

142C.15 Anatomical gift public awareness and transplantation fund established uses of fund.

1. An anatomical gift public awareness and transplantation fund is created as a separate fund in the state treasury under the control of the Iowa department of public health. The fund shall consist of moneys remitted by the county treasurer of a county or by the department of transportation which were collected through the payment of a contribution made by an applicant for registration of a motor vehicle pursuant to section 321.44A and any other contributions to the fund.

2. The moneys collected under this section and deposited in the fund are appropriated to the Iowa department of public health for the purposes specified in this section. Moneys in the fund shall not be subject to appropriation or expenditure for any other purpose.

3. The treasurer of state shall act as custodian of the fund and shall disburse amounts contained in the fund as directed by the department. The treasurer of state may invest the moneys deposited in the fund. The income from any investment shall be credited to and deposited in the fund. Notwithstanding section 8.33, moneys in the fund are not subject to reversion to the general fund of the state. The fund shall be administered by the department which shall make expenditures from the fund consistent with the purposes of this section.

4. The Iowa department of public health may use not more than five percent of the moneys in the fund for administrative costs. The remaining moneys in the fund may be expended through grants to any of the following persons, subject to the following conditions:

a. Not more than twenty percent of the moneys in the fund annually may be expended in the form of grants to state agencies or to nonprofit legal entities with an interest in anatomical gift public awareness and transplantation to conduct public awareness projects. Moneys remaining that were not requested and awarded for public awareness projects may be used for research, or to develop and support a statewide organ and tissue donor registry. Grants shall be made based upon the submission of a grant application by an agency or entity to conduct a public awareness project or to research, develop, and support a statewide organ and tissue donor registry.

b. Not more than thirty percent of the moneys in the fund annually may be expended in the form of grants to hospitals for reimbursement for costs directly related to the development of in-hospital anatomical gift public awareness projects, anatomical gift referral protocols, and associated administrative expenses. As a condition of receiving a grant, a hospital shall demonstrate, through documentation, that the hospital, during the previous calendar year, properly complied with in-hospital anatomical gift request protocols for all deaths occurring in the hospital at a percentage rate which places the hospital in the upper fifty percent of all protocol compliance rates for hospitals submitting documentation for cost reimbursement under this section.

c. Not more than fifty percent of the moneys in the fund annually may be expended in the form of grants to transplant recipients, transplant candidates, living organ donors, or to legal representatives on behalf of transplant recipients, transplant candidates, or living organ donors. Transplant recipients, transplant candidates, living organ donors, or the legal representatives of transplant recipients, transplant candidates, or living organ donors shall submit grant applications with supporting documentation provided by a hospital that performs transplants, verifying that the person by or for whom the application is submitted requires a transplant or is a living organ donor and specifying the amount of the costs associated with the following, if funds are not available from any other third-party payor:

(1) The costs of the organ transplantation procedure.

(2) The costs of post-transplantation drug or other therapy.

(3) Other transplantation costs including but not limited to food, lodging, and transportation.
