
BUDGET UNIT BRIEF – FY 2022

Fiscal Services Division

July 1, 2021

Ground Floor, State Capitol Building

Des Moines, Iowa 50319

515.281.3566

Virtual Storage Archival System—TRF

Purpose and History

This appropriation provides funding to the Department of Public Safety (DPS) to upgrade virtual storage and power supplies. The Department's servers support computer operations across the Department and some applications maintained by the Department of Transportation (DOT) and the Iowa Law Enforcement Academy (ILEA). Functions hosted on these servers include access to documents stored on network drives, local access to the DPS network, secured remote access to the DPS network, antivirus and endpoint protection, mobile device (smartphone) management, system encryption, print services, and mobile access to criminal justice information by all law enforcement officers and agencies statewide. Funding will also replace the uninterruptible power supplies (backup power) at the DPS disaster recovery site.

Funding

The General Assembly appropriated \$290,000 from the Technology Reinvestment Fund for FY 2020.
