DCI Lab Evidence Management System — TRF

Purpose and History

This is a Technology Reinvestment Fund appropriation to the Department of Public Safety (DPS) to purchase a Digital Evidence Management System. This software will analyze digital images of evidence that are submitted to the crime laboratory. The software includes controls that will provide greater file security and ensure that images have not been altered. These tools can be used on latent prints, footwear, documents, impression evidence, and other forensic evidence.

Funding

The General Assembly appropriated \$80,000 in FY 2020.
