# Child Care Assistance

## Purpose and History

The Child Care Assistance (CCA) Program is administered by the Department of Human Services (DHS) and was established in 2000. The CCA Program subsidizes child care costs for low-income families with working parents, parents gaining work skills, parents going to school, and parents unable to care for children for a limited time due to physical or mental illness. Child care is also subsidized for children in need of protective services to prevent or alleviate child abuse or neglect, and for children in foster care home settings. In addition to paying for child care, State and federal funds support the regulation of child care providers and quality improvement activities of providers.

## Populations Served

The CCA Program provides financial assistance for the care of children under the age of 13 in the following circumstances:

- Families in which the parent or parents are working at least 28 hours per week, are in school full-time, or are working part-time and going to school part-time for a total of 28 hours per week in the aggregate, with incomes at or below 145.0% of the federal poverty level (FPL).
- Families that are eligible as outlined above, but at the end of their 12-month eligibility segment are above 145.0% of the FPL but below 85.0% of the State Median Income (SMI). These families are eligible for an additional 12 months of services through CCA Plus.
- Families with children with special needs when parents are working or in school full-time, with incomes up to 200.0% of the FPL. Children with special needs are eligible for the Program through age 18.
- Families receiving Family Investment Program (FIP) benefits and participating in PROMISE JOBS. Income requirements are waived under this scenario.
- Protective Child Care Assistance is also available to children who have been abused or neglected. Income requirements are waived under this scenario.

In FY 2017, a total of 36,304 children were served by the CCA Program. The average number of children participating in the Program per month was 22,689, an increase of 7.0% over FY 2016. The average child in the CCA Program is under age five, has one sibling, and lives in a one-parent family. The parent is working, and the family income is below 100.0% of the FPL and therefore does not require a copy for services.

## Activities

The CCA Program allows parents and legal guardians to choose their child care provider as long as the provider accepts CCA payment. As of FY 2017, paid providers include:

- 1,512 licensed child care centers.
- 2,898 registered child care development homes. In-home providers caring for six or more children at one time must register.
- 733 legally operating, non-registered providers that receive payment under the CCA Program. Providers caring for five or fewer children at one time are not required to be regulated.

Activities other than child care assistance that are funded by this appropriation include:

- Five Child Care Resource and Referral (CCR&R) contracts and 17 wrap-around child care contracts, which assist families in selecting quality child care and provide referrals to child care facilities. Services under these contracts also assist child care providers in adopting developmentally appropriate programs and sustainable business practices via consultation, training, and other resources.
- The Quality Rating System (QRS), which identifies and promotes quality in child care services. The QRS is voluntary for providers and comes with technical assistance as providers take steps to improve care. Participating providers may also receive bonus pay as their ratings increase or are maintained.
- Regulation of providers and payment, which is carried out by the DHS Field Operations and General Administration staff.
- Eligibility for CCA and Protective Child Care assistance activities as determined by the DHS Field Operations. Eligibility for PROMISE JOBS child care is determined by the Iowa Workforce Development.

## Funding – State General Fund

The CCA Program General Fund appropriation is included in the Health and Human Services Appropriations Act. The exact amount of General Fund need fluctuates year-to-year, depending upon the ability to use federal funds to supplant General Fund dollars.

Staff members at the Department of Management, the DHS, and the Legislative Services Agency meet regularly to project child care expenditures for current and future fiscal years and provide funding recommendations to the General Assembly, as required by Iowa Code section 234.47. Child care assistance is not an entitlement, and a waiting list or other measures may be used if funding does not meet demand. Total funds appropriated from all sources and carried forward equal \$138.0 million for estimated FY 2018.

## Funding – Other Resources

Iowa's CCA Program is also supported by federal funds through the Child Care Development Fund (CCDF), which is administered by the federal Office of Child Care and includes the Child Care Development Block Grant (CCDBG).

Additionally, Temporary Assistance for Needy Families (TANF) funding can be used as long as maintenance of effort requirements are met.
