These funds support grant awards to local entities for water trail enhancements and dam mitigation grants to dam owners, including State and local government entities and private owners, to improve low head dam safety. State-designated water trails are designed to provide the following four basic types, or levels, of recreational experiences: gateway, recreational, challenge, and wilderness. Each segment of a water trail is assigned one of these experience ratings to reflect a range of conditions available to the user in the designated waterways.

While there are different types of low head dams, they generally consist of a riverwide dam that is normally overtopped by the entire river's flow. Flood gates may or may not be present to reduce

upstream flooding effects. The height of these dams is less than 30 feet. Low head dams were originally constructed throughout Iowa to power gristmills and sawmills. Some dams were later used for hydroelectric generation. Low head dams can be extremely dangerous due to the powerful recirculating hydraulics that are generated. Since FY 2009, appropriations for the Water Trails and Low Head Dam Public Hazard Program from the RIIF have totaled \$13,800,000. 9 7 11. BOARD OF REGENTS

9 8 a. For allocation by the state board of regents to the  
9 9 state university of Iowa, Iowa state university of science  
9 10 and technology, and the university of northern Iowa to

Rebuild Iowa Infrastructure Fund appropriation to the Board of Regents to replace tuition used to pay debt service on academic revenue bonds.

9 11 reimburse the institutions for deficiencies in the operating  
 9 12 funds resulting from the pledging of tuition, student fees  
 9 13 and charges, and institutional income to finance the cost of

 9 15 and utility services at the institutions:  
 9 16 FY 2024-2025:  
 9 17 ..... \$ 26,500,000

DETAIL: This appropriation replaces student tuition and fees that pay the debt service on academic revenue bonds authorized in prior fiscal years. Iowa Code chapter [262A](#), enacted in the 1969 Legislative Session, authorizes the sale of academic revenue bonds by the Board of Regents.

The first academic revenue bonds were issued in 1970 and provided the primary source of funds for construction of academic facilities at the universities for several decades. Academic revenue bonds are secured by student tuition and fees. The appropriation is not mandatory by statute, but the Board of Regents indicated that without a tuition replacement appropriation, an aggregate tuition increase of 3.40% across the universities will be required to pay the debt service.

Funding for tuition replacement has been provided for many decades. Until FY 2002, the appropriation was made solely from the General Fund. After FY 2002, portions were funded from the General Fund and from infrastructure-related funds such as the RIIF and the Restricted Capitals Fund. From FY 2006 to FY 2008, funding for this appropriation was divided between the General Fund and the RIIF. Since FY 2009, the entire appropriation has been funded from the RIIF. The exception to this is FY 2018, in which appropriations were made from both the RIIF and the State Bond Repayment Fund.

The tuition replacement appropriation provides most of the annual debt service on the academic revenue bonds, but a portion of the debt service is paid from annual reductions in the Debt Service Reserve Fund.

9 18 b. For the renovation and construction of an industrial

In [Senate File 577](#) (FY 2024 Infrastructure Appropriations Act), the Board of Regents was permitted to redirect a portion of its FY 2022 and FY 2023 appropriation for the Industrial Technology Center for the purpose of emergency steam tunnel repairs at UNI. This appropriation for FY 2025 is to recover the costs of those repairs that were redirected from previously appropriated moneys. This project will expand the existing facility by 48,000 square feet. The current facility was constructed in 1974 and has \$10,000,000 in

10 11 FY 2024-2025:  
10 12 ..... \$ 1,900,000

Rebuild Iowa Infrastructure Fund appropriation to the DOT for infrastructure improvements at commercial service airports.

DETAIL: Since FY 2012, appropriations have been made from the RIIF for improvements at commercial service airports. Since FY 2022, \$1,900,000 has been appropriated annually from the RIIF. There are eight commercial service airports in the State, located in Burlington, Cedar Rapids, Des Moines, Dubuque, Fort Dodge, Mason City, Sioux City, and Waterloo.

The funds are distributed through a 50/40/10 formula. For this

appropriation, \$950,000 will be allocated equally among each of the commercial service airports, \$760,000 will be allocated based on the percentage of enplaned passengers during the previous fiscal year, and \$190,000 will be allocated based on the proportion of air cargo tonnage at each airport during the previous fiscal year. Airports submit applications to the DOT Office of Aviation for specific projects that are considered for approval by the Transportation Commission. No local match is required. Projects must meet the definition of vertical infrastructure.

In FY 2024, there was an additional \$10,000,000 appropriated from the RIIF for commercial service airport terminal improvements. Commercial airports were required to provide a 90.00% match for grants and could not utilize federal funds to provide the match.

Since FY 2022, \$1,000,000 has been appropriated annually from the RIIF for infrastructure improvements at general aviation airports.

General aviation airport vertical infrastructure projects may receive up to 85.00% of the total project costs but require a minimum level of \$5,000 in local match to be considered. Projects must meet the definition of vertical infrastructure. Eligible airports apply to the DOT Office of Aviation. Projects receive final approval from the Transportation Commission.
