257.10 District cost per pupil district cost.

1. *Regular program district cost per pupil for 1991-1992.* For the budget year beginning July 1, 1991, in order to determine the regular program district cost per pupil for a district, the department of management shall divide the product of the regular program district cost per pupil of the district for the base year, as regular program district cost per pupil would have been calculated under section 442.9, Code 1989, multiplied by its budget enrollment for the base year as budget enrollment would have been calculated under section 442.4, Code 1989, plus the amount added to district cost pursuant to section 442.21, Code 1989, for each school district, by the budget enrollment of the school district for the budget year beginning July 1, 1990, calculated under section 257.6, subsection 4, as if section 257.6, subsection 4, had been in effect for that budget year. The regular program district cost per pupil for the budget year beginning July 1, 1991, is the amount calculated by the department of management under this subsection plus the allowable growth amount calculated for regular program state cost per pupil, except that if the regular program district cost per pupil for the budget year calculated under this subsection in any school district exceeds one hundred ten percent of the regular program state cost per pupil for the budget year, the department of management shall reduce the regular program district cost per pupil of that district for the budget year to an amount equal to one hundred ten percent of the regular program state cost per pupil for the budget year, and if the regular program district cost per pupil for the budget year calculated under this subsection in any school district is less than the regular program state cost per pupil for the budget year, the department of management shall increase the regular program district cost per pupil of that district to an amount equal to the regular program state cost per pupil for the budget year.

2. *Regular program district cost per pupil for 1992-1993 and succeeding years.*

a. For the budget year beginning July 1, 1992, and succeeding budget years, the regular program district cost per pupil for each school district for a budget year is the regular program district cost per pupil for the base year plus the regular program allowable growth for the budget year except as otherwise provided in this subsection.

b. If the regular program district cost per pupil of a school district for the budget year under paragraph *"a"* exceeds one hundred five percent of the regular program state cost per pupil for the budget year and the state percent of growth for the budget year is greater than two percent, the regular program district cost per pupil for the budget year for that district shall be reduced to one hundred five percent of the regular program state cost per pupil for the budget year. However, if the difference between the regular program district cost per pupil for the budget year and the regular program state cost per pupil for the budget year is greater than an amount equal to two percent multiplied by the regular program state cost per pupil for the base year, the regular program district cost per pupil for the budget year shall be reduced by the amount equal to two percent multiplied by the regular program state cost per pupil for the base year.

3. *Special education support services district cost per pupil for 1991-1992.* For the budget year beginning July 1, 1991, for the special education support services district cost per pupil, the department of management shall divide the approved budget of each area education agency for special education support services for that year approved by the state board of education, under section 273.3, subsection 12, by the total of the weighted enrollment for special education support services in the area for that budget year.

The special education support services district cost per pupil for each school district in an area for the budget year is the amount calculated by the department of management under this subsection.

4. *Special education support services district cost per pupil for 1992-1993 and succeeding years.* For the budget year beginning July 1, 1992, and succeeding budget years, the special education support services district cost per pupil for the budget year is the special education support services district cost per pupil for the base year plus the special education support services allowable growth for the budget year.

Notwithstanding the special education support services district cost per pupil for the budget year beginning July 1, 1991, calculated under subsection 3, for area education agencies that have fewer than three and five-tenths public school pupils per square mile, the special education support services district cost per pupil for the budget year beginning July 1, 1991, is one hundred forty-seven dollars.

5. *Combined district cost per pupil.* The combined district cost per pupil for a school district is the sum of the regular program district cost per pupil and the special education support services district cost per pupil. Combined district cost per pupil does not include modified allowable growth added for school districts that have a negative balance of funds raised for special education instruction programs, modified allowable growth granted by the school budget review committee for a single school year, or modified allowable growth added for programs for dropout prevention.

6. *Regular program district cost.* Regular program district cost for a school district for a budget year is equal to the regular program district cost per pupil for the budget year multiplied by the budget enrollment for the budget year.

7. *Special education support services district cost.* Special education support services district cost for a school district for a budget year is equal to the special education support services district cost per pupil for the budget year multiplied by the special education support services weighted enrollment for the district for the budget year. If the special education support services district cost for a school district for a budget year is less than the special education support services district cost for that district for the base year, the department of management shall adjust the special education support services district cost for that district for the budget year to equal the special education support services district cost for the base year.

8. *Combined district cost.* Combined district cost is the sum of the regular program district cost per pupil multiplied by the weighted enrollment and the special education support services district cost, plus the additional district cost allocated to the district to fund media services and educational services provided through the area education agency.

A school district may increase its combined district cost for the budget year to the extent that an excess tax levy is authorized by the school budget review committee.
