

28E.23 Budget.

The public safety commission, on or before January 10 of each year, shall make an estimate of the total amount of revenue deemed necessary for operation of the district and, in conjunction with the county board of supervisors and city councils in the district, determine the amounts which will be contributed by the county and by each city in the district from its general fund which are based upon an average of revenues raised for law enforcement purposes in the county or city for the three previous years.

One of the following methods shall be used by the public safety commission for computing the amount of revenue deemed necessary for the operation of the district:

1. The per capita cost shall be computed by dividing the amount of revenue deemed necessary for the operation of the district by the total population of the district and by computing separate amounts for the public safety fund as follows:

a. The funds to be contributed by each city in the district shall be computed by multiplying the per capita cost by the population residing in each city of the district.

b. The funds to be contributed by the unincorporated area of the district shall be computed by multiplying the per capita cost by the population residing in the unincorporated area of the district.

2. The percent of service received by the unincorporated area and by each city in the district shall be computed and the percent of service received by each shall be multiplied by the amount of revenue deemed necessary for the operation of the district.
