Water Quality Initiative

Purpose and History

The Nutrient Reduction Strategy report was introduced in November 2012 as a collaborative effort by the Department of Agriculture and Land Stewardship (DALs), the Department of Natural Resources (DNR), and Iowa State University (ISU) to assess and reduce nutrients that flow into Iowa waters. The Water Quality Initiative Program was created in SF 435 (FY 2014 Agriculture and Natural Resources Appropriations Act) with the goal to provide funding for watershed practices in high-priority watersheds as designated by the Water Resources Coordinating Council (WRCC). The Program is administered by the DALs. The Act also created the Iowa State University (ISU) Nutrient Research Center in Ames.

Funding

The following table summarizes the appropriations to the Water Quality Initiative:
