Community College Salary Supplement

Purpose

The annual Community College Salary Increase appropriation provides supplemental funding for faculty salaries at the 15 community colleges.

Funding and Allocation Formula

The appropriation was first funded for FY 2008 at \$2.0 million. The appropriation gradually decreased and has remained at \$500,000 since FY 2012. The Department of Education allocates the annual appropriation between the colleges based on each college's share of the number of community college faculty statewide. Part-time faculty members are included on a prorated basis.

Impact on General Aid Allocation

Each college's allocation of the Salary Increase appropriation is a factor in determining its share of the following year's General Aid appropriation. The formula used to allocate the General Aid appropriation begins with a base amount that includes both the General Aid and the Salary Increase appropriations from the previous year.
