## Retailers Fuel Gallons Annual Report - 2020

Each fuel retail dealer in lowa is required to file a detailed report of the gallons of fuel they have sold during each calendar year for each retail location. This report is not a method of collecting tax (no tax is due with the report) and is designed only to gather information which will allow the State to monitor whether income tax incentives for the sales of biofuel are fulfilling their intended purpose.

Average Total Gallons of Pure Biofuel Sold by County - 2020

Average Gallons Sold

Percentages represent total biofuel percent of sales as compared to the sum of gasoline and ethanol sales.

Average Total Gallons of All Fuel Sold by County - 2020

*Other includes Adams and Taylor counties, where fewer than five retailers reported sales.
