DETAIL: Projects related to eligible water bodies as defined in Iowa Code section [456A.33C](#) (On-Stream Impoundment Restoration Fund) are eligible for grants from the Water Trails and Low Head Dam Safety grants appropriation in FY 2025.

These funds support grant awards to local entities for water trail enhancements and dam mitigation grants to dam owners, including State and local government entities and private owners, to improve low head dam safety. State-designated water trails are designed to provide the following four basic types, or levels, of recreational experiences: gateway, recreational, challenge, and wilderness. Each segment of a water trail is assigned one of these experience ratings to reflect a range of conditions available to the user in the designated waterways.

While there are different types of low head dams, they generally consist of a riverwide dam that is normally overtopped by the entire river's flow. Flood gates may or may not be present to reduce upstream flooding effects. The height of these dams is less than 30 feet. Low head dams were originally constructed throughout Iowa to power gristmills and sawmills. Some dams were later used for hydroelectric generation. Low head dams can be extremely dangerous due to the powerful recirculating hydraulics that are generated. Since FY 2009, appropriations for the Water Trails and Low Head Dam Public Hazard Program from the RIIF have totaled \$13,800,000. Recent prior year appropriations for the Water Trails and Low Head Dam Public Hazard Program include the following:

- FY 2023 and FY 2024: \$1,500,000 from the RIIF
- FY 2022: \$1,000,000 from the RIIF

requirement in Iowa Code section [8.57\(5\)\(c\)](#).

DETAIL: This appropriation will be used to fund the annual lease payment and tower maintenance. The difference will be funded from the Primary Road Fund. In FY 2024, there was an increase in the appropriation amount due to the State contractually assuming an annual maintenance agreement in the amount of \$2,315,350 beginning in FY 2024. The final payment for the lease purchase is expected to be in FY 2026, and the Motorola maintenance agreement will continue through FY 2030.

A lease-purchase contract was signed with Motorola in 2015 at an estimated cost of \$39,500,000 (\$36,400,000 in principal and \$3,100,000 in interest) over 10 years. This is the ninth payment made by the State. This is the eighth year the payment for the Communications System has been funded by the RIIF. In prior years, the payment was funded by the E911 Fund. The final payment is estimated to be in FY 2026.

9 29 b. For deposit in the public safety equipment fund created

 10 2 and technology, and the university of northern Iowa to
 10 3 reimburse the institutions for deficiencies in the operating
 10 4 funds resulting from the pledging of tuition, student fees
 10 5 and charges, and institutional income to finance the cost of
 10 6 providing academic and administrative buildings and facilities
 10 7 and utility services at the institutions:
 10 8 FY 2024-2025:

Rebuild Iowa Infrastructure Fund appropriation to the Board of Regents to replace tuition used to pay debt service on academic revenue bonds.

DETAIL: This appropriation replaces student tuition and fees that pay the debt service on academic revenue bonds authorized in prior fiscal years. Iowa Code chapter [262A](#), enacted in the 1969 Legislative Session, authorizes the sale of academic revenue bonds by the Board of Regents.

10 9 \$ 26,500,000

The first academic revenue bonds were issued in 1970 and provided the primary source of funds for construction of academic facilities at the universities for several decades. Academic revenue bonds are secured by student tuition and fees. The appropriation is not mandatory by statute, but the Board of Regents indicated that without a tuition replacement appropriation, an aggregate tuition increase of 3.40% across the universities will be required to pay the debt service.

Funding for tuition replacement has been provided for many decades. Until FY 2002, the appropriation was made solely from the General Fund. After FY 2002, portions were funded from the General Fund and from infrastructure-related funds such as the RIIF and the Restricted Capitals Fund. From FY 2006 to FY 2008, funding for this appropriation was divided between the General Fund and the RIIF. Since FY 2009, the entire appropriation has been funded from the RIIF. The exception to this is FY 2018, in which appropriations were made from both the RIIF and the State Bond Repayment Fund.

The tuition replacement appropriation provides most of the annual debt service on the academic revenue bonds, but a portion of the debt service is paid from annual reductions in the Debt Service Reserve Fund.

10 10 b. For the renovation and construction of an industrial
10 11 technology center at the university of northern Iowa:

In [Senate File 577](#) (FY 2024 Infrastructure Appropriations Act), the Board of Regents was permitted to redirect a portion of its FY 2022 and FY 2023 appropriation for the Industrial Technology Center for the purpose of emergency steam tunnel repairs at UNI. This appropriation for FY 2025 is to recover the costs of those repairs that were redirected from previously appropriated moneys. This project will expand the existing facility by 48,000 square feet. The current facility was constructed in 1974 and has \$10,000,000 in deferred maintenance. The Center will support the programs that educate students for management, manufacturing, construction, graphics, and technology education fields.
