Comment: I am writing on behalf of the SBCA the national trade association of the consumerbased satellite industry. Our industry partners currently support thousands of residential and commercial consumers throughout the state. In coming months new satellites will be deployed which will be able to deliver speeds of 100/20Mbps and greatly enhance capacity to serve consumers throughout the state. The SBCA fully supports HF 2324 which would help consumers offset the initial costs of acquiring the service. This bill would also help support local firms who sell and install satellite internet throughout the state. We would be happy to speak with any members of this committee who would like to learn more about our technology. Respectfully submitted Steven Hill President SBCA
