

Comment Report

HF 377

A bill for an act prohibiting the serving of foods containing insect proteins, lab-grown proteins imitating animal products, and genetically engineered products used to simulate animal meats at schools.

Subcommittee Members: Ingels-CH, Fry, Steckman

Date: 03/01/2023

Time: 09:30 AM

Location: House Lounge

Name: Courtney Collier

Comment: I support this bill HF 377 We should feed our students the most premium nutrient based real foods at school. The brain and body develops based on nutritional intake. We should never allow schools to feed lab grown or gmo meat like products or insect protein. Children should be protected from this type of experimentation.
