

Unbelievable - public schools, underfunded for years, are now expected to survive - and thrive? - on even less funding? Inflation is running at 6.5% and the Governor is recommending a funding increase of 2.5%??? Unbelievable - ESAs worth thousands of dollars every year are to be made available, eventually for every parent, for use in private schools (also home schooling???) - private schools, which have zero accountability, no requirements imposed by the State whatsoever while public schools are being held to ever stricter scrutiny? Unbelievable. I as a taxpayer in Iowa will be expected to pay for parents sending their children to private schools to promote beliefs that are counter to mine? Unbelievable.
