

347—72.5(89A) Hydraulic elevators. The provisions contained in American National Standard Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks, ANSI A17.1, part III, sections 300-307, are adopted by reference. On hydraulic elevator installations, a scavenger pump or other acceptable means shall be provided, designed to carry excess oil from the cylinder packing gland back to the oil storage tank of the elevator. When ANSI C1 (NFPA 70) is used in part III it shall be changed to the ANSI C1 (NFPA 70) required by rule 347—72.1(89A).
