Brucellosis Testing To Be Completed By May 31 In County

Testing of cattle in Keokuk county for brucellosis is expected to be completed by May 31.

The cooperation from herd owners has been excellent and the veterinarians have worked hard to reach this goal, stated Dr. K. R. Hook, federal veterinarian.

It is estimated over ninety percent of the cattle in the county have been completed. Only one herd remains in Clear Creek township. In the other 14 townships all but two are over 85 percent tested.

Most of the remaining cattle should be tested before the end of March to avoid conflict with field work, stated Dr. Hook. Owners that have not yet been approached to test their cattle are advised to contact their veterinarian.

Herd owners are reminded to have their calves vaccinated against brucellosis. This is a requirement on all calves born after July 4, 1963 if they are to be sold later as breeding stock.
