SENATE FILE 452
BY COMMITTEE ON HUMAN
RESOURCES

(SUCCESSOR TO SSB 1253)

(As Amended and Passed by the Senate March 18, 2015)

A BILL FOR

1 An Act relating to Medicaid program transformation and
2 oversight.
3 BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF IOWA:

1 Section 1. NEW SECTION. 249A.9 Medicaid transformation and
2 oversight commission — findings, goals, and intent.

3 1. The general assembly finds that state Medicaid program
4 initiatives have consistently advanced the goals of a health
5 care delivery system that improves population health, enhances
6 the experiences and outcomes of patients, reduces the costs of
7 care, and integrates and coordinates services and supports to
8 address social determinants of health. Existing initiatives,
9 including the healthiest state initiative, the balancing
10 incentive program, the Iowa health and wellness plan created
11 pursuant to chapter 249N, and the state innovation models
12 initiative, all reflect these consistent goals. Each of
13 these programs and initiatives has been formulated to realign
14 the health care delivery system to provide whole-person,
15 patient-centered and family-centered care while moving toward a
16 value and risk-based model of reimbursement.

17 2. Legislative involvement and oversight is essential to
18 ensure stakeholder input, consumer protection, and quality
19 assurance in the transformation of the Medicaid program. A
20 transition to a managed care system, especially one that
21 affects vulnerable populations so diverse in medical and
22 functional needs and that involves such a wide spectrum of
23 providers and state agencies, requires intentional planning
24 and attention. The state must also provide for appropriate
25 and adequate infrastructure, resources, and funding to ensure
26 accountability to and compliance with state policy, rules, and
27 contract requirements.

28 3. Given the challenges presented, a Medicaid
29 transformation and oversight commission is created to provide
30 a formal venue for guidance and oversight of and stakeholder
31 engagement in, the design, development, and implementation of
32 Medicaid program transformation.

33 4. a. The commission shall include all of the following
34 members:

35 (1) The co-chairpersons and ranking members of the

1 legislative joint appropriations subcommittee on health
2 and human services, or members of the joint appropriations
3 subcommittee designated by the respective co-chairpersons or
4 ranking members.

5 (2) The chairpersons and ranking members of the
6 human resources committees of the senate and house of
7 representatives, or members of the respective committees
8 designated by the respective chairpersons or ranking members.

9 (3) The chairpersons and ranking members of the
10 appropriations committees of the senate and house of
11 representatives, or members of the respective committees
12 designated by the respective chairpersons or ranking members.

13 *b.* The members of the commission shall receive a per diem as
14 provided in section 2.10.

15 *c.* The commission shall meet at least quarterly, but may
16 meet as often as necessary. The commission may use sources of
17 information deemed appropriate, and the department of human
18 services and other agencies of state government shall provide
19 information to the commission as requested. The legislative
20 services agency shall provide staff support to the commission.

21 *d.* The commission shall select co-chairpersons, one
22 representing the senate and one representing the house of
23 representatives, annually, from its membership. A majority of
24 the members of the commission shall constitute a quorum.

25 *e.* The commission may contract for the services of persons
26 who are qualified by education, expertise, or experience to
27 advise, consult with, or otherwise assist the commission in the
28 performance of its duties. The commission may specifically
29 enlist the assistance of entities such as the university of
30 Iowa public policy center to provide ongoing evaluation of the
31 Medicaid program and to make evidence-based recommendations to
32 improve the program.

33 5. The commission shall do all of the following:

34 *a.* Provide overall long-term and real-time guidance for the
35 Medicaid program including but not limited to:

1 (1) Developing a strategic plan to provide a predictable
2 guide for transformation prior to any transition. The
3 strategic plan shall address health care delivery and payment
4 reforms that reflect a holistic, integrated, patient-centered
5 and family-centered, primary care-focused, value-based model
6 and extend beyond a medical model to address the social
7 determinants of health.

8 (2) Reviewing, recommending, and approving the design,
9 development, and implementation of all initiatives under the
10 Medicaid program, and making additional recommendations for
11 Medicaid program reform.

12 (3) Monitoring progress in obtaining federal approval of
13 proposals such as those relating to benefit design, service
14 delivery, payment reform, and quality and cost containment
15 measures.

16 (4) Reviewing other states' models of health care delivery
17 and payment reform and specifically those related to Medicaid
18 managed care to determine best practices and inform future
19 state Medicaid program initiatives.

20 (5) Ensuring that at each stage of transformation, existing
21 models, provider networks, reimbursement methodologies,
22 and performance and quality metrics are integrated into the
23 subsequent stage to provide consistency and reliability.

24 (6) Ensuring that the state has a clearly articulated
25 vision for the Medicaid program, which is reflected in contract
26 expectations, oversight, incentives, and penalties under the
27 program.

28 (7) Assessing state agencies including those involved
29 in the Medicaid program, child welfare, aging and disability
30 services, and public health to articulate clear roles and
31 responsibilities and to promote state program interoperability.

32 (a) The commission shall review and make recommendations
33 regarding potential integration of various service delivery
34 systems including public health, aging and disability services
35 agencies, and mental health and disability services regions to

1 more efficiently and effectively address consumer needs.

2 (b) The commission shall ensure that state agencies provide
3 leadership and have the appropriate organizational structures,
4 adequate resources and funding, and qualified staff with
5 specialized skills, training, and expertise to provide the
6 level of expertise and scrutiny required to administer and
7 oversee the various transformation initiatives, including those
8 related to Medicaid managed care.

9 (8) Ensuring that state Medicaid managed care initiatives
10 comply with the guidance to states using 1115 demonstrations
11 or 1915(b) waivers for managed long-term services and supports
12 programs published by the centers for Medicare and Medicaid
13 services of the United States department of health and human
14 services on May 20, 2013, including those relating to adequate
15 planning, stakeholder engagement, enhanced provision of home
16 and community-based services, alignment of structures and
17 goals, support for beneficiaries, a person-centered process, a
18 comprehensive, integrated service package, qualified providers,
19 consumer protections, and quality.

20 (9) Reviewing the performance under and outcomes of
21 contracts including but not limited to those between the
22 state and the Iowa Medicaid enterprise and managed care
23 organizations, to determine compliance.

24 (10) Ensuring that the various Medicaid populations are
25 managed at all times within funding limitations and contract
26 terms. The commission shall also monitor service delivery
27 and utilization to ensure the responsibility for provision of
28 services to Medicaid consumers is not shifted to non-Medicaid
29 covered services solely to attain savings, and that such
30 responsibility is not shifted to mental health and disability
31 services regions, local public health agencies, aging and
32 disability resource centers, or other entities unless agreement
33 to provide, and provision for adequate compensation for, such
34 services is agreed to in advance.

35 b. Address provider access and workforce adequacy issues.

1 (1) As the state moves toward integration of long-term
2 services and supports into Medicaid managed care, the
3 commission shall provide for a comprehensive review of
4 long-term services and supports and make recommendations to
5 create a sustainable, person-centered approach that increases
6 health and life outcomes, supports maximum independence,
7 addresses medical and social needs in a coordinated, integrated
8 manner, and provides for sufficient resources including a
9 stable, well-qualified workforce.

10 (a) The commission shall provide a forum for open and
11 constructive dialogue among stakeholders representing
12 individuals involved in the delivery and financing of long-term
13 services and supports, address the cost and financing of
14 long-term services and supports, the coordination of services
15 among providers, and the availability of and access to a
16 well-qualified workforce, and consider methods to educate
17 consumers and enhance engagement of consumers in the broader
18 conversation regarding long-term services and supports.

19 (b) The commission shall recommend ways to eliminate Iowa's
20 institutional bias and come into full compliance with the
21 Olmstead decision.

22 (2) The commission shall review current and projected
23 overall health care workforce availability to determine
24 the most efficient utilization of the roles, functions,
25 responsibilities, activities, and decision-making capacity
26 of health care professionals and make recommendations for
27 improvement. The commission shall encourage the use of
28 alternative modes of health care delivery, as appropriate.

29 (3) The commission shall ensure the linguistic and cultural
30 competency of providers and other program facilitators.

31 c. Provide for consumer engagement, address consumer
32 choice and satisfaction, and provide for consumer appeal and
33 grievance procedures. The commission shall provide for input
34 from the medical assistance advisory council created in section
35 249A.4B, the mental health and disabilities services commission

1 created in section 225C.5, the commission on aging created
2 in section 231.11, the medical home system advisory council
3 created in section 135.159, the bureau of substance abuse of
4 the department of public health, and other appropriate entities
5 to provide advice to the commission.

6 *d.* Review and make recommendations regarding reimbursement
7 and rate setting to ensure adequate compensation for all
8 providers of services and supports to the Medicaid population,
9 an adequate provider network, and timely access to services for
10 consumers.

11 *e.* Define the desired outcomes and the metrics by which
12 improvement is determined. The commission shall provide for
13 consistency and uniformity of metrics and required outcomes
14 across payors and providers to the greatest extent possible.

15 *f.* Ensure that care coordination and case management are
16 provided in a patient-centered and family-centered manner that
17 requires a knowledge of community supports, a reasonable ratio
18 of care coordinators to consumers, standards for frequency
19 of contact with the consumer, and specific and adequate
20 reimbursement.

21 *g.* Address health information technology and data collection
22 and sharing.

23 6. The commission shall submit a report of its findings and
24 recommendations to the governor and the general assembly by
25 December 15, annually.

26 Sec. 2. TRANSITION TO MEDICAID MANAGED CARE —
27 DIRECTIVES. In order to ensure a seamless transition of
28 Medicaid consumers to Medicaid managed care, all of the
29 following circumstances shall be considered and all of the
30 following conditions shall be met in any design, development,
31 or implementation of Medicaid managed care on or after March
32 1, 2015:

33 1. The state shall engage in a thoughtful and deliberative
34 planning process that permits sufficient time to outline a
35 clear vision for the program, solicit and consider stakeholder

1 input, educate program consumers, assess readiness, and
2 develop safeguards and oversight mechanisms to ensure a
3 smooth transition to and effective ongoing implementation of
4 Medicaid managed care. The movement to Medicaid managed care
5 shall retain an emphasis on choice, consumer-driven care and
6 services, a community-based infrastructure, and promotion of
7 community-based alternatives. The state shall demonstrate
8 that systems and processes are in place between state agencies
9 to support the populations enrolled in Medicaid managed care
10 such as elders, persons with physical, intellectual, and
11 developmental disabilities, persons with chronic diseases, and
12 persons with mental health or substance abuse issues.

13 2. a. Prior to the transition to Medicaid managed care
14 of any population, and especially to ensure that high-risk
15 populations are provided continuity of care and do not
16 experience gaps in coverage or access to care issues, the state
17 shall perform a readiness assessment to ensure that managed
18 care organizations are in compliance with network adequacy
19 requirements, that necessary consumer and provider outreach and
20 education have been conducted, and that programmatic gaps have
21 been identified prior to the system becoming operational.

22 b. A managed care contract shall include a provision
23 for continuity and coordination of care for a consumer
24 transitioning to managed care, including maintaining existing
25 provider-consumer relationships and honoring the amount and
26 duration of an individual's authorized services under an
27 existing service plan, based on individual assessment and
28 needs. In the initial transition of a consumer to Medicaid
29 managed care, to ensure the least amount of disruption, managed
30 care organizations shall provide, at a minimum, a one-year
31 transition of care period for all provider types, regardless of
32 network status with an individual managed care organization.

33 c. The state shall ensure that if an individual is
34 auto-enrolled in a Medicaid managed care plan, there are
35 sufficient staff and safeguards available to ensure continuity

1 of care for the consumer through the consumer's existing
2 provider.

3 d. The state shall administratively credential existing
4 Medicaid providers, rather than requiring such providers to
5 complete a new credentialing process, to ensure a seamless
6 transition to the new managed care system and to ensure rapid
7 development of managed care provider networks.

8 e. The state shall retain external managed care experts to
9 guide patient transition, system implementation, and oversight
10 until the department of human services is able to develop the
11 internal staff capacity to confidently operate independently.
12 Such external experts shall be selected through a request for
13 proposals process and the state shall ensure that such experts
14 are not affiliated with any of the managed care organizations
15 selected in order to provide unbiased and appropriate guidance.

16 3. a. The state shall establish a specific, enforceable
17 process to ensure managed care organizations grievance and
18 appeals procedures are fully accessible to patients regardless
19 of physical, intellectual, behavioral, or sensory barriers.

20 b. Managed care contracts shall include consumer
21 protections including a statement of consumer rights and
22 responsibilities, a critical incident management system with
23 safeguards to prevent abuse, neglect, and exploitation, and
24 fair hearing protections including the continuation of services
25 during an appeal.

26 c. Managed care organization contracts shall include
27 provider appeals and grievance procedures that in part allow a
28 provider to file a grievance independently but on behalf of a
29 member and to appeal claims denials which, if determined to be
30 based on claims for medically necessary services whether or not
31 denied on an administrative basis, shall receive appropriate
32 payment.

33 4. a. The state shall utilize public forums, public input
34 surveys, stakeholder workgroup sessions, and other effective
35 formal channels for stakeholder engagement in the design,

1 development, and implementation of Medicaid managed care. The
2 state shall utilize the medical assistance advisory council
3 established pursuant to section 249A.4B to provide a forum
4 for oversight of managed care organizations and to advise the
5 department regarding systemic issues identified by the council.

6 b. Managed care organizations shall maintain stakeholder
7 panels comprised of an equal number of consumers and providers
8 in place at least thirty days prior to the transition to
9 managed care. Managed care organizations shall provide for
10 separate provider-specific panels to address detailed payment
11 and claims issues and grievance and appeals processes.

12 5. a. The state shall ensure that a managed care
13 organization develops and maintains a network of qualified
14 providers who meet state licensing, credentialing, and
15 certification requirements, as applicable, which network shall
16 be sufficient to provide adequate access to all services
17 covered and for all populations served under the managed
18 care contract. The state shall ensure that managed care
19 organizations incorporate existing and traditional providers,
20 including but not limited to those that comprise the Iowa
21 collaborative safety net provider network created in section
22 135.153.

23 b. Managed care contracts shall specify provider network
24 composition and access requirements including continuity of
25 care provisions and rules for when and how consumers may
26 access out-of-network providers. Managed care plans shall
27 provide reports of compliance with state network composition
28 and access standards and the state shall include financial
29 incentives and disincentives as management tools to support
30 state expectations.

31 c. The state shall review managed care organization
32 credentialing processes to provide consistency across such
33 organizations and to simplify and streamline the credentialing
34 process.

35 d. The state shall ensure that management of care for the

1 population served is consumer-driven, patient-focused and
2 family-focused, and provider-led.

3 e. The state shall monitor and enforce access standards
4 to ensure that consumers are able to access appropriate care
5 as close to their own homes as possible. The state shall
6 review, at least quarterly, network adequacy compliance and
7 require the dissemination of easily accessible and updated
8 provider directories to ensure consumers have the most accurate
9 information possible regarding the number, location, type, and
10 current capacity of providers contracted with the individual
11 managed care organization. The state shall ensure that
12 noncompliance results in swift corrective action.

13 f. The state shall require managed care plans to remove
14 administrative barriers to, provide reimbursement for,
15 and utilize emerging technologies such as e-health, mobile
16 technologies, and telehealth in health care delivery in a
17 medically appropriate manner in order to expand access to
18 services and extend the reach of approved provider networks
19 into rural and underserved areas of the state. Reimbursement
20 for telehealth shall be at the same rate as in-person services.
21 Reimbursable activities shall include store and forward
22 consultation, direct-to-consumer virtual care, telehealth
23 visits, home-based monitoring, and telehealth monitoring in
24 long-term care facilities.

25 g. The state shall require managed care organizations to
26 implement tools and strategies that support community-level
27 system integration between acute care, long-term services and
28 supports, and community-level agencies and organizations to
29 further population health goals.

30 6. a. (1) The state shall require managed care
31 organizations to align economic incentives, delivery system
32 reform, and performance and outcome metrics with those of the
33 state innovation models initiative and Medicaid accountable
34 care organizations.

35 (2) The state shall develop a common, uniform set of

1 process, quality, and consumer satisfaction measures across
2 all Medicaid payors and providers that align with those
3 developed through the state innovation models initiative and
4 shall ensure that such measures are expanded and adjusted to
5 address additional populations and to meet population health
6 objectives. Measures considered may include but are not
7 limited to those related to consumer education, transition
8 to and ongoing implementation of managed care, monitoring
9 and oversight, consumer input and rights, network adequacy
10 and access to care including services that address social
11 determinants of health, the provision of preventive services
12 and supports as well as those that address chronic conditions,
13 continuity of care, long-term services and supports, provider
14 standards, and evaluation and quality measures.

15 (3) Any quality data collected regarding provider
16 performance shall be shared with providers for review and input
17 prior to dissemination to consumers.

18 b. Managed care contracts shall include long-term
19 performance goals that reward success in achieving population
20 health goals such as improved community health metrics.

21 c. The state shall require consistency and uniformity
22 of processes and forms across all managed care organizations
23 including but not limited to the use of uniform cost and
24 quality reporting and uniform prior authorization procedures.

25 7. The state shall require the provision of independent
26 choice counseling, education, functional assessment, and
27 enrollment and disenrollment from a managed care plan by
28 an entity free of conflicts. The state shall ensure an
29 independent advocate is available to assist consumers in
30 navigating the Medicaid managed care landscape, understanding
31 their rights, responsibilities, choices, and opportunities,
32 and helping to resolve any problems that arise between the
33 consumer and the managed care organization. Unless such an
34 entity declines, as applicable to the population of consumers,
35 the aging and disability resource centers and the long-term

1 care ombudsman shall provide such independent, conflict-free
2 services in an accessible, ongoing, and consumer-friendly
3 manner, and shall be provided adequate resources and
4 reimbursement for provision of such services.

5 7A. a. Managed care organization contracts shall
6 specifically and appropriately address the unique needs of
7 children and children's health care delivery.

8 b. Managed care organizations shall maintain child health
9 panels that include representatives of child health, welfare,
10 policy, and advocacy organizations in the state that address
11 child health and child well-being.

12 c. Managed care organization contracts that apply
13 to children's health care delivery shall address early
14 intervention and prevention strategies, the provision of a
15 child health delivery infrastructure for children with special
16 health care needs, utilization of current standards and
17 guidelines for children's health care and pediatric-specific
18 screening and assessment tools, the inclusion of pediatric
19 specialty providers in the provider network, and the
20 utilization of health homes for children and youth with special
21 health care needs including intensive care coordination and
22 family support and access to a professional family-to-family
23 support system.

24 d. Managed care organization contracts that apply
25 to children's health care delivery shall utilize
26 pediatric-specific quality measures, which shall align
27 with existing pediatric-specific measures as determined in
28 consultation with the child health panel.

29 e. Managed care contracts shall provide special incentives
30 for innovative and evidence-based preventive, behavioral, and
31 developmental health care and mental health care for children's
32 programs that improve the life course trajectory of those
33 children.

34 8. The state shall require the use of uniform, standardized,
35 person-centered, and state-approved instruments to assess

1 a consumer's physical, psychosocial, and functional needs,
2 including current health status and treatment needs; social,
3 employment, and transportation needs and preferences;
4 personal goals; consumer and caregiver preferences for
5 care; back-up plans for situations in which caregivers are
6 unavailable; and informal networks. The state shall approve a
7 pediatric-specific assessment tool and quality measures. The
8 information collected from these assessments shall be used to
9 identify health risks and social determinants of health that
10 impact health outcomes. Plans and providers shall use this
11 data in care coordination and interventions to improve patient
12 outcomes and to drive program designs that improve the health
13 of the population. Managed care organizations shall share
14 aggregate assessment data for consumers with providers on a
15 routine basis.

16 9. The state shall establish guidelines for care
17 coordination across managed care organizations to ease
18 administrative burdens on providers and help streamline
19 access to care. Coordinated care shall utilize the team-based
20 care model by connecting a Medicaid consumer to a single
21 primary care provider. The state shall require managed care
22 organizations to coordinate data sharing and analytics across
23 providers to facilitate care coordination. A managed care plan
24 shall provide for identification of the care coordination needs
25 of a consumer including those related to social determinants of
26 health, ensure that appropriate care coordination services are
27 provided, and provide evidence on an ongoing basis to the state
28 that both have occurred.

29 10. The state shall review and integrate the activities of
30 state agencies, including those agencies with public health,
31 child welfare, aging and disabilities, and ombudsman functions
32 to ensure there is no wrong door for consumers to access the
33 medical and social services and supports necessary for improved
34 outcomes. Managed care organizations shall provide or ensure
35 that consumers are connected with or referred to providers

1 and services to meet social determinants of health, even if
2 provision of services is outside their provider network.
3 Managed care contracts shall encourage partnerships between
4 managed care organizations and local public health agencies,
5 aging and disability resource centers, child welfare agencies,
6 mental health and disability services regions, and others to
7 address the holistic needs of the consumer and shall provide
8 for adequate reimbursement for such services.

9 11. a. Managed care plans shall include policies, plans,
10 and procedures to prepare consumers for transitions between
11 care settings to improve the quality of care for all consumers,
12 reduce avoidable rehospitalizations, and allow individuals to
13 live and receive services in the setting of their choice.

14 b. The state shall require managed care organizations
15 to have in place nursing facility diversion programs. The
16 state shall provide for the use of incentives in managed care
17 contracts for transition of consumers from a nursing facility
18 to home and community-based services.

19 12. The state shall ensure a sufficient and sustainable
20 state infrastructure for monitoring managed care organizations.
21 There shall be sufficient resources for the state to evaluate
22 contractually required quality reports and financial reports,
23 evaluate the impact or effectiveness of incentive programs,
24 conduct quality-focused audits, provide quality-related
25 technical assistance, validate that managed care organization
26 corrective actions have been implemented, analyze quality
27 findings and develop reports to assess quality trends and
28 to identify areas for improvement, develop, implement, and
29 evaluate performance improvement projects, solicit and analyze
30 consumer feedback, and investigate and follow up on critical
31 incident events.

32 13. a. Managed care contracts shall require that a portion
33 of the savings achieved by a managed care organization be
34 reinvested in innovations and longer-term community investments
35 to address population health, infrastructure, the healthcare

1 workforce, and improved service delivery and capacity.

2 *b.* A managed care contract shall impose a medical loss ratio
3 of at least eighty-five percent and shall include well-defined
4 criteria of what qualifies as a medical expense, and reporting
5 requirements and recoupment provisions to ensure compliance.

6 14. a. The state shall ensure that savings achieved
7 through Medicaid managed care do not come at the expense
8 of further reduction in already inadequate provider rates.
9 The state shall ensure that managed care organizations use
10 reasonable reimbursement standards for all provider types and
11 compensate providers for covered services at not less than
12 current Medicaid fee-for-service levels, as determined in
13 conjunction with actuarially sound rate setting procedures.
14 Such reimbursement shall extend for the entire duration of a
15 managed care organization's contract.

16 *b.* The state shall address rate setting and reimbursement
17 of the entire scope of services provided under the Medicaid
18 program to ensure the adequacy of the provider network and to
19 ensure that providers that contribute to the holistic health
20 of the consumer, whether inside or outside of the provider
21 network, are compensated for their services.

22 *c.* The state shall ensure that managed care organizations do
23 not arbitrarily deny coverage for medically necessary services
24 solely based on financial reasons.

25 15. a. In order to provide adequate access to care for
26 vulnerable Iowans, managed care organizations shall extend
27 nonemergency transportation services to all consumers.

28 *b.* The state shall ensure that dental coverage, if not
29 integrated into an overall managed care contract, is provided
30 and is part of the overall integrated coverage for physical,
31 behavioral, and long-term services and supports provided to a
32 Medicaid consumer.

33 *c.* The state shall ensure that the existing formulary for
34 pharmacy benefits under the Medicaid state plan is honored and
35 continued.

1 d. Managed care plans shall ensure consumers receive
2 services and supports in the amount, duration, scope, and
3 manner as identified through the applicable person-centered
4 assessment and service planning process.

5 e. The state shall ensure that for those populations
6 for whom Medicaid home and community-based services waiver
7 services have been historically provided, managed care
8 organizations address with specific plans the expansion,
9 support, reinvestment of savings in, and adequate reimbursement
10 of community-based services and supports.

11 16. a. The state shall utilize the application of
12 liquidated damages in contracts to be paid from moneys other
13 than those paid by the state to hold managed care organizations
14 accountable regarding such provisions as timely claims
15 processing and claims payment accuracy, compliance with
16 licensure and background check requirements, timely provision
17 of an approved service, continuation of benefits pending
18 appeal, timely development of a plan of care, initiation
19 of long-term services and supports, and completion of care
20 coordination contacts.

21 b. The state shall review and approve or deny approval
22 for contract amendments on an ongoing basis to provide for
23 continuous improvement in Medicaid managed care.

24 c. Medicaid managed care organization contracts shall
25 include sanctions for failure to comply with the terms of
26 a contract, including failure relating to performance or
27 deliverables including meeting of performance and outcomes
28 measures. Such sanctions may include but are not limited to
29 assessment of a penalty or assessment of liquidated damages or
30 other monetary remedies.

31 Sec. 3. EFFECTIVE UPON ENACTMENT. This Act, being deemed of
32 immediate importance, takes effect upon enactment.
