- l.* Fraudulently or inappropriately using or permitting the use of prescription blanks, obtaining or attempting to obtain prescription medications under false pretenses, or assisting others to obtain or attempt to obtain prescription medication under false pretenses.
- m.* Practicing nursing while under the influence of alcohol, marijuana, or illicit drugs or while impaired by the use of legitimately prescribed pharmacological agents or medications.
- n.* Being involved in the unauthorized manufacture or distribution of a controlled substance.
- o.* Being involved in the unauthorized possession or use of a controlled substance.
- p.* Engaging in behavior that is contradictory to professional decorum.
- q.* Failing to report suspected wrongful acts or omissions committed by a licensee of the board.
- r.* Failing to comply with an order of the board.
- s.* For an advanced registered nurse practitioner, prescribing, dispensing, administering, or distributing drugs in an unsafe manner.

*t.* For an advanced registered nurse practitioner, prescribing, dispensing, administering or distributing drugs without accurately documenting it or without assessing, evaluating, or instructing the patient or client.

*u.* For an advanced registered nurse practitioner, prescribing, dispensing, administering or distributing drugs to individuals who are not patients or are outside the licensee's specialty area.

*v.* Engaging in repeated verbal or physical conduct which interferes with another health care worker's performance or creates an intimidating, hostile, or offensive work environment.

*w.* Failing to properly safeguard or secure medications.

*x.* Failing to properly document or perform medication wastage.

**4.6(5)** For purposes of this subrule, "patient" is defined to include the patient and the patient's family or caretakers who are present with the patient while the patient is under the care of the licensee. In accordance with Iowa Code section 147.55(3), behavior (i.e., acts, knowledge, and practices) which constitutes unethical conduct or practice harmful or detrimental to the public may include, but need not be limited to, the following professional boundaries violations:

*a.* Sexual contact with a patient, regardless of patient consent.

*b.* Making lewd, suggestive, demeaning, or otherwise sexual comments to a patient, regardless of patient consent.

*c.* Initiating, or attempting to initiate, a sexual, emotional, social, or business relationship with a patient, for personal gain, regardless of patient consent.

*d.* Soliciting, borrowing, or misappropriating money or property from a patient, regardless of patient consent.

*e.* Repeatedly divulging personal information to a patient for nontherapeutic purposes, regardless of patient consent.

*f.* Engaging in a sexual, emotional, social, or business relationship with a former patient when there is a risk of exploitation or harm to the patient, regardless of patient consent.

**4.6(6)** In accordance with Iowa Code section 147.55(4), habitual intoxication or addiction to the use of drugs may include, but need not be limited to, the following:

*a.* Excessive use of alcohol which may impair a licensee's ability to practice the profession with reasonable skill and safety.

*b.* Excessive use of drugs which may impair a licensee's ability to practice the profession with reasonable skill and safety.

**4.6(7)** In accordance with Iowa Code section 147.55(5), conviction of a crime related to the profession or occupation of the licensee or conviction of any crime that would affect the licensee's ability to practice within a profession means the following:

*a.* Pleading guilty to or being convicted of a crime related to the profession of nursing, or conviction of any crime that would affect the licensee's ability to practice nursing, regardless of whether the judgment of conviction or sentence was deferred, and regardless of the jurisdiction wherein the action occurred. A copy of the record of conviction or plea of guilty shall be conclusive evidence.

*b.* Reserved.

**4.6(8)** In accordance with Iowa Code section 147.55(6), fraud in representation as to skill or ability.

**4.6(9)** In accordance with Iowa Code section 147.55(7), use of untruthful or improbable statements in advertisements.

**4.6(10)** In accordance with Iowa Code section 147.55(8), willful or repeated violations of provisions of Iowa Code chapter 147, 152, or 272C.

**4.6(11)** In accordance with Iowa Code section 147.55(9), other acts or offenses as specified by board rule, including the following:

*a.* Failing to provide written notification of a change of address to the board within 30 days of the event.

*b.* Failing to notify the board within 30 days from the date of the final decision in a disciplinary action taken by the licensing authority of another state, territory or country.

*c.* Failing to notify the board of a criminal conviction within 30 days of the action, regardless of whether the judgment of conviction or sentence was deferred, and regardless of the jurisdiction where it occurred.

*d.* Failing to submit an additional completed fingerprint packet as required and applicable fee, when a previous fingerprint submission has been determined to be unacceptable, within 30 days of a request made by board staff.

*e.* Failing to respond to the board during a board audit or submit verification of compliance with continuing education requirements or exceptions, within the time period provided.

*f.* Failing to respond to the board during a board audit or submit verification of compliance with training in child or dependent adult abuse identification and reporting or exceptions, within the time period provided.

*g.* Failing to respond to the board during a board audit or submit verification of compliance with the requirements for the supervision of fluoroscopy set forth in 655—subrule 7.2(2) or exceptions, within the time period provided.

*h.* Failing to respond to or comply with a board investigation or subpoena.

*i.* Engaging in behavior that is threatening or harassing to the board, board staff, or agents of the board.

*j.* Violating an initial agreement or contract with the Iowa nurse assistance program committee.

**4.6(12)** In accordance with Iowa Code section 147.2 or 147.10:

*a.* Engaging in the practice of nursing in Iowa prior to licensure or not pursuant to the nurse licensure compact.

*b.* Engaging in the practice of nursing in Iowa on an inactive license.

**4.6(13)** In accordance with Iowa Code section 152.10(2):

*a.* Continued practice while knowingly having an infectious or contagious disease which could be harmful to a patient's welfare, without taking precautions to meet the current standard of care.

*b.* Having a license to practice nursing as a registered nurse, licensed practical/vocational nurse or advanced registered nurse practitioner revoked or suspended or having other disciplinary action taken by a licensing authority of another state, territory, or country. A certified copy of the record or order of suspension, revocation, or disciplinary action is prima facie evidence of such fact. "Certified copy" means a complete and accurate copy of a document, as verified by the board or the agency providing that document. "Certified copy" includes an electronic version of a document provided to another agency or individual by the board, or received from another agency, so long as the electronic record is:

- (1) Obtained directly from the official Web site of the board or other agency;
- (2) Regularly updated by the board or the other agency in accordance with standard practice;
- (3) Accessible as a "read only" document;
- (4) Properly safeguarded to prevent the document from being altered; and
- (5) Certified from another agency in accordance with the laws applicable in that jurisdiction.

*c.* Having a license to practice nursing as a registered nurse, licensed practical/vocational nurse or advanced registered nurse practitioner revoked or suspended, or having other disciplinary action taken, by a licensing authority in another state which has adopted the nurse licensure compact contained in Iowa Code section 152E.1 or the advanced practice registered nurse compact contained in Iowa Code section 152E.3 and which has communicated information relating to such action pursuant to the coordinated licensure information system established by the compact. If the action taken by the licensing authority occurs in a jurisdiction which does not afford the procedural protections of Iowa Code chapter 17A, the licensee may object to the communicated information and shall be afforded the procedural protections of Iowa Code chapter 17A.

*d.* Knowingly aiding, assisting, procuring, advising, or allowing a person to unlawfully practice nursing.

*e.* Being adjudicated mentally incompetent by a court of competent jurisdiction. Such adjudication shall automatically suspend a license for the duration of the license unless the board orders otherwise.

*f.* Inability to practice nursing with reasonable skill and safety by reason of illness or as a result of a mental or physical condition.

[ARC 0084C, IAB 4/18/12, effective 5/23/12; ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—4.7(17A,147,152,272C) Sanctions.** A sanction is a disciplinary action by the board which resolves a contested case. The board may impose one or more of the following:

1. Revocation.
2. Suspension.
3. Restriction on engaging in specified procedures or acts.
4. Probation.
5. Order a physical, mental or substance abuse evaluation, alcohol or drug screening, or clinical competency evaluation.

6. Civil penalty. A fine may be imposed in accordance with Iowa Code section 272C.3(2) “e.” Assessment of a fine shall be specified in the order and may not exceed a maximum amount of \$1,000. Fines may be incurred for:

- Practicing without an active license: \$50 for each calendar month or part thereof, beginning on the date that a license enters inactive status.
  - Failing to respond to the board during a board audit or to submit verification of compliance with the continuing education requirements or exceptions: \$50 for each contact hour that is not verified.
  - Violating rule 655—4.6(17A,147,152,272C): an amount deemed appropriate.
7. Additional education, reexamination, or both.
  8. Citation and warning.
  9. Such other sanctions allowed by law as may be appropriate.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—4.8(17A,147,152,272C) Voluntary surrender.** A voluntary surrender of licensure may be submitted to the board as resolution of a contested case or in lieu of continued compliance with a disciplinary decision of the board. A voluntary surrender, when accepted by the board, has the same force and effect as an order of revocation.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

These rules are intended to implement Iowa Code chapter 17A and Iowa Code sections 147.55, 152.10, 272C.4, 272C.5, 272C.6, and 272C.9.

CHAPTER 5  
CONTINUING EDUCATION  
[Prior to 8/26/87, Nursing Board[590] Ch 5]

**655—5.1(152) Definitions.**

*“Approved provider”* means those persons, organizations, or institutions that meet the criteria specified in subrule 5.3(2) and are authorized by the board to offer approved continuing education programs. Provider approval applies to all programs regardless of geographic location.

*“Approved provider number”* means the number assigned by the board which identifies an approved provider.

*“Audit”* means the selection of licensees for verification of satisfactory completion of continuing education requirements during a specified time period; or the selection of approved providers for verification of adherence to continuing education approved provider requirements during a specified time period.

*“Continuing education”* means planned, organized learning activities acquired following initial licensure and designed to maintain, improve, or expand nurses’ knowledge and skills or to develop new knowledge and skills relevant to nursing for the enhancement of practice, education, administration, or theory development to the end of improving the health of the public.

*“Criteria”* means those standards as defined in subrule 5.3(2) which the provider shall meet to be an approved provider.

*“Extended course”* means an organized program of study offered in a series of sessions.

*“Formal offering”* means an extension course, independent study, or other course which is offered for academic credit or audit by an accredited institution of higher education. A formal offering need not be offered by an approved provider.

*“Informal offering”* means workshop, seminar, institute, conference, lecture, extended course, provider designed self-study, or learner designed self-study which is offered for credit in contact hours or continuing education units.

*“In-service”* means activities intended to assist nurses to acquire, maintain, or expand nurses’ knowledge and skills in fulfilling the assigned responsibilities specific to the expectations of the employer.

*“Learner designed self-study”* means the learner takes the initiative and the responsibility for assessing, planning, implementing, and evaluating an educational activity under the guidance of an approved provider. The provider may award credit to a nurse for learner designed self-study such as lecture development, research, preparation of articles for publication, development of patient care or patient education programs, or projects directed at resolving administrative problems.

*“Nonapproved provider”* means those persons, organizations, or institutions who do not hold an Iowa approved provider number. The board may recognize credit from nonapproved providers under special situations as specified in subrule 5.2(2), paragraph “f,” subparagraphs (2) and (3).

*“Practicum”* means a course-related, planned and supervised clinical experience which includes clinical objectives and assignment to practice in a laboratory setting or with patients/clients/families for attainment of the objectives.

*“Provider designed self-study”* means that the provider designs a program for learning for the nurse who completes the program at the individual’s pace, e.g., home study, programmed instruction.

**655—5.2(152) Continuing education — licensees.**

**5.2(1) Board authority.** The board derives its authority under Iowa Code chapter 272C to create continuing education requirements as a prerequisite to obtain a current license and an audit system to ensure compliance. Rules relating to the continuing education and licensing of registered nurses and licensed practical nurses are found in this chapter; rules relating to the continuing education and licensing of advanced registered nurse practitioners are found in nursing board rules, 655—Chapter 7.

**5.2(2) Requirements.** To obtain a registered nurse or licensed practical nurse license for the next renewal period, the licensee shall verify the completion of continuing education requirements or exceptions to the requirements, as outlined in subrule 5.2(3).

*a.* Thirty-six contact hours or 3.6 continuing education units (CEUs) shall be required for renewal of a three-year license. Twenty-four contact hours or 2.4 CEUs shall be required for renewal of a license which was issued for less than three years as a result of one of the following:

- (1) Examination.
- (2) Endorsement into Iowa from another state.
- (3) Reactivation from inactive status.

*b.* The hours specified in paragraph “*a*” shall be completed in the license period for which the license was issued. Credit will not be accepted for a duplication of informal or formal offerings within a license period.

*c.* Continuing education credits from a previous license period including all make-up credit shall not be used, nor shall credits be accumulated for use in a future licensure period.

*d.* Units of measurement used for continuing education courses shall be as follows:

(1) 1 contact hour = 50 minutes of didactic instruction, work on learner designed self-study, and clinical or laboratory practicum in an informal offering.

(2) 1 CEU = 10 contact hours of instruction.

(3) 1 academic semester hour = 15 contact hours of instruction.

(4) 1 academic quarter hour = 10 contact hours of instruction.

*e.* To be approved for continuing education credit, formal offerings shall meet the qualifications of appropriate subject matter as specified in subrule 5.3(2), paragraph “*a*,” or be required toward meeting the requirements of a nursing education program which extends beyond the education completed for the original nursing license. Questions about whether particular formal offerings will be approved may be directed to the board office. A denial of approval may be appealed to the board within one month of the denial. The licensee shall retain a transcript exhibiting a passing grade for each formal offering or verification of attendance for offerings which are audited.

*f.* To be approved for continuing education credit, informal offerings shall meet the qualifications of appropriate subject matter as specified in subrule 5.3(2), paragraph “*a*.” There are no restrictions on amount of credit acquired through learner designed or provider designed self-study. The licensee shall retain a certificate to verify completion of each informal offering.

(1) Informal offerings shall be accepted when offered by board-approved providers or when guided by board-approved providers in learner designed self-study. All learner designed self-study and all offerings within Iowa including distance education technology, e.g., satellite programming, shall be sponsored by a board-approved provider to be acceptable.

(2) Informal offerings attended outside of Iowa or offered as self-study, including Internet self-study, shall be accepted when recognized by other state boards of nursing with mandatory continuing education requirements or offered by the American Nurses’ Association, National League for Nursing, National Federation of Licensed Practical Nurses, National Association for Practical Nurse Education and Service, Inc. These informal offerings shall be in accordance with the continuing education standards as follows:

1. American Nurses’ Credentialing Center Manual for Accreditation as a Provider of Continuing Education in Nursing in effect in 2001 and the Manual for Accreditation as an Approver of Continuing Education in effect in 2001.

2. National League for Nursing criteria and guidelines of the International Association for Continuing Education and Training in effect in 2000.

3. National Federation of Licensed Practical Nurses Continuing Education Department policies and procedures in effect in 1997.

4. National Association for Practical Nurse Education and Service, Inc. (NAPNES) Criteria for Approval of Continuing Education in effect in 2000.

(3) Informal offerings offered from nonapproved providers outside of Iowa or an organization not specified in subrule 5.2(2), paragraph “*f*,” subparagraph (2), whether it be a self-study course,

an Internet self-study course, or a live presentation attended outside of Iowa, shall be accepted when specially approved by the board for an individual licensee. A licensee shall obtain special approval from the board office in order to receive credit acceptable to fulfill the requirements. The special approval application form is available from the board office upon request. Special approval requires submission of a completed application and a brochure, advertisement, or course description prior to the completion of the licensure period. Course content shall meet the qualifications of appropriate subject matter as specified in subrule 5.3(2), paragraph "a." The licensee shall retain the approval letter from the board office, in addition to the certificate of attendance received from the nonapproved provider. A denial of approval may be appealed to the board within one month of the denial.

g. Activities not specified in subrule 5.2(2), paragraph "e" or "f," shall be considered appropriate for continuing education credit only after approval has been obtained in writing from the board.

**5.2(3) Exceptions to the requirements in subrule 5.2(2), paragraph "a."** A waiver of continuing education requirements or extensions of time within which to fulfill the requirements may be granted on an individual basis. Specific instructions are available from the board office for the following:

a. A licensee shall be deemed to have complied with the continuing education requirements during periods that person serves honorably on active duty in the military service as specified in Iowa Code section 272C.2(3). The continuing education credit requirements shall be waived; however, a licensee who claims this exception shall retain evidence of active duty to be presented upon request from the board.

(1) A licensee who served on active duty for the entire license period or through the end of the license period shall be exempt from the requirement of continuing education credits.

(2) A licensee who served on active duty for a portion of a license period but is not on active duty at the time of renewal shall comply with continuing education requirements of Iowa for the remainder of the license period. The required hours are prorated at 12 contact hours per year for each period of 12 consecutive months when not on active duty.

b. A licensee shall be deemed to have complied with the continuing education requirements when that person, at the time of renewal, resides outside of Iowa and holds a current license to practice in a state other than Iowa which also has mandatory continuing education. The continuing education credit requirements shall be waived; however, a licensee who claims this exception shall retain evidence of the out-of-state license to be presented upon request from the board.

(1) A licensee who resides out of state for the entire license period or through the end of the license period and meets a state's continuing education requirements to maintain a current license shall be exempt from the requirements of continuing education credits.

(2) A licensee who resided out of state for a portion of a license period but is residing in Iowa at the time of renewal shall comply with continuing education requirements of Iowa for the remainder of the license period. The required hours are prorated at 12 contact hours per year for each period of 12 consecutive months of residence in Iowa.

c. A licensee shall be deemed to have complied with the continuing education requirements during periods that person is a government employee working as a registered nurse or licensed practical nurse and assigned to duty outside of the United States as specified in Iowa Code section 272C.2(4). The continuing education credit requirement shall be waived; however, a licensee who claims this exception shall retain evidence of government employment outside the United States to be presented upon request from the board.

(1) A licensee who is a government employee serving outside the United States for the entire license period or through the end of the license period shall be exempt from the requirement of continuing education credits.

(2) A licensee who is a government employee serving outside the United States for a portion of a license period, but is not in that status at the time of renewal, shall comply with continuing education requirements of Iowa for the remainder of the license period. The required hours are prorated at 12 contact hours per year for each period of 12 consecutive months when not in that status.

d. A licensee shall be deemed to have complied with the continuing education requirements during periods that person is in foreign service as a registered nurse or licensed practical nurse outside the United

States where a current license is required. The continuing education credit requirement shall be waived; however, a licensee who claims this exception shall retain evidence of foreign service requiring licensure to be presented upon request from the board.

(1) A licensee who is serving in such a position for the entire license period or through the end of the license period shall be exempt from the requirement for continuing education credits.

(2) A licensee who is serving in such a position for a portion of the license period, but is not in that status at the time of renewal, shall comply with continuing education requirements of Iowa for the remainder of the license period. The required hours are prorated at 12 contact hours per year for each period of 12 consecutive months when not in that status.

*e.* A licensee shall be deemed to have complied with the continuing education requirements when that person at the time of renewal possesses evidence of certification in a specialty area of nursing practice for the advanced registered nurse practitioner as defined in rule 655—7.1(152). The continuing education credit requirements shall be waived; however, a licensee who claims this exception shall retain evidence of current certification by the national organization to be submitted upon request.

*f.* A licensee who has had a physical or mental disability or illness during the license period shall be eligible for a waiver. A waiver provides for an extension of time or exemption from some or all of the continuing education requirements. An application for a waiver is available upon request to the board office. The application requires the signature of a physician who can attest to the existence of a disability or illness during the license period. The application for a waiver shall be approved or denied depending on the disability or illness of the licensee. A licensee shall be notified of the decision. A licensee who obtains approval shall retain a copy of the waiver to be presented to the board upon request.

**5.2(4)** *Failure to meet requirements or conditions for exceptions to requirements.* The licensee who fails to meet the requirements or the conditions for exceptions has the following options:

*a.* If the requirements or the conditions for exceptions are met during the late renewal period, as defined in rule 655—3.1(17A,147,152,272C), the licensee may retain the license in an active status.

(1) To remain active, the licensee shall complete the continuing education requirements as specified in subrule 5.2(2) or 5.2(3) as well as other requirements specified in 655—subrule 3.7(4). The licensee shall be required to submit to an audit of continuing education following the late renewal. The licensee shall automatically be reaudited when late credit has been accepted.

(2) Failure to renew within 30 days after expiration shall cause the license to be placed on inactive status.

*b.* An inactive license as defined in rule 655—3.1(17A,147,152,272C) may be reactivated.

*c.* To reactivate a license, the licensee shall obtain 12 contact hours of continuing education within the 12 months prior to reactivation and complete the requirements specified in 655—subrule 3.7(5).

**5.2(5)** *Audit of licensees.* The board may select licensees for audit following a period of licensure.

*a.* The licensee must submit verification of compliance with continuing education requirements or exceptions for the period of licensure being audited. Verification for satisfactory completion of the audit includes legible copies of certificates of attendance, transcripts, special approval of informal offerings from nonapproved providers, or documentation of compliance with exceptions in subrule 5.2(3).

*b.* The licensee must submit verification of the requirement specified in 655—subrule 3.7(3).

*c.* Verification must be submitted within one month after the date of the audit. Extension of time may be granted on an individual basis.

*d.* If submitted materials are incomplete or unsatisfactory, the licensee shall be notified. The licensee shall be given the opportunity to submit make-up credit to cover the deficit found through the audit. The deadline for receipt of the documentation for this make-up credit is within 90 days of receipt of the board office notification. The licensee shall be reaudited during the next renewal period when make-up credit has been accepted.

*e.* Licensees are required to keep certificates of attendance, letters verifying special approval for informal offerings from nonapproved providers, transcripts, and documentation of compliance with exceptions for four years.

*f.* The board shall notify the licensee of satisfactory completion of the audit.

g. Failure to complete the audit satisfactorily or falsification of information shall result in board action as described in nursing board rules, 655—Chapter 4.

h. Failure to notify the board of a current mailing address will not absolve the licensee from the audit requirement; completion of an audit will be required prior to further license renewal.

**655—5.3(152) Continuing education — providers.**

**5.3(1) Board authority.** The board derives its authority under Iowa Code chapter 272C to create requirements for becoming an approved provider and maintaining that status. The board also has the authority to develop an audit, a mechanism to verify compliance with criteria for approved providers.

**5.3(2) Criteria for approved providers.** The approved providers shall show evidence of capability to adhere to criteria indicative of quality continuing education activities for nurses.

a. Criteria related to appropriate subject matter. Appropriate subject matter for continuing education credits reflects the educational needs of the nurse learner and the health needs of the consumer. Subject matter is limited to offerings that are scientifically founded and predominantly for professional growth. The following areas are deemed appropriate subject matter for continuing education credit:

- (1) Nursing practice related to health care of patients/clients/families in any setting.
- (2) Professional growth and development related to nursing practice roles and designed to enhance the delivery of patient care and health service.
- (3) Sciences upon which nursing practice, nursing education, or nursing research is based, e.g., nursing theories and biological, physical, behavioral, computer, social, or basic sciences.

- (4) Social, economic, ethical and legal aspects of health care.

- (5) Management or administration of health care, health care personnel, or health care facilities.

- (6) Education of patients or their significant others, students, or personnel in the health care field.

b. Criteria related to operation of an approved continuing education providership. The provider shall:

- (1) Have a consistent, identifiable authority who has overall responsibility for the operation of the providership and execution of the informal offerings who is knowledgeable in administration and has the capability to organize, execute, and evaluate the overall operations of the providership.

- (2) Have an organizational chart to delineate lines of authority and communication within the providership as well as within the parent organization, if applicable, and other cooperative or advisory committees.

- (3) Develop and implement a philosophy, goals and objectives consistent with the controlling institution, if applicable, which reflect the provider beliefs about nursing, education, and continuing education. These shall indicate the overall direction of the providership for a five-year period.

- (4) Maintain financial integrity so that participants receive the continuing education for which they have paid.

- (5) Maintain participant and program records as specified in paragraph “c” of this subrule.

- (6) Demonstrate active nursing participation in the planning and administration of informal offerings. Nursing participation shall be documented in a written statement of policy, denotation on the organizational chart, and planning minutes.

- (7) Select appropriate subject matter designed to fulfill the educational needs of nurses in order to meet the health care needs of consumers. Have a subject matter plan which indicates the mechanism of assessing the learning needs of the population to be served and describes how the provider shall meet the appropriate subject matter criteria as specified in subrule 5.3(2), paragraph “a,” subparagraphs (1) to (6).

- (8) Demonstrate planning for each offering that includes a statement of purpose and measurable, educational objectives.

- (9) Provide notification to licensees of the availability of informal offerings. A brochure or written advertisement shall be developed for all informal offerings other than learner designed self-study and a copy shall be sent to the board prior to each offering. The brochure or advertising shall accurately describe the activities by including the date, time, location, statement of purpose, educational objectives, intended audience, credentials of instructors, amount of continuing education credit to be awarded, and,

if applicable, costs and items covered by the fee and refund policy. The board-approved provider number shall appear on the brochure or written advertisement.

(10) Structure program content and learning experience to relate to the stated purpose and objectives. Program content shall cover one topic or a group of closely related topics. Current, relevant, scientifically based supportive materials shall be used.

(11) Develop policies and procedures for verification of satisfactory completion of the activity by each participant including a system for verification of satisfactory completion, the control methods to ensure completion and a method to inform participants that completion of the offering is required prior to the award of credit. The provider shall not require exchanging an evaluation form for a certificate of completion. The provider may award credit to other members of the providership who attend but do not serve as organizers during the actual offering. The provider may make an exception and award partial credit in extreme emergency conditions. The provider may make an exception and award credit for the portion of time the speaker attended the offering excluding the presentation time; however, full credit may be awarded to a speaker who presents the offering for the first time. The provider may base the verification of satisfactory completion of an extended course on the participant's meeting the course objectives rather than on the number of sessions attended.

(12) Develop policies and procedures for management of continuing education programs including registration procedures, tuition refund, and enrollee grievances.

(13) Assign credit according to a uniform measure of credit as defined in subrule 5.2(2), paragraph "d." No credit shall be awarded for less than one contact hour or .1 CEU.

(14) If desired, cosponsor an offering provided by a nonapproved provider. When cosponsoring is done, the approved provider is responsible for assurance that all criteria in subrule 5.3(2) are met. A cosponsorship contract or letter of agreement shall delineate responsibilities of all parties, which includes the approved provider awarding the credit and maintaining the program and participant records. Cosponsoring is not acceptable for learner designed self-study.

(15) An approved provider shall notify the board within 30 days of changes in the administrative authority or address of the providership or the inability to meet the criteria.

c. Criteria related to record system and maintenance of continuing education programs. The provider shall:

(1) Maintain participant records for a minimum of four years from the date of program completion. The participant records shall include the name of licensee, license number, contact hours or CEUs awarded, offering titles, and dates of offerings. The record system shall provide for secure storage and retrieval of the participant records of continuing education. Secure storage shall include limiting employee access and describing security measures. Individual attendance and information regarding each offering shall be available within two weeks upon request from individual nurses or the board. If individual nurses are assessed a fee for this retrieval service, the fee shall be specified.

(2) Maintain program records for a minimum of four years from the date of program completion.

Program records for all informal offerings, other than learner designed self-study, shall include a brochure or advertising, roster of participants to whom credit was awarded, and a summary of the program including participant and provider evaluations. The provider shall maintain records for one informal offering which includes all required materials for renewal for approved providers as specified in subrule 5.3(4), paragraph "a," subparagraph (6).

Program records for learner designed self-study shall include the written agreement between the learner and provider, date of completion, and learner and provider evaluations.

(3) Furnish a certificate to each participant documenting the date the credit was earned. The front of the certificate shall display: participant's name, provider number, contact hours or continuing education units awarded, dates of the offering, subject matter taken, and a reminder to the participant to retain the certificate for four years. A certificate issued by electronic means must be a print-only file.

d. Criteria related to faculty of informal offerings. The faculty shall:

(1) Be current, knowledgeable, and skillful in the subject matter of the offering by having evidence of further education in the subject. Such education shall be acquired through course completion or an advance degree, experience in teaching in the specialized area within the three years preceding the

offering, or six months' work experience in the specialized area within the three years preceding the offering.

(2) If applicable, be skillful in assisting a nurse in designing a learner designed self-study program by having experience or education in course design.

(3) Include a nurse if the subject matter is nursing or if it is learner designed self-study.

(4) Encourage active participation of the nurse learners enrolled in the offerings.

(5) Utilize principles of adult education in teaching strategies.

(6) Utilize teaching methodologies appropriate to the subject, audience, and time allotment.

(7) Utilize current supportive materials by drawing from resources that are predominantly less than five years old unless the topic is of an historical nature.

(8) Not receive credit when teaching participants; however, an exception may be made as specified in subrule 5.3(2), paragraph "b," subparagraph (11).

(9) Not receive credit for learner designed self-study from a provider which employs them in the regular administration of the providership.

*e.* Criteria related to evaluation of continuing education programs. The provider shall include:

(1) A design for participants to assess achievement of program objectives, faculty effectiveness, and teaching-learning methodologies, resources and facilities for each offering.

(2) Evaluation techniques to assess the effectiveness of each offering and plan for future offerings.

(3) A method of notifying the participants that the evaluation may be submitted directly to the board.

*f.* Additional criteria related to management of learner designed self-study for providers who wish to guide this type of education. The provider shall:

(1) Provide a written application process through which the learner describes the following:

Individual's assessed need for the learning activity which meets the criteria related to appropriate subject matter found in this subrule, paragraph "a."

Purpose for pursuing the learning activity.

Objectives clarifying the purpose and providing a description of expected learning outcomes in measurable, behavioral terms.

Learning experiences or activities detailed in a plan for achieving the behavioral objectives.

Learning resources identifying people, materials, and facilities to be utilized to achieve the purpose and objectives.

Timetable for completion of learning activities.

Method of evaluation to be used which ensures completion of the learning activities, the objectives, and the number of hours required.

(2) Provide a written agreement with the learner. The written agreement shall include:

The approved written application.

Cost and refund policy.

Number of contact hours to be awarded.

The board-approved provider number.

Signatures of the nurse learner and the faculty managing this learner designed self-study.

Date of the agreement.

(3) Provide an evaluation which indicates successful completion of the terms of the written agreement and the award of a certificate of completion.

**5.3(3) Initial approval process for providers.** Initial approval is granted upon the submission of required materials and the determination by the board or its representative that the materials fulfill the criteria for approved providers specified in subrule 5.3(2).

*a.* Upon request, the board office shall send an application to a potential provider which requires the submission of the following materials:

(1) Designation of the administrative authority and biographical information about the administrative authority.

(2) Organizational chart.

(3) Philosophy, goals and objectives.

- (4) List of program offerings.
- (5) Evidence of nursing participation.
- (6) Plan on subject matter.
- (7) A policy for record system and maintenance.

A policy regarding the certificate and a sample of the certificate to be used.

A sample of a written agreement for learner designed self-study, if applicable.

- (8) Policies and procedures for verification of satisfactory completion of an offering.

- (9) A policy for registration procedures and tuition refund.

- (10) A policy for the written advertisement.

- (11) A policy regarding enrollee grievances.

- (12) A policy regarding participant and provider evaluation.

- (13) A policy regarding faculty selection.

- (14) A policy regarding the use of the uniform measure of continuing education credit.

- (15) Documents from a typical sample course offering. Documents for this offering shall include:

A narrative of the planning of the offering including evidence of nursing participation.

A sample brochure or advertising.

Content of course, e.g., topical outline.

Teaching-learning methodologies and supportive materials.

Bibliography.

A sample evaluation form for participant completion.

A sample evaluation form for provider completion.

- (16) A policy for cosponsorship of offerings, if applicable, and a sample contract or letter of agreement.

*b.* Upon receipt of the completed application and two copies, a review is held by a committee.

- (1) The committee is composed of at least three appointees of the board. The review is held at the board office within 60 days of receipt of the application.

- (2) The review is based on the criteria as specified in subrule 5.3(2).

- (3) If the submitted materials meet the requirements, the committee shall approve the provider for five years and issue a provider number. The approved provider shall be notified of the decision within two weeks of the committee review.

- (4) If the committee finds submitted materials to be incomplete or unsatisfactory, it shall notify the provider applicant of the decision within two weeks of the committee review. The applicant is given the opportunity to meet the criteria with an additional review to be held within six weeks of receipt of the revised application materials at the board office.

- (5) If the applicant is unable to meet the criteria within three committee reviews or one year from the receipt of the initial application at the board office, whichever comes first, the committee shall recommend nonapproval at the next regularly scheduled board meeting.

- (6) Notice of this recommendation of nonapproval shall be provided to the applicant at least 30 days before the board meeting.

- (7) The board shall make the final decision.

*c.* At any time the provider applicant disagrees with the committee's actions, the applicant may request board action. At this time the matter becomes a contested case and an evidentiary hearing as specified in Iowa Code chapter 17A shall be held by the board at its next regularly scheduled meeting.

- (1) If the final decision of the board is approval, approval shall be granted up to five years and an approved provider number is issued. The applicant shall be notified of the decision within two weeks of the board's final decision.

- (2) If the final decision of the board is a denial, the applicant shall be notified of the decision within two weeks of the board's final decision. Provisions for making a request for reconsideration and appeal are found in Iowa Code sections 17A.16 and 17A.19.

*d.* A provider applicant who has been denied approved provider status may apply no sooner than one year after denial to become an approved provider by starting the initial approval process specified in this subrule.

**5.3(4) *Reapproval process for approved providers.*** Reapproval is granted upon the submission of required materials and the determination by the board or its representatives that the materials fulfill the criteria for approved providers specified in this chapter.

*a.* The board shall send an application for reapproval to an approved provider six months before the expiration of the current approval. The completed application shall be submitted to the board office no later than three months prior to the expiration of the current approval. The application requires submission of the following materials:

(1) Identification of the current administrative authority. The information shall include the name(s) and title(s) of the authority.

(2) Current table of organization. The table shall:

Delineate the administrative authority for the providership.

Define the line relationships within the providership as well as within the parent organization, if applicable.

Illustrate cooperative or advisory relationships, if applicable.

(3) Goals, philosophy, and objectives. These shall:

Be described in regard to accomplishments, strengths, and weaknesses during the approval period.

Indicate the overall direction of the providership for the next five-year period, taking into consideration the strengths and weaknesses of the providership.

(4) List of course offerings from the previous year.

(5) Explanation of changes. A new policy or procedure shall be submitted for each change made since the previous approval.

(6) Documents from a typical course offering. The following documents shall be included:

A narrative of the planning of the offering.

A brochure, advertising, or written agreement.

Content of course, e.g., topical outline.

Teaching-learning methodologies and supportive materials.

Bibliography.

Attendance record.

Participant evaluation form.

Summary of participant and provider evaluations.

A sample of the current participant evaluation form and certificate.

*b.* Upon receipt of the application for reapproval, a review shall be made by a board designee at the board office within 30 days of receipt of the application.

(1) The review is based on the criteria as specified in subrule 5.3(2).

(2) If the submitted materials meet the requirements, the designee shall issue a renewal of the approved provider status for a five-year period.

(3) If the submitted materials are incomplete or unsatisfactory, the designee shall notify the provider of the decision within two weeks of the committee review. The provider shall be given the opportunity to meet the criteria within 30 days of the receipt of the board office notification. If the provider is unable to meet the requirements, the designee shall recommend nonapproval at the next regularly scheduled board meeting.

(4) Notice of this recommendation of nonapproval shall be provided to the applicant at least 30 days before the board meeting.

(5) The board shall make the final decision.

(6) At any time the renewal applicant disagrees with the designee's actions, the applicant may request board action. At this time the matter becomes a contested case and an evidentiary hearing as specified in Iowa Code chapter 17A shall be held by the board at its next regularly scheduled meeting, when the board shall issue a final decision.

(7) If the final decision of the board is reapproval, approval shall be granted up to five years. The approved provider shall be notified of the decision within two weeks of the board's final decision.

(8) If the final decision of the board is denial, the reapproval applicant shall be notified of the decision within two weeks of the board's decision. Provisions for making a request for reconsideration and appeal are found in Iowa Code sections 17A.16 and 17A.19.

(9) A reapproval applicant who has been denied reapproval may apply no sooner than one year after denial to become an approved provider by starting the initial approval process specified in subrule 5.3(3).

**5.3(5) *Audit of approved providers.*** The board shall monitor approved providers for adherence to criteria as established in this chapter.

*a.* The board may order an audit of an approved provider or may audit as a result of a written complaint. A written complaint may be filed with the board against a provider for acts or omissions which indicate a failure to meet the criteria established in this chapter. If the complaint is in regard to a particular offering, it shall be filed within one month of the completion of the offering.

*b.* The board may revoke the approved provider status for willful or repeated failure to meet one or more of the criteria specified in subrule 5.3(2).

*c.* A notice of revocation shall be issued to the provider. The provider will have 30 days to request a hearing for reconsideration of revocation. If a request for hearing is not received within the 30 days, the revocation shall be considered final.

*d.* The hearing will be conducted by the board pursuant to 655—20.1(17A,147,152,272C).

*e.* A provider who wishes to request rehearing shall do so within 20 days from the date of receipt of decision. The provider shall submit a statement which shows cause why action should not have been taken by the board. This statement shall be acted upon by the board within 20 days.

*f.* A provider who wishes to appeal the sanction imposed by the board may do so pursuant to Iowa Code section 17A.19.

*g.* A provider whose approved provider status has been revoked shall no longer advertise that it is an approved provider. The provider number shall no longer be used or appear in brochures, advertisements, certificates, or other materials.

*h.* A provider whose approved provider status has been revoked shall maintain the records required in subrule 5.3(2) until four years after the last credit was granted or transfer the records to the custody of the board.

*i.* The board shall notify other states which have mandatory nursing continuing education of the revocation of the approved provider status and the reason(s) for withdrawal.

*j.* A provider whose approved provider status has been revoked may apply no sooner than one year after the withdrawal of approval to become an approved provider by the initial approval process described in subrule 5.3(3).

**5.3(6) *Voluntary relinquishment of an approved providership.*** An approved provider may voluntarily relinquish its provider number. If an approved provider does not submit the required materials for reapproval or is unable to be located by the board, by certified mail, the board will consider that the provider voluntarily relinquished its approved provider status effective with the return of the certified mail or as determined by the executive director. When the approved providership has been voluntarily relinquished, the provider shall discontinue providing continuing education that is acceptable for license renewal in Iowa.

*a.* The provider shall maintain the records subrule required in 5.3(2) until four years after the last credit was granted or transfer the records to the custody of the board.

*b.* The board shall notify other states which have mandatory nursing continuing education of the relinquishment of the approved provider status and the reason(s) for relinquishment.

*c.* The provider whose approved provider status has been voluntarily relinquished may apply to become an approved provider by starting the initial approval process specified in subrule 5.3(3).

CHAPTER 9  
DECLARATORY ORDERS

The board of nursing hereby adopts, with the following exceptions and amendments, the Uniform Rules on Agency Procedure relating to declaratory orders which are printed in the first volume of the Iowa Administrative Code.

**655—9.1(17A) Petition for declaratory order.** In lieu of the words “(designate agency)”, insert “board of nursing”.

In lieu of the words “(designate office)”, insert “Iowa Board of Nursing, RiverPoint Business Park, 400 S.W. Eighth Street, Suite B, Des Moines, Iowa 50309-4685”.

In lieu of the words “(AGENCY NAME)”, insert “BOARD OF NURSING”.

Delete the following: “(An agency may wish to describe here a simplified alternative petition form that would be more appropriate for some members of its clientele in light of their particular circumstances.)”.

**655—9.2(17A) Notice of petition.** In lieu of the underline insert “15” and delete the words “(15 or less)”.

In lieu of the words “(designate agency)”, insert “board of nursing”.

**655—9.3(17A) Intervention.**

**9.3(1)** In lieu of the underline, insert “15”.

**9.3(2)** In lieu of the words “(designate agency)”, insert “board of nursing”.

**9.3(3)** In lieu of the words “(designate office)”, insert “the board of nursing”.

In lieu of the words “(designate agency)”, insert “board of nursing”.

In lieu of the words “(AGENCY NAME)”, insert “BOARD OF NURSING”.

Delete the words “(An agency may wish to describe here a simplified alternative petition for intervention form that would be more appropriate for some members of its clientele in light of their particular circumstances.)”.

**655—9.4(17A) Briefs.** In lieu of the words “(designate agency)”, insert “board of nursing”.

**655—9.5(17A) Inquiries.** In lieu of the words “(designate official by full title and address)”, insert “the Executive Director, Iowa Board of Nursing, RiverPoint Business Park, 400 S.W. Eighth Street, Suite B, Des Moines, Iowa 50309-4685”.

**655—9.6(17A) Service and filing of petitions and other papers.**

**9.6(2)** In lieu of the words “(specify office and address)”, insert “Iowa Board of Nursing, RiverPoint Business Park, 400 S.W. Eighth Street, Suite B, Des Moines, Iowa 50309-4685”.

In lieu of the words “(agency name)”, insert “board of nursing”.

**9.6(3)** In lieu of the words “(uniform rule on contested cases X.12(17A))”, insert “655 IAC 20.17(17A)”.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—9.7(17A) Consideration.** In lieu of the words “(designate agency)”, insert “board of nursing”.

**655—9.8(17A) Action on petition.**

**9.8(1)** In lieu of the words “(designate agency head)”, insert “board of nursing”.

**9.8(2)** In lieu of the words “as defined in (contested case uniform rule X.2(17A))”, insert “the date of mailing of a decision or order, or date of delivery if service is by other means, unless another date is specified”.

**655—9.9(17A) Refusal to issue order.**

**9.9(1)** In lieu of the words “(designate agency)”, insert “board of nursing”.

2. In lieu of the words “(designate agency)”, insert “board of nursing”.
3. In lieu of the words “(designate agency)”, insert “board of nursing”.
10. In lieu of the words “(designate agency)”, insert “board of nursing”.

Delete the words “(Where the agency’s experience enables it to define in advance other specific reasons for refusing to issue a declaratory ruling, it should include them here.)”.

**655—9.12(17A) Effect of a declaratory order.** In lieu of the words “(designate agency)”, insert “board of nursing”.

[Filed 2/17/88, Notice 8/26/87—published 3/9/88, effective 4/13/88]

[Filed 4/29/99, Notice 3/24/99—published 5/19/99, effective 7/1/99]

[Filed ARC 2339C (Notice ARC 2109C, IAB 8/19/15), IAB 1/6/16, effective 2/10/16]

CHAPTER 11  
EXAMINATION OF PUBLIC RECORDS

**655—11.1(17A,22,147,152,272C) Definitions.**

“*Access to records*” means the general right of the public to examine and copy records. In subrule 11.2(9), it also means the right of the subject of a confidential record to authorize its release, in writing, to a named third party.

“*Confidential record*” means a record which is not available to members of the public except as specified in Iowa Code section 22.7 or other law forbidding disclosure. Nothing in this definition shall be construed to deny access to the public portions of a record which contains a mixture of public and confidential information, or to broaden the definition of confidential information to include an entire document.

“*Custodian of records*” means the executive director of the board or that official’s designee.

“*Disclosure*” means the availability or release of a record.

“*Individual*” means a living person. It does not include persons such as sole proprietorships, partnerships, corporations, or educational institutions. A business firm which is identified by the name of one or more persons is not an individual within the meaning of this part.

“*Open records*” are those records which are not authorized or required to be kept confidential under Iowa Code section 22.7 or any other provision of the law.

“*Personally identifiable information*” means information about or pertaining to an individual in a record which identifies the person by personal identifier such as the name of the individual, number, symbol or other unique retriever assigned to the individual and which is contained in a system of records as defined in this subrule.

“*Record,*” when used in these rules means “public record,” includes all records, documents, tapes or other information stored or preserved in any medium of or belonging to the board.

“*Release of information*” means granting access to examine records and providing copies as requested.

“*Subject of a record*” means an individual under whose name or other personal identifier a record is kept in a system of records.

“*System of records*” means any group of records under the control of the board from which a record is retrieved by personal identifier and all records or group of records that are not retrievable by personal identifier. Papers maintained by individual employees of the board which are prepared, maintained, or discarded at the discretion of the employee are not part of the system of records; provided, that the personal papers are not used by the employee or the board to determine any rights, benefits, or privileges of the individuals.

**655—11.2(17A,22,147,152,272C) Public information and inspection of records.**

**11.2(1) *Public information.*** Any interested person may examine public records of the board by making a written request. This request may be mailed or presented in person to the executive director or the designee at the office of the board. Records shall only be examined at the board office during the board’s regular business hours, Monday through Friday from 8 a.m. to 4:30 p.m., excluding legal holidays. Unless otherwise provided by law, all records other than confidential records, maintained by the board shall be made available for public inspection.

**11.2(2) *Inspection of records.*** Procedures governing requests for the inspection of records are set out in subrule 11.2(1).

**11.2(3) *Board records routinely available for public inspection.*** The board collects and maintains the following records that are routinely available for public inspection:

a. Board calendars, agenda, newsletter, news releases and other information intended for the public.

b. Board decisions, orders, opinions and other statements of law or policy issued by the board in the performance of its function.

c. The records of rule-making proceedings.

- d. Annual reports of the board.
- e. Reports and materials filed with the board by nursing education programs and continuing education providers.
- f. Board minutes except those resulting from meetings in closed sessions in accordance with Iowa Code section 21.5.
- g. Rulings on requests for waivers of board rules.
- h. Information about licensees (rosters and mailing lists).
- i. All of the records that are not specifically exempted from disclosure from subrule 11.2(4).

The board files of public records listed above may contain confidential records. Any request to review confidential records must be made in accordance with subrule 11.2(4). In addition, the board records listed in “a,” “b,” “d,” “f,” “g,” “h,” and “i” of this subrule may contain personally identifiable information.

Various legal and technical publications relating to nursing are also available for inspection by the public in the board office.

**11.2(4)** *Records not routinely available for public inspection.* The following records are not routinely available for public inspection. These records are withheld as specified in Iowa Code section 22.7.

a. Materials that are specifically exempted from disclosure by statute in which the board may in its discretion withhold from public inspection. Any person may request permission to inspect particular records withheld from inspection under this subrule. At the time of the request, the board will notify all interested parties. If the request is to review materials under this subrule, the board will withhold the materials from public inspection for 14 days to allow the party who submitted the materials an opportunity to seek injunctive relief.

b. Records which the board is authorized to withhold from public inspection under Iowa law include, but are not limited to, the following:

(1) Hospital records, medical records, and professional counselor records of the conditions, diagnosis, care, or treatment of a patient or former patient or a counselee or former counselee, including outpatient.

(2) Peace officers’ investigative reports as specified in Iowa Code section 22.7, except where disclosure is authorized elsewhere in the Code. However, the date, time, specific location, and immediate facts and circumstances surrounding a crime or incident shall not be kept confidential under this section, except in those unusual circumstances where disclosure would plainly and seriously jeopardize an investigation or pose a clear and present danger to the safety of an individual.

(3) Personnel records of board staff and board members which may be confidential pursuant to Iowa Code section 22.7(11). The board maintains files containing information about employees, their families and dependents, and applicants for positions with the board. The files may include payroll records, biographical information, medical information relating to disability, performance reviews and evaluations, disciplinary information, information required for tax withholding, information concerning employee benefits, affirmative action reports, and other information concerning the employer-employee relationship.

(4) Information in a report to the state department of public health, to a local board of health, or to a local health department, which identifies a person infected with a reportable disease.

(5) Communications not required by law, rule, or procedure that are made to a government body or to any of its employees by identified persons outside of the government, to the extent that the government body receiving those communications from such persons outside of the government could reasonably believe that those persons would be discouraged from making them to that government body if they were available for general public examination. Notwithstanding this provision:

1. The communication is a public record to the extent that the person outside of government making that communication consents to its treatment as a public record.

2. Information contained in the communication is public record to the extent that it can be disclosed without directly or indirectly indicating the identity of the person outside of government making it or enabling others to ascertain the identity of that person.

3. Information contained in the communication is public record to the extent that it indicates the date, time, specific location, and immediate facts and circumstances surrounding the occurrence of a crime or other illegal act, except to the extent that its disclosure would plainly and seriously jeopardize a continuing investigation or pose a clear and present danger to the safety and danger of any person. In any action challenging the failure of the lawful custodian to disclose any particular information of the kind enumerated in this paragraph, the burden of proof is on the lawful custodian to demonstrate that the disclosure of that information would jeopardize an investigation or would pose a clear and present danger.

(6) Identifying details in final orders, decisions and opinions to the extent required to prevent a clearly unwarranted invasion of personal privacy under Iowa Code section 17A.3(1)“d.”

(7) Materials exempt from public inspection under any other provision of state law.

**11.2(5)** *Materials specifically exempt from disclosure by statute and which the board is prohibited from making available for public inspection.* The board is required to withhold the following materials from public inspection:

a. Records which include all complaint files, investigation files, other investigation reports and all other investigative information in the possession of the board or peer review committee acting under the authorization of the board or its employees or agents which relate to licensee application or discipline are privileged and confidential and are not subject to discovery, subpoena or other means of legal compulsion for their release to persons other than the licensee or applicant, the board, its employees and agents involved in licensee discipline. For further information and exceptions, see Iowa Code section 272C.6(4).

b. Minutes and tape recordings of portions of board meetings held in closed sessions in accordance with Iowa Code section 21.5(4).

c. Criminal history or prior misconduct of the examination applicant.

d. Information relating to the contents of the licensure examination.

e. Information relating to the examination results other than final score except for information about the results of the examination given to the person who took the examination.

**11.2(6)** *Requests that materials or information submitted to the board be withheld from public inspection.* Any person submitting information or materials to the board may submit a request that part or all of the information or materials not be made available for public inspection pursuant to the following requirements:

a. *Procedure.* The request shall be attached to the materials to which it applies, each page of which shall be clearly marked confidential.

b. *Content of the request.* Each request shall contain a statement of the legal basis for withholding the materials from inspection and the facts to support the legal basis relied upon. The facts underlying the legal basis shall be supported by affidavit executed by a corporate officer (or by an individual, if not a business entity) with personal knowledge of the specific facts. If the request is that the materials be withheld from inspection for a limited period of time, the period shall be specified.

c. *Compliance.* If a request complies with the requirements of paragraphs “a” and “b” of this subrule, the materials will be temporarily withheld from public inspection. The board will examine the documents to determine whether the documents should be afforded confidentiality. If the request is granted, the ruling will be placed in a public file in lieu of the materials withheld from public inspection.

d. *Request denied.* If a request for confidentiality is denied, the documents will be held confidential for 14 days to allow the applicant an opportunity to seek injunctive relief. After the 14 days expire, the materials will be available for public inspection, unless the board is directed by a court to keep the material confidential.

**11.2(7)** *Procedures for the inspection of board records which are routinely available for public inspection.* The records requested must be reasonably described by the person requesting them to permit their location by staff personnel. Members of the public will not be given access to the area in which records are kept and will not be permitted to search the files.

Advance requests to have records available on a certain date may be made by telephone or by correspondence.

*a. Search fees.* An hourly fee will be charged for searching for requested records. The fee will be based upon the pay scale of the employee who makes the search. No search fee will be charged if the records are not located, the records are not made available for inspection, or the search does not exceed one-quarter hour in duration.

*b. Written request.* Written requests shall list the telephone number (if any) of the person making the request, and for each document requested shall set out all available information which would assist in identifying and locating the document. The request should also set out the maximum search fee the person making the request is prepared to pay. If the maximum search fee is reached before all the requested documents have been located and copied the requesting person will be notified. When the requesting person requests that the board mail copies of the material, postage and handling expenses should also be included. Fees shall be paid directly to the board prior to the release of the requested information.

*c. Procedure for written request.* Records will be produced for inspection at the earliest possible date following a request. Records should be inspected within seven days after notice is given that the records have been located and are available for inspection or as otherwise agreed upon. After seven days, the records will be returned to storage and additional charges may be imposed for having to produce them again.

*d. Copies.* Copies of public records shall be made by the board staff and the charge shall be \$.10 per page.

**11.2(8)** *Procedures for inspection of board records which are not routinely available for public inspections.* Any person desiring to inspect board records which are not routinely available for public inspection shall file a request for inspection meeting the requirements of this subrule.

*a. Content of request.* The records must be reasonably described by the person requesting them so as to permit their location by staff personnel. Requests shall be directed to the Executive Director of the board.

*b. Procedure.* Requests for inspection shall be acted upon as follows:

(1) If the board is prohibited from disclosing the records, the request for inspection will be denied with a statement setting forth the specific grounds for denial.

(2) If the board is prohibited from disclosing part of a document from inspection, that part will be deleted and the remainder will be made available for inspection.

(3) In the case of requests to inspect records not routinely available for public inspection under subrule 11.2(4)“a”(1) through (9), the board will notify all interested parties of the request to view the materials. The board will withhold the materials from public inspection for 14 days to allow the party who submitted the material an opportunity to seek injunctive relief. If the request is granted by the board, or is partially granted and partially denied, the person who submitted the records to the board will be afforded 14 days from the date of the written ruling in which to seek injunctive relief. If injunctive relief is not requested within this period, the records will be produced for inspection.

**11.2(9)** *Procedure by which the subject of a confidential record may have a copy released to a named third party.* Upon request which complies with the following procedures, the board will disclose a confidential record to its subject or to a named third party designated by the subject. Positive identification is required of all individuals making a request.

*a. In person request.* Subjects of a confidential record who request that information be given to a named third party will be asked for positive means of identification. If an individual cannot provide suitable identification, the request will be denied.

Subjects of a confidential record who request that information be given to a named third party will be asked to sign a release form before records are disclosed.

*b. Written request.* All requests by subject of a confidential board record for release of the information to a named third party sent by mail shall be signed by the requester and shall include the requester’s current address and telephone number (if any). If positive identification cannot be made on the basis of the information submitted along with the information contained in the record, the request will be denied.

Subjects of a confidential record who request by mail that information be given to a named third party will be asked to sign a release form before the records are disclosed.

*c. Denial of access to the record.* If positive identification cannot be made on the basis of the information submitted or if data in the record are so sensitive that authorized access could cause harm or embarrassment to the individual to whom the record pertains, the board may deny access to the record pending the production of additional evidence of identity.

**11.2(10) Procedure by which the subject of a board record may have additions, dissents or objections entered into the record.** An individual may request an addition, dissent or any objection be entered into a board record which contains personally identifiable data pertaining to that individual. The request shall be acted on within a reasonable time.

*a. Content of the request.* The request must be in writing and addressed to the Executive Director of the board. The request should contain the following information:

- (1) A reasonable description of the pertinent record.
- (2) Verification of identity.
- (3) The requested addition, dissent or objection.
- (4) The reason for the requested addition, dissent or objection to the record.

*b. Denial of request.* If the request is denied, the requester will be notified in writing of the refusal and will be advised that the requester may seek board review of the denial within 20 working days after issuance of the denial.

**11.2(11) Advice and assistance.** Individuals who have questions regarding the procedures contained in these rules may contact the Executive Director of the board.

**11.2(12) Data processing system.** The board does not currently have a data processing system which matches, collates or permits the comparison of personally identifiable information in one record system with personally identifiable information on another record system.

### **655—11.3(17A,22,147,152,272C) Personally identifiable information.**

**11.3(1) Collection of personally identifiable information.** This board is authorized to collect information, some of which is personally identifiable. The nature and extent of the personally identifiable information collected by the board, the legal authority for the collection of that information and a description of the means of storage are found in this section.

**11.3(2) Personally identifiable information.** The board maintains the following systems of records which may contain personally identifiable information:

*a. Rule making.* Rule-making records may contain information about individuals making written or oral comments or proposed rules. This information is collected pursuant to Iowa Code section 17A.4. This information is not retrieved by individual identifier, and is not stored in an automated data processing system.

*b. Board records.* Agendas, minutes and materials presented to all board members in preparation for board meetings are available from the Executive Director, except those records concerning closed sessions which are exempt from disclosure under Iowa Code section 21.5(4).

*c. Publications.* News releases, annual reports, project reports, board newsletters, etc. are available from the office of the Executive Director.

Board news releases, annual reports, project reports, and newsletters may contain personally identifiable information about board staff or members of the board or committees. This information is not retrieved by individual identifier and is not stored on an automated data processing system.

*d. Disciplinary reports.* This information is available from the chief health professions investigator in the board office. These reports contain personally identifiable information about nurses who have had action taken by the board against their licenses. This information is retrieved by individual identifier and some of the information is stored on an automated data processing system. Some is stored as hard copy or microfilmed documents. This information is matched or compared with personally identifiable information in other record systems.

This information is dispersed pursuant to Iowa Code sections 272C.4 and 272C.6.

*e. Declaratory rulings.* Records may contain information about individuals making the requests for declaratory rulings or comments from other individuals concerning the rulings. This information is collected pursuant to Iowa Code section 17A.9. This information is retrieved by the individual requesting the ruling or topic and is not stored on an automated data processing system.

*f. Licensing.*

(1) Records pertaining to licensure by examination may include:

1. Transcripts from nursing education programs. This information is collected pursuant to Iowa Code section 152.7.

2. Application for licensure by examination. This information is collected pursuant to Iowa Code sections 147.8 and 147.29.

3. Application for licensure by endorsement. This information is collected pursuant to Iowa Code section 147.44.

4. Birth certificates (part of previous requirement for licensure; no longer required). This information is collected pursuant to Iowa Code section 147.3.

5. References.

6. Past felony record. This information is collected pursuant to Iowa Code section 147.3.

7. Examination scores. This information is collected pursuant to Iowa Code section 152.7.

8. High school graduation or equivalency. This information is collected pursuant to Iowa Code section 152.7.

9. Certification for advanced registered nurse practice. This information is collected pursuant to Iowa Code section 152.1(2)“d.”

(2) Records pertaining to licensure by endorsement may include:

1. Transcripts from nursing education programs. This information is collected pursuant to Iowa Code section 152.7.

2. Application for licensure by endorsement. This information is collected pursuant to Iowa Code section 152.8.

3. Birth certificates (part of previous requirement; no longer required). This information is collected pursuant to Iowa Code section 147.3.

4. Past felony record. This information is collected pursuant to Iowa Code section 147.3.

5. Examination scores. This information is collected pursuant to Iowa Code section 152.7.

6. Disciplinary action taken by other boards of nursing. This information is collected pursuant to Iowa Code section 147.52.

7. High school graduation or equivalency. This information is collected pursuant to Iowa Code section 152.7.

8. Verification of licensure by another board of nursing. This information is collected pursuant to Iowa Code section 152.8.

(3) Licensure by renewal, reinstatement and reactivation.

1. Applications. This information is collected pursuant to Iowa Code sections 147.10 and 147.11.

2. Past felony record. This information is collected pursuant to Iowa Code section 147.3.

3. Continuing education records. This information is collected pursuant to Iowa Code section 272C.2.

**11.3(3) Retrieval of personally identifiable information.** Personally identifiable information is retrieved by individual identifier and some of this information is stored in an automated data processing system. Some is stored as hard copy or microfilmed documents. All record systems maintained by the board and which contain personally identifiable information permit the comparison of personally identifiable information in one record system with personally identifiable information in another system.

**11.3(4) Board procedures for requesting information.** After July 1, 1988, the board shall notify persons supplying information requested by the agency of the use that will be made of the information, which persons outside the department might routinely be provided this information, which parts of the information requested are required and which are optional, and the consequences of failing to provide the

information requested. This notification shall either appear on the form used to collect the information, or on a separate sheet accompanying the form.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—11.4(17A,22,147,152,272C) Notice to suppliers of information.** When the board requests a person to supply personal information, the board shall notify the person of the use that will be made of the information, which persons outside the board might routinely be provided this information, which parts of the requested information are required and which are optional, and the consequences of a failure to provide the requested information. This notice may be given in these rules, on the written form used to collect the information, on a separate fact sheet or letter, in brochures, in formal agreements, in contracts, in handbooks, in manuals, verbally, or by other appropriate means.

**11.4(1) License and examination applicants.** License and examination applicants are requested to supply a wide range of information depending on the qualifications required for licensure or for sitting for an examination, as provided by statutes, board rules and application forms. Failure to provide the requested information may result in denial of the application. Some requested information, such as a college transcript, social security number, examination score, or criminal history, is confidential under state or federal law, but most of the information contained in license or examination applications is treated as public information freely available for public examination.

**11.4(2) Home address.** License applicants and licensees are requested to provide their home addresses. These addresses are treated as open records. If a license applicant or licensee has a basis to shield a home address from public disclosure, such as a domestic abuse protective order, written notification should be provided to the board office. Absent a court order, the board does not have a basis under Iowa Code chapter 22 to shield the home address from public disclosure, but the board shall refrain from placing the home address on its Web site and may notify the applicant or licensee before the home address is released to the public to provide an opportunity for the applicant or licensee to seek injunction.

**11.4(3) License renewal.** Licensees are requested to supply a wide range of information in connection with license renewal, including continuing education information, criminal history and disciplinary actions, as provided by statutes, board rules and application forms, both on paper and electronically. Failure to provide requested information may result in denial of the application. Most information contained on renewal applications is treated as public information freely available for public examination, but some information, such as criminal history, may be confidential under state or federal law.

**11.4(4) Investigations.** Licensees are required to respond to board requests for information involving the investigation of disciplinary complaints against licensees. Failure to timely respond may result in disciplinary action against the licensee to whom the request is made. Information provided in response to such a request is confidential pursuant to Iowa Code section 272C.6(4), but may become public if introduced at a hearing that is open to the public, contained in a final order, or filed with a court of judicial review.

**655—11.5(17A,22,147,152,272C) Rosters.** Rosters of licensees shall be made available to the public in accordance with Iowa Code chapter 22 and sections 147.8 and 147.43.

**11.5(1)** Rosters may be accessed via the board's Web site under IBON Online Services and Purchase a Roster.

**11.5(2)** A fee of \$40 per data set shall be charged for a roster.

**11.5(3)** The executive director may authorize the release of a roster of Iowa licensees without cost in the case of any emergency whereby the interest of the public warrants immediate access to health care personnel.

**11.5(4)** State agencies will be provided an electronic file of the roster at no cost.

[ARC 1174C, IAB 11/13/13, effective 12/18/13]

These rules are intended to implement Iowa Code chapters 147, 152 and 272C.

[Filed ARC 2339C (Notice ARC 2109C, IAB 8/19/15), IAB 1/6/16, effective 2/10/16]

CHAPTER 20  
CONTESTED CASES  
[Prior to 1/6/16, see 655—Chapter 4]

**655—20.1(17A,272C) Scope and applicability.** This chapter applies to contested case proceedings conducted by the Iowa board of nursing.  
[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.2(17A,272C) Definitions.** Except where otherwise specifically defined by law:

“*Board*” means a quorum of members of the Iowa board of nursing.

“*Contested case*” means a proceeding defined by Iowa Code section 17A.2(5), including but not limited to licensee disciplinary proceedings, adverse agency action to limit or revoke the multistate licensure privilege granted under the provisions of the nurse licensure compact, license denial proceedings, and license reinstatement proceedings.

“*Issuance*” means the date of mailing of a decision or order, or date of delivery if service is by other means, unless another date is specified in the order.

“*Party*” means the state of Iowa, as represented by the office of the attorney general, and the respondent or applicant.

“*Probable cause*” means a reasonable ground for belief in the existence of facts warranting the specified proceeding.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.3(17A,272C) Time requirements.** Time shall be computed as provided in Iowa Code section 4.1(34). For good cause, the presiding officer may lengthen or shorten the time to take any action, except as precluded by statute or by rule. Except for good cause stated in the record, before lengthening or shortening the time to take any action, the presiding officer shall afford all parties an opportunity to be heard or to file written arguments.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.4(17A,272C) Applicability of Iowa Rules of Civil Procedure.** Except as expressly provided in Iowa Code chapter 17A and these rules, the Iowa Rules of Civil Procedure do not apply to contested case proceedings. However, upon application by a party, the board may permit the use of procedures provided for in the Iowa Rules of Civil Procedure unless doing so would unreasonably complicate the proceedings or impose an undue hardship on a party.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.5(17A,272C) Combined statement of charges and settlement agreement.** Upon a determination by the board that probable cause exists to take public disciplinary action, the board and the licensee may enter into a combined statement of charges and settlement agreement.

**20.5(1)** No licensee is entitled to be offered a combined statement of charges and settlement agreement.

**20.5(2)** Entering into a combined statement of charges and settlement agreement is completely voluntary.

**20.5(3)** The combined statement of charges and settlement agreement shall include a brief statement of the charges, the circumstances that led to the charges, and the terms of settlement.

**20.5(4)** A combined statement of charges and settlement agreement shall constitute the commencement and resolution of a contested case proceeding. By entering into a combined statement of charges and settlement agreement, the licensee waives the right to a contested case hearing on the matter.

**20.5(5)** A combined statement of charges and settlement agreement is a permanent public record open for inspection under Iowa Code chapter 22.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.6(17A,272C) Notice of hearing.**

**20.6(1) Delivery.** Delivery of the notice of hearing constitutes the commencement of the contested case proceeding. Delivery may be executed by:

- a. Personal service, as provided in the Iowa Rules of Civil Procedure; or
- b. Certified restricted mail, return receipt requested; or
- c. Signed acknowledgment accepting service; or
- d. When service cannot be accomplished using the above methods:
  - (1) An affidavit shall be prepared outlining the measures taken to attempt service; and
  - (2) Notice of hearing shall be published once each week for three consecutive weeks in a newspaper

of general circulation, published or circulated in the county of last-known residence of the respondent. The first notice of hearing shall be published at least 30 days prior to the scheduled hearing.

**20.6(2) Contents.** The notice of hearing shall contain the following information:

- a. A statement of the time, place, and nature of the hearing;
- b. A statement of the legal authority and jurisdiction under which the hearing is to be held;
- c. A reference to the particular sections of the statutes and rules involved;
- d. A short and plain statement of the matters asserted;
- e. Identification of all parties, including the name, address and telephone number of the assistant attorney general representing the state;
- f. Reference to the procedural rules governing conduct of the contested case proceeding;
- g. Reference to the procedural rules governing settlement;
- h. Identification of the presiding officer;
- i. Notification of the time period in which a party may request, pursuant to Iowa Code section 17A.11, that the presiding officer be an administrative law judge;
- j. Notification of the time period in which the respondent may file an answer; and
- k. Notification of the respondent's right to request a closed hearing, if applicable.

**20.6(3) Public record.** Notices of hearing are permanent public records open for inspection under Iowa Code chapter 22.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.7(17A,272C) Statement of charges.** In the event the board finds there is probable cause for taking public disciplinary action against a licensee, the board shall file a statement of charges. The statement of charges shall be incorporated within the notice of hearing. The statement of charges shall set forth the acts or omissions with which the respondent is charged including the statute(s) and rule(s) which are alleged to have been violated and shall be in sufficient detail to enable the preparation of the respondent's defense. Every statement of charges prepared by the board shall be reviewed by the office of the attorney general before it is filed. Statements of charges are permanent public records open for inspection under Iowa Code chapter 22.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.8(13,272C) Legal representation.** Following the issuance of a notice of hearing, the office of the attorney general shall be responsible for the legal representation of the public interest in the contested case. The assistant attorney general assigned to prosecute a contested case before the board shall not represent the board in that case but shall represent the public interest.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.9(17A,272C) Presiding officer in a disciplinary contested case.** The presiding officer in a disciplinary contested case shall be the board. When acting as presiding officer, the board may request that an administrative law judge perform certain functions as an aid to the board, such as ruling on prehearing motions, conducting the prehearing conference, ruling on evidentiary objections at hearing, assisting in deliberations, and drafting the written decision for review by the board.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.10(17A,272C) Presiding officer in a nondisciplinary contested case.**

**20.10(1)** Any party in a nondisciplinary contested case who wishes to request that the presiding officer assigned to render a proposed decision be an administrative law judge employed by the department of inspections and appeals must file a written request within 20 days after service of the notice of hearing.

**20.10(2)** The board may deny the request only upon a finding that one or more of the following apply:

- a. There is a compelling need to expedite issuance of a final decision in order to protect the public health, safety, or welfare.
- b. An administrative law judge is unavailable to hear the case within a reasonable time.
- c. The case involves significant policy issues of first impression that are inextricably intertwined with the factual issues presented.
- d. The demeanor of the witnesses is likely to be dispositive in resolving the disputed factual issues.
- e. Funds are unavailable to pay the costs of an administrative law judge and an interagency appeal.
- f. The request was not timely filed.
- g. The request is not consistent with a specified statute.

**20.10(3)** The board shall issue a written ruling specifying the grounds for its decision within 20 days after a request for an administrative law judge is filed. If the ruling is contingent upon the availability of an administrative law judge, the parties shall be notified at least 10 days prior to hearing if an administrative law judge will not be available.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.11(17A,272C) Disqualification.**

**20.11(1)** A presiding officer or other person shall withdraw from participation in the making of any proposed or final decision in a contested case if that person:

- a. Has a personal bias or prejudice concerning a party or a representative of a party.
- b. Has personally investigated, prosecuted, or advocated in connection with that case, the specific controversy underlying that case, another pending factually related contested case, or a pending factually related controversy that may culminate in a contested case involving the same parties. If the licensee elects to appear before the board in the investigative process, the licensee waives this provision.
- c. Is subject to the authority, direction or discretion of any person who has personally investigated, prosecuted or advocated in connection with that contested case, the specific controversy underlying that contested case, or a pending factually related contested case or controversy involving the same parties.
- d. Has acted as counsel to any person who is a private party to that proceeding within the past two years.
- e. Has a personal financial interest in the outcome of the case or any other significant personal interest that could be substantially affected by the outcome of the case.
- f. Has a spouse or relative within the third degree of relationship who:
  - (1) Is a party to the case, or an officer, director or trustee of a party;
  - (2) Is a lawyer in the case;
  - (3) Is known to have an interest that could be substantially affected by the outcome of the case; or
  - (4) Is likely to be a material witness in the case.
- g. Has any other legally sufficient cause to withdraw from participation in the decision making in that case.

**20.11(2)** The term “personally investigated” means taking affirmative steps to interview witnesses directly or to obtain documents or other information directly. The term “personally investigated” does not include:

- a. General direction and supervision of assigned investigators;
- b. Unsolicited receipt of information which is relayed to assigned investigators;
- c. Review of another person’s investigative work product in the course of determining whether there is probable cause to initiate a proceeding; or
- d. Exposure to factual information while performing other agency functions, including fact gathering for purposes other than investigation of the matter which culminates in a contested case.

Factual information relevant to the merits of a contested case received by a person who later serves as presiding officer in that case shall be disclosed if required by Iowa Code section 17A.17(3) and subrules 20.11(3) and 20.28(8).

By electing to participate in an appearance before the board, the licensee waives any objection to a board member's both participating in the appearance and later participating as a decision maker in a contested case proceeding on the grounds that the board member "personally investigated" the matter under this provision.

**20.11(3)** In a situation where a presiding officer or other person knows of information which might reasonably be deemed to be a basis for disqualification and decides voluntary withdrawal is unnecessary, that person shall submit the relevant information for the record by affidavit and shall provide for the record a statement of the reasons for the determination that withdrawal is unnecessary.

**20.11(4)** If a party asserts disqualification on any appropriate ground, including those listed in subrule 20.11(1), the party shall file a motion supported by an affidavit pursuant to Iowa Code section 17A.11(3). The motion must be filed as soon as practicable after the reason alleged in the motion becomes known to the party. The individual against whom disqualification is asserted shall make the initial determination as to whether disqualification is required. If the individual elects not to disqualify, the board shall make the final determination as to disqualification of that individual as part of the record in the case.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.12(17A,272C) Waiver of procedures.** Unless otherwise precluded by law, the parties in a contested case proceeding may waive any provision of this chapter. However, the board in its discretion may refuse to give effect to such a waiver when the board deems the waiver to be inconsistent with the public interest.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.13(17A,272C) Telephone or electronic proceedings.** The presiding officer may resolve prehearing matters by telephone conference in which all parties have an opportunity to participate. Contested case hearings will generally not be held by telephone or electronic means in the absence of consent by all parties under compelling circumstances. Nothing shall prohibit a witness from testifying by telephone or electronic means pursuant to paragraph 20.26(3) "b."

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.14(17A,272C) Consolidation—severance.**

**20.14(1) Consolidation.** The presiding officer may consolidate any or all matters at issue in two or more contested case proceedings where: (a) the matters at issue involve common parties or common questions of fact or law; (b) consolidation would expedite and simplify consideration of the issues involved; and (c) consolidation would not adversely affect the rights of any of the parties to those proceedings.

**20.14(2) Severance.** The presiding officer may, for good cause shown, order any contested case proceedings or portions thereof severed.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.15(17A,272C) Appearance.** The respondent or applicant may be represented by an attorney. The attorney must file an appearance in the contested case. If the attorney is not licensed to practice law in Iowa, the attorney must fully comply with Iowa Court Rule 31.14.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.16(17A,272C) Answer.** An answer may be filed within 20 days of service of the notice of hearing and statement of charges. An answer shall specifically admit, deny, or otherwise answer all material allegations of the statement of charges to which it responds. It shall state any facts supporting any affirmative defenses and contain as many additional defenses as the respondent may claim. An answer shall state the name, address and telephone number of the person filing the answer. Any allegation in the statement of charges not denied in the answer is considered admitted. The presiding officer may

refuse to consider any defense not raised in the answer which could have been raised on the basis of facts known when the answer was filed if any party would be prejudiced.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.17(17A,272C) Filing and service of documents.**

**20.17(1) Filing—when required.** After the notice of hearing, all documents in a contested case proceeding shall be filed with the board.

**20.17(2) Filing—how made.** Filing shall be made by delivering or mailing the document to the board office located at 400 S.W. 8th Street, Suite B, Des Moines, Iowa 50309-4685.

**20.17(3) Filing—when made.** A document is deemed filed at the time it is delivered to the board office, delivered to an established courier service for immediate delivery to the board office, or mailed by first-class mail or state interoffice mail to that office, so long as there is proof of mailing.

**20.17(4) Service—when required.** Except as otherwise provided by law, every document filed in a contested case proceeding shall be simultaneously served upon each of the parties of record to the proceeding, including the assistant attorney general representing the state. Except for an application for rehearing as provided in Iowa Code section 17A.16(2), the party filing a document is responsible for service on all parties.

**20.17(5) Service—how made.** Service upon a party represented by an attorney shall be made upon the attorney unless otherwise ordered. Service is made by delivery or by mailing a copy to the person's last-known address. Service by mail is complete upon mailing, except where otherwise specifically provided by statute, rule, or order, so long as there is proof of mailing.

**20.17(6) Electronic service.** Service may be made upon a party or attorney by electronic mail (e-mail) if the person consents in writing in that case to be served in that manner. The written consent shall specify the e-mail address for such service. The written consent may be withdrawn by written notice served on the parties or attorneys.

**20.17(7) Proof of mailing/e-mailing.** Proof of mailing/e-mailing includes either: a legible United States Postal Service postmark on the envelope, a certificate of service, a notarized affidavit, or a certification in substantially the following form:

I certify under penalty of perjury and pursuant to the laws of Iowa that, on (date of mailing), I mailed copies of (describe document) addressed to the (agency office and address) and to the names and addresses of the parties listed below by depositing the same in the United States mail, state interoffice mail, or e-mail when permitted by 655 IAC 20.17(6).

(Date)

(Signature)

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.18(272C) Investigative file.** The board's investigative file is available to the respondent or applicant upon request only after the commencement of a contested case and only prior to the resolution of the contested case. A licensee who elects to enter into a combined statement of charges and settlement agreement is not entitled to request the investigative file. In accordance with Iowa Code section 272C.6(4), information contained within an investigative file is confidential and may only be used in connection with the disciplinary proceedings before the board.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.19(17A,272C) Discovery.**

**20.19(1)** The scope of discovery described in Iowa Rule of Civil Procedure 1.503 shall apply to contested case proceedings.

**20.19(2)** The following discovery procedures available in the Iowa Rules of Civil Procedure are available to the parties in a contested case proceeding: depositions upon oral examination or written questions; written interrogatories; production of documents, electronically stored information, and things; and requests for admission. Unless lengthened or shortened by the presiding officer, the time frames for discovery in the specific Iowa Rules of Civil Procedure govern those specific procedures.

*a.* Iowa Rules of Civil Procedure 1.701 through 1.717 regarding depositions shall apply to any depositions taken in a contested case proceeding. Any party taking a deposition in a contested case shall be responsible for any deposition costs, unless otherwise specified or allocated in an order. Deposition costs include, but are not limited to, reimbursement for mileage of the deponent, costs of a certified shorthand reporter, and expert witness fees, as applicable.

*b.* Iowa Rule of Civil Procedure 1.509 shall apply to any interrogatories propounded in a contested case proceeding.

*c.* Iowa Rule of Civil Procedure 1.512 shall apply to any requests for production of documents, electronically stored information, and things in a contested case proceeding.

*d.* Iowa Rule of Civil Procedure 1.510 shall apply to any requests for admission in a contested case proceeding. Iowa Rule of Civil Procedure 1.511 regarding the effect of an admission shall apply in contested case proceedings.

**20.19(3)** The mandatory disclosure and discovery conference requirements in Iowa Rules of Civil Procedure 1.500 and 1.507 do not apply to contested case proceedings. However, upon application by a party, the board may order the parties to comply with these procedures unless doing so would unreasonably complicate the proceedings or impose an undue hardship.

**20.19(4)** Iowa Rule of Civil Procedure 1.508 shall apply to discovery of any experts identified by a party to a contested case proceeding.

**20.19(5)** Discovery shall be served on all parties to the contested case proceeding but shall not be filed with the board.

**20.19(6)** A party may file a motion to compel or other motion related to discovery in accordance with this subrule. Any motion filed with the board relating to discovery shall allege that the moving party has previously made a good-faith attempt to resolve the discovery issues involved with the opposing party. Motions in regard to discovery shall be ruled upon by the presiding officer. Opposing parties shall be afforded the opportunity to respond within 10 days of the filing of the motion unless the time is lengthened or shortened by the presiding officer. The presiding officer may rule on the basis of the written motion and any response or may order argument on the motion.

**20.19(7)** Evidence obtained in discovery may be used in the contested case proceeding if that evidence would otherwise be admissible in that proceeding.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

#### **655—20.20(17A,272C) Issuance of subpoenas in a contested case.**

**20.20(1)** Subpoenas issued in a contested case may compel the attendance of witnesses at deposition or hearing and may compel the production of books, papers, records, and other real evidence. A command to produce evidence or to permit inspection may be joined with a command to appear at deposition or hearing or may be issued separately. Subpoenas shall be issued by the executive director or designee upon a written request that complies with the requirements of this rule. A request for a subpoena of mental health records must confirm that the conditions described in subrule 20.20(3) have been satisfied prior to the issuance of the subpoena. The executive director or designee may refuse to issue a subpoena if the request does not comply with the requirements of this rule.

**20.20(2)** A request for a subpoena shall include the following information, as applicable, unless the subpoena is requested to compel testimony or documents for rebuttal or impeachment purposes:

- a.* The name, address and telephone number of the person requesting the subpoena;
- b.* The name and address of the person to whom the subpoena shall be directed;
- c.* The date, time and location at which the person shall be commanded to attend and give testimony;
- d.* Whether the testimony is requested in connection with a deposition or hearing;
- e.* A description of the books, papers, records or other real evidence requested and the date, time and location for production or inspection and copying; and
- f.* In the case of a subpoena request for mental health records, confirmation that the conditions described in subrule 20.20(3) have been satisfied.

**20.20(3)** In the case of a request for a subpoena of mental health records, the request must confirm compliance with the following conditions prior to the issuance of the subpoena:

- a.* The nature of the issues in the case reasonably justifies the issuance of the requested subpoena;
- b.* Adequate safeguards have been established to prevent unauthorized disclosure;
- c.* An express statutory mandate, articulated public policy, or other recognizable public interest favors access; and
- d.* An attempt was made to notify the patient and to secure an authorization from the patient for the release of the records at issue.

**20.20(4)** Each subpoena shall contain, as applicable, the following:

- a.* The caption of the case;
- b.* The name, address and telephone number of the person who requested the subpoena;
- c.* The name and address of the person to whom the subpoena is directed;
- d.* The date, time and location at which the person is commanded to appear;
- e.* Whether the testimony is commanded in connection with a deposition or hearing;
- f.* A description of the books, papers, records or other real evidence the person is commanded to produce;
- g.* The date, time and location for production or inspection and copying;
- h.* The time within which the motion to quash or modify the subpoena must be filed;
- i.* The signature, address and telephone number of the executive director or designee;
- j.* The date of issuance;
- k.* A return of service.

**20.20(5)** Unless a subpoena is requested to compel testimony or documents for rebuttal or impeachment purposes, the executive director or designee shall mail copies of all subpoenas to the parties. The person who requested the subpoena is responsible for serving the subpoena upon the subject of the subpoena.

**20.20(6)** Any person who is aggrieved or adversely affected by compliance with the subpoena or any party to the contested case who desires to challenge the subpoena must, within 14 days after service of the subpoena, or before the time specified for compliance if such time is less than 14 days, file with the board a motion to quash or modify the subpoena. The motion shall describe the legal reasons why the subpoena should be quashed or modified and may be accompanied by legal briefs or factual affidavits.

**20.20(7)** Upon receipt of a timely motion to quash or modify a subpoena, the board may request an administrative law judge to issue a decision or the board may issue a decision. Oral argument may be scheduled at the discretion of the board or the administrative law judge. The administrative law judge or the board may quash or modify the subpoena, deny the motion, or issue an appropriate protective order.

**20.20(8)** A person aggrieved by a ruling of an administrative law judge who desires to challenge that ruling must appeal the ruling to the board by serving on the executive director in accordance with subrule 20.17(5) a notice of appeal within 10 days after service of the decision of the administrative law judge.

**20.20(9)** If the person contesting the subpoena is not a party to the contested case proceeding, the board's decision is final for purposes of judicial review. If the person contesting the subpoena is a party to the contested case proceeding, the board's decision is not final for purposes of judicial review until there is a final decision in the contested case.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

### **655—20.21(17A,272C) Motions.**

**20.21(1)** No technical form for motions is required. Prehearing motions must be in writing, state the grounds for relief, and state the relief sought.

**20.21(2)** Any party may file a written response to a motion within 10 days after the motion is served, unless the time period is lengthened or shortened by rules of the board or the presiding officer. The presiding officer may consider a failure to respond within the required time period in ruling on a motion.

**20.21(3)** The presiding officer may schedule oral argument on any motion.

**20.21(4)** Motions pertaining to the hearing must be filed and served at least 10 days prior to the date of hearing unless there is good cause for permitting later action or the time for such action is lengthened or shortened by rule of the board or the presiding officer.

**20.21(5)** Dispositive motions, such as motions for summary judgment or motions to dismiss, must be filed with the board and served on all parties to the contested case proceeding at least 30 days prior to the scheduled hearing date, unless otherwise ordered or permitted by the presiding officer. Any party may file a written response to a dispositive motion within 10 days after the motion is served, unless the time for response is otherwise lengthened or shortened by the presiding officer.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.22(17A,272C) Prehearing conferences.**

**20.22(1)** Any party may request a prehearing conference. Prehearing conferences shall be conducted by the executive director, who may request that an administrative law judge conduct the prehearing conference. A written request for prehearing conference or an order for prehearing conference on the executive director's own motion shall be filed not less than 7 days prior to the hearing date, unless authorized by the person conducting the prehearing conference. A prehearing conference shall be scheduled not less than 3 business days prior to the hearing date.

**20.22(2)** Each party shall be prepared to discuss the following subjects at the prehearing conference:

*a.* Submission of expert and other witness lists. Witness lists may be amended subsequent to the prehearing conference within the time limits established by the executive director or administrative law judge at the prehearing conference. Any such amendments must be served on all parties. Witnesses not listed on the final witness list may be excluded from testifying unless there was good cause for the failure to include their names.

*b.* Submission of exhibit lists. Exhibit lists may be amended subsequent to the prehearing conference within the time limits established by the executive director or administrative law judge at the prehearing conference. Other than rebuttal exhibits, exhibits that are not listed on the final exhibit list may be excluded from admission into evidence unless there was good cause for the failure to include them.

*c.* The entry of a scheduling order to include deadlines for completion of discovery.

*d.* Stipulations of law or fact.

*e.* Stipulations on the admissibility of exhibits.

*f.* Identification of matters which the parties intend to request be officially noticed.

*g.* Consideration of any additional matters which will expedite the hearing.

**20.22(3)** Prehearing conferences shall be conducted by telephone unless otherwise ordered.

**20.22(4)** A party must seek intra-agency appeal to the board of prehearing rulings made by an administrative law judge in order to adequately exhaust administrative remedies. Such appeals must be filed within 10 days of the date of the issuance of the challenged ruling but no later than the time for compliance with the order or the date of hearing, whichever is first.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.23(17A,272C) Continuances.** Unless otherwise provided, requests for continuance shall be filed with the board.

**20.23(1)** A written request for a continuance shall:

*a.* Be made at the earliest possible time and no less than 7 days before the hearing except in cases of unanticipated emergencies;

*b.* State the specific reasons for the request; and

*c.* Be signed by the requesting party or the party's attorney.

**20.23(2)** No request for continuance shall be made or granted without notice to all parties except in an emergency where notice is not feasible. The presiding officer may allow an oral application for continuance at the contested case hearing only in the event of an unanticipated emergency.

**20.23(3)** The presiding officer or the executive director has the authority to grant or deny a request for a continuance in accordance with this subrule. The executive director or an administrative law judge may enter an order granting an uncontested request for a continuance. Upon consultation with the board chair,

the executive director or an administrative law judge may deny an uncontested request for a continuance or may rule on a contested request for continuance.

**20.23(4)** In determining whether to grant a continuance, the presiding officer or the executive director may require documentation of any grounds for continuance and may consider:

- a.* Prior continuances;
- b.* The interests of all parties;
- c.* The public interest;
- d.* The likelihood of settlement;
- e.* The existence of an emergency;
- f.* Any objection;
- g.* Any applicable time requirements;
- h.* The existence of a conflict in the schedules of counsel, parties, or witnesses;
- i.* The timeliness of the request; and
- j.* Other relevant factors.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.24(17A,272C) Settlement agreements.**

**20.24(1)** A contested case may be resolved by settlement agreement. Settlement negotiations may be initiated by any party at any stage of a contested case. No party is required to participate in the settlement process.

**20.24(2)** If the respondent initiates or consents to settlement negotiations, the assistant attorney general prosecuting the case may discuss settlement with the board chair without violating the prohibition against ex parte communications in Iowa Code section 17A.17 and without disqualifying the board chair from participating in the adjudication of the contested case. The full board shall not be involved in settlement negotiations until a proposed settlement agreement executed by the respondent is submitted to the board for approval.

**20.24(3)** By signing the proposed settlement agreement, the respondent authorizes an assistant attorney general to have ex parte communications with the board related to the terms of the proposed settlement. If the board fails to approve the proposed settlement agreement, it shall be of no force or effect to either party and shall not be admissible at hearing. Upon rejecting a proposed settlement agreement, the board may suggest alternative terms of settlement, which the respondent is free to accept or reject.

**20.24(4)** A settlement agreement is a permanent public record open for inspection under Iowa Code chapter 22.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.25(17A,272C) Hearing procedures in contested cases.**

**20.25(1)** The presiding officer shall be in control of the proceedings and shall have the authority to administer oaths and to admit or exclude testimony or evidence and shall rule on all motions and objections. The board may request that an administrative law judge assist the board by performing any of these functions.

**20.25(2)** When, in the opinion of the board, it is desirable to obtain specialists within an area of practice when holding disciplinary hearings, the board may appoint a panel of three specialists who are not board members to make findings of fact and to report to the board. Such findings shall not include any recommendation for or against licensee discipline.

**20.25(3)** An applicant or respondent has the right to participate or to be represented in all hearings related to the applicant's or respondent's case. Any applicant or respondent may be represented by an attorney at the party's own expense.

**20.25(4)** All objections shall be timely made and stated on the record.

**20.25(5)** Subject to terms prescribed by the presiding officer, parties have the right to introduce evidence on issues of material fact, cross-examine witnesses present at the hearing as necessary for a full and true disclosure of the facts, present evidence in rebuttal, submit briefs, and engage in oral argument.

**20.25(6)** The presiding officer shall maintain the decorum of the hearing and may refuse to admit or may expel anyone whose conduct is disorderly.

**20.25(7)** All rulings by an administrative law judge who acts either as presiding officer or as an aid to the board are subject to appeal to the board. While a party may seek immediate board review of rulings made by an administrative law judge when the administrative law judge is sitting with and acting as an aid to the board or panel of specialists during a hearing, such immediate review is not required to preserve error for judicial review.

**20.25(8)** Conduct of hearing. The presiding officer shall conduct the hearing in the following manner:

*a.* The presiding officer shall give an opening statement briefly describing the nature of the proceedings;

*b.* The parties shall be given an opportunity to present opening statements;

*c.* Parties shall present their cases in the sequence determined by the presiding officer;

*d.* Each witness shall be sworn or affirmed by the presiding officer or the court reporter and be subject to examination and cross-examination. The board members and administrative law judge have the right to question a witness. The presiding officer may limit questioning in a manner consistent with law;

*e.* When all parties and witnesses have been heard, parties may be given the opportunity to present final arguments.

**20.25(9)** The hearing shall be open to the public unless the respondent requests that the hearing be closed, in accordance with Iowa Code section 272C.6(1). At the request of either party, or on the board's own motion, the presiding officer may issue a protective order to protect documents which are privileged or confidential by law.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

#### **655—20.26(17A,272C) Evidence.**

##### **20.26(1) General.**

*a.* Relevant evidence is admissible, subject to the discretion of the presiding officer. Irrelevant, immaterial and unduly repetitious evidence should be excluded. A finding will be based upon the kind of evidence on which reasonably prudent persons are accustomed to rely for the conduct of their serious affairs, and may be based on hearsay or other types of evidence which may or would be inadmissible in a jury trial.

*b.* The presiding officer shall rule on admissibility of evidence and may, where appropriate, take official notice of facts in accordance with all applicable requirements of law.

*c.* Stipulation of facts is encouraged. The presiding officer may make a decision based on stipulated facts.

*d.* Evidence in the proceeding shall be confined to the issues as to which the parties received notice prior to the hearing unless the parties waive their right to such notice or the presiding officer determines that good cause justifies expansion of the issues. If the presiding officer decides to admit evidence on issues outside the scope of the notice over the objection of a party who did not have actual notice of those issues, that party, upon timely request, shall receive a continuance sufficient to amend pleadings and to prepare on the additional issue.

*e.* Any party may object to specific evidence or may request limits on the scope of any examination or cross-examination. Such an objection shall be accompanied by a brief statement of the grounds upon which it is based. The objection, the ruling on the objection, and the reasons for the ruling shall be noted in the record. The presiding officer may rule on the objection at the time it is made or may reserve a ruling until the written decision.

*f.* Whenever evidence is ruled inadmissible, the party offering that evidence may submit an offer of proof on the record. The party making the offer of proof for excluded oral testimony shall briefly summarize the testimony or, with permission of the presiding officer, present the testimony. If the excluded evidence consists of a document or exhibit, it shall be marked as part of an offer of proof and inserted in the record.

**20.26(2) Exhibits.**

*a.* The party seeking admission of an exhibit must provide opposing parties with an opportunity to examine the exhibit prior to the ruling on its admissibility. Copies of documents should normally be provided to opposing parties. If admitted, copies of documents should be distributed to individual board members and the administrative law judge. Unless prior arrangements have been made, the party seeking admission of a document should arrive at the hearing prepared with sufficient copies of the document to distribute to opposing parties, board members, the administrative law judge, and witnesses who are expected to examine the document. The state's exhibits shall be marked numerically, and the applicant's or respondent's exhibits shall be marked alphabetically.

*b.* All exhibits admitted into evidence shall be appropriately marked and be made part of the record.

*c.* An original is not required to prove the content of a writing, recording, or photograph. Duplicates or photocopies are admissible. Any objection related to the authenticity of an exhibit shall go to the weight given to that exhibit and not preclude its admissibility.

**20.26(3) Witnesses.**

*a.* Witnesses may be sequestered during the hearing.

*b.* Subject to the terms prescribed by the presiding officer and the limitations in Iowa Rule of Civil Procedure 1.704, parties may present the testimony of witnesses in person, by telephone, by videoconference, by affidavit, or by written or video deposition. If a witness is providing testimony in person, by telephone, or by videoconference, use of any deposition is limited by Iowa Rule of Civil Procedure 1.704.

*c.* Witnesses are entitled to be represented by an attorney at their own expense. In a closed hearing, the attorney may be present only when the client testifies. The attorney may assert legal privileges personal to the client, but may not make other objections. The attorney may only ask questions to the client to prevent a misstatement from being entered into the record.

*d.* The parties in a contested case shall be responsible for any witness fees and expenses incurred by witnesses appearing at the contested case hearing, unless otherwise specified or allocated in an order. The costs for lay witnesses shall be determined in accordance with Iowa Code section 622.69. The costs for expert witnesses shall be determined in accordance with Iowa Code section 622.72. Witnesses are entitled to reimbursement for mileage and may be entitled to reimbursement for meals and lodging, as incurred.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.27(17A,272C) Default.**

**20.27(1)** If a party fails to appear or participate in a contested case proceeding after proper service of notice, the presiding officer may, if no adjournment is granted, enter a default decision or proceed with the hearing and render a decision in the absence of the party.

**20.27(2)** Where appropriate and not contrary to law, any party may move for default against a party who has requested the contested case proceeding and has failed to file a required pleading or has failed to appear after proper service.

**20.27(3)** Default decisions or decisions rendered on the merits after a party has failed to appear or participate in a contested case proceeding become final agency action unless, within 15 days after the date of notification or mailing of the decision, a motion to vacate is filed and served on all parties or an appeal of a decision on the merits is timely initiated within the time provided by rule 655—20.30(17A,272C). A motion to vacate must state all facts relied upon by the moving party which establish that good cause existed for that party's failure to appear or participate at the contested case proceeding. Each fact so stated must be substantiated by at least one sworn affidavit from a person with personal knowledge of each such fact. The affidavit(s) must be attached to the motion.

**20.27(4)** The time for further appeal of a decision for which a timely motion to vacate has been filed is stayed pending a decision on the motion to vacate.

**20.27(5)** Properly substantiated and timely filed motions to vacate shall be granted only for good cause shown. The burden of proof as to good cause is on the moving party. Adverse parties shall have

10 days to respond to a motion to vacate. Adverse parties shall be allowed to conduct discovery as to the issue of good cause and to present evidence on the issue prior to a decision on the motion, if a request to do so is included in that party's response.

**20.27(6)** "Good cause" for purposes of this rule shall have the same meaning as "good cause" for setting aside a default judgment under Iowa Rule of Civil Procedure 1.971.

**20.27(7)** A decision by an administrative law judge granting or denying a motion to vacate is subject to appeal to the board within 20 days.

**20.27(8)** If a motion to vacate is granted and no timely appeal to the board has been filed, the presiding officer shall issue a rescheduling order setting a new hearing date and the contested case shall proceed accordingly.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.28(17A,272C) Ex parte communication.**

**20.28(1)** Prohibited communications. Unless required for the disposition of ex parte matters specifically authorized by statute, following issuance of the notice of hearing, there shall be no communication, directly or indirectly, between the presiding officer and any party or representative of any party or any other person with a direct or indirect interest in such case in connection with any issue of fact or law in the case, except upon notice and opportunity for all parties to participate. This does not prohibit persons jointly assigned such tasks from communicating with each other. Nothing in this provision is intended to preclude the presiding officer from communicating with members of the agency or seeking the advice or help of persons other than those with a personal interest in, or those engaged in personally investigating as defined in subrule 20.11(2), prosecuting, or advocating in, either the case under consideration or a pending factually related case involving the same parties, as long as those persons do not directly or indirectly communicate to the presiding officer any ex parte communications they have received of a type that the presiding officer would be prohibited from receiving or that furnish, augment, diminish, or modify the evidence in the record.

**20.28(2)** Prohibitions on ex parte communications commence with the issuance of the notice of hearing in a contested case and continue for as long as the case is pending.

**20.28(3)** Written, oral or other forms of communication are "ex parte" if made without notice and opportunity for all parties to participate.

**20.28(4)** To avoid prohibited ex parte communications, notice must be given in a manner reasonably calculated to give all parties a fair opportunity to participate. Notice of written communications shall be provided in compliance with rule 655—20.17(17A,272C) and may be supplemented by telephone, facsimile, electronic mail or other means of notification. Where permitted, oral communications may be initiated through telephone conference call which includes all parties or their representatives.

**20.28(5)** Persons who jointly act as presiding officer in a pending contested case may communicate with each other without notice or opportunity for parties to participate.

**20.28(6)** The executive director or designee may be present in deliberations or otherwise advise the presiding officer without notice or opportunity for parties to participate as long as the executive director or designee is not disqualified from participating in the making of a proposed or final decision under subrule 20.11(1) or other law and the executive director or designee complies with subrule 20.28(1).

**20.28(7)** Communications with the presiding officer involving scheduling or uncontested procedural matters do not require notice or opportunity for parties to participate. A party should notify other parties prior to initiating such contact with the presiding officer when feasible.

**20.28(8)** A presiding officer who received a prohibited ex parte communication during the pendency of a contested case must initially determine if the effect of the communication is so prejudicial that the presiding officer should be disqualified. If the presiding officer determines that disqualification is warranted, a copy of any prohibited written communication, all written responses to the communication, a written summary stating the substance of any prohibited oral or other communication not available in written form for disclosure, all responses made, and the identity of each person from whom the presiding officer received a prohibited ex parte communication shall be submitted for inclusion in the record under seal by protective order. If the presiding officer determines that disqualification is not warranted, such

documents shall be submitted for inclusion in the record and served on all parties. Any party desiring to rebut the prohibited communication must be allowed the opportunity to do so upon written request filed within 10 days after notice of the communication.

**20.28(9)** Promptly after being assigned to serve as presiding officer, the presiding officer shall disclose to all parties material factual information received through ex parte communication prior to such assignment, unless the factual information has already been or shortly will be disclosed pursuant to Iowa Code section 17A.13(2) or through discovery. Factual information contained in an investigative report or similar document need not be separately disclosed by the presiding officer as long as such documents have been or will shortly be provided to the parties.

**20.28(10)** The presiding officer may render a proposed or final decision imposing appropriate sanctions for violations of this rule including default, a decision against the offending party, censure, or suspension or revocation of the privilege to practice before the board. Violation of ex parte communication prohibitions by board personnel shall be reported to the board's executive director for possible sanctions including: censure, suspension, dismissal, or other disciplinary action.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.29(17A,272C) Recording.** Contested case hearings shall be recorded by electronic means or by a certified shorthand reporter. A party may request that a hearing be recorded by a certified shorthand reporter instead of through electronic means by filing a request with the board at least 14 days in advance of the hearing. Parties who request that a hearing be recorded by a certified shorthand reporter rather than by electronic means shall bear the cost of the certified shorthand reporter. Upon request, the board shall provide a copy of the whole or any portion of the record at cost. The cost of preparing a copy of the record or of transcribing the hearing record shall be paid by the requesting party. If the request for the hearing record is made as a result of a petition for judicial review, the party who filed the petition shall be considered the requesting party.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.30(17A,272C) Proposed decisions.** Decisions issued by an administrative law judge in nondisciplinary cases are proposed decisions. A proposed decision issued by an administrative law judge becomes a final decision if not timely appealed or reviewed in accordance with this rule.

**20.30(1) Appeal by party.** Any adversely affected party may appeal a proposed decision to the board within 30 days after issuance of the proposed decision.

**20.30(2) Review.** The board may initiate review of a proposed decision on its own motion at any time within 30 days following the issuance of such a decision.

**20.30(3) Exhaustion.** A party must timely seek intra-agency appeal of a proposed decision in order to adequately exhaust administrative remedies.

**20.30(4) Notice of appeal.** An appeal of a proposed decision is initiated by filing a timely notice of appeal with the board. The notice of appeal must be signed by the appealing party or an attorney for that party and contain a certificate of service. The notice shall specify:

- a. The parties initiating the appeal;
- b. The proposed decision or order which is being appealed;
- c. The specific findings or conclusions to which exception is taken and any other exceptions to the decision or order;
- d. The relief sought;
- e. The grounds for relief.

**20.30(5) Requests to present additional evidence.** A party may request the taking of additional evidence only by establishing that the evidence is material, that good cause existed for the failure to present the evidence at the hearing, and that the party has not waived the right to present the evidence. A written request to present additional evidence must be filed with the notice of appeal or, by a nonappealing party, within 14 days of service of the notice of appeal. The board may remand a case to the presiding officer for further hearing or may itself preside at the taking of additional evidence.

**20.30(6) Scheduling.** The board shall issue a schedule for consideration of the appeal.

**20.30(7) Briefs and arguments.** Unless otherwise ordered, within 20 days of the notice of appeal or order for review, each appealing party may file exceptions and briefs. Within 20 days thereafter, any party may file a responsive brief. Briefs shall cite any applicable legal authority and specify relevant portions of the record in that proceeding. Written requests to present oral argument shall be filed with the briefs. The board may resolve the appeal on the briefs or provide an opportunity for oral argument. The board may shorten or extend the briefing period as appropriate.

**20.30(8) Record.** The record on appeal or review shall be the entire record made before the administrative law judge.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.31(17A,272C) Final decisions.**

**20.31(1)** A final decision of the board shall include findings of fact and conclusions of law. When the board presides over the reception of the evidence at the hearing, its decision is a final decision.

**20.31(2)** The board may charge a fee to the licensee not to exceed \$75 for conducting a disciplinary hearing which results in disciplinary action taken against the licensee by the board.

**20.31(3)** Final decisions shall be served on the respondent or applicant using one of the following methods:

- a. Personal service, as provided in the Iowa Rules of Civil Procedure, or
- b. Certified mail, return receipt requested, or
- c. Signed acknowledgment accepting service, or
- d. When service cannot be accomplished using the above methods:
  - (1) An affidavit shall be prepared outlining the measures taken to attempt service; and
  - (2) The final decision shall be published once each week for three consecutive weeks in a newspaper of general circulation, published or circulated in the county of last-known residence of the respondent.
- e. If the respondent or applicant is represented by an attorney, the final decision shall be mailed to the attorney. The attorney may waive the requirement to serve the respondent or applicant through a written acknowledgment that the attorney is accepting service on behalf of the client. The state shall be served by first-class mail or state interoffice mail.

**20.31(4)** A final decision is a permanent public record open for inspection under Iowa Code chapter 22, in accordance with Iowa Code section 272C.6(4).

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.32(17A,272C) Applications for rehearing.**

**20.32(1) Who may file.** Any party to a contested case proceeding may file an application for rehearing from a final order.

**20.32(2) Content of application.** An application for rehearing shall state on whose behalf it is filed, the specific grounds for rehearing, and the relief sought. In addition, the application shall state whether the applicant desires reconsideration of all or part of the board decision on the existing record and whether, upon showing good cause, the applicant requests an opportunity to submit additional evidence. A party may request the taking of additional evidence after the issuance of a final order only by establishing that:

- a. The evidence is material; and
- b. The evidence arose after the completion of the original hearing; or
- c. Good cause exists for failure to present the evidence at the original hearing; and
- d. The party has not waived the right to present additional evidence.

**20.32(3) Time of filing.** The application shall be filed with the board office within 20 days after issuance of the final decision.

**20.32(4) Notice to other parties.** A copy of the application shall be timely mailed by the applicant to all parties of record not joining therein. If the application does not contain a certificate of service, the board shall serve copies on all parties.

**20.32(5) Disposition.** Any application for a rehearing shall be deemed denied unless the board grants the application within 20 days after its filing.

**20.32(6) *Only remedy.*** Application for rehearing is the only procedure by which a party may request that the board reconsider a final board decision.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.33(17A,272C) Stays of agency actions.**

**20.33(1) *When available.*** Any party to a contested case proceeding may petition the board for a stay of an order issued in that proceeding or for other temporary remedies, pending review by the board or pending judicial review. The petition shall state the reasons justifying a stay or other temporary remedy. The petition must be filed within 30 days of the issuance of the final order, or if a party filed a request for rehearing that was denied, the petition must be filed within 30 days after the request for rehearing was denied or deemed denied.

**20.33(2) *When granted.*** The board shall not grant a stay in any case in which the district court would be expressly prohibited by statute from granting a stay. In determining whether to grant a stay, the presiding officer shall consider the following factors:

- a. The extent to which the applicant is likely to prevail when the board or court finally disposes of the matter;
- b. The extent to which the applicant will suffer irreparable injury if relief is not granted;
- c. The extent to which the grant of relief to the applicant will substantially harm other parties to the proceedings;
- d. The extent to which the public interest relied on by the board is sufficient to justify the board's action in the circumstances.

**20.33(3) *Exhaustion required.*** A party must petition the board for a stay pursuant to this rule prior to requesting a stay from the district court in a judicial review proceeding.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.34(17A,272C) No factual dispute contested cases.** If the parties agree that no dispute of material fact exists as to a matter that would be a contested case if such a dispute of fact existed, the parties may present all relevant admissible evidence either by stipulation or otherwise as agreed by the parties, without necessity for the production of evidence at an evidentiary hearing. If such agreement is reached, a jointly submitted schedule detailing the method and timetable for submission of the record, briefs and oral argument should be submitted to the presiding officer for approval as soon as practicable.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.35(17A,272C) Emergency adjudicative proceedings.**

**20.35(1) *Necessary emergency action.*** To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare, the board may issue a written order in compliance with Iowa Code section 17A.18 to suspend a license in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the agency by emergency adjudicative order. Before issuing an emergency adjudicative order, the board shall consider factors including, but not limited to, the following:

- a. Whether there has been a sufficient factual investigation to ensure that the agency is proceeding on the basis of reliable information;
- b. Whether the specific circumstances which pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;
- c. Whether the person required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;
- d. Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and
- e. Whether the specific action contemplated by the agency is necessary to avoid the immediate danger.

**20.35(2) Issuance.**

a. An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the board's decision to take immediate action.

b. The written emergency adjudicative order shall be immediately served on persons who are required to comply with the order by utilizing one or more of the following procedures:

- (1) Personal service, as provided in the Iowa Rules of Civil Procedure, or
- (2) Certified restricted mail, return receipt requested, or
- (3) Signed acknowledgment accepting service.

c. To the degree practicable, the board shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

**20.35(3) Notice.** Unless the written emergency adjudicative order is served personally on the same day that the order issues, the board shall make reasonable immediate efforts to contact by telephone and electronic mail the persons who are required to comply with the order.

**20.35(4) Proceedings.** Issuance of a written emergency adjudicative order shall include notification of the date on which agency proceedings are scheduled for hearing. After issuance of an emergency adjudicative order, the licensee subject to the emergency adjudicative order may request a continuance of the hearing at any time by filing a request with the board. The state may only file a request for a continuance in compelling circumstances. Nothing in this subrule shall be construed to eliminate the opportunity to resolve the matter with a settlement agreement.

**20.35(5) Public record.** An emergency adjudicative order is a permanent public record open for inspection under Iowa Code chapter 22.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.36(17A,147,272C) Application for reinstatement.** Any person whose license to practice nursing has been revoked or has been voluntarily surrendered may apply for reinstatement. An application for reinstatement must be made in accordance with the terms specified in the board's order of revocation or order accepting the voluntary surrender. Any person whose license to practice nursing has been suspended and the board order imposing the suspension indicates that the respondent must apply for and receive reinstatement may apply for reinstatement in accordance with the terms specified in the board's order. All applications for reinstatement must be filed in accordance with this rule.

**20.36(1)** If the order for revocation, suspension, or surrender did not establish terms for reinstatement, an initial application for reinstatement may not be filed until at least one year has elapsed from the date of issuance of the order. Persons who have failed to satisfy the terms imposed by the board order revoking, suspending, or surrendering a license shall not be entitled to apply for reinstatement.

**20.36(2)** Reinstatement proceedings shall be initiated by the respondent, who shall file with the board an application for reinstatement of the respondent's license. Such application shall be docketed in the original contested case in which the license was revoked, suspended, or surrendered. The person filing the application for reinstatement shall immediately serve a copy upon the office of the attorney general and shall serve any additional documents filed in connection with the application.

**20.36(3)** The application shall allege facts and circumstances which, if established, will be sufficient to enable the board to determine that the basis for the revocation, suspension, or surrender no longer exists and that it shall be in the public interest for the license to be reinstated. The application shall include written evidence supporting the respondent's assertion that the basis for the revocation, suspension, or surrender no longer exists and that it shall be in the public interest for the license to be reinstated. Such evidence may include, but is not limited to: medical and mental health records establishing successful completion of any necessary medical or mental health treatment and aftercare recommendations; documentation verifying successful completion of any court-imposed terms of probation; statements from support group sponsors verifying active participation in a support group; verified statements from current and past employers attesting to employability; and evidence establishing that prior professional competency or unethical conduct issues have been resolved. The burden of proof to establish such facts shall be on the respondent.

**20.36(4)** The executive director or designee shall review the application for reinstatement and determine if it conforms to the terms established in the board order that revoked, suspended, or surrendered the license and the requirements imposed by this rule. Applications failing to comply with the specified terms or with the requirements in this rule will be denied. Such denial shall be in writing, stating the grounds, and may be appealed by requesting a hearing before the board.

**20.36(5)** Applications not denied for failure to conform to the terms established in the board order that revoked, suspended, or surrendered the license or requirements imposed by this rule may be set for hearing before the board. The hearing shall be a contested case hearing within the meaning of Iowa Code section 17A.12, and the order to grant or deny reinstatement shall incorporate findings of fact and conclusions of law. If reinstatement is granted, terms may be imposed. Nothing shall prohibit the board from entering into a stipulated order granting reinstatement with or without terms in the absence of a hearing.

**20.36(6)** A nurse whose license is reinstated must complete the requirements for license reactivation in order to receive an active license.

**20.36(7)** An order granting or denying reinstatement is a permanent public record open for inspection under Iowa Code chapter 22.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.37(17A,22,272C) Dissemination of public records.** All documents identified in this chapter as permanent public records open for inspection under Iowa Code chapter 22 are reported to NURSYS® and national databanks in accordance with applicable reporting requirements. In addition, these documents may be posted on the board's Web site, published in the board's newsletter, distributed to national or state associations, transmitted to mailing lists or news media, issued in conjunction with a press release, or otherwise disseminated.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

**655—20.38(17A) Judicial review.** Judicial review of a final order of the board may be sought in accordance with the terms of Iowa Code chapter 17A.

[ARC 2339C, IAB 1/6/16, effective 2/10/16]

These rules are intended to implement Iowa Code chapters 17A, 147, 152, 152E and 272C.

[Filed ARC 2339C (Notice ARC 2109C, IAB 8/19/15), IAB 1/6/16, effective 2/10/16]

- 53.2(78GA,HF2492) Programs, services, and fees

## CHAPTERS 54 to 60

Reserved

## CHAPTER 61

## REDUCED IGNITION PROPENSITY CIGARETTES

- 61.1(101B) Definitions
- 61.2(101B) Restriction on sale of cigarettes
- 61.3(101B) Test method, performance standard, test report
- 61.4(101B) Alternate test method
- 61.5(101B) Acceptance of alternate test method approved by another state
- 61.6(101B) Retention of reports of testing
- 61.7(101B) Testing performed or sponsored by the department
- 61.8 and 61.9 Reserved

61.10(101B)	Certification and fee
61.11(101B)	Changes to the manufacture of a certified reduced ignition propensity cigarette
61.12(101B)	Notification of certification
61.13(101B)	Marking reduced ignition propensity cigarette packaging
61.14 to 61.19	Reserved
61.20(101B)	Applicability—preemption
61.21(17A)	Violations and penalties

## CHAPTERS 62 to 79

Reserved

## CHAPTER 80

## PUBLIC RECORDS AND FAIR INFORMATION PRACTICES

80.1(17A,22)	Definition
80.2(17A,22)	Statement of policy
80.3(17A,22)	Requests for access to records
80.4(17A,22)	Procedures for access to confidential records
80.5(17A,22)	Requests for treatment of a record as a confidential record
80.6(17A,22)	Procedure by which a subject may have additions, dissents, or objections entered into the record
80.7(17A,22)	Consent to disclosure by the subject of a confidential record
80.8	Reserved
80.9(17A,22)	Disclosures without the consent of the subject
80.10(17A,22)	Routine use
80.11(17A,22)	Records retention manual
80.12(17A,22)	Data processing system
80.13(22)	Confidential records
80.14(252J)	Release of confidential licensing information for child support recovery purposes
80.15(22,80F)	Release of official photographs of employees

## CHAPTER 81

## CRIMINAL INTELLIGENCE INFORMATION

81.1(692)	Definitions
81.2(692)	Iowa law enforcement intelligence network (LEIN) information system
81.3(692)	Criminal intelligence file security
81.4(692)	Review of criminal intelligence files—purging
81.5(692)	Subpoenas and court orders

## CHAPTER 82

## CRIMINAL HISTORY AND FINGERPRINT RECORDS

82.1(690,692)	Records and identification section
82.2(690,692)	Definitions
82.3(690,692)	Tracking criminal history data
82.4 to 82.100	Reserved

DIVISION I  
CRIMINAL HISTORY DATA

82.101(690,692)	Release of information
82.102(690,692)	Right of review
82.103(690,692)	Review of record
82.104(17A,690,692)	Inaccuracies in criminal history record
82.105(17A,690,692)	Arresting agency portion of final disposition form
82.106(690,692)	Final disposition form
82.107(692)	Release of information to the public

- 82.108(692) Scope of record checks for non-criminal justice agencies and individuals
- 82.109(692) Fees
- 82.110(17A,22,692) Requests for criminal history data
- 82.111(690) Administrative sanctions
- 82.112(692) Criminal history record checks for qualified entities or authorized agencies
- 82.113 to 82.200 Reserved

DIVISION II  
FINGERPRINT RECORDS

- 82.201(17A,690,692) Fingerprint files and crime reports
- 82.202(690) Taking of fingerprints
- 82.203 to 82.300 Reserved

DIVISION III  
JUVENILE RECORDS

- 82.301(232) Juvenile fingerprints and criminal histories

CHAPTER 83  
IOWA SEX OFFENDER REGISTRY

- 83.1(692A) Sex offender registry established
- 83.2(692A) Definitions
- 83.3(692A) Forms and procedures
- 83.4(692A) Availability of records
- 83.5(692A) Expungement of records

CHAPTERS 84 to 86  
Reserved

CHAPTER 87  
WIRELESS COMMUNICATIONS SERVICE PROVIDER DATABASE

- 87.1(34A) Wireless communications service provider database established
- 87.2(34A) Definitions
- 87.3(34A) Administration of database
- 87.4(34A) Confidentiality
- 87.5(34A) Database requirements
- 87.6(34A) Procedures to request provider information

- CHAPTER 88  
NOTIFICATION OF LAW ENFORCEMENT AGENCY BY HOSPITAL PRIOR TO DISCHARGE  
OF A PERSON WITH SERIOUS MENTAL IMPAIRMENT
- 88.1(229) Notification request

CHAPTER 89  
MISSING PERSONS

- 89.1 to 89.99 Reserved

DIVISION I  
MISSING PERSON INFORMATION CLEARINGHOUSE

- 89.100(694) Missing person information clearinghouse
- 89.101(694) Administration of missing person information clearinghouse
- 89.102(694) Definitions
- 89.103(694) Program information
- 89.104(694) Prevention and education programs and materials
- 89.105(694) Release of information
- 89.106(694) Dissemination
- 89.107(694) Training

89.108 to 89.199 Reserved

DIVISION II  
AMBER ALERT PROGRAM

89.200(694) AMBER alert program  
89.201(694) Criteria  
89.202(694) Activation procedures  
89.203(694) Alternative alert if criteria are not satisfied

CHAPTER 90  
Reserved

CHAPTER 91

WEAPONS AND IOWA PROFESSIONAL PERMITS TO CARRY WEAPONS

91.1(724) Definitions  
91.2(724) Forms  
91.3(724) Federal and state prohibitions—permit to carry weapons  
91.4(724) Application procedures for an Iowa professional permit to carry weapons  
91.5(724) Issuance or denial of application for permit to carry weapons  
91.6(724) Suspension or revocation of permit to carry weapons  
91.7(724) Appeals  
91.8(724) Reports and remittance to the state  
91.9(724) Offensive weapons as collector's items—method of classification

CHAPTER 92  
Reserved

CHAPTER 93

IDENTIFICATION CARDS FOR FORMER PEACE OFFICERS  
OF THE IOWA DEPARTMENT OF PUBLIC SAFETY

93.1(18USC926C) General provisions  
93.2(18USC926C) Definitions  
93.3(18USC926C) Application for former peace officer ID card  
93.4(18USC926C) Annual firearms qualification—certification card  
93.5(17A) Appeals

CHAPTER 94  
Reserved

CHAPTER 95

DISPOSITION OF SEIZED AND FORFEITED WEAPONS AND AMMUNITION

95.1(809,809A) Definitions  
95.2(809,809A) Ammunition and firearms  
95.3(809,809A) Firearms inventory  
95.4(809,809A) Deposit of firearms in the firearms reference file  
95.5(809,809A) Disposition of firearms (interstate)  
95.6(809A) Transfer of rifles and shotguns to the department of natural resources  
95.7(809,809A) Disposition of firearms (intrastate)  
95.8(809,809A) Final disposition and destruction of firearms  
95.9(809,809A) Claims  
95.10(809,809A) Disposition of explosives  
95.11(809,809A) Disposition of weapons other than firearms and explosives

CHAPTERS 96 to 120  
Reserved

CHAPTER 121  
BAIL ENFORCEMENT, PRIVATE INVESTIGATION, AND  
PRIVATE SECURITY BUSINESSES

121.1(80A)	Licensing
121.2(80A)	Definitions
121.3(80A)	Persons exempt
121.4(80A)	Licenses
121.5(80A)	License requirements
121.6(80A)	Identification cards
121.7(80A)	License and background investigation fees
121.8(80A)	Display of license
121.9(80A)	Duplicate license
121.10(80A)	License renewal
121.11(80A)	Employee identification cards
121.12(80A)	Badges, uniforms, insignia, patches and hats
121.13(80A)	Advertisement, cards, letterhead and the like
121.14(80A)	Misleading statements
121.15(80A)	Reports
121.16(80A)	Denial, cancellation, suspension, or revocation of a license or identification card
121.17(80A)	Licensee's duty regarding employees
121.18(80A)	Campus weapon requirements
121.19(80A)	Professional permit to carry weapons
121.20(80A)	Appeals
121.21(252J)	Child support collection procedures
121.22(80A)	Continuing education requirements
121.23(80A)	Reciprocity
121.24(80A)	Replacement license

CHAPTERS 122 to 140  
Reserved

CHAPTER 141  
CLOSED CIRCUIT SURVEILLANCE SYSTEMS

141.1(99F)	Definitions
141.2 and 141.3	Reserved
141.4(99F)	Closed circuit surveillance system
141.5(99F)	Required equipment
141.6(99F)	Required surveillance
141.7(99F)	Equipment in DCI offices
141.8(99F)	Camera lenses
141.9(99F)	Lighting
141.10(99F)	Surveillance room
141.11(99F)	Nongambling hours
141.12(99F)	Waivers from requirements

CHAPTERS 142 to 149  
Reserved

CHAPTER 150  
DIVISION OF CRIMINAL INVESTIGATION CRIMINALISTICS LABORATORY

150.1(691)	Criminalistics laboratory
150.2(691)	Purpose and scope of work
150.3(691)	Laboratory capabilities

- 150.4(691) Evidence submission to the laboratory
- 150.5(17A,691) Distribution of reports
- 150.6(17A,691) Disposition of evidence

CHAPTERS 151 to 155  
Reserved

CHAPTER 156  
DNA DATABASE

- 156.1(81) Establishment of DNA database
- 156.2(81) Definitions
- 156.3(81) Administration of DNA database
- 156.4(81) Collection of DNA samples
- 156.5(81) Submission of DNA samples
- 156.6(81) Analysis of DNA samples
- 156.7(81) Identification of DNA samples
- 156.8(81) Storage of DNA samples
- 156.9 Reserved
- 156.10(81) Expungement of DNA samples

CHAPTER 157

DEVICES AND METHODS TO TEST BODY FLUIDS FOR ALCOHOL OR DRUGS

- 157.1(321J) Approval of devices and methods to test for alcohol or drug concentration
- 157.2(321J) Evidentiary breath testing
- 157.3(321J) Urine collection
- 157.4(321J) Submission of samples for alcohol and drug testing to the criminalistics laboratory
- 157.5(321J) Preliminary breath screening test
- 157.6(123) Chemical test—alcohol concentration—public intoxication
- 157.7(321J) Detection of drugs other than alcohol

CHAPTER 158

IGNITION INTERLOCK DEVICES

- 158.1(321J) Scope and authority
- 158.2(321J) Definitions
- 158.3(321J) Approval
- 158.4(321J) Revocation of approval
- 158.5(321J) Modifications to an approved IID
- 158.6(321J) Mandatory operational features
- 158.7(321J) IID security
- 158.8(321J) IID maintenance and reports
- 158.9(321J) Other provisions

CHAPTERS 159 to 173  
Reserved

CHAPTER 174

RETAIL SALES OF PSEUDOEPHEDRINE

- 174.1(81GA,SF169) Electronic logbooks
- 174.2(81GA,SF169) Reporting of civil penalties

CHAPTERS 175 to 199  
Reserved

CHAPTER 200  
FIRE MARSHAL ADMINISTRATION

200.1(100)	Description
200.2(100)	General administrative procedures
200.3(100)	Building plan approval and plan review fees
200.4(100,101,101A)	Inspections and inspection fees
200.5(100)	Certificates for licensure
200.6(100)	Fire investigations
200.7(100)	Fire drills
200.8(100)	Inspection based on complaint
200.9(100A)	Sharing of insurance company information with the fire marshal
200.10(100A)	Release of information to an insurance company
200.11(100A)	Forms

CHAPTER 201  
GENERAL FIRE SAFETY REQUIREMENTS

201.1(100)	Scope
201.2(100)	General provisions
201.3(100)	Electrical installations
201.4(100)	Existing buildings or structures
201.5(100)	Recognition of local fire ordinances and enforcement

CHAPTER 202  
REQUIREMENTS FOR SPECIFIC OCCUPANCIES

202.1(100)	Scope
202.2(237)	Facilities in which foster care is provided by agencies to fewer than six children
202.3(137C)	Bed and breakfast inns
202.4	Reserved
202.5(100,135C)	General requirements for small group homes (specialized licensed facilities) licensed pursuant to Iowa Code section 135C.2

CHAPTERS 203 and 204  
Reserved

CHAPTER 205  
FIRE SAFETY REQUIREMENTS FOR HOSPITALS AND  
HEALTH CARE FACILITIES

205.1(100)	Definitions
205.2 to 205.4	Reserved
205.5(100)	Hospitals
205.6 to 205.9	Reserved
205.10(100)	Nursing facilities and hospices
205.11 to 205.14	Reserved
205.15(100)	Intermediate care facilities for the mentally retarded and intermediate care facilities for persons with mental illness
205.16 to 205.19	Reserved
205.20(100)	Ambulatory health care facilities
205.21 to 205.24	Reserved
205.25(100)	Religious nonmedical health care institutions

CHAPTERS 206 to 209  
Reserved

CHAPTER 210  
SMOKE DETECTORS

- 210.1(100) Definitions
- 210.2(100) Scope
- 210.3(100) General requirements
- 210.4(100) Smoke detectors—notice and certification of installation
- 210.5(100) Smoke detectors—new and existing construction

CHAPTERS 211 to 220  
Reserved

CHAPTER 221  
FLAMMABLE AND COMBUSTIBLE LIQUIDS

- 221.1(101) Scope
- 221.2(101) Definitions
- 221.3(101) Flammable and combustible liquids
- 221.4(101) Motor fuel dispensing facilities and repair garages
- 221.5(101) Aircraft fueling
- 221.6(101) Helicopter fueling
- 221.7(101) Fuel-fired appliances
- 221.8(101) Stationary combustion engines and gas turbines

CHAPTERS 222 and 223  
Reserved

CHAPTER 224  
ABOVEGROUND PETROLEUM STORAGE TANKS

- 224.1(101) Scope
- 224.2(101) Definition
- 224.3(101) Compliance
- 224.4(101) Registration of existing and new tanks—fees
- 224.5(101) Approval of plans
- 224.6(101) Inspections and orders
- 224.7(101) Leaks, spills, or damage
- 224.8(101) Civil penalty
- 224.9(17A,101) Appeals

CHAPTER 225  
Reserved

CHAPTER 226  
LIQUEFIED PETROLEUM GAS

- 226.1(101) General requirements
- 226.2(101) Transfer into container
- 226.3(101) Prohibition of certain refrigerants
- 226.4(101) Qualifications of personnel
- 226.5(101) Pressure testing
- 226.6(101) Damages—reporting
- 226.7(101) Use of railroad tank cars in stationary service
- 226.8(101) Installation and use of DOT specification MC330 or MC331 cargo tanks in stationary service
- 226.9(101) NFPA standards

## CHAPTER 227

Reserved

## CHAPTER 228

## LIQUEFIED NATURAL GAS

228.1(101) Transportation, storage, handling, and use of liquefied natural gas

## CHAPTERS 229 and 230

Reserved

## CHAPTER 231

MANUFACTURING, STORAGE, HANDLING, AND  
USE OF EXPLOSIVE MATERIALS

231.1(101A) Explosive materials

## CHAPTERS 232 to 234

Reserved

## CHAPTER 235

## COMMERCIAL EXPLOSIVE LICENSING

- 235.1(101A) Licensing program established  
 235.2(101A) Licenses required  
 235.3(101A) License application process  
 235.4(101A) Issuance of commercial explosive business license  
 235.5(101A) Issuance of individual blaster license  
 235.6(101A) Inventory and records  
 235.7(101A,252J) Grounds for suspension, revocation, or denial of commercial explosive licenses;  
 appeals  
 235.8(101A,252J) Child support collection procedures  
 235.9(101A,272D) Suspension or revocation for nonpayment of debts owed state or local government

## CHAPTERS 236 to 250

Reserved

## CHAPTER 251

## FIRE FIGHTER TRAINING AND CERTIFICATION

- 251.1(100B) Definitions  
 251.2 to 251.100 Reserved

## MINIMUM TRAINING STANDARDS

- 251.101(100B) Minimum training standard  
 251.102(100B) Other training  
 251.103(100B) Continuing training  
 251.104(100B) Record keeping  
 251.105 to 251.200 Reserved

## FIRE FIGHTER CERTIFICATION

- 251.201(100B) Fire fighter certification program  
 251.202(100B) Certification standards  
 251.203(100B) Fees  
 251.204(100B) Certification, denial, and revocation of certification

## CHAPTERS 252 to 258

Reserved

CHAPTER 259  
FIRE FIGHTER TRAINING AND EQUIPMENT FUNDS

259.1 to 259.100 Reserved

DIVISION I  
VOLUNTEER FIRE FIGHTER TRAINING AND EQUIPMENT FUND

259.101(17A,77GA,ch1222) Establishment of fund  
 259.102(17A,77GA,ch1222) Allocations  
 259.103(17A,77GA,ch1222) Awards to private providers of training  
 259.104(100B) Paul Ryan memorial fire fighter safety training fund  
 259.105(80GA,ch1175) Volunteer fire fighter preparedness fund  
 259.106 to 259.200 Reserved

DIVISION II  
FIRE FIGHTING EQUIPMENT REVOLVING LOAN FUND

259.201(80GA,ch177) Fire fighting equipment revolving loan fund  
 259.202(80GA,ch177) Purpose and scope  
 259.203(80GA,ch177) Definitions  
 259.204(80GA,ch177) Application process  
 259.205(80GA,ch177) Allowable acquisitions  
 259.206(80GA,ch177) Eligibility requirements and restrictions  
 259.207(80GA,ch177) Loan origination fee and repayment schedule  
 259.208 to 259.300 Reserved

DIVISION III  
REGIONAL TRAINING FACILITY FUNDS

259.301(100B) Regional training center program  
 259.302(100B) Definitions  
 259.303(100B) Availability of funds  
 259.304(100B) Application process  
 259.305(100B) Processing of submitted applications

CHAPTERS 260 to 274  
Reserved

CHAPTER 275  
CERTIFICATION OF AUTOMATIC FIRE EXTINGUISHING SYSTEM CONTRACTORS

275.1(100C) Establishment of program  
 275.2(100C) Definitions  
 275.3(100C) Responsible managing employee  
 275.4(100C) Certification requirements  
 275.5(100C) Application and fees  
 275.6(100C) Complaints  
 275.7(100C) Denial, suspension, or revocation of certification; civil penalties; and appeals

CHAPTER 276  
LICENSING OF FIRE PROTECTION SYSTEM INSTALLERS AND  
MAINTENANCE WORKERS

276.1(100D) Establishment of program  
 276.2(100D) Definitions  
 276.3(100D) Licensing requirements  
 276.4(100D) Application and fees  
 276.5(100D) Complaints  
 276.6(100D) Denial, suspension, or revocation of licensure; civil penalties; appeals

## CHAPTER 277

## CERTIFICATION OF ALARM SYSTEM CONTRACTORS AND INSTALLERS

- 277.1(100C) Establishment of program
- 277.2(100C) Definitions
- 277.3(100C) Responsible managing employee
- 277.4(100C) Contractor certification requirements
- 277.5(100C) Contractor application and fees
- 277.6(100C) Installer certification requirements
- 277.7(100C) Installer application and fees
- 277.8(100C) Complaints
- 277.9(100C) Denial, suspension, or revocation of certification; civil penalties; and appeals

## CHAPTERS 278 to 290

Reserved

## CHAPTER 291

## VOLUNTEER EMERGENCY SERVICES PROVIDER DEATH BENEFITS

- 291.1(100B) Volunteer emergency services provider death benefit program
- 291.2(100B) Eligibility
- 291.3(100B) Determination

## CHAPTERS 292 to 299

Reserved

## CHAPTER 300

## STATE BUILDING CODE—ADMINISTRATION

- 300.1(103A) State building code promulgated
- 300.2(103A) Building code commissioner
- 300.3(103A) Building code advisory council
- 300.4(103A) Plan reviews
- 300.5(103A) Inspections
- 300.6(103A) Local code enforcement

## CHAPTER 301

## STATE BUILDING CODE—GENERAL PROVISIONS

- 301.1(103A) Scope and applicability
- 301.2(103A) Definitions
- 301.3(103A) General provisions
- 301.4(103A) Mechanical requirements
- 301.5(103A) Electrical requirements
- 301.6(103A) Plumbing requirements
- 301.7(103A) Existing buildings
- 301.8(103A) Residential construction requirements
- 301.9(103A) Fuel gas piping requirements
- 301.10(103A) Transition period

## CHAPTER 302

## STATE BUILDING CODE—ACCESSIBILITY OF BUILDINGS AND FACILITIES AVAILABLE TO THE PUBLIC

- 302.1(103A,104A) Purpose and scope
- 302.2(103A,104A) Definitions
- 302.3(103A,104A) Accessibility of buildings and facilities available to the public
- 302.4 to 302.19 Reserved
- 302.20(103A,104A) Making apartments accessible and functional for persons with disabilities

CHAPTER 303  
STATE BUILDING CODE—REQUIREMENTS FOR  
ENERGY CONSERVATION IN CONSTRUCTION

303.1(103A)	Scope and applicability of energy conservation requirements
303.2(103A)	Residential energy code
303.3(103A)	Adoption of nonresidential energy code
303.4(470)	Life cycle cost analysis
303.5(103A)	Energy review fee

CHAPTERS 304 to 309  
Reserved

CHAPTER 310  
SUSTAINABLE DESIGN STANDARDS

310.1(103A)	Scope and purpose
310.2(103A)	Definitions
310.3(103A)	Submission of projects
310.4(103A)	Sustainable design criteria for residential projects
310.5(103A)	Sustainable design criteria for commercial projects
310.6(103A)	Fees

CHAPTERS 311 to 314  
Reserved

CHAPTER 315  
WEATHER SAFE ROOMS

315.1(83GA,ch142)	Scope
315.2(83GA,ch142)	Definition
315.3(83GA,ch142)	Requirements

CHAPTERS 316 to 321

PEACE OFFICERS' RETIREMENT, ACCIDENT, AND  
DISABILITY SYSTEM—GOVERNANCE AND ADMINISTRATION

400.1(97A) Establishment of system  
 400.2(97A) Definitions  
 400.3(97A) Governance  
 400.4(97A) Meetings of board of trustees  
 400.5(97A) Administrative support  
 400.6(97A) Forms and information  
 400.7(97A) Annual statements  
 400.8(97A) Books of account  
 400.9(97A) Investments  
 400.10(97A) Medical board

CHAPTER 401  
PEACE OFFICERS' RETIREMENT, ACCIDENT, AND  
DISABILITY SYSTEM—ADMINISTRATIVE PROCEDURES

- 401.1(97A) Applications
- 401.2(97A) Determination on initial review
- 401.3(97A) Applications for reimbursement for medical attention
- 401.4 to 401.100 Reserved

PROCEDURE FOR RULE MAKING

- 401.101(17A) Applicability
- 401.102(17A) Advice on possible rules before notice of proposed rule adoption
- 401.103(17A) Public rule-making docket
- 401.104(17A) Notice of proposed rule making
- 401.105(17A) Public participation
- 401.106(17A) Regulatory analysis
- 401.107(17A,25B) Fiscal impact statement
- 401.108(17A) Time and manner of rule adoption
- 401.109(17A) Variance between adopted rule and published notice of proposed rule adoption
- 401.110(17A) Concise statement of reasons
- 401.111(17A,97A) Agency rule-making record
- 401.112(17A,97A) Petitions for rule making
- 401.113(17A,97A) Waivers of rules
- 401.114 to 401.200 Reserved

DECLARATORY ORDERS

- 401.201(17A) Petition for declaratory order
- 401.202(17A) Notice of petition
- 401.203(17A) Intervention
- 401.204(17A) Briefs
- 401.205(17A) Inquiries
- 401.206(17A) Service and filing of petitions and other papers
- 401.207(17A) Consideration
- 401.208(17A) Action on petition
- 401.209(17A) Refusal to issue order
- 401.210(17A) Contents of declaratory order—effective date
- 401.211(17A) Copies of orders
- 401.212(17A) Effect of a declaratory order
- 401.213 to 401.300 Reserved

CONTESTED CASES

- 401.301(17A) Contested case proceeding
- 401.302(17A) Discovery
- 401.303(17A) Subpoenas in a contested case
- 401.304(17A) Motions
- 401.305(17A) Settlements
- 401.306(17A) Prehearing conference
- 401.307(17A) Continuances
- 401.308(17A) Withdrawals
- 401.309(17A) Hearing procedures
- 401.310(17A) Evidence
- 401.311(17A) Ex parte communication
- 401.312(17A) Decisions
- 401.313(17A) No factual dispute contested cases
- 401.314(17A) Applications for rehearing

CHAPTER 402  
PEACE OFFICERS' RETIREMENT, ACCIDENT, AND DISABILITY SYSTEM—  
ELIGIBILITY, BENEFITS, AND PAYMENTS

402.1 to 402.99      Reserved

DIVISION I  
ELIGIBILITY

402.100(97A)      Age of qualification  
402.101(97A)      Date of retirement  
402.102(97A)      Application of Iowa Code Supplement section 97A.6, subsection 12  
402.103(97A)      Date of death  
402.104(97A)      Age of spouse  
402.105 to 402.199      Reserved

DIVISION II  
BENEFITS AND PAYMENTS

402.200(97A)      Computation of average final compensation  
402.201(97A)      Workers' compensation—effect on benefit payment  
402.202(97A)      Errors in payments  
402.203(97A)      Initial benefit for a child  
402.204(97A)      Computation for partial month  
402.205(97A)      One year of service  
402.206(97A)      Termination prior to retirement  
402.207(97A)      Optional retirement benefits  
402.208(97A)      Options not reversible once payments begin—exceptions  
402.209(97A)      Method of calculating annual adjustments when optional retirement benefits are selected  
402.210(97A)      Termination of benefits when optional retirement benefits are selected  
402.211(97A)      Impact of optional benefit selections on child benefits  
402.212(97A)      Method of calculating annual adjustment for members who retire on or after July 1, 2010  
402.213(97A)      Method of calculating annual adjustment for members who retired prior to July 1, 2010  
402.214(97A)      Determination of survivor's pension  
402.215 to 402.299      Reserved

DIVISION III  
SERVICE PURCHASES

402.300(97A)      Purchase of eligible service credit  
402.301(97A)      Determination of eligible service  
402.302(97A)      Determination of cost to member  
402.303(97A)      Application process  
402.304(97A)      Service adjustment irrevocable  
402.305(97A)      Board review  
402.306(97A)      Other provisions  
402.307(97A)      Purchase of service credit for military service

CHAPTER 403  
PEACE OFFICERS' RETIREMENT, ACCIDENT, AND DISABILITY SYSTEM—  
LINE-OF-DUTY DEATH BENEFIT

403.1(97A)      Member death benefit program  
403.2(97A)      Application  
403.3(97A)      Determination

CHAPTER 87  
WIRELESS COMMUNICATIONS SERVICE PROVIDER DATABASE

**661—87.1(34A) Wireless communications service provider database established.** The wireless communications service provider database is established in the department of public safety. All wireless communications service providers authorized to do business in the state of Iowa, or submitting to the jurisdiction of the state of Iowa, shall submit current contact information to the department of public safety in order to facilitate requests from law enforcement agencies and public safety answering points (PSAPs), so that law enforcement agencies and PSAPs can promptly obtain location information concerning a cell phone or other wireless communications device in emergency situations.

[ARC 2335C, IAB 1/6/16, effective 2/10/16]

**661—87.2(34A) Definitions.** The following definitions apply to rules 661—87.1(34A) through 661—87.6(34A):

“*Department*” means the Iowa department of public safety.

“*Public safety answering point*” or “*PSAP*” means the same as defined in Iowa Code section 34A.2(16).

[ARC 2335C, IAB 1/6/16, effective 2/10/16]

**661—87.3(34A) Administration of database.** The database is administered by the division of intelligence within the department. The information in the database shall only be available to law enforcement agencies and PSAPs and only as authorized in Iowa Code section 34A.16 and these rules.

[ARC 2335C, IAB 1/6/16, effective 2/10/16]

**661—87.4(34A) Confidentiality.** All information and records in the wireless communications service provider database maintained by the department and all inquiries and results of inquiries to the service providers are confidential records pursuant to Iowa Code section 22.7(5) and chapter 692 and any other applicable federal or state laws or rules.

[ARC 2335C, IAB 1/6/16, effective 2/10/16]

**661—87.5(34A) Database requirements.**

**87.5(1)** A wireless communications service provider shall provide the following information for the database:

- a. Company name of the provider;
- b. Physical address;
- c. Mailing address;
- d. Name of the point of contact for the provider;
- e. Phone number and alternate phone number for the point of contact, which will be answered 24 hours a day, 7 days a week, by a person or persons who can promptly provide the location information of the cell phone or other wireless communications device upon the request of the department or other law enforcement agency or PSAP;
- f. Fax number; and
- g. E-mail address.

**87.5(2)** Each wireless communications service provider shall immediately provide the department with any updates or changes to the information required in 87.5(1). On or before June 15 of each year, each wireless communications service provider shall confirm to the department the provider’s information for the database.

**87.5(3)** The information required in 87.5(1) shall be submitted to the department by at least one of the following:

- a. E-mail: [intinfo@dps.state.ia.us](mailto:intinfo@dps.state.ia.us).
- b. Fax: (515)725-6320, Attn: Division of Intelligence, Subject: Wireless Communications Provider contact information.

c. U.S. mail: Iowa Department of Public Safety, Division of Intelligence, Oran Pape Building, 215 East 7th Street, Des Moines, Iowa 50319-0049.  
[ARC 2335C, IAB 1/6/16, effective 2/10/16]

**661—87.6(34A) Procedures to request provider information.** Upon a determination by a law enforcement agency or PSAP that emergency location information for a subscriber's cell phone or other wireless communications device is required, the law enforcement agency or PSAP shall contact Iowa state patrol communications to request the contact information for the wireless communications systems provider.

[ARC 2335C, IAB 1/6/16, effective 2/10/16]

These rules are intended to implement Iowa Code section 34A.16.

[Filed ARC 2335C (Notice ARC 2170C, IAB 9/30/15), IAB 1/6/16, effective 2/10/16]

## REVENUE DEPARTMENT[701]

Created by 1986 Iowa Acts, Chapter 1245.

### CHAPTER 1

#### STATE BOARD OF TAX REVIEW—ADMINISTRATION

- 1.1(17A,421) Establishment, membership and location of the state board of tax review
- 1.2(421,17A) Powers and duties of the state board
- 1.3(421,17A) Powers and duties not subject to the jurisdiction of the state board

### CHAPTER 2

#### STATE BOARD OF TAX REVIEW—CONDUCT OF APPEALS AND RULES OF PRACTICE AND PROCEDURE

##### DIVISION I APPELLATE CASES

##### GENERAL RULES OF PRACTICE AND PROCEDURE FOR FINAL CONTESTED CASE DECISIONS OF OR ATTRIBUTABLE TO THE DIRECTOR OF REVENUE

- 2.1(421,17A) Definitions
- 2.2(421,17A) Appeal and jurisdiction
- 2.3(421,17A) Form of appeal
- 2.4(421,17A) Certification by director
- 2.5(421,17A) Motions
- 2.6(421,17A) Answer
- 2.7(421,17A) Docketing
- 2.8(421,17A) Filing of papers
- 2.9(421,17A) Hearing an appeal
- 2.10(17A,421) Appearances by appellant
- 2.11(421,17A) Authority of state board to issue procedural orders
- 2.12(421,17A) Continuances
- 2.13(17A,421) Place of hearing
- 2.14(17A,421) Members participating
- 2.15(17A,421) Presiding officer
- 2.16(17A,421) Appeals of state board decisions

##### DIVISION II ORIGINAL JURISDICTION

##### RULES GOVERNING CONTESTED CASE PROCEEDINGS IN WHICH THE STATE BOARD HAS ORIGINAL JURISDICTION TO COMMENCE A CONTESTED CASE PROCEEDING

- 2.17(421,17A) Applicability and scope
- 2.18(17A) Definitions

26.59(422)	Gun repair
26.60(422)	Janitorial and building maintenance or cleaning
26.61(422)	Lawn care
26.62(422)	Landscaping
26.63(422)	Pet grooming
26.64(422)	Reflexology
26.65(422)	Tanning beds and tanning salons
26.66(422)	Tree trimming and removal
26.67(422)	Water conditioning and softening
26.68(422)	Motor vehicle, recreational vehicle and recreational boat rental
26.69(422)	Security and detective services
26.70	Reserved
26.71(422,423)	Solid waste collection and disposal services
26.72(422,423)	Sewage services
26.73	Reserved
26.74(422,423)	Aircraft rental
26.75(422,423)	Sign construction and installation
26.76(422,423)	Swimming pool cleaning and maintenance
26.77(422,423)	Taxidermy
26.78(422,423)	Mini-storage
26.79(422,423)	Dating services
26.80(422,423)	Limousine service
26.81(422)	Sales of bundled services contracts

## CHAPTER 27

## AUTOMOBILE RENTAL EXCISE TAX

27.1(422,422C,423)	Definitions and characterizations
27.2(422,422C,423)	Tax imposed upon rental of automobiles
27.3(422,422C,423)	Lessor's obligation to collect tax
27.4(422,422C,423)	Administration of tax

TITLE IV  
USECHAPTER 28  
DEFINITIONS

28.1(423)	Taxable use defined
28.2(423)	Processing of property defined
28.3(423)	Purchase price defined
28.4(423)	Retailer maintaining a place of business in this state defined

CHAPTER 29  
CERTIFICATES

- 29.1(423) Certificate of registration
- 29.2(423) Cancellation of certificate of registration
- 29.3(423) Certificates of resale, direct pay permits, or processing

CHAPTER 30  
FILING RETURNS, PAYMENT OF TAX, PENALTY AND INTEREST

- 30.1(423) Liability for use tax and denial and revocation of permit
- 30.2(423) Measure of use tax
- 30.3(421,423) Consumer's use tax return
- 30.4(423) Retailer's use tax return
- 30.5(423) Collection requirements of registered retailers
- 30.6(423) Bracket system to be used by registered vendors
- 30.7(423) Sales tax or use tax paid to another state
- 30.8(423) Registered retailers selling tangible personal property on a conditional sale contract basis
- 30.9(423) Registered vendors repossessing goods sold on a conditional sale contract basis
- 30.10(423) Penalties for late filing of a monthly tax deposit or use tax returns
- 30.11(423) Claim for refund of use tax
- 30.12(423) Extension of time for filing

CHAPTER 31  
RECEIPTS SUBJECT TO USE TAX

- 31.1(423) Transactions consummated outside this state
- 31.2(423) Goods coming into this state
- 31.3(423) Sales by federal government or agencies to consumers
- 31.4(423) Sales for lease of vehicles subject to registration—taxation and exemptions
- 31.5(423) Motor vehicle use tax on long-term leases
- 31.6(423) Sales of aircraft subject to registration
- 31.7(423) Communication services

CHAPTER 32  
RECEIPTS EXEMPT FROM USE TAX

- 32.1(423) Tangible personal property and taxable services subject to sales tax
- 32.2(423) Sales tax exemptions applicable to use tax
- 32.3(423) Mobile homes and manufactured housing
- 32.4(423) Exemption for vehicles used in interstate commerce
- 32.5(423) Exemption for transactions if sales tax paid
- 32.6(423) Exemption for ships, barges, and other waterborne vessels
- 32.7(423) Exemption for containers
- 32.8(423) Exemption for building materials used outside this state
- 32.9(423) Exemption for vehicles subject to registration
- 32.10(423) Exemption for vehicles operated under Iowa Code chapter 326
- 32.11(423) Exemption for vehicles purchased for rental or lease
- 32.12(423) Exemption for vehicles previously purchased for rental
- 32.13(423) Exempt use of aircraft on and after July 1, 1999

CHAPTER 33  
RECEIPTS SUBJECT TO USE TAX DEPENDING ON  
METHOD OF TRANSACTION

- 33.1 Reserved
- 33.2(423) Federal manufacturer's or retailer's excise tax

- 33.3(423) Fuel consumed in creating power, heat or steam for processing or generating electric current
- 33.4(423) Repair of tangible personal property outside the state of Iowa
- 33.5(423) Taxation of American Indians
- 33.6(422,423) Exemption for property used in Iowa only in interstate commerce
- 33.7(423) Property used to manufacture certain vehicles to be leased
- 33.8(423) Out-of-state rental of vehicles subject to registration subsequently used in Iowa
- 33.9(423) Sales of mobile homes, manufactured housing, and related property and services
- 33.10(423) Tax imposed on the use of manufactured housing as tangible personal property and as real estate

#### CHAPTER 34

##### VEHICLES SUBJECT TO REGISTRATION

- 34.1(422,423) Definitions
- 34.2(423) County treasurer shall collect tax
- 34.3(423) Returned vehicles and tax refunded by manufacturers
- 34.4(423) Use tax collections required
- 34.5(423) Exemptions
- 34.6(423) Vehicles subject to registration received as gifts or prizes
- 34.7(423) Titling of used foreign vehicles by dealers
- 34.8(423) Dealer's retail sales tax returns
- 34.9(423) Affidavit forms
- 34.10(423) Exempt and taxable purchases of vehicles for taxable rental
- 34.11(423) Manufacturer's refund of use tax to a consumer, lessor, or lessee of a defective motor vehicle
- 34.12(423) Government payments for a motor vehicle which do not involve government purchases of the same
- 34.13(423) Transfers of vehicles resulting from corporate mergers and other types of corporate transfers
- 34.14(423) Refund of use tax paid on the purchase of a motor vehicle
- 34.15(423) Registration by manufacturers
- 34.16(423) Rebates
- 34.17(321,423) Repossession of a vehicle
- 34.18(423) Federal excise tax
- 34.19(423) Claiming an exemption from Iowa tax
- 34.20(423) Affidavit forms
- 34.21(423) Insurance companies

#### CHAPTERS 35 and 36

Reserved

#### CHAPTER 37

##### UNDERGROUND STORAGE TANK RULES INCORPORATED BY REFERENCE

- 37.1(424) Rules incorporated

TITLE V  
*INDIVIDUAL*

#### CHAPTER 38 ADMINISTRATION

- 38.1(422) Definitions
- 38.2(422) Statute of limitations
- 38.3(422) Retention of records

38.4(422)	Authority for deductions
38.5(422)	Jeopardy assessments
38.6(422)	Information deemed confidential
38.7(422)	Power of attorney
38.8(422)	Delegations to audit and examine
38.9(422)	Bonding procedure
38.10(422)	Indexation
38.11(422)	Appeals of notices of assessment and notices of denial of taxpayer's refund claims
38.12(422)	Indexation of the optional standard deduction for inflation
38.13(422)	Reciprocal tax agreements
38.14(422)	Information returns for reporting income payments to the department of revenue
38.15(422)	Relief of innocent spouse for substantial understatement of tax attributable to other spouse
38.16(422)	Preparation of taxpayers' returns by department employees
38.17(422)	Resident determination
38.18(422)	Tax treatment of income repaid in current tax year which had been reported on prior Iowa individual income tax return
38.19(422)	Indication of dependent child health care coverage on tax return

#### CHAPTER 39

##### FILING RETURN AND PAYMENT OF TAX

39.1(422)	Who must file
39.2(422)	Time and place for filing
39.3(422)	Form for filing
39.4(422)	Filing status
39.5(422)	Payment of tax
39.6(422)	Minimum tax
39.7(422)	Tax on lump-sum distributions
39.8(422)	State income tax limited to taxpayer's net worth immediately before the distressed sale
39.9(422)	Special tax computation for all low-income taxpayers except single taxpayers
39.10(422)	Election to report excess income from sale or exchange of livestock due to drought in the next tax year
39.11(422)	Forgiveness of tax for an individual whose federal income tax was forgiven because the individual was killed outside the United States due to military or terroristic action
39.12(422)	Tax benefits for persons in the armed forces deployed outside the United States
39.13	Reserved
39.14(422)	Tax benefits for persons serving in support of the Bosnia-Herzegovina hazardous duty area
39.15(422)	Special tax computation for taxpayers who are 65 years of age or older

#### CHAPTER 40

##### DETERMINATION OF NET INCOME

40.1(422)	Net income defined
40.2(422)	Interest and dividends from federal securities
40.3(422)	Interest and dividends from foreign securities and securities of state and other political subdivisions
40.4	Reserved
40.5(422)	Military pay
40.6(422)	Interest and dividend income

42.22(15E,422)	Venture capital credits
42.23(15)	New capital investment program tax credits
42.24(15E,422)	Endow Iowa tax credit
42.25(422)	Soy-based cutting tool oil tax credit
42.26(15I,422)	Wage-benefits tax credit
42.27(422,476B)	Wind energy production tax credit
42.28(422,476C)	Renewable energy tax credit
42.29(15)	High quality job creation program
42.30(15E,422)	Economic development region revolving fund tax credit
42.31(422)	Early childhood development tax credit
42.32(422)	School tuition organization tax credit
42.33(422)	E-85 gasoline promotion tax credit
42.34(422)	Biodiesel blended fuel tax credit
42.35(422)	Soy-based transformer fluid tax credit
42.36(16,422)	Agricultural assets transfer tax credit and custom farming contract tax credit
42.37(15,422)	Film qualified expenditure tax credit
42.38(15,422)	Film investment tax credit
42.39(422)	Ethanol promotion tax credit

42.40(422)	Charitable conservation contribution tax credit
42.41(15,422)	Redevelopment tax credit
42.42(15)	High quality jobs program
42.43(16,422)	Disaster recovery housing project tax credit
42.44(422)	Deduction of credits
42.45(15)	Aggregate tax credit limit for certain economic development programs
42.46(422)	E-15 plus gasoline promotion tax credit
42.47(422)	Geothermal heat pump tax credit
42.48(422)	Solar energy system tax credit
42.49(422)	Volunteer fire fighter, volunteer emergency medical services personnel and reserve peace officer tax credit
42.50(422)	Taxpayers trust fund tax credit
42.51(422,85GA,SF452)	From farm to food donation tax credit
42.52(422)	Adoption tax credit
42.53(15)	Workforce housing tax incentives program
42.54(404A,422)	Historic preservation and cultural and entertainment district tax credit for projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014

#### CHAPTER 43 ASSESSMENTS AND REFUNDS

43.1(422)	Notice of discrepancies
43.2(422)	Notice of assessment, supplemental assessments and refund adjustments
43.3(422)	Overpayments of tax
43.4(68A,422,456A)	Optional designations of funds by taxpayer
43.5(422)	Abatement of tax
43.6 and 43.7	Reserved
43.8(422)	Livestock production credit refunds for corporate taxpayers and individual taxpayers

#### CHAPTER 44 PENALTY AND INTEREST

44.1(422)	Penalty
44.2(422)	Computation of interest on unpaid tax
44.3(422)	Computation of interest on refunds resulting from net operating losses
44.4(422)	Computation of interest on overpayments

#### CHAPTER 45 PARTNERSHIPS

45.1(422)	General rule
45.2(422)	Partnership returns
45.3(422)	Contents of partnership return
45.4(422)	Distribution and taxation of partnership income

#### CHAPTER 46 WITHHOLDING

46.1(422)	Who must withhold
46.2(422)	Computation of amount withheld
46.3(422)	Forms, returns and reports
46.4(422)	Withholding on nonresidents
46.5(422)	Penalty and interest
46.6(422)	Withholding tax credit to workforce development fund
46.7(422)	ACE training program credits from withholding

- 46.8(260E) New job tax credit from withholding  
 46.9(15) Supplemental new jobs credit from withholding and alternative credit for housing assistance programs  
 46.10(403) Targeted jobs withholding tax credit

CHAPTER 47  
 Reserved

CHAPTER 48  
 COMPOSITE RETURNS

- 48.1(422) Composite returns  
 48.2(422) Definitions  
 48.3(422) Filing requirements  
 48.4 Reserved  
 48.5(422) Composite return required by director  
 48.6(422) Determination of composite Iowa income  
 48.7(422) Determination of composite Iowa tax  
 48.8(422) Estimated tax  
 48.9(422) Time and place for filing

CHAPTER 49  
 ESTIMATED INCOME TAX FOR INDIVIDUALS

- 49.1(422) Who must pay estimated income tax  
 49.2(422) Time for filing and payment of tax  
 49.3(422) Estimated tax for nonresidents  
 49.4(422) Special estimated tax periods  
 49.5(422) Reporting forms  
 49.6(422) Penalty—underpayment of estimated tax  
 49.7(422) Estimated tax carryforwards and how the carryforward amounts are affected under different circumstances

CHAPTER 50  
 APPORTIONMENT OF INCOME FOR RESIDENT  
 SHAREHOLDERS OF S CORPORATIONS

- 50.1(422) Apportionment of income for resident shareholders of S corporations  
 50.2 Reserved

52.24(422)	Soy-based cutting tool oil tax credit
52.25(15I,422)	Wage-benefits tax credit
52.26(422,476B)	Wind energy production tax credit
52.27(422,476C)	Renewable energy tax credit
52.28(15)	High quality job creation program
52.29(15E,422)	Economic development region revolving fund tax credit
52.30(422)	E-85 gasoline promotion tax credit
52.31(422)	Biodiesel blended fuel tax credit
52.32(422)	Soy-based transformer fluid tax credit
52.33(16,422)	Agricultural assets transfer tax credit and custom farming contract tax credit
52.34(15,422)	Film qualified expenditure tax credit
52.35(15,422)	Film investment tax credit
52.36(422)	Ethanol promotion tax credit
52.37(422)	Charitable conservation contribution tax credit
52.38(422)	School tuition organization tax credit
52.39(15,422)	Redevelopment tax credit
52.40(15)	High quality jobs program
52.41(15)	Aggregate tax credit limit for certain economic development programs
52.42(16,422)	Disaster recovery housing project tax credit
52.43(422)	E-15 plus gasoline promotion tax credit

- 52.44(422) Solar energy system tax credit
- 52.45(422,85GA,SF452) From farm to food donation tax credit
- 52.46(15) Workforce housing tax incentives program
- 52.47(404A,422) Historic preservation and cultural and entertainment district tax credit for projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014

#### CHAPTER 53

##### DETERMINATION OF NET INCOME

- 53.1(422) Computation of net income for corporations
- 53.2(422) Net operating loss carrybacks and carryovers
- 53.3(422) Capital loss carryback
- 53.4(422) Net operating and capital loss carrybacks and carryovers
- 53.5(422) Interest and dividends from federal securities
- 53.6(422) Interest and dividends from foreign securities, and securities of state and their political subdivisions
- 53.7(422) Safe harbor leases
- 53.8(422) Additions to federal taxable income
- 53.9(422) Gains and losses on property acquired before January 1, 1934
- 53.10(422) Work opportunity tax credit and alcohol and cellulosic biofuel fuels credit
- 53.11(422) Additional deduction for wages paid or accrued for work done in Iowa by certain individuals
- 53.12(422) Federal income tax deduction
- 53.13(422) Iowa income taxes and Iowa tax refund
- 53.14(422) Method of accounting, accounting period
- 53.15(422) Consolidated returns
- 53.16(422) Federal rulings and regulations
- 53.17(422) Depreciation of speculative shell buildings
- 53.18(422) Deduction of multipurpose vehicle registration fee
- 53.19(422) Deduction of foreign dividends
- 53.20(422) Employer social security credit for tips
- 53.21(422) Deduction for contributions made to the endowment fund of the Iowa educational savings plan trust
- 53.22(422) Additional first-year depreciation allowance
- 53.23(422) Section 179 expensing
- 53.24(422) Exclusion of ordinary or capital gain income realized as a result of involuntary conversion of property due to eminent domain
- 53.25(422) Exclusion of income from sale, rental or furnishing of tangible personal property or services directly related to production of film, television, or video projects
- 53.26(422) Exclusion of biodiesel production refund

#### CHAPTER 54

##### ALLOCATION AND APPORTIONMENT

- 54.1(422) Basis of corporate tax
- 54.2(422) Allocation or apportionment of investment income
- 54.3(422) Application of related expense to allocable interest, dividends, rents and royalties—tax periods beginning on or after January 1, 1978
- 54.4(422) Net gains and losses from the sale of assets
- 54.5(422) Where income is derived from the manufacture or sale of tangible personal property
- 54.6(422) Apportionment of income derived from business other than the manufacture or sale of tangible personal property

- 54.7(422) Apportionment of income of transportation, communications, and certain public utilities corporations
- 54.8(422) Apportionment of income derived from more than one business activity carried on within a single corporate structure
- 54.9(422) Allocation and apportionment of income in special cases

## CHAPTER 55

## ASSESSMENTS, REFUNDS, APPEALS

- 55.1(422) Notice of discrepancies
- 55.2(422) Notice of assessment
- 55.3(422) Refund of overpaid tax
- 55.4(421) Abatement of tax
- 55.5(422) Protests

## CHAPTER 56

## ESTIMATED TAX FOR CORPORATIONS

- 56.1(422) Who must pay estimated tax
- 56.2(422) Time for filing and payment of tax
- 56.3(422) Special estimate periods
- 56.4(422) Reporting forms
- 56.5(422) Penalties
- 56.6(422) Overpayment of estimated tax

TITLE VII  
FRANCHISE

## CHAPTER 57

## ADMINISTRATION

- 57.1(422) Definitions
- 57.2(422) Statutes of limitation
- 57.3(422) Retention of records
- 57.4(422) Authority for deductions
- 57.5(422) Jeopardy assessments
- 57.6(422) Information deemed confidential
- 57.7(422) Power of attorney
- 57.8(422) Delegation to audit and examine

## CHAPTER 58

FILING RETURNS, PAYMENT OF TAX, PENALTY AND INTEREST,  
AND TAX CREDITS

- 58.1(422) Who must file
- 58.2(422) Time and place for filing return
- 58.3(422) Form for filing
- 58.4(422) Payment of tax
- 58.5(422) Minimum tax
- 58.6(422) Refunds and overpayments
- 58.7(422) Allocation of franchise tax revenues
- 58.8(15E) Eligible housing business tax credit
- 58.9(15E) Eligible development business investment tax credit
- 58.10(404A,422) Historic preservation and cultural and entertainment district tax credit
- 58.11(15E,422) Venture capital credits
- 58.12(15) New capital investment program tax credits
- 58.13(15E,422) Endow Iowa tax credit
- 58.14(15I,422) Wage-benefits tax credit

58.15(422,476B)	Wind energy production tax credit
58.16(422,476C)	Renewable energy tax credit
58.17(15)	High quality job creation program
58.18(15E,422)	Economic development region revolving fund tax credit
58.19(15,422)	Film qualified expenditure tax credit
58.20(15,422)	Film investment tax credit
58.21(15)	High quality jobs program
58.22(422)	Solar energy system tax credit
58.23(15)	Workforce housing tax incentives program

#### CHAPTER 59

##### DETERMINATION OF NET INCOME

59.1(422)	Computation of net income for financial institutions
59.2(422)	Net operating loss carrybacks and carryovers
59.3(422)	Capital loss carryback
59.4(422)	Net operating and capital loss carrybacks and carryovers
59.5(422)	Interest and dividends from federal securities
59.6(422)	Interest and dividends from foreign securities and securities of states and other political subdivisions
59.7(422)	Safe harbor leases
59.8(422)	Additional deduction for wages paid or accrued for work done in Iowa by certain individuals
59.9(422)	Work opportunity tax credit
59.10	Reserved
59.11(422)	Gains and losses on property acquired before January 1, 1934
59.12(422)	Federal income tax deduction
59.13(422)	Iowa franchise taxes
59.14(422)	Method of accounting, accounting period
59.15(422)	Consolidated returns
59.16(422)	Federal rulings and regulations
59.17(15E,422)	Charitable contributions relating to the endow Iowa tax credit
59.18(422)	Depreciation of speculative shell buildings
59.19(422)	Deduction of multipurpose vehicle registration fee
59.20(422)	Disallowance of expenses to carry an investment subsidiary for tax years which begin on or after January 1, 1995
59.21(422)	S corporation and limited liability company financial institutions
59.22(422)	Deduction for contributions made to the endowment fund of the Iowa educational savings plan trust
59.23(422)	Additional first-year depreciation allowance
59.24(422)	Section 179 expensing

##### ALLOCATION AND APPORTIONMENT

59.25(422)	Basis of franchise tax
59.26(422)	Allocation and apportionment
59.27(422)	Net gains and losses from the sale of assets
59.28(422)	Apportionment factor
59.29(422)	Allocation and apportionment of income in special cases

#### CHAPTER 60

##### ASSESSMENTS, REFUNDS, APPEALS

60.1(422)	Notice of discrepancies
60.2(422)	Notice of assessment
60.3(422)	Refund of overpaid tax

- 60.4(421) Abatement of tax
- 60.5(422) Protests

## CHAPTER 61

## ESTIMATED TAX FOR FINANCIAL INSTITUTIONS

- 61.1(422) Who must pay estimated tax
- 61.2(422) Time for filing and payment of tax
- 61.3(422) Special estimate periods
- 61.4(422) Reporting forms
- 61.5(422) Penalties
- 61.6(422) Overpayment of estimated tax

## CHAPTERS 62 to 66

Reserved

TITLE VIII  
*MOTOR FUEL*

## CHAPTER 67

## ADMINISTRATION

- 67.1(452A) Definitions
- 67.2(452A) Statute of limitations, supplemental assessments and refund adjustments
- 67.3(452A) Taxpayers required to keep records
- 67.4(452A) Audit—costs
- 67.5(452A) Estimate gallonage
- 67.6(452A) Timely filing of returns, reports, remittances, applications, or requests
- 67.7(452A) Extension of time to file
- 67.8(452A) Penalty and interest
- 67.9(452A) Penalty and enforcement provisions
- 67.10(452A) Application of remittance
- 67.11(452A) Reports, returns, records—variations
- 67.12(452A) Form of invoice
- 67.13(452A) Credit card invoices
- 67.14(452A) Original invoice retained by purchaser—certified copy if lost
- 67.15(452A) Taxes erroneously or illegally collected
- 67.16(452A) Credentials and receipts
- 67.17(452A) Information confidential
- 67.18(452A) Delegation to audit and examine
- 67.19(452A) Practice and procedure before the department of revenue
- 67.20(452A) Time for filing protest
- 67.21(452A) Bonding procedure
- 67.22(452A) Tax refund offset
- 67.23(452A) Supplier, restrictive supplier, importer, exporter, blender, dealer, or user licenses
- 67.24(452A) Reinstatement of license canceled for cause
- 67.25(452A) Fuel used in implements of husbandry
- 67.26(452A) Excess tax collected
- 67.27(452A) Retailer gallons report

## CHAPTER 68

## MOTOR FUEL AND UNDYED SPECIAL FUEL

- 68.1(452A) Definitions
- 68.2(452A) Tax rates—time tax attaches—responsible party
- 68.3(452A) Exemption
- 68.4(452A) Blended fuel taxation—nonterminal location

68.5(452A)	Tax returns—computations
68.6(452A)	Distribution allowance
68.7(452A)	Supplier credit—uncollectible account
68.8(452A)	Refunds
68.9(452A)	Claim for refund—payment of claim
68.10(452A)	Refund permit
68.11(452A)	Revocation of refund permit
68.12(452A)	Income tax credit in lieu of refund
68.13(452A)	Reduction of refund—sales and use tax
68.14(452A)	Terminal withdrawals—meters
68.15(452A)	Terminal and nonterminal storage facility reports and records
68.16(452A)	Method of reporting taxable gallonage
68.17(452A)	Transportation reports
68.18(452A)	Bill of lading or manifest requirements
68.19(452A)	Right of distributors and dealers to blend conventional blendstock for oxygenate blending, gasoline, or diesel fuel using a biofuel

#### CHAPTER 69

#### LIQUEFIED PETROLEUM GAS— COMPRESSED NATURAL GAS—LIQUEFIED NATURAL GAS

69.1(452A)	Definitions
69.2(452A)	Tax rates—time tax attaches—responsible party—payment of the tax
69.3(452A)	Penalty and interest
69.4(452A)	Bonding procedure
69.5(452A)	Persons authorized to place L.P.G., L.N.G., or C.N.G. in the fuel supply tank of a motor vehicle
69.6(452A)	Requirements to be licensed
69.7(452A)	Licensed metered pumps
69.8(452A)	Single license for each location
69.9(452A)	Dealer's and user's license nonassignable
69.10(452A)	Separate storage—bulk sales—highway use
69.11(452A)	Combined storage—bulk sales—highway sales or use
69.12(452A)	Exemption certificates
69.13(452A)	L.P.G. sold to the state of Iowa, its political subdivisions, contract carriers under contract with public schools to transport pupils or regional transit systems
69.14(452A)	Refunds
69.15(452A)	Notice of meter seal breakage
69.16(452A)	Location of records—L.P.G. or C.N.G. users and dealers

#### TITLE IX PROPERTY

#### CHAPTER 70 REPLACEMENT TAX AND STATEWIDE PROPERTY TAX

#### DIVISION I REPLACEMENT TAX

70.1(437A)	Who must file return
70.2(437A)	Time and place for filing return
70.3(437A)	Form for filing
70.4(437A)	Payment of tax
70.5(437A)	Statute of limitations
70.6(437A)	Billings
70.7(437A)	Refunds

70.8(437A)	Abatement of tax
70.9(437A)	Taxpayers required to keep records
70.10(437A)	Credentials
70.11(437A)	Audit of records
70.12(437A)	Collections/reimbursements
70.13(437A)	Information confidential

DIVISION II  
STATEWIDE PROPERTY TAX

70.14(437A)	Who must file return
70.15(437A)	Time and place for filing return
70.16(437A)	Form for filing
70.17(437A)	Payment of tax
70.18(437A)	Statute of limitations
70.19(437A)	Billings
70.20(437A)	Refunds
70.21(437A)	Abatement of tax
70.22(437A)	Taxpayers required to keep records
70.23(437A)	Credentials
70.24(437A)	Audit of records

CHAPTER 71  
ASSESSMENT PRACTICES AND EQUALIZATION

71.1(405,427A,428,441,499B)	Classification of real estate
71.2(421,428,441)	Assessment and valuation of real estate
71.3(421,428,441)	Valuation of agricultural real estate
71.4(421,428,441)	Valuation of residential real estate
71.5(421,428,441)	Valuation of commercial real estate
71.6(421,428,441)	Valuation of industrial land and buildings
71.7(421,427A,428,441)	Valuation of industrial machinery
71.8(428,441)	Abstract of assessment
71.9(428,441)	Reconciliation report
71.10(421)	Assessment/sales ratio study
71.11(441)	Equalization of assessments by class of property
71.12(441)	Determination of aggregate actual values
71.13(441)	Tentative equalization notices
71.14(441)	Hearings before the director
71.15(441)	Final equalization order
71.16(441)	Alternative method of implementing equalization orders
71.17(441)	Special session of boards of review
71.18(441)	Judgment of assessors and local boards of review
71.19(441)	Conference boards
71.20(441)	Board of review
71.21(421,17A)	Property assessment appeal board
71.22(428,441)	Assessors
71.23(421,428,441)	Valuation of multiresidential real estate
71.24(421,428,441)	Valuation of dual classification property
71.25(441,443)	Omitted assessments
71.26(441)	Assessor compliance

## CHAPTER 72

## EXAMINATION AND CERTIFICATION OF ASSESSORS AND DEPUTY ASSESSORS

72.1(441)	Application for examination
72.2(441)	Examinations
72.3(441)	Equivalent of high school diploma
72.4(441)	Appraisal-related experience
72.5(441)	Regular certification
72.6(441)	Temporary certification
72.7	Reserved
72.8(441)	Deputy assessors—regular certification
72.9	Reserved
72.10(441)	Appointment of deputy assessors
72.11(441)	Special examinations
72.12(441)	Register of eligible candidates
72.13(441)	Course of study for provisional appointees
72.14(441)	Examining board
72.15(441)	Appointment of assessor
72.16(441)	Reappointment of assessor
72.17(441)	Removal of assessor
72.18(421,441)	Courses offered by the department of revenue

## CHAPTER 73

## PROPERTY TAX CREDIT AND RENT REIMBURSEMENT

73.1(425)	Eligible claimants
73.2(425)	Separate homesteads—husband and wife property tax credit
73.3(425)	Dual claims
73.4(425)	Multipurpose building
73.5(425)	Multidwelling
73.6(425)	Income
73.7(425)	Joint tenancy
73.8(425)	Amended claim
73.9(425)	Simultaneous homesteads
73.10(425)	Confidential information
73.11(425)	Mobile, modular, and manufactured homes
73.12(425)	Totally disabled
73.13(425)	Nursing homes
73.14(425)	Household
73.15(425)	Homestead
73.16(425)	Household income
73.17(425)	Timely filing of claims
73.18(425)	Separate homestead—husband and wife rent reimbursements
73.19(425)	Gross rent/rent constituting property taxes paid
73.20(425)	Leased land
73.21(425)	Property: taxable status
73.22(425)	Special assessments
73.23(425)	Suspended, delinquent, or canceled taxes
73.24(425)	Income: spouse
73.25(425)	Common law marriage
73.26	Reserved
73.27(425)	Special assessment credit
73.28(425)	Credit applied
73.29(425)	Deceased claimant

- 73.30(425) Audit of claim
- 73.31(425) Extension of time for filing a claim
- 73.32(425) Annual adjustment factor
- 73.33(425) Proration of claims
- 73.34(425) Unreasonable hardship

## CHAPTER 74

## MOBILE, MODULAR, AND MANUFACTURED HOME TAX

- 74.1(435) Definitions
- 74.2(435) Movement of home to another county
- 74.3(435) Sale of home
- 74.4(435) Reduced tax rate
- 74.5(435) Taxation—real estate
- 74.6(435) Taxation—square footage
- 74.7(435) Audit by department of revenue
- 74.8(435) Collection of tax

## CHAPTER 75

## PROPERTY TAX ADMINISTRATION

- 75.1(441) Tax year
- 75.2(445) Partial payment of tax
- 75.3(445) When delinquent
- 75.4(446) Payment of subsequent year taxes by purchaser
- 75.5(428,433,434,437,437A,438,85GA,SF451) Central assessment confidentiality
- 75.6(446) Tax sale
- 75.7(445) Refund of tax
- 75.8(614) Delinquent property taxes

## CHAPTER 76

## DETERMINATION OF VALUE OF RAILROAD COMPANIES

- 76.1(434) Definitions of terms
- 76.2(434) Filing of annual reports
- 76.3(434) Comparable sales
- 76.4(434) Stock and debt approach to unit value
- 76.5(434) Income capitalization approach to unit value
- 76.6(434) Cost approach to unit value
- 76.7(434) Correlation
- 76.8(434) Allocation of unit value to state
- 76.9(434) Exclusions

## CHAPTER 77

## DETERMINATION OF VALUE OF UTILITY COMPANIES

- 77.1(428,433,437,438) Definition of terms
- 77.2(428,433,437,438) Filing of annual reports
- 77.3(428,433,437,438) Comparable sales
- 77.4(428,433,437,438) Stock and debt approach to unit value
- 77.5(428,433,437,438) Income capitalization approach to unit value
- 77.6(428,433,437,438) Cost approach to unit value
- 77.7(428,433,437,438) Correlation
- 77.8(428,433,437,438) Allocation of unit value to state

CHAPTER 78  
REPLACEMENT TAX AND STATEWIDE PROPERTY  
TAX ON RATE-REGULATED WATER UTILITIES

REPLACEMENT TAX

- 78.1(85GA,SF451) Who must file return
- 78.2(85GA,SF451) Time and place for filing return
- 78.3(85GA,SF451) Form for filing
- 78.4(85GA,SF451) Payment of tax
- 78.5(85GA,SF451) Statute of limitations
- 78.6(85GA,SF451) Billings
- 78.7(85GA,SF451) Refunds
- 78.8(85GA,SF451) Abatement of tax
- 78.9(85GA,SF451) Taxpayers required to keep records
- 78.10(85GA,SF451) Credentials
- 78.11(85GA,SF451) Audit of records
- 78.12(85GA,SF451) Information confidential

STATEWIDE PROPERTY TAX

- 78.13(85GA,SF451) Who must file return
- 78.14(85GA,SF451) Time and place for filing return
- 78.15(85GA,SF451) Form for filing
- 78.16(85GA,SF451) Payment of tax
- 78.17(85GA,SF451) Statute of limitations
- 78.18(85GA,SF451) Billings
- 78.19(85GA,SF451) Refunds
- 78.20(85GA,SF451) Abatement of tax
- 78.21(85GA,SF451) Taxpayers required to keep records
- 78.22(85GA,SF451) Credentials
- 78.23(85GA,SF451) Audit of records

CHAPTER 79

REAL ESTATE TRANSFER TAX AND DECLARATIONS OF VALUE

- 79.1(428A) Real estate transfer tax: Responsibility of county recorders
- 79.2(428A) Taxable status of real estate transfers
- 79.3(428A) Declarations of value: Responsibility of county recorders and city and county assessors
- 79.4(428A) Certain transfers of agricultural realty
- 79.5(428A) Form completion and filing requirements
- 79.6(428A) Public access to declarations of value

CHAPTER 80

PROPERTY TAX CREDITS AND EXEMPTIONS

- 80.1(425) Homestead tax credit
- 80.2(22,35,426A) Military service tax exemption
- 80.3(427) Pollution control and recycling property tax exemption
- 80.4(427) Low-rent housing for the elderly and persons with disabilities
- 80.5(427) Speculative shell buildings
- 80.6(427B) Industrial property tax exemption
- 80.7(427B) Assessment of computers and industrial machinery and equipment
- 80.8(404) Urban revitalization partial exemption
- 80.9(427C,441) Forest and fruit-tree reservations
- 80.10(427B) Underground storage tanks
- 80.11(425A) Family farm tax credit

80.12(427)	Methane gas conversion property

## CHAPTER 225

RESALE AND PROCESSING EXEMPTIONS PRIMARILY  
OF BENEFIT TO RETAILERS

- 225.1(423) Paper or plastic plates, cups, and dishes, paper napkins, wooden or plastic spoons and forks, and straws
- 225.2(423) A service purchased for resale
- 225.3(423) Services used in the repair or reconditioning of certain tangible personal property
- 225.4(423) Tangible personal property purchased by a person engaged in the performance of a service
- 225.5(423) Maintenance or repair of fabric or clothing
- 225.6(423) The sales price from the leasing of all tangible personal property subject to tax
- 225.7(423) Certain inputs used in taxable vehicle wash and wax services

## CHAPTER 226

## AGRICULTURAL RULES

- 226.1(423) Sale or rental of farm machinery and equipment and items used in agricultural production that are attached to a self-propelled implement of husbandry
- 226.2(423) Packaging material used in agricultural production
- 226.3(423) Irrigation equipment used in agricultural production
- 226.4(423) Sale of a draft horse
- 226.5(423) Veterinary services
- 226.6(423) Commercial fertilizer and agricultural limestone
- 226.7(423) Sales of breeding livestock
- 226.8(423) Domesticated fowl
- 226.9(423) Agricultural health promotion items
- 226.10(423) Drainage tile
- 226.11(423) Materials used for seed inoculations
- 226.12(423) Fuel used in agricultural production
- 226.13(423) Water used in agricultural production
- 226.14(423) Bedding for agricultural livestock or fowl
- 226.15(423) Sales by farmers
- 226.16(423) Sales of livestock (including domesticated fowl) feeds
- 226.17(423) Farm machinery, equipment, and replacement parts used in livestock or dairy production
- 226.18(423) Machinery, equipment, and replacement parts used in the production of flowering, ornamental, and vegetable plants
- 226.19(423) Nonexclusive lists

## CHAPTERS 227 to 229

## CHAPTER 230

EXEMPTIONS PRIMARILY BENEFITING MANUFACTURERS AND  
OTHER PERSONS ENGAGED IN PROCESSING

- 230.1 Reserved
- 230.2(423) Carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, and taxable services used in processing
- 230.3(423) Services used in processing
- 230.4(423) Chemicals, solvents, sorbents, or reagents used in processing
- 230.5(423) Exempt sales of gases used in the manufacturing process
- 230.6(423) Sale of electricity to water companies
- 230.7(423) Wind energy conversion property
- 230.8(423) Exempt sales or rentals of core making and mold making equipment, and sand handling equipment
- 230.9(423) Chemical compounds used to treat water
- 230.10(423) Exclusive web search portal business and its exemption
- 230.11(423) Web search portal business and its exemption
- 230.12(423) Large data center business exemption
- 230.13(423) Data center business sales and use tax refunds
- 230.14(423) Exemption for the sale of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment used for certain manufacturing purposes if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.15(423) Exemption for the sale of property directly and primarily used in processing by a manufacturer if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.16(423) Exemption for the sale of property directly and primarily used by a manufacturer to maintain integrity or unique environmental conditions if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.17(423) Exemption for the sale of property directly and primarily used in research and development of new products or processes of processing if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.18(423) Exemption for the sale of computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.19(423) Exemption for the sale of property directly and primarily used in recycling or reprocessing of waste products if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.20(423) Exemption for the sale of pollution control equipment used by a manufacturer if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.21(423) Exemption for the sale of fuel or electricity used in exempt property if the sale occurs as part of a contract entered into on or after July 1, 2016
- 230.22(423) Exemption for the sale of services for designing or installing new industrial machinery or equipment if the sale occurs as part of a contract entered into on or after July 1, 2016

## CHAPTER 231

## EXEMPTIONS PRIMARILY OF BENEFIT TO CONSUMERS

- 231.1(423) Newspapers, free newspapers and shoppers' guides
- 231.2(423) Motor fuel, special fuel, aviation fuels and gasoline
- 231.3(423) Sales of food and food ingredients
- 231.4(423) Sales of candy
- 231.5(423) Sales of prepared food
- 231.6(423) Prescription drugs, medical devices, oxygen, and insulin
- 231.7(423) Exempt sales of other medical devices which are not prosthetic devices
- 231.8(423) Prosthetic devices, durable medical equipment, and mobility enhancing equipment
- 231.9(423) Raffles
- 231.10(423) Exempt sales of prizes
- 231.11(423) Modular homes
- 231.12(423) Access to on-line computer service
- 231.13(423) Sale or rental of information services
- 231.14(423) Exclusion from tax for property delivered by certain media
- 231.15(423) Exempt sales of clothing and footwear during two-day period in August
- 231.16(423) State sales tax phase-out on energies

CHAPTER 15  
DETERMINATION OF A SALE AND SALE PRICE  
[Prior to 12/17/86, Revenue Department[730]]

**701—15.1(422) Conditional sales to be included in gross sales.** When a conditional sale agreement exists the seller shall bill the purchaser for the full amount of tax due. The purchaser is obligated to pay sales tax upon delivery of the property which is the subject of the conditional sale agreement. *Harold D. Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985). The gross receipts shall be computed on the entire contract price except interest and finance charges when separately stated and reasonable in amount, and the seller shall remit the tax to the department at the close of the period during which delivery under the contract for the sale was made.

This rule is intended to implement Iowa Code sections 422.42(2) and 422.42(3).

**701—15.2(422,423) Repossessed goods.** When tangible personal property which has been repossessed either by the original seller or by a finance company is resold to final users or consumers, the gross receipts from those sales are subject to tax.

A retailer repossessing previously sold merchandise shall be entitled to claim a credit on tax paid for bad debts in the same fashion as any other retailer who has paid tax to the department upon gross receipts which ultimately constitute bad debts. See rule 15.4(422,423) for a description of the circumstances under which bad debts are and are not allowed as a credit on tax paid.

This rule is intended to implement Iowa Code sections 422.42, 422.43, 423.1, and 423.2.

**701—15.3(422,423) Exemption certificates, direct pay permits, fuel used in processing, and beer and wine wholesalers.**

**15.3(1) General provision.** The gross receipts from the sale of tangible personal property to a purchaser for any exempt purpose are not subject to tax as provided by the Iowa sales and use tax statutes. In addition, a seller of tangible personal property need not collect Iowa sales or use tax from a purchaser that possesses a valid direct pay permit issued by the department of revenue. However, the following are requirements for the exemption and noncollection of tax by a seller when a direct pay permit is involved:

*a.* Prior to July 1, 2004, the sales tax liability for all sales of tangible personal property was upon the seller unless the seller took in good faith from the purchaser a valid exemption certificate stating that the purchase was for an exempt purpose or the tax would be remitted directly to the department by the purchaser under a valid direct pay permit issued by the department. In addition to the provisions and requirements set forth in subrule 15.3(2), to be valid an exemption certificate issued by a purchaser to a seller in good faith under a direct pay permit must have included the purchaser's name, direct pay permit number, and date the direct pay permit was issued by the department. A seller who has taken a valid exemption certificate under a direct pay permit must keep records of sales made in accordance with rule 701—11.4(422,423). For more information regarding direct pay permits, see rule 701—12.3(422). Where tangible personal property or services have been purchased tax-free pursuant to a valid exemption certificate which was taken in good faith by the seller, and the tangible personal property or services were used or disposed of by the purchaser in a nonexempt manner, or the purchaser failed to pay tax to the department under a direct pay permit issued by the department, the purchaser was solely liable for the taxes and must remit the taxes directly to the department.

When a processor or fabricator purchases tangible personal property exempt from the sales or use tax and subsequently withdraws the tangible personal property from inventory for its own taxable use or consumption, the tax shall be reported in the period when the tangible personal property was withdrawn from inventory.

*b.* As of July 1, 2004, the requirement of "good faith" on the part of a seller is replaced by a different standard. For sales occurring on and after that date, the sales tax liability for all sales of tangible personal property and all sales of services is upon the seller and the purchaser unless the seller takes from the purchaser a valid exemption certificate stating under penalty of perjury that the purchase is for

a nontaxable purpose and is not a retail sale, or the seller is not obligated to collect tax due, or unless the seller takes a fuel exemption certificate. If the tangible personal property or services are purchased tax-free pursuant to a valid exemption certificate and the tangible personal property or services are used or disposed of by the purchaser in a nonexempt manner, the purchaser is solely liable for the taxes and shall remit the taxes directly to the department. The protection afforded a seller by this paragraph does not apply to a seller who fraudulently fails to collect tax or to a seller who solicits purchasers to participate in the unlawful claiming of an exemption.

c. The director is required to provide exemption certificates to assist retailers in properly accounting for nontaxable sales of tangible personal property or services to buyers for exempt purposes. These exemption certificates must be completed as to the information required on the form in order to be valid.

**15.3(2) Retailer-provided exemption certificates.** Retailers may provide their own exemption certificates. Those exemption certificates must contain information required by the department, including, but not limited to: the seller's name, the buyer's name and address, the buyer's nature of business (wholesaler, retailer, manufacturer, lessor, other), the reason for purchasing tax-exempt (e.g., resale or processing), the general description of the products purchased, and state sales tax or I.D. registration number. The certificate must be signed and dated by the buyer.

a. An exemption certificate or blanket exemption certificate as referred to in paragraph "b" cannot be used to make a tax-free purchase of any tangible personal property or service not covered by the certificate. For example, the certificate used to purchase a chemical consumed in processing cannot be used to purchase a generator which is going to become an integral part of other tangible personal property which will be ultimately sold at retail.

b. Any person repeatedly selling the same type of property or service to the same purchaser for resale, processing, or for any other exempt purpose may accept a blanket certificate covering more than one transaction. A seller who accepts a blanket certificate is required periodically to inquire of the purchaser to determine if the information on the blanket certificate is accurate and complete. Such an inquiry by the seller shall be deemed evidence of good faith on the part of the seller.

c. When due to extraordinary circumstances in the nature of fire, flood, or other cases of destruction beyond the taxpayer's control, a seller does not have an exemption certificate on file, the seller may show by other evidence, such as a signed affidavit by the purchaser, that the property or service was purchased for an exempt purpose.

d. The liability for the tax does not shift from the seller to the purchaser if the seller has not accepted a valid exemption certificate in good faith. If the seller has actual knowledge of information or circumstances indicating that it is unlikely that the property or services will be used by the purchaser in an exempt manner, then in order to act in good faith the seller must make further inquiry to determine the facts supporting the exemption certificate. In addition, if the nature of the business of the purchaser, as shown by the exemption certificate, indicates that it is unlikely that the property or services will be used in an exempt manner, then in order to act in good faith the seller must make further inquiry to determine the facts supporting the exemption certificate.

EXAMPLE 1. A seller is expected to inquire to discover the facts supporting the claimed exemption if the seller knows that the property or services will not be, or it is unlikely that the property or services will be, resold or used in processing by that purchaser. This further inquiry is expected even when there is nothing in the nature of the business as shown on the valid exemption certificate to cause the seller to make further inquiry.

EXAMPLE 2. A seller is expected to inquire to discover the facts supporting the claimed exemption of the sale of sawdust or a tool chest purchased by a gas station since such items are rarely resold by a gas station.

EXAMPLE 3. A seller is not expected to make further inquiry, in the absence of actual knowledge, to determine which light bulbs bought by a hardware store are for use in the store or those purchased for resale.

If the seller has met the requirements set forth above in accepting a valid exemption certificate, the seller shall be deemed to have acted in good faith and the liability for the tax shifts to the purchaser who becomes solely liable for the taxes.

*e.* A seller is relieved from liability for sales tax if (1) a purchaser deletes the tax reimbursement from the payment to the seller or if the purchaser makes a notation on an invoice such as “not subject to tax” or “resale” and (2) if the seller can produce written evidence to show that an attempt was made to obtain an exemption certificate to show that the transaction was exempt from tax but was unable to obtain said certificate from the purchaser.

*f.* The failure of a permit holder to act in good faith while giving or receiving exemption certificates may result in the revocation of the sales tax permit. Revocation is authorized under the provisions of Iowa Code section 422.53(5).

*g.* The purchase of tangible personal property or services which are specifically exempt from tax under the Iowa Code need not be evidenced by an exemption certificate. However, if certificates are given to support these transactions, they do not relieve the seller of the responsibility for tax if at some later time the transaction is determined to be taxable.

*h.* A person who is selling tangible personal property or services, but who is not making taxable sales at retail, shall not be required to hold a permit. When this person purchases tangible personal property or services for resale, the person shall furnish a certificate in accordance with these rules to the supplier stating that the property or services was purchased for the purpose of resale.

*i.* For information regarding the use of exemption certificates for contractors, see 701—Chapter 19.

**15.3(3) Fuel exemption certificates.**

*a.* Definitions.

“*Fuel*” includes, but is not limited to, heat, steam, electricity, gas, water, or any other tangible personal property consumed in creating heat, power, or steam.

“*Fuel consumed in processing*” includes fuel used in grain drying or providing heat or cooling for livestock buildings, fuel used for generating electric current, fuel consumed in implements of husbandry engaged in agricultural production, as well as fuel used in “processing” as defined in rules 701—18.29(422,423), 701—18.58(422,423), and 701—230.15(423). See rule 701—17.2(422) for a detailed description of “fuel used in processing.” See rule 701—17.3(422,423) for extensive discussion regarding electricity and steam used in processing.

“*Fuel exemption certificate*” is a certificate given by a purchaser and signed under penalty of perjury to assist a seller in properly accounting for nontaxable sales of fuel consumed in processing. The fuel exemption certificate must contain information required by the department, including, but not limited to: the seller’s name and address; the purchaser’s name and address; the type of fuel purchased, e.g., electricity, propane; a description of the purchaser’s business, e.g., farmer, manufacturer of steel products, food processor; a general description of the type of processing in which the fuel is consumed, e.g., grain drying, raising livestock, generating electricity, or manufacture of tangible personal property; and the percentage exemption claimed. The fuel exemption certificate must be signed under penalty of perjury by the purchaser and dated. The seller may demand from the purchaser additional documentation attached to the fuel exemption certificate which is reasonably necessary to support the claim of exemption for fuel consumed in processing. In the absence of separate metering, documentation reasonably necessary to support a claim for exemption will consist of either an electrical consultant’s survey or of a document prepared by the purchaser in accordance with the requirements of subrule 15.3(4). Attachment of documentation is not necessary if the purchaser has furnished the seller with documentation when filing an earlier exemption certificate and a substantial change in the purchaser’s operation had not occurred since the documentation was furnished or if fuel consumed by the purchaser in processing is separately metered and billed by the seller.

“*Substantial change*” means a change in the purchaser’s use or disposition of tangible personal property and services such that the purchaser pays less than 90 percent of the purchaser’s actual sales tax liability.

b. If fuel is purchased tax-free pursuant to a fuel exemption certificate which has been accepted by the seller and the purchaser uses or disposes of the fuel in a nonexempt manner, the purchaser is solely liable for sales tax and shall remit that tax directly to the department. A seller can, however, rely upon a fuel exemption certificate for sales occurring within five years subsequent to the date of the certificate only. For later sales, the seller must secure a new certificate of exemption from the purchaser.

c. A purchaser may apply to the department for review of any fuel exemption certificate. The department shall review the certificate and determine the correct amount of exemption within 12 months from the date of application. The department shall notify a purchaser of any determination that is different from the purchaser's claim of exemption. Failure to determine the correct amount of exemption within 12 months from the date of application shall constitute a determination on the department's part that the claim of exemption on the fuel certificate is correct as submitted. A determination regarding an exemption certificate is final unless the purchaser appeals to the director for a revision of the determination within 60 days from the date of the notice of determination. The director shall grant a hearing and upon the hearing, the director shall determine the correct exemption and notify the purchaser of the decision by mail. The decision is final unless the purchaser seeks judicial review of the director's decision under Iowa Code section 422.55 within 60 days from the date of the notice of the director's decision. The purchaser must notify the seller of any change in percentage.

d. The effective date of the legislation allowing use of an exemption certificate for fuel used in processing is January 1, 1988. However, a certificate which is complete and correct according to subrule 15.3(3), paragraph "a," and any other requirement of the director, which is signed and dated prior to January 1, 1988, shall, if accepted by a seller in good faith, protect the seller to the extent described in subrule 15.3(3), paragraph "b," for energy consumed on or after January 1, 1988. Exemption certificates filed with the seller prior to January 1, 1988, also expire five years from date of acceptance.

**15.3(4) *Determining percentage of electricity used in processing.*** When electricity is purchased for consumption both for processing and for taxable uses, and the use of the electricity is recorded on a single meter, the purchaser must allocate the use of the electricity according to taxable and nontaxable consumption if an exemption for nontaxable use is to be claimed. The calculations which support the allocation, if properly performed, can serve as the documentation reasonably necessary to support a claim of exemption for fuel used in processing. The following method with its alternative table may be used to determine the percentage of electricity used on the farm or in a factory which is exempt by virtue of its being used in processing. See subrule 15.3(4), paragraph "e," for alternative methods of computing exempt use, including exempt use by a new business. First, the base period for the calculations must be selected.

a. Ordinarily, the 12 months previous to the date upon which the exemption is calculated are used as the base period for determining the percentage of electricity exempt as used in processing. This immediately previous 12-month period is used because it is a span of time which is (1) recent enough to accurately reflect future electric usage; (2) extended enough to take into account variations in electrical usage resulting from changes in temperature occurring with the seasons; and (3) is not so long as to require unduly burdensome calculations. However, individual circumstances can dictate that a shorter or longer period than 12 months will be used or that some 12-month period other than that immediately previous to the date upon which the exemption certificate is filed, will be used.

EXAMPLE: Mr. Wilson is a farmer. He files an exemption certificate for the period beginning January 1, 1990. The year 1989 is one with a very mild winter, a relatively cool summer, and a very dry autumn. Mr. Wilson uses no electricity for grain drying and substantially less electricity than usual for heating and cooling his livestock buildings. Mr. Wilson must use a 12-month period which is more representative of his usual exempt electrical consumption than that of January through December 1989.

EXAMPLE: Mr. Jackson is also a farmer. He files an exemption certificate for the period beginning January 1, 1991. The year 1990 is one in which the summer is extraordinarily hot, the winter exceedingly cold, and the autumn very wet. Mr. Jackson uses far more electricity than normal to dry his grain and heat and cool his livestock buildings. He should use a 12-month period more representative of his customary exempt use of electricity than the period January through December 1990.

EXAMPLE: Company A manufactures its product in a factory which has no windows and is heavily insulated. The factory always runs 40 hours per week, 52 weeks per year. Because of these and other circumstances, Company A's electrical usage does not vary significantly from month to month, and it is easy enough to document this. Company A can calculate its percentage of exempt use of electricity based on a one-month, rather than a 12-month, period.

EXAMPLE: Company B manufactures widgets. The "economic cycle" for widget production is, on the average, 36 months long. During this economic cycle, there are times when, for months at a time, the factory will operate three shifts. At other times, for weeks at a time, the entire factory will be shut down and its personnel laid off. The only accurate way to determine exempt percentage of electricity used is to calculate electrical use over the entire economic cycle. Therefore, 36 months, rather than 12 months, would be the base period.

*b.* Calculating kilowatts used per hour by various electrical devices. The first step in computing percentage of exemption is to determine the number of kilowatts used per hour for each device in farm or factory. If kilowatts consumed per hour of a device's use is not listed on the device or otherwise readily obtainable, formulas can be used to determine this information.

#### Lights

For incandescent bulbs, add rated wattages and divide by 1,000. For fluorescent lights, add rated wattages plus an additional 20 percent of rated wattages, then divide by 1,000.

#### Incandescent Lights:

$$\frac{\text{Watts}}{1,000} = \text{Kilowatts Per Hour}$$

#### Fluorescent and Other High Intensity Lights:

$$\frac{\text{Watts} + .20 (\text{Watts})}{1,000} = \text{Kilowatts Per Hour}$$

#### Devices Other Than Lights

For these devices, use the wattage rating given by the manufacturer and divide by 1,000 to obtain approximate kilowatts used per hour of operation.

$$\frac{\text{Watts}}{1,000} = \text{Kilowatts Per Hour}$$

If an appliance does not list a watt rating, tables provided by Iowa State University Cooperative Extension Service can be used especially by farmers who are attempting to compute their exempt percentage of electricity used. Persons using a table are reminded to convert watts to kilowatts before proceeding to further calculations.

*c.* The average number of kilowatts consumed per hour of operation for any one device must next be multiplied by the total number of hours which the device is operated during the base period. A person may use intermediate calculations. For example, assume that a machine used in processing consumes 20 kilowatts per hour of operation. The machine is operated, during a 12-month base period, 40 hours per week during 50 weeks. The machine is not placed in operation when the factory is closed for two weeks vacation. Exempt use is calculated as follows:

$$\frac{\text{Kilowatts Per Hour}}{20} \times \frac{\text{Hours Operated Per Week}}{40} \times \frac{\text{Weeks Operated in 12-Month Period Equals Number of Exempt Kilowatt Hours}}{50} = 40000$$

Assume that a grain dryer uses 30 kilowatts per hour of operation. During a 12-month base period, the grain dryer is used in processing 200 hours per month, for 3 months. The calculation for total number of kilowatt hours of exempt use for the 12-month period is as follows:

$$\frac{\text{Kilowatts Per Hour}}{30} \times \frac{\text{Hours of Exempt Use Per Month}}{200} \times \frac{\text{Number of Months of Exempt Use Equals Total Number of Exempt Kilowatt Hours}}{3} = 18000$$

d. The following is a very simplified example of a worksheet for determining the percentage of electricity qualifying for exemption when a single meter records both exempt and taxable use.

	Kilowatts Per Hour of Operation	Average Hours of Operation Per 12-Month Base Period	Average Kilowatt Hours Per 12-Month Base Period	Total
All Exempt Usage				
Production Machine #1	10	1000	10000	
Production Machine #2	10	1000	10000	
Other	10	1000	10000	
Total Exempt Usage				30000(A)
All Taxable Usage				
Air Conditioners	10	3000	30000	
General Lighting	10	3000	30000	
Office Equipment	10	3000	30000	
Space Heaters	10	3000	30000	
Other	10	3000	30000	
Total Taxable Usage				150000(B)
Total—All Usages				180000(C)

$$\frac{30000}{180000} \text{ or } \frac{A}{C} = \text{Percentage of Electricity Purchase Qualifying for Exemption} = 16.60\%$$

The number actually used in the base period can be determined by reference to billings for the base period. If the number of kilowatt hours calculated to have been used does not approximate the number actually used in the base period, the calculations are deficient and should be performed again. Once the precise percentage of exemption has been calculated, that percentage must be applied during any period for which a purchaser is requesting exemption. Any substantial and permanent change in the amount of electricity consumed or in the proportion of exempt and nonexempt use of electricity is an occasion for recomputing the exempt percentage and for filing a new exemption certificate.

e. The following are nonexclusive alternatives to the above method of determining the percentage of electricity which is exempt because it is used in processing. First, if currently only one meter exists to measure both exempt and nonexempt use of electricity, the most accurate method of determining exempt and nonexempt use may be separate metering of these two uses. This possibility is especially practical

if all exempt use results from the activities of one machine, however large. If separate metering is impossible or impractical, it may be useful to employ the services of an energy consultant. If using energy consultant's service is impractical, it may be possible to secure, from the manufacturer of a machine used in processing, the number of kilowatts which a machine uses per hour of operation. Often, these manufacturer's studies give a more accurate measure of a machine's use of electricity than the formulas set out in paragraph 15.3(4) "b" above. This circumstance is especially true with regard to large electric motors.

If a business is new, and no historical data exists for use in calculating exempt and nonexempt percentages of electricity or other fuel consumed, any person calculating future exempt use must make the best projections possible. If calculating future exempt use with no past historical data to serve as a basis for the calculations, it is suggested that conservative estimates of exempt use be made. Using these conservative estimates can avoid future liability for sales tax on the part of the purchaser of the electricity. Possibly, in calculating exempt use of fuel for a new business, historical data from existing similar businesses can be used if available from persons not in direct competition to the person claiming the exemption.

Ordinarily any method of determining the percentage of electricity used in processing will involve calculating both exempt and nonexempt usage. However, in certain instances it is acceptable to calculate only exempt or nonexempt usage in one column and to list separately the equipment or devices making the exempt or nonexempt use of the electricity separate. This practice can normally be followed where electrical usage does not fluctuate dramatically and where usage is either predominantly exempt or predominantly not exempt.

**15.3(5) *Applicability.*** The provisions of subrule 15.3(4) explaining the determination of the percentage exemption for electricity also apply to other types of fuel such as natural gas, LP, etc., when used for exempt purposes.

**15.3(6) *Special certificates of beer and wine wholesalers.*** Beer or wine purchased from a wholesaler holding a Class A or F permit has been purchased for resale if the purchaser provides the wholesaler with a retail beer or wine permit or liquor license number. A wholesaler's record of account with an individual retailer is a complete and correct exemption certificate for the purposes of beer or wine sales and provides all the protection which the usual exemption certificate (see subrule 15.3(2)) provides if the record of account contains the retailer's beer or wine permit or liquor license number and all other information concerning the account is taken in good faith by the wholesaler. The words "beer," "permit," "retailer," "wholesaler," and "wine" have the same definitions for the purposes of this rule as the definitions given them in Iowa Code section 123.3.

This rule is intended to implement Iowa Code sections 422.42(3), 422.42(13), 422.42(16), 422.47, 422.53 as amended by 1997 Iowa Acts, House File 266, and 423.1(1).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—15.4(422,423) Bad debts.** Bad debts shall be allowed as a credit on tax when all the following facts have been shown:

**15.4(1)** Tax has been previously paid on the gross receipts from the accounts on which the taxpayer claims credit for tax.

**15.4(2)** The accounts have been found to be worthless.

**15.4(3)** The taxpayer has records to show that the accounts have actually been charged off for income tax purposes.

Credit for bad debts shall not be allowed on merchandise which was exempt from tax when sold.

When credit on tax has been taken on account of bad debts and the debts are subsequently paid, the proceeds from the collection of such accounts shall be included in the gross receipts for the period in which payment is made.

Effective July 1, 1992, the sales and use tax rate increased from 4 percent to 5 percent.

Bad debts which occur prior to July 1, 1992, and are charged off on or after July 1, 1992, may be charged off at the tax rate of 5 percent. Bad debts which have been charged off prior to July 1, 1992,

and all or any part of the bad debt is recovered after July 1, 1992, will be subject to tax at the rate of 5 percent. All the provisions of this rule and rule 15.5(422,423) apply.

This rule is intended to implement Iowa Code sections 422.42(16), 422.46, and 423.1(10).

**701—15.5(422,423) Recovery of bad debts by collection agency or attorney.** When bad debts have been charged off and later recovered in whole, or in part, through the services of a collection agency or an attorney, the full amount of the debt recovered shall be included with the gross sales for the period which the collection was made. The services of an agency or attorney are services purchased by a retailer and shall not reduce the gross amount collected for the retailer by the agency or attorney.

This rule is intended to implement Iowa Code sections 422.42(16), 422.46, and 423.1(10).

**701—15.6(422,423) Discounts, rebates and coupons.**

**15.6(1) Discounts.** A discount is an abatement from the face of an account, with the remainder being the actual purchase price of the goods charged in the account. The purchaser entitled to the discount will never owe the face of the bill as a debt—this being the net of the bill after the agreed discount has been deducted. The word “discount” means “to buy at a reduction.” *Benner Tea Company v. Iowa State Tax Commission*, 252 Iowa 843, 109 N.W.2d 39 (1961).

Any discount allowed by a retailer and taken on taxable sales is a proper deduction when collecting and reporting tax. This is not the case when the retailer offers a discount to a purchaser but bills and collects tax on the gross charge rather than on the net charge. The customer must receive the benefit of the discount, for sales tax purposes, in order for the retailer to exclude it from gross receipts.

Certain retailers bill their customers on a gross and net basis, with the difference considered to be a discount for payment purposes. When a customer does not resolve the bill within the net payment period, tax shall apply on the gross charge shown on the billing.

**15.6(2) Rebates.** A rebate is a return of part of an amount paid for a product. Manufacturers’ rebates are not discounts and cannot be used to reduce the gross receipts received from a sale or reduce the purchase price of a product. This rule applies even though the rebate is used by the seller to reduce the selling price or is used by the purchaser as a down payment. The rebate is considered a transaction between the manufacturer and the purchaser. See 1972 O.A.G. 332.

**15.6(3) Coupons.** Coupons issued by the producer of a product are not discounts and cannot be used as an abatement from the face of the account. Coupons issued by the retailer which actually reduce the price of the product to the purchaser are treated as a discount as per subrule 15.6(1). *Saxon-Western Corporation v. Mahin*, 369 N.E.2d 1185 (Ill. 1979).

EXAMPLE: C acquires a 30¢ off coupon issued by manufacturer of A-B Band-aids for A-B Band-aids which can be redeemed at a store which sells the product. C goes to store D and purchases a box of A-B Band-aids which shows a price of \$1.50. C pays \$1.20 + the 30¢ coupon. D is reimbursed the 30¢ for the coupon by the manufacturer. Tax is due on the \$1.50 because C’s total gross receipts are \$1.50. The coupon is not used as a discount in this situation.

EXAMPLE: E offers a two for the price of one coupon for its super hamburger. Each hamburger normally sells for \$2.00 each. The coupon can only be redeemed at E’s retail store. F acquires the coupon and redeems it at E’s store. The purchase price for F was \$2.00 for both hamburgers. The tax is due on the \$2.00 because this amount is the gross receipts for E, even though the value of the two hamburgers would normally be \$4.00. In this situation, the sales price for the two hamburgers was \$2.00.

This rule is intended to implement Iowa Code sections 422.42(6) and 423.1(3).

**701—15.7(422,423) Trading stamps are not a discount.** Rescinded IAB 11/14/01, effective 12/19/01.

**701—15.8(422,423) Returned merchandise.** When merchandise is sold and returned by a customer who secures an allowance or a return of the full purchase price, the seller may deduct the amount allowed as full credit or refund, provided the merchandise is taxable merchandise and tax has been previously paid on the gross receipts.

An allowance shall not be made for the return of any merchandise which (1) is exempt from either sales or use tax; or (2) has not been reported in the taxpayer's gross receipts and tax previously paid.

This rule is intended to implement Iowa Code sections 422.42(6) and 423.1(3).

**701—15.9(422) Goods damaged in transit.** If goods shipped by a retailer have been delivered under a contract for sale to a consumer, and thereafter the goods are damaged in the course of transit to the consumer, the retailer shall be liable for tax upon the full sale price of the goods, as the sale to the consumer has been completed. *Harold D. Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985).

If the goods have not been delivered to the consumer, the sale to the consumer has not been completed, and the retailer shall not be taxed for the amount agreed to be paid by the consumer.

EXAMPLE: A company in Chicago transports furniture in its own truck to customer B in Des Moines. Under the contract of sale, delivery of the furniture would occur in Des Moines and sales tax would ordinarily be due upon the gross receipts of the sale. However, in East Moline, Illinois, the furniture truck is involved in an accident, and B's furniture is destroyed. There was no delivery of the furniture to B, thus no sale to B and thus no sales tax is due. Had the point of delivery been Chicago, Illinois, a sale would have occurred outside this state, but no use tax would be due because B never made any "use" of the furniture in Iowa.

This rule is intended to implement Iowa Code sections 422.42 and 422.43.

**701—15.10(422) Consignment sales.** When a retailer receives tangible personal property on consignment from others and the consigned merchandise is sold in the ordinary course of business with other merchandise owned or services performed by the retailer, the retailer or consignee shall be making sales at retail. In these cases, the consignee shall file a return and remit tax to the department along with the returns and remittances of gross receipts from the sale of other merchandise.

Sale of tangible personal property by an agent or consignee for another person shall be exempt if the sales meet the requirements of a casual sale or any other exemptions.

This rule is intended to implement Iowa Code sections 422.42 and 423.43.

**701—15.11(422,423) Leased departments.** When a permit holder leases a part of the premises where the permit holder's retail business is conducted, the lessor shall immediately notify the department and supply the following information: (1) name and home office address of the lessee; (2) type of merchandise sold by the lessee or service performed; (3) date when the lessee began making sales or performing services at retail in Iowa on the leased premises; and (4) whether the lessee has secured a permit to account directly to the department for tax due or if the lessee's sales will be accounted for in the lessor's tax return. Upon request, the department shall furnish a form to the lessor on which to report this information.

If the lessor fails to notify the department that a part of the premises has been leased and does not furnish the requested information, the lessor shall be responsible for tax due as a result of sales by the lessee, unless the lessee has properly remitted the tax due.

The lessor who has leased a part of the premises shall report to the department the names and addresses of all lessees. If the lessor is accounting for the lessee's sales, the lessor shall, after the name of each lessee, show the amount of net taxable sales made by the lessee and which net taxable sales are included in the lessor's return. If the lessee is reporting the tax directly to the department, the lessor shall show the permit number of the lessee.

When the lessee has terminated selling activities, the lessor shall immediately notify the department.

This rule is intended to implement Iowa Code sections 422.68(1) and 423.23.

**701—15.12(422,423) Excise tax included in and excluded from gross receipts.**

**15.12(1)** An excise tax which is not an Iowa sales or use tax may be excluded from the gross receipts or purchase price of the sale or use of property or taxable services only if all of the following conditions exist:

*a.* The excise tax is imposed upon the identical sale which the Iowa sales tax is imposed upon or upon the sale which measures the taxable use or upon a use identical to the Iowa taxable use and not upon some event or activity which precedes or occurs after the sale or use.

*b.* The legal incidence of the excise tax falls upon the purchaser who is responsible for payment of the Iowa sales tax. The purchaser must be obligated to pay the excise tax either directly to the government in question or to another person (e.g., the retailer) who acts as a collector of the tax. See *Gurley v. Rhoden*, 421 U.S. 200, 95 S. Ct. 1605, 44 L.Ed.2d 110 (1975) for a description of the circumstances under which the legal, as opposed to the economic, burden of an excise tax falls upon the purchaser.

*c.* The name of the tax is specifically stated and the amount of the tax separately set out on the invoice, bill of sale, or upon another document which embodies a record of the sale.

EXAMPLE 1. The federal government imposes an excise tax upon the act of manufacturing tangible personal property within the United States. The amount of the tax is measured as a percentage of the price for the first sale of the property, which is usually to a wholesaler. However, one particular manufacturer sells its manufactured goods at retail in Iowa. Even if this tax meets the requirements for exclusion of paragraphs “*b*” and “*c*” above, it is not excludable because it does not meet the requirements of paragraph “*a*.” The tax is not imposed upon the act of sale but upon the prior act of manufacture. The tax is merely measured by the amount of the proceeds of the sale.

EXAMPLE 2. The federal government imposes an excise tax of 4 percent on a retailer’s gross receipts from sales of tangible personal property. The law allows the retailer to separately identify and bill a customer for the tax. However, if a retailer fails to pay the tax, the government cannot collect it from a purchaser and if the government assesses tax against the retailer and secures a judgment requiring the retailer to pay the tax, the retailer who has failed to collect the tax from a purchaser on the initial sale has no right of reimbursement from the purchaser. This tax is not excludable from Iowa excise tax. Its economic burden falls upon the purchaser. However, since neither the government nor the retailer has any legal right to demand payment of the tax from a purchaser, the legal incidence of the tax is not upon the purchaser; and the tax would not meet the requirements of paragraph “*b*” above.

**15.12(2)** As of January 1, 1988, the following federal excise taxes are includable in the gross receipts of Iowa sales tax:

*a.* The federal gallonage taxes on distilled spirits, wines, and beer imposed by 26 U.S.C. Sections 5001, 5041, and 5051.

*b.* The tax imposed by 26 U.S.C. Section 5701 with regard to cigars, cigarettes, and cigarette papers and tubes.

*c.* The federal tax on gasoline imposed under 26 U.S.C. Section 4081.

*d.* The federal tax on tires, inner tubes, and tread rubber imposed by 26 U.S.C. Section 4071.

*e.* The federal manufacturer’s excise tax imposed by 26 U.S.C. Section 4061 has been repealed.

**15.12(3)** The following excise taxes are excluded from the amount of gross receipts:

*a.* The federal tax imposed by 26 U.S.C. Section 4251(a) on the communication services of local telephone service, toll telephone service, and teletypewriter exchange service.

*b.* The federal tax imposed by 26 U.S.C. Section 4051 upon the first retail sale of automobile and truck chassis and bodies; truck trailer and semitrailer chassis and bodies and tractors of the kind chiefly used for highway transportation in combination with trailers or semitrailers.

This rule is intended to implement Iowa Code sections 422.42(6), 422.43, 423.1, and 423.2.

**701—15.13(422,423) Freight, other transportation charges, and exclusions from the exemption applicable to these services.** The determination of whether freight and other transportation charges shall be subject to sales or use tax is dependent upon the terms of the sale agreement.

When tangible personal property or a taxable service is sold at retail in Iowa or purchased for use in Iowa and under the terms of the sale agreement the seller is to deliver the property to the buyer or the purchaser is responsible for delivery and such delivery charges are stated and agreed to in the sale agreement or the charges are separate from the sale agreement, the gross receipts derived from the freight or transportation charges shall not be subject to tax. As of May 20, 1999, this exemption does not apply

to the service of transporting electrical energy. As of April 1, 2000, this exemption does not apply to the service of transporting natural gas.

When freight and other transportation charges are not separately stated in the sale agreement or are not separately sold, the gross receipts from the freight or transportation charges become a part of the gross receipts from the sale of tangible personal property or a taxable service and are subject to tax. Where a sales agreement exists, the freight and other transportation charges are subject to tax unless the freight and other transportation charges are separately contracted. If the written contract contains no provisions separately itemizing such charge, tax is due on the full contract price with no deduction for transportation charge, regardless of whether or not such transportation charges are itemized separately on the invoice. *Clarion Ready Mixed Concrete Company v. Iowa State Tax Commission*, 252 Iowa 500, 107 N.W.2d 553(1961); *Schemmer v. Iowa State Tax Commission*, 254 Iowa 315, 117 N.W.2d 420(1962); *City of Ames v. Iowa State Tax Commission*, 246 Iowa 1016, 71 N.W.2d 15(1959); *Dain Mfg. Company v. Iowa State Tax Commission*, 237 Iowa 531, 22 N.W.2d 786(1946).

Effective July 1, 2001, gross receipts from charges for delivery of electricity or natural gas are exempt from tax to the extent that the gross receipts from the sale, furnishing, or service of electricity or natural gas or its use are exempt from sales or use tax under Iowa Code chapters 422 and 423.

The exclusions from this exemption relating to the transportation of natural gas and electricity are applicable to all contracts for the performance of these transportation services. Below are examples which explain some of the principal circumstances in which the transport of natural gas or electricity is a service subject to tax.

Freight and transportation charges include, but are not limited to, the following charges or fees: freight; transportation; shipping; delivery; or trip charges.

EXAMPLE 1. Consumer ABC, located in Des Moines, contracts with supplier DEF, located in Waterloo, for DEF to sell gas and electricity to ABC. ABC then contracts with utility GHI to transport the energy over GHI's network (of pipes or wires) from Waterloo to ABC's facility in Des Moines. GHI's transport of ABC's energy is a taxable service. The transportation of natural gas and electricity by a utility is a taxable service of furnishing natural gas or electricity whether or not that utility or some other utility produces the natural gas or generates the electricity furnished. A utility's transportation of gas or electricity is a "transportation service" specifically excluded from the exemption set out in this rule.

EXAMPLE 2. Consumer ABC contracts with utility DEF for DEF to provide electricity from DEF's generating plant in Mason City to ABC's location in Cedar Rapids. Transport of the electricity is by way of DEF's network of long distance transmission lines. The contract between ABC and DEF states the prices to be paid for the purchase of various amounts of electricity and also sets out the amounts to be paid for transport of electricity as well and constitutes separate sales of electricity and transportation services. In these circumstances, amounts which ABC pays DEF for transport of the electricity are taxable gross receipts. This transportation service would ordinarily then be excluded from tax under the exemption set out in this rule; however, separate transportation charges for transportation of electricity are excluded from the exemption (as of May 20, 1999, and are thereafter taxable).

EXAMPLE 3. As in Example 2, consumer ABC contracts with utility DEF for the delivery of electricity from DEF's generating plant in Mason City to ABC's location in Cedar Rapids, ownership of the electricity to pass to ABC in Cedar Rapids. Also, as in Example 2, the contract between ABC and DEF states varying prices to be paid for the purchase and transportation of varying amounts of electricity and constitutes separate sales of electricity and transportation services. Transport of the electricity will be by way of GHI's transmission lines. DEF contracts with GHI for the transport of the electricity to ABC's plant in Cedar Rapids. At the time the contract is signed, GHI asks DEF for an exemption certificate stating that DEF will resell GHI's transportation service to ABC. GHI must either secure the certificate or collect Iowa sales tax from DEF. GHI is furnishing a taxable electricity transportation service to DEF which DEF will in turn furnish to ABC. DEF must collect tax from ABC.

EXAMPLE 4. In this example, the same contract exists between ABC and DEF as exists in Example 3. However, in this example, a breakdown at DEF's plant in Mason City prevents DEF from generating the electricity which it is contractually obligated to provide to ABC. DEF is forced to purchase both

electricity and its transport from JKL. The contract between DEF and JKL states the prices to be paid for the purchase of various amounts of electricity and also sets out the amounts to be paid for the transport of this electricity as well and constitutes separate sales of electricity and transportation services. JKL asks DEF for an exemption certificate stating that DEF has purchased the electricity and its transport for resale to ABC. In this case, JKL must secure an exemption certificate from DEF to avoid collecting tax on its sale and transport of the electricity for DEF.

EXAMPLE 5. Again, ABC and DEF have contracted, as they did in Example 2, for DEF to sell and transport electricity from Mason City to Cedar Rapids. However, their agreement mentions only one combined price for sale and delivery of the electricity. There is no separately contracted price for transport of the electricity, in contrast to the situation in Example 2. In this case, the entire amount which ABC pays to DEF is taxable as the entire amount paid is for the sale of tangible personal property. See Clarion Ready Mixed and Schemmer, generally, above.

EXAMPLE 6. Manufacturer EFG contracts with utility DEF for the purchase of natural gas with a separate contract for its delivery. The gas is to be transported from DEF's storage facility near Osceola to EFG's manufacturing plant in Fort Dodge by way of DEF's pipeline. Ownership of the gas passes from DEF to EFG in Fort Dodge. EFG uses 92 percent of the gas which is transported to its plant in processing the goods manufactured there. The receipts which EFG pays DEF for the transport of the gas are excluded from the transportation exemption, but they are not excluded from the processing exemption. Ninety-two percent of those receipts are exempt from tax because that is the percentage of gas used by EFG in processing. In addition, utility DEF charges manufacturer EFG \$9.95 as a delivery fee for the gas. Since the purchase of the gas has a 92 percent exemption from Iowa sales tax because of a 92 percent usage in processing, 92 percent of the delivery charge of \$9.95 is also exempt from tax.

This rule is intended to implement Iowa Code sections 422.43 and 423.2, and section 422.45 as amended by 2001 Iowa Acts, House File 705.

**701—15.14(422,423) Installation charges when tangible personal property is sold at retail.** When the sale of tangible personal property includes a charge for installation of the personal property sold, the current rate of tax shall be measured on the entire gross receipts from the sale. The installation charges would not be taxable if: (1) The installation service is not an enumerated service, and also (2) where a sales agreement exists, the installation charges are separately contracted. If the written contract contains no provisions separately itemizing such charges, tax is due on the full contract price with no deduction for installation charges, regardless whether or not such installation charges are itemized separately on the invoice.

If the installation services are enumerated services, the installation charges would not be taxable if: (1) The services are exempt from tax, e.g., the services are performed on or connected with new construction, reconstruction, alteration, expansion or remodeling of a building or structure; or, the services are rendered in connection with the installation of new industrial machinery or equipment. See rule 701—19.13(422, 423) and subrule 18.45(7), respectively. And also (2) where a sales agreement exists, the installation charges are separately contracted. If the written contract contains no provisions separately itemizing such charges, tax is due on the full contract price with no deduction for installation charges, regardless whether or not such installation charges are itemized separately on the invoice. If no written contract exists, the installation charges must be separately itemized on the invoice to be exempt from tax.

This rule is intended to implement Iowa Code sections 422.43 and 423.2.

**701—15.15(422) Premiums and gifts.** A person who gives away or donates tangible personal property shall be deemed to be a consumer of such property for tax purposes. The gross receipts from the sale of tangible personal property to such persons for such purposes shall be subject to tax.

When a retailer purchases tangible personal property, exclusive of tax, for the purpose of resale in the regular course of business and later gives it away or donates it, the retailer shall include in the return the value of the property at the retailer's cost price.

When a retailer sells tangible personal property and furnishes a premium with the property sold, the retailer is considered to be the ultimate consumer or user of the premium furnished.

This rule is intended to implement Iowa Code sections 422.42 and 422.43.

**701—15.16(422)** **Gift certificates.** When a retailer sells gift certificates, tax shall be added at the time the gift certificate is redeemed.

This rule is intended to implement Iowa Code sections 422.42 and 422.43.

**701—15.17(422,423)** **Finance charge.** Interest or other types of additional charges that result from selling on credit or under installment contracts are not subject to sales tax when such charges are separately stated and when such charges are in addition to an established cash selling price. However, if a sale is made for a lump sum, the tax is due on the total selling price if finance charges are not separately stated.

When interest and other types of additional charges are added as a condition of a sale in order to obtain title rather than as a charge to obtain credit where title to goods has previously passed, such charges will be subject to tax even though they may be separately stated. *State ex. rel. Turner v. Younkers Bros., Inc.*, 210 N.W.2d 550 (Iowa 1973); *Road Machinery Supplies of Minneapolis, Inc., v. The Commissioner of Revenue*, Minnesota Tax Court of Appeals, 1977, 2 Minn. CCH State Tax Reporter II 200-835. See rule 701—16.47(422,423) relating to conditional sales contracts.

This rule is intended to implement Iowa Code sections 422.42(2) and 423.4.

**701—15.18(422,423)** **Coins and other currency exchanged at greater than face value.** Any exchange, transfer, or barter of merchandise for a consideration paid in gold, silver, or other coins or currency shall be subject to tax to the extent of the agreed-upon value of the coins or currency so exchanged. This agreed-upon value constitutes the gross receipts or purchase price subject to tax. Coins or currency becomes articles of tangible personal property having a value greater than face value when they are exchanged for a price greater than face value. However, when a coin or other currency, in the course of circulation, is exchanged at its face value, the sale shall be subject to tax for the face value alone. *Losana Corp. v. Porterfield*, 14 Ohio St.2d 42, 236 N.E.2d 535 (1968).

EXAMPLE 1. Taxpayer operates a furniture store. The taxpayer offers to exchange furniture for silver coins at ten times the face value of any coins dated prior to January 1, 1965. Upon any exchange pursuant to the offer, the value of the coins for purposes of determining the tax on the exchange will be equivalent to the value as agreed upon by the parties without regard to the face value of the coins.

EXAMPLE 2. Taxpayer operates a hardware store. In the regular course of business, the taxpayer receives silver coins dated prior to January 1, 1965. Taxpayer has received the coins at face value for the sales price and only that value is subject to tax.

Also see Attorney General Opinion Griger to Bair, Director of Revenue, May 15, 1980, #80-5-13.

This rule is intended to implement Iowa Code section 422.42(6).

**701—15.19(422,423)** **Trade-ins.**

**15.19(1)** Trade-ins. When tangible personal property is traded toward the purchase price of other tangible personal property, the gross receipts shall be only that portion of the purchase price which is payable in money to the retailer if the following conditions are met:

- a. The tangible personal property is traded to a retailer, and the property traded is the type normally sold in the regular course of the retailer's business; and
- b. The tangible personal property traded to a retailer is intended by the retailer to be ultimately sold at retail; or
- c. The tangible personal property traded to a retailer is intended to be used by the retailer or another in the remanufacturing of a like item.

EXAMPLE 1. A owns a car valued at \$5,000. A trades his used car to XY car dealer for a used car valued at \$12,000. XY car dealer normally sells used cars. Use tax would be due on the \$7,000 in money A paid to XY used car dealer, as both conditions "a" and "b" have been met.

EXAMPLE 2. John Doe has a pickup truck with a value of \$2,000. John wants a boat so he offers to trade his \$2,000 pickup to ABC boat dealer for the purchase of a boat valued at \$5,000. ABC boat dealer is a new and used boat dealer. ABC boat dealer agrees to accept the \$2,000 pickup and \$3,000 cash in trade for the boat. In this example, the tax would be computed on \$5,000. The trade-in provision would not apply because condition “a” has not been met. The property traded is not the type of property normally sold by ABC new and used boat dealer in the regular course of the boat dealer’s business.

EXAMPLE 3. ABC Corporation trades 500 bushels of corn and \$500 cash to the local cooperative elevator for the purchase of various hand tools. The local cooperative elevator normally sells grain in its regular course of business for processing into bread. The trade-in provision in this example would not apply because condition “b” would not be met. The grain traded toward the purchase price of the hand tools when ultimately sold by the cooperative elevator is sold for processing and not at retail.

EXAMPLE 4. Hometown Appliance store is in the business of selling stoves, refrigerators, and other various appliances in Iowa. Hometown Appliance has a refrigerator valued at \$650. Customer A wishes to trade a used refrigerator toward the purchase price of the new refrigerator. Hometown Appliance agrees to accept A’s used refrigerator at a value of \$150 toward the purchase price of the new refrigerator. A pays Hometown Appliance \$500 in money. The trade-in provision applies as both conditions “a” and “b” have been met and tax would be due on the \$500.

Several months later, Hometown Appliance sells the used refrigerator it received from customer A to the local school district which is exempt from sales tax on its purchase. The trade-in provision on the original transaction is still applicable because both conditions “a” and “b” were met. The sale is “at retail,” even if it is a retail sale exempt from tax.

EXAMPLE 5. ABC Auto Supply is in the business of selling various types of automobile and farm implement supplies. The normal selling price for a car generator is \$80. ABC Auto Supply allows a \$20 trade-in credit to any customer who wishes to trade in an unworkable generator. At the time ABC Auto Supply accepts the unusable generator it knows that the generator will not be sold at retail; however, ABC Auto Supply does know that the generator will be sold to XYZ Company which is in the business of rebuilding generators by using existing parts plus new parts. In this example the trade-in provision would apply since conditions “a” and “c” have been met.

**15.19(2)** All the provisions of subrule 15.19(1) apply to the trade-in of vehicles subject to registration when the trade involves retailers of vehicles.

When vehicles subject to registration are traded among persons who are not retailers of vehicles subject to registration, the conditions set forth in 15.19(1) “a” and “b” need not be met. The purchase price is only that portion of the purchase price represented by the difference between the total purchase price of the vehicle subject to registration acquired and the amount of the vehicle subject to registration traded.

This rule applies only when a vehicle is traded for tangible personal property, regardless of whether the transaction is between a retailer and a nonretailer or two nonretailers. The vehicle traded in must be owned by the person(s) trading in the vehicle. It is presumed that the name or names indicated on the title of the vehicle dictate ownership of the vehicle as set forth in Iowa Code section 321.1.

EXAMPLE 1. John Doe has an automobile with a value of \$2,000. John and his neighbor Bill Jones, who has an automobile valued at \$3,500, decide to trade automobiles. John pays Bill \$1,500 cash. Vehicles subject to registration are subject to use tax which is payable to the county treasurer at the time of registration. In this example John would owe use tax on \$1,500 since this is the amount John paid Bill and tax is only due on the cash difference. Bill would not owe any use tax on the vehicle acquired through the trade.

EXAMPLE 2. Joe has a Ford automobile with a value of \$5,000. Joe and his friend Jim, who has a Chevrolet automobile also valued at \$5,000, decide to trade automobiles. Joe and Jim make an even trade, automobile for automobile with no money changing hands. In this example there is no tax due on either automobile because there is no exchange of money.

**15.19(3)** Trade for services. The trade-in provisions found in Iowa Code sections 422.42(5) “b” and 423.1(8) do not apply to taxable enumerated services. When taxable enumerated services are traded, the gross receipts would be determined based on the value of the service or other consideration.

**15.19(4)** Three-way trade-in transactions. In a three-way transaction, the agreement provides that a lessee sell to a third-party dealer a vehicle (or other tangible personal property) which the lessee owns. The lessor then purchases another vehicle from the third-party dealer at a reduced price and leases the vehicle to the lessee. The difference between the reduced sale price and retail price of the vehicle is not allowed as a trade-in on the vehicle for use tax purposes.

EXAMPLE. “A” enters into a three-way agreement with “B,” the lessor. Under the terms of the contract, “A” sells a 2000 Ford Taurus owned by “A” to “C,” a used-car dealer. The retail price for the Ford Taurus is \$30,000. “C” then sells the Ford Taurus to “B” for the reduced price of \$25,000. “B” then leases the Ford Taurus to “A” for a period of 12 months. The \$5,000 difference between the reduced sale price and the retail price of the vehicle is not allowed as a trade-in on the sale of the vehicle for use tax purposes.

This rule is intended to implement Iowa Code sections 422.42(5) “b” and 423.1(8). See also *Reynolds Motor Co. et al v. Iowa Dep’t. of Revenue*, Equity 72050, Dist. Ct. of Scott Cty., Iowa, August 28, 1987.

**701—15.20(422,423) Corporate mergers which do not involve taxable sales of tangible personal property or services.** If title to or possession of tangible personal property or ownership of services is transferred from one corporation to another pursuant to a statutory merger, the transfer is not a “sale” subject to tax if all of the following circumstances exist: (1) the merger is pursuant to statute (for example, Iowa Code section 490.1106); (2) by the terms of that statute, the title or possession of property or services transferred passes from a merging corporation to a surviving corporation and not for any consideration; and (3) the merging corporation is extinguished and dissolved the moment the merger occurs and, as a result of this dissolution, cannot receive any benefit from the merger. Transactions which are not of the type described above may involve taxable sales. See the following court cases relating to this area: *Nachazel v. Mira Co. Mfg.*, 466 N.W.2d 248 (Iowa 1991); *D. Canale & Co. v. Celauro*, 765 S.W.2d 736 (Tenn 1989); and *Commissioner of Revenue v. SCA Disposal Services*, 421 N.E.2d 766 (Mass 1981).

EXAMPLE A: Nonaffiliated Corporations A and C enter into a voluntary merger agreement governed by Iowa Code section 490.1106. A and C are separate and independent, one from the other, and neither is a subsidiary of another corporation. No officer of the one is an officer of the other. A and C voluntarily negotiate an arms-length merger agreement which results in the transfer of A’s assets to C and the dissolution of A. In return, A’s stockholders receive stock in C. A’s transfer of tangible personal property to merged company C is not subject to sales or use tax.

EXAMPLE B: Corporations B, D, and E are independent entities. They enter into a merger agreement governed by Iowa Code section 490.1106 and agree to merge into one surviving corporation which will (after the dissolution of B and D) be E. They agree that the shares of merging corporations will be converted into shares of E on an equal basis. The transfers of property by the corporations which are parties to the merger are not sales subject to Iowa tax.

EXAMPLE C: Corporation F receives all of Corporation G’s outstanding shares from G’s sole stockholder. In return, G’s sole stockholder receives stock from F. Corporation G continues to exist after the transaction as a subsidiary of Corporation F. This particular transaction involves a trade or barter of the stock shares of F and G. There is a barter of the stocks and thus a “sale” as that term is understood for the purposes of Iowa sales tax law. However, because the sale involves only intangible property (the stock shares), that sale is not taxable. The stock exchange transaction would not prevent taxation of subsequent transfers of tangible personal property or services between F and G.

EXAMPLE D: Corporation H buys all the assets of Corporation I which include machinery, equipment, finished goods, and raw materials. Corporation H pays cash for these assets. This transaction does involve the sale of tangible personal property and may be subject to Iowa sales tax. However, see 701—subrule 18.28(2) concerning a casual sale exemption applicable to the liquidation of a business.

CHAPTER 18  
TAXABLE AND EXEMPT SALES DETERMINED BY METHOD  
OF TRANSACTION OR USAGE  
[Prior to 12/17/86, Revenue Department[730]]

**701—18.1(422,423) Tangible personal property purchased from the United States government.** Tangible personal property purchased from the United States government or any of the governmental agencies shall be exempt from sales tax, but such purchases shall be taxable to the purchaser under the provisions of the use tax law. Persons making purchases from the United States government, unless exempt from the provisions of Iowa Code section 422.44, shall report and pay use tax at the current rate on the purchase price of such purchases.

This rule is intended to implement Iowa Code sections 422.44 and 423.3.

**701—18.2(422,423) Sales of butane, propane and other like gases in cylinder drums, etc.** Sales of butane, propane and other like gases in cylinder drums and other similar containers purchased for cooking, heating and other purposes shall be taxable.

When gas of this type is sold and motor vehicle fuel tax is collected by the seller, tax shall not be due. If Iowa motor vehicle fuel tax is not collected by the seller at the time of the sale, tax shall be collected and remitted to the department, unless the sale is specifically exempt.

If tax is not collected by the seller at the time of sale, any tax due shall be collected by the department at the time the user of the product makes application for a refund of the motor vehicle fuel tax.

The gross receipts from the rental of cylinders, drums and other similar containers by the distributor or dealer of the gas shall be subject to tax when the title remains with the dealer. Gas converter equipment which might be sold to an ultimate consumer shall be subject to tax.

This rule is intended to implement Iowa Code sections 422.42, 422.43, 422.45(11), 423.1 and 423.2.

**701—18.3(422,423) Chemical compounds used to treat water.** Chemical compounds placed in water which is ultimately sold at retail should be purchased exempt from the tax. The chemical compounds become an integral part of property sold at retail. Chemical compounds placed in water which is directly used in processing are exempt from the tax, even if the water is consumed by the processor and not sold at retail.

Chemical compounds which are used to treat water that is not sold at retail or which are not used directly in processing shall be subject to tax. An example would be chlorine or other chemicals used to treat water for a swimming pool.

Special boiler compounds used by processors when live steam is injected into the mash or substance, whereby the steam liquefies and becomes an integral part of the product intended to be sold at retail and does become a part of the finished product, shall be exempt from tax.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1, and 423.2.

**701—18.4(422) Mortgages and trustees.** Pursuant to the provisions of a chattel mortgage, the receipts from the sale of tangible personal property at a public auction shall be taxable even if the sale is made by virtue of a court decree of foreclosure by an officer appointed by the court for that purpose.

The tax applies to inventory and noninventory goods provided the owner is in the business of making retail sales of tangible personal property or taxable services. In *Re Hubs Repair Shop, Inc.* 28 B.R. 858 (Bkrtcy. 1983).

This rule is intended to implement Iowa Code sections 422.42, 422.43, 423.1 and 423.2.

**701—18.5(422,423) Sales to agencies or instrumentalities of federal, state, county and municipal government.**

**18.5(1)** The gross receipts from the sale of tangible personal property or enumerated taxable services made directly by or to the United States government or to recognized agencies or departments of the United States government shall not be subject to sales tax.

The gross receipts from sales at retail made directly to patients, inmates or employees of an institution or department of the United States government shall be taxable, since they are not made directly to the government. However, sales similarly made by post exchanges and other establishments organized and controlled by federal authority shall not be subject to sales tax.

**18.5(2)** The gross receipts from sales to the United States government, state of Iowa, or federal bureaus, departments, or instrumentalities are not taxable. A sale to government occurs only if a government, pursuant to a contract for sale, takes title or ownership to tangible personal property as a buyer from a seller. No sale to government occurs if a government pays some portion of the cost of sale of an item of tangible personal property but title to and ownership of the property are transferred to another person as a result of the sale. See *AVCO Manufacturing Corporation v. Connelly*, 145 Conn. 161, 140 A.2d 479 (1958) and *Akron Home Medical Services, Inc. v. Lindley*, 25 Ohio St.3d 107, 495 N.E.2d 417 (1986).

EXAMPLE A: Patient A purchases a hospital bed from a drugstore. A percentage of patient A's bill is paid by federal funds from Medicaid. Patient A has purchased a hospital bed, not the federal government, and Iowa tax is due as a result of this sale.

EXAMPLE B: A is a federal government employee. A stays at a hotel while on government business and eats meals there. A pays for the hotel room (treated as the sale of tangible personal property under Iowa sales tax law) and the meals with a credit card. The credit card was issued in A's name, and the cost of the room and meals is billed to A, who pays it. The federal government later reimburses A the entire cost of the room and meals. A has purchased the room and meals, and Iowa sales tax should be charged accordingly.

EXAMPLE C: B is a federal government employee who eats at a restaurant while on government business. B uses a credit card to pay for the meal. The credit card is issued in B's name, but the cost of the meal is billed to the U.S. government which pays that cost. In this situation, the government is the purchaser of the meal on B's behalf, and the sale is exempt from tax.

See rule 701—34.12(423) for an example of the application of this subrule to the motor vehicle use tax.

**18.5(3)** The gross receipts from the sale of goods, wares, merchandise, or services used for public purposes to any tax-certifying or tax-levying body of the state of Iowa or governmental subdivision thereof, including the state board of regents, state department of human services, state department of transportation, and all divisions, boards, commissions, agencies, or instrumentalities of the state, federal, county, or municipal government which have no earnings going to the benefit of an equity investor or stockholder, except the sale of goods, wares, merchandise or services used by or in connection with the operation of any municipally owned public utility engaged in selling gas, electricity, pay television service, or heat to the general public, shall be exempt. The exclusion from exemption for municipally owned pay television service is applicable to sales occurring and services provided on and after July 1, 1991. On and after April 1, 1992, providing sewage service or solid waste collection and disposal service to a county or municipality on behalf of nonresidential commercial operations located within the county or municipality shall be taxable (see rules 701—26.71(422,423) and 26.72(422,423) for more information). Goods, wares, merchandise, or services used for public purposes and sold to any municipally owned solid waste facility which sells all or part of its processed waste as a fuel to a municipally owned public utility shall be exempt.

EXAMPLES:

*a.* A group of exempt instrumentalities, such as cities, issues bonds to finance the construction of a sewage disposal facility. X, a corporation, purchases the bonds but is not involved in the project in any other way. Since X does not enjoy the benefits of earnings of the solid waste facility, the exemption provided the instrumentalities is applicable.

*b.* Corporation Y, which is an instrumentality of the federal government and which Congress has allowed by statute to be subject to state sales and use taxes, purchases tangible personal property. Said purchases are subject to tax because the profits of the corporation are distributed to the stockholders thereof.

c. An instrumentality of government includes an area agency on aging as designated by the Iowa department on aging pursuant to Iowa Code section 231.32.

This tax exemption does not apply to independent contractors who deal with agencies, instrumentalities, or other entities of government. These contractors do not, by virtue of their contracting with governmental entities, acquire any immunity or exemption from taxation for themselves. Sales to these contractors remain subject to tax, even if those sales are of goods or services which a contractor will use in the performance of a contract with a governmental entity. This principle is applicable to construction contractors who create or improve real property for federal, state, county, and municipal instrumentalities or agencies thereof. The contractors shall be subject to sales and use tax on all tangible personal property they purchase regardless of the identity of their construction contract sponsor. See 701—Chapter 19. See also *NLO, Inc. v. Limbach*, 613 N.E.2d 193, 66 Ohio St.3d 389 (1993); *Bill Roberts Inc. v. McNamara*, 539 So.2d 1226 (La. 1989) reh. den. April 27, 1989; *White Oak Corporation v. Department of Revenue Services*, 503 A.2d 582, 198 Conn. 413 (1986).

This rule is intended to implement Iowa Code section 422.45(5).

### **701—18.6(422,423) Relief agencies.**

**18.6(1)** Relief agency means the state, any county, city and county, city or district thereof, or any agency engaged in actual relief work. Nonexclusive examples of relief agencies are Salvation Army, Royal Neighbors, and Masonic Lodge. The sales of tangible personal property or enumerated services to relief agencies are subject to tax. A relief agency may apply to the director for refund of the amount of tax imposed and paid by it, upon the purchase of goods, wares, merchandise, or services rendered, furnished, or performed that are used for free distribution to the poor and needy.

**18.6(2)** Persons are determined to be in the poor and needy category when their incomes and resources are at or below poverty level. The department will use federal poverty guidelines in making this determination.

**18.6(3)** Listed below are some examples where the tax may or may not be refunded to the relief agency:

EXAMPLE: A relief agency purchases clothing for free distribution to a poor and needy person. The tax is refundable.

EXAMPLE: A relief agency pays the gas, light, or telephone bill for a person who is poor and needy. The tax is refundable.

EXAMPLE: An agency purchases items of clothing for residents of their living facility, and is partially reimbursed by the person using the items based upon the recipient's ability to pay. Tax on the portion of cost not recovered by the agency can be claimed as a refund of tax paid by using formula stated in 18.6(6).

**18.6(4)** Demolition v. repair costs. A nonprofit noneducational relief agency is not entitled to a refund of sales tax paid by contractors on building materials used in the alteration, expansion, repair, remodeling or construction of the facility since the materials were sold tax paid to the contractor who is the consumer of the material by statute. See Iowa Code section 422.42(9). However, the relief agency would be entitled to a refund of sales tax paid on the cost of the demolition of the building since the demolition of the building indirectly benefited the poor and needy. 1968 O.A.G. #841.

EXAMPLE: A relief agency, which is not part of a governmental unit, operates a home or orphanage for persons who are poor and needy or for orphan children. Food, lodging, and necessary items are furnished free-of-charge to the residents. The relief agency would be entitled to a refund of any taxes paid to operate this facility; such as, but not limited to, lights, heat, water, telephone, and repair items or services needed to maintain the facility.

**18.6(5)** Claims for refund must be filed quarterly with the department within 45 days after the end of the quarter for which the refund is claimed. Claims are to be submitted on forms provided by the department.

The claim shall include the following information:

- a. The total amount or amounts, valued in money, expended directly or indirectly for goods, wares, merchandise, or services rendered, furnished, or performed used for free distribution to the poor and needy.
- b. List the persons making the sales to the relief agency.
  1. Include the date of the sale.
  2. Include the total amount expended, itemizing sales tax.
  3. Include the date of payment.
  4. Include the check number, receipt number, or paid invoice verifying payment.
- c. List the total operating income received (residents, donations, etc.)
- d. List the operating income received from residents only.
- e. The claim shall be signed by an authorized agent of the relief agency.

**18.6(6)** When a relief agency receives part of its operating income from the poor and needy it is serving, this income will be considered in computing the tax refund paid upon sales to it of products or services used for free distribution to the poor and needy.

To reasonably approximate the correct amount of tax to be refunded, where only a portion of the tax qualifies for refund, a formula will be used by the department. The prescribed formula the department will allow is operating income received from the poor and needy served divided by total operating income received. This percentage will be multiplied by the applicable gross receipts which are considered refundable to arrive at the correct amount of tax to be refunded.

If a person requests an alternative formula, the person shall first list the reasons why an alternative formula is necessary and, secondly, shall outline the proposed formula in detail. If approval is given, the department reserves the right to withdraw the approval or require adjustments in the formula upon notice to the person. Additional refunds or assessments may be made if an audit discloses the formula is incorrect.

This rule is intended to implement Iowa Code sections 422.42(7), 422.43, 422.47, 423.1 and 423.2.

**701—18.7(422,423) Containers, including packing cases, shipping cases, wrapping material and similar items.** The gross receipts from the sale of containers, labels, cartons, pallets, packing cases, wrapping paper, twine, bags, bottles, shipping cases, garment hangers, and other similar articles and receptacles sold to retailers or manufacturers which are purchased for the purpose of packaging or facilitating the transportation of tangible personal property which is sold either at retail or for resale shall be exempt from the tax.

For the purpose of this rule, producers, wholesalers and jobbers are considered retailers or manufacturers.

**18.7(1) Sales to other than retailers or manufacturers.**

a. Containers and all other specified items delivered with tangible personal property which are sold to a final buyer or ultimate consumer shall be exempt from the tax when no separate charge is made for the container. This group includes such items as boxes, cartons, pallets, paper bags, bottles, shipping cases, wrapping paper and twine. If a separate charge is made for the container, the sale of the container is subject to the tax. The sale of wrapping paper, paper bags and like items are subject to the tax when sold at retail.

EXAMPLE: A meat locker purchases materials such as wrapping paper and tape which it uses to wrap meat for customers to whom meat is sold. The wrapping paper and tape would be exempt from tax as being purchased as a packaging material of tangible personal property sold at retail.

EXAMPLE: A meat locker purchases materials such as wrapping paper and tape which it uses to wrap meat for customers who own the meat. The meat locker only performs the service of processing the meat. The wrapping paper and tape are subject to tax as they were not purchased for packaging or for the facilitating of transportation of tangible personal property sold at retail, but were used in the rendering of a service.

b. Packing paper, lining paper, paper used to line boxes and crates, and similar items shall be exempt from the tax if delivered with tangible personal property ultimately sold at retail when no separate charge is made for the paper.

**18.7(2) Labels, tags and nameplates.** Sales of labels, tags, and nameplates attached to products for the benefit of the vendor such as shipping tags, price tags and instructions to cashiers are subject to the tax, unless such items are sold to manufacturers and retailers for packaging or facilitating the transportation of tangible personal property ultimately sold at retail. Labels, tags or nameplates attached to products for the benefit of the final consumer which describe contents, or which relate to the product and are affixed to the product, are exempt from tax.

**18.7(3) Pallets.** Pallets purchased by manufacturers or retailers which are purchased for the purpose of packaging or facilitating the transportation of tangible personal property ultimately sold at retail shall be exempt from the tax.

**18.7(4) Garment hangers.** Garment hangers purchased by manufacturers or retailers and used to facilitate the transportation of tangible personal property or garment hangers delivered with tangible personal property ultimately sold at retail when no separate charge is made are exempt from tax.

Garment hangers used merely to display tangible personal property are taxable.

This rule is intended to implement Iowa Code sections 422.42(3), 422.45(19) and 423.1(1).

#### **701—18.8(422) Auctioneers.**

**18.8(1)** An auctioneer in making a sale, whether of tangible personal property or realty, is by virtue of this employment making the sale as the agent of the principal.

**18.8(2)** Where an auctioneer is conducting a sale and the principal meets the requirement of the casual sale exemption found in Iowa Code section 422.42(12), the gross receipts from the sale are exempt from the tax. See 1970 O.A.G. 774.

**18.8(3)** When an auctioneer is conducting a sale and the principal is in the business of making sales of tangible personal property or taxable services on a recurring basis, the gross receipts from the sale are taxable.

**18.8(4)** Where an auctioneer is selling tangible personal property that the auctioneer owns, the sale of the tangible property owned by the auctioneer is taxable.

This rule is intended to implement Iowa Code section 422.43.

**701—18.9(422) Sales by farmers.** The sale of grain, livestock or any other farm or garden product by the producer thereof ordinarily constitutes a sale for resale, processing or human consumption and shall not be subject to tax.

Farmers selling tangible personal property not otherwise exempt to ultimate consumers or users shall hold a permit and collect and remit sales tax on the gross receipts from their sales.

#### **701—18.10(422,423) Florists.**

**18.10(1)** Florists are engaged in the business of selling tangible personal property at retail and shall be liable for payment of tax measured by the receipts from the sale of flowers, wreaths, bouquets, potted plants and other items of tangible personal property.

**18.10(2)** When florists conduct transactions through a florists' telephonic delivery association, the following rules shall apply when computing tax liability:

*a.* On all orders taken by an Iowa florist and telephoned to a second florist in Iowa for delivery in the state, the sending florist shall be liable for tax, measured at the current rate of tax on gross receipts from the total amount collected from the customer, except the cost of a telegram when a separate charge is made therefor.

*b.* In cases where a florist receives an order pursuant to which the florist gives telephonic instructions to a second florist located outside Iowa for delivery to a point outside Iowa, tax is not owing with respect to any receipts which the florist may realize from the transaction.

*c.* In cases where Iowa florists receive telephonic instructions from other florists located either within or outside of Iowa for the delivery of flowers, the receiving florist will not be held liable for tax with respect to any receipts which the florist may realize from the transaction.

*d.* Rescinded IAB 2/28/96, effective 4/3/96.

**18.10(3)** Florists engaged in selling shrubbery, trees, and similar items. See rule 18.11(422,423). This rule is intended to implement Iowa Code section 422.43.

**701—18.11(422,423) Landscaping materials.** The gross receipts from the sale of sod, dirt, trees, shrubbery, bulbs, sand, rock, woodchips and other similar landscaping materials, when used for landscaping and sold to final consumers, shall be subject to sales tax. For the purpose of this rule, “final consumer” ordinarily means the owner of the land to which the landscaping materials are applied, or a general building contractor when the landscaping contractor contracts with the general building contractor. When a landscaping contractor uses materials to fulfill a contract, the landscape contractor is considered the retailer of the landscaping materials and shall be obligated to collect sales tax on the selling price from the final consumer.

When the retailer of sod, dirt, trees, shrubbery, bulbs, sand, rock, woodchips and other similar landscaping materials installs these items as a part of a contract for landscaping or improving land for a lump sum, the entire gross receipts shall be subject to tax. Any retailer’s charges for “landscaping” shall be taxable. See rule 701—26.62(422) for a description of this service. However, a retailer’s charges for nontaxable services are not taxable if contracted for separately; or, if no written contract exists, the charges are itemized separately on the invoice.

EXAMPLE: A sodding contractor agrees to furnish and install 20 yards of sod for the lump sum of \$20.00 per yard. The sodding contractor must charge the customer \$20.00 sales tax (5% x \$400.00).

EXAMPLE: XYZ Company enters into a contract for the landscaping of an existing office building. XYZ Company agrees to furnish shrubs at \$25.00 each, white rock for \$5.00 per bag and woodchips for \$4.00 per bag. XYZ Company also contracts to install all of the landscaping materials for a fee of \$25.00 per hour. XYZ Company’s hourly fee is taxable if paid for the service of “landscaping” or for some other taxable service, e.g., excavation. If the service is not taxable, the charge is excluded from tax because it was separately contracted for.

The gross receipts from the sale of uncut sod and unexcavated trees, shrubs, and rock shall not be subject to sales or use tax. This is considered a sale of intangible property and not the sale of tangible personal property.

This rule does not apply to the gross receipts from the sale of plants and trees which are eligible for purchase with food coupons under rule 701—20.1(422,423).

This rule is intended to implement Iowa Code sections 422.42, 422.45(12) and 423.1.

**701—18.12(422,423) Hatcheries.** The gross receipts from the sale of egg-type cockerel chicks, broiler chicks and turkey poulters shall be subject to tax. If sale of domestic poultry is for breeding, see rule 701—17.9(422,423).

When pullets and poulters are sold for production purposes, the receipts from the sales shall be exempt from tax.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1 and 423.2.

**701—18.13(422,423) Sales by the state of Iowa, its agencies and instrumentalities.** The state of Iowa, its agencies and instrumentalities, are required to collect and remit tax on the gross receipts from taxable retail sales of tangible personal property and taxable services.

This rule does not apply to sales made by cities and counties in the state of Iowa which are specifically exempted from collecting tax by Iowa Code section 422.45(20).

This rule is intended to implement Iowa Code chapters 422 and 423.

**701—18.14(422,423) Sales of livestock and poultry feeds.** Tax shall not apply to the sale of feed for any form of animal life when the product of the animals constitutes food for human consumption. Tax shall apply on feed sold for consumption by pets.

Antibiotics, when administered as an additive to feed or drinking water, and vitamins and minerals sold for livestock and poultry shall be exempt from tax.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1 and 423.2.

**701—18.15(422,423) Student fraternities and sororities.** Student fraternities and sororities are not considered to be engaged in the business of selling tangible personal property at retail within the meaning of the sales tax law when they provide their members with meals and lodging for which a flat rate or lump sum is charged. A person engaged in the selling of foods and beverages to such organizations for use in the preparation of meals is making exempt sales at retail and shall not be liable for tax if the food purchases would be exempt under rule 701—20.1(422,423).

Student fraternities or sororities engaged in the business of serving meals to persons other than members for which separate charges are made, or owning and operating canteens through which tangible personal property is sold are deemed to be making taxable sales.

When student fraternities or sororities do not provide their own meals but are provided by caterers, concessionaires or other persons, such caterers, concessionaires or other persons shall be liable for the collection and remittance of tax with respect to their receipts from meals furnished. A similar liability is attached to persons engaged in the business of operating boarding houses, whether for students or other persons.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1 and 423.2.

**701—18.16(422,423) Photographers and photostaters.** Tax shall apply to the sale of photographs and photostat copies, whether or not produced to the special order of the customer and to charges for the making of photographs or photostat copies out of materials furnished by the customer. A deduction shall not be allowed for the expenses incurred by the photographer, such as rental of equipment or salaries or wages paid to assistants or models, whether or not the expenses are itemized in billings to customers.

Tax shall not apply to the sale of tangible personal property to photographers and photostat producers which becomes an ingredient or component part of photographs or photostat copies sold, such as mounts, frames and sensitized paper; but tax shall apply to the sale of materials to photographers or producers which is used in the processing of photographs or photostat copies.

**18.16(1)** *Sales of photographs to newspaper or magazine publishers for reproduction.* The sale of photographs by a person engaged in the business of making and selling photographs to newspaper or magazine publishers for reproduction shall be taxable.

**18.16(2)** Reserved.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1 and 423.2.

**701—18.17(422,423) Gravel and stone.** When a contract is entered between a contractor and a governmental body and the contract calls for a stockpile delivery along a road to be improved, it is a sale of tangible personal property to the governmental body. Transactions of this type are exempt from tax. When a contract not only provides for the sale and delivery of materials but also the conversion of the materials into realty improvements, the contractor is the ultimate consumer of the material used and shall be liable for tax. Tax shall apply on the purchase price of the material.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 422.45(5), 423.1 and 423.2.

**701—18.18(422,423) Sale of ice.** The sale of ice for human consumption which may be purchased with food coupons is exempt from tax. The sale of ice used for cooling is subject to tax. See rule 701—20.1(422,423).

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 422.45(12), 423.2 and 423.4.

**701—18.19(422,423) Antiques, curios, old coins or collector's postage stamps.** Curios, antiques, art work, coins, collector's postage stamps and such articles sold to or by art collectors, philatelists, numismatists and other persons who purchase or sell such items of tangible personal property for use and not primarily for resale are sales at retail and shall be subject to tax.

**18.19(1)** Stamps, whether canceled or uncanceled, which are sold by a collector or person engaged in retailing stamps to collectors shall be taxable.

**18.19(2)** The distinction between stamps which are purchased by a collector and stamps which are purchased for their value as evidence of the privilege of the owner to have certain mail carried by the United States government is that which determines whether or not a stamp is taxable or not taxable. A stamp becomes an article of tangible personal property having market value when, because of the demand, it can be sold for a price greater than its face value. On the other hand, when a stamp has only face value, as evidence of the right to certain services or an indication that certain revenue has been paid, it shall not be subject to either sales or use tax.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1 and 423.2.

**701—18.20(422,423) Communication services.** This rule applies to sales of communication services billed prior to November 23, 2011. For communication service, telecommunication service, ancillary service and other related communication service billed on or after November 23, 2011, refer to 701—Chapter 224, Iowa Administrative Code. The gross receipts from the sale of all communication services provided in this state are subject to tax. (Communication services are not subject to use tax prior to July 1, 2001. See rule 701—31.7(423).)

**18.20(1) Definitions.**

*a.* Communication service shall mean the act of providing, for a consideration, any medium or method for, or the act of transmission and receipt of, information between two or more points. Each point must be capable of both transmitting and receiving information if “communication” is to occur. The term “communication service” includes, but is not limited to, the transmission and receipt of sound, printed materials (including letters and materials printed by teletype), other images perceived visually and data encoded in computer languages. Any separate charge for the service of transmitting and receiving information between automatic data processing equipment and remote facilities shall be subject to tax, see paragraph 18.34(3)“c.”

*b.* Communication service is provided “in this state” only if both the points of origination and termination of the communication are within the borders of Iowa. Communication service between any other points is “interstate” in nature and not subject to tax.

*c.* “Gross receipts” from the sale of communication service in this state shall mean all charges to any person which are necessary for the ultimate user to secure the service, except those charges which are in the nature of a sale for resale (see subrule 18.20(4)). Such charges shall be taxable if the charges are necessary to secure communication service in this state even though payment of the charge may also be necessary to secure other services. Any charge necessary to secure only interstate communication service shall not be subject to tax if the nature of the service is separately stated and the charge for the service separately billed. For the present, the charges imposed by the Federal Communications Commission and referred to as “access charges for interstate or foreign access services” to an “end user” shall not be subject to tax if separately stated and billed.

Charges imposed or approved by the utilities division of the department of commerce which are necessary to secure long distance service in this state, for example, “end user intrastate access charges,” are taxable. Such charges are taxable whether they result from an expense incurred from operations or are imposed by the mandate of the utilities division and unrelated to any expense actually incurred in providing the service.

If company A collects gross receipts from ultimate users for communication services performed in this state by company B, company A shall treat those gross receipts as its own, collect tax upon them, and remit the tax to the department. The situation is similar to a consignment sale of tangible personal property, and tax must be remitted by the company collecting the gross receipts from the users of the communication services.

As of April 4, 1990, the amount of a surcharge for enhanced 911 emergency telephone service shall not be subject to sales tax if the amount is no more than \$1 per month per telephone access line and the surcharge is separately identified and separately billed. An enhanced 911 emergency telephone service surcharge is one which routes a 911 call to the appropriate public safety answering point and automatically displays a name, address, and telephone number of an incoming 911 call at that answering point.

*d.* Paging services. A one-way paging service is not a taxable enumerated service in Iowa because one-way paging only receives information and is not capable of transmitting information. As a result, this type of pager service is not a two-way transmission.

**18.20(2)** This subrule is applicable to various specific circumstances involving the sale of communication services.

*a.* Companies which bill their subscribers for communication services on a quarterly, semiannual, annual or any other periodic basis shall include the amount of such billings in their gross receipts. The date of the billing shall determine the period for which sales tax shall be remitted. Thus, if the date of a billing is March 31, and the due date for payment of the bill without penalty is April 20, tax upon the gross receipts contained in the bill shall be included in the sales tax return for the first quarter of the year. The same principle shall be used to determine when tax will be included in payment of a sales tax deposit to the department.

*b.* The gross receipts from the service of transmitting messages, night letters, day letters and all other messages of similar nature between two or more points within this state are subject to sales tax.

*c.* Receipts from communication services performed for all divisions, boards, commissions, agencies or instrumentalities of federal, Iowa, county or municipal government, and private, nonprofit educational institutions in this state for educational purposes are exempt from tax, except sales to any tax-levying body used by or in connection with the operation of any municipally owned utility engaged in selling gas, electricity or heat to the general public are subject to tax.

**18.20(3)** This subrule is specifically applicable to companies and other persons providing telephone service in this state. Any reasoning contained in this subrule may also be applied to companies or other persons providing other communication services.

*a.* All companies must have a permit for each business office which provides communication service in this state. The companies must collect and remit tax upon the gross receipts from the operation of such offices.

*b.* If a minimum amount is guaranteed to a company from the operation of any coin-operated telephone, tax shall be computed on the minimum amount guaranteed or the actual taxable gross receipts collected whichever is the greater.

*c.* In computing tax due, the federal taxes identified as such, separately billed and payable by the customer shall be excluded from gross receipts. If the taxes are not separately billed, they shall be subject to Iowa sales tax.

*d.* Telegrams and like charges made to the accounts of subscribers and billed by companies providing telephone service which appear on the subscribers' toll bills are subject to tax.

*e.* Charges for directory assistance service rendered in this state shall be subject to tax. Charges for directory assistance service, separately stated and billed, shall not be subject to tax if the service is interstate in nature.

*f.* The gross receipts from the installation or repair of any inside wire which provides electrical current that allows an electronics device to function shall be subject to tax. Such gross receipts are from the enumerated service of electrical repair or installation, and are thus subject to tax. The gross receipts from "inside wire maintenance charges" for services performed under a service or warranty contract shall also be subject to tax. Depending on circumstances, such receipts are for the enumerated service of "electrical repair" or are incurred under an "optional service or warranty contract" for an enumerated service. In either event, the receipts are subject to tax. See rule 701—18.25(422,423).

*g.* The gross receipts from the rental of any device for home or office use or to provide a communication service to others shall be fully taxable; such receipts are for the enumerated service of "rental of tangible personal property." The gross receipts from rental include rents, royalties, and copyright and license fees. Any periodic fee for maintenance of the device which is included in the gross receipts for the rental of the device shall also be subject to tax.

*h.* The sale of any device, new or used, in place at the time of sale on the customer's premises or sold to the customer elsewhere is the sale of tangible personal property, and thus a sale subject to tax. The sale of an entire inventory of devices may or may not be subject to tax, depending upon whether it does or does not come within the purview of the casual sales exemption, see Iowa Code section 422.42(2)

and subrule 18.28(3). Other exemptions may be applicable as well. See Iowa Code section 422.45 and 701—Chapter 17.

*i.* The gross receipts for the repair or installation of inside wire or the repair or installation of any electronic device, including a telephone or telephone switching equipment shall, as a general rule, be subject to tax whether the customer or purchaser is billed by way of a flat fee or flat hourly charge covering all costs including labor and materials, or by way of a premises visit or trip charge, or by a single charge covering and not distinguishing between charges for labor and materials, or is billed by a charge with labor and material segregated, or is billed for labor only. An exception is this: If the gross receipts are for services on or in connection with new construction, reconstruction, alteration, expansion or remodeling of a building or structure, the gross receipts shall not be subject to tax. For further information concerning the conditions under which such gross receipts for repair or installation would not be subject to tax, see rule 701—19.1(422,423) and 701—subrule 26.2(1).

*j.* If a company bills a handling charge to a customer for sending the customer an electronic device by mail or by a delivery service, this charge shall constitute a part of the gross receipts from the sale of the device and shall be subject to tax. The gross receipts of a mandatory service rendered in connection with the sale of tangible personal property are considered by the department to be a part of the gross receipts from the sale of the property itself and thus subject to tax.

*k.* The purchase or rental of tangible personal property by companies providing communication services shall be subject to tax.

*l.* The amount of any deposit paid by a customer to a company providing communication service if returned to the customer shall not be subject to tax. Any portion of a deposit utilized by a company as payment for the sale of tangible personal property or a taxable service shall be included in gross receipts or gross taxable services and shall be subject to tax.

*m.* On and after July 1, 1997, the gross receipts from sales of prepaid telephone calling cards and prepaid authorization numbers are subject to tax as sales of tangible personal property.

**18.20(4)** When one commercial communication company furnishes another commercial communication company services or facilities which are used by the second company in furnishing communication service to its customers, such services or facilities furnished to the second company are in the nature of a sale for resale; and the charges, including any carrier access charges, shall be exempt from sales tax. The charges for services or facilities initially purchased for resale and subsequently used or consumed by the second company shall be subject to tax, and the tax shall be collected and paid by the seller unless the seller has taken a valid exemption certificate in good faith from the purchaser and other requirements of 701—subrule 15.3(2) are met.

**18.20(5)** Prior to July 1, 1999, charges for access to or use of what is commonly referred to as the “Internet” or charges for other contracted on-line services are the gross receipts from the performance of a taxable service if access is by way of a local or in-state long distance telephone number and if the predominant service offered is two-way transmission and receipt of information from one site to another as described in paragraph “a” of subrule 18.20(1). If a user’s billing address is located in Iowa, a service provider should assume that Internet access or contracted on-line service is provided to that user in Iowa unless the user presents suitable evidence that the site or sites at which these services are furnished are located outside this state.

On and after July 1, 1999, gross receipts from charges paid to a provider for access to an on-line computer service are exempt from tax. An “on-line computer service” is one which provides for or enables multiple users to have computer access to the Internet. Charges paid to a provider for other contracted on-line services which do not provide access to the Internet and which are communication services remain subject to Iowa tax through May 14, 2000.

On and after May 15, 2000, the furnishing of any contracted on-line service is exempt from Iowa tax if the information is made available through a computer server. The exemption applies to all contracted on-line services, as long as they provide access to information through a computer server.

**18.20(6)** The gross receipts paid for the performance of the service of sending or receiving any document commonly referred to as a “fax” from one point to another within this state are subject to sales tax. See 18.20(1)“a.” Gross receipts paid for the service of providing a telephone line or other

transmission path for the use of what is commonly called a “fax” machine are the gross receipts from the performance of a taxable service if the points of transmission and receipt of a fax are in this state. See 18.20(1) “a” and “b.”

EXAMPLE A. Klear Kopy Services is located in Des Moines, Iowa. Klear Kopy charges a customer \$2 to transmit a fax (via its machine) to Dubuque, Iowa. The \$2 is taxable gross receipts. Midwest Telephone Company charges Klear Kopy \$500 per month for the intrastate communications on Klear Kopy’s dedicated fax line. The \$500 is also gross receipts from a taxable communication service.

EXAMPLE B. The XYZ Law Firm is located in Des Moines, Iowa. The firm owns a fax machine and uses the fax machine in the performance of its legal work to transmit and receive various documents. The firm does not perform faxing services but will, on billings for legal services to clients, break out the amount of a billing which is attributable to expenses for faxing. For example, “bill to John Smith for August, 1997, \$1,000 for legal services performed, fax expenses which are part of this billing—\$30.” The \$30 is not gross receipts for the performance of any taxable service, the faxing service performed being only incidental to the performance of the nontaxable legal services.

EXAMPLE C. The TUV Hospital is located in Cedar Rapids, Iowa. The surgeons successfully perform delicate brain surgery on patient W. To perform that surgery it was necessary for the surgeons to consult with a number of colleagues; the consultation was via E-mail. After the operation, the TUV Hospital sent patient W a bill for \$10,000 of nontaxable hospital services. Listed as an expense is “E-mail—\$200.” The E-mail services are performed incidentally to the nontaxable hospital services; therefore, the \$200 is not taxable gross receipts.

EXAMPLE D. D is a dentist practicing in Mason City, Iowa. D subscribes to an on-line service which, in return for a monthly fee, informs its subscribers of the latest dental surgery techniques and advises them about how these techniques can be applied to individual patients. After consultation on patient E’s problem through the on-line service, D performs complex surgery on patient E. D’s bill to patient E reads as follows: “dental reconstruction—\$2,750; on-line consultation portion—\$240.” The \$240 is not taxable gross receipts, this charge being incidental to the nontaxable charge for dental work.

**18.20(7)** *Communication service, telecommunications service, ancillary service, and other similar communication service.*

*a. Purpose.* This subrule covers various provisions related to communication service, telecommunications service, ancillary service, and other similar communication service.

*b. Definitions.*

(1) “*Air-to-ground radio telephone service*” means a radio service in which common carriers are authorized to offer and provide radio telecommunications service for hire to subscribers in aircraft.

(2) “*Ancillary services*” means services that are associated with or incidental to the provision of a telecommunications service. The term includes, but is not limited to, detailed communications billing service, directory assistance, vertical service, and voice mail services.

(3) “*Call-by-call basis*” means any method of charging for telecommunications services where the price is measured by individual calls.

(4) “*Communications channel*” means a physical or virtual path of communications over which signals are transmitted between or among customer channel termination points.

(5) “*Communication service*” means the act of communicating using any system or the act of transmission and receipt of information between two or more points. Each point must be capable of both transmitting and receiving information if communication is to occur. The term “communication service” includes, but is not limited to, the transmission and receipt of sound, printed materials (including letters and other materials), other images perceived visually and data encoded in computer languages. Communication service also includes telecommunications service, ancillary service and other similar communication service.

(6) “*Conference bridging service*” means an ancillary service that links two or more participants of an audio or video conference call and may include the provision of a telephone number. Conference bridging service does not include telecommunications services used to reach the conference bridge.

(7) “*Customer*” means the person or entity that contracts with the seller of telecommunications services. If the end user of telecommunications services is not the contracting party, the end user of the

telecommunications service is the customer of the telecommunications service. For purposes of sourcing sales of telecommunications services, the end user of the telecommunications service is the customer of the telecommunications service when the end user is not also the contracting party. "Customer" does not include a reseller of telecommunications service or for mobile telecommunications service of a serving carrier under an agreement to serve the customer outside the home service provider's licensed service area.

(8) "*Customer channel termination point*" means the location where the customer either inputs or receives the communications.

(9) "*Detailed telecommunications billing service*" means an ancillary service of separately stating information pertaining to individual calls on a customer's billing statement.

(10) "*Directory assistance*" means an ancillary service of providing telephone number information and address information.

(11) "*End user*" means the person who utilizes the telecommunication service. In the case of an entity, "end user" means the individual who utilizes the service on behalf of the entity.

(12) "*Fixed wireless service*" means a telecommunications service that provides radio communication between fixed points.

(13) "*Home service provider*" means the same as defined in Section 124(5) of Public Law 106-252, 4 U.S.C. § 124(5) (Mobile Telecommunications Sourcing Act). The home service provider is the facilities-based carrier or reseller with which the customer contracts for the provision of mobile telecommunications services.

(14) "*Interstate*" means a telecommunications service that originates in one United States state or a United States territory or possession and terminates in a different United States state or a United States territory or possession.

(15) "*Intrastate*" means a telecommunications service that originates in one United States state or a United States territory or possession and terminates in the same United States state or a United States territory or possession.

(16) "*Mobile telecommunications service*" means commercial mobile radio service; that is, a radio communication service carried on between mobile stations or receivers and land stations and by mobile stations communicating among themselves.

(17) "*Mobile wireless service*" means a telecommunications service that is transmitted, conveyed, or routed regardless of the technology used, whereby the origination and/or termination points of the transmission, conveyance, or routing are not fixed, including, by example only, telecommunications services that are provided by a commercial mobile radio service provider.

(18) "*Paging service*" means a telecommunications service that provides transmission of coded radio signals for the purpose of activating specific pagers. This transmission may include messages and sounds.

(19) "*Pay telephone service*" means a telecommunications service provided through any pay telephone. Pay telephone service also includes coin operated telephone service paid for by inserting money into a telephone accepting direct deposits of money to operate.

(20) "*Place of primary use*" means the street address representative of where the customer's use of the telecommunications service primarily occurs, which must be the residential street address or the primary business street address of the customer. In the case of mobile telecommunications services, the place of primary use must be within the licensed service area of the home service provider.

(21) "*Postpaid calling service*" means the telecommunications service obtained by making a payment on a call-by-call basis, either through use of a credit card or payment mechanism such as a bank card, travel card, credit card or debit card, or by charge made to a telephone number which is not associated with the origination or termination of the telecommunications service. A postpaid calling service includes a telecommunications service, except a prepaid wireless calling service that would be a prepaid calling service except it is not exclusively a telecommunication service.

(22) "*Prepaid calling service*" means the right to access exclusively telecommunications services, which must be paid for in advance and which enable the origination of calls using an access number or

authorization code, whether manually or electronically dialed, and that are sold in predetermined units or dollars of which the number declines with use in a known amount.

(23) *“Prepaid wireless calling service”* means a telecommunications service that provides the right to utilize mobile wireless service as well as other non-telecommunications services, including the download of digital products delivered electronically, content and ancillary services, which must be paid for in advance that is sold in predetermined units or dollars of which the number declines with use in a known amount.

(24) *“Private communication service”* means a telecommunication service that entitles the customer to exclusive or priority use of a communications channel or group of channels between or among termination points, regardless of the manner in which such channel or channels are connected, and includes switching capacity, extension lines, stations, and any other associated services that are provided in connection with the use of such channel or channels.

(25) *“Residential telecommunications service”* means a telecommunications service or ancillary services provided to an individual for personal use at a residential address, including an individual dwelling unit, such as an apartment. In the case of institutions where individuals reside, such as schools or nursing homes, telecommunications service is considered residential if it is provided to and paid for by an individual resident rather than the institution.

(26) *“Service address”* means:

1. The location of the telecommunications equipment to which a customer’s call is charged and from which the call originates or terminates, regardless of where the call is billed or paid.

2. If the location in numbered paragraph “1” of this subparagraph is not known, “service address” means the origination point of the signal of the telecommunications services first identified by either the seller’s telecommunications system or in information received by the seller from its service provider, where the system used to transport such signals is not that of the seller.

3. If the locations in numbered paragraphs “1” and “2” of this subparagraph are not known, the service address means the location of the customer’s place of primary use.

(27) *“Telecommunications service”* means the electronic transmission, conveyance, or routing of voice, data, audio, video, or any other information or signals to a point, or between or among points. The term includes any transmission, conveyance, or routing in which computer processing applications are used to act on the form, code, or protocol of the content for purposes of transmission, conveyance, or routing without regard to whether such service is referred to as voice-over Internet protocol services or is classified by the Federal Communications Commission as enhanced or value-added. “Telecommunications service” does not include the following:

1. Data processing and information services that allow data to be generated, acquired, stored, processed, or retrieved and delivered by an electronic transmission to a purchaser where the purchaser’s primary purpose for the underlying transaction is the processed data or information;

2. Installation or maintenance of wiring or equipment on a customer’s premises;

3. Tangible personal property;

4. Advertising, including but not limited to directory advertising;

5. Billing and collection services provided to third parties;

6. Internet access service;

7. Radio and television audio and video programming services, regardless of the medium, including the furnishing of transmission, conveyance, or routing of the service by the programming service provider. Radio and television audio and video programming services shall include, but not be limited to, cable service and audio and video programming services delivered by a commercial mobile radio service provider;

8. Ancillary service;

9. Digital products delivered electronically, including but not limited to software, music, video, reading materials or ring tones.

(28) *“Value-added non-voice data service”* means a service that otherwise meets the definition of telecommunications services in which computer processing applications are used to act on the form,

content, code, or protocol of the information or data primarily for a purpose other than transmission, conveyance, or routing.

(29) “*Vertical service*” means an ancillary service that is offered in connection with one or more telecommunications services, which offers advanced calling features that allow customers to identify callers and to manage multiple calls and call connections. Nonexclusive examples of vertical service include call forwarding, caller ID, three-way calling, and conference bridging services.

(30) “*Voice mail service*” means an ancillary service that enables the customer to store, send, or receive recorded messages. Voice mail service does not include any vertical services that the customer may be required to have in order to utilize the voice mail service.

*c. Taxable communication service, telecommunications service, ancillary service, and other similar communication service.* The sales price from the sale of communication service, telecommunications service, ancillary service, and other similar communication service is subject to the sales or use tax. The following is a nonexclusive list of services subject to the Iowa sales and use tax:

- (1) Air-to-ground radio telephone service;
- (2) Ancillary services except detailed communications billing service;
- (3) Conference bridging service;
- (4) Fixed wireless service;
- (5) Mobile wireless service;
- (6) Pay telephone service;
- (7) Postpaid calling service;
- (8) Prepaid calling service;
- (9) Prepaid wireless calling service;
- (10) Private communication service;
- (11) Residential telecommunications service.

*d. Nontaxable communication service, telecommunications service, ancillary service, and other similar communication service.* The following services are not subject to the Iowa sales and use tax:

- (1) Detailed communications billing service;
- (2) Internet access fees or charges;
- (3) One-way paging services that only receive information and are not capable of transmitting information;
- (4) Value-added non-voice data service;
- (5) Any charge necessary to secure only interstate communication service if the nature of the service is separately stated and the charge for the interstate service is separately billed.

*e. Sourcing of telecommunications services.*

(1) General sourcing principles apply to telecommunications services unless the service falls under one of the exceptions set out in paragraph “e.”

(2) Exceptions. The following telecommunications services and products are sourced in accordance with the principles set out in subparagraph (2):

1. Mobile telecommunications service is sourced to the place of primary use, unless the service is prepaid wireless calling service.

2. Prepaid calling service is sourced as provided under Iowa Code section 423.15. However, if the seller has sufficient information available, the sale of prepaid wireless calling service may be sourced to the location of the place of primary use.

3. A sale of a private telecommunications service is sourced as follows:

- Service for a separate charge related to a customer channel termination point is sourced to each level of jurisdiction in which the customer channel termination point is located.

- Service where all customer termination points are located entirely within one jurisdiction or levels of jurisdiction is sourced in the jurisdiction in which the customer channel termination points are located.

- Service for segments of a channel between two customer channel termination points located in different jurisdictions and which segments of channel are separately charged is sourced 50 percent in each level of jurisdiction in which the customer channel termination points are located.

- Service for segments of a channel located in more than one jurisdiction or levels of jurisdiction and which segments are not separately billed is sourced in each jurisdiction based on the percentage determined by dividing the number of customer channel termination points in the jurisdiction by the total number of customer channel termination points.

4. The sale of Internet access service is sourced to the customer's place of primary use.

5. The sale of an ancillary service is sourced to the customer's place of primary use.

6. A postpaid calling service is sourced to the origination point of the telecommunications signal as first identified by either (a) the seller's telecommunications system or (b) information received by the seller from its service provider, where the system used to transport the signals is not that of the seller.

7. The sale of telecommunications service sold on a call-by-call basis is sourced to (a) each level of taxing jurisdiction where the call originates and terminates in that jurisdiction or (b) each level of taxing jurisdiction where the call either originates or terminates and in which the service address is also located.

8. The sale of telecommunications services sold on a basis other than a call-by-call basis is sourced to the customer's place of primary use.

9. The sale of the following telecommunication services is sourced to each level of taxing jurisdiction as follows:

- A sale of mobile telecommunications services, other than prepaid calling service, is sourced to the customer's place of primary use as required by the federal Mobile Telecommunications Sourcing Act.

- A sale of postpaid calling service is sourced to the origination point of the telecommunications signal as first identified by either (a) the seller's telecommunications system or (b) information received by the seller from its service provider, where the system used to transport such signals is not that of the seller.

*f. Bundled transaction.*

- (1) A "bundled transaction" is the retail sale of two or more products where (a) the products are otherwise distinct and identifiable, and (b) the products are sold for one non-itemized price. A bundled transaction does not include the sale of any products in which the sales price varies or is negotiable based on the selection by the purchaser of the products included in the transaction.

- (2) In the case of a bundled transaction that includes any of the following: telecommunications service, ancillary service, Internet access, or audio or video programming service:

1. If the price is attributable to products that are taxable and products that are nontaxable, the portion of the price attributable to the nontaxable products will be subject to tax unless the provider can identify by reasonable and verifiable standards such portion from its books and records that are kept in the regular course of business for other purposes, including, but not limited to, non-tax purposes.

2. If the price is attributable to products that are subject to tax at different tax rates, the total price may be treated as attributable to the products subject to tax at the highest tax rate unless the provider can identify by reasonable and verifiable standards the portion of the price attributable to the products subject to tax at the lower rate from its books and records that are kept in the regular course of business for other purposes, including but not limited to non-tax purposes.

3. The provisions of this subrule shall apply unless otherwise provided by federal law.

*g. Direct pay permit.* The department may issue a direct pay permit that allows the holder to purchase tangible personal property or taxable services without payment of the tax to the seller. The direct pay permit holder cannot use the direct pay permit for the purchase of communication service, telecommunications service, ancillary services, or other similar communication service. The seller should charge and collect the sales or use tax from the purchaser on the taxable sales of communication service, telecommunications service, ancillary services, and other similar communication service.

*h. Credit.* A taxpayer subject to sales or use tax on communication service, telecommunications service, ancillary service or other similar communication service who has paid any legally imposed sales or use tax on such service to another jurisdiction outside the state of Iowa is allowed a credit against the sales or use tax imposed by the state of Iowa equal to the sales or use tax paid to the other taxing jurisdictions.

*i. Sales of communication service, telecommunications service, ancillary service, or other similar communication service to the United States government or the state government of Iowa.* Sales of communication service, telecommunications services, ancillary services, or other similar communication service to the United States government or its agencies or to the state of Iowa or its agencies are not subject to sales or use tax. In order to be a sale to the United States government or to the state government of Iowa, the government or agency involved must make the purchase of the services and pay directly to the vendor the purchase price of the services. Telecommunications service providers should obtain an exemption certificate from each agency for their records.

*j. Retailers liable for collecting and remitting tax.* Retailers that sell taxable communication service, telecommunications service, ancillary services, or other similar communication service are liable for collecting and remitting the state sales or use tax and any applicable local sales tax on the amounts of the sales.

This rule is intended to implement Iowa Code sections 34A.7(1)“c”(2), 422.42(2), 422.42(3), 422.43(9), 422.45(5), 422.45(8), 422.45 and 422.51(1) and Iowa Code Supplement section 422.45 as amended by 2000 Iowa Acts, chapter 1189, section 29.

[ARC 8021B, IAB 7/29/09, effective 9/2/09; ARC 9814B, IAB 10/19/11, effective 11/23/11]

**701—18.21(422,423) Morticians or funeral directors.** A mortician or funeral director is engaged in the business of selling both tangible personal property and funeral services. Examples of the former are caskets, other burial containers, flowers, and grave clothing. Examples of the latter are cremation, transportation by hearse and embalming. Tax is due only upon gross receipts from the sale of tangible personal property and taxable services, and not upon gross receipts from the sale of nontaxable services.

If a mortician or funeral director separately itemizes charges for tangible personal property, taxable services and nontaxable services, as required by the rules of the Federal Trade Commission, or Iowa Code section 523A.8(1)“b,” whichever is applicable, tax is due only upon the gross receipts from the sales of tangible personal property and taxable services. If contrary to the rules or the statute, or if the applicable rules are rescinded or the statute repealed, and the mortician or funeral director charges a lump sum to a customer covering the entire cost of the funeral without dividing the charges for sales of tangible personal property and taxable and nontaxable services, the mortician or funeral director shall report the full amount of the funeral bill less any cash advanced by the mortician or funeral director, with tax due on 50 percent of the difference. *Kistner v. Iowa State Board of Assessment and Review*, 224 Iowa 404, 280 N.W. 587 (1938). Cash advance items may include, but are not limited to, the following: cemetery or crematory services, pallbearers, public transportation, clergy honoraria, flowers, musicians, singers, nurses, obituary notices, gratuities, and death certificates.

The mortician or funeral director is considered to be purchasing caskets, outer burial containers, and grave clothing for resale, and may purchase these items from suppliers without payment of tax. The mortician or director should present the supplier with a certificate of resale as set out in rule 701—15.3(422,423). A mortician or director is considered to be the user or consumer of office furniture and equipment, funeral home furnishings, advertising calendars, booklets, motor vehicles and accessories, embalming equipment, instruments, fluid and other chemicals used in embalming, cosmetics, and grave equipment, stretchers, baskets, and other items if title or possession does not pass to the customer. *Kistner*; *supra*.

For purposes of this rule, the terms of morticians or funeral directors shall also include cemeteries, cemetery associations and anyone engaged in activities similar to those discussed in the rule.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 423.1 and 423.2.

**701—18.22(422,423) Physicians, dentists, surgeons, ophthalmologists, oculists, optometrists, and opticians.** Physicians, dentists, surgeons, ophthalmologists, oculists, optometrists, and opticians shall not be liable for tax on services rendered such as examinations, consultations, diagnosis, surgery and other kindred services, nor on the applicable exemptions prescribed under 701—Chapter 20.

The purchase of materials, supplies, and equipment by these persons is subject to tax unless the particular item is exempt from tax when purchased by an individual for the individual’s own use. For

example, the purchase for use in the office of prescription drugs would not be subject to tax nor would the purchase of prosthetic devices such as artificial limbs or eyes.

Sales of tangible personal property to dentists, which are to be affixed to the person of a patient as an ingredient or component part of a dental prosthetic device, are exempt from tax. These include artificial teeth, and facings, dental crowns, dental mercury and acrylic, porcelain, gold, silver, alloy, and synthetic filling materials.

Sales of tangible personal property to physicians or surgeons, which are prescription drugs to be used or consumed by a patient, are exempt from tax.

Sales of tangible personal property to ophthalmologists, oculists, optometrists, and opticians, which are prosthetic devices designed, manufactured, or adjusted to fit a patient, are exempt from tax. These include prescription eyeglasses, contact lenses, frames, and lenses.

The purchase by such persons of materials such as pumice, tongue depressors, stethoscopes, which are not in themselves exempt from tax, would be subject to tax when purchased by such professions.

The purchase of equipment, such as an X-ray machine, X-ray photograph or frames for use by such persons is subject to tax. On the other hand, the purchase of an item of equipment that is utilized directly in the care of an illness, injury or disease, which item would be exempt if purchased directly by the patient, is not subject to tax.

This rule is intended to implement Iowa Code sections 422.42(3), 422.43, 422.45(13-15), 423.2 and 423.4(4).

**701—18.23(422) Veterinarians.** Purchase of food, drugs, medicines, bandages, dressings, serums, tonics, and the like, but not to include tools and equipment, which are used in treating livestock raised as part of agricultural production is exempt from tax. Where these same items are used in treating animals maintained as pets for hobby purposes, sales tax is due. See rule 701—18.48(422,423) for an exemption for machinery used in livestock or dairy production which may be applicable to veterinarians but should be claimed only with caution by them.

A veterinarian engaged in retail sales, in addition to furnishing professional services, must account for sales tax on the gross receipts from such sales.

This rule is intended to implement Iowa Code sections 422.42(3) and 422.43.

**701—18.24(422,423) Hospitals, infirmaries and sanitariums.** Hospitals, infirmaries, sanitariums, and like institutions are engaged primarily in rendering services. These facilities shall not be subject to tax on their purchases of items of tangible personal property exempt under 701—Chapter 20 when the items would be exempt if purchased by the individual and if the item is used substantially for the tax-exempt purpose. See rule 18.59(422,423) for an exemption applicable to sales of goods and furnishing of services on and after July 1, 1998, to a nonprofit hospital.

Hospitals, infirmaries, and sanitariums may be the purchasers for use or consumption of tangible personal property used or consumed in furnishing services. *Modern Dairy Co. v. Department of Revenue*, 413 Ill. 55, 108 N.E.2d 8 (1952). However, tangible personal property can be purchased for resale by these facilities and, if purchased for resale, is exempt from tax on the purchases. *Burrows Co. v. Hollingsworth*, 415 Ill. 202, 112 N.E.2d 706 (1953); *Fefferman v. Marohn*, 408 Ill. 542, 97 N.E.2d 785 (1951). Property is purchased for resale if the conditions in subrule 18.31(1) are applicable. See also 701—subrule 15.3(2) with respect to resale exemption certificates.

Depending upon the circumstances, a nonprofit facility may be a charitable institution or organization; a profit facility is not. *Northwest Community Hospital v. Board of Review of City of Des Moines*, 229 N.W.2d 738 (Iowa 1975); *Readlyn Hospital v. Hoth*, 223 Iowa 341, 272 N.W. 90 (1937). Sales by these nonprofit facilities would be exempt from tax if the requirements of Iowa Code section 422.45(3) are met. See rule 701—17.1(422,423).

This rule is intended to implement Iowa Code section 422.45 as amended by 1998 Iowa Acts, House File 2513, and chapter 423.

**701—18.25(422,423) Warranties and maintenance contracts.**

**18.25(1)** In general—definitions. “Mandatory warranty.” A warranty is mandatory within the meaning of this regulation when the buyer, as a condition of the sale, is required to purchase the warranty or guaranty contract from the seller. “Optional warranty.” A warranty is optional within the meaning of this regulation when the buyer is not required to purchase the warranty or guaranty contract from the seller.

**18.25(2)** Mandatory warranties. When the sale of tangible personal property or services includes the furnishing or replacement of parts or materials which are pursuant to the guaranty provisions of the sales contract, a mandatory warranty exists. If the property subject to the warranty is sold at retail, and the measure of the tax includes any amount charged for the guaranty or warranty, whether or not such amount is purported to be separately stated from the purchase price, the sale of replacement parts and materials to the seller furnishing them thereunder is a sale for resale and not taxable. Labor performed under a mandatory warranty which is in connection with an enumerated taxable service is also exempt from tax.

**18.25(3)** Optional warranties. For periods after June 30, 1981.

*a.* The sale of optional service or warranty contracts which provide for the furnishing of labor and materials and require the furnishing of any taxable service enumerated under Iowa Code section 422.43 is considered a sale of tangible personal property the gross receipts from which are subject to tax at the time of sale except as described below.

*b.* On and after July 1, 1995, the sale of a residential service contract regulated under Iowa Code chapter 523C is not considered to be the sale of tangible personal property, and gross receipts from the sales of these service contracts are no longer subject to tax, and the gross receipts from taxable services performed for the providers of residential service contracts are now subject to tax. See the examples below for more detailed explanation. A “residential service contract” is defined in Iowa Code subsection 523C.1(8) to be: a contract or agreement between a residential customer and a service company which undertakes, for a predetermined fee and for a specified period of time, to maintain, repair, or replace all or any part of the structural components, appliances, or electrical, plumbing, heating, cooling, or air-conditioning systems of residential property containing not more than four dwelling units.

EXAMPLE A. John Jones purchases a residential service contract for \$3,000 on July 1, 1994. He pays \$150 of Iowa state sales tax. On December 1, 1994, his furnace malfunctions. The service company which sold Mr. Jones the contract pays Smith Furnace Repair \$700 to fix the furnace. No sales tax is due on the \$700 charge.

EXAMPLE B. Bob Jones purchases a residential service contract for \$3,000 on July 1, 1995. No sales tax is owing or paid. On December 1, 1995, his furnace becomes inoperable. The service company which sold Mr. Jones the contract pays Smith Furnace Repair \$900 to fix Mr. Jones’ furnace. Sales tax of \$45 is due based on the \$900.

*c.* On and after July 1, 1998, if an optional service or warranty contract is a computer software maintenance or support service contract and the contract provides for the furnishing of technical support services only and not for the furnishing of any materials, then no tax is imposed on the furnishing of those services under this subrule. If a computer software maintenance or support service contract provides for the performance of nontaxable services and the taxable transfer of tangible personal property, and no separate fee is stated for either the performance of the service or the transfer of the property, then state sales tax of 5 percent shall be imposed on 50 percent of the gross receipts from the sale of the contract. If a charge for the performance of the nontaxable service is separately stated, see subrule 18.25(5) below.

**18.25(4)** A preventive maintenance contract is a contract which requires only the visual inspection of equipment and no repair is or shall be included. The gross receipts from the sale of a preventive maintenance contract is not subject to tax.

**18.25(5)** Additional charges for parts and labor furnished in addition to that covered by a warranty or maintenance contract which are for enumerated taxable services shall be subject to tax. Only parts and

not labor will be subject to tax where a nontaxable service is performed if the labor charge is separately stated.

This rule is intended to implement Iowa Code sections 422.42 and 423.2 and Iowa Code Supplement section 422.43 as amended by 1998 Iowa Acts, Senate File 2288.

**701—18.26(422) Service charge and gratuity.** When the purchase of any food, beverage or meals automatically and invariably results in the inclusion of a mandatory service charge to the total price for such food, beverage or meal, the amounts so included shall be subject to tax. The term “service charge” means either a fixed percentage of the total price of or a charge for food, beverage or meal.

The mandatory service charge shall be considered: (1) a required part of a transaction arising from a taxable sale and a contractual obligation of a purchaser to pay to a vendor arising directly from and as a condition of the making of the sale and (2) a fixed labor cost included in the price for food, beverage or meal even though such charge is separately stated from the charge for the food, beverage or meal.

When a gratuity is voluntarily given for food, beverage or meal it shall be considered a tip and not subject to tax.

*Cohen v. Playboy Club International, Inc.*, 19 Ill. App. 3d 215, 311 N.E.2d 336; *Baltimore Country Club, Inc. v. Comptroller of Treasury*, 272 Md. 65, 321 A.2d 308.

This rule is intended to implement Iowa Code section 422.43.

**701—18.27(422) Advertising agencies, commercial artists, and designers.**

**18.27(1) Nontaxable services.** Tax does not apply to charges by advertising agencies, commercial artists, or designers for services rendered that do not represent services that are a part of a sale of tangible personal property, or a labor or service cost in the production of tangible personal property. Examples of such nontaxable services are: writing original manuscripts and news releases; writing copy for use in newspapers, magazines, or other advertising, or to be broadcast on television or radio, compiling statistical and other information; placing or arranging for the placing of advertising in media, such as newspapers, magazines, or other publications; billboards and other facilities used in public transportation; and delivering or causing the delivery of brochures, pamphlets, cards, and similar items. Charges for such items as supervision, consultation, research, postage, express, transportation and travel expense, if involved in the rendering of such services, are likewise not taxable.

**18.27(2) Agency fee or commission.** When an amount billed as an agency “fee,” “service charge,” or “commission” represents a charge or part of the charge for any of the nontaxable services described under 18.27(1), the amount so billed is not taxable. Such charge by an advertising agency will be considered to be made for nontaxable services.

**18.27(3) Items taxable.** The tax applies to the entire amount charged to clients for items of tangible personal property such as drawings, paintings, designs, photographs, lettering, assemblies and printed matter. This includes the cost of typography and reproduction proofs when the latter is used as part of a paste-up, “mechanical” or assembly. Whether the items of property are used for reproduction or display purposes is immaterial.

**18.27(4) Preliminary art.** “Preliminary art” as used herein means roughs, visualizations, comprehensives and layouts prepared for acceptance by clients before a contract is entered into or approval is given for finished art. (“Finished art” as used herein means the final art used for actual reproduction by photo-mechanical or other processes.) Tax does not apply to separate charges for preliminary art, except where the preliminary art becomes physically incorporated into the finished art as for example, when the finished art is made by inking directly over a pencil sketch or drawing, or the approved layout is used as camera copy for reproduction.

The charge for preliminary art must be billed separately to the client, either on a separate billing or separately charged for on the billing for the finished art. It must be clearly identified on the billing as preliminary art, of one or more of the types mentioned in the preceding paragraph. Proof of ordering or producing the preliminary art prior to date of contract or approval for finished art shall be evidenced by purchase orders of the buyer, or by work orders or other records of the seller.

The following situations are examples of when the sale of “finished art” is taxable:

*a.* Finished art which is sold to customers to be used for advertising purposes in newspapers, magazines or the like. After the advertiser contracts with the ad agency for the development of an advertising message or theme, the agency devises ideas (preliminary art) and produces the finished art. The finished art is then delivered to the advertiser or to an agent of the advertiser such as a printer or publisher who is under contract with the advertiser to publish the ad.

*b.* Finished art which is sold to customers, or their agents (e.g., printers), for use in producing printed material. The charge for finished art is taxable even though the art work may later be returned to the ad agency by the purchaser or the printer or used by the customer or the customer's agent to produce a nontaxable item. Since the finished art is not a part of the printed materials, the ad agency's customer is consuming the material and not buying it for resale, or using it in an exempt manner.

*c.* Finished art which is used to produce other tangible personal property sold by the ad agency such as letterhead stationery and business cards. The charge for such art is taxable as part of the selling price for such stationery or business cards. This is true whether or not the agency separately itemizes the charge for such stationery or business cards.

**18.27(5) *Items purchased by agency, artist or designer.*** An advertising agency, artist, or designer is the consumer of tangible personal property used in the operation of its business, such as stationery, ink, paint, tools, drawing tables, T-squares, pens, pencils, and other office supplies. Tax applies to the sale of such property to the agency, artist, or designer. Tax also applies where the agency, artist or designer is the consumer of taxable services.

The agency, artist, or designer is the seller of, and may purchase for resale, any item resold before use, or that becomes physically an ingredient or component part of tangible personal property sold, as, for example, illustration board, paint, ink, rubber cement, flap paper, wrapping paper, photographs, photostats, or art purchased from other artists. Tax also applies where the agency, artist, or designer is the seller at retail of taxable services.

In the event that an agency, artist, or designer is both a consumer and a retailer of such items of tangible personal property as noted in this subsection, such agency, artist or designer should:

*a.* Purchase such items without tax liability if the majority of the items are sold at retail and remit the tax at the time of resale or at the time such items are consumed in the operation of the business.

*b.* Pay tax to suppliers at the time of purchase if the majority of the items will be consumed in the operation of the business and deduct the original cost of any such items subsequently sold at retail when reporting tax on their returns.

**18.27(6) *Construction.*** Nothing contained in this rule shall be construed to provide for an exemption from tax for services expressly taxable in rules 701—26.17(422) and 26.39(422).

**18.27(7) *Advertising agencies, commercial artists and designers as agent of client or as a nonagent.***

*a.* In general. A true agent relationship depends upon the facts with respect to each transaction. An agent is one who represents another, called the principal, in dealings with third persons. Advertising agencies, commercial artists, and designers may act as agents on behalf of their clients in dealing with third persons or they may act on their own behalf. To the extent advertising agencies, artists and designers act as agents of their clients in acquiring tangible personal property, they are neither purchasers of the property with respect to the supplier nor sellers of the property with respect to their principals.

*b.* When advertising agencies, commercial artists, and designers act as agents of their clients in purchasing property for their clients, the tax applies to the gross receipts from the sale of such property to the advertising agencies, commercial artists, and designers. Unless such advertising agencies, commercial artists and designers act as true agents, they will be regarded as the retailers of tangible personal property furnished to their clients and the tax will apply to the total amount received for such property. Further, nothing in this rule should be construed to be in variance with the opinion of the Iowa Supreme Court in *Rowe vs. Iowa State Tax Commission*, 249 Iowa 1207, 91 N.W.2d 548 (1958).

*c.* To establish that a particular acquisition is made in the capacity of an agent for a client, advertising agencies, commercial artists, and designers (collectively herein referred to as agency) shall act as follows:

1. The agency must clearly disclose to the supplier the name of the client for whom the agency is acting as an agent.

2. The agency must obtain, prior to the acquisition, and retain written evidence of agent status with the client.

3. The price billed to the client, exclusive of any agency fee, must be the same as the amount paid to the supplier. The agency may make no use of the property for its own account, such as commingling the property of a client with another, and the reimbursement for the property should be separately invoiced or shown separately on the invoice to the client.

*d.* Some charges may represent reimbursement for tangible personal property acquired by the agency as agents for its clients and compensation for performing of agency services related thereto. When an advertising agency, commercial artist, or designer establishes that it has acquired tangible personal property as agents for its clients, tax does not apply to the charge made by the agency to its client for reimbursement charges by a supplier or to the charges made for the performance of the agency's services directly related to the acquisition of personal property.

*e.* Advertising agencies, commercial artists, and designers acting as agents shall not issue resale certificates to suppliers.

*f.* Advertising agencies, commercial artists, and designers act as retailers of all items of tangible personal property produced or fabricated by their own employees when they sell to their clients. Advertising agencies, commercial artists, and designers are not agents of their clients with respect to the acquisition of materials incorporated into items of tangible personal property prepared by their employees and sold at retail to their clients.

**18.27(8) Scope.** The scope of this rule is not confined simply to advertising agencies, commercial artists and designers, but also applies to all other businesses whose activities would bring them within the scope of this rule (e.g., printers).

This rule is intended to implement Iowa Code sections 422.43 and 423.2.

#### **701—18.28(422,423) Casual sales.**

**18.28(1)** *Casual sales by persons not retailers or by retailers outside the regular course of business.* Casual sales are exempt from the Iowa sales and use taxes except for the casual sale of vehicles subject to registration, and vehicles subject only to the issuance of a certificate of title. On and after July 1, 1988, the casual sale of aircraft is also taxable. In order for a casual sale to qualify for exemption under this subrule, two conditions must be present: (1) the sale of tangible personal property or taxable services must be of a nonrecurring nature, and (2) the seller, at the time of the sale, must not be engaged for profit in the business of selling tangible goods or services taxed under Iowa Code section 422.43 or, if so engaged, the sale must be outside the regular course of the seller's business (Order of State Board of Tax Review, Martin Development Corporation, Docket No. 136, December 1, 1976, incorporating by reference Order of Department of Revenue Hearing Officer in Docket No. 75-28-6A-A, July 9, 1976). See subrule 18.28(2) for an explanation of the casual sale exemption applicable to the liquidation of a trade or business.

If either of the conditions above are lacking, no casual sale occurs. Moreover, prior to July 1, 1985, the casual sale exemption was limited to sales of tangible personal property, and casual enumerated taxable services did not qualify for the exemption. *KTVO, Inc. v. Bair*, Equity No. 385 Linn County District Court, September 5, 1975.

For the purposes of this subrule, the word "aircraft" refers to any contrivance now known or hereafter invented, which is designed or used for navigation of or flight in the air, for the purpose of transporting persons, property, or both or for crop dusting, aerial surveillance, recreational flying, or for providing some other service. By way of nonexclusive example, balloons, gliders, helicopters, and "ultra lights" are aircraft. Also included within the meaning of the word "aircraft" is any craft registered under Iowa Code section 328.20 or any successor statute thereto.

Sales of capital assets such as equipment, machinery, and furnishings which are not sold as inventory shall be deemed outside the regular course of business (including sales of capital assets during a retailer's liquidation) and the casual sales exemption shall apply as long as such sales are nonrecurring. This will include transactions exempted from state and federal income tax under Section 351 of the Internal Revenue Code.

Two separate selling events outside the regular course of business within a 12-month period shall be considered nonrecurring. Three such separate selling events within a 12-month period shall be considered as recurring. Tax shall only apply commencing with the third separate selling event. However, in the event that a sale event occurs consistently over a span of years, such sale is recurring and not casual, even though only one sales event occurs each year. *Des Moines Police Department v. Bair*, Equity No. CE3-1591, Polk County District Court, November 1, 1976.

EXAMPLE: Corporation A sells the company copy machine at retail to B. At the time of this sale, Corporation A is engaged in the business for profit of selling clothes at retail. Assuming that the sale of the copy machine constitutes a sale of a nonrecurring nature, there is a casual sale because the sale is outside the regular course of Corporation A's business.

EXAMPLE: Corporation C is engaged in the business of lending money secured by collateral. In the course of such business, Corporation C must repossess some collateral and sell it at retail for purposes of payment of loans. Such sales recur from time to time. Notwithstanding that Corporation C is presumably not engaged in the business of selling tangible goods or services for a profit, since the sales are recurring, there is no casual sale. *S & M Finance Co., Fort Dodge v. Iowa State Tax Commission*, 1968, Iowa 162 N.W.2d 505.

EXAMPLE: F, a farmer, does not sell tangible personal property at retail or engage in the performance of any taxable services. F liquidates the farming business and hires a professional auctioneer to auction off many items of tangible personal property. Assuming this liquidation event is casual, all items sold by the auctioneer at retail are casual sales notwithstanding that many different sales to numerous different buyers may occur. See rule 18.8(422).

EXAMPLE: H, an insurance agency, holds a semiannual event to sell its used office furniture. Even though H does not regularly sell tangible personal property at retail, the casual sale exemption does not apply because the selling events are recurring. *Des Moines Police Department v. Bair*, Equity No. CE3-1591, Polk County District Court, November 1, 1976.

EXAMPLE: I, a corporation, has one sales event every year whereby it auctions off capital assets which it has no use for or desires to replace. This event has been a planned function of I and is conducted regularly and consistently over a span of years. Even though this sale event occurs only once a year, it is of a recurring nature because of the pattern of repetitiveness present and, therefore, the casual sale exemption would not apply, regardless of the number of items sold at such sale event each year.

EXAMPLE: J, a corporation engaged in the sale for resale of tangible personal property, sells three capital assets used in J's trade or business consisting of a copy machine, a desk, and a computer. Each sale is made to different buyers and is unrelated to the other sales. The three sales occur in January, June, and October of the same year. The sale made in October consists of a desk. J has not established a pattern of recurring sales of capital assets prior to aforementioned sales of capital assets. Under these circumstances, the sale of the desk is not a casual sale, but the sales of the copy machine and the computer are casual and exempt.

EXAMPLE: K, a corporation, is primarily engaged in the business of road construction. From time to time, it sells used capital assets and scrap materials reclaimed from its road construction work to individuals and businesses. It does not advertise itself as a retailer of these assets and materials but sells them as a matter of courtesy to persons who cannot purchase them elsewhere. After 42 years of operation, it decides to liquidate. Pursuant to that decision, K employs two auctioneers to sell its capital assets and ceases operation after its assets are sold. K had only one capital asset sale during the 12 months immediately preceding each liquidation auction sale. The auction sales are exempt casual sales under this subrule (1) because they are nonrecurring, and (2) because K is not a retailer of the capital assets sold during its liquidation. See *Holland Bros. Construction Co., Inc. v. Iowa State Board of Tax Review*, 611 N.W.2d 495 (Iowa 2000).

EXAMPLE: L, a sole proprietorship, engaged in selling automobile parts at retail, incorporated. The assets of L are sold to the new corporation in exchange for stock and the new corporation now engages in selling automobile parts at retail. The casual sale exemption would apply, but only because of the exemption set out in subrule 18.28(2) infra, since the transfer involves a liquidation of L's business and

the sale of L's inventory to another person (the corporatin) which will continue to engage in a similar trade or business.

The above examples are not the only ones pertaining to the questions of whether a casual sale did or did not occur. However, because of the myriad of factual situations which can and do exist, it is not possible to formulate more detailed rules on this subject matter.

**18.28(2) *Special rules for casual sales involving the liquidation of a trade or business.*** When retailers sell all or substantially all of the tangible personal property held or used in the course of the trade or business for which retailers are required to hold a sales tax permit, the casual sale exemption will apply to exempt those sales only when the following circumstances exist: (1) the trade or business must be transferred to another person, and (2) the transferee must engage in a similar trade or business. The trade or business transferred refers to the place where the business is located since each taxable retail business must have a sales tax permit at each location. For purposes of this casual sale circumstance, it is irrelevant whether the retailer actually has a sales tax permit or not; rather, the relevant circumstance is that the retailer was required to have a sales tax permit. See *Holland Bros. Construction Co., Inc. v. Iowa State Board of Tax Review*, 611 N.W.2d 495 (Iowa 2000). One effect of this is that a retailer who is closing as opposed to transferring a business and is selling inventory in the process of this closing is not entitled to claim the casual sale exemption under this subrule, but see subrule 18.28(1), and the resale exemption is always potentially applicable to sales of inventory. See the examples below for further explanation.

EXAMPLE: L, a hardware store, desires to liquidate the business. L had been selling tangible personal property at retail and was required to have an Iowa retail sales tax permit. L hires a professional auctioneer and all items of inventory, equipment, and fixtures are sold to various purchasers. These items consist of all or substantially all of the tangible personal property held or used by L in the course of the business for which a sales tax permit was required to be held. L, however, does not transfer the trade or business to anyone else. Under these circumstances, the casual sales exemption does not apply to the sale of the inventory, but see subrule 18.28(1) for criteria which determine whether the casual sales exemption applies to the equipment and fixtures.

EXAMPLE: The facts are the same as those in the previous example, except that L is liquidating its business because it attempted to build a new store and its entire inventory was destroyed by fire while in storage. An auctioneer sells L's equipment and trade fixtures to various purchasers. The auctioneer's sale of the equipment and trade fixtures is an exempt casual sale of the type described in subrule 18.28(1) because (1) it is nonrecurring, and (2) it is outside the usual course of L's business. See *Holland Bros. Construction Co., Inc.*, supra.

EXAMPLE: M, a sole proprietorship, incorporated. The assets of M are sold to the new corporation for stock. The new corporation engaged in a similar business. The casual sale exemption would apply.

EXAMPLE: N, an oil company, sells all or substantially all of the tangible personal property of ten company-owned service stations which were held or used in the course of its business, for which N was required to hold a sales tax permit, by bulk sales or otherwise. The sales were made to O, P, and Q and occurred at different times during the same year, each sale being unrelated. N was required to have a sales tax permit for each service station. N transferred its trade or business (each service station) to O, P, and Q, each of whom will engage in the same business N did, i.e., operation of service stations. Even though under these circumstances, the sales by N are recurring, the casual sales exemption would apply since each trade or business was transferred to another person who did engage in a similar trade or business.

EXAMPLE: R, an operator of a restaurant, auctions off to various purchasers who are not engaged in the restaurant business all or substantially all of the tangible personal property held or used in the business for which R was required to hold a retail sales tax permit. R transfers the trade or business to S who then operates a restaurant at the same location R did. Even if S did not purchase any of the tangible personal property, under these circumstances, the casual sales exemption applies. The tangible personal property held or used in the trade or business need not be sold to the same person to whom the trade or business is sold for the exemption to apply.

EXAMPLE: T, a restaurant, sells all of its tangible personal property held or used in the course of its business for which it was required to hold a sales tax permit to U. T also sells its trade or business to U. U engages in the business of operation of a dance hall and does not continue to operate the restaurant. This subrule's casual sales exemption will not apply, but see subrule 18.28(1) for the criteria of a casual sale exemption which could apply.

The above examples are not the only ones pertaining to the questions of whether a casual sale did or did not occur. However, because of the myriad of factual situations which can and do exist, it is not possible to formulate more detailed rules on this subject matter.

**18.28(3) *Casual sales of services.*** Special rule for services rendered, furnished, or performed on or after July 1, 1985. The "casual sale" of an enumerated service has occurred if the following circumstances exist:

a. The service was rendered, furnished, or performed on or after July 1, 1985; and

b. The service was rendered, furnished, or performed on a nonrecurring basis by a seller who, at the time of the sale of the service, is not engaged for profit in the business of selling tangible goods or services taxed under Iowa Code section 422.43, or, if so engaged, the sale was outside the regular course of the seller's business; or

c. The sales of all, or substantially all of the services held or used by a retailer in the course of the retailer's trade or business for which the retailer is required to hold a sales tax permit, if the retailer sells or otherwise transfers the trade or business to another person who engages in a similar trade or business.

EXAMPLE: V ordinarily engages in janitorial and building maintenance or cleaning which are taxable services; see rule 701—26.60(422). Once, as a favor to customer W, V cut customer W's lawn and otherwise performed the taxable service of "lawn care" for customer W. Since this performance of lawn care was not "within V's regular course of business" and was not "recurring," gross receipts from the lawn care are not subject to tax.

EXAMPLE: Corporation X rents a piece of equipment from Y. Y does not otherwise rent equipment and does not engage in the business for profit of selling tangible goods or taxable enumerated services. A casual sale qualifying for the exemption exists.

This rule is intended to implement Iowa Code sections 422.42(12), 422.45(6) and 423.4.

**701—18.29(422,423) Processing, a definition of the word, its beginning and completion characterized with specific examples of processing.**

**18.29(1) *Processing—a definition.*** For the purpose of these rules, "processing" means an operation or a series of operations whereby tangible personal property is subjected to some special treatment by artificial or natural means which changes its form, context, or condition, and results in marketable tangible personal property. These operations are commonly associated with fabricating, compounding, germinating, or manufacturing. *Linwood Stone Products Co. v. State Department of Revenue*, 175 N.W.2d 393 (Iowa 1970).

**18.29(2) *The beginning of processing.*** Processing begins when the "form, context, or condition" of tangible personal property is changed with the intent of eventually transforming the property into a saleable finished product. The severance of raw material from real estate is not processing, even if this severance results in a change in the form, context, or condition of the real estate. *Linwood Stone Products Co. v. State Department of Revenue*, 175 N. W.2d 393 (Iowa 1970). Furthermore, transportation of raw material after it is severed from real estate but prior to the time the initial change in the form, context, or condition of the raw material occurs is not processing. *Southern Sioux County Rural Water System, Inc. v. Iowa Department of Revenue*, 383 N.W.2d 585 (Iowa 1986).

**18.29(3) *The completion of processing.*** Processing ends when the property being processed is in the form in which it is ultimately intended to be sold at retail, *Hy-Vee Food Stores v. Iowa Department of Revenue*, 379 N.W.2d 37 (Iowa App. 1985). The storage or transport of property after that property is transformed into a finished product is not a part of processing.

**18.29(4) *Examples of when processing begins and ends.*** The following examples are intended to clarify but not to contradict the explanation of processing set out in subrules 18.29(2) and 18.29(3).

EXAMPLE A: A company blasts limestone from the ground, bulldozers pick the limestone up and put it in trucks; these trucks transport the limestone to a crusher some distance from the quarry site. The first change in the “form” or “condition” of the limestone, while it is tangible personal property, occurs when the stone is crushed in the crusher. The blasting of the stone from the ground and its transport to the crusher would be acts preparatory to and not a part of processing. Thus, fuel used in the bulldozers and transport trucks would not be fuel used in processing, *Linwood Stone Products*, supra.

EXAMPLE B: Pumps remove water from underground wells and pump that water through pipes to a water treatment plant. At the treatment plant, the water passes initially through an aeration system which adds oxygen to it. At other points in the plant, potassium and chlorine are added to the water and iron is removed. After these acts are performed, clean, drinkable water exists. The first change, however, in the condition of the water occurs when it passes through the aeration system and oxygen is added to it. The withdrawal of the water from the ground and its transport to the aeration system would not be a part of processing. Thus, electricity used by the pumps which pump the water to the aeration system would not be used in processing. However, by way of contrast, electricity used to transport the water between, for example, the aeration system and the point where potassium is added to the water would be used in processing. *Southern Sioux Rural Water System, Inc.*, supra.

EXAMPLE C: Water is processed in a treatment plant. The last act at the plant necessary to render the water drinkable or a “finished product” is the addition of chlorine. After the addition of chlorine, the water is pumped first into wells and later into water towers where it is held for distribution. The pumping of this drinkable water from the point where the chlorine is added to the wells and the tower is not a part of processing because processing of the water ended with the addition of the chlorine; thus, electricity used in these pumps is not electricity used in processing. *Southern Sioux County Rural Water System, Inc.*, supra.

**18.29(5) Integral part of the production of the product test.** Certain activities may be exempt as part of processing if those activities are very closely interconnected with, or an integral part of, the operation of the processing equipment while processing is occurring. *Southern Sioux Rural Water System, Inc.*, supra. Merely because an activity is vital or essential to a processing operation does not make that activity exempt as part of processing unless the activity itself is closely interconnected with, or an integral part of, the operation of the processing equipment while processing is occurring. *Mississippi Valley Milk Producers Ass’n v. Iowa Dept. of Revenue*, 387 N.W.2d 611 (Iowa App. 1986). See the nonexclusive example below.

A manufactures nails. In A’s factory is a machine which draws steel into long rods the width of whatever nail A may wish to manufacture. After this machine draws the steel into the desired-size rods, the rods are moved to a second machine by a conveyor belt. This second machine cuts the rods into the length of nail which A desires. A second conveyor belt then transports these cut rods to a third machine which sharpens one end of the rod to a point and puts a “nail head” on the other end of the rod. The activities of the three machines are clearly processing, in that they are activities which change the form, context or condition of raw material, and as a result of those activities, marketable tangible personal property or a finished product is created. The two conveyor belts move the partially finished nails from one piece of processing equipment to another while processing is occurring. Since the activities of the conveyors are very closely interconnected with and an integral part of the operation of the various pieces of processing equipment while processing is occurring, the conveyor belts are involved in processing as well.

**18.29(6) Other specific examples of processing.** The Iowa Supreme Court has also stated that the following activities are processing: manufacturing ice, refrigerating cheese to age it from “green” to edible, refrigerating eggs to change their flavor, pasteurizing and subsequent refrigeration of milk, “hard” freezing of meat and butter for aging, canning vegetables and cooking foodstuffs; *Fischer Artificial Ice & Cold Storage Co. v. Iowa State Tax Commission*, 248 Iowa 497, 81 N.W.2d 437 (1957); and, *Mississippi Valley Milk Producers v. Iowa Dept. of Revenue and Finance*, 387 N.W.2d 611 (Ia. App. 1986), also crushing of “flat rock” limestone and treating limestone in kilns. *Linwood Stone Products Co. v. State Dept. of Revenue*, 175 N.W.2d 393 (Iowa 1970). See 701—subrule 17.3(2) for an expanded definition of processing with regard to food manufacturing.

**18.29(7) Other department rules concerned with processing.** Various sections of the Iowa Code set out activities that are defined by statute to be “processing.” The rules interpreting these statutes for the purposes of sales and use tax law are the following:

- a. 701—15.3(422,423) Exemption certificates, direct pay permits, fuel used in processing, and beer and wine wholesalers.
- b. 701—17.2(422) Fuel used in processing—when exempt.
- c. 701—17.3(422,423) Processing exemptions.
- d. 701—17.9(422,423) Sales of breeding livestock, fowl, and certain other property used in agricultural production. See 701—subrules 17.9(4), 17.9(5), 17.9(6), and 17.9(7) for processing exemptions.
- e. 701—17.14(422,423) Chemicals, solvents, sorbents, or reagents used in processing.
- f. 701—18.3(422,423) Chemical compounds used to treat water.
- g. 701—18.45(422,423) Sale or rental of computers, industrial machinery and equipment; refund of and exemption from tax paid for periods prior to July 1, 1997.
- h. 701—18.58(422,423) Sales or rentals of machinery, equipment, and computers and sales of fuel and electricity to manufacturers and sales or rentals of computers to commercial enterprises for periods on and after July 1, 1997, but before July 1, 2016.
- i. 701—26.2(422) Enumerated services exempt. See 701—subrule 26.2(2) for the processing exemption.
- j. 701—28.2(423) Processing of property defined.
- k. 701—33.3(423) Fuel consumed in creating power, heat, or steam for processing or generating electric current.
- l. 701—33.7(423) Property used to manufacture certain vehicles to be leased.
- m. For property sold as part of a contract entered into on or after July 1, 2016, computers, machinery, and equipment used for an exempt purpose under Iowa Code section 423.3(47). See rules 701—230.14(423) to 701—230.22(423).  
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

## **701—18.30(422) Taxation of American Indians.**

### **18.30(1) Definitions.**

“*American Indians*” means all persons of Indian descent who are members of any recognized tribe.

“*Settlement*” means all lands within the boundaries of the Mesquakie Indian settlement located in Tama County, Iowa and any other recognized Indian settlement or reservation within the boundaries of the state of Iowa.

**18.30(2) Retail sales tax—tangible personal property.** Retail sales of tangible personal property made on a recognized settlement or reservation to Indians who are members of the tribe located on that settlement or reservation, where delivery occurs on the reservation, are exempt from tax (*Bryan v. Itasca County*, 426 U.S. 373, 376-77 (1976); *Moe v. Confederated Salish & Kootenai Tribes*, 425 U.S. 463, 475-81 (1976)). Retail sales of tangible personal property made on a recognized settlement or reservation to Indians where delivery occurs off the reservation are subject to tax. Retail sales of tangible personal property made to non-Indians on a recognized settlement or reservation are subject to tax regardless of where the delivery occurs. Sales made to non-Indians are taxable even though the seller may be a member of a recognized settlement or reservation.

**18.30(3) Retail sales tax—services.** Sales of enumerated taxable services and sales made by municipal corporations furnishing gas, electricity, water, heat, or communication services to Indians who are members of the tribe located on the recognized settlement or reservation where delivery of the service occurs are exempt from tax (*Bryan v. Itasca County*, 426 U.S. 373, 376-77 (1976); *Moe v. Confederated Salish & Kootenai Tribes*, 425 U.S. 463, 475-81 (1976)). Sales of enumerated taxable services or sales made by municipal corporations furnishing gas, electricity, water, heat, or communication services to Indians where delivery of the services occurs off a recognized settlement or reservation are subject to tax.

**18.30(4) *Off-reservation purchases.*** Purchases made by Indians off a recognized settlement or reservation are subject to tax if delivery occurs off the reservation. Purchases made by Indians off a recognized settlement or reservation are not subject to tax if delivery is made on the reservation to Indians who are members of the tribe located on that reservation.

See rule 701—33.5(423) for the taxation of tangible personal property and services where the state use tax may be applicable.

This rule is intended to implement Iowa Code sections 422.42, 422.43, and 422.45(1).

**701—18.31(422,423) Tangible personal property purchased by one who is engaged in the performance of a service.**

**18.31(1) *In general. (Effective July 1, 1990)***

*a.* On and after July 1, 1990, tangible personal property purchased by one who is engaged in the performance of a service is purchased for resale and not subject to tax if (1) the provider and user of the service intend that a sale of the property will occur, and (2) the property is transferred to the user of the service in connection with the performance of the service in a form or quantity capable of a fixed or definite price value, and (3) the sale is evidenced by a separate charge for the identifiable piece or quantity of property.

*b.* Prior to July 1, 1990, in those circumstances in which tangible personal property is purchased by one who is engaged in the performance of a service and the property is transferred to the customer in conjunction with a performance of the service in a form or quantity which is capable of any fixed or definite price value, but the actual sale of the property is not indicated by a separate charge for the identifiable item, the burden of proving that the property was purchased for resale by one engaged in the performance of a service and not subject to tax at the time of purchase is upon the person engaged in the performance of a service who asserts this.

*c.* Tangible personal property which is not sold in the manner set forth in “*a*” or “*b*” above is not purchased for resale and thus is subject to tax at the time of purchase by one engaged in the performance of a service. Such tangible personal property is considered to be consumed by the purchaser who is engaged in the performance of a service and the person performing the service shall pay tax upon the sale at the time of purchase.

**EXAMPLE:** An investment counselor purchases envelopes. These envelopes are used to send out monthly reports to the investment counselor’s clients regarding their accounts. Tax is due at the time the investment counselor purchases the envelopes if the clients are not billed for these items. Each envelope is transferred to a client in a form or quantity which is capable of a fixed or definite price value. However, there must also be an actual sale to the client (customer) of an item of personal property in order that there be a “resale” of the item.

An automobile repair shop purchases solvents which are used in cleaning automobile parts and thus in performing its automobile repair service. Tax is due at the time the automobile repair shop purchases the solvent since the solvents are not sold to the customer and, in this case, the item is not transferred to a customer in a form or quantity which is capable of a fixed or definite price value. Thus, the solvent is deemed consumed by the purchaser engaged in the performance of the service.

**EXAMPLE:** A retailer purchases television tubes tax-free where the retailer makes a separate charge for the tube to the customer and since the tube is transferred to the customer in a form or quantity capable of a fixed or definite price value.

**EXAMPLE:** A beauty or barber shop purchases shampoo and other items to be used in the performance of its service. Tax is due at the time the beauty or barber shop purchases such items from its supplier, where the customers of the beauty or barber shop are not separately billed for the item, and because it is not transferred to the customer in a form or quantity capable of a fixed or definite price value, it is being consumed by the beauty or barber shop.

**EXAMPLE:** A car wash purchases water, electricity, or gas used in the washing of a car. The car wash would be the consumer of the water, electricity, or gas and tax is due at the time of purchase. The items purchased by the car wash are not transferred to the customer in a form or quantity capable of a fixed or definite price value, and the customer is not billed for the item.

EXAMPLE: An accounting firm purchases plastic binders which are used to cover the reports issued to its customers. These binders would be subject to tax at the time of purchase by the firm where the customer of the firm is not billed for the item, there being no sale to the customer in such a case.

EXAMPLE: A meat locker purchases materials such as wrapping paper and tape which it uses to wrap meat for customers who provide the locker with the meat. These materials would be subject to tax at the time of purchase by the meat locker because they are not sold to the customer in a form or quantity capable of a fixed or definite price value.

EXAMPLE: A jeweler purchases materials such as main springs and crystals to be used in the performance of a service. These items are purchased by the jeweler for resale where they are transferred to the customer in a form or quantity capable of a fixed or definite price value and each item is actually sold to the customer as evidenced by a separate charge therefor.

EXAMPLE: A lawn care service applies fertilizer, herbicides, and pesticides to its customers' lawns. The following are examples of invoices to customers which are suitable to indicate a lawn care service's purchase of the fertilizer, herbicides, and pesticides for resale to those customers: "Chemicals...31 Gal...\$60"; "Fertilizer...50 lbs....\$100"; and "Materials applied to lawn...4 bushel...\$40". The following are examples of information placed upon an invoice which would not indicate a purchase for resale to the customers invoiced: "Fifty percent of the charge for this service is for materials placed on a lawn," or "Lawn chemicals...\$30" or "Fifty pounds of fertilizer was applied to this lawn."

**18.31(2)** *Purchases made by automobile body shops or garages with body shops (effective October 1, 1980).*

Tangible personal property purchased by body shops can be purchased for resale provided both of the following conditions are met:

1. The property purchased for resale is actually transferred to the body shop's customer by becoming an ingredient or component part of the repair work. See Iowa Code section 422.42(2) and *Cedar Valley Leasing Inc. v. Iowa Department of Revenue*, 274 N.W.2d 357 (Iowa 1979).

2. The property purchased for resale is itemized as a separate item on the invoice to the body shop's customer and is transferred to the customer in a form or quantity capable of a fixed or definite price value.

If either of the above two events is missing, there is no purchase for resale and the body shop is deemed the consumer of the item purchased.

When body shops purchase items which will be resold (see list of items in this rule) in the course of the repair activity, the vendors selling to the body shops are encouraged to accept a valid resale certificate at the time of purchase. See rule 701—15.3(422,423). Failure of the vendor to accept a valid resale certificate may subject that vendor to sales tax liability since the burden of proof would be on the vendor that a sale was made for resale. If the vendor cannot meet that burden, the vendor will be liable for the sales tax. Such burden is not met merely by a showing that the purchaser had obtained from the department an Iowa retail sales tax or retail use tax permit.

For insurance purposes, body shops are reimbursed by insurance companies for "materials" which such shops consume in rendering repair services. Some of the materials are transferred to the recipients of the repair services and some are not. Of those so transferred, such transfer is in irregular quantities and is not in a form or quantity capable of a fixed or definite price value. Therefore, body shops are generally deemed to be the consumers of materials and must pay tax on these items at the time of purchase. Nonexclusive examples of items most likely to be included in this category of "materials," whether actually transferred to customers of body shops or not, are as follows:

- Abrasives
- Accessories
- Battery water
- Body filler or putty
- Body lead
- Bolts, nuts and washers
- Brake fluid
- Buffing pads

Chamois  
Cleaning compounds  
Degreasing compounds  
Floor dry  
Hydraulic jack oil  
Lubricants  
Masking tape  
Paint  
Polishes  
Rags  
Rivets and cotter pins  
Sand paper  
Sanding discs  
Scuff pads  
Sealer and primer  
Sheet metal  
Solder  
Solvents  
Spark plug sand  
Striping tape  
Thinner  
Upholstery tacks  
Waxes  
White sidewall cleaner

The following are nonexclusive examples of parts which can be purchased for resale since they are generally transferred to the body shop's customer during the course of the repair in a form or quantity capable of a fixed or definite price value and are generally itemized separately as parts.

Batteries  
Brackets  
Bulbs  
Bumpers  
Cab corners  
Chassis parts  
Doors  
Door guards  
Door handles  
Engine parts  
Fenders  
Floor mats  
Grills  
Headlamps  
Hoods  
Hub caps  
Radiators  
Rocker panels  
Shock absorbers  
Side molding  
Spark plugs  
Tires  
Trim  
Trunk lids  
Wheels

Window glass  
Windshield ribbon  
Windshields

The following are nonexclusive examples of tools and supplies which are generally not transferred to the body shop's customer during the course of the repair and therefore could not be purchased for resale. The body shop is deemed the consumer of these items since they are not transferred to a customer and therefore the body shop must pay tax to the vendor at the time of purchase.

Air compressors and parts  
Body frame straightening equipment  
Brooms and mops  
Buffers  
Chisels  
Drill bit  
Drop cords  
Equipment parts  
Fire extinguisher fluids  
Floor jacks  
Hand soap  
Hand tools  
Office supplies  
Paint brushes  
Paint sprayers  
Sanders  
Spreaders for putty  
Signs  
Washing equipment and parts  
Welding equipment and parts

Because of the nature of their business and the formulas devised by the insurance industry to reimburse body shops for cost of "materials," it is possible for body shops, in their invoices to their customers, to separately set forth labor, resold parts, and materials. While the materials can be separately invoiced as one general item, there is no way to ascertain a definite and fixed price for each item of the materials listed in this rule and consumed by the body shops and some of such individual materials are not even transferred by body shops to their customers. Therefore, the body shops are generally the "consumers" of "materials" and do not purchase them for resale. *W. J. Sandberg Co. v. Iowa State Board of Assessments and Review*, 225 Iowa 103, 278 N.W. 643 (1938). Thus, body shops should pay tax to their suppliers on all materials purchased and consumed by them. If materials are purchased from non-Iowa suppliers who do not collect Iowa tax from body shops, such body shops should remit consumer use tax to the Department of Revenue on such materials.

Body shops must collect sales tax on the taxable service of repairing motor vehicles. See rule 701—26.5(422). However, due to the nature of the insurance formulas, it is possible for body shops to itemize that portion of their billing which would be for repair services and that portion relating to consumed "materials." It is also possible for body shops to itemize that portion of their charges for parts which they purchase for resale to their customers. Body shops do not and cannot resell the tools and supplies previously listed in this rule and are taxable on their purchases of such items.

Therefore, as long as body shops separately itemize on their invoices to their customers the amounts for labor, parts, and for "materials," body shops should collect sales tax on the labor and the parts, but not on the materials as enumerated in this rule.

EXAMPLE: A body shop repairs a motor vehicle by replacing a fender and painting the vehicle. In doing the repair work, the body shop uses rags, sealer and primer, paint, solder, thinner, bolts, nuts and washers, masking tape, sandpaper, waxes, buffing pads, chamois, solder and polishes. In its invoice to the customer, the labor is separately listed at \$300, the part (fender) is separately listed at \$300, and the category of "materials" is separately listed for a lump sum of \$100, for a total billing of \$700. The Iowa

sales tax computed by the body shop should be on \$600 which is the amount attributable to the labor and the parts. The materials consumed by the body shop were separately listed and would not be included in the tax base for “gross taxable services” as defined in Iowa Code subsection 422.42(16), which is taxable in Iowa Code section 422.43.

In this example, if the “materials” were not separately listed on the invoice, but had been included in either or both of the labor or part charges by marking up such charges, the body shop would have to collect sales tax on the full charges for parts or labor even though tax was paid on materials by the body shop to its supplier at time of purchase.

This rule is intended to implement Iowa Code sections 422.42, 422.43 and 423.2.

**701—18.32(422,423) Sale, transfer or exchange of tangible personal property or taxable enumerated services between affiliated corporations.**

**18.32(1)** *In general.* The sale, transfer or exchange of tangible personal property or taxable services among affiliated corporations, included but not limited to a parent corporation to a subsidiary corporation, for a consideration is subject to tax. A bookkeeping entry for an “account payable” qualifies as consideration as well as the actual exchange of money or its equivalent. Transactions between affiliated corporations may not be subject to tax where it can be shown that the affiliated corporations are operating as a unit within the meaning of Iowa Code sections 422.42(1) and 423.1(8).

**18.32(2)** *Affiliated corporations acting as a unit.* If an affiliated corporation acts as an agent for the other affiliated corporation in a transaction listed in 18.32(1) such corporation shall be considered as acting as a unit as set forth herein and such transactions may not be subject to tax.

This rule should not be equated with the unitary business concept used in corporation income tax law.

This rule is intended to implement Iowa Code sections 422.42(1) and 423.1(8).

**701—18.33(422,423) Printers’ and publishers’ supplies exemption with retroactive effective date.**

**18.33(1)** For the purposes of this rule, a “printer” is any person, a portion of whose business involves the completion of a finished, printed product for sale at retail by that person or another person. A “printer” is also any person, a portion of whose business involves the completion of a finished printed packaging material used to package products for ultimate sale at retail. The term “printer” does not include any person printing or copyrighting printed material for its own use or consumption and not for resale. A “publisher” means and includes any person who owns the right to produce, market, and distribute printed literature and information for ultimate sale at retail.

**18.33(2)** Effective May 4, 1995, and retroactive to July 1, 1983, the gross receipts from the sale or rental of the following to a printer or publisher are exempt from tax: acetate; antihalation backing; antistatic spray; back lining; base material used as a carrier for light sensitive emulsions; blankets; blow-ups; bronze powder; carbon tissue; codas; color filters; color separations; contacts; continuous tone separations; creative art; custom dies and die cutting materials; dampener sleeves; dampening solution; design and styling; diazo coating; dot etching; dot etching solutions; drawings; drawsheets; driers; duplicate films or prints; electronically digitized images; electrotypes; end product of image modulation; engravings; etch solutions; film; finished art or final art; fix; fixative spray; flats; flying pasters; foils; goldenrod paper; gum; halftones; illustrations; ink; ink paste; keylines; lacquer; lasering images; layouts; lettering; line negatives and positives; linotypes; lithographic offset plates; magnesium and zinc etchings; masking paper; masks; masters; mats; mat service; metal toner; models; modeling; mylar; negatives; nonoffset spray; opaque film process paper; opaquing; padding compound; paper stock; photographic materials: acids, plastic film, desensitizer emulsion, exposure chemicals, fix, developers, paper; photography, day rate; photopolymer coating; photographs; photostats; photo-display tape; phototypesetter materials; pH-indicator sticks; positives; press pack; printing cylinders; printing plates, all types; process lettering; proof paper; proofs and proof processes, all types; pumice powder; purchased author alterations; purchased composition; purchased phototypesetting; purchased stripping and paste-ups; red litho tape; reducers; roller covering; screen tints; sketches; stepped plates; stereotypes; strip types; substrate; tints; tissue overlays; toners; transparencies; tympan;

typesetting; typography; varnishes; Veloxes; wood mounts; and any other items used in a similar capacity to any of the above-enumerated items by the printer or publisher to complete a finished product for sale at retail. Expendable tools and supplies not enumerated in this subrule are subject to tax.

**18.33(3)** Claim for refunds of tax, interest, or penalty paid for the period of July 1, 1983, to June 30, 1995, must be limited to \$25,000 in the aggregate and will not be allowed unless filed prior to October 1, 1995. If the amount of claimed refunds for this period totals more than \$25,000, the department must prorate the \$25,000 among all claims.

**701—18.34(422,423) Automatic data processing.**

**18.34(1)** *In general.*

*a. Applicability of tax.* For the purposes of this rule, the tax on automatic data processing is applicable to the gross receipts of:

- (1) Sales and rentals of data processing equipment (hardware).
- (2) Sales and rentals of tangible personal property produced or consumed by data processing equipment or prewritten (canned) computer software used in data processing operations.
- (3) Certain enumerated services performed on or connected with data processing such as rental of tangible personal property, machine repair, services of machine operators, office and business machines repair, electrical installation, and any other taxable service enumerated in Iowa Code section 422.43.

*b. Definitions.*

(1) “*Computer*” means a programmed or programmable machine or device having information processing capabilities and includes word processing equipment, testing equipment, and programmed or programmable microprocessors and any other integrated circuit embedded in manufactured machinery or equipment.

(2) “*Hardware*” means the physical computer assembly and peripherals including, but not limited to, such items as the central processing unit, keyboards, consoles, monitors, memory, disk and tape drives, terminals, printers, plotters, modems, tape readers, document sorters, optical readers and digitizers.

(3) “*Canned software*” is prewritten computer software which is offered for general or repeated sale or rental to customers with little or no modification at the time of the transaction beyond specifying the parameters needed to make the program run. Canned software is tangible personal property. The term also includes programs offered for general or repeated sale or rental which were initially developed as custom software. Evidence of canned software includes the selling or renting of the software more than once. Software may qualify as custom software for the original purchaser or lessor but is canned software with respect to all others. Canned software includes program modules which are prewritten and later used as needed for integral parts of a complete program.

(4) “*Custom software*” is specified, designed, and created by a vendor at the specific request of a customer to meet a particular need and is considered to be a sale of a service rather than a sale of tangible personal property. It includes those services represented by separately stated charges for the modification of existing prewritten software when the modifications are written or prepared exclusively for a customer. Modification to existing prewritten software to meet the customer’s needs is custom computer programming only to the extent of the modification and only to the extent that the actual amount charged for the modification is separately stated. Examples of services that do not result in custom software include loading parameters to initialize program settings and arranging preprogrammed modules to form a complete program.

When the charges for modification of a prewritten program are not separately stated, tax applies to the entire charge made to the customer for the modified program unless the modification is so significant that the new program qualifies as a custom program. If the prewritten program before modification was previously marketed, the new program will qualify as a custom program if the price of the prewritten program was 50 percent or less of the price of the new program. If the prewritten program was not previously marketed, the new program will qualify as a custom program if the charge made to the customer for custom programming services, as evidenced by the records of the seller, was more than 50 percent of the contract price to the customer.

The department will consider the following records in determining the extent of modification to prewritten software when there is not a separate charge for the modification: logbooks, timesheets, dated documents, source codes, specifications of work to be done, design of the system, performance requirements, diagrams of programs, flow diagrams, coding sheets, error printouts, translation printouts, correction notes, and invoices or billing notices to the client.

(5) “*Storage media*” includes hard disks, compact disks, floppy disks, diskettes, diskpacks, magnetic tape, cards, or other media used for nonvolatile storage of information readable by a computer.

(6) “*Rental*” includes any lease or license agreement between a vendor and a customer for the customer’s use of hardware or software.

(7) “*Program*” is interchangeable with the term “software” for purposes of this rule.

**18.34(2) Taxable sales, rentals and services.**

*a. Sales of equipment.* Tax applies to sales of automatic data processing equipment and related equipment.

*b. Rental or leasing of equipment.* Where a lease includes a contract by which a lessee secures for a consideration the use of equipment which may or may not be used on the lessee’s premises, the rental or lease payments are subject to tax. See rule 701—26.18 on tangible personal property rental.

*c. Canned software.* The sale or rental for a consideration of any computer software which is not custom software is a transfer of tangible personal property and is taxable. Canned software may be transferred to a customer in the form of diskettes, disks, magnetic tape, or other storage media or by listing the program instructions on coding sheets.

(1) Tax applies whether title to the storage media on which the software is recorded, coded, or punched passes to the customer or the software is recorded, coded, or punched on storage media furnished by the customer. A fee for the temporary transfer of possession of canned software for the purpose of direct use to be recorded, coded, or punched by the customer or by the lessor on the customer’s premises, is a sale or rental of canned software and is taxable.

(2) Tax applies to the entire amount charged to the customer for canned software. Where the consideration consists of license fees, royalty fees, right to use fees or program design fees, whether for a period of minimum use or for extended periods, all fees includable in the purchase price are subject to tax.

*d. Training materials.* Persons who sell or lease data processing equipment may provide a number of training services with the sale or rental of their equipment. Training services, per se, are not subject to tax. Training materials, such as books, furnished to the trainees for a specific charge are taxable.

*e. Services a part of the sale or lease of equipment.* Where services, such as programming, training or maintenance services, are provided to those who purchase or lease automatic data processing and related equipment, on a mandatory basis as an inseparable part of the sale or taxable lease of the equipment, charges for the furnishing of the services are includable in the measure of tax from the sale or lease of the equipment whether or not the charges are separately stated. (Where the purchaser or lessee has the option to acquire the equipment either with the services or without the services, charges for the services may not be excluded from the measure of tax if they are taxable enumerated services.)

*f. Materials and supplies.* The transfer of title, for a consideration, of tangible personal property, including property on which or into which information has been recorded or incorporated is a sale subject to tax.

Generally service bureaus are consumers of all tangible personal property, including cards and forms, which they use in providing services unless a separate charge is made to customers for the materials, in which case, tax applies to the charge made for the materials.

*g. Additional copies.* When additional copies of records, reports, tabulation, etc., are sold, tax applies to the charges made for the additional copies. “Additional copies” are all copies in excess of those produced on multipart carbon paper simultaneously with the production of the original and on the same printer, whether the copies are prepared by rerunning the same program, by using multiple simultaneous printers, by looping a program such that the program is run continuously, by using different programs to produce the same output product, or by other means. Where additional copies are prepared, the tax will be measured by the charge made by the service bureau to the customer. If no separate charge is made

for the additional copies, tax applies to that portion of the gross receipts which the cost of the additional computer time (if any) and the cost of materials and labor cost to produce the additional copies bear to the total job cost. Charges for copies produced by means of photocopying, multilithing, or by other means are subject to tax. Tax applies to a contract where data on magnetic tape are converted into combinations of alphanumeric printing, curve plotting or line drawings, and put on microfilm or photorecording paper.

*h. Mailing lists.* Addressing (including labels) for mailing. Where the service bureau addresses, through the use of its automatic data processing equipment or otherwise, material to be mailed, with names and addresses furnished by the customer or maintained by the service bureau for the customer, tax does not apply to the charge for addressing. Similarly, where the service bureau prepares, through the use of its automatic data processing equipment or otherwise, labels to be affixed to material to be mailed, with names and address furnished by the customer or maintained by the service bureau for the customer, tax does not apply to the charge for producing the labels, regardless of whether the service bureau itself affixes the labels to the material to be mailed. However, tax would be due on any tangible personal property, such as labels, consumed by the service bureau. (See “*f*” above.) Mailing lists in the form of Cheshire tapes, gummed labels, and heat transfers which are attached to envelopes and placed in the mail by a service bureau constitute tangible personal property and are subject to tax.

*i. Services of a machine operator.* The services of a machine operator, such as a key punch operator or the operator of any other data processing equipment, when hired to operate another person’s machinery or equipment, are subject to tax when contracted for and performed by someone other than an employee of the owner of the machinery and equipment.

*j. Maintenance contracts.* Maintenance contracts sold in connection with the sale or lease of canned software generally provide that the purchaser will be entitled to receive storage media on which prewritten program improvements have been recorded. The maintenance contract may also provide that the purchaser will be entitled to receive certain services, including error corrections and telephone or on-site consultation services.

(1) Nonoptional maintenance contract. If the maintenance contract is required as a condition of the sale or rental of canned software, it will be considered as part of the sale or rental of the canned software, and the gross sales price is subject to tax whether or not the charge for the maintenance contract is separately stated from the charge for software.

(2) Optional maintenance contracts prior to July 1, 1998. If the maintenance contract is optional to the purchaser of canned software, then only the portion of the contract fee representing improvements delivered on storage media is subject to sales tax if the fee for other services, including consultation services and error corrections, is separately stated. If the fee for other services, including consultation services and error corrections, is not separately stated from the fee for improvements delivered on storage media, the entire charge for the maintenance contract is subject to sales tax.

(3) Optional maintenance contracts on and after July 1, 1998. If an optional software maintenance or support contract provides for technical support services only, then no tax is imposed on the gross receipts from the performance of those services. If an optional software maintenance or support contract separately states the charges which represent improvements delivered on storage media from charges which represent other services, including consultation services and error correction, then only that portion of the contract fee representing improvements delivered on the storage media is subject to sales tax. If an optional software maintenance or support contract provides for the taxable transfer of tangible personal property and the provision of nontaxable services, and there is no separately stated charge for the taxable transfer of property or for the nontaxable service, then state sales tax of 5 percent shall be imposed on 50 percent of the gross receipts from the sale of such contracts. See 701—paragraph 18.25(3)“*c*” for more information.

**18.34(3) Nontaxable items and activities.**

*a. Custom programs.* These are programs prepared to the special order of a customer. Tax does not apply to the transfer of custom programs in the form of written procedures, such as program instructions listed on coding sheets. Tax applies to the sale of material transferred to the customer in the form of typed or printed sheets if separately invoiced.

*b. Processing a client's data.* Generally speaking, if a person enters into a contract to process a client's data by the use of a computer program, or through an electrical accounting machine programmed by a wired plugboard, the processing of a client's data is nontaxable. Such contracts usually provide that the person will receive the client's source documents, record data in machine readable form, such as in punch cards or on magnetic tape, make necessary corrections, rearrange or create new information as the result of the processing and then provide tabulated listings or record output on other media. This service will be considered nontaxable even if the total charge is broken down into specific charges for each step. The furnishing of computer programs and data by the client for processing under direction and control of the person providing the service is nontaxable even though charges may be based on computer time. The true object of these contracts is considered to be a service, even though some tangible personal property is incidentally transferred to the client. However, tax will apply to tangible personal property separately invoiced to the client.

*c. Time sharing.* Charges made for the use of automatic data processing equipment, on a time-sharing basis, where access to the equipment is by means of remote facilities, are not subject to tax. Time sharing which is, in fact, a rental of equipment and the lessee exercises the right of possession or control over the equipment is subject to tax. See 18.34(2) "b" and rule 701—26.18(422).

*d. Designing of systems, converting of systems, consulting, training, and miscellaneous services.* These services consist of the developing of ideas, concepts and designs. Common examples of these nontaxable services are:

(1) Designing and implementing computer systems (e.g., determining equipment and personnel required and how they will be utilized).

(2) Designing storage and data retrieval systems (e.g., determining what data communications and high speed input-output terminals are required).

(3) Converting manual systems to automatic data processing systems, converting present automatic data processing systems to new systems (e.g., changing a second generation system to a third generation system).

(4) Consulting services (e.g., studies of all or part of a data processing system).

(5) Feasibility studies (e.g., studies to determine what benefits would be derived if procedures were automated).

(6) Evaluation of bids (e.g., studies to determine which manufacturer's proposal for computer equipment would be most beneficial).

(7) Providing technical help such as analysts and programmers, usually on an hourly basis.

(8) Writing (coding) and testing of programs—contract programming. These services result in the production of customized programs. This type of service is not taxable because programming requires the development or ascertainment of information, and the evaluation of data, in addition to other development skills.

Persons engaged in providing nontaxable computer services are the consumers of all tangible personal property used in such activities, and the tax must be paid on their acquisition of such property.

This paragraph, 18.34(3) "d," shall become effective for periods beginning on or after April 1, 1992.

*e. Installation charges.* Where installation charges are separately contracted for or where no contract exists, are separately invoiced, or do not constitute enumerated taxable services, they are exempt from tax. See rule 701—15.14(422,423).

*f. Pickup and delivery charges.* The tax will not apply to pickup and delivery charges which are separately contracted for or where no contract exists, are separately invoiced.

*g. Rental of computer programs.* Prior to July 1, 1984, the rental of computer programs was not subject to tax since the program did not constitute equipment. *KTVO, Inc. vs. Bair*, 1977, Iowa 225 N.W.2d, 111. For the rule regarding prewritten (canned) programs subsequent to that date, see 18.3(2) "c."

This rule is intended to implement Iowa Code sections 422.42, 422.45 and 423.2 and Iowa Code Supplement section 422.43 as amended by 1998 Iowa Acts, Senate File 2288.

**701—18.35(422,423) Drainage tile.** The sale or installation of drainage tile which is to be used in disease control, weed control, or the health promotion of plants or livestock produced as part of agricultural production for market is exempt from tax. Drainage tile, when purchased for these purposes, is therefore not subject to tax. In all other cases, drainage tile will be considered a building material and subject to tax under the provisions of Iowa Code subsection 422.42(9).

This rule is intended to implement Iowa Code sections 422.42(3), 422.42(9), and 423.2.

**701—18.36(422,423) True leases and purchases of tangible personal property by lessors.**

**18.36(1) True leases and purchases by lessors prior to, on, and subsequent to July 1, 1978.** The definition of a sale specified in Iowa Code subsection 422.42(2) does not include leases. Hence, the exemption from tax on sales for resale is inapplicable to the purchase of tangible personal property for the purpose of leasing such property to others, but not for the purpose of reselling such property. *Cedar Valley Leasing, Inc. v. Iowa Department of Revenue*, 274 N.W.2d 357 (Iowa 1979). However, even though the general rule is that the acquisition cost of tangible personal property purchased for the purpose of leasing it to others is subject to the Iowa sales or use tax, certain transactions are exempted from tax by statute. See subrule 18.36(4).

**18.36(2) General.** Prior to July 1, 1984, tax is due on the lease or rental payments derived from the service of equipment rental only and not from the lease or rental of other tangible personal property. See 701—subrule 26.18(1). Tax would also be due on the gross receipts received on the disposal of the tangible personal property provided no exemption exists. When property is purchased for the purpose of financing under a conditional sales contract, the property is purchased for resale, and the acquisition of the property is not subject to Iowa tax. See rule 701—16.47(422,423).

The gross receipts from the leasing of property for subletting purposes is exempt from tax as a resale of a service, but the lessee must collect tax on the gross receipts from subletting unless such subletting is otherwise exempt from tax.

*a.* Where a resident or nonresident lessor leases equipment to a resident or nonresident lessee and the lease contract is executed in Iowa and the equipment is delivered to the lessee in Iowa, the rental payments are subject to Iowa sales tax, even if the equipment is taken by the lessee to another state. *Williams Rentals, Inc. v. Tidwell*, 516 S.W.2d 614 (Tenn. 1974).

*b.* Where a nonresident lessor leases equipment to a resident or nonresident lessee and the lessee uses the equipment in Iowa, the nonresident lessor has the responsibility of collecting Iowa use tax on the lease payments, provided the lessor maintains a place of business in Iowa as provided in Iowa Code sections 423.1(6) and 423.9. Whether the lease agreement is executed in Iowa or not is irrelevant. *State Tax Commission v. General Trading Co.*, 322 U.S. 335, 64 S.Ct. 1028, 88 L.Ed 1309, (1944).

*c.* Where a lessee is the recipient of equipment rental services as defined in “*a*” and “*b*” above and no tax has been collected from such lessee by the lessor, the lessee should remit Iowa use tax to the department of revenue. In the event no tax is remitted, the department, in its discretion, may seek to collect the tax from the lessor or lessee. In the event that the lessee is the recipient of equipment rental services, and the lessor does not maintain a place of business in Iowa and does not collect use tax pursuant to Iowa Code section 423.10, such lessee shall remit tax on its rental payments to the department.

*d.* Where a resident lessor leases equipment to a nonresident lessee outside of Iowa, and the equipment is delivered to the lessee outside Iowa, the act of leasing is exempt from the Iowa sales tax on the rental payments. However, in the event the lessee brings the equipment into Iowa and uses it in Iowa, Iowa use tax applies to rental payments, but see “*g*” below.

*e.* Where a resident or nonresident lessor purchases tangible personal property in Iowa for subsequent lease in or out of Iowa and takes delivery of the equipment in Iowa, the lessor’s purchase is subject to Iowa sales tax. *Dodgen Industries, Inc. v. Iowa State Tax Commission*, 160 N.W.2d 289 (Iowa 1968).

*f.* When a resident or nonresident lessor purchases tangible personal property outside of Iowa for the purpose of leasing it in Iowa and the equipment is brought into Iowa and used by the resident or nonresident lessee in this state, the lessor is considered as having a “use” of the property in Iowa and Iowa use tax will apply to the lessor’s purchase price of the property, regardless whether or not the lessor

makes any physical use of the property in Iowa. *Union Oil Company of California v. State Board of Equalization*, 1963, 34 Cal. Rpts. 872, 386 P.2d 496.

g. If a sales or use tax has already been paid to another state on the purchase price of equipment prior to the use of that equipment in Iowa, a tax credit against the Iowa use tax on the purchase price will be given. After the equipment is brought into Iowa, if a sales or use tax is properly payable and is paid to another state on the rental payments of equipment, for the same time the Iowa tax is imposed on such rentals, a tax credit against the Iowa use tax on such rental payments will be given. *Henneford v. Silas Mason Co.*, 1937, U.S.577, 57 S.Ct. 524, 51 L.Ed. 814.

**18.36(3)** *Leases relating to vehicles subject to registration.*

a. Vehicles as defined in Iowa Code subsections 321.1(4), (6), (8), (9), and (10) (motor trucks, truck tractors, road tractors, trailers, and semitrailers), except when designed primarily for carrying persons, can be purchased free of use tax when purchased for lease and actually leased for use outside Iowa if the subsequent sole use in Iowa is in interstate commerce or interstate transportation.

b. Tangible personal property which by means of fabrication, compounding, or manufacturing becomes an integral part of vehicles as defined in 18.36(3)“a” when manufactured for lease and actually leased to a lessee for use outside the state of Iowa, can be purchased free of use tax provided the sole subsequent use of the vehicle in Iowa is in interstate commerce or interstate transportation. (Iowa purchases which would be subject to Iowa sales tax do not qualify for this exemption.) See rule 701—33.7(423).

The provisions of “a” and “b” are effective for periods beginning on January 1, 1973. Also see 701—Chapter 34 of the rules relating to vehicles subject to registration.

**18.36(4)** *Special rules for lessors on or after July 1, 1978.* If tangible personal property is purchased for leasing, the purchase of the property is exempt from tax if the following conditions are met:

- a. The person (lessor) purchasing the property is regularly engaged in the business of leasing,
- b. The period of the lease is for more than one year for sales or property occurring from July 1, 1978, to May 18, 1997, inclusive; for sales of property occurring on and after May 19, 1997, the period of the lease must be for more than five months, and
- c. The lease or rental receipts must be subject to tax under the service of equipment rental.

All three conditions must be met before the exemption applies.

If the exemption is properly claimed, it is lost when the property is made use of for any purpose other than leasing and the person claiming the exemption is liable for the tax based on the original purchase price. Tax paid on the leasing or rental payments would be allowed as a credit against the tax due on the purchase price.

In the following examples, assume, unless stated to the contrary, that the lease or rental receipts are subject to tax. The examples are written on the assumption that the period for an exempt lease is five months or longer. Thus, these examples are basically applicable to the period beginning May 19, 1997; however, the examples illustrate principles which are applicable to the purchase for lease exemption for periods longer than one year which was the requirements for exemption prior to May 19, 1997.

EXAMPLE: A restaurant makes a one-time purchase of office furniture which it leases to an insurance company for a period of four years. The purchase of office furniture by the restaurant would be subject to tax because the restaurant is not regularly engaged in the business of leasing. However, if the restaurant established a pattern of regularly purchasing office furniture or other tangible personal property for lease, the exemption would apply.

EXAMPLE: A company purchases a computer which will be leased for a period of three years, at which time the computer is returned to the company. The sole business of the company is to purchase this one computer for lease. The purchase of the computer is exempt from tax because the company is regularly engaged in the business of leasing.

EXAMPLE: A leasing company purchases three lawn mowers which will be leased to individuals for periods of time less than five months. The purchase of the lawn mowers by the leasing company would be subject to tax because the periods of the leases are for less than five months.

EXAMPLE: A leasing company purchases a computer which will be leased for a period of three years. The purchase of the computer is exempt from tax because the period of the lease is for more than five months.

EXAMPLE: A leasing company buys a computer. The company claims the exemption from tax, but the company uses the computer in its own operations. Tax is due on the original purchase price and the leasing company is liable for the tax due.

EXAMPLE: A leasing company purchases a copying machine which will be leased for a period of two years. After four months, the machine is returned to the leasing company and then the machine is immediately re-leased without being used by the leasing company for any other purpose. The exemption would apply because it was properly claimed and nothing occurred to cause loss of the exemption.

EXAMPLE: A leasing company purchases a copying machine which will be leased for a period of two years. After four months, the machine is returned and the leasing company then uses the machine in its own business. The exemption would no longer apply and the leasing company would be liable for the tax based on the original purchase price. Credit would be allowed against the tax due on the purchase price for any tax paid on the lease or rental payments. Assume the leasing company paid \$2,000 for the copying machine and charged \$200 per month plus \$10 in tax per month. Since the machine is returned and the exemption is not applicable, the leasing company would owe \$100 on the \$2,000 acquisition cost. However, the leasing company collected \$40 (four months x \$10) tax on the monthly rental charges. Allowing the credit for tax collected of \$40 against the total tax liability of \$100 leaves a net tax liability of \$60 owed by the leasing company.

EXAMPLE: A manufacturer and seller of office furniture also leases office furniture. The leases always run for a period longer than five months and the company usually has only two leases per year. The leasing operation only accounts for 1 percent of the company's total business. The company still qualifies for the exemption because it is regularly engaged in the business of leasing and the period of the lease is for more than five months.

EXAMPLE: A leasing company purchases an airplane from an aircraft dealer and leases it for a period of three years. The lease or rental payments are not taxed because of the exemption for transportation services. The leasing company would owe tax based on the acquisition cost because the lease or rental payments are not subject to tax under the service of equipment rental.

EXAMPLE: A leasing company purchases equipment and leases it to a lessee for a period of 18 months. For the first 3 months, the equipment is used by the lessee in making repairs to existing structures and the lease receipts are taxable. For the remainder of the lease period, the equipment is used in new construction of buildings and structures and the lease receipts are exempt from tax. The acquisition cost of the equipment is exempt because the exemption was properly claimed and was not subsequently lost by a use other than leasing.

EXAMPLE: A leasing company purchases from an Iowa retailer equipment on May 18, 1997, for the purpose of leasing it for a period of six months. The lease receipts will be taxable. The sales tax exemption on the acquisition cost to the lessor cannot be claimed because the sale occurred before May 19, 1997, and, at the time of the sale, no sales tax exemption applied to such acquisition cost. The exemption for acquisition cost should not be given a retroactive effect. *Jones v. Gordy*, 1935, 169 Md. 173, 180 Atl. 272.

EXAMPLE: A leasing company purchases equipment outside of Iowa on May 1, 1997. The lessee brings the equipment into Iowa on June 1, 1997, and uses it in Iowa. The lease period is nine months, and the lessee's use in Iowa is subject to Iowa use tax on the lease payments. Under these circumstances, the Iowa use tax exemption on the lessor's acquisition cost applies because it is the law in effect at the time of use in Iowa, not at the time of sale, which determines whether a use tax exemption applies. *City of Ames v. Iowa State Tax Commission*, 1955, 246 Iowa 1016, 71 N.W.2d 15; *Allis-Chalmers Mfg. Co. v. Iowa State Tax Commission*, 1958, 250 Iowa 193, 92 N.W.2d 129.

EXAMPLE: A leasing company purchases equipment not for resale and leases it to the lessee for a period of more than five months. After three months, the equipment is returned to the leasing company which then sells the equipment. Such sale is not part of the regular course of the leasing company's business. The exemption, though properly claimed, is lost because, by reason of such sale, the leasing

company made use of the property for a purpose other than leasing or renting. Had the equipment been returned to the leasing company on or after five months and one day from the commencement of the lease period, and the leasing company then sold the equipment outside the regular course of its business or used the equipment in its business, the exemption for acquisition cost would not be lost. Had the equipment been purchased for resale and leased prior to such resale, the acquisition cost to the leasing company would be exempt from tax. *Herman M. Brown Co. v. Johnson*, 1957, 248 Iowa 1143, 82 N.W.2d 134. If the equipment is traded in toward the purchase price of other equipment by the leasing company, or if the leasing company disposes of the equipment after it is fully depreciated, the exemption for acquisition cost is not lost. Where sale of equipment outside the regular course of business is made by the leasing company, see also rule 18.28(422) to determine whether the casual sale exemption applies to the receipts from such sale.

EXAMPLE: A leasing company purchases equipment which is leased to the lessee. Assume that the exemption for acquisition cost of the equipment was properly claimed. Thereafter, the lessee makes an assignment of the lease. The exemption is not lost since the assignee stands in the same position as the original lessee and such an assignment does not change the nature of the original lease period. *Berg v. Ridgway*, 1966, 258 Iowa 640, 140 N.W.2d 95.

EXAMPLE: A leasing company purchases equipment which is leased to the lessee in accordance with the criteria creating the acquisition cost exemption. The leasing company sells the lease contracts, as commercial paper, to others. The exemption for acquisition cost can still be claimed and such sales of lease contracts do not cause loss of the exemption.

EXAMPLE: A leasing company purchases equipment which is leased to the lessee in accordance with the criteria creating the acquisition cost exemption. Thereafter, the lease can no longer be performed because the property is destroyed by an act of God. The acquisition cost exemption is not lost.

EXAMPLE: A leasing company purchases equipment which is leased to the lessee in accordance with the criteria creating the acquisition cost exemption. Thereafter, the lessee is adjudged bankrupt and the equipment is returned to the leasing company and is re-leased without being used by the leasing company for any other purpose. The acquisition cost exemption is not lost since the leasing company makes no use for any purpose other than leasing or renting.

EXAMPLE: A leasing company purchases equipment which is leased to a lessee. The criteria for the acquisition cost exemption are present. The lessee then sublets the equipment to another for a period less than five months. The acquisition cost exemption is not lost.

**18.36(5)** *Lease or rental of all tangible personal property now subject to tax.* On and after July 1, 1984, the lease or rental of all tangible personal property is subject to tax. See rule 701—26.18(422) for information concerning additional transactions subject to tax after that effective date.

This rule is intended to implement Iowa Code sections 422.42(2), 422.43, 422.45, 423.1, and 423.4.

### **701—18.37(422,423) Motor fuel, special fuel, aviation fuels and gasoline.**

**18.37(1)** *In general.* The gross receipts from the sale of motor fuel and special fuel are exempt from sales tax under Iowa Code section 422.45(11) if (1) the fuel is consumed for highway use, in watercraft, or in aircraft, (2) the Iowa fuel tax has been imposed and paid, and (3) no refund or credit of fuel tax has been made or will be allowed. However, beginning July 1, 1985, the gross receipts from the sale of special fuel for diesel engines used in commercial watercraft on rivers bordering Iowa are exempt from sales tax, even though no fuel tax has been imposed and paid, providing the seller delivers the fuel to the owner's watercraft while it is afloat. Prior to July 1, 1988, retail sales of aviation gasoline were not exempt from sales tax under Iowa Code subsection 422.45(11). See subrule 18.37(4).

**18.37(2)** *Refunds or credits of motor fuel and special fuel.* Claims for refund or credit of fuel taxes under the provisions of Iowa Code chapter 452A must be reduced by any sales or use tax owing the state unless a sales tax exemption is applicable. Generally, refund claims or credits are allowed where fuel is purchased tax paid and used for purposes other than to propel a motor vehicle or used in watercraft.

**18.37(3)** *Refunds of tax on fuel purchased in Iowa and consumed out of Iowa.* Even though fuel is purchased in Iowa, fuel tax paid in Iowa, and the fuel tax is subject to refund under the provisions of division III of Iowa Code chapter 452A relating to interstate motor vehicle operations, the refund of

the fuel tax does not subject the purchase of the fuel to sales tax. Subjecting the purchase to sales tax has the effect of imposing sales tax when fuel is consumed in interstate commerce while fuel consumed on Iowa highways in intrastate commerce is exempt from sales tax pursuant to Iowa Code subsection 422.45(11). The effect for sales tax purposes is to impose a greater tax burden on non-Iowa highway fuel consumption than Iowa highway fuel consumption thereby discriminating against interstate commerce. In addition, the effect of imposing sales tax on interstate excess purchases where intrastate highway use is not subject to the tax constitutes an export duty for purchasing fuel in Iowa and exporting it for use in another state. Such effects are in violation of the commerce clause of the United States Constitution. *Boston Stock Exchange v. State Tax Commission*, 1977, 429 U.S. 319, 97 S.Ct. 599, 50 L.Ed.2d 514 and *Coe v. Errol*, 1886, 116 U.S. 517, 6 S.Ct. 475, 29 L.Ed. 715.

**18.37(4) Aviation gasoline.** Tax treatment prior to July 1, 1988. Prior to July 1, 1988, all Iowa fuel tax paid on aviation gasoline used in aircraft was refundable under Iowa Code section 452A.17. Generally, aviation gasoline is not purchased for highway use or for use in watercraft, therefore, the exemption from sales and use tax found in Iowa Code subsection 422.45(11) was generally not applicable to purchases of aviation gasoline. However, Iowa Code subsection 422.52(4) provides for the collection of sales tax by way of deduction from motor fuel tax refunds allowable under Iowa Code chapter 452A. Therefore, sales tax is not assessed at the retail level but only in instances where the fuel tax paid on aviation gasoline has been refunded. If no application for a fuel tax refund relating to aviation fuel has been made, no sales tax is assessed on the aviation gasoline purchase.

**18.37(5) Ethanol.** For tax periods after April 30, 1981. Retail sales of ethanol are exempt from Iowa sales or use tax.

**18.37(6) Tax base.** The basis for computing the Iowa sales tax will be the retail selling price of the fuel less any Iowa fuel tax included in such price. Federal excise tax should not be removed from the selling price in determining the proper sales tax due. *W.M. Gurley v. Army Rhoden* supra. Also see rule 701—15.12(422,423).

This rule is intended to implement Iowa Code sections 422.31, 422.43, 422.45(11), 422.45(22), 422.52(4), 423.1, 452A.3, and 452A.17.

**701—18.38(422,423) Urban transit systems.** A privately owned urban transit system which is not an instrumentality of federal, state or county government is subject to sales tax on fuel purchases which are within the urban transit systems charter.

Tax shall not apply to fuel purchases, made by a privately owned urban transit company, for use outside the urban transit system charter in which a fuel tax has been imposed and paid and no refund has been or will be allowed.

Whether an urban transit company will be considered an instrumentality of federal, state or county government for the purpose of receiving sales tax exemption on its fuel purchases, which are also exempted from fuel tax and used for public purposes, depends upon consideration of the following:

1. Whether it is created by government.
2. Whether it is wholly owned by government.
3. Whether it is operated for profit.
4. Whether it is primarily engaged in the performance of some essential governmental function.
5. Whether the payment of tax will impose an economic burden upon the corporation, or that payment of tax serves to materially impair the usefulness or efficiency of the corporation or the payment of tax materially restricts the corporation in the performance of its duties.

These above enumerated considerations are not all inclusive and the presence of some and absence of others does not necessarily establish the exemption. *Unemployment compensation of North Carolina v. Wachovia Bank and Trust Company*, 2 S.E.2d 592, 595, 215 No. Car. 491 (1939); 1976 O.A.G. 823, 827, 828.

This rule is intended to implement Iowa Code subsection 422.45(1).

**701—18.39(422,423) Sales or services rendered, furnished, or performed by a county or city.** The gross receipts from the sales, furnishing, or service of gas, electricity, water, heat, and communication

service rendered, furnished, or performed by a county or city are subject to the tax. On and after July 1, 1985, the gross receipts from fees paid to cities and counties for the privilege of participating in any athletic sports are also subject to tax. On or after July 1, 1991, the gross receipts from any municipally owned pay television service are taxable as well. On and after April 1, 1992, the gross receipts from a county or municipality furnishing sewage service or solid waste collection and disposal service to nonresidential commercial operations are taxable (see rules 701—26.71(422,423) and 26.72(422,423) for more information).

Any other sales or services rendered, furnished, or performed by a county or city are not subject to the tax.

A “sport” is any activity or experience which involves some movement of the human body and gives enjoyment or recreation. An “athletic” sport is any sport which requires physical strength, skill, speed, or training in its performance. The following activities are nonexclusive examples of athletic sports: baseball, football, basketball, softball, volleyball, golf, tennis, racquetball, swimming, wrestling, and foot racing.

The following is a list of various fees which would be considered fees paid to a city or county for the privilege of participating in any athletic sport, and thus subject to tax under this rule. The list is not exhaustive.

1. Fees paid for the privilege of using any facility specifically designed for use by those playing an athletic sport: fees for use of a golf course, ball diamond, tennis court, swimming pool, or ice skating rink are subject to tax. These fees are subject to tax whether they allow use of the facility for a brief or extended period of time, e.g., a daily fee or season ticket for use of a swimming pool or golf course would be subject to tax. Group rental of facilities designed for playing an athletic sport would also be subject to tax.

2. Fees paid to enter any tournament or league which involves playing an athletic sport would be subject to tax. Both team and individual entry fees are taxable. Fees paid to enter any marathon or foot race of shorter duration would be subject to tax under this rule.

Not subject to tax as fees paid to a city or county for the privilege of participating in any athletic sport under this rule are the following charges. The list is not intended to be exhaustive.

1. Fees paid for lesson or instruction in how to play or to improve one’s ability to play an athletic sport are not subject to tax. Golf and swimming lesson fees are specific examples of such nontaxable charges. The fees are excluded from tax regardless of whether the person receiving the instruction is a child or an adult. Fees charged for equipment rental, regardless of whether this equipment is helpful or necessary to participation in an athletic sport, are not subject to tax. The rental of a golf cart or moveable duck blind would not be subject to tax. The rental of a recreational boat is a transportation service, the gross receipts of which are not subject to tax if provided by a city or county.

2. Sales of merchandise, e.g., food or drink, to persons watching or participating in any athletic sport are not subject to tax.

3. Fees charged to improve any facility where any athletic sport is played are not subject to tax, unless such a fee must be paid to participate in an athletic sport which can be played within the facility.

4. Fees paid by any person or organization to rent any county or city facility or any portion of any county or city park shall not be subject to tax unless the portion of the park or facility is specifically designed for the playing of an athletic sport.

EXAMPLE: A local bridge club pays a fee to use a shelter house and the surrounding grounds at a county park for a picnic. During the course of the picnic, the club members set up a net and use the surrounding grounds to play volleyball. They also improvise a softball field and play a softball game there. The fee which the bridge club has paid to rent the shelter house and surrounding grounds would not be subject to tax.

5. Fees paid for the use of a campground or hiking trail are not subject to tax.

This rule is intended to implement Iowa Code sections 422.43 and 422.45.

**701—18.40(422,423) Renting of rooms.** The gross receipts from the renting of any and all rooms, including but not limited to sleeping rooms, banquet rooms or conference rooms in any hotel, motel,

inn, public lodging house, rooming or tourist court, or in any place where sleeping accommodations are furnished to transient guests, whether with or without meals, are subject to the tax. The rental of a mobile home or of manufactured housing which is tangible personal property is treated as room rental rather than tangible personal property rental. The renting of all rooms would be exempt from the tax if rented by the same person for a period of more than 31 consecutive days. The renter must contract to rent for a single period of 31 days or more. The renter may not accumulate these 31 days by contracting for two or more rental transactions. The incremental manner in which the hotel, motel, inn, public lodging house, rooming or tourist court, or any place where sleeping accommodations are furnished to transient guests bills its customers does not influence the accumulation of days that is required to claim the exemption.

This rule is intended to implement Iowa Code section 422.43.

#### **701—18.41(422,423) Envelopes for advertising.**

**18.41(1)** Some envelopes which contain advertising are exempt from tax. Envelopes which are not primarily used for advertising are taxable. The primary use of the envelopes should control whether they will be taxable or exempt. *Iowa Movers and Warehouseman's Assn. v. Briggs*, 237 N.W.2d 759 (Iowa 1976).

EXAMPLE 1: XYZ mails coupons and advertisements to persons giving discounts on a certain item which is sold at retail. The envelope used to package these materials is exempt from tax since it is primarily used to contain advertising materials.

EXAMPLE 2: XYZ mails a monthly billing statement to its charge account customers. In addition to the billing statement, XYZ Company encloses an advertisement in the envelope. The envelope has a dual purpose: (1) the collection of accounts receivable and (2) the distribution of advertising. However, the envelope is not primarily used for advertising but for billing the customer, therefore, the exemption does not apply.

**18.41(2)** Because of the difficulty of administering this exemption, purchasers of envelopes may petition to the department for permission to use a formula to represent to the seller the portion of taxable and exempt gross receipts from envelope purchases.

This rule is intended to implement Iowa Code subsection 422.45(9).

#### **701—18.42(422,423) Newspapers, free newspapers and shoppers' guides.**

**18.42(1) General observations.** The gross receipts from the sales of newspapers, free newspapers, and shoppers' guides are exempt from tax. The gross receipts from the sales of magazines, newsletters, and other periodicals which are not newspapers are taxable. Recent cases decided by the United States Supreme Court and the Supreme Court of Iowa prohibit exempting from taxation the sale of any periodical if that exemption from taxation is based solely upon the contents of that periodical. See *Arkansas Writers' Project, Inc. v. Ragland*, 481 U.S. 221, 107 S.Ct. 1722, 95 L.Ed.2d 209 (1987) and *Hearst v. Iowa Department of Revenue & Finance*, 461 N.W.2d 295 (Iowa 1990).

**18.42(2) General characteristics of a newspaper.** "Newspaper" is a term with a common definition. A "newspaper" is a periodical, published at short, stated, and regular intervals, usually daily or weekly. It is printed on newsprint with news ink. The format of a newspaper is that of sheets folded loosely together without stapling. A newspaper is admitted to the U.S. mails as second-class material. Other frequent characteristics of newspapers are the following:

*a.* Newspapers usually contain photographs. The photographs are more often in black and white rather than color.

*b.* Information printed on newspapers is usually contained in columns on the newspaper pages.

*c.* The larger the cross section of the population which reads a periodical in the area where the periodical circulates, the more likely it is that the department will consider that periodical to be a "newspaper."

**18.42(3) Characteristics of newspaper publishing companies.** Companies in the business of publishing newspapers are differently structured from other companies. Often, companies publishing larger newspapers will subscribe to various syndicates or "wire services." A larger newspaper will employ a general editor and a number of subordinate editors as well, for example, sports and lifestyle

editors; business, local, agricultural, national, and world news editors; and editorial page editors. A larger newspaper will also employ a variety of reporters and staff writers. Smaller newspapers may or may not have these characteristics or may consolidate these functions.

**18.42(4) Characteristics which distinguish a newsletter from a newspaper.** A “newsletter” is generally distributed to members or employees of a single organization and not usually to a large cross section of the general public. It is often published at irregular intervals by a volunteer, rather than the paid individual who usually publishes a newspaper. A newsletter is often printed on sheets which are held together at one point only by a staple, rather than folded together.

This rule is intended to implement Iowa Code section 422.45(9).

**701—18.43(422,423) Written contract.** On and after July 1, 1985, the gross receipts from certain additional services are subject to tax. However, these newly taxable services are exempt from tax if performed pursuant to a written services contract in effect on April 1, 1985. The exemption from taxation for these services expires June 30, 1986. The services to which this “written contract” exemption is applicable are the following: cable television; campgrounds; gun repair; janitorial and building maintenance or cleaning; lawn care, landscaping and tree trimming and removal; lobbying service; pet grooming; reflexology; security and detective services; tanning beds or salons; water conditioning and softening; the rental of recreational vehicles, recreational boats or motor vehicles subject to registration which are registered for a gross weight of 13 tons or less; and fees paid to cities and counties for the privilege of participating in any athletic sports.

A “written contract” is one which is entirely in writing, so that all of its essential terms and provisions exist in writing, and oral statements are not necessary to set out any essential term or provision, such as who the parties to the contract are or what their rights and duties are under the contract. However, if it is necessary to resort to oral statements to explain the meaning of a written provision in a contract, a “written contract” can still exist. A written contract need not consist of one document or instrument only. It can consist of two or more writings, if all the necessary provisions of the contract are contained in those writings. For the purposes of this rule, the following must be stated in writing if a written contract is to exist: The nature and specification of the service to be provided, the name of the party providing the service, the name of the party receiving the service, the “consideration” (amount and method of payment) for providing the service, the signature of one or both of the parties to the contract, depending upon circumstances, and the date upon which the contract became effective.

The written contract must be in effect on April 1, 1985, if the service to which the contract pertains is to be exempt from tax. If a contract is signed by only one of the parties to it, that contract is still a “written contract” if the party which has not signed the contract acquiesces in the promises which the party who has signed the document makes within it. *McDermott v. Mahoney*, 139 Iowa 292, 115 N.W. 32, (Iowa 1908).

EXAMPLE: A security agency sends a proposed agreement to a potential customer promising to provide the services of a uniformed security guard for the customer’s business premises beginning March 15, 1985, and continuing until March 15, 1987. The agreement is signed by the security agency’s president and dated February 15, 1985. The agreement is received by the potential customer’s president, who does not sign it, but, on March 15, 1985, allows the security agency’s uniformed guard on the premises, and makes payment for those services as stipulated in the agreement. This agreement is a “written contract”; the services of the uniformed guard are not subject to tax for the period beginning July 1, 1985, and ending June 30, 1986. The services performed between July 1, 1986, and March 15, 1987, would be subject to tax.

This rule is intended to implement Iowa Code subsection 422.43(11).

**701—18.44(422,423) Sale or rental of farm machinery and equipment.** On and after July 1, 1987, the gross receipts from the sale or rental of farm machinery and equipment will be exempt from tax. Effective July 1, 1996, the gross receipts from the sale of property which is a container, label, carton, pallet, packing case, wrapping, baling wire, twine, bag, bottle, shipping case or other similar article or receptacle sold for use in agricultural, livestock or dairy production are not subject to sales tax.

**18.44(1) Characteristics of and limitations upon farm machinery and equipment.** To be eligible for exemption from or refund of tax under this rule the machinery or equipment must:

- a. Be directly and primarily used in production of agricultural products; and
- b. Be one of the following:
  - (1) A self-propelled implement; or
  - (2) An implement customarily drawn or attached to a self-propelled implement; or
  - (3) A grain dryer; or
  - (4) An auxiliary attachment which improves the performance, safety, operation, or efficiency of a qualifying implement or grain dryer if sale or first use in Iowa is on or after July 1, 1995; or
  - (5) A replacement part for any item described in subparagraph (1), (2), (3), or (4).
  - (6) Effective July 1, 1996, the gross receipts from the sale of property which is a container, label, carton, pallet, packing case, wrapping, baling wire, twine, bag, bottle, shipping case, or other similar article or receptacle sold for use in agricultural, livestock or dairy production.
- c. No vehicle subject to registration, as defined in Iowa Code subsection 423.1(7), implement customarily drawn or attached to a vehicle, auxiliary attachment, or any replacement part for a vehicle, implement, or auxiliary attachment is eligible for the exemption or refund allowed under this rule.

**18.44(2) Definitions and characterizations.** For the purposes of this rule, the following definitions apply.

a. Production of agricultural products means the same as the term “agricultural production” which is defined in 701—subrule 17.9(3), paragraph “a,” to mean a farming operation undertaken for profit by raising crops or livestock. Production of agricultural products begins with the cultivation of land previously cleared for planting of crops or with the purchase or breeding of livestock or domesticated fowl. Not included within the meaning of the phrase are the clearing or preparation of previously uncultivated land, the creation of farm ponds or the erection of machine sheds, confinement facilities, storage bins or other farm buildings. See *Trullinger v. Fremont County*, 223 Iowa 677, 273 N.W. 124 (1937). Machinery and equipment used for these purposes would be used for activities which are preparatory to but not a part of the production of agricultural products. The production of agricultural products ceases when an agricultural product has been transported to the point where it will be sold by the farmer or processed.

EXAMPLE. Farmer Brown uses a tractor and wagon to haul harvested corn from a field to a grain dryer located on the farm. After the corn is dried, the same tractor and wagon are used to move the grain to a storage bin, also located on the farm. Later the same tractor and wagon are used to deliver the corn from the farm to the local elevator where it is sold. After Farmer Brown deposits the corn there, the local elevator uses its own tractor and wagon to move the corn to a place of relatively permanent storage. Farmer Brown has used the tractor and wagon in the production of agricultural products and the refund or exemption would apply. The elevator has not used its tractor and wagon in such production; refund or exemption would not be lawful.

b. Farm machinery and equipment means machinery and equipment specifically designed for use in the production of agricultural products or equipment and machinery not specifically designed for this use but which are directly and primarily used in the production of agricultural products.

EXAMPLE. Farmer Jones raises livestock and the farming operation requires that fences be built to confine the livestock. Farmer Jones purchases a posthole digger that is customarily attached to a tractor and uses the digger to construct the fences used to confine the livestock. The posthole digger is not specifically designed for use in the production of agricultural products but would be directly and primarily used in the production of agricultural products. Therefore, the exemption or refund applies.

c. Self-propelled implement has the same meaning as in 701—subrule 17.9(5), paragraph “c,” where the term is defined to mean an implement which is capable of movement from one place to another under its own power. The term self-propelled implement includes but is not limited to the following items: skidloaders and tractors; and the following machinery if capable of movement under its own power: combines, corn pickers, fertilizer spreaders, hay conditioners/windrowers, sprayers, and bean buggies.

*d.* Implements customarily drawn or attached to self-propelled implements. The following is a nonexclusive, representative list of implements which are customarily drawn or attached to self-propelled implements: Augers, balers, blowers, combines, conveyers, cultivators, disks, drags, dryers (portable), farm wagons, feeder wagons, fertilizer spreaders, front- and rear-end loaders, harrows, hay loaders, mowers and rakes, husking machines, manure spreaders, planters, plows, rotary blade mowers, rotary hoes, sprayers and tanks, and tillage equipment.

*e.* Direct use in agricultural production. In determining whether farm machinery, equipment or any grain dryer is directly used in agricultural production, the fact that particular machinery or equipment is essential to the production of agricultural products because its use is required either by law or practical necessity does not, of itself, mean that the machinery or equipment is directly used in the production of agricultural products. Machinery or equipment coming into actual physical contact with the soil or crops during the operations of planting, cultivating, harvesting, and soil preparation will be presumed to be machinery or equipment used in agricultural production.

*f.* Grain dryer. The term grain dryer includes the heater and the blower necessary to force the warmed air into a grain storage bin. It does not include equipment used in grain storage or movement such as augers and spreaders or any other equipment that is not a grain dryer. Equipment other than a grain dryer which is used in grain drying may be exempt or subject to refund if the equipment is a self-propelled implement or customarily drawn or attached to a self-propelled implement.

*g.* Replacement parts, differing meanings of the term for the period ending June 30, 1988, and for the period beginning July 1, 1988.

(1) For the period beginning July 1, 1985, and ending June 30, 1988, a replacement part is refundable or exempt only if its cost is depreciable for state and federal income tax purposes. Replacement parts which are depreciable for state and federal income tax purposes include only those replacement parts which either materially add to the value of machinery or equipment or appreciably prolong its life. Replacement parts which only keep the machinery or equipment in its ordinarily efficient operating condition are not eligible for exemption or refund. Included within the meaning of replacement parts is any part the cost of which is depreciable for state and federal income tax purposes but which may also be deducted as a current expense. So long as the cost is depreciable the sale or lease of the replacement part is eligible for refund or exemption from tax. However, the person claiming the refund or exemption must show that the replacement part which was deducted as an expense could have been depreciated under state and federal income tax law.

(2) On and after July 1, 1988, the sale or lease of a replacement part is exempt from tax if the replacement part is essential to any repair or reconstruction necessary to farm machinery or equipment's exempt use in the production of agricultural products. The term "replacement part" does not include attachments and accessories which are not essential to the operation of the farm machinery or equipment. Nonexclusive examples of attachments or accessories are: cigarette lighters, radios, and add-on air-conditioning units.

**18.44(3)** *Taxable and nontaxable transactions.* The following are nonexclusive examples of sales and leases of farm machinery and equipment which are or are not subject to exemption and refund.

*a.* A lessor's purchase of farm machinery and equipment is not subject to tax, or is taxable subject to refund, if the machinery or equipment is leased to a lessee who uses it directly and primarily in the production of agricultural products and if the lessee's use of the machinery or equipment is otherwise exempt or subject to refund. To claim exemption from tax or a refund of tax paid, the lessor need not make exempt use of the machinery or equipment so long as the lessee does.

*b.* To claim refund or exemption, the owner or lessee of farm machinery or equipment need not be a farmer so long as the machinery and equipment is directly and primarily used in the production of agricultural products, and the owner or lessee and the equipment or machinery meet the other requirements of this rule. For example, a person who purchases an airplane designed for use in agricultural aerial spraying and so used after purchase is entitled to the benefits of this rule even though that person is not the owner or occupant of the land where the airplane is used.

c. The sale or lease, within Iowa, of any farm machinery, equipment, or replacement part for direct and primary use in agricultural production outside of Iowa is a transaction eligible for refund or exemption if those transactions are otherwise qualified under this rule.

**18.44(4) Auxiliary attachments.** The following is a list (not inclusive) of auxiliary attachments described in 18.44(1)“b”(4), the sale or first use in Iowa which is exempt from tax on and after July 1, 1995: auxiliary hydraulic valves, cabs, coil tine harrows, corn head pickup reels, dry till shanks, dual tires, extension shanks, fenders, fertilizer attachments and openers, fold kits, grain bin extensions, herbicide and insecticide attachments, kit wraps, no-till coulters, quick couplers, rear wheel assists, rock boxes, rollover protection systems, rotary shields, stalk choppers, step extensions, trash whips, upperbeaters, silage bags, and weights.

**18.44(5) and 18.44(6)** Rescinded IAB 9/7/88, effective 10/12/88.

This rule is intended to implement Iowa Code subsections 422.43(3) and 422.45(26), Iowa Code chapter 422, Division IV, and Iowa Code section 422.45 as amended by 1996 Iowa Acts, chapter 1145.

**701—18.45(422,423) Sale or rental of computers, industrial machinery and equipment; refund of and exemption from tax paid for periods prior to July 1, 1997.** The sale or rental of computers, industrial machinery and equipment, including pollution control equipment, used in manufacturing, in research and development, or in the processing or storage of data or information by an insurance company, financial institution, or commercial enterprise is, under certain circumstances, exempt from tax and, under other circumstances, is subject to refund of sales or use tax paid. The sale or rental of machinery, equipment, or computers directly and primarily used in the recycling or reprocessing of waste products is also exempt from tax; see subrule 18.45(8). For purposes of the organization of this rule, items that may be exempt or subject to refund of tax are referred to as specified property unless the context of the rule indicates otherwise. See subrule 18.45(1) for definition of what constitutes specified property. See rule 18.58(422,423) for the manner in which the sale or rental of machinery, equipment, and computers to manufacturers and the sale or rental of computers to commercial enterprises are treated on and after July 1, 1997.

**18.45(1) Definitions.** The following words are defined for the purposes of this rule in the manner set out below.

“*Commercial enterprise*” includes businesses and manufacturers conducted for profit and includes centers for data processing services to insurance companies, financial institutions, businesses, and manufacturers, but excludes professions and occupations and nonprofit organizations. A hospital that is a not-for-profit organization would not be a “commercial enterprise.” The term “professions” means a vocation or employment requiring specialized knowledge and often long and intensive academic preparation. The term “occupations” means the principal business of an individual. Included within the meaning of “occupations” is the business of farming. A professional corporation which carries on any business which is a “profession” or “occupation” is not a commercial enterprise.

“*Computer*” means stored program processing equipment and all devices fastened to it by means of signal cables or any communication medium that serves the function of a signal cable. Nonexclusive examples of devices fastened by a signal cable or other communication medium are: terminals, printers, display units, card readers, tape readers, document sorters, optical readers, and card or tape punchers. Excluded from the definition of “computer” is point-of-sale equipment. For a characterization of “point-of-sale equipment” see 701—subrule 71.1(7).

Also included within the meaning of the word “computer” is any software consisting of an operating system or executive program. Such software coordinates, supervises, or monitors the basic operating procedures of a computer. An operating system or executive program is exempt from sales tax only if purchased as part of the sale of the computer for which it operates. An operating system or executive program priced separately or sold at a later time is subject to the provisions of rule 18.34(422,423). Excluded from the meaning of the word “computer” is any software consisting of an application program. For purposes of this subrule, “operating system or executive program” means a computer program which is fundamental and necessary to the functioning of a computer. The operating system or executive program software controls the operation of a computer by managing the allocation of

all system resources, including the central processing unit, main and secondary storage, input/output devices, and the processing of programs. This is in contrast to application software which is a collection of one or more programs used to develop and implement the specific applications which the computer is to perform, and which calls upon the services of the operating system or executive program.

*"Directly used."* Property is "directly used" only if it is used to initiate, sustain, or terminate the transformation of any activity. In determining whether any property is "directly used," consideration should be given to the following factors:

1. The physical proximity of the property in question to the activity in which it is used;
2. The proximity of the time of use of the property in question to the time of use of other property used before and after it in the activity involved; and
3. The active causal relationship between the use of the property in question and the activity involved. The fact that a particular piece of property may be essential to the conduct of the activity because its use is required either by law or practical necessity does not, of itself, mean that the property is directly used.

*"Financial institution"* is a bank incorporated under Iowa Code chapter 524 or federal law; a savings and loan association incorporated under Iowa Code chapter 534 or federal law; a credit union organized under Iowa Code chapter 533 or federal law; or any corporation licensed as an industrial loan company under Iowa Code chapter 536A. Excluded from the meaning of the term are loan brokers governed by Iowa Code chapter 535C and production credit associations.

*"Industrial machinery and equipment"* means machinery and equipment used by a manufacturer in a manufacturing establishment. Machinery is any mechanical, electrical or electronic device designed and used to perform some function and to produce a certain effect or result. The word includes not only the basic unit of the machinery but also any adjunct or attachment necessary for the basic unit to accomplish its intended function. The word also includes all devices used or required to control, regulate or operate a piece of machinery, provided such devices are directly connected with or are an integral part of the machinery and are used primarily for control, regulation or operation of machinery. Jigs, dies, tools, and other devices necessary to the operation of or used in conjunction with the operation of what would be ordinarily thought of as machinery are also considered to be "machinery." See *Deere Manufacturing Co. v. Zeiner*, 247 Iowa 1264 78 N.W.2d 527 (1956). Machinery does not include buildings designed specifically to house or support machinery. Equipment is any tangible personal property used in an operation or activity. Nonexclusive examples of equipment are: tables on which property is assembled on an assembly line and chairs used by assembly line workers.

*"Insurance company"* means an insurer organized or operating under Iowa Code chapter 508, 514, 515, 518, 519, or 520 or authorized to do business in Iowa as an insurer. An insurance company must have 50 or more persons employed in Iowa, excluding licensed insurance agents. Effective April 8, 1996, an insurance company means an insurer organized or operating under Iowa Code chapter 508, 514, 515, 518, 518A, 519, or 520 or authorized to do business in this state as an insurer or licensed insurance agent under Iowa Code chapter 522. Excluded from the definition of "insurance company" are fraternal and beneficial societies governed by Iowa Code chapter 512 and health maintenance organizations governed by Iowa Code chapter 514B. This list of exclusions is not intended to be exclusive.

*"Manufacturer"* means any person, firm, or corporation who purchases, receives, or holds personal property for the purpose of adding to its value by any process of manufacturing, refining, purifying, combining of different materials, or by packing of meats with an intent to sell at a gain or profit. Those who are in the business of printing, newspaper publication, bookbinding, lumber milling, and production of drugs and agricultural supplies are illustrative, nonexclusive examples of manufacturers. Construction contracting; quarrying; remanufacture or rebuilding of tangible personal property (such as automobile engines); provision of health care; farming; transportation for hire; mining; and the activities of restaurateurs, hospitals, and medical doctors are illustrative, nonexclusive examples of businesses which are not manufacturers. See *Associated General Contractors of Iowa v. State Tax Commission*, 255 Iowa 673, 123 N.W.2d 922 (1963) and *River Products Co. v. Board of Review of Washington County*, 332 N.W.2d 116 (Iowa Ct. App. 1982).

*“Pollution control equipment”* means any disposal system or apparatus used or placed in operation primarily for the purpose of reducing, controlling or eliminating air or water pollution. The term does not include any apparatus used to eliminate “noise pollution.” Liquid, solid, and gaseous wastes are included within the meaning of the word “pollution.”

*“Processing”* means an operation or series of operations whereby tangible personal property is subjected to some special treatment by artificial or natural means which changes its form, context, or condition, and results in marketable tangible personal property. See rule 18.29(422,423).

*“Processing or storage of data or information.”* Not only a computer, but machinery or equipment may be used in the processing or storage of data or information. All computers store and process information. However, only if the “final output” for a user or consumer is stored or processed data will the computer be subject to refund or exemption of tax.

*“Recycling”* means any process by which waste, or materials which would otherwise become waste, are collected, separated, or processed and revised or returned for use in the form of raw materials or products. The term includes, but is not limited to, the composting of yard waste which has been previously separated from other waste. “Recycling” does not include any form of energy recovery.

*“Replacement parts.”* Replacement parts which are depreciable for state and federal income tax purposes include only those replacement parts which either materially add to the value of industrial machinery, equipment, or computers or appreciably prolong their lives. Replacement parts which only keep machinery, equipment, or computers in their ordinarily efficient operating condition are not eligible for exemption. Included within the meaning of replacement parts is any part the cost of which is depreciable for state and federal income tax purposes but which may also be deducted as a current expense. So long as the cost is depreciable the sale or lease of the replacement part is eligible for exemption from tax. However, the person claiming the exemption must show that the replacement part which was deducted as an expense could have been depreciated under state and federal income tax law.

*“Research and development”* means experimental or laboratory activity which has as its ultimate goal the development of new products, processes of manufacturing, refining, purifying, combining of different materials, or meat packing. The ultimate goal of research and development must be that of adding value to products. The term “research and development” does not include testing or inspection for quality control purposes, efficiency surveys, management studies, consumer surveys, advertising, promotions, or research in connection with literary, historical, or similar projects. Machinery, equipment, and computers are used “directly” in research and development only if they are used in actual experimental or laboratory activity that qualifies as research and development under this subrule.

*“Specified property”* means property that is a computer or industrial machinery and equipment including pollution control equipment and depreciable replacement parts for that property.

**18.45(2) Requirements.** The sale or rental of specified property is exempt from tax if:

*a.* The property is real property within the scope of Iowa Code section 427A.1(1) “e” or “j.” For sales occurring after January 1, 1994, the property is not required to be subject to taxation as real property (however, see subrules 18.45(4) and 18.45(8)); and

*b.* The property is directly and primarily used in one of the following:

1. By a manufacturer in processing tangible personal property; or

2. In research and development of new products or processes of manufacturing, refining, purifying, combining of different materials or packing of meats to be used for the purposes of adding value to products; or

3. In processing or storage of data or information by an insurance company, financial institution, or commercial enterprise.

*c.* To qualify for refund or exemption, a computer may be taxable as either commercial or industrial real estate. Machinery and equipment must be taxable as industrial real estate only to be similarly qualified. Research and development machinery and equipment that is not taxable as industrial real estate does not qualify for refund or exemption. See 701—subrules 71.1(5) and 71.1(6) for characterizations of “commercial” and “industrial” real estate. However, see subrule 18.45(4) for an exception to the requirement that certain property be taxable as real property.

*d.* The following are examples of machinery which is not directly used in manufacturing:

1. Machinery used exclusively for the efficient use of other machinery. Examples are: air cooling, air conditioning, and exhaust systems.
2. Machinery used in support operations, such as a machine shop, in which production machinery is assembled, maintained or repaired.
3. Machinery used by administrative, accounting, and personnel departments.
4. Machinery used by plant security, fire prevention, first aid, and hospital stations.
5. Machinery used in plant cleaning, disposal of scrap and waste, plant communications, lighting, safety, or heating.

*e.* The following is an example of property directly used in research and development: Frontier Hybrid, Inc. maintains a research and development laboratory for use in developing a corn plant which is a perennial. It purchases the following items for use in its research and development laboratory: a computer which will process data relating to the genetic structure of the various corn plants which Frontier Hybrid is testing, an electron microscope for examining the structure of corn plant genes, a “steam cleaner” for cleaning rugs in the laboratory offices, and a typewriter for use by the laboratory director’s secretary. The computer and the microscope are “directly” used in the research in which the laboratory is engaged; the steam cleaner and the typewriter only indirectly used. Therefore, purchase of the computer and microscope would be exempt from tax; purchase of the steam cleaner and typewriter would be subject to tax.

*f.* The following is an example of property used in processing or storage of information or data: A health insurance company has three computers. Computer A is used to monitor the temperature within the insurance company’s building. The computer transmits messages to the building’s heating and cooling systems telling them when to raise or lower the level of heating or air conditioning as needed. Computer B is used to store patient records and will recall those records on demand. Computer C is used to tabulate statistics regarding the amount of premiums paid in and the amount of benefit paid out for various classes of insured. The “final output” of Computer A is neither stored nor processed information. The final output of Computer B is stored information. The final output of Computer C is processed information. The sale, lease, or use of Computers B and C would qualify for exemption or refund.

*g.* The following is an example of property not used in manufacturing: A manufacturing plant located in Warren County which manufactures widgets fabricates its own patterns used in manufacturing the widgets on a metal press machine in its machine shop located in Story County. The machine shop does not sell the patterns and the metal press machine is used for no other purpose than to fabricate the patterns. The metal press machine is not used in manufacturing because there is no intent to sell the patterns used by the machine shop at a gain or profit.

**18.45(3) Exceptions.** The following specified property is not exempt:

*a.* Property assessed by the department of revenue pursuant to Iowa Code chapters 428, 433, 434 and 436 to 438, inclusive. For electric, gas, water, and other companies assessed under Iowa Code chapter 428, only property owned by the company is assessed by the department. For railroad, telephone, pipeline, and electric transmission lines companies, property leased to as well as owned by the company is assessed by the department. See 701—Chapters 71 and 77.

*b.* Hand tools.

*c.* Point-of-sale equipment. See 701—subrule 71.1(7).

**18.45(4) Inclusions.** Property exempt from taxation for property tax purposes under the provisions of Iowa Code chapters 404 and 427B relating to urban revitalization property and industrial machinery receiving partial exemption by ordinance is also eligible for exemption from sales and use taxes even though the property is not subject to taxation as real property. Urban revitalization property and industrial machinery receiving partial exemption by ordinance are discussed in rules 701—80.8(404) and 80.6(427B), respectively. This property must meet the other requirements in subrule 18.45(2) in order to be exempt from sales and use taxes.

**18.45(5) Lessor purchases of specified property.** The analysis contained in rule 18.44(422,423) regarding lessor purchases of farm machinery and equipment is applicable to explain that same problem regarding specified property. See subrule 18.44(3) for analysis.

**18.45(6) Rights of refund and exemption.** Rescinded IAB 10/13/93, effective 11/17/93.

**18.45(7) *Designing or installing new industrial machinery or equipment.*** On and after July 1, 1985, the gross receipts from the services of designing or installing new industrial machinery or equipment shall be exempt from tax. The enumerated services of electrical or electronic installation are included in this exemption. To qualify for the exemption, the sale or rental of the machinery or equipment must be subject to refund or exemption under this rule. In addition, the machinery or equipment must be “new.” For purposes of this subrule, “new” means never having been used or consumed by anyone. The exemption is not applicable to reconstructed, rebuilt or repaired or previously owned machinery or equipment. The exemption is applicable to new machinery and equipment designed or installed for rental as well as for sale. The gross receipts from design or installation must be separately identified, charged separately, and reasonable in amount for the exemption to apply. A “computer” is not considered to be machinery or equipment, and its installation or design is not eligible for this exemption.

**18.45(8) *Property used in recycling or reprocessing of waste products.*** On and after July 1, 1989, the gross receipts from the sale or rental of machinery, equipment, or computers directly and primarily used in the recycling or reprocessing of waste products shall be exempt from tax. Machinery or equipment used in the recycling or reprocessing of waste products includes, but is not limited to, compactors, balers, crushers, grinders, cutters, or shears directly and primarily used for this purpose. The sale of an endloader, forklift, truck, or other moving device is exempt from tax if the device is directly and primarily used in the movement of property which is an integral part of recycling or reprocessing. See 18.45(8) “c.” The sale of a bin for storage ordinarily would not be exempt from tax, storage without more not being a part of recycling or reprocessing. Certain limits for exemption placed upon industrial machinery and equipment are not applicable to machinery and equipment used in recycling or reprocessing.

For example, machinery, equipment or a computer need not meet the requirements of 18.45(2) “a” concerning specified property being real property for the exemption to apply. Furthermore, the exemption will apply even if the machinery, equipment or computer is purchased by a person other than an insurance company, financial institution or commercial enterprise. For instance, a person engaged in a profession or occupation could purchase property for direct and primary use in recycling or reprocessing of waste products and the exemption would apply.

*a.* By way of nonexclusive examples, recycling or reprocessing can begin when waste or material which would otherwise become waste is collected or separated. A vehicle used directly and primarily for collecting waste which will be recycled or reprocessed could be a vehicle used for an exempt purpose under this rule. Thus, the purchaser of a garbage truck could claim this exemption if the truck were directly and primarily used in recycling and not, for instance, in hauling garbage to a landfill. Machinery or equipment used to segregate waste from material to be recycled or reprocessed or used to separate various forms of materials which will be reprocessed (e.g., glass and aluminum) can also be used at the beginning of recycling or reprocessing.

*b.* Machinery and equipment directly and primarily used in recycling or reprocessing. See subrule 18.45(1) for the definition of “directly used” which is applicable to this subrule. The examples of machinery not directly used in manufacturing set out in 18.45(2) “d” should be studied for guidance in determining whether similar machinery is or is not used in recycling or reprocessing; e.g., machinery used in plant security (see 18.45(2) “d”<sup>4</sup>) is not machinery directly used in recycling or reprocessing.

*c.* Integral use in recycling or reprocessing. Ordinarily, any operation or series of operations which does not transform waste or material which would otherwise become waste into new raw materials or products would not be a part of recycling or reprocessing. However, activities which do not do this, but are an “integral part” of recycling or reprocessing, are themselves recycling or reprocessing. For example, an endless belt which moves aluminum cans from a machine where they are shredded to a machine where the shredded aluminum is crushed into blocks would be an endless belt used in recycling or reprocessing and the exemption applies. See subrule 18.29(5) for a discussion of when an activity is an integral part of “processing.” Some of that discussion is applicable to this subrule.

*d.* The end of recycling or reprocessing. Recycling or reprocessing ends when waste or a material which would otherwise become waste is in the form of raw material in which it will be used in manufacturing or in the form of a product which will be sold for use other than as a raw material in manufacturing. For instance, a corporation purchases a machine which grinds logs, stumps, pallets, and

crates and other waste wood into wood chips. After grinding, the wood chips are sold and transported to purchasers to various sites where the chips are dumped on and spread out over the ground for use in erosion control. The machine which grinds the wood chips is a machine used in recycling. The truck which transports the wood chips from the machine to the sites is not used in reprocessing because, at the time the chips are placed in the truck, they are in the form in which they will be sold for use other than as a raw material in manufacturing.

This rule is intended to implement Iowa Code section 422.45(26), Iowa Code section 422.45(27) as amended by 1996 Iowa Acts, chapter 1049, and Iowa Code section 422.45(29).

**701—18.46(422,423) Automotive fluids.** The gross receipts from the sales of certain automotive fluids are exempt from tax. To be considered exempt, the sale must possess the following characteristics: (1) the sale must be to a retailer who will install the automotive fluid in or apply the automotive fluid to a motor vehicle; and (2) the installation or application must be done while the retailer is providing a taxable enumerated service (e.g., automobile lubrication); or (3) the automotive fluid must be installed in or applied to a motor vehicle which the retailer intends to sell and the sale of which will be subject to Iowa use tax.

Specific but nonexclusive examples of “automotive fluids” are motor oil and other automobile lubricants, hydraulic, brake, and transmission fluids, sealants, undercoatings, antifreeze, and gasoline additives.

This rule is intended to implement Iowa Code section 422.45(33).

**701—18.47(422,423) Maintenance or repair of fabric or clothing.**

**18.47(1)** As of July 1, 1987, sales of chemicals, solvents, sorbents, or reagents consumed in the maintenance or repair of fabric or clothing are exempt from tax. See 701—subrule 17.14(1) for definitions of the terms “chemical, solvent, sorbent or reagent.” This subrule’s exemption is mainly applicable to dry-cleaning and laundry establishments; however, it is also applicable to soap or any chemical or solvent used to clean carpeting. The department presumes that a substance is “directly used” in the maintenance or repair of fabric or clothing if the substance comes in contact with the fabric or clothing during the maintenance or repair process. Substances which do not come into direct contact with fabric or clothing may, under appropriate circumstances, be directly used in the maintenance or repair of the fabric or clothing but direct use will not be presumed.

The following are examples of substances directly used and consumed in the maintenance or repair of fabric or clothing: perchloroethylene “perch” or petroleum solvents used in dry-cleaning machines and coming in direct contact with the clothing being dry-cleaned. Substances used to clean or filter the “perch” or petroleum solvents would also be exempt from tax, even though these substances do not come in direct contact with the clothing being cleaned. The sale of soap or detergents especially made for mixing with “perch” or petroleum solvents is exempt. The sale of stain removers to dry cleaners is exempt from tax.

A commercial laundry’s purchase of detergents, bleaches, and fabric softeners is exempt from tax. A commercial laundry’s purchase of water, which is a solvent, is also exempt from tax if purchased for use in the cleaning of clothing.

The purchase of starch by laundries and “sizing” by dry cleaners is not exempt from tax.

**18.47(2)** Also, on and after July 1, 1987, the sale of property which is a container, label, or similar article or receptacle for transfer in association with the maintenance or repair of fabric or clothing is exempt from tax. In general, the sale of any article which protects dry-cleaned or laundered clothing from dirt or helps the dry-cleaned or laundered clothing to maintain its proper shape or form in the same fashion as a container does would be exempt from tax under this subrule. By way of nonexclusive example, the sale of plastic garment bags, which protect clothing from dirt, is exempt from tax. The sale of “shirt boards” and garment hangers, both of which help clothing to maintain its proper shape, would also be exempt.

A container, label, or similar article’s sale is exempt from tax only if the item is transferred to the customer of a commercial laundry, dry cleaner, or other retailer. Thus, “bundle bags” and “meese carts,”

used to transfer or transport clothing within a dry-cleaning establishment, are not subject to the exemption because these bags and carts remain with the dry cleaner and are not transferred to a customer.

Concerning labels, the sale of which would be exempt from tax, these labels must be affixed to the dry-cleaned or laundered clothing and transferred to the customer of the dry-cleaning or laundering establishment. By way of nonexclusive example, the sale to dry cleaners, of “special attention,” “invoice” and “sorry” tags would be exempt from tax.

The sale of safety pins and other types of clips used to hang skirts and other garments from hangers would not be exempt from tax. These items do not sufficiently resemble containers or labels to the extent that their sale is exempt from tax.

This rule is intended to implement Division IV of Iowa Code chapter 422.

**701—18.48(422,423) Sale or rental of farm machinery, equipment, replacement parts, and repairs used in livestock, dairy, or plant production.** Sales or rental of farm machinery and equipment used in livestock or dairy production and replacement parts which occur on or after July 1, 1988, are exempt from sales and use tax. On and after July 1, 1995, machinery, equipment, and replacement parts used in the production of flowering, ornamental, or vegetable plants are exempt from tax. See rule 701—18.57(422,423).

**18.48(1) Definitions and characterizations.** For the purposes of this rule, the following definitions and characterizations of words apply.

a. “Machinery” means major mechanical machines or major components thereof which contribute directly and primarily to the livestock or dairy production process. Usually, a machine is a large object with moving parts which performs work by the expenditure of energy, either mechanical (e.g., gasoline or kerosene) or electrical.

b. “Equipment” is tangible personal property (other than a machine) directly and primarily used in livestock or dairy production. It may be characterized as property which performs a specialized function which, of itself, has no moving parts or if it does possess moving parts, its source of power is external to it. The following examples attempt to differentiate between machinery and equipment:

EXAMPLE A. An electric pump is used to pump milk into a bulk milk tank. The electric pump is machinery; the bulk milk tank is equipment.

EXAMPLE B. An auger places feed into a cattle feeder. If not “real property” (see 18.48(1) “c”) the auger is a piece of machinery; the cattle feeder is a piece of equipment.

c. Property used in livestock or dairy production which is neither “equipment” nor “machinery.”

(1) Real property. The ground or the earth is not machinery or equipment. A building is not machinery or equipment, *Mid-American Growers, Inc. v. Dept. of Revenue*, 493 N.E.2d 1097 (Ill. App. Ct. 1986). Therefore, tangible personal property which is sold for incorporation into the ground or a building in such a manner that it will become a part of the ground or the building is taxable. Generally, property incorporated into the ground or a building has become a part of the ground or the building if removal of the property from the ground or building will substantially damage the property, ground, or building or substantially diminish the value of the property, ground, or building. Fence posts embedded in concrete and electrical wiring, light fixtures, fuse boxes, and switches are examples of property sold for incorporation into the ground or a building, respectively. The property referred to in 18.48(1) “c”(1) can be identified by applying the following test: Assume that the property is being sold to a contractor rather than a person engaged in livestock or dairy production. If sold to a contractor, would the retailer be required to consider the property “building material” and charge the contractor sales tax upon the purchase of this building material. If this is the case, sale of the property is not exempt from Iowa tax law. Iowa department of revenue rule 701—19.3(422,423) contains a characterization of “building material” and a list of specific examples of building material.

(2) “Supplies” are neither machinery nor equipment. Tangible personal property is part of farm supplies if it is used up or destroyed by virtue of its use in livestock or dairy production or, because of its nature, can only be used once in livestock or dairy production. A light bulb is an example of a farm supply which is not machinery or equipment. The sale of some farm supplies is exempt from tax. See

701—subrule 17.9(3). See List B in subrule 18.48(7) for examples of farm supplies which could be mistaken for equipment and are not exempt from tax on other grounds.

*d.* “Hand tools” are tools which can be held in the hand or hands and which are powered by human effort. Hand tools specifically designed for use in livestock or dairy production are exempt from tax as “equipment.” Mechanical devices that are held in the hand and driven by electricity or some source other than human muscle power are, if otherwise qualified, exempt from tax as “farm machinery.” See subrule 18.48(7), List C, for examples of “hand tools” exempt and not exempt from tax.

*e.* Directly used in livestock or dairy production. To determine if machinery or equipment is “directly” used in livestock or dairy production, one must first ensure that the machinery or equipment is used during livestock or dairy production and not before that process has begun or after it has ended. Subrule 18.48(1), paragraph “g,” describes when livestock or dairy production begins and ends. If the machinery or equipment is used in livestock or dairy production, to be “directly” so used, that use must constitute an integral and essential part of production as distinguished from a use in production which is incidental, merely convenient to or remote from production. The fact that machinery or equipment is essential or necessary to livestock or dairy production does not mean that it is also “directly” used in production. Machinery or equipment may be necessary to livestock or dairy production but so remote from it that it is not directly used in that production.

(1) In determining whether machinery or equipment is used directly, consideration should be given to the following factors:

1. The physical proximity of the machinery or equipment to other machinery or equipment whose direct use is unarguable. The closer the machinery or equipment whose direct use is questioned is to the machinery or equipment whose direct use is not questioned, the more likely it is that the former is directly used in livestock or dairy production.

2. The proximity in time of the use of machinery or equipment whose direct use is questionable to the use of machinery whose direct use is not questioned. The closer in time the use, the more likely that the questioned machinery or equipment’s use is direct rather than remote.

3. The active causal relationship between the use of the machinery or equipment in question and livestock or dairy production. The fewer intervening causes between the use of the machinery or equipment and the production of the product, the more likely it is that the machinery or equipment is directly used in production.

(2) The following are examples of machinery and equipment directly used in livestock or dairy production:

1. Machinery and equipment used to transport or limit the movement of livestock and dairy animals (e.g., electric fence equipment, head gates, and loading chutes).

2. Machinery and equipment used in the conception, birth, feeding, and watering of livestock or dairy animals (e.g., artificial insemination equipment, portable farrowing pens, feed carts, and automatic watering equipment).

3. Machinery and equipment used to maintain healthful or sanitary conditions in the immediate area where livestock are kept (e.g., manure gutter cleaners, automatic cattle oilers, fans, and heaters if not real property).

4. Machinery or equipment used to test or inspect livestock or dairy animals during production.

(3) The following are nonexclusive examples of machinery or equipment which would not be directly used in livestock or dairy production.

1. Machinery or equipment used to assemble, maintain, or repair other machinery or equipment directly used in livestock or dairy production (e.g., welders, paint sprayers, and lubricators).

2. Machinery used in farm management, administration, advertising, or selling (e.g., a recordkeeping computer, calculating machine, office safe, telephone, books, and farm magazines).

3. Machinery or equipment used in the exhibit of livestock or dairy animals (e.g., blankets, halters, prods, leads, and harnesses).

4. Machinery or equipment used in safety or fire prevention, even though the machinery or equipment is required by law.

5. Machinery or equipment for employee or personal use. Machinery or equipment used for the personal comfort, convenience, or use by a farmer, the farmer's family or employees, or persons associated with the farmer are not exempt from tax. Examples of such machinery and equipment include the following: beds, mattresses, blankets, tableware, stoves, refrigerators, and other equipment used in conjunction with the operation of a farm home or of a migrant labor camp, or other facilities for farm employees.

6. Machinery and equipment used for heating, cooling, ventilation, and illumination of farm buildings generally rather than specifically in the immediate area where livestock are kept.

7. Vehicles subject to registration.

f. "Primarily" used in livestock or dairy production. Machinery or equipment is "primarily used in livestock or dairy production" if of the total time that unit of machinery or equipment is used, more than 50 percent of the time is in livestock or dairy production. If a unit of machinery or equipment is used more than 50 percent of the time for production and the balance of time for other business purposes, the exemption applies. If a unit of equipment is used 50 percent or more of the time for business purposes other than livestock or dairy production, the exemption does not apply. Any unit of machinery or equipment used more than 50 percent of the time directly in livestock or dairy production is subject to the exemption.

g. Beginning and end of livestock or dairy production. Livestock or dairy production begins with the purchase or breeding of livestock or dairy animals. Livestock and dairy production ceases when an animal or the product of an animal's body (e.g., wool or milk) has been transported to the point where it will be sold by the farmer or processed.

h. Farm machinery and equipment means machinery and equipment specifically designed for use in livestock and dairy production or equipment and machinery not specifically designed for this use but which are directly and primarily used in livestock or dairy production except for common or ordinary hand tools. See 18.48(1) "d" for a definition of "hand tools."

EXAMPLE. Farmer Jones raises livestock and fans must be used to cool the animals. Farmer Jones buys fans designed for use in a residence which he uses directly and solely to cool the livestock. The exemption applies.

i. "Self-propelled implement" has the same meaning as in 701—subrule 17.9(5), paragraph "c" where the term is defined to mean an implement which is capable of movement from one place to another under its own power. The term self-propelled implement includes but is not limited to the following items: skidloaders and tractors; and the following machinery if capable of movement under its own power: combines, corn pickers, fertilizer spreaders, hay conditioners/windrowers, sprayers, and bean buggies.

j. Implements customarily drawn or attached to self-propelled implements. The following is a nonexclusive, representative list of implements which are customarily drawn or attached to self-propelled implements: augers, balers, blowers, combines, conveyers, cultivators, disks, drags, dryers (portable), farm wagons, feeder wagons, fertilizer spreaders, front- and rear-end loaders, harrows, hay loaders, mowers and rakes, husking machines, manure spreaders, planters, plows, posthole diggers, rotary blade mowers, rotary hoes, sprayers and tanks, and tillage equipment.

k. The term "grain dryer" includes the heater and the blower necessary to force the warmed air into a grain storage bin. It does not include equipment used in grain storage or movement such as augers and spreaders or any other equipment that is not a grain dryer. Equipment other than a grain dryer which is used in grain drying may be exempt or subject to refund if the equipment is a self-propelled implement or customarily drawn or attached to a self-propelled implement.

l. The term "replacement parts essential to any repair or reconstruction necessary to farm machinery or equipment's exempt use in the production of agricultural products" does not include attachments and accessories not essential to the operation of the machinery or equipment itself (except when sold as part of the assembled unit) such as cigarette lighters, radios, canopies, air conditioning units, cabs, deluxe seats, and tools or utility boxes.

**18.48(2)** *Right of refund for farm machinery and equipment used in livestock or dairy production, basic requirements.* Rescinded IAB 10/13/93, effective 11/17/93.

**18.48(3)** *Treatment of replacement parts.* Rescinded IAB 10/13/93, effective 11/17/93.

**18.48(4)** *Packing material used in agricultural, livestock, or dairy production.* For sales occurring on or after July 1, 1996, the gross receipts from the sale of property which is a container, label, carton, pallet, packing case, wrapping, baling wire, twine, bag, bottle, shipping case, or other similar article or receptacle sold for use in agricultural, livestock, or dairy production are not subject to sales tax. This exemption also applies to producers of ornamental, flowering, or vegetable plants in commercial greenhouses or other places which sell such items in the ordinary course of business since that activity is considered to be agricultural.

**18.48(5)** Rescinded IAB 11/20/96, effective 12/25/96.

**18.48(6)** *Auxiliary attachments exemption.* On and after July 1, 1995, sales of auxiliary attachments which improve the performance, safety, operation, or efficiency of machinery or equipment are exempt from tax. Sales of replacement parts for these auxiliary attachments are also exempt on and after that date.

**18.48(7)** *Lists.* Lists (representative but not all-inclusive) of tangible personal property for which sales or use tax paid is or is not refundable.

LIST A. Property Used in Livestock and Dairy  
Production Which is Usually Real Property. See  
18.48(1)“c”(1). Its sale is usually taxable.

barn ventilators*	livestock feeders*
conveyers*	silos
farrowing crates*	specialized flooring*
fence posts	sprinklers
fencing wire	stanchions
furnaces*	watering tanks*
gestation stalls*	ventilators*

\*These items also appear in List D. Tax paid on their sale can be refundable or their sale exempt if the items are not real property.

LIST B. Taxable Farm Supplies  
Which Are Not Machinery or Equipment

burlap*	lubricants
disposable hypodermic syringes	marking chalk
ear tags	packages for one-time use
hog rings	

\*Burlap is exempt when used in the form of a bag, container, wrap or other receptacle or packaging material.

## LIST C. Hand Tools—Taxable and Nontaxable

axes	lanterns
brooms	milk cans*
buckets	mops
cleaning brushes	paintbrushes
dehorner (nonelectric)*	pliers
garden hoses	scrapers
grease guns	screwdrivers
hammers	shovels
hay hooks*	wheelbarrows
hog ringers*	wrenches
lamps	

\*Hand tools specially designed for use in livestock or dairy production are equipment. Tax paid on the sale or use of these hand tools is refundable.

LIST D. Farm Machinery and Equipment Directly and  
Primarily Used in Livestock or Dairy Production.  
Tax Paid is Usually Refundable or the Sale Exempt.

artificial insemination equipment	gates*
augers*	grain augers
automatic feeding systems*	head gates
bulk feeding tanks*	heating pads and lamps
bulk milk coolers	hog feeders*
bulk milk tanks	hypodermic syringes and needles, nondisposable
cattle weaners and feeders	livestock feeding, watering and handling equipment*
cattle currying and oiling machines	loading chutes*
cattle feeders*	LP gas tanks
conveyers*	manure handling equipment*
dehorner, electric	milk coolers
electric fence equipment	milk strainers
fans*	milking machines
farrowing crates, houses and stalls*	refrigerators used to cool raw milk
feed bins*	silo unloaders
feed carts	specialized flooring*
feed elevators*	space heaters
feed grinders	sprayers
feed tanks*	squeeze chutes*
feeders	vacuum coolers
foggers	ventilators*
furnaces*	

\*If not real property. See 18.48(1)“c”(1).

**18.48(8) Seller's and purchaser's liability for sales tax.** The seller shall be relieved of sales tax liability if the seller takes from the purchaser an exemption certificate stating that the purchase is of machinery or equipment meeting the requirements of subrule 18.48(4). An exemption certificate can take the form of a stamp imprinted onto one of the documents of sale. If items purchased tax-free pursuant to an exemption certificate are used or disposed of by the purchaser in a nonexempt manner, the purchaser is solely liable for the taxes and shall remit the tax directly to the department.

This rule is intended to implement Iowa Code section 422.45 as amended by 1996 Iowa Acts, chapter 1145.

**701—18.49(422,423) Aircraft sales, rental, component parts, and services exemptions prior to, on, and after July 1, 1999.**

**18.49(1)** Prior to July 1, 1999, sales in Iowa of aircraft subject to registration were subject to sales tax. On and after July 1, 1999, sales of aircraft in Iowa are subject to Iowa use tax rather than Iowa sales tax. See rule 701—31.6(423). Also, on and after that date, the use tax imposed on sales of aircraft in Iowa is collected by the Iowa department of transportation at the time of the aircraft's registration. Sales of certain aircraft parts in Iowa, the performance of taxable services in Iowa on or in connection with the repair, remodeling, or maintenance of aircraft, and the rental of aircraft in Iowa remain subject to Iowa sales tax on and after July 1, 1999. See subrule 18.49(3).

**18.49(2)** For the purposes of this subrule only, an "aircraft" is any contrivance known or hereafter invented which is designed for navigation of or flight in the air and is used in a scheduled interstate Federal Aviation Administration certified air carrier operation.

*a. Exempt aircraft sales.* As of July 1, 1988, and up to and including June 30, 1999, gross receipts from the sale of aircraft are exempt from tax.

*b. Exempt rental of aircraft.* Effective May 1, 1995, and retroactive to July 1, 1988, the taxable rental (see 701—26.74(422,423)) of aircraft, as defined in the introductory paragraph of this subrule, is exempt from tax.

*c. Exempt sale or rental of aircraft parts.* Effective May 1, 1995, and retroactive to July 1, 1988, gross receipts from the sale or rental of tangible personal property permanently affixed to any aircraft as a component part of that aircraft are exempt from tax. The term "component parts" includes, but is not limited to, repair or replacement parts and materials.

*d. Exempt performance of services.* Effective May 1, 1995, and retroactive to July 1, 1988, gross receipts from the rendering, furnishing, or performing of services in connection with the repair, remodeling, or maintenance of aircraft (including aircraft engines and component materials or parts) are exempt from tax.

**18.49(3)** For the purposes of this subrule only, an "aircraft" is any aircraft used in a nonscheduled interstate Federal Aviation Administration certified air carrier operation conducted under 14 CFR ch. 1, pt. 135. On and after July 1, 1998, the gross receipts from the sale or rental of tangible personal property permanently affixed or permanently attached as a component part of these aircraft, including but not limited to repair or replacement materials or parts, are exempt from tax. Also exempt, on and after that date, are the gross receipts from the performance of any service used for aircraft repair, remodeling, or maintenance when the service is performed on an aircraft, aircraft engine, or aircraft component material or part exempt under this subrule. Gross receipts from the sale or rental of aircraft are not exempt from tax under this subrule

**18.49(4)** For the purposes of this subrule only, an "aircraft" is any contrivance known or hereafter invented which is designed for navigation of or flight in the air. On and after July 1, 1998, and up to and including June 30, 1999, the gross receipts from the sale of an aircraft to an aircraft dealer who rents or leases the aircraft to another are exempt from tax if all of the following circumstances exist:

- a.* The aircraft is kept in the inventory of the dealer for sale at all times.
- b.* The dealer reserves the right to immediately take the aircraft from the renter or lessee when a buyer is found.
- c.* The renter or lessee is aware that the dealer will immediately take the aircraft when a buyer is found.

As soon as an aircraft, the sale of which is exempt under this subrule, is used for any purpose other than leasing or renting, or the conditions set out in paragraphs “a,” “b,” and “c” are not continuously met, the dealer claiming the exemption is liable for the tax which would have been due but for the exemption set out in this subrule. Tax will be computed on the original purchase price paid by the dealer.

See rule 701—32.13(423) for a description of the manner in which transactions described in this subrule are exempted from tax on and after July 1, 1999.

This rule is intended to implement Iowa Code section 422.45, subsections 38, 38A, 38B and 38C and Iowa Code section 423.2 as amended by 1999 Iowa Acts, chapter 168.

**701—18.50(422,423) Property used by a lending organization.** On and after July 1, 1988, the gross receipts from the sale of tangible personal property to a nonprofit organization organized for the purpose of lending the tangible personal property to the general public for use by the public for nonprofit purposes are exempt from tax. The exemption contained in this rule is applicable to tangible personal property only, and not to taxable services. It is applicable to the sale of that property and not to its rental to a nonprofit organization. Finally, the exemption is applicable only to property purchased by a nonprofit organization for subsequent rental to the general public. The exemption is not applicable to other property (e.g., office equipment) which the nonprofit organization might need for its ongoing existence.

This rule is intended to implement Iowa Code section 422.45(36).

**701—18.51(422,423) Sales to nonprofit legal aid organizations.** On and after July 1, 1988, the gross receipts from the sale or rental of tangible personal property or from services performed, rendered, or furnished to a nonprofit legal aid organization are exempt from tax.

This rule is intended to implement Iowa Code subsection 422.45(37).

**701—18.52(422,423) Irrigation equipment used in farming operations.** On and after July 1, 1989, the gross receipts from the sale or rental of irrigation equipment used in farming operations are exempt from tax. The term “irrigation equipment” includes, but is not limited to, circle irrigation systems and trickle irrigation systems. The term “farming operations” has the same meaning as the term “agricultural production” set out in 701—subrule 17.9(3), paragraph “a,” and as further characterized in 18.44(2) “a.”

Effective May 18, 2001, and retroactive to April 1, 1995, the gross receipts from the sale or rental of irrigation equipment, as defined above, whether installed above or below ground are exempt from tax as long as the equipment is sold or rented by a contractor or farmer and the equipment is primarily used in agricultural operations.

Contractors or farmers entitled to the exemption set forth in the previous paragraph may apply for a refund of taxes, interest or penalties paid on the sale or rental of qualifying irrigation equipment for transactions that occurred between April 1, 1995, and May 18, 2001. To be eligible for refund, refund claims must be filed with the department prior to October 1, 2001. Refund claims are limited to \$25,000 in the aggregate and will not be allowed if not timely filed. If the amount of refund claims totals more than \$25,000 in the aggregate, the department will prorate the \$25,000 among all claimants in relation to the amounts of the claimants’ valid claims.

This rule is intended to implement Iowa Code section 422.45 and 2001 Iowa Acts, House File 723.

**701—18.53(422,423) Sales to persons engaged in the consumer rental purchase business.** On and after July 1, 1989, the gross receipts from the sale of tangible personal property, except vehicles subject to registration, to persons regularly engaged in the consumer purchase business are exempt from tax if the property (1) is sold for the purpose of utilization in a transaction involving a “consumer rental purchase agreement” as defined in Iowa Code subsection 537.3604(8), and (2) the gross receipts from the consumer rental of the property are subject to Iowa sales or use tax.

If property exempt under this rule is made use of for any purpose other than a consumer rental purchase, the person claiming the exemption is liable for the tax that would have been due had the exemption not existed. The tax shall be computed on the original purchase price to the person claiming

the exemption. The aggregate of the tax paid on the consumer rental purchase of the property, not exceeding the amount of sales or use tax owed, shall be credited against the tax.

This rule is intended to implement Iowa Code section 422.45(18).

**701—18.54(422,423) Sales of advertising material.** On and after July 1, 1990, gross receipts from the sales of advertising material to any person in Iowa are exempt from tax if that person, or any agent of that person, will, after the sale, send that advertising material outside of Iowa and subsequent sole use of that material will be outside this state.

For the purposes of this rule “advertising material” is tangible personal property only, including paper. “Advertising material” is limited to the following: brochures, catalogs, leaflets, fliers, order forms, return envelopes, floppy discs, CD-ROMs, videotapes, and any similar items of tangible personal property which will be used to promote sales of property or services.

This rule is intended to implement Iowa Code section 422.45.

**701—18.55(422,423) Drop shipment sales.** A “drop shipment” generally involves two sales transactions and three parties. The first party is a consumer located inside Iowa. The second party is a retailer located outside the state. The third party is a supplier who may be located inside or outside of Iowa. The two sales transactions in question are the sale of property from the supplier to the out-of-state retailer, and the further sale of that property from the out-of-state retailer to the consumer in Iowa.

A “drop shipment sale” occurs when the consumer places an order for the purchase of tangible personal property with the out-of-state retailer. The retailer does not own the property ordered at the same time the consumer’s order is placed. The retailer then purchases the property from the supplier. The supplier in turn ships the property directly to the consumer in Iowa. Under Iowa law the supplier in a drop shipment sale cannot be required to collect tax (either sales or use) from the consumer, even if the requisite “nexus” to require collection exists. See the next to last paragraph of this rule for a characterization of “nexus.” The supplier transfers possession of the goods to the consumer; however, transfer of possession alone has never been held to be a “sale” for the purposes of Iowa sales and use tax law. *Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985) and *Cedar Valley Leasing v. Iowa Department of Revenue*, 274 N.W.2d 357 (Iowa 1979).

With reference to drop shipment sales: If delivery of the goods under the contract for sale has occurred outside of Iowa, sale of the goods has occurred outside of Iowa. If delivery of the goods under the contract for sale has occurred within Iowa, the sale has occurred here. See *Sturtz* above for more information regarding sales and delivery. If the sale has occurred in Iowa and the retailer possesses the requisite nexus to require it to collect Iowa tax, the retailer is obligated to collect Iowa sales tax upon the “gross receipts” from its sale of the goods to the consumer. If the sale has occurred outside this state, and the retailer possesses the nexus to require it to collect Iowa tax, the retailer is obligated to collect Iowa retailer’s use tax upon the purchase price of the goods. If the retailer does not have nexus sufficient to require it to collect either Iowa sales or Iowa use tax, or if the retailer fails to collect either tax, the consumer is obligated to pay a consumer use tax directly to the department upon the purchase price of the goods. These rules are illustrated in the following examples.

**EXAMPLE A:** A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The Minneapolis retailer contracts with a supplier in Iowa to manufacture and ship the goods to the consumer. The retailer has nexus with Iowa, and delivery under the contract for sale has occurred in this state. In this case, the consumer is obligated to pay and the retailer is obligated to collect Iowa sales tax. The supplier is not obligated to collect any Iowa tax.

**EXAMPLE B:** A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The Minnesota retailer contracts with a supplier in Iowa to manufacture and ship the goods to the consumer. The retailer has no nexus with Iowa. Delivery under the contract of sale is in Iowa. Under these circumstances, the consumer is obligated to pay consumer’s use tax directly to the department. Neither the retailer nor the supplier is obligated to collect any Iowa tax.

**EXAMPLE C:** A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The retailer contracts with a supplier in Minneapolis to manufacture and ship the goods to

the consumer in Des Moines. The retailer has nexus with Iowa, and delivery under the contract for sale occurs in Iowa. Under these circumstances, the consumer is obligated to pay and the retailer is obligated to collect Iowa sales tax. The supplier is not obligated to collect any Iowa tax.

EXAMPLE D: A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The retailer contracts with a supplier in Minneapolis to manufacture and ship the goods to the consumer in Des Moines. The retailer has nexus with this state; delivery under the contract for sale is in Minnesota. Under the circumstances, the consumer is obligated to pay and the retailer is obligated to collect Iowa retailer's use tax. The supplier is not obligated to collect or pay any Iowa tax.

EXAMPLE E: A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The retailer contracts with a supplier in Minneapolis to manufacture and ship the goods to the consumer in Des Moines. The retailer has no nexus with this state. Delivery can occur in either Minnesota or Iowa. In this example, the consumer is obligated to pay Iowa consumer's use tax directly to the department. Neither the retailer nor the supplier is obligated to collect any Iowa tax.

EXAMPLE F: A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The retailer contracts with a supplier located in Madison, Wisconsin, to ship the goods to the consumer in Des Moines. The retailer has nexus with Iowa, and delivery under the contract for sale is in Iowa. Under these circumstances, the retailer is obligated to collect and the consumer obligated to pay Iowa sales tax. The supplier is not obligated to collect any Iowa tax.

EXAMPLE G: A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The retailer contracts with a supplier located in Madison, Wisconsin, to ship the goods to the consumer in Des Moines. The retailer has nexus with Iowa with delivery in Madison, Wisconsin. Under these circumstances, the retailer is obligated to collect and the consumer obligated to pay Iowa retailer's use tax. The supplier is not obligated to collect any Iowa tax.

EXAMPLE H: A consumer in Des Moines, Iowa, purchases goods from a retailer in Minneapolis, Minnesota. The retailer contracts with a supplier located in Madison, Wisconsin, to ship the goods to the consumer in Des Moines. The retailer has no nexus with Iowa. Delivery under the contract for sale may be in Iowa or Wisconsin. Under these circumstances, the consumer is obligated to pay Iowa consumer's use tax directly to the department. Neither the retailer nor the supplier is obligated to collect any Iowa tax.

As used in these examples, the requirement of "nexus" is discussed in *Good's Furniture House Inc. v. Iowa State Bd. of Tax Review*, 382 N.W.2d 145 (Iowa 1986); cert. den. 479 U.S. 817; *State Tax Commission v. General Trading Co.*, 10 N.W.2d 659, 233 Iowa 877 (1943) affd. 64 S.Ct. 1028, 322 U.S. 335, 88 L.Ed. 1309; and *Nelson v. Sears, Roebuck & Co.*, 292 N.W. 130, 228 Iowa 1273 (1940) reversed 61 S.Ct. 586, 312 U.S. 359, 85 L.Ed. 522, as well as other judicial decisions, and Iowa Code section 422.43(12).

This rule is intended to implement Iowa Code subsections 422.42(2) and 422.42(5).

**701—18.56(422,423) Wind energy conversion property.** On and after July 1, 1993, the gross receipts from the sale of property used to convert wind energy to electrical energy or the gross receipts from the sale of materials used to manufacture, install, or construct property used to convert wind energy to electrical energy shall be exempt from tax.

For the purposes of this rule, "property used to convert wind energy to electrical energy" means any device which converts wind energy to usable electrical energy including, but not limited to, wind chargers, windmills, wind turbines, pad mount transformers, substations, power lines, and tower equipment.

This rule is intended to implement Iowa Code section 422.45 as amended by 1993 Iowa Acts, chapter 161.

**701—18.57(422,423) Exemptions applicable to the production of flowering, ornamental, and vegetable plants.** On and after July 1, 1995, the production of flowering, ornamental, or vegetable plants by a grower in a commercial greenhouse or at another location is considered to be a part of agricultural production. The word "plants" does not include trees, shrubs, other woody perennials,

or fungus. The exemption also applies to implements, machinery, equipment, and replacement parts directly and primarily used in the production of flowering, ornamental, or vegetable plants and fuel used for providing heating or cooling for greenhouses or buildings or parts of buildings dedicated to the production of flowering, ornamental, or vegetable plants intended for sale in the ordinary course of business. The following exemptions are applicable to the production of flowering, ornamental, or vegetable plants.

**18.57(1)** Sales of fertilizer, limestone, herbicides, pesticides, insecticides, plant food, and medication for use in disease, weed, insect control, or other health promotion of flowering, ornamental, or vegetable plants to a commercial greenhouse are exempt from tax. For the purposes of this subrule a virus, bacteria, fungus, or insect which is purchased for use in killing insects or other pests is an “insecticide” or “pesticide.” See rules 701—17.4(422,423) and 17.9(422,423) for more information regarding these exemptions.

**18.57(2)** Sales of fuel to provide heating or cooling for a greenhouse or building or a part of a building dedicated to the production of flowering, ornamental, or vegetable plants held for sale in the ordinary course of business are exempt from tax. Electricity is a “fuel” for the purposes of this subrule. Fuel used in a plant production building for purposes other than heating or cooling (e.g., lighting) or for purposes other than direct use in plant production (e.g., heating or cooling office space) is not eligible for this exemption. For example, assume that there is a separate meter for electricity used only for heating or cooling. If a greenhouse is used, partially for growing plants and partially for a nonexempt purpose, a proportional exemption from sales tax may be claimed based upon a percentage calculated from a fraction, the numerator of which is the number of square feet of the greenhouse heated or cooled and used for raising plants, and the denominator of which is the number of square feet heated or cooled in the entire greenhouse. It may be necessary to alter this formula (by the use of separate metering, for example) if a greenhouse has a walk-in cooler and the cooler is used directly in plant production. Plant production has ended when a plant has grown to the point that it is of the size or weight at which it will be prepared for shipment to the destination where it will be marketed. Examples of nonexempt purposes for which a portion of a greenhouse might be used include, but are not limited to, portions used for office space, loading docks, storage of property other than plants, housing of heating and cooling equipment and portions used for packaging plants for shipment. See rule 701—15.3(422,423) regarding fuel exemption certificates and subrule 18.48(8) regarding seller’s and purchaser’s liability for sales tax.

**18.57(3)** Sales of gas, electricity, steam or other tangible personal property for use as a fuel in implements of husbandry used in the production of plants in a commercial greenhouse or elsewhere are exempt from tax. See 701—subrule 17.9(6), paragraph “a,” for a definition of “implements of husbandry.”

**18.57(4)** Sales of self-propelled implements. Sales of self-propelled implements or implements customarily drawn by or attached to self-propelled implements and replacement parts for the same are exempt from tax if the implements are used directly and primarily in the production of plants in commercial greenhouses or elsewhere. See rule 701—18.44(422,423) for an extensive explanation of this exemption. Implements exempt under this subrule include, but are not limited to, forklifts used to transport pallets of plants; wagons containing sterilized soil and tractors used to pull the same.

**18.57(5)** Sale of water used in the production of plants is exempt from tax. If water is not separately metered, the grower of plants must determine by use of a percentage that portion which is used for a taxable purpose and that portion which is used for an exempt purpose.

Nonexclusive examples of taxable usage would be rest rooms, sanitation, lawns, and vehicle wash.

**18.57(6)** For sales occurring on or after July 1, 1996, the gross receipts for the sale of property which is a container, label, carton, pallet, packing case, wrapping, baling wire, twine, bag, bottle, shipping case, or other similar article or receptacle sold for use in agricultural, livestock, or dairy production are not subject to sales tax. This exemption also applies to producers of ornamental, flowering, or vegetable plants in commercial greenhouses or other places which sell such items in the ordinary course of business since that activity is considered to be agricultural. A noninclusive list of containers and packaging materials would include boxes, trays, labels, sleeves, tape, and staples.

**18.57(7)** Sales of machinery and equipment used in plant production which are not self-propelled or attached to self-propelled machinery and equipment are also exempt from tax. See rule 701—18.48(422,423) for a thorough explanation of this exemption. Listed below are a number of examples of machinery and equipment which are directly and primarily used in plant production. Sales of this machinery and equipment to commercial growers are usually exempt from tax.

- Air-conditioning pads\*
- Airflow control tubes
- Atmospheric CO<sub>2</sub> control and monitoring equipment
- Backup generators
- Bins holding sterilized soil
- Control panels = heating and cooling
- Coolers used to chill plants\*
- Cooling walls\* or membranes
- Equipment used to control water levels for subirrigation
- Fans = cooling and ventilating\*
- Floor mesh for controlling weeds
- Germination chambers
- Greenhouse boilers\*
- Greenhouse netting or mesh = used for light and heat control
- Greenhouse monorail systems\*
- Greenhouse thermometers
- Handcarts used to move plants
- Lighting which provides artificial sunlight
- Overhead heating, lighting and watering systems
- Overhead tracks for holding potted plants\*
- Plant tables\*
- Plant watering systems\*
- Portable buildings used to grow plants\*
- Seeding and transplanting machines
- Soil pot and soil flat filling machines
- Steam generators for soil sterilization\*
- Warning devices = excess heat or cold
- Watering booms

\*If not real property. See 18.48(1) “c”(1).

**18.57(8)** Miscellaneous exempt and taxable sales. Sales of pots, soil, seeds, bulbs, and “starter plants” for use in plant production are not the sale of machinery or equipment, but can be sales for resale and exempt from tax if the pots and soil are sold with the final product or become the finished product. Sales of portable buildings which will be used to display plants for retail sales are taxable. Finally, sales of whitewash which will be painted on greenhouses to control the amount of sunlight entering those houses are taxable sales of a “supply” rather than exempt sales of equipment. See 18.48(1) “c”(2) relating to “supplies.” See rule 701—18.7(422,423) relating to containers, including packaging cases, shipping cases, wrapping materials, and similar items sold to retailers, and see subrule 18.57(6).

This rule is intended to implement Iowa Code sections 422.42(1), 422.42(4), 422.42(11), 422.45(39) and 422.47(4) and Iowa Code section 422.45 as amended by 1996 Iowa Acts, chapter 1145.

**701—18.58(422,423) Exempt sales or rentals of computers, industrial machinery and equipment, and exempt sales of fuel and electricity on and after July 1, 1997, but before July 1, 2016.** The sale or rental of machinery, equipment, or computers used by a manufacturer in processing; the sale or rental of a computer used in the processing or storage of data or information by an insurance company, financial institution, or commercial enterprise; and the sale or rental of various other types of tangible personal property are, under certain circumstances, exempt from tax as of July 1, 1997, but before July 1, 2016.

For sales that occur as part of a contract entered into on or after July 1, 2016, see rules 701—230.14(423) to 701—230.22(423).

**18.58(1) Definitions.** The following terms are defined for the purposes of this rule in the manner set out below.

*“Commercial enterprise”* includes businesses and manufacturers conducted for profit and includes centers for data processing services to insurance companies, financial institutions, businesses, and manufacturers, but excludes professions and occupations and nonprofit organizations. A hospital that is a not-for-profit organization would not be a “commercial enterprise.” The term “professions” means a vocation or employment requiring specialized knowledge and often long and intensive academic preparation. The term “occupations” means the principal business of an individual. Included within the meaning of “occupations” is the business of farming. A professional corporation which carries on any business which is a “profession” or “occupation” is not a commercial enterprise.

*“Computer”* means stored program processing equipment and all devices fastened to it by means of signal cables or any communication medium that serves the function of a signal cable. Nonexclusive examples of devices fastened by a signal cable or other communication medium are terminals, printers, display units, card readers, tape readers, document sorters, optical readers, and card or tape punchers. Excluded from the definition of “computer” is point-of-sale equipment. For a characterization of “point-of-sale equipment,” see 701—subrule 71.1(7). Also included within the meaning of the word “computer” is any software consisting of an operating system or executive program. Such software coordinates, supervises, or monitors the basic operating procedures of a computer. An operating system or executive program is exempt from sales tax only if purchased as part of the sale of the computer for which it operates. An operating system or executive program priced separately or sold at a later time is subject to the provisions of rule 18.34(422,423). Excluded from the meaning of the word “computer” is any software consisting of an application program. For purposes of this subrule, “operating system or executive program” means a computer program which is fundamental and necessary to the functioning of a computer. The operating system or executive program software controls the operation of a computer by managing the allocation of all system resources, including the central processing unit, main and secondary storage, input/output devices, and the processing of programs. This is in contrast to application software which is a collection of one or more programs used to develop and implement the specific applications which the computer is to perform, and which calls upon the services of the operating system or executive program.

*“Contract manufacturer”* is any manufacturer who falls within the definition of “manufacturer” set out subsequently in this subrule except that a contract manufacturer does not sell the tangible personal property which it processes on behalf of other manufacturers.

*“Directly used.”* Property is “directly used” only if it is used to initiate, sustain, or terminate an exempt activity. In determining whether any property is “directly used,” consideration should be given to the following factors:

1. The physical proximity of the property in question to the activity in which it is used;
2. The proximity of the time of use of the property in question to the time of use of other property used before and after it in the activity involved; and
3. The active causal relationship between the use of the property in question and the activity involved. The fact that a particular piece of property may be essential to the conduct of the activity because its use is required either by law or practical necessity does not, of itself, mean that the property is directly used.

*“Financial institution”* is a bank incorporated under any state or federal law; a savings and loan association incorporated under any state or federal law; a credit union organized under any state or federal law; or any corporation licensed as an industrial loan company under Iowa Code chapter 536A. Excluded from the meaning of the term are loan brokers governed by Iowa Code chapter 535C and production credit associations.

*“Insurance company”* means an insurer organized or operating under Iowa Code chapter 508, 514, 515, 518, 518A, 519, or 520 or authorized to do business in Iowa as an insurer or as a licensed insurance agent under Iowa Code chapter 522. Excluded from the definition of “insurance company” are fraternal

and beneficial societies governed by Iowa Code chapter 512 and health maintenance organizations governed by Iowa Code chapter 514B. This list of exclusions is not intended to be exclusive.

*“Machinery and equipment”* means machinery and equipment used by a manufacturer. Machinery is any mechanical, electrical, or electronic device designed and used to perform some function and to produce a certain effect or result. The term includes not only the basic unit of the machinery, but also any adjunct or attachment necessary for the basic unit to accomplish its intended function. The term also includes all devices used or required to control, regulate, or operate a piece of machinery, provided such devices are directly connected with or are an integral part of the machinery and are used primarily for control, regulation, or operation of machinery. Jigs, dies, tools, and other devices necessary to the operation of or used in conjunction with the operation of what would be ordinarily thought of as machinery are also considered to be “machinery.” See *Deere Manufacturing Co. v. Zeiner*, 247 Iowa 1264, 78 N.W.2d 527 (1956). Also see the definition of “replacement parts” *infra*. Machinery does not include buildings designed specifically to house or support machinery. Equipment is any tangible personal property used in an operation or activity. Nonexclusive examples of equipment are tables on which property is assembled on an assembly line and chairs used by assembly line workers.

*“Manufacturer”* means any person, firm, or corporation that purchases, receives, or holds personal property for the purpose of adding to its value by any process of manufacturing, refining, purifying, combining of different materials, or by packing of meats with an intent to sell at a gain or profit. Those who are in the business of printing, newspaper publication, bookbinding, lumber milling, and production of drugs and agricultural supplies are illustrative, nonexclusive examples of manufacturers. Construction contracting; remanufacture or rebuilding of tangible personal property (such as automobile engines); provision of health care; farming; transportation for hire; and the activities of restaurateurs, hospitals, medical doctors, and those who merely process data are illustrative, nonexclusive examples of businesses which are not manufacturers. See *Associated General Contractors of Iowa v. State Tax Commission*, 255 Iowa 673, 123 N.W.2d 922 (1963) and *River Products Co. v. Board of Review of Washington County*, 332 N.W.2d 116 (Iowa Ct. App. 1982). The term “manufacturer” includes a contract manufacturer. Ordinarily, the word does not include those commercial enterprises engaged in quarrying or mining. However, effective July 1, 1998, a commercial enterprise, the principal business of which is quarrying or mining, is a manufacturer with respect to activities in which it engages subsequent to quarrying or mining. These subsequent activities include, by way of nonexclusive example, crushing, washing, sizing, and blending of aggregate materials.

EXAMPLE: Company A owns and operates a gravel pit. It sells the gravel extracted from the pit to others who use the gravel for surfacing roads and as an ingredient in concrete manufacture. Company A removes overlay and raw gravel from the pit. It then transports the gravel to a plant where washing and sizing of the gravel take place. Company A is a manufacturer, but only with respect to those activities which occur after it severs the gravel from the ground.

*“Pollution control equipment”* means any disposal system or apparatus used or placed in operation primarily for the purpose of reducing, controlling, or eliminating air or water pollution. The term does not include any apparatus used to eliminate “noise pollution.” Liquid, solid, and gaseous wastes are included within the meaning of the word “pollution.” “Pollution control equipment” specifically includes, but is not limited to, any equipment the use of which is required or certified by an agency of this state or the United States Government. Wastewater treatment facilities and scrubbers used in smokestacks are examples of pollution control equipment. However, pollution control equipment does not include any equipment used only for worker safety (e.g., a gas mask).

*“Processing”* means a series of operations in which materials are manufactured, refined, purified, created, combined, transformed, or stored by a manufacturer, ultimately into tangible personal property. Processing encompasses all activities commencing with the receipt or producing of raw materials by the manufacturer and ending at the point products are delivered for shipment or transferred from the manufacturer. Processing includes, but is not limited to, refinement or purification of materials; treatment of materials to change their form, context, or condition; maintenance of the quality or integrity of materials, components, or products; maintenance of environmental conditions necessary for materials, components or products; quality control activities; construction of packaging and shipping

devices; placement into shipping containers or any type of shipping device or medium; and the movement of materials, components, or products until shipment from the manufacturer.

*“Processing or storage of data or information.”* All computers store and process information. However, only if the “final output” for a user or consumer is stored or processed data will the computer be eligible for exemption of tax.

*“Receipt or producing of raw materials”* means activities performed upon tangible personal property only. With respect to raw materials produced from or upon real estate, “production of raw materials” is deemed to occur immediately following the severance of the raw materials from the real estate.

*“Recycling”* means any process by which waste or materials which would otherwise become waste are collected, separated, or processed and revised or returned for use in the form of raw materials or products. The term includes, but is not limited to, the composting of yard waste which has been previously separated from other waste. “Recycling” does not include any form of energy recovery.

*“Replacement parts.”* A “replacement part” is any machinery, equipment, or computer part which is substituted for another part that has broken, has become worn out or obsolete, or is otherwise unable to perform its intended function. “Replacement parts” are those parts which materially add to the value of industrial machinery, equipment, or computers or appreciably prolong their lives or keep them in their ordinarily efficient operating condition. Excluded from the meaning of the term “replacement parts” are supplies, the use of which is necessary if machinery is to accomplish its intended function. Drill bits, grinding wheels, punches, taps, reamers, saw blades, lubricants, coolants, sanding discs, sanding belts, and air filters are nonexclusive examples of supplies. Sales of supplies remain taxable.

Tangible personal property with an expected useful life of 12 months or more which is used in the operation of machinery, equipment, or computers is rebuttably presumed to be a “replacement part.” Tangible personal property used in the same manner with an expected useful life of less than 12 months is rebuttably presumed to be a “supply.”

*“Research and development”* means experimental or laboratory activity which has as its ultimate goal the development of new products or processes of processing. Machinery, equipment, and computers are used “directly” in research and development only if they are used in actual experimental or laboratory activity that qualifies as research and development under this subrule.

**18.58(2) Exempt sales.** On and after July 1, 1997, sales or rentals of the following machinery, equipment, or computers (including replacement parts) are exempt from tax:

*a.* Machinery, equipment, and computers directly and primarily used in processing by a manufacturer.

*b.* Machinery, equipment, and computers directly and primarily used to maintain a manufactured product’s integrity or to maintain any unique environmental conditions required for the product.

*c.* Machinery, equipment and computers directly and primarily used to maintain unique environmental conditions required for other machinery, equipment, or computers used in processing by a manufacturer.

*d.* Test equipment directly and primarily used by a manufacturer in processing to control the quality and specifications of a product.

*e.* Machinery, equipment, or computers directly and primarily used in research and development of new products or processes of processing.

*f.* Computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise.

*g.* Machinery, equipment, and computers directly and primarily used in recycling or reprocessing of waste products.

*h.* Pollution control equipment used by a manufacturer. It is not necessary that the equipment be “directly and primarily” used in any kind of processing.

*i.* Materials used to construct or self-construct any machinery, equipment, or computer, the sale of which is exempted by paragraphs “a” through “h” above.

*j.* Exempt sales of fuel and electricity. Sales of fuel or electricity consumed by machinery, equipment, or computers used in any exempt manner described in paragraphs “a,” “b,” “c,” “d,” “e,”

“g,” and “h” of this subrule are exempt from tax. Sales of electricity consumed by computers used in the manner described in paragraph “f” remain subject to tax.

**18.58(3) Examples of exempt items.** Sales of the following nonexclusive types of machinery and equipment, previously taxable, are exempt on and after July 1, 1997, if that machinery or equipment is sold for direct and primary use in processing by a manufacturer: coolers which do not change the nature of materials stored in them; equipment which eliminates bacteria; palletizers; storage bins; property used to transport raw, semifinished, or finished goods; vehicle-mounted cement mixers; self-constructed machinery and equipment; packaging and bagging equipment (including conveyer systems); equipment which maintains an environment necessary to preserve a product’s integrity; equipment which maintains a product’s integrity directly; quality control equipment and electricity or other fuel used to power the machinery and equipment mentioned above.

**18.58(4) Processing—beginning to end.**

*a. The beginning of processing.* Processing begins with a manufacturer’s receipt or production of raw material. Thus, when a manufacturer produces its own raw material it is engaged in processing. Processing also begins when raw materials are transferred to a manufacturer’s possession by a manufacturer’s supplier.

*b. The completion of processing.* Processing ends when the finished product is transferred from the manufacturer or delivered for shipment by the manufacturer. Therefore, a manufacturer’s packaging, storage, and transport of a finished product after the product is in the form in which it will be sold at retail are part of the processing of the product.

*c. Examples of the beginning, intervening steps, and the ending of processing.* Of the following, Examples A and B illustrate when processing begins under various circumstances; Example C demonstrates the middle stages of processing; and Example D demonstrates when the end of processing takes place.

EXAMPLE A. Company A manufactures fine furniture. Company A owns a grove of walnut trees which it uses as raw material. A’s employees cut the trees, transport the logs to A’s factory, offload them there, and store the logs in a warehouse (to begin the curing of their wood) before taking them to A’s sawmill. The walnut trees are real property, *Kennedy v. Board of Assessment and Review*, 276 N.W. 205, 224 Iowa 405 (1937). Thus, no “production of raw materials” has occurred with regard to the trees until they have been severed from the soil and transformed into logs. In this example, “processing” of the logs begins when they are placed on vehicles for transport to A’s factory. However, note that even though the transport vehicles are used in processing, if they are “vehicles subject to registration,” their use is not exempt from tax. See 18.58(6)“d” infra.

EXAMPLE B. Company A from the previous example also buys mahogany logs from a supplier in Honduras. Company A uses its own equipment to offload the logs from railroad cars at its manufacturing facility and then transports, stores, and saws the logs as previously described in Example A. Processing begins when Company A offloads the logs from the railroad cars.

EXAMPLE C. Company C is a microbrewery. It uses a variety of kettles, vats, tanks, tubs, and other containers to mix, cook, ferment, settle, age, and store the beer which it brews. It also uses a variety of pipes and pumps to move the beer among the various containers involved in the activity of brewing. All stages of this brewing are part of processing whether those stages involve the transformation of the raw materials from one state to another, e.g., fermentation or aging, or simply involve holding the materials in an existing state, e.g., storage of hops in a bin or storage of the beer immediately prior to bottling. Also, any movement of the beer between containers is an activity which is a part of processing, whether this movement is an “integral part” of the production of the beer or not.

EXAMPLE D. After the brewing process is complete, Company C places its beer in various containers, stores it, and moves the beer to its customers by a common carrier that picks up the beer at C’s brewery. C’s activities of placing the beer into bottles, cans, and kegs, storing it after packaging, and moving the beer by use of a forklift to the common carrier’s pickup site are activities which are part of processing.

**18.58(5) Various unrelated inclusions in and exclusions from this exemption.**

*a.* The following are nonexclusive examples of machinery which is not directly used in processing:

(1) Machinery used exclusively for the comfort of workers. Examples are air cooling, air conditioning, and ventilation systems.

(2) Machinery used in support operations, such as a machine shop, in which production machinery is assembled, maintained, or repaired.

(3) Machinery used by administrative, accounting, and personnel departments.

(4) Machinery used by plant security, fire prevention, first aid, and hospital stations.

(5) Machinery used in plant communications and safety.

*b.* The following is an example of property directly used in research and development. Frontier Hybrid, Inc. maintains a research and development laboratory for use in developing a corn plant which is a perennial. It purchases the following items for use in its research and development laboratory: a computer which will process data relating to the genetic structure of the various corn plants which Frontier Hybrid is testing, an electron microscope for examining the structure of corn plant genes, a “steam cleaner” for cleaning rugs in the laboratory offices, and a typewriter for use by the laboratory director’s secretary. The computer and the microscope are “directly” used in the research in which the laboratory is engaged; the steam cleaner and the typewriter only indirectly used. Therefore, purchase of the computer and microscope would be exempt from tax; purchase of the steam cleaner and typewriter would be subject to tax.

*c.* The following is an example of computers used and not used in processing or storage of information or data. A health insurance company has four computers. Computer A is used to monitor the temperature within the insurance company’s building. The computer transmits messages to the building’s heating and cooling systems telling them when to raise or lower the level of heating or air conditioning as needed. Computer B is used to store patient records and will recall those records on demand. Computer C is used to tabulate statistics regarding the amount of premiums paid in and the amount of benefits paid out for various classes of insured. Computer D is used to train the insurance company’s employees to perform various additional tasks or to better perform work they can already do. Computer D uses various canned programs to accomplish this. The “final output” of Computer A is neither stored nor processed information. Therefore, Computer A does not fit the definition of an exempt computer. The final output of Computer B is stored information. The final output of Computer C is processed information. The final output of Computer D is processed information consisting of the training exercises appearing on the computer monitor. The sale, lease, or use of Computers B, C, and D would qualify for exemption.

*d.* The following is an example of property not used in processing. A manufacturing plant located in Warren County which manufactures widgets fabricates its own patterns used in manufacturing the widgets on a metal press machine in its machine shop located in Story County. The machine shop does not sell the patterns, and the metal press machine is used for no other purpose than to fabricate the patterns. The metal press machine is not used in processing because there is no intent to sell the patterns used by the machine shop at a gain or profit.

**18.58(6) Exceptions.** Sales of the following machinery, equipment, or computers are not exempt:

*a.* Machinery, equipment, or computers assessed by the department of revenue pursuant to Iowa Code chapters 428, 433, 434, and 436 to 438, inclusive. For electric, gas, water, and other companies assessed under Iowa Code chapter 428, only property owned by the company is assessed by the department. For railroad, telephone, pipeline, and electric transmission lines companies, property leased to, as well as owned by, the company is assessed by the department. See 701—Chapters 71 and 77.

*b.* Hand tools. These are tools which can be held in the hand or hands and which are powered by human effort.

*c.* Point-of-sale equipment. See 701—subrule 71.1(7).

*d.* Vehicles subject to registration, except vehicles subject to registration which are directly and primarily used in recycling or reprocessing of waste products.

*e.* Machinery and equipment purchased by a person engaged in processing who is not a manufacturer. Restaurants, retail bakeries, food stores, and blacksmith shops are nonexclusive examples of businesses which process tangible personal property but are not manufacturers as that word is defined for the purposes of this rule.

*f.* The fact that the acquisition cost of rented or purchased machinery, equipment, or computers can be capitalized for the purposes of Iowa or federal income tax law is not an indication that their sale or rental would be exempt from tax under this rule.

**18.58(7)** *Lessor purchases of machinery, equipment, or computers.* The analysis regarding lessor purchases of farm machinery and equipment contained in subrule 18.44(3) explains that same problem regarding machinery, equipment, and computers.

**18.58(8)** *Designing or installing new industrial machinery or equipment.* The gross receipts from the services of designing or installing new industrial machinery or equipment are exempt from tax. The enumerated services of electrical or electronic installation are included in this exemption. To qualify for the exemption, the sale or rental of the machinery or equipment must be subject to exemption under this rule. In addition, the machinery or equipment must be “new.” For purposes of this subrule, “new” means never having been used or consumed by anyone. The exemption is not applicable to reconstructed, rebuilt, or repaired or previously owned machinery or equipment. The exemption is applicable to new machinery and equipment designed or installed for rental as well as for sale. The gross receipts from design or installation must be separately identified, charged separately, and reasonable in amount for the exemption to apply. A “computer” is not considered to be machinery or equipment, and its installation or design is not eligible for this exemption.

**18.58(9)** *Property used in recycling or reprocessing of waste products.* Gross receipts from the sale or rental of machinery (including vehicles subject to registration), equipment, or computers directly and primarily used in the recycling or reprocessing of waste products are exempt from tax. “Reprocessing” is not a subcategory of “processing.” Reprocessing of waste products is an activity separate and independent from the processing of tangible personal property. Machinery or equipment used in the recycling or reprocessing of waste products includes, but is not limited to, compactors, balers, crushers, grinders, cutters, or shears directly and primarily used for this purpose. The sale of an end loader, forklift, truck, or other moving device is exempt from tax if the device is directly and primarily used in the movement of property which is an integral part of recycling or reprocessing. The sale of a bin for storage ordinarily would not be exempt from tax; storage without more activity would not be a part of recycling or reprocessing. Certain limits for exemption placed upon industrial machinery and equipment are not applicable to machinery and equipment used in recycling or reprocessing. For example, the exemption will apply even if the machinery, equipment or computer is purchased by a person other than an insurance company, financial institution or commercial enterprise. A person engaged in a profession or occupation could purchase property for direct and primary use in recycling or reprocessing of waste products and the exemption would apply.

*a.* By way of nonexclusive examples, recycling or reprocessing can begin when waste or material which would otherwise become waste is collected or separated. A vehicle used directly and primarily for collecting waste which will be recycled or reprocessed could be a vehicle used for an exempt purpose under this rule. Thus, the purchaser of a garbage truck could claim this exemption if the truck were directly and primarily used in recycling and not, for instance, in hauling garbage to a landfill. Machinery or equipment used to segregate waste from material to be recycled or reprocessed or used to separate various forms of materials which will be reprocessed (e.g., glass and aluminum) can also be used at the beginning of recycling or reprocessing.

*b.* Machinery and equipment directly and primarily used in recycling or reprocessing. See subrule 18.58(1) for the definition of “directly used” which is applicable to this subrule. The examples of machinery not directly used in processing set out in 18.58(5) “a” should be studied for guidance in determining whether similar machinery is or is not used in recycling or reprocessing; e.g., machinery used in plant security (see 18.58(5) “a”(4)) is not machinery directly used in recycling or reprocessing.

*c.* Integral use in recycling or reprocessing. Ordinarily, any operation or series of operations which does not transform waste or material which would otherwise become waste into new raw materials or products would not be a part of recycling or reprocessing. However, activities which do not do this, but are an “integral part” of recycling or reprocessing, are themselves recycling or reprocessing. For example, an endless belt which moves aluminum cans from a machine where they are shredded to a machine where the shredded aluminum is crushed into blocks would be an endless belt used in recycling

or reprocessing and the exemption applies. See subrule 18.29(5) for a discussion of when an activity is an integral part of “processing.” Some of that discussion is applicable to this subrule.

*d.* The end of recycling or reprocessing. Recycling or reprocessing ends when waste or a material which would otherwise become waste is in the form of raw material or in the form of a product. For instance, a corporation purchases a machine which grinds logs, stumps, pallets, crates, and other waste wood into wood chips. After grinding, the wood chips are sold and transported to various sites where the chips are dumped and spread out over the ground for use in erosion control. The machine which grinds the wood chips is a machine used in recycling. The truck which transports the wood chips from the machine to the sites is not used in recycling because at the time the chips are placed in the truck they are in the form in which they will be used in erosion control.

This rule is intended to implement Iowa Code Supplement section 422.45(27) as amended by 1998 Iowa Acts, Senate File 2288; Iowa Code section 422.45(29); and Iowa Code chapter 423. [ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—18.59(422,423) Exempt sales to nonprofit hospitals.** On and after July 1, 1998, the gross receipts from sales or rentals of tangible personal property to and from the rendering, furnishing, or performing of services for a nonprofit hospital licensed under Iowa Code chapter 135B are exempt from tax if the property or service purchased is used in the operation of the hospital. A hospital is not entitled to claim a refund for tax paid by a contractor on the sale or use of tangible personal property or the performance of services in the fulfillment of a written construction contract with the hospital. However, see the circumstances set out below in which sales of goods, wares or merchandise, or taxable services to a hospital for use in the fulfillment of a construction contract, are exempt from Iowa tax.

For the purposes of this rule, the word “hospital” means a place which is devoted primarily to the maintenance and operation of facilities for diagnosis, treatment, or care, over a period exceeding 24 hours, of two or more nonrelated individuals suffering from illness, injury, or a medical condition (such as pregnancy). The word “hospital” includes general hospitals, specialized hospitals (e.g., pediatric, mental, and orthopedic hospitals, and cancer treatment centers), sanatoriums, and other hospitals licensed under Iowa Code chapter 135B. Also included are institutions, places, buildings, or agencies in which any accommodation is primarily maintained, furnished, or offered for the care, over a period exceeding 24 hours, of two or more nonrelated aged or infirm persons requiring or receiving chronic or convalescent care. Excluded from the meaning of the term “hospital” are institutions for well children; day nursery and child care centers; foster boarding homes and houses; homes for handicapped children; homes, houses, or institutions for aged persons which limit their function to providing food, lodging, and provide no medical or nursing care, and house no bedridden person; dispensaries or first-aid stations maintained for the care of employees, students, customers, members of any commercial or industrial plan, educational institution, or convent; freestanding hospice facilities which operate a hospice program in accordance with 42 CFR § 418 and freestanding clinics which do not provide diagnosis, treatment, or care for periods exceeding 24 hours. This list of inclusions and exclusions is not exclusive. For additional information see 481—Chapter 51.

Ordinarily, goods, wares, or merchandise (such as building materials, supplies, and equipment; see rule 701—19.3(422,423) for definitions) which is purchased by a hospital and used by a contractor in the fulfillment of a written contract with the hospital cannot be purchased exempt from Iowa tax. The goods, wares, and merchandise used in the fulfillment of these construction contracts are not used in the “operation” of a hospital but in activities at least one step removed from that operation. See *Polich v. Anderson-Robinson Coal Co.*, 227 Iowa 553, 288 N.W. 650 (1939).

However, for a limited period, the gross receipts from all sales of goods, wares, or merchandise or from services rendered, furnished, or performed are exempt from tax (or a claim for refund may be filed for tax paid) if the tangible personal property or the taxable service is used in the fulfillment of a written construction contract with a hospital and all of the following circumstances exist:

1. Deliveries under contracts of sale of the goods, wares, or merchandise occurred or the taxable services were rendered, furnished, or performed between July 1, 1998, and December 31, 2001, inclusive. A claim for refund may be filed for any tax paid for this period, so long as the claim is filed prior to April

1, 2002, and the requirements of “2” and “3” below are also met. Claims for refunds of tax, interest, or penalty paid for the period of July 1, 1998, to December 31, 2001, are limited to \$25,000 in the aggregate. If the amount of the claimed refunds for this period totals more than \$25,000, the department must prorate the \$25,000 among all claimants in relation to the amounts of the claimants’ valid claims.

2. The written construction contract was entered into prior to December 31, 1999, or bonds to fund the construction were issued prior to December 31, 1999.

3. The property or services were purchased directly by the hospital or by a contractor as an agent of the hospital. For the purposes of this exemption, no hospital can retroactively designate a contractor to be its agent and by this means transform a contractor’s purchases of goods, wares, merchandise, or services into its own. Upon the department’s request, a hospital claiming that a contractor is or has been its purchasing agent must present suitable evidence of a principal-agent relationship between itself and the contractor during any period for which exempt sales or a refund is claimed. The best evidence of a principal and purchasing agent relationship is a written document setting out the terms of the relationship and the period for which the agency is in effect; however, other evidence, which is the equivalent of a written document in reliability, will be considered by the department when necessary.

This rule is intended to implement Iowa Code Supplement section 422.45 as amended by 2000 Iowa Acts, chapter 1207.

**701—18.60(422,423) Exempt sales of gases used in the manufacturing process.** Effective May 24, 1999, but retroactive to January 1, 1991, sales of argon and other similar gases to be used in the manufacturing process are exempt from tax. For the purposes of this rule, only inert gases are gases which are similar to argon. An “inert gas” is any gas which is normally chemically inactive. It will not support combustion and cannot be used as either a fuel or as an oxidizer. Argon, nitrogen, carbon dioxide, helium, neon, krypton, and xenon are nonexclusive examples of inert gases. Oxygen, hydrogen, and methane are nonexclusive examples of gases which are not inert. These sales are exempt only if the gas is purchased by a “manufacturer,” for used in “processing,” as those terms are defined in subrule 18.45(1), for the period prior to July 1, 1997, and as those terms are defined in subrule 18.58(1) for the period beginning July 1, 1997.

This rule is intended to implement Iowa Code section 422.45 as amended by 1999 Iowa Acts, chapter 170.

**701—18.61(422,423) Exclusion from tax for property delivered by certain media.** For the period beginning March 15, 1995, a taxable “sale” of tangible personal property does not occur if the substance of the transaction is delivered to the purchaser digitally, electronically, or by utilizing cable, radio waves, microwaves, satellites, or fiber optics. This exclusion from tax is not applicable to any leasing of tangible personal property, a lease not being a “sale” of tangible personal property for the purposes of Iowa sales and use tax law, *Cedar Valley Leasing, Inc. v. Iowa Department of Revenue*, 274 N.W.2d 357 (Iowa 1979). The exclusion is also not applicable to property delivered by any medium other than those listed above. Sales of items such as artwork, drawings, photographs, music, electronic greeting cards, “canned” software (see subrule 18.34(1)), entertainment properties (e.g., films, concerts, books, and television and radio programs), and all other digitized products delivered as described above are not taxable, except the exclusion does not repeal by implication the tax on the service of providing pay television. See rule 701—26.56(422). If an order for a product is placed by way of any of the media described above but the product ordered is delivered by conventional, physical means, e.g., the U.S. Postal Service or common carrier, sale of the product is not excluded from tax under this rule.

This rule is intended to implement Iowa Code Supplement section 422.43 as amended by 2002 Iowa Acts, Senate File 2321.

<sup>◇</sup> Two or more ARCs

<sup>1</sup> Effective date of 18.20(5) and 18.20(6) delayed 70 days by the Administrative Rules Review Committee at its meeting held February 10, 1997.

CHAPTER 219  
SALES AND USE TAX ON CONSTRUCTION ACTIVITIES

Rules in this chapter include cross references to provisions in 701—Chapters 15 to 20, 21, 26, 30, 32 and 33 that were applicable prior to July 1, 2004.

**701—219.1(423) General information.** 2005 Iowa Code subsection 423.2(1) imposes a tax upon the sales price from the sales of tangible personal property, consisting of goods, wares or merchandise sold at retail in this state to consumers and users. Also subject to tax are certain enumerated services. Those services relating to the construction industry include carpentry; roof, shingle and glass repair; electrical repair and installation; excavating and grading; house and building moving; laboratory testing; landscaping; machinery operator services; machine repair of all kinds; oilers and lubricators; painting, papering, and interior decorating; pipe fitting and plumbing; wood preparations; termite, bug, roach, and pest eradicators; tin and sheet metal repair; welding; well drilling; and wrecking services. Under Iowa law, contractors are consumers or users of certain tangible personal property. Contractors may also be retailers of tangible personal property and taxable enumerated services. It should be noted that these services are exempt from taxation when performed on or in connection with new construction, reconstruction, alteration, expansion, or remodeling of a building or structure. The services of a general building contractor, architect or engineer are exempt from tax when performed on or in connection with new construction, reconstruction, alteration, expansion, or remodeling of a building or structure. For the purposes of this exemption, a structure is defined as that which is artificially built up or composed of parts joined together in some definite manner and which also has some obvious or apparent functional use or purpose. Nonexclusive examples of structures include buildings; roads, whether paved or otherwise; dikes; drainage ditches; and ponds. See rule 701—219.12(423) relating to structures.

This chapter details the obligation of contractors, contractor-retailers, retailers, and repairpersons to pay or collect sales tax on the sales price from sales of building materials, supplies, equipment, and other tangible personal property and the obligation of these parties to collect tax or claim exemption for their performances of taxable services. How one is classified, whether as a contractor, contractor-retailer, retailer, or repairperson is the basis for determining many of those obligations. It can be very difficult for a person starting a business to determine if that business will be engaged in contracting, retailing, a combination of the two, or providing repair services. However, one status must be chosen. Any reasonable assessment of a new business's status will be honored by the department. A status, once chosen, should not be changed, unless it has become clear from an extended course of dealing that the business has become something other than what it was established to be. For instance, if a business is founded to engage in contracting and purchases construction materials based on the fact that it is a contractor, but the founder must sell construction materials at retail if the business is to survive, and after two years' operation half the revenue is from construction contracts and half from retail sales, then the business has become a contractor-retailer and henceforth should purchase construction materials based on that status. Changing the status of a business from job to job to avoid the obligation to pay or collect tax is not a lawful activity.

2005 Iowa Code section 423.5 imposes a tax that is assessed upon tangible personal property purchased for use in this state and on taxable services which are rendered, furnished or performed in Iowa or where the product or result of such service is used in Iowa. "Use" of tangible personal property in Iowa is defined to mean and include the exercise by any person of any right or power over tangible personal property incident to the ownership of that property.

**701—219.2(423) Contractors—consumers of building materials, supplies, and equipment by statute.** 2005 Iowa Code subsection 423.2(1)"b" provides that sales of building materials, supplies and equipment to owners, contractors, subcontractors or builders for the erection of buildings or the alteration, repair or improvement of real property are retail sales in whatever quantity sold. This means that a contractor, subcontractor, or builder cannot claim an exemption for resale when purchasing building materials or supplies even if the contractor, subcontractor, or builder later separately itemizes

material and labor charges for construction contracts. Building materials and supplies would generally consist of items which are incorporated into real property, lose their identity as tangible personal property and cannot be removed without altering the realty, or which are consumed by the contractor during the performance of the construction contract. See subrules 219.3(1), 219.3(2) and 219.3(3). Building equipment would ordinarily consist of machinery and tools. See subrule 219.3(4). The fact that a contractor, subcontractor or builder holds an Iowa retail sales tax permit and has a tax number does not entitle that person to purchase building materials, supplies and equipment without paying sales tax to the vendor. See rules 701—219.3(423) and 701—219.4(423).

When bidding on a contract, a contractor (general, special or subcontractor) should anticipate that sales or use taxes will increase the cost of materials by the tax unless the sponsor is a designated exempt entity; reference 701—subrule 19.12(5). The necessary allowance should be made in figuring the bid inasmuch as the contractor will be held responsible for paying the tax on building supplies, materials and equipment. The tax should not be identified as a separate item in the formal bid since the contractor cannot charge sales tax.

**701—219.3(423) Sales of building materials, supplies, and equipment to contractors, subcontractors, builders or owners.** Suppliers or dealers that sell materials and supplies to contractors, subcontractors, builders or owners are required to collect Iowa sales tax from those persons based upon the sales price from such sales. Reference 701—subrule 19.12(5), which deals with construction contracts with designated exempt entities, for an explanation of one of the few exceptions to this requirement. The fact that a contractor, subcontractor, or builder holds an Iowa retail sales tax permit and has a tax number does not entitle that person to purchase building materials, supplies and equipment without paying sales tax to the vendor. See rules 701—219.2(423) and 701—219.4(423). Materials purchased out of state for use in Iowa are subject to the Iowa use tax which is payable in the quarter that the materials are delivered into the state.

**219.3(1) Building materials.** The term “building materials” as used in this rule means materials used in construction work, and is not limited to materials used in constructing a building with sides and covering. The term may also include any type of materials used for improvement of the premises or anything essential to the completion of a building or structure for the use intended. *State v. James A. Head & Company, Inc.*, 306 So. 2d 5 (Ala. 1974).

**219.3(2) Building supplies.** The term “building supplies” as used in this rule means anything that is furnished for and used directly in the carrying on of the work of an owner, contractor, subcontractor or builder and which is used or consumed by the contractor. Such items do not have to enter into and become a physical part of the structure like building materials, but they do become as much a part of the structure as the labor which is performed on it. *United States Fidelity & Guaranty Co. v. Feenaughty Machinery Co.*, 85 P.2d 1085, 197 Wash. 569.

**219.3(3) Typical items.** While not intended to be inclusive, the following is a list of typical items regarded as building materials and supplies:

- Asphalt
- Bricks
- Builders’ hardware
- Caulking material
- Cement
- Central air conditioning
- Cleaning compounds
- Conduit
- Doors
- Ducts
- Electric wiring, connections, and switching devices
- Fencing materials
- Flooring<sup>1</sup>
- Glass

Gravel  
Insulation  
Lath  
Lead  
Lighting fixtures  
Lime  
Linoleum<sup>1</sup>  
Lubricants  
Lumber  
Macadam  
Millwork  
Modular and mobile homes  
Mortar  
Oil  
Paint  
Paper  
Piping, valves, and pipe fittings  
Plaster  
Plates and rods used to anchor masonry foundations  
Plumbing supplies  
Polyethylene covers  
Power poles, towers, and lines  
Putty  
Reinforcing mesh  
Rock salt  
Roofing  
Rope  
Sand  
Sheet metal  
Steel  
Stone  
Stucco  
Tile  
Wallboard  
Wall coping  
Water conditioners  
Weather stripping  
Windows  
Window screens  
Wire netting and screen  
Wood preserver

**219.3(4)** *Building equipment.* The term “building equipment” as used in this rule means any vehicle, machine, tool, implement or other device used by a contractor in erecting structures for others, or reconstructing, altering, expanding or remodeling property of others which does not become a physical component part of the property upon which work is performed, and which is not necessarily consumed in the performance of such work. “Building equipment” includes, but is not limited to, such items as:

Compressors  
Drill presses  
Electric generators  
Forms  
Hand tools

Lathes  
Replacement parts for equipment  
Scaffolds  
Tools  
Vehicles including grading, lifting and excavating vehicles

Construction equipment purchased by a contractor which is intended for use in the performance of an Iowa construction contract is subject to the Iowa sales or use tax. Equipment which is rented for use on or in connection with an Iowa construction contract would normally be rented subject to tax. See rule 701—219.21(423) for an explanation of the existing exemption in favor of rented machinery used by a contractor on a job site.

<sup>1</sup> Floor coverings which are shaped to fit a particular room or area and which are attached to the supporting floor with cement, tacks or tack strips or by some other method making a permanent attachment are considered to be building materials. Reference rule 701—16.48(422,423) for an exception concerning carpeting. Carpeting (whether attached to the floor or not) is not treated as a building material for the purposes of this chapter. Rugs, mats and linoleum types of floor coverings which are not attached but which are simply laid on finished floors are also not considered to be building materials.

**701—219.4(423) Contractors, subcontractors or builders who are retailers.** In some instances, contractors, subcontractors and builders are in a dual business which includes reselling to the general public on a recurring “over-the-counter” basis the same type of building materials and supplies which are used by the contractors, subcontractors and builders in their own construction work. A person operating in such a manner is referred to in this rule as a contractor-retailer. Any person who is engaged in the performance of construction contracts and who also sells building materials or other items at retail is obligated to examine the person’s business and determine if it is that of a contractor or a contractor-retailer. A sale by a contractor-retailer of building materials, supplies and equipment which does not provide for installation of the merchandise sold is considered a retail sale and subject to sales tax. Conversely, a sale by a contractor-retailer of building supplies, materials and equipment which provides for installation of the merchandise is considered a construction contract and tax shall be paid by the contractor-retailer based upon the cost of materials at the time the materials are withdrawn from inventory for use in a construction contract performed in Iowa. When a contractor-retailer does repair work, the contractor-retailer is acting as a retailer and not a contractor and must collect tax on the sales price charged for materials used in the repair and on the sales price charged for any labor used in the repair which is a taxable service or on the entire charge if materials and labor are not separately invoiced. Reference rule 701—18.31(422,423) and rule 701—219.13(423).

The following is a list of the characteristics of the usual contractor-retailer:

1. A contractor-retailer is a business which makes frequent retail sales to the public or to other contractors and also engages in the performance of construction contracts (see rule 701—219.8(423)). In determining whether a business is a contractor-retailer or a retailer only, the department looks to the totality of business activity and not only to one portion of the business’s activity. Thus, the maintenance of a small retail outlet does not automatically transform a contractor-retailer into a retailer, and a large number of retail sales without a retail outlet can qualify a business as a contractor-retailer.

2. A business cannot claim the status of a contractor-retailer unless the business is in possession of a valid sales tax permit to report tax due from retail sales and from withdrawals of materials or supplies from inventory for use in construction contracts.

3. A contractor-retailer must purchase building materials, supplies, and equipment placed in its inventory for resale; the contractor-retailer should not pay sales or use tax to its suppliers for these items. Instead, the contractor-retailer should provide suppliers with valid resale exemption certificates. When a valid certificate is furnished, the vendor is relieved from the responsibility of collecting the tax if the purchaser has demonstrated that the purchaser is a contractor-retailer under the provisions of this rule. Reference rule 701—15.3(422,423) and rule 701—219.19(423) for a detailed explanation of this matter.

4. A contractor-retailer purchasing construction material which will not be placed in its inventory must purchase that material subject to Iowa sales or use tax. For example, if a contractor-retailer purchases wet concrete for use in a construction project, that purchase is taxable.

5. A contractor-retailer usually has a retail outlet, but if not, frequent sales to individuals or other contractors qualify a business as a contractor-retailer.

6. Contractor-retailers do not pay tax on materials withdrawn from inventory for use in construction projects performed outside Iowa. See 2005 Iowa Code subsection 423.2(1)“b.”

The business records of a contractor-retailer must clearly reflect the use made of items purchased, and the records must be in such form that the director can readily determine that the proper sales and use tax liability is being reported and paid.

The following examples are offered to illustrate the responsibility for paying and remitting sales tax under this rule:

EXAMPLE 1. ABC Company operates a retail outlet that sells lumber and other building materials and supplies. ABC Company is also a contractor which builds residential and commercial structures. ABC Company would be considered a contractor-retailer and would, therefore, purchase all inventory items for resale. Those items which are used in the performance of a construction contract would be subject to tax in the period that they are withdrawn from inventory. The tax would be computed on the cost of the items withdrawn from inventory. Those items which are sold over the counter in the retail outlets would be subject to tax at the time of sale. The tax would be computed on the over-the-counter sales price.

EXAMPLE 2. EFG Company is a mechanical contractor and has no retail outlets. EFG Company rarely sells any of its inventory to other persons or to other contractors. EFG Company would not be considered a contractor-retailer under this rule. However, EFG Company would be considered a contractor and must pay tax to its vendor at the time it purchases any building materials, supplies and equipment. However, on those rare occasions when an inventory item is sold to another person or to another contractor, tax must be collected at the time of sale; therefore, EFG Company should have a sales tax permit. An adjustment can be made to the sales tax report by taking a credit for tax previously paid on the item sold.

EXAMPLE 3. Home Town Construction Company is owned and operated by two individuals in a rural Iowa farming community. They do not have a retail outlet but they frequently make sales of building materials which are in their inventory to local residents. Home Town Construction Company would be a contractor-retailer and could purchase all inventory items for resale. Those items which are used in the performance of a construction contract would be subject to tax in the period they are withdrawn from inventory. The tax would be computed on the cost of the items withdrawn from inventory. Those items which are sold to residents would be subject to the tax at the time of sale. The tax would be computed on the sales price of the items.

EXAMPLE 4. Down Home Construction Company is operated by two individuals in a rural Iowa farming community. They do not have a retail outlet and rarely make sales of building materials from their inventory to local residents. Down Home Construction Company would not be considered a contractor-retailer under this rule. Rather, Down Home Construction Company would be considered a contractor and must pay tax to its vendor at the time it purchases any building materials, supplies and equipment. When sales are made to local residents, tax must be collected at the time of sale; therefore, Down Home Construction Company should have a sales tax permit. However, Down Home Construction Company can adjust its sales tax report by taking a credit for tax paid to its vendor on an item sold to a local resident.

EXAMPLE 5. Intown Home Construction Company places modular homes on slabs or basement foundations; makes electrical, plumbing and other connections; and otherwise prepares the modular homes for sale as real estate. Intown also has a sales tax permit, maintains an inventory of modular homes for sale, and sells homes from the inventory as tangible personal property to owners who later convert the property to real estate. Intown is a contractor-retailer and is obligated to pay or collect sales tax, respectively, at the time a modular home is withdrawn from inventory for use as material in a construction contract or at the time a modular home is withdrawn from inventory for sale to an owner. See rule 701—231.11(423) for an explanation of the basis on which tax is computed.

EXAMPLE 6. Smith’s Plumbing has a retail store in Davenport, but it also installs plumbing fixtures and lines in new construction and remodeling projects. Plumbing supplies that are taken from an

inventory in Davenport for a new home being built in Rock Island, Illinois, are withdrawn exempt from Iowa sales tax because the construction contract is performed outside Iowa. However, those supplies may be subject to Illinois sales or use tax.

**701—219.5(423) Building materials, supplies, and equipment used in the performance of construction contracts within and outside Iowa.**

**219.5(1)** The use of building materials, supplies, or equipment in the performance of construction contracts by the manufacturer outside Iowa is not a sale of tangible personal property and, therefore, is not a taxable event. The use of tangible personal property as building materials, supplies, or equipment by the manufacturer in the performance of construction contracts in Iowa is a sale at retail and a taxable event. The tax is computed on the manufacturer's fabricated cost or cost of production. See rule 701—219.6(423) for a characterization of the term manufacturer's "fabricated cost."

**219.5(2)** A contractor-retailer's withdrawal of materials from inventory for use in construction contracts outside this state is not a taxable event.

**219.5(3)** A contractor is a consumer by statute. A contractor's purchase of materials for use in a construction contract is subject to tax whether the materials are purchased for use in construction contracts performed in Iowa or outside this state.

**219.5(4)** A manufacturer's purchase of tangible personal property consumed as building material in the manufacturer's or the manufacturer's subcontractor's performance of construction contracts within Iowa is taxable. The tax is computed on the fabricated cost or cost of production of the materials. See rule 701—219.6(423) for a characterization of the term "fabricated cost." The purchase of tangible personal property consumed by a manufacturer as building material in the manufacturer's or the manufacturer's subcontractor's performance of a construction contract outside Iowa is not subject to tax.

**219.5(5)** Reference rule 701—32.8(423) for an exemption from use tax for building materials, supplies, or equipment purchased outside Iowa, brought into this state, and subsequently used in the performance of a construction contract outside this state.

**701—219.6(423) Tangible personal property used or consumed by the manufacturer thereof.** When a person who is primarily engaged in the manufacture of building materials, supplies, or equipment for sale and not for the person's own use or consumption, considering the totality of the business, from time to time uses or consumes the building materials, supplies, or equipment for construction purposes, the person is deemed to be making retail sales to one's self and subject to tax on the basis of the fabricated cost of the items so used or consumed for construction purposes. If equipment, building materials, or supplies are used by a manufacturer in the performance of a construction contract, a "sale" occurs only if the equipment, materials, or supplies are used in the performance of a construction contract in Iowa. For purposes of this rule, the term "fabricated cost" means and includes the cost of all materials as well as the cost of labor, power, transportation to the plant, and other plant expenses but not installation on the job site. *Associated General Contractors of Iowa v. State Tax Commission*, 255 Iowa 673, 123 N.W.2d 922 (1963). Also see rule 701—219.4(423) relating to contractors and rule 701—219.5(423) relating to materials, supplies, and equipment used in construction contracts within and outside Iowa.

**701—219.7(423) Prefabricated structures.**

**219.7(1) Basic concepts and general rules.** A "prefabricated structure" is any structure assembled in a factory and capable of transport to the location where it will be used in the performance of a construction contract by placement on a foundation either by the buyer or a designated contractor. The term "prefabricated structure" includes a "modular home" as defined in rule 701—231.11(423), a mobile home whether or not sold subject to the issuance of a certificate of title, "manufactured housing" (reference definition in rule 701—33.10(423)), sectionalized housing, precut housing packages, and panelized construction. With a few major exceptions (see subrule 219.7(2) regarding the "60 percent rule" and reference rule 701—33.10(423) regarding the taxation of manufactured housing while it is real property), the sales and use tax treatment of prefabricated structures generally follows the treatment of construction materials, that is, tax is due when those structures are sold to or used by owners,

contractors, subcontractors, or builders. Sales of prefabricated structures which have not been erected on a foundation are considered sales of tangible personal property and thus are taxable at the time of retail sale. The usual basis for computing sales or use tax is the purchase price charged to a consumer or user by the seller of a prefabricated structure. *Custom Built Homes Co. v. Kansas State Commission of Revenue and Taxation*, 184 Kan. 31, 334 P.2d 808 (1959). Sales or use tax is due on the full purchase price when a prefabricated structure is delivered under a contract for sale or sold for use in Iowa. *Dodgen Industries Inc. v. Iowa State Tax Commission*, 160 N.W.2d 289 (Iowa 1968).

**219.7(2)** *Exceptions to the general rules.* There are a number of exceptions to the general rules stated above in 219.7(1). Those exceptions are applicable to modular and mobile homes and manufactured housing. They are explained as follows:

*a. Modular homes.* Only 60 percent of the sales price from the sale of a modular home is subject to Iowa tax. See rule 701—231.11(423). This 60 percent rule is applicable only to a “modular home” as that phrase is defined in rule 701—231.11(423) and not to other types of prefabricated structures which do not meet the definition of the term “modular home” such as sectionalized housing or panelized construction. Also, the 60 percent rule is not applicable to the sale of materials used in the assembly of a modular home, only to the sale of the finished product.

*b. Mobile homes and manufactured housing.* Iowa use tax and not Iowa sales tax is imposed on mobile homes or manufactured housing sold subject to the issuance of a certificate of title, and, similar to 219.7(2) “a” above, use tax is imposed only upon 60 percent of the purchase price of these mobile homes or manufactured housing. Reference rule 701—32.3(423). All mobile homes sold in Iowa or sold outside Iowa for use in this state are sold subject to Iowa use tax, whether sold for placement within or outside a mobile home park; see 2005 Iowa Code chapter 423 and Iowa Code chapter 435.

**219.7(3)** *Tax consequences of sales of modular homes by various parties, some operating in a dual capacity.*

*a.* A retailer (dealer) that is not additionally a contractor or manufacturer of modular homes purchases those homes tax-free from a wholesaler or manufacturer for subsequent resale to contractors or owners. Tax must be collected when the dealer sells the modular home to an owner or contractor.

*b.* A contractor that is not a dealer must pay tax when purchasing a modular home for use in a construction contract or for some other purpose. A contractor’s sale of a modular home to an owner or another contractor is treated as explained in Examples 2 and 4 of rule 701—219.4(423).

*c.* A dealer that is also a contractor will purchase homes tax-free for inclusion in its inventory. Tax is imposed when the dealer withdraws a home from inventory for sale or use in the performance of a construction contract as explained in rule 701—219.4(423).

*d.* A manufacturer that acts as its own dealer and sells its own modular homes at retail to contractors or owners will collect tax on the sales price from its sales of those modular homes to its customers. This situation is in contrast to that described in subrule 701—219.7(4) in which a manufacturer uses its own modular homes in the performance of construction contracts and the tax due is computed on a sum other than the sales price from the sale of a home.

What is stated in this subrule concerning sales of modular homes is generally applicable to the use tax on mobile homes and manufactured housing. However, one distinct difference is that mobile homes and manufactured housing are seldom, if ever, purchased by a dealer for any subsequent use in the performance of construction contracts. A dealer will often purchase a mobile home or manufactured housing for subsequent resale to a customer as tangible personal property and then will place or install the mobile home or manufactured housing on a site prepared by the customer. This is not the performance of a construction contract (see rule 701—219.8(423)), and the dealer is a retailer who installs tangible personal property and is not a construction contractor.

**219.7(4)** *Manufacturers who perform construction contracts.* When companies whose principal business is the manufacture of prefabricated structures use those structures in the performance of construction contracts, this use is treated as a retail sale of the structures on the manufacturer’s part. See rule 701—219.6(423) for a detailed description of the sales tax treatment of this sort of transaction. The 60 percent rule (see 219.7(2) above) is not applicable when calculating the amount of tax owed by a manufacturer.

**219.7(5) Examples.** The following examples are intended to illustrate who must collect or remit sales or use tax when a manufacturer sells a modular home to a contractor or owner or acts as a contractor in erecting the home. The incidence of tax depends on several factors, such as the nature of the manufacturer's business, the point of delivery, the contractual agreement for erection and whether or not a sale for resale has occurred.

EXAMPLE 1. The manufacturer is located outside Iowa. The manufacturer contracts with an Iowa customer to build a home in the manufacturer's factory. The manufacturer also contracts to completely erect the home, install the furnace, and do electrical and other necessary work to make the home ready for occupancy. The main source of the manufacturer's income relates to on-site construction. The manufacturer has paid a sales tax equal to Iowa tax in its state of residency. The manufacturer would be considered to be performing a construction contract in Iowa and would owe use tax in Iowa; however, a sales tax credit would be allowed for tax paid to the other state.

EXAMPLE 2. The manufacturer is located outside Iowa. An Iowa unrelated builder/dealer contracts with the customer for the home and then contracts with the manufacturer for construction, delivery, and installation on the customer's foundation. The manufacturer delivers the home into Iowa on the manufacturer's own truck. The customer, by contractual agreement, is obligated to pay for the home on delivery of the property, so the sale takes place in Iowa. In this situation, the manufacturer is involved in the sale of tangible personal property rather than the sale of real estate and must collect Iowa sales tax on 60 percent of the sales price to the Iowa builder/dealer.

EXAMPLE 3. The manufacturer is located outside Iowa. The manufacturer contracts to sell a home to a customer (owner) in Iowa. The manufacturer hires a common carrier to deliver the home to the Iowa customer. The manufacturer has no activity in Iowa that would create a "nexus" requiring the manufacturer to collect Iowa tax. In this situation, the Iowa customer is required to remit use tax on 60 percent of the purchase price of the home.

EXAMPLE 4. The manufacturer may be located in Iowa or outside Iowa. The manufacturer sells a home to a dealer in Iowa that will resell the home to the final customer. The manufacturer may deliver the home, or delivery may be made by a common carrier. The manufacturer has no contractual obligation for erection. In this situation, the manufacturer is making a sale for resale and is not required to collect tax. The manufacturer must have a valid resale certificate on file from the dealer. The dealer, if in Iowa, would be required to collect tax when the home is sold.

EXAMPLE 5. The manufacturer is located in Iowa. The manufacturer contracts to furnish, deliver, and perform the setup on a home in a state other than Iowa. The manufacturer withdraws the home from inventory and transports the home to the other state for setup. In this situation, the Iowa manufacturer does not owe any Iowa tax because 2005 Iowa Code subsection 423.2(1) "b" exempts building materials and supplies that manufacturers withdraw from inventory for construction outside Iowa.

EXAMPLE 6. The manufacturer is located in Iowa. The manufacturer sells a home to an Iowa customer and agrees, under separate contract, to transport the home to the job site and perform the setup. The manufacturer should collect tax on 60 percent of the sales price of the home. The customer also wants a garage. The manufacturer agrees to sell the lumber, nails, and shingles to the customer who would build the garage. This sale would be considered a sale at retail, and the manufacturer should collect tax on the entire sales price of these materials. The same would be true if the manufacturer sold appliances separate from the sale of the home; sales tax would be due on the entire sales price of the appliances.

EXAMPLE 7. The manufacturer may be located inside or outside Iowa. The manufacturer sells a modular home to a dealer that is a general contractor. The dealer subcontracts the work of placing the home on a foundation to various third parties, which transport the home to its site, excavate for and pour the concrete slab, and perform plumbing, electrical hookup, and all other services which are part of the construction contract for placing the modular home at its location. Since the sale of the modular home is to a dealer that is a contractor, the manufacturer will collect and the dealer will pay tax on 60 percent of the modular home's invoice price.

**701—219.8(423) Types of construction contracts.** The term “construction contract” is defined as an agreement under the terms of which an individual, corporation, partnership or other entity agrees to furnish the necessary building or structural materials, supplies, equipment or fixtures and to erect the same on the project site for a second party known as a sponsor. Nonexclusive examples of the types of construction contracts include: lump-sum contracts; cost plus contracts; time and material contracts; unit price contracts; guaranteed maximum or upset price contracts; construction management contracts; design built contracts; and turnkey contracts.

The following is a nonexclusive list of activities and items which could fall within the meaning of a construction contract or are generally associated with new construction, reconstruction, alteration, or expansion of a building or structure. The list is provided merely for the purpose of illustration. It should not be used to distinguish machinery and equipment from real property or structures since such a determination is factual. See rules 701—219.11(423) and 701—219.12(423) for details.

- Ash removal equipment (installed as distinguished from portable units)
- Automatic sprinkler systems (fire protection)
- Awnings and venetian blinds which become attached to real property
- Boilers (installed as distinguished from portable units)
- Brick work
- Builder’s hardware
- Burglar alarm and fire alarm fixtures
- Caulking materials work
- Cement work
- Central air conditioner installation
- Coal handling equipment (installed as distinguished from portable units)
- Concrete work
- Counters, lockers (installed as distinguished from portable units), and prefabricated cabinets
- Drapery installation
- Electric conduit work and items relating thereto
- Electric distribution lines
- Electric transmission lines
- Floor covering which is permanently installed—see rule 701—16.48(422,423) for an exception to this regarding carpeting
- Flooring work
- Furnaces, heating boilers and heating units
- Glass and glazing work
- Gravel work (excluding landscaping)
- Installation of modular homes on foundations
- Lathing work
- Lead work
- Lighting fixtures
- Lime work
- Lumber and carpenter works
- Macadam work
- Millwork installation
- Mortar work
- Oil work
- Paint booths and spray booths (installed as distinguished from portable units)
- Painting work
- Paneling work
- Papering work
- Passenger and freight elevators
- Piping valves and pipe fitting work
- Plastering work

- Plumbing work
- Prefabricated cabinets, counters, and lockers (installed as opposed to portable units)
- Putty work
- Refrigeration units (central plants installation as distinguished from portable units)
- Reinforcing mesh work
- Road construction (concrete, bituminous, gravel, etc.)
- Roofing work
- Sheet metal work
- Sign installation (other than portable sign installation)
- Steel work
- Stone work
- Stucco work
- Tile work—ceiling, floor and walls
- Underground gas mains
- Underground sewage disposal
- Underground water mains
- Vault doors and equipment
- Wallboard work
- Wall coping work
- Wallpaper work
- Water heater and softener installation
- Weather stripping work
- Wire net screen work
- Wood preserving work

**701—219.9(423) Machinery and equipment sales contracts with installation.** Machinery and equipment sales contracts with installation are transactions which are considered a sale of tangible personal property to a final consumer. Therefore, the individual who sells the equipment with installation must purchase the machinery and equipment tax-free as a purchase for resale. This rule should not be confused with subrule 219.3(3) regarding building equipment. The contract should itemize the sales tax separately. If a contractor wishes to avoid an itemization of sales and use tax on machinery and equipment which remains tangible personal property, the contractor can do so by figuring the tax as a general overhead expense and including a statement in the contract and related invoices that “sales tax is included in the contract price.”

If the sales transaction is one completed out of state and shipped in interstate commerce to a consumer or a user in Iowa, and not otherwise exempt from tax, the final purchaser is required to pay Iowa use tax on the purchase price of the machinery and equipment.

In a “mixed contract” (a construction contract mingled with a machinery and equipment sales contract), the elements of the contract should be separated for sales tax purposes. See rule 701—219.10(423).

Certain services which are enumerated in 2005 Iowa Code section 423.2 are subject to tax when performed under a contract for the installation of machinery and equipment which is not done in connection with new construction, reconstruction, alteration, expansion or remodeling of a building or structure. Reference rule 701—15.14(422,423) relating to installation charges. Examples of the enumerated services are: electrical installation; plumbing; welding; and pipe fitting. Other labor charges for job site installation which do not involve a taxable enumerated service are not subject to tax if the charges are separately contracted or, if no written contract exists, are separately itemized on the billing from the seller to the purchaser.

**EXAMPLE.** Company B contracts with Company A to furnish and install a portable conveyor unit in Company A’s new building. Company B can purchase the portable conveyor unit tax-free because the portable conveyor unit maintains its identity as tangible personal property after installation and does not become a component part of the real property. Company B would then charge tax to Company A on

the sale of the portable conveyor unit. Installation charges would be part of the total sales price subject to tax unless they are separately contracted or, if no written contract exists, separately itemized on the billing from Company B to Company A.

**701—219.10(423) Construction contracts with equipment sales (mixed contracts).** Construction contracts with equipment sales, commonly known as mixed contracts, place a dual burden on the contractor, as a contractor is a consumer of construction materials and also a retailer of the machinery and equipment. As a consumer by statute of construction building materials, supplies, and building equipment, a contractor is required to pay sales tax to the supplier at the time of purchase or remit use tax to the department if purchasing building materials, supplies, and building equipment from an out-of-state supplier. Reference 701—Chapter 30 of the rules regarding use taxes. Machinery and equipment must be purchased for resale by the contractor if the machinery and equipment does not become real property. This means that the contractor does not pay tax to a supplier at the time of purchase of machinery and equipment, but instead, the contractor is responsible for collecting sales tax on the sales price from a sponsor and remitting it to the department.

EXAMPLE. Company A contracts with Company B to have Company B build a new building and install all of the production machinery and equipment for the new building. Company B must pay tax on its purchases of building materials and supplies which lose their identity as tangible personal property and become a component part of the real property. Company B also purchases some refrigeration units for the new building which maintain their identity as tangible personal property. These units must be purchased tax-free by Company B because they will be resold. Company B would then charge Company A the tax on the units which retain their identity as tangible personal property. The installation charges for the units which remain as tangible personal property would be part of the total sales price subject to tax unless they are separately contracted or, if no written contract exists, are separately itemized on the billing from Company B to Company A.

When a mixed construction contract is let for a lump-sum amount, the machinery and equipment furnished and installed shall be considered, for the purposes of this rule only, as being sold by the contractor for an amount equal to the cost of the machinery and equipment.

Persons required to collect sales tax in Iowa under machinery and equipment contracts or a mixed contract are required to have a sales tax or a retailer's use tax permit.

**701—219.11(423) Distinguishing machinery and equipment from real property.** A construction contract may include many activities, but it does not include a contract for the sale and installation of machinery or equipment. Machinery and equipment includes property that is tangible personal property when it is purchased and remains tangible personal property after installation. Generally, tangible personal property can be moved without causing damage or injury to itself or to the structure, it does not bear the weight of the structure, and it does not in any other manner constitute an integral part of a structure. For exemptions related to the sale of computers, machinery, and equipment if the sale occurs as part of a contract entered into on or after July 1, 2016, see rules 701—230.14(423) to 701—230.22(423).

**219.11(1)** The following is a list of property that, under normal conditions, remains tangible personal property after installation. The list is nonexclusive and is offered for illustrative purposes only:

*a.* Furniture, radio and television sets and antennas, washers and dryers, portable lamps, home freezers, portable appliances and window air-conditioning units.

*b.* Portable items such as casework, tables, counters, cabinets, lockers, athletic and gymnasium equipment, and other related easily movable property attached to the structure.

*c.* Machinery, equipment, tools, appliances, and materials used exclusively as such by manufacturers, industrial processors and others performing a processing function with the items, including:

(1) Computers, machinery, and equipment directly and primarily used in processing by a manufacturer (see rule 701—230.15(423)).

(2) Computers, machinery, and equipment directly and primarily used to maintain the integrity of the product or to maintain unique environmental conditions required for either the product or the computers, machinery, and equipment used in processing by a manufacturer (see rule 701—230.16(423)).

(3) Computers, machinery, and equipment directly and primarily used in research and development of new products or processes of processing (see rule 701—230.17(423)).

(4) Computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise (see rule 701—230.18(423)).

(5) Computers, machinery, and equipment directly and primarily used in recycling or reprocessing of waste products (see rule 701—230.19(423)).

(6) Pollution-control equipment used by a manufacturer, including but not limited to that required or certified by an agency of Iowa or the United States government (see rule 701—230.20(423)).

*d.* Office, bank, and savings and loan association furniture and equipment, including office machines.

*e.* Radio, television, and cable television station equipment, but not broadcasting towers.

*f.* Certain equipment used by restaurants and in institutional kitchens; for instance, dishwashers, stainless steel wall cabinets, stainless steel natural gas stoves, stainless steel natural gas convection ovens, and combination ovens and steamers with stands. This paragraph is not applicable to similar items used in residential kitchens. See Petition of Taylor Industries Inc. (Dkt No. 94-30-6-0367, 3-14-95).

**219.11(2)** The following is a list of property that, under normal conditions, becomes a part of realty. The list is nonexclusive and is offered for illustrative purposes only:

*a.* Boilers and furnaces.

*b.* Built-in household items such as kitchen cabinets, dishwashers, sinks (including faucets), fans, garbage disposals, and incinerators.

*c.* Buildings, and structural and other improvements to buildings, including awnings, canopies, foundations for machinery, floors (including computer room floors), walls, general wiring and lighting facilities, roofs, stairways, stair lifts, sprinkler systems, storm doors and windows, door controls, air curtains, loading platforms, central air-conditioning units, building elevators, sanitation and plumbing systems, decks, and heating, cooling and ventilation systems.

*d.* Fixed (year-round) wharves and docks.

*e.* Improvements to land including patios, retaining walls, roads, walks, bridges, fencing, railway switch tracks, ponds, dams, ditches, wells, underground irrigation systems, drainage, storm and sanitary sewers, and water supply lines for drinking water, sanitary purposes, and fire protection. See rule 701—226.10(423) relating to drainage tile.

*f.* Mobile and modular homes installed on foundations.

*g.* Planted nursery stock.

*h.* Residential water heaters, water softeners, intercoms, garage door opening equipment, pneumatic tube systems, and music and sound equipment (except portable equipment).

*i.* Safe deposit boxes, drive-up and walk-up windows, night depository equipment, remote TV auto teller systems, vault doors, and camera security equipment (except portable equipment).

*j.* Seating in auditoriums and theaters and theater stage lights (except portable seating and lighting).

*k.* Swimming pools (wholly or partially underground (except portable pools)).

*l.* Truck platform scale foundations.

*m.* Walk-in cold storage units that become a component part of a building.

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—219.12(423) Tangible personal property that becomes structures.** Items that are manufactured as tangible personal property can, by their nature, become structures. However, the determination is factual and must be made on an item-by-item basis. For exemptions related to the sale of computers, machinery, and equipment occurring as part of a contract entered into on or after July 1, 2016, see rules

701—230.14(423) to 701—230.22(423). The following is a listing of criteria that courts have used in making such a determination:

1. The degree of architectural and engineering skills necessary to design and construct the structure.
2. The overall scope of the business and the contractual obligations of the person designing and building the structure.
3. The amount and variety of materials needed to complete the structure, including the identity of materials prior to assembly and the complexity of assembly.
4. The size and weight of the structure.
5. The permanency or degree of annexation of the structure to other real property which would affect its mobility.
6. The cost of building, moving or dismantling the structure.
7. For property sold as part of a contract entered into on or after July 1, 2016, computers, machinery, or equipment used for an exempt purpose under Iowa Code section 423.3(47) remains tangible personal property. See rules 701—230.14(423) to 701—230.22(423).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—219.13(423) Tax on enumerated services.** The tax on the services enumerated in 2005 Iowa Code section 423.2 is basically a tax on labor. When such services are performed on or connected with new construction, reconstruction, alteration, expansion or remodeling of real property or structures, the services are exempt from tax. Neither the repair nor the rental of machinery on the job site is exempt from tax under this rule. See rule 701—219.21(423) for an explanation of the exemption in favor of rented machinery used by a contractor on a job site.

The distinction between a repair (see subrule 219.13(1)) and new construction, reconstruction, alteration, expansion and remodeling activities (see subrule 219.13(2)) can, oftentimes, be difficult to grasp. Therefore, the intent of the parties and the scope of the project may become the factors which determine whether certain enumerated services are taxable. An area of particular difficulty is the distinction between repair and remodeling. Remodeling a building or other structure means much more than making repairs or minor changes to it. Remodeling is a reforming or reshaping of a structure or some substantial portion of it to the extent that the remodeled structure or portion of the structure is in large part the equivalent of a new structure or part thereof. See *Board of Commissioners of Guadalupe County v. State*, 43 N.M. 409, 94 P.2d 515 (1939) and *City of Mayville v. Rosing*, 19 N.D. 98, 123 N.W. 393 (1909).

**219.13(1)** Repair is synonymous with mend, restore, maintain, replace and service. A repair contemplates an existing structure or tangible personal property which has become imperfect and constitutes the restoration to a good and sound condition. A repair is not a capital improvement; that is, it does not materially add to the value or substantially prolong the useful life of the property.

2005 Iowa Code section 423.1(42) defines a person engaged in the business of performing taxable services as a retailer. Since retailers may purchase building materials, supplies and equipment for resale, persons making taxable repairs (repairpersons and servicepersons) are not considered to be contractors and are not subject to the provisions of 2005 Iowa Code subsection 423.2(1)“b.” In addition, such persons are not considered to be owners, subcontractors or builders. Repairpersons and servicepersons will normally purchase building materials and supplies free of tax for subsequent resale to their customers; contractor-retailers will also do this. However, contractors, subcontractors or builders who may make repairs are subject to 2005 Iowa Code subsection 423.2(1)“b” and must pay tax at the time building materials, supplies and equipment are purchased from vendors even though the contractors, subcontractors or builders hold a valid sales tax permit. See rules 701—219.2(423) and 701—219.3(423). In determining who is a contractor and who is a retailer of repair services, the department looks to the total business of the entity in question and not to any one portion of it. Thus, the fact that a business whose overall activity is contracting has a division engaged in taxable repair services does not transform that business into a retailer providing services rather than a contractor. When contractors do repair work, they may separately itemize labor and materials charges and collect

sales tax on all charges. A contractor's markup on a materials charge is part of any taxable sale. A contractor can take a credit for any tax paid on the purchase of materials that are sold as part of a service transaction.

When other persons making repairs sell tangible personal property at retail in connection with any taxable service enumerated in 2005 Iowa Code section 423.2, those persons shall collect and remit tax on the sales price. The person making repairs shall purchase tangible personal property for resale when the property is used in the repair job and is resold to a customer. Reference rule 701—18.31(422,423) for an explanation of when persons performing services sell the property that the persons use in performing those services to their customers. Nonexclusive examples of repair situations are as follows:

- a. Repair of broken or defective glass.
- b. Replacement of broken, defective or rotten windows.
- c. Replacing individual or damaged roof shingles.
- d. Replacing or repairing a segment of worn-out or broken kitchen cabinets.
- e. Repair or replacement of broken or damaged garage doors or garage door openers.
- f. Replacing or repairing a part of a broken or worn tub, shower, or faucets.
- g. Replacing or repairing a broken water heater, furnace or central air conditioning compressor.
- h. Restoration of original wiring in a house or building.

**219.13(2)** The following are examples of new construction, reconstruction, alteration, expansion and remodeling activities:

- a. The building of a garage or adding a garage to an existing building would be considered new construction.
- b. Adding a redwood deck to an existing structure would be considered new construction.
- c. Replacing a complete roof on an existing structure would be considered reconstruction or alteration.
- d. Adding a new room to an existing building would be considered new construction.
- e. Adding a new room by building interior walls would be considered alteration.
- f. Replacing kitchen cabinets with some modification would be considered an improvement.
- g. Paneling existing walls would be considered an improvement.
- h. Laying a new floor over an existing floor would be considered an improvement.
- i. Rebuilding a structure damaged by flood, fire or other uncontrollable disaster or casualty would be considered reconstruction.
- j. Building a new wing to an existing building would be considered an expansion.
- k. Rearranging the interior physical structure of a building would be considered remodeling.
- l. Installing manufactured housing or a modular or mobile home on a foundation would be considered new construction. However, reference rule 701—33.10(423) for a description of the special treatment of taxable installation charges when the taxable sale of manufactured housing as real estate occurs.
- m. Replacing an entire water heater, water softener, furnace or central air conditioning unit.
- n. Sign installation and well-drilling services are generally performed in connection with new construction.

In all the examples, the contractor is responsible for paying tax to any supplier on materials. However, there would be no tax on any enumerated services.

**219.13(3)** "*On or connected with.*" The term "on or connected with" is broad and should be used to convey generally accepted meaning. Therefore, in a specific situation, the facts relating thereto are controlling in determining whether the exemption is applicable. "On or connected with" does not connote that those things connected have to be primary or subsidiary to the construction, reconstruction, alteration, expansion or remodeling of the real property.

a. *Incidental relationship.* An incidental relationship can qualify the activity for exemption if the relationship forms an intimate connection with the construction activity. For example, the service of excavating and grading relating to the clearing of land to begin construction of a building would qualify for the exemption; however, excavating and grading land without motive toward construction would not

qualify for exemption even though at some later date plans to construct a building were created and a structure was actually erected.

*b. Proximity in time.* The presence of a time relationship can also be a factor in determining the applicability of exemption. For example, tax would not apply to separate labor charges relating to the installation of institutional kitchen equipment in a building while remodeling of the real property was in progress. (Tax could apply to the sales price of the institutional kitchen equipment; see rule 701—230.14(423)). However, if a year after all construction activity has ended, the owner decides to install a piece of institutional kitchen equipment in the building, any taxable enumerated services relating thereto would be subject to tax. Further, if, following construction, the land is graded for the purpose of seeding a new lawn, the exemption would be applicable. However, if the lawn does not grow and the land is regraded the following year, the exemption would not be applicable. Therefore, the motive behind the activity and the course of events that could reasonably be expected to occur would be a further consideration in determining if the exemption is applicable.

*c. Physical proximity.* A physical relationship is also a factor that should be evaluated. If a building is constructed to house machinery, any enumerated services relating to the installation of that machinery would be exempt from tax. For example, piping joining two pieces of equipment housed in separate buildings would qualify for exemption if the equipment in either building was installed while such new construction, reconstruction, alteration, expansion or remodeling to the structure was also taking place to house the equipment.

*d. Totality of the facts and circumstances.* An incidental relationship, a time relationship, and close physical proximity may not be enough to support the conclusion that a taxable service is performed in connection with new construction or reconstruction. For example, a homeowner hires a general contractor to add a new room to an existing home (which is new construction; see 219.13(2) “d”). The existing home is in need of a number of the repairs described in subrule 219.13(1); for example, it is in need of rewiring and replacement of a broken window. The general contractor rewires the home and repairs the window in addition to building the new room. The taxable services which the general contractor performs while rewiring the home and repairing the window are not performed in connection with the construction of the new room simply because those services happen to be performed at the same time and on the same home as the new construction. If the addition of the new room were the cause of the need for the taxable service (e.g., the window was broken during construction of the new room) and not just a convenient occasion for performance of the service, that performance would be exempt from tax. The facts and motives are important in the determination of the taxability of services relating to construction activities. However, it should also be noted that taxes on enumerated services are applicable to repair or installation work that is not a construction activity. See subrule 219.13(1) relating to persons who make repairs or perform enumerated services for more information.

**219.13(4)** Excavating includes digging, hollowing out, scooping out, or making a hole in the earth. It also includes removal of materials or substance found beneath the surface. Grading includes a change in the earth’s structure by scraping and filling to a common level or a fixed line known as a grade. The enumerated services of excavating and grading are not subject to tax if performed on or connected with new construction. Removal of overburden which is directly related to road building, building of dikes, building of farm ponds, and creating drainage ditches would not be taxable as such activities would be considered on or connected with the creation of a structure. See *Maasdam v. Kirkpatrick*, 214 Iowa 1388 (1932). However, the mere removal of overburden, without more, would be taxable as the enumerated service of excavating or grading under 2005 Iowa Code subsection 423.2(6).

**219.13(5)** Services associated with new construction or reconstruction, for example, which are not taxable include, but are not limited to, brick laying, concrete finishing, tiling, siding installation, laying of linoleum and other flooring and carpet installation. No tax can be collected on the performance of these services even when they are furnished in connection with the performance of repairs.

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—219.14(423) Transportation cost.** Transportation charges and delivery charges are not subject to the Iowa sales and use tax when they are separately contracted or, if no written contract exists, are separately itemized on the billing from the seller to the purchaser. Reference rule 701—15.13(422,423).

**701—219.15(423) Start-up charges.** Start-up charges are not subject to the Iowa sales and use tax when they are separately contracted or, if no written contract exists, are separately itemized on the billing from the seller to the purchaser.

**701—219.16(423) Liability of subcontractors.** A subcontractor who is providing materials and labor on the actual construction of the building or structure has the same status and tax responsibilities as a general contractor under the Iowa statutes. However, where an individual or firm is hired to provide machinery and equipment to a general contractor or another subcontractor, the individual or firm is considered a material supplier rather than a subcontractor. This is true even though the machinery and equipment are supplied with installation. Items of machinery and equipment sold by material suppliers to contractors shall be sold for resale and the contractor must provide the material supplier with a valid resale certificate.

**701—219.17(423) Liability of sponsors.** The sponsor cannot be held responsible for a tax liability incurred on building materials, supplies and equipment by a general contractor or subcontractor in the completion of a construction contract. Likewise, a general contractor cannot be held responsible for the tax liability incurred on building materials, supplies and equipment by a subcontractor in the completion of a construction contract. The tax responsibility regarding machinery and equipment contracts depends on where the sale was consummated. If the sale was consummated in Iowa, the seller is responsible for the collection and remittance of tax unless a valid exemption certificate is given by the purchaser. If the sale was consummated outside Iowa and the seller does not remit use tax to the department, then a use tax would be due from the Iowa user.

**701—219.18(423) Withholding.** A sponsor of a contract with a nonregistered out-of-state (nonresident) contractor may be asked to withhold the final payment of the contract as a guarantee that sales and use taxes will be paid. The withholding requirement may also apply to registered out-of-state contractors at the discretion of the department. The department will issue a notice to the sponsor to support the withholding of funds. In order to seek a release of the notice, the out-of-state contractor is required to file a report with the department consisting of the following departmental forms:

1. Form 35-012, which is a listing of subcontractors to whom the out-of-state contractor has awarded a construction contract. This statement should be submitted on each project as it becomes available.

2. Form 35-013, which is a list of material suppliers both in state and out of state from whom tangible personal property has been purchased for use in completing each project or contract.

3. Form 35-001, which is a summary of the provisions of the actual contract.

All letters of release furnished by the department are subject to audit and, therefore, are not unconditional release from any Iowa sales or use tax liability. All letters of release will be issued within 60 days upon receipt of the proper information unless an error or discrepancy is noted.

**701—219.19(423) Resale certificates.** Whenever machinery and equipment which will remain tangible personal property after installation is purchased for a machinery and equipment contract by a contractor from a supplier or a material supplier, it should be purchased for resale. See rule 701—219.9(423). Resale purchases are most commonly related to machinery and equipment sales contracts with installation and mixed construction contracts. Contractor-retailers and persons making repairs may also purchase materials for resale as long as they collect tax on their retail sales and pay the tax themselves on items withdrawn from inventory for use in the performance of a construction contract. See rule 701—219.4(423) and subrule 219.13(1). Resale certificates can be obtained by contacting the Iowa department of revenue. Reference rule 701—15.3(422,423) for detailed information on resale certificates.

**701—219.20(423) Reporting for use tax.** An Iowa contractor can report use tax either on a consumer's use tax return or as consumed goods on a sales tax return. Tax is due in the quarter the materials are delivered into Iowa. Nonresident contractors should report use tax on a consumer's use tax return. Consumer's use tax returns for nonresident contractors must be obtained directly from the department of revenue unless the contractor is registered with the department.

**701—219.21(423) Exempt sale, lease, or rental of equipment used by contractors, subcontractors, or builders.**

**219.21(1) Exempt lease or rental of machinery and equipment.** On and after July 1, 2004, the sales price on the lease or rental only of the following types of machinery and equipment is exempt from tax: all machinery, equipment, and replacement parts directly and primarily used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures and all machinery, equipment, and replacement parts which improve the performance, safety, operation, or efficiency of the equipment and replacement parts so used. A contractor's, subcontractor's, or builder's purchases of this equipment would continue to be taxable, as would a lessor's purchases of machinery, equipment, or replacement parts for subsequent exempt rental to a contractor, subcontractor, or builder. Reference rule 701—26.18(422,423) for an extensive explanation of this matter.

**219.21(2) Exempt sales, including lease or rental of equipment.** Beginning July 1, 2005, the sales price on the sale in any form, including lease or rental, of the following types of equipment is exempt from the tax imposed by Iowa Code chapter 423: self-propelled building equipment, self-constructed cranes, pile drivers, structural concrete forms, regular and motorized scaffolding, generators, or attachments customarily drawn or attached to those items of equipment, including auxiliary attachments which improve the performance, safety, operation, or efficiency of the equipment and replacement parts and are directly and primarily used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures. The sales price from a sale in a form other than that of a lease or rental is not exempt from all excise tax. See 701—Chapter 241, division II, for an explanation of the new excise tax imposed on these transactions as of July 1, 2005.

These rules are intended to implement 2005 Iowa Code subsections 423.1(42), 423.2(1) "b" and "c," 423.2(6), 423.3(64), and 423.5(2) and 2005 Iowa Code Supplement subsections 423.3(37) and 423.3(85).

IAB 1/6/16, effective 2/10/16]

CHAPTER 230  
EXEMPTIONS PRIMARILY BENEFITING MANUFACTURERS AND  
OTHER PERSONS ENGAGED IN PROCESSING

Rules in this chapter include cross references to provisions in 701—Chapters 15, 18 and 26 that were applicable prior to July 1, 2004.

**701—230.1** Reserved.

**701—230.2(423) Carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, and taxable services used in processing.** An expanded definition of “processing” is allowed to manufacturers of food products for human consumption using carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, and taxable services. For the purposes of this rule, the rental or leasing of tangible personal property is treated as the furnishing of a taxable service and not as the sale of tangible personal property.

**230.2(1)** “Manufacturer” characterized. A manufacturer is a person or entity different from a merchant, dealer, or retailer. See *Commonwealth v. Thackara Mfg. Co.*, 27 A. 13 (Pa. 1893). In order for a business to be a manufacturer, the principal business of that business must be manufacturing. See *Associated General Contractors v. State Tax Commission*, 123 N.W.2d 922 (Iowa 1963). Another distinction is that a merchant or retailer sells in order to earn a profit and a manufacturer sells to take profits already earned from prior activity. See *State v. Coastal Petrol Inc.*, 198 So. 610 (Ala. 1940). A person primarily engaged in selling tangible personal property in order to earn a profit and only incidentally engaged in creating products suitable for use from raw materials is not a manufacturer. A retail grocery store, incidentally and not primarily engaged in manufacturing activities such as meat cutting or production and packaging of baked goods, is not a “manufacturer of food products for human consumption” and is not entitled to claim the special processing exemption allowed to those manufacturers. Retail food stores, restaurants, and other persons incidentally engaged in food manufacturing activities can, however, continue to claim on their incidental processing activities the processing exemption allowed to persons who are not manufacturers of food products for human consumption. See rule 701—230.3(423).

**230.2(2)** The following activities constitute processing when performed by a manufacturer to create food products for human consumption. Any carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, or other taxable services primarily used in the performance of these activities is exempt from tax.

*a.* Treatment of material that changes its form, context, or condition in order to produce a marketable food product for human consumption. “Special treatment” of the material to change its form, context, or condition is not necessary to lawfully claim the exemption. Examples of “treatment” which would not be “special” are the following: the washing, sorting and grading of fruits or vegetables; the washing, sorting, and grading of eggs; and the mixing or agitation of liquids. By way of contrast, sterilization would be “special treatment.”

*b.* Maintenance of the quality or integrity of the food product and the maintenance or the changing of temperature levels necessary to avoid spoilage or to hold the food in marketable condition. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or other taxable service used in freezers, heaters, coolers, refrigerators, or evaporators used in cooling or heating which holds the food product at a temperature necessary to maintain quality or integrity or to avoid spoilage of the food or to hold the food product in marketable condition is exempt from tax. It is not necessary that the taxable service be used to raise or lower the temperature of the food. Also, processing of food products for human consumption does not cease when the food product is in marketable form. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used to maintain or to change a temperature necessary to keep the product marketable is exempt from tax.

*c.* Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or other taxable service primarily used in the maintenance of environmental conditions necessary for the safe or efficient use of machinery or material used to produce the food product is exempt from tax. For example, electricity used to air-condition a room in which meat is stored is exempt from tax if the purpose of the air conditioning is

to maintain the meat in a condition in which it is easy to slice rather than for the comfort of the employees who work in the room.

*d.* Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service primarily used in sanitation and quality control activities is exempt from tax. Nonexclusive examples exempt from tax include taxable services used in pH meters, microbiology counters and incubators used to test the purity or sanitary nature of a food product. For example, electricity used in egg-candling lights would be exempt from tax. Also, electricity, steam, or any taxable service used to power equipment which cleans and sterilizes food production equipment would be exempt from tax. Electricity used to power refrigerators used to store food samples for testing would be exempt from tax. Finally, electricity used to power “bug lights” or other insect-killing equipment used in areas where food products are manufactured or stored would be exempt from tax.

*e.* Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used in the formation of packaging for marketable food products for human consumption is exempt from tax. For example, electricity used in plastic bottle-forming machines by a food manufacturer is exempt from tax if the plastic bottles will be used to hold a marketable food product, such as milk. Any electricity, steam, or other taxable service used in the heating, compounding, liquefying and forming of plastic pellets into these plastic bottles is exempt.

*f.* Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used in placement of the food product into shipping containers is exempt from tax. For example, electricity used by a food manufacturer to place food products into packing cases, pallets, crates, shipping cases, or other similar receptacles is exempt.

*g.* Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used to move material which will become a marketable food product or used to move the marketable food product itself until shipment from the building of manufacture is exempt from tax. This includes, but is not limited to, taxable services used in pumps, conveyors, forklifts, and freight elevators moving the material or food product and taxable services used in door openers which open doors for forklifts or other devices moving the material or product. Any loading dock which is attached to a building of manufacture is a part of that building. Any electricity, steam, or taxable service used to move any food products to a loading dock is exempt from tax. If a food product is carried outside its building of manufacture by any conveyor belt system, electricity used by any portion of the system located outside the building is taxable.

This rule is intended to implement 2005 Iowa Code Supplement subsection 423.3(49).

**701—230.3(423) Services used in processing.** Electricity, steam, or any taxable service is used in processing only if the service is used in any operation which subjects raw material to some special treatment which changes, by artificial or natural means, the form, context, or condition of the raw material and results in a change of the raw material into marketable tangible personal property intended to be sold ultimately at retail. The following are nonexclusive examples of what would and would not be considered electricity, steam, or taxable services used in processing:

**230.3(1)** The sales price from the sale of electricity or steam consumed as power or used in the actual processing of tangible personal property intended to be sold ultimately at retail would be exempt from tax. The sales price is to be distinguished from that of electricity or steam consumed for the purpose of lighting, ventilating, or heating manufacturing plants, warehouses, or offices. The latter sales price would be taxable.

**230.3(2)** The sales price from electricity used in the freezing of tangible personal property, ultimately to be sold at retail, to make the property marketable would be exempt from sales tax. See *Fischer Artificial Ice & Cold Storage Co. v. Iowa State Tax Commission*, 81 N.W.2d 437 (Iowa 1957).

**230.3(3)** Electricity used merely in the refrigeration or the holding of tangible personal property for the purpose of preventing spoilage or to preserve the property in its present state would not be “used in processing” and, therefore, its sales price would be subject to tax. See *Fischer Artificial Ice, supra*.

Measurement of taxable and nontaxable use of electricity and steam. The exemption provided in the case of electricity or steam applies only upon the sales price from the sale of electricity or steam when

the energy is consumed as power or is used in the processing of food products or other tangible personal property intended to be sold ultimately at retail, as distinguished from electricity or steam which is consumed for taxable purposes. When practical, electricity or steam consumed as power or used directly in processing must be separately metered and separately billed by the supplier thereof to clearly distinguish energy so consumed from electricity or steam which is consumed for purposes or under conditions in which the exemption would not apply. If it is impractical to separately meter electricity or steam which is exempt from that electricity or steam upon which tax will apply, the purchaser must furnish an exemption certificate to the supplier with respect to what percentage of electricity or steam in the case of each purchaser is subject to the exemption. Reference 701—subrule 15.3(2). The exemption certificate must be supported by a study showing how the percentage was developed. When a certificate and study are accepted by the supplier as a basis for determining exemption, any changes in the processing method, changes in equipment or alterations in plant size or capacity affecting the percentage of exemption will necessitate the filing of a new and revised statement by the purchaser. When the electric or steam energy is separately metered, enabling the supplier to accurately apply the exemption in the case of processing energy, the purchaser need only file an exemption certificate since the supplier, under such conditions, will separately record and compute the consumption of energy which is exempt from tax apart from that energy which is subject to tax.

This rule is intended to implement Iowa Code section 423.3(49).

**701—230.4(423) Chemicals, solvents, sorbents, or reagents used in processing.** Chemicals, solvents, sorbents, and reagents directly used and consumed, dissipated, or depleted in processing tangible personal property intended to be sold ultimately at retail shall be exempt from sales and use tax. For the purpose of this processing exemption rule, free newspapers and shoppers' guides are considered to be retail sales. See 701—Chapter 211 for definition of the words "chemicals," "solvents," "sorbents," and "reagents."

For the purpose of this rule, a catalyst is considered to be a chemical, solvent, sorbent, or reagent. A catalyst is a substance which promotes or initiates a chemical reaction and, as such, is exempt from tax if consumed, dissipated, or depleted during processing of tangible personal property intended to be ultimately sold at retail.

To qualify for this exemption, all of the following conditions must be met:

1. The item must be a chemical, solvent, sorbent, or reagent.
2. The chemical, solvent, sorbent, or reagent must be directly used and consumed, dissipated, or depleted during processing as defined in referenced rule 701—18.29(422,423).
3. The processing must be performed on tangible personal property intended to be sold ultimately at retail.
4. The chemical, solvent, sorbent, or reagent need not become an integral or component part of the processed tangible personal property.

This rule is intended to implement Iowa Code section 423.3(50).

**701—230.5(423) Exempt sales of gases used in the manufacturing process.** Sales of argon and other similar gases to be used in the manufacturing process are exempt from tax. For the purposes of this rule, only inert gases are gases that are similar to argon. An "inert gas" is any gas that is normally chemically inactive. It will not support combustion and cannot be used as either a fuel or as an oxidizer. Argon, helium, neon, krypton, radon, and xenon are inert gases. Oxygen, hydrogen, and methane are nonexclusive examples of gases that are not inert. These sales are exempt only if the gas is purchased by a "manufacturer," for use in "processing," as those terms are defined in subrules 230.15(3) and 230.15(4).

This rule is intended to implement Iowa Code section 423.3(51).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.6(423) Sale of electricity to water companies.** The sales price from the sale of electricity to water companies assessed for property tax pursuant to Iowa Code sections 428.24, 428.26, and 428.28, which is used solely for the purpose of pumping water from a river or well is exempt from sales tax. For

the purposes of this rule, “river” means a natural body of water or waterway that is commonly known as a river. “Well,” for the purposes of this rule, means an issue of water from the earth; a mineral spring; a pit or hole sunk into the earth to reach a water supply; a shaft or hole sunk to obtain oil, water, gas, etc.; or a shaft or excavation in the earth, in mining, from which run branches. *Pacific Gas and Electric Company v. Hufford*, 319 P.2d 1033, 1040 (Calif. 1957), citing Webster’s New International Dictionary, 2nd ed., unabridged.

This rule is intended to implement Iowa Code section 423.3(52).

**701—230.7(423) Wind energy conversion property.** The sales price from the sale of property used to convert wind energy to electrical energy or the sales price from the sale of materials used to manufacture, install, or construct property used to convert wind energy to electrical energy is exempt from tax.

For the purposes of this rule, “property used to convert wind energy to electrical energy” means any device which converts wind energy to usable electrical energy including, but not limited to, wind chargers, windmills, wind turbines, pad mount transformers, substations, power lines, and tower equipment.

This rule is intended to implement Iowa Code section 423.3(53).

**701—230.8(423) Exempt sales or rentals of core making and mold making equipment, and sand handling equipment.** This rule is applicable to the period beginning on or after July 1, 2004.

**230.8(1) Exempt sales and rentals of machinery and equipment.** The sales price from sales or rentals of core making, mold making, and sand handling machinery and equipment directly and primarily used by a foundry in the mold making process is exempt from tax. For the purposes of this rule, a “foundry” is an establishment where metal, but not plastic, is melted and poured into molds. A nonexclusive list of equipment which may be exempt under this rule includes sand storage tanks, conveyers, patterns, mallor controllers, and sand mixers. A nonexclusive list of items which would not be exempted by this rule includes sand and other materials (as opposed to equipment) used to build molds or cores, and supplies. Services used in the mold making process are not exempted from tax by this rule. For the purposes of this rule, core making, mold making, and sand handling equipment also include replacement parts necessary for the operation of the equipment which is used directly and primarily by a foundry in the mold making process. Reference 701—subrule 18.58(1) for definitions of “directly used,” “equipment,” “machinery,” “replacement part” and “supplies.”

**230.8(2) Exempt sales of fuel and electricity.** The sales price from sales of fuel used in creating heat, power, or steam for, or used for generating electric current for, or electric current sold for use in machinery or equipment the sale or rental of which is exempt under subrule 230.8(1) is exempt from tax.

**230.8(3) Exempt design and installation services.** The sales price from furnishing design and installation services, including electrical and electronic installation, of machinery and equipment the sale or rental of which is exempt under subrule 230.8(1) is exempt from tax. Reference rule 701—26.16(422) for characterizations of the words “installation” and “electronic installation.”

This rule is intended to implement Iowa Code section 423.3(82).

**701—230.9(423) Chemical compounds used to treat water.** Chemical compounds placed in water which is ultimately sold at retail should be purchased exempt from the tax. The chemical compounds become an integral part of property sold at retail. Chemical compounds placed in water which is directly used in processing are exempt from the tax, even if the water is consumed by the processor and not sold at retail.

Chemical compounds which are used to treat water that is not sold at retail or which are not used directly in processing shall be subject to tax. An example would be chlorine or other chemicals used to treat water for a swimming pool.

Special boiler compounds used by processors when live steam is injected into the mash or substance, whereby the steam liquefies and becomes an integral part of the product intended to be sold at retail and also becomes a part of the finished product, shall be exempt from tax.

This rule is intended to implement Iowa Code section 423.3(50).

**701—230.10(423) Exclusive web search portal business and its exemption.** Effective on or after July 1, 2007, a business that qualifies as a web search portal business that has a physical location in Iowa and that meets specific criteria may obtain an exemption from sales and use tax on specific purchases that are used in the operation and maintenance of the web search portal business. This exemption from sales and use tax also applies to the affiliates of a qualifying web search portal business.

**230.10(1) Definitions.** For the purpose of this exemption, the following definitions apply:

*a.* “Affiliate” means an entity that directly or indirectly controls, is controlled with or by, or is under common control with another entity.

*b.* “Control” means any of the following:

(1) In the case of a United States corporation, the ownership, directly or indirectly, of 50 percent or more of the voting power to elect directors.

(2) In the case of a foreign corporation, if the voting power to elect the directors is less than 50 percent, the maximum amount allowed by applicable law.

(3) In the case of an entity other than a corporation, 50 percent or more ownership interest in the entity, or the power to direct the management of the entity.

*c.* “Web search portal business” means an entity among whose primary businesses is to provide a search portal to organize information; to access, search, and navigate the internet, including research and development to support capabilities to organize information; and to provide internet access, navigation, and search functionalities.

**230.10(2) Criteria to claim exemption.** The following govern whether a business qualifies for an exemption from sales and use tax on purchases made or leases executed by a web search portal business:

*a.* All of the following requirements must be met by a web search portal business for the purpose of this exemption:

(1) The business of the purchaser or lessee shall be as a provider of a web search portal.

(2) The web search portal business shall have a physical location in Iowa that is used for the operations and maintenance of the web search portal site on the internet, including but not limited to research and development to support capabilities to organize information and to provide internet access, navigation, and search.

(3) The web search portal business shall make a minimum investment in an Iowa physical location of \$200 million within the first six years of operation in Iowa beginning with the date the web search portal business initiates site preparation activities. The minimum investment includes the initial investment, including land and subsequent acquisition of additional adjacent land and subsequent investment at the Iowa location.

(4) The web search portal business shall purchase, option, or lease Iowa land not later than December 31, 2008, for any initial investment. However, the December 31, 2008, date shall not affect the future purchases of adjacent land and additional investment in the initial or adjacent land to qualify as part of the minimum investment for purposes of this exemption.

*b.* Aggregation to meet requirements. A web search portal business that is seeking an exemption from sales and use tax under this exemption may meet the requirements found in subparagraphs 230.10(2)“a”(1) to (4) above, by aggregating various Iowa investments and other requirements with its business affiliates.

*c.* Failure to meet investment qualifications. If a web search portal business claiming exemption from sales and use tax under this exemption fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the web search portal business, the web search portal business will lose the right to claim this exemption from sales and use tax. Immediately following the loss of the right to claim this exemption from sales and use tax, the web search portal business is required to pay all sales or use taxes that would have been due on the purchase or rental of all purchases previously claimed exempt from sales and use tax, plus any and all applicable statutory penalty and interest due on the tax.

**230.10(3) Exempt purchases.** Sales and leases of the following are exempt from sales and use tax when sold or leased to a qualifying web search portal business:

- a. Computers and equipment that are necessary for the maintenance and operation of the web search portal business;
- b. All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the web search portal;
- c. All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “b” above;
- d. All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the web search portal;
- e. All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the web search portal. This equipment includes, but is not limited to, exterior dedicated business-owned power substations, backup power generation systems, battery systems, and related infrastructure;
- f. All equipment used in the racking system, including cabling and trays;
- g. Fuel purchased by the web search portal business that is used in the backup power generation system and in all items listed in paragraphs “a” to “f.” This provision includes the fuel used in backup generators that may be located outside of the building that are used if power is interrupted to ensure the web search portal continues operation; and
- h. Electricity purchased for use in operating the web search portal.

**230.10(4) Limitation of exemption.** The purchases or leases of the items listed in subrule 230.10(3) are only exempt if the items being purchased or leased are being used in the operation or maintenance of the web search portal business. Such purchases or leases will not be exempt from sales or use tax if the item is to be used in the business for another purpose not related to operations or maintenance. Examples of items included in this limitation include but are not limited to:

- a. Electricity not used for operation or maintenance, such as in the office or employee break room;
- b. Tangible personal property used in areas of the web search portal facility that is not used for operation or maintenance, such as cleaning equipment and supplies;
- c. Building materials that become part of real property, such as concrete, steel or roofing; and
- d. Tangible personal property that becomes part of real property, such as a dishwasher.

**230.10(5) Initial date of exemption.** The exemption from sales and use tax begins on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying web search portal business.

This rule is intended to implement 2007 Iowa Code Supplement section 423.3(92).

**701—230.11(423) Web search portal business and its exemption.** Effective on or after July 1, 2008, a business that qualifies as a web search portal business that has a physical location in Iowa and that meets specific criteria may obtain an exemption from sales and use tax on specific purchases that are used in the operation and maintenance of the web search portal business. This exemption from sales and use tax also applies to the affiliates of a qualifying web search portal business.

**230.11(1) Definitions.** For the purpose of this exemption, the following definitions apply:

“*Affiliate*” means an entity that directly or indirectly controls, is controlled with or by, or is under common control with another entity.

“*Control*” means any of the following:

1. In the case of a United States corporation, the ownership, directly or indirectly, of 50 percent or more of the voting power to elect directors.
2. In the case of a foreign corporation, if the voting power to elect the directors is less than 50 percent, the maximum amount allowed by applicable law.
3. In the case of an entity other than a corporation, 50 percent or more ownership interest in the entity, or the power to direct the management of the entity.

“*Web search portal business*” means an entity whose business among other businesses is to provide a search portal to organize information; to access, search, and navigate the Internet, including research and development to support capabilities to organize information; or to provide Internet access, navigation, or search functionalities.

**230.11(2) Criteria to claim exemption.** The following governs whether a business qualifies for an exemption from sales and use tax on purchases made or leases executed by a web search portal business:

*a. Requirements.* All of the following requirements must be met by a web search portal business for the purpose of this exemption:

(1) The business, among other businesses, of the purchaser or lessee shall be as a provider of a web search portal.

(2) The web search portal business shall have a physical location in Iowa that is used for the operations and maintenance of the web search portal site on the Internet, including but not limited to research and development to support capabilities to organize information and to provide Internet access, navigation, and search functionality.

(3) The web search portal business shall make a minimum investment in an Iowa physical location of \$200 million within the first six years of operation in Iowa beginning with the date the web search portal business initiates site preparation activities. The minimum investment includes the initial investment, including land and subsequent acquisition of additional adjacent land and subsequent investment at the Iowa location.

(4) The web search portal business shall purchase, option, or lease Iowa land not later than December 31, 2008, for any initial investment. However, the December 31, 2008, date shall not affect the future purchases of adjacent land and additional investment in the initial or adjacent land to qualify as part of the minimum investment for purposes of this exemption.

*b. Aggregation to meet requirements.* A web search portal business that is seeking an exemption from sales and use tax under this exemption may meet the requirements found in subparagraphs 230.11(2)“a”(1) to (4) by aggregating various Iowa investments and other requirements with its business affiliates.

*c. Failure to meet investment qualifications.* If a web search portal business claiming exemption from sales and use tax under this exemption fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the web search portal business, the web search portal business will lose the right to claim this exemption from sales and use tax. Immediately following the loss of the right to claim this exemption from sales and use tax, the web search portal business is required to pay all sales or use taxes that would have been due on the purchase or rental of all purchases previously claimed exempt from sales and use tax, plus any and all applicable statutory penalty and interest due on the tax.

**230.11(3) Exempt purchases.** Sales and leases of the following are exempt from sales and use tax when sold or leased to a qualifying web search portal business:

*a.* Computers and equipment that are necessary for the maintenance and operation of the web search portal business;

*b.* All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the web search portal business;

*c.* All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “b”;

*d.* All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the web search portal business;

*e.* All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the web search portal business. This equipment includes, but is not limited to, exterior dedicated business-owned power substations; and back-up power generation systems, battery systems, and related infrastructure;

*f.* All equipment used in the racking system, including cabling and trays;

*g.* Fuel purchased by the web search portal business that is used in the back-up power generation system and in all items listed in paragraphs “a” to “f.” This includes the fuel used in the back-up generators that may be located outside the building and that are used if power is interrupted to ensure the web search portal business continues operation; and

*h.* Electricity purchased for use in operating the web search portal business.

**230.11(4) *Limitation of exemption.*** The purchase or lease of the items listed in subrule 230.11(3) is only exempt if the items being purchased or leased are being used in the operation or maintenance of the web search portal business. Such purchases or leases will not be exempt from sales or use tax if the item is to be used in the business for another purpose. For example, the purchase of electricity for use in the office portion of the web search portal facility would not be exempt. The purchase of building materials that become real property would not be exempt. For example, the purchase of a dishwasher that will be built into a kitchen area in the break room for employees would not be exempt from tax. The purchase of a dishwasher is the purchase of tangible personal property. However, upon installation, the dishwasher becomes part of the building and realty and is not exempt from Iowa sales or use tax.

**230.11(5) *Initial date of exemption.*** The exemption from sales and use tax begins on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying web search portal business.

This rule is intended to implement Iowa Code section 423.3 as amended by 2008 Iowa Acts, House File 2233, section 1.

**701—230.12(423) Large data center business exemption.** Effective on or after July 1, 2009, a data center business that has a physical location in Iowa and that meets specific criteria may obtain an exemption from sales and use tax on specific purchases that are used in the operation and maintenance of the data center business.

**230.12(1) *Definitions.*** For the purpose of this rule, the following definitions apply:

“*Data center*” means a building rehabilitated or constructed to house a group of networked server computers in one physical location in order to centralize the storage, management, and dissemination of data and information pertaining to a particular business, taxonomy, or body of knowledge.

“*Data center business*” means an entity whose business, among other businesses, is to operate a data center.

**230.12(2) *Criteria to claim exemption.*** The following govern whether a business qualifies for an exemption from sales and use tax on purchases made or leases executed by a data center business:

*a. Requirements.* All of the following requirements must be met by a data center business for the purpose of this exemption:

(1) The business, among other businesses, of the purchaser or lessee shall be as a provider of a data center.

(2) The data center business shall have a physical location in Iowa that is, in the aggregate, at least 5,000 square feet in size used for the operation and maintenance of the data center.

1. A data center facility includes, but is not limited to, the centralization, storage, management and dissemination of data and information.

2. The physical location shall include the mechanical and electrical systems, redundant or backup power supplies, redundant data communications connections, environmental controls, and fire suppression systems for the data center business. The data center business’s physical location may also include a restricted access area employing advanced physical security measures such as video surveillance systems and card-based security or biometric security access systems.

(3) The data center business shall make a minimum investment in an Iowa physical location of \$200 million within the first six years of operation in Iowa beginning with the date the data center business initiates site preparation activities. The minimum investment includes the initial investment, including land and subsequent acquisition of additional adjacent land and subsequent investment at the Iowa location.

(4) The data center business shall comply with the applicable sustainable design and construction standards in Iowa Administrative Code 661—Chapter 310 as established by the state building code commissioner pursuant to Iowa Code section 103A.8B.

*b. Failure to meet investment qualifications.* If a data center business claiming exemption from sales and use tax under this exemption fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the data center business, the data center business will lose the right to claim this exemption

from sales and use tax. Immediately following the loss of the right to claim this exemption from sales and use tax, the data center business is required to pay all sales and use taxes that would have been due on the purchase or rental of all purchases previously claimed exempt from sales and use tax, plus any and all applicable statutory penalty and interest due on the tax.

**230.12(3) Exempt purchases.** Sales and leases of the following are exempt from sales and use tax when sold or leased to a qualifying data center business:

- a. Computers and equipment that are necessary for the maintenance and operation of the data center business;
- b. All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the data center business;
- c. All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “b”;
- d. All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the data center business;
- e. All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the data center business. This equipment includes, but is not limited to, exterior dedicated business-owned power substations and backup power generation systems, battery systems, and related infrastructure;
- f. All equipment used in the racking system, including cabling and trays;
- g. Fuel purchased by the data center business that is used in the backup power generation system and in all items listed in paragraphs “a” to “f.” This includes the fuel used in the backup generators that may be located outside the building and that are used if power is interrupted to ensure the data center business continues operation; and
- h. Electricity purchased for use in operating the data center business.

**230.12(4) Limitation of exemption.** The purchase or lease of the items listed in subrule 230.12(3) is only exempt if the items being purchased or leased are being used in the operation or maintenance of the data center business. Such purchases or leases will not be exempt from sales or use tax if the item is to be used in the business for another purpose. For example:

- a. The purchase of electricity for use in the office portion of the data center business facility would not be exempt.
- b. The purchase of building materials that become real property would not be exempt. For example, the purchase of a dishwasher that will be built into a kitchen area in the break room for employees would not be exempt from tax. Although the purchase of a dishwasher is the purchase of tangible personal property, upon installation, the dishwasher becomes part of the building and realty and, therefore, is not exempt from Iowa sales and use tax.

**230.12(5) Initial date of exemption.** The exemption from sales and use tax begins on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying data center business.

This rule is intended to implement Iowa Code section 423.3 as amended by 2009 Iowa Acts, Senate File 478, sections 197 through 202.

[ARC 8602B, IAB 3/10/10, effective 4/14/10]

**701—230.13(423) Data center business sales and use tax refunds.** Effective on or after July 1, 2009, data center businesses in Iowa meeting certain criteria may make an annual application to the department for a refund of 50 percent of the sales and use tax paid on the sales price of certain computers, equipment, fuel, and electricity used in the operation of the data center business.

**230.13(1) Definitions.** For the purpose of this rule, the following definitions apply:

“Data center” means a building rehabilitated or constructed to house a group of networked server computers in one physical location in order to centralize the storage, management, and dissemination of data and information pertaining to a particular business, taxonomy, or body of knowledge.

“*Data center business*” means an entity whose business, among other businesses, is to operate a data center.

“*Refund year*” means the year beginning with the date of initial site preparation of the data center facility.

“*Rehabilitation*” means a process of substantial repair, remodeling, or alteration, which may include but is not limited to upgrading mechanical systems, plumbing, roofing, wiring, windows, and heating and cooling systems, and performing significant interior or exterior structural modification. Although they may be included as part of an overall rehabilitation project, singular actions such as the installation of a new information system or cosmetic changes to the interior or exterior appearance of a building do not, in and of themselves, constitute a rehabilitated building.

**230.13(2) Basis and criteria for refunds.** The amount, type, and length of refunds available to data center businesses depend upon the dollar amount of investment made, the type of construction undertaken, and the size in square feet of the facility.

*a. Investment of \$136 million to \$200 million.* Data center businesses which make investments in an Iowa facility of \$136 million to \$200 million in the first six years of operations and which facility contains at least 5,000 square feet are eligible for a refund of 50 percent of the sales and use tax paid on qualifying computers and equipment, backup fuel, and electricity for the first seven years of operation.

*b. Investment of \$10 million to \$136 million—new construction.* Data center businesses which make investments of \$10 million to \$136 million in the first six years of operations in the new construction of an Iowa facility that is at least 5,000 square feet are eligible for a refund of 50 percent of the sales and use tax paid on qualifying computers and equipment, backup fuel, and electricity for the first ten years of operation.

*c. Investment of \$5 million to \$136 million—rehabilitation.* Data center businesses which make investments of \$5 million to \$136 million in the first six years of operations in the rehabilitation of an Iowa facility that is at least 5,000 square feet are eligible for a refund of 50 percent of the sales and use tax paid on qualifying computers and equipment, backup fuel, and electricity for the first ten years of operation.

*d. Investment of \$1 million to \$10 million—new construction.* Data center businesses which make investments of \$1 million to \$10 million in the first three years of operations in the new construction of an Iowa facility of any size are eligible for a refund of 50 percent of the sales and use tax paid on fuel and electricity for the first five years of operation.

*e. Investment of \$1 million to \$5 million—rehabilitation.* Data center businesses which make investments of \$1 million to \$5 million in the first three years of operations in the rehabilitation of an Iowa facility of any size are eligible for a refund of 50 percent of the sales and use tax paid on fuel and electricity for the first five years of operation.

**230.13(3) Purchases eligible for refunds.** Sales and leases of the following are eligible for a refund of 50 percent of the sales and use tax paid when sold or leased to a qualifying data center business:

*a.* Computers and equipment that are necessary for the maintenance and operation of the data center business;

*b.* All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the data center business;

*c.* All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “*b*”;

*d.* All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the data center business;

*e.* All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the data center business. This equipment includes, but is not limited to, exterior dedicated business-owned power substations and backup power generation systems, battery systems, and related infrastructure;

*f.* All equipment used in the racking system, including cabling and trays;

g. Fuel purchased by the data center business that is used in the backup power generation system and in all items listed in paragraphs “a” to “f.” This includes the fuel used in the backup generators that may be located outside the building and that are used if power is interrupted to ensure the data center business continues operation; and

h. Electricity purchased for use in operating the data center business.

**230.13(4) Sustainable design standards.** In order to claim the refunds detailed in subrule 230.13(3), paragraphs “a” through “h,” data center businesses must comply with the sustainable design and construction standards as required by Iowa Administrative Code 661—Chapter 310 as established by the state building code commissioner pursuant to Iowa Code section 103A.8B.

**230.13(5) Failure to meet investment qualifications.** If a data center business claiming a refund of sales and use tax under this rule fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the data center business, the data center business will lose the right to claim the refund of sales and use tax. Immediately following the loss of the right to claim the refund of sales and use tax, the data center business is required to return the refund of sales and use tax paid on qualifying computers, equipment, fuel, and electricity, plus any and all applicable statutory penalty and interest due on the tax.

**230.13(6) Limitation of refunds.**

a. *Use in operation or maintenance.* The purchase or lease of the items listed in subrule 230.13(3) is only eligible for a refund of sales and use tax if the items being purchased or leased are being used in the operation or maintenance of the data center business. Such purchases or leases will not be eligible for a refund of sales and use tax if the item is to be used in the business for another purpose. For example:

(1) The purchase of electricity for use in the office portion of the data center business facility would not be eligible for a refund.

(2) The purchase of building materials that become real property would not be eligible for a refund. For example, the purchase of a dishwasher that will be built into a kitchen area in the break room for employees would not be eligible for a refund of tax. Although the purchase of a dishwasher is the purchase of tangible personal property, upon installation, the dishwasher becomes part of the building and realty and, therefore, is not eligible for a refund of Iowa sales and use tax.

b. *State sales tax only.* Refunds issued under this rule may not exceed 5 percent of the sales price of computers and equipment listed in subrule 230.13(3) and the fuel used to create heat, power and steam for processing or generating electrical current or from the sales price of electricity consumed by computers, machinery, or other equipment for operation of the data center business facility. The refund will not include any local option sales and services taxes.

c. *Qualifying dates for fuel and electricity refund.* To qualify for the 50 percent refund, the following must be on or after the first day of the first month through the last day of the last month of the refund year:

(1) The dates of the utility billing or meter reading cycle for the sale or furnishing of metered gas and electricity;

(2) The dates of the sale or furnishing of fuel for purposes of commercial energy; and

(3) The delivery of the fuel used for purposes of commercial energy.

**230.13(7) Form and filing requirements.**

a. *Form.* The owner of a data center business seeking a refund of sales and use tax imposed upon the sale or lease of any qualifying computers, equipment, fuel, and electricity must complete and file with the department Form IA 843, Claim for Refund. All of the information on the Claim for Refund must be completed.

b. *Due date.* The refund request form must be filed with the department no later than one year after the purchase of the qualifying computers, equipment, fuel, or electricity and within three months after the end of the refund year. The refund for sales and use tax begins with purchases made on and after July 1, 2009, or on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying data center business.

c. *Date required.* The refund request must include detailed schedules of the items being claimed including dates of purchase of tangible personal property, amount of purchase, and tax paid. The purchase of fuel and electricity must be computed and documented separately from other purchases.

d. *Affidavit.* In addition to completing and filing Form IA 843, Claim for Refund, the owner of a data center business seeking a refund as specified in this rule must also complete and file with the department an affidavit certifying that qualifications for the refund have been met. The affidavit must be filed prior to any refund request and must be approved by the department before a refund claim can be filed. The following format must be used for the affidavit:

Iowa Department of Revenue  
Sales Tax Refund Affidavit

NAME OF AFFIANT	}	AFFIDAVIT FOR
ADDRESS OF AFFIANT		DATA CENTER BUSINESS

The undersigned duly swears that the named data center business complies with criteria to be entitled to refund of sales tax as required in Iowa Code section 423.4 as follows:

1. The facility is a data center business as defined by Iowa Code section 423.4(8) or 423.4(9);
2. The data center business facility will be a minimum of 5,000 square feet, as applicable, located upon Iowa land; and located at \_\_\_\_\_; with total square footage of \_\_\_\_\_;
3. The data center business will make an investment of (check only one):
  - \$136 million to \$200 million within the first six years of operation (refund available for first seven years).
  - \$10 million to \$136 million for new construction within the first six years of operation (refund available for first ten years).
  - \$5 million to \$136 million for rehabilitation of an existing facility within the first six years of operation (refund available for first ten years).
  - \$1 million to \$10 million for new construction within the first three years of operation (refund of tax paid on fuel and electricity only; refund available for first five years).
  - \$1 million to \$5 million for rehabilitation of an existing facility within the first three years of operation (refund of tax paid on fuel and electricity only; refund available for first five years).
4. The data center business facility will be constructed in accordance with the sustainable design and construction standards as required by Iowa Administrative Code 661—Chapter 310 and established by the building code commissioner pursuant to Iowa Code section 103A.8B;
5. Construction of the data center business facility was commenced on or after July 1, 2009; and the date of the initial site preparation or building rehabilitation was \_\_\_\_\_; and
6. Purchases of qualifying computers, equipment, fuel or electricity were made on or after July 1, 2009.

The undersigned duly swears that he or she is the owner of the qualifying data center business or that the undersigned is the authorized representative of the qualifying data center business and has the authority to sign this document. The undersigned swears that he or she has personal knowledge regarding the facts contained in this affidavit and that the statements set forth in this affidavit are true and accurate and that the qualifying data center business has met all of the requirements as contained herein.

**701—230.14(423) Exemption for the sale of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment used for certain manufacturing purposes if the sale occurs as part of a contract entered into on or after July 1, 2016.** Rules 701—230.14(423) to 701—230.20(423) exempt the sales price of computers, machinery, and equipment used in an exempt manufacturing purpose. Rule 701—230.21(423) exempts the purchase of fuel used in such machinery and equipment. Rule 701—230.22(423) exempts the service of designing or installing such machinery and equipment. Rules 701—230.14(423) to 701—230.22(423) apply to sales of such products occurring as part of a contract entered into on or after July 1, 2016. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423). A sale occurs as part of a contract entered into prior to July 1, 2016, if the purchaser enters into a contract with a retailer to purchase the product and the contract date is prior to July 1, 2016, or if the purchaser enters into a contract with a contractor, subcontractor, or builder to construct or assemble the property and the contract date is prior to July 1, 2016.

**230.14(1) Generally.** The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax if the property is any of the following:

- a. Directly and primarily used in processing by a manufacturer (see rule 701—230.15(423)).
- b. Directly and primarily used to maintain the integrity of the product or to maintain unique environmental conditions required for either the product or the computers, machinery, and equipment used in processing by a manufacturer, including test equipment used to control quality and specifications of the product (see rule 701—230.16(423)).
- c. Directly and primarily used in research and development of new products or processes of processing (see rule 701—230.17(423)).
- d. Computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise (see rule 701—230.18(423)).
- e. Directly and primarily used in recycling or reprocessing of waste products (see rule 701—230.19(423)).
- f. Pollution-control equipment used by a manufacturer, including but not limited to that required or certified by an agency of this state or of the United States government (see rule 701—230.20(423)).
- g. Fuel used in creating heat, power, steam, or for generating electrical current, or from the sale of electricity, consumed by computers, machinery, or equipment used in an exempt manner described in paragraph “a,” “b,” “c,” “e,” or “f” (see rule 701—230.21(423)).

**230.14(2) Computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment.**

a. *Computers.* A “computer” is an electronic device that accepts information in digital or similar form and manipulates the information for a result based on a sequence of instructions. A computer includes all devices fastened to it by means of signal cables or any communication medium that serves the function of a signal cable. Nonexclusive examples of devices fastened by a signal cable or other communication medium are terminals, printers, display units, card readers, tape readers, document sorters, optical readers, and card or tape punchers. A computer also includes any operating system or executive program, but not application software, purchased as part of the sale of the computer for which the operating system or executive program operates. For purposes of this paragraph, “operating system or executive program” means computer software that is fundamental and necessary to the functioning of a computer. The operating system or executive program controls the operation of a computer by managing the allocation of all system resources, including the central processing unit, main and secondary storage, input/output devices, and the processing of programs. This is in contrast to application software, which is a collection of one or more programs used to develop and implement the specific applications that the computer is to perform and which calls upon the services of the operating system or executive program. Application software, or an operating system or executive program priced separately or sold at a later time from the computer for which the operating system or executive program operates, may be taxable as “prewritten computer software.” See rule 701—211.1(423).

*b. Machinery.* “Machinery” is any mechanical, electrical, or electronic device designed and used to perform some function and to produce a certain effect or result. Machinery also includes all devices used or required to control, regulate, or operate a piece of machinery, provided such devices are directly connected with or are an integral part of the machinery and are used primarily for control, regulation, or operation of machinery. Jigs, dies, tools, and other devices necessary to the operation of or used in conjunction with the operation of what would be ordinarily thought of as machinery are also considered to be machinery. All property that is in the nature of machinery (other than structural components of a building or other inherently permanent structure) is considered tangible personal property even if located outside of a building. A structure that is essentially machinery remains tangible personal property for purposes of this paragraph. For more information on distinguishing machinery from buildings and other constructed realty, see subparagraph 230.14(2) “f”(1).

*c. Equipment.* In general usage, “equipment” refers to devices or tools used to produce a final product or achieve a given result. Equipment includes supplies that do not qualify as “replacement parts,” such as drill bits, grinding wheels, punches, taps, reamers, saw blades, lubricants, coolants, sanding discs, sanding belts, and air filters. All property that is in the nature of equipment (other than structural components of a building or other inherently permanent structure) is considered tangible personal property even if located outside of a building. A structure that is essentially equipment may remain tangible personal property for purposes of this paragraph. For more information on distinguishing equipment from buildings and other constructed realty, see subparagraph 230.14(2) “f”(1).

*d. Replacement parts.* “Replacement part” means tangible personal property other than computers, machinery, or equipment, regardless of the cost or useful life of such tangible personal property. A replacement part can be separated from the computer, machinery, or equipment. A “replacement part” is a part or component of a computer, machinery, or equipment that came with the original item purchased or has been added over time to improve or restore the computer, machinery, or equipment.

*e. Materials used to construct or self-construct computers, machinery, and equipment.* “Materials used to construct or self-construct computers, machinery, and equipment” means tangible personal property that is incorporated into a computer, machinery, or equipment when the computer, machinery, or equipment is constructed or assembled. Materials used to construct a structure that is essentially machinery or equipment are exempt from sales and use tax so long as the machinery or equipment is used in an exempt manner under rules 701—230.14(423) to 701—230.20(423).

*f. Exclusions.* Sales of the following property, or materials used to construct or self-construct the following property, are not exempt under rules 701—230.14(423) to 701—230.20(423) regardless of how the property is used.

(1) Constructed realty.

1. Generally. Iowa Code section 423.2(1) “b” and “c” imposes sales and use tax upon building materials, supplies, and equipment used for the erection of buildings or other realty. However, Iowa Code section 423.3(47) exempts from sales and use tax certain computers, machinery, and equipment as well as items used to construct or self-construct certain computers, machinery, and equipment. Determining whether constructed items are realty or exempt computers, machinery, or equipment under Iowa Code section 423.3(47) ultimately depends on the use of the items. In general, exempt computers, machinery, and equipment under Iowa Code section 423.3(47) are tangible personal property when purchased, and they remain tangible personal property after installation. Materials used to construct realty remain taxable when purchased by the contractor, subcontractor, or builder under Iowa Code section 423.2(1) “b” and “c.” For more information about sales and use tax on construction activities, see 701—Chapter 219.

2. Distinguishing constructed realty from tangible personal property. For purposes of rules 701—230.14(423) to 701—230.22(423), an item remains tangible personal property after installation if all of the following apply:

- The item can be removed without causing material damage or injury to the item or to the building that houses it or the real property upon which it is located;
- The item does not bear the weight of a building or other realty;

- The item does not in any other manner constitute an integral part of a building or other realty; and

- The item is used in an exempt manner under rules 701—230.14(423) to 701—230.20(423).

3. Buildings. Buildings are constructed realty. A “building” is any structure or edifice enclosing a space within its walls, and usually covered by a roof, the purpose of which is, for example, to provide shelter or housing for machinery or equipment or to provide working, office, parking, display, or sales space. Materials used to construct a building or any other realty are not exempt under rules 701—230.14(423) to 701—230.20(423), even if the realty is specially designed to house exempt computers, machinery, or equipment.

4. Examples.

- Property that, under normal conditions, remains tangible personal property after installation for purposes of rules 701—230.14(423) to 701—230.22(423) includes, but is not limited to:

- Storage tanks that rest upon a foundation and are secured with bolts.

- Industrial piping systems directly and primarily used in processing.

- Cooling towers directly and primarily used in processing.

- Structural steel, if exposed and used to support other computers, machinery, or equipment.

- Property that, under normal conditions, becomes constructed realty after installation for purposes of rules 701—230.14(423) to 701—230.22(423) includes, but is not limited to:

- Underground storage tanks constructed on site.

- Foundations made of concrete or other materials, regardless of whether they are used exclusively as platforms for machinery and equipment.

- Cooling towers primarily used to cool a building or other constructed realty.

- Structural steel, if used to construct a building or other constructed realty.

(2) Land.

(3) Intangible property.

(4) Hand tools. “Hand tool” means a tool that can be held in the hand or hands and is powered by human effort.

(5) Point-of-sale equipment and computers. “Point-of-sale equipment and computers” means input, output, and processing equipment used to consummate a sale and to record or process information pertaining to a sale transaction at the time the sale takes place and is located at the counter, desk, or other specific point where the transaction occurs.

(6) Certain centrally assessed industrial machinery, equipment, and computers. Property that is centrally assessed by the department of revenue under Iowa Code sections 428.24 to 428.29 or chapters 433, 434, 437, 437A, 437B, and 438 does not qualify for exemption under rules 701—230.14(423) to 701—230.20(423). Property used but not owned by persons whose property is defined by such provisions of the Iowa Code, which would be assessed by the department of revenue if the persons owned the property, also does not qualify for exemption under rules 701—230.14(423) to 701—230.20(423).

(7) Vehicles subject to registration. The general sales and use tax does not apply to vehicles subject to registration under Iowa Code chapter 321. Instead, such vehicles are subject to the fee for new registration under Iowa Code section 321.105A. Vehicles subject to registration are not exempt from the fee for new registration under rules 701—230.14(423) to 701—230.20(423), unless the vehicle is directly and primarily used in recycling or reprocessing of waste products (see rule 701—230.19(423)).

*g. Examples.* When used for an exempt purpose under rules 701—230.14(423) to 701—230.20(423), the following items may be exempt computers, machinery, or equipment. This list is not all-inclusive.

(1) Coolers, including coolers that do not change the nature of materials stored in them.

(2) Equipment that eliminates bacteria.

(3) Palletizers.

(4) Storage bins.

(5) Property used to transport raw, semifinished, or finished goods.

(6) Vehicle-mounted cement mixers.

(7) Self-constructed machinery and equipment.

- (8) Packaging and bagging equipment, including conveyer systems.
- (9) Equipment that maintains an environment necessary to preserve a product's integrity.
- (10) Equipment that maintains a product's integrity directly.
- (11) Quality control equipment.

**230.14(3) *Leased and rented property.*** The exemptions under rules 701—230.14(423) to 701—230.22(423) apply to property regardless of how it is sold, including leased or rented property. The lease of computers, machinery, or equipment may be exempt from sales and use tax if the lessee uses the property in an exempt manner under rules 701—230.14(423) to 701—230.20(423). Additionally, a lessor's purchase of computers, machinery, or equipment for lease may be an exempt sale for resale under Iowa Code section 423.3(2).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.15(423) Exemption for the sale of property directly and primarily used in processing by a manufacturer if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used in processing by a manufacturer. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

**230.15(1) *Required elements.*** To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, or equipment (see subrule 230.14(2));
- b. Directly used (see subrule 230.15(2));
- c. Primarily used (see subrule 230.15(2));
- d. Used in processing (see subrule 230.15(3)); and
- e. Used by a manufacturer (see subrule 230.15(4)).

**230.15(2) *Directly and primarily used.***

a. *Directly used.*

(1) Generally. Property is “directly used” only if it is used to initiate, sustain, or terminate an exempt activity. In determining whether any property is “directly used,” consideration should be given to the following factors:

- 1. The physical proximity of the property to the exempt activity;
- 2. The temporal proximity of the use of the property to the use of other property that is directly used in the exempt activity; and
- 3. The active causal relationship between the use of the property and the exempt activity. The fact that a particular piece of property may be essential to the conduct of the activity because its use is required either by law or practical necessity does not, of itself, mean that the property is directly used.

(2) Examples. The following property typically is not directly used in an exempt manner:

- 1. Property used exclusively for the comfort of workers, such as air cooling, air conditioning, or ventilation systems.
- 2. Property used in support operations, such as a machine shop, where production machinery is assembled, maintained, or repaired.
- 3. Property used by administrative, accounting, or personnel departments.
- 4. Property used by security, fire prevention, first aid, or hospital stations.
- 5. Property used in communications or safety.

b. *Primarily used.* The primary use of property is the activity or activities for which the property is used more than half of the time.

**230.15(3) *Processing.***

a. *Generally.* “Processing” means a series of operations in which materials are manufactured, refined, purified, created, combined, transformed, or stored by a manufacturer, ultimately into tangible personal property. Processing encompasses all activities commencing with the receipt or producing of raw materials by the manufacturer and ending at the point products are delivered for shipment or

transferred from the manufacturer. Processing includes, but is not limited to, refinement or purification of materials; treatment of materials to change their form, context, or condition; maintenance of the quality or integrity of materials, components, or products; maintenance of environmental conditions necessary for materials, components, or products; quality control activities; construction of packaging and shipping devices; placement into shipping containers or any type of shipping device or medium; and the movement of materials, components, or products until shipment from the processor. "Receipt or producing of raw materials" means activities performed upon tangible personal property only. With respect to raw materials produced from or upon real estate, "production of raw materials" is deemed to occur immediately following the severance of the raw materials from the real estate.

*b. The beginning of processing.* Processing begins with a processor's receipt or production of raw material. Thus, when a processor produces its own raw material, it is engaged in processing. Processing also begins when a supplier transfers possession of raw materials to a processor.

*c. The completion of processing.* Processing ends when the finished product is transferred from the processor or delivered for shipment by the processor. Therefore, a processor's packaging, storage, and transport of a finished product after the product is in the form in which it will be sold at retail are part of the processing of the product.

*d. Examples of the beginning, intervening steps, and the ending of processing.* Of the following, Examples A and B illustrate when processing begins under various circumstances; Example C demonstrates the middle stages of processing; and Example D demonstrates when the end of processing takes place.

**EXAMPLE A:** Company A manufactures fine furniture. Company A owns a grove of walnut trees that it uses as raw material. Company A's employees cut the trees, transport the logs to Company A's facility, store the logs in a warehouse to begin the curing process, and eventually take the logs to Company A's sawmill. The walnut trees are real property while they are growing. Thus, no "production of raw materials" has occurred with regard to the trees until they have been severed from the soil and transformed into logs. Processing of the logs begins when they are placed on vehicles for transport to Company A's factory. However, if the transport vehicles are "vehicles subject to registration," they are not exempt from the fee for new registration under this rule (see subparagraph 230.14(2) "f"(7)).

**EXAMPLE B:** Company A from the previous example also buys mahogany logs from a supplier in Honduras. Company A uses its equipment to offload the logs from railroad cars at its facility. Company A then stores and saws the logs as previously described in Example A. Processing begins when Company A offloads the logs from the railroad cars.

**EXAMPLE C:** Company C is a microbrewery. It uses a variety of kettles, vats, tanks, tubs, and other containers to mix, cook, ferment, settle, age, and store the beer it brews. Company C also uses a variety of pipes and pumps to move the beer among the various containers involved in the activity of brewing. All stages of this brewing are part of processing, including fermentation or aging (the transformation of the raw materials from one state to another) as well as the storage of hops in a bin and the storage of beer prior to bottling (the holding of materials in an existing state). Any movement of the product between containers is also a part of processing.

**EXAMPLE D:** After the brewing process is complete, Company C places its beer in various containers, stores the beer, and moves the beer to Company C's customers by a common carrier that picks up the beer at Company C's facility. Company C's activities of placing the beer into bottles, cans, and kegs, storing it after packaging, and moving the beer by use of a forklift to the common carrier's pickup site are part of processing.

#### **230.15(4) Manufacturer.**

*a. Generally.* "Manufacturer" means a person that purchases, receives, or holds personal property of any description for the purpose of adding to its value by a process of manufacturing, refining, purifying, or combining of different materials, or by the packing of meats, with a view to selling the property for gain or profit, but also includes contract manufacturers. A "contract manufacturer" is a manufacturer that otherwise falls within the definition of manufacturer, except that a contract manufacturer does not sell the tangible personal property the contract manufacturer processes on behalf of other manufacturers. A business engaged in activities subsequent to the extractive process of quarrying or mining, such as

crushing, washing, sizing, or blending of aggregate materials, is a manufacturer with respect to these activities. A person does not need to be primarily engaged in an activity listed in this subrule in order to qualify as a manufacturer for purposes of this rule.

*b. Nonexclusive examples.* Those who are in the business of printing, newspaper publication, bookbinding, lumber milling, and production of drugs and agricultural supplies are illustrative, nonexclusive examples of manufacturers. Construction contracting; repairing of tangible personal property (such as automobile engines); provision of health care; farming; transportation for hire; and the activities of restaurateurs, hospitals, medical doctors, and those who merely process data are illustrative, nonexclusive examples of businesses that ordinarily are not manufacturers.

EXAMPLE A: Company A owns and operates a gravel pit. Company A sells the gravel extracted from the pit to others who use the gravel for surfacing roads and as an ingredient in concrete manufacture. Company A removes overlay and raw gravel from the pit and then transports the gravel to a plant where washing and sizing of the gravel take place. Company A is a manufacturer, but only with respect to those activities that occur after it extracts the gravel from the ground.

EXAMPLE B: Company B owns a manufacturing plant. Company B also owns a machine shop where it uses a metal press machine to fabricate patterns. All of these patterns are used in Company B's manufacturing plant as part of processing, and the metal press machine is used solely to fabricate these patterns. The sales price of the metal press machine is not exempt from sales and use tax under this rule because Company B does not use the metal press machine to manufacture a product for sale at a gain or profit. However, the computers, machinery, and equipment in Company B's manufacturing plant may be exempt if they are directly and primarily used in processing.

This rule is intended to implement Iowa Code section 423.3(47) "a"(1).  
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.16(423) Exemption for the sale of property directly and primarily used by a manufacturer to maintain integrity or unique environmental conditions if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used to maintain the integrity of the product or to maintain unique environmental conditions required for either the product or the computers, machinery, and equipment used in processing by a manufacturer, including test equipment used to control quality and specifications of the product. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

**230.16(1) Required elements.** To qualify for exemption under this rule, the purchaser must prove the property is:

- a.* Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, and equipment (see subrule 230.14(2));
- b.* Directly used (see subrule 230.15(2));
- c.* Primarily used (see subrule 230.15(2));
- d.* Used by a manufacturer (see subrule 230.15(4)); and
- e.* Used to maintain:
  - (1) A manufactured product's integrity;
  - (2) Unique environmental conditions required for a manufactured product; or
  - (3) Unique environmental conditions required for other computers, machinery, or equipment directly and primarily used in processing by a manufacturer.

**230.16(2) Example of property directly and primarily used to maintain integrity or unique environmental conditions.** A manufacturer purchases a cooling tower to directly and primarily maintain the proper temperature of its machinery and equipment. The manufacturer uses such machinery and equipment directly and primarily in processing. Because the cooling tower maintains the environmental conditions necessary for machinery and equipment that is directly and primarily used in processing,

the cooling tower and materials used to construct or self-construct the cooling tower are exempt from sales and use tax under this rule.

This rule is intended to implement Iowa Code section 423.3(47) “a”(2).  
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.17(423) Exemption for the sale of property directly and primarily used in research and development of new products or processes of processing if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used in research and development of new products or processes of processing. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

**230.17(1) Required elements.** To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, and equipment (see subrule 230.14(2));
- b. Directly used (see subrules 230.15(2) and 230.17(3));
- c. Primarily used (see subrule 230.15(2)); and
- d. Used in research and development (see subrule 230.17(2)) of:
  - (1) New products; or
  - (2) Processes of processing.

**230.17(2)** “Research and development” means experimental or laboratory activity that has as its ultimate goal the development of new products or processes of processing.

**230.17(3)** Property is used “directly” in research and development only if it is used in actual experimental or laboratory activity that qualifies as research and development under this rule.

**230.17(4)** Example of property directly and primarily used in research and development of new products or processes of processing. A hybrid seed producer maintains a research and development laboratory for use in developing new varieties of corn seed. The hybrid seed producer purchases the following items for use in its research and development laboratory: a laboratory computer for processing data related to the genetic structure of various corn plants, an electron microscope for examining the structure of corn plant genes, a steam cleaner for cleaning rugs in the laboratory offices, and a desktop computer for use by the laboratory receptionist. The laboratory computer and the microscope are “directly” used in the research in which the laboratory is engaged; the steam cleaner and the receptionist’s computer are not directly used in research. Therefore, the sales prices of the laboratory computer and the microscope are exempt from sales and use tax. The sales prices of the steam cleaner and the receptionist’s computer are not exempt from tax under this rule.

This rule is intended to implement Iowa Code section 423.3(47) “a”(3).  
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.18(423) Exemption for the sale of computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of computers is exempt from sales tax when the computers are used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

**230.18(1) Required elements.** To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers (see paragraph 230.14(2) “a”);
- b. Used in processing or storage of data or information (see subrule 230.18(2)); and
- c. Used by:
  - (1) An insurance company (see subrule 230.18(3));
  - (2) A financial institution (see subrule 230.18(3)); or
  - (3) A commercial enterprise (see subrule 230.18(3)).

**230.18(2)** *Processing or storage of data or information.* All computers store and process information. However, only if the “final output” for a user or consumer is stored or processed data will the computer be eligible for exemption from tax under this rule.

**230.18(3)** *Insurance company, financial institution, or commercial enterprise.*

*a. Insurance company.* An insurance company is an insurer organized or operating under Iowa Code chapter 508, 514, 515, 518, 518A, 519, or 520 or an insurer authorized to do business in Iowa as an insurer or as a licensed insurance producer under Iowa Code chapter 522B. Excluded from the definition of “insurance company” are benevolent associations governed by Iowa Code chapter 512A, fraternal benefit societies governed by Iowa Code chapter 512B, and health maintenance organizations governed by Iowa Code chapter 514B. This list of exclusions is not intended to be exclusive.

*b. Financial institution.* A financial institution is any bank incorporated under the provisions of any state or federal law, any savings and loan association incorporated under the provisions of federal law, any credit union organized under the provisions of any state or federal law, any corporation licensed as an industrial loan company under Iowa Code chapter 536A, and any affiliate of a bank, savings and loan association, credit union, or industrial loan company.

*c. Commercial enterprise.* A commercial enterprise is a business or manufacturer conducted for profit, other than an insurance company or financial institution. “Commercial enterprise” includes centers for data processing services to insurance companies, financial institutions, businesses, and manufacturers, but excludes professions and occupations as well as nonprofit organizations. A hospital that is a not-for-profit organization is not a commercial enterprise. The term “profession” means a vocation or employment requiring specialized knowledge and often long and intensive academic preparation. The term “occupation” means the principal business of an individual, such as the business of farming. A professional entity that carries on any profession or occupation, such as an accounting firm, is not a commercial enterprise.

**230.18(4)** *Examples of computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise.* A health insurance company has four computers. Computer A is used to monitor the temperature within the insurance company’s building. Computer A transmits messages to the building’s heating and cooling systems, which tell the systems when to raise or lower the level of heating or air conditioning. Computer B is used to store patient records and to recall those records on demand. Computer C is used to tabulate statistics regarding the amount of premiums paid in and the amount of benefits paid out for various classes of insured. Computer D is used to train the insurance company’s employees to perform various additional tasks or to better perform work the employees can already do. Computer D uses various canned programs to accomplish this function. The final output of Computer A is neither stored nor processed information. Therefore, Computer A does not meet the definition of an exempt computer. The final output of Computer B is stored information. The final output of Computer C is processed information. The final output of Computer D is processed information consisting of the training exercises appearing on the computer monitor. The sales prices of Computers B, C, and D are exempt from sales and use tax as computers used in processing or storage of data or information by an insurance company.

This rule is intended to implement Iowa Code section 423.3(47) “a”(4).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.19(423) Exemption for the sale of property directly and primarily used in recycling or reprocessing of waste products if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used in recycling or reprocessing of waste products. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

**230.19(1)** *Required elements.* To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, and equipment (see subrule 230.14(2));
- b. Directly used (see subrule 230.15(2));
- c. Primarily used (see subrule 230.15(2)); and
- d. Used in:
  - (1) Recycling of waste products (see subrule 230.19(2)); or
  - (2) Reprocessing of waste products (see subrule 230.19(2)).

**230.19(2) *Recycling and reprocessing.***

a. “Recycling” is any process by which waste or materials that would otherwise become waste are collected, separated, or processed and revised or returned for use in the form of raw materials or products. Recycling includes, but is not limited to, the composting of yard waste that has been previously separated from other waste. Recycling does not include any form of energy recovery.

b. “Reprocessing” is not a subcategory of processing. Reprocessing of waste products is an activity separate and independent from the processing of tangible personal property.

c. Recycling or reprocessing generally begins when the waste products are collected or separated. Recycling or reprocessing generally ends when waste products are in the form of raw material or another non-waste product. Activities that occur between these two points and are an integral part of recycling or processing qualify as recycling or reprocessing.

**230.19(3) *Examples.***

a. Computers, machinery, and equipment that may be exempt from sales and use tax under this rule include, but are not limited to, compactors, balers, crushers, grinders, cutters, and shears if directly and primarily used in recycling or reprocessing.

b. End loaders, forklifts, trucks, conveyor systems, and other moving devices directly and primarily used in the movement of waste products during recycling or reprocessing may be exempt from sales and use tax under this rule.

c. A bin or other container used to store waste products before collection for recycling or reprocessing is not directly and primarily used in recycling or reprocessing, and its sales price is not exempt from sales and use tax under this rule.

d. A vehicle used directly and primarily for collecting waste products for recycling or reprocessing could be a vehicle used for an exempt purpose under this rule, and such a vehicle could be exempt from the fee for new registration. Thus, a garbage truck could qualify for this exemption if the truck is directly and primarily used in recycling; however, a garbage truck primarily used to haul garbage to a landfill does not qualify for exemption under this rule.

EXAMPLE A: Company A recycles household waste. Company A uses several machines in its facility to separate waste products into recyclable and nonrecyclable materials and to further separate the recyclable materials into paper, plastic, or glass. The sales prices of all separating machines are exempt from sales and use tax as machines directly and primarily used in recycling of waste products.

EXAMPLE B: Company B uses grinding machines to convert logs, stumps, pallets, crates, and other waste wood into wood chips. Company B then uses its trucks to deliver the wood chips to local purchasers. The sales prices of the grinding machines are exempt from sales and use tax as machines directly and primarily used in recycling or reprocessing of waste products. The trucks used to transport the wood chips are not used in recycling or reprocessing because the wood chips are in their final form when loaded onto the trucks.

This rule is intended to implement Iowa Code section 423.3(47) “a”(5).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.20(423) Exemption for the sale of pollution control equipment used by a manufacturer if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of pollution control equipment, including but not limited to equipment required or certified by an agency of Iowa or of the United States government, is exempt from sales and use tax when the property is used by a manufacturer. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

**230.20(1)** Required elements. To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Pollution control equipment (See subrule 230.20(2)); and
- b. Used by a manufacturer (See subrule 230.15(4)).

**230.20(2)** “Pollution control equipment” is any disposal system or apparatus used or placed in operation primarily for the purpose of reducing, controlling, or eliminating air or water pollution. Pollution control equipment does not include any apparatus used to eliminate noise pollution. Liquid, solid, and gaseous wastes are included within the meaning of the word “pollution.” Pollution control equipment specifically includes, but is not limited to, any equipment the use of which is required or certified by an agency of this state or of the United States government. Wastewater treatment equipment, dust mitigation systems, and scrubbers used in smokestacks are examples of pollution control equipment. However, pollution control equipment does not include any equipment used only for worker safety, such as a gas mask.

EXAMPLE: A manufacturer constructs a wastewater treatment facility to treat wastewater from its manufacturing facility. The wastewater treatment facility uses aboveground piping and other equipment to divert wastewater from the local water treatment plant. The facility then converts wastewater into a biogas, which the manufacturer uses as an energy source in its manufacturing facility. The equipment used for the wastewater treatment facility is pollution control equipment used by a manufacturer. The sales price of the equipment is exempt from sales and use tax.

This rule is intended to implement Iowa Code section 423.3(47) “a”(6).  
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.21(423) Exemption for the sale of fuel or electricity used in exempt property if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price of fuel or electricity consumed by property that is exempt from sales and use tax under rule 701—230.14(423), 701—230.15(423), 701—230.16(423), 701—230.17(423), 701—230.19(423), or 701—230.20(423) is also exempt from sales and use tax. The sales price of electricity or other fuel consumed by computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise remains subject to tax even if such computers are exempt under rule 701—230.18(423). For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

EXAMPLE: A manufacturer operates a power plant. The manufacturer uses energy from the power plant to operate machinery and equipment used directly and primarily in processing at its manufacturing facility. The fuel consumed in the manufacturer’s power plant is exempt from sales and use tax.

This rule is intended to implement Iowa Code section 423.3(47) “b.”  
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

**701—230.22(423) Exemption for the sale of services for designing or installing new industrial machinery or equipment if the sale occurs as part of a contract entered into on or after July 1, 2016.** The sales price from the services of designing or installing new industrial machinery or equipment is exempt from sales and use tax. The enumerated services of electrical or electronic installation are included in this exemption.

**230.22(1)** Required elements. To qualify for the exemption, the purchaser must prove the service is:

- a. A design or installation service (see subrule 230.22(2));
- b. Of new (see subrule 230.22(3)); and
- c. Industrial machinery or equipment (see subrule 230.22(4)).

**230.22(2)** Design or installation services include electrical and electronic installation. “Design or installation” services do not include any repair service.

**230.22(3)** “New” means never having been used or consumed by anyone. The exemption does not apply to design or installation services on reconstructed, rebuilt, repaired, or previously owned machinery or equipment.

**230.22(4)** Industrial machinery or equipment.

*a. Generally.* “Industrial machinery or equipment” means machinery or equipment, as defined in subrule 230.14(2). The sale of industrial machinery or equipment must also qualify for exemption under any of the following:

(1) Property used directly and primarily in processing by a manufacturer (see rule 701—230.15(423)).

(2) Property used directly and primarily by a manufacturer to maintain the integrity of the manufacturer’s product or to maintain unique environmental conditions for computers, machinery, or equipment (see rule 701—230.16(423)).

(3) Property used directly and primarily in research and development of new products or processes of processing (see rule 701—230.17(423)).

(4) Property used directly and primarily in recycling or reprocessing of waste products (see rule 701—230.19(423)).

(5) Pollution control equipment used by a manufacturer (see rule 701—230.20(423)).

*b. Exclusions.* The following property is not industrial machinery or equipment regardless of how the purchaser uses it:

(1) Computers (see paragraph 230.14(2) “a”).

(2) Supplies, including but not limited to drill bits, grinding wheels, punches, taps, reamers, saw blades, lubricants, coolants, sanding discs, sanding belts, and air filters.

(3) Replacement parts (see paragraph 230.14(2) “d”).

**230.22(5) Billing.** The sales price for designing or installing new industrial machinery or equipment must be separately identified, charged separately, and reasonable in amount for the exemption to apply. The exemption applies to new industrial machinery or equipment regardless of how it is purchased, including leased or rented machinery or equipment.

**EXAMPLE:** Dealer sells and installs two new machines for Manufacturer. Manufacturer uses one machine on its production floor, where it is directly and primarily used in processing. Manufacturer uses the other machine in its machine shop, where it is not directly and primarily used in processing. Dealer gives an invoice to Manufacturer that separately itemizes the sales prices for each machine and each installation. The machine used on the production floor is new industrial machinery or equipment, and the sales prices of the machine and its installation are exempt from sales and use tax. The machine used in the machine shop is not new industrial machinery or equipment, and the sales prices of the machine and its installation are taxable.

This rule is intended to implement Iowa Code section 423.3(48).

[Filed ARC 2349C (Amended Notice ARC 2239C, IAB 11/11/15; Notice ARC 2178C, IAB 9/30/15), IAB 1/6/16, effective 2/10/16]

CHAPTER 602  
CLASSES OF DRIVER'S LICENSES

**761—602.1(321) Driver's licenses.**

**602.1(1) *Classes.*** The department issues the following classes of driver's licenses. All licenses issued, including special licenses and permits, shall carry a class designation. A license shall be issued for only one class, except that Class M may be issued in combination with another class.

- Class A—commercial driver's license (CDL)
- Class B—commercial driver's license (CDL)
- Class C—commercial driver's license (CDL)
- Class C—noncommercial driver's license
- Class D—noncommercial driver's license (chauffeur)
- Class M—noncommercial driver's license (motorcycle)

**602.1(2) *Special licenses and permits.*** The department issues the following special licenses and permits. More than one type of special license or permit may be issued to an applicant. On the driver's license, a restriction number designates the type of special license or permit issued, as follows:

- 1—Motorcycle instruction permit—includes motorcycle instruction permits issued under Iowa Code subsections 321.180(1) and 321.180B(1)
- 2—Noncommercial instruction permit (vehicle less than 16,001 gross vehicle weight rating)—includes instruction permits, other than motorcycle instruction permits, issued under Iowa Code subsection 321.180(1) and section 321.180A and subsection 321.180B(1)
- 3—Commercial learner's permit
- 4—Chauffeur's instruction permit
- 5—Motorized bicycle license
- 6—Minor's restricted license
- 7—Minor's school license

**602.1(3) *Commercial driver's license (CDL).*** See 761—Chapter 607 for information on the procedures, requirements and validity of a commercial driver's license (Classes A, B and C) and a commercial learner's permit, and their restrictions and endorsements.

This rule is intended to implement Iowa Code sections 321.178, 321.180, 321.180A, 321.180B, 321.189, and 321.194.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—602.2(321) Information and forms.** Applications, forms and information about driver's licensing are available at any driver's license examination station. Assistance is also available at the address in rule 761—600.2(17A).

**602.2(1) *Certificate of completion.*** Form 430036 shall be used to submit proof of successful completion of an Iowa-approved course in driver education, motorcycle rider education or motorized bicycle education.

*a.* If a student completed a course in another state, a public or licensed commercial or private provider of the Iowa-approved course may issue the form for the student if the provider determines that the out-of-state course is comparable to the Iowa-approved course.

*b.* If the out-of-state course is comparable but lacks certain components of the Iowa-approved course, the provider may issue the form after the student completes the missing components.

**602.2(2) *Affidavit for school license.*** Form 430021 shall be used for submitting the required statements, affidavits and parental consent for a minor's school license. See rule 761—602.26(321).

**602.2(3) *Waiver of accompanying driver for intermediate licensee.*** Form 431170 is the waiver described in Iowa Code subsection 321.180B(2). This form allows an intermediate licensee to drive unaccompanied between the hours of 12:30 a.m. and 5 a.m. and must be in the licensee's possession when the licensee is driving during the hours to which the waiver applies.

- a.* If the waiver is for employment, the form must be signed by the licensee's employer.

*b.* If the waiver is for school-related extracurricular activities, the form must be signed by the chairperson of the school board, the superintendent of the school, or the principal of the school if authorized by the superintendent.

*c.* The form must be signed by the licensee's parent or guardian. However, the parent's or guardian's signature is not required if the licensee is married and the original or a certified copy of the marriage certificate is in the licensee's possession when the licensee is driving during the hours to which the waiver applies.

This rule is intended to implement Iowa Code sections 321.8, 321.178, 321.180B, 321.184, 321.189, and 321.194.

[ARC 7902B, IAB 7/1/09, effective 8/5/09]

**761—602.3(321) Examination and fee.** Rescinded IAB 8/9/00, effective 7/24/00.

**761—602.4(321) Definitions of immediate family.**

**602.4(1)** A "member of the permittee's immediate family" as used in Iowa Code subsection 321.180(1) means the permittee's parent or guardian or a brother, sister or other relative of the permittee who resides at the permittee's residence.

**602.4(2)** A "member of the permittee's immediate family" as used in Iowa Code section 321.180B, subsections 1 and 2, means a brother, sister or other relative of the permittee who resides at the permittee's residence.

This rule is intended to implement Iowa Code sections 321.180 and 321.180B.

**761—602.5 to 602.10** Reserved.

**761—602.11(321) Class C noncommercial driver's license.** This rule describes a noncommercial Class C driver's license that is not a special license or permit.

**602.11(1) *Validity and issuance.***

*a.* The license is valid for operating:

(1) A motor vehicle that does not require a commercial driver's license or a Class D driver's license for its operation.

(2) A motorized bicycle.

(3) A motorcycle only if the license has a motorcycle endorsement.

*b.* The license is issued for either two years or eight years.

(1) A qualified applicant who is at least 17 years, 11 months of age but not yet 72 years of age shall be issued an eight-year license. However, the expiration date of the license issued shall not exceed the licensee's 74th birthday.

(2) A two-year license shall be issued to a qualified applicant who is under 17 years, 11 months of age or who is 72 years of age or older.

(3) A two-year license may also be issued, at the discretion of the department, to an applicant whose license is restricted due to vision or other physical disabilities.

**602.11(2) *Requirements.***

*a.* An applicant shall be at least 16 years of age.

*b.* Except as otherwise provided in Iowa Code subsection 321.178(3), an applicant under 18 years of age must meet the requirements of Iowa Code section 321.180B and submit proof of successful completion of an Iowa-approved course in driver education.

This rule is intended to implement Iowa Code sections 321.177, 321.178, 321.180B, 321.189, and 321.196.

[ARC 1714C, IAB 11/12/14, effective 12/17/14]

**761—602.12(321) Class D noncommercial driver's license (chauffeur).** This rule describes a noncommercial Class D driver's license.

**602.12(1) *Validity and issuance.***

*a.* The license is valid for operating:

(1) A motor vehicle as a chauffeur as specified by the endorsement on the license, unless the type of vehicle or type of operation requires a commercial driver's license.

(2) A motor vehicle that may be legally operated under a noncommercial Class C driver's license, including a motorized bicycle.

(3) A motorcycle only if the license has a motorcycle endorsement.

*b.* The license shall have one endorsement authorizing a specific type of motor vehicle or type of operation, as listed in 761—subrule 605.4(3). The gross vehicle weight rating shall be determined pursuant to rule 761—604.35(321).

*c.* The license is issued for either two years or eight years.

(1) A qualified applicant who is at least 18 years of age but not yet 72 years of age shall be issued an eight-year license. However, the expiration date of the license issued shall not exceed the licensee's 74th birthday.

(2) A two-year license shall be issued to a qualified applicant who is 72 years of age or older.

(3) A two-year license may also be issued, at the discretion of the department, to an applicant whose license is restricted due to vision or other physical disabilities.

**602.12(2) Requirements.**

*a.* An applicant shall be at least 18 years of age.

*b.* Reserved.

This rule is intended to implement Iowa Code sections 321.1, 321.177, 321.189, and 321.196. [ARC 1714C, IAB 11/12/14, effective 12/17/14; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—602.13(321) Class M noncommercial driver's license (motorcycle).** This rule describes a noncommercial Class M driver's license that is not a special license or permit.

**602.13(1) Validity and issuance.**

*a.* The license is valid for operating:

(1) A motorcycle. However, the license may have a restriction which limits operation to a three-wheel motorcycle.

(2) A motorized bicycle.

*b.* The license is issued for either two years or eight years.

(1) A qualified applicant who is at least 17 years, 11 months of age but not yet 72 years of age shall be issued an eight-year license. However, the expiration date of the license issued shall not exceed the licensee's 74th birthday.

(2) A two-year license shall be issued to a qualified applicant who is under 17 years, 11 months of age or who is 72 years of age or older.

(3) A two-year license may also be issued, at the discretion of the department, to an applicant whose license is restricted due to vision or other physical disabilities.

*c.* An Iowa driver's license issued before March 15, 1968, which is still valid because of an extension, is valid for motorcycles. An Iowa driver's license issued from March 15, 1968, through June 30, 1972, which is still valid because of an extension, is valid for motorcycles unless the back of the license is stamped "Not valid for motorcycles."

**602.13(2) Requirements.**

*a.* An applicant shall be at least 16 years of age.

*b.* Except as otherwise provided in Iowa Code subsection 321.178(3), an applicant under 18 years of age must meet the requirements of Iowa Code section 321.180B and submit proof of successful completion of an Iowa-approved course in driver education.

*c.* An applicant under 18 years of age must submit proof of successful completion of an Iowa-approved course in motorcycle rider education.

This rule is intended to implement Iowa Code sections 321.177, 321.178, 321.180B, 321.189 and 321.196.

[ARC 1714C, IAB 11/12/14, effective 12/17/14]

**761—602.14(321) Transition from five-year to eight-year licenses.** During the period January 1, 2014, to December 31, 2018, the department shall issue qualified applicants otherwise eligible for an eight-year license a five-year, six-year, seven-year, or eight-year license, subject to all applicable limitations for age and ability. The applicable period shall be randomly assigned to the applicant by the department's computerized issuance system based on a distribution formula intended to spread renewal volumes as equally as practical over the eight-year period beginning January 1, 2019, and ending December 31, 2026.

This rule is intended to implement Iowa Code section 321.196 and 2013 Iowa Acts, chapter 104, section 2.

[ARC 1714C, IAB 11/12/14, effective 12/17/14]

**761—602.15(321) Minor's restricted license.** Renumbered as 761—602.25(321)IAB 1/8/92, effective 2/12/92.

**761—602.16(321) Temporary instruction permit.** Rescinded IAB 1/8/92, effective 2/12/92.

**761—602.17(321) Minor's school license.** Renumbered as 761—602.26(321)IAB 1/8/92, effective 2/12/92.

**761—602.18(321) Motorcycle instruction permit.** This rule describes a motorcycle instruction permit issued under Iowa Code subsection 321.180(1) or 321.180B(1).

**602.18(1) Validity and issuance.**

- a. The motorcycle instruction permit is a permit that is added to another driver's license.
- b. The permit is valid for operating a motorcycle when the permittee is accompanied by a person specified in Iowa Code subsection 321.180(1) or 321.180B(1), as applicable to the age of the permittee.
- c. The permit is not valid for operating a motorized bicycle.
- d. The permit is issued for four years and is not renewable.

**602.18(2) Requirement.** An applicant shall be at least 14 years of age.

This rule is intended to implement Iowa Code sections 321.177, 321.180 and 321.180B.

**761—602.19(321) Noncommercial instruction permit.** This rule describes a noncommercial instruction permit, other than a motorcycle instruction permit, issued under Iowa Code subsection 321.180(1) or 321.180B(1).

**602.19(1) Validity and issuance.**

- a. The permit is a restricted, noncommercial Class C driver's license.
- b. The permit is valid for operating a motor vehicle that may be legally operated under a noncommercial Class C driver's license when the permittee is accompanied by a person specified in Iowa Code subsection 321.180(1) or 321.180B(1), as applicable to the age of the permittee.
- c. The permit is not valid for operating a motorized bicycle.
- d. The permit is not valid as a motorcycle instruction permit.
- e. The permit is issued for four years.

**602.19(2) Requirement.** An applicant shall be at least 14 years of age.

This rule is intended to implement Iowa Code sections 321.177, 321.180 and 321.180B.

**761—602.20** Rescinded IAB 11/18/98, effective 12/23/98.

**761—602.21(321) Special noncommercial instruction permit.** This rule describes a special noncommercial instruction permit issued under Iowa Code section 321.180A.

**602.21(1) Validity and issuance.**

- a. The permit is a restricted, noncommercial Class C driver's license that is issued to a person whose application for driver's license renewal has been denied or whose driver's license has been suspended for incapability due to a physical disability.

*b.* The permit is valid for operating a motor vehicle that may be legally operated under a noncommercial Class C driver's license when the permittee is accompanied by a person specified in Iowa Code section 321.180A.

*c.* The permit is not valid for operating a motorized bicycle.

*d.* The permit is not valid as a motorcycle instruction permit.

*e.* The permit is valid for six months from the date of issuance. It is invalid after the expiration date on the permit.

*f.* The permit may be reissued for one additional six-month period.

**602.21(2) Requirement.** An applicant must submit a medical report pursuant to 761—subrule 600.4(6).

This rule is intended to implement Iowa Code section 321.180A.

**761—602.22** Reserved.

**761—602.23(321) Chauffeur's instruction permit.**

**602.23(1) Validity and issuance.**

*a.* A chauffeur's instruction permit is a permit that is added to a Class D license or a noncommercial Class C license that is not a special license or permit.

*b.* The license with the permit is valid for operating:

(1) A motor vehicle that may be legally operated under the class of license (and for Class D, the endorsement) held by the licensee, including a motorized bicycle.

(2) A motor vehicle, other than a commercial motor vehicle or a motorcycle, as a chauffeur if accompanied by a person with a valid Class D license or a commercial driver's license valid for the vehicle being operated.

*c.* The permit is issued for two years.

**602.23(2) Requirements.**

*a.* An applicant shall be at least 18 years of age.

*b.* Reserved.

This rule is intended to implement Iowa Code sections 321.1, 321.177 and 321.180.

**761—602.24(321) Motorized bicycle license.**

**602.24(1) Validity and issuance.**

*a.* A motorized bicycle license is a restricted, noncommercial Class C license.

*b.* The license is valid for operating a motorized bicycle.

*c.* The license is issued for two years.

**602.24(2) Requirements.**

*a.* An applicant shall be at least 14 years of age.

*b.* An applicant under 16 years of age must submit proof of successful completion of an Iowa-approved course in motorized bicycle education.

This rule is intended to implement Iowa Code sections 321.177 and 321.189.

**761—602.25(321) Minor's restricted license.**

**602.25(1) Validity and issuance.**

*a.* A minor's restricted license is a restricted, noncommercial Class C or Class M driver's license.

*b.* The license is valid for driving to and from the licensee's place of employment or to transport dependents to and from temporary care facilities, if necessary to maintain the licensee's present employment.

*c.* The type of motor vehicle that may be operated is controlled by the class of driver's license issued. A Class C minor's restricted license is valid for operating a motorcycle only if the license has a motorcycle endorsement. A minor's restricted license is valid for operating a motorized bicycle only for the purposes specified in paragraph "b" of this subrule.

*d.* The license is issued for two years.

**602.25(2) Requirements.**

- a. The applicant shall be at least 16 years of age but not yet 18.
- b. The applicant shall submit to the department a statement from the employer confirming the applicant's employment.
- c. Proof of nonattendance is required. Proof of nonattendance is receipt of notification from the appropriate school authority that the applicant does not attend school, as set out in 761—subrule 615.23(2).
- d. The applicant shall submit proof of successful completion of an Iowa-approved course in driver education.
- e. For a Class M minor's restricted license or a motorcycle endorsement, the applicant shall also submit proof of successful completion of an Iowa-approved course in motorcycle rider education.

This rule is intended to implement Iowa Code sections 299.1B, 321.178, 321.180B, 321.189, 321.196 and 321.213B.

**761—602.26(321) Minor's school license.****602.26(1) Validity and issuance.**

- a. A minor's school license is a restricted, noncommercial Class C or Class M driver's license.
- b. The license is valid for driving unaccompanied from 6 a.m. to 10 p.m. on the most direct route between a licensee's residence and schools of enrollment or the closest school bus stop or public transportation service, and between schools of enrollment, to attend scheduled courses and extracurricular activities within the school district.
- c. The license is also valid for driving when the licensee is accompanied by a person specified in Iowa Code subsection 321.180B(1).
- d. The type of motor vehicle that may be operated is controlled by the class of driver's license issued. A Class C minor's school license is valid for operating a motorcycle only if the license has a motorcycle endorsement. A minor's school license is valid for operating a motorized bicycle only for the purposes specified in paragraph "b" of this subrule.
- e. The license is issued for two years.

**602.26(2) Requirements.**

- a. An applicant shall be at least 14 years of age but not yet 18 and meet the requirements of Iowa Code section 321.194.
- b. An applicant shall submit a statement of necessity signed by the chairperson of the school board, the superintendent of the school, or the principal of the school if authorized by the superintendent. The statement shall be on Form 430021.
- c. An applicant shall submit proof of successful completion of an Iowa-approved course in driver education.
- d. For a Class M minor's school license or a motorcycle endorsement, an applicant shall also submit proof of successful completion of an Iowa-approved course in motorcycle rider education.

**602.26(3) Exemption.**

a. An applicant is not required to have completed an approved driver education course if the applicant demonstrates to the satisfaction of the department that completion of the course would impose a hardship upon the applicant; however, the applicant must meet all other requirements for a school license. "Hardship" means:

(1) If the applicant is 14 years old, that a driver education course will not begin at the applicant's school(s) of enrollment or at a public school in the applicant's district of residence within one year following the applicant's fourteenth birthday; or

(2) If the applicant is 15 years old, that a driver education course will not begin at the applicant's school(s) of enrollment or at a public school in the applicant's district of residence within six months following the applicant's fifteenth birthday; or

(3) If the applicant is between 16 and 18 years old, that a driver education course is not offered at the applicant's school(s) of enrollment or at a public school in the applicant's district of residence at the time the request for hardship status is submitted to the department; or

(4) That the applicant is permanently handicapped. In this rule, “handicapped” means that, because of a disability or impairment, the applicant is unable to walk in excess of 200 feet unassisted or cannot walk without causing serious detriment or injury to the applicant’s health.

*b.* “Demonstrates to the satisfaction of the department” means that the department has received an affidavit on Form 430021 attesting that completion of the course would impose a hardship upon the applicant. The affidavit shall be signed by the applicant’s parent, custodian or guardian and by the superintendent of the applicant’s school, the chairperson of the school board, or the principal of the applicant’s school if authorized by the superintendent.

This rule is intended to implement Iowa Code sections 321.177, 321.180B, 321.189, 321.194 and 321.196.

**761—602.27 to 602.29** Reserved.

**761—602.30(321) Special instruction permit.** Rescinded IAB 1/8/92, effective 2/12/92.

<sup>1</sup> Effective date delayed 70 days by the Administrative Rules Review Committee at its March 9, 1988, meeting. Delay lifted by ARRC, April 21, 1988.

CHAPTER 604  
LICENSE EXAMINATION

[Prior to 6/3/87, see Transportation Department[820]—(07,C)rules 13.3 and 13.17]

**761—604.1(321) Authority and scope.**

**604.1(1)** The department is authorized to determine by examination an applicant's ability to operate motor vehicles safely upon the highways and to issue all driver's licenses.

**604.1(2)** This chapter of rules shall apply to the examination for all driver's licenses. Information on the additional examination procedures and requirements for a commercial driver's license or commercial learner's permit is given in 761—Chapter 607.

This rule is intended to implement Iowa Code sections 321.2, 321.3, 321.13, 321.177, and 321.186. [ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—604.2(321) Definitions.**

*"Binocular field of vision"* is the sum of the temporal measurements or the sum of the nasal measurements.

*"Monocular field of vision"* is the sum of the temporal measurement and the nasal measurement for one eye.

*"Representative vehicle"* is a vehicle which is characteristic of and requires operating skills comparable to those vehicles that may legally be operated under the class of license or endorsement desired.

This rule is intended to implement Iowa Code sections 321.174 and 321.186. [ARC 9991B, IAB 2/8/12, effective 3/14/12]

**761—604.3(17A) Information and forms.**

**604.3(1)** Applications, forms, and information about driver's license examinations are available at any driver's license examination station. Assistance is also available from the office of driver services at the address in 761—600.2(17A).

**604.3(2)** The "Iowa Driver Manual" and the "Iowa Motorcycle Operator Manual" are also available from the department.

This rule is intended to implement Iowa Code section 17A.3.

**761—604.4 to 604.6** Reserved.

**761—604.7(321) Examination.**

**604.7(1)** An examination shall include:

- a. A vision screening if the person has not filed a vision report.
- b. A knowledge test of Iowa traffic laws and highway signs.
- c. A driving test of the person's ability to operate a motor vehicle.

**604.7(2)** The examination required for a driver's license depends upon the class of license requested, applicable endorsements, and the qualifications of the applicant.

This rule is intended to implement Iowa Code sections 321.186 and 321.186A.

**761—604.8 and 604.9** Reserved.

**761—604.10(321) Vision screening.**

**604.10(1) Requirement.** Vision screening or a vision report is required of an applicant for a driver's license.

**604.10(2) Method.** At driver's license examination stations, a vision screening instrument shall be used to screen the applicant's vision. An applicant who has corrective lenses may be screened with or without the corrective lenses.

**604.10(3) Report.** A vision report shall be submitted on Form 430032 signed by a licensed vision specialist and shall report the person's visual acuity level and field of vision as measured within 30 days prior to the date of the application. In lieu of Form 430032, a vision report signed by a licensed vision

specialist on the specialist's letterhead may be accepted if it contains all the information specified on Form 430032.

**604.10(4) Exception for persons renewing electronically.** An applicant renewing a driver's license electronically pursuant to 761—subrule 605.25(7) is not required to complete a vision screen or submit a vision report to complete the renewal. This subrule does not preclude the department from requiring a vision screen or vision report of a person who has renewed a driver's license electronically when the department has reason to believe that the person is not capable of operating a motor vehicle safely.

This rule is intended to implement Iowa Code sections 321.186, 321.186A and 321.196 as amended by 2013 Iowa Acts, House File 355, section 1.

[ARC 9991B, IAB 2/8/12, effective 3/14/12; ARC 0895C, IAB 8/7/13, effective 7/9/13; ARC 1073C, IAB 10/2/13, effective 11/6/13]

**761—604.11(321) Vision standards.** The visual acuity and field of vision standards for licensing and the applicable restrictions are as follows.

**604.11(1) Visual acuity standards.**

*a. When the applicant is screened without corrective lenses.* If the visual acuity is 20/40 or better with both eyes or with the better eye, no restriction will be imposed. If the visual acuity is less than 20/40 but at least 20/70 with both eyes or with the better eye, the applicant shall be restricted from driving when headlights are required.

*b. When the applicant is screened with corrective lenses.* If the visual acuity is 20/40 or better with both eyes or with the better eye, the applicant shall be required to wear corrective lenses. If the visual acuity is less than 20/40 but at least 20/70 with both eyes or with the better eye, the applicant shall be required to wear corrective lenses and shall be restricted from driving when headlights are required.

*c. Other standards.* If the visual acuity in the left eye is less than 20/100, the applicant shall be restricted to driving a vehicle with both left and right outside rearview mirrors. However, if the applicant has a visual acuity of 20/40 in the right eye and less than 20/100 in the left eye without corrective lenses and has corrective lenses that improve the vision in the left eye to better than 20/100, the applicant shall have the option of being restricted to driving with corrective lenses or driving a vehicle with both left and right outside rearview mirrors.

**604.11(2) Field of vision standards.**

*a.* If the binocular field of vision is at least 140 degrees, no restriction will be imposed.

*b.* If the binocular field of vision is less than 140 degrees but at least 110 degrees, or one eye has a monocular field of vision of at least 100 degrees, the applicant shall be restricted to driving a vehicle with both left and right outside rearview mirrors.

This rule is intended to implement Iowa Code sections 321.186, 321.193, and 321.196.

[ARC 9991B, IAB 2/8/12, effective 3/14/12]

**761—604.12(321) Vision referrals.**

**604.12(1) Referral.**

*a.* If an applicant on first screening cannot attain 20/40 but can attain 20/70 with at least one eye, the department shall not issue a license to the applicant. Instead, the department shall advise the applicant to consult a licensed vision specialist.

*b.* A vision report, pursuant to subrule 604.10(3), shall be required before the department will reconsider licensing.

**604.12(2) License.**

*a.* The department shall affix a sticker to the applicant's license stating: "Renewal or license issuance denied due to vision."

*b.* If the applicant's license is valid for less than 30 days, the department may issue a temporary driving permit with restrictions appropriate to the applicant's visual acuity level and field of vision. The temporary driving permit is valid for not more than 30 days from the end of the current license validity.

**604.12(3) Report.** If the vision report recommends a restriction, the department shall issue a restricted license even though it would not be required by departmental standards.

**604.12(4) Applicant refusal.** If an applicant refuses to consult a licensed vision specialist, the department shall issue or deny the license based on the results achieved on the vision screening.

This rule is intended to implement Iowa Code sections 321.181, 321.186, 321.186A, 321.193 and 321.196.

**761—604.13(321) Vision screening results.**

**604.13(1) Two-year license.** An applicant who cannot attain a visual acuity of 20/40 with both eyes or with the better eye shall be issued a two-year license. This restriction may be waived by the department when a vision report pursuant to subrule 604.10(3) certifies that the vision has stabilized and is not expected to deteriorate.

**604.13(2) License denied.**

*a.* An applicant who cannot attain a visual acuity of 20/70 with both eyes or with the better eye shall not be licensed, subject to discretionary issuance under subrule 604.13(4).

*b.* If the applicant's binocular field of vision is less than 110 degrees, or the monocular field of vision is less than 100 degrees, the applicant shall not be licensed, subject to discretionary issuance under subrule 604.13(4).

**604.13(3) Reapplication.** An applicant who cannot meet the vision standards in subrule 604.13(2) may reapply when the vision improves and meets the vision standards. If a suspension or denial notice was served, reapplication must be made to the office of driver services at the address in 761—600.2(17A), and not at a driver's license examination station.

**604.13(4) Discretionary issuance.**

*a.* An applicant whose license is restricted under rule 761—604.11(321) or who cannot meet the vision standards in subrule 604.13(2) may submit a written request for review by an informal settlement officer.

*b.* Based upon consideration of the applicant's vision screening results or vision report, driving test and driving record, the written recommendation of the applicant's licensed vision specialist, and traffic conditions in the vicinity of the applicant's residence, the officer may recommend issuing a license with restrictions suitable to the applicant's capabilities. However:

(1) An applicant who cannot attain a visual acuity of 20/100 with both eyes or with the better eye may be considered for licensing only after recommendation by the medical advisory board.

(2) An applicant who cannot attain a visual acuity of 20/199 with both eyes or with the better eye shall not be licensed.

(3) If an applicant's binocular field of vision or monocular field of vision is less than 75 degrees, the applicant may be considered for licensing only after recommendation by the medical advisory board.

(4) An applicant who cannot attain a binocular or monocular field of vision of 21 degrees shall not be licensed.

*c.* The officer's recommendation denying discretionary issuance or regarding the extent and nature of restrictions is subject to reversal or modification upon review or appeal only if it is clearly characterized by an abuse of discretion.

This rule is intended to implement Iowa Code sections 321.186, 321.186A, 321.193 and 321.196.  
[ARC 9991B, IAB 2/8/12, effective 3/14/12]

**761—604.14 to 604.19** Reserved.

**761—604.20(321) Knowledge test.**

**604.20(1) Written test.** A knowledge test is a written test to determine an applicant's ability to read and understand Iowa traffic laws and the highway signs that regulate, warn, and direct traffic. A test may be revised at any time but each test states the minimum passing score.

**604.20(2) Three types of tests.** There are three types of knowledge tests: an operator's test, a chauffeur's test, and a motorcycle test. The requirement for a license depends upon the class of license desired, applicable endorsements, and the qualifications of the applicant.

**604.20(3) Oral test.** An applicant who is unable to read or understand a written test may request an oral test. The oral test may be administered by an examiner or by an automated testing device.

**604.20(4) Waiver.** Rescinded IAB 1/8/92, effective 2/12/92.

This rule is intended to implement Iowa Code section 321.186.

**761—604.21(321) Knowledge test requirements and waivers.**

**604.21(1) Knowledge test requirements.** The knowledge test requirements are as follows:

*a. Operator's test.* An operator's knowledge test is required for all classes of driver's licenses and all types of special driver's licenses and permits.

*b. Motorcycle test.* A motorcycle knowledge test is required for all:

- (1) Motorcycle instruction permits.
- (2) Class M driver's licenses.
- (3) Motorcycle endorsements.

*c. Chauffeur's test.* A chauffeur's knowledge test is required for all:

- (1) Chauffeur's instruction permits.
- (2) Class D driver's licenses except those with an endorsement for "passenger vehicle less than 16-passenger design."

**604.21(2) Knowledge test waivers.** The department may waive a knowledge test listed in subrule 604.21(1) if the applicant meets one of the following qualifications:

*a.* The applicant has passed the same type of test for another Iowa driver's license or an equivalent out-of-state license that is still valid.

*b.* The applicant has a valid, equivalent driver's license issued by a foreign jurisdiction with which Iowa has a nonbinding reciprocity agreement.

*c.* The applicant has a military extension and is renewing the applicant's Iowa driver's license within six months following separation from active duty.

This rule is intended to implement Iowa Code sections 321.180, 321.180A, 321.180B, 321.186, 321.189, 321.196 and 321.198.

**761—604.22(321) Knowledge test results.**

**604.22(1) Proof of Passing score.** When necessary, the department shall give the applicant a form, valid for 90 days, which certifies that the applicant has passed the knowledge test.

**604.22(2) Retesting.** An applicant who fails a knowledge test may repeat the test at the discretion of the examiner, but at least two hours shall elapse between tests.

This rule is intended to implement Iowa Code section 321.186.

**761—604.23 to 604.29** Reserved.

**761—604.30(321) Driving test.** A driving test is a demonstration of an applicant's ability to exercise ordinary and reasonable control in the operation of a motor vehicle under actual traffic conditions. The test is also called a road test, field test, or driving demonstration. A motorcycle skill test is an off-street demonstration of an applicant's ability to control the motorcycle in a set of standard maneuvers, and a motorcycle driving test is an on-street demonstration.

**604.30(1) Vehicle type and safety.**

*a.* For the driving test, the applicant shall provide a representative vehicle as defined in 761—604.2(321).

*b.* The examiner or other authorized personnel shall visually inspect the vehicle. If a vehicle is illegal or unsafe, or is not a representative vehicle, the examiner shall refuse to administer the test until corrections are made or an acceptable vehicle is provided.

**604.30(2) Criteria and route.** Form 430024, "Your Driving Test," explains the criteria for passing the test and shall be given to the applicant before any required test, except a motorcycle skill test. The applicant shall be directed over one of the routes which have been preselected by the examiner to test driving skills and maneuvers.

**604.30(3) Test score.** The examiner shall use the standard departmental score sheet and shall enter the test score and the licensing decision in the spaces provided. At the end of the test, the examiner shall explain the test score. The test score result is valid for 90 days.

**604.30(4) Retesting.** If an applicant fails a driving test, the test may be rescheduled at the discretion of the examiner.

This rule is intended to implement Iowa Code sections 321.174 and 321.186.  
[ARC 9991B, IAB 2/8/12, effective 3/14/12]

**761—604.31(321) Driving test requirements and waivers for noncommercial driver's licenses.**

**604.31(1) Driving test requirements.** The driving test requirements for noncommercial driver's licenses are as follows:

- a. *Instruction permits.* A driving test is not required to obtain an instruction permit.
- b. *Class C driver's licenses.* For a Class C driver's license other than an instruction permit or a motorized bicycle license, an operator's driving test in a representative vehicle is required.
- c. *Class D driver's licenses.* For a Class D driver's license, a driving test in a representative vehicle for the endorsement requested, as set out in 761—subrule 605.4(3), is required.
- d. *Class M driver's licenses and motorcycle endorsements.* The driving test for a Class M driver's license or motorcycle endorsement consists of two parts: an off-street motorcycle skill test and an on-street driving test.

(1) The off-street motorcycle skill test is required. The on-street motorcycle driving test is also required if the applicant does not have another driver's license that permits unaccompanied driving.

(2) A motorcycle shall be used for these tests. If a three-wheeled motorcycle is used, the driver's license shall be restricted: "Not valid for 2-wheel vehicle."

e. *Motorized bicycle licenses.* For a motorized bicycle license, an off-street or on-street driving test may be required. A motorized bicycle shall be used for the test.

**604.31(2) Driving test waivers.** The department may waive a required driving test listed in subrule 604.31(1) if the applicant meets one of the following qualifications:

a. The applicant is applying for the applicant's first Iowa driver's license that permits unaccompanied driving following successful completion of the appropriate Iowa-approved course or courses. The appropriate Iowa-approved courses are the following: driver education, other than driver education by a teaching parent under rule 761—634.11(321), for a Class C driver's license other than motorized bicycle; driver education and motorcycle rider education for a Class M driver's license or motorcycle endorsement; and motorized bicycle education for a motorized bicycle license. However, if an applicant is under the age of 18, a driving test is required if so requested by the applicant's parent, guardian, or instructor.

b. The applicant is renewing a Class C, Class D or Class M Iowa driver's license or endorsement within 14 months after the expiration date.

c. The applicant has passed the same type of driving test for another Iowa driver's license or endorsement that is still valid or has expired within the past 14 months.

d. The applicant has a military extension and is renewing the applicant's Iowa driver's license within six months following separation from active duty.

e. The applicant is applying for a Class C Iowa driver's license that permits unaccompanied driving and has an equivalent out-of-state license that is valid or has expired within the past year.

f. The applicant is applying for a Class D Iowa driver's license and has an equivalent out-of-state license that is valid or has expired within the past year.

g. The applicant is applying for a Class M driver's license or a motorcycle endorsement and has an equivalent out-of-state Class M driver's license or motorcycle endorsement that is valid or has expired within the past year.

*h.* The applicant has a valid, equivalent driver's license issued by a foreign jurisdiction with which Iowa has a nonbinding reciprocity agreement.

This rule is intended to implement Iowa Code sections 321.174, 321.178, 321.178A, 321.180, 321.180A, 321.180B, 321.186, 321.189, 321.193, 321.196 and 321.198.

[ARC 7902B, IAB 7/1/09, effective 8/5/09; ARC 1612C, IAB 9/3/14, effective 10/8/14; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—604.32(321) Driving tests requirements.** Rescinded IAB 1/8/92, effective 2/12/92.

**761—604.33 and 604.34** Reserved.

**761—604.35(321) Determination of gross vehicle weight rating.** For a vehicle that has no legible manufacturer's certification label, the applicant may provide documentation of the gross vehicle weight rating, such as a manufacturer's certificate of origin, a title, a vehicle registration document, or the vehicle identification number information for the vehicle. In the absence of the above documentation, the registered weight of the vehicle shall be presumed to be the gross vehicle weight rating.

This rule is intended to implement Iowa Code section 321.1.

**761—604.36 to 604.39** Reserved.

**761—604.40(321) Failure to pass examination.**

**604.40(1)** An applicant who fails to pass a required examination or reexamination shall not be licensed.

*a.* If the applicant does not have a valid Iowa license, the department shall deny the applicant a license.

*b.* If the applicant has a valid Iowa license, the department shall suspend the license for incapability. However, if the applicant's license is valid for less than 30 days, the department shall deny further licensing. The department shall serve a notice of suspension or denial.

*c.* See 761—615.4(321) for further information on denials and 761—615.14(321) for further information on suspensions for incapability.

*d.* An applicant may contest a denial or suspension in accordance with 761—615.38(321).

**604.40(2)** Limitations on the hearing and appeal process.

*a.* After a suspension or denial for failure to pass a required knowledge or driving test, a person who contests the suspension or denial shall be deemed to have exhausted the person's administrative remedies after three unsuccessful attempts to pass the required test.

*b.* After the three unsuccessful attempts, no further testing shall be allowed until six months have elapsed from the date of the last test failure, and then only if the applicant demonstrates a significant change or improvement in those physical or mental factors that resulted in the original decision. A request for further testing must be submitted in writing to the office of driver services at the address in rule 761—600.2(17A).

*c.* Notwithstanding paragraphs "a" and "b" of this subrule, no testing shall occur if the director determines that it is unsafe to allow testing.

This rule is intended to implement Iowa Code chapter 17A and sections 321.177, 321.180A and 321.210.

**761—604.41 to 604.44** Reserved.

**761—604.45(321) Reinstatement.** A person whose license has been suspended or denied for failure to pass a required examination or reexamination shall meet the vision standards for licensing, pass the required knowledge examination(s), and pass the required driving test(s) before an Iowa license will be issued.

This rule is intended to implement Iowa Code sections 321.177 and 321.186.

**761—604.46 to 604.49** Reserved.

**761—604.50(321) Special reexaminations.** The department may require a special reexamination consisting of a vision screening, knowledge test and driving test of any licensee.

**604.50(1)** The department may require a special reexamination when a licensee has been involved in a fatal motor vehicle accident and the investigating officer's report of the accident indicates the licensee contributed to the accident.

**604.50(2)** The department may require a special reexamination when a licensee has been involved in two accidents within a three-year period and the investigating officer's report of each accident lists one of the following "Driver/Vehicle Related Contributing Circumstances" for the licensee:

- a. Ran traffic signal.
- b. Ran stop sign.
- c. Passing, interfered with other vehicle.
- d. Left of center, not passing.
- e. Failure to yield right-of-way at uncontrolled intersection.
- f. Failure to yield right-of-way from stop sign.
- g. Failure to yield right-of-way from yield sign.
- h. Failure to yield right-of-way making left turn.
- i. Failure to yield right-of-way to pedestrian.
- j. Failure to have control.

**604.50(3)** The department may require a special reexamination when a licensee has been involved in two accidents within a three-year period and the investigating officers' reports for both accidents list a driver condition for the licensee of "apparently asleep."

**604.50(4)** The department may require a special reexamination when a licensee who is 65 years of age or older has been involved in an accident and information in the investigating officer's or the person's own report of the accident indicates the need for reexamination. A circumstance that may indicate a need for reexamination includes, but is not limited to, any one of the following:

- a. The licensee made a left turn that resulted in the accident.
- b. The licensee failed to yield the right-of-way at a stop sign.
- c. The licensee failed to yield the right-of-way at a yield sign.
- d. The licensee failed to yield the right-of-way at an uncontrolled intersection.
- e. The licensee failed to yield the right-of-way at a traffic control signal.
- f. The licensee's vision may be a contributing factor to a nighttime accident.
- g. The licensee has a physical disability-related license restriction other than "corrective lenses" and the accident involved one of the circumstances listed in paragraphs "a" to "f" above.

**604.50(5)** The department may require a special reexamination when recommended by a peace officer, a court, or a properly documented citizen's request. A factor that may indicate a need for reexamination includes, but is not limited to, any one of the following:

- a. Loss of consciousness.
- b. Confusion, disorientation or dementia.
- c. Inability to maintain a vehicle in the proper lane.
- d. Repeatedly ignoring traffic control devices in a nonchase setting.
- e. Inability to interact safely with other vehicles.
- f. Inability to maintain consistent speed when no reaction to other vehicles or pedestrians is required.

This rule is intended to implement Iowa Code sections 321.177, 321.186 and 321.210.

<sup>1</sup> Effective date of 604.11(2) and 604.13(2) “b” delayed until adjournment of the 1988 Session of the General Assembly pursuant to Iowa Code section 17A.8(9) by the Administrative Rules Review Committee at its June 1987 meeting.

CHAPTER 605  
LICENSE ISSUANCE

**761—605.1(321) Scope.** This chapter of rules applies to the issuance of all Iowa driver's licenses. Additional information on the issuance of a commercial driver's license or a commercial learner's permit is given in 761—Chapter 607.

This rule is intended to implement Iowa Code section 321.174.  
[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—605.2(321) Contents of license.** In addition to the information specified in Iowa Code subsection 321.189(2), the following information shall be shown on a driver's license.

**605.2(1) Name.** The licensee's full legal name shall be listed as established according to 761—subrule 601.5(1) and 761—subrule 601.5(5) and shall conform to the requirements of 761—subrule 601.1(2).

**605.2(2) Current residential address.** The licensee's current residential address shall be listed as established according to the requirements of 761—subrule 601.5(3).

**605.2(3) Physical description.** The physical description of the licensee on the face of the driver's license shall include:

*a.* The licensee's eye color using these abbreviations: Blk-black, Blu-blue, Bro-brown, Gry-gray, Grn-green, Haz-hazel, and Pnk-pink.

*b.* The licensee's height in inches.

**605.2(4) Date of birth.** The licensee's date of birth shall be listed as established according to 761—subrule 601.5(1) and 761—subrule 601.5(6).

**605.2(5) Sex.** The licensee's sex designation shall be listed as established according to the requirements of 761—subrule 601.5(7).

**605.2(6) REAL ID markings.**

*a.* A driver's license that is issued as a REAL ID license as defined in 761—601.7(321) shall include a security marking as required by 6 CFR 37.17(n).

*b.* Beginning January 15, 2013, a driver's license that is not issued as a REAL ID license as defined in 761—601.7(321) may be marked as required by 6 CFR 37.71 and any subsequent guidance issued by the U.S. Department of Homeland Security.

*c.* A driver's license issued to a foreign national with temporary lawful status shall include the following statement on the face of the license: "limited term."

**605.2(7) Voluntary markings.** Upon the request of the licensee, the department shall indicate on the driver's license the presence of a medical condition, that the licensee is a donor under the uniform anatomical gift law, that the licensee has in effect a medical advance directive, that the licensee is hearing impaired or deaf, or that the licensee is a veteran. To be eligible for a veteran designation, the licensee must be an honorably discharged veteran of the armed forces of the United States. A licensee who requests a veteran designation shall submit Form 432035, properly completed by the licensee and a designee of the Iowa department of veterans affairs.

This rule is intended to implement Iowa Code sections 142C.3 and 321.189, the REAL ID Act of 2005 (49 U.S.C. Section 30301 note), and 6 CFR Part 37.

[ARC 0347C, IAB 10/3/12, effective 11/7/12; ARC 1714C, IAB 11/12/14, effective 12/17/14]

**761—605.3(321) License class.** The driver's license class shall be coded on the face of the driver's license using these codes:

Class A—commercial driver's license

Class B—commercial driver's license

Class C—commercial driver's license

Class C—noncommercial driver's license

Class D—noncommercial driver's license, chauffeur

Class M—noncommercial driver's license, motorcycle only

This rule is intended to implement Iowa Code section 321.189.

**761—605.4(321) Endorsements.** The endorsements shall be coded on the face of the driver's license and explained in text on the back of the driver's license.

**605.4(1) For a commercial driver's license.** The following endorsements may be added to a Class A, B or C commercial driver's license using these letter codes:

- H—Hazardous material
- P—Passenger
- N—Tank
- X—Hazardous material and tank
- T—Double/triple trailers
- S—School bus

**605.4(2) For a commercial learner's permit.** The following endorsements are the only endorsements that may be added to a commercial learner's permit using these letter codes. All other endorsements are prohibited on a commercial learner's permit.

- P—Passenger
- N—Tank
- S—School bus

**605.4(3) For a Class D driver's license (chauffeur).** The following endorsements may be added to a Class D driver's license using these number codes:

- 1—Truck-tractor semitrailer combination
- 2—Vehicle with 16,001 pounds gross vehicle weight rating or more. Not valid for truck-tractor semitrailer combination
- 3—Passenger vehicle less than 16-passenger design

**605.4(4) Motorcycle endorsement.** A motorcycle endorsement may be added to any driver's license that permits unaccompanied driving, other than a Class M driver's license or a motorized bicycle license, using the following letter code:

- L—Motorcycle

This rule is intended to implement Iowa Code sections 321.180 as amended by 2015 Iowa Acts, House File 635, section 50, and 321.189.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—605.5(321) Restrictions.** Restrictions shall be coded on the face of the driver's license and explained in text on the back of the driver's license. For purposes of this rule, "CMV" means commercial motor vehicle.

**605.5(1) For all licenses.** The following restrictions may apply to any driver's license:

- B—Corrective lenses required
- C—Mechanical aid (as detailed in the restriction on the back of the card)
- D—Prosthetic aid (as detailed in the restriction on the back of the card)
- F—Left and right outside rearview mirrors
- G—No driving when headlights required
- H—Temporary restricted license or permit (work permit)
- I—Ignition interlock required
- J—Restrictions on the back of card
- S—SR required (proof of financial responsibility for the future)
- T—Medical report required at renewal
- U—Not valid for 2-wheel vehicle
- W—Restricted commercial driver's license (CDL)
- Y—Intermediate license

**605.5(2) For a noncommercial driver's license.** The following restrictions apply only to a noncommercial driver's license:

- 8—Special instruction permit
- 9—Passenger restriction for intermediate license
- Q—No interstate or freeway driving

**605.5(3)** *For a commercial driver's license.* The following restrictions apply to a commercial driver's license:

- E—No manual transmission equipped CMV
- K—Intrastate only
- L—No air brake equipped CMV
- M—No Class A passenger vehicle
- N—No Class A and B passenger vehicle
- O—No tractor trailer CMV
- V—Medical variance
- Z—No full air brake equipped CMV

**605.5(4)** *For a commercial learner's permit.* The following restrictions apply to a commercial learner's permit.

- K—Intrastate only
- L—No air brake equipped CMV
- M—No Class A passenger vehicle
- N—No Class A and B passenger vehicle
- P—No passengers in CMV bus
- V—Medical variance
- X—No cargo in CMV tank vehicle

**605.5(5)** *Special licenses.* A numbered restriction will designate a special driver's license using these codes:

- 1—Motorcycle instruction permit
- 2—Noncommercial instruction permit (vehicle less than 16,001 gross vehicle weight rating)
- 3—Commercial learner's permit
- 4—Chauffeur's instruction permit
- 5—Motorized bicycle license
- 6—Minor's restricted license
- 7—Minor's school license

**605.5(6)** *Additional information.*

*a. Reexamination or report.* The department may issue a restriction requiring a person to reappear at a specified time for examination. The department may require a medical report to be submitted. The department shall send Form 430029 as a reminder to appear.

*b. Loss of consciousness or voluntary control.*

(1) If a person is licensed pursuant to 761—subrule 600.4(4), the department shall issue the first driver's license with a restriction stating: "Medical report to be furnished at the end of six months."

(2) If this medical report shows that the person has been free of an episode of loss of consciousness or voluntary control since the previous medical report and the report recommends licensing, the department shall issue a duplicate driver's license with a restriction stating: "Medical report required at renewal." At each renewal accompanied by a favorable medical report, the department shall issue a two-year driver's license with the same restriction.

(3) If the latest medical report indicates the person experienced only a single nonrecurring episode, the cause has been identified, and the qualified medical professional is not treating or has not treated the person for the episode and believes it is unlikely to recur, the department may waive the medical report requirement upon receipt of a favorable recommendation from a qualified medical professional.

(4) The department may remove the medical report requirement and issue a full-term driver's license if recommended by a qualified medical professional and if the latest medical information on file with the department indicates the person has not had an episode of loss of consciousness or voluntary control and has not been prescribed medications to control such episodes during the 24-month period immediately preceding application for a license.

(5) The department may remove the medical report requirement and issue a full-term driver's license if recommended by a qualified medical professional and if the latest medical information on file

with the department indicates the person has not had an episode of loss of consciousness or voluntary control during the 10-year period immediately preceding application for a license.

*c. Financial responsibility.* When a person is required under Iowa Code chapter 321A to have future proof of financial responsibility on file, the license restriction will read: “SR required.” The license shall be valid only for the operation of motor vehicles covered by the class of license issued and by the proof of financial responsibility filed.

*d. Vision restriction.* Restrictions relating to vision are addressed in 761—Chapter 604.

This rule is intended to implement Iowa Code chapter 321A and sections 321.178, 321.180 as amended by 2015 Iowa Acts, House File 635, section 50, 321.180A, 321.180B, 321.188 as amended by 2015 Iowa Acts, House File 635, section 53, 321.189, 321.193, 321.194, 321.215, 321J.4, and 321J.20. [ARC 9991B, IAB 2/8/12, effective 3/14/12; ARC 0661C, IAB 4/3/13, effective 5/8/13; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—605.6(321) License term for temporary foreign national.** A driver’s license issued to a person who is a foreign national with temporary lawful status shall be issued only for the length of time the person is authorized to be present as verified by the department, not to exceed two years. However, if the person’s lawful status as verified by the department has no expiration date, the driver’s license shall be issued for a period of no longer than one year.

This rule is intended to implement Iowa Code section 321.196, the REAL ID Act of 2005 (49 U.S.C. Section 30301 note), and 6 CFR Part 37. [ARC 0347C, IAB 10/3/12, effective 11/7/12]

**761—605.7(321L) Handicapped designation.** Rescinded IAB 2/11/98, effective 3/18/98.

**761—605.8** Reserved.

**761—605.9(321) Fees for driver’s licenses.** Fees for driver’s licenses are specified in Iowa Code section 321.191. A license fee may be paid by cash, check, credit card, debit card or money order. If payment is by check, the following requirements apply:

**605.9(1)** The check shall be for the exact amount of the fee and shall be payable to: Treasurer, State of Iowa. An exception may be made when a traveler’s check is presented.

**605.9(2)** One check may be used to pay fees for several persons, such as members of a family or employees of a business firm. One check may pay all fees involved, such as the license fee and the reinstatement fee.

This rule is intended to implement Iowa Code section 321.191. [ARC 9991B, IAB 2/8/12, effective 3/14/12]

**761—605.10(321) Waiver or refund of license fees.** Rescinded IAB 2/8/12, effective 3/14/12.

**761—605.11(321) Duplicate license.**

**605.11(1) Lost, stolen or destroyed license.** To replace a valid license that is lost, stolen or destroyed, the licensee shall comply with the requirements of 761—601.5(321) and pay the replacement fee.

**605.11(2) Voluntary replacement.** The department shall issue a duplicate of a valid license to an eligible licensee if the license is surrendered to the department and the replacement fee is paid. Voluntary replacement includes but is not limited to:

*a.* Replacement of a damaged license.

*b.* Replacement to change the current residential address on a license. The licensee shall comply with the requirements of 761—subrule 601.5(3) to establish a change of current residential address.

*c.* Replacement to change the name on a license. The licensee shall comply with the requirements of 761—subrule 601.5(5) to establish a name change.

*d.* Replacement to change the date of birth on a license. The licensee shall comply with the requirements of 761—subrule 601.5(6) to establish a change of date of birth.

*e.* Replacement to change the sex designation on a license. The licensee shall comply with the requirements of 761—subrule 601.5(7) to establish a change of sex designation.

- f.* Issuance of a license without the words “under 21” to a licensee who is 21 years of age or older.
- g.* Issuance of a license without the words “under 18” to a licensee who is 18 years of age or older. (If the licensee is under 21 years of age, the words “under 21” will replace the words “under 18.”)
- h.* Issuance of a noncommercial driver’s license to an eligible person who has been disqualified from operating a commercial motor vehicle.
- i.* Replacement of a valid license before its expiration date to obtain a license that may be accepted for federal identification purposes under 6 CFR Part 37 (a REAL ID license). The licensee shall comply with the requirements of 761—601.5(321) to obtain a REAL ID license.
- j.* Replacement to add a veteran designation to the license. To be eligible for a veteran designation, the licensee must be an honorably discharged veteran of the armed forces of the United States. A licensee who requests a veteran designation shall submit Form 432035, properly completed by the licensee and a designee of the Iowa department of veterans affairs.

**605.11(3) Fee.** The fee to replace a license is \$10. Anything in this rule, notwithstanding the fee for replacement of a license under paragraphs 605.11(2) “*f*” and 605.11(2) “*g*,” shall be as set forth in Iowa Code subsection 321.189(6).

This rule is intended to implement Iowa Code sections 321.189, 321.195 and 321.208, the REAL ID Act of 2005 (49 U.S.C. Section 30301 note), and 6 CFR Part 37.

[ARC 7902B, IAB 7/1/09, effective 8/5/09; ARC 0347C, IAB 10/3/12, effective 11/7/12; ARC 1714C, IAB 11/12/14, effective 12/17/14]

#### **761—605.12(321) Address changes.**

**605.12(1)** A licensee shall notify the department of a change in the licensee’s mailing address within 30 days of the change. Notice shall be given by:

- a.* Submitting the address change in writing to the office of driver services, or
- b.* Appearing in person to change the mailing address at any driver’s license examination station.

**605.12(2)** Parents or legal guardians may provide written notice of a mailing address change on behalf of their minor children.

**605.12(3)** The department may use U.S. Postal Service address information to update its address records.

This rule is intended to implement Iowa Code sections 321.182 and 321.184.

#### **761—605.13 and 605.14 Reserved.**

#### **761—605.15(321) License extension.**

**605.15(1) Six-month extension.** An Iowa resident may apply for a six-month extension of a license if the resident:

- a.* Has a valid license,
- b.* Is eligible for further licensing, and
- c.* Is temporarily absent from Iowa or is temporarily incapacitated at the time for renewal.

**605.15(2) Procedure.** The licensee shall apply for an extension by submitting Form 430027 to the department. The form may be obtained from and submitted to a driver’s license examination station. The licensee may also apply by letter to the address in 761—600.2(17A).

*a.* A six-month extension shall be added to the expiration date on the license. When the licensee appears to renew the license, the expiration date of the renewed license will be computed from the expiration date of the original license, notwithstanding the extension.

*b.* The department shall allow only two six-month extensions.

This rule is intended to implement Iowa Code section 321.196.

#### **761—605.16(321) Military extension.**

**605.16(1) Form 430028.** A person who qualifies for a military extension of a valid license should request Form 430028 from the department and carry it with the license for verification to peace officers. Form 430028 explains the provisions of Iowa Code section 321.198 regarding military extensions.

**605.16(2) Request for retention of record.** A person with a military extension may request that the department retain the record of license issuance for the duration of the extension or reenter the record if it has been removed from department records. The request may be made by letter or by using Form 430081. The letter or Form 430081 shall be signed by the person's commanding officer to verify the military service and shall be submitted to the department at the address in 761—600.2(17A).

**605.16(3) Renewal of license after military extension.** When an applicant renews a license after a military extension, the department may require the applicant to provide documentation of both the military service and the date of separation from military service.

**605.16(4) Reinstatement after sanction.** A person with a military extension whose license has been canceled, suspended or revoked shall comply with the requirements of 761—615.40(321) to reinstate the license.

This rule is intended to implement Iowa Code section 321.198.

**761—605.17 to 605.19** Reserved.

**761—605.20(321) Fee adjustment for upgrading license.** The fee for upgrading a driver's license shall be computed on a full-year basis. The fee is charged for each year or part of a year between the date of the change and the expiration date on the license.

**605.20(1)** The fee to upgrade a driver's license from one class to another is determined by computing the difference between the current license fee and the new license fee as follows:

- a. Converting noncommercial Class C to Class D—\$4 per year of new license validity.
- b. Converting Class M to Class D with a motorcycle endorsement—\$4 per year of new license validity.
- c. Converting Class M to noncommercial Class C with a motorcycle endorsement—\$2 one-time fee.

**605.20(2)** The fee to add a privilege to a driver's license is computed per year of new license validity as follows:

Noncommercial Class C (full privileges from a restricted Class C)	\$4 per year
Motorized bicycle	\$4 per year
Minor's restricted license	\$4 per year
Minor's school license	\$4 per year
Motorcycle instruction permit	\$2 per year
Motorcycle endorsement	\$2 per year

This rule is intended to implement Iowa Code sections 321.189 and 321.191.  
[ARC 1714C, IAB 11/12/14, effective 12/17/14]

**761—605.21 to 605.24** Reserved.

**761—605.25(321) License renewal.**

**605.25(1)** A licensee who wishes to renew a driver's license shall apply to the department and, if required, pass the appropriate examination.

**605.25(2)** A valid license may be renewed 30 days before the expiration date. If this is impractical, the department for good cause may renew a license earlier.

**605.25(3)** A valid license may be renewed within 60 days after the expiration date, unless otherwise specified.

**605.25(4)** If the licensee's current residential address, name, date of birth, or sex designation has changed since the previous license was issued, the licensee shall comply with the following:

- a. *Current residential address.* The licensee shall comply with the requirements of 761—subrule 601.5(3) to establish a change of current residential address.

*b. Name.* The licensee shall comply with the requirements of 761—subrule 601.5(5) to establish a name change.

*c. Date of birth.* The licensee shall comply with the requirements of 761—subrule 601.5(6) to establish a change of date of birth.

*d. Sex designation.* The licensee shall comply with the requirements of 761—subrule 601.5(7) to establish a change of sex designation.

**605.25(5)** A licensee who has not previously been issued a license that may be accepted for federal identification purposes under 6 CFR Part 37 (a REAL ID license) and wishes to obtain a REAL ID license upon renewal must comply with the requirements of 761—601.5(321) to obtain a REAL ID license upon renewal.

**605.25(6)** A licensee who is a foreign national with temporary lawful status must provide documentation of lawful status as required by 761—subrule 601.5(4) at each renewal.

**605.25(7)** The department may determine means or methods for electronic renewal of a driver's license.

*a.* An applicant who meets the following criteria may apply for electronic renewal:

(1) The applicant must be at least 18 years of age but not yet 70 years of age.

(2) The applicant completed a satisfactory vision screen or submitted a satisfactory vision report under 761—subrules 604.10(1) to 604.10(3) and updated the applicant's photo at the applicant's last issuance or renewal.

(3) The applicant's driver's license has not been expired for more than one year.

(4) The department's records show the applicant is a U.S. citizen.

(5) The applicant's driver's license is not marked "valid without photo."

(6) The applicant is not seeking to change any of the following information as it appears on the applicant's driver's license:

1. Name.

2. Date of birth.

3. Sex.

(7) The applicant's driver's license is a Class C noncommercial driver's license, a Class D noncommercial driver's license (chauffeur), or Class M noncommercial driver's license (motorcycle) that is not a special license or permit, a temporary restricted license, or a two-year license.

(8) The applicant is not subject to a pending request for reexamination.

(9) The applicant does not wish to change any of the following:

1. Class of license.

2. License endorsements.

3. License restrictions.

(10) The applicant is not subject to any of the following restrictions:

G—No driving when headlights required

J—Restrictions on the back of card

T—Medical report required at renewal

8—Special instruction permit

Q—No interstate or freeway driving

R—Maximum speed of 35 mph

*b.* The department reserves the right to deny electronic renewal and to require the applicant to personally apply for renewal at a driver's license examination station if it appears to the department that the applicant may have a physical or mental condition that may impair the applicant's ability to safely operate a motor vehicle, even if the applicant otherwise meets the criteria in 605.25(7) "a."

c. An applicant who has not previously been issued a driver's license that is compliant with the REAL ID Act of 2005, 49 U.S.C. Section 30301 note, as further defined in 6 CFR Part 37 (a REAL ID license) may not request a REAL ID driver's license by electronic renewal.

This rule is intended to implement Iowa Code sections 321.186 and 321.196 as amended by 2013 Iowa Acts, House File 355, section 1, the REAL ID Act of 2005 (49 U.S.C. Section 30301 note), and 6 CFR Part 37.

<sup>1</sup> Effective date of December 29, 1993, for 761—605.26(2) "a" and "d," delayed 70 days by the Administrative Rules Review Committee at its meeting held December 15, 1993; delay lifted by this Committee on January 5, 1994, effective January 6, 1994.

CHAPTER 607  
COMMERCIAL DRIVER LICENSING

**761—607.1(321) Scope.** This chapter applies to licensing persons for the operation of commercial motor vehicles. Unless otherwise stated, the provisions of this chapter are in addition to other motor vehicle licensing rules.

This rule is intended to implement Iowa Code chapter 321.

**761—607.2(17A) Information.**

**607.2(1) Information and location.** Applications, forms and information about the commercial driver's license (CDL) are available at any driver's license examination station. Assistance is also available by mail from the Office of Driver Services, Iowa Department of Transportation, P.O. Box 9204, Des Moines, Iowa 50306-9204; in person at 6310 SE Convenience Blvd., Ankeny, Iowa; by telephone at (800)532-1121 or (515)244-8725; or by facsimile at (515)237-3071.

**607.2(2) Manual.** A copy of a study manual for the commercial driver's license tests is available upon request at any driver's license examination station.

This rule is intended to implement Iowa Code section 17A.3.

**761—607.3(321) Definitions.** The definitions in Iowa Code section 321.1 as amended by 2015 Iowa Acts, House File 635, section 44, apply to this chapter of rules. In addition, the following definitions are adopted:

*"Air brake system"* means a system that uses air as a medium for transmitting pressure or force from the driver's control to the service brake. "Air brake system" shall include any braking system operating fully or partially on the air brake principle.

*"Air over hydraulic brakes"* means any braking system operating partially on the air brake and partially on the hydraulic brake principle.

*"Automatic transmission"* means any transmission other than a manual transmission.

*"CDLIS"* means "commercial driver's license information system" as defined in Iowa Code section 321.1 as amended by 2015 Iowa Acts, House File 635, section 44.

*"Commercial driver's license downgrade"* or *"CDL downgrade"* means either:

1. The driver changes the driver's self-certification of type of driving from non-excepted interstate to excepted interstate, non-excepted intrastate, or excepted intrastate driving, or
2. The department removed the CDL privilege from the driver's license.

*"Commercial motor vehicle"* or *"CMV"* as defined in Iowa Code section 321.1 does not include a motor vehicle designed as off-road equipment rather than as a motor truck, such as a forklift, motor grader, scraper, tractor, trencher or similar industrial-type equipment. "Commercial motor vehicle" also does not include self-propelled implements of husbandry described in Iowa Code subsection 321.1(32).

*"Controlled substance"* as used in Iowa Code section 321.208 means a substance defined in Iowa Code section 124.101.

*"Hazardous materials"* means any material that has been designated as hazardous under 49 U.S.C. Section 5103 and is required to be placarded under 49 CFR Part 172, Subpart F, or any quantity of a material listed as a select agent or toxin in 42 CFR Part 73.

*"Manual transmission"* means a transmission utilizing a driver-operated clutch that is activated by a pedal or lever and a gear-shift mechanism operated either by hand or by foot. All other transmissions, whether semi-automatic or automatic, will be considered automatic.

*"Medical examiner"* means a person who is licensed, certified or registered, in accordance with applicable state laws and regulations, to perform physical examinations. The term includes but is not limited to doctors of medicine, doctors of osteopathy, physician assistants, advanced registered nurse practitioners, and doctors of chiropractic.

*"Medical examiner's certificate"* means a certificate completed and signed by a medical examiner under the provisions of 49 CFR Section 391.43.

“*Medical variance*” means a driver has received one of the following from the Federal Motor Carrier Safety Administration that allows the driver to be issued a medical certificate:

1. An exemption letter permitting operation of a commercial motor vehicle pursuant to 49 CFR Part 381, Subpart C, or 49 CFR Section 391.62, or 49 CFR Section 391.64.
2. A skill performance evaluation certificate permitting operation of a commercial motor vehicle pursuant to 49 CFR Section 391.49.

“*Passenger vehicle*” means either of the following:

1. A motor vehicle designed to transport 16 or more persons including the operator.
2. A motor vehicle of a size and design to transport 16 or more persons including the operator which is redesigned or modified to transport fewer than 16 persons with disabilities. The size of a redesigned or modified vehicle shall be any such vehicle with a gross vehicle weight rating of 10,001 or more pounds.

“*School bus*” means a commercial motor vehicle used to transport pre-primary, primary, or secondary school students from home to school, from school to home, or to and from school-sponsored events. “School bus” does not include a bus used as a common carrier.

“*Self-certification*” means a written certification of which category of type of driving an applicant for a commercial driver’s license engages in or intends to engage in, from the following categories:

1. Non-excepted interstate. The person certifies that the person operates or expects to operate in interstate commerce, is both subject to and meets the qualification requirements under 49 CFR Part 391, and is required to obtain a medical examiner’s certificate by 49 CFR Section 391.45.
2. Excepted interstate. The person certifies that the person operates or expects to operate in interstate commerce, but engages exclusively in transportation or operations excepted under 49 CFR Section 390.3(f), 391.2, 391.68 or 398.3 from all or parts of the qualification requirements of 49 CFR Part 391, and is therefore not required to obtain a medical examiner’s certificate by 49 CFR Section 391.45.
3. Non-excepted intrastate. The person certifies that the person operates only in intrastate commerce and is subject to state driver qualification requirements.
4. Excepted intrastate. The person certifies that the person operates only in intrastate commerce, but engages exclusively in transportation or operations excepted from all or parts of the state driver qualification requirements as set forth in Iowa Code section 321.449.

“*State,*” as used in this chapter and in “another state” in Iowa Code subsection 321.174(2), “former state of residence” in Iowa Code subsection 321.188(5), or “any state” in Iowa Code subsection 321.208(1), means one of the United States or the District of Columbia unless the context means the state of Iowa.

This rule is intended to implement Iowa Code sections 321.1 as amended by 2015 Iowa Acts, House File 635, section 44, 321.174, 321.188 as amended by 2015 Iowa Acts, House File 635, section 53, 321.191, 321.193, 321.207 and 321.208.

[ARC 7902B, IAB 7/1/09, effective 8/5/09; ARC 9954B, IAB 1/11/12, effective 1/30/12; ARC 0031C, IAB 3/7/12, effective 4/11/12; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.4 and 607.5** Reserved.

**761—607.6(321) Exemptions.**

**607.6(1) *Persons exempt.*** A person listed in Iowa Code section 321.176A is exempt from commercial driver licensing requirements.

**607.6(2) *Exempt until April 1, 1992.*** Rescinded IAB 6/23/93, effective 7/28/93.

This rule is intended to implement Iowa Code sections 321.1 and 321.176A.

**761—607.7(321) Records.** The operating record of a person who has been issued a commercial driver’s license or a commercial learner’s permit or a person who has been disqualified from operating

a commercial motor vehicle shall be maintained as provided in the department's "Record Management Manual" adopted in 761—Chapter 4.

This rule is intended to implement Iowa Code sections 22.11, 321.12 as amended by 2015 Iowa Acts, House File 635, section 46, and 321.199.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.8** and **607.9** Reserved.

**761—607.10(321) Adoption of federal regulations.**

**607.10(1) Code of Federal Regulations.** The department's administration of commercial driver's licenses shall be in compliance with the state procedures set forth in 49 CFR Section 383.73, and this chapter shall be construed to that effect. The department adopts the following portions of the Code of Federal Regulations which are referenced throughout this chapter of rules:

- a. 49 CFR Section 391.11 as adopted in 761—Chapter 520.
- b. 49 CFR Section 392.5 as adopted in 761—Chapter 520.
- c. The following portions of 49 CFR Part 383 (October 1, 2014):
  - (1) Section 383.51, Disqualification of drivers.
  - (2) Subpart E—Testing and Licensing Procedures.
  - (3) Subpart G—Required Knowledge and Skills.
  - (4) Subpart H—Tests.

**607.10(2) Copies of regulations.** Copies of the federal regulations may be reviewed at the state law library or through the Internet at <http://www.fmcsa.dot.gov>.

This rule is intended to implement Iowa Code sections 321.187, 321.188 as amended by 2015 Iowa Acts, House File 635, section 53, 321.207, 321.208 and 321.208A.

[ARC 7902B, IAB 7/1/09, effective 8/5/09; ARC 9954B, IAB 1/11/12, effective 1/30/12; ARC 0031C, IAB 3/7/12, effective 4/11/12; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.11** to **607.14** Reserved.

**761—607.15(321) Application.** An applicant for a commercial driver's license shall comply with the requirements of Iowa Code sections 321.180(2)"e" as amended by 2015 Iowa Acts, House File 635, section 50, 321.182 and 321.188 as amended by 2015 Iowa Acts, House File 635, section 53, and 761—Chapter 601, and must provide the proofs of citizenship or lawful permanent residence and state of domicile required by 49 CFR Section 383.71. If the applicant is domiciled in a foreign jurisdiction and applying for a nondomiciled commercial driver's license, the applicant must provide a document required by 49 CFR Section 383.71(f).

This rule is intended to implement Iowa Code sections 321.180 as amended by 2015 Iowa Acts, House File 635, section 50, 321.182 and 321.188 as amended by 2015 Iowa Acts, House File 635, section 53.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.16(321) Commercial driver's license (CDL).**

**607.16(1) Classes.** The department may issue a commercial driver's license only as a Class A, B or C driver's license. The license class identifies the types of vehicles that may be operated. A commercial driver's license may have endorsements which authorize additional vehicle operations or restrictions which limit vehicle operations.

**607.16(2) Validity.**

a. A Class A commercial driver's license allows a person to operate a combination of commercial motor vehicles as specified in Iowa Code paragraph 321.189(1)"a." With the required endorsements and subject to the applicable restrictions, a Class A commercial driver's license is valid to operate any vehicle.

b. A Class B commercial driver's license allows a person to operate a commercial motor vehicle as specified in Iowa Code paragraph 321.189(1)"b." With the required endorsements and subject to the applicable restrictions, a Class B commercial driver's license is valid to operate any vehicle

except a truck-tractor semitrailer combination as a chauffeur (Class D) or a vehicle requiring a Class A commercial driver's license.

*c.* A Class C commercial driver's license allows a person to operate a commercial motor vehicle as specified in Iowa Code paragraph 321.189(1)“c.” With the required endorsements and subject to the applicable restrictions, a Class C commercial driver's license is valid to operate any vehicle except a truck-tractor semitrailer combination as a chauffeur (Class D) or a vehicle requiring a Class A or Class B commercial driver's license.

*d.* A commercial driver's license is valid for operating a motorcycle as a commercial motor vehicle only if the license has a motorcycle endorsement and a hazardous material endorsement. A commercial driver's license is valid for operating a motorcycle as a noncommercial motor vehicle only if the license has a motorcycle endorsement.

*e.* A commercial driver's license valid for eight years shall be issued to a qualified applicant who is at least 18 years of age but not yet 72 years of age. However, the expiration date of the license issued shall not exceed the licensee's 74th birthday.

*f.* A commercial driver's license valid for two years shall be issued to a qualified applicant 72 years of age or older. A two-year license may also be issued, at the discretion of the department, to an applicant whose license is restricted due to vision or other physical disabilities.

*g.* A commercial driver's license is valid for 60 days after the expiration date.

*h.* A person with a commercial driver's license valid for the vehicle operated is not required to obtain a Class D driver's license to operate the vehicle as a chauffeur.

**607.16(3) Requirements.**

*a.* The minimum age to obtain a commercial driver's license is 18 years.

*b.* The applicant shall meet the requirements set forth in rule 761—607.15(321).

**607.16(4) Transition from five-year to eight-year licenses.** During the period January 1, 2014, to December 31, 2018, the department shall issue qualified applicants otherwise eligible for an eight-year license a five-year, six-year, seven-year, or eight-year license, subject to all applicable limitations for age and ability. The applicable period shall be randomly assigned to the applicant by the department's computerized issuance system based on a distribution formula intended to spread renewal volumes as equally as practical over the eight-year period beginning January 1, 2019, and ending December 31, 2026.

This rule is intended to implement Iowa Code sections 321.177, 321.182, 321.188, 321.189, and 321.196 and 2013 Iowa Acts, chapter 104, section 2.

[ARC 1714C, IAB 11/12/14, effective 12/17/14; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.17(321) Endorsements.** All endorsements except the hazardous material endorsement continue to be valid without retesting or additional fees when renewing or upgrading a license. The endorsements that authorize additional commercial motor vehicle operations with a commercial driver's license are:

**607.17(1) Hazardous material.** A hazardous material endorsement (H) is required to transport hazardous materials. Upon license renewal, retesting and fee payment are required. Retesting and fee payment are also required when an applicant upgrades an Iowa license or transfers a commercial driver's license from another state unless the applicant provides evidence of passing the endorsement test within the preceding 24 months. A farmer or a person working for a farmer is not subject to the hazardous material endorsement while operating either a pickup or a special truck within 150 air miles of the farmer's farm to transport supplies to or from the farm.

**607.17(2) Passenger vehicle.** A passenger vehicle endorsement (P) is required to operate a passenger vehicle as defined in rule 761—607.3(321).

**607.17(3) Tank vehicle.** A tank vehicle endorsement (N) is required to operate a tank vehicle as defined in Iowa Code section 321.1 as amended by 2015 Iowa Acts, House File 635, section 44. A vehicle transporting a tank, regardless of the tank's capacity, which does not otherwise meet the definition of a commercial motor vehicle in Iowa Code section 321.1 is not a tank vehicle.

**607.17(4) Double/triple trailer.** A double/triple trailer endorsement (T) is required to operate a commercial motor vehicle with two or more towed trailers when the combination of vehicles meets the criteria for a Class A commercial motor vehicle. Operation of a triple trailer combination vehicle is not permitted in Iowa.

**607.17(5) Hazardous material and tank.** A combined endorsement (X) authorizes both hazardous material and tank vehicle operations.

**607.17(6) School bus.** After September 30, 2005, a school bus endorsement (S) is required to operate a school bus as defined in rule 761—607.3(321). An applicant for a school bus endorsement must also qualify for a passenger vehicle endorsement.

**607.17(7) Exceptions for towing operations.**

*a.* A driver who tows a vehicle in an emergency “first move” from the site of a vehicle malfunction or accident on a highway to the nearest appropriate repair facility is not required to have the endorsement(s) applicable to the towed vehicle. In any subsequent move, a driver who tows a vehicle from one repair or disposal facility to another is required to have the endorsement(s) applicable to the towed vehicle with one exception: A tow truck driver is not required to have a passenger endorsement to tow a passenger vehicle.

*b.* The double/triple trailer endorsement is not required to operate a commercial motor vehicle with two or more towed vehicles that are not trailers.

This rule is intended to implement Iowa Code sections 321.1 as amended by 2015 Iowa Acts, House File 635, section 44, 321.176A, and 321.189.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.18(321) Restrictions.** The restrictions that may limit commercial motor vehicle operation with a commercial driver’s license are listed in 761—subrule 605.5(3) and are explained below:

**607.18(1) Air brake.** The air brake restriction (L, no air brake equipped CMV) applies to a licensee who either fails the air brake component of the knowledge test or performs the skills test in a vehicle not equipped with air brakes and prohibits the operation of a commercial motor vehicle equipped with an air brake system until the licensee passes the required air brake tests and pays the fee for upgrading the license. Retesting and fee payment are not required when the license is renewed.

**607.18(2) Full air brake.** The full air brake restriction (Z, no full air brake equipped CMV) applies to a licensee who performs the skills test in a vehicle equipped with air over hydraulic brakes and prohibits the operation of a commercial motor vehicle equipped with any braking system operating fully on the air brake principle until the licensee passes the required air brake tests and pays the fee for upgrading the license. Retesting and fee payment are not required when the license is renewed.

**607.18(3) Manual transmission.** The manual transmission restriction (E, no manual transmission equipped CMV) applies to a licensee who performs the skills test in a vehicle equipped with automatic transmission and prohibits the operation of a commercial motor vehicle equipped with a manual transmission until the licensee passes the required tests and pays the fee for upgrading the license. Retesting and fee payment are not required when the license is renewed.

**607.18(4) Tractor-trailer.** The tractor-trailer restriction (O, no tractor trailer CMV) applies to a licensee who performs the skills test in a combination vehicle for a Class A commercial driver’s license with the power unit and towed unit connected with a pintle hook or other non-fifth wheel connection and prohibits operation of a tractor-trailer combination connected by a fifth wheel that requires a Class A commercial driver’s license until the licensee passes the required tests and pays the fee for upgrading the license. Retesting and fee payment are not required when the license is renewed.

**607.18(5) Class A passenger vehicle.** The Class A passenger vehicle restriction (M, no Class A passenger vehicle) applies to a licensee who applies for a passenger endorsement and performs the skills test in a passenger vehicle that requires a Class B commercial driver’s license and prohibits operation of a passenger vehicle that requires a Class A commercial driver’s license.

**607.18(6) Class A and B passenger vehicle.** The Class A and B passenger vehicle restriction (N, no Class A and B passenger vehicle) applies to a licensee who applies for a passenger endorsement and

performs the skills test in a passenger vehicle that requires a Class C commercial driver's license and prohibits operation of a passenger vehicle that requires a Class A or Class B commercial driver's license.

**607.18(7) *Intrastate only.*** The intrastate only restriction (K, intrastate only) applies to a licensee who self-certifies to non-excepted intrastate or excepted intrastate driving and prohibits the operation of a commercial motor vehicle in interstate commerce.

**607.18(8) *Medical variance.*** The medical variance restriction (V, medical variance) applies to a licensee when the department is notified pursuant to 49 CFR Section 383.73(o)(3) that the driver has been issued a medical variance and indicates there is information about a medical variance on the CDLIS driver record.

This rule is intended to implement Iowa Code sections 321.189 and 321.191 as amended by 2015 Iowa Acts, House File 635, section 55.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.19** Reserved.

**761—607.20(321) Commercial learner's permit.**

**607.20(1) *Validity.***

*a.* A commercial learner's permit allows the permit holder to operate a commercial motor vehicle when accompanied as required by Iowa Code section 321.180(2) "d" as amended by 2015 Iowa Acts, House File 635, section 50.

*b.* A commercial learner's permit is valid for 180 days and may be renewed for an additional 180 days without retaking the general and endorsement knowledge tests required by Iowa Code section 321.188 as amended by 2015 Iowa Acts, House File 635, section 53.

*c.* A commercial learner's permit is invalid after the expiration date of the underlying commercial or noncommercial driver's license issued to the permit holder or the expiration date of the permit whichever occurs first.

*d.* The issuance of a commercial learner's permit is a precondition to the initial issuance of a commercial driver's license. The issuance of a commercial learner's permit is also a precondition to the upgrade of a commercial driver's license if the upgrade requires a skills test. The holder of a commercial learner's permit is not eligible to take a required driving skills test for the first 14 days after the permit holder is issued the permit. The 14-day period includes the day the commercial learner's permit was issued.

EXAMPLE: The commercial learner's permit is issued on September 1. The earliest date the permit holder would be eligible to take the skills test is September 15.

*e.* A commercial learner's permit is not valid for the operation of a vehicle transporting hazardous materials.

**607.20(2) *Requirements.***

*a.* An applicant for a commercial learner's permit must hold a valid Class A, B, C, or D driver's license issued in this state other than an instruction permit, a special instruction permit, a motorized bicycle license or a temporary restricted license, must be at least 18 years of age, and must meet the requirements to obtain a valid commercial driver's license, including the requirements set forth in Iowa Code section 321.188 as amended by 2015 Iowa Acts, House File 635, section 53. However, the applicant does not have to complete the driving skills tests required for a commercial driver's license to obtain a commercial learner's permit.

*b.* The applicant must successfully pass a general knowledge test that meets the federal standards contained in 49 CFR Part 383, Subparts F, G and H, for the commercial motor vehicle the applicant operates or expects to operate, including any endorsement for which the applicant applies.

**607.20(3) *Endorsements.*** A commercial learner's permit may include the following endorsements. All other endorsements are prohibited on a commercial learner's permit.

*a.* An applicant for a passenger endorsement (P) must take and pass the passenger endorsement knowledge test. A commercial learner's permit holder with a passenger endorsement is prohibited from operating a commercial motor vehicle carrying passengers, other than federal/state auditors and

inspectors, test examiners, other trainees, and the commercial driver's license holder accompanying the permit holder required by Iowa Code section 321.180(2) "d" as amended by 2015 Iowa Acts, House File 635, section 50.

*b.* An applicant for a school bus endorsement (S) must take and pass the school bus endorsement knowledge test. A commercial learner's permit holder with a school bus endorsement is prohibited from operating a commercial motor vehicle carrying passengers, other than federal/state auditors and inspectors, test examiners, other trainees, and the commercial driver's license holder accompanying the permit holder required by Iowa Code section 321.180(2) "d" as amended by 2015 Iowa Acts, House File 635, section 50.

*c.* An applicant for a tank vehicle endorsement (N) must take and pass the tank vehicle endorsement knowledge test. A commercial learner's permit holder with a tank vehicle endorsement may only operate an empty tank vehicle and is prohibited from operating any tank vehicle that previously contained hazardous materials that has not been purged of any residue.

**607.20(4) Restrictions.** A commercial learner's permit may include the air brake (L), medical variance (V), Class A passenger vehicle (M), Class A and B passenger vehicle (N) and intrastate only (K) restrictions described in rule 761—607.18(321). In addition, a commercial learner's permit may include the following restrictions that are specific to the commercial learner's permit:

*a. Passenger.* The passenger restriction (P, no passengers in CMV bus) applies to a permit holder who has a commercial learner's permit with a passenger or school bus endorsement and prohibits the operation of a commercial motor vehicle carrying passengers, other than federal/state auditors and inspectors, test examiners, other trainees, and the commercial driver's license holder accompanying the permit holder required by Iowa Code section 321.180(2) "d" as amended by 2015 Iowa Acts, House File 635, section 50.

*b. Cargo.* The cargo restriction (X, no cargo in CMV tank vehicle) applies to a permit holder who has a commercial learner's permit with a tank vehicle endorsement and prohibits the operation of any tank vehicle containing cargo or any tank vehicle that previously contained hazardous materials that has not been purged of any residue.

This rule is intended to implement Iowa Code sections 321.180 as amended by 2015 Iowa Acts, House File 635, section 50, 321.186, and 321.188 as amended by 2015 Iowa Acts, House File 635, section 53.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.21 to 607.24** Reserved.

**761—607.25(321) Examination for a commercial driver's license.** In addition to the requirements of 761—Chapter 604, an applicant for a commercial driver's license shall pass the knowledge and skills tests as required in 49 CFR Part 383, Subparts G and H.

This rule is intended to implement Iowa Code section 321.186.

**761—607.26(321) Vision screening.** An applicant for a commercial driver's license or commercial learner's permit must pass a vision screening test administered by the department. The vision standards are given in 761—604.11(321).

This rule is intended to implement Iowa Code sections 321.186 and 321.186A.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.27(321) Knowledge tests.**

**607.27(1) General knowledge test.** The general knowledge test for a commercial driver's license is a written test of topics such as vehicle inspection, operation, safety and control in accordance with 49 CFR Section 383.111.

**607.27(2) Additional tests.** In addition to the general knowledge test for a commercial driver's license, an additional knowledge test is required for each of the following:

*a.* Class A license for combination vehicle operation as required in 49 CFR Section 383.111.

- b. Hazardous material endorsement as required in 49 CFR Section 383.121. The knowledge test for a hazardous material endorsement shall not be administered orally or in a language other than English.
- c. Passenger vehicle endorsement as required in 49 CFR Section 383.117.
- d. Tank vehicle endorsement as required in 49 CFR Section 383.119.
- e. Double/triple trailer endorsement as required in 49 CFR Section 383.115.
- f. School bus endorsement as required in 49 CFR Section 383.123. The applicant must also qualify for a passenger vehicle endorsement.
- g. Removal of the air brake restriction as required in 49 CFR Section 383.111.

**607.27(3) Test methods.** All knowledge tests shall be administered in compliance with 49 CFR Section 383.133(b). All tests other than the hazardous material endorsement test may be administered in written form, verbally, or in automated format and can be administered in a foreign language, provided no interpreter is used in administering the test. A verbal test shall be offered only at specified locations. Information about the locations is available at any driver's license examination station.

**607.27(4) Waiver.** A waiver of any knowledge test is permitted only as provided in Iowa Code subsection 321.188(5). The burden of proof of having passed the hazardous material endorsement test within the preceding 24 months rests with the applicant.

**607.27(5) Requirement.** An applicant must pass the applicable knowledge test(s) before taking the skills test. Passing scores for a knowledge test shall meet the standards contained in 49 CFR Section 383.135(a).

This rule is intended to implement Iowa Code sections 321.186 and 321.188 as amended by 2015 Iowa Acts, House File 635, section 53.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

#### **761—607.28(321) Skills test.**

**607.28(1) Content.** The skills test for a commercial driver's license is a three-part test as required in 49 CFR Part 383, Subparts E, G and H.

**607.28(2) Test methods.** All skills tests shall be administered in compliance with 49 CFR Section 383.133(c). Interpreters are prohibited during the administration of skills tests. Applicants must be able to understand and respond to verbal commands and instructions in English by a skills test examiner. Neither the applicant nor the examiner may communicate in a language other than English during the skills test.

**607.28(3) Order.** The skills test must be administered and successfully completed in the following order: pre-trip inspection, basic vehicle control skills, on-road skills. If an applicant fails one segment of the skills test, the applicant cannot continue to the next segment of the test, and scores for the passed segments of the test are only valid during initial issuance of the commercial learner's permit. If the commercial learner's permit is renewed, all three segments of the skills test must be retaken. However:

- a. If the applicant wants to remove an air brake restriction, full air brake restriction, or manual transmission restriction, the applicant does not have to retake the complete skills test, and may complete a modified skills test that demonstrates the applicant can safely and effectively operate the vehicle's full air brakes, air over hydraulic brakes, or manual transmission. In addition, to remove the air brake or full air brake restriction, the applicant must successfully perform the air brake pre-trip inspection and pass the air brake knowledge test.

- b. If the applicant wants to remove the tractor-trailer restriction, the applicant must retake all three skills tests in a representative tractor-trailer.

**607.28(4) Vehicle.** The applicant shall provide a representative vehicle for the skills test. "Representative vehicle" means a commercial motor vehicle that meets the statutory description for the class of license applied for.

- a. To obtain a passenger vehicle endorsement applicable to a specific vehicle class, the applicant must take the skills test in a passenger vehicle, as defined in rule 761—607.3(321), satisfying the requirements of that class, as required in 49 CFR Section 383.117.

- b. To obtain a school bus endorsement, the applicant must qualify for a passenger vehicle endorsement and take the skills test in a school bus, as defined in rule 761—607.3(321), in the same

vehicle class as the applicant will drive, as required in 49 CFR Section 383.123. Up to and including September 30, 2005, the skills test for a school bus endorsement is waived for an applicant meeting the requirements of 49 CFR Section 383.123(b).

c. To remove an air brake or full air brake restriction, the applicant must take the skills test in a vehicle equipped with an air brake system, as defined in rule 761—607.3(321) and as required in 49 CFR Section 383.113.

d. To remove a manual transmission restriction, the applicant must take the skills test in a vehicle equipped with a manual transmission, as defined in rule 761—607.3(321).

**607.28(5) Skills test scoring.** Passing scores for a skills test shall meet the standards contained in 49 CFR Section 383.135(b).

**607.28(6) Military waiver.** The department may waive the requirement that an applicant pass a required skills test for an applicant who is on active duty in the military service or who has separated from such service in the past year, provided the applicant meets the requirements of Iowa Code subsection 321.188(6) as amended by 2015 Iowa Acts, House File 635, section 53.

**607.28(7) Locations.** The skills test for a commercial driver's license shall be given only at specified locations where adequate testing facilities are available. An applicant may contact any driver's license examination station for the location of the nearest skills testing station. A skills test by appointment shall be offered only at specified regional test sites.

This rule is intended to implement Iowa Code section 321.186 and section 321.188 as amended by 2015 Iowa Acts, House File 635, section 53.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.29(321) Waiver of skills test.** Rescinded IAB 6/23/93, effective 7/28/93.

**761—607.30** Reserved.

**761—607.31(321) Test results.**

**607.31(1) Period of validity.** Passing knowledge and skills test results shall remain valid for a period of 180 days.

**607.31(2) Retesting.** Subject to rule 761—607.28(321), an applicant shall be required to repeat only the knowledge test(s) or part(s) of the skills test that the applicant failed. An applicant who fails a test shall not be permitted to repeat that test the same day.

**607.31(3) Skills test results from other states.** As required by 49 CFR Section 383.79, the department shall accept the valid results of a skills test administered to an applicant who is domiciled in the state of Iowa and that was administered by another state, in accordance with 49 CFR Part 383, Subparts F, G and H, in fulfillment of the applicant's testing requirements under 49 CFR Section 383.71 and the state's test administration requirements under 49 CFR Section 383.73. The results must be transmitted directly from the testing state to the department as required by 49 CFR Section 383.79.

This rule is intended to implement Iowa Code section 321.186 and section 321.188 as amended by 2015 Iowa Acts, House File 635, section 53.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.32 to 607.34** Reserved.

**761—607.35(321) Issuance of commercial driver's license and commercial learner's permit.** A commercial driver's license or commercial learner's permit issued by the department shall include the information and markings required by Iowa Code section 321.189(2) "b" as amended by 2015 Iowa Acts, House File 635, section 54.

This rule is intended to implement Iowa Code section 321.189 as amended by 2015 Iowa Acts, House File 635, section 54.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.36(321) Conversion to commercial driver's license.** Rescinded IAB 6/23/93, effective 7/28/93.

**761—607.37(321) Commercial driver's license renewal.** The department shall administer commercial driver's license renewals as required by 49 CFR Section 383.73.

**607.37(1) Licensee requirements.** To renew a commercial driver's license, the licensee shall apply at a driver's license examination station and complete the following:

*a.* Make a written self-certification of type of driving as required by rule 761—607.50(321) and provide a current medical examiner's certificate if required.

*b.* If the licensee has and wishes to retain a hazardous material endorsement, the licensee shall pass the test required in 49 CFR Section 383.121 and comply with the Transportation Security Administration security threat assessment standards specified in 49 CFR Sections 383.71(b)(8) and 383.141 for such endorsement. A lawful permanent resident of the United States must also provide the licensee's U.S. Citizenship and Immigration Services alien registration number.

*c.* Provide proof of citizenship or lawful permanent residency and state of domicile as required by rule 761—607.15(321) and 49 CFR 383.71(d)(7). Proof of citizenship or lawful permanent residency is not required if the licensee provided such proof at initial issuance or a previous renewal or upgrade of the license and the department has a notation on the licensee's record confirming that the required proof of legal citizenship or legal presence check was made and the date on which it was made.

*d.* If the applicant is domiciled in a foreign jurisdiction and renewing a non-domiciled commercial driver's license, the applicant must provide a document required by 49 CFR 383.71(f) at each renewal.

**607.37(2) Early renewal.** A valid commercial driver's license may be renewed 30 days before the expiration date. If this is impractical, the department for good cause may renew a license earlier, not to exceed one year prior to the expiration date. The department may allow renewal earlier than one year prior to the expiration date for active military personnel being deployed due to actual or potential military conflict.

This rule is intended to implement Iowa Code sections 321.186, 321.188 as amended by 2015 Iowa Acts, House File 635, section 53, and 321.196.

[ARC 2337C, IAB 1/6/16, effective 2/10/16; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.38(321) Transfers from another state.** Upon initial application for an Iowa license, an Iowa resident who has a valid commercial driver's license from a former state of residence is not required to retest except as specified in Iowa Code subsection 321.188(5) but is required to pay the applicable endorsement and restriction removal fees.

This rule is intended to implement Iowa Code sections 321.188 and 321.191.

**761—607.39(321) Disqualification.**

**607.39(1) Date.** A disqualifying act, action or offense under Iowa Code section 321.208, that occurred before July 1, 1990, shall not be grounds for disqualification from operating a commercial motor vehicle.

**607.39(2) Notice.** A 30-day advance notice of disqualification shall be served by the department in accordance with rule 761—615.37(321). Pursuant to Iowa Code subsection 321.208(9), a peace officer on behalf of the department may serve the notice of disqualification immediately.

**607.39(3) Hearing and appeal process.** A person who has received a notice of disqualification may contest the disqualification in accordance with 761—615.38(17A,321).

**607.39(4) Reduction of lifetime disqualification.** Reserved.

This rule is intended to implement Iowa Code chapter 17A and section 321.208.

**761—607.40(321) Sanctions.** When a person's motor vehicle license is denied, canceled, suspended, revoked or barred, the person is also disqualified from operating a commercial motor vehicle.

This rule is intended to implement Iowa Code section 321.208.

**761—607.41 to 607.44** Reserved.

**761—607.45(321) Reinstatement.** To reinstate a commercial driver's license after completion of a period of disqualification, a person shall appear at a driver's license examination station. The person

must also meet the vision standards for licensing, pass the applicable knowledge test(s) and the skills test, and pay the required reinstatement fee and the fees for a new license.

This rule is intended to implement Iowa Code sections 321.191 and 321.208.

**761—607.46 to 607.48** Reserved.

**761—607.49(321) Restricted commercial driver's license.**

**607.49(1) Scope.** This rule pertains to the issuance of restricted commercial driver's licenses to suppliers or employees of suppliers of agricultural inputs. Issuance is permitted by 49 CFR 383.3(f). A restricted commercial driver's license shall meet all requirements of a regular commercial driver's license, as set out in Iowa Code chapter 321 and this chapter of rules, except as specified in this rule.

**607.49(2) Agricultural inputs.** The term "agricultural inputs" means suppliers or applicators of agricultural chemicals, fertilizer, seed or animal feeds.

**607.49(3) Validity.**

*a.* A restricted commercial driver's license allows the licensee to drive a commercial motor vehicle for agricultural input purposes. The license is valid to:

- (1) Operate Group B and Group C commercial motor vehicles including tank vehicles and vehicles equipped with air brakes, except passenger vehicles.
- (2) Transport the hazardous materials listed in paragraph 607.49(3) "b."
- (3) Operate only during the current, validated seasonal period.
- (4) Operate between the employer's place of business and the farm currently being served, not to exceed 150 miles.

*b.* A restricted commercial driver's license is not valid for transporting hazardous materials requiring placarding, except as follows:

- (1) Liquid fertilizers such as anhydrous ammonia may be transported in vehicles or implements of husbandry with total capacities of 3,000 gallons or less.
- (2) Solid fertilizers such as ammonium nitrate may be transported provided they are not mixed with any organic substance.
- (3) A hazardous material endorsement is not needed to transport the products listed in the preceding subparagraphs.

*c.* When not driving for agricultural input purposes, the license is valid for operating a noncommercial motor vehicle that may be legally operated under the noncommercial license held by the licensee.

**607.49(4) Requirements.**

*a.* The applicant must have two years of previous driving experience. This means that the applicant must have held a license that permits unaccompanied driving for at least two years. This does not include a motorized bicycle license, a minor's school license or a minor's restricted license.

*b.* The applicant must have a good driving record for the most recent two-year period, as defined in subrule 607.49(5).

*c.* An applicant who currently holds a commercial driver's license or a commercial learner's permit is not eligible for issuance of a restricted commercial driver's license.

**607.49(5) Good driving record.** A "good driving record" means a driving record showing:

- a.* No multiple licenses.
- b.* No driver's license suspensions, revocations, disqualifications, denials, bars, or cancellations of any kind.
- c.* No convictions in any type of motor vehicle for:
  - (1) Driving under the influence of alcohol or drugs.
  - (2) Leaving the scene of an accident.
  - (3) Committing any felony involving a motor vehicle.
  - (4) Speeding 15 miles per hour or more over the posted speed limit.
  - (5) Reckless driving.
  - (6) Improper or erratic lane changes.

- (7) Following too closely.
- (8) Accident-connected traffic law violations.
- d. No record of at-fault accidents.

**607.49(6) Issuance.**

a. The knowledge and skills tests described in rules 761—607.27(321) and 761—607.28(321) are waived.

b. A restricted commercial driver's license shall be coded with restriction "W" on the face of the driver's license, with the restriction explained in text on the back of the driver's license. In addition, the license shall be issued with a restriction stating the license's validity.

c. The expiration date for a restricted commercial driver's license that is converted to this license from another Iowa license shall carry the same expiration date as the previous license.

d. A restricted commercial driver's license may be renewed for the period of time specified in Iowa Code section 321.196. The licensee's good driving record shall be confirmed at the time of renewal.

e. The fee for a restricted commercial driver's license shall be as specified in Iowa Code section 321.191.

f. There are two periods of validity for commercial motor vehicle operation: March 15 through June 30, and October 4 through December 14. These are referred to as "seasonal periods." Validity shall not exceed 180 days in any 12-month period. Any period of validity authorized previously by another state's license shall be considered a part of the 180-day maximum period of validity.

g. A restricted commercial driver's license must be validated for commercial motor vehicle operation for each seasonal period. This means that the applicant/licensee must appear at a driver's license examination station during the current seasonal period or not more than 30 days before the beginning of the period to have the person's good driving record confirmed. Upon confirmation, the department shall issue a replacement license with a restriction validating the license for that seasonal period, provided the person is otherwise eligible for the license. The fee for a replacement license shall be as specified in Iowa Code section 321.195.

h. The same process must be repeated for each seasonal period.

This rule is intended to implement Iowa Code section 321.176B.

[ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

**761—607.50(321) Self-certification of type of driving and submission of medical examiner's certificate.**

**607.50(1)** *Applicants for commercial learner's permit or new, transferred, renewed or upgraded CDL.*

a. A person shall provide to the department a self-certification of type of driving if the person is applying for:

- (1) A commercial learner's permit,
- (2) An initial commercial driver's license,
- (3) A transfer of a commercial driver's license from a prior state of domicile to the state of Iowa,
- (4) Renewal of a commercial driver's license, or
- (5) A license upgrade for a commercial driver's license or an endorsement authorizing the operation of a commercial motor vehicle not covered by the current commercial driver's license.

b. The self-certification shall be on a form or in a format, which may be electronic, as provided by the department.

**607.50(2)** *Enrollment of existing CDL holders.* Every person who holds a commercial driver's license on or after January 30, 2012, and up to January 30, 2014, and who has not otherwise made a self-certification of type of driving under subrule 607.50(1) shall make to the department a self-certification of type of driving. The self-certification may be made on or after January 30, 2012, but must be made no later than January 29, 2014.

**607.50(3)** *Submission of medical examiner's certificate by persons certifying to non-excepted interstate driving.* Every person who self-certifies to non-excepted interstate driving must give the department a copy of the person's current medical examiner's certificate. A person who fails to provide

a required medical examiner's certificate shall not be allowed to proceed with an initial issuance, transfer, renewal, or upgrade of a license until the person gives the department a medical examiner's certificate that complies with the requirements of this subrule, or changes the person's self-certification of type of driving to a type other than non-excepted interstate driving. For persons submitting a current medical examiner's certificate, the department shall post a medical certification status of "certified" on the person's CDLIS driver's record. A person who self-certifies to a type of driving other than non-excepted interstate shall have no medical certification status on the CDLIS driver's record.

**607.50(4)** *Maintaining certified status.* To maintain a medical certification status of "certified," a person who self-certifies to non-excepted interstate driving must give the department a copy of each subsequently issued medical examiner's certificate valid for the person. The copy must be given to the department at least ten days before the previous medical examiner's certificate expires.

**607.50(5)** *CDL downgrade.* If the medical examiner's certificate or medical variance for a person self-certifying to non-excepted interstate driving expires or if the Federal Motor Carrier Safety Administration notifies the department that the person's medical variance was removed or rescinded, the department shall post a medical certification status of "not certified" to the person's CDLIS driver's record and shall initiate a downgrade of the person's commercial driver's license or commercial learner's permit. The medical examiner's certificate of a person who fails to maintain a medical certification status of "certified" as required by subrule 607.50(4) shall be deemed to be expired on the date of expiration of the last medical examiner's certificate filed for the person as shown by the person's CDLIS driver's record. The downgrade will be initiated and completed as follows:

*a.* The department shall give the person written notice that the person's medical certification status is "not certified" and that the commercial motor vehicle privileges will be removed from the person's commercial driver's license or commercial learner's permit 60 days after the date the medical examiner's certificate or medical variance expired or the medical variance was removed or rescinded unless the person submits to the department a current medical certificate or medical variance or self-certifies to a type of driving other than non-excepted interstate.

*b.* If the person submits a current medical examiner's certificate or medical variance before the end of the 60-day period, the department shall post a medical certification status of "certified" on the person's CDLIS driver's record and shall terminate the downgrade of the person's commercial driver's license or commercial learner's permit.

*c.* If the person self-certifies to a type of driving other than non-excepted interstate before the end of the 60-day period, the department shall not remove the commercial motor vehicle privileges from the person's commercial driver's license or commercial learner's permit, and the person will have no medical certification status on the person's CDLIS driver's record.

*d.* If the person fails to take the action in either paragraph 607.50(5) "b" or "c" before the end of the 60-day period, the department shall remove the commercial motor vehicle privileges from the person's commercial driver's license or commercial learner's permit and shall leave the person's medical certification status as "not certified" on the person's CDLIS driver's record.

**607.50(6)** *CDL downgrade of existing CDL holders who fail to enroll before January 30, 2014.* Every person subject to subrule 607.50(2) who fails to make a self-certification of type of driving or fails to give the department a copy of the person's medical examiner's certificate as required by subrule 607.50(3) before January 30, 2014, shall be subject to a CDL downgrade. The department shall post a medical certification status of "not certified" to the CDLIS driver's record and shall initiate a downgrade of the driver's commercial driver's license following the procedure set forth in subrule 607.50(5). In such cases, the 60-day period shall begin January 30, 2014, and the person shall be required to make an initial self-certification of type of driving to terminate the CDL downgrade and to avoid removal of the commercial driver's license privilege. The person's status and privilege under subrule 607.50(5) shall be determined according to the certification made or not made.

**607.50(7)** *Establishment or reestablishment of "certified" status.* A person who has no medical certification status or whose medical certification status has been posted as "not certified" on the person's CDLIS driver's record may establish or reestablish the status as "certified" by submitting a current medical examiner's certificate or medical variance to the department. A person who has failed

to self-certify to a type of driving or has self-certified to a type of driving other than non-excepted interstate must also make a self-certification of type of driving to non-excepted interstate driving. The department shall then post a medical certification status of “certified” on the person’s CDLIS driver’s record.

**607.50(8) Reestablishment of the CDL privilege.** A person whose commercial motor vehicle privileges have been removed from the person’s commercial driver’s license or commercial learner’s permit under the provisions of paragraph 607.50(5) “d” may reestablish the commercial motor vehicle privileges by either of the following methods:

*a.* Submitting a current medical examiner’s certificate or medical variance to the department. A person who has failed to self-certify to a type of driving must also make an initial self-certification of type of driving to non-excepted interstate driving. The department shall then post a medical certification status of “certified” on the person’s CDLIS driver’s record and reestablish the commercial motor vehicle privileges, provided that the person otherwise remains eligible for a commercial driver’s license or commercial learner’s permit.

*b.* Self-certifying to a type of driving other than non-excepted interstate. The department shall then reestablish the commercial motor vehicle privileges, provided that the person otherwise remains eligible for a commercial driver’s license or commercial learner’s permit; the person will have no medical certification status on the driver’s CDLIS driver’s record.

**607.50(9) Change of type of driving.** A person may change the person’s self-certification of type of driving at any time. As required by subrule 607.50(3), a person certifying to non-excepted interstate driving must give the department a copy of the person’s current medical examiner’s certificate prepared by a medical examiner.

**607.50(10) Record keeping.** The department shall comply with the medical record-keeping requirements set forth in 49 CFR Section 383.73.

This rule is intended to implement Iowa Code sections 321.182, 321.188 as amended by 2015 Iowa Acts, House File 635, section 53, and 321.207 as amended by 2015 Iowa Acts, House File 635, section 60.

[ARC 9954B, IAB 1/11/12, effective 1/30/12; ARC 0031C, IAB 3/7/12, effective 4/11/12; ARC 2071C, IAB 8/5/15, effective 7/14/15; ARC 2337C, IAB 1/6/16, effective 2/10/16]

#### **761—607.51(321) Determination of gross vehicle weight rating.**

**607.51(1) Actual weight prohibited.** In determining whether the vehicle is a representative vehicle for the skills test and the group of commercial driver’s license for which the applicant is applying, the vehicle’s gross weight rating or gross combination weight rating must be used, not the vehicle’s actual gross weight or gross combination weight. For purposes of this rule, “gross weight rating” and “gross combination weight rating” mean as defined in 49 CFR Section 383.5.

**607.51(2) Vehicle without legible manufacturer’s certification label.** To complete a skills test using a vehicle that has no legible manufacturer’s certification label, whether a power unit or towed vehicle, the applicant must provide documentation of the vehicle’s gross vehicle weight rating, such as a manufacturer’s certificate of origin, a title, or the vehicle identification number information for the vehicle. In the absence of such documentation, the vehicle may not be used, either alone or in combination.

This rule is intended to implement Iowa Code section 321.1 as amended by 2015 Iowa Acts, House File 635, section 44.

CHAPTER 71  
ADMINISTRATION OF THE CONVEYANCE SAFETY PROGRAM

**875—71.1(89A) Definitions.** The definitions contained in this rule shall apply to 875—Chapters 71, 72, and 73.

“*Acceptance checklist*” means a checklist available on the Web site of the division of labor services that includes a list of major systems and components of conveyances.

“*AECO*” means an elevator/escalator certification organization accredited pursuant to ASME A17.7.

“*Approved*” means approved by the division.

“*CCD*” means code compliance documentation as described in ASME A17.7, Section 2.10.

“*CEI*” means a person who is a certified elevator inspector or certified elevator inspector supervisor and who received the certification from a certifying organization that holds a valid document of accreditation issued by an accreditation body in accordance with ANSI/ISO/IEC 17024.

“*Control*” means the system governing the starting, stopping, direction of motion, acceleration, speed and deceleration of the moving member.

“*Conveyance*” means any elevator, escalator, dumbwaiter, wind tower lift, CPH, or other equipment governed by Iowa Code chapter 89A.

“*CPH*” means a construction personnel hoist.

“*CPH jump*” means the addition or removal of mast or tower allowing a change in the hoist service elevation of a CPH.

“*Division*” means the labor services division of the workforce development department.

“*Elevator*” means a hoisting and lowering mechanism equipped with a car or platform which moves in guides in a substantially vertical direction and which serves two or more floors of a building or structure. “Elevator” does not include a CPH.

“*Elevator mechanic*” means a person who meets the standard for “elevator personnel” found in ASME A17.1.

“*Hoistway-unit system*” means a series of hoistway-door interlocks, hoistway-door electric contacts or hoistway-door combination mechanical locks and electric contacts, or a combination thereof, the function of which is to prevent operation of the driving machine by the normal operating device unless all hoistway doors are in the closed position and, if required, locked.

“*Wind tower lift*” means a conveyance designed and utilized solely for movement of trained and authorized people and small loads in wind towers built for the production of electricity.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 9221B, IAB 11/17/10, effective 12/22/10; ARC 0168C, IAB 6/13/12, effective 7/18/12; ARC 0685C, IAB 4/17/13, effective 5/22/13; ARC 1159C, IAB 10/30/13, effective 12/4/13]

**875—71.2(89A) Registration of conveyances.** The owner or authorized agent of each operable conveyance not previously registered shall register the conveyance. An application to install a new conveyance shall constitute registration. All registrations shall be submitted to the commissioner on forms available from the division of labor services and shall include all information requested by the labor commissioner.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.3(89A) State identification number.** The commissioner shall assign an identification number to each conveyance that shall be stamped on a metal tag permanently attached to the controller, to the electrical disconnecting switch, or in a wind tower lift cage.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.4(89A) Responsibility for obtaining permits.** The procuring of all permits and the payment of all fees required by this chapter shall be the responsibility of the owner. Failure to obtain the appropriate permit prior to installation, alteration or operation may, at the discretion of the labor commissioner, result in a referral to the attorney general for prosecution of criminal penalties as described in Iowa Code section 89A.17.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.5(89A) Installation permits.**

**71.5(1)** Installation shall not begin until an installation permit has been issued by the division. A separate installation permit shall be issued for each conveyance, except that a single installation permit shall cover all identical wind tower lifts installed as the result of one construction contract in identical wind towers in a single wind farm.

**71.5(2)** Application for an installation permit shall be accompanied by the fee specified in rule 875—71.16(89A), shall be in the format required by the labor commissioner, and shall include the following, as applicable:

- a.* Sectional plan of car and hoistway.
- b.* Sectional plan of machine room.
- c.* Sectional elevation of hoistway and machine room including the pit, bottom and top clearance of car and counterweights.
- d.* Size and weight of rails and guide rail bracket spacing.
- e.* The estimated maximum vertical forces on the guide rails on application of the safety device.
- f.* In the case of freight elevators for class B or class C loading, the horizontal forces on the guide rail faces during loading and unloading and the estimated maximum horizontal forces in a post-wise direction on the guide rail faces on the application of the safety device.
- g.* The size and weight per foot of any rail reinforcements where rail reinforcements are provided.
- h.* Job specifications.
- i.* For a conveyance covered by ASME A17.7, a complete copy of the CCD with attachments and a complete copy of the Certificate of Conformance with attachments as described by ASME A17.7, Appendix I, Section 4.5.
- j.* For a CPH, the number of CPH jumps planned, the planned dates for each CPH jump, and the change in the number of floors anticipated with each CPH jump.

**71.5(3)** A CPH installation permit issued in response to an application submitted in full compliance with this subrule permits each planned CPH jump. Each CPH jump shall be considered an alteration. The fee submitted for a CPH installation permit shall be the total of the CPH installation permit fee as set forth in subrule 71.16(3) and the CPH alteration permit fee as set forth in subrule 71.16(4).

**71.5(4)** Issuance of an installation permit shall not be construed as a waiver or variance of any requirement of law.

**71.5(5)** The installation permit or a copy of the installation permit shall be conspicuously posted at the worksite. All the wind towers covered by a single installation permit shall be considered a single worksite, and posting one copy of the installation permit at the construction project office shall be sufficient compliance with this subrule.

**71.5(6)** Except as described in paragraphs 71.5(6) “a” and “b,” the installation permit shall expire upon the earlier of the completion of the installation as described in the permit application or one year after issuance.

- a.* For a CPH, the installation permit shall expire upon completion of the last CPH jump.
- b.* For any conveyance, during the tenth month after issuance, and upon submission to the labor commissioner of sufficient justification, the fee established by this chapter, and other required information, an extension may be granted at the discretion of the labor commissioner.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 9221B, IAB 11/17/10, effective 12/22/10]

**875—71.6(89A) Construction permits.** A construction permit authorizes the temporary, limited use of an elevator for purposes relating to construction or demolition.

**71.6(1)** Use of the elevator shall not begin until a construction permit has been issued by the division.

**71.6(2)** Application for a construction permit shall be in the format required by the labor commissioner and must include all the information requested by the labor commissioner and the fee specified by this chapter.

**71.6(3)** Upon submission of the completed application and fee, a state inspector shall be scheduled to inspect the elevator. Construction permits shall be issued only if the following criteria are met:

*a.* The elevator has been successfully tested pursuant to the requirements of ASME A17.1, Section 8.11.5.13; and

*b.* The applicable requirements of ASME A17.1, Section 5.10, are met.

**71.6(4)** The construction permit or a copy of the construction permit shall be posted conspicuously in a protective sleeve in the elevator car.

**71.6(5)** The construction permit shall expire 120 days after issuance. However, between 90 and 110 days after issuance and upon submission to the labor commissioner of sufficient justification, the fee established by this chapter, and other required information, an extension of up to 90 days may be granted at the discretion of the labor commissioner.

**71.6(6)** Elevators with a construction permit but without an operating permit shall not be accessible to the general public.

**71.6(7)** Failure to comply with these provisions may result in the revocation of the construction permit.

**71.6(8)** An operating permit shall not be issued before construction and an acceptance inspection are complete.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

### **875—71.7(89A) Operating permits.**

**71.7(1)** Operation of equipment covered by this chapter without a current operating permit is prohibited, except as authorized by rules 875—71.6(89A), 875—71.8(89A), and 875—71.20(89A). If operation of a conveyance is prohibited under this rule, the labor commissioner may post notice on the conveyance that it is not to be used. The conveyance may be returned to service only after an operating permit for the conveyance has been issued or reissued.

**71.7(2)** Operating permits shall not be issued prior to successful completion of an inspection pursuant to rule 875—71.11(89A) and payment of all permit and inspection fees owed to the division.

**71.7(3)** Current operating permits or copies of current operating permits shall be conspicuously displayed as follows:

*a.* The operating permit for an elevator or CPH shall be posted in the car.

*b.* The operating permit for an escalator, dumbwaiter, wind tower lift, moving walk, or wheelchair lift shall be posted on or near the subject conveyance.

**71.7(4)** An operating permit shall expire 60 days after the first permit renewal inspection following the issuance of the operating permit, unless an earlier date is dictated by this rule.

**71.7(5)** An operating permit is automatically suspended when an alteration begins. The operating permit automatically resumes when the elevator passes an inspection pursuant to rule 875—71.11(89A).

**71.7(6)** An operating permit is automatically terminated when an imminent danger notice is posted on the conveyance.

**71.7(7)** Notwithstanding other provisions of this rule, at the discretion of the labor commissioner, a temporary operating permit may be issued for up to 30 days provided the inspection has been completed and no code violations were identified. Issuance of a temporary operating permit does not extend the expiration date of the conveyance's operating permit.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 0318C, IAB 9/5/12, effective 10/10/12; ARC 0574C, IAB 2/6/13, effective 3/13/13; ARC 0685C, IAB 4/17/13, effective 5/22/13]

**875—71.8(89A) Controller upgrade permits.** A controller upgrade permit may be issued to allow operation of an elevator while work to upgrade controls requires deactivation of the Phase I recall initiated by smoke sensing devices. Each elevator to be altered requires a separate controller upgrade permit. The duration of a controller upgrade permit shall not exceed 90 days. Each elevator in the group shall pass inspection pursuant to rule 875—71.11(89A) prior to being placed back into service.

**71.8(1)** A controller upgrade permit shall not be issued unless each of the following conditions is met:

*a.* Two or more elevators share a lobby at the level of the recall floor.

*b.* The project includes the installation of new elevator controllers in all of the elevators in the group.

c. Phase I fire recall initiated by a key-operated switch and all other controls shall be properly functioning for each elevator available for use.

d. There is a current alteration permit for the project.

e. A complete application for the controller upgrade permit and the fee established by this chapter have been submitted and accepted.

**71.8(2)** A controller upgrade permit shall not be construed to waive or excuse compliance with the requirements of any other governmental entity, including the department of public safety.

**71.8(3)** Upon the submission to the labor commissioner of sufficient justification, the fee established by this chapter, and other required information, an extension of the permit for up to 60 days may be granted.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.9(89A) Alteration permits.**

**71.9(1)** Alteration shall not begin until an alteration permit has been issued by the division.

**71.9(2)** Application for an alteration permit shall be in the format required by the labor commissioner and shall include drawings and specifications of all planned changes and the fee specified by rule 875—71.16(89A).

**71.9(3)** Issuance of an alteration permit shall not be construed as a waiver or variance of any requirement of law.

**71.9(4)** The alteration permit or a copy of the alteration permit shall be conspicuously posted at the worksite.

**71.9(5)** If a complete installation permit application was submitted for a CPH pursuant to subrule 71.5(3), at least seven days' advance notice of each CPH jump shall be provided to the labor commissioner.

**71.9(6)** The alteration permit shall expire upon the earlier of the completion of the alteration as described in the permit application or one year after issuance. However, during the tenth month after issuance and upon submission to the labor commissioner of the fee set forth in this chapter, sufficient justification, and other required information, the labor commissioner may grant an extension of the alteration permit.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 9221B, IAB 11/17/10, effective 12/22/10; ARC 0685C, IAB 4/17/13, effective 5/22/13; ARC 2333C, IAB 1/6/16, effective 2/10/16]

**875—71.10(89A) Alterations.**

**71.10(1)** Alterations or changes shall comply with rule 875—72.13(89A) or rule 875—73.8(89A), as applicable.

**71.10(2)** A conveyance that is relocated shall be brought into compliance with all codes that are applicable at the time of relocation.

**71.10(3)** With the exception of replacing brushes on or adding brushes to escalators, all alterations of conveyances other than elevators shall require that the entire conveyance be brought into compliance with the current code.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 0168C, IAB 6/13/12, effective 7/18/12; ARC 0685C, IAB 4/17/13, effective 5/22/13]

**875—71.11(89A) Inspections.** Pursuant to Iowa Code section 89A.12, inspections by the labor commissioner's designee shall be permitted at reasonable times with or without prior notice.

**71.11(1) Scope of inspections.**

a. *Comprehensive.* Periodic inspections shall be comprehensive. Elevators being transferred from construction permits to operating permits, previously dormant conveyances being returned to service, relocated conveyances, and new conveyances shall be inspected in their entirety prior to operation.

b. *Limited.* The scope of an inspection after an alteration shall be determined by rule 875—72.13(89A) or 875—73.8(89A), as applicable. However, if the inspector notices a safety hazard in plain view outside the altered components, or if the periodic inspection is due, the entire conveyance shall be inspected.

**71.11(2) *When inspections will occur.*** When the timing of two different types of inspection on a single conveyance coincide, a state inspector may perform both inspections in one visit.

*a. Periodic inspections.*

(1) Each construction elevator and CPH shall be inspected at intervals not to exceed three months. All other periodic conveyance inspections by state inspectors shall be conducted annually unless the labor commissioner determines resources do not allow annual inspections. If the labor commissioner determines quarterly inspections of construction elevators and CPHs and annual inspections of other state-inspected conveyances are not feasible due to insufficient resources, the labor commissioner shall determine the inspection schedule.

(2) Conveyance inspections by special inspectors shall be conducted at least annually.

*b. Acceptance inspections.* A CPH shall be inspected pursuant to the schedule in ANSI A10.4 – 2007, Chapter 26. For all other conveyances, an acceptance inspection shall occur:

(1) After each relocation,

(2) After each alteration,

(3) For a new installation, not less than two business days after a completed acceptance checklist is submitted by the conveyance installation company,

(4) Before an elevator subject to a construction permit receives an operating permit, and

(5) Before a previously dormant conveyance is returned to service.

*c. Other inspections.* Inspections may be made when the commissioner reasonably believes that a conveyance is not in compliance with the rules. Accidents, complaints, or requests for consultative inspections may result in inspections by the labor commissioner's designee.

**71.11(3) *Who may perform inspections.***

*a.* The labor commissioner's designee shall inspect altered conveyances, construction elevators, CPHs, previously dormant conveyances being returned to service, wind tower lifts exempted from ASME A17.1 by rule 875—72.12(89A), relocated conveyances, and new conveyances.

*b.* Except as noted in 71.11(3)“c,” annual inspections may be performed by state inspectors or special inspectors authorized by the labor commissioner pursuant to rule 875—71.12(89A).

*c.* An inspection report by a special inspector shall not be accepted as the required, annual inspection if the conveyance is under contract for maintenance, installation or alteration by the special inspector or the special inspector's employer, or if the property is owned or leased by the special inspector or the special inspector's employer.

**71.11(4) *Inspection standards.*** Inspections shall be performed in accordance with applicable safety codes or documents such as:

*a.* CCD;

*b.* ASME A17.1, Sections 8.10 and 8.11, except Section 8.11.1.1;

*c.* ANSI A10.4-2007;

*d.* Rule 875—72.12(89A) for wind tower lifts exempted from ASME A17.1 by rule 875—72.12(89A); or

*e.* ASME A18.1.

**71.11(5) *Inspection reports.***

*a.* All inspectors shall file inspection reports on forms approved by the commissioner within 30 days from the date of inspection and shall provide owners of conveyances with copies of completed inspection reports. The inspection report must separately list each unsafe condition and the applicable, specific code citation. Up to 30 days shall be allowed for correction of the unsafe conditions.

*b.* The owner may file a petition for reconsideration of an inspection report pursuant to 875—Chapter 69. The timely and proper filing of a petition for reconsideration extends the deadline for correction of the hazards that are subject to the petition for reconsideration.

**71.11(6) *Extension of time.*** The owner may petition the commissioner for up to 60 additional days to make the necessary corrections. The time frames set forth in subrule 71.11(7) may be adjusted by the labor commissioner as necessary to accommodate an extension of time.

**71.11(7) *Correction of unsafe conditions.*** In the absence of a determination on reconsideration or appeal that correction of hazards is not required, all unsafe conditions identified in the inspection report

shall be corrected. The labor commissioner shall verify correction of all unsafe conditions identified in the inspection report by sending a state inspector to reinspect the conveyance for the fee set forth in rule 875—71.16(89A), or by reviewing appropriate documentation such as a photograph, invoice, other verifiable document, or subsequent inspection report. The time frames set forth in this subrule may be accelerated at the request of the owner.

*a.* Promptly upon receipt of an inspection report listing unsafe conditions, the labor commissioner will send to the owner and the special inspector, if any, an abatement order. A copy of the inspection report shall be attached to the abatement order. Unless a special inspector conducted the inspection, the order may specify a period that ends no more than 45 days after the inspection during which the owner may submit written evidence that the unsafe conditions have been corrected. The abatement order shall:

- (1) Identify the equipment.
- (2) Demand that the unsafe conditions be corrected within the period set forth in the inspection report.
- (3) Set forth the consequences of failure to comply.

*b.* After the period specified on the inspection report has passed, the labor commissioner may cause a state inspector to verify correction of all unsafe conditions. If reinspection reveals no significant progress toward correcting the unsafe conditions, or the remaining unsafe conditions create significant safety concerns, the labor commissioner may serve a notice of intent to suspend, deny or revoke the operating permit.

*c.* The labor commissioner may issue an operating permit after receipt of the appropriate fee and verification that each unsafe condition identified in the inspection report has been corrected.

*d.* If written proof of correction was requested in the abatement order, but adequate proof was not received by the deadline set forth in the abatement order, the labor commissioner may send a second abatement order or cause a state inspector to inspect the conveyance. If the labor commissioner elects to send a second abatement order, it shall notify the owner that, if written proof of abatement is not received within 20 days, a state inspector may be sent to the site. Copies of the abatement order and the inspection report shall be attached to the second abatement order.

*e.* If a special inspector conducted the inspection, more than 45 days have passed since the deadline for correction of hazards, and an inspection report indicating the hazards are corrected has not been filed, the labor commissioner may contact the special inspector, send a second abatement order to the owner, or send a state inspector to inspect the conveyance. Copies of the abatement order and the inspection report shall be attached to a second abatement order.

*f.* If an inspection as described in paragraph 71.11(7) “*d*” or “*e*” reveals no significant progress toward correcting the unsafe conditions, and the remaining unsafe conditions create no significant safety concerns, the labor commissioner may extend the time for abatement of the unsafe conditions an additional 10 days or may serve a notice of intent to suspend, deny or revoke the operating permit. The labor commissioner may also post a notice prohibiting use of the conveyance pending abatement of the unsafe conditions listed in the inspection report.

*g.* Procedures for appeal of a notice of intent to suspend, deny or revoke an operating permit are set forth in 875—Chapter 69.

**71.11(8) *Imminent danger.*** If the labor commissioner determines that continued operation of a conveyance pending correction of unsafe conditions creates an imminent danger, the labor commissioner shall post notice on the conveyance that it is not to be used pending repairs. Use of a conveyance contrary to posted notice by the labor commissioner may result in additional legal proceedings pursuant to Iowa Code section 89A.10(3) or 89A.18. The conveyance may be returned to service only after the imminent danger has been corrected and the conveyance has passed a comprehensive inspection.

**71.11(9) *Interference prohibited.*** No person shall interfere with, delay or impede an inspector employed by the state during an inspection.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 9221B, IAB 11/17/10, effective 12/22/10; ARC 0168C, IAB 6/13/12, effective 7/18/12; ARC 0685C, IAB 4/17/13, effective 5/22/13; ARC 1971C, IAB 4/29/15, effective 6/3/15]

**875—71.12(89A,252J,261,272D) Special inspector commissions.**

**71.12(1) Definition.** As used in this rule, “certificate of noncompliance” means:

- a. A certificate of noncompliance issued by the child support recovery unit, department of human services, pursuant to Iowa Code chapter 252J;
- b. A certificate of noncompliance issued by the college student aid commission pursuant to Iowa Code chapter 261; or
- c. A certificate of noncompliance issued by the centralized collection unit of the department of revenue pursuant to Iowa Code chapter 272D.

**71.12(2) Qualifications.**

- a. Each applicant must possess a high school diploma or general equivalency degree.
- b. Each applicant shall have at least three years of full-time work experience in the construction, installation, repair or inspection of conveyances.
- c. Each applicant shall be a CEI.
- d. Each applicant shall satisfactorily pass a division of labor services examination on Iowa procedures, Iowa policies, and all safety standards adopted by reference.
- e. Each applicant shall submit proof of insurance coverage insuring the applicant against liability for injury or death for any act or omission on the part of the applicant. The insurance policy shall be in an amount of not less than \$1,000,000 for bodily injury to or death of one person in any one accident, and in an amount of not less than \$5,000,000 for bodily injury to or death of two or more persons in any one accident, and in an amount of not less than \$100,000 for damage to or destruction of property in any one accident. The insurance coverage of the special inspector’s employer shall be considered to comply with this requirement if the coverage provides equivalent coverage for each special inspector.

**71.12(3) Application.** An applicant for a commission shall complete, sign, and submit to the division the form provided by the division with the required fee. The applicant shall include with the application proof that the applicant is a CEI.

**71.12(4) Expiration.** The commission expires when the commission is suspended or revoked by the labor commissioner or one year from issuance, whichever occurs earlier.

**71.12(5) Changes.** The special inspector shall notify the division at the time any of the information on the form or attachments changes.

**71.12(6) Denials.** The labor commissioner may refuse to issue or renew a special inspector’s commission for failure of the applicant to complete an application package, if the applicant is not a CEI, or for any reason listed in subrules 71.12(8) to 71.12(10).

**71.12(7) Investigations.** The labor commissioner may investigate for any reasonable cause related to special inspectors or special inspector applicants. The labor commissioner may conduct interviews and utilize other reasonable investigatory techniques. Investigations may be conducted without prior notice at the times and in the places the labor commissioner directs. The labor commissioner may notify the organization that certified the special inspector as a CEI of the findings of an investigation.

**71.12(8) Reasons for probation.** The labor commissioner may issue a notice of commission probation when an investigation reasonably reveals that the special inspector filed inaccurate reports.

**71.12(9) Reasons for suspension.** The labor commissioner may issue a notice of commission suspension when an investigation reasonably reveals any of the following:

- a. The special inspector failed to submit and report inspections on a timely basis;
- b. The special inspector abused the special inspector’s authority;
- c. The special inspector misrepresented self as a state inspector or a state employee;
- d. The special inspector used commission authority for inappropriate personal gain;
- e. The special inspector failed to follow the division’s rules for inspection of object repairs, alterations, construction, installation, or in-service inspection;
- f. The special inspector committed numerous violations as described in subrule 71.12(8);
- g. The special inspector used fraud or deception to obtain or retain, or to attempt to obtain or retain, a special inspector commission whether for one’s self or another;
- h. The special inspector is no longer a CEI;
- i. The division received a certificate of noncompliance; or

*j.* The special inspector failed to take appropriate disciplinary actions against a subordinate special inspector who has committed repeated acts or omissions listed in paragraphs 71.12(9) “a” to “h.”

**71.12(10) *Reasons for revocation.*** The labor commissioner may issue a notice of revocation of a special inspector’s commission when an investigation reveals any of the following:

- a.* The special inspector filed a misleading, false or fraudulent report;
- b.* The special inspector failed to perform a required inspection;
- c.* The special inspector failed to file a report or filed a report which was not in accordance with the provisions of applicable standards;
- d.* The special inspector committed repeated violations as described in subrule 71.12(9);
- e.* The special inspector used fraud or deception to obtain or retain, or to attempt to obtain or retain, a special inspector commission whether for one’s self or another;
- f.* The special inspector instructed, ordered, or otherwise encouraged a subordinate special inspector to perform the acts or omissions listed in paragraphs 71.12(10) “a” to “e”;
- g.* The special inspector is no longer a CEI; or
- h.* The division received a certificate of noncompliance.

**71.12(11) *Procedures.*** The following procedures shall apply except in the event of revocation or suspension due to receipt of a certificate of noncompliance. In instances involving receipt of a certificate of noncompliance, the applicable procedures of Iowa Code chapter 252J, 261, or 272D shall apply.

*a. Notice of actions.* The labor commissioner shall serve a notice on the special inspector by certified mail to an address listed on the commission application form or by other service as permitted by Iowa Code chapter 17A.

*b. Contested cases.* The special inspector shall have 20 days to file a written notice of contest with the labor commissioner. If the special inspector does not file a written contest within 20 days of receipt of the notice, the action stated in the notice shall automatically be effective.

*c. Hearing procedures.* The hearing procedures in 875—Chapter 1 shall govern.

*d. Emergency suspension.* Pursuant to Iowa Code section 17A.18A, if the labor commissioner finds that the public health, safety or welfare imperatively requires emergency action because a special inspector failed to comply with applicable laws or rules, the special inspector’s commission may be summarily suspended.

*e. Probation period.* A special inspector may be placed on probation for a period not to exceed one year for each incident causing probation.

*f. Suspension period.* A special inspector’s commission may be suspended up to five years for each incident causing a suspension.

*g. Revocation period.* A special inspector’s commission that has been revoked shall not be reinstated for five years.

*h. Concurrent actions.* Multiple actions may proceed at the same time against any special inspector.

*i. Revoked or suspended commissions.* Within five business days of final agency action revoking or suspending a special inspector commission, the special inspector shall surrender the special inspector’s commission card to the labor commissioner. The labor commissioner may notify the special inspector’s employer and the organization that certified the special inspector as a CEI of a revocation or suspension. [ARC 7841B, IAB 6/17/09, effective 7/22/09]

**875—71.13(89A) State employees.** Rescinded ARC 1971C, IAB 4/29/15, effective 6/3/15.

**875—71.14(89A) Safety tests.** Only safety test reports submitted on approved forms from elevator mechanics who are employed by authorized companies shall be considered to meet the requirements of this rule. The alternative test methods set forth at ASME A17.1, Rule 8.6.11.10, shall not be allowed as a substitute for a full-load safety test.

**71.14(1) *When safety tests will be performed.***

- a.* Safety tests shall be performed on new and altered installations before they are placed in service.

b. Safety tests shall be made on all conveyances pursuant to the schedules and procedures set forth in:

- (1) The maintenance control plan for wind tower lifts exempted from ASME A17.1 by rule 875—72.12(89A);
- (2) The CCD for conveyances covered by ASME A17.7-2007/CSA B44-07;
- (3) The columns pertaining to “periodic tests” in Table N-1 in the edition of ASME A17.1 currently adopted for new conveyances at rule 875—72.1(89A);
- (4) ASME A18.1(2003), Part 10; or
- (5) ANSI A10.4-2007, Section 26.4.

**71.14(2)** *How safety tests will be reported.* Within 30 days after completion of a safety test, the elevator mechanic shall file with the labor commissioner a report on an approved form and shall provide a copy of the form to the owner and to the witness, if applicable.

**71.14(3)** *How safety tests will be recorded.* The elevator mechanic shall attach a tag showing the date of the test, the elevator mechanic’s name, and the type of test performed.

a. On electric traction elevators, the elevator mechanic shall attach the tag to the safety-releasing carrier.

b. On hydraulic elevators, the elevator mechanic shall attach the tag to the disconnecting switch or the controller.

c. On wheelchair lifts, the elevator mechanic shall attach the tag to the disconnecting switch.

d. On other conveyances covered by these rules, the commissioner’s designee witnessing the acceptance safety test shall indicate the proper location of the tag. Subsequent test tags shall be attached in the same location.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 9221B, IAB 11/17/10, effective 12/22/10; ARC 0168C, IAB 6/13/12, effective 7/18/12; ARC 1766C, IAB 12/10/14, effective 1/14/15]

#### **875—71.15(89A) Authorized companies.**

**71.15(1)** Each year, authorized companies shall train their elevator mechanics who perform safety tests on safety test procedures.

**71.15(2)** For each conveyance owned by an authorized company, the owner shall obtain the services of a CEI who is not employed by the authorized company or an inspector employed by the state to witness the safety test.

**71.15(3)** To become authorized to perform safety tests, a company shall submit a copy of its procedures for performing safety tests. The labor commissioner shall review the procedures for adequacy and shall request modifications to the procedures or grant or deny the authorization.

**71.15(4)** Every five years or within six months after the board adopts a new edition of ASME, whichever is earlier, authorized companies shall submit revised safety test procedures for renewal of authorization. The labor commissioner shall review the procedures for adequacy and shall request modifications to the procedures or grant or deny the authorization.

**71.15(5)** Investigations. Investigations shall take place at the times and in the places the labor commissioner directs. The labor commissioner may investigate for any reasonable cause. The labor commissioner may conduct interviews and utilize other reasonable investigatory techniques. Investigations may be conducted without prior notice.

**71.15(6)** Suspension. If the labor commissioner determines that a falsified safety test report was submitted by an elevator mechanic, the labor commissioner shall suspend the authorization of the elevator mechanic’s employer for six months. During the suspension, all safety tests performed by any employee of the authorized company shall be witnessed by a state inspector or a CEI who is not employed by the suspended authorized company.

**71.15(7)** Suspension procedures.

a. The labor commissioner shall notify an authorized company of its suspension by certified mail or by other service as permitted by Iowa Code chapter 17A.

b. The authorized company shall have 20 days to file a written notice of contest with the labor commissioner. If the authorized company does not file a written notice of contest in a timely manner,

the suspension shall automatically be effective. If the authorized company does file a written notice of contest in a timely manner, the hearing procedures in 875—Chapter 1 shall govern.

c. If the labor commissioner finds, pursuant to Iowa Code section 17A.18A, that public health, safety or welfare imperatively requires emergency action, the authorization may be summarily suspended.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.16(89A) Fees.** Except as noted in this rule, all fees are nonrefundable and due in advance.

**71.16(1) *Operating permits.*** The annual operating permit fee shall be \$75 per conveyance.

**71.16(2) *Periodic inspections.*** Fees shall be remitted to the division of labor services within 30 days of the date of inspection. The fees for periodic inspections shall be as follows:

- a. Construction elevator: \$200.
- b. Wind tower lift: \$225.
- c. Hand-powered elevator: \$90.
- d. Television tower elevator: \$500.
- e. Handicapped restricted use elevator: \$100.
- f. Other hydraulic elevator: \$100.
- g. Other traction elevator: \$150.
- h. Escalator: \$150.
- i. Dumbwaiter: \$90.
- j. Wheelchair lift: \$90.
- k. CPH.
  - (1) Annual: \$500.
  - (2) Quarterly: \$200.
- l. Moving walk: \$150.

**71.16(3) *Installation permits.*** The fees in this subrule cover the initial print review, installation permit, initial inspection and first-year operating permit. Each print revision submitted to the division shall be subject to an additional fee of \$100. The fees for new installations shall be as follows:

- a. Wind tower lift: \$500.
- b. Hydraulic elevator: \$750.
- c. Traction elevator: \$1000.
- d. Escalator: \$1000.
- e. Dumbwaiter: \$500.
- f. Wheelchair lift: \$500.
- g. CPH: \$500.
- h. Moving walk: \$500.

**71.16(4) *Alteration permits.***

a. The fee for any elevator alteration permit shall be \$500 and shall cover the initial print review, alteration permit, and initial inspection.

b. The fee for each CPH extension shall be \$150. The total fee required for all planned CPH extensions shall be submitted with the installation permit application pursuant to subrule 71.5(3).

c. The fee for an alteration permit shall be \$500 if the only alteration is the addition or replacement of an escalator skirt brush.

d. For all other conveyances, the fees for new installations shall apply to alterations.

**71.16(5) *Construction permits.*** The construction permit fee shall be \$200 per conveyance. This fee includes the fee for initial inspection.

**71.16(6) *Controller upgrade permits.*** The controller upgrade permit fee shall be \$250. This fee includes one inspection.

**71.16(7) *Consultative inspections.*** Consultative inspections may be performed at the discretion of the labor commissioner for \$125 per hour, including travel time, with a minimum charge of \$250.

**71.16(8) *Special inspector commission.*** The special inspector commission fee shall be \$60 annually.

**71.16(9) *Witness of safety tests.*** The fee for division employees to witness safety tests shall be \$125 per hour, including travel time, with a minimum charge of \$250.

**71.16(10) *Permit extensions.*** The fee to extend an installation permit, alteration permit, or construction permit shall be \$100.

**71.16(11) *Inspections outside of normal business hours.*** Inspections outside the normal business hours may be performed at the discretion of the labor commissioner. If the owner or contractor requests an inspection outside of normal business hours and the labor commissioner agrees to the schedule, an additional fee will be charged. The additional fee will be calculated at a rate of \$200 per hour, including travel time, with a minimum charge of \$400.

**71.16(12) *Reinspections.*** The fees for reinspections are \$400 for television tower elevators and CPHs, \$200 for wind tower lifts, and \$300 for all other conveyances.

**71.16(13) *Inspection for temporary removal from service.*** The inspection fee for temporary removal from service pursuant to rule 875—71.20(89A) shall be \$125 per hour, including travel time, with a minimum charge of \$250.

**71.16(14) *Fee waiver.***

*a.* When a state inspector combines in one visit two different types of inspection on a single conveyance, the commissioner may waive the lesser of the fees.

*b.* The fee for an alteration permit shall be waived by the commissioner if the only alterations covered by the permit application are required by rule 875—72.26(89A) or 875—73.27(89A). The fee waiver set forth in this paragraph does not eliminate the requirement to pay for an acceptance inspection or for an operating permit.

[ARC 7840B, IAB 6/17/09, effective 7/22/09; ARC 9221B, IAB 11/17/10, effective 12/22/10; ARC 0318C, IAB 9/5/12, effective 10/10/12; ARC 0685C, IAB 4/17/13, effective 5/22/13; ARC 1158C, IAB 10/30/13, effective 12/4/13; ARC 1972C, IAB 4/29/15, effective 6/3/15; ARC 1971C, IAB 4/29/15, effective 6/3/15]

**875—71.17(89A) *Publications available for review.*** Standards, codes, and publications adopted by reference in these rules are available for review in the office of the Division of Labor Services, 1000 E. Grand Avenue, Des Moines, Iowa 50319.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.18(89A) *Other regulations affecting elevators.*** Regulations concerning accessibility of buildings and conveyances available to the public are found at 661—Chapter 302. Regulations governing the safety and health of employees who work in and around elevators are found at 875—Chapters 2 to 26. Iowa Code chapter 91C and 875—Chapter 150 apply to companies that alter and install conveyances. No rule in 875—Chapters 71 to 73 shall be interpreted as creating an exemption, waiver, or variance from any otherwise applicable regulation or statute.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.19(89A) *Accidents.***

**71.19(1) *Reporting the accident.*** The owner shall immediately notify the commissioner of each personal injury accident requiring the service of a physician or causing disability exceeding one day or causing damage to the conveyance exceeding \$2,000. Notification shall be in writing and shall include the state identification number, owner, and description of accident.

**71.19(2) *Securing the accident site pending investigation.*** The removal of any part of the damaged conveyance or operating mechanism from the premises is forbidden until permission to do so is granted by the commissioner.

**71.19(3) *Putting the conveyance back into operation.*** When an accident involves the failure or destruction of any part of the conveyance or its operating mechanism, the use of the conveyance is forbidden until it has been made safe, until it has been reinspected, and until any repairs or alterations have been approved by the commissioner.

[ARC 7840B, IAB 6/17/09, effective 7/22/09]

**875—71.20(89A) *Temporary removal from service.*** The requirements for an annual inspection, annual inspection fee, safety test, operating permit, and operating permit fee shall be temporarily

suspended for up to three years for an elevator in an unoccupied building if the requirements of this rule are met.

**71.20(1)** All elevator doors in unoccupied buildings shall be closed and locked. Hydraulic elevators shall be parked at the bottom of the hoistway. Traction elevators shall be parked at the top of the hoistway.

**71.20(2)** Upon request by the owner of an elevator in an unoccupied building, the labor commissioner shall send an inspector who is a state employee to confirm that the building is unoccupied and that the car and doors of the elevator have been properly secured. If the conditions set forth in subrule 71.20(1) are met, the inspector shall apply to the elevator a seal and a red tag marked with the words “Do Not Operate.”

**71.20(3)** One year after the inspection, the owner must file with the labor commissioner written confirmation that the status of the elevator and building have not changed, and the owner must file again two years after the inspection. Failure to comply with this requirement shall result in termination of the temporary suspension of the requirements for safety tests, inspections, and operating permits.

**71.20(4)** Prior to returning the elevator to service, and upon request of the owner, the labor commissioner may allow the elevator to be operated for 30 days for the sole purpose of performing safety tests and maintenance.

**71.20(5)** The owner must notify the labor commissioner at least two weeks before placing an elevator back into service and must arrange for an inspector who is a state employee to witness a safety test.

**71.20(6)** If at the end of three years the building is still unoccupied, suspension of the requirements for safety tests, inspections, and operating permits shall end without possibility of renewal.

[ARC 0318C, IAB 9/5/12, effective 10/10/12]
