

State of Iowa

Iowa
Administrative
Code
Supplement

Biweekly
April 11, 2018

STEPHANIE A. HOFF
ADMINISTRATIVE CODE EDITOR

Published by the
STATE OF IOWA
UNDER AUTHORITY OF IOWA CODE SECTION 17A.6

The Iowa Administrative Code Supplement is published biweekly pursuant to Iowa Code section 17A.6. The Supplement contains replacement chapters to be inserted in the loose-leaf Iowa Administrative Code (IAC) according to instructions included with each Supplement. The replacement chapters incorporate rule changes which have been adopted by the agencies and filed with the Administrative Rules Coordinator as provided in Iowa Code sections 7.17 and 17A.4 to 17A.6. To determine the specific changes in the rules, refer to the Iowa Administrative Bulletin bearing the same publication date.

In addition to the changes adopted by agencies, the replacement chapters may reflect objection to a rule or a portion of a rule filed by the Administrative Rules Review Committee (ARRC), the Governor, or the Attorney General pursuant to Iowa Code section 17A.4(6); an effective date delay imposed by the ARRC pursuant to section 17A.4(7) or 17A.8(9); rescission of a rule by the Governor pursuant to section 17A.4(8); or nullification of a rule by the General Assembly pursuant to Article III, section 40, of the Constitution of the State of Iowa.

The Supplement may also contain replacement pages for the IAC Index or the Uniform Rules on Agency Procedure.

INSTRUCTIONS

FOR UPDATING THE

IOWA ADMINISTRATIVE CODE

Agency names and numbers in bold below correspond to the divider tabs in the IAC binders. New and replacement chapters included in this Supplement are listed below. Carefully remove and insert chapters accordingly.

Editor's telephone (515)281-3355 or (515)242-6873

Credit Union Division[189]

- Replace Analysis
- Replace Chapter 12
- Replace Chapter 17

Insurance Division[191]

- Replace Analysis
- Replace Chapter 50

Utilities Division[199]

- Replace Chapter 24

Inspections and Appeals Department[481]

- Replace Analysis
- Replace Chapter 57
- Replace Chapters 62 and 63

Environmental Protection Commission[567]

- Replace Analysis
- Replace Chapters 40 to 44
- Replace Chapter 81
- Replace Chapter 83
- Replace Chapter 111

Public Health Department[641]

- Replace Analysis
- Replace Chapter 3
- Replace Chapters 37 to 41
- Replace Chapter 45
- Replace Chapter 80
- Remove Reserved Chapters 146 to 149
- Insert Chapter 146 and Reserved Chapters 147 to 149

Professional Licensure Division[645]

- Replace Analysis
- Replace Chapters 280 to 283

Pharmacy Board[657]

Replace Chapter 10

Replace Chapter 37

Public Safety Department[661]

Replace Chapter 502

Replace Chapters 551 and 552

Revenue Department[701]

Replace Chapters 41 and 42

Replace Chapters 103 to 105

Labor Services Division[875]

Replace Chapters 71 to 73

CREDIT UNION DIVISION[189]

Credit Union Department[295] renamed Credit Union Division[189] under the Department of Commerce by 1986 Iowa Acts, Senate File 2175, section 751, effective July 1, 1986. See IAB 9/10/86.

CHAPTER 1

DESCRIPTION OF ORGANIZATION

- | | |
|--------------|------------------------|
| 1.1(533) | Definitions |
| 1.2(17A,533) | Scope and application |
| 1.3(17A,533) | Credit union division |
| 1.4(17A,533) | Forms and instructions |

CHAPTER 2

ORGANIZATION, CHARTERING AND FIELD OF MEMBERSHIP OF A CREDIT UNION

- | | |
|-----------|-------------------------------------|
| 2.1(533) | Definitions |
| 2.2(533) | Purpose |
| 2.3(533) | Chartering process |
| 2.4(533) | Organization procedure |
| 2.5(533) | Field of membership and common bond |
| 2.6(533) | Application for charter |
| 2.7(533) | Chartering standards |
| 2.8(533) | Incorporation |
| 2.9(533) | Commencement of business |
| 2.10(533) | Use of credit union name |
| 2.11(533) | Employee groups |
| 2.12(533) | Approval or denial |
| 2.13(533) | Appeal |

CHAPTER 3

CONVERSION OF AN IOWA-CHARTERED CREDIT UNION TO ANOTHER CHARTER TYPE

- | | |
|-----------|---|
| 3.1(533) | Definitions |
| 3.2(533) | Authority to convert |
| 3.3(533) | Board of directors and membership approval |
| 3.4(533) | Notice to members and voting procedures |
| 3.5(533) | Notice to the superintendent |
| 3.6(533) | Certification of vote on conversion proposal |
| 3.7(533) | Superintendent oversight of methods and procedures of membership vote |
| 3.8(533) | Other regulatory oversight of methods and procedures of membership vote |
| 3.9(533) | Completion of conversion |
| 3.10(533) | Limit on compensation of officials |

CHAPTER 4

PROCEDURE FOR ADOPTION OF RULES

- | | |
|--------------|--|
| 4.1(17A) | Applicability |
| 4.2(17A) | Advice on possible rules before notice of proposed rule adoption |
| 4.3(17A) | Public rule-making docket |
| 4.4(17A) | Notice of proposed rule making |
| 4.5(17A) | Public participation |
| 4.6(17A) | Regulatory analysis |
| 4.7(17A,25B) | Fiscal impact statement |
| 4.8(17A) | Time and manner of rule adoption |

| | |
|-----------|--|
| 4.9(17A) | Variance between adopted rule and rule proposed in Notice of Intended Action |
| 4.10(17A) | Exemptions from public rule-making procedures |
| 4.11(17A) | Concise statement of reasons |
| 4.12(17A) | Contents, style, and form of rule |
| 4.13(17A) | Agency rule-making record |
| 4.14(17A) | Filing of rules |
| 4.15(17A) | Effectiveness of rules prior to publication |
| 4.16(17A) | General statements of policy |
| 4.17(17A) | Review of rules by division |

CHAPTER 5

DEBT CANCELLATION PRODUCTS

| | |
|-----------|---|
| 5.1(533) | Authority and purpose |
| 5.2(533) | Definitions |
| 5.3(533) | Debt cancellation products |
| 5.4(533) | Prohibited practices |
| 5.5(533) | Refunds of fees in the event of termination or prepayment of the covered loan |
| 5.6(533) | Method of payment of fees |
| 5.7(533) | Disclosures |
| 5.8(533) | Affirmative election to purchase and acknowledgment of receipt of disclosure |
| 5.9(533) | Short-form disclosure |
| 5.10(533) | Long-form disclosure |
| 5.11(533) | Safe and sound practices |
| 5.12(533) | Exception for Guarantee Automobile Protection or Guarantee Asset Protection (GAP) and other debt cancellation products offered by credit unions through unaffiliated, nonexclusive agents |

CHAPTER 6

BRANCH OFFICES

| | |
|----------|-------------------------------------|
| 6.1(533) | Establishment of branch offices |
| 6.2(533) | Change of location of branch office |

CHAPTER 7

LOW-INCOME DESIGNATED CREDIT UNION

| | |
|----------|--------------------------------------|
| 7.1(533) | Authority |
| 7.2(533) | Definitions |
| 7.3(533) | Low-income designation documentation |
| 7.4(533) | Nonmember deposits |
| 7.5(533) | Removal of low-income designation |
| 7.6(533) | Receipt of secondary capital |

CHAPTER 8

ACCOUNTS

| | |
|----------|--------------------------------|
| 8.1(533) | Definitions |
| 8.2(533) | Insurance required |
| 8.3(533) | Authorized accounts |
| 8.4(533) | Ownership accounts |
| 8.5(533) | Trust accounts |
| 8.6(533) | Executor accounts |
| 8.7(533) | Corporate accounts |
| 8.8(533) | IRA and Keogh accounts |
| 8.9(533) | Deferred compensation accounts |

CHAPTER 9
REAL ESTATE LENDING

- 9.1(533) Real estate lending
- 9.2(533) Evidence of title

CHAPTER 10
CORPORATE CENTRAL CREDIT UNION

- 10.1(533) Corporate central credit union powers

CHAPTER 11
INSOLVENCY

- 11.1(533) Definition of insolvency
- 11.2(533) Factors considered
- 11.3(533) First year of operation

CHAPTER 12
VOTES OF THE MEMBERSHIP

- 12.1(533) Voting requirements and eligibility
- 12.2(533) Nomination procedures for the board of directors
- 12.3(533) Election procedures for the board of directors
- 12.4(533) Vote to amend bylaws or articles of incorporation
- 12.5(533) Vote to modify, amend, or reverse an act of the board of directors or to instruct the board to take action
- 12.6(533) Vote on merger
- 12.7(533) Vote on voluntary dissolution
- 12.8(533) Vote to remove or reinstate an officer, director, or member of the auditing committee
- 12.9(533) Preservation of ballots
- 12.10(533) Reporting the results of the vote to the membership
- 12.11(533) Vote on sale of assets by corporate central credit union
- 12.12(533) Vote on conversion of an Iowa-chartered credit union to another charter type

CHAPTER 13
POWERS OF SUPERINTENDENT IN CONTROL OF CREDIT UNION

- 13.1(533) Powers of superintendent or special deputy superintendent
- 13.2(533) Surrender of control

CHAPTER 14
EXAMINATION REVIEWS AND INVESTIGATIONS

- 14.1(533) Definitions
- 14.2(533) Application of rules
- 14.3(533) Examination reviews
- 14.4(533) Preliminary informal investigations
- 14.5(533) Nonpublic proceedings and transcripts of examination reviews or informal preliminary investigatory proceedings
- 14.6(533) Formal investigations
- 14.7(533) Action following an examination, examination review or an informal or formal investigation
- 14.8(533) Voluntary submission of information
- 14.9(533) Effect of disposition and settlement on criminal proceedings

CHAPTER 15
FOREIGN CREDIT UNION BRANCH OFFICES

- 15.1(17A) Definitions
- 15.2(533) Application of foreign credit union
- 15.3(533) Exhibits
- 15.4 Reserved
- 15.5(533) Annual reporting requirements
- 15.6(533) Fees
- 15.7(533) Certificate of approval
- 15.8(533) Change of location of a branch office

CHAPTER 16
MERGERS

- 16.1(533) Spin-offs
- 16.2(533) Plan requirements
- 16.3(533) Additional requirements

CHAPTER 17
INVESTMENT AND DEPOSIT ACTIVITIES FOR CREDIT UNIONS

- 17.1(533) Authority and purpose
- 17.2(533) Definitions
- 17.3(533) Investment policies
- 17.4(533) Record keeping and documentation requirements
- 17.5(533) Discretionary control over investments and investment advisers
- 17.6(533) Credit analysis
- 17.7(533) Notice of noncompliant investments
- 17.8(533) Broker-dealers
- 17.9(533) Safekeeping of investments
- 17.10(533) Monitoring nonsecurity investments
- 17.11(533) Valuing securities
- 17.12(533) Monitoring securities
- 17.13(533) Permissible investment activities
- 17.14(533) Permissible investments
- 17.15(533) Prohibited investment activities
- 17.16(533) Prohibited investments
- 17.17(533) Conflicts of interest
- 17.18 Reserved
- 17.19(533) Investment pilot program
- 17.20(533) Responsibility placed upon the credit union to show cause
- 17.21(533) Director, officer, or employee overdraft

CHAPTER 18
MAINTENANCE OF ALLOWANCE FOR LOAN AND LEASE LOSSES ACCOUNT

- 18.1(533) Definitions
- 18.2(533) Legal reserve required
- 18.3(533) Generally accepted accounting principles
- 18.4(533) Allowance for loan and lease losses
- 18.5(533) Allowance for loan and lease losses computation
- 18.6(533) Accounting treatment

CHAPTER 19
Reserved

CHAPTER 20
PETITIONS FOR RULE MAKING

| | |
|-----------|--------------------------|
| 20.1(17A) | Petition for rule making |
| 20.2(17A) | Briefs |
| 20.3(17A) | Inquiries |
| 20.4(17A) | Division consideration |

CHAPTER 21
DECLARATORY ORDERS

| | |
|------------|--|
| 21.1(17A) | Petition for declaratory order |
| 21.2(17A) | Notice of petition |
| 21.3(17A) | Intervention |
| 21.4(17A) | Briefs |
| 21.5(17A) | Inquiries |
| 21.6(17A) | Service and filing of petitions and other papers |
| 21.7(17A) | Consideration |
| 21.8(17A) | Action on petition |
| 21.9(17A) | Refusal to issue order |
| 21.10(17A) | Contents of declaratory order—effective date |
| 21.11(17A) | Copies of orders |
| 21.12(17A) | Effect of a declaratory order |

CHAPTER 22
CONTESTED CASES

| | |
|------------|--|
| 22.1(17A) | Scope and applicability |
| 22.2(17A) | Definitions |
| 22.3(17A) | Time requirements |
| 22.4(17A) | Requests for contested case proceeding |
| 22.5(17A) | Notice of hearing |
| 22.6(17A) | Presiding officer |
| 22.7(17A) | Waiver of procedures |
| 22.8(17A) | Telephone proceedings |
| 22.9(17A) | Disqualification |
| 22.10(17A) | Consolidation—severance |
| 22.11(17A) | Pleadings |
| 22.12(17A) | Service and filing of pleadings and other papers |
| 22.13(17A) | Discovery |
| 22.14(17A) | Subpoenas |
| 22.15(17A) | Motions |
| 22.16(17A) | Prehearing conference |
| 22.17(17A) | Continuances |
| 22.18(17A) | Withdrawals |
| 22.19(17A) | Intervention |
| 22.20(17A) | Hearing procedures |
| 22.21(17A) | Evidence |
| 22.22(17A) | Default |
| 22.23(17A) | Ex parte communication |
| 22.24(17A) | Recording costs |
| 22.25(17A) | Interlocutory appeals |
| 22.26(17A) | Final decision |
| 22.27(17A) | Appeals and review |
| 22.28(17A) | Applications for rehearing |

- 22.29(17A) Stays of division actions
- 22.30(17A) No factual dispute contested cases
- 22.31(17A) Emergency adjudicative proceedings

CHAPTER 23

UNIFORM WAIVER AND VARIANCE RULES

- 23.1(17A,ExecOrd11) Scope of chapter
- 23.2(17A,ExecOrd11) Superintendent discretion
- 23.3(17A,ExecOrd11) Requester's responsibilities in filing a waiver or variance petition
- 23.4(17A,ExecOrd11) Notice
- 23.5(17A,ExecOrd11) Superintendent's responsibilities regarding petition for waiver or variance
- 23.6(17A,ExecOrd11) Public availability
- 23.7(17A,ExecOrd11) Voiding or cancellation
- 23.8(17A,ExecOrd11) Violations
- 23.9(17A,ExecOrd11) Defense
- 23.10(17A,ExecOrd11) Appeals
- 23.11(17A,ExecOrd11) Summary reports

CHAPTER 24

ELECTRONIC TRANSFER OF FUNDS

- 24.1(527) Scope
- 24.2(527) Terms defined
- 24.3(527) Applications to operate a central routing unit
- 24.4(527) Compliance examinations of a central routing unit
- 24.5(527) Applications to establish a satellite terminal
- 24.6(527) Customer instruction in the use of a satellite terminal

CHAPTER 25

PUBLIC RECORDS AND FAIR INFORMATION PRACTICES

(Uniform Rules)

- 25.1(17A,22) Definitions
- 25.3(17A,22) Requests for access to records
- 25.6(17A,22) Procedure by which additions, dissents, or objections may be entered into certain records
- 25.9(17A,22) Disclosure without the consent of the subject
- 25.10(17A,22) Routine use
- 25.11(17A,22) Consensual disclosure of confidential records
- 25.12(17A,22) Release to subject
- 25.13(17A,22) Availability of records
- 25.14(17A,22) Personally identifiable information
- 25.15(17A,22) Other groups of records routinely available for public inspection

CHAPTER 12
VOTES OF THE MEMBERSHIP

189—12.1(533) Voting requirements and eligibility.

12.1(1) All elections are determined by plurality vote.

12.1(2) A member shall have one vote regardless of the number of or class of shares held by the member. Jointly held ownership shares are entitled to one vote, and joint tenants shall not be permitted to cast more than one vote per ownership share jointly held.

12.1(3) Members shall not vote by proxy.

12.1(4) A member other than a natural person may cast a single vote through a delegated agent.

12.1(5) Members shall be at least 16 years of age by the date of the meeting in order to vote, sign nominating petitions, or sign petitions requesting special meetings.

12.1(6) Members shall be at least 18 years of age by the date of the meeting where the election or appointment will occur in order to hold an elected or appointed position.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.2(533) Nomination procedures for the board of directors.

12.2(1) *Nominating committee.* If the board has determined that voting for directors at the annual meeting will be conducted via one or more methods other than only in-person voting at the meeting, then at least 120 days before each annual meeting, the chairperson of the board shall appoint a nominating committee of three or more members, none of whom are directors currently eligible for reelection or their immediate family members.

a. It is the duty of the nominating committee to nominate at least one member for each vacancy, including for any unexpired-term vacancy, for which elections are being held and to obtain a signed certificate from the members nominated that they are agreeable to the placing of their names in nomination, will accept office if elected, and will cooperate with any background check required by the credit union.

b. The nominating committee shall file its nominations with the secretary of the credit union board at least 90 days before the annual meeting.

c. Nominations made by the nominating committee are not subject to the petition process in subrule 12.2(2).

12.2(2) *Nominations by petition.* If the board of directors determines pursuant to subrule 12.3(1) that voting for directors will be conducted in whole or in part by mail or electronic ballots prior to the annual meeting, then nominations shall not be taken from the floor at the annual meeting and the nominating committee shall accept additional nominations by petition.

a. At least 90 days before the annual meeting, the secretary shall notify in writing all members eligible to vote that nominations for vacancies may be made by petition signed by at least 1 percent of the members, subject to a minimum of 20 members and a maximum of 200 members.

(1) The notice shall indicate that there will be no nominations from the floor at the annual meeting.

(2) The notice shall include a list of the nominating committee's nominees and a brief statement of the nominees' qualifications and biographical data in a form approved by the board of directors. Each nominee by petition shall submit a similar statement of qualifications and biographical data with the petition.

(3) Nominations by petition shall be accompanied by a signed certificate from the nominee stating that the nominee is agreeable to nomination, will serve if elected to office, and will cooperate with any background check required by the credit union.

(4) The period for receiving nominations by petition shall extend at least 30 days from the date that the notice is sent. Petitions shall be filed with the secretary of the credit union at least 60 days before the annual meeting.

(5) Nominations by petition which are received after the closing date, or which are otherwise incomplete because they do not include a statement of qualifications and biographical data, or certification agreeing to the nomination and indicating a willingness to serve, shall be disqualified by

the board secretary. The secretary shall immediately notify the nominee of the disqualification and of the reason. A petition for a disqualified nominee may be refiled provided that all requirements, including the closing date for receiving nominations by petition, are met.

b. The notice may be included with the notice of annual meeting, in statements or newsletters, on the credit union website, or on signs posted in the credit union.

c. The secretary may use electronic mail to notify members who have opted to receive notices or statements electronically.

12.2(3) Posting of nominations. The secretary shall ensure that all nominations are posted in a conspicuous place in each credit union office at least 30 days but no more than 60 days before the annual meeting.

12.2(4) Alternative schedule—voting only in person at annual meeting. If the board of directors determines that voting at the annual meeting shall only be conducted in person, and nominations will be taken from the floor at the annual meeting, the chairperson of the board shall appoint a nominating committee of three or more members, none of whom are directors currently eligible for reelection or their immediate family members, at least 60 days before the annual meeting. The nominating committee shall not solicit additional nominations by petition pursuant to subrule 12.2(2). Nominations shall be posted according to subrule 12.2(3).

12.2(5) Nomination notification by newsletter. The board of directors may determine that the entire credit union membership will be notified via newsletter or other written communication of the opportunity to nominate an individual for the board of directors.

a. If the membership is notified of nominations via newsletter or other written communication at least 90 days before the annual meeting, the secretary shall:

(1) Send the newsletter or other written communication to the entire membership via U.S. mail or electronic mail to members who have opted to receive notices or statements electronically and indicate a physical location or email address where nominations can be sent;

(2) Indicate in the notice that there will be no nominations from the floor at the annual meeting; and

(3) Indicate in the notice that the nominating committee will vet the candidates and present a list of the eligible candidates prior to the voting period.

b. If the board of directors utilizes the nomination notification by newsletter pursuant to this rule, then nominations shall not be taken from the floor at the annual meeting as set forth in subrule 12.3(7) and nomination notifications made pursuant to this rule are not subject to the nomination-by-petition process in subrule 12.2(2).

[ARC 0938C, IAB 8/7/13, effective 9/15/13; ARC 3734C, IAB 4/11/18, effective 5/16/18]

189—12.3(533) Election procedures for the board of directors.

12.3(1) Vote by board of directors. The board of directors shall, by majority vote, select the method of voting for the membership vote for the election of directors, in accordance with Iowa Code section 533.203. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. If the number of members who have opted to receive notices electronically is less than all members, the board may provide access to an electronic device in each credit union office for the members to vote electronically in order to satisfy the access requirement. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at the annual meeting, pursuant to the requirements of this rule.

12.3(2) Election committee. The board of directors shall appoint an election committee of not fewer than five members, none of whom may be a current director or nominee for office or an immediate family member of any director or nominee for office.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. The chairperson of the election committee shall announce the results of the election at the annual meeting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.203.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.3(3) Notice of balloting. At least 20 days but not more than 30 days prior to the close of balloting, the secretary shall produce a notice of balloting.

a. The notice of balloting shall state the names of the candidates for the board of directors. The name of each candidate shall be followed by a brief statement of the candidate's qualifications and biographical data in a form approved by the board of directors.

b. If the board of directors elected to accept additional nominations by petition, then the notice of balloting shall state that additional nominations shall not be taken from the floor at the annual meeting. In this event, the board may vote to conduct the election in any form permitted by Iowa Code section 533.203.

c. If the board of directors did not elect to accept additional nominations by petition, then the notice of balloting shall state that additional nominations will be taken from the floor at the annual meeting. In this event, the board may only vote to conduct the election in person at the annual meeting, and not by mail-in ballot, electronic voting, absentee voting, or any combination permitted by Iowa Code section 533.203.

d. The notice shall set forth the rules and procedures for voting and the date of the close of balloting for ballots submitted other than in person during voting at the annual meeting.

(1) The close of balloting for ballots submitted other than in person during voting at the annual meeting shall be at least two days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at the annual meeting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at the annual meeting and received within five business days after the closing date of balloting for ballots submitted other than in person during voting at the annual meeting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at the annual meeting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

e. The notice may be included with notice of the annual meeting and in statements or newsletters, on the credit union website, or on signs posted in the credit union.

f. Electronic mail may be used to provide the notice of balloting to members who have opted to receive notices or statements electronically.

12.3(4) Mailed ballots. If the board of directors, by majority vote, has elected to conduct the election in whole or in part by mailed ballot, then the secretary shall send with the notice of balloting a mail-in ballot.

- a.* The secretary shall include the following materials for balloting:
- (1) One ballot, clearly identified as the ballot, on which the names of the candidates for the board of directors are printed in random order.
 - (2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.
 - (3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.
 - (4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.
- b.* If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions for the electronic voting procedure.
- c.* Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.
- d.* If voting will also occur at the annual meeting, the ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the annual meeting. If voting is not scheduled to occur at the annual meeting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the close of balloting for ballots submitted other than in person during voting at the annual meeting.
- 12.3(5) *Electronic voting.*** If the board of directors, by majority vote, has elected to conduct the election in whole or in part by electronic voting, then the secretary shall include with the notice of balloting specific instructions for electronic voting.
- a.* The instruction sheet for electronic voting shall contain specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.
- b.* For those members who have opted to receive notices or statements electronically, the instructions for electronic voting required under this subrule may be communicated electronically.
- c.* The electronic voting shall be tallied by the election committee. If voting will also occur at the annual meeting, then the results shall be verified at the meeting.
- d.* If voting is not scheduled to occur at the annual meeting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the close of balloting for ballots submitted other than in person during voting at the annual meeting.
- 12.3(6) *Absentee ballots—subsequent in-person vote at meeting.*** If the board of directors, by majority vote, has elected to conduct the election only in person at the annual meeting, the board may also, by majority vote, utilize absentee ballots when no additional nominations will be taken from the floor at the annual meeting and when, in the opinion of the board, it is in the best interest of the credit union and its membership.
- a.* The secretary shall include with the notice of annual meeting a notification that members may vote either in person at the annual meeting or by absentee ballot if the member submits a written or electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at the annual meeting.
- b.* The secretary shall mail the balloting materials specified in paragraph 12.3(4) “*a*” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.
- c.* Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the annual meeting.
- d.* At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election

committee before the meeting. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.3(7) *Nominations from the floor—subsequent in-person vote at meeting.* If the board of directors did not elect to accept additional nominations by petition, then additional nominations shall be taken from the floor at the annual meeting, provided that no electronic, mail-in, or absentee balloting has occurred.

a. At the annual meeting, printed ballots shall be distributed to those in attendance after additional nominations are taken from the floor, or the ballots shall also have blank spaces to write in the additional names. The ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting.

b. After members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee.

c. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the annual meeting.

12.3(8) *In-person vote at meeting.* If the board of directors elected to accept additional nominations by petition, and if the board of directors also chose to conduct the vote in whole or in part by in-person voting at the annual meeting, printed ballots shall be distributed to those in attendance at the annual meeting who have not voted.

a. The ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting.

b. After those members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots.

c. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the annual meeting.

12.3(9) *Preservation of ballots.* Ballots shall be preserved according to the provisions of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date the results are certified to the board by the election committee.

12.3(10) *Publication of results.* Results of the election shall be reported to members according to the provisions of 189—12.10(533). The 60-day posting period required by subrule 12.10(1) shall run from the date the results are certified to the board by the election committee.

[ARC 0938C, IAB 8/7/13, effective 9/15/13; ARC 3734C, IAB 4/11/18, effective 5/16/18]

189—12.4(533) Vote to amend bylaws or articles of incorporation.

12.4(1) *Requirements.* Voting on amendments of bylaws and articles of incorporation shall be conducted in accordance with Iowa Code section 533.201. All amendments shall be approved by the superintendent before the amendments become effective.

12.4(2) *Vote by board of directors.* If the board of directors has elected upon a favorable vote of the majority that the board of directors shall vote on the amendment, then the amendment is adopted by a favorable vote of the majority of the board.

12.4(3) *Membership vote.* The board of directors may vote to conduct the vote on the amendment by a method other than a majority vote of the board of directors, as provided in Iowa Code section 533.201. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. If the number of members who have opted to receive notices electronically is less than all members, the board may provide access to an electronic device in each credit union office for the members to vote electronically in order to satisfy the access requirement. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at a meeting held for the purpose of voting, pursuant to the requirements of this rule.

12.4(4) *Election committee.* If the board of directors votes to conduct the vote on the amendment by a method other than a majority vote of the board of directors, as provided in Iowa Code section 533.201,

then the board shall appoint an election committee of not fewer than five members, none of whom may be directors.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. The chairperson of the election committee shall announce the results of the vote at the annual meeting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.201.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.4(5) Notice of balloting. The secretary shall set forth the proposed amendment in its entirety in a notice to all members eligible to vote at least 20 days but not more than 30 days prior to the closing date of balloting.

a. The notice shall set forth the rules and procedures for voting, the date of the close of balloting for ballots submitted other than in person at a meeting held for the purpose of voting, that balloting is subject to an affirmative vote of a majority of all members eligible to vote, and that no other vote on the subject shall be taken after the closing date of balloting except for votes cast in person at a meeting held for the purpose of voting. The notice shall also contain a summary of the board's reasons for recommending the amendment.

(1) The close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting shall be at least five days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting and received within five business days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote on the proposed amendment through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

b. The notice may be included in statements or newsletters, on the credit union website, or on signs posted in the credit union.

c. The notice may be sent electronically to those members who have opted to receive notices electronically.

12.4(6) Mailed ballots. If the board of directors has elected, upon a favorable vote of the majority, to conduct a vote on the proposed amendment in whole or in part via mailed ballot:

a. The secretary shall include the following materials for balloting with the notice of balloting:

(1) One ballot, clearly identified as the ballot, on which the proposed amendment is printed in full.
(2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.

(3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.

(4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.

b. If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions and notices for the electronic voting procedure.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.

d. If additional voting will be conducted at a meeting of members, the tallies shall be placed in the ballot boxes, and the ballot boxes shall be resealed to be taken to the meeting. If voting is not scheduled to occur at a meeting, the election committee shall tally the total votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.4(7) *Electronic voting.* If the board of directors, by majority vote, has elected to conduct the vote in whole or in part by electronic voting, then the secretary shall include with the notice of balloting specific instructions for electronic voting to each member eligible to vote.

a. The instruction sheet for electronic voting shall contain specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.

b. For those members who have opted to receive notices or statements electronically, the instructions required under this subrule may be communicated electronically.

c. The electronic voting shall be tallied by the election committee. If voting will also occur at a meeting, then the results shall be verified at the meeting.

d. If voting is not scheduled to occur at a meeting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.4(8) *Absentee ballots—subsequent in-person vote at meeting.* If the board of directors, by majority vote, has elected to conduct the vote only in person at a meeting of members, the board may also, by majority vote, utilize absentee ballots when, in the opinion of the board, it is in the best interest of the credit union and its membership.

a. The secretary shall include with the notice of balloting a statement that members may vote either in person at the meeting of members or by absentee ballot if the member submits a written or electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

b. The secretary shall mail the balloting materials specified in paragraph 12.4(6) “*a*” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the meeting.

d. At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any

previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.4(9) *In-person voting at meeting.* If the board of directors has elected, upon a favorable vote of the majority, to present the proposed amendment for a vote in whole or in part at a meeting of members, printed ballots shall be given at the meeting to those members who have not voted by another method.

a. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting.

b. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots.

c. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.4(10) *Preservation of ballots.* Ballots shall be preserved according to the requirements of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date of final approval or denial of the amendment by the superintendent.

12.4(11) *Submission to superintendent.* The board of directors shall submit the amendment to the superintendent for approval before the amendment becomes effective. The board shall submit the following documentation in support of its request for approval:

a. A certified copy of the board minutes which contain the recommendation to submit the amendment to a vote of the membership.

b. A certified copy of the notices provided to members.

c. A certified copy of any ballots provided to members.

d. A certified statement, including the vote count, that a majority of the eligible members voted in favor of the proposed amendment.

12.4(12) *Publication of results.* The board shall inform the membership of the results of the vote and whether the amendment received the approval of the superintendent, according to the provisions of 189—12.10(533). The 60-day posting period required by subrule 12.10(1) shall run from the date of final approval or denial of the amendment by the superintendent.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.5(533) Vote to modify, amend, or reverse an act of the board of directors or to instruct the board to take action.

12.5(1) *Vote of members at meeting.* The majority of members present at any meeting may vote to modify, amend, or reverse any act of the board of directors or instruct the board to take action not inconsistent with the articles of incorporation, the bylaws, or the Iowa credit union Act or administrative rules.

12.5(2) *Subsequent vote of membership.* In order to be binding upon the board of directors, any action taken by the membership to modify, amend, or reverse an act of the board, or to instruct the board to take action, requires an affirmative vote of a majority of all eligible members obtained by submitting the modification, amendment, reversal, or instruction to the members for a vote.

a. After a majority of members present at a meeting have voted to modify, amend, or reverse any act of the board of directors, or to instruct the board to take action not inconsistent with the articles, the bylaws, or the Iowa credit union Act or administrative rules, the board of directors shall meet to determine the method of voting for the membership vote and shall, within 60 days of the date of the meeting where the majority of members voted to modify, amend, or reverse an act of the board of directors, or to instruct the board to take action, submit the issue to all eligible voters of record as of the date of the meeting.

b. The board of directors shall, by majority vote, select the method of voting for the membership vote, in accordance with Iowa Code section 533.203. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. If the number of members who have opted to receive notices electronically is less than all members, the board may provide access to an electronic device in each credit union office for the members to vote electronically in order

to satisfy the access requirement. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at a meeting held for the purpose of voting, pursuant to the requirements of this rule.

c. If a simple majority of all eligible members vote in favor of the amendment, modification, reversal or instruction to take action, the vote of the members taken at the annual or special meeting shall be considered affirmed, and the board of directors shall take immediate action to comply with the directions of the membership. However, if a simple majority of all eligible members failed to vote in favor of the amendment, modification, reversal or instruction to take action, the vote of the members taken at the annual or special meeting is not affirmed, and the prior action of the board of directors shall be considered upheld.

12.5(3) Election committee. The board shall appoint an election committee of not fewer than five members, no more than two of whom may be from the board of directors.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. If the balloting includes a vote taken at a meeting of members, the chairperson of the election committee shall announce the results of the election at the meeting; otherwise, the chairperson shall certify the vote to the board within five days of the close of balloting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.203.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.5(4) Notice of balloting. The secretary shall set forth the proposed amendment, modification, reversal or instruction to take action in its entirety in a notice to all members eligible to vote at least 20 days but not more than 30 days prior to the closing date of balloting.

a. The notice shall set forth the rules and procedures for voting, the date of the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting, that balloting is subject to an affirmative vote of a majority of all members eligible to vote, and that no other vote on the subject shall be taken after the closing date of balloting except for votes cast in person during voting at a meeting held for the purpose of voting. The notice shall also contain a summary of the board's reasons for its action or inaction, as well as a summary of the reasons, if known, for the vote to amend, modify, or reverse the board action, or to instruct the board to take action.

(1) The close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting shall be at least five days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting and received within five business days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

b. The notice may be included in statements or newsletters, on the credit union website, or on signs posted in the credit union.

c. The notice may be sent electronically to those members who have opted to receive notices electronically.

12.5(5) Mailed ballots. If the board voted by majority vote to conduct the vote in whole or in part by mailed ballot:

a. The secretary shall include the following balloting materials with the notice of balloting:

(1) One ballot, clearly identified as the ballot, on which the proposed amendment, modification, or reversal, or instruction to the board to take action, is printed in full.

(2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.

(3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.

(4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.

b. If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions and notices for the electronic voting procedure.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.

d. If additional voting will be conducted at a meeting of members, the tallies shall be placed in the ballot boxes, and the ballot boxes shall be resealed to be taken to the meeting. If no other voting is scheduled to occur, the election committee shall tally the total votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.5(6) Electronic voting. If the board voted by majority vote to conduct the vote in whole or in part by electronic voting:

a. The secretary shall include with the notice of balloting specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.

b. For those members who have opted to receive notices or statements electronically, the instructions required under this subrule may be communicated electronically.

c. The electronic voting shall be tallied by the election committee prior to any meeting where voting is also scheduled to take place, and the committee shall take the tallies to the meeting. If no meeting is scheduled for voting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.5(7) Absentee ballots—subsequent in-person vote at meeting. If the board of directors, by majority vote, has elected to conduct the vote only in person at a meeting of members, the board may also, by majority vote, utilize absentee ballots when, in the opinion of the board, it is in the best interest of the credit union and its membership.

a. The secretary shall include with the notice of balloting a statement that members may vote either in person at the meeting of members or by absentee ballot if the member submits a written or

electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

b. The secretary shall mail the balloting materials specified in paragraph 12.5(5) “a” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the meeting.

d. At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.5(8) *In-person vote at meeting.* If the board voted by majority vote to conduct the vote in whole or in part at a meeting of members, then printed ballots on which the proposed amendment, modification, or reversal, or instruction to the board to take action, is printed in full shall be distributed to those in attendance at the meeting who have not voted by another method, and the ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After those members have been given an opportunity to vote at the meeting, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.5(9) *Preservation of ballots.* Ballots shall be preserved according to the requirements of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date the results are certified to the board by the election committee.

12.5(10) *Publication of results.* The board shall inform the membership of the results of the vote according to the provisions of 189—12.10(533). The 60-day posting period required by subrule 12.10(1) shall run from the date the results are certified to the board by the election committee.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.6(533) Vote on merger.

12.6(1) *Vote by board of directors.* A state credit union that seeks to merge with another credit union shall proceed pursuant to a plan agreed upon by a favorable vote of a majority of directors.

12.6(2) *Subsequent vote of the membership.* Following a vote by the board of directors to merge with another credit union, the board shall submit the merger to a vote of the membership of the merging credit union unless the superintendent finds that an emergency exists justifying the waiver of the membership vote.

a. The board of the continuing credit union shall, within three days of voting to merge, notify the superintendent of the merger vote.

b. After the superintendent has given preliminary approval to the merger, the board of the merging credit union shall submit the issue within 30 days to all eligible voters of record as of the date of the vote by the board of directors. The board of directors shall, by majority vote, select the method of voting for the membership vote, in accordance with Iowa Code section 533.203. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. If the number of members who have opted to receive notices electronically is less than all members, the board may provide access to an electronic device in each credit union office for the members to vote electronically in order to satisfy the access requirement. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at a meeting held for the purpose of voting, pursuant to the requirements of this rule.

c. The approval of the merger is not final until approved by the superintendent after the membership vote of the merging credit union.

12.6(3) Election committee. The board shall appoint an election committee of not fewer than five members, no more than two of whom may be from the board of directors.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. If the balloting includes a vote taken at a meeting of members, the chairperson of the election committee shall announce the results of the vote at the meeting; otherwise, the chairperson shall certify the vote to the board within five days of the close of balloting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.203.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.6(4) Notice of balloting. The secretary shall set forth the proposed merger in a notice to all members eligible to vote at least 20 days but not more than 30 days prior to the closing date of balloting.

a. The notice shall set forth the rules and procedures for voting, the date of the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting, that balloting is subject to an affirmative vote of a majority of all members eligible to vote, and that no other vote on the subject shall be taken after the closing date of balloting except for votes cast in person during voting at a meeting held for the purpose of voting. The notice shall also contain a summary of the board's reasons for voting to merge.

(1) The close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting shall be at least five days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting and received within five business days after the closing date of balloting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote on the proposed merger through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

b. The notice may be included in statements or newsletters, on the credit union website, or on signs posted in the credit union.

c. The notice may be sent electronically to those members who have opted to receive notices electronically.

12.6(5) Mailed ballots. If the board voted by majority vote to conduct the vote in whole or in part by mailed ballot:

a. The secretary shall include the following balloting materials with the notice of balloting:

(1) One ballot, clearly identified as the ballot.

(2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.

(3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.

(4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.

b. If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions and notices for the electronic voting procedure.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.

d. If additional voting will be conducted at a meeting of members, the tallies shall be placed in the ballot boxes, and the ballot boxes shall be resealed to be taken to the meeting. If no other voting is scheduled to occur, the election committee shall tally the total votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.6(6) Electronic voting. If the board voted by majority vote to conduct the vote in whole or in part by electronic voting:

a. The secretary shall include with the notice of balloting specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.

b. For those members who have opted to receive notices or statements electronically, the instructions required under this subrule may be communicated electronically.

c. The electronic voting shall be tallied by the election committee prior to any meeting where voting is also scheduled to take place, and the committee shall take the tallies to the meeting. If no meeting is scheduled for voting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.6(7) Absentee ballots—subsequent in-person vote at meeting. If the board of directors, by majority vote, has elected to conduct the vote only in person at a meeting of members, the board may also, by majority vote, utilize absentee ballots when, in the opinion of the board, it is in the best interest of the credit union and its membership.

a. The secretary shall include with the notice of balloting a statement that members may vote either in person at the meeting of members or by absentee ballot if the member submits a written or electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

b. The secretary shall mail the balloting materials specified in paragraph 12.6(5) “a” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the meeting.

d. At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After the members have been given an opportunity to vote, balloting

shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.6(8) *In-person vote at meeting.* If the board voted by majority vote to conduct the vote in whole or in part at a meeting of members, then printed ballots shall be distributed to those in attendance at the meeting who have not voted by another method, and the ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After those members have been given an opportunity to vote at the meeting, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.6(9) *Preservation of ballots.* Ballots shall be preserved according to the requirements of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date the results are certified to the board by the election committee.

12.6(10) *Submission to superintendent.* The board of directors shall submit the merger to the superintendent for approval before the merger becomes effective. The board shall submit the following documentation in support of its request for approval:

- a. A certified copy of the board minutes which contain the vote of the board of directors to approve the merger and to submit the merger to a vote of the membership.
- b. A certified copy of the notices provided to members.
- c. A certified copy of any ballots provided to members.
- d. A certified statement, including the vote count, that a majority of the eligible members voted in favor of the proposed merger.

12.6(11) *Publication of results.* The board shall inform the membership of the results of the vote according to the provisions of 189—12.10(533). The 60-day posting period required by subrule 12.10(1) shall run from the date the results are certified to the board by the election committee.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.7(533) Vote on voluntary dissolution.

12.7(1) *Vote of board of directors.* A state credit union that seeks to dissolve shall proceed pursuant to a plan agreed upon by a favorable vote of a majority of directors. Within three days of the vote and prior to sending notice of the membership vote, the board of directors shall notify the superintendent of the intention to dissolve.

12.7(2) *Subsequent vote of the membership.* Following a vote by the board of directors to dissolve, the board shall submit the dissolution to a vote of the membership.

- a. The board shall submit the issue to the membership within 30 days of voting to dissolve.
- b. The board shall submit the issue to all eligible voters of record as of the date of the vote by the board of directors.
- c. The board of directors shall, by majority vote, select the method of voting for the membership vote, in accordance with Iowa Code section 533.203. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. If the number of members who have opted to receive notices electronically is less than all members, the board may provide access to an electronic device in each credit union office for the members to vote electronically in order to satisfy the access requirement. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at a meeting held for the purpose of voting, pursuant to the requirements of this rule.
- d. The approval of the dissolution is not final until the superintendent issues a certificate of dissolution.

12.7(3) *Election committee.* The board shall appoint an election committee of not fewer than five members, no more than two of whom may be from the board of directors.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. If the balloting includes a vote taken at a meeting of members, the chairperson of the election committee shall announce the results of the election at the meeting; otherwise, the chairperson shall certify the vote to the board within five days of the close of balloting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.203.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.7(4) Notice of balloting. The secretary shall set forth the proposed dissolution in a notice to all members eligible to vote at least 20 days but not more than 30 days prior to the closing date of balloting.

a. The notice shall set forth the rules and procedures for voting, the date of the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting, that balloting is subject to an affirmative vote of a majority of all members eligible to vote, and that no other vote on the subject shall be taken after the closing date of balloting except for votes cast in person during voting at a meeting held for the purpose of voting. The notice shall also contain a summary of the board's reasons for voting for the voluntary dissolution.

(1) The close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting shall be at least five days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting and received within five business days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote on the proposed dissolution through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

b. The notice may be included in statements or newsletters, on the credit union website, or on signs posted in the credit union.

c. The notice may be sent electronically to those members who have opted to receive notices electronically.

12.7(5) Mailed ballots. If the board voted by majority vote to conduct the vote in whole or in part by mailed ballot:

a. The secretary shall include the following balloting materials with the notice of balloting:

(1) One ballot, clearly identified as the ballot.

(2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.

(3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.

(4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.

b. If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions and notices for the electronic voting procedure.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.

d. If additional voting will be conducted at a meeting of members, the tallies shall be placed in the ballot boxes, and the ballot boxes shall be resealed to be taken to the meeting. If no other voting is scheduled to occur, the election committee shall tally the total votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.7(6) *Electronic voting.* If the board voted by majority vote to conduct the vote in whole or in part by electronic voting:

a. The secretary shall include with the notice of balloting specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.

b. For those members who have opted to receive notices or statements electronically, the instructions required under this subrule may be communicated electronically.

c. The electronic voting shall be tallied by the election committee prior to any meeting where voting is also scheduled to take place, and the committee shall take the tallies to the meeting. If no meeting is scheduled for voting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.7(7) *Absentee ballots—subsequent in-person vote at meeting.* If the board of directors, by majority vote, has elected to conduct the vote only in person at a meeting of members, the board may also, by majority vote, utilize absentee ballots when, in the opinion of the board, it is in the best interest of the credit union and its membership.

a. The secretary shall include with the notice of balloting a statement that members may vote either in person at the meeting of members or by absentee ballot if the member submits a written or electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

b. The secretary shall mail the balloting materials specified in paragraph 12.7(5) “a” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the meeting.

d. At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.7(8) *In-person vote at meeting.* If the board voted by majority vote to conduct the vote in whole or in part at a meeting of members, then printed ballots shall be distributed to those in attendance at the meeting who have not voted by another method, and the ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee. After those members have been given an opportunity to vote at the meeting, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.7(9) *Preservation of ballots.* Ballots shall be preserved according to the requirements of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date the results are certified to the board by the election committee.

12.7(10) *Submission to superintendent.* The board of directors shall submit the dissolution to the superintendent for review before the dissolution becomes effective. The state credit union shall cease existence when the superintendent issues a certificate of dissolution. The board shall submit the following documentation:

- a. A certified copy of the board minutes which contain the vote of the board of directors to approve the plan and to submit the dissolution to a vote of the membership.
- b. A certified copy of the notices provided to members.
- c. A certified copy of any ballots provided to members.
- d. A certified statement, including the vote count, that a majority of the eligible members voted in favor of the proposed dissolution.
- e. Proof that is satisfactory to the superintendent that all assets have been liquidated from which there is a reasonable expectation of realization, that the liabilities of the state credit union have been discharged and distribution made to its members, and that the liquidation has been completed.

12.7(11) *Publication of results.* The board shall inform the membership of the results of the vote according to the provisions of 189—12.10(533). The 60-day posting period required by subrule 12.10(1) shall run from the date the results are certified to the board by the election committee.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.8(533) Vote to remove or reinstate an officer, director, or member of the auditing committee.

12.8(1) *Auditing committee vote.* If the auditing committee deems the action to be necessary to the proper conduct of the state credit union, the auditing committee may suspend, by majority vote, any officer, director, or member of the auditing committee.

12.8(2) *Subsequent vote of membership.* Following a vote by the auditing committee to suspend an officer, director, or member of the auditing committee, the suspension shall be put to a vote of the membership.

a. The members may vote to sustain the suspension and remove the officer, director, or auditing committee member permanently or may vote to reinstate the officer, director, or auditing committee member.

b. The board of directors shall meet to determine the method of voting for the membership vote and shall, within 30 days of the date of the auditing committee's vote, submit the issue to all eligible voters of record as of the date of the auditing committee's meeting. The board of directors shall, by majority vote, select the method of voting for the membership vote, in accordance with Iowa Code section 533.203. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. If the number of members who have opted to receive notices electronically is less than all members, the board may provide access to an electronic device in each credit union office for the members to vote electronically in order to satisfy the access requirement. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at a meeting held for the purpose of voting, pursuant to the requirements of this rule.

12.8(3) Election committee. The board shall appoint an election committee of not fewer than five members, no more than two of whom may be from the board of directors and none of whom may be from the auditing committee.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. If the balloting includes a vote taken at a meeting of members, the chairperson of the election committee shall announce the results of the election at the meeting; otherwise, the chairperson shall certify the vote to the board within five days of the close of balloting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.203.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.8(4) Notice of balloting. The secretary shall set forth the suspension and proposed removal in a notice to all members eligible to vote at least 20 days but not more than 30 days prior to the closing date of balloting.

a. The notice shall set forth the rules and procedures for voting, the date of the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting, that balloting is subject to an affirmative vote of a majority of all members eligible to vote, and that no other vote on the subject shall be taken after the closing date of balloting except for votes cast in person during voting at a meeting held for the purpose of voting. The notice shall also contain a summary of the auditing committee's reasons for voting to suspend the officer, director, or member of the auditing committee, as well as a summary of the reasons, if known, that the officer, director, or member of the auditing committee believes that the officer, director, or member should be reinstated.

(1) The close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting shall be at least five days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting and received within five business days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote on the proposed removal through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

b. The notice may be included in statements or newsletters, on the credit union website, or on signs posted in the credit union.

c. The notice may be sent electronically to those members who have opted to receive notices electronically.

12.8(5) Mailed ballots. If the board voted by majority vote to conduct the vote in whole or in part by mailed ballot:

a. The secretary shall include the following balloting materials with the notice of balloting:

(1) One ballot, clearly identified as the ballot.

(2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.

(3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.

(4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.

b. If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions and notices for the electronic voting procedure.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.

d. If additional voting will be conducted at a meeting of members, the tallies shall be placed in the ballot boxes, and the ballot boxes shall be resealed to be taken to the meeting. If no other voting is scheduled to occur, the election committee shall tally the total votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.8(6) Electronic voting. If the board voted by majority vote to conduct the vote in whole or in part by electronic voting:

a. The secretary shall include with the notice of balloting specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.

b. For those members who have opted to receive notices or statements electronically, the instructions required under this subrule may be communicated electronically.

c. The electronic voting shall be tallied by the election committee prior to any meeting where voting is also scheduled to take place, and the committee shall take the tallies to the meeting. If no meeting is scheduled for voting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.8(7) Absentee ballots—subsequent in-person vote at meeting. If the board of directors, by majority vote, has elected to conduct the vote only in person at a meeting of members, the board may also, by majority vote, utilize absentee ballots when, in the opinion of the board, it is in the best interest of the credit union and its membership.

a. The secretary shall include with the notice of balloting a statement that members may vote either in person at the meeting of members or by absentee ballot if the member submits a written or electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

b. The secretary shall mail the balloting materials specified in paragraph 12.8(5) “a” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the meeting.

d. At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.8(8) *In-person vote at meeting.* If the board voted by majority vote to conduct the vote in whole or in part at a meeting of members, then printed ballots shall be distributed to those in attendance at the meeting who have not voted by another method, and the ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee. After those members have been given an opportunity to vote at the meeting, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.8(9) *Preservation of ballots.* Ballots shall be preserved according to the requirements of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date the results are certified to the board by the election committee.

12.8(10) *Publication of results.* The board shall inform the membership of the results of the vote according to the provisions of 189—12.10(533). The 60-day posting period required by subrule 12.10(1) shall run from the date the results are certified to the board by the election committee.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.9(533) Preservation of ballots.

12.9(1) Immediately upon certification of the results of the vote by the election committee, any written ballots shall be sealed and appropriately labeled. Electronic vote results shall be saved electronically.

12.9(2) All ballots and voting results shall be retained by the credit union for at least 60 days, and until any disputes are resolved.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.10(533) Reporting the results of the vote to the membership.

12.10(1) *Posting of results.* Except as otherwise provided for a membership vote, the board shall inform the membership of the results of the vote by conspicuously posting notice in each credit union office for a period of 60 days.

12.10(2) *Publication of results.* Except as otherwise provided for a membership vote, in addition to posting the results in each credit union office, the board shall also communicate the results to the membership by at least one of the following methods:

- a. Include the results in the next mailing of the member's statement of account.
- b. Include the results in the credit union newsletter.
- c. Include the results in the sponsor's newsletter.
- d. Post a notice on the credit union's website.
- e. Place a notice in a newspaper of general circulation within the geographic area of operation of the credit union.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.11(533) Vote on sale of assets by corporate central credit union.

12.11(1) *Board of directors' vote.* A corporate central credit union that seeks to sell all of its assets to another corporate credit union shall proceed pursuant to a plan agreed upon by a favorable vote of a majority of directors. The board shall notify the superintendent within three days.

12.11(2) *Subsequent vote of the membership.* Following a vote by the board of directors to approve a plan to sell all of the corporate central credit union's assets to another corporate credit union, the board shall submit the plan to a vote of the membership.

a. The board shall submit the issue within 30 days of voting to approve the plan to all eligible voters of record as of the date of the vote by the board of directors.

b. The board of directors shall, by majority vote, select the method of voting for the membership vote, in accordance with Iowa Code section 533.203. Each credit union member shall have a meaningful opportunity to vote in a membership vote. The board of directors shall vote to conduct the vote in whole by electronic voting only if all members have access to an electronic voting device. Otherwise, the board shall also conduct the vote in part by mail-in ballot or in person at a meeting held for the purpose of voting, pursuant to the requirements of this rule.

c. The approval of the sale is not final until approved by the superintendent after the membership vote.

12.11(3) *Election committee.* The board shall appoint an election committee of not fewer than five members, no more than two of whom may be from the board of directors.

a. It is the duty of the election committee to oversee balloting, to tabulate votes, and to ensure that each member shall only be allowed to vote once and that multiple ballots submitted by the same member are disqualified.

b. The election committee shall elect a chairperson from among the committee members. If the balloting includes a vote taken at a meeting of members, the chairperson of the election committee shall announce the results of the election at the meeting; otherwise, the chairperson shall certify the vote to the board within five days of the close of balloting.

c. No member or agent of the election committee shall reveal the manner in which any member voted.

d. If the board of directors, by majority vote, has elected to utilize electronic voting, the election committee shall test the integrity of the electronic voting system at regular intervals during the election period. In the event of a malfunction of the electronic voting system, the board may in its discretion order the election to be held in another form, consistent with Iowa Code section 533.203.

e. For electronic ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as registered in the electronic voting system.

f. For mail-in ballots, including absentee ballots, it is the duty of the election committee to verify, or cause to be verified, the name and credit union account number of the voter as they appear on the identification form, to place the verified identification form and the sealed ballot envelope in a place of safekeeping pending the count of the vote, and, in the case of a questionable or challenged identification form, to retain the identification form and sealed ballot envelope together until the verification or challenge has been resolved.

12.11(4) *Notice of balloting.* The secretary shall set forth the proposed sale in a notice to all members eligible to vote at least 20 days but not more than 30 days prior to the closing date of balloting.

a. The notice shall set forth the rules and procedures for voting, the date of the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting, that balloting is subject to an affirmative vote of a majority of all members eligible to vote, and that no other vote on the subject shall be taken after the closing date of balloting except for votes cast in person during voting at a meeting held for the purpose of voting. The notice shall also contain a summary of the board's reasons for selling the assets.

(1) The close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting shall be at least five days prior to any meeting where voting will occur.

(2) Electronic ballots shall be submitted no later than midnight on the date balloting closes for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(3) Ballots mailed to the credit union shall be postmarked no later than the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting and received within five business days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(4) Ballots hand-delivered to the credit union shall be received prior to the close of normal credit union business hours on the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting in order to be considered valid.

(5) If more than one method of voting will be used, the notice shall also communicate that members have the right to vote on the proposed sale through any of the methods of voting designated by the board, but that members will only be allowed to vote once.

b. The notice may be included in statements or newsletters or on the credit union website.

c. The notice may be sent electronically to those members who have opted to receive notices electronically.

12.11(5) Mailed ballots. If the board voted by majority vote to conduct the vote in whole or in part by mailed ballot:

a. The secretary shall include the following balloting materials with the notice of balloting:

(1) One ballot, clearly identified as the ballot.

(2) One ballot envelope clearly marked “ballot” with instructions that the completed ballot shall be placed in that envelope and sealed.

(3) One identification form to be completed so as to include the name, address, signature, and credit union account number of the voter.

(4) One mailing envelope in which the voter, following instructions provided, shall insert the sealed “ballot” envelope and the identification form. The mailing envelope shall be preaddressed for return to the election committee.

b. If the credit union will also be conducting electronic voting, the mail-in ballot is not required for members who have opted to receive notices or statements electronically, and electronic mail may be used to provide the instructions and notices for the electronic voting procedure.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and placed in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee.

d. If additional voting will be conducted at a meeting of members, the tallies shall be placed in the ballot boxes, and the ballot boxes shall be resealed to be taken to the meeting. If no other voting is scheduled to occur, the election committee shall tally the total votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.11(6) Electronic voting. If the board voted by majority vote to conduct the vote in whole or in part by electronic voting:

a. The secretary shall include with the notice of balloting specific instructions for electronic voting, including how to access and use the electronic voting system, and the period of time in which votes will be taken.

b. For those members who have opted to receive notices or statements electronically, the instructions required under this subrule may be communicated electronically.

c. The electronic voting shall be tallied by the election committee prior to any meeting where voting is also scheduled to take place, and the committee shall take the tallies to the meeting. If no meeting is scheduled for voting, the election committee shall tally the votes and certify the vote count to the board no later than five days after the closing date of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

12.11(7) Absentee ballots—subsequent in-person vote at meeting. If the board of directors, by majority vote, has elected to conduct the vote only in person at a meeting of members, the board may also, by majority vote, utilize absentee ballots when, in the opinion of the board, it is in the best interest of the credit union and its membership.

a. The secretary shall include with the notice of balloting a statement that members may vote either in person at the meeting of members or by absentee ballot if the member submits a written or electronic request for an absentee ballot and returns the ballot prior to the close of balloting for ballots submitted other than in person during voting at a meeting held for the purpose of voting.

b. The secretary shall mail the balloting materials specified in paragraph 12.11(5)“a” to each member who is eligible to vote and who has submitted a written or electronic request for an absentee ballot.

c. Ballots mailed to the election committee or hand-delivered to the credit union shall be received unopened and deposited in ballot boxes. The ballot boxes shall be opened by and the vote tallied by the election committee, the tallies placed in the ballot boxes, and the ballot boxes resealed to be taken to the meeting.

d. At the meeting of members, printed ballots shall be given to those members who have not voted. The completed ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee before the meeting. After the members have been given an opportunity to vote, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of absentee ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.11(8) *In-person vote at meeting.* If the board voted by majority vote to conduct the vote in whole or in part at a meeting of members, then printed ballots shall be distributed to those in attendance at the meeting who have not voted by another method, and the ballots shall be deposited in ballot boxes placed in conspicuous locations by the election committee. After those members have been given an opportunity to vote at the meeting, balloting shall be closed, the ballot boxes opened and the vote tallied by the election committee and added to any previous count of mailed or electronic ballots. The election committee shall immediately certify the vote count to the board. The chairperson of the election committee shall announce the result of the vote at the meeting.

12.11(9) *Preservation of ballots.* Ballots shall be preserved according to the requirements of 189—12.9(533). The 60-day retention period required by subrule 12.9(2) shall run from the date the results are certified to the board by the election committee.

12.11(10) *Submission to superintendent.* The board of directors shall submit the plan to the superintendent for approval before the plan to sell all of the assets of the corporate central credit union becomes effective. The board shall submit the following documentation in support of its request for approval:

a. A certified copy of the board minutes which contain the vote of the board of directors to approve the plan and to submit the sale to a vote of the membership.

b. A certified copy of the notices provided to members.

c. A certified copy of any ballots provided to members.

d. A certified statement, including the vote count, that a majority of the eligible members voted in favor of the proposed sale.

12.11(11) *Publication of results.* The board shall inform the membership of the results of the vote within ten days of certification of the results of the vote by the election committee. The board shall communicate the results to the membership by at least two of the following methods:

a. By mail.

b. By email.

c. By posting a notice on the corporate central credit union’s website.

[ARC 0938C, IAB 8/7/13, effective 9/15/13]

189—12.12(533) *Vote on conversion of an Iowa-chartered credit union to another charter type.* An Iowa-chartered credit union that seeks to convert to another charter type shall comply with the conversion procedures, including a vote of the membership, as provided in 189—Chapter 3.

These rules are intended to implement Iowa Code sections 533.201, 533.203, 533.203A, 533.204, 533.208, 533.213, 533.401, 533.403, and 533.405.

CHAPTER 17
INVESTMENT AND DEPOSIT ACTIVITIES FOR CREDIT UNIONS

189—17.1(533) Authority and purpose.

17.1(1) These rules implement the authority of credit unions organized in accordance with Iowa Code chapter 533 to engage in investment and deposit activities which would be permitted if the credit union were federally chartered in accordance with Iowa Code sections 533.301(5) “j” and 533.301(25), and are promulgated under the authority of Iowa Code section 533.104.

17.1(2) These rules identify certain investments and deposit activities permissible under the Federal Credit Union Act, 12 U.S.C. Section 1757, and National Credit Union Administration (NCUA) rules and regulations, 12 CFR Part 703, and prescribe the rules governing those investments and deposit activities on the basis of safety and soundness concerns. Additionally, these rules identify and prohibit certain investments and deposit activities, which may or may not be permitted for federal credit unions and which are considered inconsistent with state law or unsafe or unsound investment for Iowa state-chartered credit unions. Finally, these rules address investment authority granted to Iowa state-chartered credit unions in Iowa Code chapter 533, which may or may not be permitted for federal credit unions.

17.1(3) Exceptions. These rules do not apply to:

- a. Investment in loans to members and other activities pursuant to Iowa Code sections 533.301(2), 533.301(3), 533.301(15) and 533.301(16);
- b. Investment in real estate-secured loans to members pursuant to Iowa Code section 533.315(4);
- c. Investment in credit union service organizations pursuant to Iowa Code section 533.301(5) “f”;
- d. Investment in fixed assets pursuant to Iowa Code section 533.301(10).

189—17.2(533) Definitions. The definition of terms included in Iowa Code section 17A.2 and 189—1.1(533) applies to such terms used in this chapter unless otherwise provided in this rule. In addition, the following definitions apply as used in these rules:

“Adjusted trading” means selling an investment to a counterparty at a price above its current fair value and simultaneously purchasing or committing to purchase from the counterparty another investment at a price above its current fair value.

“Associated personnel” means a person engaged in the investment banking or securities business who is directly or indirectly controlled by a National Association of Securities Dealers (NASD) member, whether or not the person is registered or exempt from registration with NASD. “Associated personnel” includes every sole proprietor, partner, officer, director, or branch manager of any NASD member.

“Banker’s acceptance” means a time draft that is drawn on and accepted by a bank and that represents an irrevocable obligation of the bank.

“Bank note” means a direct, unconditional, and unsecured general obligation of a bank that ranks equally with all other senior unsecured indebtedness of the bank, except deposit liabilities and other obligations that are subject to any priorities or preferences.

“Borrowing repurchase transaction” means a transaction in which the credit union agrees to sell a security to a counterparty and to repurchase the same or an identical security from that counterparty at a specified future date and at a specified price.

“Call” means an option that gives the holder the right to buy a specified quantity of a security at a specified price during a fixed time period.

“Collateralized mortgage obligation” means a multiclass mortgage-related security.

“Collective investment fund” means a fund maintained by a national bank under Comptroller of the Currency regulations, 12 CFR Part 9.

“Commercial mortgage-related security” means a mortgage-related security, as defined in this rule, except that it is collateralized entirely by commercial real estate, such as a warehouse or office building, or a multifamily dwelling consisting of more than four units.

“Commercial paper” means a debt obligation of a United States-chartered corporation with a maturity date of 270 days or less, which may be interest-bearing or discount-purchased.

“*Corporate bonds*” means a debt obligation of a United States-chartered corporation with a maturity date greater than 270 days, which may be interest-bearing or discount-purchased.

“*Counterparty*” means the party on the other side of the transaction.

“*Custodial agreement*” means a contract in which one party agrees to hold securities in safekeeping for others.

“*Delivery versus payment*” means payment for an investment must occur simultaneously with its delivery.

“*Deposit note*” means an obligation of a bank that is similar to a certificate of deposit but is rated.

“*Derivatives*” means any derivative instrument, as defined under generally accepted accounting principles (GAAP).

“*Embedded option*” means a characteristic of an investment that gives the issuer or holder the right to alter the level and timing of the cash flows of the investment. Embedded options include call and put provisions and interest rate caps and floors. Since a prepayment option in a mortgage is a type of call provision, a mortgage-backed security composed of mortgages that may be prepaid is an example of an investment with an embedded option.

“*Eurodollar deposit*” means a U.S. dollar-denominated deposit in a foreign branch of a United States depository institution.

“*European financial options contract*” means an option that can be exercised only on its expiration date.

“*Exchangeable collateralized mortgage obligation*” means a class of a collateralized mortgage obligation (CMO) that, at the time of purchase, represents beneficial ownership interests in a combination of two or more underlying classes of the same CMO structure. The holder of an exchangeable CMO may pay a fee and take delivery of the underlying classes of the CMO.

“*Fair value*” means the amount at which an instrument could be exchanged in a current, arm’s-length transaction between willing parties, as opposed to a forced or liquidation sale.

“*Financial options contract*” means an agreement to make or take delivery of a standardized financial instrument upon demand by the holder of the contract as specified in the agreement.

“*Immediate family member*” means a spouse or other family member living in the same household.

“*Industry-recognized information provider*” means an organization that obtains compensation by providing information to investors and receives no compensation for the purchase or sale of investments.

“*Investment*” means any security, obligation, account, deposit, or other item authorized for purchase by a federal credit union under the Federal Credit Union Act, 12 U.S.C. Section 1757(7), 1757(8), or 1757(15), or NCUA rules and regulations, 12 CFR Part 703, other than loans to members and the exceptions specified in 189—subrule 17.1(3).

“*Investment grade*” means the issuer of a security has an adequate capacity to meet the financial commitments under the security for the projected life of the asset or exposure, even under adverse economic conditions. An issuer has an adequate capacity to meet financial commitments if the risk of default by the obligor is low and the full and timely repayment of principal and interest on the security is expected. A credit union may consider any or all of the following factors, to the extent appropriate, with respect to the credit risk of a security: credit spreads; securities-related research; internal or external credit risk assessments; default statistics; inclusion on an index; priorities and enhancements; price, yield, and/or volume; and asset class-specific factors. This list of factors is not meant to be exhaustive or mutually exclusive.

“*Investment portfolio*” means the amount invested by a credit union pursuant to Iowa Code sections 533.301(5), 533.301(25), 533.304 and 533.305, excluding any investment in nonearning assets such as real estate, premises and equipment, the capitalization deposit in the National Credit Union Share Insurance Fund (NCUSIF), and any other investment which does not generate a regular dividend or interest or receive or accrue added value.

“*Investment repurchase transaction*” means a transaction in which an investor agrees to purchase a security from a counterparty and to resell the same or an identical security to that counterparty at a specified future date and at a specified price.

“*Maturity*” means the date the last principal amount of a security is scheduled to come due and does not mean the call date or the weighted average life of a security.

“*Mortgage-related security*” means a security as defined in Section 3(a)(41) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(41)).

“*Mortgage servicing rights*” means a contractual obligation to perform mortgage servicing and the right to receive compensation for performing those services. Mortgage servicing is the administration of a mortgage loan, including collecting monthly payments and fees, providing record-keeping and escrow functions, and, if necessary, curing defaults and foreclosing.

“*Negotiable instrument*” means an instrument that may be freely transferred from the purchaser to another person or entity by delivery, or endorsement and delivery, with full legal title becoming vested in the transferee.

“*Net worth*” means the retained earnings balance of the credit union at quarter end as determined under generally accepted accounting principles and as further defined in NCUA rules and regulations, 12 CFR Part 702.2(f).

“*Official*” means any member of a credit union’s board of directors, credit committee, auditing/supervisory committee, or investment-related committee.

“*Ordinary care*” means the degree of care that an ordinarily prudent and competent person engaged in the same line of business or endeavor should exercise under similar circumstances.

“*Pair-off transaction*” means an investment purchase transaction that is closed or sold on or before the settlement date. In a pair-off transaction, an investor commits to purchase an investment, but then pairs off the purchase with a sale of the same investment on or before the settlement date.

“*Put*” means an option that gives the holder the right to sell a specified quantity of a security at a specified price during a fixed time period.

“*Registered investment company*” means an investment company that is registered with the Securities and Exchange Commission under the Investment Company Act of 1940 (15 U.S.C. 80a). Examples of registered investment companies are mutual funds and unit investment trusts.

“*Regular way settlement*” means delivery of a security from a seller to a buyer within the time frame that the securities industry has established for immediate delivery of that type of security. For example, regular way settlement of a Treasury security includes settlement on the trade date (cash), the business day following the trade date (regular way), and the second business day following the trade date (skip day).

“*Residual interest*” means the remainder cash flows from collateralized mortgage obligations/real estate mortgage investment conduits (CMOs/REMICs), or other mortgage-backed security transaction, after payments due bondholders and trust administrative expenses have been satisfied.

“*Securities lending*” means lending a security to a counterparty, either directly or through an agent, and accepting collateral in return.

“*Security*” means a share, participation, or other interest in property or in an enterprise of the issuer or an obligation of the issuer that:

1. Either is represented by an instrument issued in bearer or registered form or, if not represented by an instrument, is registered in books maintained to record transfers by or on behalf of the issuer;
2. Is of a type commonly dealt in on securities exchanges or markets or, when represented by an instrument, is commonly recognized in any area in which it is issued or dealt in as a medium for investment; and
3. Either is one of a class or series or by its terms is divisible into a class or series of shares, participations, interests, or obligations.

“*Senior management employee*” means a credit union’s chief executive officer (typically this individual holds the title of president or manager), an assistant chief executive officer, and the chief financial officer.

“*Small business-related security*” means a security as defined in Section 3(a)(53) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(53)). This definition does not include Small Business Administration securities permissible under the Federal Credit Union Act, 12 U.S.C. Section 1757(7).

“*Superintendent*” means the superintendent of credit unions appointed by the governor to direct and regulate credit unions pursuant to Iowa Code chapter 533.

“*Weighted average life*” means the weighted average time to the return of a dollar of principal, calculated by multiplying each portion of principal received by the time at which it is expected to be received (based on a reasonable and supportable estimate of that time) and then summing and dividing by the total amount of principal.

“*When-issued trading of securities*” means the buying and selling of securities in the period between the announcement of an offering and the issuance and payment date of the securities.

“*Yankee dollar deposit*” means a deposit in a United States branch of a foreign bank licensed to do business in the state in which it is located, or a deposit in a state-chartered, foreign-controlled bank.

“*Zero coupon investment*” means an investment that makes no periodic interest payments but instead is sold at a discount from its face value. The holder of a zero coupon investment realizes the rate of return through the gradual appreciation of the investment, which is redeemed at face value on a specified maturity date.

[ARC 1678C, IAB 10/15/14, effective 11/19/14]

189—17.3(533) Investment policies. A state-chartered credit union’s board of directors must establish written investment policies consistent with Iowa Code chapter 533, the Federal Credit Union Act, these rules, and other applicable laws and regulations and must review the policies at least annually. These policies may be part of a broader, asset-liability management policy. Written investment policies must address, at a minimum, the following:

17.3(1) The purposes and objectives of the credit union’s investment activities;

17.3(2) The characteristics of the investments the credit union may make, including the issuer, maturity, index, cap, floor, coupon rate, coupon formula, call provision, average life, and interest rate risk;

17.3(3) How the credit union will manage interest rate risk;

17.3(4) How the credit union will manage liquidity risk;

17.3(5) How the credit union will manage credit risk including specifically listing institutions, issuers, and counterparties that may be used, or criteria for the credit union’s selection, and limits on the amounts that may be invested with each;

17.3(6) How the credit union will manage concentration risk, which can result from dealing with a single issuer or related issuers, lack of geographic distribution, holding obligations with similar characteristics like maturities and indexes, holding bonds having the same trustee, and holding securitized loans having the same originator, packager, or guarantor;

17.3(7) Who has investment authority and the extent of that authority. Those with authority must be qualified by education or experience to assess the risk characteristics of investments and investment transactions. Only officials or employees of the credit union may be voting members of an investment-related committee;

17.3(8) The name of the broker-dealer(s) the credit union may use;

17.3(9) The name of the safekeeper(s) the credit union may use;

17.3(10) How the credit union will handle an investment that, after purchase, is outside of board policy or fails a requirement of these rules; and

17.3(11) How the credit union will conduct investment trading activities, if applicable, including addressing:

- a. Who has purchase and sale authority;
- b. Limits on trading account size;
- c. Allocation of cash flow to trading accounts;
- d. Stop loss or sale provisions;
- e. Dollar size limitations of specific types, quantity and maturity to be purchased;
- f. Limits on the length of time an investment may be inventoried in a trading account; and
- g. Internal controls, including segregation of duties.

189—17.4(533) Record keeping and documentation requirements.

17.4(1) All state-chartered credit unions must comply with generally accepted accounting principles (GAAP) applicable to reports or statements required to be filed with the superintendent. This contrasts with only federal credit unions with assets of \$10 million or greater that must comply with GAAP in reports and statements filed with the NCUA.

17.4(2) A credit union must maintain documentation for each investment transaction for as long as it holds the investment and until the documentation has been audited in accordance with Iowa Code section 533.208 or NCUA rules and regulations, 12 CFR Part 701.12, or both, and examined by the superintendent or the NCUA, or both. The documentation should include, where applicable, bids and prices at purchase and sale and for periodic updates, relevant disclosure documents or a description of the security from an industry-recognized information provider, financial data, and tests and reports required by the credit union's investment policy and these rules.

17.4(3) A credit union must maintain documentation that its board of directors used to approve a broker-dealer or a safekeeper for as long as the broker-dealer or safekeeper is approved and until the documentation has been audited in accordance with Iowa Code section 533.208 or NCUA rules and regulations, 12 CFR Part 701.12, or both, and examined by the superintendent or the NCUA, or both.

17.4(4) A credit union must obtain an individual confirmation statement from each broker-dealer for each investment purchased or sold.

189—17.5(533) Discretionary control over investments and investment advisers.

17.5(1) Except as provided in 17.5(2), 17.5(3) and 17.5(4), a credit union must retain discretionary control over its purchase and sale of investments. A credit union has not delegated discretionary control to an investment adviser when the credit union reviews all recommendations from investment advisers and is required to authorize a recommended purchase or sale transaction before its execution.

17.5(2) A credit union may delegate discretionary control over the purchase and sale of investments to a person other than a credit union official or employee:

a. Provided the person is an investment adviser registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940 (15 U.S.C. 80b); and

b. Provided the amount of investment authority does not exceed 100 percent of the credit union's net worth, in the aggregate, at the time of delegation.

17.5(3) At least annually, the credit union must adjust the amount of funds held under discretionary control to comply with the 100 percent of net worth cap. The credit union's board of directors must receive notice as soon as possible, but no later than the next regularly scheduled monthly board meeting, of the amount exceeding the net worth cap and notify in writing the superintendent within five days after the board meeting. The credit union must develop a plan to comply with the cap within a reasonable period of time.

17.5(4) Before transacting business with an investment adviser, a credit union must analyze the investment adviser's background and information available from state or federal securities regulators, including any enforcement actions against the adviser, associated personnel, or the firm for which the adviser works.

17.5(5) A credit union may not compensate an investment adviser with discretionary control over the purchase and sale of investments on a per-transaction basis or based on capital gains, capital appreciation, net income, performance relative to an index, or any other incentive basis.

17.5(6) A credit union must obtain a report from its investment adviser at least monthly that details the investments under the adviser's control and the investments' performance.

[ARC 1678C, IAB 10/15/14, effective 11/19/14]

189—17.6(533) Credit analysis. A credit union must conduct and document a credit analysis on an investment and the issuing entity before purchasing it, except for investments issued or fully guaranteed as to principal and interest by the U.S. government or its agencies, enterprises, or corporations or fully insured (including accumulated interest) by the National Credit Union Administration or the Federal

Deposit Insurance Corporation. A credit union must update this analysis at least annually for as long as it holds the investment.

189—17.7(533) Notice of noncompliant investments. A credit union's board of directors must receive notice, no later than the next regularly scheduled monthly board meeting, of any investment that either is outside of board policy after purchase or has failed a requirement of these rules. The board of directors must document its action regarding the investment in the minutes of the board meeting, including a detailed explanation of any decision not to sell the investment. The credit union must notify the superintendent in writing of an investment that has failed a requirement of these rules within five days after the board meeting.

189—17.8(533) Broker-dealers.

17.8(1) A credit union may purchase and sell investments through a broker-dealer as long as the broker-dealer is registered as a broker-dealer with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 78a, et seq.) or is a depository institution whose broker-dealer activities are regulated by a federal or state regulatory agency.

17.8(2) Before purchasing an investment through a broker-dealer, a credit union must analyze and annually update the following:

- a.* The background of any sales representative with whom the credit union is doing business;
- b.* Information available from state or federal securities regulators and securities industry self-regulatory organizations, such as the National Association of Securities Dealers and the North American Securities Administrators Association, about any enforcement actions against the broker-dealer, its affiliates, or associated personnel; and
- c.* If the broker-dealer is acting as the credit union's counterparty, the ability of the broker-dealer and its subsidiaries or affiliates to fulfill commitments, as evidenced by capital strength, liquidity, and operating results. The credit union should consider current financial data, annual reports, external assessments of creditworthiness, relevant disclosure documents, and other sources of financial information.

17.8(3) The requirements of 17.8(1) do not apply when the credit union purchases a certificate of deposit or share certificate directly from a bank, credit union, or other depository institution.
[ARC 1678C, IAB 10/15/14, effective 11/19/14]

189—17.9(533) Safekeeping of investments.

17.9(1) A credit union's purchased investments and repurchase collateral must be in the credit union's possession, recorded as owned by the credit union through the Federal Reserve Book Entry System, or held by a board of directors-approved safekeeper under a written custodial agreement that requires the safekeeper to exercise, at least, ordinary care.

17.9(2) Any safekeeper used by a credit union must be regulated and supervised by either the Securities and Exchange Commission, a federal or state depository institution regulatory agency, or a state trust company regulatory agency.

17.9(3) A credit union must obtain and reconcile monthly a statement of purchased investments and repurchase collateral held in safekeeping.

17.9(4) Annually, the credit union must analyze the ability of the safekeeper to fulfill the safekeeper's custodial responsibilities, as evidenced by capital strength, liquidity, and operating results. The credit union should consider current financial data, annual reports, external assessments of creditworthiness, relevant disclosure documents, and other sources of financial information.

[ARC 1678C, IAB 10/15/14, effective 11/19/14]

189—17.10(533) Monitoring nonsecurity investments.

17.10(1) At least quarterly, a credit union must prepare a written report listing all of its shares and deposits in banks, credit unions, and other depository institutions, that have one or more of the following features:

- a.* Embedded options;

- b. Remaining maturities greater than three years; or
- c. Coupon formulas that are related to more than one index or are inversely related to, or are multiples of, an index.

17.10(2) The requirement of 17.10(1) does not apply to shares and deposits that are securities.

17.10(3) If a credit union does not have an investment-related committee, then each member of its board of directors must receive a copy of the report described in 17.10(1). If a credit union has an investment-related committee, then each member of the committee must receive a copy of the report, and each board member must receive a summary of the information in the report.

189—17.11(533) Valuing securities.

17.11(1) Before purchasing or selling a security, a credit union must obtain either price quotations on the security from at least two broker-dealers or a price quotation on the security from an industry-recognized information provider. This requirement to obtain price quotations does not apply to new issues purchased at par or at original issue discount.

17.11(2) At least monthly, a credit union must determine the fair value of each security it holds. It may determine fair value by obtaining a price quotation on the security from an industry-recognized information provider, a broker-dealer, or a safekeeper.

17.11(3) At least annually, the credit union's auditing/supervisory committee or its external auditor must independently assess the reliability of monthly price quotations received from a broker-dealer or safekeeper. The credit union's auditing/supervisory committee or external auditor must follow generally accepted auditing standards, which require either recomputation or reference to market quotations.

17.11(4) If a credit union is unable to obtain a price quotation required by this rule for a particular security, then it may obtain a quotation for a security with substantially similar characteristics.

189—17.12(533) Monitoring securities.

17.12(1) At least monthly, a credit union must prepare a written report setting forth, for each security held, the fair value and dollar change since the prior month end, with summary information for the entire portfolio.

17.12(2) At least quarterly, a credit union must prepare a written report setting forth the sum of the fair values of all fixed and variable rate securities held that have one or more of the following features:

- a. Embedded options;
- b. Remaining maturities greater than three years; or
- c. Coupon formulas that are related to more than one index or are inversely related to, or are multiples of, an index.

17.12(3) When the amount calculated in 17.12(2) is greater than a credit union's net worth, the report described in that subrule must provide a reasonable and supportable estimate of the potential impact, in percentage and dollar terms, of an immediate and sustained parallel shift in market interest rates of plus and minus 300 basis points on:

- a. The fair value of each security in the credit union's portfolio;
- b. The fair value of the credit union's portfolio as a whole; and
- c. The credit union's net worth.

17.12(4) If the credit union does not have an investment-related committee, then each member of its board of directors must receive a copy of the reports described in 17.12(1) through 17.12(3). If the credit union has an investment-related committee, then each member of the committee must receive copies of the reports, and each member of the board of directors must receive a summary of the information in the reports.

189—17.13(533) Permissible investment activities.

17.13(1) *Regular way settlement and delivery versus payment basis.* A credit union may only contract for the purchase or sale of a security as long as the delivery of the security is by regular way settlement and the transaction is accomplished on a delivery versus payment basis.

17.13(2) Federal funds. A credit union may sell federal funds to a national bank; or to a state bank, trust company or mutual savings bank operating in accordance with Iowa law or the laws of any state where it operates a credit union office; or in banks and institutions, the accounts of which are insured by the Federal Deposit Insurance Corporation; or to credit unions, the accounts of which are insured by the National Credit Union Administration; and as long as the interest or other consideration received from the financial institution is at the market rate for federal funds transactions.

17.13(3) Investment repurchase transaction. A credit union may enter into an investment repurchase transaction so long as:

a. Any securities the credit union receives are permissible investments for federal and Iowa credit unions; the credit union, or its agent, either takes physical possession or control of the repurchase securities or is recorded as owner of them through the Federal Reserve Book Entry Securities Transfer System; the credit union, or its agent, receives a daily assessment of the securities' market value, including accrued interest; and the credit union maintains adequate margins that reflect a risk assessment of the securities and the term of the transaction; and

b. The credit union has entered into signed contracts with all approved counterparties.

17.13(4) Borrowing repurchase transaction. A credit union may enter into a borrowing repurchase transaction so long as:

a. The transaction meets the requirements of 17.13(3);

b. Any cash the credit union receives, when aggregated with all other credit union borrowings, is subject to the borrowing limit in accordance with Iowa Code section 533.306 or to any lesser amount specified by policy of the board of directors, and any investments the credit union purchases with that cash are permissible for federal credit unions; and

c. The investments referenced in 17.13(4) "b" mature no later than the maturity of the borrowing repurchase transaction.

17.13(5) Securities lending transaction. A credit union may enter into a securities lending transaction so long as:

a. The credit union receives written confirmation of the loan;

b. Any collateral the credit union receives is a legal investment for federal credit unions; the credit union, or its agent, obtains a first priority security interest in the collateral by taking physical possession or control of the collateral, or is recorded as owner of the collateral through the Federal Reserve Book Entry Securities Transfer System; and the credit union, or its agent, receives a daily assessment of the market value of the collateral, including accrued interest; and maintains adequate margin that reflects a risk assessment of the collateral and the term of the loan;

c. Any cash the credit union receives, when aggregated with all other credit union borrowings, is subject to the borrowing limit in accordance with Iowa Code section 533.306 or to any lesser amount specified by policy of the board of directors, and any investments the credit union purchases with that cash are permissible for federal credit unions and mature no later than the maturity of the transaction; and

d. The credit union has executed a written loan and security agreement with the borrower.

17.13(6) Trading securities.

a. A credit union may trade securities, including engaging in when-issued trading and pair-off transactions, so long as the credit union can show that it has sufficient resources, knowledge, systems, and procedures to handle the risks.

b. A credit union must record any security it purchases or sells for trading purposes at fair value on the trade date. The trade date is the date the credit union commits, orally or in writing, to purchase or sell a security.

c. At least monthly, the credit union must give its board of directors or investment-related committee a written report listing all purchase and sale transactions of trading securities and the resulting gain or loss on an individual basis.

189—17.14(533) Permissible investments.

17.14(1) Variable rate investment. A credit union may invest in a variable rate investment, as long as the index is tied to domestic interest rates. Except in the case of U.S. Treasury inflation-protected securities, the variable rate investment cannot, for example, be tied to foreign currencies, foreign interest rates, domestic or foreign commodity prices, equity prices, or inflation rates. For purposes of this subrule, the U.S. dollar-denominated London Interbank Offered Rate (LIBOR) is a domestic interest rate.

17.14(2) Corporate credit union shares or deposits. A credit union may purchase shares or deposits in a corporate credit union, except when the superintendent or the NCUA has notified it that the corporate credit union is not operating in compliance with NCUA rules and regulations, 12 CFR Part 704. A credit union's aggregate amount of paid-in capital and membership capital, as defined in NCUA rules and regulations, 12 CFR Part 704, in one corporate credit union is limited to 2 percent of its assets measured at the time of investment or adjustment. A credit union's aggregate amount of paid-in capital and membership capital in all corporate credit unions is limited to 4 percent of its assets measured at the time of investment or adjustment.

17.14(3) Registered investment company. A credit union may invest in a registered investment company or collective investment fund, as long as the prospectus of the company or fund restricts the investment portfolio to investments and investment transactions that are permissible for federal credit unions.

17.14(4) Collateralized mortgage obligation/real estate mortgage investment conduit. A credit union may invest in a fixed or variable rate collateralized mortgage obligation/real estate mortgage investment conduit.

17.14(5) Municipal security. A credit union may purchase and hold a municipal security, as defined in the Federal Credit Union Act, 12 U.S.C. Section 1757(7)(K), only if the credit union conducts and documents an analysis that reasonably concludes the security is at least investment grade. The credit union must also limit its aggregate municipal securities holdings to no more than 75 percent of the credit union's net worth and limit its holdings of municipal securities issued by any single issuer to no more than 25 percent of the credit union's net worth.

17.14(6) Instruments issued by institutions described in the Federal Credit Union Act, 12 U.S.C. Section 1757(8). A credit union may invest in the following instruments issued by an institution described in Section 1757(8) of the Federal Credit Union Act:

- a. Yankee dollar deposits;
- b. Eurodollar deposits;
- c. Banker's acceptances;
- d. Deposit notes; and
- e. Bank notes with weighted average maturities of less than five years.

17.14(7) European financial options contract. A credit union may purchase a European financial options contract or a series of European financial options contracts only to fund the payment of dividends on member share certificates or interest on member certificates of deposit when such dividend or interest rate is tied to an equity index provided:

- a. The option and dividend/interest rate are based on a domestic equity index;
- b. Proceeds from the options are used only to fund dividends/interest on the equity-linked certificates;
- c. Dividends or interest, or both, on the certificates are derived solely from the change in the domestic equity index over a specified period;
- d. The options' expiration dates are no later than the maturity date of the certificate;
- e. The certificate may be redeemed prior to the maturity date only upon the member's death or termination of the corresponding option;

- f.* The total costs associated with the purchase of the option is known by the credit union prior to effecting the transaction;
- g.* The options are purchased at the same time the certificate is issued to the member;
- h.* The counterparty to the transaction is a domestic counterparty and has been approved by the credit union's board of directors;
- i.* The counterparty to the transaction meets the minimum credit quality standards as approved by the credit union's board of directors;
- j.* Any collateral posted by the counterparty is a permissible investment for federal credit unions and is valued daily by an independent third party along with the value of the option;
- k.* The aggregate amount of equity-linked member share certificates does not exceed 50 percent of the credit union's net worth;
- l.* The terms of the certificate include a guarantee that there can be no loss of principal to the member regardless of changes in the value of the option unless the certificate is redeemed prior to maturity; and
- m.* The credit union provides its board of directors with a monthly report detailing, at a minimum:
 - (1) The dollar amount of outstanding equity-linked certificates;
 - (2) The certificates' maturities; and
 - (3) The fair value of the options as determined by an independent third party.

17.14(8) Debt obligations of U.S.-chartered corporations. An Iowa state-chartered credit union may invest in unsecured notes and acceptances, commonly referred to as "commercial paper" and "corporate bonds," of U.S.-chartered corporations pursuant to Iowa Code section 533.301(5) "h" and "i" and this rule, only if:

- a.* The investment in a corporate bond debt obligation is investment grade and has a maturity of less than five years;
- b.* The investment in a commercial paper debt obligation is investment grade and has a maturity of less than one year;
- c.* An investment in a nonrated equivalent value issue of a commercial paper debt obligation shall be investment grade. A credit union shall retain documentation supporting its determination and the current and previous two years of year-end financial statements which indicate acceptable operating performance of the issuing U.S. corporation;
- d.* If, subsequent to the date of purchase but prior to the date of maturity, the investment no longer meets the investment grade standard and the investment exceeds the credit union's net worth by 5 percent or more, the credit union shall have no more than 30 days to divest of the security unless the credit union seeks and receives a waiver from the superintendent as provided by rule;
- e.* The total investment by a credit union in debt obligations in a lone U.S. corporation and its subsidiaries shall not exceed 25 percent of the credit union's net worth;
- f.* The total aggregate investment by a credit union in debt obligations of U.S. corporations and their subsidiaries shall not exceed the lesser of 100 percent of the credit union's net worth or 20 percent of the credit union's investment portfolio;
- g.* An investment will be considered speculative and unauthorized if it contains any of the following characteristics, and the credit union shall be required to divest of the security in accordance with 17.14(8) "d" without an opportunity of waiver:
 - (1) It is issued by a business entity not recognized in the market place or by other than a U.S.-chartered corporation, or by both;
 - (2) It has a maturity that exceeds that established in this subrule; or
 - (3) It is issued to cover or underwrite foreign market operations, or for new-line products or services, or both, which exceed 25 percent of the investment offering;
- h.* If the net worth level of a credit union falls or remains below an amount which causes the limitations of this subrule to be exceeded for two consecutive quarters and the amount of difference is 5 percent or more of the net worth, the credit union shall divest of a sufficient amount of debt obligations so the credit union no longer exceeds the limitations or seek a waiver from the superintendent as provided by rule;

i. A corporate credit union chartered in accordance with Iowa Code chapter 533 is exempt from the provisions and limitations of this subrule and, instead, shall have the powers, restrictions and obligations contained in NCUA rules and regulations, 12 CFR Part 704, for federally insured corporate credit unions.

17.14(9) Mortgage note repurchase transactions. A credit union may invest in securities that are offered and sold pursuant to Section 4(5) of the Securities Act of 1933, 15 U.S.C. 77d(5), only as a part of an investment repurchase agreement under subrule 17.13(3), subject to all of the following conditions:

a. The aggregate of the investments with any one counterparty is limited to 25 percent of the credit union's net worth and 50 percent of its net worth with all counterparties.

b. At the time the credit union purchases the securities, the counterparty, or a party fully guaranteeing the counterparty, must meet the minimum credit quality standards as approved by the credit union's board of directors.

c. The credit union must obtain a daily assessment of the market value of the securities under paragraph 17.13(3) "a" using an independent qualified agent.

d. The mortgage note repurchase transaction is limited to a maximum of 90 days.

e. All mortgage note repurchase transactions will be conducted under triparty custodial agreements.

f. A credit union must obtain an undivided interest in the securities.

17.14(10) Zero-coupon investments. A credit union may only purchase a zero-coupon investment with a maturity date that is no greater than ten years from the related settlement date, unless authorized by the superintendent.

17.14(11) Commercial mortgage-related security (CMRS). A credit union may purchase a CMRS that would be a permissible investment for a federal credit union under 12 U.S.C. Section 1756(7)(E) or Section 1756(15)(B) subject to all of the following conditions:

a. The credit union conducts and documents a credit analysis that reasonably concludes the CMRS is at least investment grade.

b. The CMRS meets the definition of commercial mortgage security in 189—17.2(533).

c. The CMRS's underlying pool of loans contains more than 50 loans with no one loan representing more than 10 percent of the pool.

d. The aggregate amount of private label CMRS purchased by the credit union does not exceed 25 percent of its net worth, unless otherwise authorized by the superintendent.

17.14(12) Charitable donation accounts. An Iowa-chartered credit union may apply to the superintendent for authorization to fund a charitable donation account (CDA) as approved by the National Credit Union Administration. The request to the superintendent should address the items listed in 17.19(2) "a" to "c."

a. If the superintendent grants the request, the CDA must satisfy all of the conditions in 12 CFR 721.3(b)(2)(i) to (vii), including but not limited to the following:

(1) The book value of investments in all CDAs in the aggregate must be limited to 5 percent of a credit union's net worth at all times as measured at every call report.

(2) The assets must be held in a segregated custodial account and be specifically identified as a CDA.

(3) If a trust is chosen as the vehicle for the CDA, the trustee must be regulated by the Office of the Comptroller of the Currency (OCC), the U.S. Securities and Exchange Commission (SEC), another federal regulatory agency, or a state regulatory agency. A regulated trustee or other person or entity that is authorized to make investment decisions for a CDA, other than the credit union itself, must be either a registered investment adviser or regulated by the OCC.

(4) The parties to the CDA, typically the funding credit union and trustee or other manager of the account, must document the terms and conditions controlling the account in a written agreement. The terms of the agreement must be consistent with the federal rule. The credit union's board of directors must adopt written policies governing the creation, funding, and management of the CDA that are consistent with the federal rule, must review the policies annually, and may amend them from time to

time. Charitable contributions and donations can only be made to organizations that are exempt from taxation under Section 501(c)(3) of the Internal Revenue Code.

(5) Credit unions utilizing CDAs are required to distribute 51 percent of the total return on investment to one or more qualified charities no less frequently than every five years.

b. CDAs are investments that carry risk. It is expected that any credit union that makes this type of investment will conduct the necessary due diligence and retain the due diligence documentation for examiner review. The board must also document the investment strategies and risk tolerances and must account for the CDA in accordance with generally accepted accounting principles.

[ARC 1678C, IAB 10/15/14, effective 11/19/14; ARC 3734C, IAB 4/11/18, effective 5/16/18]

189—17.15(533) Prohibited investment activities. A credit union may not engage in adjusted trading or short sales.

189—17.16(533) Prohibited investments.

17.16(1) Derivatives. A credit union may not purchase or sell financial derivatives, such as futures, options, interest rate swaps, or forward rate swaps. This prohibition does not apply to:

a. Any derivatives permitted under NCUA rules and regulations, 12 CFR 701.21(i) and 189—subrule 17.14(7);

b. Embedded options not required under GAAP to be accounted for separately from the host contract; and

c. Interest rate lock commitments or forward sales commitments made in connection with a loan originated by the credit union.

17.16(2) Zero coupon investments. Rescinded IAB 10/15/14, effective 11/19/14.

17.16(3) Mortgage servicing rights. A credit union may not purchase mortgage servicing rights as an investment but may perform mortgage servicing functions as a financial service for a member as long as the mortgage loan is owned by a member.

17.16(4) Commercial mortgage-related security. Rescinded IAB 10/15/14, effective 11/19/14.

17.16(5) Stripped mortgage-backed securities. A credit union may not invest in stripped mortgage-backed securities (SMBS) or securities that represent interests in SMBS except as described in 17.16(5) “a” and “c.”

a. A credit union may invest in and hold exchangeable collateralized mortgage obligations (exchangeable CMOs) representing beneficial ownership interests in one or more interest-only classes of a CMO (IO CMOs) or principal-only classes of a CMO (PO CMOs), but only if:

(1) At the time of purchase, the ratio of the market price to the remaining principal balance is between .8 and 1.2, meaning that the discount or premium of the market price to par must be less than 20 points;

(2) The offering circular or other official information available at the time of purchase indicates that the notional principal on each underlying IO CMO declines at the same rate as the principal on one or more of the underlying non-IO CMOs, and the principal on each underlying PO CMO declines at the same rate as the principal, or notional principal, on one or more of the underlying non-PO CMOs; and

(3) The credit union staff has the expertise dealing with exchangeable CMOs to apply the conditions in 17.16(5) “a”(1) and 17.16(5) “a”(2).

b. A credit union that invests in an exchangeable CMO may exercise the exchange option only if all of the underlying CMOs are permissible investments for that credit union.

c. A credit union may accept an exchangeable CMO representing beneficial ownership interests in one or more IO CMOs or PO CMOs as an asset associated with an investment repurchase transaction or as collateral in a securities lending transaction. When the exchangeable CMO is associated with one of these two transactions, it need not conform to the conditions in 17.16(5) “a”(1) and 17.16(5) “a”(2).

17.16(6) Insurance company annuity product. A credit union may not purchase an insurance company annuity product as an investment of the credit union. However, a credit union, in its capacity as an employer, may establish retirement or defined employee benefit programs, which may include the purchase of an annuity for the specific purpose of funding an employee benefit plan, provided that:

- a.* The plan is usually entirely funded by the credit union and the underlying investments are owned by the credit union;
- b.* There is a direct connection between the purchase of the investment and the employee benefit obligation;
- c.* If an employee leaves the credit union before the specified time, fails to exercise an option or to vest in the plan, dies, or in some manner forfeits the right to the planned benefit, the credit union must take the steps necessary to dispose of any investment(s) not needed to meet an actual or potential obligation under the employee benefit plan; and
- d.* A credit union may, under certain circumstances, hold an otherwise impermissible investment purchased to fund an employee benefit plan after an employee retires or separates from the credit union. For example, when a qualified employee is allowed to exercise an investment option following separation, the investment may be held in order to satisfy this benefit plan provision. In most cases this is an acceptable practice provided the option period is reasonable. Upon the employee's exercise of the option or the expiration of the exercise period, the credit union must divest itself of any remaining impermissible investment(s).

17.16(7) *Other prohibited investments.* A credit union may not purchase residual interests in collateralized mortgage obligations, real estate mortgage investment conduits, or small business-related securities.

[ARC 1678C, IAB 10/15/14, effective 11/19/14]

189—17.17(533) Conflicts of interest.

17.17(1) A credit union's officials and senior management employees, and their immediate family members, may not receive anything of value in connection with their investment transactions. This prohibition also applies to any other employee, such as an investment officer, if the employee is directly involved in investments, unless the credit union's board of directors determines that the employee's involvement does not present a conflict of interest. This prohibition does not include compensation for employees.

17.17(2) A credit union's officials and employees must conduct all transactions with business associates or family members that are not specifically prohibited by 17.17(1) at arm's length and in the credit union's best interest.

189—17.18 Reserved.

189—17.19(533) Investment pilot program.

17.19(1) Under an investment pilot program, the credit union division will permit a limited number of credit unions to engage in investment activities prohibited by this rule but otherwise permitted by the Federal Credit Union Act, 12 U.S.C. Section 1757.

17.19(2) Except as provided in 17.19(4), before a credit union may engage in an additional activity it must obtain written approval from the superintendent. To obtain approval, a credit union must submit its written request to the superintendent that addresses the following items:

- a.* Certification that the credit union is "well-capitalized" under NCUA rules and regulations, 12 CFR Part 702;
- b.* Board policies approving the activities and establishing limits on them;
- c.* A complete description of the activities, with specific examples of how they will benefit the credit union and how they will be conducted;
- d.* A demonstration of how the activities will affect the credit union's financial performance, risk profile, and asset-liability management strategies;
- e.* Examples of reports the credit union will generate to monitor the activities;
- f.* Projections of the associated costs of the activities, including personnel, computer, and audit;
- g.* Descriptions of the internal systems that will measure, monitor, and report the activities;
- h.* Qualifications of the staff and officials responsible for implementing and overseeing the activities; and

i. Internal control procedures that will be implemented, including audit requirements.

17.19(3) If the superintendent supports the credit union's request to engage in the additional activity as provided in 17.19(2), the superintendent will forward the request to the NCUA regional director for review and nonobjection. If the regional director determines that the additional activity would be approved for the credit union if it were federally chartered and does not object otherwise, the superintendent may approve the credit union's request.

17.19(4) Subsequent to the publication date of these rules, a credit union will not need to seek written approval of the superintendent to engage in an investment activity prohibited by the rules but permitted by the Federal Credit Union Act if the activity is part of a third-party investment program the NCUA approves for federal credit unions after the third party submits a request to the NCUA Director of the Office of Strategic Program Support and Planning that addresses the following items:

- a.* A complete description of the activities with specific examples of how a federal credit union will conduct and account for them, and how the activities will benefit a federal credit union;
- b.* A description of any risks to a federal credit union from participating in the program; and
- c.* Contracts that must be executed by the federal credit union.

189—17.20(533) Responsibility placed upon the credit union to show cause.

17.20(1) A state-chartered credit union that engages in an investment activity that it believes to be permissible for federal credit unions, whether or not addressed by these rules, must provide the superintendent, when requested, satisfactory documentation that the activity is not prohibited by the Iowa Code or by the NCUA, or both.

17.20(2) If a credit union engages in an investment activity, whether expressly permitted by these rules or an investment activity that the credit union believes, in good faith, is permitted, and which at the time of engagement is not or thought not to be prohibited by the Iowa Code or the NCUA, or both, but subsequently becomes or is found to have been prohibited, the credit union must develop a plan to become compliant within a reasonable period of time.

17.20(3) Although automatic authority is granted to Iowa credit unions by Iowa Code sections 533.301(5)“j” and 533.301(25) and these rules, such authority may be withheld or withdrawn by the superintendent for safety and soundness concerns or for blatant disregard for these rules, in whole or in part, by a credit union.

189—17.21(533) Director, officer, or employee overdraft. A state credit union may pay an overdraft of a director, officer, or employee of the state credit union on an account at the state credit union when the payment of funds is made in accordance with any of the following:

1. A written, preauthorized, interest-bearing extension of credit plan that specifies a method of repayment.
2. A written, preauthorized transfer of collected funds from another account of the account holder at the state credit union.
3. The overdraft is paid pursuant to an overdraft protection plan or courtesy pay program. Such payment is limited to one time per quarter, and the overdraft shall last no longer than ten days. Each credit union board of directors shall enact a policy regarding failure to comply with the provisions of this rule.

This rule is intended to implement Iowa Code section 533.205(7).
[ARC 3734C, IAB 4/11/18, effective 5/16/18]

These rules are intended to implement Iowa Code section 533.301(5).

[Filed 2/5/88, Notice 11/18/87—published 2/24/88, effective 3/30/88]

[Filed 1/31/03, Notice 12/25/02—published 2/19/03, effective 3/26/03]

[Filed 11/4/04, Notice 9/15/04—published 11/24/04, effective 12/29/04]

[Filed 12/10/08, Notice 11/5/08—published 12/31/08, effective 2/4/09]

[Filed ARC 1678C (Notice ARC 1580C, IAB 8/20/14), IAB 10/15/14, effective 11/19/14]

[Filed ARC 3734C (Notice ARC 3600C, IAB 1/31/18), IAB 4/11/18, effective 5/16/18]

INSURANCE DIVISION[191]

[Prior to 10/22/86, see Insurance Department[510], renamed Insurance Division[191] under the “umbrella” of Department of Commerce by the 1986 Iowa Acts, Senate File 2175]

ORGANIZATION AND PROCEDURES

CHAPTER 1

ORGANIZATION OF DIVISION

- 1.1(502,505) Organization
- 1.2(502,505) Location and contact information
- 1.3(22,502,505) Public information and inspection of records
- 1.4(505) Service of process

CHAPTER 2

DECLARATORY ORDERS

- 2.1(17A) Petition for declaratory order
- 2.2(17A) Notice of petition
- 2.3(17A) Intervention
- 2.4(17A) Briefs
- 2.5(17A) Inquiries
- 2.6(17A) Service and filing of petitions and other papers
- 2.7(17A) Consideration
- 2.8(17A) Action on petition
- 2.9(17A) Refusal to issue order
- 2.10(17A) Contents of declaratory order—effective date
- 2.11(17A) Copies of orders
- 2.12(17A) Effect of a declaratory order

CHAPTER 3

CONTESTED CASES

- 3.1(17A) Scope and applicability
- 3.2(17A) Definitions
- 3.3(17A) Time requirements
- 3.4(17A) Requests for contested case proceeding
- 3.5(17A) Commencement of hearing; notice
- 3.6(17A) Presiding officer
- 3.7(17A) Waiver of procedures
- 3.8(17A) Telephone proceedings
- 3.9(17A) Disqualification
- 3.10(17A) Consolidation—severance
- 3.11(17A) Pleadings
- 3.12(17A) Service and filing of pleadings and other papers
- 3.13(17A) Discovery
- 3.14(17A) Subpoenas
- 3.15(17A) Motions
- 3.16(17A) Prehearing conference
- 3.17(17A) Continuances
- 3.18(17A) Withdrawals
- 3.19(17A) Intervention
- 3.20(17A) Hearing procedures
- 3.21(17A) Evidence
- 3.22(17A) Default
- 3.23(17A) Ex parte communication
- 3.24(17A) Recording costs

| | |
|--------------------|------------------------------------|
| 3.25(17A) | Interlocutory appeals |
| 3.26(17A) | Final decision |
| 3.27(17A) | Appeals and review |
| 3.28(17A) | Applications for rehearing |
| 3.29(17A) | Stay of agency action |
| 3.30(17A) | No factual dispute contested cases |
| 3.31(17A) | Emergency adjudicative proceedings |
| 3.32(502,505,507B) | Summary cease and desist orders |
| 3.33(17A,502,505) | Informal settlement |
| 3.34(17A,502,505) | Witness fees |

CHAPTER 4

AGENCY PROCEDURE FOR RULE MAKING AND WAIVER OF RULES

DIVISION I

AGENCY PROCEDURE FOR RULE MAKING

| | |
|---------------|--|
| 4.1(17A) | Applicability |
| 4.2(17A) | Advice on possible rules before notice of proposed rule adoption |
| 4.3(17A) | Public rule-making docket |
| 4.4(17A) | Notice of proposed rule making |
| 4.5(17A) | Public participation |
| 4.6(17A) | Regulatory analysis |
| 4.7(17A,25B) | Fiscal impact statement |
| 4.8(17A) | Time and manner of rule adoption |
| 4.9(17A) | Variance between adopted rule and rule proposed in Notice of Intended Action |
| 4.10(17A) | Exemptions from public rule-making procedures |
| 4.11(17A) | Concise statement of reasons |
| 4.12(17A) | Contents, style, and form of rule |
| 4.13(17A) | Agency rule-making record |
| 4.14(17A) | Filing of rules |
| 4.15(17A) | Effectiveness of rules prior to publication |
| 4.16(17A) | General statements of policy |
| 4.17(17A) | Review of rules by division |
| 4.18(17A) | Petition for rule making |
| 4.19 and 4.20 | Reserved |

DIVISION II

WAIVER AND VARIANCE RULES

| | |
|-----------|---|
| 4.21(17A) | Definition |
| 4.22(17A) | Scope |
| 4.23(17A) | Applicability of Division II of Chapter 4 |
| 4.24(17A) | Criteria for waiver or variance |
| 4.25(17A) | Filing of petition |
| 4.26(17A) | Content of petition |
| 4.27(17A) | Additional information |
| 4.28(17A) | Notice |
| 4.29(17A) | Hearing procedures |
| 4.30(17A) | Ruling |
| 4.31(17A) | Public availability |
| 4.32(17A) | Summary reports |
| 4.33(17A) | Cancellation of a waiver |
| 4.34(17A) | Violations |
| 4.35(17A) | Defense |
| 4.36(17A) | Judicial review |

REGULATION OF INSURERS

CHAPTER 5

REGULATION OF INSURERS—GENERAL PROVISIONS

- 5.1(507) Examination reports
- 5.2(505,507) Examination for admission
- 5.3(507,508,515) Submission of quarterly financial information
- 5.4(505,508,515,520) Surplus notes
- 5.5(505,515,520) Maximum allowable premium volume
- 5.6(505,515,520) Treatment of various items on the financial statement
- 5.7(505) Ordering withdrawal of domestic insurers from states
- 5.8(505) Monitoring
- 5.9(505) Rate and form filings
- 5.10(511) Life companies—permissible investments
- 5.11(511) Investment of funds
- 5.12(515) Collateral loans
- 5.13(508,515) Loans to officers, directors, employees, etc.
- 5.14 Reserved
- 5.15(508,512B,514,514B,515,520) Accounting practices and procedures manual and annual statement instructions
- 5.16 to 5.19 Reserved
- 5.20(508) Computation of reserves

UNEARNED PREMIUM RESERVES ON MORTGAGE GUARANTY INSURANCE POLICIES

- 5.21(515C) Unearned premium reserve factors
- 5.22(515C) Contingency reserve
- 5.23(507C) Standards
- 5.24(507C) Commissioner's authority
- 5.25 Reserved
- 5.26(508,515) Participation in the NAIC Insurance Regulatory Information System
- 5.27(508,515,520) Asset valuation
- 5.28(508,515,520) Risk-based capital and surplus
- 5.29(508,515) Actuarial certification of reserves
- 5.30(515) Single maximum risk—fidelity and surety risks
- 5.31(515) Reinsurance contracts
- 5.32(511,515) Investments in medium grade and lower grade obligations
- 5.33(510) Credit for reinsurance
- 5.34(508) Actuarial opinion and memorandum
- 5.35 to 5.39 Reserved
- 5.40(515) Premium tax
- 5.41(508) Tax on gross premiums—life companies
- 5.42(432) Cash refund of premium tax
- 5.43(510) Managing general agents

DISCLOSURE OF MORTGAGE LOAN APPLICATIONS

- 5.44 to 5.49 Reserved
- 5.50(535A) Purpose
- 5.51(535A) Definitions
- 5.52(535A) Filing of reports
- 5.53(535A) Form and content of reports
- 5.54(535A) Additional information required
- 5.55(535A) Written complaints

CHAPTER 6

ORGANIZATION OF DOMESTIC INSURANCE COMPANIES

| | |
|----------|------------------------------|
| 6.1(506) | Definitions |
| 6.2(506) | Promoters contributions |
| 6.3(506) | Escrow |
| 6.4(506) | Alienation |
| 6.5(506) | Sales to promoters |
| 6.6(506) | Options |
| 6.7(506) | Qualifications of management |
| 6.8(506) | Chief executive |
| 6.9(506) | Directors |

CHAPTER 7

DOMESTIC STOCK INSURERS PROXIES

PROXY REGULATIONS

| | |
|-----------|--|
| 7.1(523) | Application of regulation |
| 7.2(523) | Proxies, consents and authorizations |
| 7.3(523) | Disclosure of equivalent information |
| 7.4(523) | Definitions |
| 7.5(523) | Information to be furnished to stockholders |
| 7.6(523) | Requirements as to proxy |
| 7.7(523) | Material required to be filed |
| 7.8(523) | False or misleading statements |
| 7.9(523) | Prohibition of certain solicitations |
| 7.10(523) | Special provisions applicable to election contests |

SCHEDULE A

INFORMATION REQUIRED IN PROXY STATEMENT

SCHEDULE B

INFORMATION TO BE INCLUDED IN STATEMENTS FILED BY OR ON BEHALF OF A PARTICIPANT (OTHER THAN THE INSURER) IN A PROXY SOLICITATION IN AN ELECTION CONTEST

POLICYHOLDER PROXY SOLICITATION

| | |
|--------------|-------------------------------------|
| 7.11(523) | Application |
| 7.12(523) | Conditions—revocation |
| 7.13(523) | Filing proxy |
| 7.14(523) | Solicitation by agents—use of funds |
| 7.15 to 7.19 | Reserved |

STOCK TRANSACTION REPORTING

| | |
|-----------|--|
| 7.20(523) | Statement of changes of beneficial ownership of securities |
|-----------|--|

| 37.57(507B,514D) | Introductory, initial or special offers |
| 37.58(507B,514D) | Enforcement procedures—certificate of compliance |
| 37.59(507B,514D) | Filing for prior review |

CHAPTER 38
COORDINATION OF BENEFITS

DIVISION I

| | |
|---------------|----------|
| 38.1 to 38.11 | Reserved |
|---------------|----------|

DIVISION II

| | |
|----------------|--|
| 38.12(509,514) | Purpose and applicability |
| 38.13(509,514) | Definitions |
| 38.14(509,514) | Use of model COB contract provision |
| 38.15(509,514) | Rules for coordination of benefits |
| 38.16(509,514) | Procedure to be followed by secondary plan to calculate benefits and pay a claim |
| 38.17(509,514) | Notice to covered persons |
| 38.18(509,514) | Miscellaneous provisions |

CHAPTER 39
LONG-TERM CARE INSURANCE

DIVISION I
GENERAL PROVISIONS

- 39.1(514G) Purpose
- 39.2(514G) Authority
- 39.3(514G) Applicability and scope
- 39.4(514G) Definitions
- 39.5(514G) Policy definitions
- 39.6(514G) Policy practices and provisions
- 39.7(514G) Required disclosure provisions
- 39.8(514G) Prohibition against postclaims underwriting
- 39.9(514D,514G) Minimum standards for home health care benefits in long-term care insurance policies
- 39.10(514D,514G) Requirement to offer inflation protection
- 39.11(514D,514G) Requirements for application forms and replacement coverage
- 39.12(514G) Reserve standards
- 39.13(514D) Loss ratio
- 39.14(514G) Filing requirement
- 39.15(514D,514G) Standards for marketing
- 39.16(514D,514G) Suitability
- 39.17(514G) Prohibition against preexisting conditions and probationary periods in replacement policies or certificates
- 39.18(514G) Standard format outline of coverage
- 39.19(514G) Requirement to deliver shopper's guide
- 39.20(514G) Policy summary and delivery of life insurance policies with long-term care riders
- 39.21(514G) Reporting requirement for long-term care benefits funded through life insurance by acceleration of the death benefit
- 39.22(514G) Unintentional lapse
- 39.23(514G) Denial of claims
- 39.24(514G) Incontestability period
- 39.25(514G) Required disclosure of rating practices to consumers
- 39.26(514G) Initial filing requirements
- 39.27(514G) Reporting requirements
- 39.28(514G) Premium rate schedule increases
- 39.29(514G) Nonforfeiture
- 39.30(514G) Standards for benefit triggers
- 39.31(514G) Additional standards for benefit triggers for qualified long-term care insurance contracts
- 39.32(514G) Penalties
- 39.33(514G) Notice of cancellation, nonrenewal or termination of long-term care insurance
- 39.34 to 39.40 Reserved

DIVISION II
INDEPENDENT REVIEW OF BENEFIT TRIGGER DETERMINATIONS

- 39.41(514G) Purpose
- 39.42(514G) Effective date
- 39.43(514G) Definitions
- 39.44(514G) Notice of benefit trigger determination and content
- 39.45(514G) Notice of internal appeal decision and right to independent review
- 39.46(514G) Independent review request
- 39.47(514G) Certification process
- 39.48(514G) Selection of independent review entity

| | |
|----------------|--|
| 39.49(514G) | Independent review process |
| 39.50(514G) | Decision notification |
| 39.51(514G) | Insurer information |
| 39.52(514G) | Certification of independent review entity |
| 39.53(514G) | Additional requirements |
| 39.54(514G) | Toll-free telephone number |
| 39.55(514G) | Insurance division application and reports |
| 39.56 to 39.74 | Reserved |

DIVISION III
LONG-TERM CARE PARTNERSHIP PROGRAM

| | |
|------------------------|---|
| 39.75(514H,83GA,HF723) | Purpose |
| 39.76(514H,83GA,HF723) | Effective date |
| 39.77(514H,83GA,HF723) | Definitions |
| 39.78(514H,83GA,HF723) | Eligibility |
| 39.79(514H,83GA,HF723) | Discontinuance of partnership program |
| 39.80(514H,83GA,HF723) | Required disclosures |
| 39.81(514H,83GA,HF723) | Form filings |
| 39.82(514H,83GA,HF723) | Exchanges |
| 39.83(514H,83GA,HF723) | Required policy terms and disclosures |
| 39.84(514H,83GA,HF723) | Standards for marketing and suitability |
| 39.85(514H,83GA,HF723) | Required reports |

CHAPTER 40
HEALTH MAINTENANCE ORGANIZATIONS

(Health and Insurance—Joint Rules)

| | |
|-------------|---|
| 40.1(514B) | Definitions |
| 40.2(514B) | Application |
| 40.3(514B) | Inspection of evidence of coverage |
| 40.4(514B) | Governing body and enrollee representation |
| 40.5(514B) | Quality of care |
| 40.6(514B) | Change of name |
| 40.7(514B) | Change of ownership |
| 40.8(514B) | Termination of services |
| 40.9(514B) | Complaints |
| 40.10(514B) | Cancellation of enrollees |
| 40.11(514B) | Application for certificate of authority |
| 40.12(514B) | Net worth |
| 40.13(514B) | Fidelity bond |
| 40.14(514B) | Annual report |
| 40.15(514B) | Cash or asset management agreements |
| 40.16 | Reserved |

| 41.15(514B) | Reinsurance |
| 41.16(514B) | Provider contracts |
| 41.17(514B) | Producers' duties |
| 41.18(514B) | Emergency services |
| 41.19(514B) | Reimbursement |
| 41.20(514B) | Limited service organization requirements |
| 41.21(514B) | Disclosure requirements |

CHAPTER 42
GENDER-BLENDED MINIMUM NONFORFEITURE
STANDARDS FOR LIFE INSURANCE

| | |
|-----------|--|
| 42.1(508) | Purpose |
| 42.2(508) | Definitions |
| 42.3(508) | Use of gender-blended mortality tables |
| 42.4(508) | Unfair discrimination |
| 42.5(508) | Separability |
| 42.6(508) | 2001 CSO Mortality Table |

CHAPTER 43
ANNUITY MORTALITY TABLES FOR USE IN
DETERMINING RESERVE LIABILITIES FOR ANNUITIES

| | |
|-----------|--|
| 43.1(508) | Purpose |
| 43.2(508) | Definitions |
| 43.3(508) | Individual annuity or pure endowment contracts |
| 43.4(508) | Group annuity or pure endowment contracts |
| 43.5(508) | Application of the 1994 GAR Table |
| 43.6(508) | Application of the 2012 IAR Mortality Table |
| 43.7(508) | Separability |

CHAPTER 44
SMOKER/NONSMOKER MORTALITY TABLES
FOR USE IN DETERMINING MINIMUM RESERVE LIABILITIES
AND NONFORFEITURE BENEFITS

| | |
|-----------|------------------|
| 44.1(508) | Purpose |
| 44.2(508) | Definitions |
| 44.3(508) | Alternate tables |
| 44.4(508) | Conditions |

- 44.5(508) Separability
- 44.6(508) 2001 CSO Mortality Table

INSURANCE HOLDING COMPANY SYSTEMS

CHAPTER 45

INSURANCE HOLDING COMPANY SYSTEMS

- 45.1(521A) Purpose
- 45.2(521A) Definitions
- 45.3(521A) Subsidiaries of domestic insurers
- 45.4(521A) Control acquisition of domestic insurer
- 45.5(521A) Registration of insurers
- 45.6(521A) Alternative and consolidated registrations
- 45.7(521A) Exemptions
- 45.8(521A) Disclaimers and termination of registration
- 45.9(521A) Transactions subject to prior notice—notice filing
- 45.10(521A) Extraordinary dividends and other distributions
- 45.11(521A) Enterprise risk report
- 45.12(521A) Forms—additional information and exhibits

CHAPTER 46

MUTUAL HOLDING COMPANIES

- 46.1(521A) Purpose
- 46.2(521A) Definitions
- 46.3(521A) Application—contents—process
- 46.4(521A) Plan of reorganization
- 46.5(521A) Duties of the commissioner
- 46.6(521A) Regulation—compliance
- 46.7(521A) Reorganization of domestic mutual insurer with mutual insurance holding company
- 46.8(521A) Reorganization of foreign mutual insurer with mutual insurance holding company
- 46.9(521A) Mergers of mutual insurance holding companies
- 46.10(521A) Stock offerings
- 46.11(521A) Regulation of holding company system
- 46.12(521A) Reporting of stock ownership and transactions

CHAPTER 47

VALUATION OF LIFE INSURANCE POLICIES

(Including New Select Mortality Factors)

- 47.1(508) Purpose
- 47.2(508) Application
- 47.3(508) Definitions
- 47.4(508) General calculation requirements for basic reserves and premium deficiency reserves
- 47.5(508) Calculation of minimum valuation standard for policies with guaranteed nonlevel gross premiums or guaranteed nonlevel benefits (other than universal life policies)
- 47.6(508) Calculation of minimum valuation standard for flexible premium and fixed premium universal life insurance policies that contain provisions resulting in the ability of a policyowner to keep a policy in force over a secondary guarantee period
- 47.7(508) 2001 CSO Mortality Table

VIATICAL AND LIFE SETTLEMENTS

CHAPTER 48

VIATICAL AND LIFE SETTLEMENTS

| | |
|-------------|--|
| 48.1(508E) | Purpose and authority |
| 48.2(508E) | Definitions |
| 48.3(508E) | License requirements |
| 48.4(508E) | Disclosure statements |
| 48.5(508E) | Contract requirements |
| 48.6(508E) | Filing of forms |
| 48.7(508E) | Reporting requirements |
| 48.8(508E) | Examination or investigations |
| 48.9(508E) | Requirements and prohibitions |
| 48.10(508E) | Penalties; injunctions; civil remedies; cease and desist |
| 48.11(252J) | Suspension for failure to pay child support |
| 48.12(261) | Suspension for failure to pay student loan |
| 48.13(272D) | Suspension for failure to pay state debt |
| 48.14(508E) | Severability |

CHAPTER 49

FINANCIAL INSTRUMENTS USED IN HEDGING TRANSACTIONS

| | |
|-----------|--|

CHAPTER 50
REGULATION OF SECURITIES OFFERINGS AND THOSE WHO ENGAGE
IN THE SECURITIES BUSINESS

[Appeared as Ch 17, 1973 IDR]
[Prior to 10/22/86, Insurance Department[510]]

DIVISION I
DEFINITIONS AND ADMINISTRATION

191—50.1(502) Definitions. For the purposes of this chapter, the definitions in Iowa Code chapter 502 and the following definitions shall apply unless the context otherwise requires:

“*Act*” means Iowa Code chapter 502, the Iowa Uniform Securities Act (Blue Sky Law).

“*Administrator*” means the commissioner of insurance or the deputy administrator appointed under Iowa Code section 502.601.

“*CCH NASAA Reports*” means the official statements of policy of the North American Securities Administrators Association, Inc., printed by Commerce Clearing House, the official reporter for NASAA.

“*CRD*” means the Central Registration Depository.

“*CSRU*” means the Iowa child support recovery unit.

“*FDIC*” means the Federal Deposit Insurance Corporation.

“*FINRA*” means the Financial Industry Regulatory Authority.

“*Form ADV*” means Uniform Application for Investment Adviser Registration.

“*Form ADV-E*” means the Certificate of Accounting of Client Securities and Funds in the Possession or Custody of an Investment Adviser.

“*Form ADV-H*” means Notice of Hardship Application for Investment Adviser Registration.

“*Form ADV-W*” means Notice of Withdrawal from Registration as Investment Adviser.

“*Form BD*” means Uniform Application for Broker-Dealer Registration.

“*Form BDW*” means Uniform Request for Broker-Dealer Withdrawal.

“*Form ICP*” means Agricultural Cooperative Notice of Sales of Notes or Evidences of Indebtedness.

“*Form F-7*” means Registration Statement Under the Securities Act of 1933, for registration of securities of certain Canadian issuers offered for cash upon the exercise of rights granted to existing security holders.

“*Form F-8*” means Registration Statement Under the Securities Act of 1933, for registration of securities of certain Canadian issuers to be issued in exchange offers or a business combination.

“*Form F-9*” means Registration Statement Under the Securities Act of 1933, for registration of certain investment grade debt or investment grade preferred securities of certain Canadian issuers.

“*Form F-10*” means Registration Statement Under the Securities Act of 1933, for registration of securities of certain Canadian issuers.

“*Form NF*” means Uniform Investment Company Notice Filing.

“*Form S-1*” means Registration Statement Under the Securities Act of 1933, for registration of securities for which no other form is authorized or prescribed.

“*Form SB-2*” means Registration Statement Under the Securities Act of 1933, for registration of securities to be sold to the public by small business issuers.

“*Form U-1*” means Uniform Application to Register Securities.

“*Form U-2*” means Uniform Consent to Service of Process.

“*Form U-2A*” means Uniform Corporate Resolution.

“*Form U-4*” means Uniform Application for Securities Industry Registration or Transfer.

“*Form U-5*” means Uniform Termination Notice for Securities Industry Registration.

“*Form U-6*” means Uniform Disciplinary Action Reporting Form.

“*Form U-7*” means Small Corporate Offering Registration Form.

“*Form USR-1*” means Investment Company Report of Sales.

“*Gift*” means a rendering of anything of value in return for which legal consideration of equal or greater value is not given and received.

“*IARD*” means the Investment Advisory Registration Depository.

“*Immediate family*” includes parent, mother-in-law, father-in-law, spouse, former spouse, brother, sister, brother-in-law, sister-in-law, son-in-law, daughter-in-law, child and stepchild. In addition, “immediate family” includes any other person who is supported, directly or indirectly, to a material extent by an agent.

“*Investment contract*” as used in Iowa Code section 502.102(28) includes:

1. Any investment in a common enterprise with the expectation of profit to be derived through the essential managerial efforts of someone other than the investor.

(1) “Common enterprise” in this definition means an enterprise in which the fortunes of the investor are tied to the efficacy of the efforts and successes of those seeking the investment or of a third party.

(2) “Profit” in this definition includes income or a return on the investment, including a fixed rate of return, dividends, other periodic payments, or the increased value of the investment; or

2. Any investment by which an offeree furnishes initial value to an offerer, and a portion of this initial value is subjected to the risks of the enterprise, and the furnishing of the initial value is induced by the offerer’s promises or representations which give rise to a reasonable understanding that a valuable benefit of some kind over and above the initial value will accrue to the offeree as a result of the operation of the enterprise, and the offeree does not exercise practical and actual control over the managerial decisions of the enterprise.

“*Loan*” means an agreement to advance property, including but not limited to money, in return for the promise that payment will be made for use of the property.

“*NASAA*” means the North American Securities Administrators Association, Inc.

“*NASDAQ*” means the NASDAQ Stock Market.

“*NCUA*” means the National Credit Union Association.

“*NSMIA*” means the National Securities Markets Improvement Act of 1996, Public Law 104-290.

“*NYSE*” means the New York Stock Exchange.

“*OTC*” means over the counter.

“*PCAOB*” means the Public Company Accounting Oversight Board.

“*SAI*” means Statement of Additional Information.

“*SEC*” means the United States Securities and Exchange Commission as established pursuant to 15 U.S.C. Section 78(d).

“*SOIF*” means Solicitation of Interest Form.

This rule is intended to implement Iowa Code section 502.605(1).

[ARC 9169B, IAB 10/20/10, effective 11/24/10; ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 2175C, IAB 9/30/15, effective 11/4/15]

191—50.2(502) Cost of audit or inspection.

50.2(1) The administrator may assess the broker-dealer or investment adviser for reasonable charges of travel, lodging, and other expenses incurred by Iowa insurance division staff or independent persons conducting an audit or inspection and directly attributable to an audit or inspection made pursuant to Iowa Code section 502.411(4). The assessment of costs of meals, lodging, transportation, and other actual and necessary travel expenses, if any, incurred by persons conducting an audit or inspection shall be determined in accordance with one of the following, as agreed by the administrator and the persons conducting an audit or inspection:

a. The department of administrative services (DAS) state accounting enterprise Accounting Policy and Procedures Manual guidelines for employee travel (das.iowa.gov/state-accounting/sae-policies-procedures-manual) and the DAS form Travel Section Policy and Procedures (das.iowa.gov/state-accounting/travel-relocation) in effect at the time of the audit or inspection.

b. The department of administrative services state accounting enterprise Accounting Policy and Procedures Manual guidelines for travel for in-state board, commission, advisory council, and task force member expenses.

c. The United States General Services Administration Continental United States (“CONUS”) per diem travel allowances for lodging, meals and incidental expenses.

d. A reimbursement schedule as agreed by the administrator and the persons conducting the audit or inspection.

50.2(2) If costs are assessed under subrule 50.2(1), the administrator may, upon completion of the examination, or at such regular intervals prior to completion as the administrator determines, prepare an account of the costs incurred in performing and preparing the report of the examination which shall be charged to and paid by the broker-dealer or investment adviser examined.

50.2(3) The administrator shall notify the broker-dealer or investment adviser of the expenses attributable to the audit or inspection as soon as practicable.

50.2(4) Assessments collected pursuant to this rule shall be paid by the broker-dealer or investment adviser as directed by the administrator either to the administrator or to the persons conducting the audit or inspection. The persons conducting the audit or inspection shall be reimbursed only for the actual and necessary costs incurred in conducting the audit or inspection.

This rule is intended to implement Iowa Code section 502.411(4).

[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 2175C, IAB 9/30/15, effective 11/4/15; ARC 2872C, IAB 12/21/16, effective 1/25/17]

191—50.3(502) Interpretative opinions or no-action letters. Interested persons may request the administrator to issue an interpretative opinion pursuant to Iowa Code section 502.605(4). These requests will be answered by means of a no-action letter. Requests for confirmation of the availability of an exemption shall be answered in the same manner. The following procedure is recommended for the submission of such requests:

50.3(1) The request should be in writing and include the factual situation involved, a citation to the applicable part of the rule or statute, and the question sought to be answered. Any disclosure or informational materials which pertain to the issue should also be filed.

50.3(2) The administrator, or any person delegated under Iowa Code section 502.601(1), may respond to the request by determining to take or not to take a no-action position or by declining to reach a determination due to insufficient facts, conflicting case or administrative law or such other reasons as the administrator’s discretionary power allows.

50.3(3) All no-action determinations shall be based upon the representations made by the requesting party in the letter and information filed, since any different facts or conditions might require a different conclusion. The no-action letter shall express the administrator’s position on enforcement action only and shall not purport to express any legal conclusion on the questions presented. No determination shall take a position on whether or not any disclosure materials satisfactorily comply with the antifraud and civil liability sections of the Act.

50.3(4) A no-action determination issued under this rule may be provided to interested persons for a filing fee of \$100.

This rule is intended to implement Iowa Code section 502.605(4).

[ARC 2872C, IAB 12/21/16, effective 1/25/17]

191—50.4 to 50.9 Reserved.

DIVISION II
REGISTRATION OF BROKER-DEALERS AND AGENTS

191—50.10(502) Broker-dealer registrations, renewals, amendments, succession, and withdrawals.

50.10(1) An applicant for an initial registration to conduct business as a broker-dealer must:

a. File a current Form BD. If the applicant is a member of FINRA, Form BD shall be filed with CRD. If the applicant is not a member of FINRA, Form BD shall be signed and notarized and filed with the administrator; and

b. Pay a \$200 filing fee. If the applicant is a member of FINRA, the fee shall be remitted to the CRD. If the applicant is not a member of FINRA, the fee shall be remitted to the administrator.

50.10(2) No application for initial registration will be deemed complete for purposes of Iowa Code section 502.406(3) until the applicant has been approved as a member of FINRA.

50.10(3) An applicant that is a member of FINRA and that seeks renewal of a broker-dealer registration shall comply with the renewal time frames established by FINRA for renewal on the CRD system and shall:

a. File with CRD an updated Form BD;

b. Pay to the CRD a \$200 renewal filing fee.

50.10(4) An applicant that is not a member of FINRA and that seeks renewal of a broker-dealer registration shall by November 30 of each year:

a. File with the administrator an updated Form BD, manually signed and notarized;

b. File with the administrator the renewal applicant's most recent audited financial statements if they were not previously submitted to the administrator pursuant to subrule 50.10(1);

c. Pay a \$200 renewal filing fee, which shall be remitted to the administrator.

50.10(5) Failure to comply with the requirements of subrule 50.10(3) or 50.10(4) shall be deemed a request for withdrawal of the broker-dealer registration, and the registration will be terminated as of December 31 of the renewal year.

50.10(6) A registered broker-dealer that is a FINRA member shall submit a withdrawal request by filing an accurate and complete Form BDW with CRD. A registered broker-dealer that is not a FINRA member shall submit a withdrawal request by filing an accurate and complete Form BDW with the administrator.

50.10(7) For purposes of Iowa Code section 502.406(2), a correcting amendment to the information or a record contained in either an initial or renewal application shall be considered to be filed "promptly" with the administrator if filed within 30 days of the event necessitating the correcting amendment.

50.10(8) Succession and change in registration.

a. In the case of an organizational change, including a change in the state of incorporation or form of organization, not involving a material change in financial condition or management, a broker-dealer shall file all applicable amendments to Form BD.

b. In the case of an organizational change, including a change in the state of incorporation or form of organization, involving a material change in financial condition or management, a broker-dealer shall file a new application for registration pursuant to subrule 50.10(1). The filing must include the fee pursuant to paragraph 50.10(1)"*c*" and registration fees for all Iowa-registered agents.

c. In the case of a change in name, a broker-dealer shall file all applicable amendments to Form BD.

50.10(9) Upon the administrator's oral or written request, a broker-dealer shall provide to the administrator the broker-dealer's most recent financial reports, audited or unaudited, within two business days of the request. A broker-dealer may utilize express mail delivery or transmission via electronic means to comply with a request pursuant to this subrule. Financial reports not received by the filing deadline are subject to a late fee of \$50 per day beyond the filing deadline, not to exceed an aggregate penalty of \$500. Imposition of the late fee is not a reportable event. In the event of the broker-dealer's continued noncompliance, the administrator may also pursue sanctions authorized by Iowa Code section 502.412.

50.10(10) Registration exemption for merger and acquisition brokers.

a. Definitions. For purposes of rule 191—50.10(502), in addition to the definitions set forth in rule 191—50.1(502), the following definitions apply:

(1) "*Control*" means the power, directly or indirectly, to direct the management or policies of a company, whether through ownership of securities, by contract or otherwise. There is a presumption of control for any person who meets at least one of the following conditions:

1. Is a director, general partner, member, or manager of a limited liability company, or officer exercising executive responsibility (or similar status or functions).

2. Has the right to vote 20 percent or more of a class of voting securities or the power to sell or direct the sale of 20 percent or more of a class of voting securities.

3. In the case of a partnership or limited liability company, has the right to receive upon dissolution, or has contributed, 20 percent or more of the capital.

(2) "*Eligible privately held company*" means a company that meets both of the following conditions:

1. The company does not have any class of securities:

- Registered, or required to be registered, pursuant to the Securities Exchange Act of 1934 (15 U.S.C. Section 781); or

- For which the company files, or is required to file, periodic information, documents, and reports pursuant to the Securities Exchange Act of 1934 (15 U.S.C. Section 78o(d)).

2. In the fiscal year ending immediately before the fiscal year in which the services of the merger and acquisition broker are initially engaged with respect to the securities transaction, the company meets either or both of the following conditions (determined in accordance with the historical financial accounting records of the company):

- The earnings of the company before interest, taxes, depreciation, and amortization are less than \$25 million.

- The gross revenues of the company are less than \$250 million.

(3) "*Merger and acquisition broker*" means any broker-dealer and any person that is associated with a broker-dealer:

1. That is engaged in the business of effecting securities transactions solely in connection with the transfer of ownership of an eligible privately held company; and

- That is thus engaged regardless of whether that broker-dealer acts on behalf of a seller or buyer; and

- That is thus engaged through the purchase, sale, exchange, issuance, repurchase, or redemption of, or a business combination involving, securities or assets of the eligible privately held company; and

2. That meets both of the following conditions:

- The broker-dealer reasonably believes that, upon consummation of the transaction, any person acquiring securities or assets of the eligible privately held company, acting alone or in concert, will control and, directly or indirectly, will be active in the management of the eligible privately held company or the business conducted with the assets of the eligible privately held company; and

- If any person offered securities in exchange for securities or assets of the eligible privately held company, such person will, prior to becoming legally bound to consummate the transaction, receive or have reasonable access to both of the following:

- o The most recent fiscal year-end financial statements of the issuer of the securities as customarily prepared by its management in the normal course of operations; and

- o If the financial statements of the issuer are audited, reviewed or compiled, all of the following:

- ◆ Any related statement by the independent accountant;

- ◆ A balance sheet dated not more than 120 days before the date of the exchange offer;

- ◆ Information pertaining to the management, business, and results of operations for the period covered by the foregoing financial statements; and

- ◆ Any material loss contingencies of the issuer.

(4) "*Public shell company*" means a company that, at the time of a transaction with an eligible privately held company, meets all three of the following conditions:

1. Has any class of securities registered, or required to be registered, with the SEC pursuant to the Securities Exchange Act of 1934 (15 U.S.C. Section 781), or with respect to which the company files, or is required to file, periodic information, documents, and reports pursuant to the Securities Exchange Act of 1934 (15 U.S.C. 78o(d)).

2. Has no or nominal operations.

3. Has assets consisting of one of the following:

- No or nominal assets.
- Cash and cash equivalents.
- Any amount of cash and cash equivalents and nominal other assets.

b. Merger and acquisition broker exemption from registration requirements.

(1) Exemption. Except as provided in subparagraphs 50.10(10)“b”(2) and (3), a merger and acquisition broker is exempt from the broker-dealer registration requirements and procedures of Iowa Code sections 502.401 and 502.406.

(2) Activities not exempt. A merger and acquisition broker is not exempt from the broker-dealer registration requirements of Iowa Code sections 502.401 and 502.406 if the merger and acquisition broker does any of the following:

1. Directly or indirectly, in connection with the transfer of ownership of an eligible privately held company, receives, holds, transmits, or has custody of the funds or securities to be exchanged by the parties to the transaction.

2. Engages on behalf of an issuer in a public offering of any class of securities that is registered, or is required to be registered, with the SEC under the Securities Exchange Act of 1934 (15 U.S.C. Section 781) or with respect to which the issuer files, or is required to file, periodic information, documents, and reports under the Securities Exchange Act of 1934 (15 U.S.C. Section 78o(d)).

3. Engages on behalf of any party in a transaction involving a public shell company.

(3) Disqualifications. A merger and acquisition broker is not exempt from registration under this subrule if the merger and acquisition broker is subject to any of the following:

1. Suspension or revocation of registration under the Securities Exchange Act of 1934 (15 U.S.C. Section 78o(b)(4));

2. A statutory disqualification described in the Securities Exchange Act of 1934 (15 U.S.C. Section 78c(a)(39));

3. A disqualification under the rules adopted by the SEC pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act (15 U.S.C. Section 77d note)); or

4. A final order described in the Securities Exchange Act of 1934 (15 U.S.C. Section 78o(b)(4)(H)).

(4) Rule of construction. Nothing in this subrule shall be construed to limit any other authority of the administrator to exempt any person, or any class of persons, from Iowa Code chapter 502 or from any provision of this chapter.

c. Inflation adjustment. On July 1, 2023, and every five years thereafter, each dollar amount in 50.10(10)“a”(2)“2” shall be adjusted by the following calculation, and the dollar amount determined under the calculation shall be rounded to the nearest multiple of \$100,000:

(1) Dividing the annual value of the Employment Cost Index for Wages and Salaries, Private Industry Workers (or any successor index), as published by the Bureau of Labor Statistics, for the calendar year preceding the calendar year in which the adjustment is being made by the annual value of such index (or successor index) for the calendar year ending December 31, 2017; and

(2) Multiplying the dollar amount in 50.10(10)“a”(2)“2” by the quotient obtained under subparagraph 50.10(10)“c”(1), above.

This rule is intended to implement Iowa Code section 502.411(2).

[ARC 9169B, IAB 10/20/10, effective 11/24/10; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.11(502) Principals. Every registered broker-dealer shall have at least two officers or partners registered with FINRA as principals, appropriate to the function(s) to be performed.

This rule is intended to implement Iowa Code section 502.406.

[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.12(502) Agent and issuer registrations, renewals and amendments.

50.12(1) Agent registration. Every applicant for registration as an agent of a broker-dealer shall:

a. Pass the Uniform Securities Agent State Law Examination (Series 63) or the Uniform Combined State Law Examination (Series 66);

b. Pass the appropriate qualifying examination administered by FINRA. In the event that an applicant for registration as an agent has received a waiver by FINRA of a FINRA examination otherwise required by this paragraph, the FINRA waiver will be accepted in lieu of the examination requirement;

c. File an accurate and complete Form U-4 with CRD; and

d. Pay a \$40 filing fee to FINRA if applying for registration as an agent of a FINRA member broker-dealer, or to the administrator if applying for registration as an agent of a non-FINRA member broker-dealer.

50.12(2) Any individual who is out of the business of effecting transactions in securities for less than two years from the date of filing an application and who has previously passed an examination required in subrule 50.12(1) shall not be required to retake the examination to be eligible to be relicensed upon application.

50.12(3) Renewals, amendments, and withdrawal requests.

a. A registered agent of a FINRA member broker-dealer shall submit all renewals, renewal fees, amendments to Form U-4, and withdrawal requests to CRD. A withdrawal request shall be made by filing an accurate and complete Form U-5 with CRD.

b. A registered agent of a non-FINRA member broker-dealer shall submit all renewals, renewal fees, amendments to Form U-4, and withdrawal requests to the administrator. A withdrawal request shall be made by filing an accurate and complete Form U-5 with the administrator.

50.12(4) An issuer seeking to employ persons as agents of the issuer within the meaning of Iowa Code section 502.102(2) must apply in writing to the administrator for such authority. The application shall include:

a. A statement of the issuer's intent to employ agents for the sale of its securities;

b. The name, address, social security number, and proof of satisfaction of subrule 50.12(1) for each agent;

c. A complete description of the subject securities;

d. A complete and accurate Form U-4; and

e. A \$40 filing fee.

This rule is intended to implement Iowa Code section 502.406.

[ARC 9169B, IAB 10/20/10, effective 11/24/10; ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.13(502) Agent continuing education requirements. Every registered agent shall comply with all applicable continuing education requirements adopted by FINRA, NYSE, or any other self-regulatory agency. Failure to comply with any such requirements may be a basis for discipline pursuant to Iowa Code section 502.412(4) "n."

This rule is intended to implement Iowa Code section 502.411(8).

[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.14(502) Broker-dealer record-keeping requirements.

50.14(1) Unless otherwise provided by an SEC order, each broker-dealer registered or required to be registered under the Act shall make, maintain and preserve books and records in compliance with SEC Rules 17a-3 (17 CFR 240.17a-3), 17a-4 (17 CFR 240.17a-4), 15c2-6 (17 CFR 240.15c2-6) and 15c2-11 (17 CFR 240.15c2-11).

50.14(2) To the extent that the SEC amends the above-referenced rules, broker-dealers complying with such rules as amended shall not be subject to enforcement action by the administrator for violating this rule to the extent that the violation results solely from the broker-dealer's compliance with the amended rule.

This rule is intended to implement Iowa Code section 502.411(3).

191—50.15(502) Broker-dealer minimum financial requirements and financial reporting requirements.

50.15(1) Each broker-dealer registered or required to be registered under the Act shall comply with SEC Rules 15c3-1 (17 CFR 240.15c3-1), 15c3-2 (17 CFR 240.15c3-2), and 15c3-3 (17 CFR 240.15c3-3).

50.15(2) Each broker-dealer registered or required to be registered under the Act shall comply with SEC Rule 17a-11 (17 CFR 240.17a-11) and shall file with the administrator copies of notices of financial deficiencies, as required under SEC Rule 17a-11 (17 CFR 240.17a-11).

50.15(3) To the extent that the SEC amends the above-referenced rules, broker-dealers complying with such rules as amended shall not be subject to enforcement action by the administrator for violations resulting solely from the broker-dealer's compliance with the amended rules.

This rule is intended to implement Iowa Code section 502.411(2).

191—50.16(502) Dishonest or unethical practices in the securities business.

50.16(1) Dishonest or unethical business practices by any person in the securities business, other than an agent, investment adviser, investment adviser representative, or federal covered investment adviser, as prohibited pursuant to Iowa Code section 502.412(4) "m" include, but are not limited to, the following:

a. Engaging in any unreasonable and unjustifiable delay in delivering securities purchased by any customers or paying, upon request, free credit balances reflecting completed transactions of any customers;

b. Inducing in a customer's account trading which is excessive in size or frequency relative to the financial resources and character of the account;

c. Suitability:

(1) Failing to use reasonable diligence, in regard to the opening and maintenance of every account, to know and retain the essential facts concerning every customer and concerning the authority of each person acting on behalf of such customer;

(2) Recommending a transaction or investment strategy involving a security or securities without a reasonable basis to believe that the transaction or investment strategy is suitable for the customer, based on the information obtained through the reasonable diligence of the member or associated person to ascertain the customer's investment profile. A customer's investment profile includes, but is not limited to, the customer's age, other investments, financial situation and needs, tax status, investment objectives, investment experience, investment time horizon, liquidity needs, risk tolerance, and any other information the customer may disclose to the broker-dealer or agent in connection with such recommendation;

d. Executing a transaction on behalf of a customer without authorization;

e. Exercising any discretionary power in effecting a transaction for a customer's account without first obtaining written discretionary authority from the customer, unless the discretionary power relates solely to the time or price for executing the orders;

f. Executing any transaction in a margin account without securing from the customer a properly executed written margin agreement prior to the initial transaction in the account;

g. Failing to segregate customers' free securities or securities held in safekeeping;

h. Hypothecating a customer's securities without having a lien on them unless the broker-dealer secures from the customer a properly executed written consent promptly after the initial transaction, except as otherwise permitted by SEC rules;

i. Entering into a transaction with or for a customer at a price not reasonably related to the current market price of the security or receiving an unreasonable commission or profit;

j. Failing to furnish on or before the transaction confirmation date a final prospectus, or, if a final prospectus is not available, a preliminary prospectus together with additional documents which include all information that would be set forth in the final prospectus, to a customer purchasing securities in an offering registered pursuant to Iowa Code section 502.303 or 502.304 or that is subject to a notice filing made pursuant to Iowa Code section 502.302. If the offering is not registered, the broker-dealer shall furnish those disclosure documents that are customarily available;

k. Charging unreasonable and inequitable fees for services performed, including miscellaneous services such as collecting moneys due for principal, dividends or interest, exchange or transfer of securities, appraisals, safekeeping, custody of securities or other services regarding the securities business;

l. Offering to buy from or sell to any person any security at a stated price unless the broker-dealer is prepared to purchase or sell the security at the stated price and under the conditions as stated at the time of the offer to buy or sell the security;

m. Representing that a security is being offered to a customer “at the market” or a price relevant to the market price unless the broker-dealer knows or has reasonable grounds to believe that a market for the security exists other than that made, created or controlled by the broker-dealer, or by any person for whom the broker-dealer is acting or with whom the broker-dealer is associated in the distribution, or any person controlled by, controlling or under common control with such broker-dealer;

n. Effecting any transaction in, or inducing the purchase or sale of, any security by any manipulative, deceptive or fraudulent device, practice, plan, program, design or contrivance, including but not limited to:

(1) Effecting any transaction in a security involving no change in the beneficial ownership thereof;

(2) Entertaining an order for the purchase or sale of any security knowing that an order or orders of substantially the same size have been or will be entered by or for the same or different parties at substantially the same time and price for the purpose of creating a false or misleading appearance of active trading in the security or a false or misleading appearance regarding the market for the security. Nothing in this subparagraph shall prohibit a broker-dealer from entering bona fide agency cross transactions for the broker-dealer’s customers;

(3) Effecting, alone or with one or more persons, a series of transactions in any security which creates actual or apparent active trading in a security or raising or depressing the price of the security for the purpose of inducing the purchase or sale of the security by others;

o. Guaranteeing a customer against loss in any securities account of the customer carried by the broker-dealer or in any securities transaction effected by the broker-dealer with or for the customer;

p. Publishing or circulating, or causing to be published or circulated, any notice, circular, advertisement, newspaper article, investment service, or communication of any kind purporting to report any transaction as a purchase or sale of any security unless the broker-dealer believes that the transaction was a bona fide purchase or sale of such security, or purporting to quote the bid price or asked price for any security unless the broker-dealer believes that the quotation represents a bona fide bid for or offer of such security;

q. Using any advertising or sales presentation in a deceptive or misleading fashion including but not limited to a distribution of any nonfactual data, material or presentation based on conjecture, unfounded or unrealistic claims or assertions in any brochure or flyer, or display by words, pictures, graphs or other medium designed to supplement, detract from, supersede or defeat the purpose or effect of any prospectus or disclosure;

r. Failing to disclose that the broker-dealer is controlled by, controlling, affiliated with or under common control of the issuer of any security before entering into any contract with or for a customer for the purchase or sale of the security. The existence of any control or affiliation shall be disclosed to the customer in writing prior to completion of the transaction;

s. Failing to make a bona fide public offering of all of the securities allotted to a broker-dealer for distribution, whether the securities were acquired by the broker-dealer as an underwriter, as a selling group member, or from a member participating in the distribution as an underwriter or selling group member;

t. Failing or refusing to furnish a customer, upon reasonable request, information to which the customer is entitled or to respond to a formal written request or complaint from the customer;

u. Failing or refusing to provide information requested in writing by the administrator within 14 days or a later time as prescribed by the administrator;

v. Extending credit to a customer in violation of the Securities Exchange Act of 1934 or the regulations of the Federal Reserve Board;

- w. Engaging in acts or practices enumerated in rule 191—50.100(502);
- x. Failing in the solicitation of a sale or purchase of an OTC non-NASDAQ security to promptly provide, upon the customer's request, the most current prospectus, the most recent periodic report filed pursuant to Section 13 of the Securities Exchange Act of 1934, or any other available research reports;
- y. Marking any order tickets or confirmations as unsolicited when the transaction is solicited;
- z. Failing to provide each customer, on no greater than a quarterly basis, a statement of account that, for all OTC non-NASDAQ equity securities in the account for which the firm has been a market maker during the reportable period, contains a value for each security based on the closing market bid on a date certain for any month in which activity has occurred in a customer's account;
 - aa. Failing to comply with any applicable provision of the FINRA Conduct Rules or any applicable fair practice or ethical standard promulgated by the SEC or by a self-regulatory organization approved by the SEC; and
 - bb. Engaging in or aiding in "boiler-room" operations or high-pressure tactics in connection with the promotion of speculative offerings or "hot issues" by means of an intensive telephone campaign or unsolicited calls to persons not known by, nor having an account with, the agent or broker-dealer represented by the agent, where the prospective purchaser is encouraged to make a hasty decision to buy, irrespective of the purchaser's investment needs and objectives.

50.16(2) Dishonest or unethical practices by an agent in the securities business as prohibited pursuant to Iowa Code section 502.412(4) "m" include, but are not limited to, the following:

- a. Lending money or securities to or borrowing money or securities from a customer or acting as a custodian for money, securities, or an executed stock power of a customer unless the customer is a member of the agent's immediate family and the act or practice is approved in advance by the agent's supervisory personnel;
- b. Effecting securities transactions not recorded on the regular books or records of the broker-dealer the agent represents unless the transactions are authorized in writing by the broker-dealer prior to executing the transaction;
- c. Establishing or maintaining an account containing fictitious information for the purpose of executing transactions otherwise prohibited;
- d. Sharing, directly or indirectly, in profits or losses in any customer account without the written authorization of the customer and the broker-dealer the agent represents;
- e. Dividing or otherwise splitting the agent's commissions, profits, or other compensation from the purchase or sale of securities with any person who is not registered as an agent for the same broker-dealer or for a broker-dealer under direct or indirect common control;
- f. Soliciting or accepting a gift, directly or indirectly, from an unrelated customer that in the aggregate exceeds \$250 in a calendar year. A gift accepted by an immediate family member from an unrelated customer shall be included in the aggregate limit. An agent shall not solicit or accept from a customer a gift transferred through a relative or third party to the agent's benefit that would have the effect of evading this paragraph;
- g. Soliciting or accepting being named as a beneficiary, executor, or trustee in a will or trust of an unrelated customer;
- h. Evading or otherwise negating the requirements of paragraph 50.16(2) "a," "f" or "g" by terminating the customer relationship for the purpose of soliciting or accepting a loan or gift or being named as a beneficiary, executor or trustee in a will or trust that the agent is otherwise not permitted to solicit or accept. An agent is not in violation of this paragraph if the agent has made a bona fide termination of the customer relationship and conducted no securities-related business or other business for a period of three years with the customer;
- i. Engaging in conduct specified in subrule 50.16(1), paragraphs "b" to "f," "i," "j," "n" to "q," "u," and "w" to "aa";
- j. Engaging in conduct deemed dishonest or unethical in rule 191—50.55(502); and

k. Employing any method or tactic which uses undue pressure, force, fright, or threat, whether explicit or implied, to solicit the purchase or sale of securities, or committing any act which shows that the agent has exerted undue influence over a person.

This rule is intended to implement Iowa Code section 502.412(4) “*m.*”
[ARC 9169B, IAB 10/20/10, effective 11/24/10; ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.17(502) Rules of conduct.

50.17(1) Each broker-dealer, after executing and before completing each transaction with its customer, shall give or send the customer a written confirmation. A broker-dealer not registered pursuant to the Securities Exchange Act of 1934 shall provide a written confirmation including, at a minimum:

- a.* A description of the security purchased or sold, the date of the transaction, the price at which the security was purchased or sold and any commission charged;
- b.* A statement as to whether the broker-dealer was acting for its own account, as the agent for the customer, as the agent for some other person, or as the agent for both the customer and some other person;
- c.* When the broker-dealer is acting as an agent for the customer, the name of the person from whom the security was purchased or to whom it was sold or the fact that such information will be furnished upon the customer’s request.

50.17(2) A broker-dealer registered pursuant to the Securities Exchange Act of 1934 shall comply with all requirements of the Securities Exchange Act of 1934 and its implementing rules regarding written confirmations.

50.17(3) Each broker-dealer shall establish written supervisory procedures and a system for applying those procedures which may reasonably be expected to prevent and detect any violations of Iowa Code chapter 502, its implementing rules, and any orders issued pursuant to it. Each broker-dealer shall designate and qualify a number of supervisory employees reasonable in relation to the number of its registered agents, offices, and transactions in Iowa.

50.17(4) Each broker-dealer whose principal office is located in Iowa shall have at least one partner, officer or registered agent employed on a full-time basis at its principal office.

This rule is intended to implement Iowa Code sections 502.411(3) and 502.412(4) “*i.*”

191—50.18(502) Limited registration of Canadian broker-dealers and agents.

50.18(1) A Canadian broker-dealer may register under this rule if the broker-dealer:

- a.* Files with the administrator an application in the form required by the jurisdiction in which the broker-dealer has its principal office;
- b.* Files with the administrator a consent to service of process on Form U-2;
- c.* Is registered as a broker-dealer and is in good standing in the jurisdiction from which the broker-dealer is effecting transactions into Iowa and files with the administrator satisfactory evidence thereof;
- d.* Is a member of a self-regulatory organization or stock exchange in Canada; and
- e.* Pays a \$200 filing fee.

50.18(2) An agent representing a Canadian broker-dealer registered under this rule in effecting transactions in securities in Iowa may register under this rule if the agent:

- a.* Files with the administrator an application in the form required by the jurisdiction in which the broker-dealer has its principal office;
- b.* Files with the administrator a consent to service of process;
- c.* Is registered and is in good standing in the jurisdiction from which the agent is effecting transactions into Iowa and files with the administrator satisfactory evidence thereof; and
- d.* Pays a \$40 filing fee.

50.18(3) A Canadian broker-dealer that is resident in Canada and has no office or other physical presence in Iowa may, provided that the broker-dealer is registered under this rule, effect transactions in Iowa:

a. With or for a person from Canada temporarily residing in Iowa with whom the Canadian broker-dealer had a bona fide broker-dealer-client relationship before the person entered the United States;

b. With or for a person from Canada currently residing in Iowa whose transactions are in a self-directed, tax-advantaged retirement plan in Canada of which the person is the holder or contributor; or

c. With or through:

- (1) The issuers of the securities involved in the transactions;
- (2) Other registered broker-dealers;
- (3) Banks, savings institutions, trust companies, insurance companies, or investment companies as the term is defined in the Investment Company Act of 1940;
- (4) Pension or profit-sharing trusts; or
- (5) Other financial institutions or institutional investors, whether acting on their own behalf or as trustees.

50.18(4) An agent registered pursuant to subrule 50.18(2) representing a Canadian broker-dealer registered pursuant to subrule 50.18(1) may effect all securities transactions that the broker-dealer is authorized by subrule 50.18(3) to effect.

50.18(5) If no denial order is in effect and no proceeding is pending pursuant to Iowa Code section 502.304, a registration filed pursuant to this rule becomes effective on the forty-fifth day after an application is filed, unless otherwise provided by order of the administrator.

50.18(6) A Canadian broker-dealer registered under this rule shall:

a. Maintain provincial or territorial registration and membership in a self-regulatory organization or stock exchange and remain in good standing in each;

b. Provide, upon the administrator's request, all books and records relating to its business in Iowa as a broker-dealer;

c. Promptly inform the administrator of any criminal action taken against the broker-dealer or of any finding or sanction imposed on the broker-dealer as a result of a self-regulatory or other regulatory action involving fraud, theft, deceit, misrepresentation, or like conduct; and

d. Disclose in writing to each of the broker-dealer's clients in Iowa that the broker-dealer and its agents are not subject to the full regulatory requirements of the Act.

50.18(7) An agent of a Canadian broker-dealer registered under this rule shall:

a. Maintain the agent's provincial or territorial registration and remain in good standing; and

b. Promptly inform the administrator of any criminal action taken against the agent or of any finding or sanction imposed on the agent as a result of a self-regulatory or other regulatory action involving fraud, theft, deceit, misrepresentation, or like conduct.

50.18(8) Renewal applications for Canadian broker-dealers and agents under this rule must be filed before December 1 each year and may be made by filing with the administrator the most recent renewal application, if any, filed in the jurisdiction in which the broker-dealer has its principal office or, if no such renewal application is required, the most recent application filed pursuant to paragraph 50.18(1) "a" or 50.18(2) "a."

50.18(9) Every applicant for registration or renewal registration pursuant to this rule shall pay the applicable fee for broker-dealers and agents as set forth in Iowa Code section 502.410.

50.18(10) A Canadian broker-dealer or agent registered under this rule and in compliance with paragraph 50.18(3) "c" is exempt from all the requirements of the Act, except for the antifraud sections and the requirements set out in this rule.

50.18(11) All transactions in securities effected between Canadian broker-dealers or agents registered under this rule and Canadian persons meeting the requirements of paragraph 50.18(3) "a" or "b" are exempt from Iowa Code sections 502.301 and 502.504.

This rule is intended to implement Iowa Code section 502.401(4).

[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.19(502) Brokerage services by national and state banks.

50.19(1) A bank may, without registering as a broker-dealer, effect:

- a. Transactions pursuant to Iowa Code section 502.102(4) “c”; or
- b. Transactions permitted by order of the administrator.

50.19(2) A bank that has entered into a contract with an Iowa-registered broker-dealer may provide the following ministerial securities services without registering as a broker-dealer:

a. Provide bank customers and the public with a telephone number of the broker-dealer and provide telephone facilities on bank premises for customers and members of the public to use in contacting the broker-dealer;

b. Distribute literature to bank customers and members of the public about particular services provided by the broker-dealer, subject to the requirements of subrule 50.19(4);

c. Provide broker-dealer account applications to bank customers and members of the public and provide assistance in completing the forms. The disclosures required pursuant to subrule 50.19(4), in the form prescribed by subrule 50.19(5), shall be included on either the account application or an attachment to the application. If the disclosures are provided on an attachment to the application, both the application and attachment must be signed by the applicant. The bank may mail the completed account applications to a broker-dealer;

d. Assist bank customers wishing to transfer funds into and out of their bank accounts for securities transactions; and

e. Provide mailers to bank customers and members of the public and assist them in transmitting securities and securities documents to the broker-dealer.

50.19(3) A bank that has entered into a contract with an Iowa-registered broker-dealer may attempt to effect and effect securities transactions without registering as a broker-dealer if all of the following requirements are met:

a. Any bank employee who attempts to effect and effects securities transactions is a registered agent of the broker-dealer and:

- (1) Has passed an acceptable subject matter examination pursuant to paragraph 50.12(1) “a”;
- (2) Has passed the FINRA Series 63 or Series 66 examination;
- (3) Is registered with FINRA; and
- (4) Is registered as an agent of the broker-dealer pursuant to rule 191—50.12(502).

b. If the broker-dealer provides securities services in an area of public access on the bank premises in which banking services are not provided, the bank requires that the broker-dealer clearly distinguish the area in which securities services are provided. If securities services and banking services are provided in the same public area on the bank premises, there shall be a sign clearly identifying the broker-dealer providing the securities services.

c. The bank receives only the following types of compensation from the broker-dealer:

(1) Transaction-related compensation, subject to the restrictions provided by paragraph 50.19(7) “b”;

(2) An administrative fee;

(3) Payments for compensation of employees jointly employed by the bank and the broker-dealer; and

(4) Lease payments.

50.19(4) A bank attempting to effect and effecting securities transactions pursuant to a contract with an Iowa-registered broker-dealer may distribute advertisements or promotional materials without registering as a broker-dealer if the advertisements or promotional materials clearly and prominently:

a. Identify the broker-dealer;

b. State in bold typeface that securities transactions and related earnings or profits are not insured by the FDIC;

c. State that the securities offered by the broker-dealer are not guaranteed by, nor are they obligations of, the bank; and

d. State that the bank and the broker-dealer are separate organizations.

50.19(5) The following or a similar statement printed in bold typeface and capital letters shall satisfy the disclosure requirements of subrule 50.19(4): [NAME OF BROKER-DEALER] IS NOT A BANK, AND SECURITIES OFFERED BY [NAME OF BROKER-DEALER] ARE NOT BACKED OR GUARANTEED BY ANY BANK NOR ARE THEY INSURED BY THE FDIC.

50.19(6) The disclosure requirements of subrule 50.19(4) shall not apply to radio or television advertisements not exceeding 30 seconds in length.

50.19(7) A bank shall not engage in the following securities activities:

a. Distribute prospectuses to bank customers or to members of the public regarding securities unless done so:

- (1) In the exercise of trust functions permitted to banks;
- (2) Pursuant to registration as a broker-dealer; or
- (3) In the performance of securities activities as permitted by subrule 50.19(1), 50.19(2), or 50.19(3);

b. Allow registered joint bank and broker-dealer employees to split commissions or other transaction-related remuneration received from customers with unregistered bank employees;

c. Transmit account statements, confirmations, or other broker-dealer communications to bank customers or members of the public unless the communications contain a disclosure statement as required by subrule 50.19(4);

d. Permit bank employees who are not registered securities agents of the broker-dealer to receive or transmit orders to the broker-dealer from customers or the public, except as permitted by subrule 50.19(1); and

e. Permit bank employees who are not registered agents of the broker-dealer to perform securities functions directly involving customer contact, except as provided in subrules 50.19(1) and 50.19(2).

This rule is intended to implement Iowa Code sections 502.102(4) “c” and 502.401.
[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.20(502) Broker-dealers having contracts with national and state banks.

50.20(1) A broker-dealer engaging in securities activities with banks as permitted by subrules 50.19(2) and 50.19(3) shall maintain for three years and make available to the administrator upon request the following records:

a. Copies of all advertisements and promotional literature disseminated by the bank and broker-dealer regarding securities services and products offered by the broker-dealer to bank customers and the public;

b. Copies of each contract executed between the bank and the broker-dealer which propose to sell securities to bank customers or the public;

c. Copies of new account forms to be completed by bank customers or members of the public who open an account with the broker-dealer;

d. A list of every bank employee who is a registered securities agent of the broker-dealer and the employee’s social security number and CRD number; and

e. Copies of compliance and procedures manuals regarding the securities activities of the bank.

50.20(2) In addition to any responsibilities assumed pursuant to subrule 50.69(5), a broker-dealer engaging in securities transactions pursuant to a contract with a bank as permitted by subrules 50.19(2) and 50.19(3) shall not allow a person who is not an Iowa-registered securities agent of the broker-dealer to use the broker-dealer name, logo, or trademark on business cards or letterheads.

This rule is intended to implement Iowa Code sections 502.102(4) “c” and 502.401.

191—50.21(502) Brokerage services by credit unions, savings banks, and savings and loan institutions.

50.21(1) A credit union, savings bank, or savings and loan institution may, without registering as a broker-dealer, effect:

a. Transactions pursuant to Iowa Code section 502.102(4) “c”; and

b. Transactions permitted by order of the administrator.

50.21(2) A credit union, savings bank, or savings and loan institution that has entered into a contract with an Iowa-registered broker-dealer may provide the following ministerial securities services without registering as a broker-dealer:

a. Provide customers and the public with a telephone number of the broker-dealer and provide telephone facilities on its premises for customers and members of the public to use in contacting the broker-dealer;

b. Distribute literature to its customers and members of the public about particular services provided by the broker-dealer, subject to the requirements of subrule 50.21(4);

c. Provide broker-dealer account applications to its customers and members of the public and provide assistance in completing the forms. The disclosures required pursuant to subrule 50.21(4) shall be included on either the account application or an attachment to the application. If the disclosures are provided on an attachment to the application, both the application and attachment must be signed by the applicant. The credit union, savings bank, or savings and loan institution may mail the completed account applications to a broker-dealer;

d. Assist its customers wishing to transfer funds into and out of their accounts for securities transactions; and

e. Provide mailers to its customers and members of the public and assist them in transmitting securities and securities documents to the broker-dealer.

50.21(3) A credit union, savings bank, or savings and loan institution that has entered into a contract with an Iowa-registered broker-dealer may attempt to effect and effect securities transactions without registering as a broker-dealer if all of the following requirements are met:

a. Any credit union, savings bank, or savings and loan institution employee who attempts to effect and effects securities transactions is a registered agent of the broker-dealer and:

- (1) Has passed an acceptable subject matter examination pursuant to paragraph 50.12(1)“*a*”;
- (2) Has passed the FINRA Series 63 or Series 66 examination;
- (3) Is registered with FINRA; and
- (4) Is registered as an agent of the broker-dealer pursuant to rule 191—50.12(502).

b. If the broker-dealer provides securities services in an area of public access on the credit union, savings bank, or savings and loan institution premises in which credit union, savings bank, or savings and loan institution services are not provided, the credit union, savings bank, or savings and loan institution requires that the broker-dealer clearly distinguish the area in which securities services are provided. If securities services and credit union, savings bank, or savings and loan institution services are provided in the same public area on the bank premises, there shall be a sign clearly identifying the broker-dealer providing the securities services.

c. The credit union, savings bank, or savings and loan institution receives only the following types of compensation from the broker-dealer:

- (1) Transaction-related compensation, subject to the restrictions provided by paragraph 50.19(7)“*b*”;
- (2) An administrative fee;
- (3) Payments for compensation of employees jointly employed by the credit union, savings bank, or savings and loan institution and the broker-dealer; and
- (4) Lease payments.

50.21(4) Credit unions, savings banks, and savings and loan institutions attempting to effect and effecting securities transactions under contracts with Iowa-registered broker-dealers may distribute advertisements or promotional materials without registering as broker-dealers if the advertisements or promotional materials clearly and prominently:

a. Identify the broker-dealer.

b. Disclose in bold print that securities transactions and related earnings or profits are not insured by:

- (1) The FDIC, in the case of savings banks and savings and loan institutions, or
- (2) The NCUA, in the case of credit unions.

c. Disclose that securities offered by the broker-dealer are not guaranteed by, nor are they obligations of, the credit union, savings bank, or savings and loan institution.

d. Disclose that the credit union, savings bank, or savings and loan institution and the broker-dealer are separate organizations.

50.21(5) The following or a similar statement in bold print and capital letters will satisfy the disclosure requirements of subrule 50.21(4): [NAME OF BROKER-DEALER] IS NOT A [SAVINGS BANK, SAVINGS AND LOAN INSTITUTION, OR CREDIT UNION], AND SECURITIES OFFERED BY [NAME OF BROKER-DEALER] ARE NOT BACKED OR GUARANTEED BY ANY [SAVINGS BANK, SAVINGS AND LOAN INSTITUTION, OR CREDIT UNION] NOR ARE THEY INSURED BY THE [FDIC OR NCUA].

50.21(6) The disclosure requirements of subrule 50.21(4) shall not apply to radio or television advertisements not exceeding 30 seconds in length.

50.21(7) Credit unions, savings banks, and savings and loan institutions shall not:

a. Distribute prospectuses for securities to customers or to members of the public except:

- (1) In the exercise of trust functions permitted to them;
- (2) Pursuant to registration as a broker-dealer; or
- (3) In the performance of securities activities as permitted by subrules 50.21(1) to 50.21(3); or

b. Engage in any of the activities proscribed if performed by an unregistered bank by paragraphs 50.19(7) “*b*” to “*e*.”

This rule is intended to implement Iowa Code sections 502.102(4) “*c*” and 502.401. [ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.22(502) Broker-dealers having contracts with credit unions, savings banks, and savings and loan institutions.

50.22(1) A broker-dealer engaging in securities activities with credit unions, savings banks, or savings and loan institutions as permitted by subrules 50.21(2) and 50.21(3) shall maintain for three years and make available to the administrator upon request the following records:

a. Copies of all advertisements and promotional literature disseminated by the credit union, savings bank, or savings and loan institution and the broker-dealer regarding securities services and products offered by the broker-dealer to credit union, savings bank, or savings and loan institution customers and the public;

b. Copies of each contract executed between the credit union, savings bank, or savings and loan institution and the broker-dealer which proposes to sell securities to credit union, savings bank, or savings and loan institution customers or the public;

c. Copies of new account forms to be completed by credit union, savings bank, or savings and loan institution customers or members of the public who open an account with the broker-dealer;

d. A list of every credit union, savings bank, or savings and loan institution employee who is a registered securities agent of the broker-dealer and the employee’s social security number and CRD number; and

e. Copies of compliance and procedures manuals regarding the securities activities of the credit union, savings bank, or savings and loan institution.

50.22(2) In addition to any responsibilities assumed pursuant to subrule 50.69(5), a broker-dealer engaging in securities transactions pursuant to a contract with a credit union, savings bank, or savings and loan institution as permitted by subrules 50.21(2) and 50.21(3) shall not allow a person who is not an Iowa-registered securities agent of the broker-dealer to use the broker-dealer name, logo, or trademark on business cards or letterheads.

This rule is intended to implement Iowa Code sections 502.102(4) “*c*” and 502.401.

191—50.23 to 50.29 Reserved.

AND FEDERAL COVERED INVESTMENT ADVISERS

191—50.30(502) Electronic filing with designated entity.

50.30(1) Designation. Pursuant to Iowa Code sections 502.406 and 502.608(3)“a,” the administrator designates the IARD operated by FINRA to receive and store filings and collect related fees from investment advisers on behalf of the administrator.

50.30(2) Use of IARD. Unless otherwise provided, all investment adviser applications, amendments, reports, notices, related filings and fees required to be filed with the administrator pursuant to the rules promulgated under the Act shall be filed electronically with and transmitted to IARD. The following additional conditions relate to such electronic filings:

a. Electronic signature. When a signature or signatures are required by the particular instructions of any filing to be made through IARD, a duly authorized signatory of the applicant, as required, shall affix the duly authorized signatory’s electronic signature to the filing by typing the duly authorized signatory’s name in the appropriate fields and submitting the filing to IARD. Submission of a filing in this manner shall constitute irrefutable evidence of legal signature by any individuals whose names are typed on the filing.

b. When filed. Solely for purposes of a filing made through IARD, a document is considered filed with the administrator when all fees are received and the filing is accepted by IARD on behalf of the state.

This rule is intended to implement Iowa Code sections 502.102(8), 502.406 and 502.608(3)“a.”
[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.31(502) Investment adviser applications and renewals.

50.31(1) Investment adviser applications—required filings. The application for initial registration as an investment adviser shall be made by:

- a.* Filing Form ADV Parts 1 and 2 with IARD; and
- b.* Remitting the \$100 filing fee to IARD pursuant to Iowa Code section 502.410(3).

50.31(2) Investment adviser applications—discretionary filings. The administrator may require that an application for initial registration also include the following:

- a.* Financial statements as set forth in paragraph 50.42(1)“f” including, but not limited to, a copy of the balance sheet for the last fiscal year and, if the balance sheet is prepared as of a date more than 45 days from the date of the filing of the application, an unaudited balance sheet prepared in accordance with subrule 50.40(7);
- b.* A copy of the surety bond required pursuant to rule 191—50.41(502), if any; and
- c.* Any other information necessary for determining whether registration is appropriate.

50.31(3) Investment adviser renewals—required filings. Annual renewals by investment advisers shall be made by:

- a.* Filing an annual renewal registration with IARD; and
- b.* Remitting the \$100 filing fee to IARD as required pursuant to Iowa Code section 502.410(3).

50.31(4) Investment adviser renewals—discretionary filings. The administrator may require the filing of a copy of the surety bond, if any, required pursuant to rule 191—50.41(502).

50.31(5) Completion of filing. An application for initial or renewal registration is considered filed for the purposes of Iowa Code section 502.406 when the required fee and all required submissions have been received by IARD and the administrator.

50.31(6) Updates and amendments. The investment adviser is under a continuing obligation to update information provided on Form ADV as follows:

- a.* An updated Form ADV must be filed with IARD within 90 days of the end of the investment adviser’s fiscal year; and
- b.* Any amendment to Form ADV must be filed with IARD within 30 days of the event causing the required amendment.

50.31(7) Succession and change in registration.

a. In the case of an organizational change, including a change in the state of incorporation or form of organization, not involving a material change in financial condition or management, an investment adviser shall file all applicable amendments to Form ADV.

b. In the case of an organizational change, including a change in the state of incorporation or form of organization, involving a material change in financial condition or management, an investment adviser must file a new application for registration pursuant to subrule 50.31(1). The filing must include the fee pursuant to paragraph 50.31(1) “*b*” and registration fees for all Iowa-registered investment adviser representatives.

c. In the case of a change in name, an investment adviser shall file all applicable amendments to Form ADV.

This rule is intended to implement Iowa Code sections 502.102(8) and 502.406.
[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.32(502) Application for investment adviser representative registration.

50.32(1) Designation. Pursuant to Iowa Code sections 502.406 and 502.608(3) “*a*,” the administrator designates the CRD operated by FINRA to receive and store filings and collect related fees from investment adviser representatives on behalf of the administrator.

50.32(2) Initial application. The application for initial registration as an investment adviser representative made pursuant to Iowa Code section 502.406(1) shall be made by filing Form U-4 with the CRD. The following shall be submitted to the CRD with the application:

a. Proof of compliance by the investment adviser representative with the examination requirements of rule 191—50.33(502); and

b. If applicable, the \$30 fee required pursuant to Iowa Code section 502.410(4).

50.32(3) Annual renewal. Annual renewals by investment adviser representatives shall be made by:

a. Filing an annual renewal registration with CRD; and

b. If applicable, remitting the \$30 filing fee to CRD as required pursuant to Iowa Code section 502.410(4).

50.32(4) Completion of filing. An application for initial or renewal registration is considered filed for the purposes of Iowa Code section 502.406 when the required fee and all required submissions have been received by the CRD.

50.32(5) Updates, amendments, withdrawals and terminations. The investment adviser representative is under a continuing obligation to update information provided on Form U-4 as follows:

a. Any amendment to information provided on Form U-4 must be filed with CRD within 30 days of the event causing the required amendment; and

b. A withdrawal request or termination must be filed with CRD within 30 days of the event causing the necessity of a withdrawal request or termination. A withdrawal request shall be made by filing an accurate and complete Form U-5 with CRD.

This rule is intended to implement Iowa Code sections 502.102(8) and 502.406.
[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.33(502) Examination requirements.

50.33(1) Except as exempted by subrule 50.33(2), a person applying to be registered as an investment adviser representative shall provide the administrator with proof that the person has obtained either:

a. A passing score on the Series 65 examination.

b. Passing scores on both the Series 7 examination and the Series 66 examination and, if the application is received by the administrator on or after October 1, 2018, FINRA’s Securities Industry Essentials Exam. In the event that an applicant for registration as an investment adviser representative has received a waiver by FINRA of the Series 7 examination otherwise required by this paragraph, the FINRA waiver will be accepted in lieu of the examination requirement.

50.33(2) Unless otherwise ordered by the administrator in connection with a violation of the Act, the following individuals shall be exempt from the examination requirements of subrule 50.33(1):

a. Any individual who is registered as an investment adviser or investment adviser representative in any jurisdiction in the United States on or before January 19, 2000.

b. Any individual who is registered as an investment adviser or investment adviser representative in any jurisdiction in the United States after November 1, 2001, provided that the jurisdiction in which the investment adviser or investment adviser representative is registered requires the passage of the examinations in subrule 50.33(1).

c. Any individual who has not been registered as an investment adviser or investment adviser representative in any jurisdiction for a period of two years shall be required to comply with the examination requirements of this rule.

d. Any individual who currently holds one of the following professional designations:

(1) Certified Financial Planner or CFP designation awarded by the Certified Financial Planner Board of Standards, Inc.;

(2) Chartered Financial Consultant (ChFC) designation awarded by The American College, Bryn Mawr, Pennsylvania;

(3) Personal Financial Specialist (PFS) designation administered by the American Institute of Certified Public Accountants;

(4) Chartered Financial Analyst (CFA) designation granted by the Association for Investment Management and Research;

(5) Chartered Investment Counselor (CIC) designation granted by the Investment Counsel Association of America; or

(6) Any other professional designation recognized by order of the administrator.

This rule is intended to implement Iowa Code section 502.412(5).

[ARC 9169B, IAB 10/20/10, effective 11/24/10; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.34(502) Notice filing requirements for federal covered investment advisers.

50.34(1) Notice filing. The notice filing for a federal covered investment adviser pursuant to Iowa Code section 502.405 shall be filed with IARD on an executed Form ADV. A notice filing of a federal covered investment adviser shall be deemed filed for purposes of this subrule when Form ADV and the fee of \$100 required pursuant to Iowa Code section 502.410(5) are received by IARD.

50.34(2) Form ADV Part 2. The administrator may:

a. Accept a copy of Part 2 of Form ADV as filed electronically with IARD; or

b. Deem Part 2 of Form ADV filed if a federal covered investment adviser provides, within five days of a request, Part 2 of Form ADV to the administrator. Because the administrator deems Part 2 of Form ADV to be filed, a federal covered investment adviser is not required to submit Part 2 of Form ADV to the administrator unless specifically requested to do so.

50.34(3) Renewal. The annual renewal of the notice filing for a federal covered investment adviser pursuant to Iowa Code section 502.405 shall be filed with IARD. The renewal of the notice filing shall be deemed filed for purposes of this subrule when the \$100 fee required pursuant to Iowa Code section 502.410(5) is accepted by IARD.

50.34(4) Updates and amendments. A federal covered investment adviser must file with IARD any amendments to the federal covered investment adviser's Form ADV.

This rule is intended to implement Iowa Code section 502.405.

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.35(502) Withdrawal of investment adviser registration. The application for withdrawal of registration as an investment adviser pursuant to Iowa Code section 502.409 shall be completed on Form ADV-W and filed with IARD.

This rule is intended to implement Iowa Code section 502.409.

191—50.36(502) Investment adviser brochure.

50.36(1) General requirements.

a. Unless otherwise provided in this rule, an investment adviser registered or required to be registered pursuant to Section 403 of the Act shall furnish each advisory client and prospective advisory client with:

- (1) A brochure which may be a copy of Part 2A of its Form ADV or written documents containing the information required by Part 2A of Form ADV;
 - (2) A copy of its Part 2B brochure supplement for each individual:
 1. Providing investment advice and having direct contact with clients in this state; or
 2. Exercising discretion over assets of clients in this state, even if no direct contact is involved;
 - (3) A copy of its Part 2A Appendix 1 wrap fee brochure if the investment adviser sponsors or participates in a wrap fee account;
 - (4) A summary of material changes, which may be included in Form ADV Part 2 or given as a separate document; and
 - (5) Such other information as the administrator may require.
- b.* The brochure must comply with the language, organizational format and filing requirements specified in the Instructions to Form ADV Part 2.
- c.* Notwithstanding the SEC's Instructions for Part 2A of Form ADV, fee changes constitute material changes requiring an update to all parts of Form ADV.

50.36(2) Delivery.

a. Initial delivery. An investment adviser, except as provided in paragraph 50.36(2)“c,” shall deliver the Part 2A brochure and any brochure supplements required by rule 191—50.36(502) to a prospective advisory client:

- (1) Not less than 48 hours before an investment adviser enters into any advisory contract with such client or prospective client; or
- (2) At the time an advisory client enters into any such contract, if the advisory client has a right to terminate the contract without penalty within five business days after entering into the contract.

b. Annual delivery. An investment adviser, except as provided in paragraph 50.36(2)“c,” must:

- (1) Deliver within 120 days of the end of its fiscal year a free, updated brochure and related brochure supplements which include or are accompanied by a summary of material changes; or
- (2) Deliver a summary of material changes that includes an offer to provide a copy of the updated brochures and supplements and information on how the client may obtain a copy of the brochures and supplements, provided that advisers are not required to deliver a summary of material changes if no material changes have taken place since the last summary and brochure delivery.

c. Exceptions to delivery. Delivery of the brochure and related brochure supplements required by paragraphs 50.36(2)“a” and “b” need not be made to:

- (1) Clients who receive only impersonal advice and who pay less than \$500 in fees per year; or
- (2) An investment company registered under the Investment Company Act of 1940; or
- (3) A business development company as defined in the Investment Company Act of 1940 and whose advisory contract meets the requirements of Section 15c of that Act.

d. Electronic delivery. Delivery of the brochure and related supplements may be made electronically if the investment adviser:

- (1) In the case of an initial delivery to a potential client, obtains verification that readable copies of the brochure and supplements were received by the client;
- (2) In the case of other than initial deliveries, obtains each client's prior consent to provide the brochure and supplements electronically;
- (3) Prepares the electronically delivered brochure and supplements in the format prescribed in subrule 50.36(1) and Instructions to Form ADV Part 2;
- (4) Delivers the brochure and supplements in a format that can be retained by the client in either electronic or paper form; or
- (5) Establishes procedures to supervise personnel transmitting the brochure and supplements and to prevent violations of this rule.

50.36(3) Other disclosures. Nothing in this rule shall relieve any investment adviser from any obligation pursuant to any provision of the Act or the rules thereunder or other federal or state law to disclose any information to its advisory clients or prospective advisory clients not specifically required by this rule.

50.36(4) Definitions. For the purpose of this rule:

a. "Contract for impersonal advisory services" means any contract relating solely to the provision of investment advisory services:

- (1) By means of written material or oral statements which do not purport to meet the objectives or needs of specific individuals or accounts;
- (2) Through the issuance of statistical information containing no expression of opinion as to the investment merits of a particular security; or
- (3) Any combination of the foregoing services.

b. "Entering into," in reference to an advisory contract, does not include an extension or renewal without material change of any such contract which is in effect immediately prior to such extension or renewal.

This rule is intended to implement Iowa Code section 502.411(7).
[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.37(502) Cash solicitation.

50.37(1) Payment of a cash fee, directly or indirectly, by an investment adviser to a solicitor for solicitation activities shall constitute an act, practice, or course of conduct operating as a fraud or deceit upon a person, pursuant to Iowa Code section 502.502(2), if:

- a. The solicitor:*
- (1) Is subject to an order issued by the administrator pursuant to Iowa Code section 502.412(4);
 - (2) Has been convicted of a felony or within the previous ten years has been convicted of a misdemeanor involving conduct described in Iowa Code section 502.412(4) "*c*"; or
 - (3) Is found by the administrator to have engaged or has been convicted of engaging in any of the conduct specified in Iowa Code section 502.505, 502.412(4) "*b*" or 502.412(4) "*i*"; has materially aided in violating Iowa Code section 502.412(4) "*d*"; or is subject to an order, judgment, or decree pursuant to Iowa Code section 502.412(4) "*d*" to "*f*."

b. The cash fee is not paid pursuant to a written agreement to which the investment adviser is a party. If the cash fee is paid pursuant to a written agreement, the written agreement must:

- (1) Describe the solicitation activities to be engaged in by the solicitor on behalf of the investment adviser and the compensation to be received for the solicitation activities;
- (2) Contain an undertaking by the solicitor to perform the solicitor's duties under the agreement in a manner consistent with the instructions of the investment adviser and the provisions of the Act and its implementing rules, as applicable; and
- (3) Require that the solicitor, at the time of any solicitation activities for which compensation is paid or is to be paid by the investment adviser, provide the client with a current copy of the investment adviser's written disclosure statement required by subparagraph 50.36(2) "*a*"(2) or SEC Rule 204-3, if applicable, and a separate written disclosure statement as described in subrule 50.37(2). Prior to or upon entering into a written or oral investment advisory contract with a client, the investment adviser shall obtain a signed and dated acknowledgment of receipt by the client of the investment adviser's and solicitor's written disclosure statements. Additionally, the investment adviser shall make a bona fide effort to ascertain whether the solicitor has complied in all aspects with the written agreement, and shall have a reasonable basis for believing that the solicitor has complied.

c. The cash fee is paid to a solicitor:

- (1) For solicitation activities regarding anything other than impersonal advisory services; or
- (2) Who is a partner, officer, director, or employee of the investment adviser or is a partner, officer, director, or employee of a person who controls, is controlled by, or is under common control with the investment adviser without disclosure of the status of the solicitor as a partner, officer, director, or employee of the investment adviser or other person and of any affiliation between the investment adviser and the solicitor to the client at the time of solicitation or referral.

50.37(2) The separate written disclosure statement required to be furnished pursuant to subparagraph 50.37(1) "*b*"(3) shall contain the following information:

- a. The name of the solicitor;*
- b. The name of the investment adviser;*

- c. The nature of the relationship, including any affiliation, between the solicitor and the investment adviser;
- d. A statement that the solicitor will be compensated for the solicitor's solicitation services by the investment adviser;
- e. The terms of such compensation arrangement, including a description of the compensation paid or to be paid to the solicitor; and
- f. The amount, if any, the client will be charged for the cost of obtaining the client's account in addition to the advisory fee, and the differential, if any, in advisory fees charged by the investment adviser if the differential is the result of the investment adviser's agreement to compensate the solicitor for soliciting or referring clients.

50.37(3) Nothing in this rule relieves any person of any fiduciary duty or other obligation to which the person may be subject pursuant to contract or law.

50.37(4) For the purpose of this rule:

"*Client*" includes any prospective client.

"*Impersonal advisory services*" means investment advisory services provided solely through written materials or oral statements not purporting to meet the objectives or needs of the specific client, statistical information containing no expressions of opinion as to the investment merits of particular securities, or any combination of the foregoing.

"*Principal place of business*" of an investment adviser means the executive office of the investment adviser from which the officers, partners, or managers of the investment adviser direct, control, and coordinate the activities of the investment adviser.

"*Solicitor*" means any person who, directly or indirectly, solicits any client for or refers any client to an investment adviser.

50.37(5) An investment adviser shall retain a copy of each written agreement, acknowledgment and solicitor disclosure statement required by this rule in accordance with Iowa Code section 502.411(3) and paragraph 50.42(1)"o." However, an investment adviser registered in Iowa whose principal place of business is located outside Iowa shall not be subject to the record maintenance requirements of this subrule and the applicable provisions of paragraph 50.42(1)"o" if:

- a. The investment adviser is registered or licensed as an investment adviser in the state in which the investment adviser maintains the investment adviser's principal place of business;
- b. The investment adviser complies with the applicable books and records requirements of the state in which the investment adviser maintains the investment adviser's principal place of business; and
- c. The provisions of this rule would require the investment adviser to maintain books or records in addition to those required by the laws of the state in which the investment adviser maintains the investment adviser's principal place of business.

This rule is intended to implement Iowa Code section 502.502(2).

191—50.38(502) Prohibited conduct in providing investment advice.

50.38(1) An investment adviser, an investment adviser representative, or a federal covered investment adviser is a fiduciary and has a duty to act primarily for the benefit of its clients. Rule 191—50.38(502) applies to federal covered investment advisers to the extent that the alleged conduct is fraudulent, deceptive, or as otherwise permitted by the NSMIA. While the extent and nature of this duty varies according to the nature of the relationship between an investment adviser, an investment adviser representative, or a federal covered investment adviser and its clients and the circumstances of each case, an investment adviser, an investment adviser representative, or a federal covered investment adviser shall not engage in prohibited fraudulent, deceptive, or manipulative conduct including, but not limited to:

- a. Recommending to a client to whom investment advisory services are provided the purchase, sale, or exchange of any security without reasonable grounds to believe that the recommendation is suitable for the client on the basis of information furnished by the client after reasonable inquiry concerning the client's investment objectives, financial situation and needs, and any other information

known by the investment adviser, investment adviser representative, or federal covered investment adviser;

b. Exercising any discretionary authority in placing an order for the purchase or sale of securities for a client without obtaining written discretionary authority from the client within ten business days after the date of the first transaction placed pursuant to discretionary authority, unless the discretionary authority relates solely to the price at which, or the time when, an order for a definite amount of a specified security shall be executed, or both;

c. Inducing trading in a client's account that is excessive in size or frequency compared to the financial resources, investment objectives, and character of the account;

d. Placing an order to purchase or sell a security for a client account without authority to do so;

e. Placing an order to purchase or sell a security for a client account upon instruction of a third party without first obtaining a written third-party trading authorization from the client;

f. Borrowing money or securities from a client unless the client is a broker-dealer, an affiliate of the investment adviser, or a financial institution engaged in the business of loaning funds;

g. Loaning money or securities to a client unless the investment adviser is a financial institution engaged in the business of loaning funds or the client is an affiliate of the investment adviser;

h. Misrepresenting to any client, or prospective client, the qualifications of the investment adviser, investment adviser representative, or federal covered investment adviser or any employee, or affiliated persons, or misrepresenting the nature of the advisory services being offered or fees to be charged for such service, or omitting to state a material fact necessary to make the statements made regarding qualifications, services or fees, in light of the circumstances under which they are made, not misleading;

i. Providing a report or recommendation to any advisory client prepared by someone other than the investment adviser, investment adviser representative, or federal covered investment adviser without disclosing that fact. This prohibition does not apply when the investment adviser, investment adviser representative, or federal covered investment adviser uses published research reports or statistical analyses to render advice or when an investment adviser, investment adviser representative, or federal covered investment adviser orders such a report in the normal course of providing service;

j. Charging a client an unreasonable fee;

k. Failing to disclose to clients in writing before any advice is rendered any material conflict of interest regarding the investment adviser, investment adviser representative, or federal covered investment adviser or any of its employees, or affiliated persons which could reasonably be expected to impair the rendering of unbiased and objective advice including, but not limited to:

(1) Compensation arrangements connected with investment advisory services to clients which are in addition to compensation from such clients for such services; and

(2) Charging a client an investment advisory fee for rendering advice when compensation for effecting securities transactions pursuant to such advice will be received by the investment adviser, investment adviser representative, or federal covered investment adviser or its employees or affiliated persons;

l. Knowingly selling any security to or purchasing any security from a client while acting as principal for an advisory account of the investment adviser, investment adviser representative, or federal covered investment adviser, or knowingly effecting any sale or purchase of any security for the account of the client while acting as broker-dealer for a person other than the client, without disclosing to the client in writing before the completion of the transaction the capacity in which the investment adviser, investment adviser representative, or federal covered investment adviser is acting and without obtaining the written consent of the client to the transaction.

(1) The prohibitions of paragraph 50.38(1) "l" shall not apply to any transaction with a customer of a broker-dealer if the broker-dealer is not acting as an investment adviser in relation to the transaction.

(2) The prohibitions of paragraph 50.38(1) "l" shall not apply to any transaction with a customer of a broker-dealer if the broker-dealer acts solely as an investment adviser:

1. By means of publicly distributed written materials or publicly made oral statements;

2. By means of written materials or oral statements not purporting to meet the objectives or needs of specific individuals or accounts;

3. Through the issuance of statistical information containing no expressions of opinion as to the investment merits of a particular security; or

4. Any combination of the foregoing services.

(3) Publicly distributed written materials or publicly made oral statements shall disclose that, if the purchaser of the advisory communication uses the investment adviser's services in connection with the sale or purchase of a security which is a subject of the communication, the investment adviser may act as principal for its own account or as agent for another person. Compliance by the investment adviser with the foregoing disclosure requirement shall not relieve the investment adviser of any other disclosure obligations under the Act.

(4) Definitions for purposes of rule 191—50.38(502):

1. "*Publicly distributed written materials*" means written materials which are distributed to 35 or more persons who pay for those materials.

2. "*Publicly made oral statements*" means oral statements made simultaneously to 35 or more persons who pay for access to those statements.

m. Guaranteeing a client that a specific result will be achieved with advice rendered;

n. Making, in the solicitation of clients, any untrue statement of a material fact, or omitting to state a material fact necessary in order to make the statement made, in light of the circumstances under which they are made, not misleading;

o. Disclosing the identity, affairs, or investments of any client unless required by law to do so, or unless disclosed with the client's consent;

p. Taking any action, directly or indirectly, regarding securities or funds in which any client has any beneficial interest when the investment adviser has custody or possession of such securities or funds and when the action of the investment adviser or investment adviser representative is subject to and in violation of the custody requirements provided by rule 191—50.39(502);

q. Failing to establish, maintain, and enforce written policies and procedures reasonably designed to prevent the misuse of material nonpublic information in violation of Section 204A of the Investment Advisers Act of 1940;

r. Engaging in any act, practice, or course of business which is fraudulent, deceptive, manipulative, or unethical;

s. Engaging in conduct or any act, indirectly or through or by any other person, which is unlawful for such person to do directly under the provisions of this Act, its implementing rules, or order of the administrator;

t. Failing to disclose or providing incomplete disclosure to a client regarding any securities-related activities, or engaging in deceptive practices;

u. Soliciting or accepting a gift, directly or indirectly, from an unrelated customer that in the aggregate exceeds \$250 in a calendar year. A gift accepted by an immediate family member from an unrelated client shall be included in the aggregate limit. An investment adviser shall not solicit or accept from a client a gift transferred through a relative or third party to the investment adviser's benefit that would have the effect of evading this paragraph;

v. Soliciting or accepting being named as a beneficiary, executor, or trustee in a will or trust of an unrelated customer;

w. Evading or otherwise negating the requirements of paragraph 50.38(1) "*f*," "*g*," "*u*" or "*v*," by terminating the customer relationship for the purpose of soliciting or accepting a loan or gift or being named as a beneficiary, executor or trustee in a will or trust that the agent is otherwise not permitted to solicit or accept. An investment adviser or investment adviser representative will not be in violation of this rule if the investment adviser or investment adviser representative has made a bona fide termination of the client relationship and conducted no securities-related business or other business for a period of three years with the client;

x. Engaging in conduct deemed dishonest or unethical in rule 191—50.55(502); and

y. Employing any method or tactic which uses undue pressure, force, fright, or threat, whether explicit or implied, in connection with providing investment advice, or committing any act which shows that an investment adviser or investment adviser representative has exerted undue influence over a client.

50.38(2) An investment adviser, investment adviser representative, or federal covered investment adviser shall not, directly or indirectly, publish, circulate, or distribute any advertisement that does any one of the following:

a. Refers to any testimonial of any kind concerning the investment adviser, investment adviser representative, or federal covered investment adviser or concerning any advice, analysis, report, or other service rendered by such investment adviser, investment adviser representative, or federal covered investment adviser.

b. Refers to past specific recommendations of the investment adviser, investment adviser representative, or federal covered investment adviser that were or would have been profitable to any person, except that an investment adviser, investment adviser representative, or federal covered investment adviser may furnish or offer to furnish a list of all recommendations made by the investment adviser, investment adviser representative, or federal covered investment adviser within the immediately preceding period of not less than one year if the advertisement or list also includes both of the following:

(1) The name of each security recommended, the date and nature of each recommendation, the market price at that time, the price at which the recommendation was to be acted upon, and the most recently available market price of each such security.

(2) A legend on the first page in prominent print or type that states that the reader should not assume that recommendations made in the future will be profitable or will equal the performance of the securities in the list.

c. Represents that any graph, chart, formula, or other device being offered can in and of itself be used to determine which securities to buy or sell, or when to buy or sell them; or which represents, directly or indirectly, that any graph, chart, formula, or other device being offered will assist any person in making that person's own decisions as to which securities to buy or sell, or when to buy or sell them, without prominently disclosing in such advertisement the limitations thereof and the difficulties with respect to the use of any graph, chart, formula or device.

d. Represents that any report, analysis, or other service will be furnished for free or without charge, unless such report, analysis, or other service actually is or will be furnished entirely free and without any direct or indirect condition or obligation.

e. Represents that the administrator has approved any advertisement.

f. Contains any untrue statement of a material fact, or any statement that is otherwise false or misleading.

50.38(3) With respect to federal covered investment advisers, the provisions of subrule 50.38(2) apply only to the extent permitted by Section 203A of the Investment Advisers Act of 1940.

50.38(4) For the purposes of subrule 50.38(2), the term "advertisement" shall include any notice, circular, letter, or other written communication addressed to more than one person, or any notice or other announcement in any electronic or paper publication, by radio or television, or by any medium, that offers any one of the following:

a. Any analysis, report, or publication concerning securities.

b. Any analysis, report, or publication that is to be used in making any determination as to when to buy or sell any security, or which security to buy or sell.

c. Any graph, chart, formula, or other device to be used in making any determination as to when to buy or sell any security, or which security to buy or sell.

d. Any other investment advisory service with regard to securities.

50.38(5) The prohibitions of rule 191—50.38(502) shall not apply to an investment adviser effecting an agency cross transaction for an advisory client provided the following conditions are met:

a. The advisory client executes a written consent prospectively authorizing the investment adviser to effect agency cross transactions for such client;

b. Before obtaining such written consent from the client, the investment adviser makes full written disclosure to the client that, with respect to agency cross transactions, the investment adviser will act as

broker-dealer for, receive commissions from, and have a potentially conflicting division of loyalties and responsibilities regarding both parties to the transactions;

c. At or before the completion of each agency cross transaction, the investment adviser or any other person relying on subrule 50.38(5) sends the client a written confirmation. The written confirmation shall include:

- (1) A statement of the nature of the transaction;
- (2) The date the transaction took place;
- (3) An offer to furnish, upon request, the time when the transaction took place; and
- (4) The source and amount of any other remuneration the investment adviser received or will receive in connection with the transaction. In the case of a purchase, if the investment adviser was not participating in a distribution, or, in the case of a sale, if the investment adviser was not participating in a tender offer, the written confirmation may state whether the investment adviser has been receiving or will receive any other remuneration and that the investment adviser will furnish the source and amount of such remuneration to the client upon the client's written request;

d. At least annually, and with or as part of any written statement or summary of the account from the investment adviser, the investment adviser or any other person relying on subrule 50.38(5) sends each client a written disclosure statement identifying:

- (1) The total number of agency cross transactions for the client during the period since the date of the last such statement or summary; and
- (2) The total amount of all commissions or other remuneration the investment adviser received or will receive in connection with agency cross transactions for the client during the period;

e. Each written disclosure and confirmation required by subrule 50.38(5) must include a conspicuous statement indicating that the client may revoke the written consent required under paragraph 50.38(5) "a" at any time by providing written notice to the investment adviser;

f. No agency cross transaction may be effected in which the same investment adviser recommended the transaction to both any seller and any purchaser;

g. "Agency cross transaction for an advisory client," for purposes of subrule 50.38(5), means a transaction in which a person acts as an investment adviser in relation to a transaction in which the investment adviser, or any person controlling, controlled by, or under common control with such investment adviser, including an investment adviser representative, acts as a broker-dealer for both the advisory client and for another client on the other side of the transaction. When acting in such capacity, such person acting as an investment adviser, or any person controlling, controlled by, or under common control with such investment adviser, including an investment adviser representative, is required to be registered as a broker-dealer in this state unless excluded from the definition of investment adviser;

h. Nothing in subrule 50.38(5) shall be construed to relieve an investment adviser or investment adviser representative from acting in the best interests of the client, including fulfilling the duty with respect to the best price and execution for the particular transaction for the client, nor shall subrule 50.38(5) relieve any investment adviser or investment adviser representative of any other disclosure obligations imposed by the Act.

This rule is intended to implement Iowa Code section 502.502(2).
[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.39(502) Custody of client funds or securities by investment advisers.

50.39(1) Safekeeping required. It is unlawful and deemed to be a fraudulent, deceptive, or manipulative act, practice, or course of business for an investment adviser, registered or required to be registered, to have custody of client funds or securities unless the following conditions are met:

a. *Notice to administrator.* The investment adviser notifies the administrator promptly in writing that the investment adviser has or may have custody. Such notification is required to be given on Form ADV.

b. *Qualified custodian.* A qualified custodian maintains those funds and securities:

- (1) In a separate account for each client under that client's name; or

(2) In accounts that contain only the investment adviser's clients' funds and securities, under the investment adviser's name as agent or trustee for the clients, or, in the case of a pooled investment vehicle that the investment adviser manages, in the name of the pooled investment vehicle.

c. Notice to clients. If an investment adviser opens an account with a qualified custodian on its client's behalf, under the client's name, under the name of the investment adviser as agent, or under the name of a pooled investment vehicle, the investment adviser must notify the client in writing of the qualified custodian's name and address and the manner in which the funds or securities are maintained, promptly when the account is opened and following any changes to this information. If the investment adviser sends account statements to a client to whom the investment adviser is required to provide this notice, the investment adviser must include in the notification provided to that client and in any subsequent account statement the investment adviser sends that client a statement urging the client to compare the account statements from the custodian with those from the investment adviser.

d. Account statements. The investment adviser has a reasonable basis, after due inquiry, for believing that the qualified custodian sends an account statement, at least quarterly, to each client for which the qualified custodian maintains funds or securities, identifying the amount of funds and of each security in the account at the end of the period and setting forth all transactions in the account during that period.

e. Special rule for limited partnerships and limited liability companies. If the investment adviser or a related person is a general partner of a limited partnership (or managing member of a limited liability company, or holds a comparable position for another type of pooled investment vehicle):

(1) The account statements required under paragraph 50.39(1) "d" must be sent to each limited partner (or member or other beneficial owner); and

(2) The investment adviser must:

1. Enter into a written agreement with an independent party who is obliged to act in the best interest of the limited partners, members, or other beneficial owners to review all fees, expenses and capital withdrawals from the pooled accounts; and

2. Send all invoices or receipts to the independent party, detailing the amount of the fee, expenses or capital withdrawal and the method of calculation such that the independent party can:

- Determine that the payment is in accordance with the pooled investment vehicle standards (generally the partnership agreement or membership agreement); and

- Forward, to the qualified custodian, approval for payment of the invoice with a copy to the investment adviser.

f. Independent verification. The client funds and securities of which the investment adviser has custody are verified by actual examination at least once during each calendar year, by an independent certified public accountant (CPA), pursuant to a written agreement between the investment adviser and the independent CPA, at a time that is chosen by the independent CPA without prior notice or announcement to the investment adviser and that is irregular from year to year. The written agreement must provide for the first examination to occur within six months of execution of the written agreement, except that, if the investment adviser maintains client funds or securities pursuant to rule 191—50.38(502) as a qualified custodian, the agreement must provide for the first examination to occur no later than six months after the investment adviser obtains the internal control report. The written agreement must require the independent CPA to:

(1) File a certificate on Form ADV-E with the administrator within 120 days of the time chosen by the independent CPA in paragraph 50.39(1) "f," stating that the independent CPA has examined the funds and securities and describing the nature and extent of the examination;

(2) Notify the administrator within one business day of the finding of any material discrepancies during the course of the examination, by means of a facsimile transmission or electronic mail, followed by first-class mail, directed to the attention of the administrator; and

(3) File within four business days of the resignation or dismissal from, or other termination of, the engagement, or removing itself or being removed from consideration for being reappointed, Form ADV-E accompanied by a statement that includes:

1. The date of such resignation, dismissal, removal, or other termination, and the name, address, and contact information of the independent CPA; and

2. An explanation of any problems relating to examination scope or procedure that contributed to such resignation, dismissal, removal, or other termination.

g. Investment advisers acting as qualified custodians. If the investment adviser maintains, or if the investment adviser has custody because a related person maintains, client funds or securities pursuant to rule 191—50.39(502) as a qualified custodian in connection with advisory services the investment adviser provides to clients:

(1) The independent CPA that the investment adviser retains to perform the independent verification required by paragraph 50.39(1) “*f*” must be registered with, and subject to regular inspection as of the commencement of the professional engagement period, and as of each calendar year-end, by, the Public Company Accounting Oversight Board in accordance with its rules; and

(2) The investment adviser must obtain, or receive from its related person, within six months of execution of the written agreement and thereafter no less frequently than once each calendar year a written internal control report prepared by an independent CPA.

1. The internal control report must include an opinion of an independent CPA as to whether controls have been placed in operation as of a specific date, and are suitably designed and are operating effectively to meet control objectives relating to custodial services, including the safeguarding of funds and securities held by either the investment adviser or a related person on behalf of the investment adviser’s clients, during the year;

2. The independent CPA must verify that the funds and securities are reconciled to a custodian other than the investment adviser or the investment adviser’s related person; and

3. The independent CPA must be registered with, and subject to regular inspection as of the commencement of the professional engagement period, and as of each calendar year-end, by, the Public Company Accounting Oversight Board in accordance with its rules.

h. Independent representatives. A client may designate an independent representative to receive, on the client’s behalf, notices and account statements as required under paragraphs 50.39(1) “*c*” and “*d*.”

50.39(2) Exceptions.

a. Shares of mutual funds. With respect to shares of an open-end company as defined in Section 5(a)(1) of the Investment Company Act of 1940 (“mutual fund”), the investment adviser may use the mutual fund transfer agent in lieu of a qualified custodian for purposes of complying with subrule 50.39(1).

b. Certain privately offered securities.

(1) The investment adviser is not required to comply with paragraph 50.39(1) “*b*” with respect to securities that are:

1. Acquired from the issuer in a transaction or chain of transactions not involving any public offering;

2. Uncertificated and ownership thereof is recorded only on the books of the issuer or its transfer agent in the name of the client; and

3. Transferable only with prior consent of the issuer or holders of the outstanding securities of the issuer.

(2) Notwithstanding subparagraph 50.39(2) “*b*”(1), the provisions of paragraph 50.39(2) “*b*” are available with respect to securities held for the account of a limited partnership (or limited liability company, or other type of pooled investment vehicle) only if the limited partnership is audited, and the audited financial statements are distributed, as described in paragraph 50.39(2) “*d*,” and the investment adviser notifies the administrator in writing that the investment adviser intends to provide audited financial statements, as described in this subparagraph. Such notification is required to be provided on Form ADV.

c. Fee deduction. Notwithstanding paragraph 50.39(1) “*f*,” an investment adviser is not required to obtain an independent verification of client funds and securities maintained by a qualified custodian if all of the following conditions are met:

(1) The investment adviser has custody of the funds and securities solely as a consequence of its authority to make withdrawals from client accounts to pay its advisory fee;

(2) The investment adviser has written authorization from the client to deduct advisory fees from the account held with the qualified custodian;

(3) Each time a fee is directly deducted from a client account, the investment adviser concurrently:

1. Sends the independent party designated pursuant to subparagraph 50.39(1)“e”(2) an invoice or statement of the amount of the fee to be deducted from the client’s account; and

2. Sends the client an invoice or statement itemizing the fee. Itemization includes the formula used to calculate the fee, the amount of assets under management on which the fee is based, and the time period covered by the fee; and

(4) The investment adviser notifies the administrator in writing that the investment adviser intends to use the safeguards provided in paragraph 50.39(2)“c.” Such notification is required to be given on Form ADV.

d. Limited partnerships subject to annual audit. An investment adviser is not required to comply with paragraphs 50.39(1)“c” and “d” and shall be deemed to have complied with paragraph 50.39(1)“f” with respect to the account of a limited partnership (or limited liability company, or another type of pooled investment vehicle) if each of the following conditions is met:

(1) The adviser sends to all limited partners (or members or other beneficial owners), at least quarterly, a statement showing:

1. The total amount of all additions to and withdrawals from the fund as a whole as well as the opening and closing value of the fund at the end of the quarter based on the custodian’s records;

2. A listing of all long and short positions on the closing date of the statement in accordance with the Financial Accounting Standards Board, Rule ASC 946-210-50; and

3. The total amount of additions to and withdrawals from the fund by the investor as well as the total value of the investor’s interest in the fund at the end of the quarter;

(2) At least annually the fund is subject to an audit and distributes the fund’s audited financial statements prepared in accordance with generally accepted accounting principles to all limited partners (or members or other beneficial owners) and the administrator within 120 days of the end of the fund’s fiscal year;

(3) The audit is performed by an independent CPA that is registered with, and subject to regular inspection as of the commencement of the professional engagement period, and as of each calendar year-end, by, the Public Company Accounting Oversight Board in accordance with its rules;

(4) Upon liquidation, the adviser distributes the fund’s final audited financial statements prepared in accordance with generally accepted accounting principles to all limited partners (or members or other beneficial owners) and the administrator promptly after the completion of such audit;

(5) The written agreement with the independent CPA must require the independent CPA, upon resignation or dismissal from, or other termination of, the engagement, or upon removing itself or being removed from consideration for being reappointed, to notify the administrator within four business days accompanied by a statement that includes:

1. The date of such resignation, dismissal, removal, or other termination, and the name, address, and contact information of the independent CPA; and

2. An explanation of any problems relating to audit scope or procedure that contributed to such resignation, dismissal, removal, or other termination;

(6) The investment adviser must also notify the administrator in writing that the investment adviser intends to employ the use of the statement delivery and audit safeguards described in paragraph 50.39(2)“d.” Such notification is required to be given on Form ADV.

e. Registered investment companies. The investment adviser is not required to comply with rule 191—50.39(502) with respect to the account of an investment company registered under the Investment Company Act of 1940.

50.39(3) Delivery to related persons. Sending an account statement under paragraph 50.39(1)“e” or distributing audited financial statements under paragraph 50.39(2)“d” shall not satisfy the requirements of rule 191—50.39(502) if such account statements or financial statements are sent solely to limited

partners (or members or other beneficial owners) that themselves are limited partnerships (or limited liability companies, or another type of pooled investment vehicle) and are related persons of the investment adviser.

50.39(4) Definitions. For the purposes of this rule:

a. "Control" means the power, directly or indirectly, to direct the management or policies of a person whether through ownership of securities, by contract, or otherwise. "Control" includes the following:

(1) Each of the investment adviser's officers, partners, or directors exercising executive responsibility (or persons having similar status or functions) is presumed to control the investment adviser;

(2) A person is presumed to control a corporation if the person:

1. Directly or indirectly has the right to vote 25 percent or more of a class of the corporation's voting securities; or

2. Has the power to sell or direct the sale of 25 percent or more of a class of the corporation's voting securities;

(3) A person is presumed to control a partnership if the person has the right to receive upon dissolution, or has contributed, 25 percent or more of the capital of the partnership;

(4) A person is presumed to control a limited liability company if the person:

1. Directly or indirectly has the right to vote 25 percent or more of a class of the interests of the limited liability company;

2. Has the right to receive upon dissolution, or has contributed, 25 percent or more of the capital of the limited liability company; or

3. Is an elected manager of the limited liability company; or

(5) A person is presumed to control a trust if the person is a trustee or managing agent of the trust.

b. "Custody" means holding, directly or indirectly, client funds or securities, having any authority to obtain possession of client funds or securities, or having the ability to appropriate client funds or securities. The investment adviser has custody if a related person holds, directly or indirectly, client funds or securities, or has any authority to obtain possession of them, in connection with advisory services the investment adviser provides to clients.

(1) "Custody" includes:

1. Possession of client funds or securities unless received inadvertently and returned to the sender within three business days of receiving them and the investment adviser maintains the records required under paragraph 50.42(1) "v";

2. Any arrangement including, but not limited to, a general power of attorney pursuant to which the investment adviser is authorized or permitted to withdraw client funds or securities maintained with a custodian upon the investment adviser's instruction; and

3. Any capacity including, but not limited to, general partner of a limited partnership, managing member of a limited liability company, a comparable position for another type of pooled investment vehicle, or trustee of a trust that gives the investment adviser or a person supervised by the investment adviser legal ownership of or access to client funds or securities.

(2) Receipt of checks drawn by clients and made payable to third parties will not meet the definition of custody if forwarded to the third party within three business days of receipt and the investment adviser maintains the records required under paragraph 50.42(1) "v."

c. "Independent certified public accountant" means a certified public accountant that meets the standards of independence described in SEC Rule 2-01(b) and (c) of Regulation S-X (17 CFR 210.2-01(b) and (c)).

d. "Independent representative" means a person who:

(1) Acts as agent for an advisory client including, in the case of a pooled investment vehicle, limited partners of a limited partnership, members of a limited liability company, or other beneficial owners of another type of pooled investment vehicle, and who is by law or contract required to act in the best interest of the advisory client or the limited partners or members, or other beneficial owners;

(2) Does not control, is not controlled by, and is not under common control with the investment adviser; and

(3) Does not have and has not had within the past two years a material business relationship with the investment adviser.

e. “Qualified custodian” means the following independent institutions or entities that are not affiliated with the investment adviser by any direct or indirect common control and have not had a material business relationship with the investment adviser in the previous two years:

(1) A bank or savings association that has deposits insured by the Federal Deposit Insurance Corporation under the Federal Deposit Insurance Act;

(2) A broker-dealer registered in Iowa and with the SEC holding client assets in customer accounts;

(3) A registered futures commission merchant registered pursuant to Section 4(f)(a) of the Commodity Exchange Act that is holding client funds and security futures or other securities incidental to transactions in contracts for the purchase or sale of a commodity for future delivery and options thereon in customer accounts; and

(4) A foreign financial institution that customarily holds financial assets for its customers, provided that the foreign financial institution keeps the advisory clients’ assets in customer accounts segregated from its proprietary assets.

f. “Related person” means any person, directly or indirectly, controlling or controlled by the investment adviser, and any person that is under common control with the investment adviser.

This rule is intended to implement Iowa Code section 502.411(5).
[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.40(502) Minimum financial requirements for investment advisers.

50.40(1) An investment adviser registered or required to be registered under the Act that has custody of client funds or securities shall maintain at all times a minimum net worth of \$35,000 except:

a. An investment adviser that has custody solely due to direct fee deduction and that is also in compliance with the applicable safekeeping requirements of paragraph 50.39(2)“*c*” and the record-keeping requirements of rule 191—50.42(502) is not required to comply with the net worth requirements of this rule; and

b. An investment adviser having custody solely due to advising pooled investment vehicles and that is in compliance with the applicable safekeeping requirements of paragraph 50.39(1)“*e*” or 50.39(2)“*d*” and the record-keeping requirements of rule 191—50.42(502) is not required to comply with the net worth requirements of this rule.

50.40(2) An investment adviser registered or required to be registered pursuant to the Act that has discretionary authority over client funds or securities but does not have custody of client funds or securities shall maintain a minimum net worth of \$10,000 at all times.

50.40(3) An investment adviser registered or required to be registered pursuant to the Act shall maintain a positive net worth at all times.

50.40(4) Unless otherwise exempted, an investment adviser registered or required to be registered pursuant to the Act shall notify the administrator if the investment adviser’s net worth is less than the minimum required. Notice must be filed in a report to the administrator no later than the close of business on the next business day following the decrease in net worth. Additionally, an investment adviser shall file by the close of business on the next business day a report with the administrator of the investment adviser’s financial condition including, at a minimum, the following:

a. A trial balance of all ledger accounts;

b. A list of all client funds or securities which are not segregated;

c. A computation of the aggregate amount of client ledger debit balances; and

d. The total number of client accounts managed by the investment adviser.

50.40(5) The administrator may require the submission of a current appraisal for the purpose of establishing the worth of any asset.

50.40(6) An investment adviser that has its principal place of business in a state other than this state is not required to maintain the minimum capital required by this rule provided that the investment adviser

is registered as an investment adviser in the state in which the investment adviser has its principal place of business and is in compliance with that state's laws regarding minimum capital requirements.

50.40(7) For purposes of this rule:

a. "Net worth" means an excess of assets over liabilities calculated in accordance with generally accepted accounting principles. The calculation of assets shall not include the following: prepaid expenses (except those prepaid expenses classified as assets under generally accepted accounting principles); deferred charges, goodwill, franchise rights, organizational expenses, patents, copyrights, marketing rights, unamortized debt discount and expense, and all other assets of intangible nature; in the case of an individual, home(s), home furnishings, automobile(s), or any other personal items not readily marketable; in the case of a corporation, advances or loans to stockholders or officers; and in the case of a partnership, advances or loans to partners.

b. "Custody" means the same as defined in paragraph 50.39(4) "b."

c. An investment adviser shall not be deemed to be exercising discretion when the investment adviser places trade orders with a broker-dealer pursuant to a third-party trading agreement if:

(1) The investment adviser has executed a separate investment adviser contract exclusively with the investment adviser's client which acknowledges that a third-party trading agreement will be executed to allow the investment adviser to effect securities transactions for the client in the client's broker-dealer account;

(2) The investment adviser contract specifically states that the client does not grant discretionary authority to the investment adviser and the investment adviser in fact does not exercise discretion with respect to the account; and

(3) A third-party trading agreement is executed between the client and a broker-dealer which specifically limits the investment adviser's authority in the client's broker-dealer account to the placement of trade orders and deduction of investment adviser fees.

This rule is intended to implement Iowa Code section 502.411(1).

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.41(502) Bonding requirements for investment advisers.

50.41(1) Every investment adviser registered or required to be registered under the Act:

a. Having custody of or discretionary authority over client funds or securities shall be bonded in an amount determined by the administrator based upon the number of clients and the total assets under management of the investment adviser; and

b. Having custody of or discretionary authority over client funds or securities when the investment adviser does not meet the minimum net worth standard provisions of subrules 50.40(1) and 50.40(2) must be bonded in the amount of the net worth deficiency rounded up to the nearest \$5,000.

50.41(2) A bond required by this rule shall be issued by a company qualified to do business in this state in the form determined by the administrator and shall be subject to the claims of clients of the investment adviser regardless of the client's state of residence.

50.41(3) An investment adviser that has a principal place of business in a state other than Iowa is exempt from this rule provided that the investment adviser is registered as an investment adviser in the state in which the investment adviser has its principal place of business and is in compliance with that state's laws regarding bonding requirements.

50.41(4) For purposes of this rule, "custody" means the same as defined in paragraph 50.39(4) "b."

This rule is intended to implement Iowa Code section 502.411(5).

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.42(502) Record-keeping requirements for investment advisers.

50.42(1) An investment adviser registered or required to be registered pursuant to the Act shall make and keep true, accurate and current the following books, ledgers and records:

a. A journal or journals, including cash receipts and disbursements records, and any other records of original entry forming the basis of any ledger entries.

b. General and auxiliary ledgers (or other comparable records) reflecting asset, liability, reserve, capital, income, and expense accounts.

c. A memorandum of each order given by the investment adviser for the purchase or sale of any security, of any instruction received by the investment adviser from the client concerning the purchase, sale, receipt or delivery of a particular security, and of any modification or cancellation of any such order or instruction. The memorandum shall describe the terms and conditions of the order, instruction, modification or cancellation; identify the person connected with the investment adviser who recommended the transaction to the client and the person who placed the order; indicate whether discretionary power was exercised; and indicate the account for which entered, the date of entry, and, where applicable, the bank or broker-dealer by or through whom executed.

d. All checkbooks, bank statements, canceled checks and cash reconciliations of the investment adviser.

e. All invoices, bills, or statements, or copies of those documents, relating to the investment adviser's business as an investment adviser regardless of whether the expense or debt is paid or unpaid.

f. All trial balances, financial statements, and internal audit working papers relating to the investment adviser's business as an investment adviser. For the purposes of this paragraph, "financial statements" means a balance sheet prepared in accordance with generally accepted accounting principles, an income statement, a cash flow statement, and a net worth computation, if applicable, as required by subrule 50.40(7).

g. Originals of all written communications received by and copies of all written communications sent by the investment adviser relating to:

(1) Any recommendation made or proposed to be made and any advice given or proposed to be given;

(2) Any receipt, disbursement, or delivery of funds or securities; or

(3) The placing or execution of any order to purchase or sell any security, except:

1. The investment adviser shall not be required to keep any unsolicited market letters and other similar communications of general public distribution not prepared by or for the investment adviser; and

2. The investment adviser is not required to keep a record of the names and addresses of persons to whom a notice, circular, or other advertisement offering any report, analysis, publication or other investment advisory service is sent if sent to more than ten persons; however, if the notice, circular, or other advertisement is distributed to persons named on any list, the investment adviser must retain with the copy of the notice, circular, or advertisement a memorandum describing the list and its source.

h. A list or other record of all accounts identifying the accounts in which the investment adviser is vested with any discretionary power with respect to the funds, securities or transactions of any client.

i. Copies of all powers of attorney and other documents granting discretionary authority by any client to the investment adviser.

j. Copies of each agreement entered into by the investment adviser with any client, and all other written agreements otherwise relating to the investment adviser's business as an investment adviser.

k. A file containing copies of each notice, circular, advertisement, newspaper article, investment letter, bulletin, or other communication including electronic media that the investment adviser circulates or distributes, directly or indirectly, to two or more persons not affiliated with the investment adviser and, if the notice, circular, advertisement, newspaper article, investment letter, bulletin, or other communication including one in electronic media format recommends the purchase or sale of a specific security and does not state the reasons for the recommendation, a memorandum indicating the investment adviser's reasons for the recommendation.

l. Transactions involving beneficial ownership.

(1) A record of every transaction in a security in which the investment adviser or any advisory representative of the investment adviser has or by reason of any transaction acquires a direct or indirect beneficial ownership, except the following:

1. Transactions effected in any account over which neither the investment adviser nor any advisory representative of the investment adviser has any direct or indirect influence or control; and

2. Transactions in securities which are direct obligations of the United States.

(2) The required record shall state, at a minimum, the title and amount of the security involved, the date and nature of the transaction (i.e., purchase, sale or other acquisition or disposition), the price

at which the transaction was effected, and the name of the bank or broker-dealer with or through which the transaction was effected. The record may also contain a statement declaring that the reporting or recording of any transaction shall not be construed as an admission that the investment adviser or advisory representative has any direct or indirect beneficial ownership in the security. A transaction must be recorded no later than ten days after the end of the calendar quarter in which the transaction was effected. An investment adviser shall not be in violation of this paragraph because of a failure to record securities transactions of an advisory representative if the investment adviser establishes that the investment adviser instituted adequate procedures and used reasonable diligence to promptly obtain reports of all transactions required by this paragraph to be recorded.

m. Notwithstanding the provisions of paragraph 50.42(1)“l,” when the investment adviser is primarily engaged in a business or businesses other than advising investment advisory clients, a record must be maintained of every transaction in a security in which the investment adviser or any advisory representative of the investment adviser has, or by reason of any transaction acquires, any direct or indirect beneficial ownership, except:

(1) Transactions effected in any account over which neither the investment adviser nor any advisory representative of the investment adviser has any direct or indirect influence or control; or

(2) Transactions in securities which are direct obligations of the United States.

The record shall state the title and amount of the security involved, the date and nature of the transaction (i.e., purchase, sale, or other acquisition or disposition), the price at which it was effected, and the name of the broker-dealer or bank with or through which the transaction was effected. The record may also contain a statement declaring that the reporting or recording of any transaction shall not be construed as an admission that the investment adviser or advisory representative has any direct or indirect beneficial ownership in the security. A transaction shall be recorded not later than ten days after the end of the calendar quarter in which the transaction was effected. An investment adviser shall not be deemed to have violated the provisions of this subparagraph because of a failure to record securities transactions of an advisory representative if the investment adviser establishes that the investment adviser instituted adequate procedures and used reasonable diligence to promptly obtain reports of all transactions required to be recorded.

n. A copy of each written statement and each amendment or revision, given or sent to any client or prospective client of the investment adviser in accordance with rule 191—50.36(502), and a record of the dates on which each written statement, amendment and revision was given or offered to be given to any client or any prospective client who subsequently becomes a client.

o. For each client that was obtained by the investment adviser by means of a solicitor to whom a cash fee was paid by the investment adviser:

(1) A copy of any written agreement relating to the payment of a cash fee to which the investment adviser is a party;

(2) A signed and dated acknowledgment of receipt from the client evidencing the client’s receipt of the investment adviser’s disclosure statement and a written disclosure statement of the solicitor; and

(3) A copy of the solicitor’s written disclosure statement.

The written agreement, acknowledgment and solicitor disclosure statement will be deemed to be in compliance if such documents comply with Rule 275.206(4)-3 of the Investment Advisers Act of 1940.

p. All accounts, books, internal working papers, and any other records or documents that are necessary to form the basis for or demonstrate the calculation of the performance or rate of return of all managed accounts or securities recommendations provided in any notice, circular, advertisement, newspaper article, investment letter, bulletin, or other communication, including electronic media, that is directly or indirectly circulated or distributed by the investment adviser to two or more persons (other than persons connected with the investment adviser). However, with respect to the performance of managed accounts only, the retention of all account statements reflecting all debits, credits, and other transactions in a client’s account for the period of the statement, and the retention of all worksheets necessary to demonstrate the calculation of the performance or rate of return of the managed account shall satisfy the requirements of this paragraph.

q. A file containing copies of all written communications received or sent regarding any litigation or customer or client complaints involving the investment adviser or any investment adviser representative or employee.

r. The basis, in writing, for any recommendation or investment advice provided to an investment advisory client.

s. Copies of all written procedures regarding the supervision of the employees and investment adviser representatives that are reasonably designed to achieve compliance with securities laws and regulations.

t. A file containing a copy of each document (other than any notices of general dissemination) that was filed with or received from any state or federal agency or self-regulatory organization pertaining to the investment adviser or its investment adviser representatives, as defined by subrule 50.42(11), including but not limited to all applications, amendments, renewal filings, and correspondence.

u. Original copies signed by the lawful signatory of the investment adviser and the investment adviser representative of each initial Form U-4 and each U-4 Amendment to Disclosure Reporting Pages (DRPs).

v. For each transaction in which the investment adviser inadvertently held or obtained the client's securities or funds and returned them to the client within three business days of receipt or forwarded a check drawn by a client and made payable to a third party within three business days of receipt, a ledger or list of all funds or securities held or obtained with the following information:

- (1) Issuer;
- (2) Type of security and series;
- (3) Date of issue;
- (4) For debt instruments, the denomination, interest rate and maturity date;
- (5) Certificate number, including alphabetical prefix or suffix;
- (6) Name in which registered;
- (7) Date submitted to the investment adviser;
- (8) Date sent to client or sender;
- (9) Form of delivery to client or sender, or copy of the form of delivery to client or sender; and
- (10) Mail confirmation number, if applicable, or confirmation by client or sender of the return of the security or fund.

w. If an investment adviser obtains possession of securities that are acquired from the issuer in a transaction or chain of transactions not involving a public offering that comply with the exception from custody in paragraph 50.39(2) "b," the adviser shall keep:

(1) A record showing the issuer's or current transfer agent's name, address, telephone number, and other applicable contact information pertaining to the party responsible for recording the client's interests in the securities; and

(2) A copy of any legend, shareholder agreement, or other agreement providing that the securities are transferable only with prior consent of the issuer or holders of the outstanding securities of the issuer.

x. A copy of a written business continuity and succession plan as required by rule 191—50.47(502).

50.42(2) In addition to the retention requirements of subrule 50.42(1), an investment adviser having custody of client funds or securities, as defined by paragraph 50.39(3) "b," shall retain the following records:

a. Copies of all documents executed by each client, including but not limited to a limited power of attorney, pursuant to which the investment adviser is authorized or permitted to withdraw a client's funds or securities maintained with a custodian upon the adviser's instruction to the custodian;

b. A journal or other record for all accounts reflecting all purchases, sales, receipts, and deliveries of securities, including but not limited to certificate numbers, and all other debits and credits to the accounts;

c. A separate ledger account for each client showing all purchases, sales, receipts and deliveries of securities, the date and price of each purchase or sale, and all debits and credits;

d. Copies of confirmations of all transactions effected by or for the account of any client;

e. A record for each security in which any client has a position showing, at a minimum, the name of each client having an interest in the security, the amount of interest of each client in the security, and the location of each security;

f. A copy of each client's quarterly account statements as generated and delivered by the qualified custodian. Additionally, if the investment adviser generates a statement that is delivered to the client, the investment adviser shall retain copies of those statements along with information indicating the dates on which the statements were provided to the client;

g. If applicable, a copy of the special examination report, financial statements, and letter verifying the completion of and describing the nature and extent of an examination by an independent certified public accountant and documentation describing the nature and extent of the examination and a record regarding any findings of any material discrepancies found during the examination; and

h. If applicable, evidence of the client's designation of an independent representative.

50.42(3) An investment adviser deemed to have custody of client securities or funds because the investment adviser advises a pooled investment vehicle shall, in addition to any other applicable record retention requirements, keep the following records:

a. True, accurate, and current account statements;

b. If utilizing the exception provided by paragraph 50.39(2) "c," the date(s) of the audit, a copy of the audited financial statements, and evidence of the mailing of the audited financial statements to all limited partners, members, or other beneficial owners within 120 days of the end of the fiscal year;

c. If subject to paragraph 50.39(1) "e," a copy of the written agreement with the independent party reviewing all fees and expenses and describing the responsibilities of the independent third party, and copies of all invoices and receipts showing approval by the independent third party for payment through the qualified custodian.

50.42(4) Each investment adviser subject to subrule 50.42(1) that renders investment supervisory or management services to any client shall, with respect to the portfolio being supervised or managed and to the extent that the information is reasonably available to or obtainable by the investment adviser, retain the following records:

a. For each client, detailed information regarding the securities purchased and sold including, but not limited to, the date of the purchase or sale, the total dollar amount of the purchase or sale, and the price at which the security was purchased or sold.

b. For each security in which any client has a current position, the name of each client and current amount or interest of the client.

50.42(5) Records required to be retained pursuant to rule 191—50.42(502) shall be kept as follows:

a. Except as provided in paragraphs 50.42(1) "k" and "p," all records required to be made under subrules 50.42(1) to 50.42(3) and paragraph 50.42(4) "a" shall be maintained and preserved in a readily accessible location for a period of not less than five years from the end of the fiscal year during which the last entry was made on record, with no less than the first two years being kept in the principal office of the investment adviser.

b. Partnership articles and any amendments, articles of incorporation, charters, minute books, and stock certificate books of the investment adviser and of any predecessor shall be maintained in the principal office of the investment adviser and preserved until at least three years after termination of the enterprise.

c. Books and records required to be retained pursuant to paragraphs 50.42(1) "k" and 50.42(1) "p" shall be maintained and preserved in a readily accessible location for a period of not less than five years from the end of the fiscal year during which the investment adviser last published or otherwise disseminated, directly or indirectly, the notice, circular, advertisement, newspaper article, investment letter, bulletin, or other communication including by electronic media, with no less than the first two years being kept in the principal office of the investment adviser.

d. Books and records required to be retained pursuant to paragraphs 50.42(1) "q" to "v" shall be maintained and preserved in a readily accessible location for a period of not less than five years from the end of the fiscal year during which the last entry was made on such record, with no less than the first

two years being kept in the principal office of the investment adviser, or the time period during which the investment adviser is registered or required to be registered in this state, whichever is less.

e. Notwithstanding other record preservation requirements of rule 191—50.42(502), an investment adviser that has rendered or renders investment advisory services shall maintain at all times the following records at the investment adviser's business location from which the customer or client is being provided or has been provided investment advisory services during the applicable retention period:

(1) All records required to be preserved pursuant to paragraphs 50.42(1)“*c*,” “*g*” to “*j*,” “*n*,” “*o*,” and “*q*” to “*s*” and subrules 50.42(2) to 50.42(4); and

(2) All records required pursuant to paragraphs 50.42(1)“*k*” to “*p*” identifying the name of the investment adviser representative providing investment advice from that business location, or identifying the physical address, mailing address, electronic mailing address, or telephone number of the business location. The records will be maintained for the period described in paragraph 50.42(5)“*a*.”

50.42(6) An investment adviser subject to subrule 50.42(1) that ceases to conduct or discontinues business as an investment adviser shall arrange for and be responsible for the retention of the records required to be retained pursuant to this rule for the applicable retention period. The investment adviser shall notify the administrator in writing prior to ceasing to conduct or discontinuing business as an investment adviser of the exact address where the books and records will be maintained during the retention period.

50.42(7) An investment adviser required to retain records pursuant to this rule may maintain the records in such manner that the identity of any client to whom the investment adviser renders investment supervisory services is indicated by numerical code, alphabetical code, or similar designation.

50.42(8) Record maintenance.

a. Pursuant to subrule 50.42(4), the records required to be maintained and preserved may be immediately produced or reproduced, and maintained and preserved for the required time, by an investment adviser in:

- (1) Paper or hard-copy form, as those records are kept in their original form; or
- (2) Micrographic media, including microfilm, microfiche, or any similar medium; or
- (3) Electronic storage media, including any digital storage medium or system, that meet the terms of this subrule.

b. The investment adviser must:

- (1) Arrange and index the records in a way that permits easy location, access, and retrieval of any particular record;
- (2) Provide promptly any of the following that the administrator may request:
 1. A legible, true, and complete copy of the record in the medium and format in which it is stored;
 2. A legible, true, and complete printout of the record; and
 3. Means to access, view, and print the records; and
- (3) Separately store, for the time required for preservation of the original record, a duplicate copy of the record in any medium allowed by this subrule.

c. In the case of records created or maintained in electronic storage media, the investment adviser must establish and maintain procedures:

- (1) To maintain and preserve the records, so as to reasonably safeguard them from loss, alteration, or destruction;
- (2) To limit access to the records to properly authorized personnel and the administrator; and
- (3) To reasonably ensure that any reproduction of a nonelectronic original record in electronic storage media is complete, true, and legible when retrieved.

50.42(9) Compliance with any substantially similar record-keeping requirements of SEC Rules 17a-3 and 17a-4 (17 CFR 240.17a-3 and 17 CFR 240.17a-4) shall be deemed to be in compliance with this rule.

50.42(10) Every investment adviser that is registered or required to be registered in this state and that has its principal place of business in a state other than this state shall be exempt from the requirements

of this rule, provided the investment adviser is properly registered in that state and is in compliance with that state's record-keeping requirements.

50.42(11) For purposes of this rule:

"Advisory representative" means any partner, officer or director of the investment adviser; any employee who participates in any way in the determination of which recommendations shall be made; any employee who, in connection with the employee's duties, obtains any information concerning which securities are being recommended prior to the effective dissemination of the recommendations; and any of the following persons who obtain information concerning securities recommendations being made by the investment adviser prior to the effective dissemination of the recommendations:

1. Any person in a relationship of control with the investment adviser;
2. Any person affiliated with a controlling person; and
3. Any person affiliated with an affiliated person.

"Control" means the power to exercise a controlling influence over the management or policies of a company, unless that power results solely from an official position with the company. Any person who owns beneficially, either directly or through one or more controlled companies, more than 25 percent of the voting securities of a company shall be presumed to control the company.

An investment adviser shall not be deemed to be exercising a discretionary power as to the price at which or the time when a transaction is effected or is to be effected if, before the order is given by the investment adviser, the client has directed or approved the purchase or sale of a definite amount of the particular security.

"Investment adviser primarily engaged in a business or businesses other than advising investment advisory clients" means an investment adviser that for each of the most recent three fiscal years or for the period of time since organization, whichever is less, derives on an unconsolidated basis more than 50 percent of total sales and revenues and income (or loss) before income taxes and extraordinary items from business activities other than advising investment advisory clients.

"Investment supervisory services" means continuous advice regarding investment of funds provided to each client on the basis of the individual needs of the client.

"Solicitor" means any person or entity that for compensation acts as an agent of an investment adviser in referring potential clients.

This rule is intended to implement Iowa Code section 502.411(3).
[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.43(502) Financial reporting requirements for investment advisers.

50.43(1) Every registered investment adviser that has custody of client funds or securities or requires payment of advisory fees six months or more in advance and in excess of \$500 per client shall file with the administrator an audited balance sheet as of the end of the investment adviser's fiscal year. Each balance sheet filed pursuant to this rule must be:

- a. Examined in accordance with generally accepted auditing standards and prepared in conformity with generally accepted accounting principles;
- b. Audited by an independent certified public accountant; and
- c. Accompanied by an opinion of the accountant as to the report of financial position, and by a note stating the principles used to prepare the opinion, the basis of included securities, and any other explanations required for clarity.

50.43(2) Every registered investment adviser that has discretionary authority over, but not custody of, client funds or securities shall file with the administrator a balance sheet, which need not be audited, but which must be prepared in accordance with generally accepted accounting principles or such other basis of accounting acceptable to the administrator and represented by the investment adviser or the person who prepared the statement as true and accurate, as of the end of the investment adviser's fiscal year.

50.43(3) The financial statements required by this rule shall be filed with the administrator within 90 days following the end of the investment adviser's fiscal year.

50.43(4) Every investment adviser that has its principal place of business in a state other than this state shall file only such reports as required by the state in which the investment adviser maintains its principal place of business, provided the investment adviser is licensed in such state and is in compliance with such state's financial reporting requirements.

This rule is intended to implement Iowa Code section 502.411(2).
[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.44(502) Solely incidental services by certain professionals.

50.44(1) General approach.

a. Certain professionals may rely on an exclusion from the definition of “investment adviser” contained in Iowa Code section 502.102(15)“b” for lawyers, accountants, engineers or teachers whose performance of investment advice is solely incidental to the practice of the person's profession. Whether the exclusion from the definition of “investment adviser” is available to a lawyer, accountant, engineer or teacher providing investment advisory services within the meaning of Iowa Code section 502.102(15)“b” depends upon the relevant facts and circumstances.

b. In general, the administrator will determine whether the investment advisory services provided and the fees charged are solely incidental to the total services provided to the individual client by comparing whether the aggregate of such fees and services is solely incidental to the aggregate of services provided to all clients. In addition, the administrator will take other relevant factors into consideration in determining the applicability of the exclusion including, but not limited to, whether the firm establishes a separate subsidiary, division, or other business entity to perform advisory services or maintains an investment adviser registration with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940. In this context, the administrator would refer to U.S. Securities and Exchange Commission Release IA-1092 relating to the analogous exclusion in the Investment Advisers Act of 1940 which states that “. . . the exclusion . . . is not available . . . to a lawyer or accountant who holds himself out to the public as providing financial planning, pension consulting, or other financial advisory services. In such a case it would appear that the performance of investment advisory services by the person would not be solely incidental to his practice as a lawyer or accountant.”

50.44(2) General versus specific advice. A lawyer, accountant, engineer or teacher, whether or not holding oneself out to the public as providing financial planning or other financial advisory services, who does not render advice with respect to investing in specific securities, types of securities, or categories of securities need not register as an investment adviser. Registration is not required when the securities advice provided to clients in this state is limited to a general recommendation that the client should be more aggressive or more conservative in securities investments, a general recommendation as to the percentage of the client's assets that should be in securities, or a general recommendation that the client pursue an income-producing or growth-oriented investment strategy, provided the recommendation does not identify specific securities, types of securities, or categories of securities. For the purpose of this subrule, the phrase “types of securities” means classes of securities in which the issuer is not specifically identified, such as common stock, preferred stock, options, warrants, bonds, and mutual funds, and the phrase “categories of securities” means general areas of securities investments where neither the issuer nor the types of securities are identified such as cyclical securities, automotive industry securities, international securities, and NYSE securities. Asset allocation recommendations, however, generally do include advice on types of securities.

EXAMPLE: An accountant provides clients accounting and financial planning services. No advice with respect to specific securities, types of securities, or categories of securities is provided. The accountant need not register as an investment adviser.

50.44(3) Professional does not hold self out as a financial planner. When the securities advice is provided by a lawyer, accountant, engineer, or teacher who does not hold oneself out to the public as providing financial planning or other financial advisory services, the availability of the exclusion from the definition of “investment adviser” contained in Iowa Code section 502.102(15)“b” for securities advice rendered solely incidental to the profession will depend on those factors set forth in paragraph 50.44(1)“b.”

EXAMPLE A: An accountant who does not hold oneself out to the public as providing financial planning or other financial advisory services provides the client both accounting and financial planning services. The services involve advice with respect to specific securities, types of securities, or categories of securities. Whether the accountant is excluded from the definition of investment adviser depends on those factors set forth in paragraph 50.44(1)“b,” including a comparison of the extent of the securities advisory services provided to any client as contrasted with the accounting services provided to that client. The comparison is measured by the compensation paid for each service.

EXAMPLE B: An accountant provides a client financial planning services only. The financial planning services involve advice with respect to specific securities, types of securities, or categories of securities. The accountant is not excluded from the definition of investment adviser and therefore must register as an investment adviser.

50.44(4) *Professional holds self out as a financial planner.*

a. If the investment advice provided by a lawyer, accountant, engineer, or teacher who holds oneself out to the public as providing financial planning or other financial advisory services is part of the financial plan being provided to a financial planning client, the professional cannot rely on the exclusion from the definition of “investment adviser” contained in Iowa Code section 502.102(15)“b” for investment advice rendered incidentally to the practice of the profession.

EXAMPLE: An accountant who holds oneself out to the public as providing financial planning or other financial advisory services provides the client both accounting and financial planning services. The financial planning services involve advice with respect to specific securities, types of securities, or categories of securities. The accountant is not excluded from the definition of investment adviser no matter how insignificantly the securities advice compares to the other financial planning advice or accounting services rendered.

b. When a lawyer, accountant, engineer, or teacher holding oneself out to the public as providing financial planning or other financial advisory services does not provide advice on specific securities, types of securities, or categories of securities as part of financial planning services but provides such advice in connection with the practice of the profession, in most instances the exclusion from the definition of investment adviser would be unavailable because the professional is holding oneself out as a financial planner or financial adviser. If, however, securities advice is not part of financial planning services and is both limited and isolated, the exclusion may still be available.

EXAMPLE: An accountant who holds oneself out to the public as providing financial planning or other financial advisory services provides clients both accounting and financial planning services. No securities advice is rendered as part of the financial planning services. Clients, on a few occasions, request the accountant’s advice on investing in certain limited partnerships. The fees charged to such a client for the advice total only a small percentage of the fees charged to that client for accounting services provided. The accountant is excluded from the definition of investment adviser. The example presented is intentionally narrow in order to illustrate that once the accountant holds oneself out as a financial planner or financial adviser, even if the only securities advice provided for compensation is not part of the financial planning or advisory activities, only limited and isolated securities advice may be provided without registration as an investment adviser.

This rule is intended to implement Iowa Code section 502.102(15)“b.”

191—50.45(502) Registration exemption for investment advisers to private funds.

50.45(1) *Definitions.* For purposes of this rule, the following definitions shall apply:

“3(c)(1) fund” means a qualifying private fund that is eligible for the exclusion from the definition of an investment company under the Investment Company Act of 1940 (15 U.S.C. Section 80a-3(c)(1)).

“Private fund adviser” means an investment adviser who provides advice solely to one or more qualifying private funds.

“Qualifying private fund” means a private fund that meets the definition of a qualifying private fund in SEC Rule 203(m)-1 (17 CFR 275.203(m)-1).

“Value of primary residence” means the fair market value of a person’s primary residence, less the amount of debt secured by the property up to its fair market value.

“*Venture capital fund*” means a private fund that meets the definition of a venture capital fund in SEC Rule 203(l)-1 (17 CFR 275.203(l)-1).

50.45(2) Exemption for private fund advisers. Subject to the additional requirements of subrule 50.45(3), a private fund adviser shall be exempt from the registration requirements of Iowa Code section 502.403 if the private fund adviser satisfies each of the following conditions:

a. Neither the private fund adviser nor any of its advisory affiliates are subject to a disqualification as described in SEC Rule 262 of Regulation A (17 CFR 230.262).

b. The private fund adviser files with the state each report and amendment thereto that an exempt reporting adviser is required to file with the SEC pursuant to SEC Rule 204-4 (17 CFR 275.204-4).

c. The private fund adviser pays any applicable fees.

50.45(3) Additional requirements for private fund advisers to certain 3(c)(1) funds. In order to qualify for the exemption described in subrule 50.45(2), a private fund adviser who advises at least one 3(c)(1) fund that is not a venture capital fund shall, in addition to satisfying each of the conditions specified in paragraph 50.45(3)“*b*,” comply with the following requirements:

a. The private fund adviser shall advise only those 3(c)(1) funds (other than venture capital funds) whose outstanding securities (other than short-term paper) are beneficially owned entirely by persons who, after deducting the value of the primary residence from the person’s net worth, would each meet the definition of a qualified client in SEC Rule 205-3 (17 CFR 275.205-3) at the time the securities are purchased from the issuer.

b. At the time of purchase, the private fund adviser shall disclose the following in writing to each beneficial owner of a 3(c)(1) fund that is not a venture capital fund:

(1) All services, if any, to be provided to individual beneficial owners;

(2) All duties, if any, the private fund adviser owes to the beneficial owners; and

(3) Any other material information affecting the rights or responsibilities of the beneficial owners.

c. The private fund adviser shall obtain on an annual basis audited financial statements of each 3(c)(1) fund that is not a venture capital fund and shall deliver a copy of such audited financial statements to each beneficial owner of the fund.

50.45(4) Federal covered investment advisers. If a private fund adviser is registered with the SEC, the adviser shall not be eligible for this exemption and shall comply with the state notice filing requirements applicable to federal covered investment advisers.

50.45(5) Investment adviser representatives. A person is exempt from the registration requirements if the person is employed by or associated with an investment adviser that is exempt from registration in this state pursuant to rule 191—50.45(502) and does not otherwise act as an investment adviser representative.

50.45(6) Electronic filing. The report filings described in paragraph 50.45(2)“*b*” shall be made electronically through the IARD. A report shall be deemed filed when the report and the fee required are filed and accepted by the IARD on the state’s behalf.

50.45(7) Transition. An investment adviser that becomes ineligible for the exemption provided by rule 191—50.45(502) must comply with all applicable laws and rules requiring registration or notice filing within 90 days from the date the investment adviser’s eligibility for this exemption ceases.

50.45(8) Grandfathering for investment advisers to 3(c)(1) funds with nonqualified clients. An investment adviser to a 3(c)(1) fund (other than a venture capital fund) that has one or more beneficial owners who are not qualified clients as described in paragraph 50.45(3)“*a*” is eligible for the exemption contained in subrule 50.45(2) if the following conditions are satisfied:

a. The subject fund existed prior to November 6, 2013;

b. As of November 6, 2013, the subject fund ceases to accept beneficial owners who are not qualified clients, as described in paragraph 50.45(3)“*a*”;

c. The investment adviser discloses in writing the information described in paragraph 50.45(3)“*b*” to all beneficial owners of the fund; and

d. As of November 6, 2013, the investment adviser delivers audited financial statements as required by paragraph 50.43(3)“c.”

This rule is intended to implement Iowa Code section 502.403.
[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.46(502) Contents of investment advisory contract. The provisions of this rule shall apply to federal covered investment advisers to the extent that the conduct alleged is fraudulent, deceptive, or as otherwise permitted by the National Securities Markets Improvement Act of 1996.

50.46(1) It is unlawful for any investment adviser, investment adviser representative, or federal covered investment adviser to enter into, extend, or renew any investment advisory contract unless it provides in writing:

a. The services to be provided, the term of the contract, the investment advisory fee, the formula for computing the fee, the amount of prepaid fee to be returned in the event of termination or nonperformance of the contract, and any grant of discretionary power to the investment adviser, investment adviser representative, or federal covered investment adviser;

b. That no direct or indirect assignment or transfer of the contract may be made by the investment adviser, investment adviser representative, or federal covered investment adviser without the consent of the client or other party to the contract;

c. That the investment adviser, investment adviser representative, or federal covered investment adviser shall not be compensated on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of the client;

d. That the investment adviser, investment adviser representative, or federal covered investment adviser, if a partnership, shall notify the client or other party to the investment contract of any change in the membership of the partnership within a reasonable time after the change.

50.46(2) It is unlawful for any investment adviser, investment adviser representative, or federal covered investment adviser to:

a. Include in an advisory contract any condition, stipulation, or provisions binding any person to waive compliance with any provision of this Act or of the Investment Advisers Act of 1940, or any other practice contrary to the provisions of Section 215 of the Investment Advisers Act of 1940; or

b. Enter into, extend or renew any advisory contract contrary to the provisions of Section 205 of the Investment Advisers Act of 1940. This provision shall apply to all advisers and investment adviser representatives registered or required to be registered under this Act, notwithstanding whether such adviser or representative would be exempt from federal registration pursuant to Section 203(b) of the Investment Advisers Act of 1940.

50.46(3) Notwithstanding paragraph 50.46(1)“c,” an investment adviser may enter into, extend or renew an investment advisory contract which provides for compensation to the investment adviser on the basis of a share of capital gains upon or capital appreciation of the funds, or any portion of the funds, of the client if the conditions in paragraphs 50.46(3)“a” to “d” are met.

a. The client entering into the contract must be:

(1) A natural person or a company that, immediately after entering into the contract, has at least \$750,000 under the management of the investment adviser; or

(2) A person that the investment adviser and its investment adviser representatives reasonably believe, immediately before entering into the contract, is a natural person or a company whose net worth, at the time the contract is entered into, exceeds \$1,500,000. The net worth of a natural person may include assets held jointly with that person’s spouse.

b. The compensation paid to the investment adviser with respect to the performance of any securities over a given period must be based on a formula with the following characteristics:

(1) In the case of securities for which market quotations are readily available within the meaning of Rule 2a-4(a)(1) under the Investment Company Act of 1940 (definition of “current net asset value” for use in computing periodically the current price of redeemable security), the formula must include the realized capital losses and unrealized capital depreciation of the securities over the period;

(2) In the case of securities for which market quotations are not readily available within the meaning of Rule 2a-4(a)(1) under the Investment Company Act of 1940, the formula must include:

1. The realized capital losses of securities over the period; and
2. If the unrealized capital appreciation of the securities over the period is included, the unrealized capital depreciation of the securities over the period; and

(3) The formula must provide that any compensation paid to the investment adviser under paragraph 50.46(3) “b” is based on the gains less the losses (computed in accordance with subparagraphs 50.46(3) “b”(1) and (2)) in the client’s account for a period of not less than one year.

c. Before entering into the advisory contract and in addition to the requirements of Form ADV, the investment adviser must disclose in writing to the client or the client’s independent agent all material information concerning the proposed advisory arrangement, including the following:

(1) That the fee arrangement may create an incentive for the investment adviser to make investments that are riskier or more speculative than would be the case in the absence of a performance fee;

(2) Where relevant, that the investment adviser may receive increased compensation with regard to unrealized appreciation as well as realized gains in the client’s account;

(3) The periods which will be used to measure investment performance throughout the contract and their significance in the computation of the fee;

(4) The nature of any index which will be used as a comparative measure of investment performance, the significance of the index, and the reason the investment adviser believes that the index is appropriate; and

(5) When the investment adviser’s compensation is based in part on the unrealized appreciation of securities for which market quotations are not readily available within the meaning of Rule 2a-4(a)(1) under the Investment Company Act of 1940, how the securities will be valued and the extent to which the valuation will be independently determined.

d. The investment adviser (and any investment adviser representative) that enters into the contract must reasonably believe, immediately before entering into the contract, that the contract represents an arm’s length arrangement between the parties and that the client (or in the case of a client which is a company as defined in paragraph 50.46(6) “d,” the person representing the company), alone or together with the client’s independent agent, understands the proposed method of compensation and its risks. The representative of a company may be a partner, director, officer or an employee of the company or of the trustee, where the company is a trust, or any other person designated by the company or trustee, but must satisfy the definition of client’s independent agent set forth in paragraph 50.46(6) “c.”

50.46(4) Any person entering into or performing an investment advisory contract under rule 191—50.46(502) is not relieved of any obligations under rule 191—50.38(502) or any other applicable provision of the Act or any rule or order thereunder.

50.46(5) Nothing in rule 191—50.46(502) shall relieve a client’s independent agent from any obligation to the client under applicable law.

50.46(6) The following definitions apply for purposes of rule 191—50.46(502):

a. “*Affiliate*” shall have the same definition as in Section 2(a)(3) of the Investment Company Act of 1940.

b. “*Assignment*,” as used in paragraph 50.46(1) “b,” includes, but is not limited to, any transaction or event that results in any change to the individuals or entities with the power, directly or indirectly, to direct the management or policies of, or to vote more than 50 percent of any class of voting securities of, the investment adviser or federal covered investment adviser as compared to the individuals or entities that had such power as of the date when the contract was first entered into, extended or renewed.

c. “*Client’s independent agent*” means any person who agrees to act as an investment advisory client’s agent in connection with the contract. “*Client’s independent agent*” does not include:

(1) The investment adviser relying on rule 191—50.46(502);

(2) An affiliated person of the investment adviser or an affiliated person of an affiliated person of the investment adviser including an investment adviser representative;

(3) An interested person of the investment adviser;

(4) A person who receives, directly or indirectly, any compensation in connection with the contract from the investment adviser, an affiliated person of the investment adviser, an affiliated person of an affiliated person of the investment adviser or an interested person of the investment adviser; or

(5) A person with any material relationship between the person (or an affiliated person of that person) and the investment adviser (or an affiliated person of the investment adviser) that exists, or has existed at any time during the past two years.

d. "Company" means a corporation, partnership, association, joint stock company, trust, or any organized group of persons, whether incorporated or not; or any receiver, trustee in a case under Title 11 of the United States Code, or similar official or any liquidating agent for any of the foregoing, in the liquidating agent's capacity as such. "Company" shall not include:

(1) A company required to be registered under the Investment Company Act of 1940 but which is not so registered;

(2) A private investment company is an entity which would be defined as an investment company under Section 3(a) of the Investment Company Act of 1940 but for the exception from that definition provided by Section 3(c)(1) of that Act;

(3) An investment company registered under the Investment Company Act of 1940; or

(4) A business development company as defined in Section 202(a)(22) of the Investment Advisers Act of 1940, unless each of the equity owners of any such company, other than the investment adviser entering into the contract, is a natural person or a company within the meaning of "company."

e. "Interested person" means:

(1) Any member of the immediate family of any natural person who is an affiliated person of the investment adviser;

(2) Any person who knowingly has any direct or indirect beneficial interest in, or who is designated as trustee, executor, or guardian of any legal interest in, any security issued by the investment adviser or by a controlling person of the investment adviser if that beneficial or legal interest exceeds:

1. One-tenth of one percent of any class of outstanding securities of the investment adviser or a controlling person of the investment adviser; or

2. Five percent of the total assets of the person seeking to act as the client's independent agent; or

(3) Any person or partner or employee of any person who has acted as legal counsel for the investment adviser within the past two years.

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.47(502) Business continuity and succession planning for investment advisers.

50.47(1) On and after July 1, 2017, every investment adviser registered in Iowa shall make and maintain records, pursuant to Iowa Code section 502.411(3) "a," of the establishment, implementation and maintenance of a written business continuity and succession plan. The business continuity and succession plan shall be created and implemented in a manner consistent with the NASAA Guidance on Business Continuity and Succession Planning for State-Registered Investment Advisers, which is available on the Iowa insurance division's website, iid.iowa.gov. In developing the procedures for the business continuity and succession plan, the investment adviser shall consider, among other things, the size of the firm, the types of services provided and the number of locations of the investment adviser. The business continuity and succession plan shall provide for, at a minimum, all of the following:

a. The protection, backup, and recovery of books and records;

b. Alternate means of communications with customers, key personnel, employees, vendors, service providers (including third-party custodians of securities) and regulators, that will allow the communication of certain events, including, but not limited to, providing notice of a significant business interruption or the death or unavailability of key personnel or other disruptions or cessation of business activities;

c. Office relocation in the event of temporary or permanent loss of a principal place of business;

d. Assignment of duties to qualified responsible persons in the event of the death or unavailability of key personnel; and

e. Other means of minimizing service disruptions and client harm that could result from a sudden significant business interruption.

50.47(2) Every investment adviser registered in Iowa shall annually review the investment adviser's written business continuity and succession plan and, if it has been changed since it was submitted, or if it was not previously submitted, shall file it for examination by the administrator, pursuant to Iowa Code section 502.411(4). The administrator shall review an investment adviser's written business continuity and succession plan to determine whether it is consistent with the NASAA Guidance on Business Continuity and Succession Planning for State-Registered Investment Advisers and whether it takes into account the considerations listed in subrule 50.47(1). The administrator may request the investment adviser to modify the filed business continuity and succession plan according to the administrator's suggestions. After the initial filing, the investment adviser's filing of any change shall identify any substantive amendment to the business continuity and succession plan with the registration renewal following the amendment. The administrator may request from the investment adviser at any time information regarding the business continuity and succession plan made since the last filing of the plan.

50.47(3) An investment adviser registered in Iowa shall be deemed in compliance with this rule if the investment adviser can demonstrate compliance with SEC rules or other law related to the investment adviser's adoption and implementation of a written business continuity and succession plan.

This rule is intended to implement Iowa Code chapter 502.
[ARC 2872C, IAB 12/21/16, effective 1/25/17; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.48 and 50.49 Reserved.

DIVISION IV
RULES COVERING ALL REGISTERED PERSONS

191—50.50(502) Internet advertising by broker-dealers, investment advisers, broker-dealer agents, investment adviser representatives, and federal covered investment advisers.

50.50(1) Broker-dealers, investment advisers, broker-dealer agents, investment adviser representatives, and federal covered investment advisers who use the Internet, the World Wide Web, or similar proprietary or common carrier electronic systems (collectively described as the "Internet") to disseminate information regarding products and services through communications directed generally to anyone having access to the Internet and transmitted through posting on bulletin boards, displays on home pages or similar methods (hereinafter "Internet communications") will not be considered to be transacting business in Iowa pursuant to Iowa Code section 502.401, 502.402, 502.403, 502.404, or 502.405 based solely on that communication, if:

a. The Internet communication contains a legend clearly stating that:

(1) The broker-dealer, investment adviser, broker-dealer agent, investment adviser representative, or federal covered investment adviser may only transact business in a state if first registered pursuant to or excluded or exempt from the state broker-dealer, investment adviser, broker-dealer agent, or investment adviser representative registration requirements, or federal covered investment adviser notice requirement; and

(2) The broker-dealer, investment adviser, broker-dealer agent, investment adviser representative, or federal covered investment adviser will not effect or attempt to effect transactions in securities or render personalized investment advice for compensation absent compliance with applicable state broker-dealer, investment adviser, broker-dealer agent, or investment adviser representative registration requirements, or federal covered investment adviser notice requirement or applicable exemption or exclusion;

b. The Internet communication contains a mechanism, including but not limited to technical firewalls or other policies and procedures, to ensure that, prior to effecting or attempting to effect transactions with customers in Iowa or prior to direct communication with prospective customers or clients in Iowa, the broker-dealer, investment adviser, broker-dealer agent, or investment adviser representative is first registered in Iowa or, in the case of a federal covered investment adviser, has made a notice filing, or qualifies for an exemption or exclusion from registration requirements;

c. The Internet communication is limited to general information regarding products and services, and the broker-dealer, investment adviser, broker-dealer agent, investment adviser representative, or federal covered investment adviser does not effect or attempt to effect transactions in securities in Iowa or provide personalized investment advice for compensation; and

d. In the case of a broker-dealer agent or investment adviser representative:

(1) The agent's broker-dealer, investment adviser, or federal covered investment adviser affiliation is prominently disclosed within the Internet communication;

(2) The broker-dealer, investment adviser, or federal covered investment adviser with whom the agent or representative is affiliated reviews and approves the content of any Internet communication by the broker-dealer agent or investment adviser representative;

(3) The broker-dealer, investment adviser, or federal covered investment adviser with whom the agent or representative is associated first authorizes the dissemination of information on the particular products and services through the Internet communication; and

(4) The broker-dealer agent or investment adviser representative acts within the scope of the authority granted by the broker-dealer, investment adviser, or federal covered investment adviser in the dissemination of information through the Internet communication.

50.50(2) Nothing in this rule shall excuse broker-dealer, investment adviser, broker-dealer agent, investment adviser representative, and federal covered investment adviser compliance with applicable securities registration, notice filing, antifraud or related provisions.

50.50(3) Nothing in this rule shall be construed to affect the activities of any broker-dealer, investment adviser, broker-dealer agent, investment adviser representative, or federal covered investment adviser engaged in business in Iowa that is not subject to the jurisdiction of the administrator as a result of NSMIA.

This rule is intended to implement Iowa Code sections 502.401 to 502.405.

191—50.51(502) Consent to service.

50.51(1) Every consent appointing the administrator or successor to be an attorney to receive service of any lawful process as required by Iowa Code section 502.611 shall be properly notarized and shall contain, at a minimum, the following information:

a. Name of the applicant;

b. Address of the applicant;

c. A statement that the consent is irrevocable;

d. A statement that the consent is valid as to any noncriminal suit, action or proceeding against the applicant or the successor, executor or administrator of the applicant which arises out of the Act; and

e. A statement that the applicant stipulates and agrees that service upon the administrator shall have the same validity as if served personally upon the applicant.

50.51(2) A form of consent to service of process provided by the administrator, a Form U-2, or a consent to service of process contained in any other form authorized or required to be filed by these rules shall satisfy subrule 50.51(1).

50.51(3) A broker-dealer, investment adviser, agent, investment adviser representative, federal covered investment adviser, or issuer may incorporate by reference any consent to service of process required to be filed pursuant to Iowa Code sections 502.302(1) "a," 502.302(3), 502.303(2), 502.304(2), 502.406(1) and 502.611, or the administrative rules implementing these sections.

This rule is intended to implement Iowa Code section 502.611.

191—50.52(252J) Denial, suspension or revocation of agent or investment adviser representative registration for failure to pay child support.

50.52(1) Upon receipt of a certificate of noncompliance from the CSRU for default on debts owed to or collected by the CSRU, the administrator shall issue a notice to a securities agent or investment adviser representative applicant or registrant that any pending application for registration will be denied or any current registration will be suspended or revoked 30 days after the date of the notice. The notice shall be served by restricted certified mail, return receipt requested, or by personal service as provided

by the Iowa Rules of Civil Procedure, unless the applicant or registrant accepts service personally or through authorized counsel.

50.52(2) The administrator shall provide the applicant or registrant with a copy of the certificate of noncompliance and shall provide a notice advising the applicant that:

a. The administrator intends to deny an application or to suspend or revoke a registration due to receipt of a certificate of noncompliance from the CSRU;

b. The applicant or registrant must contact the CSRU to schedule a conference or to otherwise obtain a withdrawal of a certificate of noncompliance;

c. Unless the CSRU furnishes a withdrawal of a certificate of noncompliance to the administrator within 30 days of issuance of the notice, the application shall be denied or the registration shall be suspended or revoked;

d. The applicant or registrant does not have a right to a hearing before the administrator, but may, pursuant to Iowa Code section 252J.9, request a court hearing within 30 days of provision of notice by the administrator; and

e. The filing of an application for hearing with the district court will stay the proceedings of the administrator.

50.52(3) The filing of an application for hearing with the district court under Iowa Code section 252J.9 automatically stays action of the administrator until the administrator is notified of the resolution of the application.

50.52(4) If the administrator does not receive a withdrawal of the certificate of noncompliance from the CSRU or a notice that an application for district court hearing has been filed, the administrator shall deny, suspend or revoke the application or registration 30 days after the notice prescribed in subrule 50.52(2) is issued.

50.52(5) Upon receiving a withdrawal of the certificate of noncompliance from the CSRU, the administrator shall immediately halt action to deny an application or suspend or revoke a registration. The applicant or registrant shall be notified that action has been halted. If the application has already been denied or if a registration has already been suspended or revoked, the applicant or former registrant shall reapply for registration. The application shall be granted if the individual is otherwise in compliance with applicable laws, rules, regulations and orders.

50.52(6) All application fees must be paid by the applicant before a registration will be issued after the administrator has denied, suspended, or revoked a registration pursuant to Iowa Code chapter 252J.

50.52(7) Notwithstanding any statutory confidentiality provision, the administrator may share information with the CSRU for the sole purpose of identifying applicants or registrants subject to enforcement pursuant to Iowa Code chapter 252J.

This rule is intended to implement Iowa Code chapter 252J.
[ARC 2872C, IAB 12/21/16, effective 1/25/17]

191—50.53(261) Denial, suspension or revocation of agent or investment adviser representative registration for failure to pay debts owed to or collected by the college student aid commission.

50.53(1) Upon receipt of a certificate of noncompliance from the college student aid commission for defaults on debts owed to or collected by the commission, the administrator shall issue a notice to a securities agent or investment adviser representative applicant or registrant that any pending application for registration or any current registration will be denied, suspended or revoked 30 days after the date of the notice. The notice shall be served by restricted certified mail, return receipt requested, or by personal service as provided by the Iowa Rules of Civil Procedure, unless the applicant or registrant accepts service personally or through authorized counsel.

50.53(2) The administrator shall provide the applicant or registrant with a copy of the certificate of noncompliance and shall provide a notice advising the applicant or registrant that:

a. The administrator intends to deny an application or suspend or revoke a registration due to receipt of a certificate of noncompliance from the college student aid commission;

b. The applicant or registrant must contact the college student aid commission to schedule a conference or to otherwise obtain a withdrawal of a certificate of noncompliance;

c. Unless the college student aid commission furnishes a withdrawal of a certificate of noncompliance to the administrator within 30 days of issuance of the notice, the application shall be denied or the registration shall be suspended or revoked;

d. The applicant or registrant does not have a right to a hearing before the administrator but may, pursuant to Iowa Code section 261.126, request a district court hearing within 30 days of provision of notice by the administrator; and

e. The filing of an application for hearing with the district court will stay the proceedings of the administrator.

50.53(3) The filing of an application for hearing with the district court under Iowa Code section 261.127 automatically stays action of the administrator until the administrator is notified of the resolution of the application.

50.53(4) If the administrator does not receive a withdrawal of the certificate of noncompliance from the college student aid commission or a notice that an application for district court hearing has been filed, the administrator shall deny the application or suspend or revoke the registration 30 days after the notice prescribed in subrule 50.53(2) is issued.

50.53(5) If the administrator receives a withdrawal of the certificate of noncompliance from the college student aid commission, the administrator shall immediately halt action to deny, suspend or revoke an application or registration. The applicant or registrant shall be notified that action has been halted. If the application or registration has already been denied, suspended or revoked, the applicant or former registrant shall reapply for registration. The application shall be granted if the individual is otherwise in compliance with applicable laws, rules, regulations and orders.

50.53(6) All application fees must be paid by the applicant before a registration will be issued after the administrator has denied, suspended, or revoked a registration pursuant to Iowa Code section 261.126.

50.53(7) Notwithstanding any statutory confidentiality provision, the administrator may share information with the college student aid commission for the sole purpose of identifying applicants or registrants subject to enforcement pursuant to Iowa Code section 261.126.

This rule is intended to implement Iowa Code section 261.126.

[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 2872C, IAB 12/21/16, effective 1/25/17]

191—50.54(272D) Denial, suspension or revocation of agent or investment adviser representative registration for failure to pay state debt.

50.54(1) Upon receipt of a certificate of noncompliance from the centralized collection unit of the department of revenue (CCU), the administrator shall issue a notice to a securities agent or investment adviser representative applicant or registrant that any pending application for registration will be denied or any current registration will be suspended or revoked 60 days after the date of the notice. The notice shall be served by restricted certified mail, return receipt requested, or by personal service as provided by the Iowa Rules of Civil Procedure, unless the applicant or registrant accepts service personally or through authorized counsel.

50.54(2) The administrator shall provide the applicant or registrant with a copy of the certificate of noncompliance and shall provide a notice advising the applicant that:

a. The administrator intends to deny an application or to suspend or revoke a registration due to receipt of a certificate of noncompliance from the CCU;

b. The applicant or registrant must contact the CCU to schedule a conference or to otherwise obtain a withdrawal of a certificate of noncompliance;

c. Unless the CCU furnishes a withdrawal of a certificate of noncompliance to the administrator within 60 days of issuance of the notice, the application shall be denied or the registration shall be suspended or revoked;

d. The applicant or registrant does not have a right to a hearing before the administrator, but may file an application for hearing in district court pursuant to Iowa Code section 272D.9; and

e. The filing of an application for hearing with the district court will stay the proceedings of the administrator.

50.54(3) The filing of an application for hearing with the district court under Iowa Code section 272D.9 automatically stays action of the administrator until the administrator is notified of the resolution of the application.

50.54(4) If the administrator does not receive a withdrawal of the certificate of noncompliance from the CCU or a notice that an application for district court hearing has been filed, the administrator shall deny, suspend or revoke the application or registration 60 days after the notice prescribed in subrule 50.54(2) is issued.

50.54(5) Upon receiving a withdrawal of the certificate of noncompliance from the CCU, the administrator shall immediately halt action to deny an application or suspend or revoke a registration. The applicant or registrant shall be notified that action has been halted. If the application has already been denied or if a registration has already been suspended or revoked, the applicant or former registrant shall reapply for registration. The application shall be granted if the individual is otherwise in compliance with applicable laws, rules, regulations and orders.

50.54(6) All application fees must be paid by the applicant before a registration will be issued after the administrator has denied, suspended, or revoked a registration pursuant to Iowa Code chapter 272D.

50.54(7) Notwithstanding any statutory confidentiality provision, the administrator may share information with the CCU for the sole purpose of identifying applicants or registrants subject to enforcement pursuant to Iowa Code chapter 272D.

This rule is intended to implement Iowa Code chapter 272D.

[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 2872C, IAB 12/21/16, effective 1/25/17]

191—50.55(502) Use of senior-specific certifications and professional designations.

50.55(1) The use of a senior-specific certification or designation by any person in connection with the offer, sale, or purchase of securities or the provision of advice as to the value of or the advisability of investing in, purchasing, or selling securities, either directly or indirectly or through publications or writings, or by issuing or promulgating analyses or reports relating to securities, that indicate or imply that the user has special certification or training in advising or servicing senior citizens or retirees in such a way as to mislead any person shall be a dishonest and unethical practice in the securities, commodities, investment, franchise, banking, finance, or insurance business within the meaning of Iowa Code section 502.412(4) “m.” The prohibited use of such certifications or professional designation includes, but is not limited to, the following:

- a. Use of a certification or professional designation by a person who has not actually earned or is otherwise ineligible to use such certification or designation;
- b. Use of a nonexistent or self-conferred certification or professional designation;
- c. Use of a certification or professional designation that indicates or implies a level of occupational qualifications obtained through education, training, or experience that the person using the certification or professional designation does not have; and
- d. Use of a certification or professional designation that was obtained from a designating or certifying organization that:
 - (1) Is primarily engaged in the business of instruction in sales or marketing;
 - (2) Does not have reasonable standards or procedures for ensuring the competency of its designees or certificants;
 - (3) Does not have reasonable standards or procedures for monitoring and disciplining its designees or certificants for improper or unethical conduct; or
 - (4) Does not have reasonable continuing education requirements for its designees or certificants in order to maintain the designation or certificate.

50.55(2) There is a rebuttable presumption that a designating or certifying organization is not disqualified solely for purposes of 50.55(1) “d” when the organization has been accredited by:

- a. The American National Standards Institute;
- b. The National Commission for Certifying Agencies; or

c. An organization that is on the United States Department of Education’s list entitled “Accrediting Agencies Recognized for Title IV Purposes” and the designation or credential issued therefrom does not primarily apply to sales or marketing.

50.55(3) In determining whether a combination of words or an acronym standing for a combination of words constitutes a certification or professional designation indicating or implying that a person has special certification or training in advising or servicing senior citizens or retirees, the administrator shall consider the following factors:

a. Use of one or more words such as “senior,” “retirement,” “elder,” or similar words combined with one or more words such as “certified,” “registered,” “chartered,” “adviser,” “specialist,” “consultant,” “planner,” or similar words in the name of the certification or professional designation; and

b. The manner in which those words are combined.

50.55(4) For purposes of this rule, a certification or professional designation does not include a job title within an organization that is licensed or registered by a state or federal financial services regulatory agency, when that job title:

a. Indicates seniority or standing within the organization; or

b. Specifies an individual’s area of specialization within the organization.

For purposes of this subrule, financial services regulatory agency includes, but is not limited to, an agency that regulates broker-dealers, investment advisers, or investment companies as defined under the Investment Company Act of 1940.

50.55(5) Nothing in this rule shall limit the administrator’s authority to enforce existing provisions of law.

This rule is intended to implement Iowa Code section 502.605(1).
[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.56 to 50.59 Reserved.

DIVISION V
REGISTRATION OF SECURITIES

191—50.60(502) Notice filings for investment company securities offerings.

50.60(1) Except as provided in subrule 50.60(5), no investment company that is registered under the Investment Company Act of 1940 or that has a currently filed registration statement under the Securities Act of 1933 is required to file with the administrator, either prior to the initial offer or after the initial offer in Iowa of a security which is a covered security under Section 18(b)(2) of the Securities Act of 1933, a copy of any document which is part of a federal registration statement filed with the SEC or is part of an amendment to such federal registration statement.

50.60(2) Prior to the initial offer of a federal covered security in Iowa, an investment company that is registered under the Investment Company Act of 1940 or that has filed a registration statement under the Securities Act of 1933 shall file with the administrator:

a. A notice of filing on Form NF;

b. A filing fee; and

c. A consent to service of process.

50.60(3) A notice of filing may be renewed prior to expiration by filing the following with the administrator:

a. A notice of filing on Form NF; and

b. Payment of the applicable fee under Iowa Code section 502.302(1) “*a.*”

50.60(4) Amendments to notice filings are made on Form NF and are effective upon receipt by the administrator. Withdrawal or termination of a notice filing is made by filing Form NF or providing the administrator with notice of the withdrawal or termination in a similar format. An amendment, withdrawal, or termination is effective upon receipt by the administrator of the required notice and all fees required by Iowa Code section 502.302(1) “*a.*”

This subrule is intended to implement Iowa Code section 502.302.

50.60(5) An investment company that is registered under the Investment Company Act of 1940 or that has filed a registration statement under the Securities Act of 1933 shall file, upon written request of the administrator and within the time period set forth in the request, a copy of any document identified in the request that is part of the federal registration statement filed with the SEC or part of an amendment to such federal registration statement.

50.60(6) An investment company that makes a notice filing under subrule 50.60(2) and that pays an initial \$400 filing fee under Iowa Code section 502.302(1)“a” shall pay a \$400 renewal fee prior to the notice filing’s annual renewal date. Notice filings that are not renewed by the annual renewal date shall expire.

This subrule is intended to implement Iowa Code section 502.302.

50.60(7) Effective January 1, 2019, when notice filings of the records and fees are required by this rule for the offer or sale of unit investment trusts (as defined in the Investment Company Act of 1940 (15 U.S.C. Section 80a-4(2)), the filings shall be submitted electronically through NASAA’s electronic filing depository system at efdnasaa.org.

This rule is intended to implement Iowa Code section 502.302(1).

[ARC 2175C, IAB 9/30/15, effective 11/4/15; ARC 2731C, IAB 9/28/16, effective 11/2/16; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.61(502) Registration of small corporate offerings.

50.61(1) Form U-7 may be obtained from the NASAA website at www.nasaa.org. Form U-7 has been developed under the Small Business Investment Incentive Act of 1980 which prescribes state and federal cooperation in furthering the policies of the Act: diminishing the burden of raising investment capital and minimizing interference with the business of capital formation.

50.61(2) To be eligible to use Form U-7, the issuer shall comply with each of the following requirements:

a. The issuer shall:

(1) Be a corporation or limited liability company organized under the laws of the United States or Canada, or any state, province, or territory or possession thereof, or the District of Columbia and have its principal place of business in one of the foregoing;

(2) Not be subject to the reporting requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934;

(3) Not be an investment company registered or required to be registered under the Investment Company Act of 1940;

(4) Not be engaged in or propose to be engaged in petroleum exploration and production, mining, or other extractive industries;

(5) Not be a development stage company that either has no specific business plan or purpose or has indicated that its business plan is to engage in a merger or acquisition with an unidentified company or companies or other entity or person; and

(6) Not be disqualified under subrule 50.61(3).

b. The offering price for common stock or common ownership interests (hereinafter, collectively referred to as “common stock”), the exercise price for options, warrants, or rights to common stock, or the conversion price for securities convertible into common stock must be greater than or equal to U.S. \$1 per share or unit of interest. The issuer must agree with the administrator that the issuer will not split its common stock, or declare a stock dividend for two years after the effective date of the registration if such action has the effect of lowering the price below U.S. \$1.

c. Commissions, fees or other remuneration for soliciting any prospective purchaser in connection with the offering in the state are only paid to persons who, if required to be registered or licensed, the issuer believes, and has reason to believe, are appropriately registered or licensed in the state.

d. Financial statements shall be prepared in accordance with either U.S. or Canadian generally accepted accounting principles. If appropriate, a reconciliation note should be provided. If the company has not conducted significant operations, statements of receipts and disbursements shall be included in lieu of statements of income. Interim financial statements may be unaudited. All other financial

statements shall be audited by independent certified public accountants, provided, however, that if each of the following four conditions are met, such financial statements in lieu of being audited may be reviewed by independent certified public accountants in accordance with the Accounting and Review Service Standards promulgated by the American Institute of Certified Public Accountants or the Canadian equivalent:

(1) The company shall not have previously sold securities through an offering involving the general solicitation of prospective investors by means of advertising, mass mailings, public meetings, "cold call" telephone solicitation, or any other method directed toward the public;

(2) The company has not been previously required under federal, state, provincial or territorial securities laws to provide audited financial statements in connection with any sale of its securities;

(3) The aggregate amount of all previous sales of securities by the company (exclusive of debt financing with banks and similar commercial lenders) shall not exceed U.S. \$1 million; and

(4) If the offering is a Rule 504 offering, the amount of the present offering does not exceed U.S. \$1 million.

e. The offering shall be made in compliance with Rule 504 of Regulation D, Regulation A, or Section 3(a)(11) of the Securities Act of 1933.

f. The issuer shall comply with the General Instructions to SCOR in Part I of the NASAA SCOR Issuer's Manual.

50.61(3) Disqualifications.

a. Unless the administrator determines that it is not necessary under the circumstances that the disqualification under this subrule be applied, application for registration referred to in subrule 50.61(2) shall be denied if the issuer, any of its officers, directors, stockholders who own 10 percent or greater of the issuer, promoters, or selling agents, or any officer, director or partner of any selling agent:

(1) Has filed a registration statement which is subject to a currently effective stop order entered pursuant to any state or provincial securities laws within five years prior to the filing of the registration statement;

(2) Has been convicted, within five years prior to the filing of the registration statement, of any felony or misdemeanor in connection with the offer, purchase, or sale of securities, or of any felony involving fraud or deceit including, but not limited to, forgery, embezzlement, obtaining money under false pretenses, larceny, or conspiracy to defraud;

(3) Is currently subject to any state or provincial administrative enforcement order or judgment entered by that state's or province's securities administrator within five years prior to the filing of the registration statement;

(4) Is subject to any state or provincial administrative enforcement order or judgment in which fraud or deceit including, but not limited to, making untrue statements of material facts and omitting to state material facts, was found, and the order or judgment was entered within five years prior to the filing of the current application for registration;

(5) Is subject to any state or provincial administrative enforcement order or judgment which prohibits, denies, or revokes the use of any exemption from registration in connection with the offer, purchase or sale of securities;

(6) Is currently subject to any order, judgment, or decree of any court of competent jurisdiction that temporarily, preliminarily, or permanently restrains or enjoins such party from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security, or involving the making of any false filing with the state, entered within five years prior to the filing of the registration statement; or

(7) Has violated the law of a foreign jurisdiction governing or regulating any aspect of the business of securities or banking or, within the past five years, has been the subject of an action of a securities regulator of a foreign jurisdiction denying, revoking or suspending the right to engage in the business of securities as a broker-dealer, agent or investment adviser or is the subject of an action of any securities exchange or self-regulatory organization operating under the authority of the securities regulator of a foreign jurisdiction suspending or expelling such person from membership in such exchange or self-regulatory organization.

b. The prohibitions of subparagraphs (1) to (3) and (5) of paragraph 50.61(3)“*a*” shall not apply if the person subject to the disqualification is duly registered or licensed to conduct securities-related business in the state or province in which the administrative order or judgment was entered against such person, or if the broker-dealer employing such person is registered or licensed in the state and the Form BD filed in the state discloses the order, conviction, judgment or decree relating to such person.

c. No person disqualified shall act in any capacity other than the capacity for which the person is registered or licensed.

d. Disqualification is automatically waived if the jurisdiction which created the basis for disqualification determines upon a showing of good cause that it is not necessary under the circumstances that registration be denied.

This rule is intended to implement Iowa Code section 502.304.

[ARC 2175C, IAB 9/30/15, effective 11/4/15]

191—50.62(502) Streamlined registration for certain equity securities.

50.62(1) An equity security meeting the conditions of this rule may be registered pursuant to Iowa Code section 502.303 if all of the following conditions are satisfied, unless waived by the administrator, and except as provided by subrule 50.62(2):

a. The issuer must be a corporation organized under the laws of one of the states or possessions of the United States;

b. The offering price for common stock, the exercise price if the securities are options, warrants, or rights for common stock, or the conversion price if the securities are convertible into common stock must be equal to or greater than \$5 per share;

c. The issuer of the security has (or will have upon completion of the offering) total assets exceeding \$10 million;

d. The security will be offered under a firm underwriting;

e. The security is the subject of a registration statement filed on Form S-1 or Form SB-2 with the SEC; and

f. The registration statement filed with the administrator contains audited financial statements for each of the two most recently concluded fiscal years of its operations, and the audit for the most recent fiscal year does not include an auditor’s report expressing substantial doubt about the issuer’s ability to continue as a going concern.

50.62(2) Registration pursuant to this rule is not available if:

a. The issuer is a blind pool or other offering for which the specific business or properties cannot now be described; or

b. The issuer, a principal officer or a principal shareholder thereof, or a broker-dealer offering or selling the securities:

(1) Is subject to statutory disqualification, as defined by subparagraphs (A), (B), (C), or (D) of Section 3(a)(39) of the Securities Exchange Act of 1934;

(2) Has been convicted of any felony under federal or state law regarding the offer, purchase, or sale of any security, or any felony under federal or state law involving fraud or deceit in the ten years prior to the date of the offering;

(3) Is currently named in and subject to any order, judgment, or decree of any court of competent jurisdiction acting under federal or state law temporarily or permanently restraining or enjoining the person from engaging in or continuing any conduct or practice in connection with the offer, purchase, or sale of a security;

(4) Has filed a registration statement which is currently the subject of a stop order entered pursuant to any state’s securities law within five years prior to the offering;

(5) Is currently subject to any state administrative enforcement order or judgment entered by that state’s securities administrator within five years prior to the offering, or is currently subject to any state’s administrative enforcement order or judgment in which fraud or deceit was found within five years prior to the offering; or

(6) Is currently subject to any state's administrative order or judgment prohibiting, denying, or revoking the use of any exemption from registration regarding the offer, sale, or purchase of any security, or involving the making of a false filing with the state within five years of the offering.

50.62(3) The unavailability of streamlined registration pursuant to this rule as a result of the disqualification of a party pursuant to paragraph 50.62(2) "b" may be waived by the administrator if the order, conviction, judgment or decree relating to the party's disqualification was disclosed in writing to the administrator and the administrator determines, based upon good cause shown, that the public interest no longer requires the party to be disqualified.

50.62(4) The administrator shall review a filing made pursuant to this rule within ten business days of receipt. Registration shall be effective upon review, or earlier if the administrator permits a shorter time frame, or comments explaining noncompliance will be promptly sent to the applicant.

50.62(5) The administrator shall not deny the effectiveness of a registration made pursuant to this rule based on subrule 50.66(13) or 50.66(15), or based upon the financial condition of the issuer under Iowa Code section 502.306(1) "h."

50.62(6) The following securities shall be the subject of a lockup with the managing underwriter for no less than 180 days, or a longer period if requested by the managing underwriter of the offering:

a. A security issued to a promoter within three years immediately preceding the offering or to be issued to a promoter for consideration substantially less than the offering price; or

b. A security issued to a promoter for a consideration other than cash, unless the registrant demonstrates that the value of the noncash consideration received in exchange for the security is substantially equal to the offering price for the security. A copy of the lockup agreement shall be filed with the administrator.

50.62(7) For purposes of this rule, a "promoter" is:

a. A person who, acting alone or in concert with one or more other persons, founds or organizes the business or enterprise of the issuer;

b. An officer or director owning securities of the issuer, or a person who owns, beneficially or of record, 10 percent or more of a class of securities of the issuer if the officer, director, or person acquires any of those securities in a non-arm's-length transaction within the three years prior to the filing of the registration statement pursuant to this rule; or

c. A member of the immediate family of a person described in paragraph "a" or "b" of subrule 50.62(7) if the family member receives securities of the issuer from that person in a non-arm's-length transaction within the three years prior to the filing of the registration statement pursuant to this rule.

This rule is intended to implement Iowa Code section 502.303.

191—50.63(502) Registration of multijurisdictional offerings.

50.63(1) Pursuant to Iowa Code section 502.303(2), offerings filed on SEC Form F-7, Form F-8, Form F-9 or Form F-10 shall become effective the later of three days after filing, or the effective date with the SEC.

50.63(2) Pursuant to Iowa Code section 502.605(3), financial statements and financial information for offerings filed under subrule 50.63(1) shall comply with instructions provided with SEC Form F-7, Form F-8, Form F-9 or Form F-10.

50.63(3) In a Rights Offering, SEC Form F-7 will be accepted in lieu of any state form required to claim an exemption for any transaction pursuant to an offer to existing securities holders.

50.63(4) After the SEC has declared effective an issuer's Form F-8, Form F-9 or Form F-10 registration statement, a nonissuer transaction in any class of the issuer's securities is exempt from registration, whether or not the transaction is effected through a broker-dealer.

This rule is intended to implement Iowa Code sections 502.303(2) and 502.605(3).

191—50.64(502) Form of financial statements.

50.64(1) Except as otherwise provided by this rule, the balance sheet, statement of cash flows, and statement of income required by Iowa Code section 502.304(2) "q" shall be certified by an independent certified public accountant who shall also issue an opinion on the financial statements. The audit and

opinion requirements may be waived by the administrator upon written application and for good cause shown.

50.64(2) The balance sheet, statement of cash flows, and statement of income provided for compliance with the four-month requirement of Iowa Code section 502.304(2) “q” need not be certified in accordance with subrule 50.64(1) if such certification was submitted for the last fiscal year prior to the application and the date of the financial statements subject to certification is not more than 12 months prior to the registration date.

This rule is intended to implement Iowa Code section 502.304.

191—50.65(502) Reports contingent to registration by qualification. In the administrator’s discretion, a registration by qualification statement filed pursuant to Iowa Code section 502.304 may not become effective until one or both of the following are filed:

1. When the value, after its purchase, of certain property does or will constitute a material portion of the assets of the issuer or any other person whose financial condition is significant to the registration, the report of any appraiser or engineer; and

2. When the ownership of any such property is material to the registration, a signed opinion of legal counsel regarding ownership of any property.

This rule is intended to implement Iowa Code section 502.304(2A).

191—50.66(502) NASAA guidelines and statements of policy.

50.66(1) *Overview of national models.* In cooperation with the securities administrators of other states and with a view to effectuating a policy to achieve maximum uniformity of regulations regarding the registration of securities, registration and business practices of securities industry and investment advisory registrants, and enforcement of antifraud laws, and in the interest of streamlining the rules contained in Chapter 50, the administrator incorporates by reference the following guidelines and statements of policy promulgated by NASAA. This rule does not include any later amendments or editions of the incorporated matter.

The NASAA website allows access to statements of policy, comment letters, model rules, NASAA proposals published for comment, and state rule proposals and may be found at www.nasaa.org, under “regulatory & legal activity.”

50.66(2) *Registration of oil and gas programs.* All oil and gas programs filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Registration of Oil and Gas Programs, which were initially adopted by the NASAA membership on September 22, 1976, as amended on October 12, 1977; October 31, 1979; April 23, 1983; July 1, 1984; September 3, 1987; September 14, 1989; October 24, 1991; May 7, 2007; and May 6, 2012; and published in CCH NASAA Reports at paragraph 2621.

50.66(3) *Uniform disclosure guidelines—legend.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Cover Legends as adopted by the NASAA membership on October 2, 2004, and published in CCH NASAA Reports at paragraph 1351.

50.66(4) *Omnibus guidelines.* All registrations of limited or general partnerships, joint ventures, unincorporated associations, or similar organizations, other than a corporation formed and operated for the primary purpose of investment in and the operation of or gain from and interest in the assets to be acquired by such entity for which statements of policy have not been adopted by the NASAA membership, filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Omnibus Guidelines as adopted by the NASAA membership on March 29, 1992, as amended on May 7, 2007; and published in CCH NASAA Reports at paragraph 2321.

50.66(5) *Registration of commodity pool programs.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Registration of Commodity Pool Programs as adopted by the NASAA membership on September 21, 1983, effective January 1, 1984, amended August

30, 1990, amended May 7, 2007, amended May 6, 2012, and published in CCH NASAA Reports at paragraph 1201.

50.66(6) *Registration of equipment programs.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Equipment Programs as adopted by the NASAA membership on November 20, 1986, effective January 1, 1987, amended April 22, 1988, October 24, 1991, May 7, 2007, and May 6, 2012, and published in CCH NASAA Reports at paragraph 1601.

50.66(7) *Registration of real estate programs.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Real Estate Programs as adopted by the NASAA membership on September 29, 1993, last revised, May 7, 2007, and published in CCH NASAA Reports at paragraph 3601.

50.66(8) *Registration of mortgage programs.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Mortgage Programs as adopted by the NASAA membership on September 10, 1996, amended May 2007, and published in CCH NASAA Reports, paragraph 701.

50.66(9) *Real estate investment trusts.* The registration of a real estate investment trust may be disallowed if it does not substantially comply, as determined by the administrator, with the NASAA Statement of Policy Regarding Real Estate Investment Trusts as revised and adopted by the NASAA membership on September 29, 1993, as revised on May 7, 2007, and published in CCH NASAA Reports at paragraph 3401.

50.66(10) *Corporate securities definitions.* For securities registration purposes, the administrator adopts the various definitions set out in the NASAA Statement of Policy Regarding Corporate Securities Definitions as adopted by the NASAA membership on April 27, 1997, and as amended September 28, 1999, and March 31, 2008, and published in CCH NASAA Reports at paragraph 3812.

50.66(11) *Impoundment of proceeds.* When an impoundment of proceeds is necessary, it shall substantially comply, as determined by the administrator, with the NASAA Statement of Policy Regarding the Impoundment of Proceeds as adopted by the NASAA membership on April 27, 1997, and as amended September 28, 1999, and March 31, 2008, and published in CCH NASAA Reports at paragraph 2151.

50.66(12) *Loans and other material affiliated transactions.* When there have been or will be loans or other material affiliated transactions, the transactions shall substantially comply, as determined by the administrator, with the NASAA Statement of Policy Regarding Loans and Other Material Affiliated Transactions as amended by the NASAA membership on April 27, 1997, and March 31, 2008, and published in CCH NASAA Reports at paragraph 374.

50.66(13) *Options and warrants.* The issuance of options and warrants may be allowed by the administrator if the issuance is in substantial compliance, as determined by the administrator, with the NASAA Statement of Policy Regarding Options and Warrants as adopted by the NASAA membership on November 17, 1997, and as amended September 28, 1999, and as amended March 31, 2008, and published in CCH NASAA Reports at paragraph 2801.

50.66(14) *Preferred stock.* A public offering of preferred stock may be allowed by the administrator if the administrator determines that the offering substantially complies with the NASAA Statement of Policy Regarding Preferred Stock as adopted by the NASAA membership on April 27, 1997, and as amended March 31, 2008, and September 11, 2016 (nasaa.cdn.s3.amazonaws.com/wp-content/uploads/2011/07/SOP-Regarding-Preferred-Stock-Amended0916.pdf).

50.66(15) *Promotional shares.* The registration of a security may include promotional shares if it substantially complies, as determined by the administrator, with the NASAA Statement of Policy Regarding Promotional Shares as adopted by the NASAA membership on April 27, 1997, and as amended September 28, 1999, and March 31, 2008, and published in CCH NASAA Reports at paragraph 3201.

50.66(16) *Risk disclosure.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines

for Risk Disclosure as adopted by the NASAA membership on September 8, 2001, and published in CCH NASAA Reports at paragraph 1362.

50.66(17) *Unsound financial condition.* An issuer may be deemed to be in an unsound financial condition if it substantially meets, as determined by the administrator, the conditions provided within the NASAA Statement of Policy Regarding Unsound Financial Condition as adopted by the NASAA membership on April 27, 1997, and as amended September 28, 1999, and March 31, 2008, and published in CCH NASAA Reports at paragraph 3821.

50.66(18) *Use of proceeds.* The registration of a security may be disallowed if the administrator determines that the registration does not substantially comply with the NASAA Statement of Policy Regarding Specificity in Use of Proceeds as amended by the NASAA membership on April 27, 1997, September 28, 1999, March 31, 2008, and September 11, 2016 (nasaa.cdn.s3.amazonaws.com/wp-content/uploads/2011/07/SPECIFICITY_IN_USE_OF_PROCEEDS-Amended0916.pdf).

50.66(19) *Registration of asset-backed securities.* All registrations of securities filing for registration by coordination or qualification shall substantially comply, as determined by the administrator, with the NASAA Guidelines for Registration of Asset-Backed Securities as adopted by the NASAA membership on October 25, 1995, amended May 7, 2007, and May 6, 2012, and published in CCH NASAA Reports at paragraph 501.

50.66(20) *Promoters' equity investment.* The registration of a security may be disallowed by the administrator if the administrator determines that the registration does not substantially comply with the NASAA Statement of Policy Regarding Promoters' Equity Investment as amended by the NASAA membership on April 27, 1997, March 31, 2008, and September 11, 2016 (nasaa.cdn.s3.amazonaws.com/wp-content/uploads/2011/07/PROMOTERS_EQUITY_INVESTMENT-revised0916.pdf).

50.66(21) *Unequal voting rights.* The registration of a security may be disallowed by the administrator if the administrator determines that the registration does not substantially comply with the NASAA Statement of Policy Regarding Unequal Voting Rights as adopted by the NASAA membership on October 24, 1991, and as amended March 31, 2008, and September 11, 2016 (nasaa.cdn.s3.amazonaws.com/wp-content/uploads/2011/07/SOP_Unequal_Voting_Rights-Amended0916.pdf).

50.66(22) *Use of electronic offering documents and electronic signatures.*

a. Definitions. For purposes of this subrule, the following definitions apply.

"Offering documents" means documents that include, but are not limited to, the registration statement, prospectus, applicable agreements, charter, bylaws, opinion of counsel and other opinions, specimen, indenture, consent to service of process and associated resolution, sales materials, subscription agreement, and applicable exhibits.

"Sales materials" means materials that include only those materials to be used in connection with the solicitation of purchasers of the securities approved as sales literature or other related materials by the SEC, FINRA, and the states, as applicable.

"Security breach" means the unauthorized accessing, acquisition, or disclosure of any data that compromises the security or confidentiality of confidential personal information maintained by the person or business; provided, however, that for this purpose a "security breach" shall relate only to a system, technology, or process that is used in connection with or is introduced into a securities offering in order to implement the use of electronic offering documents or electronic signatures.

b. Use of electronic offering documents and subscription agreements.

(1) An issuer of securities or agent acting on behalf of the issuer may deliver offering documents over the Internet or by other electronic means, or in machine-readable format, provided all of the following requirements are met:

1. Each offering document:

- Is prepared, updated, and delivered in a manner consistent and in compliance with state and federal securities laws;
- Satisfies the formatting requirements applicable to printed documents, such as font size and typeface, and is identical in content to the printed version (other than electronic instructions or procedures as may be displayed and nonsubstantive updates to daily net asset value which can be updated more efficiently in the electronic version);

- Is delivered as a single, integrated document or file; when delivering multiple offering documents, the documents must be delivered together as a single package or list;
 - Where the offering documents include a hyperlink to external documents or content, provides notice to investors or prospective investors that the document or content being accessed by the hyperlink is provided by an external source; and
 - Is delivered in an electronic format that intrinsically enables the recipient to store, retrieve, and print the documents;
2. The issuer or agent acting on behalf of the issuer:
 - Obtains informed consent from the investor or prospective investor to receive offering documents electronically;
 - Ensures that the investor or prospective investor receives timely, adequate, and direct notice when an electronic offering document has been delivered;
 - Employs safeguards to ensure that delivery of offering documents occurred at or before the time required by law in relation to the time of sale; and
 - Maintains evidence of delivery by keeping records of its electronic delivery of offering documents and makes those records available on demand by the securities administrator.

(2) Subscription agreements may be provided electronically by an issuer or agent acting on behalf of the issuer for the prospective investor to review and complete, provided the subscription process is administered in a manner that is similar to the administration of subscription agreements in paper form, as follows:

1. Before completion of any subscription agreement, the issuer or agent acting on behalf of the issuer shall review with the prospective investor all appropriate documentation related to the prospective investment including documents and instructions on how to complete the subscription agreement;
2. Mechanisms shall be established to ensure a prospective investor reviews all required disclosures and scrolls through the document in its entirety prior to initialing or signing; and
3. Unless otherwise allowed by the securities administrator, a single subscription agreement shall be used to subscribe a prospective investor in no more than one offering.

(3) Security breach.

1. In the event of discovery of a security breach at any time in any jurisdiction, the issuer or its agents, as appropriate, shall take prompt action to do all of the following:
 - Identify and locate the breach.
 - Secure the affected information.
 - Suspend the use of the particular device or technology that has been compromised until information security has been restored.
 - Provide notice of the security breach to any investor whose confidential personal information has been improperly accessed in connection with the security breach and to the securities administrator of each state in which an affected investor resides.

2. Compliance with subparagraph 50.66(22)“b”(3) after the discovery of a security breach or any other breach of personal information shall not substitute or in any way affect other requirements or obligations, including notification, imposed on an issuer or its agents pursuant to applicable laws, regulations, or standards.

(4) Delivery requires that the offering documents be conveyed to and received by the investor or prospective investor, or that the storage media in which the offering documents are stored be physically delivered to the investor or prospective investor in accordance with numbered paragraph 50.66(22)“b”(1)“1.”

(5) Each electronic document shall be preceded by or presented concurrently with the following notice: **“Clarity of text in this document may be affected by the size of the screen on which it is displayed.”**

(6) Informed consent to receive offering documents electronically pursuant to the first bulleted paragraph of numbered paragraph 50.66(22)“b”(1)“2” may be obtained in connection with each new offering or globally, either by the issuer or by an agent acting on behalf of the issuer. The investor may revoke this consent at any time by informing the party to whom the consent was given, or, if such party

is no longer available, the issuer. Generally, a consent is considered to be informed when an investor is apprised that the document to be provided will be available through a specific electronic medium or source, and that there may be costs associated with delivery. In addition, for a consent to be informed an investor must be apprised of the time and scope parameters of the consent.

(7) Investment opportunities shall not be conditioned on participation in the electronic offering documents and subscription agreements initiative.

(8) Investors or prospective investors who decline to participate in an electronic offering documents and subscription agreements initiative shall not be subjected to higher costs—other than the actual direct cost of printing, mailing, processing, and storing offering documents and subscription agreements—as a result of their lack of participation in the initiative, and no discount shall be given for participating in an electronic offering documents and subscription agreements initiative.

(9) Entities participating in an electronic initiative shall maintain, and shall require participating underwriters, dealer-managers, placement agents, broker-dealers, or other selling agents to maintain, written policies and procedures covering the use of electronic offering documents and subscription agreements.

(10) Entities and their contractors and agents having custody and possession of electronic offering documents, including electronic subscription agreements, shall store them in a nonrewriteable and nonerasable format.

(11) Subrule 50.66(22) does not change or waive any other requirement of law concerning registration or presale disclosure of securities offerings.

c. Use of electronic signatures.

(1) An issuer of securities or agent acting on behalf of the issuer may provide for the use of electronic signatures if all of the following are true:

1. The process by which electronic signatures are obtained:

- Shall be implemented in compliance with the Electronic Signatures in Global and National Commerce Act and the Uniform Electronic Transactions Act, and, where applicable, shall include required federal disclosures;

- Shall include an appropriate level of security and assurances of accuracy;

- Shall employ an authentication process to establish signer credentials;

- Shall employ security features that protect signed records from alteration; and

- Shall provide that either the issuer or agent acting on behalf of the issuer retain, in compliance with applicable laws and regulations, electronically signed documents;

2. An investor or prospective investor shall expressly opt in to the electronic signature initiative, and participation may be terminated at any time; and

3. Investment opportunities shall not be conditioned on participation in the electronic signature initiative.

(2) Entities that participate in an electronic signature initiative shall maintain, and shall require underwriters, dealer-managers, placement agents, broker-dealers, and other selling agents to maintain, written policies and procedures covering the use of electronic signatures.

(3) Documentation of an investor's election to participate in an electronic signature initiative by following the requirements of numbered paragraph 50.66(22) "b"(1)"2" may be obtained in connection with each new offering, or by an agent acting on behalf of the issuer. The investor may revoke this consent at any time by informing the party to whom the consent was given, or, if such party is no longer available, the issuer.

This rule is intended to implement Iowa Code sections 502.305(6) and 502.306(1).

[ARC 1076C, IAB 10/2/13, effective 11/6/13; ARC 2175C, IAB 9/30/15, effective 11/4/15; ARC 3391C, IAB 10/11/17, effective 11/15/17]

191—50.67(502) Amendments to registration by qualification. A registration statement registered by qualification pursuant to Iowa Code section 502.304 is presumed to be reasonably current for purposes of Iowa Code section 502.305(9) if:

1. The issuer notifies the administrator in writing of any change in a material fact contained in the registration statement no later than 7 days after the issuer learns of the change; and

2. The issuer notifies the administrator in writing of the results of an annual audit or semiannual report no later than 14 days after receiving such audit results or semiannual report unless the results constitute a change in material fact subject to the provisions of paragraph “1.”

This rule is intended to implement Iowa Code section 502.305(9).

191—50.68(502) Delivery of prospectus. As a condition to registration by qualification pursuant to Iowa Code section 502.304, a prospectus containing the information required by Iowa Code section 502.304(2) shall be delivered to each person to which an offer is made, before or concurrently with the earliest of the following events:

1. The first offer made in a record to each person otherwise than by means of a public advertisement, by or for the account of the issuer or any other person on whose behalf the offering is made, or by any underwriter or broker-dealer offering part of an unsold allotment or subscription taken as a participant in the distribution;

2. The confirmation of any sale made by or for the account of the person;

3. The payment pursuant to any such sale; or

4. The delivery of the security pursuant to any such sale.

This rule is intended to implement Iowa Code section 502.304(5).

191—50.69(502) Advertisements.

50.69(1) The following advertising regarding the offer, sale or purchase of any security in Iowa is exempt from the filing requirements of Iowa Code section 502.504:

a. A prospectus published or circulated regarding an offering of a security registered pursuant to Iowa Code section 502.303 or 502.304 that is not yet effective, or an offering of a security for which a notice or application for exemption, including the prospectus, has been filed pursuant to Iowa Code section 502.201 or 502.202;

b. Advertising which provides information regarding only from whom a prospectus may be obtained, a description of the security offered for sale, the price of the security, or the names of broker-dealers having an interest in its sale;

c. Advertising published by a registered broker-dealer or investment adviser concerning the qualifications or business of the registrant, the general advisability of investing in securities or market quotations or other factual information relating to particular securities or issuers, provided the advertising contains no recommendation concerning the purchase or sale of a particular security;

d. Unless specifically requested by the administrator, advertising filed with FINRA or that satisfies the requirements of Securities Act of 1933 Rules 230.135a, 230.156, or 230.482; and

e. Any other advertising the administrator may specify by order.

50.69(2) All advertising required to be filed with the administrator by a registrant shall be filed prior to the date of use. All advertising required to be filed by a person other than a registrant shall be filed at least ten days prior to the date of use, or a shorter period if provided by the administrator. The advertising shall not be used in Iowa until the registrant receives approval from the administrator.

50.69(3) Sales literature of an investment company registered pursuant to the Investment Company Act of 1940 which is materially misleading within the meaning of rules or a statement of policy of the SEC constitutes false or misleading advertising as prohibited by Iowa Code section 502.504(2A).

50.69(4) False or misleading advertisements prohibited by Iowa Code section 502.504(2A) include, but are not limited to, the following:

a. Comparison charts or graphs showing a distorted, unfair, or unrealistic relationship between the issuer’s past performance, progress, or success and that of another company, business, industry, or investment media;

b. Layout or format omitting information necessary to make the entire advertisement a fair and truthful representation;

c. Statements or representations without accreditation predicting future profit, success, appreciation, or performance, or otherwise addressing the merit or potential of the securities;

d. Generalizations, generalized conclusions, opinions, representations, and general statements based upon a particular set of facts and circumstances unless those facts and circumstances are stated and modified or explained by additional facts or circumstances as are necessary to make the entire advertisement a full, fair, and truthful representation;

e. Sales kits or film clips, displays or exposures, which alone or by sequence and progressive compilation present a misleading impression of guaranteed or exaggerated potential, profit, safety, or return;

f. Distribution of any nonfactual or inaccurate data or material by words, pictures, charts, or graphs, or otherwise based upon conjectural, unfounded, extravagant, or flamboyant claims, assertions, or predictions, or upon excessive optimism; and

g. Any package or bonus deal, prize, gimmick, or similar inducement regarding the offer or sale of a security that is combined with or dependent upon the sale of some other product, contract, or service unless the combination has been fully disclosed and specifically described and identified in the advertisement.

50.69(5) Any business card or other advertisement containing the name of an agent shall:

a. Clearly designate the agent as a securities agent or registered representative of the broker-dealer, as applicable, and indicate clearly that the broker-dealer is a broker-dealer;

b. Contain no advertising other than agent name, office address, broker-dealer name, and broker-dealer logo or trademark on the business cards;

c. Provide the office address and telephone number of the location where the agent conducts securities business; and

d. Clearly state the business of that entity and the relationship of the agent to that entity if the name, logo or trademark of any business entity other than that of the broker-dealer appears on the business card or in an advertisement.

50.69(6) A firm employing a sales agent who is offering securities on its behalf is responsible for ensuring that the name of the broker-dealer is displayed on the agent's business cards as prominently as the individual's name.

50.69(7) For the purpose of this rule, "advertisement" means any written or printed communication or any communication by means of recorded telephone messages or transmitted on radio, television, or other electronic communications media, published regarding the offer, sale, or purchase of a security.

This rule is intended to implement Iowa Code section 502.504.

[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.70(502) Fee for securities registration filings under Iowa Code section 502.305. Except as provided in Iowa Code sections 502.302(3) and 502.304A(3) "g," a person who files a registration statement or a notice filing pursuant to Iowa Code section 502.305 as amended by 2016 Iowa Acts, House File 2394, section 2, shall pay the following fees:

50.70(1) For the initial filing, \$400 for one year; and

50.70(2) On each anniversary date of the initial filing, an annual renewal fee of \$400.

This rule is intended to implement Iowa Code section 502.305.

[ARC 2731C, IAB 9/28/16, effective 11/2/16]

191—50.71 to 50.79 Reserved.

DIVISION VI
EXEMPTIONS

191—50.80(502) Uniform limited offering exemption. Rescinded ARC 3741C, IAB 4/11/18, effective 5/16/18.

191—50.81(502) Notice filings for Rule 506 offerings. An issuer offering a security that is a covered security pursuant to Section 18(b)(4)(F) of the Securities Act of 1933 shall submit no later than 15 days after the first sale of such federal covered security in Iowa an electronic filing and fees through www.efdnasaa.org, under “filers and issuers.”

This rule is intended to implement Iowa Code section 502.302(3).
[ARC 2175C, IAB 9/30/15, effective 11/4/15; ARC 2872C, IAB 12/21/16, effective 1/25/17; ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.82(502) Notice filings for agricultural cooperative associations.

50.82(1) An agricultural cooperative association issuing notes or other evidence of indebtedness shall notify the administrator in writing 30 days before the security is initially sold. Notification shall include:

- a. The name of the issuer, the date of organization of the issuer, and the name of a contact person.
- b. A description of the class of persons to whom the offer of securities will be made. If the offering is being made to certain persons or within a specified area, a description of such offerees or area shall be included.
- c. A description of the type of security to be offered which includes information regarding interest and interest payment schedules, default, redemption, reinvestment, and other facts regarding the rights of holders that the issuer deems material to the offering.
- d. Financial statements of the agricultural cooperative association including a balance sheet as of the end of its most recent fiscal year, prepared under generally accepted accounting principles and accompanied by an independent auditor’s report and any other audited financial statements of the association that are available. However, if the filing by the agricultural cooperative association is made within 90 days of the end of its most recent fiscal year and current audited financial statements are not yet available, the filing may consist of an audited balance sheet and other available audited financial statements for the previous fiscal year, prepared under generally accepted accounting principles and accompanied by an independent auditor’s report. The agricultural cooperative association shall file an audited balance sheet and any other available audited financial statements for the most recent fiscal year end as soon as they become available, but in no event later than 90 days after the end of its fiscal year.

50.82(2) If, after the anniversary date of its initial notice filing, an agricultural cooperative association continues to issue notes or other evidence of indebtedness under its initial notice filing in order to maintain the exemption, the agricultural cooperative association shall on an annual basis file with the administrator an audited balance sheet and any other audited financial statements within 30 days of the anniversary of its initial notice filing. An agricultural cooperative association making its initial filing based upon a previous year’s audited financial statements because of the unavailability of current audited financial statements shall consider its anniversary date to be the date on which the cooperative filed the audited financial statements for the most recent fiscal year. An agricultural cooperative association not issuing notes or other evidence of indebtedness after an anniversary date of its initial filing is not required to make any further filing of financial information as a condition of qualifying for the exemption from registration.

This rule is intended to implement Iowa Code section 502.201(8B) “b.”
[ARC 2175C, IAB 9/30/15, effective 11/4/15]

191—50.83(502) Unsolicited order exemption.

50.83(1) Any unregistered broker-dealer effecting a transaction under an unsolicited order or offer to buy and claiming an exemption from registration based solely upon Iowa Code section 502.202(6) shall obtain acknowledgment from the customer on or before the settlement date of the transaction that the transaction is unsolicited.

50.83(2) The acknowledgment shall take one of the following forms:

- a. A confirmation statement, as required pursuant to subrule 50.83(1), displaying in bold print on the face of the statement the words “Unsolicited Order, Notify Immediately if Otherwise”; or
- b. A signed statement from the customer acknowledging that the order was unsolicited and containing the name of the customer, the name of the securities involved, the number of securities

involved in the transaction, the purchase price of the securities, the transaction date, and the total dollar amount, including commissions paid, of the transaction.

50.83(3) The customer will be presumed to have acknowledged that the transaction was unsolicited if the customer does not indicate otherwise on or before the settlement date.

50.83(4) A broker-dealer shall notify the administrator in writing that it is executing unsolicited orders in a security when both of the following conditions are met:

a. More than six unsolicited orders or offers to buy such security are received during any three consecutive business days; and

b. The broker-dealer is relying solely upon the exemption provided by Iowa Code section 502.202(6).

This rule is intended to implement Iowa Code section 502.202(6).

191—50.84(502) Solicitation of interest exemption.

50.84(1) An offer, but not a sale, of a security made by or on behalf of an issuer for the sole purpose of soliciting an indication of interest in receiving a prospectus (or its equivalent) for such security is exempt from registration pursuant to Iowa Code section 502.301 if:

a. The issuer is or will be a business entity organized under the laws of one of the states or possessions of the United States or one of the provinces or territories of Canada, is engaged in or proposes to engage in a business other than petroleum exploration or production or mining or other extractive industries, and is not a blind pool offering or other offering for which the specific business or properties cannot now be described.

b. The offerer intends to register the security in Iowa and conduct its offering pursuant to either Regulation A or Rule 504 of Regulation D, as promulgated by the SEC.

c. The offerer files with the administrator a SOIF along with any other materials to be used to conduct solicitations of interest including, but not limited to, the script of any broadcast to be made and a copy of any notice to be published no less than ten business days prior to the initial solicitation of interest.

d. The issuer files with the administrator all amendments to any materials filed pursuant to paragraph “c” or additional materials it proposes to use in conducting solicitations of interest, except for materials provided to a particular investor solely pursuant to a request by that investor, no less than five business days prior to use.

e. The offerer does not use any SOIF, script, advertisement, or other material which the administrator has ordered or notified the offerer may not be used for the purpose of solicitations of interest.

f. Except for scripted broadcasts and except to the extent necessary to obtain information needed to provide a SOIF, the offerer does not orally communicate with any prospective investor about the contemplated offering unless the investor is provided with the most current SOIF at or before the time of the communication or within five days after the communication.

g. The offerer does not solicit or accept money or a commitment to purchase securities during the solicitation of interest period.

h. The offerer does not make a sale until at least seven days after delivery to the purchaser of a final prospectus or delivery of a preliminary prospectus as provided by Iowa Code section 502.202(17).

50.84(2) Unless the offerer does not know, and in the exercise of reasonable care could not know, the exemption under this rule is not available for securities of an offerer, if any of the issuer’s officers, directors, promoters, or 10 percent shareholders:

a. Have filed a registration statement which is the subject of a current effective registration stop order entered under any federal or state securities law within five years prior to filing the SOIF.

b. Have been convicted within five years prior to filing the SOIF of any felony or misdemeanor regarding the offer, purchase or sale of any security or any felony involving fraud or deceit including, but not limited to, forgery, embezzlement, obtaining money under false pretenses, larceny, or conspiracy to defraud.

c. Are currently subject to any federal or state administrative enforcement order or judgment entered by any state securities administrator or the SEC within five years prior to filing the SOIF in which fraud or deceit, including, but not limited to, the making of untrue statements of material facts and omitting to state material facts, was found.

d. Are subject to any federal or state administrative order or judgment prohibiting, denying, or revoking the use of any exemption from registration regarding the offer, purchase or sale of securities.

e. Are currently subject to any order, judgment, or decree of any court of competent jurisdiction entered within five years prior to filing the SOIF temporarily, preliminarily, or permanently restraining or enjoining the person or entity from engaging in or continuing any conduct or practice regarding the purchase or sale of any security or the making of any false filing with any state.

The disqualifications listed in this subrule shall not apply if the person or entity subject to the disqualification is licensed or registered to conduct securities-related business in the state in which the administrative order or judgment was entered against the person or entity, or if the broker-dealer employing the person or entity is licensed or registered in Iowa and the Form BD filed with the administrator discloses the order, conviction, judgment, or decree. No person disqualified under this subrule may act in a capacity other than that for which the person is licensed or registered. Any disqualification caused by this subrule is automatically waived if the agency creating the disqualification determines for good cause shown that the exemption should not be denied.

50.84(3) The failure to comply with a term, condition or requirement of this rule shall not result in the loss of the exemption from the requirements of Iowa Code section 502.301 for an offer to a particular individual or entity if the offerer establishes all of the following:

a. The failure to comply did not pertain to a term, condition or requirement directly intended to protect that particular individual or entity; and

b. The failure to comply was insignificant regarding the offering as a whole; and

c. A good-faith and reasonable attempt was made to comply with all applicable terms, conditions and requirements of this rule.

Where an exemption is established only through reliance upon subrule 50.84(2), the failure to comply is still actionable as a violation of the Act by the administrator under Iowa Code section 502.603 or 502.604.

50.84(4) The offerer shall comply with the following requirements:

a. Any published notice or script for broadcast and any printed material delivered apart from the SOIF, unless a SOIF containing the disclosures described below was previously delivered to the person, shall contain, at a minimum, the identity of the chief executive officer of the issuer, a brief and general description of the issuer's business and products, and the following disclosure printed in capital letters and boldface type at least as large as that used in the body of the printed materials:

(1) NO MONEY OR OTHER CONSIDERATION IS BEING SOLICITED AND NONE WILL BE ACCEPTED.

(2) NO SALES OF SECURITIES WILL BE MADE OR A COMMITMENT TO PURCHASE ACCEPTED UNTIL THE DELIVERY OF AN OFFERING CIRCULAR THAT INCLUDES COMPLETE INFORMATION ABOUT THE ISSUER AND THE OFFERING.

(3) AN INDICATION OF INTEREST MADE BY A PROSPECTIVE INVESTOR INVOLVES NO OBLIGATION OR COMMITMENT OF ANY KIND.

(4) THIS OFFER IS BEING MADE PURSUANT TO AN EXEMPTION UNDER FEDERAL AND STATE SECURITIES LAWS. NO SALE MAY BE MADE UNTIL THE OFFERING STATEMENT IS QUALIFIED BY THE U.S. SECURITIES AND EXCHANGE COMMISSION AND IS REGISTERED IN IOWA.

b. All communications with prospective investors made in reliance upon this rule shall cease after a registration statement is filed with the administrator, and no sale may be made until at least 20 calendar days after the last communication made in reliance upon this rule.

c. A preliminary prospectus may be used with an offering for which indications of interest have been solicited under this rule only if the offering is conducted by a registered broker-dealer.

Failure to comply with the requirements of this subrule shall not result in losing the exemption from the requirements of Iowa Code section 502.301, but is a violation of the Act, is actionable by the administrator under Iowa Code section 502.603 or 502.604, and constitutes grounds for denying or revoking the exemption for specific transactions.

50.84(5) Upon written application by the offerer and for good cause shown, the administrator may waive any condition of the solicitation of interest exemption. Neither compliance nor attempted compliance with this rule, nor the absence of any objection or order by the administrator regarding an offer of securities made under this rule, constitutes a waiver of any condition of the rule or a confirmation by the administrator of the availability of the rule.

50.84(6) Offers made in reliance upon this rule shall not be integrated with subsequent offers or sales of securities registered in Iowa. Issuers on whose behalf indications of interest are solicited under this rule may not make offers or sales in reliance upon Iowa Code section 502.202(14) or rule 191—50.80(502) until at least 12 months after the last communication with a prospective investor made pursuant to this rule.

50.84(7) Nothing in this rule limits the application of Iowa Code section 502.401, 502.402, 502.501 or 502.509 to offers made in reliance upon this rule.

50.84(8) The administrator may review the materials filed under this rule. Materials filed, if reviewed, will be judged under antifraud principles. Any discussion in the offering documents of the potential rewards of the investment must be balanced by a discussion of the possible risks.

50.84(9) Any offer effected in violation of this rule may constitute an unlawful offer of an unregistered security for which civil liability attaches under Iowa Code section 502.501 et seq. Any misrepresentation or omission may also give rise to civil liability under the Act. A subsequent registration of the security does not cure the previous unlawful offer. Only a rescission offer made in compliance with the Act can effect a cure.

This rule is intended to implement Iowa Code section 502.202(17).

191—50.85(502) Internet offers exemption. Offers of securities made by, or on behalf of, issuers on or through the Internet are exempt from registration pursuant to Iowa Code sections 502.301 and 502.504 if:

1. The Internet offer states, directly or indirectly, that the securities are not being offered to state residents; and
2. The Internet offer is not specifically directed to any person in Iowa by, or on behalf of, the issuer of the securities; and
3. No sales of the issuer's securities are made in Iowa as a result of the Internet offering until such time as the securities being offered have been registered under Iowa Code sections 502.301 and 502.504, and a final prospectus or Form U-7 is delivered to Iowa investors prior to such sales, or the issuer qualifies for the exemption provided in Iowa Code section 502.202(13).

This rule is intended to implement Iowa Code section 502.203.

191—50.86(502) Denial, suspension, revocation, condition, or limitation of limited offering transaction exemption. The administrator shall view the following as reasons for entering an order under Iowa Code section 502.204 to deny or revoke an exemption provided under Iowa Code section 502.202(14):

1. A public advertisement is used to promote the sale of securities for which such exemption is claimed; or
2. The offering is part of a registered offering under the Securities Act of 1933.

This rule is intended to implement Iowa Code section 502.204.

191—50.87(502) Nonprofit securities exemption.

50.87(1) Church extension funds or similar organizations making continuous offerings shall be exempt pursuant to Iowa Code section 502.201(7) "b" provided the issuer:

- a. Applies for the exemption;
- b. Files an offering circular and otherwise substantially complies with the NASAA Statement of Policy Regarding Church Extension Funds as adopted by the NASAA membership on April 17, 1994, and amended by the NASAA membership on April 18, 2004, and published in CCH NASAA Reports at paragraph 1951;

- c. Files all sales and advertising literature;
- d. Files a consent to service of process;
- e. Unless disallowed by the administrator within 15 days after the applicant has filed the items required by paragraphs 50.87(1)“a” to “d,” is authorized beginning 15 days after the filing is received to sell pursuant to the exemption;
- f. After authorization, may sell securities for a period of 12 months; and
- g. Upon the expiration of the 12-month period in paragraph 50.87(1)“f,” files a renewal application that complies with the requirements of this subrule.

50.87(2) Church bonds and other one-time offerings for a single specific project shall be exempt pursuant to Iowa Code section 502.201(7)“a” provided the issuer:

- a. Files a notice specifying the material terms of the offering that comply with the NASAA Statement of Policy Regarding Church Bonds as adopted by the NASAA membership on April 14, 2002, and published in CCH NASAA Reports at paragraph 1001; and
- b. Files a consent to service of process.

This rule is intended to implement Iowa Code section 502.201(7).

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.88(502) Transactions with specified investors. The administrator grants the exemption for transactions with specified investors to the following persons:

50.88(1) Any director, executive officer, or general partner of the issuer of the securities being offered or sold, or any director, executive officer, or general partner of a general partner of that issuer.

50.88(2) Any natural person whose individual net worth, or joint net worth with that person’s spouse, at the time of the purchase exceeds \$1 million, excluding the value of the primary residence of the natural person.

50.88(3) Any natural person who had an individual income in excess of \$200,000 in each of the two most recent years or joint income with that person’s spouse in excess of \$300,000 in each of those years and has a reasonable expectation of reaching the same income level in the current year.

50.88(4) Any venture or seed capital company. For purposes of this subrule, a venture or seed capital company is a corporation, partnership or association that has been in existence for five years or whose net assets exceed \$250,000 and whose primary business is investing in developmental stage companies or “eligible small business companies” as that term is defined in the regulations of the Small Business Administration.

This rule is intended to implement Iowa Code section 502.202(13).

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.89(502) Designated securities manuals. Nationally recognized securities manuals for purposes of Iowa Code section 502.202(2)“d” include Mergent’s Manuals, S & P Capital IQ Standard Corporation Descriptions, Fitch Investment Services, and Best’s Insurance Reports, Life-Health.

This rule is intended to implement Iowa Code section 502.202(2)“d.”

[ARC 1076C, IAB 10/2/13, effective 11/6/13]

191—50.90(502) Intrastate crowdfunding exemption.

50.90(1) Definitions. For purposes of this rule, in addition to the definitions set forth in rule 191—50.1(502), the definitions in Iowa Code section 502.202(24)“a” and the following definitions apply:

“*Administrator’s website*” means the Internet site of the Iowa insurance division, iid.iowa.gov.

“*Escrow agent*” means a bank, trust company, savings bank, national banking association, building and loan association, mortgage banker, credit union, insurance company, or any other independent escrow agent acceptable to the commissioner.

“*Issuer*” means a person that is authorized to do business in Iowa and has been approved by the administrator as a crowdfunding issuer pursuant to subrule 50.90(5).

“*Management*” means an issuer’s directors, executive officers, or the individuals who perform such functions for the issuer.

“*Portal website*” means the Internet site through which a registered Iowa crowdfunding portal conducts offers and sales of exempt securities under Iowa Code section 502.202(24).

“*Principal place of business*” means the state or territory from which the officers, partners, or managers of a corporation, partnership, limited liability company, trust or other form of business primarily direct, control and coordinate the activities of the business. “Principal place of business” is not related to “place of business” as defined in Iowa Code section 502.102(21).

50.90(2) Exemption from registration.

a. Under the authority delegated to the administrator to promulgate rules in Iowa Code sections 502.203 and 502.605(1), a transaction is exempt from the registration provisions of the Act if all of the conditions in subparagraphs (1) to (4) are met:

(1) The issuer of the securities is at the time of any offers and sales a person that is a resident and doing business within the state of Iowa. The issuer shall be deemed to be a resident of the state of Iowa if it has its principal place of business in Iowa. The issuer shall be deemed to be doing business within Iowa if the issuer satisfies at least one of the following requirements:

1. The issuer derived at least 80 percent of its consolidated gross revenues from the operation of a business or of real property located in or from the rendering of services within the state of Iowa.

2. The issuer had, at the end of its most recent semiannual fiscal year prior to an initial offer of securities in any offering or subsequent offering pursuant to this rule, at least 80 percent of its assets and those of its subsidiaries on a consolidated basis located in the state of Iowa.

3. The issuer intends to use and uses at least 80 percent of the net proceeds to the issuer from sales made pursuant to this rule in connection with the operation of a business within, the operation of real property within, the purchase of real property located in, or the rendering of services within the state of Iowa.

4. A majority of the issuer’s employees are based in the state of Iowa.

(2) Sales of securities pursuant to this rule are made only to residents of the state of Iowa or to persons who the issuer reasonably believes, at the time of the sale, are residents of the state of Iowa. An individual shall be deemed to be a resident of the state of Iowa if such individual has, at the time of sale, the individual’s principal residence in the state of Iowa. A trust that is not deemed by Iowa law to be a separate legal entity is deemed to be a resident of the state of Iowa only if all of the trust’s trustees are residents of the state of Iowa. For purposes of determining the residence of a purchaser:

1. A corporation, partnership, limited liability company, trust or other form of business organization shall be deemed a resident of the state of Iowa if, at the time of sale to it, it has its principal place of business within the state of Iowa.

2. A corporation, partnership, trust or other form of business organization that is organized for the specific purpose of acquiring securities offered pursuant to this rule shall not be a resident of Iowa unless all of the beneficial owners of such organization are residents of Iowa.

(3) The issuer is not, before or as a result of the offering, any of the following:

1. An investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.).

2. A hedge fund, commodity pool, or similar investment vehicle.

3. A development stage company that either has no specific business plan or purpose or has indicated that the company’s business plan is to engage in a merger or acquisition with an unidentified company or companies, or other entity or person.

4. A company with a class of securities registered under the federal Securities Exchange Act of 1934.

(4) The offering is sold in compliance with the requirements of SEC Rule 147A (17 CFR 230.147A).

b. All offers and sales of securities made in reliance upon this rule shall be made through an intermediary’s Internet site.

50.90(3) Integration.

a. Offers and sales made in reliance on this rule may be integrated with other offers and sales when the following factors apply:

- (1) The sales are part of a single plan of financing;
- (2) The sales involve the issuance of the same class of securities;
- (3) The sales have been made at or about the same time;
- (4) The same type of consideration is received; and
- (5) The sales are made for the same general purpose.

b. Offers and sales made in reliance on this rule shall not be integrated with offers and sales made more than six months before the start of the offering or more than six months after completion of an offering, so long as during those six-month periods there are no offers or sales of securities by or for the issuer that are of the same class or of a similar class as those offered or sold under these rules, other than those offers or sales of securities under an employee benefit plan.

50.90(4) *Bad actor disqualification.*

a. The exemption of 50.90(2) shall not be available if the issuer; any predecessor of the issuer; any affiliated issuer; any director, executive officer, other officer participating in the offering, general partner or managing member of the issuer; any beneficial owner of 20 percent or more of the issuer's outstanding voting equity securities, calculated on the basis of voting power; any promoter connected with the issuer in any capacity at the time of such offer or sale; any investment manager of an issuer that is a pooled investment fund; any person that has been or will be paid (directly or indirectly) remuneration for solicitation of purchasers in connection with such offer or sale of securities; any general partner or managing member of any such investment manager or solicitor; or any director, executive officer, or other officer participating in the offering of any such investment manager or solicitor or general partner or managing member of such investment manager or solicitor:

(1) Has been convicted, within ten years before such offer or sale (or five years, in the case of issuers, their predecessors and affiliated issuers), of any felony or misdemeanor that is any of the following:

1. In connection with the purchase or sale of any security.
2. Involving any making of any false filing with the SEC or a state securities commission or agency or state official performing like functions.
3. Arising out of the conduct of the business of an underwriter, broker, dealer, municipal securities dealer, investment adviser or paid solicitor of purchasers of securities;

(2) Is subject to any order, judgment or decree of any court of competent jurisdiction, entered within five years before such offer or sale that, at the time of such offer or sale, restrains or enjoins such person from engaging or continuing to engage in any conduct or practice that is any of the following:

1. In connection with the purchase or sale of any security.
2. Involving the making of any false filing with the SEC or a state securities commission or agency or state official performing like functions.
3. Arising out of the conduct of the business of an underwriter, broker, dealer, municipal securities dealer, investment adviser or paid solicitor of purchaser of securities;

(3) Is subject to a final order of a state securities commission or agency or state official performing like functions; a state authority that supervises or examines banks, savings associations, or credit unions; a state insurance commission or agency or state official performing like functions; an appropriate federal banking agency; the U.S. Commodity Futures Trading Commission; or the National Credit Union Administration that:

1. At the time of such offer or sale, bars the person from:
 - Association with an entity regulated by such commission, authority, agency, or officer;
 - Engaging in the business of securities, insurance or banking; or
 - Engaging in savings association or credit union activities; or
2. Constitutes a final order based on a violation of any law or regulation that prohibits fraudulent, manipulative, or deceptive conduct, including making untrue statements of material facts or omitting to state material facts, entered within ten years before such offer or sale;

(4) Is subject to an order of the SEC entered pursuant to the Securities Exchange Act of 1934 (15 U.S.C. Section 78o(b) or 78o-4(c)) or the Investment Advisers Act of 1940 (15 U.S.C. Section 80b-3(e) or (f)) that, at the time of such offer or sale:

1. Suspends or revokes such person's registration as a broker, dealer, municipal securities dealer or investment adviser;

2. Places limitations on the activities, functions or operations of such person; or

3. Bars such person from being associated with any entity or from participating in the offering of any penny stock;

(5) Is subject to any order of the SEC entered within five years before such offer or sale that, at the time of such offer or sale, orders the person to cease and desist from committing or causing a violation or future violations of:

1. Any scienter-based, antifraud provision of the federal securities laws, including without limitation the Securities Act of 1933 (15 U.S.C. Section 77q(a)(1)); the Securities Exchange Act of 1934 (15 U.S.C. Section 78j(b) and 17 CFR 240.10b-5); the Securities Exchange Act of 1934 (15 U.S.C. Section 78o(c)(1)); the Investment Advisers Act of 1940 (15 U.S.C. Section 80b-6(1)); or any other rule or regulation thereunder; or

2. Section 5 of the Securities Act of 1933 (15 U.S.C. 77e);

(6) Is suspended or expelled from membership in, or suspended or barred from association with a member of, a registered national securities exchange or a registered national or affiliated securities association for any act or omission to act constituting conduct inconsistent with just and equitable principles of trade;

(7) Has filed (as a registrant or issuer), or was or was named as an underwriter in, any registration statement or Regulation A offering statement filed with the SEC that, within five years before such offer or sale, was the subject of a refusal order, stop order, or order suspending the Regulation A exemption, or is, at the time of such offer or sale, the subject of an investigation or proceeding to determine whether a stop order or suspension order should be issued;

(8) Is subject to a United States Postal Service false representation order entered within five years before such offer or sale, or is, at the time of such offer or sale, subject to a temporary restraining order or preliminary injunction with respect to conduct alleged by the United States Postal Service to constitute a scheme or device for obtaining money or property through the mail by means of false representations;

(9) Has filed a registration statement which is subject to a final stop order entered under any state's securities law within five years before such offer or sale; or

(10) Is currently subject to any final state administrative enforcement order or judgment entered by a state's securities administrator within five years prior to such offer or sale.

b. Paragraph 50.90(4)“*a*” shall not apply under either of the following circumstances:

(1) Upon a showing of good cause and without prejudice to any other action by the commissioner, if the commissioner determines that it is not necessary under the circumstances that the exemption be denied; or

(2) If the issuer establishes that it did not know and, in the exercise of reasonable care, could not have known that a disqualification existed under this subrule. An issuer will not be able to establish that it has exercised reasonable care unless it has made, in light of the circumstances, factual inquiry into whether any disqualifications exist. The nature and scope of the factual inquiry will vary based on the facts and circumstances concerning, among other things, the issuer and the other offering participants.

c. Events relating to any affiliated issuer that occurred before the affiliation arose will be not considered disqualifying if the affiliated entity is not:

(1) In control of the issuer; or

(2) Under common control with the issuer by a third party that was in control of the affiliated entity at the time of such events.

50.90(5) Filing requirements for issuers.

a. An issuer may declare an offering exempt for a maximum of 12 months and rely on this intrastate sales exemption if the issuer submits at the administrator's website, and receives approval from the administrator, at least 30 days prior to the offer of any security in reliance upon Iowa Code section 502.202(24), all of the following:

(1) A properly completed Iowa Crowdfunding Notice Filing Form (available at the administrator's website).

(2) The issuer's articles of incorporation or other charter documents pursuant to which the issuer is organized.

(3) The issuer's bylaws or operating agreement and all amendments thereto.

(4) A copy of any resolutions setting forth terms and provisions of the securities being issued.

(5) The issuer's financial statements as of the end of the issuer's most recent fiscal year, prepared in accordance with generally accepted accounting principles. If the date of the most recent fiscal year end is more than 90 days prior to the date of the filing, the issuer must also submit an unaudited balance sheet and unaudited statement of income or operations, both prepared in accordance with generally accepted accounting principles for the issuer's most recent fiscal year.

(6) A copy of any agreements between the issuer and any intermediary.

(7) A copy of any subscription agreement for the purchase of securities in the offering.

(8) A copy of the escrow agreement between the issuer and an escrow agent for the deposit of offering proceeds.

(9) A specimen or copy of the security to be offered, including required legends, if the issuer will issue physical certificates.

(10) A copy of all advertising and other materials directed to or to be furnished to investors in the offering.

(11) A copy of all disclosure documents directed to or to be furnished to investors in the offering.

(12) Any other information reasonably requested by the commissioner.

(13) A filing fee of \$100.

b. If an issuer will make offers and sales of an offering after the exempt offering period declared by the issuer on the Iowa Crowdfunding Notice Filing Form, the issuer must renew the offering exemption by submitting at the administrator's website, and receiving approval of the administrator, at least 30 days prior to the expiration of the original exempt offering period, all of the following:

(1) A report of sales as of the most recent practical date that includes the following information:

1. The time period in which the offering was open.

2. The number of shares or units sold in the offering.

3. The number of investors that purchased shares or units in the offering.

4. The dollar amount sold in the offering.

(2) A copy of the issuer's updated Iowa Crowdfunding Notice Filing Form.

(3) The issuer's financial statements as of the end of the issuer's most recent fiscal year, prepared in accordance with generally accepted accounting principles. If the end date of the most recent fiscal year is more than 90 days prior to the date of renewal, the issuer also shall submit an unaudited balance sheet and an unaudited statement of income or operations, both prepared in accordance with generally accepted accounting principles for the issuer's most recent fiscal quarter.

(4) A renewal filing fee of \$100.

c. Upon completion of an offering made in reliance upon this rule, an issuer shall file at the administrator's website, and receive the administrator's approval of, a final sales report that includes all of the following information:

(1) The time period in which the offering was open.

(2) The number of shares or units sold in the offering.

(3) The number of investors that purchased shares or units in the offering.

(4) The total dollar amount sold in the offering.

50.90(6) *Minimum offering amount.* The issuer shall establish a minimum offering amount that is sufficient, together with other sources of financing, to implement the business plan of the issuer, as disclosed in the submitted offering information.

50.90(7) *Escrow agreement.* The issuer must enter into an escrow agreement with an independent escrow agent to hold funds in an escrow account, and the escrow agreement shall include all of the following terms:

a. All offering proceeds shall be maintained in an account controlled by the escrow agent.

b. All offering proceeds will be released to the issuer only when the aggregate capital raised from all purchasers that have signed commitments to invest is equal to or greater than the minimum

offering amount disclosed in the offering materials submitted to the administrator with the issuer's filing of paragraph 50.90(5) "a."

c. If the proceeds do not meet the minimum offering amount disclosed in the offering materials within one year of the earlier of the commencement of the offering or the first posting of the offering on the Internet, the issuer shall return all funds to investors.

d. None of the following shall have any claim to the escrowed proceeds:

- (1) A creditor of an escrow agent.
- (2) An affiliate of an escrow agent.
- (3) A creditor of the issuer.
- (4) An affiliate of the issuer.
- (5) A creditor of an intermediary engaged by the issuer.
- (6) An affiliate of an intermediary engaged by the issuer.

e. The escrow agent agrees to maintain its independence from the issuer, any intermediary or Iowa crowdfunding portal assisting with the offering, and the officers, directors, managing members, and affiliates of the issuer or any Iowa crowdfunding portal assisting with the offering.

f. The commissioner may inspect the records of the impound account maintained by the escrow agent at any reasonable time at the location of the records and copy any record.

g. The escrow agreement must be signed by an officer of the issuer and an authorized representative of the escrow agent.

h. The escrow agent may not be affiliated with the issuer, any Iowa crowdfunding portal assisting with the offering, or any officers, director, managing member, or affiliate of the issuer or any intermediary assisting with the offering.

i. If the minimum offering amount is not received by the end of the offering period, the proceeds shall be returned to the purchasers within 30 days.

j. All purchasers shall have the right to withdraw their investments, without deduction of any kind, until such time as offering proceeds totaling at least the minimum offering amount are received.

50.90(8) Disclosure requirements for issuers.

a. Nothing in this exemption is intended to or should be in any way construed as relieving issuers or persons acting on behalf of issuers from providing disclosure to prospective investors adequate to satisfy the requirements of rule 191—50.90(502) and the antifraud provisions of Iowa Code chapter 502. The issuer is required to provide full and fair disclosure to investors of all material facts relating to the issuer and the securities being offered. If eligible, the issuer may use Form U-7, which may be obtained from the NASAA website at www.nasaa.org.

b. Among other risk disclosures, the issuer must provide the substance of all of the following disclosures to all prospective purchasers and investors:

(1) There is no ready market for the sale of the securities acquired in this offering. It may be difficult or impossible for an investor to sell or otherwise dispose of this investment. An investor may be required to hold and bear the financial risks of this investment indefinitely.

(2) No federal or state securities commission or regulatory authority has confirmed the accuracy or determined the adequacy of the disclosures provided.

(3) In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved.

(4) The securities have not been registered under federal or state securities laws and, therefore, cannot be resold unless the securities are registered or qualify for an exemption from registration under federal and state law.

50.90(9) Books and records. An issuer that has filed under this rule must keep and maintain written or electronic records relating to offers and sales of securities made in reliance upon this rule for at least six years following termination of the offering. These records are subject to such reasonable audits or inspections by the administrator or a representative of the administrator as the administrator considers necessary or appropriate in the public interest and for the protection of investors. An audit or inspection may be made at any time and without prior notice. The administrator may copy, and remove for audit

or inspection copies of, all records the administrator reasonably considers necessary or appropriate to conduct the audit or inspection.

50.90(10) Iowa crowdfunding portal registration.

a. To register as an Iowa crowdfunding portal, a person shall submit to the administrator at the administrator's website all of the following:

(1) A completed Iowa Crowdfunding Portal Registration Form, available on the administrator's website, including all required schedules and supplemental information.

(2) A completed Form U-4, available on the administrator's website, for each agent as defined in Iowa Code section 502.102(2).

(3) Any other information requested by the administrator to determine the financial responsibility, business reputation, or qualifications of the Iowa crowdfunding portal.

(4) The registration fee of \$100.

b. The person must receive approval of the submission and registration by the administrator before the person may operate as an Iowa crowdfunding portal.

c. Registration expires at the close of the calendar year in which a registration was issued, but the registration may be renewed for the succeeding year by submission to the administrator at the administrator's website of both a \$100 registration fee and a written request for renewal, including any material changes to the information submitted in the prior registration submission.

50.90(11) Duties of an Iowa crowdfunding intermediary.

a. *Maintenance of intermediary website.* An Iowa crowdfunding intermediary shall create and maintain the intermediary website and make information and services available on or through the intermediary website in compliance with this rule.

b. *Background and regulatory checks.* Prior to offering securities to residents of Iowa, the intermediary shall conduct a reasonable investigation of the background and history of each issuer whose securities are offered on the intermediary website and of each issuer's control persons. "Control persons" for the purpose of this subrule means the issuer's officers; directors; or other persons having the power, directly or indirectly, to direct the management or policies of the issuer, whether by contract or otherwise; and persons holding more than 20 percent of the outstanding equity of the issuer. The intermediary shall deny an issuer access to the intermediary website if there is a reasonable basis to believe that one or more of the following are true:

(1) The issuer or any of its control persons is subject to disqualification under subrule 50.90(3).

(2) The issuer has engaged in, the issuer is engaging in, or the offering involves any act, practice, or course of business that will, directly or indirectly, operate as a fraud or deceit upon any person.

(3) The intermediary cannot adequately or effectively assess the risk of fraud by the issuer or by the issuer's potential offering.

c. *Purchaser screening.* Before a security is sold through the intermediary, the intermediary shall ensure that the purchaser does all of the following:

(1) Reviews the information provided in the offering documents.

(2) Provides to the intermediary an affirmative representation from the purchaser acknowledging receipt of the disclosure statement provided to the purchaser by the issuer pursuant to subrule 50.90(8).

(3) Provides to the intermediary an affirmative representation that the purchaser is an Iowa resident.

d. *Information about the issuer and the offering.* The intermediary shall make available on the intermediary website information about the issuer and the offering. The information shall include all of the following:

(1) A copy of the disclosure statement required by subrule 50.90(8).

(2) A summary of the offering, including all of the following:

1. A description of the entity; its form of business, principal office, history, and business plan; and its intended use of offering proceeds, including compensation paid to any owner, executive officer, director, or manager.

2. The identity of the executive officers, directors, and managers, including their titles and their prior experience and the identity of all persons owning more than 20 percent of the ownership interests of any class of securities of the company.

3. A description of the securities being offered and any outstanding securities of the company, the amount of the offering, and the percentage of ownership of the company represented by the offered securities.

e. Intermediary website forum. The intermediary shall maintain a forum on the intermediary website. The forum shall be available to all potential purchasers as well as to the administrator. The intermediary website shall contain a disclaimer that reflects that access to securities offered on the intermediary website is limited to Iowa residents and that sales of the securities appearing on the intermediary website are limited to persons that are Iowa residents. Potential purchasers may ask questions and receive answers concerning the terms and conditions of the offering and may obtain additional information which the crowdfunding issuer possesses or can acquire without unreasonable effort or expense necessary to verify the accuracy of or to clarify the information provided on the intermediary website. The intermediary may adopt reasonable rules and procedures for the website forum, including registration and authentication requirements.

f. Enforcement of limits. The intermediary shall take reasonable measures to ensure that no purchaser exceeds the limits set forth in Iowa Code section 502.202(24) “c” and “d.”

g. Administrator access. The intermediary shall provide the administrator purchaser-level access at all times to the intermediary website, pursuant to Iowa Code section 502.202(24) “g”(8).

50.90(12) Prohibited conduct for intermediaries. An intermediary and individuals of the intermediary’s management:

a. Shall not have ownership or other financial interest greater than 20 percent in the crowdfunding issuer.

b. Shall not hold, manage, possess, or otherwise handle purchaser funds. Proceeds are to be held in escrow until the minimum impound amount has been met.

c. Shall not compensate employees, agents or other persons not registered with the administrator for soliciting offers or sales of securities displayed or referenced on the intermediary website.

50.90(13) Commissions, fees or other remuneration. Commissions, fees or other remuneration for soliciting any prospective purchaser in connection with the offering shall only be paid to intermediaries or any other persons who are appropriately registered or licensed with the commissioner.

50.90(14) Advertising and communications.

a. Advertising. The crowdfunding issuer shall not advertise the specific details of the offering, except for notices which direct potential purchasers to the intermediary website. Notwithstanding the foregoing, the issuer may distribute a notice that the issuer is conducting an offering of securities, the name of the intermediary through which the offering is being conducted, and a link directing the potential investor to the intermediary. The notice shall contain a disclaimer that the sale of the security is limited to persons who are Iowa residents.

b. Communications. All communications between the issuer and potential purchasers taking place pursuant to Iowa Code section 502.202(24) shall occur through the intermediary website of the intermediary. During the time the securities are being offered on the intermediary website, the intermediary shall, pursuant to paragraphs 50.90(11) “d” and “e,” provide channels through which potential purchasers can communicate with one another and with the issuer about the securities being offered. These communications shall be visible to all those with access to the intermediary website.

(1) An issuer shall respond within ten days to requests for information made by potential purchasers or by the administrator through the intermediary website.

(2) If such additional information is material and not previously included on the intermediary website, the crowdfunding issuer and the Iowa crowdfunding portal shall immediately amend the information contained on the intermediary website.

50.90(15) Offering price. The offering price of the securities offered and sold pursuant to this exemption shall be the same for all purchasers and shall not be increased during the offering period. The offering price may be lowered, but only if all previous purchasers in the particular offering are notified of the change and allowed to rescind their previous investment and participate at the lower offering price.

50.90(16) Resale of securities. On the document that is to serve as evidence of ownership, the issuer shall place a prominent notice which states that the securities have not been registered and which sets forth limitations on resale contained in SEC Rule 147A(e) (17 CFR 230.147A(e)), including that, for a period of six months from the date of last sale by the issuer of the securities in the offering, resale by any person shall be made only to Iowa residents.

This rule is intended to implement Iowa Code section 502.202.
[ARC 3741C, IAB 4/11/18, effective 5/16/18]

191—50.91(502) Notice filing requirement for federal crowdfunding offerings. This rule applies to offerings made under 17 CFR Section 227, federal Regulation Crowdfunding, General Rules and Regulations, and Sections 4(a)(6) and 18(b)(4)(C) of the Securities Act of 1933 (referred to collectively as “federal Regulation Crowdfunding”).

50.91(1) Initial filing.

a. An issuer that offers and sells securities in this state in an offering that is exempt under federal Regulation Crowdfunding and that either (1) has its principal place of business in this state or (2) sells 50 percent or greater of the aggregate amount of the offering to residents of this state shall file with the administrator the following related to that exempt offering:

(1) A completed Uniform Notice of Federal Crowdfunding Offering form (Form U-CF, accessible through www.nasaa.org/industry-resources/uniform-forms/) or copies of all documents the issuer filed with the Securities and Exchange Commission related to that exempt offering;

(2) If the issuer is not filing on the Uniform Notice of Federal Crowdfunding Offering form, a completed consent to service of process form (Form U2, accessible through www.nasaa.org/industry-resources/uniform-forms/); and

(3) A filing fee of \$100.

b. If the issuer has its principal place of business in this state, the filing required under paragraph 50.91(1) “a” shall be filed with the administrator when the issuer makes its Initial Form C filing with the SEC under the federal Regulation Crowdfunding concerning the offering with the SEC. If the issuer does not have its principal place of business in this state but residents of this state have purchased 50 percent or greater of the aggregate amount of the offering, the filing required under paragraph 50.91(1) “a” shall be filed when the issuer becomes aware that such purchases have met this threshold and in no event later than 30 days from the date of completion of the offering.

c. The initial notice filing is effective for 12 months from the date of the filing with the administrator.

50.91(2) Renewal. For each additional 12-month period in which the same offering described in paragraph 50.91(1) “a” is continued, an issuer conducting an offering under federal Regulation Crowdfunding may renew its notice filing by filing with the administrator the following on or before the expiration of the notice filing:

a. A completed Uniform Notice of Federal Crowdfunding Offering form (Form U-CF, accessible through www.nasaa.org/industry-resources/uniform-forms/), marked “renewal,” or a cover letter or other document requesting renewal; and

b. A renewal filing fee of \$100.

This rule is intended to implement Iowa Code section 502.202.
[ARC 3391C, IAB 10/11/17, effective 11/15/17]

191—50.92(502) Notice filing requirement for Regulation A – Tier 2 offerings. This rule applies to an issuer offering and selling securities in this state in an offering exempt under Tier 2 of 17 CFR Section 230.251 et seq. (“federal Regulation A”) and Sections 18(b)(3) and 18(b)(4) of the Securities Act of 1933:

50.92(1) Initial filing.

a. An issuer planning to offer and sell securities in this state in an offering exempt under Tier 2 of federal Regulation A shall submit the following to the administrator at least 21 calendar days prior to the initial sale in this state:

(1) Either a completed Uniform Notice Filing of Regulation A – Tier 2 Offering form (accessible through www.nasaa.org/industry-resources/uniform-forms/) or copies of all documents the issuer filed with the Securities and Exchange Commission related to that Tier 2 offering;

(2) If the issuer is not filing on the Uniform Notice Filing of Regulation A – Tier 2 Offering form, a completed consent to service of process form (Form U2, accessible through www.nasaa.org/industry-resources/uniform-forms/); and

(3) A filing fee of \$400.

b. The initial filing is effective for 12 months from the date of the filing with the administrator.

50.92(2) Renewal. For each additional 12-month period in which the same offering described in paragraph 50.92(1) “*a*” is continued, an issuer conducting a Tier 2 offering under federal Regulation A may renew its notice filing by filing with the administrator the following on or before the expiration of the notice filing:

a. One of the following: the Uniform Notice Filing of Regulation A – Tier 2 Offering form (accessible through www.nasaa.org/industry-resources/uniform-forms/), a notice filing form marked “renewal,” or a cover letter or other document requesting renewal; and

b. A renewal filing fee of \$400.

This rule is intended to implement Iowa Code section 502.303.

[ARC 3391C, IAB 10/11/17, effective 11/15/17]

191—50.93 to 50.99 Reserved.

DIVISION VII
FRAUD AND OTHER PROHIBITED CONDUCT

191—50.100(502) Fraudulent practices.

50.100(1) An issuer of securities registered under the Act, or any person who is an officer, director or controlling person of such issuer, is presumed to employ a “device, scheme or artifice to defraud” the purchasers of such securities under Iowa Code section 502.501(1) if such person applies, authorizes or causes to be applied any material part of the proceeds from the sale of such securities in any material way contrary to the purposes specified in the prospectus used in offering such securities and not reasonably related to the business of the issuer as described in the prospectus.

50.100(2) A broker-dealer or agent employing one or more of the following practices engages in an “act, practice, or course of business which operates or would operate as a fraud” under Iowa Code section 502.501(3):

a. Entering into any security transaction with a customer at an unreasonable price or at a price not reasonably related to the current market price of the security or receiving an unreasonable commission or profit.

b. Contradicting or negating the importance of any information contained in a prospectus or other offering materials with intent to deceive or mislead or using any advertising or sales presentation in a deceptive or misleading manner.

c. In connection with the offer, sale, or purchase of a security, falsely leading a customer to believe that the broker-dealer or agent possesses material, nonpublic information impacting the value of the security.

d. In connection with the solicitation of a sale or purchase of a security, engaging in a pattern or practice of making contradictory recommendations to different investors of similar investment objectives for some to sell and others to purchase the same security, at or about the same time, when the recommendation is not justified by the particular circumstances of each investor.

e. Failing to make a bona fide public offering of all the securities allotted to a broker-dealer for distribution by, among other things, (1) transferring securities to a customer, another broker-dealer or a fictitious account with the understanding that those securities will be returned to the broker-dealer or its nominees, or (2) parking or withholding securities.

f. Effecting any transaction in, or inducing the purchase or sale of, any security by means of any manipulative, deceptive or other fraudulent device or contrivance including, but not limited to, the use

of “boiler-room” tactics such as repeated or harassing unsolicited telephone calls or the use of fictitious or nominee accounts.

50.100(3) Although nothing in this rule precludes applying the general antifraud provisions to any person who engages in practices similar to paragraphs “a” through “h” listed below, the listed practices apply only to soliciting a purchase or sale of OTC non-NASDAQ equity securities and excludes interests in direct participation programs and shares in open-end mutual funds:

- a. Failing to disclose the entity’s present bid and ask price of a particular security at the time of solicitation.
- b. Failing to advise the customer, both at the time of solicitation and on confirmation, of the total of all charges and fees related to a specific securities transaction.
- c. In connection with a principal transaction, failing to disclose, both at the time of solicitation and upon confirmation, a short inventory position in the entity’s account of more than 5 percent of the issued and outstanding shares of that class of securities of the issuer, if the entity is a market maker at the time of solicitation.
- d. Conducting sales contests in a particular security.
- e. After a solicited purchase by a customer, failing or refusing, for a principal transaction, to promptly execute sell orders.
- f. Refusing to sell existing securities held by the customer unless the customer executes a purchase transaction.
- g. Soliciting a secondary market when there has not been a bona fide distribution in the primary market.
- h. Engaging in a pattern of compensating an agent in different amounts for effecting sales and purchases in the same security.

This list is not intended to be all-inclusive. Engaging in other conduct including, but not limited to, forgery, embezzlement, conversion, nondisclosure, incomplete disclosure or misstatement of material facts may also be deemed fraudulent.

This rule is intended to implement Iowa Code section 502.501.

191—50.101(502) Rescission offers.

50.101(1) Rescission offers made pursuant to Iowa Code section 502.510 shall be typed or printed and shall be captioned “RESCISSION OFFER” in boldface print or type. The rescission offer shall be delivered to each offeree personally or shall be sent by certified mail to the offeree’s last-known address and shall contain the following information:

- a. The name of the security which is the subject of the offer.
- b. A reasonably detailed statement indicating why liability under Iowa Code section 502.509 may have arisen and fairly and adequately advising the offeree of the offeree’s rights pursuant to the Act.
- c. An offer to repurchase the security pursuant to Iowa Code section 502.510(1) “b” to “f,” as applicable.
- d. A statement that the offeree’s right to bring an action under the Act may be lost unless the offeree accepts the offer within 30 days after receiving the offer, or any shorter period, of not less than three days, that the administrator, by order, specifies.
- e. Sufficient information about the issuer and the security offered to permit the offeree to make an informed decision regarding acceptance of the rescission offer including, but not limited to, information about the issuer’s organization and management, its operations and plan of business, and its financial condition as shown by a current financial statement prepared under generally accepted accounting principles.
- f. A form by which the offeree may accept the offer and a statement explaining that the offeree may accept the offer by returning the form to the offerer at the provided address by first-class mail, or any other type of mail.
- g. If the basis for relief under Iowa Code section 502.510 alleges a violation of Iowa Code section 502.509 which employed a device, scheme, or artifice to defraud, made an untrue statement of material fact necessary in order to make the statement made, in light of the circumstances under which it was

made, not misleading, or engaged in an act, practice, or course of business that operated or would operate as a fraud or deceit on another person, in capital letters and boldface type at least as large as that used in the body of the printed materials, and placed immediately before the signature of the offerer, the following statement:

THIS IS A RESCISSION OFFER MADE PURSUANT TO Iowa Code section 502.510, A COPY OF WHICH IS ON FILE WITH THE IOWA SECURITIES AND REGULATED INDUSTRIES BUREAU. THE BUREAU MAKES NO RECOMMENDATION AS TO WHETHER THE OFFER SHOULD BE ACCEPTED OR REJECTED NOR HAS THE BUREAU PASSED UPON THE ADEQUACY OR ACCURACY OF THIS OFFER.

50.101(2) If the basis for relief under Iowa Code section 502.510 alleges a violation of Iowa Code section 502.509 which employed a device, scheme, or artifice to defraud, made an untrue statement of material fact necessary in order to make the statement made, in light of the circumstances under which it was made, not misleading, or engaged in an act, practice, or course of business that operated or would operate as a fraud or deceit on another person, prior to making a rescission offer pursuant to Iowa Code section 502.510, the offerer shall file with the administrator:

- a. A copy of the rescission offer;
- b. The names and addresses of all holders or sellers who are to receive the rescission offer; and
- c. Financial statements proving that the offerer's assets are sufficient to meet its obligations should all offerees accept the rescission offer.

50.101(3) Rescission offers made pursuant to Iowa Code section 502.510 shall be tendered to all persons to whom liability exists or may exist pursuant to Iowa Code section 502.509.

50.101(4) A rescission offer may be accepted at any time during the period stated in the rescission offer even if an offeree previously rejected the offer.

50.101(5) Rescission offers are subject to the provisions of Iowa Code sections 502.501, 502.501A, 502.505, 502.506, and 502.506A.

50.101(6) The administrator may, in the administrator's discretion, require proof by the offerer of compliance with this rule and the terms of the rescission offer.

50.101(7) A proposal or the making of a rescission offer shall not limit the administrator's administrative or enforcement authority provided by the Act.

This rule is intended to implement Iowa Code sections 502.509 and 502.510.

191—50.102(502) Fraudulent, deceptive or manipulative act, practice, or course of business in providing investment advice.

50.102(1) It shall constitute a fraudulent, deceptive or manipulative act, practice, or course of business for an investment adviser or an investment adviser representative acting as principal for such person's own account, knowingly to sell any security to or purchase any security from a client or, acting as broker for a person other than such client, knowingly to effect any sale or purchase of any security for the account of such client, without disclosing to such client in writing before the completion of such transaction the capacity in which the investment adviser is acting and obtaining the consent of the client to such transaction. The prohibitions of this subrule shall not apply to any transaction with a customer of a broker-dealer if such broker-dealer is not acting as an investment adviser in relation to such transaction.

50.102(2) It shall constitute a fraudulent, deceptive or manipulative act, practice, or course of business for an investment adviser or an investment adviser representative to fail to disclose to any client or prospective client all material facts regarding financial and disciplinary information as provided in 17 CFR Section 275.206(4)-4.

50.102(3) Pooled investment vehicles.

a. It shall constitute a fraudulent, deceptive, or manipulative act, practice, or course of business within the meaning of Iowa Code section 502.502(2) for any investment adviser to a pooled investment vehicle to:

(1) Make any untrue statement of a material fact or to omit to state a material fact necessary to make the statements made, in the light of the circumstances under which they were made, not misleading, to any investor or prospective investor in the pooled investment vehicle; or

(2) Otherwise engage in any act, practice, or course of business that is fraudulent, deceptive, or manipulative with respect to any investor or prospective investor in the pooled investment vehicle.

b. For purposes of this subrule, “pooled investment vehicle” means any investment company as defined in Section 3(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(a)) or any company that would be an investment company under Section 3(a) of that Act but for the exclusion provided from that definition by either Section 3(c)(1) or Section 3(c)(7) of that Act (15 U.S.C. 80a-3(c)(1) or (7)).

This rule is intended to implement Iowa Code section 502.502(2).

191—50.103(502) Investment advisory contracts.

50.103(1) It is unlawful for any investment adviser to enter into, extend, or renew any investment advisory contract unless the contract provides in writing all of the following:

a. That the investment adviser shall not be compensated on the basis of a share of capital gains or capital appreciation of the funds or any portion of the funds of the client.

b. That no assignment of the contract may be made by the investment adviser without the consent of the other party to the contract.

c. That the investment adviser, if a partnership, shall notify the other party to the contract of any change in the membership of the partnership within a reasonable time after the change.

50.103(2) The provisions of subrule 50.103(1) shall be construed consistent with Sections 205(b) through (d) of the Investment Advisers Act of 1940, the terms of which shall be defined by Investment Advisers Act of 1940 Rules 275.205-1 and 275.205-2.

50.103(3) The provisions of subrule 50.103(1) shall not prohibit compensation on the basis of a share of capital gains or capital appreciation of the funds or any portion of the funds of the client in compliance with the exemption in 17 CFR Section 275.205-3.

This rule is intended to implement Iowa Code section 502.502(3).

191—50.104 to 50.109 Reserved.

DIVISION VIII
VIATICAL SETTLEMENT INVESTMENT CONTRACTS

191—50.110(502) Application by viatical settlement investment contract issuers and registration of agents to sell viatical settlement investment contracts.

50.110(1) Under this rule, the term “viatical settlement investment contract issuer” includes, but is not limited to, any individual, company, corporation or other entity that offers or sells, directly or indirectly, viatical settlement investment contracts to investors.

50.110(2) A viatical settlement investment contract issuer employing agents in Iowa must make prior application to the administrator for this authority. The application shall be made by letter and shall include:

a. A statement of the issuer’s intent to employ agents for the sale of its viatical settlement investment contracts; and

b. The name, address, social security number and proof of satisfaction of subrule 50.110(3) for each agent.

50.110(3) An applicant for registration as an Iowa-registered agent of an issuer of viatical settlement investment contracts shall file with the administrator:

a. Proof of obtaining a passing grade on the FINRA Series 7 examination;

b. Proof of obtaining a passing grade on the FINRA Series 63 examination;

c. An accurate, complete and signed Form U-4; and

d. A \$30 filing fee.

This rule is intended to implement Iowa Code sections 502.102(2), 502.301 and 502.402.

[ARC 9169B, IAB 10/20/10, effective 11/24/10]

191—50.111(502) Risk disclosure. Viatical settlement investment contract issuers and registered agents of issuers must provide specific, written disclosures of risk to Iowa investors at the time of the initial offer

to sell a viatical settlement investment contract. These disclosures must be preceded by the following caption, which must be in bold, 16-point typeface:

IMPORTANT RISK DISCLOSURE INFORMATION—READ BEFORE SIGNING ANY
VIATICAL SETTLEMENT INVESTMENT CONTRACT.

The disclosure must include, at a minimum, the following information:

1. That the actual annual rate of return on any viatical settlement investment contract is dependent upon an accurate projection of the viator's life expectancy and the actual date of the viator's death and that an annual "guaranteed" rate of return is not possible;
2. Whether, after purchasing the viatical settlement investment contract, the investor will be responsible for payment of premiums on the contract if the viator lives longer than projected and if the investor will be responsible for such premiums, the amount of the premium payment and any resulting negative effect on the investor's return;
3. Whether any premium payments on the contract have been escrowed and, if so, the date upon which the escrowed funds will be depleted, who is responsible for payment of premiums after depletion of the funds, and, if applicable, the amount of the premiums;
4. Whether any premium payments on the contract have been waived, whether the investor will be responsible for payment of the premiums if the insurer who wrote the policy terminates the waiver after purchase, and, if applicable, the amount of the premiums;
5. Whether the investor is responsible for payment of premiums on the contract if the viator returns to health and, if applicable, the amount of the premiums;
6. Whether the investor is entitled to all or part of the investor's investment under the contract if the viator's underlying policy is later determined to be null and void;
7. Whether the insurance policy is a group policy and, if so, the special risks associated with group policies including, but not limited to, whether the investor is responsible for payment of additional premiums if the policies are sold or converted;
8. Whether the insurance policy is term insurance and, if so, the special risks associated with term insurance including, but not limited to, whether the investor is responsible for additional premium costs if the viator continues the term policy at the end of the current term;
9. Whether the investor will be the beneficiary or owner of the insurance policy and, if the investor is the beneficiary, the special risks associated with beneficiary status;
10. Whether the insurance policy is contestable and, if so, the special risks associated with contestability including, but not limited to, the risk that the investor will have no claim or only a partial claim to death benefits should the insurer cancel the policy within the contestability period;
11. Who is making the projection of the viator's life expectancy, the information upon which the projection is based, and the relationship of the projection maker to the issuer;
12. Who is monitoring the viator's condition, how often the monitoring is done, how the date of death is determined, and how and when this information will be transmitted to the investor;
13. Whether the insurer who wrote the viator's underlying policy has any additional rights which could negatively affect or extinguish the investor's rights under the viatical settlement investment contract, what these rights are, and under what conditions these rights are activated;
14. That a viatical settlement investment contract is not a liquid investment and that there is no established secondary market for resale of these products by the investor;
15. That the investor will receive no returns (i.e., dividends and interest) until the viator dies; and
16. That the investor may lose all benefits or receive substantially reduced benefits if the insurer goes out of business during the term of the viatical investment.

This rule is intended to implement Iowa Code sections 502.102, 502.201(9E) and 502.301.

191—50.112(502) Advertising of viatical settlement investment contracts.

50.112(1) The issuer and agent shall file all viatical settlement investment contract advertisements with the administrator at least ten business days prior to the date of use or a shorter period as the administrator may permit. The administrator shall mark the advertisements with allowance for use or

expressly disapprove them during this time frame. The advertisement shall not be used in Iowa until a copy thereof, marked with allowance for use, has been received from the administrator.

50.112(2) Viatical settlement investment contract advertisements shall contain no more than the following:

- a. The name of the issuer;
- b. The address and telephone number of the issuer;
- c. A brief description of the security, including minimum purchase requirements and liquidity aspects;
- d. If a rate of return is advertised, it must be stated as the annual average rate of return, with a disclaimer that this is an annual average rate of return, that individual investor rates of return will vary based upon the viator's projected and actual date of death, and that an annual rate of return on a viatical settlement investment contract cannot be guaranteed;
- e. The name, address and telephone number of the agent of the issuer authorized to sell the viatical settlement investment contracts;
- f. A statement that the advertisement is neither an offer to sell nor a solicitation of an offer to purchase and that any offer or solicitation may only be made by providing a disclosure document; and
- g. How a copy of the disclosure document may be obtained.

50.112(3) Notwithstanding the provisions of rule 191—50.69(502), certain viatical settlement investment contract advertisements may be deemed false and misleading on their face by the administrator and are prohibited pursuant to Iowa Code sections 502.501 and 502.504. False and misleading viatical settlement investment contract advertisements include, but are not limited to, the following representations:

- a. “Fully secured,” “100% secured,” “fully insured,” “secure,” “safe,” “backed by rated insurance company(ies),” “backed by federal law,” “backed by state law,” or similar representations;
- b. “No risk,” “minimal risk,” “low risk,” “no speculation,” “no fluctuation,” or similar representations;
- c. “Qualified or approved for IRA, Roth IRA, 401K, SEP, 403B, Keogh plans, TSA, other retirement account rollovers,” “tax deferred,” or similar representations;
- d. “Guaranteed fixed return,” “guaranteed annual return,” “guaranteed principal,” “guaranteed earnings,” “guaranteed profits,” “guaranteed investment,” or similar representations;
- e. “No sales charges or fees” or similar representations;
- f. “High yield,” “superior return,” “excellent return,” “high return,” “quick profit,” or similar representations;
- g. “Perfect investment,” “proven investment,” or similar representations;
- h. Purported favorable representations or testimonials about the benefits of viaticals as an investment, taken out of context from newspapers, trade papers, journals, radio or television programs, or any other form of print or electronic media.

50.112(4) For purposes of this rule, the term “advertisement” includes any written, electronic or printed communication or any communication by means of recorded telephone messages or transmitted on radio, television, the Internet, or similar communications media, including filmstrips, motion pictures, and videos, published in connection with the offer or sale of a viatical settlement investment contract.

This rule is intended to implement Iowa Code sections 502.102, 502.301, and 502.504.

191—50.113(502) Duty to disclose. Issuers and agents equally share an affirmative duty to disclose all relevant and material information to prospective investors in viatical settlement investment contracts. The required disclosure is the registration statement required by Iowa Code section 502.304 which has been reviewed and made effective by the administrator.

This rule is intended to implement Iowa Code sections 502.102 and 502.201(9E).

CHAPTER 24
LOCATION AND CONSTRUCTION OF ELECTRIC POWER
GENERATING FACILITIES
[Prior to 10/8/86, Commerce Commission[250]]

199—24.1(476A) Authority, purpose, and policy.

24.1(1) Authority. The regulations contained herein are prescribed by the Iowa utilities board pursuant to authority granted the board in Iowa Code chapter 476A, relating to the location and construction of electric power generating facilities.

24.1(2) Purpose. The purpose of these regulations is to provide guidelines for proceedings for the determination whether the proposed construction of a major electric generation facility or significant alteration thereto should be issued a certificate before such construction may commence and to state the procedures for determining compliance by the applicant with permit and licensing requirements of state regulatory agencies.

24.1(3) Cooperative agreements. The board may enter into cooperative agreements pursuant to Iowa Code chapter 28E with the appropriate state agencies that will facilitate thorough review of all state issues arising in the certification process and will reduce the time and expense in determining, to the extent necessary, the environmental, economic, and social effects of the facility's construction and use. Under the auspices of these 28E agreements, the board shall delegate to the various state agencies responsibility for the issuance of permits and licenses appropriate to the authority of the agency to ensure compliance with the steps in the certification process. The board, where appropriate, may use a consolidated hearing process.

199—24.2(476A) Definitions. As used in this chapter:

"Acid Rain Program" means the sulfur dioxide and nitrogen oxides air pollution control program established pursuant to Title IV of the Clean Air Act, 42 U.S.C. Section 7401, et seq., as amended by Pub. L. 101-549, November 15, 1990.

"Act" means Iowa Code chapter 476A entitled Electric Power Generators.

"Agency" means an agency as defined in Iowa Code section 17A.2(1).

"Allowance" means an authorization, allocated by the federal Environmental Protection Agency under the Acid Rain Program, to emit up to one ton of sulfur dioxide, during or after a specified calendar year.

"Applicant" means the person or persons who make an application for a certificate for a facility or an amendment to a certificate for a facility under the Act. For projects with more than one participant, the applicant may be that person designated by and acting on behalf of the participants.

"Application" means an application for a certificate or an amendment to a certificate submitted to the board pursuant to the Act.

"Board" means the utilities board.

"Certificate" means a certificate as defined in Iowa Code section 476A.1.

"Contested case proceeding" means the contested case proceeding before the board prescribed by Iowa Code section 476A.4.

"Facility" means any electric power generating plant or combination of plants at a single site, owned by any person, with a maximum generator nameplate capacity of 25 megawatts of electricity or more and those associated transmission lines connecting the generating plant to either a power transmission system or an interconnected primary transmission system or both. This term includes any generation addition that increases the total maximum generator nameplate capacity at one site to 25 megawatts or more, but does not include those transmission lines beyond the generation station's substation.

"Interested agency" means an agency, other than a regulatory agency, which the board in its discretion determines to have a legitimate interest in the disposition of the application.

"Intervenor" means a person who received notice under 24.6(2) "b," "c," "d," "e," or "f" and has filed with the board a written notice of intervention, or a person granted permission to intervene by the board after filing a petition pursuant to rule 199—7.13(17A,476).

“*Participant*” means any person who either jointly or severally owns or operates a proposed facility or significant alteration thereto or who has contracted or intends to contract for a purchase of electricity produced by the subject facility.

“*Party*” means each person or agency named or admitted as a party, including the applicant, intervenors, and consumer advocate.

“*Person*” means individual, corporation, cooperative, government or governmental subdivision or agency, partnership, association or other legal entity.

“*Public utility*” means a public utility as defined in Iowa Code section 476.1.

“*Regulatory agency*” means a state agency which issues licenses or permits required for the construction, operation or maintenance of a facility pursuant to statutes or rules in effect on the date on which an application for a certificate is accepted by the board.

“*Significant alteration*” means:

- a. A change in the generic type of fuel used by the major electric generating facility; or
- b. Any change in the location, construction, maintenance, or operation of equipment at an existing facility that increases the maximum generator nameplate capacity of the facility by at least 10 percent and at least 25 megawatts.

“*Site*” means the land on which the generating unit of the facility, and any cooling facilities, cooling water reservoirs, security exclusion areas, and other necessary components of the facility, are proposed to be located.

“*Site impact area*” means the area within the state of Iowa within a ten-mile radius of the intersection of the transverse centerline axis and longitudinal centerline axis of the generator or all such generators where the proposed facility includes multiple generators.

“*Zoning authority*” means any city or county zoning authority in whose jurisdictional area a proposed facility site or portion thereof is located.

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.3(476A) Form of application, place of filing.

24.3(1) Form of application.

a. The application, associated documents, or other papers filed with the board in a certification proceeding shall be capable of being printed or typewritten and reproduced on sheets of 8½ inches by 11 inches (except for foldouts and special exhibits).

b. The information required by these rules shall be indexed and arranged in a sequential manner substantially similar to the outline form of the rules, with all material submitted categorized into the specific areas and sections set forth in the rules.

24.3(2) Manner and place of filing.

a. An applicant shall file the application electronically unless otherwise permitted by the board.

b. The board, through the use of its electronic filing system, shall include on the service list for the application each regulatory agency listed on the application in addition to other agencies as the board deems appropriate.

c. Any amendments to the application shall be filed in a manner similar to that required of the application.

[Editorial change: IAC Supplement 12/29/10; ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.4(476A) Application for a certificate—contents. Each person or group of persons proposing to construct a facility or a significant alteration to a facility shall file an application for certificate with the board, unless otherwise provided by these rules. The applicant may file a portion of an application and, in conjunction therewith, a request that the board accept such portion of the application pursuant to subrule 24.5(3) and conduct a separate phase of the proceeding with respect to issues presented by such portion of the application to the extent permitted pursuant to 24.5(3) and rule 199—24.9(476A). An application shall substantially comply with the following informational requirements:

24.4(1) In section 1, entitled “General Information,” applicant shall include the following information:

a. The legal name, address, telephone number, facsimile transmission number, and email address of the applicant and all other participants of the proposed facility at the time of filing, as well as the name of the person authorized to receive communications relating to the application on behalf of those persons, Iowa business address, if applicable, and principal place of business of the applicant.

b. The name and type of business of the applicant's and all other participants' parent companies and affiliates. The information must include percentages of ownership.

c. A complete description of the current and proposed rights of ownership in the proposed facility and current or planned purchase power contracts with respect to the proposed facility.

d. A general site description including a legal description of the site location, a map showing the coordinates of the site and its location with respect to state, county, and other political subdivisions, and prominent features such as cities, lakes, rivers and parks within the site impact area. Applicant shall also provide a more detailed map showing the location of the facility perimeter, utility property, railroads and other transportation facilities, abutting and adjacent properties, cities, lakes, rivers, parks, other public facilities, cemeteries and places of historical significance within one mile of the site boundary. The general site description should include a discussion of whether the proposed site is located in a flood plain.

e. A general description of the proposed facility including a description of the principal characteristics of the facility such as the capacity of the proposed facility in megawatts expressed by the contracted maximum generator nameplate MW rating, the net facility addition in MW, by net to the busbar rating, and the portion (in MW) of the design capacity of the proposed facility which is proposed to be available for use by each participant, the number and type of generating units, primary fuel source for each such unit, total hours of operation anticipated seasonally and annually, and output in MWH during these hours, expected capacity factors, a description of the general arrangement of major structures and equipment to provide the board with an understanding of the general layout of the facility, and a schedule for the facility's construction and utilization including the projected date significant site alteration is proposed to begin and the projected date the facility is to be placed into service. For this purpose, a group of several similar generating units operated together at the same location such that segregated records of energy output are not available shall be considered as a single unit.

f. A general description of all raw materials, including fuel, used by the proposed facility in producing electricity and of all wastes created in the production process. In addition to describing the wastes created in the production process, the applicant shall determine annual expected sulfur dioxide emissions from the facility and provide a plan for acquiring allowances sufficient to offset these emissions. The applicant shall describe all transportation facilities currently operating that will be available to serve the proposed facility and shall describe any additional transportation facilities needed to deliver raw materials and to remove wastes.

g. Identification, general description and chronology of all financial and other contractual commitments undertaken or planned to be undertaken with respect to the proposed facility.

h. A general map and description of the primary transmission corridors and the approximate routing of the rights-of-way. An analysis of the existing transmission network's capability to reliably support the proposed additional generation interconnection to the network. The analysis must also show that the interconnection to the transmission system is consistent with standard utility practices and the proposed interconnection does not degrade the adequacy, reliability, or operating flexibility of the existing transmission system in the area. A system impact analysis performed by the operator of the transmission system with which the facility will be interconnected, as well as any analysis, in applicant's possession, submitted to an area reliability council, concerning the impact of the facility on the area grid, shall satisfy the foregoing requirements. The impact analysis must include both local area and regional impacts.

i. The applicant, if a public utility, must include a statement of total cost to construct the proposed facility. Such cost shall include, but shall not be limited to, the cost of all electric power generating units, all electric supply lines within the facility site boundary, all electric supply lines beyond the facility site boundary with voltage of 69 kilovolts or higher used for transmitting power from the facility to the point of junction with the distribution system or with the interconnected primary transmission system,

all appurtenant or miscellaneous structures used and useful in connection with said facility or any part thereof, and all rights-of-way, lands or interest in lands, the use and occupancy of which are necessary or appropriate in the maintenance or operation of said facility.

j. The names and addresses of those owners and lessees of record of real property identified in 24.6(2) “*d*” and “*e*.”

k. The names and addresses of those owners and lessees of record of real property for whom the applicant seeks the use of eminent domain.

24.4(2) In section 2, entitled “Regulatory requirements,” applicant shall include the following:

a. All information related to the regulatory agency and zoning authority requirements for permits or licenses necessary to construct, operate, and maintain the facility.

b. A listing of every state agency from which any approval or authorization concerning the proposed facility is required and a listing of zoning authorities.

c. Information equivalent to the information required in the rules and application forms of such state regulatory agencies and zoning authorities, to the extent such information is ready to be filed.

24.4(3) In section 3, entitled “Community impact,” the applicant shall include an identification and analysis of the effects the construction, operation and maintenance of the proposed facility will have on the site impact area including, but not limited to, the following:

a. A forecast of the permanent impact of the construction, operation, and maintenance of the proposed facility on commercial and industrial sectors, housing, land values, labor market, health facilities, sewage and water, fire and public protection, recreational facilities, schools and transportation facilities.

b. A forecast of any temporary impact placed upon housing, schools or other community facilities as a result of a temporary influx of workers during the construction of the proposed facility.

c. A forecast of the impact of the proposed facility on property taxes of affected taxing jurisdictions. The forecast shall include the effects on property taxes caused by all community development proximately related to the construction of the proposed facility.

d. A forecast of the impact on agricultural production and uses.

e. A forecast of the impact on open space areas and areas of significant wildlife habitat. Such forecast shall include identification and description of the impact of the proposed facility on terrestrial and aquatic plants and animals.

f. A forecast of the impact on transportation facilities.

g. A forecast of the impact on cultural resources including known archaeological, historical and architectural properties, which are on, or eligible for, the National Register of Historic Places.

h. A forecast of the impact on landmarks of historic, religious, archaeological, scenic, natural or other cultural significance. Such information shall include applicant’s plans to coordinate with the office of state archaeologist to reduce or obviate any adverse impact and the applicant’s plans to coordinate with the state office of disaster services in the event of accidental release of contaminants from the proposed facility.

24.4(4) Site selection methodology. In section 4, entitled “Site selection methodology,” applicant shall present information related to its selection of the proposed site for the facility. Such information shall include the following:

a. The general criteria used to select alternative sites and how these criteria were used to select the proposed site.

b. A discussion of the extent to which reliance upon eminent domain powers could be reduced by use of an alternative site, alternative generation method or alternative waste handling method.

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.5(476A) Initial board review: Application acceptance.

24.5(1) Upon the filing of the application or a portion of the application, the board and the appropriate regulatory agencies shall make an initial review thereof to determine if it is in substantial compliance with the requirements of rule 199—24.4(476A) which pertain thereto. If any significant deficiencies, including those noted by applicant, are determined to exist in the application, or such portion of the

application by either the board or regulatory agency, the board shall notify the applicant specifying such deficiencies, within 45 days from the date of the filing of the application or such portion of the application.

24.5(2) The applicant shall have 30 days from notification of deficiencies to amend or request, for good cause, a reasonable extension of time to amend. In the event the applicant fails to amend within the time allowed or, after amendment, the application or portion thereof filed is not in substantial compliance with the requirements of rule 199—24.4(476A) which pertain thereto, the board may reject the application or such portion thereof. Such rejection shall constitute final agency action, but shall not preclude reapplication.

24.5(3) If the application or portion thereof, after amendment or otherwise, is in substantial compliance with the requirements of rule 199—24.4(476A) which pertain thereto, the board shall, within 45 days of the filing of the application or portion thereof or amendment thereto, accept the application or portion thereof and set the time and place for hearing as provided in rule 199—24.6(476A); provided, however, that upon acceptance of a partial application, the board may order separate proceedings on particular phases of the application, pursuant to rule 199—24.9(476A), where such partial application permits a finding to be made with regard to any of the facility siting criteria contained in subrule 24.10(2).

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.6(476A) Procedural schedule.

24.6(1) Upon acceptance of the application, the board shall establish a schedule for the certification proceeding which shall include:

a. A hearing to be commenced in accordance with rule 199—24.8(476A), no earlier than 90 days nor later than 150 days from the date of acceptance. This hearing shall be conducted in the county in which the construction of the greater portion of the facility is being proposed.

b. Provision for the publication of notice of the schedule for the hearing held by the board in the form provided in Iowa Code section 17A.12(2), which notice shall be published in a newspaper of general circulation in each county in which the proposed site is located once each week for two consecutive weeks with the second publication being no later than 30 days after acceptance of the application.

24.6(2) The board shall serve notice of the acceptance of the application and proceeding schedule upon the following:

a. All regulatory agencies, including Iowa department of transportation and the Iowa department of natural resources.

b. Interested agencies as determined by the board, including the office of state archaeologist and the office of historical preservation of the state historical society of Iowa.

c. County and city zoning authorities from the area in which the proposed site is located; and

d. All owners of record of real property located within one mile of the intersection of the transverse center-line axis and longitudinal center-line axis of the generator, or all such generator axis intersections where the proposed facility includes multiple generators, and all owners of record of real property located within 1000 linear feet of the proposed boundary, but outside any such one-mile radius.

e. All lessees of record of real property of one acre or more located within the site boundary or within 1000 linear feet outside of the proposed site boundary.

f. Owners and lessees of real property for which the applicant seeks the power of eminent domain.

g. Other interested persons as determined by the board.

24.6(3) Status of notice recipient.

a. Those receiving notice under 24.6(2) “*a*” shall be deemed parties to the proceeding.

b. Such notice provided under 24.6(2) “*b*,” “*c*,” “*d*,” “*e*” or “*f*” shall state that the recipient shall have the right to become an intervenor upon duly filing written notice of intervention.

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.7(476A) Informational meeting.

24.7(1) *Place of meeting.* Not less than 30 days prior to the filing of an application the applicant shall hold an informational meeting in the county of the proposed site for the facility. In the event the

proposed site is in more than one county, such meeting shall be in that county containing the greatest portion of the proposed facility site.

24.7(2) Meeting facilities. The applicant shall be responsible for all negotiations and compensation for a suitable facility to be used for the informational meeting, including but not limited to a building or facility which is in substantial compliance with the requirements of the Americans with Disabilities Act Accessibility Guidelines, Chapter 4, where such a building or facility is reasonably available.

24.7(3) Location. The location of the meeting shall be reasonably accessible to all persons which may be affected by the granting of the certificate.

24.7(4) Board approval. Board approval shall be obtained for the proposed informational meeting date, time, and location.

24.7(5) Personnel. The prospective applicant shall provide qualified personnel to speak for the applicant in matters relating to the following:

- a. Utility planning which has resulted in the proposed construction.
- b. When the facility or significant alteration will be constructed.
- c. In general terms the physical construction, appearance and location of major structures with respect to proposed property lines.
- d. In general terms the property rights which the applicant shall seek including purchase, option to buy, and easement.
- e. Procedures to be followed in contacting affected parties for specific negotiations in acquiring property rights.
- f. Methods and factors used in arriving at offered compensation.
- g. Manner in which payments are made including discussion of conditional easements, signing fees and time of payment.
- h. Other factors or damages for which compensation is made.
- i. If the undertaking is a joint effort, other participants shall be represented at the informational meeting by qualified personnel designated to speak for them.

24.7(6) Conduct of the meeting. A member of the board, or a hearing examiner designated by the board, shall serve as the presiding officer at the meeting and present an agenda for such meeting, which shall include a summary of the legal rights of affected legal landowners. No formal record of the meeting is required. The meeting shall be considered an opportunity for interested members of the public to raise questions regarding the proposal, and an opportunity for the applicant to respond.

24.7(7) Notice. At least one week prior to the time set for the informational meeting, the applicant shall cause to be published a notice of such meeting in a newspaper of general circulation in each county containing a portion of the proposed site impact area. The notice of the informational meeting shall contain the following statement: Persons with disabilities requiring assistive services or devices to observe or participate should contact the utilities board at (515)725-7300 in advance of the scheduled date to request that appropriate arrangements be made. Proof of such notice shall be provided to the board by applicant. Additional notice shall be made through press release to all newspapers of general circulation in each county containing a portion of the proposed site impact area and, as deemed appropriate by the board, electronic media.

This rule is intended to implement Iowa Code sections 476A.2 and 476A.12.
[Editorial change: IAC Supplement 12/29/10]

199—24.8(476A) Hearing procedure.

24.8(1) General. The proceedings conducted by the board pursuant to this chapter shall be treated in the same manner as a contested case pursuant to the provisions of Iowa Code chapter 17A. Except where contrary to express provisions below, the hearing procedure shall conform to the board's rules of practice and procedure, 199—Chapter 7. The proceeding for the issuance of certificate may be consolidated with the contested case proceeding for determination of applicable ratemaking principles under Iowa Code section 476.53. All filings shall be made electronically unless otherwise permitted by the board.

24.8(2) Intervention.

a. Notice of intervention. An agency not receiving notice pursuant to 24.6(2) “b” may become a party to the contested case proceeding by filing a notice of intervention. Such notice shall contain a statement of the jurisdiction or interest of the particular agency with respect to the proposed facility.

b. Petition to intervene. Any other person wishing to become a party to the contested case proceeding may request to intervene in the proceeding by petition to intervene filed at least 30 days prior to the date of the scheduled hearing, but not afterward except for good cause shown. Such application shall specify the issues in which petitioner may contest before a regulatory agency or otherwise. A petition to intervene shall substantially comply with the form prescribed in 199—subrule 2.2. All other parties to the proceeding shall have the right to resist or respond to the petition to intervene within seven days subsequent to the petitioner’s service thereof.

c. Board discretion. The board may, in its discretion, grant or deny such petition or may permit intervention by the petitioner limited to particular issues or to a particular phase or stage of the proceeding. The board shall, in exercising its discretion, consider the substantiality of the petitioner’s rights allegedly affected by the granting or denial of the application and whether granting the intervention will unduly delay the proceeding or have no probative value to the proceeding. The granting of any petition to intervene shall not have the effect of changing or enlarging the issues specified in the board’s notice of hearing or any prehearing order of the board unless the board shall, on motion, amend the same.

24.8(3) Appearance. If any regulatory agency fails to appear of record in the contested case proceeding conducted by the board, the board shall conclusively presume that the facility meets the regulatory agency’s permit and licensing requirements and the regulatory agency shall immediately issue any license or permit required for the construction, operation, or maintenance of the facility.

24.8(4) Discovery. Discovery may begin after the commencement of the contested case proceeding. It will not be grounds for objection that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to the discovery of admissible evidence.

24.8(5) Application for rehearing. All applications for rehearing will be made and processed in accordance with Iowa Code sections 17A.16(2) and 476.12. Applications for rehearing after decisions made by the board must state the specific grounds upon which the application is based and must specify such findings of fact and conclusions of law and such terms or conditions of any certificate or amendment to certificate as are claimed to be erroneous, with a brief statement of the grounds of error. An application for rehearing shall substantially comply with the form prescribed in 199—subrule 2.2.

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.9(476A) Separate hearings on separate issues.

24.9(1) By motion. The board, upon its own motion or on the motion of the applicant, may order separate phases on particular issues of the proceeding. Each phase shall be addressed to issues involved in applying one or more of the facility siting criteria set forth in subrule 24.10(2) and shall result in board findings with respect thereto.

24.9(2) By agreement. In accordance with agreements made pursuant to Iowa Code chapter 28E, with regulatory agencies, the board shall establish separate phases of the hearing process to determine whether the proposed facility will conform to the permit and licensing requirements of the regulatory agencies.

24.9(3) Procedure. Each such hearing phase shall be conducted in conformance with the requirements of rule 199—24.8(476A) or other rules of practice and procedure designated in the applicable chapter 28E agreement.

199—24.10(476A) Certification decision.

24.10(1) Issuance of decision. Upon the close of the record in the proceeding, the board shall expeditiously render a written decision with complete determinations as to the facility siting criteria or portion thereof under consideration, other necessary findings of fact or conclusions of law necessary to support the board’s decision.

24.10(2) Facility siting criteria. In rendering its certification decision, the board shall consider the following criteria:

a. Whether the service and operations resulting from the construction of the facility are consistent with the legislative intent as expressed in Iowa Code section 476.53 and the economic development policy of the state as expressed in Iowa Code Title I, Subtitle 5, and will not be detrimental to the provision of adequate and reliable electric service. Such determination shall include whether the existing transmission network has the capability to reliably support the proposed additional generation interconnection to the network.

b. Whether the construction, maintenance, and operation of the proposed facility will be consistent with reasonable land use and environmental policies, and consonant with reasonable utilization of air, land, and water resources, considering available technology and the economics of available alternatives. Such determination shall include:

(1) Whether all adverse impacts attendant the construction, maintenance and operation of the facility have been reduced to a reasonably acceptable level;

(2) Whether the proposed site represents a reasonable choice among available alternatives;

(3) Whether the proposed facility complies with applicable city, county or airport zoning requirements and, if not, whether the location of the proposed facility at the proposed site is reasonably justified from an economic, technical, and social standpoint.

c. Whether the applicant is willing to construct, maintain, and operate the facility pursuant to the provisions of the certificate and the Act.

d. Whether the proposed facility meets the permit and licensing requirements of regulatory agencies.

e. Requirement for good engineering practice. The applicant shall use the applicable provisions in the publications listed below as standards of accepted good practice unless otherwise ordered by the board:

(1) Iowa Electrical Safety Code, as defined in 199—Chapter 25.

(2) National Electrical Code, as defined in 199—Chapter 25.

(3) Power Piping-ANSI standard B31.1-2004.

24.10(3) Amendment. If the board finds that the application and record in the proceeding does not support affirmative findings with regard to these criteria, the board will, in its order, specify any deficiencies determined to exist. The applicant shall have 30 days from the notification of the deficiencies to amend or, for good cause, to request a reasonable extension of time to amend the application or to request reopening of the record to correct the deficiencies, or both.

24.10(4) Denial. In the event the applicant fails to amend in a timely fashion, or after amendment or reopening the record, or both, the board is still unable to make an affirmative finding, the board will deny the application. The applicant may request rehearing on such denial in accordance with Iowa Code sections 17A.16(2) and 476.12.

24.10(5) Application approval. If the board finds, after amendment or record reopening, or both, or otherwise, that affirmative findings are appropriate, the board shall approve the application and, in accordance with rule 199—24.12(476A), prepare a certificate for construction of the facility.

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.11(476A) Site preparation.

24.11(1) In the event no certificate has been issued after 90 days from the commencement of the hearing, the board may permit the applicant to begin work to prepare the site for construction of the facility. Any activities conducted pursuant to this rule shall have no probative value to the board's decision concerning the actual issuance of a certificate.

24.11(2) In the event the board denies an application for a certificate or an amendment to a certificate, applicants who have received permission to begin site preparation, pursuant to 24.11(1), shall restore the site, in accordance with the board order denying the application.

[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.12(476A) Issuance of a certificate.

24.12(1) General. The certificate shall authorize construction, maintenance, and operation of the facility on the site designated in the certificate according to the following:

- a. Those terms and conditions imposed by the board and stated in the certificate.
- b. Those terms and conditions in licenses and permits issued by regulatory agencies before and during the proceeding.
- c. Those terms and conditions which have been specifically recommended by regulatory agencies in the proceeding and declared by those regulatory agencies or the board as being necessary for the applicant to comply with requirements of licenses or permits then sought but not yet issued.

24.12(2) Eminent domain. The certificate shall give the applicant the power of eminent domain to the extent and under such conditions as the board approves, prescribes, and finds necessary for the public convenience, use, and necessity, proceeding in the manner of works of internal improvement under Iowa Code chapter 6B.

24.12(3) Certificate transfer. A certificate may be transferred, subject to the approval of the board, to a person who agrees to comply with the terms of the certificate including any amendments to the certificate. Certificates shall be transferable by operation of law to any receiver, trustee or similar assignee under a mortgage, deed of trust or similar instrument.

24.12(4) Application withdrawal. Pursuant to Iowa Code section 476.53, a rate-regulated utility shall have the option of withdrawing its application for issuance of a certificate.
[ARC 3751C, IAB 4/11/18, effective 5/16/18]

199—24.13(476A) Exemptions from certification application; application for amendment for certificate: Contents.

24.13(1) Application for amendment.

a. Each person or group of persons proposing a significant alteration to any facility which was constructed pursuant to a certificate issued by the board shall file an application for an amendment to a certificate in lieu of an application for a certificate.

b. Each person or group of persons proposing a significant alteration to any facility which was not constructed pursuant to a certificate issued by the board must file an application for such certificate unless:

- (1) The facility has not attained full commercial rating and has not operated in excess of 80 percent of its maximum nameplate megawatt rating for ten hours daily for 45 consecutive days; and
- (2) The significant alteration requires no more land than was required for the facility, is within the scope of publicly announced plans for the facility's construction, and entails no additional contracts for major components than those let for the facility.

24.13(2) All applications for amendment to a certificate shall be filed in accordance with rule 199—24.3(476A) and shall include:

- a. A complete identification and discussion of the nature of the amendment proposed; and
- b. A complete enumeration of the effects the amendment has on the accuracy of the information contained in the application for a certificate filed pursuant to rule 199—24.4(476A).

24.13(3) Upon board acceptance of the application in accordance with 24.13(1), the board shall establish a hearing schedule. At the board's discretion, the informational meeting and prehearing conference for this proceeding may be waived. Notice shall be in accordance with 24.6(2).

24.13(4) In the consideration of an application for a certificate, pursuant to 24.13(1) "b," or amendment to a certificate, pursuant to 24.13(1) "a," there shall be a rebuttable presumption that the decision criteria of 24.10(2) are satisfied.

24.13(5) Amendment to a certificate. In determining whether an amendment to a certificate will be issued to the applicant, the board will be guided by the criteria set forth in 24.10(2) to the extent applicable and appropriate.

This rule is intended to implement Iowa Code sections 17A.3, 474.5, 476.1, and 476.2.

199—24.14(476A) Assessment of costs. The applicant for a certificate, or an amendment to a certificate, shall pay all the costs and expenses incurred by the board in reaching a decision on the application including the costs of examinations of the site, the hearing, publishing of notice, board staff salaries, the cost of consultants employed by the board, and other expenses reasonably attributable to the proceeding.

This rule is intended to implement Iowa Code chapter 476A and sections 17A.3, 474.5, 476.1, and 476.2.

199—24.15(476A) Waiver. The board, if it determines that the public interest would not be adversely affected, may waive any of the requirements of this chapter. In determining whether the public interest would not be adversely affected, the board will consider the following factors:

1. The purpose of the facility.
2. The type of facility.
3. If the facility is for the applicant's own needs.
4. The effect of the facility on existing transmission systems.
5. Any other relevant factors.

In addition to other service requirements, the applicant must serve a copy of the waiver request on all owners of record of real property that adjoins the proposed facility site. A request for a waiver shall also comply with rule 199—1.3(17A,474,476).

This rule is intended to implement Iowa Code sections 476A.1, 476A.2, 476A.4, 476A.6, 476A.7 and 476A.15.

GOVERNOR'S AWARD FOR QUALITY CARE

- 54.1(135C) Purpose
- 54.2(135C) Definitions
- 54.3(135C) Nomination
- 54.4(135C) Applicant eligibility
- 54.5(135C) Nomination information
- 54.6(135C) Evaluation
- 54.7(135C) Selection of finalists
- 54.8(135C) Certificate of recognition

CHAPTER 55

Reserved

CHAPTER 56
FINING AND CITATIONS

| | |
|-------------|--|
| 56.1(135C) | Authority for citations |
| 56.2(135C) | Classification of violations—classes |
| 56.3(135C) | Fines |
| 56.4(135C) | Time for compliance |
| 56.5(135C) | Failure to correct a violation within the time specified—penalty |
| 56.6(135C) | Treble and double fines |
| 56.7(135C) | Notation of classes of violations |
| 56.8(135C) | Notation for more than one class of violation |
| 56.9(135C) | Factors determining selection of class of violation |
| 56.10(135C) | Factors determining imposition of citation and fine |
| 56.11(135C) | Class I violation not specified in the rules |
| 56.12(135C) | Class I violation as a result of multiple lesser violations |
| 56.13(135C) | Form of citations |
| 56.14(135C) | Licensee's response to a citation |
| 56.15(135C) | Informal conference |
| 56.16(135C) | Procedure for facility after informal conference |
| 56.17(135C) | Formal contest |

CHAPTER 57
RESIDENTIAL CARE FACILITIES

| | |
|----------------|--|
| 57.1(135C) | Definitions |
| 57.2(135C,17A) | Waiver or variance |
| 57.3(135C) | Application for licensure |
| 57.4(135C) | Issuance of license |
| 57.5(135C) | Licenses for distinct parts |
| 57.6(135C) | Special classifications |
| 57.7(135C) | General requirements |
| 57.8(135C) | Certified volunteer long-term care ombudsman program |
| 57.9(135C) | Required notifications to the department |
| 57.10(135C) | Administrator |
| 57.11(135C) | Personnel |
| 57.12(135C) | General policies |
| 57.13(135C) | Admission, transfer and discharge |
| 57.14(135C) | Involuntary discharge or transfer |
| 57.15(135C) | Residency agreement |
| 57.16(135C) | Medical examinations |

| 58.49(135C) | Resident property |
| 58.50(135C) | Family visits |
| 58.51(135C) | Choice of physician and pharmacy |
| 58.52(135C) | Incompetent resident |
| 58.53(135C) | County care facilities |
| 58.54(73GA,ch 1016) | Special unit or facility dedicated to the care of persons with chronic confusion or a dementing illness (CCDI unit or facility) |
| 58.55(135C) | Another business or activity in a facility |
| 58.56(135C) | Respite care services |
| 58.57(135C) | Training of inspectors |

CHAPTER 59

TUBERCULOSIS (TB) SCREENING

| | |
|------------------|---|
| 59.1(135B,135C) | Purpose |
| 59.2(135B,135C) | Definitions |
| 59.3(135B,135C) | TB risk assessment |
| 59.4(135B,135C) | Health care facility or hospital risk classification |
| 59.5(135B,135C) | Baseline TB screening procedures for health care facilities and hospitals |
| 59.6(135B,135C) | Serial TB screening procedures for health care facilities and hospitals |
| 59.7(135B,135C) | Screening of HCWs who transfer to other health care facilities or hospitals |
| 59.8(135B,135C) | Baseline TB screening procedures for residents of health care facilities |
| 59.9(135B,135C) | Serial TB screening procedures for residents of health care facilities |
| 59.10(135B,135C) | Performance of screening and testing |

CHAPTER 60

MINIMUM PHYSICAL STANDARDS FOR RESIDENTIAL CARE FACILITIES

| | |
|-------------|-------------------------------|
| 60.1(135C) | Definitions |
| 60.2(135C) | Variances |
| 60.3(135C) | General requirements |
| 60.4(135C) | Typical construction |
| 60.5(135C) | Supervised care unit |
| 60.6(135C) | Support area |
| 60.7(135C) | Service area |
| 60.8(135C) | Administration and staff area |
| 60.9(135C) | Definition of public area |
| 60.10(135C) | Elevator requirements |
| 60.11(135C) | Mechanical requirements |

- 60.12(135C) Electrical requirement
- 60.13(135C) Codes and standards

CHAPTER 61

MINIMUM PHYSICAL STANDARDS FOR NURSING FACILITIES

- 61.1(135C) Definitions
- 61.2(135C) General requirements
- 61.3(135C) Submission of construction documents
- 61.4(135C) Variances
- 61.5(135C) Additional notification requirements
- 61.6(135C) Construction requirements
- 61.7(135C) Nursing care unit
- 61.8(135C) Dietetic and other service areas
- 61.9(135C) Specialized unit or facility for persons with chronic confusion or a dementing illness (CCDI unit or facility)

CHAPTER 62

RESIDENTIAL CARE FACILITIES FOR PERSONS WITH MENTAL ILLNESS (RCFs/PMI)

- 62.1(135C) Applicability
- 62.2(135C) Definitions
- 62.3(135C) Personnel
- 62.4(135C) Admission criteria
- 62.5(135C) Evaluation services

CHAPTER 63

RESIDENTIAL CARE FACILITY—THREE- TO FIVE-BED SPECIALIZED LICENSE

- 63.1(135C) Definitions
- 63.2(135C,17A) Waiver or variance
- 63.3(135C) Application for licensure
- 63.4(135C) Issuance of license
- 63.5(135C) General requirements
- 63.6(135C) Required notifications to the department
- 63.7(135C) Administrator
- 63.8(135C) Personnel
- 63.9(135C) General policies
- 63.10(135C) Admission, transfer and discharge
- 63.11(135C) Involuntary discharge or transfer
- 63.12(135C) Residency agreement
- 63.13(135C) Medical examinations
- 63.14(135C) Records
- 63.15(135C) Resident care and personal services
- 63.16(135C) Drugs
- 63.17(135C) Dental services
- 63.18(135C) Dietary
- 63.19(135C) Orientation and service plan
- 63.20(135C) Resident activities program
- 63.21(135C) Residents' rights
- 63.22(135C) Dignity preserved
- 63.23(135C) Communications
- 63.24(135C) Resident property
- 63.25(135C) Financial affairs—management
- 63.26(135C) Resident work
- 63.27(135C) Resident abuse prohibited

| | |
|-------------|---------------------------------------|
| 63.28(135C) | Crisis intervention |
| 63.29(135C) | Safety |
| 63.30(135C) | Housekeeping |
| 63.31(135C) | Maintenance |
| 63.32(135C) | Laundry |
| 63.33(135C) | Garbage and waste disposal |
| 63.34(135C) | Supplies |
| 63.35(135C) | Buildings, furnishings, and equipment |

| 66.4(83GA,SF484) | Complaints |
| 66.5(83GA,SF484) | Investigations |
| 66.6(83GA,SF484) | Penalties |
| 66.7(83GA,SF484) | Public and confidential information |

CHAPTER 67 GENERAL PROVISIONS FOR ELDER GROUP HOMES, ASSISTED LIVING PROGRAMS, AND ADULT DAY SERVICES

| | |
|---------------------------------------|--|
| 67.1(231B,231C,231D) | Definitions |
| 67.2(231B,231C,231D) | Program policies and procedures, including those for incident reports |
| 67.3(231B,231C,231D) | Tenant rights |
| 67.4(231B,231C,231D) | Program notification to the department |
| 67.5(231B,231C,231D) | Medications |
| 67.6(231B,231C,231D) | Another business or activity located in a program |
| 67.7(231B,231C,231D) | Waiver of criteria for retention of a tenant in the program |
| 67.8(231B,231C,231D) | All other waiver requests |
| 67.9(231B,231C,231D) | Staffing |
| 67.10(17A,231B,231C,231D) | Monitoring |
| 67.11(231B,231C,231D) | Complaint and program-reported incident report investigation procedure |
| 67.12 | Reserved |
| 67.13(17A,231B,231C,231D,85GA,HF2365) | Exit interview, final report, plan of correction |
| 67.14(17A,231B,231C,231D,85GA,HF2365) | Response to final report |
| 67.15(17A,231B,231C,231D) | Denial, suspension or revocation of a certificate |
| 67.16(17A,231B,231C,231D) | Conditional certification |
| 67.17(17A,231B,231C,231D) | Civil penalties |
| 67.18(17A,231B,231C,231D) | Judicial review |
| 67.19(135C,231B,231C,231D) | Criminal, dependent adult abuse, and child abuse record checks |
| 67.20(17A,231C,231D) | Emergency removal of tenants |

- 67.21(231C) Nursing assistant work credit
 67.22(231B,231C,231D) Public or confidential information

CHAPTER 68
 ELDER GROUP HOMES

- 68.1(231B) Definitions
 68.2(231B) Program certification and posting requirements
 68.3(231B) Certification—application process
 68.4(231B) Certification—application content
 68.5(231B) Initial certification process
 68.6(231B) Expiration of program certification
 68.7(231B) Recertification process
 68.8(231B) Notification of recertification
 68.9(231B) Listing of all certified programs
 68.10(231B) Change of ownership—notification to the department
 68.11(231B) Cessation of program operation
 68.12(231B) Occupancy agreement
 68.13(231B) Evaluation of tenant
 68.14(231B) Criteria for admission and retention of tenants
 68.15(231B) Involuntary transfer from the program
 68.16(231B) Tenant documents
 68.17(231B) Service plans
 68.18(231B) Nurse review
 68.19(231B) Staffing
 68.20(231B) Managed risk policy and managed risk consensus agreements
 68.21(231B) Transportation
 68.22(231B) Identification of veteran's benefit eligibility
 68.23(231B) Resident advocate committees
 68.24(231B) Life safety—emergency policies and procedures and structural safety requirements
 68.25(231B) Structural standards
 68.26(231B) Landlord and tenant Act

CHAPTER 69
 ASSISTED LIVING PROGRAMS

- 69.1(231C) Definitions
 69.2(231C) Program certification
 69.3(231C) Certification of a nonaccredited program—application process
 69.4(231C) Nonaccredited program—application content
 69.5(231C) Initial certification process for a nonaccredited program
 69.6(231C) Expiration of the certification of a nonaccredited program
 69.7(231C) Recertification process for a nonaccredited program
 69.8(231C) Notification of recertification for a nonaccredited program
 69.9(231C) Certification or recertification of an accredited program—application process
 69.10(231C) Certification or recertification of an accredited program—application content
 69.11(231C) Initial certification process for an accredited program
 69.12(231C) Recertification process for an accredited program
 69.13(231C) Listing of all certified programs
 69.14(231C) Recognized accrediting entity

CHAPTER 57
RESIDENTIAL CARE FACILITIES
[Prior to 7/15/87, Health Department[470] Ch 57]

481—57.1(135C) Definitions. The following definitions apply to this chapter and to 481—Chapter 62. The definitions set out in Iowa Code section 135C.1 shall be considered to be incorporated verbatim in these rules.

“*Accommodation*” means the provision of lodging, including sleeping, dining, and living areas.

“*Activities of daily living*” means the following self-care tasks: bathing, dressing, grooming, eating, transferring, toileting and ambulation.

“*Administrator*” means a person approved by the department who administers, manages, supervises, and is in general administrative charge of a residential care facility, whether or not such person has an ownership interest in the facility, and whether or not the functions and duties are shared with one or more other persons.

“*Ambulatory*” means the condition of a person who immediately and without the aid of another person is physically and mentally capable of traveling a normal path to safety, including the ascent and descent of stairs.

“*Basement*” means that part of a building where the finish floor is more than 30 inches below the finish grade of the building.

“*Board*” means the regular provision of meals.

“*Change of ownership*” means the purchase, transfer, assignment, or lease of a licensed residential care facility.

“*Communicable disease*” means a disease caused by the presence within a person’s body of a virus or microbial agent which may be transmitted either directly or indirectly to other persons.

“*Department*” means the department of inspections and appeals.

“*Distinct part*” means a clearly identifiable area or section containing contiguous rooms within a health care facility.

“*Interdisciplinary team*” means the group of persons who develop a single, integrated, individual program plan to meet a resident’s needs for services. The interdisciplinary team consists of, at a minimum, the resident, the resident’s legal guardian if applicable, the resident’s advocate if desired by the resident, a referral agency representative, other appropriate staff members, other providers of services, and other persons relevant to the resident’s needs.

“*Legal representative*” means the resident’s guardian or conservator if one has been appointed or the resident’s power of attorney.

“*Mechanical restraint*” means restriction by the use of a mechanical device of a resident’s mobility or ability to use the hands, arms or legs.

“*Medication*” means any drug, including over-the-counter substances, ordered and administered under the direction of the primary care provider.

“*Nonambulatory*” means the condition of a person who immediately and without the aid of another person is not physically or mentally capable of traveling a normal path to safety, including the ascent and descent of stairs.

“*Personal care*” means assistance with the activities of daily living which the recipient can perform only with difficulty. Examples are help in getting in and out of bed, assistance with personal hygiene and bathing, help with dressing and eating, and supervision over medications which can be self-administered.

“*Physical restraint*” means direct physical contact on the part of a staff person to control a resident’s physical activity for the resident’s own protection or for the protection of others.

“*Primary care provider*” means any of the following who provide primary care and meet licensure standards:

1. A physician who is a family or general practitioner or an internist.
2. An advanced registered nurse practitioner.
3. A physician assistant.

“*Program of care*” means all services being provided for a resident in a health care facility.

“*Prone restraint*” means a restraint in which a resident is in a face-down position against the floor or another surface.

“*Rate*” means the daily fee that is charged for all residents equally and that includes the cost of all minimum services required in these rules and regulations.

“*Records*” includes electronic records.

“*Responsible party*” means the person who signs or cosigns the residency agreement required in rule 481—57.15(135C) or the resident’s legal representative. In the event that a resident has neither a legal representative nor a person who signed or cosigned the resident’s residency agreement, the term “responsible party” shall include the resident’s sponsoring agency, e.g., the department of human services, the U.S. Department of Veterans Affairs, a religious group, fraternal organization, or foundation that assumes responsibility and advocates for its client patients and pays for their health care.

“*Restraints*” means the measures taken to control a resident’s physical activity for the resident’s own protection or for the protection of others.

[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 3737C, IAB 4/11/18, effective 5/16/18; ARC 3738C, IAB 4/11/18, effective 5/16/18]

481—57.2(135C,17A) Waiver or variance. A waiver or variance from these rules may be granted by the director of the department in accordance with 481—Chapter 6. A request for waiver or variance will be granted or denied by the director within 120 calendar days of receipt.

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.3(135C) Application for licensure.

57.3(1) Application and licensing—new facility or change of ownership. In order to obtain an initial residential care facility license for a facility not currently licensed as a residential care facility or for a residential care facility when a change of ownership is contemplated, the applicant must:

- a. Make application at least 30 days prior to the proposed opening date of the facility. Application shall be made on forms provided by the department.
- b. Meet all of the rules, regulations, and standards contained in 481—Chapters 50, 57 and 60. Exceptions noted in 481—subrule 60.3(2) shall not apply.
- c. Submit a letter of intent and a written résumé of care. The résumé of care shall meet the requirements of subrule 57.3(2).
- d. Submit a floor plan of each floor of the residential care facility. The floor plan of each floor shall be drawn on 8½" × 11" paper, show room areas in proportion, room dimensions, window and door locations, designation of the use of each room, and the room numbers for all rooms, including bathrooms.
- e. Submit a photograph of the front and side of the residential care facility.
- f. Submit the statutory fee for a residential care facility license.
- g. Comply with all other local statutes and ordinances in existence at the time of licensure.
- h. Submit a certificate signed by the state or local fire inspection authority as to compliance with fire safety rules and regulations.

57.3(2) Résumé of care. The résumé of care shall describe the following:

- a. Purpose of the facility;
- b. Criteria for admission to the facility;
- c. Ownership of the facility;
- d. Composition and responsibilities of the governing board;
- e. Qualifications and responsibilities of the administrator;
- f. Medical services provided to residents, to include the availability of emergency medical services in the area and the designation of a primary care provider to be responsible for residents in an emergency;
- g. Dental services provided to residents and available in the area;
- h. Nursing services provided to residents, if applicable;
- i. Personal services provided to residents, including supervision of or assistance with activities of daily living;
- j. Activity program;

- k.* Dietary services, including qualifications of the person in charge, consultation service (if applicable) and meal service;
- l.* Other services available as applicable, including social services, physical therapy, occupational therapy, and recreational therapy;
- m.* Housekeeping;
- n.* Laundry;
- o.* Physical plant; and
- p.* Staffing provided to meet residents' needs.

57.3(3) *Renewal application.* In order to obtain a renewal of the residential care facility license, the applicant must submit the following:

- a.* The completed application form 30 days prior to the annual license renewal date of the residential care facility license;
- b.* The statutory license fee for a residential care facility;
- c.* An approved current certificate signed by the state or local fire inspection authority as to compliance with fire safety rules and regulations;
- d.* Changes to the résumé of care, if any; and
- e.* Changes to the current residency agreement, if any.

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.4(135C) Issuance of license. Licenses are issued to the person, entity or governmental unit with responsibility for the operation of the facility and for compliance with all applicable statutes, rules and regulations.

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.5(135C) Licenses for distinct parts.

57.5(1) Separate licenses may be issued for distinct parts of a health care facility which are clearly identifiable, contain contiguous rooms, and provide separate categories of care and services.

57.5(2) The following requirements shall be met for separate licensing of a distinct part:

- a.* The distinct part shall serve only residents who require the category of care and services immediately available to them within that part. (III)
- b.* The distinct part shall meet all the standards, rules, and regulations pertaining to the category for which a license is being sought.
- c.* The distinct part must be operationally and financially feasible.
- d.* Personal care staff with qualifications appropriate to the care and services being rendered must be regularly assigned and working in the distinct part under responsible management. (III)
- e.* Separately licensed distinct parts may have certain services such as management, building maintenance, laundry and dietary in common with each other.

This rule is intended to implement Iowa Code sections 135C.6(2) and 135C.14.

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.6(135C) Special classifications.

57.6(1) *Memory care.*

a. Designation and application. A residential care facility may choose to care for residents who require memory care in a distinct part of the facility or designate the entire residential care facility as one that provides memory care. Residents in the memory care unit or facility shall meet the level of care requirements for a residential care facility. "Memory care" in a residential care facility means the care of persons with early Alzheimer's-type dementia or other disorders causing dementia. (I, II, III)

(1) Application for approval to provide this category of care shall be submitted by the licensee on a form provided by the department. (III)

(2) Plans to modify the physical environment shall be submitted to the department for review based on the requirements of 481—Chapter 60. (III)

(3) If the unit or facility is to be a locked unit or facility, all locking devices shall meet the Life Safety Code and any requirements of the state fire marshal. If the unit or facility is to be unlocked, a system of security monitoring is required. (I, II, III)

b. Résumé of care. A résumé of care shall be submitted to the department for approval at least 30 days before a separate memory care unit or facility is opened. For facilities with a memory care unit, this résumé of care is in addition to the résumé of care required by subrule 57.3(2). A new résumé of care shall be submitted when services are substantially changed. The résumé of care shall:

- (1) Describe the population to be served;
- (2) State the philosophy and objectives;
- (3) List criteria for transfer to and from the memory care unit or facility;
- (4) Include a copy of the floor plan;
- (5) List the titles of policies and procedures developed for the unit or facility;
- (6) Propose a staffing pattern;
- (7) Set out a plan for specialized staff training;
- (8) State visitor, volunteer, and safety policies;
- (9) Describe programs for activities, social services and families; and
- (10) Describe the interdisciplinary team and the role of each team member.

c. Policies and procedures. Separate written policies and procedures shall be implemented in the memory care unit or facility and shall address the following:

(1) Criteria for admission and the preadmission evaluation process. The policy shall require a statement from the primary care provider approving the placement before a resident may be moved into a memory care unit or facility. (II, III)

(2) Safety, including a description of the actions required of staff in the event of a fire, natural disaster, emergency medical event or catastrophic event. Safety procedures shall also explain steps to be taken when a resident is discovered to be missing from the unit or facility and when hazardous cleaning materials or potentially dangerous mechanical equipment is being used in the unit or facility and explain the manner in which the effectiveness of the security system will be monitored. (II, III)

(3) Staffing requirements, including the minimum number, types and qualifications of staff in the unit or facility in accordance with resident needs. (II, III)

(4) Visitation policies, including suggested times for visitation and ensuring the residents' rights to free access to visitors unless visits are contraindicated by the interdisciplinary team. (II, III)

(5) The process and criteria which will be used to monitor and to respond to risks specific to the residents, including but not limited to drug use, restraint use, infections, incidents and acute behavioral events. (II, III)

d. Assessment prior to transfer or admission. Prior to the transfer or admission of a resident applicant to the memory care unit or facility, a complete assessment of the resident applicant's physical, mental, social and behavioral status shall be completed to determine whether the applicant meets admission criteria. This assessment shall be completed by facility staff and shall become part of the resident's permanent record upon admission. (II, III)

e. Staff training. All staff working in a memory care unit or facility shall have training appropriate to the needs of the residents. (I, II, III)

(1) Upon assignment to the unit or facility, all staff working in the unit or facility shall be oriented to the needs of residents requiring memory care. Staff members shall have at least six hours of special training appropriate to their job descriptions within 30 days of assignment to the unit or facility. (I, II, III)

(2) Training shall include the following topics: (II, III)

1. An explanation of Alzheimer's disease and related disorders, including symptoms, behavior and disease progression;
2. Skills for communicating with persons with dementia;
3. Skills for communicating with family and friends of persons with dementia;
4. An explanation of family issues such as role reversal, grief and loss, guilt, relinquishing the caregiving role, and family dynamics;

5. The importance of planned and spontaneous activities;
6. Skills in providing assistance with activities of daily living;
7. Skills in working with challenging residents;
8. Techniques for cueing, simplifying, and redirecting;
9. Staff support and stress reduction;
10. Medication management and nonpharmacological interventions.

(3) Nursing staff, certified medication aides, medication managers, social services personnel, housekeeping and activity personnel shall have a minimum of six hours of in-service training annually. This training shall be related to the needs of memory care residents. The six-hour initial training required in subparagraph 57.6(1) “e”(1) shall count toward the required annual in-service training. (II, III)

f. Staffing. There shall be at least one staff person on a memory care unit at all times. (I, II, III)

g. Others living in the memory care unit. A resident not requiring memory care services may live in the memory care unit if the resident’s spouse requiring memory care services lives in the unit or if no other beds are available in the facility and the resident or the resident’s legal representative consents in writing to the placement. (II, III)

h. Revocation, suspension or denial. The memory care unit license or facility license may be revoked, suspended or denied pursuant to Iowa Code chapter 135C and 481—Chapter 50.

57.6(2) Residential care facility for persons with an intellectual disability (RCF/ID).

a. Definition. For purposes of this rule, the following term shall have the meaning indicated.

“*Qualified intellectual disability professional*” means a psychologist, physician, registered nurse, educator, social worker, physical or occupational therapist, speech therapist or audiologist who meets the educational requirements for the profession, as required in the state of Iowa, and has one year’s experience working with persons with an intellectual disability.

b. Designation and application. A residential care facility may choose to care for persons with an intellectual disability in a distinct part of the facility or designate the entire residential care facility as a residential care facility for persons with an intellectual disability. Residents shall meet the level of care requirements for a residential care facility. (I, II, III)

(1) Application for approval to provide this category of care shall be submitted by the licensee on a form provided by the department. (III)

(2) Plans to modify the physical environment shall be submitted to the department for review based on the requirements of 481—Chapter 60. (III)

c. Résumé of care. A résumé of care shall be submitted to the department for approval at least 30 days before a residential care facility for persons with an intellectual disability is opened. A new résumé of care shall be submitted when services are substantially changed. The résumé of care shall:

- (1) Describe the population to be served;
- (2) Include a copy of the floor plan;
- (3) List the titles of policies and procedures developed for the unit or facility;
- (4) Set out a plan for specialized staff training;
- (5) State visitor, volunteer, and safety policies;
- (6) Describe programs for activities, social services and families; and
- (7) Describe the interdisciplinary team and the role of each team member.

d. Policies and procedures. Separate written policies and procedures shall be implemented in the residential care facility for persons with an intellectual disability and shall address the following:

(1) Criteria for admission and the preadmission evaluation process. The policy shall require a statement from the primary care provider approving the placement before a resident may be moved into a residential care facility for persons with an intellectual disability. The policy shall require a primary diagnosis of an intellectual disability for admission. (II, III)

(2) Safety, including a description of the actions required of staff in the event of a fire, natural disaster, emergency medical event or catastrophic event. (II, III)

(3) Staffing requirements, including the minimum number, types and qualifications of staff in the facility in accordance with resident needs. (II, III)

(4) Visitation policies, including suggested times for visitation and ensuring the residents' rights to free access to visitors unless visits are contraindicated by the interdisciplinary team. (II, III)

(5) The process and criteria which will be used to monitor and to respond to risks specific to the residents, including but not limited to drug use, restraint use, infections, incidents and acute behavioral events. (II, III)

e. Assessment prior to transfer or admission. Prior to the transfer or admission of a resident applicant to the facility, a complete assessment of the resident applicant's physical, mental, social and behavioral status shall be completed to determine whether the applicant meets admission criteria. This assessment shall be completed by facility staff and shall become part of the resident's permanent record upon admission. (II, III)

f. Administrator qualifications. In addition to meeting the requirements of subrule 57.10(1), the administrator of a residential care facility for persons with an intellectual disability shall have at least one year's documented experience in direct care or supervision of persons with an intellectual disability. An individual employed as an administrator on May 16, 2018, will be deemed to meet the requirements of this subrule.

g. In-service educational programming. The in-service educational programming required by paragraph 57.10(2)"c" shall include educational programming specific to serving persons with an intellectual disability.

h. Revocation, suspension or denial. The facility license may be revoked, suspended or denied pursuant to Iowa Code chapter 135C and 481—Chapter 50.

This rule is intended to implement Iowa Code sections 135C.2(3)"b" and 135C.14.
[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 3737C, IAB 4/11/18, effective 5/16/18]

481—57.7(135C) General requirements.

57.7(1) The license shall be displayed in the facility in a conspicuous place which is accessible to the public. (III)

57.7(2) The license shall be valid only in the possession of the licensee to whom it is issued.

57.7(3) The posted license shall accurately reflect the current status of the residential care facility. (III)

57.7(4) The license shall expire one year after the date of issuance or as indicated on the license.

57.7(5) The licensee shall:

a. Assume the responsibility for the overall operation of the residential care facility. (I, II, III)

b. Be responsible for compliance with all applicable laws and with the rules of the department. (I, II, III)

c. Provide an organized continuous 24-hour program of care commensurate with the needs of the residents. (I, II, III)

57.7(6) Each citation or a copy of each citation issued by the department for a class I or class II violation shall be prominently posted by the facility in plain view of the residents, visitors, and persons inquiring about placement in the facility. The citation or copy of the citation shall remain posted until the violation is corrected to the satisfaction of the department. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.8(135C) Certified volunteer long-term care ombudsman program. A certified volunteer long-term care ombudsman appointed in accordance with Iowa Code section 231.45 shall operate within the scope of the rules for volunteer ombudsmen promulgated by the office of the long-term care ombudsman and the Iowa department on aging.

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.9(135C) Required notifications to the department. The department shall be notified:

57.9(1) Thirty days before any proposed change in the residential care facility's functional operation or addition or deletion of required services; (III)

57.9(2) Thirty days before the beginning of the renovation, addition, functional alteration, change of space utilization, or conversion in the residential care facility or on the premises; (III)

57.9(3) Thirty days before closure of the residential care facility; (III)

57.9(4) Within two weeks of any change in administrator; (III)

57.9(5) Ninety days before a change in the category of license; (III)

57.9(6) Thirty days before a change of ownership, the licensee shall:

a. Inform the department of the pending change of ownership; (III)

b. Inform the department of the name and address of the prospective purchaser, transferee, assignee, or lessee; (III)

c. Submit a written authorization to the department permitting the department to release all information of whatever kind from the department's files concerning the licensee's residential care facility to the named prospective purchaser, transferee, assignee, or lessee. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.10(135C) Administrator. Each residential care facility shall have one person in charge, duly approved by the department or acting in a provisional capacity in accordance with these rules. (III)

57.10(1) Qualifications of an administrator.

a. The administrator shall be at least 21 years of age and shall have a high school diploma or equivalent. (III) In addition, this person shall meet at least one of the following conditions:

(1) Have a two-year degree in human services, psychology, sociology, nursing, health care administration, public administration, or a related field and have a minimum of two years' experience in the field; or (III)

(2) Have a four-year degree in human services, psychology, sociology, nursing, health care administration, public administration, or a related field and have a minimum of one year experience in the field; or (III)

(3) Have a master's degree in human services, psychology, sociology, nursing, health care administration, public administration, or a related field and have a minimum of one year experience in the field; or (III)

(4) Be a licensed nursing home administrator; or (III)

(5) Have completed a one-year educational training program approved by the department for residential care facility administrators; or (III)

(6) Have passed the National Association of Long Term Care Administrator Boards (NAB) RC/AL administrator licensure examination; or

(7) Have two years of direct care experience and at least six months of administrative experience in a residential care facility. (III)

b. An individual employed as an administrator on January 14, 2015, will be deemed to meet the requirements of this subrule.

57.10(2) Duties of an administrator. The administrator shall:

a. Select and direct competent personnel who provide services for the residential care program. (III)

b. Arrange for the heads of nursing, social services, dietary and activities to attend a minimum of ten contact hours of educational programs per year to increase skills and knowledge needed for their positions. The ten hours is in addition to the in-service requirements in paragraph 57.10(2) "c." (III)

c. Provide in-service educational programming for all employees with direct resident contact and maintain records of programs and participants. (III) In-service educational programming offered during each calendar year shall include, at minimum, the following topics: (I, II, III)

(1) Infection control.

(2) Emergency preparedness (fire, tornado, flood, 911, etc.).

(3) Meal time procedures/dietary.

(4) Resident activities.

(5) Mental illness/behavior modification/crisis intervention.

(6) Resident safety/supervision.

(7) Resident rights.

(8) Medication education, to include administration, storage and drug interactions.

(9) Resident service plans/programming/goals.

57.10(3) Administrator serving at more than one residential care facility. The administrator may be responsible for no more than 150 beds in total if the administrator is an administrator of more than one facility. (II)

a. An administrator of more than one facility shall designate in writing an administrative staff person in each facility who shall be responsible for directing programs in the facility.

b. The administrative staff person designated by the administrator shall:

(1) Have at least one year of experience in a supervisory or direct care position in a residential care facility or in a facility for the intellectually disabled, mentally ill or developmentally disabled; (II, III)

(2) Be knowledgeable of the operation of the facility; (II, III)

(3) Have access to records concerned with the operation of the facility; (II, III)

(4) Be capable of carrying out administrative duties and of assuming administrative responsibilities; (II, III)

(5) Be at least 21 years of age; (III)

(6) Be empowered to act on behalf of the licensee concerning the health, safety and welfare of the residents; and (II, III)

(7) Have training in emergency response, including how to respond to residents' sudden illnesses. (II, III)

c. If an administrator serves more than one facility, the administrator must designate in writing regular and specific times during which the administrator will be available to consult with staff and residents to provide direction and supervision of resident care and services. (II, III)

57.10(4) Provisional administrator. A provisional administrator may be appointed on a temporary basis by the residential care facility licensee to assume the administrative responsibilities for a residential care facility for a period not to exceed one year when the facility has lost its administrator and has not been able to replace the administrator, provided that the department has been notified and approved the provisional administrator prior to the date of the provisional administrator's appointment. (III) The provisional administrator must meet the requirements of paragraph 57.10(3) "b."

57.10(5) Temporary absence of administrator.

a. In the temporary absence of the administrator, a responsible person shall be designated in writing to the department to be in charge of the facility. (III) The person designated shall:

(1) Be knowledgeable of the operation of the facility; (III)

(2) Have access to records concerned with the operation of the facility; (III)

(3) Be capable of carrying out administrative duties and of assuming administrative responsibilities; (III)

(4) Be at least 21 years of age; (III)

(5) Be empowered to act on behalf of the licensee during the administrator's absence concerning the health, safety, and welfare of the residents; (III)

(6) Have training in emergency response, including how to respond to residents' sudden illnesses. (II, III)

b. If the administrator is absent for more than six weeks, a provisional administrator must be appointed pursuant to subrule 57.10(4).

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.11(135C) Personnel.

57.11(1) Alcohol and drug use prohibited. No person under the influence of intoxicating drugs or alcoholic beverages shall be permitted to provide services in a residential care facility. (I, II)

57.11(2) Job description. There shall be a written job description developed for each category of worker. The job description shall include the job title, responsibilities and qualifications. (III)

57.11(3) Employee criminal record checks, child abuse checks and dependent adult abuse checks and employment of individuals who have committed a crime or have a founded abuse. The facility shall comply with the requirements found in Iowa Code section 135C.33 as amended by 2014 Iowa Acts, chapter 1040, and rule 481—50.9(135C) related to completion of criminal record checks, child abuse

checks, and dependent adult abuse checks and to employment of individuals who have committed a crime or have a founded abuse. (I, II, III)

57.11(4) *Personnel record.* A personnel record shall be kept for each employee and shall include but not be limited to the following information about the employee: name and address, social security number, date of birth, date of employment, position, experience and education, references, results of criminal record checks, child abuse checks and dependent adult abuse checks, and date of discharge or resignation. (III)

57.11(5) *Supervision and staffing.*

- a. The facility shall provide sufficient staff to meet the needs of the residents served. (I, II, III)
- b. Personnel in a residential care facility shall provide 24-hour coverage for residential care services. Personnel shall be awake at all times while on duty. (I, II, III)
- c. Direct care staff shall be present in the facility unless all residents are involved in activities away from the facility. (I, II, III)
- d. Staff shall be aware of and provide supervision levels based on the present needs of the residents in the staff's care. The facility shall document the supervision of residents who require more than general supervision, as defined by facility policy. (I, II, III)

e. The facility shall maintain an accurate record of actual hours worked by employees. (III)

57.11(6) *Physical examination and screening.* Employees shall have a physical examination no longer than 12 months prior to beginning employment and every four years thereafter. Screening and testing for tuberculosis shall be conducted pursuant to 481—Chapter 59. (I, II, III)

57.11(7) *Orders for medications and treatments.* Orders for medications and treatments shall be correctly implemented by qualified personnel. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 2273C, IAB 12/9/15, effective 1/13/16]

481—57.12(135C) *General policies.* The licensee shall establish and implement written policies and procedures as set forth in this rule. The policies and procedures shall be available for review by the department, other agencies designated by Iowa Code section 135C.16(3), staff, residents, residents' families or legal representatives, and the public and shall be reviewed by the licensee annually. (II)

57.12(1) *Facility operation.* The licensee shall establish written policies for the operation of the facility, including, but not limited to the following: (III)

- a. Personnel; (III)
- b. Admission; (III)
- c. Evaluation services; (II, III)
- d. Programming and individual program plans; (II, III)
- e. Registered sex offender management; (II, III)
- f. Crisis intervention; (II, III)
- g. Discharge or transfer; (III)
- h. Medication management, including self-administration of medications and chemical restraints; (III)
- i. Resident property; (II, III)
- j. Resident finances; (II, III)
- k. Records; (III)
- l. Health and safety; (II, III)
- m. Nutrition; (III)
- n. Physical facilities and maintenance; (III)
- o. Resident rights; (II, III)
- p. Investigation and reporting of alleged dependent adult abuse; (II, III)
- q. Investigation and reporting of accidents or incidents; (II, III)
- r. Transportation of residents; (II, III)
- s. Resident supervision; (II, III)
- t. Smoking; (III)
- u. Visitors; (III)

- v. Disaster/emergency planning; (III) and
- w. Infection control. (III)

57.12(2) *Personnel policies.* Written personnel policies shall include the hours of work and attendance at educational programs. (III)

57.12(3) *Infection control.* The facility shall have a written and implemented infection control program, which shall include policies and procedures based on guidelines issued by the Centers for Disease Control and Prevention, U.S. Department of Health and Human Services. The infection control program shall address the following:

- a. Techniques for hand washing; (I, II, III)
- b. Techniques for handling of blood, body fluids, and body wastes; (I, II, III)
- c. Dressings, soaks or packs; (I, II, III)
- d. Infection identification; (I, II, III)
- e. Resident care procedures to be used when there is an infection present; (I, II, III)
- f. Sanitation techniques for resident care equipment; (I, II, III)
- g. Techniques for sanitary use and reuse of feeding syringes and single-resident use and reuse of urine collection bags; (I, II, III) and
- h. Techniques for use and disposal of needles, syringes, and other sharp instruments. (I, II, III)

57.12(4) *Resident care techniques.* The facility shall have written and implemented procedures to be followed if a resident needs any of the following treatment or devices:

- a. Intravenous or central line catheter; (I, II, III)
- b. Urinary catheter; (I, II, III)
- c. Respiratory suction, oxygen or humidification; (I, II, III)
- d. Decubitus care; (I, II, III)
- e. Tracheostomy; (I, II, III)
- f. Nasogastric or gastrostomy tubes; (I, II, III)
- g. Sanitary use and reuse of feeding syringes and single-resident use and reuse of urine collection bags. (I, II, III)

57.12(5) *Emergency care.* The facility shall establish written policies for the provision of emergency medical care to residents and employees in case of sudden illness or accident. The policies shall include a list of those individuals to be contacted in case of an emergency. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.13(135C) Admission, transfer and discharge.

57.13(1) *General admission policies.*

- a. Residents shall be admitted to a residential care facility only on a written order signed by a primary care provider, specifying the level of care, and certifying that the individual being admitted requires no more than personal care and supervision and does not require routine nursing care. (II, III)
- b. No residential care facility shall admit or retain a resident who is in need of greater services than the facility can provide. (I, II, III)
- c. No residential care facility shall admit more residents than the number of beds for which the facility is licensed. (II, III)
- d. A residential care facility is not required to admit an individual through court order, referral or other means without the express prior approval of the administrator. (III)
- e. The admission of a resident shall not grant the residential care facility the authority or responsibility to manage the personal affairs of the resident except as may be necessary for the safety of the resident and the safe and orderly management of the residential care facility as required by these rules. (III)
- f. Individuals under the age of 18 shall not be admitted to a residential care facility without prior written approval by the department. A distinct part of a residential care facility, segregated from the adult section, may be established based on a résumé of care that is submitted by the licensee or applicant and is commensurate with the needs of the residents of the residential care facility and that has received the department's review and approval. (III)

g. No health care facility and no owner, administrator, employee or representative thereof shall act as guardian, trustee, or conservator for any resident's property unless such resident is related within the third degree of consanguinity to the person acting as guardian. (III)

57.13(2) Discharge or transfer.

a. Notification shall be made to the legal representative, primary care provider, and sponsoring agency, if any, prior to the transfer or discharge of any resident. (III)

b. The licensee shall not refuse to discharge or transfer a resident when the primary care provider, family, resident, or legal representative requests such transfer or discharge. (II, III)

c. Advance notification will be made to the receiving facility prior to the transfer of any resident. (III)

d. When a resident is transferred or discharged, the appropriate record will accompany the resident to ensure continuity of care. "Appropriate record" includes the resident's face sheet, service plan, most recent orders of the primary care provider and any notifications of upcoming scheduled appointments. (II, III)

e. When a resident is transferred or discharged, the resident's unused prescriptions shall be sent with the resident or with a legal representative only upon the written order of a primary care provider. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.14(135C) Involuntary discharge or transfer.

57.14(1) Involuntary discharge or transfer permitted. A facility may involuntarily discharge or transfer a resident for only one of the following reasons:

- a. Medical reasons;
- b. The resident's welfare or that of other residents;
- c. Repeated refusal by the resident to participate in the resident's service plan;
- d. Due to action pursuant to Iowa Code chapter 229; or
- e. Nonpayment for the resident's stay, as described in the residency agreement for the resident's stay.

57.14(2) Medical reasons. Medical reasons for transfer or discharge shall be based on the resident's needs and shall be determined and documented in the resident's record by the primary care provider. Transfer or discharge may be required in order to provide a different level of care to the resident. (II)

57.14(3) Welfare of a resident. Welfare of a resident or that of other residents refers to a resident's social, emotional, or physical well-being. A resident may be transferred or discharged because the resident's behavior poses a continuing threat to the resident (e.g., suicidal) or to the well-being of other residents or staff (e.g., the resident's behavior is incompatible with other residents' needs and rights). Written documentation that the resident's continued presence in the facility would adversely affect the resident's own welfare or that of other residents shall be made by the administrator or designee and shall include specific information to support this determination. (II)

57.14(4) Notice. Involuntary transfer or discharge of a resident from a facility shall be preceded by a written notice to the resident and the responsible party. (II, III)

a. The notice shall contain all of the following information:

- (1) The stated reason for the proposed transfer or discharge. (II)
- (2) The effective date of the proposed transfer or discharge. (II)
- (3) A statement, in not less than 12-point type, that reads as follows:

You have a right to appeal the facility's decision to transfer or discharge you. If you think you should not have to leave this facility, you may request a hearing, in writing or verbally, with the Iowa department of inspections and appeals (hereinafter referred to as "department") within seven days after receiving this notice. You have a right to be represented at the hearing by an attorney or any other individual of your choice. If you request a hearing, it will be held no later than 14 days after receipt of your request by the department and you will not be transferred prior to a final decision. In emergency circumstances, extension of the 14-day requirement may be permitted upon request to the department's designee. If you lose the hearing, you will not be transferred before the expiration of (1) 30 days following receipt of the original notice of the discharge or transfer, or (2) 5 days following final decision of such hearing, including exhaustion of all appeals, whichever occurs later. To request a hearing or receive further information, call the department at (515)281-4115, or write to the department to the attention of: Administrator, Division of Health Facilities, Department of Inspections and Appeals, Lucas State Office Building, Des Moines, Iowa 50319-0083. (II)

b. The notice shall be personally delivered to the resident and a copy placed in the resident's record. A copy shall also be transmitted to the department; the resident's responsible party; the resident's primary care provider; the person or agency responsible for the resident's placement, maintenance, and care in the facility; and the department on aging's long-term care ombudsman. The notice shall indicate that a copy has been transmitted to the required parties by using the abbreviation "cc:" and listing the names of all parties to whom copies were sent. (II)

c. The notice required by paragraph 57.14(4) "a" shall be provided at least 30 days in advance of the proposed transfer or discharge unless one of the following occurs: (II)

(1) An emergency transfer or discharge is mandated by the resident's health care needs and is in accordance with the written orders and medical justification of the primary care provider. Emergency transfers or discharges may also be mandated in order to protect the health, safety, or well-being of other residents and staff from the resident being transferred. (II)

(2) The transfer or discharge is subsequently agreed to by the resident or the resident's responsible party, and notification is given to the responsible party, the resident's primary care provider, and the person or agency responsible for the resident's placement, maintenance, and care in the facility.

d. A hearing requested pursuant to this subrule shall be held in accordance with subrule 57.14(6). **57.14(5) *Emergency transfer or discharge.*** In the case of an emergency transfer or discharge, the resident must be given a written notice prior to or within 48 hours following transfer or discharge. (II, III)

a. A copy of this notice must be placed in the resident's file. The notice must contain all of the following information:

- (1) The stated reason for the transfer or discharge. (II)
- (2) The effective date of the transfer or discharge. (II)
- (3) A statement, in not less than 12-point type, that reads:

You have a right to appeal the facility's decision to transfer or discharge you on an emergency basis. If you think you should not have to leave this facility, you may request a hearing, in writing or verbally, with the Iowa department of inspections and appeals within 7 days after receiving this notice. You have the right to be represented at the hearing by an attorney or any other individual of your choice. If you request a hearing, it will be held no later than 14 days after receipt of your request by the department. You may be transferred or discharged before the hearing is held or before a final decision is rendered. If you win the hearing, you have the right to be transferred back into the facility. To request a hearing or receive further information, call the department at (515)281-4115, or write to the department to the attention of: Administrator, Division of Health Facilities, Department of Inspections and Appeals, Lucas State Office Building, Des Moines, Iowa 50319-0083. (II)

b. The notice shall be personally delivered to the resident and a copy placed in the resident's record. A copy shall also be transmitted to the department; the resident's responsible party; the resident's primary care provider; the person or agency responsible for the resident's placement, maintenance, and care in the facility; and the department on aging's long-term care ombudsman. The notice shall indicate that a copy has been transmitted to the required parties by using the abbreviation "cc:" and listing the names of all parties to whom copies were sent. (II)

c. A hearing requested pursuant to this subrule shall be held in accordance with subrule 57.14(6).
57.14(6) Hearing.

a. Request for hearing.

(1) The resident must request a hearing within 7 days of receiving the written notice.

(2) The request must be made to the department, either in writing or verbally.

b. The hearing shall be held no later than 14 days after receipt of the request by the department unless the resident requests an extension due to emergency circumstances.

c. Except in the case of an emergency discharge or transfer, a request for a hearing shall stay a transfer or discharge pending a final decision, including the exhaustion of all appeals. (II)

d. The hearing shall be heard by a department of inspections and appeals administrative law judge pursuant to Iowa Code chapter 17A and 481—Chapter 9. The hearing shall be public unless the resident or the resident's legal representative requests in writing that the hearing be closed. In a determination as to whether a transfer or discharge is authorized, the burden of proof by a preponderance of evidence rests on the party requesting the transfer or discharge.

e. Notice of the date, time, and place of the hearing shall be sent by certified mail or delivered in person to the facility, the resident, the responsible party, and the office of the long-term care ombudsman not later than 5 full business days after receipt of the request. The notice shall also inform the facility and the resident or the responsible party that they have a right to appear at the hearing in person or be represented by an attorney or other individual. The appeal shall be dismissed if neither party is present or represented at the hearing. If only one party appears or is represented, the hearing shall proceed with one party present. A representative of the office of the long-term care ombudsman shall have the right to appear at the hearing.

f. The administrative law judge's written decision shall be mailed by certified mail to the licensee, resident, responsible party, and the office of the long-term care ombudsman within 10 working days after the hearing has been concluded.

57.14(7) Nonpayment. If nonpayment is the basis for involuntary transfer or discharge, the resident shall have the right to make full payment up to the date that the discharge or transfer is to be made and then shall have the right to remain in the facility. (II)

57.14(8) Discussion of involuntary transfer or discharge. Within 48 hours after notice of involuntary transfer or discharge has been received by the resident, the facility shall discuss the involuntary transfer or discharge with the resident, the resident's responsible party, and the person or agency responsible for the resident's placement, maintenance, and care in the facility. (II)

a. The facility administrator or other appropriate facility representative serving as the administrator's designee shall provide an explanation and discussion of the reasons for the resident's involuntary transfer or discharge. (II)

b. The content of the explanation and discussion shall be summarized in writing, shall include the names of the individuals involved in the discussion, and shall be made part of the resident's record. (II)

c. The provisions of this subrule do not apply if the involuntary transfer or discharge has already occurred pursuant to subrule 57.14(5) and emergency notice is provided within 48 hours.

57.14(9) Transfer or discharge planning.

a. The facility shall develop a plan to provide for the orderly and safe transfer or discharge of each resident to be transferred or discharged. (II)

b. To minimize the possible adverse effects of the involuntary transfer, the resident shall receive counseling services by the sending facility before the involuntary transfer and by the receiving facility after the involuntary transfer. Counseling shall be documented in the resident's record. (II)

c. The counseling requirement in paragraph 57.14(9)“b” does not apply if the discharge has already occurred pursuant to subrule 57.14(5) and emergency notice is provided within 48 hours.

d. Counseling, if required, shall be provided by a licensed mental health professional as defined in Iowa Code section 228.1(6).

e. The receiving health care facility of a resident involuntarily transferred shall immediately formulate and implement a plan of care which takes into account possible adverse effects the transfer may cause. (II)

57.14(10) Transfer upon revocation of license or voluntary closure. Residents shall not have the right to a hearing to contest an involuntary discharge or transfer resulting from the revocation of the facility’s license by the department of inspections and appeals. In the case of the voluntary closure of a facility, a period of 30 days must be allowed for an orderly transfer of residents to other facilities.

57.14(11) Intrafacility transfer.

a. Residents shall not be arbitrarily relocated from room to room within a licensed health care facility. (I, II) Involuntary relocation may occur only in the following situations, which shall be documented in the resident’s record: (II)

(1) Incompatibility with or disturbing to other roommates.

(2) For the welfare of the resident or other residents of the facility.

(3) To allow a new admission to the facility that would otherwise not be possible due to separation of roommates by sex.

(4) In the case of a resident whose source of payment was previously private, but who now is eligible for Title XIX (Medicaid) assistance, the resident may be transferred from a private room to a semiprivate room or from one semiprivate room to another.

(5) Reasonable and necessary administrative decisions regarding the use and functioning of the building.

b. Unreasonable and unjustified reasons for changing a resident’s room without the concurrence of the resident or responsible party include:

(1) Change from private pay status to Title XIX, except as outlined in subparagraph 57.14(11)“a”(4). (II)

(2) As punishment or behavior modification, except as specified in subparagraph 57.14(11)“a”(1). (II)

(3) Discrimination on the basis of race or religion. (II)

c. If intrafacility relocation is necessary for reasons outlined in paragraph 57.14(11)“a,” the resident shall be notified at least 48 hours prior to the transfer and the reason therefor shall be explained. The responsible party shall be notified as soon as possible. The notification shall be documented in the resident’s record and signed by the resident or responsible party. (II, III)

d. If emergency relocation is required in order to protect the safety or health of the resident or other residents, the notification requirements may be waived. The conditions of the emergency shall be documented. The family or responsible party shall be notified immediately or as soon as possible of the condition that necessitates emergency relocation, and such notification shall be documented. (II, III)

e. A transfer to a part of a facility that has a different license must be handled the same way as a transfer to another facility, and not as an intrafacility transfer. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 3523C, IAB 12/20/17, effective 1/24/18]

481—57.15(135C) Residency agreement.

57.15(1) Each residency agreement shall:

a. State the base rate or scale per day or per month, the services included, and the method of payment. (III)

b. Contain a complete schedule of all offered services for which a fee may be charged in addition to the base rate. (III) Furthermore, the agreement shall:

(1) Stipulate that no further additional fees shall be charged for items not contained in the complete schedule of services; (III)

(2) State the method of payment for additional charges; (III)

(3) Contain an explanation of the method of assessment of such additional charges and an explanation of the method of periodic reassessment, if any, resulting in changing such additional charges; (III)

(4) State that additional fees may be charged to the resident for nonprescription drugs, other personal supplies, and services provided by a barber, beautician, and such. (III)

c. Contain an itemized list of services to be provided to the resident based on an assessment at the time of the resident's admission and in consultation with the administrator and including the specific fee the resident will be charged for each service and the method of payment. (III)

d. Include the total fee to be charged initially to the resident. (III)

e. State the conditions whereby the facility may make adjustments to its overall fees for resident care as a result of changing costs. (II, III) Furthermore, the agreement shall provide that the facility shall give:

(1) Written notification to the resident, or the responsible party when appropriate, of changes in the overall rates of both base and additional charges at least 30 days prior to the effective date of such changes; (II, III)

(2) Notification to the resident, or the responsible party when appropriate, of changes in additional charges, based on a change in the resident's condition. Notification must occur prior to the date such revised additional charges begin. If notification is given orally, subsequent written notification must also be given within a reasonable time, not to exceed one week, listing specifically the adjustments made. (II, III)

f. State the terms of agreement in regard to a refund of all advance payments in the event of the transfer, death, or voluntary or involuntary discharge of the resident. (II, III)

g. State the terms of agreement concerning the holding of and charging for a bed when a resident is hospitalized or leaves the facility temporarily for recreational or therapeutic reasons. The terms shall contain a provision that the bed will be held at the request of the resident or the resident's responsible party. (II, III)

(1) The facility shall ask the resident or responsible party whether the resident's bed should be held. This request shall be made before the resident leaves or within 48 hours after the resident leaves. The inquiry and the response shall be documented. (II, III)

(2) The facility shall inform the resident or responsible party that, when requested, the bed may be held beyond the number of days designated by the funding source, as long as payments are made in accordance with the agreement. (II, III)

h. State the conditions under which the involuntary discharge or transfer of a resident would be effected. (II, III)

i. Set forth any other matters deemed appropriate by the parties to the agreement. No agreement or any provision thereof shall be drawn or construed so as to relieve any health care facility of any requirement or obligation imposed upon it by this chapter or any standards or rules in force pursuant to this chapter. (II, III)

57.15(2) Each party to the residency agreement shall receive a copy of the signed agreement. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.16(135C) Medical examinations.

57.16(1) Each resident in a residential care facility shall have a designated primary care provider who may be contacted when needed. (II, III)

57.16(2) Each resident admitted to a residential care facility shall have a physical examination prior to admission. (II, III)

a. If the resident is admitted directly from a hospital, a copy of the hospital admission physical and discharge summary may be a part of the record in lieu of an additional physical examination. A record of the examination, signed by the primary care provider, shall be a part of the resident's record. (II, III)

b. The record of the admission physical examination and medical history shall portray the current medical status of the resident and shall include the resident's name, sex, age, medical history, physical

examination, diagnosis, statement of medical concerns, diet, and results of any diagnostic procedures. (II, III)

c. Screening and testing for tuberculosis shall be conducted pursuant to 481—Chapter 59. (I, II, III)

57.16(3) The person in charge shall immediately notify the primary care provider of any accident, injury or adverse change in the resident's condition that has the potential for requiring physician intervention. (I, II, III)

57.16(4) Each resident shall be visited by or shall visit the resident's primary care provider at least once each year. The one-year period shall be measured from the date of admission and does not include the resident's preadmission physical. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.17(135C) Records.

57.17(1) *Resident record.* The licensee shall keep a permanent record on every resident admitted to the residential care facility, and all entries in the permanent record shall be current, dated, and signed. (III) The record shall include:

- a.* Name and previous address of resident; (III)
- b.* Birth date, sex, and marital status of resident; (III)
- c.* Church affiliation, if designated; (III)
- d.* Primary care provider's name, telephone number, and address; (III)
- e.* Dentist's name, telephone number, and address; (III)
- f.* Name, address, and telephone number of next of kin or legal representative; (III)
- g.* Name, address, and telephone number of person to be notified in case of emergency; (III)
- h.* Pharmacy name, telephone number, and address; (III)
- i.* Mortuary name, telephone number, and address, if designated; (III)
- j.* Physical examination and medical history; (III)
- k.* Primary care provider's orders for the resident's level of care, medication, treatments, and diet. The orders shall be in writing and signed by the primary care provider quarterly; (III)
- l.* A notation of visits to primary care provider and other professional services; (III)
- m.* Documentation regarding services provided by other providers, including but not limited to home health agencies, hospice, day treatment and those providing medical, mental health and Medicaid waiver services; (III)
- n.* Documentation of any adverse change in the resident's condition; (II, III)
- o.* A notation describing the resident's condition on admission, transfer and discharge; (III)
- p.* A copy of instructions given to the resident, legal representative or facility in the event of discharge or transfer; (III)
- q.* In the event of a resident's death, notations of the date and time of the resident's death, the circumstances of the resident's death, the disposition of the resident's body, and the date and time the resident's family and primary care provider were notified of the resident's death; and (III)
- r.* A notation of disposition of personal property and medications upon the resident's transfer, discharge or death. (III)

57.17(2) *Confidentiality of resident records.* Each resident shall be ensured confidential treatment of all information contained in the resident's records. The resident's written consent shall be required for the release of information to persons not otherwise authorized under law to receive the information. (II)

a. The facility shall limit access to any medical records to staff and professionals providing services to the resident. (II)

b. The facility shall limit access to the resident's personal records, e.g., financial records and social services records, to staff and professionals providing the service to the resident. Only those personnel concerned with the financial affairs of the resident may have access to the financial records. (II)

c. The resident, or the resident's responsible party, shall be entitled to examine all information contained in the resident's record and shall have the right to secure full copies of the record at reasonable cost upon request, unless the primary care provider determines that the disclosure of the record or

section thereof is contraindicated, in which case this information will be deleted prior to making the record available to the resident or responsible party. This determination and the reasons for it must be documented in the resident's record. (II)

d. This subrule is not meant to preclude access to resident records by representatives of state and federal regulatory agencies.

57.17(3) Incident record.

a. Each residential care facility shall maintain an incident record report and shall have available incident report forms. (II, III)

b. Report of incidents shall be in detail on an incident report form. (III)

c. The person in charge at the time of the incident shall oversee the preparation of and sign the incident report. The administrator or designee shall review, sign and date the incident report within 72 hours of the accident, incident or unusual occurrence. (II, III)

d. An incident report shall be completed for every accident or incident where there is apparent injury or where an injury of unknown origin may have occurred. (II)

e. An incident report shall be completed for every accident, incident or unusual occurrence within the facility or on the premises that affects a resident, visitor, or employee. (II, III)

f. A copy of the incident report shall be kept on file in the facility. (II, III)

57.17(4) Retention of records.

a. Records shall be retained in the facility for five years following the termination of services to a resident. (III)

b. Records shall be retained within the facility upon change of ownership. (III)

c. When the facility ceases to operate, a copy of the resident's record shall be released to the facility to which the resident is transferred. (III)

d. When the facility ceases to operate, records shall be maintained for five years in a clean, dry secured storage area. (III)

57.17(5) Electronic records. In addition to the access provided in 481—subrule 50.10(2), an authorized representative of the department shall be provided unrestricted access to electronic records pertaining to the care provided to the residents of the facility. (II, III)

a. If access to an electronic record is requested by the authorized representative of the department, the facility may provide a tutorial on how to use its particular electronic system or may designate an individual who will, when requested, access the system, respond to any questions or assist the authorized representative as needed in accessing electronic information in a timely fashion. (II, III)

b. The facility shall provide a terminal where the authorized representative may access records. (II, III)

c. If the facility is unable to provide direct print capability to the authorized representative, the facility shall make available a printout of any record or part of a record on request in a time frame that does not intentionally prevent or interfere with the department's survey or investigation. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.18(135C) Resident care and personal services.

57.18(1) A complete change of bed linen shall be provided at least once a week and more often if necessary. (III)

57.18(2) Residents shall receive sufficient supervision to promote personal cleanliness. (II, III)

57.18(3) Residents shall have clean clothing as needed. Clothing shall be appropriate to residents' activities and to the weather. (III)

57.18(4) Residents shall be encouraged to bathe at least twice a week. (II, III)

57.18(5) All nonambulatory residents shall be housed on the grade level floor unless the facility has a suitably sized elevator. (II)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.19(135C) Drugs.

57.19(1) Drug storage.

a. Residents who have been certified in writing by their primary care provider as capable of taking their own medications may retain these medications in their bedroom, but locked storage must be provided, with staff and the resident having access. Monitoring of the storage, administration and documentation by the resident shall be carried out by a person who meets the requirements of subrule 57.19(3) and is responsible for administering medications. (II, III)

b. Drug storage for residents who are unable to take their own medications and require supervision shall meet the following requirements:

- (1) Locked storage for drugs, solutions, and prescriptions shall be provided. (III)
- (2) A bathroom shall not be used for drug storage. (III)
- (3) The drug storage shall be kept locked when not in use. (III)
- (4) The drug storage key shall be secured and available only to those employees charged with the responsibility of administering medications. (II, III)
- (5) Schedule II drugs, as defined by Iowa Code chapter 124, shall be kept in a locked box within the locked drug storage. (II, III)
- (6) Medications requiring refrigeration shall be kept locked in a refrigerator and separated from food and other items. (II, III)
- (7) Drugs for external use shall be stored separately from drugs for internal use. (II, III)
- (8) All potent, poisonous, or caustic materials shall be stored separately from drugs, shall be plainly labeled and stored in a specific, well-illuminated cabinet, closet, or storeroom, and shall be made accessible only to authorized persons. (I, II)
- (9) Inspection of drug storage shall be made by the administrator or designee and a registered pharmacist not less than once every three months. The inspection shall be verified by a report signed by the administrator and the pharmacist and filed with the administrator. The report shall include, but not be limited to, certification of the absence of the following: expired drugs, deteriorated drugs, improper labeling, drugs for which there is no current primary care provider's order, and drugs improperly stored. (III)
- (10) Bulk supplies of prescription drugs for multiresident use shall not be kept in a residential care facility. (III)

57.19(2) Drug safeguards.

a. All prescribed medications shall be clearly labeled indicating the resident's full name, primary care provider's name, prescription number, name and strength of drug, dosage, directions for use, date of issue, and name and address and telephone number of pharmacy or primary care provider issuing the drug. Where unit dose is used, prescribed medications shall, at a minimum, indicate the resident's full name, primary care provider's name, name and strength of drug, and directions for use. Standard containers shall be utilized for dispensing drugs. (III)

b. Sample medications provided by the resident's primary care provider shall clearly identify to whom the medications belong. (III)

c. Medication containers having soiled, damaged, illegible, or makeshift labels shall be returned to the issuing pharmacist, pharmacy, or primary care provider for relabeling or disposal. (III)

d. The medication for each resident shall be kept or stored in the original containers unless the resident is participating in an individualized medication program. (II, III)

e. Unused prescription drugs shall be destroyed by the person in charge, in the presence of a witness, and with a notation made on the resident's record or shall be returned to the supplying pharmacist. (III)

f. Prescriptions shall be refilled only with the permission of the resident's primary care provider. (II, III)

g. No medications prescribed for one resident may be administered to or allowed in the possession of another resident. (I, II)

h. Instructions shall be requested from the Iowa board of pharmacy concerning disposal of unused Schedule II drugs prescribed for a resident who has died or for whom the Schedule II drug was discontinued. (III)

i. Discontinued medications shall be destroyed within a specified time by a responsible person, in the presence of a witness, and with a notation made to that effect or shall be returned to the pharmacist for destruction. Drugs listed under the Schedule II drugs shall be destroyed in accordance with the requirements established by the Iowa board of pharmacy. (II, III)

j. All medication orders which do not specifically indicate the number of doses to be administered or the length of time the drug is to be administered shall be stopped automatically after a given time period. The automatic-stop order may vary for different types of drugs. The resident's primary care provider, in conjunction with the pharmacist, shall institute these policies and provide procedures for review and endorsement. (II, III)

k. No resident shall be allowed to possess any medications unless the primary care provider has certified in writing on the resident's medical record that the resident is mentally and physically capable of doing so. (II)

l. No medications or prescription drugs shall be administered to a resident without a written order signed by the primary care provider. (II)

m. The facility shall establish a policy to govern the distribution of prescribed medications to residents who are on leave from the facility. (II, III)

(1) Medications may be issued to residents who will be on leave from a facility for less than 24 hours. Only those medications needed for the time period the resident will be on leave from the facility may be issued. Non-child-resistant containers may be used. Instructions shall be provided and include the date, the resident's name, the name of the facility, and the name of the medication, its strength, dose and time of administration. (II, III)

(2) Medication for residents on leave from a facility for longer than 24 hours shall be obtained in accordance with requirements established by the Iowa board of pharmacy. (II, III)

(3) Medication for residents on leave from a facility may be issued only by facility personnel responsible for administering medication. (II, III)

57.19(3) Drug administration—authorized personnel.

a. A properly trained person shall be charged with the responsibility of administering medications as ordered by a primary care provider. (II, III)

b. The person shall have knowledge of the purpose of the drugs and their dangers and contraindications. (II, III)

c. The person shall be a licensed nurse or primary care provider or shall have successfully completed a department-approved medication aide course and passed a department-approved medication aide challenge examination administered by an area community college. (II, III)

d. Prior to taking a department-approved medication aide course, the person shall have a letter of recommendation for admission to the medication aide course from the employing facility. (III)

e. A person who is a nursing student or a graduate nurse may take the challenge examination in place of taking a medication aide course. The person shall do all of the following before taking the medication aide challenge examination:

(1) Complete a clinical or nursing theory course within six months before taking the challenge examination; (III)

(2) Successfully complete a nursing program pharmacology course within one year before taking the challenge examination; (III)

(3) Provide to the community college a written statement from the nursing program's pharmacology or clinical instructor indicating that the person is competent in medication administration. (III)

f. A person who has written documentation of certification as a medication aide in another state may become a medication aide in Iowa by successfully completing a department-approved nurse aide competency examination and a medication aide challenge examination. The requirements of paragraph 57.19(3) "d" do not apply to this person. (III)

g. In a freestanding residential care facility licensed for 15 or fewer beds, a person who has successfully completed a state-approved medication manager course may administer medications.

57.19(4) Drug administration.

a. Unless the unit dose system is used, the person assigned the responsibility of medication administration must complete the procedure by personally preparing the dose, observing the actual act of swallowing the oral medication, and charting the medication. In facilities where the unit dose system is used, the person assigned the responsibility of medication administration must complete the procedure by observing the actual act of swallowing the oral medication and by charting the medication. Medications shall be prepared on the same shift of the same day that they are administered unless the unit dose system is used. (II)

b. Injectable medications shall be administered as permitted by Iowa law by a registered nurse, licensed practical nurse, primary care provider or pharmacist. For purposes of this subrule, “injectable medications” does not include an epinephrine autoinjector, e.g., an EpiPen. (II, III)

c. A resident certified by the resident’s primary care provider as capable of injecting the resident’s own insulin may do so. Insulin may be administered pursuant to paragraph 57.19(4) “*b*” or as otherwise authorized by the resident’s primary care provider. (II, III) Authorization shall:

- (1) Be in writing,
- (2) Be maintained in the resident’s record,
- (3) Be renewed quarterly,
- (4) Include the name of the person authorized to administer the insulin,
- (5) Include documentation by the primary care provider that the authorized person is qualified to administer insulin to that resident. (II, III)

d. A resident may participate in the administration of the resident’s own medication if the primary care provider has certified in writing in the resident’s medical record that the resident is mentally and physically capable of participating and has explained in writing in the resident’s medical record what the resident’s participation may include.

e. An individual inventory record shall be maintained for each Schedule II drug prescribed for each resident, with an accurate count and authorized signatures at every shift. (II)

f. The facility may use a unit dose system.

g. Medication aides and medication managers may administer PRN medications without contacting a licensed nurse or primary care provider if all of the following apply: (I, II, III)

(1) A written order from the resident’s primary care provider specifies the purpose of the PRN medication and the frequency, dosage and strength of the PRN medication.

(2) The resident’s primary care provider provides in writing specific criteria for administering PRN medications.

(3) The pharmacist assesses the resident’s use of PRN medications when conducting the inspection of drug storage as required by subparagraph 57.19(1) “*b*”(9).

h. The pharmacist shall assess the use of PRN medications when conducting the inspection of drug storage as required by subparagraph 57.19(1) “*b*”(9). (II, III)

i. Medications administered by an employee of the facility shall be recorded on a medication record by the individual who administers the medication. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 2643C, IAB 8/3/16, effective 9/7/16; see Delay note at end of chapter]

481—57.20(135C) Dental services.

57.20(1) The residential care facility personnel shall assist residents in obtaining annual and emergency dental services and shall arrange transportation for such services. (III)

57.20(2) Dental services shall be performed only on the request of the resident, responsible party, legal representative, or primary care provider. The resident’s primary care provider shall be advised of the resident’s dental problems. (III)

57.20(3) All dental reports or progress notes shall be included in the resident record as available. The facility shall make reasonable efforts to obtain the records following the provision of services. (III)

57.20(4) Personal care staff shall assist the resident in carrying out the dentist’s recommendations.

(III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.21(135C) Dietary.**57.21(1) Dietary staffing.**

a. A minimum of one person directly responsible for food preparation shall successfully complete a course meeting the requirements for a food protection program included in the Food Code adopted pursuant to Iowa Code chapter 137F. Another course may be substituted if the course's curriculum includes substantially similar competencies to a course that meets the requirements of the Food Code and the provider of the course files with the department a statement indicating that the course provides substantially similar instruction as it relates to sanitation and safe food handling. (III)

b. If the person is in the process of completing the food protection program in paragraph 57.21(1) "a," the requirement relating to the completion of a state-approved food protection program shall be considered to have been met.

c. In addition to the requirement of paragraph 57.21(1) "a," personnel who are responsible for food preparation or service, or both food preparation and service, shall have an orientation on sanitation and safe food handling prior to handling food and shall have annual in-service training on food protection. (III)

57.21(2) Nutrition and menu planning.

a. Menus shall be planned and followed to meet the nutritional needs of residents in accordance with the primary care provider's orders. Diet orders should be reviewed as necessary, but at least quarterly, by the primary care provider. (II, III)

b. Menus shall be planned and served to include foods and amounts necessary to meet federal dietary guidelines. (II, III)

c. At least three meals or their equivalent shall be served daily, at regular hours. (II, III)

(1) There shall be no more than a 14-hour span between offering a substantial evening meal and breakfast. (II, III)

(2) Unless contraindicated, evening snacks shall be offered routinely to all residents. Special nourishments shall be available when ordered by the primary care provider. (II, III)

d. Menus shall include a variety of foods prepared in various ways. (III)

e. Menus shall be written at least one week in advance. The current menu shall be located in an accessible place for easy use by persons purchasing, preparing, and serving food. (III)

f. Records of menus as served shall be filed and maintained for 30 days and shall be available for review by departmental personnel. When substitutions are necessary or requested, they shall be of similar nutritive value and recorded on the menu or in a notebook. (III)

g. The facility shall provide an alternative choice at scheduled meal times. (III)

57.21(3) Dietary storage, food preparation, and service.

a. All food shall be handled, prepared, served and stored in compliance with the Food Code adopted pursuant to Iowa Code section 137F.2. (I, II, III)

b. Supplies of staple foods for a minimum of a one-week period and of perishable foods for a minimum of a two-day period shall be maintained on the premises. Minimum food portion requirements for a low-cost plan shall conform to information supplied by the bureau of nutrition and health promotion of the department of public health. (II, III)

c. Dishes shall be free of cracks, chips, and stains. (III)

d. If family-style service is used, all leftover prepared food that has been on the table shall be properly handled. (III)

57.21(4) Sanitation in food preparation area.

a. In facilities licensed for more than 15 beds, the kitchen shall not be used for serving meals to residents, food service personnel, or other staff. (III)

b. There shall be written procedures established for cleaning all work and serving areas in facilities with more than 15 beds. (III)

c. A schedule for duties to be performed daily shall be posted in each food area. (III)

d. All cooking equipment in facilities of 15 or more beds shall be provided with a properly sized exhaust system and hood to eliminate excess heat, moisture, and odors from the kitchen. (II, III)

e. The food service area shall be located so it will not be used as a passageway by residents, guests, or non-food service staff. (III)

f. There shall be no washing, ironing, sorting or folding of laundry in the food service area. Dirty linen shall not be carried through the food service area unless the linen is in sealed, leakproof containers. (III)

g. In facilities with more than 15 beds, a mechanical dishwasher is required. (III)

h. A three-compartment pot and pan sink with 110°F (43°C) to 115°F (46°C) water for washing, a compartment for rinsing with water at 170°F (76°C) to 180°F (82°C) for sanitizing with space for air drying, or a two-compartment sink with access to a mechanical dishwasher for sanitizing all utensils shall be provided. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.22(135C) Orientation and service plan.

57.22(1) Orientation. Within 24 hours of admission, each resident shall receive orientation to the facility. The orientation program shall be documented in the resident's file and shall include, but shall not be limited to, a review of the resident's rights, the daily schedule, house rules and the facility's evacuation plan. (II, III)

57.22(2) Initial service plan. Within 48 hours of admission, the administrator or the administrator's designee shall develop an initial service plan to address any immediate health and safety needs. The plan shall be based on information gathered from the resident, family, referring party, primary care provider, and other significant persons. The plan shall be followed until the service plan required in subrule 57.22(3) is complete. (I, II, III)

57.22(3) Service plan. Within 30 days of admission, the administrator or the administrator's designee, in conjunction with the resident, the resident's responsible party, the interdisciplinary team, and any organization that works with or serves the resident, shall develop a written, individualized, and integrated service plan for the resident. The service plan shall be developed and implemented to address the resident's priorities and assessed needs, such as activities of daily living, rehabilitation, activity, and social, behavioral, emotional, physical and mental health. (I, II, III)

a. The service plan shall include measurable goals and objectives and the specific service(s) to be provided to achieve the goals. Each goal shall include the date of initiation and anticipated duration of service(s). Any restriction of rights shall be included in the service plan. (I, II, III)

b. The service plan shall include the documentation procedure for each goal and objective. (II, III)

c. The service plan should be modified to add or delete goals and objectives as the resident's needs change. Communications related to service plan changes or changes in the resident's condition shall occur within five working days of the change and shall be conveyed to all individuals inside and outside the residential care facility who work with the resident, as well as to the resident's responsible party. (I, II, III)

d. The service plan shall be reviewed at least quarterly by relevant staff, the resident and appropriate others, such as the resident's family, case manager and responsible party. The review shall include a written report which addresses a summary of the resident's progress toward goals and objectives and the need for continued services. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.23(135C) Resident activities program.

57.23(1) Activities program. Each residential care facility shall provide an organized resident activities program for the group and for the individual resident which shall include suitable activities. The facility shall offer at least two organized evening group activities per week and two organized weekend group activities per month. (III)

a. The activities program shall be designed to meet the needs and interests of each resident and to assist residents in continuing normal activities within limitations set by the resident's primary care provider. This shall include helping residents continue in their individual interests or hobbies. (III)

b. The activities program shall include measureable goals for each resident. (III)

- c. The activities program shall include both group and individual activities. (III)
- d. Residents shall be encouraged, but not required, to participate in activities. (III)

57.23(2) Coordination of activities program.

a. Each residential care facility with 15 or fewer beds shall designate a person to oversee the activities program, develop goals and monitor progress. (III)

b. Each residential care facility with more than 15 beds shall employ a person to direct the activities program. (III)

c. Staffing for the activities program shall be provided on the minimum basis of 45 minutes per resident per week. (II, III)

d. The activities coordinator shall have completed the activities coordinator orientation course approved by the department within six months of employment or have comparable training and experience as approved by the department. (III)

e. There shall be a written plan for personnel coverage when the activities coordinator is absent during scheduled working hours. (III)

57.23(3) Duties of activities coordinator. The activities coordinator shall:

a. Have access to all residents' records. (III)

b. Coordinate all activities, including volunteer or auxiliary activities and religious services. (III)

c. Keep all necessary records including:

(1) Attendance records; (III)

(2) Individual resident progress notes, recorded at least every three months; (III)

(3) Monthly calendars, prepared in advance, updated as necessary and maintained for one year.

(III)

d. Coordinate the activities program with all other services in the facility. (III)

57.23(4) Supplies, equipment, and storage.

a. Each facility shall provide a variety of supplies and equipment of a nature calculated to fit the needs and interests of the residents. (III)

b. Storage shall be provided for recreational equipment and supplies. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.24(135C) Residents' rights.

57.24(1) Each facility shall ensure that policies and procedures are written and implemented which include, at a minimum, the provisions of this rule and which govern all areas of service provided by the facility. These policies and procedures shall be available to staff, residents, residents' families or legal representatives and the public and shall be reviewed annually. (II, III)

57.24(2) Policies and procedures shall include a method for submitting complaints and recommendations by residents or their responsible parties and for ensuring a response and disposition by the facility. (II, III) The written procedures shall:

a. Ensure the provision of assistance to residents as necessary to complete and submit complaints and recommendations; (II, III)

b. Ensure protection of the resident from any form of reprisal or intimidation; (II, III)

c. Include designation of an employee responsible for handling grievances and recommendations; (II, III)

d. Include a method of investigating and assessing the validity of a grievance or recommendation; (II, III) and

e. Include methods of recording grievances and actions taken. (II, III)

57.24(3) Policies and procedures shall include provisions governing access to, duplication of, and dissemination of information from the residents' records. (II, III)

57.24(4) Policies and procedures shall include a provision that each resident shall be fully informed of the resident's rights and responsibilities as a resident and of all rules governing resident conduct and responsibilities. This information must be provided upon the resident's admission, or in the case of residents already in the facility, upon the facility's adoption or amendment of residents' rights policies. (II, III)

a. The facility shall communicate to residents prior to or within five days after admission what residents may expect from the facility and its staff, and what is expected from residents. The communication shall be in writing, e.g., in a separate handout or brochure describing the facility, and interpreted verbally, e.g., as part of a preadmission interview, resident counseling, or in individual or group orientation sessions following the resident's admission. (II, III)

b. Residents' rights and responsibilities shall be presented in language understandable to the resident. If the facility serves residents who are non-English-speaking or deaf, steps shall be taken to translate the information into a foreign or sign language. In the case of blind residents, either Braille or a recording shall be provided. Residents shall be encouraged to ask questions about their rights and responsibilities and these questions shall be answered. (II, III)

c. A statement shall be signed by the resident, or the resident's responsible party, if applicable, indicating an understanding of these rights and responsibilities and shall be maintained in the resident's record. The statement shall be signed no later than five days after admission, and a copy of the signed statement shall be given to the resident or responsible party. (II, III)

d. In order to ensure that residents continue to be aware of these rights and responsibilities during their stay, a written copy shall be prominently posted in a location that is available to all residents. (II, III)

e. All residents shall be advised within 30 days following changes made in the statement of residents' rights and responsibilities. Appropriate means shall be utilized to inform non-English-speaking, deaf or blind residents of changes. (II, III)

57.24(5) Choice of primary care provider. Each resident shall be permitted free choice of a primary care provider, and pharmacy, if accessible. The facility may require the selected pharmacy to utilize a drug distribution system compatible with the system currently used by the facility. (II)

57.24(6) Each resident shall be afforded the opportunity to participate in the planning of the resident's total care and treatment, which may include, but shall not be limited to, medical care, nutritional needs, activities, and social work services. Each resident has the right to refuse treatment except as provided by Iowa Code chapter 229. In the case of a resident with impaired decision-making skills, the responsible party shall be afforded the opportunity to participate in the planning of the resident's total care and medical treatment and to be informed of the resident's medical condition. (II, III)

57.24(7) Each resident shall be encouraged and assisted throughout the resident's period of stay to exercise the resident's rights as a resident and as a citizen and may voice grievances and recommend changes in policies and services to administrative staff or to outside representatives of the resident's choice, free from interference, coercion, discrimination, or reprisal. (II)

57.24(8) The facility shall provide ongoing opportunities for residents to be aware of and to exercise their rights as residents. Residents shall be kept informed of changes in policies and services that are more restrictive, and their views shall be solicited prior to action. (II)

57.24(9) The facility shall post in a prominent area the text of Iowa Code section 135C.46 (Retaliation Prohibited) and the name, telephone number, and address of the long-term care ombudsman, the department, and the local law enforcement agency to provide residents a further course of redress. (II)

57.24(10) All rights and responsibilities of the resident devolve to the resident's responsible party or any legal surrogate designated in accordance with state law, to the extent permitted by state law. This subrule is not intended to limit the authority of any individual acting pursuant to Iowa Code chapter 144A. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.25(135C) Dignity preserved. The resident shall be treated with consideration, respect, and full recognition of dignity and individuality, including privacy in treatment and in care for personal needs. (I, II)

57.25(1) Staff shall display respect for residents when speaking with, caring for, or talking about them, as constant affirmation of their individuality and dignity as human beings. (I, II)

57.25(2) Schedules of daily activities shall allow maximum flexibility for residents to exercise choice about what they will do and when they will do it. Residents' individual preferences regarding such things as menus, clothing, religious activities, friendships, activity programs, entertainment, sleeping and eating, also times to retire at night and arise in the morning shall be elicited and considered by the facility. (II)

57.25(3) Residents shall be examined and treated in a manner that maintains the privacy of their bodies. A closed door or a drawn curtain shall shield the resident from passersby. People not involved in the care of the residents shall not be present without the resident's consent while the resident is being examined or treated. (II)

57.25(4) Privacy of a resident's body also shall be maintained during toileting, bathing, and other activities of personal hygiene, except as needed for resident safety or assistance. (II)

57.25(5) Staff shall knock and be acknowledged before entering a resident's room unless the resident is not capable of a response. This shall not apply under emergency conditions. (II)
[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.26(135C) Communications. Each resident may communicate, associate, and meet privately with persons of the resident's choice, unless to do so would infringe upon the rights of other residents, and may send and receive personal mail unopened. (II)

57.26(1) Subject to reasonable scheduling restrictions, visiting policies and procedures shall permit residents to receive visits from anyone they wish. Visiting hours shall be posted. (II)

57.26(2) Reasonable, regular visiting hours shall not be less than 12 hours per day and shall take into consideration the special circumstances of each visitor. A particular visitor(s) may be restricted by the facility for one of the following reasons:

- a. The resident refuses to see the visitor(s). (II)
- b. The resident's primary care provider documents specific reasons why such a visit would be harmful to the resident's health. (II)
- c. The visitor's behavior is unreasonably disruptive to the functioning of the facility. This judgment must be made by the administrator, and the reasons shall be documented and kept on file. (II)

57.26(3) Decisions to restrict a visitor are reviewed and reevaluated:

- a. Each time the medical orders are reviewed by the primary care provider;
- b. At least quarterly by the facility's staff; or
- c. At the resident's request. (II)

57.26(4) Space shall be provided for residents to receive visitors in reasonable comfort and privacy. (II)

57.26(5) Telephones shall be available and accessible for residents to make and receive calls with privacy. Residents who need help shall be assisted in using the telephone. (II)

57.26(6) Arrangements shall be made to provide assistance to residents who require help in reading or sending mail. (II)

57.26(7) Residents, including residents court-ordered to the facility, shall be permitted to leave the facility at reasonable times unless there are justifiable reasons established in writing by court order, the primary care provider, the interdisciplinary team, or facility administrator for refusing permission. (II)

57.26(8) Residents shall not have their personal lives regulated beyond reasonable adherence to meal schedules, bedtime hours, and other written policies which may be necessary for the orderly management of the facility and as required by these rules. However, residents shall be encouraged to participate in recreational programs. (II)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.27(135C) Resident activities.

57.27(1) Each resident may participate in activities of social, religious, and community groups at the resident's discretion unless contraindicated for reasons documented by the primary care provider or interdisciplinary team as appropriate in the resident's record. (II)

57.27(2) Residents who wish to meet with or participate in activities of social, religious, or other community groups in or outside of the facility shall be informed, encouraged, and assisted to do so. (II)
[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.28(135C) Resident property.

57.28(1) Residents shall be permitted to keep reasonable amounts of personal clothing and possessions for their use while in the facility. The facility shall offer the resident the opportunity to have personal property itemized and documented on an inventory sheet upon the resident's admission. The inventory sheet shall be kept in a safe location which is convenient to the resident and shall be updated at least annually. At discharge, residents may sign off on a list of the personal property they are taking with them. (II, III)

57.28(2) The facility shall provide for the safekeeping of personal effects, funds and other property of its residents. The facility may require that items of exceptional value or that would convey unreasonable responsibilities to the licensee be removed from the premises of the facility for safekeeping. (III)

57.28(3) Funds or properties received by the facility, belonging or due a resident, expendable for the resident's account, shall be trust funds. (III)
[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.29(135C) Financial affairs—management. Each resident who has not been assigned a guardian or conservator by the court may manage the resident's own personal financial affairs. To the extent the facility assists in management, under written authorization by the resident, the management shall be carried out in accordance with Iowa Code section 135C.24. (II)

57.29(1) The facility shall maintain a written account of all residents' funds received by or deposited with the facility. (II)

57.29(2) An employee shall be designated in writing to be responsible for resident accounts. (II)

57.29(3) The facility shall keep on deposit personal funds over which the resident has control in accordance with Iowa Code section 135C.24. Should the resident request these funds, they shall be given to the resident on request with receipts maintained by the facility and a copy to the resident. In the case of a resident with impaired decision-making skills, the resident's legal representative shall designate a method of disbursing the resident's funds. (II)

57.29(4) If the facility makes financial transactions on a resident's behalf, the facility must document that it has prepared and sent an itemized accounting of disbursements and current balances at least quarterly. A copy of this statement shall be maintained in the resident's financial or business record. (II)

57.29(5) A resident's personal funds shall not be used without the written consent of the resident or the resident's legal representative. (I, II)

57.29(6) A resident's personal funds shall be returned to the resident when the funds have been used without the written consent of the resident or the resident's legal representative. The department may report findings that resident funds have been used without written consent to the department's investigations division or the local law enforcement agency, as appropriate. (II)
[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.30(135C) Resident work. No resident may be required to perform services for the facility, except as provided by Iowa Code section 347B.5. (II)

57.30(1) Residents may not be used to provide a source of labor for the facility against their will. Approval by the primary care provider is required for all work programs. (I, II)

57.30(2) Residents who perform work for the facility must receive compensation unless the work is part of their approved training program. Persons on the resident census who perform work shall not be used to replace paid employees in fulfilling staffing requirements. (II)
[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.31(135C) Family—shared rooms. Family members or spouses shall be permitted to share a room, if available, if requested by both parties, unless the primary care provider of one of the parties

documents in the medical record specific reasons why such an agreement would have an adverse effect on the health of the resident. (II)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.32(135C) Resident abuse prohibited. Each resident shall receive kind and considerate care at all times and shall be free from mental, physical, sexual, and verbal abuse, exploitation, neglect, and physical injury. (I, II)

57.32(1) Mental abuse includes, but is not limited to, humiliation, harassment, and threats of punishment or deprivation. (I, II)

57.32(2) Physical abuse includes, but is not limited to, corporal punishment and the use of restraints as punishment. (I, II)

57.32(3) Drugs such as tranquilizers shall only be used in accordance with orders of the primary care provider. (I, II)

57.32(4) Allegations of dependent adult abuse. Allegations of dependent adult abuse shall be reported and investigated pursuant to Iowa Code chapter 235E and 481—Chapter 52. (I, II, III)

57.32(5) Staff shall receive training relating to the identification and reporting of dependent adult abuse as required by Iowa Code section 235B.16. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 3737C, IAB 4/11/18, effective 5/16/18]

481—57.33(135C) Crisis intervention. If a facility utilizes physical restraints, the facility shall have written policies that define the uses of physical restraints, designate the administrator or designee as the person who may authorize their use, establish a mechanism for monitoring and controlling their use, and provide staff with proper training. (I, II, III)

57.33(1) Temporary physical restraint of residents shall be used only under the following conditions: (I, II)

a. An emergency to prevent injury to the resident or to others; or (I, II)

b. For crisis intervention, but shall not be used for punishment, for the convenience of staff or as a substitution for supervision or programming; (I, II) and

c. No staff person shall use any restraint that obstructs the airway of the resident. (I, II)

57.33(2) Authorization for the use of physical restraints must be prior to or immediately after application of the restraint. (I, II)

57.33(3) Prone restraint is prohibited. Staff persons who find themselves involved in the use of a prone restraint when responding to an emergency must take immediate steps to end the prone restraint. (I, II)

57.33(4) The rationale and authorization for the use of physical restraint and staff action and procedures carried out to protect the resident's rights and to ensure safety shall be clearly set forth in the resident's record by the responsible staff persons. (I, II)

57.33(5) The primary care provider, the interdisciplinary team and the resident's responsible party shall be notified of any restraints administered. (I, II, III)

57.33(6) The facility shall provide to the staff a department-approved training program by qualified professionals on physical restraint techniques. (I, II)

a. The facility shall keep a record of training for review by the department and shall include attendance. (II, III)

b. Only staff with documented training in physical restraint and techniques shall be authorized to assist with physical restraint of a resident. (I, II)

c. Under no circumstances shall a resident be allowed to actively or passively assist in the restraint of another resident. (I, II)

57.33(7) Residents shall not be kept behind locked doors. (I, II)

57.33(8) Mechanical restraint is prohibited. Staff persons who find themselves involved in the use of a mechanical restraint when responding to an emergency must take immediate steps to end the mechanical restraint. (I, II)

[ARC 1753C, IAB 12/10/14, effective 1/14/15; ARC 3738C, IAB 4/11/18, effective 5/16/18]

481—57.34(135C) Safety. The licensee of a residential care facility shall be responsible for the provision and maintenance of a safe environment for residents and personnel. (I, II, III)

57.34(1) Fire safety.

a. All residential care facilities shall meet the fire safety rules and regulations as promulgated by the state fire marshal. (I, II)

b. The size of the facility and needs of the residents shall be taken into consideration in evaluating safety precautions and practices.

57.34(2) Safety duties of administrator. The administrator shall have a written emergency plan to be followed in the event of fire, tornado, explosion, or other emergency. (III)

a. The plan shall be prominently posted in a common area of the building. (III)

b. In-service shall be provided to ensure that all employees are knowledgeable of the emergency plan. (II, III)

57.34(3) Resident safety.

a. Smoking shall be prohibited, except as allowed by Iowa Code chapter 142D, the smokefree air Act. (II, III)

b. Whenever full or empty tanks of oxygen are being used or stored, they shall be securely supported in an upright position. (II, III)

c. Residents shall receive adequate supervision to ensure against hazard from themselves, others, or elements in the environment. (I, II, III)

d. Storage areas for cleaning agents, bleaches, insecticides, or any other poisonous, dangerous, or flammable materials shall be locked. Residents permitted to access these materials shall be supervised by staff as identified in the resident's service plan. (I, II, III)

e. Sufficient numbers of noncombustible trash containers with covers shall be available. (III)

f. Residents' personal possessions that may constitute a hazard to residents or others shall be removed and stored. (III)

57.34(4) First-aid kit. A first-aid emergency kit shall be available on each floor in every facility. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.35(135C) Housekeeping.

57.35(1) Written procedures shall be established and implemented for daily and weekly cleaning schedules. (III)

57.35(2) Each resident room shall be cleaned on a routine schedule. (III)

57.35(3) All rooms, corridors, storage areas, linen closets, attics, and basements shall be kept in a clean, orderly condition, free of unserviceable furniture and equipment and accumulations of refuse. (II, III)

57.35(4) A hallway or corridor shall not be used for storage of equipment. (II, III)

57.35(5) All odors shall be kept under control by cleanliness and proper ventilation. (III)

57.35(6) Clothing worn by personnel shall be clean and washable. (III)

57.35(7) Housekeeping and maintenance personnel shall be provided with well-constructed and properly maintained equipment appropriate to the function for which it is to be used. (III)

57.35(8) All furniture, bedding, linens, and equipment shall be cleaned periodically and before use by another resident. (II, III)

57.35(9) Polishes used on floors shall provide a nonslip finish. (II, III)

57.35(10) Throw or scatter rugs shall have nonskid backing. (II, III)

57.35(11) Entrances, exits, steps, and outside walkways shall be kept free from ice, snow, and other hazards. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.36(135C) Maintenance.

57.36(1) Each facility shall establish a maintenance program to ensure the continued maintenance of the facility, to promote good housekeeping procedures, and to ensure sanitary practices throughout

the facility. In facilities with more than 15 beds, the maintenance program shall be established in writing and available for review by the department. (II, III)

57.36(2) The building, grounds, and other buildings shall be maintained in a clean, orderly condition and in good repair. (II, III)

57.36(3) Window treatments and furniture shall be clean and in good repair. (II, III)

57.36(4) Cracks in plaster, peeling wallpaper or paint, and tears or splits in floor coverings shall be promptly repaired or replaced in a professional manner. (II, III)

57.36(5) The electrical systems, including appliances, cords, and switches, shall be maintained to guarantee safe functioning and comply with the National Electric Code. (II, III)

57.36(6) All plumbing fixtures shall function properly and comply with the state plumbing code. (II, III)

57.36(7) Yearly inspections of the heating and cooling systems shall be made to guarantee safe operation. (II, III)

57.36(8) The building, grounds, and other buildings shall be kept free of breeding areas for flies, other insects, and rodents. (II, III)

57.36(9) The facility shall be kept free of flies, other insects, and rodents. (II, III)

57.36(10) Janitor's closet.

a. Facilities shall be provided with storage for cleaning equipment and supplies. (III)

b. Mops, scrub pails, and other cleaning equipment used in the resident areas shall not be stored or used in the dietary area. (III)

c. In facilities licensed for more than 15 beds, a janitor's closet shall be provided. It shall be equipped with water for filling scrub pails and a janitor's sink for emptying scrub pails. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.37(135C) Laundry.

57.37(1) All soiled linens shall be collected and transported to the laundry room in closed, leakproof laundry bags or covered, impermeable containers. (III)

57.37(2) Except for related activities, the laundry room shall not be used for other purposes. (III)

57.37(3) Procedures shall be written for the proper handling of wet, soiled, and contaminated linens. (III)

57.37(4) Residents' personal laundry shall be marked with an identification if comingled with other residents' personal laundry. (III)

57.37(5) Bed linens, towels, and washcloths shall be clean and stain-free. (III)

57.37(6) If laundry is done in the facility, the following shall be provided:

a. A clean, dry, well-lit area to accommodate a washer and dryer of adequate size to serve the needs of the facility. (III)

b. In facilities with more than 15 beds, the laundry room shall be divided into separate areas, one for sorting soiled linen and one for sorting and folding clean linen. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.38(135C) Garbage and waste disposal.

57.38(1) All garbage shall be gathered, stored, and disposed of in a manner that will not permit transmission of disease, create a nuisance, or provide a breeding or feeding place for vermin or insects. (III)

57.38(2) All containers for refuse shall be watertight and rodent-proof and have tight-fitting covers. (III)

57.38(3) All unlined containers shall be thoroughly cleaned each time the containers are emptied. (III)

57.38(4) All waste shall be properly disposed of in compliance with local ordinances and state codes. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.39(135C) Supplies.**57.39(1) Linen supplies.**

- a. There shall be an adequate supply of linen so that each resident shall have at least three washcloths, hand towels, and bath towels per week. (III)
- b. A complete change of bed linens shall be available in the linen storage area for each bed. (III)
- c. Sufficient lightweight, clean, serviceable blankets shall be available. All blankets shall be laundered as often as necessary for cleanliness and freedom from odors. (III)
- d. Each bed shall be provided with clean, washable bedspreads. There shall be a supply available when changes are necessary. (III)
- e. Adequate storage shall be provided for linens, pillows, and bedding. (III)

57.39(2) Supplies, equipment and storage.

- a. All equipment shall be properly cleaned and sanitized before use by another resident. (III)
- b. Clean and sanitary storage shall be provided for equipment and supplies. (III)
- c. Each facility shall provide a variety of supplies and equipment of a nature calculated to fit the needs and interests of the residents. (III)
- d. Locked storage should be available for potentially dangerous items such as scissors, knives, and toxic materials. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.40(135C) Buildings, furnishings, and equipment.**57.40(1) Buildings—general requirements.**

- a. All windows shall be supplied with window treatments that are kept clean and in good repair. (III)
- b. Whenever glass sliding doors or transparent panels are used, they shall be marked conspicuously. (III)
- c. The facility shall meet the equivalent requirements of the appropriate group occupancy of the state building code. (III)

57.40(2) Furnishings and equipment.

- a. All furnishings and equipment shall be durable, cleanable, and appropriate to their function. (III)
- b. All resident areas shall be decorated, painted, and furnished to provide a homelike atmosphere. (III)
- c. Upholstery materials shall be moisture- and soil-resistant as needed, except on furniture provided by the resident and the property of the resident. (III)

57.40(3) Dining and living rooms.

- a. Every facility shall have a dining room and a living room easily accessible to all residents. (III)
- b. Living rooms shall be maintained for the use of residents and their visitors and may be used for recreational activities. Living rooms shall be suitably furnished. (III)
- c. Dining rooms shall be furnished with dining tables and chairs appropriate to the size and function of the facility. Dining rooms and furnishings shall be kept clean and sanitary. (III)

57.40(4) Bedrooms.

- a. Each resident shall be provided with a standard, single, or twin bed, substantially constructed and in good repair. Rollaway beds, metal cots, or folding beds are not acceptable. (III)
- b. Each bed shall be equipped with the following: casters or glides; clean springs in good repair; a clean, comfortable, well-constructed mattress approximately five inches thick and standard in size for the bed; and clean, comfortable pillows of average bed size. (III)
- c. Each resident shall have a bedside table with a drawer to accommodate personal possessions. (III)
- d. There shall be a comfortable chair, either a rocking chair or armchair, per resident bed. The resident's personal wishes shall be considered. (III)
- e. There shall be drawer space for each resident's clothing. In a bedroom in which more than one resident resides, drawer space shall be assigned to each resident. (III)

f. Beds and other furnishings shall not obstruct free passage to and through doorways. (III)
g. Beds shall not be placed in such a manner that the side of the bed is against the radiator or in close proximity to it unless the radiator is covered so as to protect the resident from contact with it or from excessive heat. (III)

h. There shall be no more than four residents per room. (III)

57.40(5) Bath and toilet facilities.

a. All sinks shall have paper towel dispensers and an available supply of soap. (III)

b. Toilet paper shall be readily available to residents. (III)

57.40(6) Heating. A centralized heating system shall be maintained in good working order and capable of maintaining a comfortable temperature for residents of the facility. Portable units or space heaters are prohibited from being used in the facility except in an emergency. (II, III)

57.40(7) Water supply.

a. Private sources of water supply shall be tested annually and the report made available for review by the department upon request. (III)

b. A bacterially unsafe source of water supply shall be grounds for denial, suspension, or revocation of license. (III)

c. The department may require testing of private sources of water supply at its discretion in addition to the annual test. The facility shall supply reports of such tests as directed by the department. (III)

d. Hot and cold running water under pressure shall be available in the facility. (II, III)

e. Prior to construction of a new facility or new water source, private sources of water supply shall be surveyed and shall comply with the requirements of the department. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.41(135C) Family and employee accommodations.

57.41(1) In facilities where the total occupancy of family, employees, and residents is more than five, separate bathing and toilet facilities shall be required for the family or employees distinct from such areas provided for the residents. (III)

57.41(2) In all facilities, if the family or employees live within the facility, separate living quarters and recreation facilities shall be required for the family or employees distinct from such areas provided for the residents. (III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.42(135C) Animals. No animals shall be allowed to reside in the facility except with written approval of the department and under controlled conditions. (II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.43(135C) Another business or activity in a facility. A facility is allowed to have another business or activity in a health care facility or in the same physical structure of the facility, if the other business or activity is under the control of and is directly related to and incidental to the operation of the health care facility, or the business or activity is approved by the department and the state fire marshal. (I, II, III)

57.43(1) To obtain the approval of the department and the state fire marshal, the facility must submit to the department a written request for approval which identifies the service(s) to be offered by the business and addresses the factors outlined in paragraphs 57.43(2) “a” through “j.” (I, II, III)

57.43(2) The following factors will be considered by the department in determining whether a business or activity will interfere with the use of the facility by residents, interfere with services provided to residents, or be disturbing to residents:

a. Health and safety risks for residents;

b. Compatibility of the proposed business or activity with the facility program;

c. Noise created by the proposed business or activity;

d. Odors created by the proposed business or activity;

- e.* Use of entrances and exits for the business or activity in regard to safety and disturbance of residents and interference with delivery of services;
- f.* Use of the facility's corridors or rooms as thoroughfares to the business or activity in regard to safety and disturbance of residents and interference with delivery of services;
- g.* Proposed staffing for the business or activity;
- h.* Sharing of services and staff between the proposed business or activity and the facility;
- i.* Facility layout and design; and
- j.* Parking area utilized by the business or activity.

57.43(3) Approval of the state fire marshal shall be obtained before approval of the department will be considered.

57.43(4) A business or activity conducted in a health care facility or in the same physical structure as a health care facility shall not reduce space, services or staff available to residents below minimums required in these rules and 481—Chapter 60. (I, II, III)

[ARC 1753C, IAB 12/10/14, effective 1/14/15]

481—57.44(135C) Respite care services. “Respite care services” means an organized program of temporary supportive care provided for 24 hours or more to a person in order to relieve the usual caregiver of the person from providing continual care to the person. “Respite care services” does not include crisis stabilization services provided pursuant to 2014 Iowa Acts, chapter 1044 (to be codified at Iowa Code section 225C.19A). “Respite care individual” means a person receiving respite care services. A residential care facility which chooses to provide respite care services must meet the following requirements related to respite services and must be licensed as a residential care facility. (II, III)

57.44(1) Length of stay. Respite care may be provided for no more than 30 consecutive days and for a total of no more than 60 days in a consecutive 12-month period. The 12-month period begins on the first day of the respite care individual's stay at the facility. (II, III)

57.44(2) No separate license. A residential care facility which chooses to provide respite care services is not required to obtain a separate license or pay a license fee.

57.44(3) Involuntary termination of respite services. The facility may terminate the respite services for a respite care individual. Rule 481—57.14(135C) shall not apply. The facility shall make proper arrangements for the welfare of the respite care individual prior to involuntary termination of respite services, including notification of the respite care individual's family or legal representative. (II, III)

57.44(4) Contract. Pursuant to rule 481—57.15(135C), the facility shall have a contract with each resident in the facility. When an individual is there for respite care services, the contract shall specify the time period during which the individual will be considered to be receiving respite care services. At the end of that period, the contract may be amended to extend that period of time. The contract shall specifically state that respite care services may be involuntarily terminated. The contract shall meet other requirements under rule 481—57.15(135C), except the requirements under subrule 57.15(7). (II, III)

57.44(5) Admission as a resident.

a. An individual being cared for under a respite care contract shall not be considered an admission to the facility.

b. A respite care individual shall be included in the facility's census.

c. The facility shall not enter into multiple 30-day contracts with an individual being cared for under a respite care contract in order to lengthen the individual's stay at the facility. (II, III)

d. If an individual being cared for under a respite care contract remains in the facility beyond 30 consecutive days and is eligible for admission, the department shall consider the individual a resident in the facility. The facility shall follow all requirements for the individual's admission to the facility. (II, III)

57.44(6) Level of care. Respite care services shall not be provided by a health care facility to persons requiring a level of care which is higher than the level of care the facility is licensed to provide. (I, II, III)

57.44(7) Reporting requirements. The reporting requirements of rule 481—50.7(135C) shall apply to residents being cared for under a respite care contract. (I, II, III)
 [ARC 1753C, IAB 12/10/14, effective 1/14/15]

¹ Effective date of 470—57.15(2)“a” and “b” delayed until the expiration of 45 calendar days into the 1987 session of the General Assembly pursuant to Iowa Code section 17A.8(9), IAB 6/4/86.

² See IAB, Inspections and Appeals Department.

³ Effective date of 481—57.12(2)“a,” last paragraph, delayed 70 days by the Administrative Rules Review Committee at its meeting held July 8, 1993.

⁴ September 7, 2016, effective date of 57.19(3)“d,” 62.15(2)“d,” and 63.18(3)“d” [ARC 2643C] delayed 70 days by the Administrative Rules Review Committee at its meeting held August 5, 2016.

CHAPTER 62

RESIDENTIAL CARE FACILITIES FOR PERSONS WITH MENTAL ILLNESS (RCFs/PMI)

481—62.1(135C) Applicability. This chapter relates specifically to the licensing and regulation of residential care facilities for persons with mental illness (RCFs/PMI). Refer to 481—Chapter 57 for the licensing and regulation of all residential care facilities, including RCFs/PMI, and to 481—Chapter 60 for minimum physical standards for all residential care facilities.

[ARC 3739C, IAB 4/11/18, effective 5/16/18]

481—62.2(135C) Definitions. In addition to the definitions in 481—Chapter 57 and Iowa Code chapter 135C, the following definitions apply.

“*Commission*” means the mental health and disability services commission.

“*Department*” means the Iowa department of inspections and appeals.

“*Dependent adult abuse*” is as defined in rule 481—52.1(235E).

“*Evaluation services*” means those activities designed to identify a person’s current level of functioning and those factors which are barriers to maintaining the current level or achieving a higher level of functioning.

“*Interdisciplinary team process*” means an approach to assessment, service planning, and service implementation in which members of an interdisciplinary team utilize the skills, competencies, insights and perspectives provided by each member’s training and experience to develop a single, integrated, individual program plan to meet a resident’s needs for services.

“*Level of functioning*” means a person’s current physiological and psychological status and current academic, community living, self-care, and vocational skills.

“*Mental health counselor*” means a person who is certified or eligible for certification as a mental health counselor by the National Academy of Certified Clinical Mental Health Counselors.

“*Mental illness*” means a substantial disorder of thought or mood which significantly impairs judgment, behavior, or the capacity to recognize reality or the ability to cope with the ordinary demands of life. Mental disorders include the organic and functional psychoses, neuroses, personality disorders, alcoholism and drug dependence, behavioral disorders and other disorders as defined by the current edition of American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders.

“*Physical or physiological treatment*” means those activities designed to prevent, halt, control, relieve, or reverse symptoms or conditions which interfere with the physical or physiological functioning of the human body.

“*Psychiatric advanced registered nurse practitioner*” means an individual currently licensed as a registered nurse under Iowa Code chapter 152 or 152E who holds a national certification in psychiatric mental health care and who is licensed by the board of nursing as an advanced registered nurse practitioner.

“*Psychiatric nurse*” means a person who meets the requirements of a certified psychiatric nurse, is eligible for certification by the American Nursing Association, and is licensed by the state of Iowa to practice nursing as defined in Iowa Code chapter 152.

“*Psychiatrist*” means a doctor of medicine or osteopathic medicine and surgery who is certified by the American Board of Psychiatry and Neurology or who is eligible for certification.

“*Psychologist*” means a person who is licensed to practice psychology in the state of Iowa, or is certified by the Iowa department of education as a school psychologist, or is eligible for certification, or meets the requirements for eligibility for a license to practice psychology in the state of Iowa that were effective prior to July 1, 1985.

“*Psychotherapeutic treatment*” means those activities designed to assist a person in the identification or modification of beliefs, emotions, attitudes, or behaviors in order to maintain or improve the person’s functioning in response to the physical, emotional and social environment.

“*Qualified mental health professional*” or “*QMHP*” means a person who:

1. Is a psychiatrist, psychologist, social worker, certified psychiatric nurse, psychiatric advanced registered nurse practitioner, or mental health counselor; or

2. Is a doctor of medicine or osteopathic medicine, a physician assistant, or an advanced registered nurse practitioner and has at least one year's documented supervised experience in providing mental health services; or

3. Has a master's degree with coursework focusing on diagnosis, evaluation, and psychotherapeutic treatment of mental health problems and mental illness; or

4. Is employed by a community mental health center or mental health service provider accredited by the commission and has less than a master's degree but at least a bachelor's degree and sufficient education and experience as determined by the chief administrative officer of the community mental health center, with the approval of the commission, with coursework and experience focusing on diagnosis and evaluation and treatment of persons with mental health problems and mental illness.

If the person is practicing in a field covered by an Iowa licensure law, the person shall hold a current Iowa license.

"Resident" means a person who has been admitted to the facility to receive care and services.

"Social worker" means a person who is licensed to practice social work in the state of Iowa or who is eligible for licensure.

[ARC 3739C, IAB 4/11/18, effective 5/16/18]

481—62.3(135C) Personnel. In addition to personnel requirements found in 481—Chapter 57, the RCF/PMI shall provide for services of a qualified mental health professional, by direct employment or contract, whose responsibilities shall include, but not be limited to: (II, III)

1. Approval of each resident's service plan; (II, III)
2. Monitoring the implementation of each resident's service plan; (II, III)
3. Recording each resident's progress; and (II, III)
4. Participating in a periodic review of each resident's service plan. (II, III)

[ARC 3739C, IAB 4/11/18, effective 5/16/18]

481—62.4(135C) Admission criteria. In addition to admission criteria found in 481—Chapter 57, the facility's admission criteria shall include but not be limited to age, sex, diagnosis from the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders, substance abuse, dual diagnosis and criteria that are consistent with the résumé of care. (III)

[ARC 3739C, IAB 4/11/18, effective 5/16/18]

481—62.5(135C) Evaluation services.

62.5(1) Evaluation services shall be provided to each resident. An annual evaluation of each resident shall be completed no later than 12 months from the date of the last available evaluation. For residents who are on leave from a state mental health institution, the institution shall be responsible for the completion of the evaluation. The facility shall ensure the completion of the evaluation of all other residents. The annual evaluation shall identify physical health and current level of functioning and need for services. (II, III)

62.5(2) The portion of the evaluation to identify the resident's physical health shall:

- a. Result in identification of current illness and disabilities and recommendations for physical and physiological treatment and services. (II, III)
- b. Include an evaluation of the resident's ability for health maintenance. (III)
- c. Be performed by a primary care provider. (II, III)

62.5(3) Evaluation.

a. The portion of the evaluation to identify the resident's current level of functioning and need for services shall:

- (1) Identify the resident's level of functioning and need for services in each of the following areas: self-care, community living skills, psychotherapeutic treatment, vocational skills, and academic skills. (II, III)
- (2) Be of sufficient detail to determine the appropriateness of placement according to the skills and needs of the resident. (II, III)
- (3) Be made without regard to the availability of services. (III)

- (4) Be performed by a QMHP, in consultation with the interdisciplinary team. (II, III)
- b. If an evaluation is available from the referral source, the evaluation shall be secured by the facility prior to the admission of the applicant. (III)
- c. If an evaluation is not available or does not contain all the required information, the facility shall ensure an evaluation to the extent necessary to determine if the applicant meets the criteria for admission. For those admitted, the remainder of the evaluation shall be performed prior to the development of a service plan. (III)
- d. Results of all evaluations shall be in writing and maintained in the resident's record. Evaluations subsequent to the initial evaluation shall be performed in sufficient detail to determine changes in the resident's physical health, skills and need for services. (II, III)

62.5(4) A narrative social history shall be completed for each resident within 30 days of admission and approved by the qualified mental health professional prior to the development of the service plan. (III)

a. When the social history was secured from another provider, the information contained shall be reviewed within 30 days of admission. The date of the review, signature of the staff reviewing the history, and a summary of significant changes in the information shall be entered in the resident's record. (III)

b. An annual review of the information contained within the social history shall be incorporated into the service plan progress note. (III)

c. The social history shall minimally address the following areas:

- (1) Referral source and reason for admission, (II, III)
- (2) Legal status, (II, III)
- (3) A description of previous living arrangements, (III)
- (4) A description of previous services received and summary of current service involvements, (II, III)
- (5) A summary of significant medical conditions including, but not limited to, illnesses, hospitalizations, past and current drug therapies, and special diets, (II, III)
- (6) Substance abuse history, (II, III)
- (7) Work history, (III)
- (8) Educational history, (III)
- (9) Relationship with family, significant others, and other support systems, (III)
- (10) Cultural and ethnic background and religious affiliation, (II, III)
- (11) Hobbies and leisure time activities, (III)
- (12) Likes, dislikes, habits, and patterns of behavior, (II, III)
- (13) Impressions and recommendations. (II, III)

[ARC 3739C, IAB 4/11/18, effective 5/16/18]

¹ September 7, 2016, effective date of 57.19(3)“d,” 62.15(2)“d,” and 63.18(3)“d” [ARC 2643C] delayed 70 days by the Administrative Rules Review Committee at its meeting held August 5, 2016.

CHAPTER 63
RESIDENTIAL CARE FACILITY—THREE- TO FIVE-BED SPECIALIZED LICENSE
[Prior to 7/15/87, Health Department[470] Ch 63]

481—63.1(135C) Definitions. For the purpose of these rules, the following terms shall have the meanings indicated in this chapter. The definitions set out in Iowa Code section 135C.1 shall be considered to be incorporated verbatim in the rules.

“Accommodation” means the provision of lodging, including sleeping, dining, and living areas.

“Administrator” means a person approved by the department who administers, manages, supervises, and is in general administrative charge of a three- to five-bed residential care facility, whether or not such individual has an ownership interest in such facility, and whether or not the functions and duties are shared with one or more individuals.

“Ambulatory” means the condition of a person who immediately and without aid of another person is physically and mentally capable of traveling a normal path to safety, including the ascent and descent of stairs.

“Basement” means that part of a building where the finish floor is more than 30 inches below the finish grade of the building.

“Board” means the regular provision of meals.

“Change of ownership” means the purchase, transfer, assignment or lease of a licensed three- to five-bed residential care facility.

“Communicable disease” means a disease caused by the presence within a person’s body of a virus or microbial agents which may be transmitted either directly or indirectly to other persons.

“Department” means the state department of inspections and appeals.

“Interdisciplinary team” means the group of persons who develop a single, integrated, individual program plan to meet a resident’s needs for services. The interdisciplinary team consists of, at a minimum, the resident, the resident’s legal guardian if applicable, the resident’s advocate if desired by the resident, a referral agency representative, other appropriate staff members, other providers of services, and other persons relevant to the resident’s needs.

“Legal representative” means the resident’s guardian or conservator if one has been appointed or the resident’s power of attorney.

“Mechanical restraint” means restriction by the use of a mechanical device of a resident’s mobility or ability to use the hands, arms or legs.

“Medication” means any drug, including over-the-counter substances.

“Nonambulatory” means the condition of a person who immediately and without the aid of another person is not physically or mentally capable of traveling a normal path to safety, including the ascent and descent of stairs.

“Personal care” means assistance with the activities of daily living which the recipient can perform only with difficulty. Examples are help in getting in and out of bed, assistance with personal hygiene and bathing, help with dressing and eating, and supervision over medications which can be self-administered.

“Physical restraint” means direct physical contact on the part of a staff person to control a resident’s physical activity for the resident’s own protection or for the protection of others.

“Primary care provider” means any of the following who provide primary care and meet licensure standards:

1. A physician who is a family or general practitioner or an internist.
2. An advanced registered nurse practitioner.
3. A physician assistant.

“Program of care” means all services being provided for a resident in a health care facility.

“Prone restraint” means a restraint in which a resident is in a face-down position against the floor or another surface.

“Rate” means that daily fee charged for all residents equally and shall include the cost of all minimum services required in these rules.

“Records” includes electronic records.

“*Responsible party*” means the person who signs or cosigns the residency agreement required by rule 481—63.12(135C) or the resident’s legal representative. In the event that a resident has neither a legal representative nor a person who signed or cosigned the resident’s residency agreement, the term “responsible party” shall include the resident’s sponsoring agency, e.g., the department of human services, the U.S. Department of Veterans Affairs, a religious group, fraternal organization, or foundation that assumes responsibility and advocates for its client patients and pays for their health care.

“*Restraints*” means the measures taken to control a resident’s physical activity for the resident’s own protection or for the protection of others.

“*Specialized residential care facility license*” means a license for three- to five-bed residential care facilities serving persons with an intellectual disability, chronic mental illness, a developmental disability or brain injury.

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.2(135C,17A) Waiver or variance. A waiver or variance from these rules may be granted by the director of the department in accordance with 481—Chapter 6. A request for waiver or variance will be granted or denied by the director within 120 calendar days of receipt.

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.3(135C) Application for licensure.

63.3(1) Application and licensing—new facility or change of ownership. In order to obtain a specialized residential care facility license for a facility not currently licensed as a specialized residential care facility or for a specialized residential care facility when a change of ownership is contemplated, the applicant must:

- a. Make application at least 30 days prior to the proposed opening date of the facility. Application shall be made on forms provided by the department.
- b. Meet all of the rules, regulations, and standards contained in this chapter and in 481—Chapters 50 and 60. Exceptions noted in 481—subrule 60.3(2) shall not apply.
- c. Submit a letter of intent and a written résumé of care. The résumé of care shall meet the requirements of subrule 63.3(2).
- d. Submit a floor plan of each floor of the residential care facility. The floor plan of each floor shall be drawn on 8½" × 11" paper, show room areas in proportion, room dimensions, window and door locations, designation of the use of each room, and the room numbers for all rooms, including bathrooms.
- e. Submit a photograph of the front and side of the residential care facility.
- f. Submit the fee for a specialized residential care facility license in accordance with 481—paragraph 50.3(2)“a.”
- g. Comply with all other local statutes and ordinances in existence at the time of licensure.
- h. Submit a certificate signed by the state or local fire inspection authority as to compliance with fire safety rules and regulations.

63.3(2) Résumé of care. The résumé of care shall describe the following:

- a. Purpose of the facility;
- b. Criteria for admission to the facility;
- c. Ownership of the facility;
- d. Composition and responsibilities of the governing board;
- e. Qualifications and responsibilities of the administrator;
- f. Medical services provided to residents, to include the availability of emergency medical services in the area and the designation of a primary care provider to be responsible for residents in an emergency;
- g. Dental services provided to residents and available in the area;
- h. Nursing services provided to residents, if applicable;
- i. Personal services provided to residents, including supervision of or assistance with activities of daily living;
- j. Activity program;

- k.* Dietary services, including qualifications of the person in charge, consultation service (if applicable) and meal service;
- l.* Other services available as applicable, including social services, physical therapy, occupational therapy, and recreational therapy;
- m.* Housekeeping;
- n.* Laundry;
- o.* Physical plant; and
- p.* Staffing provided to meet residents' needs.

63.3(3) *Renewal application.* In order to obtain a renewal of the specialized residential care facility license, the applicant must submit the following:

- a.* The completed application form 30 days prior to the annual license renewal date of the residential care facility license;
- b.* The fee for a specialized residential care facility license in accordance with 481—paragraph 50.3(2) “a”;
- c.* An approved current certificate signed by the state or local fire inspection authority as to compliance with fire safety rules and regulations;
- d.* Changes to the résumé of care, if any; and
- e.* Changes to the current residency agreement, if any.

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.4(135C) Issuance of license. Licenses are issued to the person, entity or governmental unit with responsibility for the operation of the facility and for compliance with all applicable statutes, rules and regulations.

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.5(135C) General requirements.

63.5(1) The license shall be displayed in the facility in a conspicuous place which is accessible to the public. (III)

63.5(2) The license shall be valid only in the possession of the licensee to whom it is issued.

63.5(3) The posted license shall accurately reflect the current status of the facility. (III)

63.5(4) The license shall expire one year after the date of issuance or as indicated on the license.

63.5(5) The licensee shall:

- a.* Assume the responsibility for the overall operation of the facility. (I, II, III)
- b.* Be responsible for compliance with all applicable laws and with the rules of the department. (I, II, III)
- c.* Provide an organized continuous 24-hour program of care commensurate with the needs of the residents. (I, II, III)

63.5(6) Each citation or a copy of each citation issued by the department for a class I or class II violation shall be prominently posted by the facility in plain view of the residents, visitors, and persons inquiring about placement in the facility. The citation or copy of the citation shall remain posted until the violation is corrected to the satisfaction of the department. (I, II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.6(135C) Required notifications to the department. The department shall be notified:

63.6(1) Thirty days before any proposed change in the residential care facility's functional operation or addition or deletion of required services; (III)

63.6(2) Thirty days before the beginning of the renovation, addition, functional alteration, change of space utilization, or conversion in the residential care facility or on the premises; (III)

63.6(3) Thirty days before closure of the residential care facility; (III)

63.6(4) Within two weeks of any change in administrator; (III)

63.6(5) Ninety days before a change in the category of license; (III)

63.6(6) Thirty days before a change of ownership. The licensee shall:

- a.* Inform the department of the pending change of ownership; (III)

b. Inform the department of the name and address of the prospective purchaser, transferee, assignee, or lessee; (III)

c. Submit a written authorization to the department permitting the department to release all information of whatever kind from the department's files concerning the licensee's residential care facility to the named prospective purchaser, transferee, assignee, or lessee. (III)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.7(135C) Administrator. Each facility shall have one person in charge, duly approved by the department or acting in a provisional capacity in accordance with these rules. (III)

63.7(1) Qualifications of an administrator.

a. The administrator shall be at least 21 years of age and shall have a high school diploma or equivalent. (III) In addition, this person shall meet at least one of the following conditions:

(1) Have a two-year degree in human services, psychology, sociology, nursing, health care administration, public administration, or a related field and have a minimum of two years' experience in the field; or (III)

(2) Have a four-year degree in human services, psychology, sociology, nursing, health care administration, public administration, or a related field and have a minimum of one year of experience in the field; or (III)

(3) Have a master's degree in human services, psychology, sociology, nursing, health care administration, public administration, or a related field and have a minimum of one year of experience in the field; or (III)

(4) Be a licensed nursing home administrator; or (III)

(5) Have completed a one-year educational training program approved by the department for residential care facility administrators; or (III)

(6) Have passed the National Association of Long Term Care Administrator Boards (NAB) RC/AL administrator licensure examination; or

(7) Have two years of direct care experience and at least six months of administrative experience in a residential care facility. (III)

b. The administrator shall have at least one year of documented experience in a supervisory or direct care position working with persons with an intellectual disability, mental illness, a developmental disability, or brain injury.

c. An individual employed as an administrator on May 16, 2018, will be deemed to meet the requirements of this subrule.

63.7(2) Duties of an administrator. The administrator shall:

a. Select and direct competent personnel who provide services for the residential care program. (III)

b. Provide in-service educational programming for all employees with direct resident contact and maintain records of programs and participants. (III) In-service educational programming offered during each calendar year shall include, at minimum, the following topics: (I, II, III)

(1) Infection control.

(2) Emergency preparedness (e.g., fire, tornado, flood, 911).

(3) Meal time procedures/dietary.

(4) Resident activities.

(5) Mental illness, brain injury or intellectual disabilities, including behavioral intervention, de-escalation, and crisis intervention techniques.

(6) Resident safety/supervision.

(7) Resident rights.

(8) Medication education, to include administration, storage and drug interactions.

(9) Resident service plans/programming/goals.

63.7(3) Administrator serving at more than one residential care facility. The administrator may be responsible for no more than 150 beds in total if the administrator is an administrator of more than one facility. (II)

a. An administrator of more than one facility shall designate in writing an administrative staff person in each facility who shall be responsible for directing programs in the facility.

b. The administrative staff person designated by the administrator shall:

(1) Have at least one year of documented experience in a supervisory or direct care position working with persons with an intellectual disability, mental illness, a developmental disability, or brain injury; (II, III)

(2) Be knowledgeable of the operation of the facility; (II, III)

(3) Have access to records concerned with the operation of the facility; (II, III)

(4) Be capable of carrying out administrative duties and of assuming administrative responsibilities; (II, III)

(5) Be at least 21 years of age; (III)

(6) Be empowered to act on behalf of the licensee concerning the health, safety and welfare of the residents; and (II, III)

(7) Have training in emergency response, including how to respond to residents' sudden illnesses. (II, III)

c. If an administrator serves more than one facility, the administrator must designate in writing regular and specific times during which the administrator will be available to consult with staff and residents to provide direction and supervision of resident care and services. (II, III)

63.7(4) Provisional administrator. A provisional administrator may be appointed on a temporary basis by the residential care facility licensee to assume the administrative responsibilities for a residential care facility for a period not to exceed one year when the facility has lost its administrator and has not been able to replace the administrator, provided that the department has been notified and has approved the provisional administrator prior to the date of the provisional administrator's appointment. (III) The provisional administrator must meet the requirements of paragraph 63.7(3) "b."

63.7(5) Temporary absence of administrator.

a. In the temporary absence of the administrator, a responsible person shall be designated in writing to the department to be in charge of the facility. (III) The person designated shall:

(1) Be knowledgeable of the operation of the facility; (III)

(2) Have access to records concerned with the operation of the facility; (III)

(3) Be capable of carrying out administrative duties and of assuming administrative responsibilities; (III)

(4) Be at least 21 years of age; (III)

(5) Be empowered to act on behalf of the licensee during the administrator's absence concerning the health, safety, and welfare of the residents; (III)

(6) Have training in emergency response, including how to respond to residents' sudden illnesses. (II, III)

b. If the administrator is absent for more than six weeks, a provisional administrator must be appointed pursuant to subrule 63.7(4).

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.8(135C) Personnel.

63.8(1) Alcohol and drug use prohibited. No person under the influence of intoxicating drugs or alcoholic beverages shall be permitted to provide services in a residential care facility. (I, II)

63.8(2) Job description. There shall be a written job description developed for each category of worker. The job description shall include the job title, responsibilities and qualifications. (III)

63.8(3) Employee criminal record, child abuse and dependent adult abuse checks and employment of individuals who have committed a crime or have a founded abuse. The facility shall comply with the requirements found in Iowa Code section 135C.33 and rule 481—50.9(135C) related to completion of criminal record checks, child abuse checks, and dependent adult abuse checks and to employment of individuals who have committed a crime or have a founded abuse. (I, II, III)

63.8(4) Personnel record. A personnel record shall be kept for each employee and shall include but not be limited to the following information about the employee: name and address; social security

number; date of birth; date of employment; position; job description; experience and education; results of criminal record checks, child abuse checks and dependent adult abuse checks; and date of discharge or resignation. (III)

63.8(5) *Supervision and staffing.*

- a. The facility shall provide sufficient staff to meet the needs of the residents served. (I, II, III)
- b. Personnel in a specialized residential care facility shall provide 24-hour coverage for residential care services. Personnel shall be up and dressed when residents are awake. (I, II, III)
- c. Direct care staff shall be present in the facility unless all residents are involved in activities away from the facility. (I, II, III)
- d. Staff shall be aware of and provide supervision levels based on the present needs of the residents in the staff's care. The facility shall document the supervision of residents who require more than general supervision, as defined by facility policy. (I, II, III)
- e. The facility shall maintain an accurate record of actual hours worked by employees. (III)

63.8(6) *Physical examination and screening.* Employees shall have a physical examination within 12 months prior to beginning employment and every four years thereafter. Screening and testing for tuberculosis shall be conducted pursuant to 481—Chapter 59. (I, II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.9(135C) General policies. The licensee shall establish and implement written policies and procedures as set forth in this rule. The policies and procedures shall be available for review by the department, other agencies designated by Iowa Code section 135C.16(3), staff, residents, residents' families or legal representatives, and the public and shall be reviewed by the licensee annually. (II)

63.9(1) *Facility operation.* The licensee shall establish written policies for the operation of the facility, including but not limited to the following: (III)

- a. Personnel; (III)
- b. Admission; (III)
- c. Evaluation services; (II, III)
- d. Programming and individual program plans; (II, III)
- e. Registered sex offender management; (II, III)
- f. Crisis intervention; (II, III)
- g. Discharge or transfer; (III)
- h. Medication management, including self-administration of medications and chemical restraints; (III)
- i. Resident property; (II, III)
- j. Resident finances; (II, III)
- k. Records; (III)
- l. Health and safety; (II, III)
- m. Nutrition; (III)
- n. Physical facilities and maintenance; (III)
- o. Resident rights; (II, III)
- p. Investigation and reporting of alleged dependent adult abuse; (II, III)
- q. Investigation and reporting of accidents or incidents; (II, III)
- r. Transportation of residents; (II, III)
- s. Resident supervision; (II, III)
- t. Smoking; (III)
- u. Visitors; (III)
- v. Disaster/emergency planning; (III) and
- w. Infection control. (III)

63.9(2) *Personnel policies.* Written personnel policies shall include the hours of work and attendance at educational programs. (III)

63.9(3) *Infection control.* The facility shall have a written and implemented infection control program, which shall include policies and procedures based on guidelines issued by the Centers for

Disease Control and Prevention, U.S. Department of Health and Human Services. The infection control program shall address the following:

- a. Techniques for hand washing; (I, II, III)
- b. Techniques for the handling of blood, body fluids, and body wastes; (I, II, III)
- c. Dressings, soaks or packs; (I, II, III)
- d. Infection identification; (I, II, III)
- e. Resident care procedures to be used when there is an infection present; (I, II, III)
- f. Sanitation techniques for resident care equipment; (I, II, III)
- g. Techniques for sanitary use and reuse of feeding syringes and single-resident use and reuse of urine collection bags; (I, II, III) and
- h. Techniques for use and disposal of needles, syringes, and other sharp instruments. (I, II, III)

63.9(4) Resident care techniques. The facility shall have written and implemented procedures to be followed if a resident needs any of the following treatment or devices:

- a. Intravenous or central line catheter; (I, II, III)
- b. Urinary catheter; (I, II, III)
- c. Respiratory suction, oxygen or humidification; (I, II, III)
- d. Decubitus care; (I, II, III)
- e. Tracheostomy; (I, II, III)
- f. Nasogastric or gastrostomy tubes; (I, II, III)
- g. Sanitary use and reuse of feeding syringes and single-resident use and reuse of urine collection bags. (I, II, III)

63.9(5) Emergency care. The facility shall establish written policies for the provision of emergency medical care to residents and employees in case of sudden illness or accident. The policies shall include a list of those individuals to be contacted in case of an emergency. (I, II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.10(135C) Admission, transfer and discharge.

63.10(1) General admission policies.

a. Residents shall be admitted to a specialized residential care facility only on a written order signed by a primary care provider or psychiatrist, specifying the level of care, and certifying that the individual being admitted requires no more than personal care and supervision and does not require routine nursing care. (II, III)

b. No residential care facility shall admit or retain a resident who is in need of greater services than the facility can provide. (I, II, III)

c. No residential care facility shall admit more residents than the number of beds for which the facility is licensed. (II, III)

d. A residential care facility is not required to admit an individual through court order, referral or other means without the express prior approval of the administrator. (III)

e. The admission of a resident shall not grant the residential care facility the authority or responsibility to manage the personal affairs of the resident except as may be necessary for the safety of the resident and the safe and orderly management of the residential care facility as required by these rules. (III)

f. Individuals under the age of 18 shall not be admitted to a residential care facility without prior written approval by the department. A distinct part of a residential care facility, segregated from the adult section, may be established based on a résumé of care that is submitted by the licensee or applicant and is commensurate with the needs of the residents of the residential care facility and that has received the department's review and approval. (III)

g. No health care facility and no owner, administrator, employee or representative thereof shall act as guardian, trustee, or conservator for any resident's property unless such resident is related within the third degree of consanguinity to the person acting as guardian. (III)

63.10(2) Discharge or transfer.

- a. Notification shall be made to the legal representative, primary care provider, psychiatrist, if any, and sponsoring agency, if any, prior to the transfer or discharge of any resident. (III)
- b. The licensee shall not refuse to discharge or transfer a resident when the primary care provider, family, resident, or legal representative requests such transfer or discharge. (II, III)
- c. Advance notification will be made to the receiving facility prior to the transfer of any resident. (III)
- d. When a resident is transferred or discharged, the appropriate record will accompany the resident to ensure continuity of care. "Appropriate record" includes the resident's face sheet, service plan, most recent orders of the primary care provider and any notifications of upcoming scheduled appointments. (II, III)
- e. When a resident is transferred or discharged, the resident's unused prescriptions shall be sent with the resident or with a legal representative only upon the written order of a primary care provider. (II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.11(135C) Involuntary discharge or transfer.

63.11(1) *Involuntary discharge or transfer permitted.* A facility may involuntarily discharge or transfer a resident for only one of the following reasons:

- a. Medical reasons;
- b. The resident's welfare or that of other residents;
- c. Repeated refusal by the resident to participate in the resident's service plan;
- d. Due to action pursuant to Iowa Code chapter 229; or
- e. Nonpayment for the resident's stay, as described in the residency agreement for the resident's stay.

63.11(2) *Medical reasons.* Medical reasons for transfer or discharge shall be based on the resident's needs and shall be determined and documented in the resident's record by the primary care provider. Transfer or discharge may be required in order to provide a different level of care to the resident. (II)

63.11(3) *Welfare of a resident.* Welfare of a resident or that of other residents refers to a resident's social, emotional, or physical well-being. A resident may be transferred or discharged because the resident's behavior poses a continuing threat to the resident (e.g., suicidal) or to the well-being of other residents or staff (e.g., the resident's behavior is incompatible with other residents' needs and rights). Written documentation that the resident's continued presence in the facility would adversely affect the resident's own welfare or that of other residents shall be made by the administrator or designee and shall include specific information to support this determination. (II)

63.11(4) *Notice.* Involuntary transfer or discharge of a resident from a facility shall be preceded by a written notice to the resident and the responsible party. (II, III)

- a. The notice shall contain all of the following information:
 - (1) The stated reason for the proposed transfer or discharge. (II)
 - (2) The effective date of the proposed transfer or discharge. (II)
 - (3) A statement, in not less than 12-point type, that reads as follows: (II)

You have a right to appeal the facility's decision to transfer or discharge you. If you think you should not have to leave this facility, you may request a hearing, in writing or verbally, with the Iowa department of inspections and appeals (hereinafter referred to as "department") within 7 days after receiving this notice. You have a right to be represented at the hearing by an attorney or any other individual of your choice. If you request a hearing, it will be held no later than 14 days after receipt of your request by the department and you will not be transferred prior to a final decision. In emergency circumstances, extension of the 14-day requirement may be permitted upon request to the department's designee. If you lose the

hearing, you will not be transferred before the expiration of (1) 30 days following receipt of the original notice of the discharge or transfer, or (2) 5 days following final decision of such hearing, including exhaustion of all appeals, whichever occurs later. To request a hearing or receive further information, call the department at (515)281-4115, or write to the department to the attention of: Administrator, Division of Health Facilities, Department of Inspections and Appeals, Lucas State Office Building, Des Moines, Iowa 50319-0083.

b. The notice shall be personally delivered to the resident and a copy placed in the resident's record. A copy shall also be transmitted to the department; the resident's responsible party; the resident's primary care provider; and the person or agency responsible for the resident's placement, maintenance, and care in the facility. The notice shall indicate that a copy has been transmitted to the required parties by using the abbreviation "cc:" and listing the names of all parties to whom copies were sent. (II)

c. The notice required by paragraph 63.11(4) "a" shall be provided at least 30 days in advance of the proposed transfer or discharge unless one of the following occurs: (II)

(1) An emergency transfer or discharge is mandated by the resident's health care needs and is in accordance with the written orders and medical justification of the primary care provider. Emergency transfers or discharges may also be mandated in order to protect the health, safety, or well-being of other residents and staff from the resident being transferred. (II)

(2) The transfer or discharge is subsequently agreed to by the resident or the resident's responsible party, and notification is given to the responsible party, the resident's primary care provider, and the person or agency responsible for the resident's placement, maintenance, and care in the facility.

d. A hearing requested pursuant to this subrule shall be held in accordance with subrule 63.11(6).

63.11(5) *Emergency transfer or discharge.* In the case of an emergency transfer or discharge, the resident must be given a written notice prior to or within 48 hours following transfer or discharge. (II, III)

a. A copy of this notice must be placed in the resident's file. The notice must contain all of the following information:

- (1) The stated reason for the transfer or discharge. (II)
- (2) The effective date of the transfer or discharge. (II)
- (3) A statement, in not less than 12-point type, that reads: (II)

You have a right to appeal the facility's decision to transfer or discharge you on an emergency basis. If you think you should not have to leave this facility, you may request a hearing, in writing or verbally, with the Iowa department of inspections and appeals (hereinafter referred to as "department") within 7 days after receiving this notice. You have the right to be represented at the hearing by an attorney or any other individual of your choice. If you request a hearing, it will be held no later than 14 days after receipt of your request by the department. You may be transferred or discharged before the hearing is held or before a final decision is rendered. If you win the hearing, you have the right to be transferred back into the facility. To request a hearing or receive further information, call the department at (515)281-4115, or write to the department to the attention of: Administrator, Division of Health Facilities, Department of Inspections and Appeals, Lucas State Office Building, Des Moines, Iowa 50319-0083.

b. The notice shall be personally delivered to the resident and a copy placed in the resident's record. A copy shall also be transmitted to the department; the resident's responsible party; the resident's primary care provider; and the person or agency responsible for the resident's placement, maintenance, and care in the facility. The notice shall indicate that a copy has been transmitted to the required parties by using the abbreviation "cc:" and listing the names of all parties to whom copies were sent. (II)

c. A hearing requested pursuant to this subrule shall be held in accordance with subrule 63.11(6).

63.11(6) *Hearing.*

a. Request for hearing.

- (1) The resident must request a hearing within 7 days of receiving the written notice.

(2) The request must be made to the department, either in writing or verbally.

b. The hearing shall be held no later than 14 days after receipt of the request by the department unless the resident requests an extension due to emergency circumstances.

c. Except in the case of an emergency discharge or transfer, a request for a hearing shall stay a transfer or discharge pending a final decision, including the exhaustion of all appeals. (II)

d. The hearing shall be heard by a department of inspections and appeals administrative law judge pursuant to Iowa Code chapter 17A and 481—Chapter 10. The hearing shall be public unless the resident or the resident's legal representative requests in writing that the hearing be closed. In a determination as to whether a transfer or discharge is authorized, the burden of proof by a preponderance of evidence rests on the party requesting the transfer or discharge.

e. Notice of the date, time, and place of the hearing shall be sent by certified mail or delivered in person to the facility, the resident, the responsible party, and the office of the long-term care ombudsman not later than 5 full business days after receipt of the request. The notice shall also inform the facility and the resident or the responsible party that they have a right to appear at the hearing in person or be represented by an attorney or other individual. The appeal shall be dismissed if neither party is present or represented at the hearing. If only one party appears or is represented, the hearing shall proceed with one party present. A representative of the office of the long-term care ombudsman shall have the right to appear at the hearing.

f. The administrative law judge's written decision shall be mailed by certified mail to the licensee, resident, responsible party, and the office of the long-term care ombudsman within 10 working days after the hearing has been concluded.

63.11(7) *Nonpayment.* If nonpayment is the basis for involuntary transfer or discharge, the resident shall have the right to make full payment up to the date that the discharge or transfer is to be made and then shall have the right to remain in the facility. (II)

63.11(8) *Discussion of involuntary transfer or discharge.* Within 48 hours after notice of involuntary transfer or discharge has been received by the resident, the facility shall discuss the involuntary transfer or discharge with the resident, the resident's responsible party, and the person or agency responsible for the resident's placement, maintenance, and care in the facility. (II)

a. The facility administrator or other appropriate facility representative serving as the administrator's designee shall provide an explanation and discussion of the reasons for the resident's involuntary transfer or discharge. (II)

b. The content of the explanation and discussion shall be summarized in writing, shall include the names of the individuals involved in the discussion, and shall be made part of the resident's record. (II)

c. The provisions of this subrule do not apply if the involuntary transfer or discharge has already occurred pursuant to subrule 63.11(5) and emergency notice is provided within 48 hours.

63.11(9) *Transfer or discharge planning.*

a. The facility shall develop a plan to provide for the orderly and safe transfer or discharge of each resident to be transferred or discharged. (II)

b. To minimize the possible adverse effects of the involuntary transfer, the resident shall be offered counseling services by the sending facility before the involuntary transfer and by the receiving facility after the involuntary transfer. Counseling, if accepted, shall be provided by a licensed mental health professional as defined in Iowa Code section 228.1(6). Counseling shall be documented in the resident's record. (II)

c. The counseling requirement in paragraph 63.11(9)“b” does not apply if the discharge has already occurred pursuant to subrule 63.11(5) and emergency notice is provided within 48 hours.

d. The receiving health care facility of a resident involuntarily transferred shall immediately formulate and implement a plan of care which takes into account possible adverse effects the transfer may cause. (II)

63.11(10) *Transfer upon revocation of license or voluntary closure.* Residents shall not have the right to a hearing to contest an involuntary discharge or transfer resulting from the revocation of the facility's license by the department of inspections and appeals. In the case of the voluntary closure of a facility, a period of 30 days must be allowed for an orderly transfer of residents to other facilities.

63.11(11) Intrafacility transfer.

a. Residents shall not be arbitrarily relocated from room to room within a licensed health care facility. (I, II) Involuntary relocation may occur only in the following situations, which shall be documented in the resident's record: (II)

- (1) Incompatibility with or disturbing to other roommates.
- (2) For the welfare of the resident or other residents of the facility.
- (3) To allow a new admission to the facility that would otherwise not be possible due to separation of roommates by sex.
- (4) In the case of a resident whose source of payment was previously private, but who now is eligible for Title XIX (Medicaid) assistance, the resident may be transferred from a private room to a semiprivate room or from one semiprivate room to another.

(5) Reasonable and necessary administrative decisions regarding the use and functioning of the building.

b. Unreasonable and unjustified reasons for changing a resident's room without the concurrence of the resident or responsible party include:

(1) Change from private pay status to Title XIX, except as outlined in subparagraph 63.11(11)"a"(4). (II)

(2) As punishment or behavior modification, except as specified in subparagraph 63.11(11)"a"(1). (II)

(3) Discrimination on the basis of race or religion. (II)

c. If intrafacility relocation is necessary for reasons outlined in paragraph 63.11(11)"a," the resident shall be notified at least 48 hours prior to the transfer and the reason therefor shall be explained. The responsible party shall be notified as soon as possible. The notification shall be documented in the resident's record and signed by the resident or responsible party. (II, III)

d. If emergency relocation is required in order to protect the safety or health of the resident or other residents, the notification requirements may be waived. The conditions of the emergency shall be documented. The family or responsible party shall be notified immediately or as soon as possible of the condition that necessitates emergency relocation, and such notification shall be documented. (II, III)

e. A transfer to a part of a facility that has a different license must be handled the same way as a transfer to another facility, and not as an intrafacility transfer. (II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.12(135C) Residency agreement.

63.12(1) Each residency agreement shall:

a. State the base rate or scale per day or per month, the services included, and the method of payment. (III)

b. Contain a complete schedule of all offered services for which a fee may be charged in addition to the base rate. (III) Furthermore, the agreement shall:

(1) Stipulate that no further additional fees shall be charged for items not contained in the complete schedule of services; (III)

(2) State the method of payment for additional charges; (III)

(3) Contain an explanation of the method of assessment of such additional charges and an explanation of the method of periodic reassessment, if any, resulting in changing such additional charges; (III)

(4) State that additional fees may be charged to the resident for nonprescription drugs, other personal supplies, and services provided by a barber, beautician, and such. (III)

c. Contain an itemized list of services to be provided to the resident based on an assessment at the time of the resident's admission and in consultation with the administrator and including the specific fee the resident will be charged for each service and the method of payment. (III)

d. Include the total fee to be charged initially to the resident. (III)

e. State the conditions whereby the facility may make adjustments to its overall fees for resident care as a result of changing costs. (II, III) Furthermore, the agreement shall provide that the facility shall give:

(1) Written notification to the resident, or the responsible party when appropriate, of changes in the overall rates of both base and additional charges at least 30 days prior to the effective date of such changes; (II, III)

(2) Notification to the resident, or the responsible party when appropriate, of changes in additional charges, based on a change in the resident's condition. Notification must occur prior to the date such revised additional charges begin. If notification is given orally, subsequent written notification must also be given within a reasonable time, not to exceed one week, listing specifically the adjustments made. (II, III)

f. State the terms of agreement in regard to a refund of all advance payments in the event of the transfer, death, or voluntary or involuntary discharge of the resident. (II, III)

g. State the terms of agreement concerning the holding of and charging for a bed when a resident is hospitalized or leaves the facility temporarily for recreational or therapeutic reasons. The terms shall contain a provision that the bed will be held at the request of the resident or the resident's responsible party. (II, III)

(1) The facility shall ask the resident or responsible party whether the resident's bed should be held. This request shall be made before the resident leaves or within 48 hours after the resident leaves. The inquiry and the response shall be documented. (II, III)

(2) The facility shall inform the resident or responsible party that, when requested, the bed may be held beyond the number of days designated by the funding source, as long as payments are made in accordance with the agreement. (II, III)

h. State the conditions under which the involuntary discharge or transfer of a resident would be effected. (II, III)

i. Set forth any other matters deemed appropriate by the parties to the agreement. No agreement or any provision thereof shall be drawn or construed so as to relieve any health care facility of any requirement or obligation imposed upon it by this chapter or any standards or rules in force pursuant to this chapter. (II, III)

63.12(2) Each party to the residency agreement shall be provided a copy of the signed agreement. (II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.13(135C) Medical examinations.

63.13(1) Each resident in a residential care facility shall have a designated primary care provider who may be contacted when needed. (II, III)

63.13(2) Each resident admitted to a residential care facility shall have a physical examination prior to admission. (II, III)

a. If the resident is admitted directly from a hospital, a copy of the hospital admission physical and discharge summary may be a part of the record in lieu of an additional physical examination. A record of the examination, signed by the primary care provider, shall be a part of the resident's record. (II, III)

b. The record of the admission physical examination and medical history shall portray the current medical status of the resident and shall include the resident's name, sex, age, medical history, physical examination, diagnosis, statement of medical concerns, and results of any diagnostic procedures. (II, III)

c. Screening and testing for tuberculosis shall be conducted pursuant to 481—Chapter 59. (I, II, III)

63.13(3) The person in charge shall immediately notify the primary care provider of any accident, injury or adverse change in the resident's condition that has the potential for requiring further medical treatment. (I, II, III)

63.13(4) Each resident shall be visited by or shall visit the resident's primary care provider at least once each year. The one-year period shall be measured from the date of admission and does not include the resident's preadmission physical. (III)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.14(135C) Records.

63.14(1) *Resident record.* The licensee shall keep a permanent record on all residents admitted to a specialized residential care facility with all entries current, dated, and signed. (III) The record shall include:

- a. Name and previous address of resident; (III)
- b. Birth date, sex, and marital status of resident; (III)
- c. Church affiliation; (III)
- d. Primary care provider's name, telephone number, and address; (III)
- e. Dentist's name, telephone number, and address; (III)
- f. Name, address, and telephone number of next of kin or legal representative; (III)
- g. Name, address, and telephone number of person to be notified in case of emergency; (III)
- h. Mortuary's name, telephone number, and address; (III)
- i. Pharmacist's name, telephone number, and address; (III)
- j. Physical examination and medical history; (III)
- k. Certification by the primary care provider that the resident requires no more than personal care and supervision, but does not require nursing care; (III)
- l. Primary care provider's orders for medication, treatment, and diet in writing and signed by the primary care provider; (III)
- m. A notation of yearly or other visits to primary care provider or other professional services; (III)
- n. Any change in the resident's condition; (II, III)
- o. If the primary care provider has certified that the resident is capable of taking prescribed medications, the resident shall be required to keep the administrator advised of current medications, treatments, and diet. The administrator shall keep a listing of medication, treatments, and diet prescribed by the primary care provider for each resident; (III)
- p. If the primary care provider has certified that the resident is not capable of taking prescribed medication, it must be administered by a qualified person of the facility. A qualified person shall be defined as either a registered or licensed practical nurse or an individual who has completed the state-approved training course in medication administration, including a medication manager or certified medication aide; (II)
- q. Medications administered by an employee of the facility shall be recorded on a medication record by the individual who administers the medication; (II, III)
- r. A notation describing the resident's condition on admission, transfer, and discharge; (III)
- s. In the event of a resident's death, notations in the resident's record shall include the date and time of the resident's death, the circumstances of the resident's death, the disposition of the resident's body, and the date and time that the resident's family and primary care provider were notified of the resident's death; (III)
- t. A copy of instructions given to the resident, legal representative, or facility in the event of discharge or transfer; (III)
- u. Disposition of valuables; (III)
- v. Current individual program plans. (II, III)

63.14(2) *Confidentiality of resident records.*

a. Each resident shall be ensured confidential treatment of all information contained in the resident's records. The resident's written consent shall be required for the release of information to persons not otherwise authorized under law to receive it. (II)

b. The facility shall limit access to any medical records to staff and consultants providing professional service to the resident. This is not meant to preclude access by representatives of state and federal regulatory agencies. (II)

c. Similar procedures shall safeguard the confidentiality of residents' personal records, e.g., financial records and social services records. Only those personnel concerned with the financial affairs of the residents may have access to the financial records. This is not meant to preclude access by representatives of state and federal regulatory agencies. (II)

d. The resident or the resident's responsible party shall be entitled to examine all information contained in the resident's record and shall have the right to secure full copies of the record at reasonable cost upon request, unless the primary care provider determines the disclosure of the record or section thereof is contraindicated in which case this information will be deleted before the record is made available to the resident or responsible party. This determination and the reasons for it must be documented in the resident's record. (II)

63.14(3) Incident record.

a. Each residential care facility shall maintain an incident record report and shall have available incident report forms. (II, III)

b. Report of incidents shall be in detail on an incident report form. (III)

c. The person in charge at the time of the incident shall oversee the preparation of and sign the incident report. The administrator or designee shall review, sign and date the incident report within 72 hours of the accident, incident or unusual occurrence. (II, III)

d. An incident report shall be completed for every accident or incident where there is apparent injury or where an injury of unknown origin may have occurred. (II)

e. An incident report shall be completed for every accident, incident or unusual occurrence within the facility or on the premises that affects a resident, visitor, or employee. (II, III)

f. A copy of the incident report shall be kept on file in the facility. (II, III)

63.14(4) Retention of records.

a. Records shall be retained in the facility for five years following the termination of services to a resident. (III)

b. Records shall be retained within the facility upon change of ownership. (III)

c. When the facility ceases to operate, a copy of the resident's record shall be released to the facility to which the resident is transferred. (III)

d. When the facility ceases to operate, records shall be maintained for five years in a clean, dry secured storage area. (III)

63.14(5) Electronic records. In addition to the access provided in 481—subrule 50.10(2), an authorized representative of the department shall be provided unrestricted access to electronic records pertaining to the care provided to the residents of the facility. (II, III)

a. If access to an electronic record is requested by the authorized representative of the department, the facility may provide a tutorial on how to use its particular electronic system or may designate an individual who will, when requested, access the system, respond to any questions or assist the authorized representative as needed in accessing electronic information in a timely fashion. (II, III)

b. The facility shall provide a terminal where the authorized representative may access records. (II, III)

c. If the facility is unable to provide direct print capability to the authorized representative, the facility shall make available a printout of any record or part of a record on request in a time frame that does not intentionally prevent or interfere with the department's survey or investigation. (II, III)

63.14(6) Reports to the department. The licensee shall furnish statistical information concerning the operation of the facility to the department on request. (III)

63.14(7) Personnel record.

a. Personnel records for each employee shall be kept in accordance with subrule 63.8(4). (III)

b. The personnel records shall be made available for review upon request by the department. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.15(135C) Resident care and personal services.

63.15(1) A complete change of bed linens shall be provided at least once a week and more often if necessary. (III)

63.15(2) Residents shall receive sufficient supervision to promote personal cleanliness. (II, III)

63.15(3) Residents shall have clean clothing as needed. Clothing shall be appropriate to residents' activities and to the weather. (III)

63.15(4) Residents shall be encouraged to bathe at least twice a week. (II, III)

63.15(5) All nonambulatory residents shall be housed on the grade level floor unless the facility has a suitably sized elevator. (II)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.16(135C) Drugs.

63.16(1) Drug storage.

a. Residents who have been certified in writing by their primary care provider as capable of taking their own medications may retain these medications in their bedroom, but locked storage must be provided, with staff and the resident having access, and the drug storage shall be kept locked when not in use. Monitoring of the storage, administration, and documentation by the resident shall be carried out by a person who meets the requirements of subrule 63.16(3) and is responsible for administering medications. (II, III)

b. Drug storage for residents who are unable to take their own medications and require supervision shall meet the following requirements:

(1) Locked storage for drugs, solutions, and prescriptions shall be provided. (III)

(2) A bathroom shall not be used for drug storage. (III)

(3) The drug storage shall be kept locked when not in use. (III)

(4) The drug storage key shall be secured and available only to those employees charged with the responsibility of administering medications. (II, III)

(5) Schedule II drugs, as defined by Iowa Code chapter 124, shall be kept in a locked box within the locked drug storage. (II, III)

(6) Medications requiring refrigeration shall be kept locked in a refrigerator and separated from food and other items. (II, III)

(7) Drugs for external use shall be stored separately from drugs for internal use. (II, III)

(8) All potent, poisonous, or caustic materials shall be stored separately from drugs, shall be plainly labeled and stored in a specific, well-illuminated cabinet, closet, or storeroom, and shall be made accessible only to authorized persons. (I, II)

(9) Inspection of drug storage shall be made by the administrator or designee and a registered pharmacist not less than once every three months. The inspection shall be verified by a report signed by the administrator and the pharmacist and filed with the administrator. The report shall include, but not be limited to, certification of the absence of the following: expired drugs, deteriorated drugs, improper labeling, drugs for which there is no current primary care provider's order, and drugs improperly stored. (III)

(10) Bulk supplies of prescription drugs for multiresident use shall not be kept in a residential care facility. (III)

63.16(2) Drug safeguards.

a. All prescribed medications shall be clearly labeled indicating the resident's full name, primary care provider's name, prescription number, name and strength of drug, dosage, directions for use, date of issue, and name and address and telephone number of pharmacy or primary care provider issuing the drug. Where unit dose is used, prescribed medications shall, at a minimum, indicate the resident's full name, primary care provider's name, name and strength of drug, and directions for use. Standard containers shall be utilized for dispensing drugs. (III)

b. Sample medications provided by the resident's primary care provider shall clearly identify to whom the medications belong. (III)

c. Medication containers having soiled, damaged, illegible, or makeshift labels shall be returned to the issuing pharmacist, pharmacy, or primary care provider for relabeling or disposal. (III)

d. The medication for each resident shall be kept or stored in the original containers unless the resident is participating in an individualized medication program. (II, III)

e. Unused prescription drugs shall be destroyed by the person in charge, in the presence of a witness, and with a notation made on the resident's record or shall be returned to the supplying pharmacist. (III)

f. Prescriptions shall be refilled only with the permission of the resident's primary care provider. (II, III)

g. Medications prescribed for one resident shall not be administered to or allowed in the possession of another resident. (I, II)

h. Instructions shall be requested from the Iowa board of pharmacy concerning disposal of unused Schedule II drugs prescribed for a resident who has died or for whom the Schedule II drug was discontinued. (III)

i. Discontinued medications shall be destroyed within a specified time by a responsible person, in the presence of a witness, and with a notation made to that effect or shall be returned to the pharmacist for destruction. Drugs listed under the Schedule II drugs shall be destroyed in accordance with the requirements established by the Iowa board of pharmacy. (II, III)

j. All medication orders which do not specifically indicate the number of doses to be administered or the length of time the drug is to be administered shall be stopped automatically after a given time period. The automatic-stop order may vary for different types of drugs. The resident's primary care provider, in conjunction with the pharmacist, shall institute these policies and provide procedures for review and endorsement. (II, III)

k. No resident shall be allowed to possess any medications unless the primary care provider has certified in writing on the resident's medical record that the resident is mentally and physically capable of doing so. (II)

l. No medications or prescription drugs shall be administered to a resident without a written order signed by the primary care provider. (II)

m. The facility shall establish a policy to govern the distribution of prescribed medications to residents who are on leave from the facility. (II, III)

(1) Medications may be issued to residents who will be on leave from a facility for less than 24 hours. Only those medications needed for the time period that the resident will be on leave from the facility may be issued. Non-child-resistant containers may be used. Instructions shall be provided and include the date, the resident's name, the name of the facility, and the name of the medication, its strength, dose and time of administration. (II, III)

(2) Medication for residents on leave from a facility for longer than 24 hours shall be obtained in accordance with requirements established by the Iowa board of pharmacy. (II, III)

(3) Medication for residents on leave from a facility may be issued only by facility personnel responsible for administering medication. (II, III)

63.16(3) Drug administration—authorized personnel.

a. A properly trained person shall be charged with the responsibility of administering medications as ordered by a primary care provider. (II, III)

b. The person shall have knowledge of the purpose of the drugs and their dangers and contraindications. (II, III)

c. The person shall be a licensed nurse or primary care provider or an individual who has completed the state-approved training course in medication administration, including a medication manager or certified medication aide. (II, III)

d. Prior to taking a department-approved medication aide course, the person shall:

(1) Successfully complete an approved residential aide course, nurse aide course, nurse aide training and testing program or nurse aide competency examination; (III)

(2) Have a letter of recommendation for admission to the medication aide course from the employing facility. (III)

e. A person who is a nursing student or a graduate nurse may take the medication aide challenge examination in place of taking a course. The person shall do all of the following before taking the challenge examination:

(1) Complete a clinical or nursing theory course within six months before taking the challenge examination; (III)

(2) Successfully complete a nursing program pharmacology course within one year before taking the challenge examination; (III)

(3) Provide to the community college a written statement from the nursing program's pharmacology or clinical instructor indicating that the person is competent in medication administration. (III)

f. A person who has written documentation of certification as a medication aide in another state may become a medication aide in Iowa by successfully completing a department-approved nurse aide competency examination and a medication aide challenge examination. The requirements of paragraph 63.16(3)“*d*” do not apply to this person. (III)

63.16(4) Drug administration.

a. Unless the unit dose system is used, the person assigned the responsibility of medication administration must complete the procedure by personally preparing the dose, observing the actual act of swallowing the oral medication, and charting the medication. In facilities where the unit dose system is used, the person assigned the responsibility of medication administration must complete the procedure by observing the actual act of swallowing the oral medication and by charting the medication. Medications shall be prepared on the same shift of the same day that they are administered unless the unit dose system is used. (II)

b. Injectable medications shall be administered as permitted by Iowa law by a registered nurse, licensed practical nurse, primary care provider or pharmacist. For purposes of this subrule, “injectable medications” does not include an epinephrine autoinjector, e.g., an EpiPen. (II, III)

c. A resident certified by the resident's primary care provider as capable of injecting the resident's own insulin may do so. Insulin may be administered pursuant to paragraph 63.16(4)“*b*” or as otherwise authorized by the resident's primary care provider. (II, III) Authorization shall:

- (1) Be in writing,
- (2) Be maintained in the resident's record,
- (3) Be renewed quarterly,
- (4) Include the name of the person authorized to administer the insulin,
- (5) Include documentation by the primary care provider that the authorized person is qualified to administer insulin to that resident. (II, III)

d. A resident may participate in the administration of the resident's own medication if the primary care provider has certified in writing in the resident's medical record that the resident is mentally and physically capable of participating and has explained in writing in the resident's medical record what the resident's participation may include.

e. An individual inventory record shall be maintained for each Schedule II drug prescribed for each resident, with an accurate count and authorized signatures at every shift. (II)

f. The facility may use a unit dose system.

g. Medication aides and medication managers may administer PRN medications without contacting a licensed nurse or primary care provider if all of the following apply: (I, II, III)

(1) A written order from the resident's primary care provider specifies the purpose of the PRN medication and the frequency, dosage and strength of the PRN medication.

(2) The resident's primary care provider provides in writing specific criteria for administering PRN medications.

(3) The pharmacist assesses the resident's use of PRN medications when conducting the inspection of drug storage as required by subparagraph 63.16(1)“*b*”(9).

h. The pharmacist shall assess the use of PRN medications when conducting the inspection of drug storage as required by subparagraph 63.16(1)“*b*”(9). (II, III)

i. Medications administered by an employee of the facility shall be recorded on a medication record by the individual who administers the medication. (I, II, III)

481—63.17(135C) Dental services.

63.17(1) The residential care facility personnel shall assist residents in obtaining annual and emergency dental services and shall arrange transportation for such services. (III)

63.17(2) Dental services shall be performed only on the request of the resident, responsible party, legal representative, or primary care provider. The resident's primary care provider shall be advised of the resident's dental problems. (III)

63.17(3) All dental reports or progress notes shall be included in the resident record as available. The facility shall make reasonable efforts to obtain the records following the provision of services. (III)

63.17(4) Personal care staff shall assist the resident in carrying out the dentist's recommendations. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.18(135C) Dietary.

63.18(1) Dietary staffing. Personnel who are responsible for food preparation or service, or both food preparation and service, shall have an orientation on sanitation and safe food handling prior to handling food and shall have annual in-service training on food protection. (III)

63.18(2) Nutrition and menu planning.

a. Menus shall be planned and followed to meet the nutritional needs of residents in accordance with the primary care provider's orders. Diet orders should be reviewed as necessary, but at least quarterly, by the primary care provider. (II, III)

b. In facilities where residents plan and prepare their own meals, education and support shall be provided to residents regarding proper food preparation, dietary guidelines, and food safety.

c. In facilities where food is regularly prepared for residents, the following shall apply:

(1) Menus shall be planned and served to include foods and amounts necessary to meet federal dietary guidelines. (II, III)

(2) At least three meals or their equivalent shall be offered daily, at regular hours. (II, III)

1. There shall be no more than a 14-hour span between offering a substantial evening meal and breakfast. (II, III)

2. Unless contraindicated, evening snacks shall be offered routinely to all residents. Special nourishments shall be available when ordered by the primary care provider. (II, III)

(3) Menus shall include a variety of foods prepared in various ways. (III)

(4) Menus shall be written at least one week in advance. The current menu shall be located in an accessible place for easy use by persons purchasing, preparing, and serving food. (III)

(5) Records of menus as served shall be filed and maintained for 30 days and shall be available for review by departmental personnel. When substitutions are necessary or requested, they shall be of similar nutritive value and recorded on the menu or in a notebook. (III)

(6) The facility shall provide an alternative choice at scheduled meal times. (III)

63.18(3) Dietary storage, food preparation, and service.

a. All food shall be handled, prepared, served and stored in compliance with the Food Code adopted pursuant to Iowa Code section 137F.2. (I, II, III)

b. Supplies of staple foods for a minimum of a one-week period and of perishable foods for a minimum of a two-day period shall be maintained on the premises. Minimum food portion requirements for a low-cost plan shall conform to information supplied by the bureau of nutrition and health promotion of the department of public health. (II, III)

c. Dishes shall be free of cracks, chips, and stains. (III)

d. If family-style service is used, all leftover prepared food that has been on the table shall be properly handled. (III)

63.18(4) Sanitation in food preparation area. There shall be written procedures established for cleaning all work and serving areas. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.19(135C) Orientation and service plan.

63.19(1) Orientation. Within 24 hours of admission, each resident shall receive orientation to the facility. The orientation program shall be documented in the resident's file and shall include, but shall not be limited to, a review of the resident's rights, the daily schedule, house rules and the facility's evacuation plan. (II, III)

63.19(2) Initial service plan. Within 48 hours of admission, the administrator or the administrator's designee shall develop an initial service plan to address any immediate health and safety needs. The plan shall be based on information gathered from the resident, family, referring party, primary care provider, and other significant persons. The plan shall be followed until the service plan required in subrule 63.19(3) is complete. (I, II, III)

63.19(3) Service plan. Within 30 days of admission, the administrator or the administrator's designee, in conjunction with the resident and the resident's interdisciplinary team, shall develop a written, individualized, and integrated service plan for the resident. The service plan shall be developed and implemented to address the resident's priorities and assessed needs, such as activities of daily living, rehabilitation, activity, and social, behavioral, emotional, physical and mental health. (I, II, III)

a. The service plan shall include measurable goals and objectives and the specific service(s) to be provided to achieve the goals. Each goal shall include the date of initiation and anticipated duration of service(s). Any restriction of rights shall be included in the service plan. (I, II, III)

b. The service plan shall include the documentation procedure for each goal and objective. (II, III)

c. The service plan should be modified to add or delete goals and objectives as the resident's needs change. Communications related to service plan changes or changes in the resident's condition shall occur within five working days of the change and shall be conveyed to all individuals inside and outside the residential care facility who work with the resident, as well as to the resident's responsible party. (I, II, III)

d. The service plan shall be reviewed at least quarterly by relevant staff, the resident and appropriate others, such as the resident's family, case manager and responsible party. The review shall include a written report which addresses a summary of the resident's progress toward goals and objectives and the need for continued services. (I, II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.20(135C) Resident activities program.

63.20(1) Activities program. Each residential care facility shall provide suitable group and individual activities for residents. (III)

a. The activities provided shall be designed to meet the needs and interests of each resident and to assist residents in continuing normal activities within limitations set by the resident's primary care provider. This shall include helping residents continue in their individual interests or hobbies. (III)

b. Residents shall be encouraged, but not required, to participate in activities. (III)

63.20(2) Each resident may participate in activities of social, religious, and community groups at the resident's discretion unless contraindicated for reasons documented by the primary care provider or interdisciplinary team as appropriate in the resident's record. (II)

63.20(3) Residents who wish to meet with or participate in activities of social, religious, or other community groups in or outside of the facility shall be informed, encouraged, and assisted to do so. (II)

63.20(4) Supplies, equipment, and storage.

a. Each facility shall provide a variety of supplies and equipment of a nature calculated to fit the needs and interests of the residents. (III)

b. Storage shall be provided for recreational equipment and supplies. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.21(135C) Residents' rights.

63.21(1) Each facility shall ensure that policies and procedures are written and implemented which include, at a minimum, the provisions of this rule and which govern all areas of service provided by the

facility. These policies and procedures shall be available to staff, residents, residents' families or legal representatives and the public and shall be reviewed annually. (II, III)

63.21(2) Policies and procedures shall include a method for submitting complaints and recommendations by residents or their responsible parties and for ensuring a response and disposition by the facility. (II, III) The written procedures shall:

a. Ensure the provision of assistance to residents as necessary to complete and submit complaints and recommendations; (II, III)

b. Ensure protection of the resident from any form of reprisal or intimidation; (II, III)

c. Include designation of an employee responsible for handling grievances and recommendations; (II, III)

d. Include a method of investigating and assessing the validity of a grievance or recommendation; (II, III) and

e. Include methods of recording grievances and actions taken. (II, III)

63.21(3) Policies and procedures shall include provisions governing access to, duplication of, and dissemination of information from the residents' records. (II, III)

63.21(4) Policies and procedures shall include a provision that each resident shall be fully informed of the resident's rights and responsibilities as a resident and of all rules governing resident conduct and responsibilities. This information must be provided upon the resident's admission or, in the case of residents already in the facility, upon the facility's adoption or amendment of residents' rights policies. (II, III)

a. The facility shall communicate to residents prior to or within five days after admission what residents may expect from the facility and its staff and what is expected from residents. The communication shall be in writing, e.g., in a separate handout or brochure describing the facility, and interpreted verbally, e.g., as part of a preadmission interview, resident counseling, or in individual or group orientation sessions following the resident's admission. (II, III)

b. Residents' rights and responsibilities shall be presented in language understandable to the resident. If the facility serves residents who are non-English-speaking or deaf, steps shall be taken to translate the information into a foreign or sign language. In the case of blind residents, either Braille or a recording shall be provided. Residents shall be encouraged to ask questions about their rights and responsibilities, and these questions shall be answered. (II, III)

c. A statement shall be signed by the resident, or the resident's responsible party if applicable, indicating an understanding of these rights and responsibilities and shall be maintained in the resident's record. The statement shall be signed no later than five days after admission, and a copy of the signed statement shall be given to the resident or responsible party. (II, III)

d. In order to ensure that residents continue to be aware of these rights and responsibilities during their stay, a written copy shall be prominently posted in a location that is available to all residents. (II, III)

e. All residents shall be advised within 30 days following changes made in the statement of residents' rights and responsibilities. Appropriate means shall be utilized to inform non-English-speaking, deaf or blind residents of changes. (II, III)

63.21(5) Choice of primary care provider. Each resident shall be permitted free choice of a primary care provider, and pharmacy, if accessible. The facility may require the selected pharmacy to utilize a drug distribution system compatible with the system currently used by the facility. (II)

63.21(6) Each resident shall be afforded the opportunity to participate in the planning of the resident's total care and treatment, which may include, but shall not be limited to, medical care, nutritional needs, activities, and social work services. Each resident has the right to refuse treatment except as provided by Iowa Code chapter 229. In the case of a resident with a responsible party, the responsible party shall be afforded the opportunity to participate in the planning of the resident's total care and medical treatment and to be informed of the resident's medical condition. (II, III)

63.21(7) Each resident shall be encouraged and assisted throughout the resident's period of stay to exercise the resident's rights as a resident and as a citizen and may voice grievances and recommend

changes in policies and services to administrative staff or to outside representatives of the resident's choice, free from interference, coercion, discrimination, or reprisal. (II)

63.21(8) The facility shall provide ongoing opportunities for residents to be aware of and to exercise their rights as residents. Residents shall be kept informed of changes in policies and services that are more restrictive, and their views shall be solicited prior to action. (II)

63.21(9) The facility shall post in a prominent area the text of Iowa Code section 135C.46 (Retaliation by facility prohibited) and the name, telephone number, and address of the long-term care ombudsman, the department, and the local law enforcement agency to provide residents a further course of redress. (II)

63.21(10) All rights and responsibilities of the resident devolve to the resident's responsible party or any legal surrogate designated in accordance with state law, to the extent permitted by state law. This subrule is not intended to limit the authority of any individual acting pursuant to Iowa Code chapter 144A. (II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.22(135C) Dignity preserved. The resident shall be treated with consideration, respect, and full recognition of dignity and individuality, including privacy in treatment and in care for personal needs. (I, II)

63.22(1) Staff shall display respect for residents when speaking with, caring for, or talking about them, as constant affirmation of their individuality and dignity as human beings. (I, II)

63.22(2) Schedules of daily activities shall allow maximum flexibility for residents to exercise choice about what they will do and when they will do it. Residents' individual preferences regarding such things as menus, clothing, religious activities, friendships, activity programs, entertainment, sleeping and eating, also times to retire at night and arise in the morning shall be elicited and considered by the facility. (II)

63.22(3) Residents shall be examined and treated in a manner that maintains the privacy of their bodies. A closed door or a drawn curtain shall shield the resident from passersby. People not involved in the care of the residents shall not be present without the resident's consent while the resident is being examined or treated. (II)

63.22(4) Privacy of a resident's body also shall be maintained during toileting, bathing, and other activities of personal hygiene, except as needed for resident safety or assistance. (II)

63.22(5) Staff shall knock and be acknowledged before entering a resident's room unless the resident is not capable of a response. This shall not apply under emergency conditions. (II)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.23(135C) Communications. Each resident may communicate, associate, and meet privately with persons of the resident's choice, unless to do so would infringe upon the rights of other residents, and may send and receive personal mail unopened. (II)

63.23(1) Subject to reasonable scheduling restrictions, visiting policies and procedures shall permit residents to receive visits from anyone they wish. Visiting hours shall be posted. (II)

63.23(2) Reasonable, regular visiting hours shall not be less than 12 hours per day and shall take into consideration the special circumstances of each visitor. A particular visitor(s) may be restricted by the facility for one of the following reasons:

- a. The resident refuses to see the visitor(s). (II)
- b. The resident's primary care provider documents specific reasons why such a visit would be harmful to the resident's health. (II)
- c. The visitor's behavior is unreasonably disruptive to the functioning of the facility. This judgment must be made by the administrator, and the reasons shall be documented and kept on file. (II)

63.23(3) Decisions to restrict a visitor are reviewed and reevaluated:

- a. Each time the medical orders are reviewed by the primary care provider;
- b. At least quarterly by the facility's staff; or
- c. At the resident's request. (II)

63.23(4) Space shall be provided for residents to receive visitors in reasonable comfort and privacy. (II)

63.23(5) Telephones shall be available and accessible for residents to make and receive calls with privacy. Residents who need help shall be assisted in using the telephone. (II)

63.23(6) Arrangements shall be made to provide assistance to residents who require help in reading or sending mail. (II)

63.23(7) Residents, including residents court-ordered to the facility, shall be permitted to leave the facility at reasonable times unless there are justifiable reasons established in writing by court order, the primary care provider, the interdisciplinary team, or the facility administrator for refusing permission. (II)

63.23(8) Residents shall not have their personal lives regulated beyond reasonable adherence to meal schedules, bedtime hours, and other written policies which may be necessary for the orderly management of the facility and as required by these rules. However, residents shall be encouraged to participate in recreational programs. (II)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.24(135C) Resident property.

63.24(1) Residents shall be permitted to keep reasonable amounts of personal clothing and possessions for their use while in the facility. The facility shall offer the resident the opportunity to have personal property itemized and documented on an inventory sheet upon the resident's admission. The inventory sheet shall be kept in a safe location which is convenient for the resident to review and update. At discharge, residents may sign off on a list of the personal property they are taking with them. (II, III)

63.24(2) The facility shall provide for the safekeeping of personal effects, funds and other property of its residents. The facility may require that items of exceptional value or that would convey unreasonable responsibilities to the licensee be removed from the premises of the facility for safekeeping. (III)

63.24(3) Any funds or other property belonging to or due a resident, or expendable for the resident's account, which is received by the facility shall be trust funds; shall be kept separate from the funds and property of the facility and of its other residents, or specifically credited to such resident; and shall be used or otherwise expended only for the account of the resident. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.25(135C) Financial affairs—management. Each resident who has not been assigned a guardian or conservator by the court may manage the resident's own personal financial affairs. To the extent the facility assists in management, under written authorization by the resident, the management shall be carried out in accordance with Iowa Code section 135C.24. (II)

63.25(1) The facility shall maintain a written account of all residents' funds received by or deposited with the facility. (II)

63.25(2) An employee shall be designated in writing to be responsible for resident accounts. (II)

63.25(3) The facility shall keep on deposit personal funds over which the resident has control in accordance with Iowa Code section 135C.24. Should the resident request these funds, they shall be given to the resident on request with receipts maintained by the facility and a copy to the resident. In the case of a resident with impaired decision-making skills, the resident's legal representative shall designate a method of disbursing the resident's funds. (II)

63.25(4) If the facility makes financial transactions on a resident's behalf, the facility must document that it has prepared and sent an itemized accounting of disbursements and current balances at least quarterly. A copy of this statement shall be maintained in the resident's financial or business record. (II)

63.25(5) A resident's personal funds shall not be used without the written consent of the resident or the resident's legal representative. (I, II)

63.25(6) A resident's personal funds shall be returned to the resident when the funds have been used without the written consent of the resident or the resident's legal representative. The department

may report findings that resident funds have been used without written consent to the department's investigations division or to the local law enforcement agency, as appropriate. (II)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.26(135C) Resident work. No resident may be required to perform services for the facility, except as provided by Iowa Code section 347B.5. (II)

63.26(1) Residents may not be used to provide a source of labor for the facility against their will. Approval by the primary care provider or psychiatrist is required for all work programs. (I, II)

63.26(2) Residents who perform work for the facility must receive compensation unless the work is part of their approved training program. Persons on the resident census who perform work shall not be used to replace paid employees in fulfilling staffing requirements. (II)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.27(135C) Resident abuse prohibited. Each resident shall receive kind and considerate care at all times and shall be free from mental, physical, sexual, and verbal abuse, exploitation, neglect, and physical injury. (I, II)

63.27(1) Mental abuse includes, but is not limited to, humiliation, harassment, and threats of punishment or deprivation. (I, II)

63.27(2) Physical abuse includes, but is not limited to, corporal punishment and the use of restraints as punishment. (I, II)

63.27(3) Drugs such as tranquilizers shall only be used in accordance with orders of the primary care provider. (I, II)

63.27(4) Allegations of dependent adult abuse. Allegations of dependent adult abuse shall be reported and investigated pursuant to Iowa Code chapter 235E and 481—Chapter 52. (I, II, III)

63.27(5) Staff shall receive training relating to the identification and reporting of dependent adult abuse as required by Iowa Code section 235B.16. (I, II, III)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.28(135C) Crisis intervention. If a facility utilizes physical restraints, the facility shall have written policies that define the uses of physical restraints, designate the administrator or designee as the person who may authorize their use, establish a mechanism for monitoring and controlling their use, and provide staff with proper training. (I, II)

63.28(1) Temporary physical restraint of residents shall be used only under the following conditions: (I, II)

a. An emergency to prevent injury to the resident or to others; or (I, II)

b. For crisis intervention, but shall not be used for punishment, for the convenience of staff or as a substitution for supervision or programming; (I, II) and

c. No staff person shall use any restraint that obstructs the airway of the resident. (I, II)

63.28(2) Authorization for the use of physical restraints must be prior to or immediately after application of the restraint. (I, II)

63.28(3) Prone restraint is prohibited. Staff persons who find themselves involved in the use of a prone restraint when responding to an emergency must take immediate steps to end the prone restraint. (I, II)

63.28(4) The rationale and authorization for the use of physical restraint and staff action and procedures carried out to protect the resident's rights and to ensure safety shall be clearly set forth in the resident's record by the responsible staff persons. (I, II)

63.28(5) The primary care provider, the interdisciplinary team and the resident's responsible party shall be notified of any restraints administered. (I, II, III)

63.28(6) The facility shall provide to the staff a department-approved training program by qualified professionals on physical restraint techniques. (I, II)

a. The facility shall keep a record of training for review by the department and shall include attendance. (II, III)

b. Only staff with documented training in physical restraint and techniques shall be authorized to assist with physical restraint of a resident. (I, II)

c. Under no circumstances shall a resident be allowed to actively or passively assist in the restraint of another resident. (I, II)

63.28(7) Residents shall not be kept behind locked doors. (I, II)

63.28(8) Mechanical restraint is prohibited. Staff persons who find themselves involved in the use of a mechanical restraint when responding to an emergency must take immediate steps to end the mechanical restraint. (I, II)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.29(135C) Safety. The licensee of a residential care facility shall be responsible for the provision and maintenance of a safe environment for residents and personnel. (I, II, III)

63.29(1) Fire safety.

a. All residential care facilities shall meet the fire safety rules and regulations as promulgated by the state fire marshal. (I, II)

b. The size of the facility and needs of the residents shall be taken into consideration in evaluating safety precautions and practices.

63.29(2) Safety duties of administrator. The administrator shall have a written emergency plan to be followed in the event of fire, tornado, explosion, or other emergency. (III)

a. The plan shall be prominently posted in a common area of the building. (III)

b. In-service shall be provided to ensure that all employees are knowledgeable of the emergency plan. (II, III)

63.29(3) Resident safety.

a. Smoking shall be prohibited, except as allowed by Iowa Code chapter 142D, the smokefree air Act. (II, III)

b. Whenever full or empty tanks of oxygen are being used or stored, they shall be securely supported in an upright position. (II, III)

c. Residents shall receive adequate supervision to ensure against hazard from themselves, others, or elements in the environment. (I, II, III)

d. Storage areas for cleaning agents, bleaches, insecticides, or any other poisonous, dangerous, or flammable materials shall be locked. Residents permitted to access these materials shall have an order by their primary care provider stating the resident is able to utilize such materials, and staff shall supervise the residents as identified in the resident's service plan. (I, II, III)

e. Sufficient numbers of noncombustible trash containers with covers shall be available. (III)

f. Residents' personal possessions that may constitute a hazard to residents or others shall be removed and stored. (III)

63.29(4) First-aid kit. A first-aid emergency kit shall be available on each floor in every facility. (II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.30(135C) Housekeeping.

63.30(1) Each resident room shall be cleaned on a routine schedule. (III)

63.30(2) All rooms, corridors, storage areas, linen closets, attics, and basements shall be kept in a clean, orderly condition, free of unserviceable furniture and equipment and accumulations of refuse. (II, III)

63.30(3) A hallway or corridor shall not be used for storage of equipment. (II, III)

63.30(4) All odors shall be kept under control by cleanliness and proper ventilation. (III)

63.30(5) Clothing worn by personnel shall be clean and washable. (III)

63.30(6) All furniture, bedding, linens, and equipment shall be cleaned periodically and before use by another resident. (II, III)

63.30(7) Polishes used on floors shall provide a nonslip finish. (II, III)

63.30(8) Throw or scatter rugs shall have nonskid backing. (II, III)

63.30(9) Entrances, exits, steps, and outside walkways shall be kept free from ice, snow, and other hazards. (II, III)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.31(135C) Maintenance.

63.31(1) The building, grounds, and other buildings shall be maintained in a clean, orderly condition and in good repair. (II, III)

63.31(2) Window treatments and furniture shall be clean and in good repair. (II, III)

63.31(3) Cracks in plaster, peeling wallpaper or paint, and tears or splits in floor coverings shall be promptly repaired or replaced in a professional manner. (II, III)

63.31(4) The electrical systems, including appliances, cords, and switches, shall be maintained to guarantee safe functioning and comply with the National Electric Code. (II, III)

63.31(5) All plumbing fixtures shall function properly and comply with the state plumbing code. (II, III)

63.31(6) Yearly inspections of the heating and cooling systems shall be made to guarantee safe operation. (II, III)

63.31(7) The building, grounds, and other buildings shall be kept free of breeding areas for flies, other insects, and rodents. (II, III)

63.31(8) The facility shall be kept free of flies, other insects, and rodents. (II, III)
[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.32(135C) Laundry.

63.32(1) Residents' personal laundry shall be marked with an identification if commingled with other residents' personal laundry. (III)

63.32(2) Bed linens, towels, and washcloths shall be clean and stain-free. (III)

63.32(3) If laundry is done in the facility, a clean, dry, well-lit area to accommodate a washer and dryer of adequate size to serve the needs of the facility shall be provided. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.33(135C) Garbage and waste disposal.

63.33(1) All garbage shall be gathered, stored, and disposed of in a manner that will not permit transmission of disease, create a nuisance, or provide a breeding or feeding place for vermin or insects. (III)

63.33(2) All containers for refuse shall be watertight and rodent-proof and have tight-fitting covers. (III)

63.33(3) All unlined containers inside of the facility shall be thoroughly cleaned each time the containers are emptied. (III)

63.33(4) All waste shall be properly disposed of in compliance with local ordinances and state codes. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.34(135C) Supplies.

63.34(1) Linen supplies.

a. There shall be an adequate supply of linens so that each resident shall have at least three washcloths, hand towels, and bath towels per week. (III)

b. A complete change of bed linens shall be available in the linen storage area for each bed. (III)

c. Sufficient lightweight, clean, serviceable blankets shall be available. All blankets shall be laundered as often as necessary for cleanliness and freedom from odors. (III)

d. Each bed shall be provided with clean, washable bedspreads. There shall be a supply available when changes are necessary. (III)

e. Adequate storage shall be provided for linens, pillows, and bedding. (III)

63.34(2) Supplies, equipment and storage.

a. All equipment shall be properly cleaned and sanitized before use by another resident. (III)

- b. Clean and sanitary storage shall be provided for equipment and supplies. (III)
 - c. Locked storage should be available for potentially dangerous items such as scissors, knives, and toxic materials. (III)
- [ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.35(135C) Buildings, furnishings, and equipment.

63.35(1) Buildings—general requirements.

- a. All windows shall be supplied with window treatments that are kept clean and in good repair. (III)
- b. Whenever glass sliding doors or transparent panels are used, they shall be marked conspicuously. (III)
- c. The facility shall meet the equivalent requirements of the appropriate group occupancy of the state building code. (III)

63.35(2) Furnishings and equipment.

- a. All furnishings and equipment shall be durable, cleanable, and appropriate to their function. (III)
- b. All resident areas shall be decorated, painted, and furnished to provide a homelike atmosphere. (III)

63.35(3) Dining areas and living rooms.

- a. Living rooms shall be maintained for the use of residents and their visitors and may be used for recreational activities. Living rooms shall be suitably furnished. (III)
- b. Dining areas shall be furnished with dining tables and chairs appropriate to the size and function of the facility. Dining rooms and furnishings shall be kept clean and sanitary. (III)

63.35(4) Bedrooms.

- a. Each resident shall be provided with a standard, single, or twin bed, substantially constructed and in good repair. Rollaway beds, metal cots, or folding beds are not acceptable. (III)
- b. Each bed shall be equipped with the following: casters or glides; clean springs in good repair; a clean, comfortable, well-constructed mattress approximately five inches thick and standard in size for the bed; and clean, comfortable pillows of average bed size. (III)
- c. There shall be a comfortable chair, either a rocking chair or armchair, per resident bed. The resident's personal wishes shall be considered. (III)
- d. There shall be drawer space for each resident's clothing. In a bedroom in which more than one resident resides, drawer space shall be assigned to each resident. (III)
- e. Beds and other furnishings shall not obstruct free passage to and through doorways. (III)
- f. Beds shall not be placed in such a manner that the side of the bed is against the radiator or in close proximity to it unless the radiator is covered so as to protect the resident from contact with it or from excessive heat. (III)
- g. There shall be a wardrobe or closet in each resident's room. Minimum clear dimensions shall be 1 foot 10 inches deep by 1 foot 8 inches wide with full hanging space and provide a clothes rod and shelf. In a multiple bedroom, closet or wardrobe space shall be assigned each resident sufficient for the resident's needs. (III)
- h. Each room shall have sufficient accessible mirrors to serve resident's needs. (III)
- i. Useable floor space of a room shall be no less than 8 feet in any major dimension. (III)
- j. Bedrooms shall have a minimum of 60 square feet of useable floor space per bed for a double room, 80 square feet of useable floor space for a single room. (III)
- k. There shall be no more than two residents per room. (III)

63.35(5) Bath and toilet facilities.

- a. All sinks shall have paper towel dispensers and an available supply of soap. (III)
- b. Toilet paper shall be readily available to residents. (III)

c. There shall be a minimum of one toilet and bath facility for five residents. (III)

63.35(6) Heating. A centralized heating system shall be maintained in good working order and capable of maintaining a comfortable temperature for residents of the facility. Portable units or space heaters are prohibited from being used in the facility except in an emergency. (II, III)

63.35(7) Water supply.

a. Private sources of water supply shall be tested annually and the report made available for review by the department upon request. (III)

b. A bacterially unsafe source of water supply shall be grounds for denial, suspension, or revocation of license. (III)

c. The department may require testing of private sources of water supply at its discretion in addition to the annual test. The facility shall supply reports of such tests as directed by the department. (III)

d. Hot and cold running water under pressure shall be available in the facility. (II, III)

e. Prior to construction of a new facility or new water source, private sources of water supply shall be surveyed and shall comply with the requirements of the department. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.36(135C) Family and employee accommodations. If the family or employees live within the facility, separate living quarters and recreation facilities shall be required for the family or employees distinct from such areas provided for the residents. (III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

481—63.37(135C) Animals. No animals shall be allowed to reside in the facility except with written approval of the department and under controlled conditions. (II, III)

[ARC 3740C, IAB 4/11/18, effective 5/16/18]

These rules are intended to implement Iowa Code chapter 135C.

◊ Two or more ARCs

- ¹ Effective date of 63.15(2) “a” and “b” delayed 70 days by the Administrative Rules Review Committee, IAB 2/26/86. Effective date of 63.15(2) “a” and “b” delayed until the expiration of 45 calendar days into the 1987 session of the General Assembly pursuant to Iowa Code section 17A.8(9), IAC 6/4/86.
- ² See IAB, Inspections and Appeals Department.
- ³ Rule 481—63.49(135C), effective 7/1/92.
- ⁴ September 7, 2016, effective date of 57.19(3) “d,” 62.15(2) “d,” and 63.18(3) “d” [ARC 2643C] delayed 70 days by the Administrative Rules Review Committee at its meeting held August 5, 2016.

ENVIRONMENTAL PROTECTION COMMISSION[567]

Former Water, Air and Waste Management[900], renamed by 1986 Iowa Acts, chapter 1245, Environmental Protection Commission under the “umbrella” of the Department of Natural Resources.

TITLE I *GENERAL*

CHAPTER 1

OPERATION OF ENVIRONMENTAL PROTECTION COMMISSION

- 1.1(17A,455A) Scope
- 1.2(17A,455A) Time of meetings
- 1.3(17A,455A) Place of meetings
- 1.4(17A,455A) Notification of meetings
- 1.5(17A,455A) Attendance and participation by the public
- 1.6(17A,455A) Quorum and voting requirements
- 1.7(17A,455A) Conduct of meeting
- 1.8(17A,455A) Minutes, transcripts, and recordings of meetings
- 1.9(17A,455A) Officers and duties
- 1.10(17A,455A) Election and succession of officers
- 1.11(68B) Sales of goods and services

CHAPTER 2

PUBLIC RECORDS AND FAIR INFORMATION PRACTICES

(Uniform Rules)

- 2.1(17A,22) Adoption by reference

CHAPTER 3

SUBMISSION OF INFORMATION AND COMPLAINTS—INVESTIGATIONS

- 3.1(17A,455B) Adoption by reference

CHAPTER 4

AGENCY PROCEDURE FOR RULE MAKING

- 4.1(17A) Adoption by reference

CHAPTER 5

PETITIONS FOR RULE MAKING

- 5.1(17A) Adoption by reference

CHAPTER 6

DECLARATORY ORDERS

- 6.1(17A) Adoption by reference

CHAPTER 7

RULES OF PRACTICE IN CONTESTED CASES

- 7.1(17A) Adoption by reference

CHAPTER 8

CONTRACTS FOR PUBLIC IMPROVEMENTS AND PROFESSIONAL SERVICES

- 8.1(17A) Adoption by reference

CHAPTER 9

DELEGATION OF CONSTRUCTION PERMITTING AUTHORITY

- 9.1(455B) Scope
- 9.2(455B,17A) Forms
- 9.3(455B) Procedures
- 9.4(455B) Criteria for authority

CHAPTER 10
ADMINISTRATIVE PENALTIES

- 10.1(455B) Scope
- 10.2(455B) Criteria for screening and assessing administrative penalties
- 10.3(455B) Assessment of administrative penalties

CHAPTER 11
TAX CERTIFICATION OF POLLUTION CONTROL OR RECYCLING PROPERTY

- 11.1(427) Scope
- 11.2(427,17A) Form
- 11.3(427) Time of submission
- 11.4(427) Notice
- 11.5(427) Issuance
- 11.6(427) Criteria for determining eligibility

CHAPTER 12
ENVIRONMENTAL SELF-AUDITS

- 12.1(455K) General
- 12.2(455K) Notice of audit
- 12.3(455K) Request for extension
- 12.4(455K) Disclosure of violation

CHAPTER 13
WAIVERS OR VARIANCES FROM ADMINISTRATIVE RULES

- 13.1(17A) Adoption by reference
- 13.2(17A) Report to commission

CHAPTER 14
ENVIRONMENTAL COVENANTS

- 14.1(455B,455H) Definitions
- 14.2(455B,455H) Environmental covenants
- 14.3(455B,455H) Supporting documentation
- 14.4(455B,455H) Recording and approval
- 14.5(455B,455H) Mandatory provisions
- 14.6(455B,455H) Optional provisions
- 14.7(455B,455H) Modification and termination
- 14.8(455B,455H) Signatories to the environmental covenant
- 14.9(455B,455H) Notice

CHAPTER 15
CROSS-MEDIA ELECTRONIC REPORTING

- 15.1(455B,554D) Purpose

CHAPTER 16
REVOCATION, SUSPENSION, AND NONRENEWAL OF LICENSE
FOR FAILURE TO PAY STATE LIABILITIES

- 16.1(272D,261) Purpose and use
- 16.2(272D,261) Definitions
- 16.3(272D,261) Requirements of the department
- 16.4(272D,261) No administrative appeal of the department's action
- 16.5(272D,261) District court hearing

CHAPTER 17
COMPLIANCE AND ENFORCEMENT PROCEDURES

| | |
|------------|-----------------------|
| 17.1(455B) | Scope |
| 17.2(455B) | Basis |
| 17.3(455B) | Option to respond |
| 17.4(455B) | Department discretion |

CHAPTERS 18 and 19
Reserved

TITLE II
AIR QUALITY

CHAPTER 20
SCOPE OF TITLE—DEFINITIONS

| | |
|----------------|----------------|
| 20.1(455B,17A) | Scope of title |
| 20.2(455B) | Definitions |

CHAPTER 21
COMPLIANCE

| | |
|------------|--|
| 21.1(455B) | Compliance schedule |
| 21.2(455B) | Variances |
| 21.3(455B) | Emission reduction program |
| 21.4(455B) | Circumvention of rules |
| 21.5(455B) | Evidence used in establishing that a violation has or is occurring |
| 21.6(455B) | Temporary electricity generation for disaster situations |

CHAPTER 22
CONTROLLING POLLUTION

| | |
|----------------|---|
| 22.1(455B) | Permits required for new or existing stationary sources |
| 22.2(455B) | Processing permit applications |
| 22.3(455B) | Issuing permits |
| 22.4(455B) | Special requirements for major stationary sources located in areas designated attainment or unclassified (PSD) |
| 22.5(455B) | Special requirements for nonattainment areas |
| 22.6 | Reserved |
| 22.7(455B) | Alternative emission control program |
| 22.8(455B) | Permit by rule |
| 22.9(455B) | Special requirements for visibility protection |
| 22.10(455B) | Permitting requirements for country grain elevators, country grain terminal elevators, grain terminal elevators and feed mill equipment |
| 22.11 to 22.99 | Reserved |
| 22.100(455B) | Definitions for Title V operating permits |
| 22.101(455B) | Applicability of Title V operating permit requirements |
| 22.102(455B) | Source category exemptions |
| 22.103(455B) | Insignificant activities |
| 22.104(455B) | Requirement to have a Title V permit |
| 22.105(455B) | Title V permit applications |
| 22.106(455B) | Annual Title V emissions inventory |
| 22.107(455B) | Title V permit processing procedures |
| 22.108(455B) | Permit content |
| 22.109(455B) | General permits |
| 22.110(455B) | Changes allowed without a Title V permit revision (off-permit revisions) |
| 22.111(455B) | Administrative amendments to Title V permits |

| | |
|------------------|--|
| 22.112(455B) | Minor Title V permit modifications |
| 22.113(455B) | Significant Title V permit modifications |
| 22.114(455B) | Title V permit reopenings |
| 22.115(455B) | Suspension, termination, and revocation of Title V permits |
| 22.116(455B) | Title V permit renewals |
| 22.117 to 22.119 | Reserved |
| 22.120(455B) | Acid rain program—definitions |
| 22.121(455B) | Measurements, abbreviations, and acronyms |
| 22.122(455B) | Applicability |
| 22.123(455B) | Acid rain exemptions |
| 22.124 | Reserved |
| 22.125(455B) | Standard requirements |
| 22.126(455B) | Designated representative—submissions |
| 22.127(455B) | Designated representative—objections |
| 22.128(455B) | Acid rain applications—requirement to apply |
| 22.129(455B) | Information requirements for acid rain permit applications |
| 22.130(455B) | Acid rain permit application shield and binding effect of permit application |
| 22.131(455B) | Acid rain compliance plan and compliance options—general |
| 22.132 | Reserved |
| 22.133(455B) | Acid rain permit contents—general |
| 22.134(455B) | Acid rain permit shield |
| 22.135(455B) | Acid rain permit issuance procedures—general |
| 22.136(455B) | Acid rain permit issuance procedures—completeness |
| 22.137(455B) | Acid rain permit issuance procedures—statement of basis |
| 22.138(455B) | Issuance of acid rain permits |
| 22.139(455B) | Acid rain permit appeal procedures |
| 22.140(455B) | Permit revisions—general |
| 22.141(455B) | Permit modifications |
| 22.142(455B) | Fast-track modifications |
| 22.143(455B) | Administrative permit amendment |
| 22.144(455B) | Automatic permit amendment |
| 22.145(455B) | Permit reopenings |
| 22.146(455B) | Compliance certification—annual report |
| 22.147 | Reserved |
| 22.148(455B) | Sulfur dioxide opt-ins |
| 22.149 to 22.299 | Reserved |
| 22.300(455B) | Operating permit by rule for small sources |

CHAPTER 23

EMISSION STANDARDS FOR CONTAMINANTS

| | |
|------------|--|
| 23.1(455B) | Emission standards |
| 23.2(455B) | Open burning |
| 23.3(455B) | Specific contaminants |
| 23.4(455B) | Specific processes |
| 23.5(455B) | Anaerobic lagoons |
| 23.6(455B) | Alternative emission limits (the “bubble concept”) |

CHAPTER 24

EXCESS EMISSION

| | |
|------------|-------------------------------------|
| 24.1(455B) | Excess emission reporting |
| 24.2(455B) | Maintenance and repair requirements |

CHAPTER 25
MEASUREMENT OF EMISSIONS

- 25.1(455B) Testing and sampling of new and existing equipment
- 25.2(455B) Continuous emission monitoring under the acid rain program
- 25.3(455B) Mercury emissions testing and monitoring

CHAPTER 26
PREVENTION OF AIR POLLUTION EMERGENCY EPISODES

- 26.1(455B) General
- 26.2(455B) Episode criteria
- 26.3(455B) Preplanned abatement strategies
- 26.4(455B) Actions taken during episodes

CHAPTER 27
CERTIFICATE OF ACCEPTANCE

- 27.1(455B) General
- 27.2(455B) Certificate of acceptance
- 27.3(455B) Ordinance or regulations
- 27.4(455B) Administrative organization
- 27.5(455B) Program activities

CHAPTER 28
AMBIENT AIR QUALITY STANDARDS

- 28.1(455B) Statewide standards

CHAPTER 29
QUALIFICATION IN VISUAL DETERMINATION OF THE OPACITY OF EMISSIONS

- 29.1(455B) Methodology and qualified observer

CHAPTER 30
FEES

- 30.1(455B) Purpose
- 30.2(455B) Fees associated with new source review applications
- 30.3(455B) Fees associated with asbestos demolition or renovation notification
- 30.4(455B) Fees associated with Title V operating permits
- 30.5(455B) Fee advisory groups
- 30.6(455B) Process to establish or adjust fees and notification of fee rates
- 30.7(455B) Fee revenue

CHAPTER 31
NONATTAINMENT AREAS

- 31.1(455B) Permit requirements relating to nonattainment areas
- 31.2 Reserved
- NONATTAINMENT AREAS DESIGNATED ON OR AFTER MAY 18, 1998
- 31.3(455B) Nonattainment new source review requirements for areas designated nonattainment on or after May 18, 1998
- 31.4(455B) Preconstruction review permit program
- 31.5 to 31.8 Reserved
- 31.9(455B) Actuals PALs
- 31.10(455B) Validity of rules
- 31.11 to 31.19 Reserved

NONATTAINMENT AREAS DESIGNATED BEFORE MAY 18, 1998

- 31.20(455B) Special requirements for nonattainment areas designated before May 18, 1998
(originally adopted in 567—22.5(455B))

CHAPTER 32

ANIMAL FEEDING OPERATIONS FIELD STUDY

- 32.1(455B) Animal feeding operations field study
32.2(455B) Definitions
32.3(455B) Exceedance of the health effects value (HEV) for hydrogen sulfide
32.4(455B) Exceedance of the health effects standard (HES) for hydrogen sulfide
32.5(455B) Iowa Air Sampling Manual

CHAPTER 33

SPECIAL REGULATIONS AND CONSTRUCTION PERMIT REQUIREMENTS
FOR MAJOR STATIONARY SOURCES—PREVENTION OF SIGNIFICANT
DETERIORATION (PSD) OF AIR QUALITY

- 33.1(455B) Purpose
33.2 Reserved
33.3(455B) Special construction permit requirements for major stationary sources in areas
designated attainment or unclassified (PSD)
33.4 to 33.8 Reserved
33.9(455B) Plantwide applicability limitations (PALs)
33.10(455B) Exceptions to adoption by reference

CHAPTER 34

PROVISIONS FOR AIR QUALITY EMISSIONS TRADING PROGRAMS

- 34.1(455B) Purpose

CHAPTER 35

AIR EMISSIONS REDUCTION ASSISTANCE PROGRAM

- 35.1(455B) Purpose
35.2(455B) Definitions
35.3(455B) Role of the department of natural resources
35.4(455B) Eligible projects
35.5(455B) Forms
35.6(455B) Project selection
35.7(455B) Funding sources
35.8(455B) Type of financial assistance
35.9(455B) Term of loans
35.10(455B) Reduced award
35.11(455B) Fund disbursement limitations
35.12(455B) Applicant cost share
35.13(455B) Eligible costs
35.14(455B) Ineligible costs
35.15(455B) Written agreement
35.16(455B) Financial assistance denial

TITLE III

WITHDRAWAL DIVERSION, STORAGE AND USE OF WATER

DIVISION A

WATER WELL CONSTRUCTION: GENERAL STANDARDS AND REGISTRATION OF CONTRACTORS

CHAPTERS 36 and 37

Reserved

CHAPTER 38

PRIVATE WATER WELL CONSTRUCTION PERMITS

| | |
|-------------|--|
| 38.1(455B) | Definitions |
| 38.2(455B) | Forms |
| 38.3(455B) | Permit requirement |
| 38.4(455B) | Form of application |
| 38.5(455B) | Fees |
| 38.6(455B) | Well maintenance and reconstruction |
| 38.7(455B) | Emergency permits |
| 38.8(455B) | Permit issuance and conditions |
| 38.9(455B) | Noncompliance |
| 38.10(455B) | Expiration of a permit |
| 38.11(455B) | Transferability |
| 38.12(455B) | Denial of a permit |
| 38.13(455B) | Appeal of a permit denial |
| 38.14 | Reserved |
| 38.15(455B) | Delegation of authority to county board of supervisors |
| 38.16(455B) | Concurrent authority of the department |
| 38.17(455B) | Revocation of delegation agreement |

CHAPTER 39

REQUIREMENTS FOR PROPERLY PLUGGING ABANDONED WELLS

| | |
|-------------|---------------------------------------|
| 39.1(455B) | Purpose |
| 39.2(455B) | Applicability |
| 39.3(455B) | Definitions |
| 39.4(455B) | Forms |
| 39.5(455B) | Abandoned well plugging schedule |
| 39.6(455B) | Abandoned well owner responsibilities |
| 39.7(455B) | Abandoned well plugging materials |
| 39.8(455B) | Abandoned well plugging procedures |
| 39.9(455B) | Designated agent |
| 39.10(455B) | Designation of standby wells |
| 39.11(455B) | Variances |

DIVISION B
DRINKING WATER

CHAPTER 40

SCOPE OF DIVISION—DEFINITIONS—FORMS—RULES OF PRACTICE

| | |
|----------------|---|
| 40.1(455B) | Scope of division |
| 40.2(455B) | Definitions |
| 40.3(17A,455B) | Forms |
| 40.4(17A,455B) | Public water supply construction permit application procedures |
| 40.5(17A,455B) | Public water supply operation permit application procedures |
| 40.6(455B) | Drinking water state revolving fund loan application procedures |
| 40.7(455B) | Viability assessment procedures |

CHAPTER 41

WATER SUPPLIES

| | |
|------------|--|
| 41.1(455B) | Primary drinking water regulations—coverage |
| 41.2(455B) | Biological maximum contaminant level (MCL), treatment technique (TT), and monitoring requirements |
| 41.3(455B) | Maximum contaminant levels (MCLs) and monitoring requirements for inorganic contaminants other than lead or copper |

| | |
|----------------|---|
| 41.4(455B) | Lead, copper, and corrosivity |
| 41.5(455B) | Organic chemicals |
| 41.6(455B) | Disinfection byproducts maximum contaminant levels and monitoring requirements |
| 41.7(455B) | Groundwater rule: sanitary survey, microbial source water monitoring, treatment technique |
| 41.8(455B) | Radionuclides |
| 41.9 and 41.10 | Reserved |
| 41.11(455B) | Special monitoring |
| 41.12(455B) | Alternative analytical techniques |
| 41.13(455B) | Monitoring of interconnected public water supply systems |
| 41.14(455B) | Department analytical results used to determine compliance |
| 41.15(455B) | Monitoring of other contaminants |

CHAPTER 42

PUBLIC NOTIFICATION, PUBLIC EDUCATION,
CONSUMER CONFIDENCE REPORTS, REPORTING,
AND RECORD MAINTENANCE

| | |
|------------|--|
| 42.1(455B) | Public notification |
| 42.2(455B) | Lead consumer notice and public education for lead action level exceedance |
| 42.3(455B) | Consumer confidence reports |
| 42.4(455B) | Reporting |
| 42.5(455B) | Record maintenance |

CHAPTER 43

WATER SUPPLIES—DESIGN AND OPERATION

| | |
|-------------|--|
| 43.1(455B) | General information |
| 43.2(455B) | Permit to operate |
| 43.3(455B) | Public water supply system construction |
| 43.4(455B) | Certification of completion |
| 43.5(455B) | Filtration and disinfection for surface water and influenced groundwater public water supply systems |
| 43.6(455B) | Residual disinfectant and disinfection byproduct precursors |
| 43.7(455B) | Lead and copper treatment techniques |
| 43.8(455B) | Viability assessment |
| 43.9(455B) | Enhanced filtration and disinfection requirements for surface water and IGW systems serving at least 10,000 people |
| 43.10(455B) | Enhanced filtration and disinfection requirements for surface water and IGW systems serving fewer than 10,000 people |
| 43.11(455B) | Enhanced treatment for <i>Cryptosporidium</i> |
| 43.12(455B) | Optimization goals |

CHAPTER 44

DRINKING WATER STATE REVOLVING FUND

| | |
|------------|--|
| 44.1(455B) | Statutory authority |
| 44.2(455B) | Scope of title |
| 44.3(455B) | Purpose |
| 44.4(455B) | Definitions |
| 44.5(455B) | Set-asides |
| 44.6(455B) | Eligibility |
| 44.7(455B) | Project point ranking system (project priority list) |
| 44.8(455B) | Intended use plan |
| 44.9(455B) | Department initial approval of projects |

| | |
|-------------|--|
| 44.10(455B) | General administrative requirements |
| 44.11 | Reserved |
| 44.12(455B) | Construction phase and postconstruction phase requirements |
| 44.13(455B) | Sanctions |
| 44.14(455B) | Disputes |

CHAPTERS 45 to 48

Reserved

CHAPTER 49

NONPUBLIC WATER SUPPLY WELLS

| | |
|-------------|---|
| 49.1(455B) | Purpose |
| 49.2(455B) | Definitions |
| 49.3(455B) | Applicability |
| 49.4(455B) | General |
| 49.5(455B) | Variances |
| 49.6(455B) | Location of wells |
| 49.7(455B) | General construction requirements |
| 49.8(455B) | Types of well construction |
| 49.9(455B) | Material standards |
| 49.10(455B) | Well reconstruction |
| 49.11(455B) | Disposal of drilling mud |
| 49.12(455B) | Pumps and pumping equipment |
| 49.13(455B) | Drop pipe |
| 49.14(455B) | Pump wiring |
| 49.15(455B) | Pitless adapters and pitless units |
| 49.16(455B) | Well caps and seals |
| 49.17(455B) | Vents |
| 49.18(455B) | Underground piping |
| 49.19(455B) | Underground wiring |
| 49.20(455B) | Sampling faucets |
| 49.21(455B) | Hydropneumatic (pressure) tanks |
| 49.22(455B) | Electrical connections |
| 49.23(455B) | Interconnections and cross connections |
| 49.24(455B) | Backflow prevention for chemical injection systems for nonpotable water wells |
| 49.25(455B) | Filters and water treatment equipment |
| 49.26(455B) | Well disinfection |
| 49.27(455B) | Water sampling and analysis |
| 49.28(455B) | Abandonment of wells |
| 49.29(455B) | Closed circuit vertical heat exchangers |

DIVISION C
WITHDRAWAL, DIVERSION AND STORAGE
OF WATER: WATER RIGHTS ALLOCATION

CHAPTER 50

SCOPE OF DIVISION—DEFINITIONS—FORMS—RULES OF PRACTICE

| | |
|----------------|---|
| 50.1(455B) | Scope of division |
| 50.2(455B) | Definitions |
| 50.3(17A,455B) | Forms for withdrawal, diversion or storage of water |
| 50.4(17A,455B) | How to request a permit |
| 50.5(455B) | Initial screening of applications |
| 50.6(17A,455B) | Supporting information |
| 50.7(17A,455B) | Review of complete applications |

- 50.8(17A,455B) Initial decision by the department
 50.9(17A,455B) Appeal of initial decision

CHAPTER 51

WATER PERMIT OR REGISTRATION—WHEN REQUIRED

- 51.1(455B) Scope of chapter
 51.2(455B) Storage (surface)
 51.3(455B) Diversion from surface into aquifer
 51.4(455B) Drain tile lines
 51.5(455B) Cooling/heating systems
 51.6(455B) Miscellaneous uses
 51.7(455B) Excavation and processing of rock and gravel products
 51.8(159) Agricultural drainage wells

CHAPTER 52

CRITERIA AND CONDITIONS FOR AUTHORIZING WITHDRAWAL,
 DIVERSION AND STORAGE OF WATER

- 52.1(455B) Scope of chapter
 52.2(455B) Conditions on permitted water uses
 52.3(455B) Conditions on withdrawals from streams
 52.4(455B) Conditions on withdrawals from groundwater sources
 52.5(455B) Duration of permits for withdrawal or diversion of water
 52.6(455B) Monitoring, recording and reporting of water use and effects on water source
 52.7(455B) Modification, cancellation, and emergency suspension of permits
 52.8(455B) Designated protected flows of streams
 52.9(455B) Water conservation
 52.10(455B) Priority allocation restrictions
 52.11(455B) Plugging of abandoned wells
 52.12 to 52.19 Reserved
 52.20(455B) Water storage permits
 52.21(455B) Permits to divert water to an agricultural drainage well

CHAPTER 53

PROTECTED WATER SOURCES — PURPOSES — DESIGNATION PROCEDURES —
 INFORMATION IN WITHDRAWAL APPLICATIONS — LIMITATIONS —
 LIST OF PROTECTED SOURCES

- 53.1(455B) Scope of chapter
 53.2(455B) Designation of protected sources
 53.3(455B) Purposes of designating a protected source
 53.4(455B) Designation procedure
 53.5(455B) Information requirements for applications to withdraw water from protected sources
 53.6(455B) Conditions in permits for withdrawals of water from a protected source
 53.7(455B) List of protected water sources

CHAPTER 54

CRITERIA AND CONDITIONS FOR PERMIT RESTRICTIONS OR COMPENSATION BY
 PERMITTED USERS TO NONREGULATED USERS DUE TO WELL INTERFERENCE

- 54.1(455B) Scope of chapter
 54.2(455B) Requirements for informal negotiations
 54.3(455B) Failure to cooperate
 54.4(455B) Well interference by proposed withdrawals
 54.5(455B) Well interference by existing permitted uses

| | |
|-------------|-----------------------------------|
| 54.6(455B) | Verification of well interference |
| 54.7(455B) | Settlement procedures |
| 54.8(455B) | Recurring complaints |
| 54.9(455B) | Variances |
| 54.10(455B) | Appeal procedures |

CHAPTER 55

AQUIFER STORAGE AND RECOVERY:
CRITERIA AND CONDITIONS FOR AUTHORIZING STORAGE,
RECOVERY, AND USE OF WATER

| | |
|------------|--|
| 55.1(455B) | Statutory authority |
| 55.2 | Reserved |
| 55.3(455B) | Purpose |
| 55.4(455B) | Definitions |
| 55.5(455B) | Application processing |
| 55.6(455B) | Aquifer storage and recovery technical evaluation criteria |

CHAPTERS 56 to 59

Reserved

TITLE IV

WASTEWATER TREATMENT AND DISPOSAL

CHAPTER 60

SCOPE OF TITLE—DEFINITIONS—FORMS—RULES OF PRACTICE

| | |
|----------------|---|
| 60.1(455B,17A) | Scope of title |
| 60.2(455B) | Definitions |
| 60.3(455B,17A) | Forms |
| 60.4(455B,17A) | Application procedures and requirements generally |

CHAPTER 61

WATER QUALITY STANDARDS

WATER QUALITY STANDARDS

| | |
|--------------|--------------------------------|
| 61.1 | Reserved |
| 61.2(455B) | General considerations |
| 61.3(455B) | Surface water quality criteria |
| 61.4 to 61.9 | Reserved |

VOLUNTEER MONITORING DATA REQUIREMENTS

| | |
|-------------|--|
| 61.10(455B) | Purpose |
| 61.11(455B) | Monitoring plan required |
| 61.12(455B) | Use of volunteer monitoring data |
| 61.13(455B) | Department audits of volunteer monitoring activities |

CHAPTER 62

EFFLUENT AND PRETREATMENT STANDARDS:
OTHER EFFLUENT LIMITATIONS OR PROHIBITIONS

| | |
|------------|--|
| 62.1(455B) | Prohibited discharges |
| 62.2(455B) | Exemption of adoption of certain federal rules from public participation |
| 62.3(455B) | Secondary treatment information: effluent standards for publicly owned treatment works and semipublic sewage disposal systems |
| 62.4(455B) | Federal effluent and pretreatment standards |
| 62.5(455B) | Federal toxic effluent standards |
| 62.6(455B) | Effluent limitations and pretreatment requirements for sources for which there are no federal effluent or pretreatment standards |

- 62.7(455B) Effluent limitations less stringent than the effluent limitation guidelines
- 62.8(455B) Effluent limitations or pretreatment requirements more stringent than the effluent or pretreatment standards
- 62.9(455B) Disposal of pollutants into wells
- 62.10(455B) Effluent reuse

CHAPTER 63

MONITORING, ANALYTICAL AND REPORTING REQUIREMENTS

- 63.1(455B) Guidelines establishing test procedures for the analysis of pollutants
- 63.2(455B) Records of monitoring activities and results
- 63.3(455B) Minimum self-monitoring requirements in permits
- 63.4(455B) Effluent toxicity testing requirements in permits
- 63.5(455B) Self-monitoring and reporting for animal feeding operations
- 63.6(455B) Bypasses and upsets
- 63.7(455B) Submission of records of operation
- 63.8(455B) Frequency of submitting records of operation
- 63.9(455B) Content of records of operation
- 63.10(455B) Records of operation forms
- 63.11(455B) Certification and signatory requirements in the submission of records of operation
- 63.12(455B) Twenty-four-hour reporting
- 63.13(455B) Planned changes
- 63.14(455B) Anticipated noncompliance
- 63.15(455B) Other noncompliance

CHAPTER 64

WASTEWATER CONSTRUCTION AND OPERATION PERMITS

- 64.1 Reserved
- 64.2(455B) Permit to construct
- 64.3(455B) Permit to operate
- 64.4(455B) Issuance of NPDES permits
- 64.5(455B) Notice and public participation in the individual NPDES permit process
- 64.6(455B) Completing a Notice of Intent for coverage under a general permit
- 64.7(455B) Terms and conditions of NPDES permits
- 64.8(455B) Reissuance of operation and NPDES permits
- 64.9(455B) Monitoring, record keeping and reporting by operation permit holders
- 64.10(455B) Silvicultural activities
- 64.11 and 64.12 Reserved
- 64.13(455B) Storm water discharges
- 64.14(455B) Transfer of title and owner or operator address change
- 64.15(455B) General permits issued by the department
- 64.16(455B) Fees
- 64.17(455B) Validity of rules
- 64.18(455B) Applicability

CHAPTER 65

ANIMAL FEEDING OPERATIONS

DIVISION I

CONFINEMENT FEEDING OPERATIONS

- 65.1(459,459B) Definitions and incorporation by reference
- 65.2(459,459B) Minimum manure control requirements and reporting of releases
- 65.3(459,459B) Requirements and recommended practices for land application of manure
- 65.4 Reserved
- 65.5(459,459B) Departmental evaluation

| | |
|-----------------|---|
| 65.6(459,459B) | Concentrated animal feeding operations; NPDES permits |
| 65.7(459,459B) | Construction permits—required approvals, permits, determinations and declaratory orders |
| 65.8(459,459B) | Construction |
| 65.9(459,459B) | Preconstruction submittal requirements |
| 65.10(459,459B) | Construction permit application review process, site inspections and complaint investigations |
| 65.11(459,459B) | Confinement feeding operation and stockpile separation distance requirements |
| 65.12(459,459B) | Exemptions and variances to confinement feeding operation and stockpile separation distance requirements and prohibition of construction on the one hundred year floodplain |
| 65.13 and 65.14 | Reserved |
| 65.15(459,459B) | Manure storage structure design requirements |
| 65.16(459,459B) | Manure management plan requirements |
| 65.17(459,459B) | Manure management plan content requirements |
| 65.18(459,459B) | Construction certification |
| 65.19(459,459B) | Manure applicators certification |
| 65.20(459,459B) | Manure storage indemnity fund |
| 65.21(459,459B) | Transfer of legal responsibilities or title |
| 65.22(459,459B) | Validity of rules |
| 65.23 to 65.99 | Reserved |

DIVISION II
OPEN FEEDLOT OPERATIONS

| | |
|-------------------|--|
| 65.100(459A) | Definitions and incorporation by reference |
| 65.101(459A) | Minimum open feedlot effluent control requirements and reporting of releases |
| 65.102(459A) | Concentrated animal feeding operations; NPDES permits |
| 65.103(455B,459A) | Departmental evaluation; CAFO designation; remedial actions |
| 65.104(455B,459A) | NPDES permits |
| 65.105(459A) | Construction permits |
| 65.106(459A) | Construction |
| 65.107(459A) | Construction permit application |
| 65.108(455B,459A) | Water well separation distances for open feedlot operations |
| 65.109(459A) | Settled open feedlot effluent basins—investigation, design and construction requirements |
| 65.110(459A) | AT systems—design requirements |
| 65.111(459A) | Construction certification |
| 65.112(459A) | Nutrient management plan requirements |
| 65.113(459A) | Complaint investigations |
| 65.114(455B,459A) | Transfer of legal responsibilities or title |
| 65.115 to 65.199 | Reserved |

DIVISION III
ANIMAL TRUCK WASH FACILITIES

| | |
|------------------|---|
| 65.200(459,459A) | Definitions and incorporation by reference |
| 65.201(459A) | Minimum animal truck wash effluent control requirements and reporting of releases |
| 65.202(459,459A) | Construction permits |
| 65.203(459A) | Construction |
| 65.204(459A) | Construction permit application |
| 65.205(459A) | Water well separation distances for animal truck wash facilities |
| 65.206(459A) | Unformed animal truck wash effluent structure—investigation, design and construction requirements |
| 65.207(459A) | Construction certification |
| 65.208(459A) | Nutrient management plan requirements |

- 65.209(459A) Complaint investigations
- 65.210(455B,459A) Transfer of legal responsibilities or title

CHAPTER 66

PESTICIDE APPLICATION TO WATERS

- 66.1(455B) Aquatic pesticide

CHAPTER 67

STANDARDS FOR THE LAND APPLICATION OF SEWAGE SLUDGE

- 67.1(455B) Land application of sewage sludge
- 67.2(455B) Exclusions
- 67.3(455B) Sampling and analysis
- 67.4(455B) Land application program
- 67.5(455B) Special definitions
- 67.6(455B) Permit requirements
- 67.7(455B) Land application requirements for Class I sewage sludge
- 67.8(455B) Land application requirements for Class II sewage sludge
- 67.9(455B) Class III sewage sludge
- 67.10(455B) Sampling and analytical methods
- 67.11(455B) Pathogen treatment processes

CHAPTER 68

COMMERCIAL SEPTIC TANK CLEANERS

- 68.1(455B) Purpose and applicability
- 68.2(455B) Definitions
- 68.3(455B) Licensing requirements
- 68.4(455B) Licensing procedures
- 68.5(455B) Suspension, revocation and denial of license
- 68.6(455B) Licensee's obligations
- 68.7(455B) County obligations
- 68.8(455B) Application sites and equipment inspections
- 68.9(455B) Standards for commercial cleaning of private sewage disposal systems
- 68.10(455B) Standards for disposal
- 68.11(455B) Standards for disposal of on-farm food processing wastewater

CHAPTER 69

PRIVATE SEWAGE DISPOSAL SYSTEMS

- 69.1(455B) General
- 69.2(455B) Time of transfer inspections
- 69.3(455B) Site analysis
- 69.4(455B) Requirements when effluent is discharged into surface water
- 69.5(455B) Requirements when effluent is discharged above the ground surface
- 69.6(455B) Requirements when effluent is discharged into the soil
- 69.7(455B) Building sewers
- 69.8(455B) Primary treatment—septic tanks
- 69.9(455B) Secondary treatment—subsurface soil absorption systems
- 69.10(455B) Mound systems
- 69.11(455B) At-grade systems
- 69.12(455B) Drip irrigation
- 69.13(455B) Packed bed media filters
- 69.14(455B) Aerobic treatment units
- 69.15(455B) Constructed wetlands
- 69.16(455B) Waste stabilization ponds

- 69.17(455B) Requirements for impervious vault toilets
- 69.18(455B) Requirements for portable toilets
- 69.19(455B) Other methods of wastewater disposal
- 69.20(455B) Disposal of septage from private sewage disposal systems
- 69.21(455B) Experimental private sewage disposal systems
- 69.22(455B) Variances

TITLE V
FLOOD PLAIN DEVELOPMENT

CHAPTER 70

SCOPE OF TITLE—DEFINITIONS—FORMS—RULES OF PRACTICE

- 70.1(455B,481A) Scope of title
- 70.2(455B,481A) Definitions
- 70.3(17A,455B,481A) Forms
- 70.4(17A,455B,481A) Requesting approval of flood plain development
- 70.5(17A,455B,481A) Procedures for review of applications
- 70.6(17A,455B,481A) Appeal of initial decision

CHAPTER 71

FLOOD PLAIN OR FLOODWAY DEVELOPMENT—
WHEN APPROVAL IS REQUIRED

- 71.1(455B) Bridges, culverts, temporary stream crossings, and road embankments
- 71.2(455B) Channel changes
- 71.3(455B) Dams
- 71.4(455B) Levees or dikes
- 71.5(455B) Waste or water treatment facilities
- 71.6(455B) Sanitary landfills
- 71.7(455B) Buildings and associated fill
- 71.8(455B) Pipeline crossings
- 71.9(455B) Stream bank protective devices
- 71.10(455B) Boat docks
- 71.11(455B) Excavations
- 71.12(455B) Miscellaneous structures, obstructions, or deposits not otherwise provided for
in other rules
- 71.13(455B) Animal feeding operation structures

CHAPTER 72

CRITERIA FOR APPROVAL

DIVISION I

SPECIAL CRITERIA FOR VARIOUS TYPES OF FLOOD PLAIN DEVELOPMENT

- 72.1(455B) Bridges and road embankments
- 72.2(455B) Channel changes
- 72.3(455B) Dams
- 72.4(455B) Levees or dikes
- 72.5(455B) Buildings
- 72.6(455B) Wastewater treatment facilities
- 72.7(455B) Sanitary landfills
- 72.8(455B) Water supply treatment facilities
- 72.9(455B) Stream protective devices
- 72.10(455B) Pipeline river or stream crossings
- 72.11(455B) Miscellaneous construction
- 72.12 Reserved
- 72.13(455B) Animal feeding operation structures

72.14 to 72.29 Reserved

DIVISION II
GENERAL CRITERIA

72.30(455B) General conditions
72.31(455B) Variance
72.32(455B) Protected stream information
72.33 to 72.49 Reserved

DIVISION III
PROTECTED STREAM DESIGNATION PROCEDURE

72.50(455B) Protected streams
72.51(455B) Protected stream designation procedure
72.52(455B) Protected stream declassification procedure

CHAPTER 73
USE, MAINTENANCE, REMOVAL, INSPECTIONS, AND SAFETY OF DAMS

DIVISION I
USE AND MAINTENANCE OF DAMS

73.1(109,455B) Operating plan for dams with movable structures
73.2(109,455B) Raising or lowering of impoundment levels
73.3 to 73.9 Reserved

DIVISION II
ABANDONMENT AND REMOVAL OF DAMS

73.10(109,455B) Abandonment prohibited
73.11(109,455B) Removal of dams
73.12 to 73.19 Reserved

DIVISION III
INSPECTION OF DAMS

73.20(109,455B) Scope and purposes of dam safety inspection program
73.21(109,455B) Types of inspections; when inspections are made
73.22(109,455B) Duty of dam owner to maintain, investigate, inspect and report
73.23(109,455B) Special inspections and investigations
73.24(109,455B) Inspection by others
73.25(109,455B) Access for inspections a condition of construction approval
73.26(109,455B) Inspection reports
73.27 to 73.29 Reserved

DIVISION IV
DESIGNATION OF UNSAFE DAMS

73.30(109,455B) Procedures for designation of a dam as unsafe
73.31(109,455B) Criteria for designating a dam as unsafe
73.32(109,455B) Agency action concerning an unsafe dam

CHAPTER 74
Reserved

CHAPTER 75
MANAGEMENT OF SPECIFIC FLOOD PLAIN AREAS

75.1(455B) Applicability and purposes of chapter
75.2(455B) Flooding characteristics
75.3(455B) Area of regulation
75.4(455B) Establishment of a floodway
75.5(455B) Minimum standards for flood plain and floodway uses
75.6(455B) Preexisting nonconforming development and associated uses

- 75.7(335,414,455B) Delegation of authority to local governments by approval of local regulations
 75.8(335,414,455B) Review and approval of variances from local regulations
 75.9(335,414,455B) Notice of proposed department flood plain management order or proposed local flood plain regulation

CHAPTER 76

FEDERAL WATER RESOURCE PROJECTS

- 76.1(455B) Referral of federal project
 76.2(455B) Solicitation of comments
 76.3(455B) Hearing
 76.4(455B) Formulation of comments
 76.5(455B) Transmittal of comments
 76.6(455B) Other coordination

CHAPTERS 77 to 79

Reserved

TITLE VI

CERTIFICATION OF OPERATORS

CHAPTER 80

Reserved

CHAPTER 81

OPERATOR CERTIFICATION: PUBLIC WATER SUPPLY SYSTEMS
AND WASTEWATER TREATMENT SYSTEMS

- 81.1(455B) Definitions
 81.2(455B) General
 81.3(455B) Wastewater treatment plant grades
 81.4(455B) Water treatment plant grades
 81.5(455B) Water distribution system grades
 81.6(455B) Grade A classification
 81.7(455B) Operator education and experience qualifications
 81.8(455B) Certification and examination fees
 81.9(455B) Examinations
 81.10(455B) Certification by examination
 81.11(455B) Certification by reciprocity
 81.12(455B) Restricted certification
 81.13(455B) Certification renewal
 81.14(455B,272C) Continuing education
 81.15(455B) Upgrading of certificates
 81.16(455B) Operator by affidavit
 81.17(455B,272C) Disciplinary actions

CHAPTER 82

WELL CONTRACTOR CERTIFICATION

- 82.1(455B) Definitions
 82.2(455B) General
 82.3(455B) Classification of well contractors
 82.4 and 82.5 Reserved
 82.6(455B) Experience requirements
 82.7(455B) Certification and examination fees
 82.8(455B) Examinations
 82.9(455B) Certification by examination

- 82.10(455B) Certification renewal
- 82.11(455B) Continuing education
- 82.12(455B) Certified well contractor obligations
- 82.13(455B) Disciplinary actions
- 82.14(455B,272C) Revocation of certificates

CHAPTER 83
LABORATORY CERTIFICATION

PART A
GENERAL

- 83.1(455B) Authority, purpose, and applicability
- 83.2(455B) Definitions

PART B
CERTIFICATION PROCESS

- 83.3(455B) Application for laboratory certification
- 83.4 Reserved
- 83.5(455B) Procedures for certification of new laboratories or changes in certification
- 83.6(455B) Laboratory recertification
- 83.7(455B) Criteria and procedure for provisional, suspended, and revoked laboratory certification

CHAPTERS 84 to 89
Reserved

TITLE VII
WATER POLLUTION CONTROL STATE REVOLVING FUND

CHAPTER 90
SCOPE OF TITLE — DEFINITIONS — FORMS

- 90.1(455B) Scope of title
- 90.2(455B) Definitions
- 90.3(455B) Forms

CHAPTER 91
CRITERIA FOR RATING AND RANKING PROJECTS
FOR THE WATER POLLUTION CONTROL STATE REVOLVING FUND

- 91.1(455B) Statutory authority
- 91.2(455B) Scope of title
- 91.3(455B) Purpose
- 91.4 and 91.5 Reserved
- 91.6(455B) General information—priority rating system
- 91.7 Reserved
- 91.8(455B) Project priority rating system

CHAPTER 92
CLEAN WATER STATE REVOLVING FUND

- 92.1(455B) Statutory authority
- 92.2(455B) Scope of title
- 92.3 Reserved
- 92.4(455B) General policy
- 92.5 Reserved
- 92.6(455B) Intended use plan management
- 92.7(455B) Point source project procedures
- 92.8(455B) Point source project requirements

CHAPTER 93

NONPOINT SOURCE POLLUTION CONTROL SET-ASIDE PROGRAMS

- 93.1(455B,466) Statutory authority
- 93.2(455B,466) Scope of title
- 93.3(455B,466) Purpose
- 93.4(455B,466) Onsite wastewater system assistance program
- 93.5(455B) Livestock water quality facilities requirements
- 93.6(455B) Local water protection project requirements
- 93.7(455B) General nonpoint source project requirements

CHAPTERS 94 to 99

Reserved

TITLE VIII
*SOLID WASTE MANAGEMENT
AND DISPOSAL*

CHAPTER 100

SCOPE OF TITLE — DEFINITIONS — FORMS — RULES OF PRACTICE

- 100.1(455B,455D) Scope of title
- 100.2(455B,455D) Definitions
- 100.3(17A,455B) Forms and rules of practice
- 100.4(455B) General conditions of solid waste disposal
- 100.5(455B) Disruption and excavation of sanitary landfills or closed dumps

CHAPTER 101

SOLID WASTE COMPREHENSIVE PLANNING REQUIREMENTS

- 101.1(455B,455D) Purpose
- 101.2(455B,455D) Definitions
- 101.3 Reserved
- 101.4(455B,455D) Duties of cities and counties
- 101.5(455B,455D) Contracts with permitted agencies
- 101.6(455B,455D) State volume reduction and recycling goals
- 101.7(455B,455D) Base year adjustment method
- 101.8(455B,455D) Submittal of initial comprehensive plans and comprehensive plan updates
- 101.9(455B,455D) Review of initial comprehensive plans and comprehensive plan updates
- 101.10 and 101.11 Reserved
- 101.12(455B,455D) Solid waste comprehensive plan types
- 101.13(455B,455D) Types of comprehensive plan submittals to be filed
- 101.14(455B,455D) Fees for disposal of solid waste at sanitary landfills

CHAPTER 102

PERMITS

- 102.1(455B) Permit required
- 102.2(455B) Types of permits
- 102.3(455B) Applications for permits
- 102.4(455B) Preparation of plans
- 102.5(455B) Construction and operation
- 102.6(455B) Compliance with rule changes
- 102.7(455B) Amendments
- 102.8(455B) Transfer of title and permit
- 102.9(455B) Permit conditions
- 102.10(455B) Effect of revocation
- 102.11(455B) Inspection prior to start-up

- 102.12(455B) Primary plan requirements for all sanitary disposal projects
- 102.13(455B) Operating requirements for all sanitary disposal projects
- 102.14(455B) Emergency response and remedial action plans

CHAPTER 103

SANITARY LANDFILLS: COAL COMBUSTION RESIDUE

- 103.1(455B) Coal combustion residue landfills
- 103.2(455B) Emergency response and remedial action plans
- 103.3(455B) Coal combustion residue sanitary landfill financial assurance

CHAPTER 104

SANITARY DISPOSAL PROJECTS WITH PROCESSING FACILITIES

- 104.1(455B) Scope and applicability
- 104.2(455B) Dumping or holding floors or pits
- 104.3(455B) Compaction equipment
- 104.4(455B) Hammermills
- 104.5(455B) Hydropulping or slurring equipment
- 104.6(455B) Air classifiers
- 104.7(455B) Metals separation equipment
- 104.8(455B) Sludge processing
- 104.9(455B) Storage containers and facilities
- 104.10(455B) Operating requirements for all processing facilities
- 104.11(455B) Closure requirements
- 104.12 to 104.20 Reserved
- 104.21(455B) Specific design requirements
- 104.22(455B) Specific operating requirements for all recycling operations
- 104.23(455B) Recycling operations processing paper, cans, and bottles
- 104.24(455B) Closure requirements
- 104.25(455B) Operator certification
- 104.26(455D) Financial assurance for solid waste processing facilities

CHAPTER 105

ORGANIC MATERIALS COMPOSTING FACILITIES

- 105.1(455B,455D) General
- 105.2(455B,455D) Exemptions
- 105.3(455B,455D) General requirements for all composting facilities not exempt pursuant to 567—105.2(455B,455D)
- 105.4(455B,455D) Specific requirements for yard waste composting facilities
- 105.5(455B,455D) Small composting facilities receiving off-premises materials
- 105.6(455B,455D) Specific requirements for composting of dead farm animals
- 105.7(455B,455D) Permit requirements for solid waste composting facilities
- 105.8(455B,455D) Permit application requirements for solid waste composting facilities
- 105.9(455B,455D) Specific operating requirements for permitted solid waste composting facilities
- 105.10(455B,455D) Operator certification for permitted solid waste composting facilities
- 105.11(455B,455D) Record-keeping requirements for solid waste composting facilities
- 105.12(455B,455D) Reporting requirements for solid waste composting facilities
- 105.13(455B,455D) Closure requirements for solid waste composting facilities
- 105.14(455B,455D) Composting facility financial assurance
- 105.15(455B,455D) Variances

CHAPTER 106
CITIZEN CONVENIENCE CENTERS AND TRANSFER STATIONS

- 106.1(455B) Compliance
- 106.2(455B,455D) Definitions
- 106.3(455B) Citizen convenience center and transfer station permits
- 106.4(455B) Citizen convenience center permit application requirements
- 106.5(455B) Citizen convenience center operations
- 106.6(455B,455D) Citizen convenience center reporting requirements
- 106.7(455B) Citizen convenience center closure requirements
- 106.8(455B) Transfer station permit application requirements
- 106.9(455B) Transfer station siting and location requirements
- 106.10(455B) Transfer station design standards
- 106.11(455B) Transfer station operating requirements
- 106.12(455B) Temporary solid waste storage at transfer stations
- 106.13(455B,455D) Transfer station record-keeping requirements
- 106.14(455B,455D) Transfer station reporting requirements
- 106.15(455B) Solid waste transport vehicle construction and maintenance requirements
- 106.16(455B) Solid waste transport vehicle operation requirements
- 106.17(455B) Transfer station closure requirements
- 106.18(455B) Citizen convenience center and transfer station financial assurance
- 106.19(455B) Emergency response and remedial action plans

CHAPTER 107
BEVERAGE CONTAINER DEPOSITS

- 107.1(455C) Scope
- 107.2(455C) Definitions
- 107.3(455C) Labeling requirements
- 107.4(455C) Redemption centers
- 107.5(455C) Redeemed containers—use
- 107.6 Reserved
- 107.7(455C) Redeemed containers must be reasonably clean
- 107.8(455C) Interpretive rules
- 107.9(455C) Pickup and acceptance of redeemed containers
- 107.10(455C) Dealer agent lists
- 107.11(455C) Refund value stated on containers—exceptions
- 107.12(455C) Education
- 107.13(455C) Refusing payment when a distributor discontinues a specific beverage product
- 107.14(455C) Payment of refund value
- 107.15(455C) Sales tax on deposits

CHAPTER 108
BENEFICIAL USE DETERMINATIONS:

SOLID BY-PRODUCTS AS RESOURCES AND ALTERNATIVE COVER MATERIAL

- 108.1(455B,455D) Purpose
- 108.2(455B,455D) Applicability and compliance
- 108.3(455B,455D) Definitions
- 108.4(455B,455D) Universally approved beneficial use determinations
- 108.5(455B,455D) Application requirements for beneficial use determinations other than alternative cover material
- 108.6(455B,455D) Requirements for beneficial uses other than alternative cover material
- 108.7(455B,455D) Record-keeping and reporting requirements for beneficial use projects other than alternative cover material

- 108.8(455B,455D) Universally approved beneficial use determinations for alternative cover material
- 108.9(455B,455D) Beneficial use determination application requirements for alternative cover material
- 108.10(455B,455D) Beneficial use of alternative cover material and state goal progress
- 108.11(455B,455D) Revocation of beneficial use determinations

CHAPTER 109
SPECIAL WASTE AUTHORIZATIONS

- 109.1(455B,455D) Purpose
- 109.2(455B,455D) Special waste authorization required
- 109.3(455B,455D) Definitions
- 109.4 Reserved
- 109.5(455B,455D) Applications
- 109.6(455B,455D) Restrictions
- 109.7(455B,455D) Landfill responsibilities
- 109.8(455B,455D) Special waste generator responsibilities
- 109.9(455B,455D) Infectious waste
- 109.10(455B,455D) Other special wastes
- 109.11(455B,455D) Conditions and requirements for the disposal of general special wastes

CHAPTER 110
Reserved

CHAPTER 111
ANNUAL REPORTS OF SOLID WASTE ENVIRONMENTAL MANAGEMENT SYSTEMS

- 111.1(455J) Purpose
- 111.2(455J) Role of the department
- 111.3(455J) Applicability
- 111.4(455J) Definitions
- 111.5(455J) Submittal of annual reports
- 111.6(455J) Contents of annual reports
- 111.7(455J) Evaluation criteria
- 111.8(455J) Evaluation outcomes

CHAPTER 112
Reserved

CHAPTER 113
SANITARY LANDFILLS FOR MUNICIPAL
SOLID WASTE: GROUNDWATER PROTECTION SYSTEMS FOR THE DISPOSAL OF
NONHAZARDOUS WASTES

- 113.1(455B) Purpose
- 113.2(455B) Applicability and compliance
- 113.3(455B) Definitions
- 113.4(455B) Permits
- 113.5(455B) Permit application requirements
- 113.6(455B) Siting and location requirements for MSWLFs
- 113.7(455B) MSWLF unit design and construction standards
- 113.8(455B) Operating requirements
- 113.9(455B) Environmental monitoring and corrective action requirements for air quality and landfill gas
- 113.10(455B) Environmental monitoring and corrective action requirements for groundwater and surface water
- 113.11(455B,455D) Record-keeping and reporting requirements

- 113.12(455B) Closure criteria
- 113.13(455B) Postclosure care requirements
- 113.14(455B) Municipal solid waste landfill financial assurance
- 113.15(455B,455D) Variances

CHAPTER 114

SANITARY LANDFILLS: CONSTRUCTION AND DEMOLITION WASTES

- 114.1(455B) Scope and applicability
- 114.2(455B) Permit required
- 114.3(455B) Types of permits
- 114.4(455B) Applications for permits
- 114.5(455B) Preparation of plans
- 114.6(455B) Construction and operation
- 114.7(455B) Compliance with rule changes
- 114.8(455B) Amendments
- 114.9(455B) Transfer of title and permit
- 114.10(455B) Permit conditions
- 114.11(455B) Effect of revocation
- 114.12(455B) Inspection prior to start-up
- 114.13(455B) Primary plan requirements for all sanitary disposal projects
- 114.14(455B) Hydrologic monitoring system planning requirements
- 114.15(455B) Soil investigation
- 114.16(455B) Hydrogeologic investigation
- 114.17(455B) Hydrologic monitoring system planning report requirements
- 114.18(455B) Evaluation of hydrogeologic conditions
- 114.19(455B) Monitoring system plan
- 114.20(455B) Sampling protocol
- 114.21(455B) Monitoring well maintenance and performance reevaluation plan
- 114.22(455B) Monitoring well siting requirements
- 114.23(455B) Monitoring well/soil boring construction standards
- 114.24(455B) Sealing abandoned wells and boreholes
- 114.25(455B) Variance from design, construction, and operation standards
- 114.26(455B) General requirements for all sanitary landfills
- 114.27(455B) Operating requirements for all sanitary disposal projects
- 114.28(455B) Specific requirements for a sanitary landfill proposing to accept only construction and demolition waste
- 114.29(455B) Operator certification
- 114.30(455B) Emergency response and remedial action plans
- 114.31(455B) Construction and demolition wastes sanitary landfill financial assurance

CHAPTER 115

SANITARY LANDFILLS: INDUSTRIAL MONOFILLS

- 115.1(455B) Scope and applicability
- 115.2(455B) Permit required
- 115.3(455B) Types of permits
- 115.4(455B) Applications for permits
- 115.5(455B) Preparation of plans
- 115.6(455B) Construction and operation
- 115.7(455B) Compliance with rule changes
- 115.8(455B) Amendments
- 115.9(455B) Transfer of title and permit
- 115.10(455B) Permit conditions

| | |
|--------------|--|
| 115.11(455B) | Effect of revocation |
| 115.12(455B) | Inspection prior to start-up |
| 115.13(455B) | Primary plan requirements for all sanitary disposal projects |
| 115.14(455B) | Hydrologic monitoring system planning requirements |
| 115.15(455B) | Soil investigation |
| 115.16(455B) | Hydrogeologic investigation |
| 115.17(455B) | Hydrologic monitoring system planning report requirements |
| 115.18(455B) | Evaluation of hydrogeologic conditions |
| 115.19(455B) | Monitoring system plan |
| 115.20(455B) | Sampling protocol |
| 115.21(455B) | Monitoring well maintenance and performance reevaluation plan |
| 115.22(455B) | Monitoring well siting requirements |
| 115.23(455B) | Monitoring well/soil boring construction standards |
| 115.24(455B) | Sealing abandoned wells and boreholes |
| 115.25(455B) | Variance from design, construction, and operation standards |
| 115.26(455B) | General requirements for all sanitary landfills |
| 115.27(455B) | Operating requirements for all sanitary disposal projects |
| 115.28(455B) | Specific requirements for a sanitary landfill proposing to accept a specific type of solid waste |
| 115.29(455B) | Operator certification |
| 115.30(455B) | Emergency response and remedial action plans |
| 115.31(455B) | Industrial monofill sanitary landfill financial assurance |

CHAPTER 116

REGISTRATION OF WASTE TIRE HAULERS

| | |
|------------------|--------------------------------------|
| 116.1(455B,455D) | Purpose |
| 116.2(455B,455D) | Definitions |
| 116.3(455B,455D) | Registration requirement |
| 116.4(455B,455D) | Registration form |
| 116.5(455B,455D) | Registration fee |
| 116.6(455B,455D) | Bond form |
| 116.7(455B,455D) | Marking of equipment |
| 116.8(455B,455D) | Disposition of waste tires collected |
| 116.9(455B,455D) | Reporting requirements |

CHAPTER 117

WASTE TIRE MANAGEMENT

| | |
|------------------|---|
| 117.1(455B,455D) | Purpose |
| 117.2(455B,455D) | Definitions |
| 117.3(455B,455D) | Waste tire disposal |
| 117.4(455B,455D) | Waste tire storage permits and requirements |
| 117.5(455B,455D) | Used tire storage |
| 117.6(455B,455D) | Waste tire processing facility permits and requirements |
| 117.7(455B,455D) | Financial assurance for waste tire sites |
| 117.8(455B,455D) | Beneficial uses of waste tires |

CHAPTER 118

DISCARDED APPLIANCE DEMANUFACTURING

| | |
|------------------|---|
| 118.1(455B,455D) | Purpose |
| 118.2(455B,455D) | Applicability and compliance |
| 118.3(455B,455D) | Definitions |
| 118.4(455B,455D) | Storage and handling of appliances prior to demanufacturing |
| 118.5(455B,455D) | Appliance demanufacturing permits |

- 118.6(455B,455D) Appliance demanufacturing permit application requirements
- 118.7(455B,455D) Fixed facilities and mobile operations
- 118.8(455B,455D) Training
- 118.9(455B,455D) Refrigerant removal requirements
- 118.10(455B,455D) Mercury-containing component removal and disposal requirements
- 118.11(455B,455D) Capacitor removal requirements
- 118.12(455B,455D) Spills
- 118.13(455B,455D) Record keeping and reporting
- 118.14(455B,455D) Appliance demanufacturing facility closure requirements
- 118.15(455B,455D) Shredding of appliances
- 118.16(455B,455D) Appliance demanufacturing facility financial assurance requirements

CHAPTER 119

USED OIL AND USED OIL FILTERS

- 119.1(455D,455B) Authority, purpose, and applicability
- 119.2(455D,455B) Definitions
- 119.3(455D,455B) Prohibited disposal
- 119.4(455D,455B) Operational requirements for acceptance of used oil
- 119.5(455D,455B) Operational requirements for acceptance of used oil filters
- 119.6(455D,455B) Oil retailer requirements
- 119.7(455D,455B) Oil filter retailer requirements
- 119.8(455D,455B) Tanks
- 119.9(455D,455B) Locating collection sites

CHAPTER 120

LANDFARMING OF PETROLEUM CONTAMINATED SOIL

- 120.1(455B) Purpose
- 120.2(455B) Applicability and compliance
- 120.3(455B) Definitions
- 120.4(455B) Landfarming permits
- 120.5(455B) Landfarm permit application requirements
- 120.6(455B) PCS analysis and characterization
- 120.7(455B) Site exploration and suitability requirements for landfarms
- 120.8(455B) Landfarm design requirements
- 120.9(455B) Landfarm operating requirements
- 120.10(455B) Emergency response and remedial action plans
- 120.11(455B) Reporting and record-keeping requirements
- 120.12(455B) Landfarm closure
- 120.13(455B,455D) Financial assurance requirements for multiuse and single-use landfarms

CHAPTER 121

LAND APPLICATION OF WASTES

- 121.1(455B,17A) Scope of title
- 121.2(455B) Definitions
- 121.3(455B) Application for permits and forms
- 121.4(455B) Land application of solid wastes
- 121.5(455B) Land application of solid wastes for home and certain crop use
- 121.6(455B) Permit exemptions
- 121.7(455B) Permit requirements
- 121.8(455B,455D) Financial assurance requirements for land application of wastes

CHAPTER 122
CATHODE RAY TUBE DEVICE RECYCLING

- 122.1(455B,455D) Purpose
- 122.2(455B,455D) Applicability and compliance
- 122.3(455B,455D) Definitions
- 122.4(455B,455D) CRT recycling permits
- 122.5(455B,455D) Registration for CRT collection facilities
- 122.6(455B,455D) CRT collection and storage requirements for registered collection points
- 122.7(455B,455D) Record-keeping requirements for CRT collection facilities
- 122.8(455B,455D) CRT recycling facility permit application requirements
- 122.9(455B,455D) Site requirements for CRT recycling facilities
- 122.10(455B,455D) Design requirements for CRT recycling facilities
- 122.11(455B,455D) Operational requirements for permitted CRT recycling facilities
- 122.12(455B,455D) Further requirements for batteries for CRT recycling facilities
- 122.13(455B,455D) Further requirements for circuit boards for CRT recycling facilities
- 122.14(455B,455D) Further requirements for CRTs for CRT recycling facilities
- 122.15(455B,455D) Further requirements for removal and disposal of mercury-containing components for CRT recycling facilities
- 122.16(455B,455D) Further requirements for removal and disposal of PCB capacitors for CRT recycling facilities
- 122.17(455B,455D) Spills and releases at CRT recycling facilities
- 122.18(455B,455D) CRT recycling facilities that shred CRTs
- 122.19(455B,455D) Storage requirements for CRT recycling facilities
- 122.20(455B,455D) ERRAP requirements for CRT recycling facilities
- 122.21(455B,455D) Training requirements for CRT recycling facilities
- 122.22(455B,455D) Reporting requirements for CRT recycling facilities
- 122.23(455B,455D) Record-keeping requirements for CRT recycling facilities
- 122.24(455B,455D) Closure requirements for CRT recycling facilities
- 122.25(455B,455D) Financial assurance requirements for cathode ray tube (CRT) recycling facilities

CHAPTER 123
REGIONAL COLLECTION CENTERS AND
MOBILE UNIT COLLECTION AND CONSOLIDATION CENTERS

- 123.1(455B,455D,455F) Purpose
- 123.2(455B,455D,455F) Definitions
- 123.3(455B,455D,455F) Requirements for satellite facilities
- 123.4(455B,455D,455F) Regional collection center and mobile unit collection and consolidation center permits
- 123.5(455B,455D,455F) Permit application requirements for regional collection centers
- 123.6(455B,455D,455F) Permit application requirements for mobile unit collection and consolidation centers
- 123.7(455B,455D,455F) Site selection
- 123.8(455B,455D,455F) Structures
- 123.9(455B,455D,455F) Staff qualifications
- 123.10(455B,455D,455F) Plans and procedures
- 123.11(455B,455D,455F) Emergency response and remedial action plans
- 123.12(455B,455D,455F) Reporting requirements
- 123.13(455B,455D,455F) Financial assurance requirements for regional collection centers and mobile unit collection and consolidation centers

DIVISION B
DRINKING WATER
CHAPTER 40
SCOPE OF DIVISION—DEFINITIONS—FORMS—RULES OF PRACTICE
[Prior to 12/3/86, Water, Air and Waste Management [900]]

567—40.1(455B) Scope of division. The department conducts the public water supply program and establishes minimum standards for the construction of private water supply systems. The public water supply program includes the following: the establishment of drinking water standards, including maximum contaminant levels, treatment techniques, maximum residual disinfectant levels, action levels, monitoring, viability assessment, consumer confidence reporting, public notice requirements, public water supply system operator certification standards, environmental drinking water laboratory certification program, and a state revolving loan program consistent with the federal Safe Drinking Water Act, and the establishment of construction standards. The construction, modification and operation of any public water supply system requires a specific permit from the department. Certain construction permits are issued upon certification by a licensed professional engineer that a project meets standards, and, in certain instances, permits are issued by local authorities pursuant to 567—Chapter 9. Private water supplies are regulated by local boards of health.

Chapter 38 contains requirements for private water well construction permits, including test wells and monitoring wells.

Chapter 39 contains requirements for the proper closure or abandonment of wells.

Chapter 40 includes rules of practice, including designation of forms, applicable to the public in the department's administration of the subject matter of this division.

Chapter 41 contains the drinking water standards and specific monitoring requirements for the public water supply program.

Chapter 42 contains the public notification, public education, consumer confidence reporting, and record-keeping requirements for the public water supply program.

Chapter 43 contains specific design, construction, fee, operating, and operation permit requirements for the public water supply program.

Chapter 44 contains the drinking water state revolving fund program for the public water supply program.

Chapter 49 contains the nonpublic water supply well requirements.

Chapters 50 to 52 contain the provisions for water withdrawal and allocation.

Chapter 55 contains the provisions for public water supply aquifer storage and recovery.

Chapter 81 contains the provisions for the certification of public water supply system operators.

Chapter 82 contains the provisions for the certification of water well contractors.

Chapter 83 contains the provisions for the certification of laboratories to provide environmental testing of drinking water supplies.

[ARC 9915B, IAB 12/14/11, effective 1/18/12]

567—40.2(455B) Definitions.

“*Act*” means the Safe Drinking Water Act as amended (42 U.S.C. 300f et seq.).

“*Action level*” is the concentration of lead or copper in water which determines, in some cases, the treatment requirements that a water system is required to complete.

“*Acute health effect*” means the health effect of a contaminant which is an immediate rather than a long-term risk to health.

“*Animal confinement*” means a lot, yard, corral, or similar structure in which the concentration of livestock or poultry is such that a vegetative cover is not maintained.

“*Animal pasturage*” means a fenced area where vegetative cover is maintained and in which animals are enclosed.

“*Animal waste*” means animal wastes consisting of excreta, leachings, feed losses, litter, washwaters or other associated wastes.

“*Animal waste stockpiles*” means the stacking, composting or containment of animal wastes.

“Animal waste storage basin or lagoon” means a fully or partially excavated or diked earthen structure used for containing animal waste, including earthen sideslopes or floor.

“Animal waste storage tank” means a completely fabricated structure, with or without a cover, either formed in place or transported to the site, used for containing animal wastes.

“Antisiphon device” means a device which will prevent back siphonage by means of a relief valve which automatically opens to the atmosphere, preventing the creation of subatmospheric pressure within a pipe, thereby preventing water from reversing its flow.

“Authority” means the Iowa finance authority (IFA) as established by Iowa Code chapter 16.

“Backflow” means the flow of water or other liquids, mixtures, or substances into the distribution system of a potable water supply from any source other than its permitted source.

“Backflow preventer” is a device or means to prevent backflow into a potable water system.

“Back siphon” means the flowing back of used, contaminated, or polluted water, from a plumbing fixture or vessel as a result of negative or subatmospheric pressure within the distribution system.

“Bag filters” means pressure-driven separation devices that remove particulate matter larger than 1 micrometer using an engineered porous filtration media. They are typically constructed of a non-rigid, fabric filtration media housed in a pressure vessel in which the direction of flow is from the inside of the bag to the outside.

“Bank filtration” means a water treatment process that uses a well to recover surface water that has naturally infiltrated into groundwater through a river bed or bank(s). Infiltration is typically enhanced by the hydraulic gradient imposed by a nearby pumping water supply or other well(s).

“Best available technology” or *“BAT”* means the best technology, treatment techniques, or other means which the state finds, after examination, for efficacy under field conditions and not solely under laboratory conditions, are available (taking cost into consideration).

“Cartridge filters” means pressure-driven separation devices that remove particulate matter larger than 1 micrometer using an engineered porous filtration media. They are typically constructed as rigid or semi-rigid, self-supporting filter elements housed in pressure vessels in which flow is from the outside of the cartridge to the inside.

“Cistern” means a tank in which rainwater from roof drains is stored.

“Clean compliance history” means, for the purposes of 567—paragraph 41.2(1)“e”(4)“2,” a record of no monitoring violations and no coliform treatment technique trigger exceedances or treatment technique violations under 567—subrule 41.2(1).

“Coagulation” means a process using coagulation chemicals and mixing by which colloidal and suspended materials are destabilized and agglomerated into flocs.

“Combined distribution system (CDS)” means the interconnected distribution system consisting of the distribution systems of wholesale systems and of the consecutive systems that receive finished water.

“Commission” means the environmental protection commission of the state of Iowa.

“Community water system (CWS)” means a public water supply system which has at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents.

“Compliance cycle” means the nine-year (calendar year) cycle during which public water systems must monitor. Each compliance cycle consists of three three-year compliance periods. The first calendar year cycle begins January 1, 1993, and ends December 31, 2001; the second begins January 1, 2002, and ends December 31, 2010; the third begins January 1, 2011, and ends December 31, 2019, and continues every nine years thereafter.

“Compliance period” means a three-year (calendar year) period within a compliance cycle. Each compliance cycle has three three-year compliance periods. Within the first compliance cycle, the first compliance period runs from January 1, 1993, to December 31, 1995; the second from January 1, 1996, to December 31, 1998; the third from January 1, 1999, to December 31, 2001, and continues every three years thereafter.

“Composite correction program (CCP)” is a systematic, comprehensive procedure that identifies and corrects the unique combination of factors, in the areas of design, operation, maintenance, and administration, that limit the performance of a filtration plant. The CCP is comprised of two elements:

comprehensive performance evaluation, which is the evaluation phase, and comprehensive technical assistance, which is the performance improvement phase.

“*Comprehensive performance evaluation (CPE)*” is a thorough review and analysis of a treatment plant’s performance-based capabilities and associated administrative, operation and maintenance practices. The CPE is conducted to identify factors that may be adversely impacting a plant’s capability to achieve compliance and emphasizes approaches that can be implemented without significant capital improvements. For purposes of compliance with surface water or influenced groundwater treatment plant requirements pursuant to 567—Chapters 41, 42, and 43, the comprehensive performance evaluation must consist of at least the following components: assessment of plant performance; evaluation of major unit processes; identification and prioritization of performance limiting factors; assessment of the applicability of comprehensive technical assistance; and preparation of a CPE report.

“*Comprehensive technical assistance (CTA)*” is the performance improvement phase of the composite correction plan that is implemented if the comprehensive performance evaluation results indicate improved performance potential by a filtration plant, in which the system must identify and systematically address plant-specific factors.

“*Confluent growth*” means a continuous bacterial growth covering the entire filtration area of a membrane filter, or a portion thereof, in which bacterial colonies are not discrete.

“*Consecutive public water supply*” means an active public water supply which purchases or obtains all or a portion of its water from another, separate public water supply, also called a wholesale system. Delivery may be through a direct connection or through the distribution system of one or more consecutive systems.

“*Conservation easements*” means an interest in land that entitles a person to use the land possessed by another (affirmative easement), or to restrict uses of the land subject to the easement (negative easement). A conservation easement restricts the landowner to uses that are compatible with resource conservation.

“*Contaminant*” means any physical, chemical, biological, or radiological substance or matter in water.

“*Contiguous*” means directly adjacent or touching along all or most of one side of a legally defined piece of property. Tracts of land involved in the same operation or water supply and separated only by roads, railroads, or bike trails are deemed contiguous tracts.

“*Conventional filtration treatment*” means a series of processes including coagulation, flocculation, sedimentation, and filtration resulting in substantial particulate removal.

“*Corrosion inhibitor*” means a substance capable of reducing the corrosivity of water toward metal plumbing materials, especially lead and copper, by forming a protective film on the interior surface of those materials.

“*Corrosive water*” means a water which due to its physical and chemical characteristics may cause leaching or dissolving of the constituents of the transporting system in which it is contained.

“*Cross connection*” means any actual or potential connection between a potable water supply and any other source or system through which it is possible to introduce into the potable system any used water, industrial fluid, gas, or other substance other than the intended potable water with which the system is supplied.

“*Customers*” in consumer confidence reports are defined as billing units or service connections to which water is delivered by a community water system.

“*Deep well*” means a well located and constructed in such a manner that there is a continuous layer of low permeability soil or rock at least 5 feet thick located at least 25 feet below the normal ground surface and above the aquifer from which water is to be drawn.

“*Department*” means the Iowa department of natural resources, which has jurisdiction over all nontribal public water systems in Iowa.

“*Diatomaceous earth filtration*” means a process resulting in substantial particulate removal in which (1) a precoat cake of diatomaceous earth filter media is deposited on a support membrane (septum), and (2) while the water is filtered by passing through the cake on the septum, additional filter

media known as body feed is continuously added to the feed water to maintain the permeability of the filter cake.

“*Direct filtration*” means a series of processes including coagulation and filtration but excluding sedimentation resulting in substantial particulate removal.

“*Director*” means the director of the Iowa department of natural resources or a designee.

“*Disinfectant*” means any oxidant, including but not limited to chlorine, chlorine dioxide, chloramines, and ozone added to water in any part of the treatment process or distribution process, that is intended to kill or inactivate pathogenic microorganisms.

“*Disinfection*” means a process which inactivates pathogenic organisms in water by chemical oxidants or equivalent agents.

“*Disinfection profile*” is a summary of *Giardia lamblia* inactivation through the treatment plant. The procedure for developing a disinfection profile is contained in 567—paragraph 43.9(2) “b” and 567—subrule 43.10(2).

“*Dose equivalent*” means the product of the absorbed dose from ionizing radiation and such factors as account for differences in biological effectiveness due to the type of radiation and its distribution in the body as specified by the International Commission on Radiological Units and Measurements (ICRU).

“*Drinking water state revolving fund*” or “*DWSRF*” means the department-administered fund intended to develop drinking water revolving loans to help finance drinking water infrastructure improvements, source water protection, system technical assistance, and other activities intended to encourage and facilitate public water supply system rule compliance and public health protection established by Iowa Code sections 455B.291 to 455B.299.

“*DWSRF funds*” means the combination of a particular fiscal year’s federal capitalization grant appropriation plus the 20 percent state of Iowa match and any additional funds made available through the program.

“*Effective corrosion inhibitor residual*” means a concentration of corrosion inhibitor sufficient to form a passivating film on the interior walls of a pipe.

“*Eligible cost*” means the cost of all labor, material, machinery, equipment, loan initiation and loan service fees, project planning, design and construction engineering services, legal fees and expenses directly related to the project, capitalized interest during construction of the project, and all other expansion, construction, and rehabilitation of all or part of a project included in the funding request placed on the draft intended use plan as a fundable project, subject to approval by the commission.

“*Enhanced coagulation*” means the addition of sufficient coagulant for improved removal of disinfection byproduct precursors by conventional filtration treatment.

“*Enhanced softening*” means the improved removal of disinfection byproduct precursors by precipitative softening.

“*Federal cross-cutters*” means the federal laws and authorities that apply to projects funded through the DWSRF.

“*Filter profile*” is a graphical representation of individual filter performance, based on continuous turbidity measurements or total particle counts versus time for an entire filter run, from startup to backwash inclusively, that includes an assessment of filter performance while another filter is being backwashed.

“*Filtration*” means a process for removing particulate matter from water by passage through a porous media.

“*Finished water*” means water that is introduced into the distribution system of a public water system and is intended for distribution and consumption without further treatment, except as treatment necessary to maintain water quality in the distribution system (e.g., booster disinfection, addition of corrosion chemicals).

“*First draw sample*” means a one-liter sample of tap water, collected in accordance with 567—paragraph 41.4(1) “c” that has been standing in plumbing pipes at least six hours and is collected without flushing the tap.

“*Fiscal year*” means the federal fiscal year starting October 1 and ending September 30.

“*Flocculation*” means a process to enhance agglomeration or collection of smaller floc particles into larger, more easily settleable particles through gentle stirring by hydraulic or mechanical means.

“*Flowing stream*” means a course of running water flowing in a definite channel.

“*GAC10*” means granular activated carbon filter beds with an empty-bed contact time of ten minutes based on average daily flow and a carbon reactivation frequency of every 180 days, except that the reactivation frequency for GAC10 is 120 days when used as a best available technology for compliance with the maximum contaminant level locational running annual average for total trihalomethanes and haloacetic acids.

“*GAC20*” means granular activated carbon filter beds with an empty-bed contact time of 20 minutes based on average daily flow and a carbon reactivation frequency of every 240 days.

“*Gross alpha particle activity*” means the total radioactivity due to alpha particle emission as inferred from measurements on a dry sample.

“*Gross beta particle activity*” means the total radioactivity due to beta particle emission as inferred from measurements on a dry sample.

“*Haloacetic acids (HAA5)*” means the sum of the concentrations in milligrams per liter of the haloacetic acid compounds (monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid, and dibromoacetic acid), rounded to two significant figures after addition.

“*Halogen*” means one of the chemical elements chlorine, bromine or iodine.

“*Health advisory (HA)*” means a group of levels set by EPA below which no harmful health effect is expected from a given contaminant in drinking water. The HAs used by the department are listed in the most current edition of the EPA “Drinking Water Regulations and Health Advisories” bulletin. The lifetime HA is the concentration of a chemical in drinking water that is not expected to cause any adverse noncarcinogenic effects over a lifetime of exposure, with a margin of safety. The long-term HA is the concentration of a chemical in drinking water that is not expected to cause any adverse noncarcinogenic effects up to approximately seven years (10 percent of an individual’s lifetime of exposure), with a margin of safety.

“*Human consumption*” means water used as part of or in connection with drinking; washing; food processing or incidental to commercial food preparation, such as: water used in beverages or other food items; ice used in drinks or in salad bars; water for washing of vegetables or other food items; water used for washing dishes; pans or utensils used in food preparation or service; water used for cleanup and washing of food preparation or service areas; water for bathing, showering, hand washing, or oral hygiene purposes. Human consumption does not include: water for production of packaged or bulk food products regulated by other state or federal regulatory agencies, such as livestock slaughtering or bottled or canned food and beverages; cooling water; industrial or commercial wash waters used for nonfood products; irrigation water; water used in toilets or urinals.

“*Impoundment*” means a reservoir, pond, or lake in which surface water is retained for a period of time, ranging from several months upward, created by constructing a barrier across a watercourse and used for storage, regulation or control of water.

“*Influenced groundwater (IGW)*” means any groundwater which is under the direct or indirect influence of surface water, as determined by the presence of (1) significant occurrence of insects or other macroorganisms, algae or large-diameter pathogens such as *Giardia lamblia* or *Cryptosporidium*; or (2) significant and relatively rapid shifts in water characteristics such as turbidity (particulate content), temperature, conductivity, or pH which correlate to climatological or surface water conditions, or other parameters as specified in 567—43.5(455B).

“*Initial compliance period*” means the first full three-year compliance period of a compliance cycle.

“*Intended use plan (IUP)*” means a plan identifying the intended uses of funds available for loans in the DWSRF for each fiscal year as described in Section 1452 of the Safe Drinking Water Act.

“*Lake or reservoir*” means a natural or man-made basin or hollow on the Earth’s surface in which water collects or is stored that may or may not have a current or single direction of flow.

“*Large water system*” means a water system that serves more than 50,000 persons.

“*Lead free,*” when used with respect to solder and flux, refers to solders and flux containing not more than 0.2 percent lead; when used with respect to pipes and pipe fittings, refers to pipes and pipe fittings

containing not more than 8.0 percent lead; and, when used with respect to plumbing fittings and fixtures intended by the manufacturer to dispense water for human ingestion, refers to fittings and fixtures that are in compliance with standards established in accordance with 42 U.S.C. 300-g-6(e).

“Lead service line” means a service line made of lead which connects the water main to the building inlet and any lead pigtail, gooseneck, or other fitting which is connected to such lead line. A lead gooseneck is not considered a lead service line unless it exceeds 10 feet.

“Legionella” means a genus of bacteria, some species of which have caused a type of pneumonia called legionnaires’ disease.

“Level 1 assessment” means an evaluation to identify the possible presence of sanitary defects, defects in distribution system coliform bacteria monitoring practices, and (when possible) the likely reason that the system triggered the assessment. A Level 1 assessment is conducted by the system operator or owner. Minimum elements of the assessment include review and identification of atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., whether a groundwater system is disinfected); existing water quality monitoring data; and inadequacies in sample sites, sampling protocol, and sample processing. The system owner or operator must conduct the assessment consistent with any department directives that tailor specific assessment elements with respect to the size and type of the system and the size, type, and characteristics of the distribution system.

“Level 2 assessment” means an evaluation to identify the possible presence of sanitary defects, defects in distribution system coliform bacteria monitoring practices, and (when possible) the likely reason that the system triggered the assessment. A Level 2 assessment provides a more detailed examination of the system (including the system’s monitoring and operational practices) than does a Level 1 assessment through the use of more comprehensive investigation and review of available information, additional internal and external resources, and other relevant practices. A Level 2 assessment is conducted by a department water supply inspector and will typically include the system operator. Minimum elements of the assessment include review and identification of atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., whether a groundwater system is disinfected); existing water quality monitoring data; and inadequacies in sample sites, sampling protocol, and sample processing. The department may tailor specific assessment elements with respect to the size and type of the system and the size, type and characteristics of the distribution system. The system must comply with any expedited actions or additional actions required by the department in the case of an *E. coli* MCL violation.

“Locational running annual average (LRAA)” means the average of the analytical results for samples taken at a particular monitoring location during the previous four calendar quarters.

“Maintenance” means the replacement of equipment or materials that are necessary to maintain the operation of the public water supply system but do not alter capacity, water quality or treatment method or effectiveness.

“Man-made beta particle and photon emitters” means all radionuclides emitting beta particles or photons or both listed in Maximum Permissible Body Burdens and Maximum Permissible Concentration of Radionuclides in Air or Water for Occupational Exposure, NBS Handbook 69, except the daughter products of thorium-232, uranium-235 and uranium-238.

“Maximum contaminant level” means the maximum permissible level of a contaminant in water which is delivered to any user of a public water system.

“Maximum contaminant level goal (MCLG)” means the maximum level of a contaminant in drinking water at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MCLGs are nonenforceable health goals.

“Maximum residual disinfectant level (MRDL)” means a level of a disinfectant added for water treatment that may not be exceeded at the consumer’s tap without an unacceptable possibility of adverse health effects.

“Maximum residual disinfectant level goal (MRDLG)” means the maximum level of a disinfectant added for water treatment at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MRDLGs are nonenforceable health goals and do not reflect the benefit of the addition of the chemical for control of waterborne microbial contaminants.

“Medium-size water system” means a water system that serves greater than 3,300 and less than or equal to 50,000 persons.

“Membrane filtration” means a pressure- or vacuum-driven separation process in which particulate matter larger than 1 micrometer is rejected by an engineered barrier, primarily through a size-exclusion mechanism, and which has a measurable removal efficiency of a target organism that can be verified through the application of a direct integrity test. This definition includes the common membrane technologies of microfiltration, ultrafiltration, nanofiltration, and reverse osmosis.

“Nonacute health effect” means the health effect of a contaminant which is a long-term rather than immediate risk to health.

“Noncommunity water system” means a public water system that is not a community water system. A noncommunity water system is either a “transient noncommunity water system (TNC)” or a “nontransient noncommunity water system (NTNC).”

“Nontransient noncommunity water system” or *“NTNC”* means a public water system other than a community water system which regularly serves at least 25 of the same persons four hours or more per day, for four or more days per week, for 26 or more weeks per year. Examples of NTNCs are schools, day-care centers, factories, offices and other public water systems which provide water to a fixed population of 25 or more people. In addition, other service areas, such as hotels, resorts, hospitals and restaurants, are considered as NTNCs if they regularly serve at least 25 or more of the same persons for four or more hours per day, for four or more days per week, for 26 or more weeks of the year.

“Optimal corrosion control treatment” means the corrosion control treatment that minimizes the lead and copper concentrations at users’ taps while ensuring that the treatment does not cause the water system to violate any drinking water standards (567—Chapters 40 to 43).

“Performance evaluation sample” means a reference sample provided to a laboratory for the purpose of demonstrating that a laboratory can successfully analyze the sample within limits of performance specified by the department. The true value of the concentration of the reference material is unknown to the laboratory at the time of analysis.

“Picocurie (pCi)” means that quantity of radioactive material producing 2.22 nuclear transformations per minute.

“Plant intake” means the works or structures at the head of a conduit through which water is diverted from a surface water source (e.g., river, reservoir, or lake) into the treatment plant.

“Point of disinfectant application” is the point where the disinfectant is applied and water downstream of that point is not subject to recontamination by surface water runoff.

“Point-of-entry treatment device (POE)” is a treatment device applied to the drinking water entering a house or building for the purpose of reducing contaminants in the drinking water distributed throughout the house or building.

“Point-of-use treatment device (POU)” is a treatment device applied to a single tap or multiple taps used for the purpose of reducing contaminants in drinking water at those taps, but is not intended to treat all of the water in the facility.

“Population served” means the total number of persons served by a public water supply that provides water intended for human consumption. For municipalities which serve only the population within their incorporated boundaries, it is the last official U.S. census population (or officially amended census population). For all other community public water supply systems, it is either the actual population counted which is verifiable by the department, or population as calculated by multiplying the number of service connections by an occupancy factor of 2.5 persons per service connection. For municipalities which also serve outside their incorporated boundaries, the served population must be

added to the official census population determined either by verifiable count or by the 2.5 persons per service connection occupancy factor. For nontransient noncommunity (NTNC) and transient noncommunity (TNC) systems, it is the average number of daily employees plus the average number of other persons served such as customers or visitors during the peak month of the year regardless if each person actually uses the water for human consumption. Where a system provides water to another public water supply system (consecutive public water supply system) which is required to have an operation permit, the population of the recipient water supply shall not be counted as a part of the water system providing the water. Community and nontransient noncommunity public water supply systems will pay their operation permit fees based upon the population served.

“Presedimentation” means a preliminary treatment process used to remove gravel, sand, and other particulate material from the source water through settling before the water enters the primary clarification and filtration processes in a treatment plant.

“Privy” means a structure used for the deposition of human body wastes.

“Project” includes the planning, design, construction, alteration or extension of any public water supply system but does not include the maintenance of a system.

“Project priority list” means the list of projects in priority order that may qualify for DWSRF loan assistance contained in the IUP document prepared pursuant to rule 567—44.8(455B). The priority list shall identify all projects eligible for funding and the points assigned to each project pursuant to 567—subrule 44.7(7).

“Public water supply system control” is defined as one of the following forms of authority over a service line: authority to set standards for construction, repair, or maintenance of the service line; authority to replace, repair, or maintain the service line; or ownership of the line. Contaminants added to the water under circumstances controlled by the water consumer or user, with the exception of those contaminants resulting from the corrosion of piping and plumbing caused by water quality, are excluded from this definition of control.

“Public water supply system (PWS)” means a system for the provision to the public of water for human consumption through pipes or other constructed conveyances, if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year. Such term includes: any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system; and any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. Such term does not include any “special irrigation district.” A public water system is either a “community water system” or a “noncommunity water system.”

“Regional water system” means a public water supply system in which the projected number of service connections in at least 50 percent of the length of the distribution system does not average more than eight service connections per linear mile of water main.

“Rem” means the unit of dose equivalent from ionizing radiation to the total body or any internal organ or organ system. A “millirem” (mrem) is 1/1000 of a rem.

“Repeat compliance period” means any subsequent compliance period after the initial compliance period.

“Residual disinfectant concentration” (“C” in CT calculations) means the concentration of disinfectant measured in mg/l in a representative sample of water.

“Sanitary defect” means a defect that could provide a pathway of entry for microbial contamination into the distribution system or that is indicative of a failure or imminent failure in a barrier that is already in place.

“Sanitary sewer pipe” means a sewer complying with the department’s standards for sewer construction.

“Sanitary survey” means a review and on-site inspection conducted by the department of the water source, facilities, equipment, operation and maintenance and records of a public water supply system for the purpose of evaluating the adequacy of such source, facilities, equipment, operation and maintenance for producing and distributing safe drinking water and identifying improvements necessary to maintain or improve drinking water quality, pursuant to 567—subrule 43.1(7).

“*SDWA*” means the Safe Drinking Water Act.

“*Seasonal system*” means a noncommunity water system that is not operated as a public water system on a year-round basis and starts up and shuts down at the beginning and end of each operating season.

“*Sedimentation*” means a water treatment process for removal of solid particles from a suspension before filtration by gravity or separation.

“*Septic tank*” means a watertight tank which receives sewage.

“*Service connections*” means the total number of active and inactive service lines originating from a water distribution main for the purpose of delivering water intended for human consumption. For municipalities, rural water districts, mobile home parks, housing developments, and similar facilities, this includes, but is not limited to, occupied and unoccupied residences and buildings, provided that there is a service line connected to the water main (or another service line), and running onto the property. For rental properties which are separate public water supply systems, this includes, but is not limited to, the number of rental units such as apartments. Connections to a system that delivers water by a constructed conveyance other than a pipe are excluded from the definition, if:

1. The water is used exclusively for purposes other than human consumption;
2. The department determines that alternative water to achieve the equivalent level of public health protection provided by the applicable national primary drinking water regulation is provided for human consumption; or
3. The department determines that the water provided for human consumption is centrally treated or treated at the point of entry by the provider, a pass-through entity, or the user to achieve the equivalent level of protection provided by the applicable national primary drinking water regulations.

“*Service line sample*” means a one-liter sample of water, collected in accordance with 567—paragraph 41.4(1)“c” for the purpose of determining the concentration of lead and copper which has been standing for at least six hours in a service line.

“*Shallow well*” means a well located and constructed in such a manner that there is not a continuous layer of low permeability soil or rock (or equivalent retarding mechanism acceptable to the department) at least 5 feet thick, the top of which is located at least 25 feet below the normal ground surface and above the aquifer from which water is to be drawn.

“*Significant deficiency*” includes a defect in design, operation, or maintenance, or a failure or malfunction of the sources, treatment, storage, or distribution system that the department determines to be causing, or has the potential for causing the introduction of contamination into the water delivered to consumers.

“*Significant noncompliance*” means the failure to comply with any national primary drinking water standard as adopted by the state of Iowa according to criteria established by the administrator of the federal Environmental Protection Agency.

“*Single-family structure*” means a building constructed as a single-family residence that is currently used as either a residence or a place of business.

“*Slow sand filtration*” means a process involving passage of raw water through a bed of sand at low velocity (generally less than 0.4 m/h (0.02 ft/min)) resulting in substantial particulate removal by physical and biological mechanisms.

“*Small water system*” means a water system that serves 3,300 persons or fewer.

“*Special irrigation district*” means an irrigation district in existence prior to May 18, 1994, that provides primarily agricultural service through a piped water system with only incidental residential or similar use where the system or the residential or similar users of the system comply with numbered paragraphs “2” and “3” in the definition of “service connections.”

“*Standard methods*” means “Standard Methods for the Examination of Water and Wastewater,” American Public Health Association, 1015 15th Street N.W., Washington, DC 20005.

“*Standard sample*” means the aliquot of finished drinking water that is examined for the presence of coliform bacteria.

“*Standard specifications*” means specifications submitted to the department for use as a reference in reviewing future plans for proposed water main construction.

“*Supplier of water*” means any person who owns or operates a public water supply system.

“*Surface water*” means all water which is open to the atmosphere and subject to surface runoff.

“*SUVA*” means Specific Ultraviolet Absorption at 254 nanometers (nm), an indicator of the humic content of water. It is a calculated parameter obtained by dividing a sample’s ultraviolet absorption at a wavelength of 254 nm (in m⁻¹) by its concentration of dissolved organic carbon (in mg/L).

“*Ten States Standards*” means the “Recommended Standards for Water Works,” 2012 edition as adopted by the Great Lakes—Upper Mississippi River Board of State and Provincial Public Health and Environmental Managers.

“*Too numerous to count*” means that the total number of bacterial colonies exceeds 200 on a 47-mm diameter membrane filter used for coliform detection.

“*Total organic carbon (TOC)*” means total organic carbon in milligrams per liter, measured using heat, oxygen, ultraviolet irradiation, chemical oxidants, or combinations of these oxidants that convert organic carbon to carbon dioxide, rounded to two significant figures.

“*Total trihalomethanes (TTHM)*” means the sum of the concentration in milligrams per liter of the trihalomethane compounds trichloromethane (chloroform), dibromochloromethane, bromodichloromethane and tribromomethane (bromoform), rounded to two significant figures.

“*Transient noncommunity water system (TNC)*” means a noncommunity water system that does not regularly serve at least 25 of the same persons over six months per calendar year.

“*Treatment technique (TT)*” means a treatment process required to minimize the level of a contaminant in drinking water. A treatment technique is specified in cases where it is not technically or economically feasible to establish an MCL, and it is an enforceable procedure or level of technological performance which public water systems must follow to ensure control of a contaminant.

“*Trihalomethane (THM)*” means one of the family of organic compounds, named as derivatives of methane, wherein three of the four hydrogen atoms in methane are each substituted by a halogen atom in the molecular structure.

“*Two-stage lime softening*” means a process in which chemical addition and hardness precipitation occur in each of two distinct unit clarification processes in series prior to filtration.

“*Uncovered finished water storage facility*” means a tank, reservoir, or other facility used to store water that will undergo no further treatment to reduce microbial pathogens except residual disinfection and is directly open to the atmosphere. Such facilities are prohibited.

“*Unregulated contaminant*” means a contaminant for which no MCL has been set, but which does have federal monitoring requirements for certain public water systems set forth in CFR Title 40, Part 141.40, and additional reporting requirements in rule 567—42.3(455B).

“*Viability*” means the technical, financial, and managerial ability to comply with applicable national primary drinking water standards as adopted by the state of Iowa. Viability is the ability of a system to remain in compliance insofar as the requirements of the SDWA.

“*Virus*” means a virus of fecal origin which is infectious to humans by waterborne transmission.

“*Waterborne disease outbreak*” means the significant occurrence of acute infectious illness, epidemiologically associated with the ingestion of water from a public water system which is deficient in treatment, as determined by the Iowa department of public health.

“*Water distribution system*” means that portion of the water supply system in which water is conveyed from the water treatment plant or other supply point to the premises of the consumer, including any storage facilities and pumping stations.

“*Water main pipe*” means a water main complying with the department’s standards for water main construction.

“*Wholesale system*” means a public water system that treats source water as necessary to produce finished water and then delivers some or all of that finished water to another public water system. Delivery may be through a direct connection or through the distribution system of one or more consecutive systems.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—40.3(17A,455B) Forms. The following forms are used by the public to apply for department approvals and to report on activities related to the public water supply program of the department. All

forms may be obtained from the department's website at www.iowadnr.gov (water supply pages) or from the Environmental Services Division, Administrative Support Station, Department of Natural Resources, Henry A. Wallace Building, 502 East Ninth Street, Des Moines, Iowa 50319-0034. Properly completed application forms shall be submitted to the Water Supply Section, Environmental Services Division. Water supply system monthly and other operation reporting forms shall be submitted to the appropriate field office (see 567—subrule 42.4(3)). Properly completed laboratory forms (reference 567—Chapter 83) shall be submitted to the State Hygienic Laboratory or as otherwise designated by the department.

40.3(1) *Construction permit application forms.* Schedules “1a” through “16d” are required.

| <u>Schedule No.</u> | <u>Name of Form</u> | <u>Form Number</u> |
|---------------------|---|--------------------|
| “1a” | General Information | 542-3178 |
| “1b” | Minor Water Main Construction Permit | 542-3151 |
| “1c” | Fee Schedule | 542-3179 |
| “2a” | Water Mains, General | 542-3030 |
| “2b” | Water Mains, Specifications | 542-3031 |
| “2c” | Notification of Minor Water Main Construction | 542-3152 |
| “3a” | Water System, Preliminary Data | 542-3032 |
| “3b” | Water Quality Data | 542-3029 |
| “3c” | Surface Water Quality Data | 542-3028 |
| “4” | Site Selection | 542-3078 |
| “5a” | Well Construction | 542-1005 |
| “5b” | Well Appurtenances | 542-3026 |
| “5c” | Well Profile | 542-1006 |
| “5d” | Surface Water Supply | 542-3139 |
| “6a” | Distribution Water Storage Facilities | 542-3140 |
| “7” | Schematic Flow Diagram | 542-3142 |
| “8” | Aeration | 542-3143 |

40.3(2) *Operation permit application forms.*

a. Form 13-2 — application for a new water supply 542-1300

b. Form 13-3 — renewal application for an existing water supply 542-1301

40.3(3) *Water supply reporting forms.* The monthly water supply operation report forms are available from the department's water supply operations section website. The laboratory analyses for compliance samples are reported via electronic means directly to the department by each certified laboratory.

40.3(4) *Laboratory certification application forms.* Reserved.
[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—40.4(17A,455B) Public water supply construction permit application procedures.

40.4(1) *General procedures.* Applications for written approval from the department for any new construction or for reconstruction pursuant to 567—Chapter 43 shall consist of complete plans and specifications, application fee, and appropriate water supply construction permit application schedules. Upon review, the department will issue a construction permit for approval of a project if the review shows that the project meets all departmental design standards in accordance with 567—Chapter 43. Approval of a project which does not meet all department design standards will be denied unless a variance as provided by 567—paragraph 43.3(2) “b” is granted. A variance may be requested at the time plans and specifications are submitted or after the design discrepancy is pointed out to the applicant.

The department may review submitted project plans and specifications and provide comments and recommendations to the applicant. Departmental comments and recommendations are advisory, except when departmental review determines that a facility does not comply with the plans or specifications as approved by the department or comply with the design standards pursuant to the criteria for certification of project design. The owner of the system must correct the deficiency in a timely manner as set forth by the department.

40.4(2) *Public water sources and below-ground level water storage facilities—site survey.* For public water sources and for below-ground level finished water storage facilities, a site survey and approval must be made by the department. The manner and procedures for applying for and processing a site survey are the same as in 40.4(1) except that the following information must be submitted by the applicant's engineer.

a. A preliminary engineering report or a cover letter which contains a brief description of the proposed source or storage facility and assurance that the project is in conformance with the long-range planning of the area.

b. Completed Schedule 1a — General Information

c. Completed Schedule 4 — Water Supply Facility Site Selection

d. A detailed map showing all potential sources of contamination (see 567—Chapter 43, Table A) within:

(1) 1,000 feet of a proposed well location. The scale shall not be smaller than 1 inch = 200 feet.

(2) 200 feet of a proposed below-ground level finished water storage facility.

(3) 2,500 feet from a proposed surface water source and a plat showing all facilities more than 2,500 feet from an impoundment (within the drainage area) that may be potential sources of contamination. The scale shall not be smaller than 1 inch = 660 feet.

(4) Six miles upstream of a proposed river intake.

40.4(3) *Modifications of an approved water supply construction project.* Persons seeking to make modifications to a water supply construction project after receiving a prior construction permit from the department shall submit an addendum to plans and specifications, a change order or revised plans and specifications at least 30 days prior to planned construction, and the appropriate fee. The department shall review the submitted material within 30 days of submission and shall issue a supplemental permit if the proposed modifications meet departmental standards.

40.4(4) *Certification of project design.* A permit shall be issued for the construction, installation or modification of a public water supply system or part of a system or for a water supply distribution system extension if a qualified, licensed professional engineer certifies that the plans and specifications comply with federal and state laws and regulations or that a variance to standards has been granted by the department. Refer to Schedule 1a.

567—40.5(17A,455B) Public water supply operation permit application procedures. A person requesting a water supply operation permit pursuant to 567—43.2(455B) must complete the appropriate application form, which will be provided by the department. Upon receipt of a completed application, the department will review the application and, if approved, will prepare and issue a water supply operation permit or draft permit, as applicable, and transmit it to the applicant. An annual operation fee pursuant to 567—subrule 43.2(1) is due by September 1 of each year. A permit or renewal will be denied when the applicant does not meet one or more requirements for issuance or renewal of this permit. An operation permit may be denied for any of the following reasons: system failed to pay the operation fee; system is not viable; system is not in compliance with the applicable maximum contaminant levels, treatment techniques, or action levels; system is in significant noncompliance with the provisions of 567—Chapter 41, 42, or 43.

567—40.6(455B) Drinking water state revolving fund loan application procedures. A person requesting a drinking water state revolving fund loan pursuant to 567—44.7(455B) must complete the appropriate application form, which will be provided by the department. The department will review the application package pursuant to 567—44.9(455B). Eligible projects will be ranked according to priority, with the highest-ranked projects receiving funding priority.

567—40.7(455B) Viability assessment procedures. A person required to complete a viability assessment pursuant to 567—43.8(455B) must submit the appropriate information as outlined in 567—43.8(455B) to the department. Self-assessment worksheets which can be used to prepare the viability assessment are available from the Water Supply Section, Department of Natural Resources, Henry A. Wallace Building, 502 East Ninth Street, Des Moines, Iowa 50319-0034.

These rules are intended to implement Iowa Code sections 455B.171 through 455B.188 and 455B.190 through 455B.192.

¹ Effective date of definitions “Population served” and “Service connections” and rule 40.5(17A,455B) delayed until adjournment of the 1995 General Assembly by the Administrative Rules Review Committee at its meeting held March 13, 1995.

CHAPTER 41
WATER SUPPLIES

[These rules transferred from Health Department, 1971 IDR (Title II, Chs 1 and 2)]

[Prior to 7/1/83, DEQ Ch 22]

[Prior to 12/3/86, Water, Air and Waste Management[900]]

567—41.1(455B) Primary drinking water regulations—coverage. 567—Chapters 40 through 44 and 83 shall apply to each public water supply system, unless the public water supply system meets all of the following conditions:

1. Consists only of distribution and storage facilities (and does not have any collection and treatment facilities);
2. Obtains all of its water from, but is not owned or operated by, a public water supply system to which such regulations apply;
3. Does not sell water to any person; and
4. Is not a carrier which conveys passengers in interstate commerce.

567—41.2(455B) Biological maximum contaminant level (MCL), treatment technique (TT), and monitoring requirements.

41.2(1) *Coliform bacteria and E. coli.* The provisions of this subrule include both maximum contaminant level and treatment technique requirements. The provisions of this subrule apply to all public water systems. Failure to comply with the applicable requirements in this subrule is a violation of the national primary drinking water regulations.

a. Maximum contaminant level. A public water system must determine compliance with the MCL for *E. coli* for each month in which the system is required to monitor for total coliforms. A system is in compliance with the MCL for *E. coli* for samples taken under this subrule unless any of the following conditions occur. For purposes of the public notification requirements in 567—42.1(455B), violation of the MCL may pose an acute risk to health.

(1) *E. coli*-positive repeat sample. The system has an *E. coli*-positive repeat sample following a total coliform-positive routine sample.

(2) *E. coli*-positive routine sample. The system has a total coliform-positive repeat sample following an *E. coli*-positive routine sample.

(3) Failure to collect all required repeat samples following *E. coli*-positive routine samples. The system fails to take all required repeat samples following an *E. coli*-positive routine sample.

(4) Failure to test for *E. coli* on any total coliform-positive repeat sample. The system fails to test for *E. coli* when any repeat sample tests positive for total coliform.

b. Analytical methodology.

(1) Sample volume. The standard sample volume required for analysis is 100 mL, regardless of the analytical method used.

(2) Presence/absence required. Only the presence or absence of total coliforms and *E. coli* is required to be determined in any compliance sample; a determination of density is acceptable but is not required.

(3) Holding time and temperature. The time from sample collection to initiation of test medium incubation may not exceed 30 hours. Systems are encouraged but not required to hold samples below 10° C during transit.

(4) Dechlorinating agent required for chlorinated water. If water having a residual chlorine (measured as free, combined, or total chlorine) is to be analyzed, sufficient sodium thiosulfate (Na₂S₂O₃) must be added to the sample bottle before sterilization to neutralize any residual chlorine in the water sample. Dechlorination procedures are addressed in Section 9060A.2 of Standard Methods for the Examination of Water and Wastewater (20th and 21st editions).

(5) Systems must conduct total coliform and *E. coli* analyses in accordance with one of the analytical methods in the following table.

| Methodology Category | Method ¹ | Citation ¹ |
|---|---|---|

¹The procedures must be done in accordance with the documents listed in 41.2(1)"a"(6). For Standard Methods, either the 20th (1998) or 21st (2005) edition may be used. For Standard Methods Online, the year in which each method was approved by the Standard Methods Committee is designated by the last two digits following the hyphen in the method number. The methods listed are the only

online versions that may be used. For vendor methods, the date of the method listed in 41.2(1)“a”(6) is the date/version of the approved method. The methods listed are the only versions that may be used for compliance with this rule. Laboratories should be careful to use only the approved versions of the methods, as product package inserts may not be the same as the approved versions of the methods.

²Incorporated by reference. See 41.2(1)“a”(6).

³Lactose broth, as commercially available, may be used in lieu of lauryl tryptose broth if the system conducts at least 25 parallel tests between lactose broth and lauryl tryptose broth using the water normally tested and if the findings from this comparison demonstrate that the false-positive rate and the false-negative rate for total coliforms, using lactose broth, is less than 10 percent.

⁴All filtration series must begin with membrane filtration equipment that has been sterilized by autoclaving. Exposure of filtration equipment to UV light is not adequate to ensure sterilization. Subsequent to the initial autoclaving, exposure of the filtration equipment to UV light may be used to sanitize the funnels between filtrations within a filtration series. Alternatively, membrane filtration equipment that is presterilized by the manufacturer (i.e., disposable funnel units) may be used.

⁵Multiple-tube and multi-well enumerative formats for this method are approved for use in presence-absence determination under this subrule.

⁶Colisure results may be read after an incubation time of 24 hours.

⁷A multiple-tube enumerative format, as described in Standard Methods for the Examination of Water and Wastewater 9221, is approved for this method for use in presence-absence determination under this subrule.

⁸The following changes must be made to the EC broth with MUG (EC-MUG) formulation: Potassium dihydrogen phosphate, KH₂PO₄, must be 1.5 g, and 4-methylumbelliferyl-beta-D-glucuronide must be 0.05 g.

(6) Methods incorporated by reference. The standards required in this subrule are incorporated by reference with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR Part 51. All approved material is available for inspection either electronically at www.regulations.gov, in hard copy at the Water Docket, or from the sources indicated below. The Docket ID is EPA-HQ-OW-2008-0878. Hard copies of these documents may be viewed at the Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room 3334, 1301 Constitution Avenue, NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202)566-1744, and the telephone number for the Water Docket is (202)566-2426. Copyrighted materials are only available for viewing in hard copy. These documents are also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202)741-6030 or go to www.archives.gov/federal-register/code-of-federal-regulations/ibr-locations.html.

(7) Laboratory certification. Systems must have all compliance samples required under this subrule analyzed by a laboratory certified by the department in accordance with 567—Chapter 83 to analyze drinking water samples. The laboratory used by the system must be certified for each method and associated contaminant used for compliance monitoring analyses under this subrule.

c. Sampling plan.

(1) Written sampling plan required. Systems must collect total coliform samples according to the written sampling plan.

1. Systems must develop a written sampling plan that identifies sample locations and a sample collection schedule that are representative of water throughout the distribution system. Major elements of the plan shall include, but not be limited to, the following:

- Map of the distribution system served by the system;
- List of routine compliance sample locations for each sample period;
- List of repeat compliance sample locations for each routine compliance sample location;
- Any other sample locations necessary to meet the requirements of this subrule;
- Sample collection schedule;
- Proper sampling technique instructions;
- Log of samples taken; and
- For groundwater systems subject to 567—41.7(455B), triggered source water monitoring plan.

2. The system shall review the sampling plan every two years and update it as needed and shall retain the sampling plan on file at the facility. The plan must be made available to the department upon request and for review during sanitary surveys and must be revised by the system at the direction of the department.

3. Monitoring under this subrule may take place at a customer’s premises, dedicated sampling station, or other designated compliance sampling location.

(2) Sampling schedule. Systems must collect routine samples at regular time intervals throughout the month. Systems that use only groundwater and serve 4,900 or fewer people, or regional water systems that use only groundwater and serve less than 121 miles of pipe, may collect all required routine samples on a single day if the samples are taken from different sites.

(3) Minimum number of required routine samples. Systems must take at least the minimum number of required routine samples even if the system has had an *E. coli* MCL violation or has exceeded the coliform treatment technique triggers in 41.2(1)“l.” Such samples must be designated as “routine” when submitted to the laboratory.

(4) Additional compliance monitoring samples. A system may conduct more compliance monitoring than is required to investigate potential problems in the distribution system and may use monitoring as a tool to assist in uncovering problems. A system may take more than the minimum number of required routine samples and must include the results when calculating whether the coliform treatment technique trigger in 41.2(1)“l”(1)“1” and “2” has been exceeded only if the samples are taken in accordance with the existing sampling plan and are representative of water throughout the distribution system. Such samples must be designated as “routine” when submitted to the laboratory.

(5) Repeat samples. Systems must identify repeat monitoring locations in the sampling plan. Repeat samples must be analyzed at the same laboratory as the corresponding original routine sample(s), unless written approval for use of a different laboratory is granted by the department. The system must collect at least one repeat sample from the sampling tap where the original routine total coliform-positive sample was taken, at least one repeat sample at a tap within five service connections upstream of the original sample location, and at least one repeat sample at a tap within five service

connections downstream of the original sample location. Such samples must be designated as “repeat” when submitted to the laboratory.

1. If the sampling location of a total coliform-positive sample is at or within one service connection from the end of the distribution system, the system must still take all required repeat samples. However, the department may allow an alternative sampling location in lieu of one of the upstream or downstream sampling locations.

2. A groundwater system with two or more wells that is required to conduct triggered source water monitoring under subrule 41.7(3) must collect groundwater source sample(s) in addition to the required repeat samples.

3. A groundwater system with a single well that is required to conduct triggered source water monitoring may, with written department approval, collect one of its required repeat samples at the triggered source water sample monitoring location. The system must demonstrate to the department’s satisfaction that the sampling plan remains representative of water quality in the distribution system. If approved, the sample result may be used to meet the requirements of subrule 41.7(3) and this subrule. If a repeat sample taken at the triggered source water monitoring location is *E. coli*-positive, the system has violated the *E. coli* MCL, and must also comply with the requirements for additional source water samples under 41.7(3) “a”(3).

4. The department may review, revise, and approve, as appropriate, repeat sampling proposed by the system under 41.2(1) “c”(5). The system must demonstrate that the sampling plan remains representative of the water quality in the distribution system.

(6) Special purpose samples. Special purpose samples, such as those taken to determine whether disinfection practices are sufficient following pipe placement, replacement, or repair, must not be used to determine whether the coliform treatment technique trigger has been exceeded. Repeat samples are not considered special purpose samples and must be used to determine whether the coliform treatment technique trigger has been exceeded. Such samples must be designated as “special” when submitted to the laboratory and cannot be used for compliance.

(7) Residual disinfectant measurement. Any system adding a chemical disinfectant to the water must meet the requirements specified in 567—subparagraph 42.4(3) “b”(1). The minimum required residual disinfectant measurements are as follows, unless otherwise directed by the department in writing:

1. Groundwater systems. A system that uses only groundwater and adds a chemical disinfectant or provides water that contains a disinfectant must measure and record the free and total chlorine residual disinfectant concentration at least at the same points in the distribution system and at the same time as routine and repeat total coliform bacteria samples are collected, as specified in 41.2(1) “e” through 41.2(1) “j.” The system shall report the residual disinfectant concentration to the laboratory with the bacteria sample and comply with the applicable reporting requirements of 567—subrule 42.4(3).

2. Surface water and influenced groundwater systems.

- Any surface water or IGW PWS must meet the requirements for minimum residual disinfectant entering the distribution system pursuant to 567—paragraph 43.5(4) “b”(2) “1”; and

- A system that uses surface water or IGW must comply with the requirements specified in 567—paragraph 43.5(4) “b”(2) “2” for daily distribution system residual disinfectant monitoring. The system must measure and record the free and total chlorine residual disinfectant concentration at least at the same points in the distribution system and at the same time as routine and repeat total coliform bacteria samples are collected, as specified in 41.2(1) “e” through 41.2(1) “j.” The residual disinfectant measurements required as a part of this subrule may be used to satisfy the requirement in 567—paragraph 43.5(4) “b”(2) “2” on the day(s) when a routine or repeat total coliform bacteria sample(s) is collected, in lieu of separate samples. The system shall report the residual disinfectant concentration to the laboratory with the bacteria sample and comply with the applicable reporting requirements of 567—subrule 42.4(3).

d. *Invalidation of total coliform samples.* A total coliform-positive sample invalidated under this paragraph does not count toward meeting the minimum monitoring requirements of this subrule.

(1) The department may invalidate a total coliform-positive sample only if the following conditions are met:

1. The laboratory establishes that improper sample analysis caused the total coliform-positive result.

2. The department, on the basis of the results of the required repeat samples, determines that the total coliform-positive sample resulted from a domestic or other non-distribution system plumbing problem. "Domestic or other non-distribution system plumbing problem" means a coliform contamination problem in a public water system with more than one service connection that is limited to the specific service connection from which the coliform-positive sample was taken. The department cannot invalidate a sample on the basis of repeat sample results unless all repeat samples collected at the same tap as the original total coliform-positive sample are also total coliform-positive and all repeat samples collected at a location other than the original tap are total coliform-negative. The department cannot invalidate a total coliform-positive sample on the basis of repeat samples if all the repeat samples are total coliform-negative or if the system has only one service connection.

3. The department has substantial grounds to believe that the total coliform-positive result is due to a circumstance or condition that does not reflect water quality in the distribution system. The system must still collect all repeat samples required under 41.2(1)"j" and use them to determine whether a coliform treatment technique trigger in 41.2(1)"l" has been exceeded.

The decision and supporting rationale for invalidating a total coliform-positive sample under 41.2(1)"d"(1) must be documented in writing, and approved and signed by the supervisor of the water supply operations section or water supply engineering section and the department official who recommended the decision. The department must make this document available to EPA and the public. The written documentation must state the specific cause of the total coliform-positive sample and what action the system has taken, or will take, to correct this problem. The department may not invalidate a total coliform-positive sample solely on the grounds that all repeat samples are total coliform-negative or because of poor sampling technique.

- (2) Laboratory invalidation. A laboratory must invalidate a total coliform sample (unless total coliforms are detected, in which case the sample is valid) if the sample produces a turbid culture in the absence of gas production using an analytical method where gas formation is examined (e.g., the multiple-tube fermentation technique), produces a turbid culture in the absence of an acid reaction in the presence-absence (P-A) coliform test, or exhibits confluent growth or produces colonies too numerous to count with an analytical method using a membrane filter (e.g., membrane filter technique). If a laboratory invalidates a sample because of such interference, the system must collect another sample from the same location as that of the original sample within 24 hours of being notified of the interference problem and must have the sample analyzed for the presence of total coliforms. The system must continue to resample within 24 hours and have the samples analyzed until a valid result is obtained. The department may waive the 24-hour time limit on a case-by-case basis.

- e. Routine monitoring for specific groundwater noncommunity water systems serving 1,000 or fewer people.* This paragraph applies to noncommunity water systems using only groundwater (not IGW) as a source and serving 1,000 or fewer people. Groundwater noncommunity water systems that serve schools, preschools, and child care facilities, and all public water systems owned or managed by state agencies, such as parks and rest areas, must monitor at the same frequency as a like-sized community water system, in accordance with 41.2(1)"f," 41.2(1)"g," or 41.2(1)"h."

- (1) General. Following any total coliform-positive sample taken under 41.2(1)"e," systems must comply with the repeat monitoring requirements and *E. coli* analytical requirements in 41.2(1)"j." Once all monitoring required by 41.2(1)"e" and 41.2(1)"j" for a calendar month has been completed, systems must determine whether any coliform treatment technique triggers specified in 41.2(1)"l" have been exceeded. If any trigger has been exceeded, systems must complete assessments as required by 41.2(1)"l."

- (2) Monitoring frequency for total coliforms. Systems must monitor each calendar quarter that the system provides water to the public, with the following exceptions:

1. A system on quarterly monitoring that experiences any of the following events must begin monthly monitoring in the month following the event. The system must continue on monthly monitoring until the system meets the requirements for returning to quarterly monitoring.

- The system has an *E. coli* MCL violation.
- The system triggers one Level 2 assessment under the provisions of 41.2(1)“l” in a rolling 12-month period.
- The system triggers two Level 1 assessments under the provisions of 41.2(1)“l” in a rolling 12-month period.
- The system has a coliform treatment technique violation.
- The system has two coliform monitoring violations in a rolling 12-month period.
- The system has one monitoring coliform violation and one Level 1 assessment under the provisions of 41.2(1)“l” in a rolling 12-month period.

2. A system on monthly monitoring for reasons other than those identified in 41.2(1)“e”(2)“1” is not considered to be on increased monitoring for the purposes of 41.2(1).

3. Seasonal systems must sample each month in which they are in operation. All seasonal systems must also demonstrate completion of a department-approved start-up procedure before serving water to the public, which includes a requirement for a coliform-negative start-up sample.

(3) Evaluation of sampling frequency during a sanitary survey. During each sanitary survey, the department must evaluate the status of the system including the distribution system, to determine whether the system is on an appropriate monitoring schedule. The department may modify the system’s monitoring schedule, as necessary, or may allow the system to stay on its existing monitoring schedule, consistent with the provisions of 41.2(1)“e.”

(4) Requirements for returning from monthly to quarterly sampling frequency for nonseasonal noncommunity systems. The department may reduce the monitoring frequency for a nonseasonal noncommunity system on monthly monitoring triggered under 41.2(1)“e”(2)“1” to quarterly monitoring if the system meets the following criteria. For the purposes of 41.2(1)“e”(4), “protected water source” means the well meets separation distances from sources of microbial contamination pursuant to 567—subrule 43.3(7), Table A; or the system has 4-log virus inactivation treatment that is approved by the department and is in continuous usage.

1. Within the previous 12 months, the system must have a completed sanitary survey or voluntary Level 2 assessment, be free of sanitary defects, and have a protected water source;

2. The system must have a clean compliance history for a minimum of the previous 12 months; and

3. The department must review the approved sampling plan, which must designate the time period(s) for monitoring based on site-specific considerations (e.g., during periods of highest demand or highest vulnerability to contamination). The system must collect compliance samples during these time periods.

(5) Additional routine monitoring for systems on quarterly sampling in the month following a total coliform-positive routine sample. Systems collecting samples on a quarterly frequency must conduct additional routine monitoring the month following one or more total coliform-positive samples (with or without a Level 1 treatment technique trigger). Systems must collect at least three routine samples during the next month. Systems may either collect samples at regular time intervals throughout the month or may collect all required routine samples on a single day if samples are taken from different sites. Systems must use the results of additional routine samples in coliform treatment technique trigger calculations under 41.2(1)“l.”

f. Routine monitoring for groundwater community water systems serving 1,000 or fewer people. This paragraph applies to community water systems using only groundwater (not IGW) as a source and serving 1,000 or fewer people.

(1) General. Following any total coliform-positive sample taken under 41.2(1)“f,” systems must comply with the repeat monitoring requirements and *E. coli* analytical requirements in 41.2(1)“j.” Once all monitoring required by 41.2(1)“f” and 41.2(1)“j” for a calendar month has been completed, systems must determine whether any coliform treatment technique triggers specified in 41.2(1)“l” have been exceeded. If any trigger has been exceeded, systems must complete assessments as required by 41.2(1)“l.”

(2) Monitoring frequency for total coliforms. The routine monitoring frequency for total coliforms is one sample per month.

g. Routine monitoring requirements for SW/IGW public water systems serving 1,000 or fewer people. This paragraph applies to all public water supply systems serving 1,000 or fewer people that use surface water/influenced groundwater sources, including consecutive systems.

(1) General. Following any total coliform-positive sample taken under 41.2(1)“g,” systems must comply with the repeat monitoring requirements and *E. coli* analytical requirements in 41.2(1)“j.” Once all monitoring required by 41.2(1)“g” and 41.2(1)“j” for a calendar month has been completed, systems must determine whether any coliform treatment technique triggers specified in 41.2(1)“l” have been exceeded. If any trigger has been exceeded, systems must complete assessments as required by 41.2(1)“l.”

(2) Monitoring frequency for total coliforms. The routine monitoring frequency for total coliforms is one sample per month. Systems may not reduce monitoring frequency.

(3) Seasonal systems must sample each month in which they are in operation, and the monitoring frequency cannot be reduced. All seasonal systems must also demonstrate completion of a department-approved start-up procedure before serving water to the public, which includes a requirement for a coliform-negative start-up sample.

h. Routine monitoring requirements for public water systems serving more than 1,000 people. The provisions of this paragraph apply to all public water systems serving more than 1,000 people except regional water systems. The requirements for regional water systems are listed in 41.2(1)“i.”

(1) General. Following any total coliform-positive sample taken under 41.2(1)“h,” systems must comply with the repeat monitoring requirements and *E. coli* analytical requirements in 41.2(1)“j.” Once all monitoring required by 41.2(1)“h” and 41.2(1)“l” for a calendar month has been completed, systems must determine whether any coliform treatment technique triggers specified in 41.2(1)“l” have been exceeded. If any trigger has been exceeded, systems must complete assessments as required by 41.2(1)“l.”

(2) Monitoring frequency for total coliforms. The routine monitoring frequency for total coliforms is based upon the population served by the system, as follows:

| Population Served | Minimum Number of Routine Samples per Month |
|-------------------|---|
| 1,001 to 2,500 | 2 |
| 2,501 to 3,300 | 3 |
| 3,301 to 4,100 | 4 |
| 4,101 to 4,900 | 5 |
| 4,901 to 5,800 | 6 |
| 5,801 to 6,700 | 7 |
| 6,701 to 7,600 | 8 |
| 7,601 to 8,500 | 9 |
| 8,501 to 12,900 | 10 |
| 12,901 to 17,200 | 15 |
| 17,201 to 21,500 | 20 |
| 21,501 to 25,000 | 25 |
| 25,001 to 33,000 | 30 |
| 33,001 to 41,000 | 40 |
| 41,001 to 50,000 | 50 |
| 50,001 to 59,000 | 60 |
| 59,001 to 70,000 | 70 |
| 70,001 to 83,000 | 80 |

| Population Served | Minimum Number of Routine Samples per Month |
|----------------------|---|
| 83,001 to 96,000 | 90 |
| 96,001 to 130,000 | 100 |
| 130,001 to 220,000 | 120 |
| 220,001 to 320,000 | 150 |
| 320,001 to 450,000 | 180 |
| 450,001 to 600,000 | 210 |
| 600,001 to 780,000 | 240 |
| 780,001 to 970,000 | 270 |
| 970,001 to 1,230,000 | 300 |

(3) Seasonal systems must sample each month in which they are in operation, and the monitoring frequency cannot be reduced. All seasonal systems must also demonstrate completion of a department-approved start-up procedure before serving water to the public, which includes a requirement for a coliform-negative start-up sample.

(4) Reduced monitoring. Community systems may not reduce the number of required routine samples.

(5) Increased monitoring. If the department, on the basis of a sanitary survey or monitoring results history, determines that some greater frequency of monitoring is more appropriate, that frequency shall be the frequency required under these rules. The increased frequency shall be confirmed or changed on the basis of subsequent surveys.

i. Routine monitoring requirements for regional public water systems. The provisions of 41.2(1)“i” apply to all regional water systems. The supplier of water for a regional water system as defined in 567—40.2(455B) shall sample for coliform bacteria at a frequency based upon the miles of pipe in its distribution system.

(1) General. Following any total coliform-positive sample taken under 41.2(1)“i,” systems must comply with the repeat monitoring requirements and *E. coli* analytical requirements in 41.2(1)“j.” Once all monitoring required by 41.2(1)“i” and 41.2(1)“j” for a calendar month has been completed, systems must determine whether any coliform treatment technique triggers specified in 41.2(1)“l” have been exceeded. If any trigger has been exceeded, systems must complete assessments as required by 41.2(1)“l.”

(2) Monitoring frequency for total coliforms. The routine monitoring frequency for total coliforms is based upon the miles of pipe in the system’s distribution system, as indicated in the following chart. In no case shall the sampling frequency for a regional water system be less than as set forth in 41.2(1)“h” based upon the population equivalent served. The following chart represents sampling frequency per miles of pipe in the distribution system and is determined by calculating one-half the square root of the miles of pipe.

| Miles of Pipe | Minimum Number of Routine Samples per Month |
|---------------|---|
| 0 – 9 | 1 |
| 10 – 25 | 2 |
| 26 – 49 | 3 |
| 50 – 81 | 4 |
| 82 – 121 | 5 |
| 122 – 169 | 6 |

| Miles of Pipe | Minimum Number of Routine Samples per Month |
|-------------------|---|
| 170 – 225 | 7 |
| 226 – 289 | 8 |
| 290 – 361 | 9 |
| 362 – 441 | 10 |
| 442 – 529 | 11 |
| 530 – 625 | 12 |
| 626 – 729 | 13 |
| 730 – 841 | 14 |
| 842 – 961 | 15 |
| 962 – 1,089 | 16 |
| 1,090 – 1,225 | 17 |
| 1,226 – 1,364 | 18 |
| 1,365 – 1,521 | 19 |
| 1,522 – 1,681 | 20 |
| 1,682 – 1,849 | 21 |
| 1,850 – 2,025 | 22 |
| 2,026 – 2,209 | 23 |
| 2,210 – 2,401 | 24 |
| 2,402 – 2,601 | 25 |
| 2,602 – 2,809 | 26 |
| 2,810 – 3,025 | 27 |
| 3,026 – 3,249 | 28 |
| 3,250 – 3,481 | 29 |
| 3,482 – 3,721 | 30 |
| 3,722 – 3,969 | 31 |
| 3,970 – 4,225 | 32 |
| 4,226 – 4,489 | 33 |
| 4,490 – 4,671 | 34 |
| 4,672 – 5,041 | 35 |
| 5,042 – 5,329 | 36 |
| 5,330 – 5,625 | 37 |
| 5,626 – 5,929 | 38 |
| 5,930 – 6,241 | 39 |
| 6,242 – 6,561 | 40 |
| 6,562 and greater | 41 |

(3) Reduced monitoring. Regional water systems may not reduce the number of required routine samples.

(4) Increased monitoring. If the department, on the basis of a sanitary survey or monitoring results history, determines that some greater frequency of monitoring is more appropriate, that frequency shall be the frequency required under these rules. The increased frequency shall be confirmed or changed on the basis of subsequent surveys.

j. Repeat monitoring. If a routine sample taken under 41.2(1)“e” through 41.2(1)“i” is total coliform-positive, the system must collect a set of repeat samples. The department cannot waive the requirement for a system to collect repeat samples.

(1) The system must collect no fewer than three repeat samples for each total coliform-positive routine sample found.

(2) The system must collect the repeat samples within 24 hours of being notified of the positive routine sample result. The department may extend the 24-hour limit on a case-by-case basis if the system has a logistical problem in collecting the repeat samples within 24 hours that is beyond its control. In the case of an extension, the department must specify how much time the system has to collect the repeat samples.

(3) The system must collect all repeat samples on the same day, except that the department may allow a system with a single service connection to collect the required set of repeat samples over a three-day period. “System with a single service connection” means a system which supplies drinking water to consumers through a single service line.

(4) The system must collect an additional set of repeat samples in the manner specified in 41.2(1)“j”(1) to (3) if one or more repeat samples in the current set of repeat samples is total coliform-positive. The system must collect the additional set of repeat samples within 24 hours of being notified of the positive result, unless the department extends the limit as provided in 41.2(1)“j”(2). The system must continue to collect additional sets of repeat samples until either total coliforms are not detected in one complete set of repeat samples or the system determines that a coliform treatment technique trigger specified in 41.2(1)“l” has been exceeded as a result of a total coliform-positive repeat sample and notifies the department. If a trigger identified in 41.2(1)“l” is exceeded as a result of a total coliform-positive routine sample, systems are required to conduct only one round of repeat monitoring for each total coliform-positive routine sample.

(5) Results of all routine and repeat samples taken under 41.2(1)“e” through 41.2(1)“i” that are not invalidated by the department must be used to determine whether a coliform treatment technique trigger specified in 41.2(1)“l” has been exceeded.

k. E. coli testing requirements.

(1) If any routine or repeat sample is total coliform-positive, the system must analyze that total coliform-positive culture medium to determine the presence of *E. coli*. If *E. coli* are present, the system must notify the department by the end of the same day when the system is notified of the test result. If the notification is outside of the department’s routine office hours, the system shall call the department’s Environmental Emergency Reporting Hotline at (515)725-8694.

(2) The department has the discretion to allow a system, on a case-by-case basis, to forgo *E. coli* testing on a total coliform-positive sample if that system assumes that the total coliform-positive sample is *E. coli*-positive. Accordingly, the system must notify the department as specified in 41.2(1)“k”(1), and the provisions of 41.2(1)“a” apply.

l. Coliform treatment technique triggers. Systems must conduct assessments in accordance with 41.2(1)“m” after exceeding any treatment technique trigger.

(1) Level 1 treatment technique triggers.

1. For systems taking 40 or more samples per month, the system exceeds 5.0 percent total coliform-positive samples for the month.

2. For systems taking fewer than 40 samples per month, the system has two or more total coliform-positive samples in the same month.

3. The system fails to take every required repeat sample after any single total coliform-positive sample.

(2) Level 2 treatment technique triggers.

1. An *E. coli* MCL violation, as specified in 41.2(1)“p”(1).

2. A second Level 1 trigger as defined in 41.2(1)“l”(1) within a rolling 12-month period, unless the department has determined a likely reason that the samples that caused the first Level 1 treatment technique trigger were total coliform-positive and has established that the system has corrected the problem.

m. Assessment requirements. Systems must ensure that Level 1 and 2 assessments are conducted in order to identify the possible presence of sanitary defects and defects in distribution system coliform monitoring practices. Level 1 assessments may be conducted by the system owner or operator. Level 2 assessments must be conducted by the department with the assistance of the system owner or operator.

(1) General. When conducting assessments, systems must ensure that the assessor evaluates minimum elements that include review and identification of inadequacies in sample sites; sampling protocol; sample processing; atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., small groundwater systems); and existing water quality monitoring data. The system must conduct the assessment consistent with any department directives that tailor specific assessment elements with respect to the size and type of the system, and the size type, and characteristics of the distribution system.

(2) Level 1 assessment. A system must conduct a Level 1 assessment consistent with the department requirements if the system exceeds one of the treatment technique triggers in 41.2(1)“l”(1).

1. The system must complete the Level 1 assessment as soon as practical after any trigger in 41.2(1)“l”(1). In the completed assessment form, the system must describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed. The system may also note on the assessment form that no sanitary defects were identified. The system must submit the completed Level 1 assessment form to the department within 30 days after the system learns that it has exceeded a trigger.

2. If the department reviews the completed Level 1 assessment and determines that the assessment is not sufficient (including any proposed timetable for any corrective actions not already completed), the department must consult with the system. If the department requires revisions after consultation, the system must submit a revised assessment form to the department on an agreed-upon schedule not to exceed 30 days from the date of the consultation.

3. Upon completion and submission of the assessment form by the system, the department must determine if the system has identified the likely cause for the Level 1 trigger and, if so, establish that the system has corrected the problem or has included a schedule acceptable to the department for correction of the problem.

(3) Level 2 assessment. A system must ensure that a Level 2 assessment is conducted if the system exceeds one of the treatment technique triggers in 41.2(1)“l”(2). The system must comply with any expedited actions or additional actions required by the department in the case of an *E. coli* MCL violation.

1. The system must ensure that a Level 2 assessment is completed by the department as soon as practical after any trigger in 41.2(1)“l”(2). The system must submit a completed Level 2 assessment form to the department within 30 days after the system learns that it has exceeded a trigger. The assessment form must contain a description of the sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed. It may also be noted on the assessment form that no sanitary defects were identified.

2. If the department reviews the completed Level 2 assessment and determines that the assessment is not sufficient (including any proposed timetable for any corrective actions not already completed), the department must consult with the system. If the department requires revisions after consultation, the system must submit a revised assessment form to the department on an agreed-upon schedule not to exceed 30 days.

3. Upon completion and submission of the assessment form by the system, the department must determine if the system has identified the likely cause for the Level 2 trigger and determine whether the system has corrected the problem or has included a schedule acceptable to the department for correction of the problem.

(4) Corrective actions. A system must correct sanitary defects found through either a Level 1 or 2 assessment conducted under 41.2(1)“l.” For corrections not completed by the time of submission of the assessment form, the system must complete the corrective action(s) in compliance with a timetable

approved by the department in consultation with the system. The system must notify the department when each scheduled corrective action is completed.

(5) Consultation. At any time during the assessment or corrective actions phase, either the water system or the department may request a consultation with the other party to determine the appropriate actions to be taken. The system may consult with the department on all relevant information that may impact on its ability to comply with a requirement of this subrule, including the method of accomplishment, an appropriate time frame, and other relevant information.

n. Reporting requirements.

(1) *E. coli.*

1. The system must notify the department by the end of the same day when the system learns of an *E. coli*-positive violation. If the notification is outside of the department's routine office hours, the system shall call the department's Environmental Emergency Reporting Hotline at (515)725-8694.

2. The system must notify the department by the end of the same day when the system learns of the *E. coli*-positive routine sample. If the notification is outside of the department's routine office hours, the system shall call the department's Environmental Emergency Reporting Hotline at (515)725-8694.

(2) A system that has violated the treatment technique for coliforms in 41.2(1)"l" must report the violation to the department no later than the end of the next business day after it learns of the violation, and must notify the public in accordance with rule 567—42.1(455B).

(3) A system required to conduct an assessment under the provisions of 41.2(1)"l" must submit the assessment report within 30 days. The system must notify the department in accordance with 41.2(1)"m"(4) when each scheduled corrective action is completed for any corrections that were not completed by the time of submission of the assessment form.

(4) A system that has failed to comply with a coliform monitoring requirement must report the monitoring violation to the department within 10 days after the system discovers the violation, and must notify the public in accordance with rule 567—42.1(455B).

(5) A seasonal system must certify, prior to serving water to the public, that it has complied with the department-approved start-up procedure.

o. Record-keeping requirements. Additional record-keeping requirements are listed in 567—paragraph 42.5(1)"j."

p. Violations.

(1) *E. coli* MCL violation. A system is in violation of the MCL for *E. coli* when any of the following occurs, and must conduct public notice in accordance with rule 567—42.1(455B):

1. The system has an *E. coli*-positive repeat sample following a total coliform-positive routine sample.

2. The system has a total coliform-positive repeat sample following an *E. coli*-positive routine sample.

3. The system fails to take all required repeat samples following an *E. coli*-positive routine sample.

4. The system fails to test for *E. coli* when any repeat sample tests positive for total coliform.

(2) Treatment technique violation. A system is in violation of a treatment technique trigger when any of the following occurs, and must conduct public notice in accordance with rule 567—42.1(455B):

1. A system exceeds a treatment technique trigger specified in 41.2(1)"l" and then fails to conduct the required assessment within the time frame specified in 41.2(1)"m."

2. A system exceeds a treatment technique trigger specified in 41.2(1)"l" and then fails to conduct the required corrective actions within the time frame specified in 41.2(1)"m"(4).

3. A seasonal system fails to complete a department-approved start-up procedure prior to serving water to the public, including collection of a finished water sample that tests total coliform-negative.

(3) Monitoring violation. A system is in violation of monitoring requirements when any of the following occurs, and must conduct public notice in accordance with rule 567—42.1(455B):

1. Failure to take every required routine or additional routine sample in a compliance period.

2. Failure to analyze for *E. coli* following a total coliform-positive routine sample.

(4) Reporting violation. A system is in violation of reporting requirements when any of the following occurs, and must conduct public notice in accordance with rule 567—42.1(455B):

1. Failure to submit a monitoring report after a system properly conducts monitoring in a timely manner.
2. Failure to submit a completed assessment form after a system properly conducts an assessment in a timely manner.
3. Failure to notify the department following an *E. coli*-positive sample as required by 41.2(1) “k”(1) in a timely manner.
4. Failure to submit the certification of completion of department-approved start-up procedure by a seasonal system.

q. Best available technology (BAT). The U.S. Environmental Protection Agency (EPA) identifies, and the department has adopted, the following as the best technology, treatment techniques, or other means available for all systems in achieving compliance with the maximum contaminant level for *E. coli* in 41.2(1) “a.” The following is also identified as affordable technology, treatment techniques, or other means available to systems serving 10,000 or fewer people for achieving compliance with the *E. coli* maximum contaminant level.

(1) Well protection. Protection of wells from fecal contamination by appropriate placement and construction.

(2) Disinfectant residual. Maintenance of a disinfectant residual throughout the distribution system.

(3) Distribution system maintenance. Proper maintenance of the distribution system including appropriate pipe replacement and repair procedures, main flushing programs, proper operation and maintenance of storage tanks and reservoirs, cross-connection control, and continual maintenance of a minimum positive water pressure of 20 psi in all parts of the distribution system at all times.

(4) Filtration or disinfection. Filtration and disinfection of surface water or groundwater under the direct influence of surface water in accordance with 567—43.5(455B), 567—43.9(455B), and 567—43.10(455B), or disinfection of groundwater in accordance with rule 567—41.7(455B) using strong oxidants such as, but not limited to, chlorine, chlorine dioxide, or ozone.

(5) Wellhead protection program. For groundwater systems, compliance with the requirements of the department’s wellhead protection program.

41.2(2) *Giardia.* Reserved.

41.2(3) *Heterotrophic plate count bacteria (HPC).*

a. Applicability. All public water systems that use a surface water source or source under the direct influence of surface water must provide treatment consisting of disinfection, as specified in 567—subrule 43.5(2), and filtration treatment which complies with 567—subrule 43.5(3). The heterotrophic plate count is an alternate method to demonstrate a detectable disinfectant residual in accordance with 567—paragraph 43.5(2) “d.”

b. Maximum contaminant levels. Reserved.

c. Monitoring requirements. Reserved.

d. BAT. Reserved.

e. Analytical methodology. Public water systems shall conduct heterotrophic plate count bacteria analysis in accordance with 567—subrule 43.5(2) and the following analytical method. Measurements for heterotrophic plate count bacteria must be conducted by a laboratory certified by the department to do such analysis, when heterotrophic plate count bacteria are being measured in lieu of a detectable residual disinfectant pursuant to 567—paragraph 43.5(2) “d.” In addition, the time from sample collection to initiation of analysis may not exceed eight hours, and the systems must hold the samples below 10 degrees Celsius during transit to the laboratory.

(1) Method. The heterotrophic plate count shall be performed in accordance with one of the following methods:

1. Method 9215B Pour Plate Method, Standard Methods for the Examination of Water and Wastewater, 18th edition, 1992, 19th edition, 1995, 20th edition, 1998, 21st edition, 2005, and 22nd edition, 2012. The cited method in any of these editions may be used. Standard Methods Online method 9215 B-04 may be used.

2. SimPlate Method, “IDEXX SimPlate™ HPC Test Method for Heterotrophs in Water,” November 2000, IDEXX Laboratories, Inc., One IDEXX Drive, Westbrook, ME 04092, telephone (800)321-0207.

(2) Reporting. The public water system shall report the results of heterotrophic plate count in accordance with 567—subparagraph 42.4(3)“c”(2).

41.2(4) Macroscopic organisms and algae.

a. *Applicability.* These rules apply to both community and noncommunity public water supply systems using surface water or groundwater under direct influence of surface water as defined by 567—subrule 43.5(1).

b. *Maximum contaminant levels (MCLs) for macroscopic organisms and algae.* Finished water shall be free of any macroscopic organisms such as plankton, worms, or cysts. The finished water algal cell count shall not exceed 500 organisms per milliliter or 10 percent of the total cells found in the raw water, whichever is greater.

c. *Monitoring requirements.* Reserved.

d. *BAT.* Reserved.

e. *Analytical methodology.* Measurement of the algal cells shall be in accordance with Method 10200F: Phytoplankton Counting Techniques, Standard Methods for the Examination of Water and Wastewater, 18th edition, pp. 10-13 to 10-16. Such measurement shall be required only when the department determines on the basis of complaints or otherwise that excessive algal cells may be present. [ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.3(455B) Maximum contaminant levels (MCLs) and monitoring requirements for inorganic contaminants other than lead or copper.

41.3(1) MCLs and other requirements for inorganic contaminants.

a. *Applicability.* Maximum contaminant levels for inorganic contaminants (IOCs) specified in 41.3(1)“b” apply to community water systems and nontransient noncommunity water systems as specified herein. The maximum contaminant level specified for fluoride applies only to community water systems and nontransient noncommunity systems which primarily serve children (child care facilities and schools). The maximum contaminant levels specified for nitrate, nitrite, and total nitrate and nitrite apply to community, nontransient noncommunity, and transient noncommunity water systems. At the discretion of the department, nitrate levels not to exceed 20.0 mg/L may be allowed in a noncommunity water system if the supplier of water demonstrates to the satisfaction of the department that:

- (1) Such water will not be available to children under 6 months of age; and
- (2) The system is meeting the public notification requirements of rule 567—42.1(455B), including continuous posting of the fact that nitrate levels exceed 10 mg/L and the potential health effects of exposure; and
- (3) The following public health authorities will be notified annually of nitrate levels that exceed 10 mg/L, in addition to the reporting requirements of 567—Chapters 41 and 42: county board of health, county health department, county sanitarian, county public health administrator, and Iowa department of public health; and
- (4) No adverse health effects shall result.

The requirements also contain monitoring requirements, best available technology (BAT) identification, and analytical method requirements pursuant to 41.3(1)“c,” and 567—paragraphs 41.3(1)“e” and 43.3(10)“b,” respectively.

b. *Maximum contaminant levels for inorganic chemicals (IOCs).*

- (1) IOC MCLs. The following table specifies the MCLs for IOCs:

| Contaminant | EPA Contaminant Code | Maximum Contaminant Level (mg/L) |
|---------------------------|----------------------|--|
| Antimony | 1074 | 0.006 |
| Arsenic* | 1005 | 0.010 |
| Asbestos | 1094 | 7 million fibers/liter (longer than 10 micrometers in length) |
| Barium | 1010 | 2 |
| Beryllium | 1075 | 0.004 |
| Cadmium | 1015 | 0.005 |
| Chromium | 1020 | 0.1 |
| Cyanide (as free Cyanide) | 1024 | 0.2 |
| Fluoride** | 1025 | 4.0 |
| Mercury | 1035 | 0.002 |
| Nitrate | 1040 | 10 (as nitrogen) |
| Nitrite | 1041 | 1.0 (as nitrogen) |
| Total Nitrate and Nitrite | 1038 | 10 (as nitrogen) |
| Selenium | 1045 | 0.05 |
| Thallium | 1085 | 0.002 |

*The arsenic MCL changed from 0.05 mg/L to 0.010 mg/L on January 23, 2006.

**The recommended fluoride level is 0.7 milligrams per liter as published by the U.S. Department of Health and Human Services, Public Health Service (July-August 2015). At this optimum level in drinking water, fluoride has been shown to have beneficial effects in reducing the occurrence of tooth decay.

(2) Compliance calculations. Compliance with 41.3(1) "b"(1) shall be determined based on the analytical result(s) obtained at each source/entry point. When the department requires a system to collect nitrate or nitrite samples in its distribution system, compliance with 41.3(1) "b"(1) shall also be determined based on the analytical result(s) obtained at each discrete sampling point in the distribution system. Arsenic sampling results must be reported to the nearest 0.001 mg/L.

1. Sampling frequencies greater than annual (e.g., monthly or quarterly). For public water supply systems which are conducting monitoring at a frequency greater than annual, compliance with the maximum contaminant levels for antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, selenium, and thallium is determined by a running annual average at any sampling point. If the average at any sampling point is greater than the MCL, then the system is out of compliance. If any one sample would cause the annual average to be exceeded, then the system is out of compliance immediately. Any sample below the method detection limit shall be calculated at zero for the purpose of determining the annual average. If a system fails to collect the required number of samples, compliance (average concentration) will be based on the total number of samples collected.

2. Sampling frequencies of annual or less. For public water supply systems which are monitoring annually, or less frequently, the system is out of compliance with the maximum contaminant levels for antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, selenium, and thallium if the level of a contaminant at any sampling point is greater than the MCL. If a confirmation sample is required by the department, it must be collected as soon as possible from the same sampling location, but not to exceed two weeks, and the determination of compliance will be based on the average of the two samples. If a system fails to collect the required number of samples, compliance (average concentration) will be based on the total number of samples collected.

3. Compliance calculations for nitrate and nitrite. Compliance with the maximum contaminant levels for nitrate and nitrite is determined based on one sample if the level of these contaminants is below the MCLs. If the level of nitrate or nitrite exceeds the MCLs in the initial sample, a confirmation sample may be required in accordance with 41.3(1) "c"(7)"2," and compliance shall be determined based on the average of the initial and confirmation samples.

(3) Additional requirements. The department may assign additional requirements as deemed necessary to protect the public health, including public notification requirements and earlier compliance dates than indicated in rule. When a system is not in compliance with an MCL as determined in subparagraph 41.3(1)“b”(2), the supplier of the water shall notify the department according to 567—subrule 42.4(1) and give notice to the public according to 567—42.1(455B).

c. Inorganic chemicals—monitoring requirements.

(1) Routine IOC monitoring (excluding asbestos, nitrate, and nitrite). Community public water supply systems and nontransient noncommunity water systems shall conduct monitoring to determine compliance with the MCLs specified in 41.3(1)“b” in accordance with this subrule. Transient noncommunity water systems shall conduct monitoring to determine compliance with the nitrate and nitrite maximum contaminant levels in 41.3(1)“b” as required by 41.3(1)“c”(5) and (6). All new systems or systems that use a new source of water must demonstrate compliance with the MCLs specified in 41.3(1)“b” within a period of time specified by the department. The system must also comply with the initial sampling frequencies specified by the department to ensure the system can demonstrate compliance with the MCLs. Routine and increased monitoring frequencies shall be conducted in accordance with the requirements in paragraph 41.3(1)“c.” A source of water that is determined by the department to be a new source/entry point is considered to be a new source for the purposes of this rule.

(2) Department designated sampling schedules: Each public water system shall monitor at the time designated by the department during each compliance period. The monitoring protocol is as follows:

1. Groundwater sampling points. Groundwater systems shall take a minimum of one sample at every entry point to the distribution system which is representative of each well after treatment (hereafter called a source/entry point) beginning in the compliance period starting January 1, 1993. The system shall take each sample at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant.

2. Surface water sampling points. Surface water systems shall take a minimum of one sample at every entry point to the distribution system after any application of treatment or in the distribution system at a point which is representative of each source after treatment (hereafter called a source/entry point) beginning in the compliance period starting January 1, 1993. (For purposes of this paragraph, surface water systems include systems with a combination of surface and ground sources.) The system shall take each sample at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant.

3. Multiple sources. If a public water supply system draws water from more than one source and the sources are combined before distribution, the system must sample at an entry point to the distribution system during periods of normal operating conditions (i.e., when water is representative of all sources being used).

4. Composite sampling. The department may reduce the total number of samples which must be analyzed by the use of compositing. In systems serving less than or equal to 3,300 persons, composite samples from a maximum of five samples are allowed, provided that the detection limit of the method used for analysis is less than one-fifth of the MCL. Compositing of samples must be done in the laboratory. If the concentration in the composite sample is greater than or equal to one-fifth of the MCL of any inorganic chemical, then a follow-up sample must be taken within 14 days at each sampling point included in the composite. These samples must be analyzed for the contaminants which exceeded one-fifth of the MCL in the composite sample. If duplicates of the original sample taken from each sampling point used in the composite are available, the system may use these duplicates instead of resampling, provided the holding time of the duplicate samples is not exceeded. The duplicate must be analyzed and the results reported to the department within 14 days after completing analysis of the composite sample. If the population served by the system is greater than 3,300 persons, then compositing may only be permitted by the department as sampling points within a single system. In systems serving less than or equal to 3,300 persons, the department may permit compositing among different systems provided the five-sample limit is maintained. Detection limits for each inorganic contaminant analytical method are contained in 41.3(1)“e”(1).

(3) Asbestos routine and repeat monitoring frequency. The frequency of monitoring conducted to determine compliance with the maximum contaminant level for asbestos specified in 41.3(1)“b” shall be conducted as follows:

1. Initial sampling frequency. Each community and nontransient noncommunity water system is required to monitor for asbestos during the first three-year compliance period of each nine-year compliance cycle beginning in the compliance period starting January 1, 1993.

2. Sampling during waiver. If the public water supply system believes it is not vulnerable to either asbestos contamination in its source water or due to corrosion of asbestos-cement pipe, or both, it may apply for a waiver of the monitoring requirement in 41.3(1)“c”(3)“1.” If the department grants the waiver, the system is not required to monitor.

3. Bases of an asbestos waiver. The department may grant a waiver based on a consideration of potential asbestos contamination of the water source, the use of asbestos-cement pipe for finished water distribution, and the corrosive nature of the water.

4. Effect of an asbestos waiver. A waiver remains in effect until the completion of the three-year compliance period. Systems not receiving a waiver must monitor in accordance with 41.3(1)“c”(3)“1.”

5. Distribution system vulnerability for asbestos. A public water supply system vulnerable to asbestos contamination due solely to corrosion of asbestos-cement pipe shall take one sample at a tap served by asbestos-cement pipe and under conditions where asbestos contamination is most likely to occur.

6. Source water vulnerability for asbestos. A public water supply system vulnerable to asbestos contamination due solely to source water shall monitor in accordance with the provision of 41.3(1)“c”(2).

7. Combined asbestos vulnerability. A public water supply system vulnerable to asbestos contamination due both to its source water supply and corrosion of asbestos-cement pipe shall take one sample at a tap served by asbestos-cement pipe and under conditions where asbestos contamination is most likely to occur.

8. Exceedance of the asbestos MCL. A public water supply system which exceeds the maximum contaminant levels as determined in 41.3(1)“b” shall monitor quarterly beginning in the next quarter after the violation occurred.

9. Asbestos reliably and consistently below the MCL. The department may decrease the quarterly monitoring requirement to the frequency specified in 41.3(1)“c”(3)“1” provided the system is reliably and consistently below the maximum contaminant level. In no case can the department make this determination unless a groundwater system takes a minimum of two quarterly samples and a surface (or combined surface/ground) water system takes a minimum of four quarterly samples.

10. Grandfathered asbestos data. If monitoring data collected after January 1, 1990, are generally consistent with the requirements of 41.3(1)“c”(3), then the department may allow public water supply systems to use that data to satisfy the monitoring requirement for the initial compliance period beginning January 1, 1993.

(4) Monitoring frequency for other IOCs. The frequency of monitoring conducted to determine compliance with the maximum contaminant levels in 41.3(1)“b” for antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, selenium, and thallium shall be as follows:

1. IOCs sampling frequency. Groundwater systems shall take one sample at each sampling point once every three years. Surface water systems (or combined surface/groundwater systems) shall take one sample annually at each sampling point.

2. IOC sampling waiver. The public water supply system may apply for a waiver from the monitoring frequencies specified in 41.3(1)“c”(4)“1.”

3. IOC sampling during a waiver. A condition of the waiver shall require that a public water supply system shall take a minimum of one sample while the waiver is effective. The term during which the waiver is effective shall not exceed one compliance cycle (i.e., nine years).

4. Bases of an IOC waiver and grandfathered data. The department may grant a waiver provided surface water systems have monitored annually for at least three years and groundwater systems have conducted a minimum of three rounds of monitoring. (At least one sample shall have been taken since

January 1, 1990.) Both surface and groundwater systems shall demonstrate that all previous analytical results were less than the maximum contaminant level. Systems that use a new water source are not eligible for a waiver until three rounds of monitoring from the new source have been completed. Systems may be granted a waiver for monitoring of cyanide, provided that the department determines that the system is not vulnerable due to lack of any industrial source of cyanide.

5. Bases of the IOC sampling frequency during a waiver. In determining the appropriate reduced monitoring frequency, the department will consider: reported concentrations from all previous monitoring; the degree of variation in reported concentrations; and other factors which may affect contaminant concentrations such as changes in groundwater pumping rates, changes in the system's configuration, changes in the system's operating procedures, or changes in stream flows or characteristics.

6. Effect of an IOC waiver. A decision to grant a waiver shall be made in writing and shall include the basis for the determination. The determination may be initiated by the department or upon an application by the public water supply system. The public water supply system shall specify the basis for its request. The department may review and, where appropriate, revise its determination of the appropriate monitoring frequency when the system submits new monitoring data or when other data relevant to the system's appropriate monitoring frequency become available.

7. Exceedance of an IOC MCL. Public water supply systems which exceed the maximum contaminant levels as calculated in 41.3(1)"b" shall monitor quarterly beginning in the next quarter after the violation occurred.

8. IOCs reliably and consistently below the MCL. The department may decrease the quarterly monitoring requirement to the frequencies specified in 41.3(1)"c"(4)"1" and "3" provided it has determined that the public water supply system is reliably and consistently below the maximum contaminant level. In no case can the department make this determination unless a groundwater system takes a minimum of two quarterly samples and a surface water system takes a minimum of four quarterly samples.

(5) Routine and repeat monitoring frequency for nitrates. All public water supply systems (community; nontransient noncommunity; and transient noncommunity systems) shall monitor to determine compliance with the maximum contaminant level for nitrate in 41.3(1)"b."

1. Initial nitrate sampling. Community and nontransient noncommunity water systems served by groundwater systems shall monitor annually beginning January 1, 1993; systems served by surface water shall monitor quarterly beginning January 1, 1993. Transient noncommunity water systems shall monitor annually beginning January 1, 1993.

2. Groundwater repeat nitrate sampling frequency. For community and noncommunity water systems, the repeat monitoring frequency for groundwater systems shall be:

- Quarterly for at least one year following any one sample in which the concentration is greater than or equal to 5.0 mg/L as N. The department may allow a groundwater system to reduce the sampling frequency to annually after four consecutive quarterly samples are reliably and consistently less than 5.0 mg/L as N.

- Monthly for at least one year following any one sample in which the concentration is greater than or equal to 10.0 mg/L as N.

3. Surface water repeat nitrate sampling frequency. For community and noncommunity water systems, the department may allow a surface water system to reduce the sampling frequency to:

- Annually if all analytical results from four consecutive quarters are less than 5.0 mg/L as N.
- Quarterly for at least one year following any one sample in which the concentration is greater than or equal to 5.0 mg/L as N. The department may allow a surface water system to reduce the sampling frequency to annually after four consecutive quarterly samples are reliably and consistently less than 5.0 mg/L as N.

- Monthly for at least one year following any nitrate MCL exceedance.

4. Scheduling annual nitrate repeat samples. After the initial round of quarterly sampling is completed, each community and nontransient noncommunity system which is monitoring annually shall take subsequent samples during the quarter(s) which previously resulted in the highest analytical result.

(6) Routine and repeat monitoring frequency for nitrite. All public water supply systems (community; nontransient noncommunity; and transient noncommunity systems) shall monitor to determine compliance with the maximum contaminant level for nitrite in 41.3(1)“b.”

1. Initial nitrite sampling. All public water systems shall take one sample at each sampling point in the compliance period beginning January 1, 1993, and ending December 31, 1995.

2. Nitrite repeat monitoring. After the initial sample, systems where an analytical result for nitrite is less than 0.50 mg/L as N shall monitor at the frequency specified by the department.

3. Nitrite increased monitoring. For community, nontransient noncommunity, and transient noncommunity water systems, the repeat monitoring frequency for any water system shall be:

- Quarterly for at least one year following any one sample in which the concentration is greater than or equal to 0.50 mg/L as N. The department may allow a system to reduce the sampling frequency to annually after determining the system is reliably and consistently less than 0.50 mg/L.

- Monthly for at least one year following any nitrite MCL exceedance.

4. Scheduling of annual nitrite repeat samples. Systems which are monitoring annually shall take each subsequent sample during the quarter(s) which previously resulted in the highest analytical result.

(7) Confirmation sampling.

1. Deadline for IOCs confirmation samples. Where the results of an analysis for antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, nickel, selenium, or thallium indicate an exceedance of the maximum contaminant level, the department may require that one additional sample be collected as soon as possible after the initial sample was taken (but not to exceed two weeks) at the same sampling point.

2. Deadline for nitrate and nitrite confirmation samples. Where nitrate or nitrite sampling results indicate an exceedance of the maximum contaminant level and the sampling frequency is quarterly or annual, the system shall take a confirmation sample within 24 hours of the system’s receipt of notification of the analytical results of the first sample. Public water supply systems unable to comply with the 24-hour sampling requirement must immediately notify the consumers served by the area served by the public water system in accordance with 567—42.1(455B) Tier 1 public notice and complete an analysis of a confirmation sample within two weeks of notification of the analytical results of the first sample. Where the sampling frequency is monthly, a confirmation sample will not be used to determine compliance with the MCL.

3. Rescinded IAB 1/7/04, effective 2/11/04.

4. Compliance calculations and confirmation samples. If a required confirmation sample as collected within the time specified in 41.3(1)“c”(7)“1” is taken for any contaminant, then the results of the initial and confirmation sample shall be averaged. The resulting average shall be used to determine the system’s compliance in accordance with 41.3(1)“b.” The department has the discretion to invalidate results of obvious sampling errors.

(8) Designation of increased sampling frequency. The department may require more frequent monitoring than specified in 41.3(1)“c”(3) through (6) or may require confirmation samples for positive and negative results at its discretion. Public water supply systems may apply to conduct more frequent monitoring than the minimum monitoring frequencies specified in this subrule. Any increase or decrease in monitoring under this subparagraph will be designated in an operation permit or administrative order. To increase or decrease such frequency, the department shall consider the following factors:

1. Reported concentrations from previously required monitoring,

2. The degree of variation in reported concentrations,

3. Blending or treatment processes conducted for the purpose of complying with a maximum contaminant level, treatment technique, or action level, and

4. Other factors include changes in pumping rates in groundwater supplies or significant changes in the system’s configuration, operating procedures, source of water and changes in streamflows.

(9) Grandfathered data. For the initial analysis required by 41.3(1)“c,” data for surface waters acquired within one year prior to the effective date and data for groundwaters acquired within three years prior to the effective date of 41.3(1)“c” may be substituted at the discretion of the department.

d. *Best available treatment technologies (BATs) for IOCs.* Rescinded IAB 8/11/99, effective 9/15/99.

e. *Analytical methodology.*

(1) Analytical methods for IOCs. Analysis for the listed inorganic contaminants shall be conducted using the following methods, or their equivalent as determined by EPA. Criteria for analyzing arsenic, barium, beryllium, cadmium, chromium, copper, lead, nickel, selenium, sodium, and thallium with digestion or directly without digestion, and other analytical test procedures are contained in Technical Notes on Drinking Water Methods, EPA-600/R-94-173, October, 1994. This document is available from the National Technical Information Service, NTIS PB95-104766, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161. The toll-free number is (800)553-6847.

¹⁰Method 100.2, “Determination of Asbestos Structure Over 10 Microns in Length in Drinking Water,” EPA-600/R-94-134, June 1994. Available at NTIS, PB94-201902.

¹¹Industrial Method No. 129-71W, “Fluoride in Water and Wastewater,” December 1972, and Method No. 380-75WE, “Fluoride in Water and Wastewater,” February 1976, Technicon Industrial Systems. Copies may be obtained from Bran & Luebbe, 1025 Busch Parkway, Buffalo Grove, IL 60089.

¹²Lower MDLs are reported using stabilized temperature graphite furnace atomic absorption.

¹³Screening method for total cyanides.

¹⁴Measures “free” cyanides when distillation, digestion, or ligand exchange is omitted.

¹⁵Because MDLs reported in EPA Methods 200.7 and 200.9 were determined using a 2X preconcentration step during sample digestion, MDLs determined when samples are analyzed by direct analysis (i.e., no sample digestion) will be higher. For direct analysis of cadmium by Method 200.7, sample preconcentration using pneumatic nebulization may be required to achieve lower detection limits. Preconcentration may also be required for direct analysis of antimony and thallium by Method 200.9, and antimony by Method 3113B, unless multiple in-furnace depositions are made.

¹⁶If ultrasonic nebulization is used in the determination of arsenic by Method 200.8, the arsenic must be in the pentavalent state to provide uniform signal response. For direct analysis of arsenic with Method 200.8 using ultrasonic nebulization, samples and standards must contain 1 mg/L of sodium hypochlorite.

¹⁷Reserved.

¹⁸The 18th, 19th, and 20th editions of Standard Methods for the Examination of Water and Wastewater, 1992, 1995, and 1998, respectively, American Public Health Association; any edition may be used, except that the versions of 3111B, 3111D, 3113B, and 3114B in the 20th edition may not be used. Copies may be obtained from the American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710.

¹⁹The 20th edition of Standard Methods for the Examination of Water and Wastewater, 1998, American Public Health Association. Copies may be obtained from the American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710.

²⁰The description for the Kelada 01 Method, "Kelada Automated Test Methods for Total Cyanide, Acid Dissociable Cyanide, and Thiocyanate," Revision 1.2, August 2001, EPA #821-B-01-009 for cyanide is available from NTIS PB 2001-108275. NOTE: A 450W UV lamp may be used in this method instead of the 550W lamp specified if it provides performance within the quality control acceptance criteria of the method in a given instrument. Similarly, modified flow cell configurations and flow conditions may be used in the method, provided that the quality control acceptance criteria are met.

²¹The description for the QuikChem Method 10-204-00-1-X, "Digestion and distillation of total cyanide in drinking water and wastewaters using MICRO DIST and determination of cyanide by flow injection analysis," Revision 2.1, November 30, 2000, for cyanide is available from Lachat Instruments, 6645 W. Mill Road, Milwaukee, WI 53218, telephone (414)358-4200.

²²Measures total cyanides when UV-digestor is used, and "free" cyanides when UV-digestor is bypassed.

(2) Sampling methods for IOCs. Sample collection for antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, nickel, nitrate, nitrite, selenium, and thallium under this subparagraph shall be conducted using the sample preservation, container, and maximum holding time procedures specified in the table below:

SAMPLING METHODS FOR IOCs

| Contaminant | Preservative ¹ | Container ² | Time ³ |
|------------------------------|--------------------------------|------------------------|--------------------------------------|
| Antimony | HNO ₃ | P or G | 6 months |
| Arsenic | HNO ₃ | P or G | 6 months |
| Asbestos | 4 degrees C | P or G | 48 hours for filtration ⁵ |
| Barium | HNO ₃ | P or G | 6 months |
| Beryllium | HNO ₃ | P or G | 6 months |
| Cadmium | HNO ₃ | P or G | 6 months |
| Chromium | HNO ₃ | P or G | 6 months |
| Cyanide | 4 degrees C, NaOH | P or G | 14 days |
| Fluoride | None | P or G | 1 month |
| Mercury | HNO ₃ | P or G | 28 days |
| Nickel | HNO ₃ | P or G | 6 months |
| Nitrate ⁴ | 4 degrees C | P or G | 48 hours |
| Nitrate-Nitrite ⁴ | H ₂ SO ₄ | P or G | 28 days |
| Nitrite ⁴ | 4 degrees C | P or G | 48 hours |
| Selenium | HNO ₃ | P or G | 6 months |
| Thallium | HNO ₃ | P or G | 6 months |

¹When indicated, samples must be acidified at the time of collection to pH < 2 with concentrated acid, or adjusted with sodium hydroxide to pH > 12. Samples collected for metals analysis may be preserved by acidification at the laboratory, using a 1:1 nitric acid solution (50 percent by volume), provided the shipping time and other instructions in Section 8.3 of EPA Methods 200.7, 200.8, and 200.9 are followed. When chilling is indicated, the sample must be shipped and stored at 4 degrees C or less.

²P: plastic, hard or soft; G: glass, hard or soft.

³In all cases, samples should be analyzed as soon after collection as possible. Follow additional (if any) information on preservation, containers, or holding times that is specified in the method.

⁴Nitrate may only be measured separate from nitrite in samples that have not been acidified. Measurement of acidified samples provides a total nitrate (sum of nitrate plus nitrite) concentration. Acidification of total nitrate (nitrate plus nitrite) samples must be done in the field at the time of sample collection.

⁵Instructions for containers, preservation procedures, and holding times as specified in Method 100.2 must be adhered to for all compliance analyses, including those conducted with Method 100.1.

f. Unregulated inorganic chemicals. Rescinded IAB 1/7/04, effective 2/11/04.

41.3(2) Other inorganic chemical contaminants. Reserved.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.4(455B) Lead, copper, and corrosivity.

41.4(1) Lead, copper, and corrosivity regulation by the setting of a treatment technique requirement. The lead and copper rules establish a treatment technique that includes requirements for corrosion control treatment, source water treatment, lead service line replacement, and public education. These requirements are triggered, in some cases, by lead and copper action levels measured in samples collected at consumers' taps.

a. Applicability. Unless otherwise indicated, each of the provisions of this subrule applies to community water systems and nontransient noncommunity water systems (hereinafter referred to as "water systems" or "systems").

b. Action levels.

(1) Lead action level. The lead action level is exceeded if the concentration of lead in more than 10 percent of tap water samples collected during any monitoring period conducted in accordance with 41.4(1) "c" is greater than 0.015 mg/L (i.e., if the "90th percentile" lead level is greater than 0.015 mg/L).

(2) Copper action level. The copper action level is exceeded if the concentration of copper in more than 10 percent of tap water samples collected during any monitoring period conducted in accordance with 41.4(1)“c” is greater than 1.3 mg/L (i.e., if the “90th percentile” copper level is greater than 1.3 mg/L).

(3) Calculation of 90th percentile. The 90th percentile lead and copper levels shall be computed as follows:

1. The results of all lead or copper samples taken during a monitoring period shall be placed in ascending order from the sample with the lowest concentration to the sample with the highest concentration. Each sampling result shall be assigned a number, ascending by single integers beginning with the number 1 for the sample with the lowest contaminant level. The number assigned to the sample with the highest contaminant level shall be equal to the total number of samples taken.

2. The number of samples taken during the monitoring period shall be multiplied by 0.9.

3. The contaminant concentration in the numbered sample yielded by this calculation is the 90th percentile contaminant level.

4. For water systems serving fewer than 100 people that collect five samples per monitoring period, the 90th percentile is computed by taking the average of the highest and second highest concentrations.

5. For a public water system that has been allowed by the department to collect fewer than five samples in accordance with 41.4(1)“c”(3), the sample result with the highest concentration is considered the 90th percentile value.

c. Lead and copper tap water monitoring requirements.

(1) Sample site selection.

1. General. Public water supply systems shall complete a materials evaluation of their distribution systems by the date indicated in 41.4(1)“c”(4) in order to identify a pool of sampling sites that meets the requirements of this subrule, and which is sufficiently large to ensure that the water system can collect the number of lead and copper tap samples required in 41.4(1)“c”(3). All sites from which first-draw samples are collected shall be selected from this pool of targeted sampling sites. Sampling sites may not include faucets that have point-of-use or point-of-entry treatment devices designed to remove inorganic contaminants.

2. Information sources. A public water supply system shall use the information on lead, copper and galvanized steel that it is required to collect under 41.4(1)“f” as part of its responsibility for the special monitoring for corrosivity characteristics when conducting a materials evaluation. When an evaluation of the information collected is insufficient to locate the requisite number of lead and copper sampling sites that meet the targeting criteria in 41.4(1)“c”(1), the water system shall review all plumbing codes, permits, and records in the files of the building department(s) which indicate the plumbing materials that are installed within publicly and privately owned structures connected to the distribution system; all inspections and records of the distribution system that indicate the material composition of the service connections that connect a structure to the distribution system; and all existing water quality information, which includes the results of all prior analyses of the system or individual structures connected to the system, indicating locations that may be particularly susceptible to high lead or copper concentrations. In addition, the system shall seek to collect such information where possible in the course of its normal operations (e.g., checking service line materials when reading water meters or performing maintenance activities).

3. Tier 1 community sampling sites. The sampling sites selected for a community water system’s sampling pool (“tier 1 sampling sites”) shall consist of single-family structures that contain copper pipes with lead solder installed after 1982 or contain lead pipes; or are served by a lead service line. When multiple-family residences comprise at least 20 percent of the structures served by a water system, the system may include these types of structures in its sampling pool.

4. Tier 2 community sampling sites. Any community water system with insufficient tier 1 sampling sites shall complete its sampling pool with “tier 2 sampling sites,” consisting of buildings, including multiple-family residences that contain copper pipes with lead solder installed after 1982 or contain lead pipes; or are served by a lead service line.

5. Tier 3 community sampling sites. Any community water system with insufficient Tier 1 and Tier 2 sampling sites shall complete its sampling pool with “Tier 3 sampling sites,” consisting of single-family structures that contain copper pipes with lead solder installed before 1983. A community water system with insufficient Tier 1, Tier 2, and Tier 3 sampling sites shall complete its sampling pool with representative sites throughout the distribution system. A representative site is defined as a site in which the plumbing materials used at that site would be commonly found at other sites served by the water system.

6. Tier 1 NTNC sampling sites. The sampling sites selected for a nontransient noncommunity water system (“tier 1 sampling sites”) shall consist of buildings that: contain copper pipes with lead solder installed after 1982 or contain lead pipes; or are served by a lead service line.

7. Other NTNC sampling sites. A nontransient noncommunity water system with insufficient Tier 1 sites that meet the targeting criteria in 41.4(1) “c”(1)“6” shall complete its sampling pool with sampling sites that contain copper pipes with lead solder installed before 1983. If additional sites are needed to complete the sampling pool, the NTNC system shall use representative sites throughout the distribution system. A representative site is defined as a site in which the plumbing materials used at that site would be commonly found at other sites served by the water system.

8. LSL sampling sites. Any public water supply system whose distribution system contains lead service lines shall draw 50 percent of the samples it collects during each monitoring period from sites that contain lead pipes, or copper pipes with lead solder, and 50 percent of those samples from sites served by a lead service line. A water system that cannot identify a sufficient number of sampling sites served by a lead service line shall collect first-draw samples from all of the sites identified as being served by such lines.

(2) Sample collection methods.

1. Tap samples for lead and copper collected in accordance with this subparagraph, with the exception of lead service line samples collected under 567—subrule 43.7(4) and 41.4(1) “c”(2)“5,” shall be first-draw samples.

2. First-draw tap samples for lead and copper shall be one liter in volume and have stood motionless in the plumbing system of each sampling site for at least six hours. First-draw samples from residential housing shall be collected from the cold-water kitchen tap or bathroom sink tap. First-draw samples from a nonresidential building shall be collected at an interior tap from which water is typically drawn for consumption. Non-first-draw samples collected in lieu of first-draw samples pursuant to 41.4(1) “c”(2)“5” shall be one liter in volume and shall be collected at an interior tap from which water is typically drawn for consumption. First-draw samples may be collected by the system or the system may allow residents to collect first-draw samples after instructing the residents of the sampling procedures specified in this paragraph. To avoid problems of residents handling nitric acid, acidification of first-draw samples may be done up to 14 days after the sample is collected. After acidification to resolubilize the metals, the sample must stand in the original container for the time specified in the approved EPA method before the sample can be analyzed. If a system allows residents to perform sampling, the system may not challenge, based on alleged errors in sample collection, the accuracy of sampling results.

3. Service line samples collected to determine if the service line is directly contributing lead (as described in 567—subrule 43.7(4)) shall be one liter in volume and have stood motionless in the lead service line for at least six hours and be collected at the tap after flushing the volume of water between the tap and the lead service line. The volume of water shall be calculated based on the interior diameter and length of the pipe between the tap and the lead service line; tapping directly into the lead service line; or if the sampling site is a building constructed as a single-family residence, allowing the water to run until there is a significant change in temperature which would be indicative of water that has been standing in the lead service line.

4. A public water supply system shall collect each first-draw tap sample from the same sampling site from which it collected a previous sample. If, for any reason, the water system cannot gain entry to a sampling site in order to collect a follow-up tap sample, the system may collect the follow-up tap

sample from another sampling site in its sampling pool as long as the new site meets the same targeting criteria, and is within reasonable proximity of the original site.

5. An NTNC system, or a CWS system that meets the criteria of 567—subparagraph 42.2(2)“b”(7) that does not have enough taps that can supply first-draw samples, as defined in 567—40.2(455B), may apply to the department in writing to substitute non-first-draw samples. Such systems must collect as many first-draw samples from appropriate taps as possible and identify sampling times and locations that would likely result in the longest standing time for the remaining sites. The department may waive the requirement for prior department approval of non-first-draw sample sites selected by the system, through written notification to the system.

(3) Number of samples. Water systems shall collect at least one sample during each monitoring period specified in 41.4(1)“c”(4) from the number of sites as listed in the column below titled “standard monitoring.” A system conducting reduced monitoring under 41.4(1)“c”(4) shall collect at least one sample from the number of sites specified in the column titled “reduced monitoring” during each monitoring period specified in 41.4(1)“c”(4). Such reduced monitoring sites shall be representative of the sites required for standard monitoring. A public water system that has fewer than five drinking water taps that can be used for human consumption meeting the sample site criteria of 41.4(1)“c”(1) to reach the required number of sample sites listed in 41.4(1)“c”(3) must collect at least one sample from each tap and then must collect additional samples from those taps on different days during the monitoring period to meet the required number of sites. Alternatively, the department may allow these systems to collect a number of samples less than the number of sites specified in 41.4(1)“c”(1), provided that 100 percent of all taps that can be used for human consumption are sampled. The department must approve this reduction of the minimum number of samples in writing based upon a request from the system or on-site verification by the department. The department may specify sampling locations when a system is conducting reduced monitoring.

REQUIRED NUMBER OF LEAD/COPPER SAMPLES

| System Size (Number of People Served) | Standard Monitoring (Number of Sites) | Reduced Monitoring (Number of Sites) |
|--|--|---|
| greater than 100,000 | 100 | 50 |
| 10,001 to 100,000 | 60 | 30 |
| 3,301 to 10,000 | 40 | 20 |
| 501 to 3,300 | 20 | 10 |
| 101 to 500 | 10 | 5 |
| less than or equal to 100 | 5 | 5 |

(4) Timing of monitoring.

1. Initial tap sampling. The first six-month monitoring period for small, medium-size and large systems shall begin on the following dates:

| System Size (Number of People Served) | First Six-month Monitoring Period Begins on: |
|--|--|
| greater than 50,000 (large system) | January 1, 1992 |
| 3,301 to 50,000 (medium system) | July 1, 1992 |
| less than or equal to 3,300 (small system) | July 1, 1993 |

All large systems shall monitor during two consecutive six-month periods. All small and medium-size systems shall monitor during each six-month monitoring period until the system exceeds the lead or copper action level and is, therefore, required to implement the corrosion control treatment requirements under 567—paragraph 43.7(1)“a,” in which case the system shall continue monitoring in accordance with 41.4(1)“c”(4), or the system meets the lead and copper action levels during two consecutive

six-month monitoring periods, in which case the system may reduce monitoring in accordance with 41.4(1)“c”(4).

2. Monitoring after installation of corrosion control and source water treatment. Large systems which install optimal corrosion control treatment pursuant to 567—subparagraph 43.7(1)“d”(4) shall monitor during two consecutive six-month monitoring periods by the date specified in 567—subparagraph 43.7(1)“d”(5). Small or medium-size systems which install optimal corrosion control treatment pursuant to 567—subparagraph 43.7(1)“e”(5) shall monitor during two consecutive six-month monitoring periods as specified in 567—subparagraph 43.7(1)“e”(6). Systems which install source water treatment shall monitor during two consecutive six-month monitoring periods by the date specified in 567—subparagraph 43.7(3)“a”(4).

3. Monitoring after the department specifies water quality parameter values for optimal corrosion control. After the department specifies the values for water quality control parameters under 567—paragraph 43.7(2)“f,” the system shall monitor during each subsequent six-month monitoring period, with the first monitoring period to begin on the date the department specifies the optimal values under 567—paragraph 43.7(2)“f.”

4. Reduced monitoring.

- A small or medium-size water system that meets the lead and copper action levels during each of two consecutive six-month monitoring periods may reduce the number of lead and copper samples according to 41.4(1)“c”(3) and reduce the frequency of sampling to once per year. A small or medium-size water system collecting fewer than five samples as specified in 41.4(1)“c”(3) that meets the lead and copper action levels during each of two consecutive six-month monitoring periods may reduce the frequency of sampling to once per year. The system may not ever reduce the number of samples required below the minimum of one sample per available tap. This sampling shall begin during the calendar year immediately following the end of the second consecutive six-month monitoring period.

- Any public water supply system that meets the lead action level and maintains the range of values for the water quality control parameters reflecting optimal corrosion control treatment specified by the department under 567—paragraph 43.7(2)“f” during each of two consecutive six-month monitoring periods may reduce the monitoring frequency to once per year and reduce the number of lead and copper samples according to 41.4(1)“c”(3), upon written approval by the department. This sampling shall begin during the calendar year immediately following the end of the second consecutive six-month monitoring period. The department shall review monitoring, treatment, and other relevant information submitted by the water system in accordance with 567—subrule 42.4(2), and shall notify the system in writing when it determines that the system is eligible to commence reduced monitoring. The department will review and, where appropriate, revise its determination when the system submits new monitoring or treatment data, or when other data relevant to the number and frequency of tap sampling becomes available.

- A small or medium-size water system that meets the lead and copper action levels during three consecutive years of monitoring may reduce the frequency of monitoring for lead and copper from annually to once every three years. Any water system that meets the lead action level and maintains the range of values for the water quality control parameters reflecting optimal corrosion control treatment specified by the department under 567—paragraph 43.7(2)“f” during three consecutive years of monitoring may reduce the frequency of monitoring from annually to once every three years if it receives written approval by the department. Samples collected once every three years shall be collected no later than every third calendar year. The department shall review monitoring, treatment, and other relevant information submitted by the water system in accordance with 567—subrule 42.4(2), and shall notify the system in writing when it determines that the system is eligible to reduce the monitoring frequency to once every three years. The department will review and, where appropriate, revise its determination when the system submits new monitoring or treatment data, or when other data relevant to the number and frequency of tap sampling becomes available.

- A water system that reduces the number and frequency of sampling shall collect these samples from sites included in the pool of targeted sampling sites identified in 41.4(1)“c”(1). Systems sampling annually or less frequently shall conduct the lead and copper tap sampling during the months of June

through September, unless the department, at its discretion, has approved a different sampling period. If approved by the department, the period shall be no longer than four consecutive months and must represent a time of normal operation where the highest levels of lead are most likely to occur. The department shall designate a period that represents a time of normal operation for an NTNC system that does not operate during the months of June through September, and for which the period of normal operation where the highest levels of lead are most likely to occur is not known. This sampling shall begin during the period approved or designated by the department in the calendar year immediately following the end of the second consecutive six-month monitoring period for systems initiating annual monitoring and during the three-year period following the end of the third consecutive calendar year of annual monitoring for systems initiating triennial monitoring.

Systems monitoring annually that have been collecting samples during the months of June through September and that receive department approval to alter their sample collection period must collect their next round of samples during a time period that ends no later than 21 months after the previous round of sampling.

Systems monitoring triennially that have been collecting samples during the months of June through September and that receive department approval to alter the sampling collection period must collect their next round of samples during a time period that ends no later than 45 months after the previous round of sampling.

Subsequent rounds of sampling must be collected annually or triennially, as required by 41.4(1)“c.”

Small systems that have been granted waivers pursuant to 41.4(1)“c”(7), that have been collecting samples during the months of June through September and that receive department approval to alter their sample collection period as previously stated must collect their next round of samples before the end of the nine-year period.

- Any water system that demonstrates for two consecutive six-month monitoring periods that the 90th percentile tap water level computed under 41.4(1)“b”(3) is less than or equal to 0.005 mg/L for lead and is less than or equal to 0.65 mg/L for copper may reduce the number of samples in accordance with 41.4(1)“c”(3) and reduce the frequency of sampling to once every three calendar years, if approved by the department.

- A small or medium-size water system subject to reduced monitoring that exceeds the lead or copper action level shall resume sampling according to 41.4(1)“c”(4)“3” and collect the number of samples specified for standard monitoring in 41.4(1)“c”(3). Any such system shall also conduct water quality parameter monitoring in accordance with 41.4(1)“d”(2), (3), or (4), as appropriate, during the monitoring period in which it exceeded the action level. Any such system may resume annual monitoring for lead and copper at the tap at the reduced number of sites specified in 41.4(1)“c”(3) after it has completed two subsequent consecutive six-month rounds of monitoring that meet the criteria of 41.4(1)“c”(4)“4,” first bulleted paragraph, and may resume triennial monitoring for lead and copper at the reduced number of sites after it demonstrates through subsequent rounds of monitoring that it meets the criteria of either 41.4(1)“c”(4)“4,” third bulleted paragraph or fifth bulleted paragraph, and has received department approval.

Any water system subject to reduced monitoring frequency that fails to meet the lead action level during any four-month monitoring period or that fails to operate at or above the minimum value or within the range of values for the water quality control parameters specified by the department under 567—paragraph 43.7(2)“f” for more than nine days in any six-month period specified in 41.4(1)“d”(4) shall resume tap water sampling according to 41.4(1)“c”(4)“3,” collect the number of samples specified for standard monitoring in 41.4(1)“c”(3), and resume monitoring for water quality parameters within the distribution system in accordance with 41.4(1)“d”(4). This standard tap water sampling shall begin no later than the six-month period beginning January 1 of the calendar year following the lead action level exceedance or water quality parameter excursion. The system may resume reduced monitoring for lead and copper at the tap and for water quality parameters within the distribution system under the following conditions:

The system may resume annual monitoring for lead and copper at the tap at the reduced number of sites specified in 41.4(1)“c”(3) after it has completed two subsequent six-month rounds of monitoring

that meet the criteria of 41.4(1) "c"(4)"4," second bulleted paragraph, and upon written approval from the department to resume reduced annual monitoring. This sampling shall begin during the calendar year immediately following the end of the second consecutive six-month monitoring period.

The system may resume triennial monitoring for lead and copper at the tap at the reduced number of sites after it demonstrates through subsequent rounds of monitoring that it meets the criteria of either 41.4(1) "c"(4)"4," third bulleted paragraph or fifth bulleted paragraph, and upon written approval from the department to resume triennial monitoring.

The system may reduce the number of water quality parameter tap water samples required in 41.4(1) "d"(5)"1" and the sampling frequency required in 41.4(1) "d"(5)"2." Such a system may not resume triennial monitoring for water quality parameters at the tap until it demonstrates that it has requalified for triennial monitoring, pursuant to 41.4(1) "d"(5)"2."

- Any water system subject to a reduced monitoring frequency under 41.4(1) "c"(4)"4" must notify the department in writing in accordance with 567—subparagraph 42.4(2) "a"(3) of any upcoming long-term change in treatment or addition of a new source as described in that subparagraph. The department must review and approve the addition of a new source or long-term change in water treatment before it is implemented by the system. The department may require the system to resume sampling pursuant to 41.4(1) "c"(4)"3" and collect the number of samples specified for standard monitoring under 41.4(1) "c"(3), or take other appropriate steps such as increased water quality parameter monitoring or reevaluation of its corrosion control treatment given the potentially different water quality considerations.

(5) Additional monitoring by systems. The results of any monitoring conducted in addition to the minimum requirements of 41.4(1) "c" shall be considered by the system and the department in making any determinations (i.e., calculating the 90th percentile lead or copper level) under this subrule.

(6) Invalidation of lead or copper tap water samples. A sample invalidated under this paragraph does not count toward determining the lead or copper 90th percentile levels under 41.4(1) "b"(3) or toward meeting the minimum monitoring requirements of 41.4(1) "c"(3).

1. The department may invalidate a lead or copper tap water sample if at least one of the following conditions is met:

- The laboratory establishes that improper sample analysis caused erroneous results.
- The department determines that the sample was taken from a site that did not meet the site selection criteria of 567—41.4(455B).
- The sample container was damaged in transit to the laboratory.
- There is a substantial reason to believe that the sample was subject to tampering.
- The sample is not representative of water that would be consumed from the tap.
- The department determined that a major disruption of the water flow occurred in the system or building plumbing prior to sample collection, which resulted in lead or copper levels that were not representative of the system.

2. The system must report the results of all samples to the department and all supporting documentation for samples the system believes should be invalidated.

3. To invalidate a sample under 41.4(1) "c"(6)"1," the decision and the rationale for the decision must be documented in writing. The department may not invalidate a sample solely on the grounds that a follow-up sample result is higher or lower than that of the original sample.

4. The system must collect replacement samples for any samples invalidated under subparagraph 41.4(1) "c"(6) if, after the invalidation of one or more samples, the system has too few samples to meet the minimum requirements of 41.4(1) "c"(3). Any such replacement samples must be taken as soon as possible, but no later than 20 days after the date the department invalidates the sample, or by the end of the applicable monitoring period, whichever occurs later. Replacement samples taken after the end of the applicable monitoring period shall not also be used to meet the monitoring requirements of a subsequent monitoring period. The replacement samples shall be taken at the same locations as the invalidated samples or, if that is not possible, at locations other than those already used for sampling during the monitoring period.

(7) Monitoring waivers for small systems. Any small system that meets the criteria of this subparagraph may apply to the department to reduce the frequency of monitoring for lead and copper

under subrule 41.4(1) to once every nine years if it meets all of the materials criteria specified in 41.4(1) “c”(7)“1” and the monitoring criteria specified in 41.4(1) “c”(7)“2.”

1. Materials criteria. The system must demonstrate that its distribution system and service lines and all drinking water supply plumbing, including plumbing conveying drinking water within all residences and buildings connected to the system, are free of lead-containing materials and copper-containing materials, as defined below:

- Lead. The water system must provide certification and supporting documentation to the department that the system is free of all lead-containing materials. The system does not contain any plastic pipes which contain lead plasticizers, or plastic service lines which contain lead plasticizers. The system must be free of lead service lines, lead pipes, lead soldered pipe joints, and leaded brass or bronze alloy fittings and fixtures, unless such fittings and fixtures meet the specifications of any standard established pursuant to 42 U.S.C. 300-g-6(e).

- Copper. The water system must provide certification and supporting documentation to the department that the system contains no copper pipes or copper service lines.

2. Monitoring criteria. The system must have completed at least one six-month round of standard tap water monitoring for lead and copper at sites approved by the department and from the number of sites required by 41.4(1) “c”(3), and demonstrate that the 90th percentile levels for any and all rounds of monitoring conducted since the system became free of all lead-containing and copper-containing materials meet the following criteria:

- Lead levels. The system must demonstrate that the 90th percentile lead level does not exceed 0.005 mg/L.

- Copper levels. The system must demonstrate that the 90th percentile copper level does not exceed 0.65 mg/L.

3. Department approval of waiver application. The department shall notify the system of its waiver determination in writing, including the basis of its decision and any condition of the waiver. The department may require as a waiver condition that the system conduct specific activities, such as limited monitoring and periodic outreach to customers to remind them to avoid installation of materials that would void the waiver. The system must continue monitoring for lead and copper at the tap as required by 41.4(1) “c”(4)“1” through “4,” as appropriate, until the system receives written approval for the waiver from the department.

4. Monitoring frequency of systems with waivers.

- A system must conduct tap water monitoring for lead and copper in accordance with 41.4(1) “c”(4)“4” at the reduced number of sampling sites identified in subparagraph 41.4(1) “c”(3) at least once every nine years and provide the materials certification specified in 41.4(1) “c”(7)“1” for both lead and copper to the department along with the monitoring results. Samples collected every nine years shall be collected no later than every ninth calendar year.

- A system with a waiver must notify the department in writing pursuant to 567—subparagraph 42.4(2) “a”(3) of any upcoming long-term change in treatment or addition of a new source, as described in that subparagraph. The department must review and approve the addition of a new source or long-term change in water treatment before it is implemented by the system. The department has the authority to require the system to add or modify waiver conditions, such as to require recertification that the system is free of lead-containing and copper-containing materials or to require additional monitoring, if the department deems such modifications are necessary to address treatment or source water changes at the system.

- If a system with a waiver becomes aware that it is no longer free of lead-containing or copper-containing materials, such as from new construction or repairs, the system shall notify the department in writing no later than 60 days after becoming aware of such a change.

5. Continued eligibility. If the system continues to satisfy the requirements of 41.4(1) “c”(7)“4,” the waiver will be renewed automatically, unless any of the conditions listed below occur. A system whose waiver has been revoked may reapply for a waiver at such time as it again meets the appropriate materials and monitoring criteria of 41.4(1) “c”(7)“1” and 41.4(1) “c”(7)“2.”

- A system no longer satisfies the materials criteria of 41.4(1)“c”(7)“1,” or has a 90th percentile lead level greater than 0.005 mg/L or a 90th percentile copper level greater than 0.65 mg/L.
- The department notifies the system in writing that the waiver has been revoked, including the basis of its decision.

6. Requirements following waiver revocation. A system whose waiver has been revoked by the department is subject to the corrosion control treatment and lead and copper tap water monitoring requirements as follows:

- If the system exceeds the lead or copper action level, the system must implement corrosion control treatment in accordance with the deadlines specified in 567—paragraph 43.7(1)“e,” and any other applicable parts of 567—41.4(455B).
- If the system meets both the lead and copper action levels, the system must monitor for lead and copper at the tap no less frequently than once every three years using the reduced number of sample sites specified in subparagraph 41.4(1)“c”(3).

d. Water quality parameter monitoring requirements. All large public water supply systems (and all small and medium-size public water supply systems that exceed the lead or copper action level) shall monitor water quality parameters in addition to lead and copper in accordance with this subrule. The requirements of this subrule are summarized in the table at the end of 41.4(1)“d”(6). The water quality parameters must be reported in accordance with the monthly operation report requirements listed in 567—subrule 42.4(3).

(1) General requirements.

1. Sample collection methods. Tap samples shall be representative of water quality throughout the distribution system taking into account the number of persons served, the different sources of water, the different treatment methods employed by the system, and seasonal variability. Tap sampling under this subrule is not required to be conducted at taps targeted for lead and copper sampling under 41.4(1)“c”(1)“1.” Systems may conduct tap sampling for water quality parameters at sites used for coliform sampling. Samples collected at the entry point(s) to the distribution system shall be from locations representative of each source after treatment. If a system draws water from more than one source and the sources are combined before distribution, the system must sample at an entry point to the distribution system during periods of normal operating conditions (i.e., when water is representative of all sources being used).

2. Number of samples.

- Systems shall collect two tap samples for applicable water quality parameters during each monitoring period specified in 41.4(1)“d”(2) through (5) from the following number of sites.

REQUIRED NUMBER OF SAMPLES: WATER QUALITY PARAMETERS

| System Size (Number of People Served) | Number of Sites for Water Quality Parameters |
|---------------------------------------|--|
| greater than 100,000 | 25 |
| 10,001 to 100,000 | 10 |
| 3,301 to 10,000 | 3 |
| 501 to 3,300 | 2 |
| 101 to 500 | 1 |
| less than or equal to 100 | 1 |

- Except as provided in 41.4(1)“d”(3)“3,” systems shall collect two samples for each applicable water quality parameter at each entry point to the distribution system during each six-month monitoring period specified in 41.4(1)“d”(2). During each monitoring period specified in 41.4(1)“d”(2). During each monitoring period specified in 41.4(1)“d”(3) through (5), systems shall collect one sample for each applicable water quality parameter at each entry point to the distribution system.

(2) Initial sampling. Large water systems shall measure the applicable water quality parameters as specified below at taps and at each entry point to the distribution system during each six-month monitoring period specified in 41.4(1)“c”(4)“1.” Small and medium-size systems shall measure the

applicable water quality parameters at taps and at each entry point to the distribution system during each six-month monitoring period specified in 41.4(1) "c"(4)"1" during which the system exceeds the lead or copper action level. Tap water and entry point monitoring shall include: pH; alkalinity; orthophosphate, when an inhibitor containing a phosphate compound is used; silica, when an inhibitor containing a silicate compound is used; calcium; conductivity; and water temperature.

(3) Monitoring after installation of corrosion control. Large systems which install optimal corrosion control treatment pursuant to 567—subparagraph 43.7(1) "d"(4) shall measure the water quality parameters at the locations and frequencies specified below during each six-month monitoring period specified in 41.4(1) "c"(4)"2." Small or medium-size systems which install optimal corrosion control treatment shall conduct such monitoring during each six-month monitoring period specified in 41.4(1) "c"(4)"2" in which the system exceeds the lead or copper action level.

1. Tap water monitoring shall include two samples for: pH; alkalinity; orthophosphate, when an inhibitor containing a phosphate compound is used; silica, when an inhibitor containing a silicate compound is used; calcium, when calcium carbonate stabilization is used as part of corrosion control.

2. Except as provided for in 41.4(1) "d"(3)"3," monitoring at each entry point to the distribution system shall include one sample every two weeks (biweekly) for: pH; a reading of the dosage rate of the chemical used to adjust alkalinity, and the alkalinity concentration when alkalinity is adjusted as part of optimal corrosion control; and a reading of the dosage rate of the inhibitor used, and the concentration of orthophosphate or silica (whichever is applicable) when a corrosion inhibitor is used as part of optimal corrosion control.

3. Any groundwater system can limit entry point sampling described in 41.4(1) "d"(3)"3" to those entry points that are representative of water quality and treatment conditions throughout the system. If water from untreated groundwater sources mixes with water from treated groundwater sources, the system must monitor for water quality parameters both at representative entry points receiving treatment and representative entry points receiving no treatment. Prior to the start of any monitoring under this paragraph, the system shall provide to the department written information identifying the selected entry points and documentation sufficient to demonstrate that the sites are representative of water quality and treatment conditions throughout the system, including information on seasonal variability.

(4) Monitoring after the department specifies water quality parameter values for optimal corrosion control. After the department specifies the values for applicable water quality control parameters reflecting optimal corrosion control treatment, all large systems shall measure the applicable water quality parameters according to 41.4(1) "d"(3) and determine compliance with the requirements of 567—paragraph 43.7(2) "g" every six months, with the first six-month period to begin on either January 1 or July 1, whichever comes first, after the department specifies the optimal values under 567—paragraph 43.7(2) "f." Any small or medium-size system shall conduct such monitoring during each monitoring period specified in 41.4(1) "c"(4)"3" in which the system exceeds the lead or copper action level. For any such small and medium-size system that is subject to a reduced monitoring frequency pursuant to 41.4(1) "c"(4)"4" at the time of the action level exceedance, the start of the applicable six-month monitoring period under this paragraph shall coincide with the end of the applicable monitoring period under 41.4(1) "c"(4)"4." Compliance with department-designated optimal water quality parameter values shall be determined as specified in 567—paragraph 43.7(2) "g."

(5) Reduced monitoring.

1. Public water supply systems that maintain the range of values for the water quality parameters reflecting optimal corrosion control treatment during each of two consecutive six-month monitoring periods under 41.4(1) "c"(4) shall continue monitoring at the entry point(s) to the distribution system as specified in 567—paragraph 43.7(2) "f." Such system may collect two tap samples for applicable water quality parameters from the following reduced number of sites during each six-month monitoring period.

REDUCED WATER QUALITY PARAMETER MONITORING

| System Size (Number of People Served) | Reduced Number of Sites for Water Quality Parameters |
|--|---|
| greater than 100,000 | 10 |
| 10,001 to 100,000 | 7 |
| 3,301 to 10,000 | 3 |
| 501 to 3,300 | 2 |
| 101 to 500 | 1 |
| less than or equal to 100 | 1 |

2. A public water system that maintains the range of values for the water quality parameters reflecting optimal corrosion control treatment specified by the department under 567—paragraph 43.7(2)“f” during three consecutive years of monitoring may reduce the frequency with which the system collects the number of tap samples for applicable water quality parameters specified in 41.4(1)“d”(5) from every six months to annually. This sampling shall begin during the calendar year immediately following the end of the monitoring period in which the third consecutive year of six-month monitoring occurs. Any system that maintains the range of values for the water quality parameters reflecting optimal corrosion control treatment specified by the department under 567—paragraph 43.7(2)“f” during three consecutive years of annual monitoring may reduce the frequency with which it collects the number of tap samples for applicable water quality parameters specified in 41.4(1)“d”(5) from annually to every three years. This sampling shall begin no later than the third calendar year following the end of the monitoring period in which the third consecutive year of monitoring occurs.

A water system may reduce the frequency with which it collects tap samples for applicable water quality parameters specified in 41.4(1)“d”(5)“1” to every three years if it demonstrates during two consecutive monitoring periods that its tap water lead level at the 90th percentile is less than or equal to 0.005 mg/L, that its tap water copper level at the 90th percentile is less than or equal to 0.65 mg/L, and that it also has maintained the range of values for the water quality parameters reflecting optimal corrosion control treatment specified by the department under 567—paragraph 43.7(2)“f.” Monitoring conducted every three years shall be done no later than every third calendar year.

3. A public water system that conducts sampling annually shall collect these samples evenly throughout the year so as to reflect seasonal variability.

4. Any water system subject to the reduced monitoring frequency that fails to operate at or above the minimum value or within the range of values for the water quality parameters specified by the department under 567—paragraph 43.7(2)“f” for more than nine days in any six-month period specified in 567—paragraph 43.7(2)“g” shall resume distribution system tap water sampling in accordance with the number and frequency requirements in 41.4(1)“d”(3). Such a system may resume annual monitoring for water quality parameters at the tap at the reduced number of sites specified in 41.4(1)“d”(5)“1” after it has completed two subsequent consecutive six-month rounds of monitoring that meet the criteria of that paragraph or may resume triennial monitoring for water quality parameters at the tap at the reduced number of sites after it demonstrates through subsequent rounds of monitoring that it meets the criteria in 41.4(1)“d”(5)“2.”

(6) Additional monitoring by systems. The results of any monitoring conducted in addition to the minimum requirements of this subrule shall be considered in making any determinations (i.e., determining concentrations of water quality parameters) under this subrule or 567—subrule 43.7(2).

SUMMARY OF MONITORING REQUIREMENTS FOR WATER QUALITY PARAMETERS¹

| Monitoring Period | Location | Parameters ² | Frequency |
|---|--|--|--|
| Initial Monitoring | Taps and at entry point(s) to distribution systems | pH, alkalinity, orthophosphate or silica ³ , calcium, conductivity, temperature | Every 6 months |
| After Installation of Corrosion Control | Taps | pH, alkalinity, orthophosphate or silica ³ , calcium ⁴ | Every 6 months |
| | Entry point(s) to distribution system ⁶ | pH, alkalinity, if alkalinity is adjusted as part of corrosion control then include the chemical additive dosage rate and concentration, inhibitor dosage rate and inhibitor residual ⁵ | At least every two weeks |
| After Department Specifies Parameter Values for Optimal Corrosion Control | Taps | pH, alkalinity, orthophosphate or silica ³ , calcium ⁴ | Every 6 months |
| | Entry point(s) to distribution system ⁶ | pH, alkalinity, if alkalinity is adjusted as part of corrosion control then include the chemical additive dosage rate and concentration, inhibitor dosage rate and inhibitor residual ⁵ | At least every two weeks |
| Reduced Monitoring | Taps | pH, alkalinity, orthophosphate or silica ³ , calcium ⁴ | Every 6 months, annually ⁷ , or every 3 years ⁸ , at a reduced number of sites |
| | Entry point(s) to distribution system ⁶ | pH, alkalinity, if alkalinity is adjusted as part of corrosion control then include the chemical additive dosage rate and concentration, inhibitor dosage rate and inhibitor residual ⁵ | At least every two weeks |

¹Table is for illustrative purposes; consult the text of this subrule for precise regulatory requirements.

²Small and medium-size systems have to monitor for water quality parameters only during monitoring periods in which the system exceeds the lead or copper action level.

³Orthophosphate must be measured only when an inhibitor containing a phosphate compound is used. Silica must be measured only when an inhibitor containing silicate compound is used.

⁴Calcium must be measured only when calcium carbonate stabilization is used as part of corrosion control.

⁵Inhibitor dosage rates and inhibitor residual concentrations (orthophosphate or silica) must be measured only when an inhibitor is used.

⁶Groundwater systems may limit monitoring to representative locations throughout the systems.

⁷Water systems may reduce frequency of monitoring for water quality parameters at the tap from every six months to annually if they have maintained the range of values for water quality parameters reflecting optimal corrosion control during three consecutive years of monitoring.

⁸Water systems may further reduce the frequency of monitoring for water quality parameters at the tap from annually to once every three years if they have maintained the range of values for water quality parameters reflecting optimal corrosion control during three consecutive years of annual monitoring. Water systems may accelerate to triennial monitoring for water quality parameters at the tap if they have maintained 90th percentile lead levels less than or equal to 0.005 mg/L, 90th percentile copper levels less than or equal to 0.65mg/L, and the range of water quality parameters designated by the department under 567—paragraph 43.7(2)“f” as representing optimal corrosion control during two consecutive six-month monitoring periods.

e. Lead and copper source water monitoring requirements.

(1) Sample location, collection methods, and number of samples.

1. A water system that fails to meet the lead or copper action level on the basis of tap samples collected in accordance with 41.4(1)“c” shall collect lead and copper source water samples in accordance with the following requirements regarding sample location, number of samples, and collection methods:

- Groundwater systems shall take a minimum of one sample at every entry point to the distribution system (source entry point) which is representative of each well after treatment. The system shall take one sample at the same source entry point unless conditions make another sampling location more representative of each source or treatment plant.

- Surface water systems and any system with a combination of surface water and groundwater shall take a minimum of one sample at every entry point to the distribution system after any application of treatment or in the distribution system at a point which is representative of each source after treatment. The system shall take each sample at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant.

- If a system draws water from more than one source and the sources are combined before distribution, the system must sample at an entry point to the distribution system during periods of normal operating conditions, when water is representative of all sources being used.

2. Where the results of sampling indicate an exceedance of maximum permissible source water levels established under 567—subparagraph 43.7(3)“b”(4), the department may require that one additional sample be collected as soon as possible after the initial sample was taken (but not to exceed two weeks) at the same sampling point. If a confirmation sample is taken for lead or copper, then the results of the initial and confirmation samples shall be averaged in determining compliance with the maximum permissible levels. Lead and copper analytical results below the detection limit shall be considered to be zero. Analytical results above the detection limit but below the practical quantification level (PQL) shall either be considered as the measured value or be considered one-half the PQL.

(2) Monitoring after system exceeds tap water action level. Any system which exceeds the lead or copper action level at the tap shall collect one source water sample from each entry point to the distribution system no later than six months after the end of the monitoring period during which the lead or copper action level was exceeded. For monitoring periods that are annual or less frequent, the end of the monitoring period is September 30 of the calendar year in which the sampling occurs or, if the department has established an alternate monitoring period, the last day of that period.

(3) Monitoring after installation of source water treatment. Any system which installs source water treatment pursuant to 567—subparagraph 43.7(3)“a”(3) shall collect an additional source water sample from each entry point to the distribution system during two consecutive six-month monitoring periods by the deadline specified.

(4) Monitoring frequency after the department specifies maximum permissible source water levels or determines that source water treatment is not needed.

1. A system shall monitor at the frequency specified below in cases where the department specifies maximum permissible source water levels under 567—subparagraph 43.7(3)“b”(4) or determines that the system is not required to install source water treatment under 567—subparagraph 43.7(3)“b”(2). A water system using only groundwater shall collect samples once during the three-year compliance period in effect when the department makes this determination. Such systems shall collect samples once during each subsequent compliance period. Triennial samples shall be collected every third calendar year. A public water system using surface water (or a combination of surface and groundwater) shall collect samples once during each year, the first annual monitoring period to begin during the year in which the department determination is made under this subparagraph.

2. A system using only groundwater is not required to conduct source water sampling for lead or copper if the system meets the action level for the specific contaminant in tap water samples during the entire source water sampling.

(5) Reduced monitoring frequency.

1. A water system using only groundwater may reduce the monitoring frequency for lead and copper in source water to once during each nine-year compliance cycle provided that the samples are collected no later than every ninth calendar year and if the system meets one of the following criteria:

- The system demonstrates that finished drinking water entering the distribution system has been maintained below the maximum permissible lead or copper concentrations specified by the department in 567—subparagraph 43.7(3)“b”(4) during at least three consecutive compliance periods under 41.4(1)“e”(4)“1”; or

- The department has determined that source water treatment is not needed and the system demonstrates that, during at least three consecutive compliance periods in which sampling was conducted under 41.4(1)“e”(4)“1,” the concentration of lead in source water was less than or equal to 0.005 mg/L and the concentration of copper in source water was less than or equal to 0.65 mg/L.

2. A water system using surface water (or a combination of surface water and groundwater) may reduce the monitoring frequency in 41.4(1)“e”(4)“1” to once during each nine-year compliance cycle provided that the samples are collected no later than every ninth calendar year and if that system meets one of the following criteria:

- The system demonstrates that finished drinking water entering the distribution system has been maintained below the maximum permissible lead and copper concentrations specified by the department in 567—subparagraph 43.7(3)“b”(4) for at least three consecutive years; or

- The department has determined that source water treatment is not needed and the system demonstrates that, during at least three consecutive years, the concentration of lead in source water was less than or equal to 0.005 mg/L and the concentration of copper in source water was less than or equal to 0.65 mg/L.

3. A water system that uses a new source of water is not eligible for reduced monitoring for lead or copper until concentrations in samples collected from the new source during three consecutive monitoring periods are below the maximum permissible lead and copper concentrations specified.

f. Corrosivity monitoring protocol—special monitoring for corrosivity characteristics. Suppliers of water for community public water systems shall collect samples from a representative entry point to the water distribution system for the purpose of analysis to determine the corrosivity characteristics of the water. The determination of corrosivity characteristics of water shall only include one round of sampling, except in cases where the department concludes additional monitoring is necessary due to variability of the raw water sources. Sampling requirements and approved analytical methods are as follows:

(1) Surface water systems. Systems utilizing a surface water source either in whole or in part shall collect two samples per plant for the purpose of determining the corrosivity characteristics. One of these samples is to be collected during the midwinter months and the other during midsummer.

(2) Groundwater systems. Systems utilizing groundwater sources shall collect one sample per plant or source, except systems with multiple plants that do not alter the corrosivity characteristics identified in 41.4(1)“f”(3) or systems served by multiple wells drawing raw water from a single aquifer may, with departmental approval, be considered one treatment plant or source when determining the number of samples required.

(3) Corrosivity characteristics analytical parameters. Determination of corrosivity characteristics of water shall include measurements of pH, calcium hardness, alkalinity, temperature, total dissolved solids (total filterable residue), and calculation of the Langelier Index. In addition, sulfate and chloride monitoring may be required by the department. At the department’s discretion, the Aggressiveness Index test may be substituted for the Langelier Index test.

(4) Corrosivity indices methodology. The following methods must be used to calculate the corrosivity indices:

1. Aggressiveness Index—“ANSI/AWWA C401-93: AWWA Standard for the Selection of Asbestos Cement Pressure Pipe, 4”–16” for Water Distribution Systems,” American Water Works Association, Denver, CO.

2. Langelier Index—“Standard Methods for the Examination of Water and Wastewater,” 14th edition, American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710, (1975), Method 203, pp. 61-63.

(5) Distribution system construction materials. Community and nontransient noncommunity water supply systems shall identify whether the following construction materials are present in their distribution system and report to the department:

1. Lead from piping, solder, caulking, interior lining of distribution mains, alloys, and home plumbing.

2. Copper from piping and alloys, service lines, and home plumbing.

3. Galvanized piping, service lines, and home plumbing.

4. Ferrous piping materials such as cast iron and steel.

5. Asbestos cement pipe.

6. Vinyl lined asbestos cement pipe.

7. Coal tar lined pipes and tanks.

8. Pipe with asbestos cement lining.

g. Lead, copper, and water quality parameter analytical methods.

(1) Analytical methods. Analyses for alkalinity, calcium, conductivity, orthophosphate, pH, silica, and temperature may be performed by a Grade I, II, III, or IV certified operator meeting the requirements

of 567—Chapter 81, any person under the supervision of a Grade I, II, III, or IV certified operator meeting the requirements of 567—Chapter 81, or a laboratory certified by the department to perform analysis under 567—Chapter 83. Analyses under this subrule for lead and copper shall only be conducted by laboratories that have been certified by the department, pursuant to 567—Chapter 83. The following methods must be used:

³Annual Book of ASTM Standards, 1994, 1996, 1999, or 2003, Vols. 11.01 and 11.02, American Society for Testing and Materials, International; the methods listed are the only versions that may be used. The previous versions of D1688-95A and D1688-95C (copper), D3559-95D (lead), D1293-95 (pH), D1125-91A (conductivity), and D859-94 (silica) are also approved. These previous versions, D1688-90A, C, D3559-90D, D1293-84, D1125-91A and D859-88, respectively, are located in the Annual Book of ASTM Standards, 1994, Volume 11.01. Copies may be obtained from ASTM International, 100 Barr Harbor Drive, West Conshohocken, PA 19428 or www.astm.org.

⁴18th and 19th editions of Standard Methods for the Examination of Water and Wastewater, 1992 and 1995, respectively, American Public Health Association. Either edition may be used. Copies may be obtained from the American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710.

⁵Techniques of Water Resources Investigation of the U.S. Geological Survey, Book 5, Chapter A-1, 3rd ed., 1989. Available from Information Services, U.S. Geological Survey, Federal Center, Box 25286, Denver, CO 80225-0425.

⁶Samples may not be filtered. Samples that contain less than 1 NTU (Nephelometric turbidity unit) and are properly preserved (concentrated nitric acid to pH < 2) may be analyzed directly (without digestion) for total metals; otherwise, digestion is required. When digestion is required, the total recoverable technique as defined in the method must be used.

⁷"Methods for the Determination of Inorganic Substances in Environmental Samples," EPA/600/R-93/100, August 1993. Available at NTIS as PB94-120821.

⁸"Methods of Analysis by the U.S. Geological Survey National Water Quality Laboratory—Determination of Inorganic and Organic Constituents in Water and Fluvial Sediments, Open File Report 93-125." ⁹Because MDLs reported in EPA Methods 200.7 and 200.9 were determined using a 2X preconcentration step during sample digestion, MDLs determined when samples are analyzed by direct analysis (i.e., no sample digestion) will be higher. Preconcentration may be required for direct analysis of lead by Methods 200.9, 3113B, and 3559-90D unless multiple in-furnace depositions are made.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.5(455B) Organic chemicals.

41.5(1) MCLs and other requirements for organic chemicals. Maximum contaminant levels for two classes of organic chemical contaminants specified in 41.5(1) "b" apply to community water systems and nontransient noncommunity water systems as specified herein. The two referenced organic chemical classes are volatile organic chemicals (VOCs) and synthetic organic chemicals (SOCs).

The requirements also contain analytical method requirements and monitoring requirements referenced in 41.5(1) "b" and "c." Best available technology (BAT) for control of these organic contaminants is referenced in 567—paragraph 43.3(10) "a."

a. Applicability. The maximum contaminant levels for volatile and synthetic organic contaminants apply to community and nontransient noncommunity water systems. Compliance with the volatile and synthetic organic contaminant maximum contaminant level is calculated pursuant to 41.5(1) "b."

b. Maximum contaminant levels (MCLs) and analytical methodology for organic compounds. The maximum contaminant levels for organic chemicals are listed in the table in subparagraph 41.5(1) "b"(1). Analyses for the contaminants in this subrule shall be conducted using the following methods, or their

equivalent as approved by EPA. For analysis of a compliance sample, a certified laboratory must be able to achieve at least the method detection limit for the specific contaminant as listed in the following table.

(1) Table:

ORGANIC CHEMICAL CONTAMINANTS, CODES, MCLS, ANALYTICAL METHODS,
AND DETECTION LIMITS

| Contaminant | EPA Contaminant Code | MCL (mg/L) | Methodology ¹ | Detection Limit (mg/L) |
|-------------------------------------|----------------------|------------|---|------------------------|
| Volatile Organic Chemicals (VOCs): | | | | |
| Benzene | 2990 | 0.005 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| Carbon tetrachloride | 2982 | 0.005 | 502.2, 524.2, 524.3, 524.4 ⁷ , 551.1 | 0.0005 |
| Chlorobenzene (mono) | 2989 | 0.1 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| 1,2-Dichlorobenzene (ortho) | 2968 | 0.6 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| 1,4-Dichlorobenzene (para) | 2969 | 0.075 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| 1,2-Dichloroethane | 2980 | 0.005 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| 1,1-Dichloroethylene | 2977 | 0.007 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| cis-1,2-Dichloroethylene | 2380 | 0.07 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| trans-1,2-Dichloroethylene | 2979 | 0.1 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| Dichloromethane | 2964 | 0.005 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |
| 1,2-Dichloropropane | 2983* | 0.005 | 502.2, 524.2, 524.3, 524.4 ⁷ | 0.0005 |

*As of January 1, 1999, the contaminant codes for the following compounds were changed from the Iowa Contaminant Code to the EPA Contaminant Code:

| Contaminant | Iowa Contaminant Code (Old) | EPA Contaminant Code (New) |
|---------------------|-----------------------------|----------------------------|
| 1,2 Dichloropropane | 2325 | 2983 |
| Xylenes (total) | 2974 | 2955 |

¹Analyses for the contaminants in this section shall be conducted using the following EPA methods or their equivalent as approved by EPA. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be inspected at EPA's Drinking Water Docket, EPA West, 1301 Constitution Avenue, NW, Room 3334, Washington, DC 20460 (telephone: (202)566-2426); or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202)741-6030, or via Internet at www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

The following methods are available from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161 (telephone: (800)553-6847).

Methods for the Determination of Organic Compounds in Drinking Water, EPA-600/4-88-039, December 1988, Revised July 1991 (NTIS PB91-231480): Methods 508A and 515.1.

Methods for the Determination of Organic Compounds in Drinking Water—Supplement I, EPA-600/4-90-020, July 1990 (NTIS PB91-146027): Methods 547, 550, 550.1.

Methods for the Determination of Organic Compounds in Drinking Water—Supplement II, EPA-600/R-92-129, August 1992 (NTIS PB92-207703): Methods 548.1, 552.1, 555.

Methods for the Determination of Organic Compounds in Drinking Water—Supplement III, EPA-600/R-95-131, August 1995 (NTIS PB95-261616): Methods 502.2, 504.1, 505, 506, 507, 508, 508.1, 515.2, 524.2, 525.2, 531.1, 551.1, 552.2.

EPA Method 523, "Determination of Triazine Pesticides and Their Degradates in Drinking Water by Gas Chromatography/Mass Spectrometry (GC/MS)," 2011. EPA-815-R-11-002. Available at www.nepis.epa.gov.

EPA Method 524.3, Version 1.0. "Measurement of Purgeable Organic Compounds in Water by Capillary Column Gas Chromatography/Mass Spectrometry," June 2009. EPA 815-B-09-009. Available at www.nemi.gov.

EPA Method 525.3, "Determination of Semivolatile Organic Chemicals in Drinking Water by Solid Phase Extraction and Capillary Column Gas Chromatograph/Mass Spectrometry (GC/MS)," 2012. EPA/600/R-12-010. Available at www.nepis.epa.gov.

EPA Method 536, "Determination of Triazine Pesticides and Their Degradates in Drinking Water by Liquid Chromatography Electrospray Ionization Tandem Mass Spectrometry (LC/ESI-MS/MS)," 2007. EPA/815-B-07-002. Available at www.nepis.epa.gov.

EPA Method 557, "Determination of Haloacetic Acids, Bromate, and Dalapon in Drinking Water by Ion Chromatography Electrospray Ionization Tandem Mass Spectrometry (IC-ESI-MS/MS)," September 2009. EPA 815-B-09-012. Available at www.nemi.gov.

Method 1613 "Tetra-through Octa-Chlorinated Dioxins and Furans by Isotope-Dilution HRGC/HRMS," EPA-821-B-94-005, October 1994 (NTIS PB95-104774).

The following American Public Health Association (APHA) documents are available from APHA, 800 I Street, NW, Washington, DC 20001-3710.

Supplement to the 18th Edition of Standard Methods for the Examination of Water and Wastewater, 1994, Standard Methods for the Examination of Water and Wastewater, 19th edition, 1995, 20th edition, 1998, 21st edition, 2005, or 22nd edition, 2012 (any of these editions may be used), APHA: Method 6610 and (carbofuran and oxamyl only) 6610B and 6610 B-04; Method 6640B (21st and 22nd editions only) and SM online 6640 B-01 for 2,4-D, 2,4,5-TP Silvex, dalapon, dinoseb, pentachlorophenol, and picloram; Method 6651B (21st and 22nd editions only) and SM online 6670-B-00 for glyphosate.

Standard Methods for the Examination of Water and Wastewater, 18th edition, 1992, 19th edition, 1995, or 20th edition, 1998, (any of these editions may be used), APHA: Method 6651.

The following American Society for Testing and Materials (ASTM) method is available from ASTM International, 100 Barr Harbor Drive, West Conshohocken, PA 19428.

Annual book of ASTM Standards, 1999, Vol. 11.02 (or any edition published after 1993), ASTM: D5317-93, 98 (Reapproved 2003).

Methods 515.3 and 549.2 are available from U.S. EPA NERL, 26 W. Martin Luther King Drive, Cincinnati, OH 45268.

Method 515.4, "Determination of Chlorinated Acids in Drinking Water by Liquid-Liquid Microextraction, Derivatization and Fast Gas Chromatography with Electron Capture Detection," Revision 1.0, April 2000, EPA 815/B-00/001 and EPA Method 552.3, "Determination of Haloacetic Acids and Dalapon in Drinking Water by Liquid-liquid Microextraction, Derivatization, and Gas Chromatography with Electron Capture Detection," Revision 1.0, July 2003, EPA 815-B-03-002, available at www.epa.gov/safewater/methods/sourcalt.html.

Method 531.2, "Measurement of n-Methylcarbamoyloximes and n-Methylcarbamates in Water by Direct Aqueous Injection HPLC with Postcolumn Derivatization," Revision 1.0, September 2001, EPA 815/B-01/002, available at www.epa.gov/safewater/methods/sourcalt.html.

Syngenta AG-625 Method, "Atrazine in Drinking Water by Immunoassay," February 2001, is available from Syngenta Crop Protection, Inc., 410 Swing Road, P.O. Box 18300, Greensboro, NC 27419, telephone (336)632-6000.

Other required analytical test procedures germane to the conduct of these analyses are contained in Technical Notes on Drinking Water Methods, EPA-600/R-94-173, October 1994 (NTIS PB95-104766).

²Standard Methods Online is available at www.standardmethods.org. The year in which each method was approved by the Standard Methods Committee is designated by the last two digits in the method number. The methods listed are the only online versions that may be used.

³Substitution of the detector specified in Method 505, 507, 508, or 508.1 for the purpose of achieving lower detection limits is allowed as follows. Either an electron capture or nitrogen-phosphorus detector may be used provided all regulatory requirements and quality control criteria are met.

⁴PCBs are qualitatively identified as Aroclors and measured for compliance purposes as decachlorobiphenyl. Users of Method 505 may have more difficulty in achieving the required detection limits than users of Method 508. 508.1, or 525.2.

⁵This method may not be used for the analysis of atrazine in any system where chlorine dioxide is used in the drinking water treatment. In samples from all other systems, any result for atrazine generated by Method AG-625 that is greater than one-half the MCL (i.e., greater than 0.0015 mg/L) must be confirmed using another approved method for this contaminant and should use additional volume of the original sample collected for compliance monitoring. In instances where a result from Method AG-625 triggers such confirmatory testing, the confirmatory result is to be used to determine compliance.

⁶Accurate determination of the chlorinated esters requires hydrolysis of the sample as described in EPA Methods 515.1, 515.2, 515.3, 515.4, and 555, and ASTM Method D5317-93, 98 (Reapproved 2003).

⁷EPA Method 524.4, Version 1.0. "Measurement of Purgeable Organic Compounds in Water by Gas Chromatography/Mass Spectrometry Using Nitrogen Purge Gas," May 2013, EPA 815-R-13-002.

(2) Organic chemical compliance calculations. Compliance with 41.5(1)"b"(1) shall be determined based on the analytical results obtained at each sampling point. If one sampling point is in violation of an MCL listed in 41.5(1)"b"(1), the system is in violation of the MCL. If a system fails to collect the required number of samples, compliance will be based on the total number of samples

collected. If a sample result is less than the detection limit, zero will be used when calculating the running annual average. If the system is in violation of an MCL, the water supplier is required to give notice to the department in accordance with 567—subrule 42.4(1) and to notify the public as required by 567—42.1(455B).

1. Systems monitoring more than once per year for VOC or SOC contaminants. For systems which monitor more than once per year, compliance with the MCL is determined by a running annual average of all samples collected at each sampling point.

2. Systems monitoring annually or less frequently for VOC contaminants. Systems which monitor annually or less frequently and whose VOC sample result exceeds the MCL must begin quarterly sampling. The system will not be considered in violation of the MCL until it has completed one year of quarterly sampling. However, if any sample result will cause the running annual average to exceed the MCL at any sampling point, the system is immediately out of compliance with the MCL.

3. Systems monitoring annually or less frequently for SOC contaminants. Systems which monitor annually or less frequently and whose SOC sample result exceeds the regulatory detection limit specified in subparagraph 41.5(1)“b”(1) must begin quarterly sampling. The system will not be considered in violation of the MCL until it has completed one year of quarterly sampling. However, if any sample result will cause the running annual average to exceed the MCL at any sampling point, the system is immediately out of compliance with the MCL.

(3) Treatment techniques for acrylamide and epichlorohydrin. Each public water supply system must certify annually in writing to the department (using third-party or manufacturer’s certification) that when acrylamide and epichlorohydrin are used in drinking water systems, the combination (or product) of dose and monomer level does not exceed the levels specified as follows:

Acrylamide = 0.05% dosed at 1 ppm (or equivalent)

Epichlorohydrin = 0.01% dosed at 20 ppm (or equivalent)

Certifications can rely on information provided by manufacturers or third parties, as approved by the department.

c. Organic chemical monitoring requirements. Each public water system shall monitor at the time designated within each compliance period. All new systems or systems that use a new source of water must demonstrate compliance with the MCLs within the time period specified by the department. The system must also comply with the initial sampling frequencies specified by the department to ensure the system can demonstrate compliance with the MCLs. A source of water that is determined by the department to be a new source/entry point is considered to be a new source for the purposes of paragraph 41.5(1)“c.” Routine and increased monitoring frequencies shall be conducted in accordance with the requirements in this paragraph.

(1) Routine volatile organic chemical (VOC) monitoring requirements. Beginning on January 1, 1993, community water supplies and NTNC water supplies shall conduct monitoring of the contaminants listed in 41.5(1)“b”(1) for the purpose of determining compliance with the maximum contaminant level.

(2) VOC monitoring protocol.

1. VOC groundwater monitoring protocol. Groundwater systems shall take a minimum of one sample at every entry point to the distribution system which is representative of each well after treatment (hereafter called a source/entry point). Each sample must be taken at the same sampling point unless conditions make another sampling point more representative of each source, treatment plant, or within the distribution system.

2. VOC surface water monitoring protocol. Surface water systems (and combined surface/groundwater systems) shall take a minimum of one sample at each entry point to the distribution system after treatment (hereafter called a source/entry point). Each sample must be taken at the same sampling point unless conditions make another sampling point more representative of each source, treatment plant, or within the distribution system.

3. Multiple sources. If the system draws water from more than one source and the sources are combined before distribution, the system must sample at an entry point to the distribution system during periods of normal operating conditions (i.e., when water representative of all sources is being used). If a

representative sample of all water sources cannot be obtained, as determined by the department, separate source/entry points with the appropriate monitoring requirements will be assigned by the department.

4. Initial VOCs monitoring frequency. Each community and nontransient noncommunity water system shall take four consecutive quarterly samples for each contaminant listed in 41.5(1)“b”(1) during each compliance period, beginning in the initial compliance period. If the initial monitoring for contaminants listed in 41.5(1)“b”(1) has been completed by December 31, 1992, and the system did not detect any contaminant listed in 41.5(1)“b”(1), then each groundwater and surface water system shall take one sample annually beginning with the initial compliance period.

5. Reduced VOC monitoring for groundwater systems. After a minimum of three years of annual sampling, the department may allow groundwater systems with no previous detection of any contaminant listed in 41.5(1)“b”(1) to take one sample during each compliance period.

6. VOC monitoring waivers. Each community and nontransient noncommunity groundwater system which does not detect a contaminant listed in 41.5(1)“b”(1) may apply to the department for a waiver from the requirements of 41.5(1)“c”(2)“4” and “5” after completing the initial monitoring. A waiver shall be effective for no more than six years (two compliance periods). The department may also issue waivers to small systems for the initial round of monitoring for 1,2,4-trichlorobenzene. Detection is defined as greater than or equal to 0.0005 mg/L.

7. Bases of a VOC monitoring waiver. The department may grant a waiver if the department finds that there has not been any knowledge of previous use (including transport, storage, or disposal) of the contaminant within the watershed or zone of influence of the system. If previous use of the contaminant is unknown or it has been used previously, then the following factors shall be used to determine whether a waiver is granted.

- Previous analytical results.
- The proximity of the system to a potential point or nonpoint source of contamination. Point sources include spills and leaks of chemicals at or near a water treatment facility or at manufacturing, distribution, or storage facilities, or from hazardous and municipal waste landfills and other waste handling or treatment facilities.
- The environmental persistence and transport of the contaminants.
- The number of persons served by the public water system and the proximity of a smaller system to a larger system, and
- How well the water source is protected against contamination, such as whether it is a surface or groundwater system. Groundwater systems must consider factors such as depth of the well, the type of soil, and wellhead protection. Surface water systems must consider watershed protection.

8. VOC monitoring waiver requirements for groundwater systems. As a condition of the waiver, a groundwater system must take one sample at each sampling point during the time the waiver is effective (i.e., one sample during two compliance periods or six years) and update its vulnerability assessment considering the factors listed in 41.5(1)“c”(2)“7.” Based on this vulnerability assessment the department must reconfirm that the system is nonvulnerable. If the department does not reconfirm within three years of the initial vulnerability determination, then the waiver is invalidated and the system is required to sample annually as specified in 41.5(1)“c”(2)“4.”

9. VOC monitoring waiver requirements for surface water systems. Each community and nontransient noncommunity surface water system which does not detect a contaminant listed in 41.5(1)“b”(1) may apply to the department for a waiver from the requirements of 41.5(1)“c”(2)“4” after completing the initial monitoring. Systems meeting this criterion must be determined by the department to be nonvulnerable based on a vulnerability assessment during each compliance period. Each system receiving a waiver shall sample at the frequency specified by the department (if any).

10. Increased VOC monitoring. If a contaminant listed in 41.5(1)“b”(1) is detected at a level exceeding 0.0005 mg/L in any sample, then:

The system must monitor quarterly at each sampling point which resulted in a detection.

The department may decrease the quarterly monitoring requirement specified in 41.5(1)“c”(2)“4” provided it has determined that the system is reliably and consistently below the maximum contaminant level. In no case shall the department make this determination unless a groundwater system takes a

minimum of two quarterly samples and a surface water system takes a minimum of four quarterly samples.

If the department determines that the system is reliably and consistently below the MCL, the department may allow the system to monitor annually. Systems which monitor annually must monitor during the quarter(s) which previously yielded the highest analytical result.

Systems which have three consecutive annual samples with no detection of a contaminant may apply to the department for a waiver as specified in 41.5(1) "c"(2)"6."

Groundwater systems which have detected one or more of the following two-carbon organic compounds: trichloroethylene, tetrachloroethylene, 1,2-dichloroethane, 1,1,1-trichloroethane, cis-1,2-dichloroethylene, trans-1,2-dichloroethylene, or 1,1-dichloroethylene shall monitor quarterly for vinyl chloride. A vinyl chloride sample shall be taken at each sampling point at which one or more of the two-carbon organic compounds was detected. If the results of the first analysis do not detect vinyl chloride, the department may reduce the quarterly monitoring frequency of vinyl chloride monitoring to one sample during each compliance period. Surface water systems are required to monitor for vinyl chloride as specified by the department.

11. VOCs reliably and consistently below the MCL. Systems which violate the MCL requirements of 41.5(1) "b"(1) must monitor quarterly. After a minimum of four consecutive quarterly samples which show the system is in compliance and the department determines that the system is reliably and consistently below the maximum contaminant level, the system may monitor at the frequency and times specified in 41.5(1) "c"(2)"10," third unnumbered paragraph (following approval by the department).

(3) Routine and repeat synthetic organic chemical (SOC) monitoring requirements. Analysis of the synthetic organic contaminants listed in 41.5(1) "b"(1) for the purposes of determining compliance with the maximum contaminant level shall be conducted as follows:

1. SOC groundwater monitoring protocols. Groundwater systems shall take a minimum of one sample at every entry point to the distribution system which is representative of each well after treatment (hereafter called a source/entry point). Each sample must be taken at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant.

2. SOC surface water monitoring protocols. Surface water systems shall take a minimum of one sample at each entry point to the distribution system after treatment (hereafter called a source/entry point). Each sample must be taken at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant. For purposes of this paragraph, surface water systems include systems with a combination of surface and ground sources.

3. Multiple sources. If the system draws water from more than one source and the sources are combined before distribution, the system must sample at an entry point to the distribution system during periods of normal operating conditions (i.e., when water representative of all sources is being used). If a representative sample of all water sources cannot be obtained, as determined by the department, separate source/entry points with the appropriate monitoring requirements will be assigned by the department.

4. SOC monitoring frequency. Community and nontransient noncommunity water systems shall take four consecutive quarterly samples for each contaminant listed in 41.5(1) "b"(1) during each compliance period beginning with the compliance period starting January 1, 1993. Systems serving more than 3,300 persons which do not detect a contaminant in the initial compliance period may reduce the sampling frequency to a minimum of two quarterly samples in one year during each repeat compliance period. Systems serving less than or equal to 3,300 persons which do not detect a contaminant in the initial compliance period may reduce the sampling frequency to a minimum of one sample during each repeat compliance period.

5. SOC monitoring waivers. Each community and nontransient water system may apply to the department for a waiver from the requirements of 41.5(1) "c"(3)"4." A system must reapply for a waiver for each compliance period.

6. Bases of an SOC monitoring waiver. The department may grant a waiver if the department finds that there has been no knowledge of previous use (including transport, storage, or disposal) of the contaminant within the watershed or zone of influence of the system. If previous use of the contaminant

is unknown or it has been used previously, then the department shall determine whether a waiver may be granted by considering:

- Previous analytical results.
- The proximity of the system to a potential point or nonpoint source of contamination. Point sources include spills and leaks of chemicals at or near a water treatment facility or at manufacturing, distribution, or storage facilities, or from hazardous and municipal waste landfills and other waste handling or treatment facilities. Nonpoint sources include the use of pesticides to control insect and weed pests on agricultural areas, forest lands, home and gardens, and other land application uses.
 - The environmental persistence and transport of the pesticide or PCBs.
 - How well the water source is protected against contamination due to such factors as depth of the well and the type of soil and the integrity of the well casing.
 - Elevated nitrate levels at the water supply source, and
 - Use of PCBs in equipment used in the production, storage, or distribution of water (i.e., PCBs used in pumps and transformers).

7. Increased SOC monitoring. If a synthetic organic contaminant listed in 41.5(1)“b”(1) is detected in any sample, then:

- Each system must monitor quarterly at each sampling point which resulted in a detection.
- The department may decrease the quarterly SOC monitoring requirement if the system is reliably and consistently below the maximum contaminant level. In no case shall the department make this determination unless a groundwater system takes a minimum of two quarterly samples and a surface water system takes a minimum of four quarterly samples.
 - After the department determines the system is reliably and consistently below the maximum contaminant level, the system may monitor annually. Systems which monitor annually must monitor during the quarter that previously yielded the highest analytical result.
 - Systems which have three consecutive annual samples with no detection of a contaminant may apply to the department for a waiver as specified in 41.5(1)“c”(3)“6.”
 - If monitoring results in detection of one or more of certain related contaminants (aldicarb, aldicarb sulfone, aldicarb sulfoxide, heptachlor, and heptachlor epoxide), then subsequent monitoring shall analyze for all related contaminants.

8. MCL violation and reliably/consistently below the MCL. Systems which violate the requirements of 41.5(1)“b” must monitor quarterly. After a minimum of four quarterly samples show the system is in compliance and the department determines the system is reliably and consistently below the MCL, the system shall monitor at the frequency specified in 41.5(1)“c”(3)“7.”

(4) Organic chemical (SOC and VOC) confirmation samples. The department may require a confirmation sample for positive or negative results. If a confirmation sample is required by the department, the result must be averaged with the first sampling result and the average is used for the compliance determination as specified by 41.5(1)“b”(2). The department has discretion to disregard results of obvious sampling errors from this calculation.

(5) Grandfathered organic chemical (SOC and VOC) data. The department may allow the use of monitoring data collected after January 1, 1988, for VOCs and January 1, 1990, for SOCs required under Section 1445 of the Safe Drinking Water Act for purposes of initial monitoring compliance. If the data are generally consistent with the other requirements in this subparagraph, the department may use such data (i.e., a single sample rather than four quarterly samples) to satisfy the initial monitoring requirement for the initial compliance period beginning January 1, 1993. Systems which use grandfathered samples for VOCs and did not detect any contaminants listed in 41.5(1)“b”(1) shall begin monitoring annually in accordance with 41.5(1)“c”(2) beginning January 1, 1993.

(6) Increased organic chemical (SOC and VOC) monitoring. The department may increase the required monitoring frequency, where necessary, to detect variations within the system (e.g., fluctuations in concentration due to seasonal use, changes in water source, changes to treatment facilities or normal operation thereof).

(7) Organic chemical (SOC and VOC) vulnerability assessment criteria. Vulnerability of each public water system shall be determined by the department based upon an assessment of the following factors.

1. VOC vulnerability assessment criteria—previous monitoring results. A system will be classified vulnerable if any sample was analyzed to contain one or more contaminants listed in 41.5(1) “b”(1)-(VOCs) or 41.5(1) “b”(3) except for trihalomethanes or other demonstrated disinfection by-products.

2. SOC vulnerability assessment criteria—previous monitoring results. A system will be classified vulnerable if any sample was analyzed to contain one or more contaminants listed in 41.5(1) “b”(2)-(SOCs) or 41.5(1) “b”(3) except for trihalomethanes or other demonstrated disinfection by-products.

3. Proximity of surface water supplies to commercial or industrial use, disposal or storage of volatile synthetic organic chemicals. Surface waters which withdraw water directly from reservoirs are considered vulnerable if the drainage basin upgradient and within two miles of the shoreline at the maximum water level contains major transportation facilities such as primary highways or railroads or any of the contaminant sources listed in this subparagraph. Surface water supplies which withdraw water directly from flowing water courses are considered vulnerable if the drainage basin upgradient and within two miles of the water intake structure contains major transportation facilities such as primary highways or railroads or any of the contaminant sources listed in this subparagraph.

4. Proximity of supplies to commercial or industrial use, disposal or storage of volatile synthetic organic chemicals. Wells that are not separated from sources of contamination by at least the following distances will be considered vulnerable.

| <u>Sources of Contamination</u> | <u>Shallow Wells as defined in 567—40.2(455B)</u> | <u>Deep Wells as defined in 567—40.2(455B)</u> |
|---|---|--|
| Sanitary and industrial point discharges | 400 ft | 400 ft |
| Mechanical waste treatment plants | 400 ft | 200 ft |
| Lagoons | 1,000 ft | 400 ft |
| Chemical and mineral storage (aboveground) | 200 ft | 100 ft |
| Chemical and mineral storage including underground storage tanks on or below ground | 400 ft | 200 ft |
| Solid waste disposal site | 1,000 ft | 1,000 ft |

5. A system is deemed to be vulnerable for a period of three years after any positive measurement of one or more contaminants listed in 41.5(1) “b”(1) except for trihalomethanes or other demonstrated disinfection by-products.

(8) PCB analytical methodology. Analysis for PCBs shall be conducted using the methods in 41.5(1) “b”(1) and as follows:

1. Each system which monitors for PCBs shall analyze each sample using Method 505, 508, 508.1, or 525.2. Users of Method 505 may have more difficulty in achieving the required Aroclor detection limits than users of Method 508, 508.1, or 525.2.

2. If PCBs (as one of seven Aroclors) are detected in any sample analyzed using Method 505 or 508, the system shall reanalyze the sample using Method 508A to quantitate PCBs as decachlorobiphenyl.

PCB AROCLOR DETECTION LIMITS

| <u>Aroclor</u> | <u>Detection Limit (mg/L)</u> |
|----------------|-------------------------------|
| 1016 | 0.00008 |
| 1221 | 0.02 |
| 1232 | 0.0005 |
| 1242 | 0.0003 |
| 1248 | 0.0001 |
| 1254 | 0.0001 |
| 1260 | 0.0002 |

3. Compliance with the PCB MCL shall be determined based upon the quantitative results of analyses using Method 508A.

d. Best available technology(ies) (BATs). Rescinded IAB 8/11/99, effective 9/15/99.

e. Total trihalomethanes sampling, analytical and other requirements. Rescinded IAB 1/7/04, effective 2/11/04.

f. Analytical procedures—organics. Rescinded IAB 1/7/04, effective 2/11/04.

41.5(2) Organic chemicals occurring as (nontrihalomethane) disinfection by-products. Reserved.
[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.6(455B) Disinfection byproducts maximum contaminant levels and monitoring requirements.

41.6(1) Stage 1 disinfection byproducts requirements.

a. Applicability.

(1) This rule establishes criteria under which CWS and NTNC public water supply systems that add a chemical disinfectant to the water in any part of the drinking water treatment process or which provide water that contains a chemical disinfectant must modify their practices to meet the MCLs listed in this rule and the maximum residual disinfectant levels (MRDL) and treatment technique requirements for disinfection byproduct precursors listed in 567—43.6(455B).

(2) Rescinded IAB 1/7/04, effective 2/11/04.

(3) Compliance dates for this rule are based upon the source water type and the population served. Systems are required to comply with this rule as follows, unless otherwise noted. The department may assign an earlier monitoring period as part of the operation permit, but compliance with the maximum contaminant level is not required until the dates stated below.

1. CWS and NTNC systems which use surface water or groundwater under the direct influence of surface water in whole or in part and which serve 10,000 or more persons must comply with this rule beginning January 1, 2002.

2. All other CWS and NTNC systems covered by 41.6(1)“a”(1) must comply with this rule by January 1, 2004.

(4) Consecutive systems. Consecutive systems that provide water containing a disinfectant or oxidant are required to comply with this rule.

(5) Systems with multiple water sources. Systems with water sources that are used independently from each other, are not from the same source as determined by the department, or do not go through identical treatment processes are required to conduct the monitoring for the applicable disinfectants or oxidants and disinfection byproducts during operation of each source. The system must comply with this rule during the use of each water source.

b. Maximum contaminant levels for disinfection byproducts.

(1) The maximum contaminant levels (MCLs) for disinfection byproducts are as follows:

| Disinfection byproduct | MCL (mg/L) |
|-------------------------------|------------|
| Bromate | 0.010 |
| Chlorite | 1.0 |
| Haloacetic acids (HAA5) | 0.060 |
| Total trihalomethanes (TTHM)* | 0.080 |

*The TTHM MCL changed from 0.10 mg/L to 0.080 mg/L effective January 1, 2002, for CWS serving at least 10,000 people and effective January 1, 2004, for all other CWS and NTNC systems which are subject to this rule.

(2) Beginning on the date listed in the following table, a system must comply with the total trihalomethanes MCL and the haloacetic acid MCL as a locational running annual average at each monitoring location.

| System Size (number of people served) | Date system must comply with MCL at each sampling location* |
|---|--|
| Systems that are not part of a combined distribution system and systems that serve the largest population in the combined distribution system | |
| System serving at least 100,000 people | April 1, 2012 |
| System serving 50,000-99,999 people | October 1, 2012 |
| System serving 10,000-49,999 people | October 1, 2013 |
| System serving fewer than 10,000 people | <ul style="list-style-type: none"> • October 1, 2013, for all groundwater systems and for SW/IGW systems that did not collect <i>Cryptosporidium</i> source water samples • October 1, 2014, for SW/IGW systems that collected <i>Cryptosporidium</i> source water samples |
| Other systems that are part of a combined distribution system | |
| Consecutive or wholesale system | At the same time as the system with the earliest compliance date in the combined distribution system |

*The department may grant up to an additional 24 months for compliance with the MCLs and operational evaluation levels if the system requires capital improvements to comply with an MCL.

c. Monitoring requirements for disinfection byproducts.

(1) General requirements.

1. Systems must take all samples during normal operating conditions.
2. Systems may consider multiple wells drawing water from a single aquifer as one treatment plant for determining the minimum number of TTHM and HAA5 samples required, with department approval.
3. Failure to monitor in accordance with the monitoring plan required under 41.6(1) "c"(1)"6" is a monitoring violation.
4. Failure to monitor is a violation for the entire period covered by the annual average where compliance is based on a running annual average of monthly or quarterly samples or averages, and the system's failure to monitor makes it impossible to determine compliance with MCLs.
5. Systems may use only data collected under the provisions of this rule or 567—43.6(455B) to qualify for reduced monitoring.
6. Each system required to monitor under the provisions of this rule or 567—43.6(455B) must develop and implement a monitoring plan. The system must maintain the plan and make it available for inspection by the department and the general public no later than 30 days following the applicable compliance dates in 41.6(1) "a"(3). All systems using surface water or groundwater under the direct influence of surface water and serving more than 3,300 people must submit a copy of the monitoring plan to the department by the applicable date in 41.6(1) "a"(3)"1." The department may also require the plan to be submitted by any other system. After review, the department may require changes in any plan elements. The plan must include at least the following elements:
 - Specific locations and schedules for collecting samples for any parameters included in this rule.
 - How the system will calculate compliance with MCLs, MRDLs, and treatment techniques.

7. The department may require a monthly monitoring frequency for disinfection byproducts, which would be specified in the operation permit.

(2) Bromate. Community and nontransient noncommunity systems using ozone for disinfection or oxidation must conduct monitoring for bromate.

1. Routine monitoring. Systems must take at least one sample per month for each treatment plant in the system using ozone, collected at each source/entry point to the distribution system while the ozonation system is operating under normal conditions.

2. Reduced monitoring. A system may reduce monitoring from monthly to quarterly, if the system's running annual average bromate concentration is less than or equal to 0.0025 mg/L based on monthly bromate measurements for the most recent four quarters. If the system previously qualified for reduced bromate monitoring and is on quarterly sampling frequency, it may remain on reduced monitoring as long as the running annual average of the bromate samples is less than or equal to 0.0025 mg/L. If the running annual average of quarterly bromate samples exceeds 0.0025 mg/L, the system must resume routine bromate monitoring. Only three analytical methods may be used for bromate samples under reduced monitoring: EPA Method 317.0 Revision 2.0, Method 326.0, or Method 321.8.

(3) Chlorite. Community and nontransient noncommunity water systems using chlorine dioxide, for disinfection or oxidation, must conduct monitoring for chlorite. If the system does not use chlorine dioxide on a daily basis, the system must conduct the required daily monitoring each day chlorine dioxide is used, and any required monthly monitoring during those months in which chlorine dioxide is used during any portion of the month.

1. Routine daily monitoring. Systems must take daily samples at the entrance to the distribution system. For any daily sample that exceeds the chlorite MCL, the system must take additional samples in the distribution system the following day at the locations required by 41.6(1) "c"(3)"3," which are in addition to the sample required at the entrance to the distribution system. These daily entry point to the distribution system samples may be analyzed by system personnel, in accordance with 41.6(1) "d."

2. Routine monthly monitoring. Systems must take a three-sample set each month in the distribution system. The system must take one sample at each of the following locations: near the first customer, at a location representative of average residence time, and at a location reflecting maximum residence time in the distribution system. Any additional routine sampling must be conducted in the same manner (as three-sample sets, at the specified locations). The system may use the results of additional monitoring conducted in accordance with 41.6(1) "c"(3)"3" to meet the requirement for monitoring in 41.6(1) "c"(3)"2." These monthly distribution system samples must be analyzed by a certified laboratory using an approved ion chromatography method, in accordance with 41.6(1) "d."

3. Additional monitoring. On each day following a routine sample monitoring result that exceeds the chlorite MCL at the entrance to the distribution system, the system is required to take three chlorite distribution system samples at the following locations: as close to the first customer as possible, in a location representative of average residence time, and as close to the end of the distribution system as possible (reflecting maximum residence time in the distribution system). These additional distribution system samples must be analyzed by a certified laboratory using an approved ion chromatography method, in accordance with 41.6(1) "d."

4. Reduced monitoring.

- Daily chlorite monitoring at the entrance to the distribution system required by 41.6(1) "c"(3)"1" may not be reduced.

- The department may allow systems with monthly chlorite monitoring in the distribution system required by 41.6(1) "c"(3)"2" to be reduced to a requirement of 1 three-sample set per quarter after one year of monitoring where no individual chlorite sample taken in the distribution system under 41.6(1) "c"(3)"2" has exceeded the chlorite MCL and the system has not been required to conduct additional monitoring under 41.6(1) "c"(3)"3." The system may remain on the reduced monitoring schedule until either any of the three individual chlorite samples taken quarterly in the distribution system under 41.6(1) "c"(3)"2" exceeds the chlorite MCL or the system is required to conduct monitoring under 41.6(1) "c"(3)"3" of this rule, at which time the system must revert to routine monitoring.

(4) Total trihalomethanes (TTHM) and haloacetic acids (HAA5).

1. Routine monitoring. Systems must monitor at the frequency indicated in the following table. Both the TTHM and HAA5 samples must be collected as paired samples during the same time period in order for each parameter to have the same annual average period for result comparison. A paired sample is one that is collected at the same location and time and is analyzed for both TTHM and HAA5 parameters.

Routine Monitoring Frequency for TTHM and HAA5

| Type of System (source water type and population served) | Minimum Monitoring Frequency | Sample Location in the Distribution System |
|---|---|--|
| SW/IGW ³ system serving ≥10,000 persons | Four water samples per quarter per treatment plant | At least 25 percent of all samples collected each quarter at locations representing maximum residence time. Remaining samples taken at locations representative of at least average residence time in the distribution system and representing the entire distribution system, taking into account number of persons served, different sources of water, and different treatment methods. ¹ |
| SW/IGW ³ system serving 500-9,999 persons | One water sample per quarter per treatment plant | Locations representing maximum residence time. ¹ |
| SW/IGW ³ system serving <500 persons | One sample per year per treatment plant during month of warmest water temperature | Locations representing maximum residence time. ¹ If the sample (or average of annual samples, if more than one sample is taken) exceeds MCL, system must increase monitoring to one sample per treatment plant per quarter, taken at a point reflecting the maximum residence time in the distribution system, until system meets reduced monitoring criteria in 41.6(1)“c”(4)“2,” second bulleted paragraph. |
| System using only non-IGW groundwater using chemical disinfectant and serving ≥10,000 persons | One water sample per quarter per treatment plant ² | Locations representing maximum residence time. ¹ |
| System using only non-IGW groundwater using chemical disinfectant and serving <10,000 persons | One sample per year per treatment plant during month of warmest water temperature | Locations representing maximum residence time. ¹ If the sample (or average of annual samples, if more than one sample is taken) exceeds MCL, system must increase monitoring to one sample per treatment plant per quarter, taken at a point reflecting the maximum residence time in the distribution system, until system meets reduced monitoring criteria in 41.6(1)“c”(4)“2,” second bulleted paragraph. |

¹If a system chooses to sample more frequently than the minimum required, at least 25 percent of all samples collected each quarter (including those taken in excess of the required frequency) must be taken at locations that represent the maximum residence time of the water in the distribution system. The remaining samples must be taken at locations representative of at least average residence time in the distribution system.

²Multiple wells drawing water from a single aquifer may be considered one treatment plant for determining the minimum number of samples required, with department approval.

³SW/IGW indicates those systems that use either surface water (SW) or groundwater under the direct influence of surface water (IGW), in whole or in part.

2. Reduced monitoring. The department may allow systems a reduced monitoring frequency, except as otherwise provided, in accordance with the following table. Source water total organic carbon (TOC) levels must be determined in accordance with 567—subparagraph 43.6(2)“c”(1).

Reduced Monitoring Frequency for TTHM and HAA5

| If you are a ... | And you have monitored at least one year and your ... | You may reduce monitoring to this level |
|---|--|--|
| SW/IGW ¹ system serving $\geq 10,000$ persons which has a source water annual average TOC level, before any treatment, of ≤ 4.0 mg/L. | TTHM annual average ≤ 0.040 mg/L and HAA5 annual average ≤ 0.030 mg/L | One sample per treatment plant per quarter at distribution system location reflecting maximum residence time. |
| SW/IGW ¹ system serving 500 - 9,999 persons that has a source water annual average TOC level, before any treatment, of ≤ 4.0 mg/L. | TTHM annual average ≤ 0.040 mg/L and HAA5 annual average ≤ 0.030 mg/L | One sample per treatment plant per year at distribution system location reflecting maximum residence time during month of warmest water temperature. |
| SW/IGW ¹ system serving < 500 persons | Any SW/IGW ¹ system serving < 500 persons may not reduce its monitoring to less than one sample per treatment plant per year. | |
| System using only non-IGW groundwater using chemical disinfectant and serving $\geq 10,000$ persons | TTHM annual average ≤ 0.040 mg/L and HAA5 annual average ≤ 0.030 mg/L | One sample per treatment plant per year at distribution system location reflecting maximum residence time during month of warmest water temperature. |
| System using only non-IGW groundwater using chemical disinfectant and serving $< 10,000$ persons | TTHM annual average ≤ 0.040 mg/L and HAA5 annual average ≤ 0.030 mg/L for two consecutive years; or, TTHM annual average ≤ 0.020 mg/L and HAA5 annual average ≤ 0.015 mg/L for one year. | One sample per treatment plant per three-year monitoring cycle at distribution system location reflecting maximum residence time during month of warmest water temperature, with the three-year cycle beginning on January 1 following quarter in which system qualifies for reduced monitoring. |

¹SW/IGW indicates those systems that use either surface water (SW) or groundwater under the direct influence of surface water (IGW), in whole or in part.

- Systems on a reduced monitoring schedule may remain on that reduced schedule as long as the average of all samples taken in the year (for systems which must monitor quarterly) or the result of the sample (for systems which must monitor no more frequently than annually) is less than or equal to 0.060 mg/L for TTHMs and is less than or equal to 0.045 mg/L for HAA5. Systems that do not meet these levels must resume monitoring at the frequency identified in 41.6(1) "c"(4)"1" in the quarter immediately following the quarter in which the system exceeds 0.060 mg/L for TTHMs and 0.045 mg/L for HAA5. For systems using only groundwater not under the direct influence of surface water and serving fewer than 10,000 persons, if either the TTHM annual average is > 0.080 mg/L or the HAA5 annual average is > 0.060 mg/L, the system must go to increased monitoring identified in 41.6(1) "c"(4)"1" in the quarter immediately following the monitoring period in which the system exceeds 0.080 mg/L for TTHMs or 0.060 mg/L for HAA5.

- The department may allow systems on increased monitoring to return to routine monitoring if, after one year of monitoring, TTHM annual average is less than or equal to 0.060 mg/L and HAA5 annual average is less than or equal to 0.045 mg/L.

- The department may return a system to routine monitoring at the department's discretion.

d. *Analytical requirements for disinfection byproducts.*

(1) Systems must use only the analytical method(s) specified in this paragraph, or equivalent methods as determined by EPA, to demonstrate compliance with the requirements of this rule.

(2) Systems must measure disinfection byproducts by the methods (as modified by the footnotes) listed in the following table:

Approved Methods for Disinfection Byproduct Compliance Monitoring

| Contaminant and Methodology | EPA Method ¹ | Standard Method ² | ASTM Method ³ |
|--|--|---|---------------------------------|
| TTHM | | | |
| P&T/GC/EICD & PID | 502.2 ⁴ | | |
| P&T/GC/MS | 524.2, 524.3, 524.4 | | |
| LLE/GC/ECD | 551.1 | | |
| HAA5 | | | |
| LLE (diazomethane)/GC/ECD | | 6251 B ⁵ , 6251 B-07 ¹² | |
| SPE (acidic methanol)/GC/ECD | 552.1 ⁵ | | |
| LLE (acidic methanol)/GC/ECD | 552.2, 552.3 | | |
| Ion chromatography electrospray ionization tandem mass spectrometry (IC-ESI-MS/MS) | 557 ¹⁰ | | |

⁴If TTHMs are the only analytes being measured in the sample, then a PID is not required.

⁵The samples must be extracted within 14 days of sample collection.

⁶Ion chromatography and postcolumn reaction or IC/ICP-MS must be used for bromate analysis for purposes of demonstrating eligibility of reduced monitoring.

⁷Samples must be preserved at sample collection with 50 mg ethylenediamine (EDA)/L of sample and must be analyzed within 28 days.

⁸Amperometric titration or spectrophotometry may be used for routine daily monitoring of chlorite at the entrance to the distribution system, as prescribed in 41.6(1) “c”(3)“1.” Ion chromatography must be used for routine monthly monitoring of chlorite and additional monitoring of chlorite in the distribution system, as prescribed in 41.6(1) “c”(3)“2” and “3.”

⁹These are the only methods approved for reduced bromate monitoring under 41.6(1) “c”(2)“2.”

¹⁰EPA Method 557, “Determination of Haloacetic Acids, Bromate, and Dalapon in Drinking Water by Ion Chromatography Electrospray Ionization Tandem Mass Spectrometry (IC-ESI-MS/MS),” August 2009. EPA 815-B-09-012. Available at www.nemi.gov.

(3) Certified laboratory requirements. Analyses under this rule for disinfection byproducts shall only be conducted by laboratories that have been certified by the department and are in compliance with the requirements of 567—Chapter 83, except as specified under 41.6(1) “d”(4). The performance evaluation sample acceptance limits and minimum reporting levels are listed in 567—subparagraph 83.6(7) “a”(6).

(4) Daily chlorite samples at the entrance to the distribution system must be measured by a Grade II, III or IV operator meeting the requirements of 567—Chapter 81, any person under the supervision of a Grade II, III or IV operator meeting the requirements of 567—Chapter 81, or a laboratory certified by the department to perform analysis under 567—Chapter 83.

e. Compliance requirements for disinfection byproducts.

(1) General requirements.

1. When compliance is based on a running annual average of monthly or quarterly samples or averages and the system fails to monitor for TTHM, HAA5, or bromate, this failure to monitor will be treated as a monitoring violation for the entire period covered by the annual average.

2. Unless invalidated by the department, all samples taken and analyzed under the provisions of this rule must be included in determining compliance, even if that number is greater than the minimum required.

3. If, during the first year of monitoring under paragraph 41.6(1) "c," any individual quarter's average will cause the running annual average of that system to exceed the MCL, the system is out of compliance at the end of that quarter.

(2) Bromate. Compliance must be based on a running annual arithmetic average, computed quarterly, of monthly samples (or, for months in which the system takes more than one sample, the average of all samples taken during the month) collected by the system as prescribed by 41.6(1) "c"(2). If the average of samples covering any consecutive four-quarter period exceeds the MCL, the system is in violation of the MCL and must notify the public pursuant to 567—42.1(455B), in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d." If a PWS fails to complete 12 consecutive months' monitoring, compliance with the MCL for the last four-quarter compliance period must be based on an average of the available data.

(3) Chlorite. Compliance must be based on an arithmetic average of each three-sample set taken in the distribution system as prescribed by 41.6(1) "c"(3)"1" and 41.6(1) "c"(3)"2." If the arithmetic average of any three-sample set exceeds the MCL, the system is in violation of the MCL and must notify the public pursuant to 567—42.1(455B), in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d."

(4) TTHM and HAA5.

1. For systems monitoring quarterly, compliance with MCLs in 41.6(1) "b" must be based on a running annual arithmetic average, computed quarterly, of quarterly arithmetic averages of all samples collected by the system as prescribed by 41.6(1) "c"(4).

2. For systems monitoring less frequently than quarterly, systems demonstrate MCL compliance if the average of samples taken that year under the provisions of 41.6(1) "c"(4) does not exceed the MCLs in 41.6(1) "b." If the average of these samples exceeds the MCL, the system must increase monitoring to once per quarter per treatment plant and is not in violation of the MCL until it has completed one year of quarterly monitoring, unless the result of fewer than four quarters of monitoring will cause the running annual average to exceed the MCL, in which case the system is in violation at the end of that quarter. Systems required to increase to quarterly monitoring must calculate compliance by including the sample that triggered the increased monitoring plus the following three quarters of monitoring.

3. If the running annual arithmetic average of quarterly averages covering any consecutive four-quarter period exceeds the MCL, the system is in violation of the MCL and must notify the public pursuant to 567—42.1(455B) in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d."

4. If a PWS fails to complete four consecutive quarters of monitoring, compliance with the MCL for the last four-quarter compliance period must be based on an average of the available data.

f. Reporting requirements for disinfection byproducts. Systems required to sample quarterly or more frequently must report to the department within ten days after the end of each quarter in which samples were collected, notwithstanding the public notification provisions of 567—42.1(455B). Systems required to sample less frequently than quarterly must report to the department within ten days after the end of each monitoring period in which samples were collected. The specific reporting requirements for disinfection byproducts are listed in 567—subparagraph 42.4(3) "d"(2).

41.6(2) Stage 2 initial distribution system evaluation. The department is adopting by reference the requirements for the Stage 2 initial distribution system evaluation (IDSE) listed in 40 CFR 141.600-605 as adopted on January 4, 2006. This regulation establishes monitoring and other requirements for identifying compliance monitoring locations that will be used to determine compliance with maximum contaminant levels for total trihalomethanes and haloacetic acids. All CWS required to comply with 41.6(1) and all NTNC serving at least 10,000 people that are required to comply with 41.6(1) are

required to comply with this subrule. The requirements in this subrule constitute national primary drinking water regulations. Only the analytical methods specified in 41.6(1)“d” may be used to demonstrate compliance with this subrule.

41.6(3) Stage 2 disinfection byproducts requirements. The requirements of this subrule constitute national primary drinking water regulations. This subrule establishes monitoring and other requirements for achieving compliance with MCLs based on locational running annual averages (LRAA) for TTHM and HAA5.

a. Applicability. All CWS and NTNC systems that use a primary or residual disinfectant other than ultraviolet light or deliver water that has been treated with a primary or residual disinfectant other than ultraviolet light must comply with the requirements in this subrule.

(1) *Schedule.* Systems must comply with the dates listed in the appropriate schedule. For the purposes of this subrule, the combined distribution system (CDS) as defined in 567—40.2(455B) only includes active connections; emergency connections are excluded. Any CWS or NTNC that purchases or sells water on a routine basis through an active connection to another CWS or NTNC is part of a combined distribution system. All systems included in a CDS must adhere to the schedule of the system that serves the largest population in that CDS. The system must comply with the requirements on the schedule for systems that are not a part of a CDS and for systems that serve the largest population in the CDS. The schedule for the other systems that are a part of a CDS, either wholesale or consecutive, is the same schedule as that of the system with the earliest compliance date in the CDS.

| Schedule | System Population | Date by which system must begin Stage 2 compliance monitoring |
|----------|-------------------|---|
| 1 | At least 100,000 | April 1, 2012 |
| 2 | 50,000-99,999 | October 1, 2012 |
| 3 | 10,000-49,999 | October 1, 2013 |
| 4 | Fewer than 10,000 | <ul style="list-style-type: none"> • October 1, 2013, for all GW systems and any SW/IGW systems that did not conduct <i>Cryptosporidium</i> sampling under 567—paragraph 43.11(3)“b”(2)“4” • October 1, 2014, for SW/IGW systems that conducted <i>Cryptosporidium</i> sampling under 567—paragraph 43.11(3)“b”(2)“4” |

(2) *Initiation of compliance monitoring under Stage 2.* Systems shall switch from Stage 1 compliance monitoring (41.6(1)) to Stage 2 monitoring as follows:

1. Systems required to conduct quarterly monitoring must start monitoring in the first full calendar quarter that includes the compliance date in the preceding table.

2. Systems that conducted IDSE monitoring and have an approved report and that are required to conduct monitoring at a frequency less than quarterly must start monitoring in the calendar month recommended in the approved IDSE report.

3. Systems that were not required to prepare an IDSE report under 41.6(2) must update their Stage 1 monitoring plan to meet the Stage 2 requirements and submit it to the department for approval six months prior to the compliance date in the preceding table.

(3) *Timing of initial determination of compliance under Stage 2.*

1. Systems required to conduct quarterly monitoring must make compliance calculations at the end of the fourth calendar quarter that follows the compliance date or earlier if the LRAA calculated based on fewer than four quarters of data would cause the MCL to be exceeded regardless of the results of subsequent sampling. Compliance determination must continue at the end of each subsequent quarter.

2. Systems required to conduct monitoring at a frequency that is less than quarterly must make compliance calculations beginning with the first compliance sample taken after the compliance date.

(4) *Monitoring and compliance.*

1. Systems required to monitor quarterly must calculate LRAAs for TTHM and HAA5 using the monitoring results collected under this subrule and determine that each LRAA does not exceed the MCL.

If the system does not complete the four consecutive quarters of monitoring, the system must calculate the compliance with the MCL based on the average of the available data from the most recent four quarters. If the system collects more than one sample per quarter at a monitoring location, all samples taken in the quarter at that location must be averaged to determine a quarterly average to be used for the LRAA calculation. If a system fails to monitor, it is in violation of the monitoring requirements for each quarter that a monitoring result would be used in calculating an LRAA.

2. Systems required to monitor yearly or triennially must determine that each sample collected is less than the MCL. If any sample exceeds the MCL, the system must comply with the requirements of 41.6(3) "e." If no sample exceeds the MCL, the sample result for each monitoring location is considered to be the LRAA for that monitoring location. If a system fails to monitor, it is in violation of the monitoring requirements for each quarter that a monitoring result would be used in calculating an LRAA.

3. The department may grant up to an additional 24 months for compliance with MCLs and operational evaluation levels if the system is required to make capital improvements in order to comply with an MCL.

(5) Any CWS or NTNC system that begins using water to which a disinfectant has been added, other than ultraviolet light, after the initial compliance dates for IDSE or Stage 2 compliance monitoring must comply with this subrule.

b. Monitoring plan. All systems must develop and implement a disinfection byproduct monitoring plan, which shall be kept on file at the system for review by the department and the public. The monitoring plan must contain the monitoring locations, monitoring dates, and compliance calculation procedures.

(1) If the system has an approved IDSE-standard monitoring plan (IDSE-SMP) report, that report contains all of the plan elements and meets this requirement.

(2) If the system does not have an approved IDSE-SMP report and does not have sufficient monitoring locations from its initial disinfection byproduct sampling plan, the system must identify additional locations by alternating selection of locations representing high TTHM levels and high HAA5 levels until the required number of compliance monitoring locations have been identified. The system must provide the rationale for identifying locations as having high levels of TTHM or HAA5.

(3) If the system does not have an approved IDSE-SMP report and has more monitoring locations from its initial Stage 1 disinfection byproduct sampling plan than the number of locations required under the Stage 2 compliance monitoring, the system must identify which locations it will use for compliance monitoring by alternating selection of locations representing high TTHM levels and high HAA5 levels until the required number of compliance monitoring locations have been identified.

(4) All plans must be reviewed by the system every three years and updated as system conditions change (such as changes in water quality or hydraulics, etc.).

1. A system may revise its monitoring plan to reflect changes in treatment, distribution system operations, and layout (including new service areas), to reflect other factors that may affect TTHM or HAA5 formation, or for department-approved reasons.

2. The system must consult with the department regarding the need for changes and the appropriateness of changes. The system must replace existing compliance monitoring locations that have the lowest LRAA with new locations that reflect the current distribution system locations with expected high TTHM or HAA5 levels.

3. The department may require modifications in the system's monitoring plan.

(5) Systems are also required to maintain the disinfectant and MRDL elements of the Stage 1 monitoring plan pursuant to 41.6(1) "c"(1)"6" and 567—paragraph 43.6(1) "c"(1)"5."

(6) All systems are required to have a valid disinfection byproducts monitoring plan prior to the start of compliance monitoring in 41.6(3) "a"(1).

c. Routine monitoring. Systems are required to start monitoring at the locations specified in the approved disinfection byproducts monitoring plan and on the schedule specified in 41.6(3) "a"(1). Each system must monitor the disinfection byproducts at the minimum number of locations identified in the Routine Monitoring table.

Routine Monitoring

| Source water type | Population size category | Monitoring frequency | Total number of distribution system monitoring location sites per monitoring period |
|-------------------|--------------------------|----------------------|---|
| SW/IGW | <500 | per year | 2 |
| | 500-3,300 | per quarter | 2 |
| | 3,301-9,999 | per quarter | 2 |
| | 10,000-49,999 | per quarter | 4 |
| | 50,000-249,999 | per quarter | 8 |
| | 250,000-999,999 | per quarter | 12 |
| Groundwater | <500 | per year | 2 |
| | 500-9,999 | per year | 2 |
| | 10,000-99,999 | per quarter | 4 |
| | 100,000-499,999 | per quarter | 6 |

(1) All systems must monitor during the month of highest disinfection byproduct concentrations.

(2) Systems on a quarterly monitoring frequency must collect samples for TTHM and HAA5 every 90 days at each monitoring location, except that SW/IGW systems serving 500 to 3,300 people may collect at one location as provided in 41.6(3)“c”(3). Each sample collected at each location must be analyzed for both TTHM and HAA5 components.

(3) Systems on an annual monitoring frequency and SW/IGW systems serving 500 to 3,300 people are required to collect TTHM and HAA5 samples at the locations with the highest TTHM and HAA5 concentrations, respectively. Each sample must be analyzed for both TTHM and HAA5 components. Sample collection is required from only one location if the highest TTHM concentration and the highest HAA5 concentration occur at the same location.

(4) Analytical methods. Systems must use an approved method listed in 41.6(1)“d”(2) for TTHM and HAA5 analyses pursuant to this subrule. Analyses must be conducted by laboratories certified for disinfection byproducts analyses in accordance with 567—Chapter 83.

d. Reduced monitoring. A system may reduce monitoring to the level specified in the Reduced Monitoring table anytime the locational running annual average is less than or equal to half the MCL for TTHM and HAA5 at all monitoring locations (i.e., less than or equal to 0.040 mg/L for TTHM and 0.030 mg/L for HAA5). Only data collected under the provisions of this rule may be used to qualify for reduced monitoring.

Reduced Monitoring

| Source water type | Population size category | Monitoring frequency ¹ | Distribution system monitoring location sites per monitoring period ² |
|-------------------|--------------------------|-----------------------------------|---|
| SW/IGW | <500 | per year | Monitoring may not be reduced |
| | 500-3,300 | per year | 1 sample per year at the same location if the highest TTHM and HAA5 measurements occurred at the same location and in the same quarter, analyzed for both TTHM and HAA5 |
| | 3,301-9,999 | per year | 2 samples: one at the location and during the quarter with the highest TTHM single measurement; one at the location and during the quarter with the highest HAA5 single measurement |
| | 10,000-49,999 | per quarter | 2 samples: one at the highest TTHM LRAA location and one at the highest HAA5 LRAA location |
| | 50,000-249,999 | per quarter | 4 samples: one sample each at the highest two TTHM LRAA locations and one sample each at the highest two HAA5 LRAA locations |

| Source water type | Population size category | Monitoring frequency ¹ | Distribution system monitoring location sites per monitoring period ² |
|-------------------|--------------------------|-----------------------------------|---|
| | 250,000-999,999 | per quarter | 6 samples: one sample each at the highest three TTHM LRAA locations and one sample each at the highest three HAA5 LRAA locations |
| Groundwater | <500 | every third year | 1 sample at the same location if the highest TTHM and HAA5 measurements occurred at the same location and in the same quarter, analyzed for both TTHM and HAA5 |
| | 500-9,999 | per year | 1 sample per year at the same location if the highest TTHM and HAA5 measurements occurred at the same location and in the same quarter, analyzed for both TTHM and HAA5 |
| | 10,000-99,999 | per year | 2 samples: one at the location and during the quarter with the highest TTHM single measurement; one at the location and during the quarter with the highest HAA5 single measurement |
| | 100,000-499,999 | per quarter | 2 samples: one at the highest TTHM LRAA location and one at the highest HAA5 LRAA location |

¹Systems on a quarterly monitoring frequency must collect the sample(s) every 90 days.

²Each sample must be analyzed for all TTHM and HAA5 components.

(1) Additional source water TOC requirement for SW/IGW systems. For SW/IGW systems, the source water running annual average TOC level, before any treatment, must be less than or equal to 4.0 mg/L at each treatment plant treating surface water or influenced groundwater, based on the monitoring conducted under 567—paragraph 43.6(2) “b,” in order to qualify for reduced monitoring.

(2) Continued reduced monitoring frequency. Systems may remain on a reduced monitoring frequency as long as they meet the following criteria. For SW/IGW systems, the source water annual average TOC level requirement in 41.6(3) “d”(1) must continue to be met.

1. A system with a quarterly reduced monitoring frequency may remain on reduced monitoring as long as the TTHM LRAA is less than or equal to 0.040 mg/L and the HAA5 LRAA is less than or equal to 0.030 mg/L at each monitoring location.

2. A system with an annual or triennial monitoring frequency may remain on reduced monitoring as long as each TTHM sample is less than or equal to 0.060 mg/L and each HAA5 sample is less than or equal to 0.045 mg/L.

(3) Return to routine monitoring frequency. Systems that cannot meet the requirements for reduced monitoring must resume routine monitoring according to 41.6(3) “c” or begin increased monitoring according to 41.6(3) “e.”

1. A system with a quarterly reduced monitoring frequency must resume routine monitoring if the LRAA from any location exceeds either 0.040 mg/L for TTHM or 0.030 mg/L for HAA5.

2. A system with an annual or triennial monitoring frequency must resume routine monitoring if the annual sample at any location exceeds either 0.060 mg/L for TTHM or 0.045 mg/L for HAA5.

3. Any SW/IGW system must resume routine monitoring if the running annual average source water TOC level, prior to any treatment, is more than 4.0 mg/L.

4. In addition, the department may require any system to resume routine monitoring at the department’s discretion.

(4) Remaining on reduced monitoring from Stage 1 to Stage 2 transition. A system may remain on reduced monitoring after the dates listed in 41.6(3) “a”(1) if all of the following three criteria are met. If the three criteria are not met, the system must return to routine monitoring.

1. Under the IDSE, the system qualified for a 40/30 certification or received a very small system waiver;

2. The system meets the reduced monitoring criteria of this paragraph; and
3. The system has not changed or added locations for disinfection byproduct monitoring from those used under the Stage 1 requirements in 41.6(1).

e. Increased monitoring.

(1) Systems that are monitoring annually or triennially must increase their monitoring frequency to quarterly if the following conditions are met.

1. Single result exceeds the TTHM or HAA5 MCL. A system that is monitoring annually or triennially must increase monitoring to quarterly at all locations if a single TTHM sample is greater than 0.080 mg/L or a single HAA5 sample is greater than 0.060 mg/L. The quarterly samples must be analyzed for both TTHM and HAA5 components.

2. Systems with a TTHM or HAA5 MCL violation. A system that is monitoring annually or triennially that is in violation of the MCL for TTHM or HAA5, based upon the LRAA, must increase monitoring to quarterly at all locations. The quarterly samples must be analyzed for both TTHM and HAA5 components. The LRAA is calculated based on four consecutive quarters of monitoring or based on fewer quarters of data if the MCL would be exceeded regardless of the monitoring results of subsequent quarters.

(2) Systems on a quarterly monitoring frequency during Stage 1 to Stage 2 transition. A system that was on increased monitoring under Stage 1 must remain on increased monitoring until the system qualifies for a return to routine monitoring under 41.6(3) "e"(3). The system must conduct the increased monitoring at the monitoring locations in the monitoring plan developed under 41.6(3) "b," beginning on the date identified in 41.6(3) "a"(1).

(3) Return to routine monitoring frequency. A system may return to routine monitoring once the system has conducted increased monitoring for at least four consecutive quarters and the LRAA for every monitoring location is less than or equal to 0.060 mg/L for TTHM and less than or equal to 0.045 mg/L for HAA5. The system may not have any monitoring violations during the most recent four consecutive quarters.

f. Operational evaluation level (OEL).

(1) TTHM operational evaluation level. The TTHM operational evaluation level is determined by the sum of the two previous quarters' TTHM results plus twice the current quarter's TTHM result, divided by 4 to determine an average. If that average exceeds 0.080 mg/L, the system has exceeded the TTHM operational evaluation level.

(2) HAA5 operational evaluation level. The HAA5 operational evaluation level is determined by the sum of the two previous quarters' HAA5 results plus twice the current quarter's HAA5 result, divided by 4 to determine an average. If that average exceeds 0.060 mg/L, the system has exceeded the HAA5 operational evaluation level.

(3) A system must calculate the operational evaluation level at any monitoring location that has a single analytical result in excess of the TTHM or HAA5 MCL in the analytical data used to calculate the current 12-month LRAA. A system must determine compliance with the OEL every quarter.

(4) Requirements when the operational evaluation level is exceeded. The system must conduct an operational evaluation and submit a written report of the evaluation to the department within 90 days after the system is notified of the analytical result that caused the system to exceed the operational evaluation level. The written report must be made available to the public upon request. The report must include an examination of system treatment and distribution operational practices, including storage tank operations, excess storage capacity, distribution system flushing, changes in source water or source water quality, and treatment changes or problems that may contribute to disinfection byproduct formation, and what steps could be considered to minimize future exceedances.

1. The system may make a request to the department to limit the scope of the examination if the system is able to identify the cause of the operational evaluation level exceedance. The 90-day deadline for submitting the written report cannot be extended.

2. The system must have department approval to limit the scope of the examination. The approval must be in writing and kept with the completed report.

g. Reporting. All systems required to comply with this rule must meet the reporting requirements pursuant to 567—paragraph 42.4(3) “d.”

h. Record keeping. All systems required to comply with this rule must retain the monitoring plans and analytical results as required by 567—paragraph 42.5(1) “h.”
[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.7(455B) Groundwater rule: sanitary survey, microbial source water monitoring, treatment technique.

41.7(1) General requirements.

a. Scope. The requirements of this rule constitute national primary drinking water regulations.

b. Applicability. This rule applies to all public water systems that use groundwater except that it does not apply to public water systems that combine all of their groundwater with surface water or with influenced groundwater prior to treatment under 567—43.5(455B). For the purposes of this rule, “groundwater system” is defined as any public water system meeting this applicability statement, including consecutive systems receiving finished groundwater. For the purposes of this rule, “4-log treatment of viruses” means treatment that includes inactivation, removal, or a department-approved combination of inactivation and removal before or at the first customer of 4-log (99.99%) of viruses.

c. General requirements. Systems subject to this rule must comply with the following requirements:

(1) Sanitary survey information requirements for all groundwater systems as described in 41.7(2).
(2) Microbial source water monitoring requirements for groundwater systems that do not treat all of their groundwater to at least 99.99 percent (4-log) treatment of viruses, using inactivation, removal, or a department-approved combination of inactivation and removal before or at the first customer, as described in 41.7(3).

(3) Treatment technique requirements, as described in 41.7(4), that apply to groundwater systems that have fecally contaminated source waters, as determined by source water monitoring conducted under 41.7(3), or that have significant deficiencies that are identified by the department. A groundwater system with fecally contaminated source water or with significant deficiencies subject to the treatment technique requirements of this rule must implement one or more of the following corrective action options:

1. Correct all significant deficiencies;
2. Provide an alternate source of water;
3. Eliminate the source of contamination; or
4. Provide treatment that reliably achieves at least 4-log treatment of viruses (using inactivation, removal, or a department-approved combination of 4-log virus inactivation and removal) before or at the first customer.

(4) Groundwater systems that provide at least 4-log treatment of viruses are required to conduct compliance monitoring to demonstrate treatment effectiveness, as described in 41.7(4).

(5) If requested by the department, groundwater systems must provide the department with any existing information that will enable the department to perform a hydrogeologic sensitivity assessment. For the purposes of this rule, “hydrogeologic sensitivity assessment” is a determination of whether groundwater systems obtain water from hydrogeologically sensitive settings.

(6) Certified laboratory requirements. Analyses under this rule shall only be conducted by laboratories that have been certified by the department and are in compliance with the requirements of 567—Chapter 83.

41.7(2) Sanitary surveys for groundwater systems. For the purposes of this rule, a “sanitary survey,” as conducted by the department in accordance with 567—subrule 43.1(7), includes but is not limited to the following: an on-site review of the water sources (identifying sources of contamination using results of source water assessments or other relevant information where available), facilities, equipment, operation, maintenance, and monitoring compliance of a public water system to evaluate the adequacy of the system, its sources and operations and the distribution of safe drinking water.

41.7(3) Groundwater source microbial monitoring and analytical methods. A groundwater system that has a department-approved 4-log treatment process for viruses and is fulfilling the requirements of 41.7(4) "b" is not required to conduct the triggered source water monitoring under 41.7(3) "a."

a. Triggered source water monitoring.

(1) General requirements. A groundwater system must conduct triggered source water monitoring if the conditions identified as follows exist:

1. The system does not provide at least 4-log treatment of viruses for each groundwater source; and

2. The system is notified that a sample collected under 41.2(1) "e" through 41.2(1) "i" is total coliform-positive, and the sample is not invalidated under 41.2(1) "d."

(2) Sampling requirements. A groundwater system must collect at least one groundwater source sample from each groundwater source in use at the time the total coliform-positive sample was collected under 41.2(1) "e" through 41.2(1) "i" that could have reasonably contributed to the positive sample. The source sample must be collected within 24 hours of when the system is notified of the total coliform-positive sample.

1. The department may extend the 24-hour time limit on a case-by-case basis if the system cannot collect the groundwater source water sample within 24 hours due to circumstances beyond the system's control. In the case of an extension, the department must specify how much time the system has to collect the sample.

2. A groundwater system serving 1,000 or fewer people may use a repeat sample collected from a groundwater source to meet both the requirements of 41.2(1) "j" and to satisfy the monitoring requirements of 41.7(3) "a" if:

- The department approves the use of *E. coli* as the fecal indicator,
- The system only has one groundwater source required to be sampled,
- The system has no treatment, and
- Should the source water sample be *E. coli*-positive, the system would incur an acute coliform bacteria maximum contaminant level violation, must comply with Tier 1 public notification requirements, and must also comply with the additional sample monitoring in 41.7(3) "a"(3).

(3) Additional samples required. Unless the department requires corrective action for a valid triggered source water sample that tested positive for the fecal indicator, the system must collect five additional source water samples from that same source within 24 hours of being notified of the fecal indicator-positive sample result.

(4) Further requirements for consecutive and wholesale systems.

1. In addition to the other requirements in 41.7(3) "a," a consecutive groundwater system that has a total coliform-positive sample collected under 41.2(1) "f" through 41.2(1) "i" must notify the wholesale system(s) within 24 hours of being notified of the total coliform-positive sample.

2. In addition to the other requirements in 41.7(3) "a," a wholesale groundwater system that does not provide the 4-log treatment of viruses as described in 41.7(3) must comply with the following:

- A wholesale groundwater system that receives notice from a consecutive system it serves that a sample collected under 41.2(1) "f" through 41.2(1) "i" is total coliform-positive must, within 24 hours of being notified, collect triggered sample(s) from its groundwater source(s) under 41.7(3) "a"(2) and analyze the sample(s) for a fecal indicator.

- If the triggered source sample(s) is fecal indicator-positive, the wholesale groundwater system must notify all consecutive systems served by that groundwater source of the fecal indicator-positive result within 24 hours of being notified of the result and must collect the required additional five samples from the source within 24 hours under 41.7(3) "a"(3).

(5) Exceptions to the triggered source water monitoring requirements. A groundwater system is not required to comply with the source water monitoring requirements of 41.7(3) "a" if either of the following conditions exists:

1. The department determines and documents in writing that the total coliform-positive sample collected under 41.2(1) "e" through 41.2(1) "i" is caused by a distribution system deficiency; or

2. The total coliform-positive sample collected under 41.2(1) “e” through 41.2(1) “i” is collected at a location that meets department criteria for distribution system conditions that will cause total coliform-positive samples.

b. Assessment source water monitoring. If directed by the department, groundwater systems must conduct assessment source water monitoring that meets department-determined requirements for such monitoring. A groundwater system conducting assessment source water monitoring may use a triggered source water sample collected under 41.7(3) “a”(2) to meet the requirements of this paragraph. Department-determined assessment source water monitoring requirements may include:

(1) Collection of a total of 12 groundwater source samples that represent each month the system provides groundwater to the public;

(2) Collection of samples from each well unless the system obtains written department approval to conduct monitoring at one or more wells within the groundwater system that are representative of multiple wells used by that system and that draw water from the same hydrogeologic setting;

(3) Collection of a standard sample volume of at least 100 mL for fecal indicator analysis regardless of technical indicator or analytical method used;

(4) Analysis of all groundwater source samples using one of the analytical methods listed in 41.7(3) “c” for the presence of *E. coli*, enterococci, or coliphage;

(5) Collection of groundwater source samples at a location before any treatment of the groundwater source unless the department approves a sampling location after treatment; and

(6) Collection of groundwater source samples at the well itself unless the system’s configuration does not allow for sampling at the well itself and the department approves an alternate sampling location that is representative of the water quality of that well.

c. Analytical methods.

(1) A groundwater system subject to the source water monitoring requirements of this rule must collect a standard sample volume of at least 100 mL for fecal indicator analysis regardless of the fecal indicator or analytical method used.

(2) A groundwater system must analyze all groundwater source samples collected under 567—41.7(455B) using one of the analytical methods in the following table for the presence of *E. coli*, enterococci, or coliphage.

Analytical Methods for Source Water Monitoring

Analyses must be conducted in accordance with the documents listed below. The Director of the Federal Register approves the incorporation by reference of the documents listed in footnotes 2 through 11 in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies of the documents may be obtained from the sources listed below. Copies may be inspected at EPA's Drinking Water Docket, EPA West, 1301 Constitution Avenue, NW, EPA West Room B102, Washington, DC 20460; (telephone: (202)566-2426); or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202)741-6030, or go to: www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. The address for EPA's Water Resource Center, referenced in several of the footnotes, is EPA Water Resource Center (RC-4100T), 1200 Pennsylvania Avenue, NW, Washington, DC 20460.

¹The time from sample collection to initiation of analysis may not exceed 30 hours. The groundwater system is encouraged but is not required to hold samples below 10°C during transit.

²Methods are described in Standard Methods for the Examination of Water and Wastewater, 20th edition (1998), and copies may be obtained from the American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710.

d. Invalidation of a fecal indicator-positive groundwater source sample.

(1) A groundwater system may obtain invalidation from the department of a fecal indicator-positive groundwater source sample collected under 41.7(3) "a" only under these conditions:

1. The system provides the department with written notice from the laboratory that improper sample analysis occurred; or

2. The department determines and documents in writing that there is substantial evidence that a fecal indicator-positive groundwater source sample is not related to source water quality.

(2) If the department invalidates a fecal indicator-positive groundwater source sample, the system must collect another source water sample under 41.7(3) "a" within 24 hours of being notified by the department of its invalidation decision. The sample must be analyzed for the same fecal indicator using the analytical methods in 41.7(3) "c." The department may extend the 24-hour time limit on a case-by-case basis if the system cannot collect the source water sample within 24 hours due to circumstances beyond the system's control. In the case of an extension, the department must specify how much time the system has to collect the sample.

e. Sampling location.

(1) Any groundwater source sample required under 41.7(3) "a" must be collected at a location prior to any treatment of the groundwater source unless the department approves a sampling location after treatment.

(2) If the system's configuration does not allow for sampling at the well itself, the system may collect a sample at a department-approved location to meet the requirements of 41.7(3) "a" if the sample is representative of the water quality of that well.

f. New sources. A groundwater system that places a new groundwater source into service must conduct assessment source water monitoring as directed by the department to include those items listed in 41.7(3) "b"(3) to (6). If directed by the department, the system must begin monitoring before the groundwater source is used to provide water to the public.

g. Public notification. A system with a groundwater source sample collected under 41.7(3) "a" or 41.7(3) "b" that is fecal indicator-positive and that is not invalidated under 41.7(3) "d," including consecutive systems served by the groundwater source, must conduct Tier 1 public notification under 567—subrule 42.1(2).

h. Monitoring violations. Failure to meet the requirements of 41.7(3) “a” through 41.7(3) “f” is a monitoring violation and requires the system to provide Tier 3 public notification under 567—subrule 42.1(4).

41.7(4) Treatment technique requirements for groundwater systems.

a. Groundwater systems with significant deficiencies or source water fecal contamination.

(1) The treatment technique requirements of this subrule, 41.7(4), must be met by groundwater systems when a significant deficiency is identified or when a groundwater source sample collected under 41.7(3) “a”(3) is fecal indicator-positive.

(2) If directed by the department, a groundwater system with a groundwater source sample collected under 41.7(3) “a”(2), 41.7(3) “a”(4), or 41.7(3) “b” that is fecal indicator-positive must comply with the treatment technique requirements of 41.7(4).

(3) When a significant deficiency is identified at a surface water or influenced groundwater system that also uses a groundwater source not under the influence of surface water, the system must comply with provisions of 41.7(4) “a” except in cases where the department determines that the significant deficiency is in a portion of the distribution system that is served solely by the surface water or influenced groundwater source.

(4) Unless the department directs the groundwater system to implement a specific corrective action, the groundwater system must consult with the department regarding the appropriate corrective action within 30 days of receiving written notice from the department of a significant deficiency, written notice from a laboratory that a groundwater source sample collected under 41.7(3) “a”(3) was found to be fecal indicator-positive, or direction from the department that a fecal indicator-positive sample collected under 41.7(3) “a”(2), 41.7(3) “a”(4), or 41.7(3) “b” requires corrective action. For the purposes of 41.7(4), significant deficiencies include, but are not limited to, defects in design, operation, or maintenance, or a failure or malfunction of the sources, treatment, storage, or distribution system that the department determines to be causing, or have potential for causing, the introduction of contamination into the water delivered to consumers.

(5) Within 120 days, or earlier if directed by the department, of receiving written notification from the department of a significant deficiency, written notice from a laboratory that a groundwater source sample collected under 41.7(3) “a”(3) was found to be fecal indicator-positive, or direction from the department that a fecal indicator-positive sample collected under 41.7(3) “a”(2), 41.7(3) “a”(4), or 41.7(3) “b” requires corrective action, the groundwater system must either:

1. Have completed corrective action in accordance with applicable department plan review processes or other department guidance or direction, if any, including department-specified interim measures; or

2. Be in compliance with a department-approved corrective action plan and schedule subject to the specified conditions as follows:

- Any subsequent modifications to a department-approved corrective action plan and schedule must also be approved by the department; and

- If the department specifies interim measures for protection of the public health pending department approval of the corrective action plan and schedule, or pending completion of the corrective action plan, the system must comply with these interim measures as well as with any schedule specified by the department.

(6) Corrective action alternatives. Groundwater systems that meet the conditions of 41.7(4) “a”(1) or (2) must implement one or more of the following corrective action alternatives:

1. Correct all significant deficiencies;

2. Provide an alternate source of water;

3. Eliminate the source of contamination; or

4. Provide treatment that reliably achieves at least 4-log treatment of viruses for the groundwater source.

(7) Special notice to the public of significant deficiencies or source water fecal contamination.

1. In addition to the applicable Tier 1 public notification requirements of 567—subrule 42.1(2), a community groundwater system that receives notice from the department of a significant

deficiency or notification of a fecal indicator-positive groundwater source sample that is not invalidated by the department under 41.7(3)“d” must inform the public served by the water system under 567—subparagraph 42.3(3)“h”(5) of the fecal indicator-positive source sample or of any significant deficiency that has not been corrected. The system must continue to inform the public annually until the significant deficiency is corrected or the fecal contamination in the groundwater source is determined by the department to be corrected under 41.7(3)“a”(5).

2. In addition to the applicable Tier 1 public notification requirements of 567—subrule 42.1(2), a noncommunity groundwater system that receives notice from the department of a significant deficiency must inform the public served by the water systems in a manner approved by the department of any significant deficiency that has not been corrected within 12 months of being notified by the department or earlier if directed by the department. The system must continue to inform the public annually until the significant deficiency is corrected. The information must include:

- The nature of the significant deficiency and the date the significant deficiency was identified by the department;
- The department-approved plan and schedule for correction of the significant deficiency, including interim measures, progress to date, and any interim measures completed; and
- For systems with a large proportion of non-English speaking consumers, as determined by the department, information in the applicable language(s) regarding the importance of the notice or a telephone number or address where consumers may contact the system to obtain a translated copy of the notice or assistance in the appropriate language.

3. If directed by the department, a noncommunity water system with significant deficiencies that have been corrected must inform its customers of the significant deficiencies, how the deficiencies were corrected, and the dates of correction under 41.7(4)“a”(7)“2.”

b. Compliance monitoring.

(1) Existing groundwater sources. A groundwater system that provides at least 4-log treatment of viruses must make a written application to the department in order to avoid the source water monitoring requirements of 41.7(3). Notification to the department must include engineering, operational, or other information that the department requests to evaluate the submission. The department must approve the 4-log request in writing before the system can avoid the groundwater source monitoring requirements. The system’s operation permit will include the mandatory operational requirements for the approved 4-log virus treatment. If the system subsequently discontinues 4-log treatment of viruses of a groundwater source or no longer wishes to be exempt from the groundwater source monitoring requirements, the system must conduct groundwater source monitoring as required under 41.7(3).

(2) New groundwater sources. A groundwater system that places a groundwater source in service that is not required to meet the source water monitoring requirements of 41.7(4) because the system provides at least 4-log treatment of viruses for the groundwater source must comply with the following requirements:

1. The system must notify the department in writing that it provides at least 4-log treatment of viruses for the groundwater source. Notification to the department must include engineering, operational, or other information that the department requests to evaluate the submission. The contact time values for inactivation of viruses using free chlorine, chlorine dioxide, and ozone are listed in 567—Chapter 43, Appendix C. No CT table is provided for chloramines and total chlorine because the CT values would be prohibitively high for groundwater systems.

2. The system must conduct compliance monitoring as required under 41.7(4)“b”(3) within 30 days of placing the source in service.

3. The system must conduct groundwater source monitoring under 41.7(3) if the system subsequently discontinues 4-log treatment of viruses for the groundwater source.

(3) Monitoring requirements. A groundwater system subject to the requirements of 41.7(4)“a” and 41.7(4)“b”(1) and (2) must monitor the effectiveness and reliability of treatment for that groundwater source before or at the first customer as follows:

1. Chemical disinfection.

- A groundwater system serving more than 3,300 people must continuously monitor the residual disinfectant concentration, using analytical methods specified in 567—subparagraph 43.5(4)“a”(5), at a location approved by the department and must record the lowest residual disinfectant concentration each day that water from the groundwater source is served to the public. The groundwater system must maintain the department-determined minimum residual disinfectant concentration every day the groundwater system serves water from the groundwater source to the public. If there is a failure in the continuous monitoring equipment, the groundwater system must conduct grab sampling every four hours until the continuous monitoring equipment is returned to service. The system must resume continuous residual disinfectant monitoring within 14 days.

- A groundwater system serving 3,300 or fewer people must monitor the residual disinfectant concentration using analytical methods specified in 567—subparagraph 43.5(4)“a”(5) at a location approved by the department and must record the residual disinfectant concentration each day that water from the groundwater source is served to the public. The groundwater system must maintain the department-determined minimum residual disinfectant concentration every day the groundwater system serves water from the groundwater source to the public. The groundwater system must take a daily grab sample during the hour of peak flow or at another time specified by the department. If any daily grab sample measurement falls below the department-determined minimum residual disinfectant concentration, the groundwater system must take follow-up samples every four hours until the residual disinfectant concentration is restored to the department-determined minimum level. Alternatively, a groundwater system that serves 3,300 or fewer people may monitor continuously and meet the requirements of 41.7(4)“b”(3)“1,” first bulleted paragraph.

2. Membrane filtration. A groundwater system that uses membrane filtration to meet the requirements of 41.7(4)“b” to provide at least 4-log treatment of viruses must monitor the membrane filtration process in accordance with all department-specified monitoring requirements and must operate the membrane filtration in accordance with all department-specified compliance requirements. A groundwater system that uses membrane filtration is in compliance with the requirement to achieve at least 4-log removal of viruses when:

- The membrane has an absolute molecular weight cut-off (MWCO), or an alternate parameter that describes the exclusion characteristics of the membrane, that can reliably achieve at least 4-log removal of viruses;

- The membrane process is operated in accordance with department-specified compliance requirements; and

- The integrity of the membrane is intact.

3. Alternative treatment. A groundwater system that uses a department-approved alternative treatment to meet the requirements of 41.7(4)“b” by providing at least 4-log treatment of viruses must:

- Monitor the alternative treatment in accordance with all department-specified monitoring requirements; and

- Operate the alternative treatment in accordance with all compliance requirements that the department determines to be necessary to achieve at least 4-log treatment of viruses.

c. Discontinuing treatment. A groundwater system may discontinue 4-log treatment of viruses for a groundwater source if the department determines and documents in writing that 4-log treatment of viruses is no longer necessary for that groundwater source. A system that discontinues 4-log treatment of viruses is subject to the source water monitoring and analytical methods requirements of 41.7(3).

d. Monitoring violation. Failure to meet the monitoring requirements of 41.7(4)“b” is a monitoring violation and requires the groundwater system to provide Tier 3 public notification under 567—subrule 42.1(4).

41.7(5) Treatment technique violations for groundwater systems. A groundwater system must give Tier 2 public notification under 567—subrule 42.1(3) for the treatment technique violations specified in 41.7(5)“a,” 41.7(5)“b,” and 41.7(5)“c.”

a. Significant deficiency. A groundwater system with a significant deficiency is in violation of the treatment technique requirement if, within 120 days (or earlier if directed by the department) of receiving written notice from the department of the significant deficiency, the system:

(1) Does not complete corrective action in accordance with any applicable department plan review processes or other department guidance and direction, including department-specified interim actions and measures; or

(2) Is not in compliance with a department-approved corrective action plan and schedule.

b. Fecal indicator-positive source sample. Unless the department invalidates a fecal indicator-positive groundwater source sample under 41.7(3)“d”(1), a groundwater system is in violation of the treatment technique requirement if, within 120 days (or earlier if directed by the department) of meeting the conditions of 41.7(4)“a”(1) or (2), the system:

(1) Does not complete corrective action in accordance with any applicable department plan review processes or other department guidance and direction, including department-specified interim measures; or

(2) Is not in compliance with a department-approved corrective action plan and schedule.

c. Failure to maintain 4-log treatment. A groundwater system subject to the requirements of 41.7(4)“b”(3) that fails to maintain at least 4-log treatment of viruses for a groundwater source is in violation of the treatment technique requirement if the failure is not corrected within four hours of the determination that the system is not maintaining at least 4-log treatment of viruses before or at the first customer.

41.7(6) Reporting and record keeping for groundwater systems.

a. Reporting. In addition to meeting the requirements of 567—subrule 42.4(1), a groundwater system regulated under this rule must provide the following information to the department:

(1) A groundwater system conducting compliance monitoring under 41.7(4)“b” must notify the department any time the system fails to meet any of the department-specified requirements for 4-log virus treatment including, but not limited to, minimum residual disinfectant concentration, membrane operating criteria or membrane integrity, and alternative treatment operating criteria, if operation in accordance with the criteria or requirements is not restored within four hours. The groundwater system must notify the department as soon as possible, but in no case later than the end of the next business day.

(2) After completing any corrective action under 41.7(4)“a,” a groundwater system must notify the department within 30 days of completion of the corrective action.

(3) If a groundwater system subject to the requirements of 41.7(3)“a” does not conduct source water monitoring under 41.7(3)“a”(5)“2,” the system must provide documentation to the department within 30 days of the total coliform-positive sample that it met the department’s criteria.

b. Record keeping. In addition to the requirements in 567—subrule 42.5(1), a groundwater system regulated under this rule must maintain the following information in its records:

(1) Documentation of corrective actions, which must be kept for a period of not less than ten years.

(2) Documentation of notice to the public as required under 41.7(4)“a”(7), which must be kept for a period of not less than three years.

(3) Records of decisions under 41.7(3)“a”(5)“2” and records of invalidation of fecal indicator-positive groundwater source samples under 41.7(3)“d”(1), both of which must be kept for a period of not less than five years.

(4) For consecutive systems, documentation of notification to the wholesale system(s) of total coliform-positive samples that are not invalidated under 41.2(1)“d,” which must be kept for a period of not less than five years.

(5) For systems, including wholesale systems, that are required to perform compliance monitoring under 41.7(4)“b”(1), the following documentation must be maintained:

1. Records of the department-specified minimum disinfectant residual, which must be kept for a period of not less than ten years.

2. Records of the lowest daily residual disinfectant concentration and records of the date and duration of any failure to maintain the department-prescribed minimum residual disinfectant concentration for a period of more than four hours, both of which must be kept for a period of not less than five years.

3. Records of department-specified compliance requirements for membrane filtration and of parameters specified by the department for department-approved alternative treatment and records of

the date and duration of any failure to meet the membrane operating, membrane integrity, or alternative treatment operating requirements for more than four hours. Documentation shall be kept for a period of not less than five years.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.8(455B) Radionuclides.

41.8(1) Radionuclides.

a. Applicability.

(1) This rule applies to all community public water supplies, and specifies the radionuclide maximum contaminant levels, analytical methodology requirements, and monitoring requirements. The radionuclide reporting requirements are listed in 567—subrule 42.4(1), the public notice requirements are listed in rule 567—42.1(455B), and the best available technology is listed in 567—subparagraph 43.3(10)“b”(3). All CWSs must comply with the requirements and maximum contaminant levels for gross alpha particle activity, radium-226, radium-228, uranium, beta particle activity, and photon emitter radioactivity. Only those CWSs designated by the department to be vulnerable to man-made radioactivity contamination are required to monitor for beta particle activity and photon emitter radioactivity. To determine whether a system is vulnerable to man-made nuclear radioactivity, the department will evaluate proximity to a nuclear facility, source water, historical analytical data, ongoing surveillance data from the nuclear facility, and any other factor considered by the department to be relevant to the vulnerability determination.

(2) Compliance dates. Community water systems must comply with the MCLs listed in 41.8(1)“b”(1) beginning December 8, 2003. Compliance shall be determined in accordance with 41.8(1)“c” through 41.8(1)“f.” Compliance with the radionuclides reporting requirements is required by December 8, 2003. All CWSs must conduct initial monitoring to determine compliance with 41.8(1)“b”(1) by December 31, 2007.

b. Maximum contaminant levels for radionuclides.

(1) Gross alpha particle activity, radium-226, radium-228, and uranium MCLs. The following table specifies the MCLs for gross alpha particles, radium, and uranium radionuclides:

| Contaminant | Maximum Contaminant Level |
|---|---------------------------|
| Gross alpha particle activity, including Radium-226 but excluding radon and uranium | 15 pCi/L |
| Combined Radium-226 and Radium-228 | 5 pCi/L ¹ |
| Uranium | 30 µg/L |

¹The combined radium-226 and radium-228 value is determined by the addition of the results of the analysis for radium-226 and the analysis for radium-228.

(2) Beta particle activity and photon radioactivity MCLs.

1. The average annual concentration of beta particle and photon radioactivity from man-made radionuclides in drinking water must not produce an annual dose equivalent to the total body or any internal organ greater than 4 millirem/year.

2. Except for the radionuclides listed below, the concentration of man-made radionuclides causing 4 millirems total body or organ dose equivalents must be calculated on the basis of 2 liter per day drinking water intake, using the 168-hour data lists in “Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and in Water for Occupational Exposure,” National Bureau of Standards Handbook 69 as amended August 1963, United States Department of Commerce. If two or more radionuclides are present, the sum of their annual dose equivalent to the total body or to any organ shall not exceed 4 millirems/year.

Average Annual Concentrations Assumed to Produce a
Total Body or Organ Dose of 4 mrem/year

| Radionuclide | Critical Organ | Concentration |
|--------------|----------------|---------------|
| Strontium-90 | Bone marrow | 8 pCi/L |
| Tritium | Total body | 20,000 pCi/L |

c. Compliance determinations. Compliance with 41.8(1)“b” will be determined based on the analytical results obtained at each sampling point. If one sampling point is in violation of an MCL, the system is in violation of the MCL. If the system is in violation of an MCL, the supplier of the water is required to give notice to the department in accordance with 567—subrule 42.4(1) and to notify the public as required by 567—42.1(455B).

(1) Detection limits. For the purposes of monitoring gross alpha particle activity, radium-226, radium-228, uranium, and beta particle and photon radioactivity in drinking water, “detection limit” is defined in this subparagraph.

1. For the purpose of monitoring radioactivity concentration in drinking water, the required sensitivity of the radioanalysis is defined in terms of a detection limit. The detection limit shall be that concentration which can be counted with a precision of plus or minus 100 percent at the confidence level (1.960 sigma where sigma is the standard deviation of the net counting rate of the sample).

2. To determine compliance with 41.8(1)“b”(1), the detection limit shall not exceed the following concentrations:

Detection Limits for Gross Alpha Particle Activity,
Radium-226, Radium-228, and Uranium

| Contaminant | Detection Limit |
|-------------------------------|-----------------|
| Gross alpha particle activity | 3 pCi/L |
| Radium-226 | 1 pCi/L |
| Radium-228 | 1 pCi/L |
| Uranium | 1 µg/L |

3. To determine compliance with 41.8(1)“b”(2), the detection limits shall not exceed the following concentrations:

Detection Limits for Man-Made
Beta Particle and Photon Emitters

| Contaminant | Detection Limit |
|---------------------|------------------------------|
| Gross beta | 4 pCi/L |
| Cesium-134 | 10 pCi/L |
| Iodine-131 | 1 pCi/L |
| Strontium-89 | 10 pCi/L |
| Strontium-90 | 2 pCi/L |
| Tritium | 1,000 pCi/L |
| Other radionuclides | 1/10 of the applicable limit |

(2) Compliance determination.

1. For systems monitoring more than once per year (i.e., quarterly), compliance with the MCL is determined by a running annual average at each sampling point. If the average of any sampling point is greater than the MCL, the system is immediately in violation of the MCL. If any sample result causes the

running annual average to exceed the MCL at any sample point, the system is immediately in violation of the MCL.

2. Systems monitoring annually or less frequently (i.e., one-, three-, six-, or nine-year frequency), and whose sample result exceeds the MCL, must revert to quarterly sampling for that contaminant during the next quarter. Systems are required to conduct quarterly monitoring only at the source/entry point at which the sample was collected and for the specific contaminant that triggered the system into the increased monitoring frequency. Systems triggered into increased monitoring will not be considered in violation of the MCL until they have completed one year of quarterly sampling. If any sample result causes the running annual average to exceed the MCL at any sample point, the system is immediately in violation of the MCL.

3. Systems must include all samples taken and analyzed under the provisions of this rule in determining compliance, even if that number is greater than the minimum required by the department.

4. If a system does not collect all required samples when compliance is based on a running annual average of quarterly samples, compliance will be based on the running average of the samples collected.

5. If a sample result is less than the detection limit, a value of zero will be used to calculate the annual average.

6. The department may invalidate results of obvious sampling or analytical errors.

7. Averaging and significant figures. To judge compliance with the maximum contaminant levels listed in 41.8(1)“b,” averages of data shall be used and shall be rounded to the same number of significant figures as the maximum contaminant level for the substance in question.

(3) The department will determine compliance or initiate enforcement action based upon analytical results or other information compiled by department staff or the department’s designee.

(4) The department may assign additional requirements as it deems necessary to protect the public health, including public notification requirements.

d. Analytical methodology for radionuclides. Analysis for the following contaminants shall be conducted to determine compliance with 41.8(1)“b” in accordance with the methods in the following table, or equivalent methods determined in accordance with 567—41.12(455B).

(1) Radionuclide Analytical Methodology Table.

RADIONUCLIDE ANALYTICAL METHODOLOGY

(2) Method references for other radionuclides. When the identification and measurement of radionuclides other than those listed in 41.8(1) “b” are required, the following references are to be used, except in cases where alternative methods have been approved in accordance with 567—41.12(455B).

1. “Procedures for Radiochemical Analysis of Nuclear Reactor Aqueous Solutions,” H. L. Krieger and S. Gold, EPA-R4-73-014, Environmental Protection Agency, Cincinnati, Ohio 45268 (May 1973).

2. "HASL Procedure Manual," edited by John H. Harley. HASL 300, ERDA Health and Safety Laboratory, New York, NY (1973).

e. Monitoring requirements for gross alpha, radium-226, radium-228, and uranium.

(1) General requirements.

1. Monitoring frequency and confirmation samples. The department may require more frequent monitoring than specified in this paragraph. The department may require confirmation samples at its discretion. The results of the initial and confirmation samples will be averaged for use in compliance determinations.

2. Monitoring period. Each PWS shall monitor during the time period designated by the department in the operation permit.

(2) Applicability and sampling locations.

1. Existing systems and sources. All existing CWSs must sample at every entry point to the distribution system that is representative of all sources being used under normal operating conditions. The system must take each sample at the same source/entry sampling point, unless conditions make another alternate sampling point more representative of each source, or the department has designated a distribution system location, in accordance with 41.8(1) "e"(3)"4." The department must approve any alternate sampling point for radionuclides.

2. New systems and sources. All new CWSs or CWSs that use a new source of water must begin to conduct initial monitoring for the new system or source within the first calendar quarter after initiating use of the system or source. More frequent monitoring must be conducted by the CWS when required by the department, in the event of possible contamination or when changes in the distribution system or treatment processes occur which may increase the concentration of radioactivity in finished water.

(3) Initial monitoring. Systems must conduct initial monitoring for gross alpha particle activity, radium-226, radium-228, and uranium as follows. If the average of the initial monitoring results for a source/entry point is above the MCL, the system must collect and analyze quarterly samples at that source/entry point until the system has results from four consecutive quarters that are at or below the MCL, unless the system enters into another schedule as part of a formal compliance agreement with the department.

1. Systems without historical monitoring data. Systems without historical monitoring data must collect four consecutive quarterly samples at all source/entry sampling points before December 31, 2007. The department may waive the final two quarters of initial monitoring from a source/entry point if the results of the samples from the previous two quarters are below the detection limit.

2. Systems with historical monitoring data and one source/entry point. Systems with only one source/entry point may use historical monitoring data collected between January 1, 2000, and December 31, 2003, from either the representative point in the distribution system or the source/entry point to satisfy the initial monitoring requirement.

3. Systems with historical source/entry point monitoring data and multiple source/entry points. Systems with multiple source/entry points that also have appropriate historical monitoring data for each source/entry point may use the monitoring data collected between January 1, 2000, and December 31, 2003, to satisfy the initial monitoring requirement.

4. Systems with historical distribution system monitoring data and multiple source/entry points. Systems with appropriate historical data for a representative point in the distribution system and multiple source/entry points may use the monitoring data collected between January 1, 2000, and December 31, 2003, provided that the department determines that the historical data satisfactorily demonstrates that each source/entry point is expected to be in compliance based upon the historical data and reasonable assumptions about the variability of contaminant levels between source/entry points. The department must make a written finding indicating how the data conforms to these requirements, in order for the data to satisfy the initial monitoring requirements.

(4) Reduced monitoring. The department may allow a CWS to reduce the future frequency of monitoring from once every three years to once every six or nine years at each source/entry point, based on the following criteria. The samples collected during the reduced monitoring period must be used to determine the monitoring frequency for subsequent monitoring periods (e.g., if a system's source/entry

point is on a nine-year frequency, and the sample result is above half of the MCL, then the next monitoring frequency for that source/entry point is three years). If a system has a monitoring result that exceeds the MCL while on reduced monitoring, the system must collect and analyze quarterly samples at that source/entry point until the system has results from four consecutive quarters that are below the MCL, unless the system enters into another schedule as part of a formal compliance agreement with the department.

1. Nine-year frequency. If the average of the initial monitoring results for each contaminant is below the detection limit specified in 41.8(1)“c”(1)“2,” the system must collect and analyze for that contaminant using at least one sample at that source/entry point every nine years.

2. Six-year frequency. If the average of the initial monitoring results for gross alpha particle activity, uranium, and combined radium-226 and radium-228 is at or above the detection limit and at or below half the MCL for that contaminant, the system must collect and analyze for that contaminant using at least one sample at that source/entry point every six years. The analytical results for radium-226 and radium-228 must be added together to yield the combined result.

3. Three-year frequency. If the average of the initial monitoring results for gross alpha particle activity, uranium, and combined radium-226 and radium-228 is above half of the MCL and at or below the MCL for that contaminant, the system must collect and analyze for that contaminant using at least one sample at that source/entry point every three years. The analytical results for radium-226 and radium-228 must be added together to yield the combined result.

(5) Composite samples. To fulfill quarterly monitoring requirements for gross alpha particle activity, radium-226, radium-228, or uranium, a system may composite up to four consecutive quarterly samples from a single entry point if analysis is done within one year of the first sample. The analytical results from the composited samples will be considered by the department as the average analytical result to determine compliance with the MCLs and to determine the future monitoring frequency. If the analytical result from the composited sample is greater than half of the MCL, the department may require additional quarterly samples from the system before the system will be allowed to sample under a reduced monitoring schedule.

(6) Data substitution using gross alpha particle activity results.

1. A gross alpha particle activity measurement may be substituted for the required uranium measurement provided that the measured gross alpha particle activity does not exceed 15 pCi/L.

2. The gross alpha particle activity measurement shall have a confidence interval of 95 percent (1.65 sigma, where sigma is the standard deviation of the net counting rate of the sample) for uranium. When a system uses a gross alpha particle activity measurement in lieu of a uranium measurement, the gross alpha particle activity analytical result will be used to determine the future monitoring frequency for uranium. If the gross alpha particle activity result is less than the detection limit, half the detection limit will be used to determine compliance and the future monitoring frequency.

f. Monitoring requirements for beta particle and photon emitters. To determine compliance with the maximum contaminant levels in 41.8(1)“b”(2) for beta particle and photon radioactivity, a system must monitor at a frequency specified in 41.8(1)“f.”

(1) General requirements.

1. Monitoring frequency and confirmation samples. The department may require more frequent monitoring than specified in 41.8(1)“f.” The department may require confirmation samples at its discretion. The results of the initial and confirmation samples will be averaged for use in compliance determinations.

2. Monitoring period. Each PWS shall monitor during the time period designated by the department in the operation permit.

(2) Systems designated by the department as vulnerable to man-made radioactivity.

1. Initial monitoring. Systems that have been determined by the department to be vulnerable to man-made radioactivity must collect quarterly samples for beta emitters and annual samples for tritium and strontium-90 at each entry point to the distribution system, beginning within one quarter after being notified by the department of this requirement. Systems already required to conduct beta particle and

photon radioactivity monitoring must continue to sample until the department removes the monitoring requirement.

2. Reduced monitoring. The department may reduce the frequency of monitoring at that sampling point to once every three years, if the gross beta particle activity minus the naturally occurring potassium-40 beta particle activity at a source/entry point has a running annual average (computed quarterly) of less than or equal to 50 pCi/L (screening level). Systems must collect all of the samples required in 41.8(1) "f"(2)"1" during the reduced monitoring period.

3. Data substitution. For a system in the vicinity of a nuclear facility, the department may allow the system to utilize environmental surveillance data collected by the nuclear facility in lieu of monitoring at the system's source/entry point(s), where the department determines such data is applicable to a particular water system. In the event that there is a release from a nuclear facility, systems which are using surveillance data must begin monitoring at the system's source/entry point(s) in accordance with 41.8(1) "f"(2).

(3) Systems determined to utilize waters contaminated by effluents from nuclear facilities.

1. Initial monitoring. Systems designated by the department as utilizing water contaminated by effluents from nuclear facilities must sample for beta particle and photon radioactivity. Systems must collect quarterly samples for beta emitters and iodine-131 and annual samples for tritium and strontium-90 at each entry point to the distribution system, beginning within one quarter after being notified by the department. Systems already designated by the department as systems using waters contaminated by effluents from nuclear facilities must continue to sample until the department removes the sampling requirement.

- Gross beta particle activity. Quarterly monitoring for gross beta particle activity shall be based on the analysis of monthly samples or the analysis of a composite of three monthly samples. The former is recommended.

- Iodine-131. A composite of five consecutive daily samples shall be analyzed once each quarter for iodine-131. The department may require more frequent monitoring when iodine-131 is identified in the finished water.

- Strontium-90 and tritium. Annual monitoring for strontium-90 and tritium shall be conducted by means of the analysis of a composite of four consecutive quarterly samples or analysis of four quarterly samples. The latter procedure is recommended.

2. Reduced monitoring. If the gross beta particle activity minus the naturally occurring potassium-40 beta particle activity at a sampling point has a running annual average (computed quarterly) less than or equal to 15 pCi/L (screening level), the department may reduce the frequency of monitoring at that sampling point to every three years. Systems must collect all samples required in 41.8(1) "f"(3) during the reduced monitoring period.

3. Data substitution. For systems in the vicinity of a nuclear facility, the department may allow the CWS to utilize environmental surveillance data collected by the nuclear facility in lieu of monitoring at the system's entry point(s), where the department determines such data is applicable to a particular water system. In the event that there is a release from a nuclear facility, systems which are using surveillance data must begin monitoring at the CWS source/entry point in accordance with 41.8(1) "f"(2)"1."

(4) Monitoring frequency waiver. A CWS designated by the department to monitor for beta particle and photon radioactivity cannot apply to the department for a waiver from the monitoring frequencies specified in 41.8(1) "f"(2) or (3).

(5) Community water systems may analyze for naturally occurring potassium-40 beta particle activity from the same or an equivalent sample used for the gross beta particle activity analysis. Systems are allowed to subtract the potassium-40 beta particle activity value from the total gross beta particle activity value to determine if the screening level is exceeded. The potassium-40 beta particle activity must be calculated by multiplying elemental potassium concentrations (in mg/L) by a factor of 0.82.

(6) If the gross beta particle activity minus the naturally occurring potassium-40 beta particle activity exceeds the appropriate screening level, an analysis of the sample must be performed to identify the major radioactive constituents present in the sample, and the appropriate doses must be calculated and summed to determine compliance with 41.8(1) "b"(2)"1," using the formula in 41.8(1) "b"(2)"2."

Doses must also be calculated and combined for measured levels of tritium and strontium to determine compliance.

(7) Monitoring after an MCL violation. Systems must monitor monthly at the sampling point(s) which exceed the maximum contaminant level in 41.8(1)“b”(2) beginning the month after the exceedance occurs. Systems must continue monthly monitoring until the system has established, by a rolling average of three monthly samples, that the MCL is being met. Systems that establish that the MCL is being met must return to quarterly monitoring until they meet the requirements set forth in 41.8(1)“f”(2) or 41.8(1)“f”(3)“2.”

41.8(2) Reserved.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—41.9(455B) Sampling and analytical requirements for radionuclides. Rescinded IAB 1/7/04, effective 2/11/04.

567—41.10(455B) Reporting, public notification and record keeping. Rescinded IAB 8/11/99, effective 9/15/99.

567—41.11(455B) Special monitoring.

41.11(1) Special monitoring for sodium. Suppliers of water for community public water systems shall collect and have analyzed one sample per source or plant, for the purpose of determining the sodium concentration in the distribution system. Systems utilizing multiple wells that draw raw water from a single aquifer may, with departmental approval, be considered as one source for determining the minimum number of samples to be collected. Sampling frequency and approved analytical methods are as follows:

a. Surface water systems. Systems utilizing a surface water source, in whole or in part, shall monitor for sodium at least once annually at the entry point to the distribution system.

b. Groundwater systems. Systems utilizing groundwater sources shall monitor at least once every three years at the entry point to the distribution system.

c. Increased monitoring. Suppliers may be required to monitor more frequently where sodium levels are variable or if certain types of treatment are used, such as cation exchange softening.

d. Analytical methodology. Analyses for sodium shall be performed in accordance with 41.3(1)“e”(1).

e. Reporting. The sodium level shall be reported to the public by at least one of the following methods:

(1) The community public water supply shall notify the appropriate local public health officials of the sodium levels by written notice by direct mail within three months of receipt of the analytical results. A copy of each notice required by this subrule shall be sent to the department within ten days of its issuance.

(2) In lieu of the reporting requirement of 41.11(1)“e”(1), the community public water supply shall include the sodium level in its annual consumer confidence report, pursuant to 567—paragraph 42.3(3)“c”(1)“12.”

f. CWSs using cation exchange treatment. Community water systems which utilize cation exchange treatment are required to collect one sodium sample of the finished water per year after all treatment. Analysis and reporting must be done in accordance with 41.11(1)“d” and “e.”

41.11(2) Special monitoring for ammonia. Ammonia in the groundwater is a precursor to the development of nitrite and nitrate in a drinking water system. Both nitrite and nitrate are contaminants with acute health effects. This subrule lists the ammonia analytical methodology, sample preservation requirements, and holding times to be used for drinking water samples.

a. Analytical methodology. Analyses for ammonia shall be performed in accordance with the following methodology, with a detection limit of 0.1 mg/L ammonia as N:

| Methodology | EPA ¹ | Standard Methods (20th edition) | ASTM | USGS ² | Other |
|---|------------------|---------------------------------|-------------|-------------------|-----------------------|
| Manual distillation at pH 9.5 ⁴ , followed by: | 350.2 | 4500-NH3 B | | | 973.49 ³ |
| Titration | 350.2 | 4500-NH3 C | | | |
| Manual electrode | 350.3 | 4500-NH3 D or E | D1426-93(B) | | |
| Automated phenate | 350.1 | 4500-NH3 G | | I-4523-85 | |
| Automated electrode | | | | | See note ⁵ |

¹“Methods for Chemical Analysis of Water and Wastes,” Environmental Protection Agency, EPA-600/4-79-020, Revised March 1983 and 1979 where applicable.

²Fishman, M.J., et al., “Methods for Analysis of Inorganic Substances in Water and Fluvial Sediments,” U.S. Department of the Interior, Techniques of Water—Resource Investigations of the U.S. Geological Survey, Denver, CO, Revised 1989, unless otherwise stated.

³“Official Methods of Analysis of the Association of Official Analytical Chemists,” 15th edition, 1990.

⁴Manual distillation is not required if the samples are very low in turbidity; however, manual distillation should be used whenever matrix interferences could be present in the sample, and will be required to resolve any controversies.

⁵Ammonia, Automated Electrode Method, Industrial Method Number 379-75 WE, dated February 19, 1976, Bran & Luebbe (Technicon) Auto Analyzer II, Bran & Luebbe Analyzing Technologies, Inc., Elmsford, NY 10523.

b. Sample preservation and holding time. The system must collect a 500 mL grab sample into a plastic or glass bottle. The sample must be acidified at the time of collection to a pH of less than 2 by the addition of sulfuric acid (H₂SO₄) and refrigerated at 4 degrees Celsius. The sample must be analyzed within 28 days. If the sample is analyzed within 24 hours of collection, the sample acidification is not required.

567—41.12(455B) Alternative analytical techniques. With the written permission of this department, concurred in by the EPA, an alternative analytical technique may be employed. An alternative technique shall be acceptable only if it is substantially equivalent to the prescribed test in both precision and accuracy as it relates to the determination of compliance with any maximum contaminant level. The use of the alternative analytical technique shall not decrease the frequency of monitoring required by 567—41.2(455B) through 567—41.8(455B).

567—41.13(455B) Monitoring of interconnected public water supply systems. When a public water supply system supplies water to one or more other public water supply systems, the department may modify the monitoring requirements imposed by this part to the extent that the interconnection of the systems justifies treating them as a single system for monitoring purposes. Any modified monitoring shall be conducted pursuant to a schedule specified by the department and concurred in by the administrator of the U.S. Environmental Protection Agency.

567—41.14(455B) Department analytical results used to determine compliance. Analytical results or other information compiled by departmental staff may be used to determine compliance with the maximum contaminant levels, action levels, or treatment techniques listed in 567—Chapters 41 and 43 or for initiating remedial action with respect to these violations.

567—41.15(455B) Monitoring of other contaminants. If the department determines that other contaminants are present in a public water supply, and the contaminants are known to pose, or scientific evidence strongly suggests that they pose, a threat to human health, the supplier of water may be required to monitor for such contaminants. The supplier of water will monitor at a frequency and in a manner which will adequately identify the magnitude and extent of the contamination. The monitoring frequency and sampling location will be determined by the department. All analytical results will be obtained using approved EPA methods and all analytical results will be submitted to the department

for review and evaluation. Any monitoring required under this paragraph will be incorporated into an operation permit or an order.

These rules are intended to implement Iowa Code sections 455B.171 through 455B.188 and 455B.190 through 455B.192.

CHAPTER 42
PUBLIC NOTIFICATION, PUBLIC EDUCATION,
CONSUMER CONFIDENCE REPORTS, REPORTING,
AND RECORD MAINTENANCE

567—42.1(455B) Public notification.

42.1(1) Applicability. Each owner or operator of a public water system must give notice for all violations of public drinking water rules and for other situations, as listed in this subrule. The term “violations” includes violations of, or failure to comply with, the maximum contaminant level, maximum residual disinfection level, treatment technique, monitoring requirements, and testing procedures in 567—Chapters 40 through 43. The term “other situations” includes all situations determined by the department to require a public notice, such as a waterborne disease outbreak or other waterborne emergency; exceedance of the nitrate MCL by noncommunity systems where granted permission by the department under 567—paragraph 41.3(1)“a”; exceedance of fluoride level over 2.0 mg/L; availability of unregulated contaminant monitoring data in accordance with CFR Title 40, Part 141.40, failure to meet the terms of a compliance schedule; exceedance of a health advisory as determined by the department; failure to comply with the public notification requirements, public education requirements, or consumer confidence report requirements; failure to meet the terms of an administrative or court order; failure to meet the data and other reporting requirements; failure to retain a certified operator in accordance with 567—subrule 43.1(5); and any other situation where the department determines public notification is needed. Public notification is not required for ammonia monitoring conducted pursuant to 567—subrule 41.11(2).

a. Types of public notice. Public notice requirements are divided into three tiers, to take into account the seriousness of the violation or situation and of any potential adverse health effects that may be involved. The public notice requirements for each violation or situation are determined by the tier to which it is assigned.

(1) Tier 1 public notice is required for all drinking water violations and situations with significant potential to have serious adverse effects on human health as a result of short-term exposure.

(2) Tier 2 public notice is required for all other drinking water violations and situations with potential to have serious adverse effects on human health.

(3) Tier 3 public notice is required for all other drinking water violations and situations not included in Tier 1 or Tier 2.

b. Notification. Each public water system must provide public notice to persons served by the water system, in accordance with this rule. A copy of the notice must also be sent to the department, in accordance with the requirements under paragraph 42.4(1)“c.”

(1) Consecutive systems. Public water systems that sell or otherwise provide drinking water to other public water systems (i.e., to consecutive systems) are required to give public notice to the owner or operator of the consecutive system. The consecutive system is responsible for providing public notice to the persons it serves, and must meet the appropriate Tier requirements for the violation.

(2) Systems with multiple physically or hydraulically isolated distribution systems. If a public water system has a violation in a portion of the distribution system that is physically or hydraulically isolated from other parts of the distribution system, the department may allow the system to limit distribution of the public notice only to persons served by that portion of the system which is out of compliance. Permission by the department to limit distribution of the notice must be granted in writing.

42.1(2) Tier 1 public notice requirements.

a. Violations and situations which require Tier 1 notice. The following types of violations or situations require Tier 1 public notice:

(1) Violation of the MCL for *E. coli*, as specified in 567—paragraph 41.2(1)“a.”

(2) Rescinded IAB 4/11/18, effective 5/16/18.

(3) Violation of the MCL for nitrate or nitrite, as defined in 567—subparagraph 41.3(1)“b”(1).

(4) Failure by the water system to collect a confirmation sample within 24 hours of the system's receipt of the first sample result showing an exceedance of the nitrate or nitrite MCL, when directed by the department, as specified in 567—paragraph 41.3(1)“c”(7)“2.”

(5) Exceedance of the nitrate MCL by noncommunity water systems, where permitted to exceed the MCL by the department under 567—paragraph 41.3(1)“a,” as required under 42.1(7)“c.”

(6) Violation of the MRDL for chlorine dioxide when one or more samples, taken in the distribution system on the day following an exceedance of the MRDL in the sample collected at the entrance to the distribution system, exceeds the MRDL, as defined in 567—paragraph 43.6(1)“b.”

(7) Failure by the water system to collect the required chlorine dioxide samples in the distribution system on the day following an exceedance of the MRDL in the sample collected at the entrance to the distribution system.

(8) Violation of the treatment technique requirement by a surface water or influenced groundwater public water system resulting from a single exceedance of the maximum allowable turbidity limit, as specified in rule 567—43.5(455B), 567—43.9(455B), or 567—43.10(455B), where the department determines after consultation with the system that a Tier 1 notice is required, or where the consultation with the department does not take place within 24 hours after the system learns of the violation.

(9) Occurrence of a waterborne disease outbreak, as defined in rule 567—40.2(455B), or other waterborne emergency, such as a failure or significant interruption in key water treatment processes, a natural disaster that disrupts the water supply or distribution system, or a chemical spill or unexpected loading of possible pathogens into the source water that significantly increases the potential for drinking water contamination.

(10) Other violations or situations with significant potential to have serious adverse effects on human health as a result of short-term exposure, as determined by the department either in its rules or on a case-by-case basis.

(11) Detection of *E. coli*, enterococci, or coliphage in source water samples, as specified in 567—paragraphs 41.7(3)“a” and 41.7(3)“b.”

b. Timing of Tier 1 public notice. Public water systems must:

(1) Provide a public notice as soon as practical but no later than 24 hours after the system learns of the violation;

(2) Initiate consultation with the department as soon as practical, but no later than 24 hours after the system learns of the violation or situation, to determine additional public notice requirements. For consultation with department staff after normal business hours, the system should contact the department via the department's Environmental Emergency Reporting Hotline telephone number (515)725-8694; and

(3) Comply with any additional public notification requirements, including any repeat notices or direction on the duration of the posted notices, that are established as a result of the consultation with the department. Such requirements may include the timing, form, manner, frequency, and content of repeat notices (if any) and other actions designed to reach all persons served. All NTNCs must notify the parent or legal guardian of each child under 18 years of age and of any nursing home resident of the Tier 1 violation as soon as possible and within 72 hours, including the information required in the public notice under subrule 42.1(5).

c. Form and manner of Tier 1 public notice. Public water systems must provide the notice within 24 hours in a form and manner reasonably calculated to reach all persons served. The form and manner used by the public water system must fit the specific situation, and must be designed to reach residential, transient, and nontransient users of the water system. In order to reach all persons served, water systems are to use, at a minimum, one or more of the following forms of delivery. The department may require that multiple forms of notification be used in a specific situation.

(1) Appropriate broadcast media, such as radio or television;

(2) Posting of the notice in conspicuous locations throughout the area served by the water system;

(3) Hand delivery of the notice to persons served by the water system; or

(4) Another delivery method approved in writing by the department.

42.1(3) Tier 2 public notice requirements.

a. Violations and situations which require Tier 2 notice. The following types of violations or situations require Tier 2 public notice:

(1) All violations of the MCL, MRDL, and treatment technique requirements, except where a Tier 1 notice is required under subrule 42.1(2);

(2) Violations of the monitoring and testing procedure requirements, where the department determines that a Tier 2 rather than a Tier 3 public notice is required, taking into account potential health impacts and persistence of the violation;

(3) Failure to comply with the requirements of any compliance schedule prescribed in an operation permit, administrative order, or court order pursuant to 567—subrule 43.2(5);

(4) Failure to comply with a health advisory as determined by the department; and

(5) Failure to take corrective action or failure to maintain at least 4-log treatment of viruses (using inactivation, removal, or a department-approved combination of 4-log virus inactivation and removal) before or at the first customer under 567—paragraph 41.7(4)“a.”

b. Timing of Tier 2 public notice. Public water systems must:

(1) Provide the initial public notice as soon as practical, but no later than 30 days after the system learns of the violation. If the public notice is posted, the notice must remain in place for as long as the violation or situation persists, but in no case for less than 7 days, even if the violation or situation is resolved. The department may allow additional time for the initial notice of up to three months from the date the system learns of the violation; however, such an extension must be on a case-by-case basis and be made in writing by the department.

(2) The public water system must repeat the notice every three months as long as the violation or situation persists, unless the department determines that appropriate circumstances warrant a different repeat frequency. If the department determines that a repeat notice frequency of longer than every three months is allowed, that decision must be made in writing by the department and must be on a case-by-case basis. In no circumstance may the repeat notice be given less frequently than once per year. Repeat notices for a coliform bacteria MCL, a treatment technique violation under 567—paragraph 41.2(1)“a” or 41.2(1)“l,” or a turbidity treatment technique violation under rule 567—43.9(455B) or 567—43.10(455B) must be made every three months or more frequently.

(3) A public water system using surface water or influenced groundwater with a treatment technique violation resulting from a single exceedance of the maximum allowable turbidity limit pursuant to 567—43.9(455B) or 567—43.10(455B) must consult with the department as soon as practical, but no later than 24 hours after the public water system learns of the violation, to determine whether a Tier 1 or Tier 2 public notice is required to protect public health. For consultation with department staff after normal business hours, the system should contact the department via the department’s Environmental Emergency Reporting Hotline telephone number (515)725-8694. If the consultation does not occur within the 24-hour period, the public water system must distribute a Tier 1 notice of the violation within the next 24 hours, or no later than 48 hours after the system learns of the violation, following the requirements of paragraphs 42.1(2)“b” and 42.1(2)“c.”

c. Form and manner of Tier 2 public notice. Public water systems must provide the initial public notice and any repeat notices in a form and manner that is reasonably calculated to reach persons served in the required time period. The form and manner of the public notice may vary based on the specific situation and type of public water system, but it must at a minimum meet the following requirements:

(1) Community water systems must provide notice by the following methods, unless directed otherwise in writing by the department:

1. Mail or other direct delivery to each customer receiving a bill and to other service connections to which water is delivered by the public water system; and

2. Any other method reasonably calculated to reach other persons regularly served by the system, if they would not normally be reached by mail or direct delivery. Such persons may include those who do not pay water bills or do not have service connection addresses, such as house renters, apartment dwellers, university students, nursing home patients, or prison inmates. Other methods may include:

- Publication in a local newspaper;

- Delivery of multiple copies for distribution by customers that provide their drinking water to others, such as apartment building owners or large private employers;
- Posting in public places served by the system or on the Internet; or
- Delivery of the notice to community organizations.

(2) Noncommunity water systems (TNC and NTNC) must provide notice by the following methods, unless directed otherwise in writing by the department:

1. Posting the notice in conspicuous locations throughout the distribution system frequented by persons served by the system, or by mail or direct delivery to each customer and service connection (where known); and

2. Any other method reasonably calculated to reach other persons served by the system who would not normally be reached by posting, mail, or direct delivery. Such persons may include those served who may not see a posted notice because the posted notice is not in a location they routinely visit. Other methods may include:

- Publication in a local newspaper or newsletter distribution to customers;
- Use of electronic mail (email) to notify employees or students; or
- Delivery of multiple copies in central locations, such as community centers.

3. In addition to the requirements in 42.1(3)“c”(2)“1” and “2,” nontransient noncommunity public water systems that serve children under 18 years of age, such as child care facilities, schools, and hospitals, or nursing home residents, including elder care facilities, shall provide the public notice in writing to the parent or legal guardian of each person within the time period specified by the department. The content of the public notice must meet the requirements of subrule 42.1(5).

42.1(4) Tier 3 public notice requirements.

a. Violations and situations which require Tier 3 notice. The following types of violations or situations require Tier 3 public notice:

(1) Monitoring violations under 567—Chapters 41, 42, and 43, except where a Tier 1 notice is required under subrule 42.1(2) or where the department determines that a Tier 2 notice is required;

(2) Failure to comply with a testing procedure established in 567—Chapters 41, 42, and 43, except where a Tier 1 notice is required under subrule 42.1(2) or where the department determines that a Tier 2 notice is required;

(3) Availability of unregulated contaminant monitoring results, as required of certain public water supply systems by CFR Title 40, Part 141.40, as required under paragraph 42.1(7)“a”;

(4) Exceedance of the fluoride level of 2.0 mg/L and not exceeding the MCL of 4.0 mg/L, as required under paragraph 42.1(7)“b”;

(5) Failure to report data or analytical results required under 567—Chapters 41, 42, and 43 to the department;

(6) Failure to meet the requirements of this chapter for public notification, public education, or the development and distribution of the Consumer Confidence Report;

(7) Failure to retain a certified operator in accordance with 567—subrule 43.1(5) and the department determines that public notification is required;

(8) Failure to maintain records required under 567—Chapters 41, 42, and 43; and

(9) Any other situation where the department determines public notification is needed.

b. Timing of Tier 3 public notice.

(1) Initial notice.

1. For violations or situations listed in subparagraphs 42.1(4)“a”(1), (2), (5), and (6), public water systems must provide the initial public notice within 12 months after the public water system learns of the violation or situation. If the violation pertains to a contaminant that could have acute health effects as determined by the department, such as coliform bacteria, nitrate, nitrite, or turbidity, the initial public notice must be provided within 3 months. If the public notice is posted, the notice must remain in place for as long as the violation or other situation persists, but in no case less than seven days, even if the violation or situation is resolved.

2. For availability of unregulated contaminant monitoring results pursuant to subparagraph 42.1(4)“a”(3), the system must provide the initial public notice within 12 months of receiving the unregulated contaminant monitoring results.

3. For subparagraphs 42.1(4)“a”(4), (7), and (8), the timing of the initial notice is at the discretion of the department, but the notice must be made within 12 months of the violation or situation.

(2) Repeat notice.

1. For violations or situations listed in subparagraphs 42.1(4)“a”(1), (2), (4), (5), and (6), public water systems must repeat the public notice every 12 months in which the violation or situation persists. If the violation pertains to a contaminant that could have acute health effects, such as coliform bacteria, nitrate, nitrite, or turbidity, the system must repeat the public notice every 3 months in which the violation or situation persists. If the public notice is posted, the notice must remain in place for as long as the violation or other situation persists, but in no case less than seven days, even if the violation or situation is resolved.

2. For availability of unregulated contaminant monitoring results pursuant to subparagraph 42.1(4)“a”(3), the system is not required to repeat the public notice, once the initial public notice requirement has been met.

3. For subparagraphs 42.1(4)“a”(4), (7), and (8), the requirement for and timing of the repeat notice is at the discretion of the department and, if required, the notice must be made within 12 months of the initial notice.

c. Form and manner of Tier 3 public notice. Public water systems must provide the initial notice and any repeat notices in a form and manner that is reasonably calculated to reach persons served in the required time period. The form and manner of the public notice may vary based on the specific situation and type of water system, but it must at a minimum meet the following requirements:

(1) Community water systems. Unless directed otherwise in writing by the department, community water systems must provide notice by:

1. Mail or other direct delivery to each customer receiving a bill and to other service connections to which water is delivered by the public water system; and

2. Any other method reasonably calculated to reach other persons regularly served by the system, if they would not normally be reached by mail or direct delivery notice. Such persons may include those who do not pay water bills or do not have service connection addresses, such as house renters, apartment dwellers, university students, nursing home patients, or prison inmates. Other methods may include:

- Publication in a local newspaper;
- Delivery of multiple copies for distribution by customers that provide their drinking water to others, such as apartment building owners or large private employers;
- Posting in public places or on the Internet; or
- Delivery of the notice to community organizations.

3. Use of the Consumer Confidence Report for initial and repeat notices. For community water systems, the Consumer Confidence Report (CCR) required under 567—42.3(455B) may be used as a vehicle for the initial Tier 3 public notice and all required repeat notices, as long as:

- The CCR is provided to persons served within the time frames specified in 42.1(4)“b”;
- The Tier 3 notice contained in the CCR follows the content requirements under 42.1(5); and
- The CCR is distributed following the delivery requirements under 42.1(4)“c”(1) and (2).

(2) Noncommunity systems (TNC and NTNC). Unless directed otherwise in writing by the department, noncommunity water systems must provide notice by:

1. Posting the notice in conspicuous locations throughout the distribution system frequented by persons served by the system, or by mail or direct delivery to each customer and service connection (where known); and

2. Any other method reasonably calculated to reach other persons served by the system, if they would not normally be reached by the posted, mailed, or delivered notice. Such persons may include those who may not see a posted notice because the notice is not in a location they routinely visit. Other methods may include:

- Publication in a local newspaper or newsletter distributed to employees;

- Use of electronic mail (email) to notify employees or students; or
- Delivery of multiple copies in central locations, such as community centers.

42.1(5) Content of the public notice.

a. Required public notice elements. Each public notice must include the following elements:

- (1) A description of the violation or situation, including the contaminant(s) of concern and, as applicable, the contaminant level(s);
- (2) When the violation or situation occurred;
- (3) Any potential adverse health effects from the violation or situation, including the standard language under subparagraph 42.1(5) “c”(1) or (2), whichever is applicable;
- (4) The population at risk, including subpopulations particularly vulnerable if exposed to the contaminant in their drinking water;
- (5) Whether alternative water supplies or bottled water should be used, or require a boil-water order;
- (6) What actions consumers should take, including when they should seek medical help, if known;
- (7) What the system is doing to correct the violation or situation;
- (8) When the water system expects to return to compliance or resolve the situation;
- (9) The name, business address, and telephone number of the water system owner, operator, or designee of the public water system as a source of additional information concerning the notice; and
- (10) A statement to encourage the notice recipient to distribute the public notice to other persons served, using the standard language under subparagraph 42.1(5) “c”(3), where applicable.

b. Appearance and presentation of the public notice.

- (1) Each public notice must:
 1. Be displayed in a conspicuous way when printed or posted;
 2. Not contain overly technical language or very small print;
 3. Not be formatted in a way that defeats the purpose of the notice; and
 4. Not contain language that nullifies the purpose of the notice.
- (2) Each public notice must comply with multilingual requirements, as follows:
 1. For public water systems serving a large proportion of non-English speaking consumers, as determined by the department, the public notice must contain information in the appropriate language(s) about the importance of the notice. Alternately, the public notice must contain a telephone number or address where persons served may contact the water system to obtain a translated copy of the notice or to request assistance in the appropriate language.
 2. In cases where the department has not determined what constitutes a large proportion of non-English speaking consumers, the public water system must include in the public notice the same information as in 42.1(5) “b”(2)“1,” where appropriate, to reach a large proportion of non-English speaking persons served by the water system.

c. Standard language requirements. Public water systems are required to include the following standard language in their public notice:

(1) Standard language about health effects for MCL violations, MRDL violations, or treatment technique violations. Public water systems must include in each public notice the language about health effects specified in Appendix A for the specific contaminant, disinfectant residual, or treatment technique that incurred the violation.

(2) Standard language for monitoring and testing procedure violations. Public water systems must include the following language in their notice, including the bracketed language necessary to complete the notice, for all monitoring and testing procedure violations:

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During [compliance period], we [use either the phrase “did not monitor or test” or “did not complete all monitoring or testing,” whichever is more applicable] for [contaminant(s)], and therefore cannot be sure of the quality of your drinking water during that time.

(3) Standard language to encourage the distribution of the public notice to all persons served. Public water systems must include in their notice the following language, where applicable:

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly, such as people in apartments, nursing homes, schools, and businesses. You can do this by posting this notice in a public place or distributing copies by hand or mail.

42.1(6) Notice to new billing units or new customers.

a. Community water systems. Community water systems must give a copy of the most recent public notice for any continuing violation or other ongoing situations requiring a public notice to all new billing units or new customers prior to or at the time service begins.

b. Noncommunity water systems. Noncommunity water systems must continuously post the public notice in conspicuous locations in order to inform new consumers of any continuing violation or other situation requiring a public notice for as long as the violation or other situation persists.

42.1(7) Special notices.

a. Availability of unregulated contaminant monitoring results.

(1) **Applicability.** The owner or operator of a community water system or nontransient noncommunity water system required to monitor under the federal unregulated contaminant monitoring rule must notify persons served by the system of the availability of the results of such sampling no later than 12 months after the monitoring results are known.

(2) **Form and manner of notice.** The form and manner of the public notice must follow the requirements for a Tier 3 public notice prescribed in paragraph 42.1(4)“c.” The notice must also identify a person and provide the telephone number to contact for information on the monitoring results.

b. Fluoride level between 2.0 and 4.0 mg/L at community or nontransient noncommunity water systems.

(1) **Applicability.** Community and nontransient noncommunity water systems that exceed the fluoride level of 2.0 mg/L as determined by the last single sample taken in accordance with 567—paragraph 41.3(1)“c” but do not exceed the MCL of 4.0 mg/L, must provide the public notice in subparagraph 42.1(7)“b”(5) to persons served. If the nontransient noncommunity public water system is a school or child care facility that serves children under nine years of age, the public water system shall provide the public notice in writing to the legal guardians of each child within the time period specified by the department.

(2) **Initial notice.** Public notice must be provided as soon as practical but no later than three months from the day the water system learns of the exceedance. A copy of the notice must also be sent to all new billing units and new customers at the time service begins and to the Public Health Dental Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

(3) **Repeat notice.** The public water system must repeat the notice at least every three months for as long as the fluoride level exceeds 2.0 mg/L. If the public notice is posted, the notice must remain in place for as long as the fluoride level exceeds 2.0 mg/L, but in no case less than seven days (even if the exceedance is eliminated). The department may require the repeat notice to be conducted more frequently.

(4) **Form and manner of notice.** The form and manner of the public notice, including repeat notices, must follow the requirements for a Tier 3 public notice in paragraph 42.1(4)“c.”

(5) **Mandatory language.** The notice must contain the following language, including the bracketed language necessary to complete the notice:

This is an alert about your drinking water and a cosmetic dental problem that might affect children under nine years of age. At low levels, fluoride can help prevent cavities, but children drinking water containing more than 2 milligrams per liter (mg/L) of fluoride may develop cosmetic discoloration of their permanent teeth, called dental fluorosis. The drinking water provided by your public water system [PWS name] has a fluoride concentration of [analytical result] mg/L.

Dental fluorosis, in its moderate or severe forms, may result in a brown staining and pitting of the permanent teeth. This problem occurs only in developing teeth, before they erupt from the gums. Children under nine should be provided with alternative sources of drinking water or water that has been treated to remove the fluoride to avoid the possibility of staining and pitting of their

permanent teeth. You may also want to contact your dentist about proper use by young children of fluoride-containing products. Older children and adults may safely drink the water.

Drinking water containing more than 4.0 mg/L of fluoride (the U.S. Environmental Protection Agency's drinking water standard) can increase your risk of developing bone disease. Your drinking water does not contain more than 4.0 mg/L of fluoride, but we are required to notify you when we discover that the fluoride levels in your drinking water exceed 2.0 mg/L because of this cosmetic dental problem.

For more information, please call [name of the person designated as the water system contact] of [name of public water system] at [telephone number]. Some home water treatment units are also available to remove fluoride from drinking water. In Iowa, home water treatment units are regulated under 641—Chapter 14, with the water treatment unit registration program administered by the Iowa department of public health's environmental health division. In addition, you may call the National Sanitation Foundation (NSF) International, at 1-877-867-3435.

c. Nitrate level between 10 and 20 mg/L for noncommunity water systems, where allowed by the department.

(1) Applicability. The owner or operator of a noncommunity water system granted permission by the department under 567—paragraph 41.3(1)“a” to exceed the nitrate MCL must provide notice to persons served according to the requirements for a Tier 1 notice under paragraphs 42.1(2)“a” and “b.”

(2) Form and manner of notice. Noncommunity water systems granted permission by the department to exceed the nitrate MCL under 567—paragraph 41.3(1)“a” must provide continuous posting of the fact that nitrate levels exceed 10 mg/L and the potential health effects of exposure, according to the requirements for Tier 1 notice delivery under paragraph 42.1(2)“c” and the content requirements under subrule 42.1(5).

d. Repeated failure to conduct monitoring of the source water for Cryptosporidium.

(1) Applicability. The owner or operator of any public water system that is required to monitor source water under 567—43.11(455B) must notify persons served by the water system that monitoring has not been completed as specified no later than 30 days after the system has failed to collect samples in any three months of monitoring as specified in 567—paragraph 43.11(3)“a.” The notice must be repeated as specified in 42.1(3).

(2) Form and manner of notice. The form and manner of the special notice must follow the Tier 2 public notice requirements in 42.1(3) and be presented as required in 42.1(5)“b.”

(3) Mandatory language. The special notice must contain the following language, including the language necessary to fill in the brackets.

“We are required to monitor the source of your drinking water for *Cryptosporidium*. Results of the monitoring are to be used to determine whether water treatment at the [treatment plant name] is sufficient to adequately remove *Cryptosporidium* from your drinking water. We are required to complete this monitoring and make this determination by [required bin determination date]. We [“did not monitor or test” or “did not complete all monitoring or testing”] on schedule and, therefore, we may not be able to determine by the required date what treatment modifications, if any, must be made to ensure adequate *Cryptosporidium* removal. Missing this deadline may, in turn, jeopardize our ability to have the required treatment modifications, if any, completed by the required deadline of [date]. For more information, please call [name of water system contact] of [name of water system] at [telephone number].”

(4) Each special notice must also include a description of what the system is doing to correct the violation and when the system expects to return to compliance or resolve the situation.

e. Failure to determine bin classification or mean Cryptosporidium level.

(1) Applicability. The owner or operator of a public water system that is required to determine a bin classification under 567—subrule 43.11(5) must notify persons served by the water system that the determination has not been made as required no later than 30 days after the system has failed to report the determination as specified in 567—paragraph 43.11(5)“c.” The notice must be repeated as specified in 42.1(3). The notice is not required if the system is in compliance with a department-approved schedule to address the violation.

(2) Form and manner of notice. The form and manner of the special notice must follow the Tier 2 public notice requirements in 42.1(3) and be presented as required in 42.1(5) “b.”

(3) Mandatory language. The special notice must contain the following language, including the language necessary to fill in the brackets.

“We are required to monitor the source of your drinking water for *Cryptosporidium* in order to determine by [date] whether water treatment at the [treatment plant name] is sufficient to adequately remove *Cryptosporidium* from your drinking water. We have not made this determination by the required date. Our failure to do this may jeopardize our ability to have the required treatment modifications, if any, completed by the required deadline of [date]. For more information, please call [name of water system contact] of [name of water system] at [telephone number].”

(4) Each special notice must also include a description of what the system is doing to correct the violation and when the system expects to return to compliance or resolve the situation.

42.1(8) Notice by department on behalf of the public water system. The department may give the public notice on behalf of the owner or operator of the public water system if the department complies with the public notification requirements of this rule. However, the owner or operator of the public water system remains responsible for ensuring the public notification requirements of this rule are met.

42.1(9) Public notice requirements in the operation permit compliance schedule. When the department determines that a public water supply system cannot promptly comply with one or more maximum contaminant levels pursuant to 567—Chapter 41, and that there is no immediate, unreasonable risk to the health of persons served by the system, an operation permit will be drafted that may include interim contaminant levels or a compliance schedule. The permit applicant may be required by the department to present the reasons the system cannot come into immediate compliance. Prior to issuance of a final permit, notice and opportunity for public participation must be given in accordance with this subrule. The notice shall be circulated in a manner designed to inform interested and potentially interested persons of any proposed interim contaminant level or compliance schedule.

a. Preparation of notice. The public notice shall be prepared by the department and circulated by the applicant within its geographical area through publication in a local newspaper with general circulation or through mail or direct delivery to the system’s customers. The public notice shall be mailed by the department to any person upon request.

b. Public comment period. The department shall provide a period of at least 30 days following the date of the public notice during which time interested persons may submit their written views on the tentative determinations with respect to the operation permit. All written comments submitted during the 30-day comment period shall be retained by the department and considered in the formulation of the department’s final determination with respect to the operation permit. The department may extend the comment period.

c. Content of notice. The content of the public notice of a proposed operation permit shall include at least the following:

- (1) The name, address, and telephone number of the department.
- (2) The name and address of the applicant.
- (3) A statement of the department’s tentative determination to issue the operation permit.
- (4) A brief description of each applicant’s water supply operations which necessitate the proposed permit conditions.

(5) A brief description of the procedures for the formulation of final determinations, including the 30-day comment period required by 42.1(9) “b.”

(6) The right to request a public hearing pursuant to 42.1(9) “d” and any other means by which interested persons may influence or comment upon those determinations.

(7) The address and telephone number of places at which interested persons may obtain further information, request a copy of the proposed operation permit prepared pursuant to 42.1(9), and inspect and copy the application forms and related documents.

d. Public hearings on proposed operation permits. The applicant or any interested agency, person or group of persons may request or petition for a public hearing with respect to the proposed action. Any such request shall clearly state issues and topics to be addressed at the hearing. Any such request

or petition for public hearing must be filed with the department within the 30-day period prescribed in 42.1(9) “b” and shall indicate the interest of the party filing such request and the reasons why a hearing is warranted. The department shall hold an informal and noncontested case hearing if there is a significant public interest (including the filing of requests or petitions for such hearing) in holding such a hearing. Frivolous or insubstantial hearing requests may be denied by the department. Instances of doubt should be resolved in favor of holding the hearing. Any hearing held pursuant to this subrule shall be held in the geographical area of the system, or other appropriate area at the discretion of the department. The department may, as appropriate, consider related groups of permit applications at the hearing.

e. Public notice of public hearings.

(1) Public notice of any hearing held pursuant to 42.1(9) shall be circulated at least as widely as the notice under 42.1(9) “a” at least 30 days in advance of the hearing.

(2) The contents of the public notice of any hearing held pursuant to 42.1(9) shall include at least the following:

1. The name, address, and telephone number of the department;
2. The name and address of each applicant whose application will be considered at the hearing;
3. A brief reference to the public notice previously issued, including identification number and date of issuance;
4. Information regarding the time and location for the hearing;
5. The purpose of the hearing;
6. A concise statement of the issues raised by the person requesting the hearing;
7. The address and telephone number of the premises where interested persons may obtain further information, request a copy of the draft operation permit or modification prepared pursuant to 42.1(9), and inspect and copy the application forms and related documents; and
8. A brief description of the nature of the hearing, including the rules and procedures to be followed.

f. Decision by the department. The department shall issue or deny the operation permit within 30 days after the termination of the public hearing held pursuant to 42.1(9), or, if no public hearing is held, within 30 days after the termination of the period for requesting a hearing.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—42.2(455B) Lead consumer notice and public education for lead action level exceedance. All CWS and NTNC systems must comply with the lead consumer notice in accordance with 42.2(1). A CWS or NTNC system that exceeds the lead action level based on tap water samples collected in accordance with 567—paragraph 41.4(1) “c” must comply with the public education requirements in accordance with 42.2(2).

42.2(1) Lead consumer notice. All CWS and NTNC systems must provide a consumer notice of lead tap water monitoring results to persons served at the sites (taps) that are tested as listed in 567—42.2(455B). Any system exceeding the lead action level shall also implement the public education requirements of 42.2(2).

a. Reporting requirement. All CWS and NTNC systems must provide a notice of the individual tap results from lead tap water monitoring carried out under the requirements of 567—paragraph 41.4(1) “c” to the persons served by the water system at the specific sampling site from which the sample was taken (e.g., the occupants of the residence where the tap was tested).

b. Timing of notification. A water system must provide the consumer notice as soon as practical, but no later than 30 days after the system learns of the tap monitoring results.

c. Content of notice. The consumer notice must include the following:

- (1) Results of the lead tap water monitoring for the tap that was tested,
- (2) An explanation of the health effects of lead,
- (3) A list of steps consumers can take to reduce exposure to lead in drinking water,
- (4) Contact information for the water utility, and
- (5) The lead maximum contaminant level goal of 0 mg/L and the 90th percentile lead action level of 0.015 mg/L and the definitions for these two terms from rule 567—40.2(455B).

d. Delivery of notice. The consumer notice must be provided to persons served at the tap that was tested, either by mail or by another method approved by the department. For example, upon approval by the department, an NTNC system could post the results on a bulletin board in the facility to allow users to review the information. The system must provide the notice to customers at sample taps tested, including consumers who do not receive water bills.

e. Inclusion of copper results. The system may also include results of copper testing in the notice along with the 90th percentile copper action level of 1.3 mg/L, copper MCLG of 1.3 mg/L, and health effects language.

42.2(2) Lead public education for lead action level exceedance. A water system that exceeds the lead action level based on tap water samples collected in accordance with 567—paragraph 41.4(1) “c” shall deliver the public education materials contained in 42.2(2) “a” in accordance with 42.2(2) “b.” Water systems that exceed the lead action level must sample the tap water of any customer who requests it in accordance with 42.2(2) “c.”

a. Content of written public education materials. CWS and NTNC systems must include the following elements in printed materials (e.g., brochures and pamphlets) in the same order as listed in this paragraph. In addition, language in 42.2(2) “a” (1), (2), and (6) must be included in the materials exactly as written, except for the text in brackets in these paragraphs for which the water system must substitute system-specific information. Any additional information presented by a water system must be consistent with the information in 42.2(2) “a” and be in plain language that can be understood by the general public. Water systems must submit all written public education materials to the department prior to delivery. The department may require the system to obtain approval of the content of written public education materials prior to delivery.

(1) The following information must be included exactly as written. “IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER. [*Insert name of water system*] found elevated levels of lead in drinking water in some homes/buildings. Lead can cause serious health problems, especially for pregnant women and young children. Please read this information closely to see what you can do to reduce lead in your drinking water.”

(2) The following information must be included exactly as written. “Health effects of lead. Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother’s bones, which may affect brain development.”

(3) Sources of lead. The printed materials must:

1. Explain what lead is.
2. Explain possible sources of lead in drinking water and how lead enters drinking water and include information on home/building plumbing materials and service lines that may contain lead.

3. Discuss other important sources of lead exposure in addition to drinking water (e.g., paint).

(4) Discuss the steps the consumers can take to reduce their exposure to lead in drinking water as follows:

1. Encourage running the water to flush out the lead.
2. Explain concerns with using hot water from the tap and specifically caution against the use of hot water for preparing baby formula.
3. Explain that boiling the water does not reduce lead levels.
4. Discuss other options consumers can take to reduce exposure to lead in drinking water, such as alternative sources or treatment of water.

5. Suggest that parents have their child’s blood tested for lead.

(5) The printed materials must explain why there are elevated levels of lead in the system’s drinking water (if known) and what the water system is doing to reduce the lead levels in homes/buildings in this area.

(6) The following information must be included exactly as written. “For more information, call us at [*insert your telephone number*] or visit our website at [*insert your website link here*]. For more information on reducing lead exposure around your home/building and the health effects of lead, visit EPA’s website at www.epa.gov/lead or contact your health care provider.”

(7) Community water systems must also include the following elements:

1. Tell consumers how to get their water tested.
2. Discuss lead in plumbing components and the difference between low lead and lead free.
- b. Delivery of public education materials.*

(1) Outreach to non-English speaking consumers. For public water systems serving a large proportion of non-English speaking consumers, as determined by the department, the public education materials must contain information in the appropriate language(s) regarding the importance of the notice or contain a telephone number or address where persons served may contact the water system to obtain a translated copy of the public education materials or to request assistance in the appropriate language.

(2) Delivery of public education at CWS. A CWS that exceeds the lead action level on the basis of tap water samples collected in accordance with 567—paragraph 41.4(1)“c” and that is not already conducting public education tasks under 42.2(2) must conduct the public education tasks within 60 days of the date of notification of the action level exceedance:

1. Deliver printed materials meeting the content requirements of 42.2(2)“a” to all bill-paying customers.

2. Contact customers who are most at risk by delivering education materials that meet the content requirements of 42.2(2)“a” to local public health agencies even if they are not located within the water system’s service area, along with an informational notice that encourages distribution to all the organization’s potentially affected customers or CWS’s users. The water system must contact the local public health agencies directly by phone or in person. The local public health agencies may provide a specific list of additional community-based organizations serving target populations, which may include organizations outside the service area of the water system. If such lists are provided, systems must deliver education materials that meet the content requirement of 42.2(2)“a” to all organizations on the provided lists.

3. Contact customers who are most at risk by delivering materials that meet the content requirements of 42.2(2)“a” to the following organizations that are located within the water system’s service area, along with an informational notice that encourages distribution to all the organization’s potentially affected customers or community public water supply system’s users:

- Public and private schools or school boards;
- Women, Infants, and Children (WIC) and Head Start programs;
- Public and private hospitals and medical clinics;
- Pediatricians;
- Family planning clinics; and
- Local welfare agencies.

4. Make a good-faith effort to locate the following organizations within the service area and to deliver to them materials that meet the content requirements of 42.2(2)“a,” along with an informational notice that encourages distribution to all potentially affected customers or users. The good-faith effort to contact at-risk customers may include requesting a specific contact list of these organizations from the local public health agencies, even if the agencies are not located within the water system’s service area:

- Licensed child care centers;
- Public and private preschools;
- Obstetricians, gynecologists, and midwives.

5. No less often than quarterly, provide information on or in each water bill as long as the system exceeds the action level for lead. The message on the water bill must include the following statement exactly as written except for the text in brackets for which the water system must substitute system-specific information: “[*insert name of water system*] found high levels of lead in drinking water in some homes. Lead can cause serious health problems. For more information, please call [*insert telephone number of water system*] or visit [*insert your website link here*].”

The message or delivery mechanisms can be modified in consultation with the department; specifically, the department may allow a separate mailing of public education materials to customers if the water system cannot place the information on water bills.

6. Post material meeting the content requirements of 42.2(2)“a” on the water system’s website if the system serves a population greater than 100,000.

7. Submit a press release to newspaper, television, and radio stations.

8. In addition to including those items previously listed, systems must implement at least three activities from one or more of the following categories. The educational content and selection of these activities must be determined in consultation with the department.

- Public service announcement;
- Paid advertisement;
- Public area information displays;
- Emails to customers;
- Public meetings;
- Household deliveries;
- Targeted individual customer contact;
- Direct material distribution to all multifamily homes and institutions; and
- Other methods approved by the department.

For systems that are required to conduct monitoring annually or less frequently, the end of the monitoring period is September 30 of the calendar year in which the sampling occurs, or if the department has established an alternate monitoring period, the last day of that period.

(3) Continuing public education at a CWS. As long as a CWS exceeds the action level, it must repeat the activities pursuant to 42.2(2)“b”(2) as follows:

1. A CWS shall repeat the tasks contained in 42.2(2)“b”(2)“1,” “2,” and “8” every 12 months.
2. A CWS shall repeat the tasks contained in 42.2(2)“b”(2)“5” with each billing cycle.
3. A CWS serving a population greater than 100,000 shall post and retain material on a publicly accessible website pursuant to 42.2(2)“b”(2)“6.”
4. A CWS shall repeat the task in 42.2(2)“b”(2)“7” twice every 12 months on a schedule agreed upon with the department. The department can allow activities in 42.2(2)“b”(2) to extend beyond the 60-day requirement if needed for implementation purposes on a case-by-case basis; however, this extension must be approved in writing by the department in advance of the 60-day deadline, and the system must already have initiated public education activities prior to the end of the 60-day deadline.

(4) Delivery of public education at an NTNC system. Within 60 days of the date of notification of the action level exceedance, an NTNC system shall deliver the public education materials specified as follows:

1. Post informational posters on lead in drinking water in a public place or common area in each of the buildings served by the system; and
2. Distribute informational pamphlets or brochures on lead in drinking water to each person served by the nontransient noncommunity water system. The department may allow the system to utilize electronic transmission in lieu of or combined with printed materials as long as at least the same coverage is achieved. If the system serves children 18 years of age and under, such as a school or child care facility, the public education notice must be provided to the parents or legal guardians of the children.

For systems that are required to conduct monitoring annually or less frequently, the end of the monitoring period is September 30 of the calendar year in which the sampling occurs or, if the department has established an alternate monitoring period, the last day of that period.

(5) Continuing public education at an NTNC system. An NTNC system shall repeat the tasks contained in 42.2(2)“b”(4) at least once during each calendar year in which the system exceeds the lead action level. The department can allow activities in 42.2(2)“b”(4) to extend beyond the 60-day requirement if needed for implementation purposes on a case-by-case basis; however, this extension must be approved in writing by the department in advance of the 60-day deadline, and the system must already have initiated public education activities prior to the end of the 60-day deadline.

(6) Discontinuation of public education activities. A CWS or NTNC system may discontinue delivery of public education materials if the system has met the lead action level during the most recent six-month monitoring period conducted pursuant to 567—paragraph 41.4(1)“c.” Such system shall recommence public education in accordance with 42.2(2) if the system subsequently exceeds the lead action level during any monitoring period.

(7) Special population CWS allowance. A CWS that meets the following criteria may apply to the department in writing for reduced public education and notification requirements:

1. The CWS is a facility, such as a prison or hospital, where the population served is not capable of or is prevented from making improvements to plumbing or installing point-of-use treatment devices; and

2. The CWS provides water as part of the cost of services provided and does not separately charge for water consumption.

If the department approves the request in writing, the CWS is not required to include the language in 42.2(2)“a”(7) and must deliver the public education in accordance with 42.2(2)“b”(4) and (5), in lieu of 42.2(2)“b”(2) and (3).

(8) CWS serving 3,300 or fewer people. A CWS serving 3,300 or fewer people may limit certain aspects of its public education programs as follows:

1. The system must implement at least one of the activities listed in 42.2(2)“b”(2)“8.”

2. The system may limit the distribution of the public education materials in 42.2(2)“b”(2)“2” and “3” to facilities and organizations served by the system that are most likely to be visited regularly by pregnant women and children.

3. The department may waive the requirements of 42.2(2)“b”(2)“7” for the system provided the system distributes notices to every household served by the system.

c. Supplemental monitoring and notification of results. A water system that fails to meet the lead action level on the basis of tap samples collected in accordance with 567—paragraph 41.4(1)“c” shall offer to sample the tap water of any customer who requests it. The system is not required to pay for collecting or analyzing the sample, nor is the system itself required to collect and analyze the sample.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—42.3(455B) Consumer confidence reports.

42.3(1) Applicability and purpose. This rule applies to all community public water supply systems. The purpose of this rule is to establish the minimum requirements for the content of annual reports that community water systems must deliver to their customers. These reports must contain information on the quality of the water delivered by the systems and characterize the risks (if any) from exposure to contaminants in the drinking water in an accurate and understandable manner. The department may assign public notification requirements and assess administrative penalties to any community public water supply system which fails to fulfill the requirements of this rule.

42.3(2) Reporting frequency.

a. Existing community water systems. Existing community water systems must deliver the first report by October 19, 1999; the second report by July 1, 2000; and subsequent reports annually by July 1 thereafter.

b. New community water systems. New community water systems must deliver their first report by July 1 of the year after their first full calendar year in operation, and annually thereafter.

c. A CWS which sells water to another CWS. A community water system that sells water to another community water system must deliver the applicable information required in subrule 42.3(3) to the buyer (or consecutive) system:

(1) No later than April 19, 1999, for the 1998 report; by April 1, 2000, for the 1999 report; and annually by April 1 thereafter, or

(2) On a date mutually agreed upon by the seller and the purchaser, and specifically included in a contract between the parties.

When a consecutive system sells water to another community water system, the seller must provide all applicable information in 42.3(3) to the CWS buying the water from them.

42.3(3) Content of the reports. Each annual consumer confidence report must contain the following information, at a minimum:

a. Source water identification. The report must identify the source(s) of water delivered by the community public water supply system, including the following:

(1) Type of water (e.g., surface water, groundwater, groundwater purchased from another public water supply).

(2) Commonly used name of the aquifer, reservoir, or river (if any) and location of the body (or bodies) of water.

(3) If a source water assessment has been completed, notify consumers of the availability of this information and the means to obtain it. In addition, systems are encouraged to highlight in the report significant sources of contamination in the source water area if they have readily available information. Where a system has received a source water assessment from the department, the report must include a brief summary of the system's susceptibility to potential sources of contamination, using language provided by the department or its designee, or written by the owner or operator.

b. Definitions. Each report using any of the following terms must include the applicable definitions:

(1) "Maximum Contaminant Level Goal (MCLG)" means the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

(2) "Maximum Contaminant Level (MCL)" means the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

(3) "Maximum Residual Disinfectant Level Goal (MRDLG)" means the level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

(4) "Maximum Residual Disinfectant Level (MRDL)" means the highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

(5) A report which contains data on a contaminant for which EPA has set a treatment technique or an action level must include one or both of the following definitions, as applicable:

1. "Treatment technique (TT)" means a required process intended to reduce the level of a contaminant in drinking water.

2. "Action level (AL)" means the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

(6) A report that contains information regarding a Level 1 or Level 2 assessment required under 567—subrule 41.2(1) must include the applicable definitions:

1. "Level 1 Assessment" is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

2. "Level 2 Assessment" is a very detailed study of the water system to identify potential problems and determine (if possible) why an *E. coli* MCL violation has occurred or why total coliform bacteria have been found in our water system on multiple occasions.

c. Information on detected contaminants. This paragraph specifies the requirements for information to be included in each report for contaminants subject to mandatory monitoring (except *Cryptosporidium*, which is listed in 42.3(3)"c"(2)) as follows: contaminants subject to an MCL, action level, MRDL, or treatment technique (regulated contaminants); contaminants for which monitoring is required by CFR Title 40, Part 141.40 (unregulated contaminants), 567—subrule 41.11(1) (sodium monitoring), and 567—41.15(455B) (other contaminants); and disinfection byproducts or microbial contaminants for which monitoring is required by 567—Chapters 40 to 43, except as provided under 42.3(3)"e"(1), and which are detected in the finished water. The ammonia monitoring conducted pursuant to 567—subrule 41.11(2) is not subject to this paragraph. For the purposes of this subrule, "detected" means at or above the levels prescribed by the following: inorganic

contaminants in 567—subparagraph 41.3(1)“e”(1); volatile organic contaminants in 567—paragraph 41.5(1)“b”; synthetic organic contaminants in 567—paragraph 41.5(1)“b”; radionuclide contaminants in 567—paragraph 41.8(1)“c”; disinfection byproducts in 567—paragraph 83.6(7)“a”(6)“3”; and other contaminants with health advisory levels, as assigned by the department.

(1) The data relating to these contaminants must be displayed in one table or in several adjacent tables. Any additional monitoring results which a community water system chooses to include in its report must be displayed separately.

1. The data must be derived from data collected to comply with departmental monitoring and analytical requirements during calendar year 1998 for the first report and subsequent calendar years thereafter. Where a system is allowed to monitor for contaminants less often than once a year, the table(s) must include the results and date of the most recent sampling and a brief statement indicating that the data presented in the report are from the most recent testing done in accordance with the regulations. No data older than five years need be included.

2. For detected regulated contaminants, which are listed in Appendix C, the table(s) must contain:

- The MCL for that contaminant, expressed as a number equal to or greater than 1.0 (as provided in Appendix C);

- The MCLG for that contaminant, expressed in the same units as the MCL;

- If there is no MCL for a detected contaminant, the table must indicate that there is a treatment technique, or specify the action level, applicable to that contaminant, and the report must include the definition for treatment technique or action level, as appropriate, specified in 42.3(3)“b”(4).

3. For contaminants subject to an MCL, except turbidity and total coliforms, the table must contain the highest contaminant level used to determine compliance with a primary drinking water standard and the range of detected levels, as follows:

- When compliance with the MCL is determined annually or less frequently: the highest detected level at any sampling point and the range of detected levels expressed in the same units as the MCL (such as inorganic compounds).

- When compliance with the MCL is determined by calculating a running annual average of all samples taken at a sampling point: the highest average of any of the sampling points and the range of all sampling points expressed in the same units as the MCL (such as organic compounds and radionuclides). For TTHM and HAA5 MCLs, systems must include the highest locational running annual average for TTHM and HAA5 and the range of individual sample results for all monitoring locations expressed in the same units as the MCL. If more than one location exceeds the TTHM or HAA5 MCL, the system must include the locational running annual averages for all locations that exceed the MCL.

- When compliance with an MCL is determined on a systemwide basis by calculating a running annual average of all samples at all sampling points: the average and range of detection expressed in the same units as the MCL.

NOTE: When rounding of results to determine compliance with the MCL is allowed by the regulations, rounding should be done prior to multiplying the results by the factor listed in Appendix C.

4. For turbidity: When it is reported pursuant to 567—43.5(455B), 567—43.9(455B), or 567—43.10(455B): the highest single measurement and the lowest monthly percentage of samples meeting the turbidity limits specified in 567—43.5(455B), 567—43.9(455B), or 567—43.10(455B) for the filtration technology being used. The report should include an explanation of the reasons for measuring turbidity.

5. For lead and copper: the 90th percentile value of the most recent round of sampling and the number of sampling sites exceeding the action level.

6. Rescinded IAB 4/11/18, effective 5/16/18.

7. For *E. coli* analytical results under 567—subrule 41.2(1), the total number of positive samples.

8. The likely source(s) of detected contaminants to the best of the owner’s or operator’s knowledge. Specific information regarding contaminants may be available in sanitary surveys and source water assessments, and should be used when available to the owner or operator. If the owner or operator lacks specific information on the likely contaminant source, the report must include one or

more of the typical sources for that contaminant listed in Appendix C, which are most applicable to the system.

9. If a community water system distributes water to its customers from multiple hydraulically independent distribution systems that are fed by different raw water sources, the table should contain a separate column for each service area and the report should identify each separate distribution system. Alternatively, systems may produce separate reports tailored to include data for each service area.

10. The table(s) must clearly identify any data indicating MCL, MRDL, or TT violations, and the report must contain a clear and readily understandable explanation of the violation including:

- The length of the violation,
- The potential adverse health effects,
- Actions taken by the system to address the violation, and
- The relevant language from Appendix C to describe the potential health effects.

11. For detected unregulated contaminants for which monitoring is required, except *Cryptosporidium*, the table(s) must contain the average and range at which the contaminant was detected. The report may include a brief explanation of the reasons for monitoring for unregulated contaminants.

12. Community public water supply systems may list the most recent results of the special sodium monitoring requirement according to 567—subrule 41.11(1) in the annual report, instead of providing a separate public notification.

13. If a contaminant which does not have an MCL, MRDL, TT, or AL is detected in the water, the PWS must contact the department for the specific health effects language, health advisory level, and contamination sources.

(2) If monitoring indicates that *Cryptosporidium* may be present in the source water or the finished water, or that radon may be present in the finished water, the report must include:

1. A summary of the *Cryptosporidium* monitoring results;
2. The radon monitoring results; and
3. An explanation of the significance of the results.

(3) If the system has performed additional monitoring which indicates the presence of other contaminants in the finished water, the system must report any results which may indicate a health concern. To determine if results may indicate a health concern, the community public water supply can determine if there is a current or proposed maximum contaminant level, maximum residual disinfectant level, treatment technique, action level, or health advisory by contacting the department or by calling the national Safe Drinking Water Hotline ((800)426-4791). The department considers the detection of a contaminant above a proposed MCL or health advisory to indicate possible health concerns. For such contaminants, the report should include:

1. The results of the monitoring; and
2. An explanation of the significance of the results noting the existence of a health advisory or a proposed regulation.

(4) If the system was required to comply with the federal Information Collection Rule pursuant to the Code of Federal Regulations Title 40 Part 141, it must include the results of monitoring in compliance with Sections 141.142 and 141.143. These results need only be included for five years from the date of the sample or until any of the detected contaminants become regulated and subject to routine monitoring requirements, whichever comes first.

d. Compliance with 567—Chapters 40, 41, 42, and 43. In addition to the requirements of paragraph 42.3(3)“c”(1)“9,” the report must note any violation that occurred during the year covered by the report of a requirement listed below and include a clear and readily understandable explanation of the violation, any potential adverse health effects, and the steps the system has taken to correct the violation. Note any violation of the following requirements:

(1) Monitoring and reporting of compliance data pursuant to 567—Chapters 41 and 43, which includes any contaminant with a maximum contaminant level, treatment technique, action level, or health advisory;

(2) Treatment techniques:

1. Filtration and disinfection prescribed by 567—43.5(455B). For systems which have failed to install adequate filtration or disinfection equipment or processes, or have had a failure of such equipment or processes which constitutes a violation, the report must include the following language as part of the explanation of potential adverse health effects: Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.

2. Lead and copper control requirements. For systems which fail to take one or more actions prescribed by 567—Chapters 41 to 43 pertaining to lead and copper, the report must include the applicable language of Appendix C to this chapter for lead or copper, or both.

3. Acrylamide and epichlorohydrin control technologies prescribed by 567—subparagraph 41.5(1) “b”(3). For systems which violate the requirements of 567—subparagraph 41.5(1) “b”(3), the report must include the relevant language from Appendix C to this chapter.

(3) Record keeping of compliance data pursuant to 567—Chapters 40 to 43;

(4) Special monitoring requirements; and

(5) Violation of the terms of operation permit compliance schedule, or an administrative order or judicial order.

e. Operation permit or administrative order with a schedule which extends the time period in which compliance must be achieved. If a system has been issued a compliance schedule with an extension for compliance, the report must contain:

(1) An explanation of the reasons for the extension;

(2) The date on which the extension was issued;

(3) A brief status report on the steps the system is taking to install treatment, find alternative sources of water, or otherwise comply with the terms of the compliance schedule; and

(4) A notice of any opportunity for public input in the review or renewal of the compliance schedule.

f. Mandatory report language for explanation of contaminant occurrence. The reports must contain a brief explanation regarding contaminants which may reasonably be expected to be found in drinking water including bottled water. This explanation may include the language of the following subparagraphs (1) to (3). Subparagraph (4) is provided as a minimal alternative to subparagraphs (1) to (3). Systems may also develop their own comparable language. The report also must include the language of 42.3(3) “g.”

(1) The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

(2) Contaminants that may be present in source water include:

1. Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

2. Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

3. Pesticides and herbicides, which may come from a variety of sources such as agriculture, storm water runoff, and residential uses.

4. Organic chemical contaminants, including synthetic and volatile organics, which are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff and septic systems.

5. Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

(3) In order to ensure that tap water is safe to drink, the department prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. The United States Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

(4) Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the national Safe Drinking Water Hotline ((800)426-4791).

g. Required additional health information.

(1) All systems. All reports must prominently display the following language: Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. The EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the national Safe Drinking Water Hotline ((800)426-4791).

(2) Arsenic levels greater than 0.005 mg/L.

1. A system which detects arsenic at levels above 0.005 mg/L and less than or equal to 0.010 mg/L:

- Must include in its report a short information statement about arsenic, using language such as: While your drinking water meets EPA's standard for arsenic, it does contain low levels of arsenic. EPA's standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

- May write its own educational statement, but only in consultation with the department.

2. A community water system that detects arsenic above 0.010 mg/L and less than or equal to 0.05 mg/L must include the arsenic health effects language prescribed by Appendix C to this chapter.

(3) Nitrate levels greater than half the MCL (5.0 mg/L). A system which detects nitrate at levels above 5.0 mg/L, but below the MCL:

1. Must include a short informational statement about the impacts of nitrate on children using language such as: Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue baby syndrome. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity. If you are caring for an infant you should ask advice from your health care provider.

2. May write its own education statement, but only in consultation with the department.

(4) Nitrite levels greater than half the MCL (0.50 mg/L). A system which detects nitrite at levels above 0.50 mg/L, but below the MCL:

1. Must include a short informational statement about the impacts of nitrite on children using language such as: Nitrite in drinking water at levels above 1 ppm is a health risk for infants of less than six months of age. High nitrite levels in drinking water can cause blue baby syndrome. If you are caring for an infant you should ask advice from your health care provider.

2. May write its own education statement, but only in consultation with the department.

(5) Lead information statement for all CWS. Every report must include the following lead-specific information:

1. A short informational statement about lead in drinking water and the effects it has on children. The statement must include the following information:

"If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from material and components associated with service lines and home plumbing. [insert name of system] is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water,

testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (800)426-4791 or at www.epa.gov/safewater/lead.”

2. A system may write its own educational statement, but only in consultation with the department.

(6) Total trihalomethane (TTHM) levels above 0.080 mg/L but less than the MCL. Community water systems that detect TTHM above 0.080 mg/L, but below the MCL in 567—subrule 41.5(1), as an annual average, monitored and calculated under the provisions of 567—paragraph 41.5(1) “e,” must include the health effects language for total trihalomethanes listed in Appendix C.

h. Additional mandatory report requirements.

(1) The report must include the telephone number of the owner, operator, or designee of the community water system as a source of additional information concerning the report.

(2) In communities with a large proportion of non-English speaking residents, as determined by the department, the report must contain information in the appropriate language(s) regarding the importance of the report or contain a telephone number or address where such residents may contact the system to obtain a translated copy of the report or assistance in the appropriate language.

(3) The report must include information (e.g., time and place of regularly scheduled board meetings) about opportunities for public participation in decisions that may affect the quality of the water.

(4) The systems may include such additional information as they deem necessary for the public education consistent with, and not detracting from, the purpose of the report.

(5) Systems required to comply with 567—41.7(455B), the groundwater rule, must include the following when applicable:

1. Any groundwater system that receives notice from the department of a significant deficiency must inform its customers of any significant deficiency that is uncorrected at the time of the next report. The system must continue to inform the public annually until the department determines that particular significant deficiency is corrected. Each report must include the following elements:

- The nature of the particular significant deficiency and the date the significant deficiency was identified by the department; and
- For each significant deficiency, the department-approved plan and schedule for correction, including interim measures, progress to date, and any interim measures completed.

Only if directed by the department, a system with significant deficiencies that have been corrected before the next report is issued must inform its customers of the significant deficiency, how the deficiency was corrected, and the date of correction.

2. Any groundwater system that receives notice from the department or laboratory of a fecal indicator-positive groundwater source sample that is not invalidated by the department under 567—paragraph 41.7(3) “d” must inform its customers of any fecal indicator-positive groundwater source sample in the next report. The system must continue to inform the public annually until the department determines that the fecal contamination in the groundwater source is addressed under 567—paragraph 41.7(4) “a.” Each report must include the following elements:

- The source of the fecal contamination (if the source is known) and the dates of the fecal indicator-positive groundwater source samples;
- Whether the fecal contamination in the groundwater source has been addressed under 567—paragraph 41.7(4) “a” and the date of such action;
- For each fecal contamination in the groundwater source that has not been addressed under 567—paragraph 41.7(4) “a,” the department-approved plan and schedule for correction, including interim measures, progress to date, and any interim measures completed; and
- If the system receives notice of a fecal indicator-positive groundwater source sample that is not invalidated by the department under 567—paragraph 41.7(3) “d,” the potential health effects, using the “Fecal coliform or *E. coli*” or “Fecal Indicators (enterococci or coliphage)” health effects language of Appendix C in Chapter 42.

(6) Pursuant to 567—subrule 41.2(1), any system required to comply with the Level 1 assessment requirement or a Level 2 assessment requirement that is not due to an *E. coli* MCL violation must include

in the report the text in 42.3(3) “h”(6)“1” to “3” as appropriate, filling in the blanks accordingly and including the text found in the bulleted paragraphs of 42.3(3) “h”(6)“4” if appropriate.

1. Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that the potential pathway exists through which contamination may enter the drinking water distribution system. We found coliforms indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessment(s) to identify problems and to correct any problems that were found during these assessments.

2. During the past year, we were required to conduct [insert number of required Level 1 assessments] Level 1 assessment(s). [insert number of completed Level 1 assessments] Level 1 assessment(s) were completed. In addition, we were required to take [insert number of required corrective actions] corrective actions, and we completed [insert number of completed corrective actions] of these actions.

3. During the past year, [insert number of required Level 2 assessments] Level 2 assessments were required to be completed for our water system. [insert number of completed Level 2 assessments] Level 2 assessment(s) were completed. In addition, we were required to take [insert number of required corrective actions] corrective actions, and we completed [insert number of completed corrective actions] of these actions.

4. Any system that has failed to complete all the required assessments or correct all identified sanitary defects is in violation of the treatment technique requirement and must also include one or both of the following statements, as appropriate:

- During the past year, we failed to conduct all of the required assessment(s).
- During the past year, we failed to correct all identified defects that were found during the assessment.

(7) Pursuant to 567—subrule 41.2(1), any system required to conduct a Level 2 assessment due to an *E. coli* MCL violation must include in the report the text in 42.3(3) “h”(7)“1” and “2” as appropriate, filling in the blanks accordingly and including the text found in the bulleted paragraphs of 42.3(3) “h”(7)“3” if appropriate.

1. *E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems. We found *E. coli* bacteria, indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessment(s) to identify problems and to correct any problems that were found during these assessments.

2. We were required to complete a Level 2 assessment because we found *E. coli* bacteria in our water system. In addition, we were required to take [insert number of required corrective actions] corrective actions, and we completed [insert number of completed corrective actions] of these actions.

3. Any system that has failed to complete the required assessment or correct all identified sanitary defects is in violation of the treatment technique requirement and must also include one or both of the following statements, as appropriate:

- We failed to conduct the required assessment.
- We failed to correct all sanitary defects that were identified during the assessment that we conducted.

(8) Pursuant to 567—subrule 41.2(1), if a system detects *E. coli* and violated the *E. coli* MCL, in addition to completing the table as required in 42.3(3) “c,” the system must include one or more of the following statements to describe any noncompliance, as applicable:

1. We had an *E. coli*-positive repeat sample following a total coliform-positive routine sample.
2. We had a total coliform-positive repeat sample following an *E. coli*-positive routine sample.
3. We failed to take all required repeat samples following an *E. coli*-positive routine sample.
4. We failed to test for *E. coli* when any repeat sample tested positive for total coliform.

(9) Pursuant to 567—subrule 41.2(1), if a system detects *E. coli* and has not violated the *E. coli* MCL, in addition to completing the table as required in 42.3(3)“c,” the system may include a statement that explains that although the system has detected *E. coli*, the system is not in violation of the *E. coli* MCL.

42.3(4) Report delivery.

a. Required report recipients. Each community water system must mail or otherwise directly deliver one copy of the report to each customer.

(1) The system must make a good-faith effort to reach consumers who do not get water bills, using means recommended by the department. An adequate good-faith effort will be tailored to the consumers who are served by the system but are not bill-paying customers, such as renters or workers. A good-faith effort to reach consumers would include a mix of methods appropriate to the particular system such as:

1. Posting the reports on the Internet;
2. Mailing to postal patrons in metropolitan areas;
3. Advertising the availability of the report in the news media;
4. Publication in a local newspaper;
5. Posting in public places such as cafeterias or lunchrooms of public buildings;
6. Delivery of multiple copies for distribution by single-billed customers such as apartment buildings or large private employers;
7. Delivery to community organizations.

(2) No later than the date the system is required to distribute the report to its customers, each community water system must mail a copy of the report to the department, followed within three months by a certification that the report has been distributed to customers, and that the information is correct and consistent with the compliance monitoring data previously submitted to the department.

(3) No later than the date the system is required to distribute the report to its customers, each community water system must deliver the report to any other agency or clearinghouse identified by the department, such as the Iowa department of public health or county board of health.

b. Availability of report. Each community water system must make its report available to the public upon request. Each community water system serving 100,000 or more persons must post its current year’s report to a publicly accessible site on the Internet.

c. Waiver from mailing requirements for systems serving fewer than 10,000 persons. All community public water supply systems with fewer than 10,000 persons served will be granted the waiver, except for those systems which have the following: one or more exceedances of a maximum contaminant level, treatment technique, action level, or health advisory; an administrative order; a court order; significant noncompliance with monitoring or reporting requirements; or an extended compliance schedule contained in the operation permit. Even though a public water supply system has been granted a mailing waiver, subparagraphs 42.3(4)“a”(2) and (3) and paragraph 42.3(4)“b” still apply to all community public water supply systems. A mailing waiver is not allowed for the report covering the year during which one of the previously listed exceptions occurred. Systems which use the mailing waiver must:

(1) Publish the reports in one or more local newspapers serving the area in which the system is located;

(2) Inform the customers that the reports will not be mailed, either in the newspapers in which the reports are published or by other means approved by the department; and

(3) Make the reports available to the public upon request.

d. Waiver from mailing requirements for systems serving 500 or fewer in population. All community public water supply systems serving 500 or fewer persons will be granted the waiver, except for those systems which have the following: one or more exceedances of a maximum contaminant level, treatment technique, action level, or health advisory; an administrative order; a court order; significant noncompliance with monitoring or reporting requirements; or an extended compliance schedule contained in the operation permit. Systems serving 500 or fewer persons which use the waiver may forego the requirements of subparagraphs 42.3(4)“c”(1) and (2) if they provide notice at least once per year to their customers by mail, door-to-door delivery, or by posting that the report is available upon

request, in conspicuous places within the area served by the system acceptable to the department. A mailing waiver is not allowed for the report covering the year during which one of the previously listed exceptions occurred. Even though a public water supply system has been granted a mailing waiver, subparagraphs 42.3(4)“a”(2) and (3) and paragraph 42.3(4)“b” still apply to all community public water supply systems.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—42.4(455B) Reporting.

42.4(1) Reporting requirements other than for lead and copper.

a. When required by the department, the supplier of water shall report to the department within ten days following a test, measurement or analysis required to be made by 567—Chapter 40, 41, 42, or 43 the results of that test, measurement or analysis in the form and manner prescribed by the department. This shall include reporting of all positive detects within the same specific analytical method.

b. Except where a different reporting period is specified in this rule or 567—Chapters 41 and 43, the supplier of water shall report to the department within 48 hours after any failure to comply with the monitoring requirements set forth in 567—Chapters 41 and 43. The supplier of water shall also notify the department within 48 hours of failure to comply with any primary drinking water regulations.

c. The public water supply system, within ten days of completion of each public notification required pursuant to 567—42.1(455B) for the initial public notice and any repeat notices, shall submit to the department a certification that it has fully complied with the public notification rules. The public water system must include with this certification a representative copy of each type of notice distributed, published, posted, or made available to the persons served by the system or to the media.

d. Groundwater rule. Additional reporting requirements for the groundwater rule are listed in 567—paragraph 41.7(6)“a.”

e. Coliform rule. Additional reporting requirements for the coliform rule are listed in 567—paragraph 41.2(1)“n.”

42.4(2) Lead and copper reporting requirements. All water systems shall report all of the following information to the department in accordance with this subrule.

a. *Reporting requirements for tap water monitoring for lead and copper and for water quality parameter monitoring.*

(1) Except as provided in 42.4(2)“a”(1)“8,” a water system shall report the information specified below for all tap water samples specified in 567—paragraph 41.4(1)“c” and for all water quality parameter samples specified in 567—paragraph 41.4(1)“d” within the first ten days following the end of each applicable monitoring period specified in 567—41.4(455B) (i.e., every six months, annually, or every three years). For monitoring periods with a duration of less than six months, the end of the monitoring period is the last date samples can be collected during that period as specified in 567—paragraphs 41.4(1)“c” and 41.4(1)“d.”

1. The results of all tap samples for lead and copper including the location of each site and the criteria under which the site was selected for the system’s sampling pool;

2. Documentation for each tap water lead or copper sample for which the water system requests invalidation pursuant to 567—paragraph 41.4(1)“c”(6)“2”;

3. Rescinded IAB 1/7/04, effective 2/11/04;

4. The 90th percentile lead and copper concentrations measured from among all lead and copper tap water samples collected during each monitoring period (calculated in accordance with 567—subparagraph 41.4(1)“b”(3));

5. With the exception of initial tap sampling conducted pursuant to 567—paragraph 41.4(1)“c”(4)“1,” the system shall designate any site which was not sampled during previous monitoring periods, and include an explanation of why sampling sites have changed;

6. The results of all tap samples for pH and, where applicable, alkalinity, calcium, conductivity, temperature, and orthophosphate or silica collected under 567—subparagraphs 41.4(1)“d”(2) through (5);

7. The results of all samples collected at the entry point(s) to the distribution system for applicable water quality parameters under 567—subparagraphs 41.4(1)“d”(2) and (5); and

8. A water system shall report the results of all water quality parameter samples collected under 567—subparagraphs 41.4(1)“d”(3) through (6) during each six-month monitoring period specified in 567—subparagraph 41.4(1)“d”(4) within the first ten days following the end of the monitoring period, unless the department has specified a more frequent reporting requirement.

(2) Certain systems that do not have enough taps that can provide first-draw samples that have met the six-hour stand time criteria, such as an NTNC that has 24-hour operation or a CWS that meets the criteria of 42.2(2)“b”(7), must either:

1. In the case where the department has not approved the non-first-draw sample sites, provide written documentation to the department identifying stand times and locations for enough non-first-draw samples to make up its sampling pool under 567—paragraph 41.4(1)“c”(2)“5” by July 1, 2003; or

2. If the department has already approved the non-first-draw sample sites selected by the system, identify each site that did not meet the six-hour minimum stand time and the length of stand time for that particular substitute sample collected pursuant to 567—paragraph 41.4(1)“c”(2)“5.” Certain systems include this information in writing with the lead and copper tap sample results required to be submitted pursuant to 567—paragraph 41.4(1)“d”(1)“1.”

(3) At a time specified by the department or, if no specific time is designated by the department, then as early as possible prior to the addition of a new source or any long-term change in water treatment, a water system that has optimized corrosion control under 567—subparagraph 43.7(1)“b”(3), a water system subject to reduced monitoring pursuant to 567—paragraph 41.4(1)“c”(4)“4,” or a water system subject to a monitoring waiver pursuant to 567—subparagraph 41.4(1)“c”(7) shall send written documentation to the department describing the change or addition. The department must review and approve the addition of a new source or long-term change in treatment before it is implemented by the water system. Examples of long-term treatment changes include the addition of a new treatment process or modification of an existing treatment process. Examples of modifications include the switching of secondary disinfectants, switching of coagulants (e.g., alum to ferric chloride), and switching of corrosion inhibitor products (e.g., orthophosphate to blended phosphate). Long-term changes can include dose changes to existing chemicals if the system is planning long-term changes to its finished water pH or residual inhibitor concentration. Long-term treatment changes would not include chemical dose fluctuations associated with daily water quality changes. In those instances where prior department approval of the treatment change or new source is not required, water systems are encouraged to provide the notification to the department beforehand to minimize the risk that the treatment change or new source will adversely affect optimal corrosion control.

(4) Any small system applying for a monitoring waiver under 567—subparagraph 41.4(1)“c”(7), or subject to a waiver granted pursuant to 567—paragraph 41.4(1)“c”(7)“3,” shall provide the following information to the department in writing by the specified deadline:

1. By the start of the first applicable monitoring period in 567—subparagraph 41.4(1)“c”(4), any small water system applying for a monitoring waiver shall provide the documentation required to demonstrate that it meets the waiver criteria of 567—paragraphs 41.4(1)“c”(7)“1” and “2.”

2. No later than nine years after the monitoring previously conducted pursuant to 567—paragraph 41.4(1)“c”(7)“2” or 567—paragraph 41.4(1)“c”(7)“4,” first bulleted paragraph, each small system desiring to maintain its monitoring waiver shall provide the information required by 567—paragraph 41.4(1)“c”(7)“4,” first and second bulleted paragraphs.

3. No later than 60 days after the system becomes aware that it is no longer free of lead-containing or copper-containing materials, as appropriate, each small system with a monitoring waiver shall provide written notification to the department, setting forth the circumstances resulting in the lead-containing or copper-containing materials being introduced into the system and what corrective action, if any, the system plans to remove these materials.

(5) Each groundwater system that limits water quality parameter monitoring to a subset of entry points under 567—paragraph 41.4(1)“d”(3)“3” shall provide, by the commencement of such monitoring, written correspondence to the department that identifies the selected entry points and

includes information sufficient to demonstrate that the sites are representative of water quality and treatment conditions throughout the system.

b. Source water monitoring reporting requirements.

(1) A water system shall report the sampling results for all source water samples collected in accordance with 567—paragraph 41.4(1)“e” within the first ten days following the end of each source water monitoring period (i.e., annually, per compliance period or per compliance cycle) specified in 567—paragraph 41.4(1)“e.”

(2) With the exception of the first round of source water sampling conducted pursuant to 567—subparagraph 41.4(1)“e”(2), the system shall specify any site which was not sampled during previous monitoring periods, and include an explanation of why the sampling point has changed.

c. Corrosion control treatment reporting requirements. By the applicable dates under 567—subrule 43.7(1), systems shall report the following information:

(1) For systems demonstrating that they have already optimized corrosion control, information required in 567—subparagraph 43.7(1)“b”(2) or (3).

(2) For systems required to optimize corrosion control, their recommendation regarding optimal corrosion control treatment under 567—paragraph 43.7(2)“a.”

(3) For systems required to evaluate the effectiveness of corrosion control treatments under 567—paragraph 43.7(2)“c,” the information required by that paragraph.

(4) For systems required to install optimal corrosion control designated by the department under 567—paragraph 43.7(2)“d,” a letter certifying that the system has completed installing that treatment.

d. Source water treatment reporting requirements. By the applicable dates in 567—subparagraph 43.7(3)“b”(1), systems shall provide the following information to the department:

(1) If required under 567—subparagraph 43.7(3)“b”(1), their recommendation regarding source water treatment;

(2) For systems required to install source water treatment under 567—subparagraph 43.7(3)“b”(1), a letter certifying that the system has completed installing the treatment designated by this department within 24 months after the department designated the treatment.

e. Lead service line replacement reporting requirements. Systems shall report the following information to demonstrate compliance with the requirements of 567—subrule 43.7(4):

(1) No later than 12 months after the end of a monitoring period in which a system exceeds the lead action level in sampling referred to in 567—paragraph 43.7(4)“a,” the system must submit to the department written documentation of the material evaluation pursuant to 567—subparagraph 41.4(1)“c”(1), identify the initial number of lead service lines in its distribution system at the time the system exceeds the lead action level, and provide the department with the system’s schedule for replacing annually at least 7 percent of the initial number of lead service lines in its distribution system.

(2) No later than 12 months after the end of a monitoring period in which a system exceeds the lead action level in sampling referred to in 567—paragraph 43.7(4)“a” and every 12 months thereafter, the system shall demonstrate in writing that the system has either:

1. Replaced in the previous 12 months at least 7 percent of the initial lead service lines (or a greater number of lines specified by the department under 567—paragraph 43.7(4)“e” in its distribution system), or

2. Conducted sampling which demonstrates that the lead concentration in all service line samples from individual line(s), taken pursuant to 567—paragraph 41.4(1)“c”(2)“3,” is less than or equal to 0.015 mg/L. In such cases, the total number of lines replaced and those lines which meet the criteria in 567—paragraph 43.7(4)“c” shall equal at least 7 percent of the initial number of lead lines identified under 42.4(2)“e”(1) or the percentage specified by the department under 567—paragraph 43.7(4)“e.” A lead service line meeting the criteria of 567—paragraph 43.7(4)“c” may only be used to comply with the 7 percent criteria for a specific year, and may not be used again to calculate compliance with the 7 percent criteria in future years.

(3) The annual letter submitted to the department under 42.4(2)“e”(2) shall contain the following information:

1. The number of lead service lines scheduled to be replaced during the previous year of the system's replacement schedule;

2. The number and location of each lead service line replaced during the previous year of the system's replacement schedule;

3. If measured, the water lead concentration and location of each lead service line sampled, the sampling method, and the date of sampling.

(4) Any system which collects lead service line samples following partial lead service line replacement required by 567—subrule 43.7(4) shall report the results to the department within the first ten days of the month following the month in which the system receives the laboratory results, or as specified by the department. Systems shall also report any additional information as specified by the department, and in a time and manner prescribed by the department, to verify that all partial lead service line replacement activities have taken place.

f. Public education program reporting requirements.

(1) Any water system that is subject to the public education requirements in 42.2(2) shall, within ten days after the end of each period in which the system is required to perform public education in accordance with 42.2(2) "b," send written documentation to the department that contains:

1. A demonstration that the system has delivered the public education materials that meet the content requirements in 42.2(2) "a" and the delivery requirements in 42.2(2) "b"; and

2. A list of all the newspapers, radio stations, television stations, facilities and organizations to which the system delivered public education materials during the period in which the system was required to perform public education tasks.

(2) Unless required by the department, a system that previously has submitted the information required by 42.4(2) "f"(1) "2" need not resubmit the same information, provided there have been no changes in the distribution list and the system certifies that the public education materials were distributed to the same list previously submitted. The certification is due within ten days after the end of each period in which the system is required to perform public education.

(3) No later than three months following the end of the monitoring period, each system must mail a sample copy of the consumer notification of tap results to the department along with a certification that the notification has been distributed in a manner consistent with the requirements of 42.2(1).

g. Reporting of additional monitoring data. A system which collects sampling data in addition to that required by 567—Chapters 41 and 43 shall report the results to the department within the first ten days following the end of the applicable monitoring period under 567—paragraphs 41.4(1) "c," "d," and "e" during which the samples are collected.

42.4(3) Operation and maintenance for PWS.

a. Required records of operation.

(1) Applicability. Monthly records of operation shall be completed by all public water supplies, on forms provided by the department or on similar forms, unless a public water supply meets all of the following conditions:

1. Supplies an annual average of not more than 25,000 gpd or serves no more than an average of 250 individuals daily;

2. Is a community public water supply and does not provide any type of treatment, or is a noncommunity system (NTNC and TNC) which has only a cation-exchange softening or iron/manganese removal treatment unit, and meets the requirements of 42.4(3) "a"(2) "7";

3. Does not utilize either a surface water or a groundwater under the direct influence of surface water either in whole or in part as a water source;

4. Does not use a treatment technique such as blending to achieve compliance with a maximum contaminant level, treatment technique, action level, or health advisory.

The reports shall be completed as described in 42.4(3) "a"(2) and maintained at the facility for inspection by the department for a period of five years. For CWS and NTNC PWSs, the monthly operation report must be signed by the certified operator in charge. For TNC PWSs, the monthly operation report, if required by the department, must be signed by the owner or the owner's designee.

All public water supplies using a surface water or influenced groundwater source must also comply with the applicable record-keeping requirements in 567—43.5(455B), 567—43.9(455B), 567—43.10(455B), and 567—43.11(455B).

(2) Contents. Monthly operation reports shall be completed as follows:

1. Pumpage or flow. Noncommunity supplies shall measure and record the total water used each week. It is recommended that a daily measurement and recording be made. Community supplies shall measure and record daily water used. Reporting of pumpage or flow may be required in an operation permit where needed to verify MCL compliance.

2. Treatment effectiveness. Where treatment is practiced, the intended effect of the treatment shall be measured at locations and by methods which best indicate effectiveness of the treatment process. These measurements shall be made pursuant to Appendix B of this chapter. Daily monitoring is seven days a week unless otherwise specified by the department.

3. Treatment effectiveness for a primary standard. Where the raw water quality does not meet the requirements of 567—Chapters 41 and 43 and treatment is practiced for the purpose of complying with a maximum contaminant level, action level, health advisory, or treatment technique criteria, daily measurement of the primary standard constituent or an appropriate indicator constituent designated by the department shall be recorded. The department will require reporting of these results in the operation permit to verify MCL compliance.

4. Treatment effectiveness for a secondary standard. Where treatment is practiced for the purpose of achieving the recommended level of any constituent designated in the federal secondary standards, measurements shall be measured and recorded at a frequency specified in Appendix B. Daily monitoring is seven days a week unless otherwise specified by the department.

5. Chemical application. Chemicals such as fluoride, iodine, bromine and chlorine, which are potentially toxic in excessive concentration, shall be measured and recorded daily. Recording shall include the amount of chemical applied each day. Where the supplier of water is attempting to maintain a residual of the chemical throughout the system, such as chlorine, the residual in the system shall be recorded daily. The quantity of all other chemicals applied shall be measured and recorded at least once each week.

6. Static water levels and pumping water levels must be measured and recorded once per month for all groundwater sources. More or less frequent measurements may be approved by the department where historical data justifies it.

7. Noncommunity systems (NTNC and TNC) are exempt from the self-monitoring requirements for cation-exchange softening and iron/manganese removal if the treatment unit:

- Is a commercially available “off-the-shelf” unit designed for home use;
- Is self-contained, requiring only a piping connection for installation;
- Operates throughout a range of 35 to 80 psi; and
- Has not been installed for the purpose of removing a contaminant which has a maximum contaminant level, treatment technique, action level, or health advisory.

b. Chemical quality and application. Any drinking water system chemical which is added to raw, partially treated, or finished water must be suitable for the intended use in a potable water system. Effective on October 1, 2000, the chemical must be certified by an American National Standards Institute (ANSI) accredited third party for conformance with American National Standards Institute/National Sanitation Foundation (ANSI/NSF) Standard 60, if such certification exists for the particular product, unless certified chemicals are not reasonably available for use, in accordance with guidelines provided by the department. If the chemical is not certified to meet the ANSI/NSF Standard 60 or no certification is available, the person seeking to supply or use the chemical must prove to the satisfaction of the department that the chemical is not toxic or otherwise a potential hazard in a potable public water supply system.

The supplier of water shall keep a record of all chemicals used. This record should include a clear identification of the chemical by brand or generic name and the dosage rate. When chemical treatment is applied with the intent of obtaining an in-system residual, the residuals will be monitored regularly.

When chemical treatment is applied and in-system residuals are not expected, the effectiveness of the treatment will be monitored through an appropriate indicative parameter.

(1) Continuous disinfection.

1. When required. Continuous disinfection must be provided at all public water supply systems, except for the following: groundwater supplies that have no treatment facilities or have only fluoride, sodium hydroxide or soda ash addition and that meet the bacterial standards as provided in 567—subrule 41.2(1) and do not show other actual or potential hazardous contamination by microorganisms. For a noncommunity system that only uses a cation-exchange softening unit that meets the requirements of 42.3(4)“a”(7), the requirement for continuous disinfection is based upon the system’s history of both coliform bacteria detection and compliance with the coliform bacteria monitoring requirements as provided in 567—subrule 41.2(1).

2. Method. Chlorine is the preferred disinfecting agent. Chlorination may be accomplished with liquid chlorine, calcium or sodium hypochlorites or chlorine dioxide. Other disinfecting agents will be considered, provided a residual can be maintained in the distribution system, reliable application equipment is available and testing procedures for a residual are recognized in Standard Methods for the Analysis of Water and Wastewater.

3. Chlorine residual. A minimum free available chlorine residual of 0.3 mg/L or a minimum total available chlorine residual of 1.5 mg/L must be continuously maintained throughout the water distribution system, except for those points in the distribution system that terminate as dead ends or areas that represent very low use when compared to usage throughout the rest of the distribution system as determined by the department. All systems using water to which chlorine has been added must monitor daily in the distribution system to ensure the minimum disinfectant residual concentration is met, including both wholesale systems and consecutive systems.

4. Test kit. A test kit capable of measuring free and combined chlorine residuals in increments no greater than 0.1 mg/L in the range below 0.5 mg/L, and in increments no greater than 0.2 mg/L in the range from 0.5 mg/L to 1.0 mg/L, and in increments no greater than 0.3 mg/L in the range from 1.0 mg/L to 2.0 mg/L must be provided at all chlorination facilities. The test kit must use a method of analysis that is recognized in Standard Methods for the Examination of Water and Wastewater.

5. Leak detection, control and operator protection. A bottle of at least 56 percent ammonium hydroxide must be provided at all gas chlorination installations for leak detection. Leak repair kits must be available where ton chlorine cylinders are used.

6. Other disinfectant residuals. If an alternative disinfecting agent is approved by this department, the residual levels and type of test kit used will be assigned by the department in accordance with and based upon analytical methods contained in Standard Methods for the Examination of Water and Wastewater.

(2) Phosphate compounds.

1. When phosphate compounds are to be added to any public water supply system which includes iron or manganese removal or ion-exchange softening, such compounds must be applied after the iron or manganese removal or ion-exchange softening treatment units, unless the director has received and approved an engineering report demonstrating the suitability for addition prior to these units in accordance with the provisions of 567—subrule 43.3(2). The department may require the discontinuance of phosphate addition where it interferes with other treatment processes, the operation of the water system or if there is a significant increase in microorganism populations associated with phosphate application.

2. The total phosphate concentration in the finished water must not exceed 10 mg/L as PO₄.

3. Chlorine shall be applied to the phosphate solution in sufficient quantity to give an initial concentration of 10 mg/L in the phosphate solution. A chlorine residual must be maintained in the phosphate solution at all times.

4. Test kits capable of measuring polyphosphate and orthophosphate in a range from 0.0 to 10.0 mg/L in increments no greater than 0.1 mg/L must be provided.

5. Continuous application or injection of phosphate compounds directly into a well is prohibited.

(3) Fluorosilicic acid. Where fluorosilicic acid (H_2SiF_6 , also called hydrofluosilicic acid) is added to a public water supply, the operator shall be equipped with a fluoride test kit with a minimum range of from 0.0 to 2.0 mg/L in increments no greater than 0.1 mg/L. Distilled water and standard fluoride solutions of 0.2 mg/L and 1.0 mg/L must be provided.

c. Reporting and record-keeping requirements for systems using surface water and groundwater under the direct influence of surface water. In addition to the monitoring requirements required by 42.4(3) "a" and "b," a public water system that uses a surface water source or a groundwater source under the direct influence of surface water must report monthly to the department the information specified in this subrule beginning June 29, 1993, or when filtration is installed, whichever is later.

(1) Turbidity measurements as required by 567—subrule 43.5(3) must be reported within ten days after the end of each month the system serves water to the public. Information that must be reported includes:

1. The total number of filtered water turbidity measurements taken during the month.
2. The number and percentage of filtered water turbidity measurements taken during the month which are less than or equal to the turbidity limits specified in 567—paragraphs 43.5(3) "b" through "e" for the filtration technology being used.
3. The date and value of any turbidity measurements taken during the month which exceed 5 NTU. If at any time the turbidity exceeds 5 NTU, the system must inform the department as soon as possible, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements in 42.1(2). This requirement is in addition to the monthly reporting requirement, pursuant to 567—43.5(455B).

(2) Disinfection information specified in 567—subrule 43.5(2) and paragraph 42.4(3) "b" must be reported to the department within ten days after the end of each month the system serves water to the public. Information that must be reported includes:

1. For each day, the lowest measurement of residual disinfectant concentration in mg/L in water entering the distribution system.
2. The date and duration of each period when the residual disinfectant concentration in water entering the distribution system fell below 0.3 mg/L free residual chlorine or 1.5 mg/L total residual chlorine and when the department was notified of the occurrence.

If at any time the residual falls below 0.3 mg/L free residual chlorine or 1.5 mg/L total residual chlorine in the water entering the distribution system, the system must notify the department as soon as possible, but no later than by the end of the next business day. The system also must notify the department by the end of the next business day whether or not the residual was restored to at least 0.3 mg/L free residual chlorine or 1.5 mg/L total residual chlorine within four hours. This requirement is in addition to the monthly reporting requirement, pursuant to 567—43.5(455B).

3. The information on the samples taken in the distribution system in conjunction with total coliform monitoring listed in 567—paragraph 43.5(2) "d" and pursuant to 567—subparagraph 41.2(1) "c"(7).

(3) Total inactivation ratio. The total inactivation ratio must be calculated each day the treatment plant is in operation, pursuant to 567—paragraph 43.5(2) "a," and reported on the monthly operation report. If the total inactivation ratio is below 1.0, the system must notify the department within 24 hours.

d. Reporting and record-keeping requirements for disinfection byproducts, disinfectants, and disinfection byproduct precursors.

(1) General requirements.

1. In addition to the monitoring requirements required by 42.4(3) "a" and "b," a CWS or NTNC public water system that adds a chemical disinfectant to the water in any part of the drinking water treatment process or which provides water that contains a chemical disinfectant must report monthly to the department the information specified in this paragraph by the dates listed in 567—subparagraphs 41.6(1) "a"(3) and 43.6(1) "a"(3). A TNC public water system which adds chlorine dioxide as a disinfectant or oxidant must report monthly to the department the information specified in this paragraph by the dates listed in 567—paragraph 43.6(1) "a"(3) "3."

2. Systems required to sample quarterly or more frequently must report to the department within ten days after the end of each quarter in which samples were collected, notwithstanding the public

notification provisions of 567—42.1(455B). Systems required to sample less frequently than quarterly must report to the department within ten days after the end of each monitoring period in which samples were collected.

(2) Disinfection byproducts. Systems must report the information specified in the following table:

Disinfection Byproducts Reporting Table

| If you are a ... | You must report ... |
|---|--|
| System monitoring for TTHMs and HAA5 under the requirements of 567—subparagraph 41.6(1)“c”(4) on a quarterly or more frequent basis | <ol style="list-style-type: none"> 1. The number of samples taken during the last quarter. 2. The location, date, and result of each sample taken during the last quarter. 3. The arithmetic average of all samples taken in the last quarter. 4. The annual arithmetic average of the quarterly arithmetic averages for the last four quarters.* 5. Whether the MCL was exceeded. 6. Under Stage 2, any operational evaluation levels that were exceeded during the quarter, including the location and date and the calculated TTHM and HAA5 levels. |
| System monitoring for TTHMs and HAA5 under the requirements of 567—subparagraph 41.6(1)“c”(4) less frequently than quarterly, but at least annually | <ol style="list-style-type: none"> 1. The number of samples taken during the last year. 2. The location, date, and result of each sample taken during the last monitoring period. 3. The arithmetic average of all samples taken over the last year.* 4. Whether the MCL was exceeded. |
| System monitoring for TTHMs and HAA5 under the requirements of 567—subparagraph 41.6(1)“c”(4) less frequently than annually | <ol style="list-style-type: none"> 1. The location, date, and result of the last sample taken. 2. Whether the MCL was exceeded. |
| System monitoring for chlorite under the requirements of 567—subparagraph 41.6(1)“c”(3) | <ol style="list-style-type: none"> 1. The number of samples taken each month for the last 3 months. 2. The location, date, and result of each sample taken during the last quarter. 3. For each month in the reporting period, the arithmetic average of all samples taken in each three sample set taken in the month. 4. Whether the MCL was exceeded, and in which month it was exceeded. |
| System monitoring for bromate under the requirements of 567—subparagraph 41.6(1)“c”(2) | <ol style="list-style-type: none"> 1. The number of samples taken during the last quarter. 2. The location, date, and result of each sample taken during the last quarter. 3. The arithmetic average of the monthly arithmetic averages of all samples taken in the last year. 4. Whether the MCL was exceeded. |

*The calculation of the running annual average will transition from a system-wide RAA calculation under Stage 1 to a locational running annual average (LRAA) under Stage 2. The transition will commence according to the system schedule listed in 567—paragraph 41.6(1)“b.” Beginning at the end of the fourth calendar quarter that follows the compliance date, and at the end of each subsequent quarter, the system must report the arithmetic average of quarterly results for the last four quarters of each monitoring location. If the calculated LRAA based on fewer than four quarters of data would cause the MCL to be exceeded regardless of the monitoring results of subsequent quarters, the system must report this information to the department no later than the due date of the next compliance report.

(3) Disinfectants. In addition to the requirements in 567—subparagraph 41.2(1)“c”(7), systems must report the information specified in the following table:

Disinfectants Reporting Table

| If you are a ... | You must report ... |
|---|---|
| System monitoring for chlorine or chloramines under the requirements of 567—paragraph 43.6(1) “c”(1)“2” | <ol style="list-style-type: none"> 1. The number of samples taken during each month of the last quarter. 2. The monthly arithmetic average of all samples taken in each month for the last 12 months. 3. The arithmetic average of all monthly averages for the last 12 months. 4. Whether the MRDL was exceeded. |
| System monitoring for chlorine dioxide under the requirements of 567—paragraph 43.6(1) “c”(1)“3” | <ol style="list-style-type: none"> 1. The dates, results, and locations of samples taken during the last quarter. 2. Whether the MRDL was exceeded. 3. Whether the MRDL was exceeded in any two consecutive daily samples and whether the resulting violation was acute or nonacute. |

(4) Disinfection byproduct precursors and enhanced coagulation or enhanced softening. Systems must report the information specified in the following table:

Disinfection Byproduct Precursors and Enhanced Coagulation or
Enhanced Softening Reporting Table

| If you are a ... | You must report ... |
|---|---|
| System monitoring monthly or quarterly for TOC under the requirements of 567—subparagraph 43.6(1)“c”(2) and required to meet the enhanced coagulation or enhanced softening requirements in 567—subparagraph 43.6(3)“b”(2) or (3) | <ol style="list-style-type: none"> 1. The number of paired (source water and treated water, prior to continuous disinfection) samples taken during the last quarter. 2. The location, date, and result of each paired sample and associated alkalinity taken during the last quarter. 3. For each month in the reporting period that paired samples were taken, the arithmetic average of the percent reduction of TOC for each paired sample and the required TOC percent removal. 4. Calculations for determining compliance with the TOC percent removal requirements, as provided in 567—subparagraph 43.6(3)“c”(1). 5. Whether the system is in compliance with the enhanced coagulation or enhanced softening percent removal requirements in 567—paragraph 43.6(3)“b” for the last four quarters. |
| System monitoring monthly or quarterly for TOC under the requirements of 567—subparagraph 43.6(1)“c”(2) and meeting one or more of the alternative compliance criteria in 567—subparagraph 43.6(3)“a”(2) or (3) | <ol style="list-style-type: none"> 1. The alternative compliance criterion that the system is using. 2. The number of paired samples taken during the last quarter. 3. The location, date, and result of each paired sample and associated alkalinity taken during the last quarter. 4. The running annual arithmetic average based on monthly averages (or quarterly samples) of source water TOC for systems meeting a criterion in 567—paragraph 43.6(3)“a”(2)“1” or “3” or of treated water TOC for systems meeting the criterion in 567—paragraph 43.6(3)“a”(2)“2.” 5. The running annual arithmetic average based on monthly averages (or quarterly samples) of source water SUVA for systems meeting the criterion in 567—paragraph 43.6(3)“a”(2)“5” or of treated water SUVA for systems meeting the criterion in 567—paragraph 43.6(3)“a”(2)“6.” 6. The running annual average of source water alkalinity for systems meeting the criterion in 567—paragraph 43.6(3)“a”(2)“3” and of treated water alkalinity for systems meeting the criterion in 567—paragraph 43.6(3)“a”(3)“1.” 7. The running annual average for both TTHM and HAA5 for systems meeting the criterion in 567—paragraph 43.6(3)“a”(2)“3” or “4.” 8. The running annual average for the amount of magnesium hardness removal (as CaCO₃, in mg/L) for systems meeting the criterion in 567—paragraph 43.6(3)“a”(3)“2.” <p>Whether the system is in compliance with the particular alternative compliance criterion in 567—subparagraph 43.6(3)“a”(2) or (3).</p> |
| SW/IGW system on reduced monitoring for TTHM/HAA5 under the requirements of 567—paragraph 41.6(3)“d” | <p>For each treatment plant that treats surface or IGW source water, report the following:</p> <ol style="list-style-type: none"> 1. The number of source water TOC samples taken each month during the last quarter. 2. The date and result of each sample taken during the last quarter. 3. The quarterly average of monthly samples taken during the last quarter or the result of the quarterly sample. 4. The running annual average (RAA) of quarterly averages from the past four quarters. 5. Whether the TOC RAA exceeded 4.0 mg/L. |

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—42.5(455B) Record maintenance.

42.5(1) Record maintenance requirements. Any owner or operator of a public water system subject to the provisions of this rule shall retain on its premises or at a convenient location near its premises the following records:

a. Analytical records.

(1) Actual laboratory reports shall be kept, or data may be transferred to tabular summaries, provided that the following information is included:

1. The date, place, and time of sampling, and the name of the person who collected the sample;

2. Identification of the sample as to whether it was a routine distribution system sample, check sample, raw or process water sample or other special purpose sample;

3. Date of analysis;
4. Laboratory and person responsible for performing analysis;
5. The analytical technique or method used; and
6. The results of the analysis.

(2) Record retention for specific analytes.

1. Microbiological and turbidity: Records of microbiological analyses and turbidity analyses made pursuant to 567—Chapters 41 and 43 shall be kept for not less than five years.

2. Chemical: radionuclide, inorganic compounds, organic compounds. Records of chemical analyses made pursuant to 567—Chapter 41 shall be kept for not less than ten years. Additional lead and copper requirements are listed in 42.5(1)“b.”

b. Lead and copper record-keeping requirements. A system subject to the requirements of 42.4(2) shall retain on its premises original records of all data and analyses, reports, surveys, public education, letters, evaluations, schedules, and any other information required by 567—41.4(455B) and 567—Chapter 43. Each water system shall retain the records required by this subrule for 12 years.

c. Records of action (violation correction). Records of action taken by the system to correct violations of primary drinking water regulations (including administrative orders) shall be kept for not less than five years after the last action taken with respect to the particular violation involved.

d. Reports and correspondence relating to sanitary surveys. Copies of any written reports, summaries, or communications relating to sanitary surveys of the system conducted by the system itself, by a private consultant, or by any local, state or federal agency, shall be kept for a period of not less than ten years after completion of the sanitary survey involved.

e. Operation or construction permits. Records concerning an operation or a construction permit issued pursuant to 567—Chapter 43 to the system shall be kept for a period ending not less than ten years after the system achieves compliance with the maximum contaminant level, treatment technique, action level, or health advisory, or after the system in question completes the associated construction project.

f. Public notification. Records of public notification, including the Consumer Confidence Report, public notification examples, and public notice certifications, must be kept for at least five years.

g. Self-monitoring requirement records. The monthly records of operation must be completed as described in 42.4(3)“a”(2) and maintained at the facility for inspection by the department for a period of at least five years. All data generated at the facility to comply with the self-monitoring requirements must be retained for a period of at least five years, and must be maintained at the facility for inspection by the department. The data shall be in a form that allows easy retrieval and interpretation. Examples of data that must be retained include, but are not limited to, recorder charts, logbooks, bench sheets, SCADA records, and electronic files.

h. Monitoring plans. Copies of monitoring plans developed pursuant to 567—Chapters 41, 42, and 43 shall be kept for the same period of time as the records of analyses taken under the plans are required to be kept, unless otherwise specified.

i. Groundwater rule. Additional record-keeping requirements for the groundwater rule are listed in 567—paragraph 41.7(6)“b.”

j. Level 1 and 2 assessment forms and corrective action. These record-keeping requirements pertain to the coliform bacteria requirements in 567—subrule 41.2(1).

(1) The system must maintain any assessment form, regardless of who conducts the assessment, and documentation of corrective actions completed as a result of those assessments, or other available summary documentation of the sanitary defects and corrective actions taken under 567—paragraph 41.2(1)“m” for department review. This record must be maintained by the system for a period not less than five years after completion of the assessment or corrective action.

(2) The system must maintain a record of any repeat sample taken that meets department criteria for an extension of the 24-hour period for collecting repeat samples as provided for under 567—paragraph 41.2(1)“j.”

42.5(2) Reserved.

[**ARC 9915B**, IAB 12/14/11, effective 1/18/12; **ARC 3735C**, IAB 4/11/18, effective 5/16/18]

These rules are intended to implement Iowa Code sections 455B.171 through 455B.188 and 455B.190 through 455B.192.

APPENDIX A:
STANDARD HEALTH EFFECTS LANGUAGE FOR PUBLIC NOTIFICATION

| Contaminant | Standard Health Effects Language |
|--|---|
| Microbiological Contaminants | |
| Coliform assessment and/or corrective action violations, under 567—subrule 41.2(1) | <p>Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other potentially harmful waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system. We found coliforms indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessments to identify problems and to correct any problems that are found. [THE SYSTEM MUST INCLUDE THE FOLLOWING APPLICABLE SENTENCES]</p> <ul style="list-style-type: none"> ● We failed to conduct the required assessment. ● We failed to correct all identified sanitary defects that were found during the assessment(s). |
| <i>E. coli</i> | <i>E. coli</i> are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems. |
| <i>E. coli</i> assessment and/or corrective action violations, under 567—subrule 41.2(1) | <p><i>E. coli</i> are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems. We violated the standard for <i>E. coli</i>, indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct a detailed assessment to identify problems and to correct any problems that are found. [THE SYSTEM MUST INCLUDE THE FOLLOWING APPLICABLE SENTENCES]</p> <ul style="list-style-type: none"> ● We failed to conduct the required assessment. ● We failed to correct all identified sanitary defects that were found during the assessment(s). |
| Seasonal system treatment technique violation | <ul style="list-style-type: none"> ● When this violation includes the failure to monitor for total coliforms or <i>E. coli</i> prior to serving water to the public, the mandatory language for monitoring violation in 42.1(5) “c”(2) must be used. ● When this violation includes failure to complete other actions, the appropriate elements found in 42.1(5) “c” to describe the violation must be used. |
| Fecal indicators for the groundwater rule (<i>E. coli</i> , enterococci, and coliphage) | Fecal indicators are microbes whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short-term health effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems. |
| Groundwater Treatment Technique Requirements | |
| Groundwater rule treatment technique violations | Inadequately treated or inadequately protected water may contain disease-causing organisms. These organisms can cause symptoms such as diarrhea, nausea, cramps, and associated headaches. |
| Surface Water Treatment Technique Requirements | |
| Turbidity | Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease-causing organisms. These organisms include bacteria, viruses, protozoa, and parasites that can cause symptoms such as nausea, cramps, diarrhea, and associated headaches, and can lead to death. |

| Contaminant | Standard Health Effects Language |
|---|---|
| Surface water/IGW system treatment technique requirements: CT ratio; residual disinfectant; log removal/inactivation of <i>Giardia</i> , viruses, and <i>Cryptosporidium</i> ; or filter backwash recycling | Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, protozoa, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches, and can lead to death. |
| Inorganic Chemical Contaminants | |
| Antimony | Some people who drink water containing antimony well in excess of the MCL over many years could experience increases in blood cholesterol and decreases in blood sugar. |
| Arsenic | Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with their circulatory system, and may have an increased risk of getting cancer. |
| Asbestos | Some people who drink water containing asbestos in excess of the MCL over many years may have an increased risk of developing benign intestinal polyps. |
| Barium | Some people who drink water containing barium in excess of the MCL over many years could experience an increase in their blood pressure. |
| Beryllium | Some people who drink water containing beryllium well in excess of the MCL over many years could develop intestinal lesions. |
| Cadmium | Some people who drink water containing cadmium in excess of the MCL over many years could experience kidney damage. |
| Chromium, total | Some people who drink water containing chromium well in excess of the MCL over many years could experience allergic dermatitis. |
| Copper | Copper is an essential nutrient, but some people who drink water containing copper in excess of the action level over many years could suffer liver or kidney damage. People with Wilson's Disease should consult their personal doctor. |
| Cyanide | Some people who drink water containing cyanide well in excess of the MCL over many years could experience nerve damage or problems with their thyroid. |
| Fluoride | Some people who drink water containing fluoride in excess of the MCL over many years could get bone disease, including pain and tenderness of the bones. Fluoride in drinking water above 2.0 mg/L may cause mottling of children's teeth, usually in children less than nine years of age. Mottling, also known as dental fluorosis, may include brown staining and pitting of the teeth, and occurs only in developing teeth before they erupt from the gums. |
| Lead | Infants and children who drink water containing lead in excess of the action level could experience delays in their physical or mental development. Children could show slight deficits in attention span and learning abilities. Adults who drink this water over many years could develop kidney problems or high blood pressure. |
| Mercury, inorganic | Some people who drink water containing inorganic mercury well in excess of the MCL over many years could experience kidney damage. |
| Nitrate | Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome. |
| Nitrite | Infants below the age of six months who drink water containing nitrite in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome. |
| Total Nitrate and Nitrite | Infants below the age of six months who drink water containing nitrate and nitrite in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome. |
| Selenium | Selenium is an essential nutrient. However, some people who drink water containing selenium in excess of the MCL over many years could experience loss of hair or fingernails, numbness in fingers or toes, or problems with their circulation. |

| Contaminant | Standard Health Effects Language |
|---|---|
| Thallium | Some people who drink water containing thallium in excess of the MCL over many years could experience hair loss, changes in their blood, or problems with their kidneys, intestines, or liver. |
| Synthetic Organic Chemical Contaminants | |
| 2,4-D | Some people who drink water containing the weed killer 2,4-D well in excess of the MCL over many years could experience problems with their kidneys, liver, or adrenal glands. |
| 2,4,5-TP (Silvex) | Some people who drink water containing Silvex in excess of the MCL over many years could experience liver problems. |
| Alachlor | Some people who drink water containing alachlor in excess of the MCL over many years could have problems with their eyes, liver, kidneys, or spleen, or experience anemia, and may have an increased risk of getting cancer. |
| Atrazine | Some people who drink water containing atrazine well in excess of the MCL over many years could experience problems with their cardiovascular system or have reproductive difficulties. |
| Benzo(a)pyrene (PAHs) | Some people who drink water containing benzo(a)pyrene in excess of the MCL over many years may experience reproductive difficulties and may have an increased risk of getting cancer. |
| Carbofuran | Some people who drink water containing carbofuran in excess of the MCL over many years could experience problems with their blood, or nervous or reproductive systems. |
| Chlordane | Some people who drink water containing chlordane in excess of the MCL over many years could experience problems with their liver or nervous system, and may have an increased risk of getting cancer. |
| Dalapon | Some people who drink water containing dalapon well in excess of the MCL over many years could experience minor kidney changes. |
| Di(2-ethylhexyl)adipate | Some people who drink water containing di(2-ethylhexyl)adipate well in excess of the MCL over many years could experience toxic effects such as weight loss, liver enlargement, or possible reproductive difficulties. |
| Di(2-ethylhexyl)-phthalate | Some people who drink water containing di(2-ethylhexyl)phthalate well in excess of the MCL over many years may have problems with their liver, or experience reproductive difficulties, and may have an increased risk of getting cancer. |
| Dibromochloropropane (DBCP) | Some people who drink water containing DBCP in excess of the MCL over many years could experience reproductive difficulties and may have an increased risk of getting cancer. |
| Dinoseb | Some people who drink water containing dinoseb well in excess of the MCL over many years could experience reproductive difficulties. |
| Dioxin (2,3,7,8-TCDD) | Some people who drink water containing dioxin in excess of the MCL over many years could experience reproductive difficulties and may have an increased risk of getting cancer. |
| Diquat | Some people who drink water containing diquat in excess of the MCL over many years could get cataracts. |
| Endothall | Some people who drink water containing endothall in excess of the MCL over many years could experience problems with their stomach or intestines. |
| Endrin | Some people who drink water containing endrin in excess of the MCL over many years could experience liver problems. |
| Ethylene dibromide | Some people who drink water containing ethylene dibromide in excess of the MCL over many years could experience problems with their liver, stomach, reproductive system, or kidneys, and may have an increased risk of getting cancer. |
| Glyphosate | Some people who drink water containing glyphosate in excess of the MCL over many years could experience problems with their kidneys or reproductive difficulties. |

| Contaminant | Standard Health Effects Language |
|---|---|
| Heptachlor | Some people who drink water containing heptachlor in excess of the MCL over many years could experience liver damage and may have an increased risk of getting cancer. |
| Heptachlor epoxide | Some people who drink water containing heptachlor epoxide in excess of the MCL over many years could experience liver damage, and may have an increased risk of getting cancer. |
| Hexachlorobenzene | Some people who drink water containing hexachlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys, or adverse reproductive effects, and may have an increased risk of getting cancer. |
| Hexachloro-cyclopentadiene | Some people who drink water containing hexachlorocyclopentadiene well in excess of the MCL over many years could experience problems with their kidneys or stomach. |
| Lindane | Some people who drink water containing lindane in excess of the MCL over many years could experience problems with their kidneys or liver. |
| Methoxychlor | Some people who drink water containing methoxychlor in excess of the MCL over many years could experience reproductive difficulties. |
| Oxamyl (Vydate) | Some people who drink water containing oxamyl in excess of the MCL over many years could experience slight nervous system effects. |
| Pentachlorophenol | Some people who drink water containing pentachlorophenol in excess of the MCL over many years could experience problems with their liver or kidneys, and may have an increased risk of getting cancer. |
| Picloram | Some people who drink water containing picloram in excess of the MCL over many years could experience problems with their liver. |
| Polychlorinated byphenyls (PCBs) | Some people who drink water containing PCBs in excess of the MCL over many years could experience changes in their skin, problems with their thymus gland, immune deficiencies, or reproductive or nervous system difficulties, and may have an increased risk of getting cancer. |
| Simazine | Some people who drink water containing simazine in excess of the MCL over many years could experience problems with their blood. |
| Toxaphene | Some people who drink water containing toxaphene in excess of the MCL over many years could experience problems with their kidneys, liver, or thyroid, and may have an increased risk of getting cancer. |
| Volatile Organic Chemical Contaminants (VOCs) | |
| Benzene | Some people who drink water containing benzene in excess of the MCL over many years could experience anemia or a decrease in blood platelets, and may have an increased risk of getting cancer. |
| Carbon tetrachloride | Some people who drink water containing carbon tetrachloride in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer. |
| Chlorobenzene (monochlorobenzene) | Some people who drink water containing chlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys. |
| o-Dichlorobenzene | Some people who drink water containing o-dichlorobenzene well in excess of the MCL over many years could experience problems with their liver, kidneys, or circulatory system. |
| p-Dichlorobenzene | Some people who drink water containing p-dichlorobenzene in excess of the MCL over many years could experience anemia, damage to their liver, kidneys, or spleen, or changes in their blood. |
| 1,2-Dichloroethane | Some people who drink water containing 1,2-dichloroethane in excess of the MCL over many years may have an increased risk of getting cancer. |
| 1,1-Dichloroethylene | Some people who drink water containing 1,1-dichloroethylene in excess of the MCL over many years could experience problems with their liver. |
| cis-1,2-Dichloroethylene | Some people who drink water containing cis-1,2-dichloroethylene in excess of the MCL over many years could experience problems with their liver. |

| Contaminant | Standard Health Effects Language |
|-----------------------------|---|
| trans-1,2-Dichloroethylene | Some people who drink water containing trans-1,2-dichloroethylene well in excess of the MCL over many years could experience problems with their liver. |
| Dichloromethane | Some people who drink water containing dichloromethane in excess of the MCL over many years could have liver problems and may have an increased risk of getting cancer. |
| 1,2-Dichloropropane | Some people who drink water containing 1,2-dichloropropane in excess of the MCL over many years may have an increased risk of getting cancer. |
| Ethylbenzene | Some people who drink water containing ethylbenzene well in excess of the MCL over many years could experience problems with their liver or kidneys. |
| Styrene | Some people who drink water containing styrene well in excess of the MCL over many years could have problems with their liver, kidneys, or circulatory system. |
| Tetrachloroethylene | Some people who drink water containing tetrachloroethylene in excess of the MCL over many years could have problems with their liver, and may have an increased risk of getting cancer. |
| Toluene | Some people who drink water containing toluene in excess of the MCL over many years could have problems with their nervous system, kidneys, or liver. |
| 1,2,4-Trichlorobenzene | Some people who drink water containing 1,2,4-trichlorobenzene well in excess of the MCL over many years could experience changes in their adrenal glands. |
| 1,1,1-Trichloroethane | Some people who drink water containing 1,1,1-trichloroethane in excess of the MCL over many years could experience problems with their liver, nervous system, or circulatory system. |
| 1,1,2-Trichloroethane | Some people who drink water containing 1,1,2-trichloroethane well in excess of the MCL over many years could have problems with their liver, kidneys, or immune system. |
| Trichloroethylene | Some people who drink water containing trichloroethylene in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer. |
| Vinyl chloride | Some people who drink water containing vinyl chloride in excess of the MCL over many years may have an increased risk of getting cancer. |
| Xylene (total) | Some people who drink water containing total xylene in excess of the MCL over many years could experience damage to their nervous system. |
| Radionuclide Contaminants | |
| Alpha emitters | Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer. |
| Beta/photon emitters | Certain minerals are radioactive and may emit forms of radiation known as photons and beta radiation. Some people who drink water containing beta and photon emitters in excess of the MCL over many years may have an increased risk of getting cancer. |
| Combined radium (226 & 228) | Some people who drink water containing radium 226 or 228 in excess of the MCL over many years may have an increased risk of getting cancer. |
| Uranium | Some people who drink water containing uranium in excess of the MCL over many years may have an increased risk of getting cancer and kidney toxicity. |
| Disinfection Byproducts | |
| Bromate | Some people who drink water containing bromate in excess of the MCL over many years may have an increased risk of getting cancer. |
| Chlorite | Some infants and young children who drink water containing chlorite in excess of the MCL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorite in excess of the MCL. Some people may experience anemia. |
| Haloacetic Acids (HAA) | Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer. |

| Contaminant | Standard Health Effects Language |
|--|--|
| Total Trihalomethanes (TTHMs) | Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer. |
| Residual Disinfectants | |
| Chloramines | Some people who use water containing chloramines well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chloramines well in excess of the MRDL could experience stomach discomfort or anemia. |
| Chlorine | Some people who use water containing chlorine well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chlorine well in excess of the MRDL could experience stomach discomfort. |
| Chlorine dioxide—acute (one or more distribution samples exceed the MRDL) | Some infants and young children who drink water containing chlorine dioxide in excess of the MRDL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorine dioxide in excess of the MRDL. Some people may experience anemia. The chlorine dioxide violations reported today include exceedances of the standard within the distribution system which delivers water to consumers. Violations of the chlorine dioxide standard within the distribution system may harm human health based on short-term exposures. Certain groups, including fetuses, infants, and young children, may be especially susceptible to nervous system effects from excessive chlorine dioxide exposure. |
| Chlorine dioxide—non-acute (two consecutive daily samples taken at the source entry point to the distribution system are above the MRDL) | Some infants and young children who drink water containing chlorine dioxide in excess of the MRDL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorine dioxide in excess of the MRDL. Some people may experience anemia. The chlorine dioxide violations reported today are the result of exceedances at the treatment facility only, not within the distribution system which delivers water to consumers. Continued compliance with chlorine dioxide levels within the distribution system minimizes the potential risk of these violations to consumers. |
| Disinfection Byproduct Precursors | |
| Total Organic Carbon (TOC) | Total organic carbon has no health effects. However, total organic carbon provides a medium for the formation of disinfection byproducts. These byproducts include trihalomethanes and haloacetic acids. Drinking water containing these byproducts in excess of the MCL may lead to adverse health effects, liver, or kidney problems, or nervous system effects, and may lead to an increased risk of getting cancer. |
| Other Treatment Techniques | |
| Acrylamide | Some people who drink water containing high levels of acrylamide over a long period of time could have problems with their nervous system or blood, and may have an increased risk of getting cancer. |
| Epichlorohydrin | Some people who drink water containing high levels of epichlorohydrin over a long period of time could experience stomach problems, and may have an increased risk of getting cancer. |

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

**APPENDIX B:
MINIMUM SELF-MONITORING REQUIREMENTS (SMR)**

I. Minimum Self-Monitoring Requirements for TNCs (excluding surface water or influenced groundwater PWSs)

Notes:

- The self-monitoring requirements (SMRs) only apply to those supplies meeting the required operation records applicability criteria in 42.4(3) “a”(1).
- TNCs are exempt from the self-monitoring requirements for point-of-use treatment devices, unless the device is used to remove a contaminant which has a maximum contaminant level or treatment technique, in which case additional SMRs will be assigned by the department.
 - Daily monitoring for TNCs applies only when the facility is in operation.
 - Additional or more frequent monitoring requirements may be assigned by the department in the operation permit.
- Additional SMRs are required if treatment is used to remove a regulated contaminant. See Section II for the requirements under the specific treatment type.

General Requirements

All TNCs which meet the required operation records applicability criteria in 42.4(3) “a”(1) must measure the following parameters, where applicable. Additional SMRs are required if treatment is used to remove a contaminant which has a maximum contaminant level or treatment technique. See Section II for the requirements under the specific treatment type.

| | PWS Type: | TNC* |
|--|----------------------------------|------------------|
| Parameter | Sample Site | Frequency |
| Pumpage (Flow) | raw: final: | 1/week 1/week |
| Disinfectant Residual*** | final: distribution system**: | 1/day 1/day |
| Disinfectant, quantity used | day tank/scale: | 1/day |
| Static Water and Pumping Water Levels (Drawdown) | each active well: | 1/month |

*TNCs must measure and record the total water used each week, but daily measurements are recommended, and may be required by the department in specific PWSs.

**Monitoring is to be conducted at representative points in the distribution system which adequately demonstrate compliance with 42.4(3) “b”(1).

***The department may reduce the required sample site locations for a system with a minimal distribution system and only hydropneumatic tank storage.

II. Minimum Self-Monitoring Requirements for CWS, NTNC, and IGW/SW TNC

Notes:

- The self-monitoring requirements (SMR) only apply to those supplies meeting the required operation records applicability criteria in 42.4(3) “a”(1).
- NTNCs are exempt from the self-monitoring requirements for point-of-use treatment devices, unless the device is used to remove a contaminant which has a maximum contaminant level, treatment technique, action level, or health advisory, in which case additional SMRs will be assigned by the department.
 - Daily monitoring for NTNCs applies only when the facility is in operation.
 - These are the minimum self-monitoring requirements. Additional or more frequent monitoring requirements may be assigned by the department in the operation permit.

A. General Requirements

All PWSs which meet the required operation records applicability criteria in 42.4(3) "a"(1) must measure the following parameters, where applicable:

| | PWS Type: | NTNC* & IGW/SW TNC | CWS |
|--|---------------------------|----------------------------|-------------------------|
| Parameter | Sample Site | Frequency | Frequency |
| Pumpage (Flow) | raw: bypass: final: | 1/week 1/week 1/week | 1/day 1/day 1/day |
| Static Water and Pumping Water Levels (Drawdown) | each active well: | 1/month | 1/month |

*NTNCs must measure and record the total water used each week, but daily measurements are recommended, and may be required by the department in specific PWSs.

B. Chemical Addition

All PWSs which apply chemicals in the treatment process must monitor the following parameters, for the applicable processes:

| | Pumpage or Flow: | <0.1 MGD | 0.1-0.5 MGD | >0.5 MGD |
|-------------------------------|---------------------------------|--------------------|------------------|------------------|
| Parameter | Sample Site | Frequency | Frequency | Frequency |
| DISINFECTION | | | | |
| Disinfectant Residual** | final: distribution system*: | 1/day 1/day | 1/day 1/day | 1/day 1/day |
| Disinfectant, quantity used | day tank/scale: | 1/day | 1/day | 1/day |
| FLUORIDATION | | | | |
| Fluoride | raw: final: | 1/quarter 1/day | 1/month 1/day | 1/month 1/day |
| Fluoride, quantity used | day tank/scale: | 1/day | 1/day | 1/day |
| pH ADJUSTMENT | | | | |
| pH | final: | 1/week | 2/week | 1/day |
| Caustic Soda, quantity used | day tank/scale: | 1/week | 1/week | 1/week |
| PHOSPHATE ADDITION | | | | |
| Phosphate, as PO ₄ | final: | 1/week | 2/week | 1/day |
| Phosphate, quantity used | day tank/scale: | 1/week | 1/week | 1/week |
| OTHER CHEMICALS | | | | |
| Chemical | final: | 1/week | 2/week | 1/day |
| Chemical, quantity used | day tank/scale: | 1/week | 1/week | 1/week |

*Monitoring is to be conducted at representative points in the distribution system which adequately demonstrate compliance with 42.4(3) "b"(1).

**The department may reduce the required sample site locations for a system with a minimal distribution system, only hydropneumatic tank storage, and, if a CWS, it serves less than 100 persons.

C. Iron or Manganese Removal

Nonmunicipalities except rural water systems, benefited water districts, and publicly owned PWSs are exempt from monitoring of iron/manganese removal equipment unless the treatment is or was installed to remove a contaminant which has a maximum contaminant level, treatment technique, action level, or health advisory. Any chemicals which are applied during the treatment process must be measured under section “B. Chemical Addition” of this table.

| | Pumpage or Flow: | <0.1 MGD | 0.1-0.5 MGD | >0.5 MGD |
|-----------|------------------|-----------|-------------|-----------|
| Parameter | Sample Site | Frequency | Frequency | Frequency |
| Iron | raw: | 1/quarter | 1/month | 1/month |
| | final: | 1/week | 2/week | 1/day |
| Manganese | raw: | 1/quarter | 1/month | 1/month |
| | final: | 1/week | 2/week | 1/day |

D. pH Adjustment for Iron and Manganese Removal, by precipitation and coagulation processes utilizing lime, soda ash, or other chemical additions. Testing is only required if a specific chemical is added.

| | Pumpage or Flow: | <0.1 MGD | 0.1-0.5 MGD | >0.5 MGD |
|------------|------------------|-----------|-------------|-----------|
| Parameter | Sample Site | Frequency | Frequency | Frequency |
| Alkalinity | raw: | 1/quarter | 1/month | 1/month |
| | final: | 1/week | 2/week | 1/day |
| Iron | raw: | 1/quarter | 1/month | 1/month |
| | final: | 1/week | 2/week | 1/day |
| Manganese | raw: | 1/quarter | 1/month | 1/month |
| | final: | 1/week | 2/week | 1/day |
| pH | raw: | 1/week | 1/week | 1/week |
| | final: | 1/week | 2/week | 1/day |

E. Cation Exchange (Zeolite) Softening

Nonmunicipalities except for rural water systems and benefited water districts are exempt from the monitoring of water quality parameters associated with ion-exchange softening unless the treatment is or was installed to remove a contaminant which has a maximum contaminant level, treatment technique, action level, or health advisory. An annual sodium sample of the final water is required of all community systems that use cation exchange softening, and will also meet the special sodium monitoring requirement of 567—paragraph 41.11(1)“f.”

| | Pumpage or Flow: | <0.1 MGD | 0.1-0.5 MGD | >0.5 MGD |
|-------------------------------|------------------|-----------|-------------|-----------|
| Parameter | Sample Site | Frequency | Frequency | Frequency |
| Hardness as CaCO ₃ | raw: | 1/quarter | 1/month | 1/month |
| | final: | 1/week | 2/week | 1/day |
| pH | final: | 1/week | 2/week | 1/day |
| Sodium* | final: | 1/year | 1/year | 1/year |

*The annual sodium sample required in 567—paragraph 41.11(1)“f” will satisfy this requirement.

F. Direct Filtration of Surface Waters or Influenced Groundwaters

| | Pumpage or Flow: | All |
|-----------------------------|--|--|
| Parameter | Sample Site | Frequency |
| CT Ratio | final: | 1/day |
| Disinfectant Residual* | source/entry point: distribution system*: | continuous daily |
| Disinfectant, quantity used | day tank/scale: | 1/day |
| pH | final: | 1/day |
| Temperature | raw: | 1/day |
| Turbidity | raw: final: | see 567—subrules 43.5(3) and 43.5(4), and 567—43.9(455B) for the specific requirements |

*Monitoring is to be conducted to demonstrate compliance with paragraph 42.4(3) “b,” 567—subrules 43.5(2) and 43.5(4), and 567—43.6(455B).

G. Clarification or Lime Softening of Surface Waters or Influenced Groundwaters

| | Pumpage or Flow: | All |
|-------------------------------|--|--|
| Parameter | Sample Site | Frequency |
| Alkalinity | raw: final: | 1/day 1/day |
| Caustic Soda, quantity used | day tank/scale: | 1/week |
| CT Ratio | final: | 1/day |
| Disinfectant Residual* | source/entry point: distribution system*: | continuous daily |
| Disinfectant, quantity used | day tank/scale: | 1/day |
| Hardness as CaCO ₃ | raw: final: | 1/day 1/day |
| Odor | raw: final: | 1/week 1/day |
| pH | raw: final: | 1/day 1/day |
| Temperature | raw: | 1/day |
| Turbidity | raw: final: | see 567—subrules 43.5(3) and 43.5(4), and 567—43.9(455B) for the specific requirements |

*Monitoring is to be conducted to demonstrate compliance with paragraph 42.4(3) “b,” 567—subrules 43.5(2) and 43.5(4), and 567—43.6(455B).

H. Lime Softening of Groundwaters (excluding IGW)

| | Pumpage or Flow: | <0.1 MGD | >0.1 MGD |
|-------------------------------|------------------|-----------|-----------|
| Parameter | Sample Site | Frequency | Frequency |
| Alkalinity | raw: | 1/quarter | 1/month |
| | final: | 1/day | 1/day |
| Hardness as CaCO ₃ | raw: | 1/quarter | 1/month |
| | final: | 1/day | 1/day |
| pH | raw: | 1/week | 1/week |
| | final: | 1/day | 1/day |
| Temperature | raw: | 1/week | 1/week |

I. Reverse Osmosis or Electrodialysis

| | Pumpage or Flow: | <0.1 MGD | >0.1 MGD |
|-------------------------------|------------------|-----------|-----------|
| Parameter | Sample Site | Frequency | Frequency |
| Alkalinity | raw: | 1/quarter | 1/month |
| | final: | 1/day | 1/day |
| Hardness as CaCO ₃ | raw: | 1/quarter | 1/month |
| | final: | 1/day | 1/day |
| Iron | raw: | 1/day | 1/day |
| Manganese | raw: | 1/day | 1/day |
| pH | raw: | 1/week | 1/week |
| | final: | 1/day | 1/day |
| Total Dissolved Solids | raw: | 1/month | 1/month |

J. Anion Exchange (i.e., Nitrate Reduction)

| | Pumpage or Flow: | <0.1 MGD | >0.1 MGD |
|-----------|------------------|-----------|-----------|
| Parameter | Sample Site | Frequency | Frequency |
| Nitrate | raw: | 1/day | 1/day |
| | final: | 1/day | 1/day |
| Sulfate | raw: | 1/week | 1/week |
| | final: | 1/week | 1/week |

K. Activated Carbon for TTHM, VOC, or SOC Removal (GAC or PAC)

| | Pumpage or Flow: | <0.1 MGD | >0.1 MGD |
|----------------------------|------------------|-----------|-----------|
| Parameter | Sample Site | Frequency | Frequency |
| Total Organic Carbon (TOC) | final: | 1/quarter | 1/month |

L. Air-Stripping for TTHM, VOC, or SOC Removal

| | Pumpage or Flow: | <0.1 MGD | >0.1 MGD |
|----------------------------|------------------|-----------|-----------|
| Parameter | Sample Site | Frequency | Frequency |
| Total Organic Carbon (TOC) | final: | 1/quarter | 1/month |

M. Lead and Copper: Corrosion Control and Water Quality Parameters

The specific SMRs for corrosion control and water quality parameters are listed in 567—paragraph 41.4(1) “d” and 567—subrules 43.8(1) and 43.8(2).

N. Consecutive PWSs Supplied by a Surface Water or IGW PWS

| | Pumpage or Flow: | All |
|---|-----------------------|-----------|
| Parameter | Sample Site | Frequency |
| Disinfectant Residual | source/entry point: | 1/day |
| | distribution system*: | 1/day |
| Disinfectant, quantity used (if applicable) | day tank/scale: | 1/day |
| Pumpage or Flow | master meter: | 1/day |

*Monitoring is to be conducted at representative points in the distribution system.

APPENDIX C:
REGULATED CONTAMINANTS TABLE FOR CONSUMER CONFIDENCE REPORT

| Key | | | | | | |
|------------------------------|--------------|---------------------------------------|--|----------------------|--------------------------------------|---|
| | AL | | Action Level | | | |
| | MCL | | Maximum Contaminant Level | | | |
| | MCLG | | Maximum Contaminant Level Goal | | | |
| | MFL | | million fibers per liter | | | |
| | MRDL | | Maximum Residual Disinfectant Level | | | |
| | MRDLG | | Maximum Residual Disinfectant Level Goal | | | |
| | mrem/year | | millirems per year (a measure of radiation absorbed by the body) | | | |
| | n/a | | not applicable | | | |
| | NTU | | nephelometric turbidity units (a measure of water clarity) | | | |
| | pCi/L | | picocuries per liter (a measure of radioactivity) | | | |
| | ppb | | parts per billion, or micrograms per liter (µg/L) | | | |
| | ppm | | parts per million, or milligrams per liter (mg/L) | | | |
| | ppq | | parts per quadrillion, or picograms per liter (pg/L) | | | |
| | ppt | | parts per trillion, or nanograms per liter (ng/L) | | | |
| | TT | | Treatment Technique | | | |
| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
| Microbiological Contaminants | | | | | | |
| Total coliform bacteria | TT | | TT | n/a | Naturally present in the environment | Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|--|--|---------------------------------|--|-------------------|--------------------------------------|---|
| <i>E. coli</i> | Routine and repeat samples are total coliform-positive and either is <i>E. coli</i> -positive, or system fails to take repeat samples following <i>E. coli</i> -positive routine sample, or system fails to analyze total coliform-positive repeat sample for <i>E. coli</i> | | Routine and repeat samples are total coliform-positive and either is <i>E. coli</i> -positive, or system fails to take repeat samples following <i>E. coli</i> -positive routine sample, or system fails to analyze total coliform-positive repeat sample for <i>E. coli</i> | 0 | Human and animal fecal waste | <i>E. coli</i> are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems. |
| Fecal indicators (enterococci or coliphage) | TT | | TT | n/a | Human and animal fecal waste | Fecal indicators are microbes whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short-term health effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems. |
| Disinfection Byproduct Precursor Removal Requirements for Surface & Influenced Groundwater Systems | | | | | | |
| Total organic carbon (ppm) | TT | | TT | n/a | Naturally present in the environment | Total organic carbon (TOC) has no health effects. However, total organic carbon provides a medium for the formation of disinfection byproducts. These byproducts include trihalomethanes (THMs) and haloacetic acids (HAAs). Drinking water containing these byproducts in excess of the MCL may lead to adverse health effects, liver, or kidney problems, or nervous system effects, and may lead to an increased risk of getting cancer. |
| Surface Water & Influenced Groundwater System Treatment Requirements | | | | | | |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|---|----------------------|---------------------------------|------------------|-------------------|---|--|
| Turbidity (NTU) | TT | | TT | n/a | Soil runoff | Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease-causing organisms. These organisms include bacteria, viruses, protozoa, and parasites that can cause symptoms such as nausea, cramps, diarrhea, and associated headaches, and can lead to death. |
| Surface water/IGW system treatment technique requirements: CT ratio; residual disinfectant; log removal/inactivation of <i>Giardia</i> , viruses, and <i>Cryptosporidium</i> ; or filter backwash recycling | TT | | TT | n/a | Soil runoff | Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, protozoa, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches, and can lead to death. |
| Radionuclide Contaminants | | | | | | |
| Gross alpha emitters (pCi/L) | 15 pCi/L | | 15 | 0 | Erosion of natural deposits | Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer. |
| Beta/photon emitters (mrem/yr) | 4 mrem/yr | | 4 | 0 | Decay of natural and man-made deposits | Certain minerals are radioactive and may emit forms of radiation known as photons and beta radiation. Some people who drink water containing beta and photon emitters in excess of the MCL over many years may have an increased risk of getting cancer. |
| Radium, combined 226 and 228 (pCi/L) | 5 pCi/L | | 5 | 0 | Erosion of natural deposits | Some people who drink water containing radium 226 or 228 in excess of the MCL over many years may have an increased risk of getting cancer. |
| Uranium (µg/L) | 30 µg/L (footnote 2) | | 30 | 0 | Erosion of natural deposits | Some people who drink water containing uranium in excess of the MCL over many years may have an increased risk of getting cancer and kidney toxicity. |
| Inorganic Contaminants | | | | | | |
| Antimony (ppb) | 0.006 | 1000 | 6 | 6 | Discharge from petroleum refineries; fire retardants; ceramics; electronics; solder | Some people who drink water containing antimony well in excess of the MCL over many years could experience increases in blood cholesterol and decreases in blood sugar. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|----------------------------|--------------------|---------------------------------|------------------|-------------------|---|--|
| Arsenic (ppb) ³ | 0.010 ³ | 1000 | 10 ³ | 0 ³ | Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes | Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with their circulatory system, and may have an increased risk of getting cancer. |
| Asbestos (MFL) | 7 MFL | | 7 | 7 | Decay of asbestos cement water mains; erosion of natural deposits | Some people who drink water containing asbestos in excess of the MCL over many years may have an increased risk of developing benign intestinal polyps. |
| Barium (ppm) | 2 | | 2 | 2 | Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits | Some people who drink water containing barium in excess of the MCL over many years could experience an increase in their blood pressure. |
| Beryllium (ppb) | 0.004 | 1000 | 4 | 4 | Discharge from metal refineries and coal-burning factories; discharge from electrical, aerospace, and defense industries | Some people who drink water containing beryllium well in excess of the MCL over many years could develop intestinal lesions. |
| Bromate (ppb) | 0.010 | 1000 | 10 | 0 | Byproduct of drinking water disinfection | Some people who drink water containing bromate in excess of the MCL over many years may have an increased risk of getting cancer. |
| Cadmium (ppb) | 0.005 | 1000 | 5 | 5 | Corrosion of galvanized pipes; erosion of natural deposits; discharge from metal refineries; runoff from waste batteries and paints | Some people who drink water containing cadmium in excess of the MCL over many years could experience kidney damage. |
| Chloramines (ppm) | MRDL = 4.0 | | MRDL = 4.0 | MRDLG = 4.0 | Water additive used to control microbes | Some people who use water containing chloramines well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chloramines well in excess of the MRDL could experience stomach discomfort or anemia. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|-------------------------|--------------|---------------------------------|------------------|-------------------|---|---|
| Chlorine (ppm) | MRDL = 4.0 | | MRDL = 4.0 | MRDLG = 4.0 | Water additive used to control microbes | Some people who use water containing chlorine well in excess of the MRDL could experience irritating effects to their eyes and nose. Some people who drink water containing chlorine well in excess of the MRDL could experience stomach discomfort. |
| Chlorine dioxide (ppb) | MRDL = 0.8 | 1000 | MRDL = 800 | MRDLG = 800 | Water additive used to control microbes | Some infants and young children who drink water containing chlorine dioxide in excess of the MRDL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorine dioxide in excess of the MRDL. Some people may experience anemia. |
| Chlorite (ppm) | 1.0 | | 1.0 | 0.8 | Byproduct of drinking water disinfection | Some infants and young children who drink water containing chlorite in excess of the MCL could experience nervous system effects. Similar effects may occur in fetuses of pregnant women who drink water containing chlorite in excess of the MCL. Some people may experience anemia. |
| Chromium (ppb) | 0.1 | 1000 | 100 | 100 | Discharge from steel and pulp mills; erosion of natural deposits | Some people who use water containing chromium well in excess of the MCL over many years could experience allergic dermatitis. |
| Copper (ppm) | AL = 1.3 | | AL = 1.3 | 1.3 | Corrosion of household plumbing systems; erosion of natural deposits | Copper is an essential nutrient, but some people who drink water containing copper in excess of the action level over a relatively short amount of time could experience gastrointestinal distress. Some people who drink water containing copper in excess of the action level over many years could suffer liver or kidney damage. People with Wilson's Disease should consult their personal doctor. |
| Cyanide (ppb) | 0.2 | 1000 | 200 | 200 | Discharge from steel, metal, plastic, and fertilizer factories | Some people who drink water containing cyanide well in excess of the MCL over many years could experience nerve damage or problems with their thyroid. |
| Fluoride (ppm) | 4.0 | | 4.0 | 4.0 | Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories | Some people who drink water containing fluoride in excess of the MCL over many years could get bone disease, including pain and tenderness of the bones. Fluoride in drinking water at half the MCL (2.0 ppm) or more may cause mottling of children's teeth, usually in children less than nine years of age. Mottling, also known as dental fluorosis, may include brown staining or pitting of the teeth, and occurs only in the developing teeth before they erupt from the gums. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|--------------------------------|--------------|---------------------------------|------------------|-------------------|--|---|
| Lead (ppb) | AL = 0.015 | 1000 | AL = 15 | 0 | Corrosion of household plumbing systems; erosion of natural deposits | Infants and children who drink water containing lead in excess of the action level could experience delays in their physical or mental development. Children could show slight deficits in attention span and learning abilities. Adults who drink this water over many years could develop kidney problems or high blood pressure. |
| Mercury, inorganic (ppb) | 0.002 | 1000 | 2 | 2 | Erosion of natural deposits; discharge from refineries and factories; runoff from landfills; runoff from cropland | Some people who drink water containing inorganic mercury well in excess of the MCL over many years could experience kidney damage. |
| Nitrate, as N (ppm) | 10 | | 10 | 10 | Runoff from fertilizer use; leaching from septic tanks or sewage; erosion of natural deposits | Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome. |
| Nitrite, as N (ppm) | 1.0 | | 1.0 | 1.0 | Conversion of ammonia; runoff from fertilizer use; leaching from septic tanks or sewage; erosion of natural deposits | Infants below the age of six months who drink water containing nitrite in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome. |
| Selenium (ppb) | 0.05 | 1000 | 50 | 50 | Discharge from petroleum and metal refineries; erosion of natural deposits; discharge from mines | Selenium is an essential nutrient. However, some people who drink water containing selenium in excess of the MCL over many years could experience hair or fingernail losses, numbness in fingers or toes, or problems with their circulation. |
| Thallium (ppb) | 0.002 | 1000 | 2 | 0.5 | Leaching from ore-processing sites; discharge from electronics, glass, and drug factories | Some people who drink water containing thallium in excess of the MCL over many years could experience hair loss, change in their blood, or problems with their kidneys, intestines, or liver. |
| Synthetic Organic Contaminants | | | | | | |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|-------------------------------|--------------|---------------------------------|------------------|-------------------|---|--|
| 2,4-D (ppb) | 0.07 | 1000 | 70 | 70 | Runoff from herbicide used on row crops | Some people who drink water containing the weed killer 2,4-D well in excess of the MCL over many years could experience problems with their kidneys, liver, or adrenal glands. |
| 2,4,5-TP Silvex (ppb) | 0.05 | 1000 | 50 | 50 | Residue of banned herbicide | Some people who drink water containing Silvex in excess of the MCL over many years could experience liver problems. |
| Acrylamide | TT | | TT | 0 | Added to water during sewage/wastewater treatment | Some people who drink water containing high levels of acrylamide over a long period of time could have problems with their nervous system or blood, and may have an increased risk of getting cancer. |
| Alachlor (ppb) | 0.002 | 1000 | 2 | 0 | Runoff from herbicide used on row crops | Some people who drink water containing alachlor in excess of the MCL over many years could have problems with their eyes, liver, kidneys, or spleen, or experience anemia, and may have an increased risk of getting cancer. |
| Atrazine (ppb) | 0.003 | 1000 | 3 | 3 | Runoff from herbicide used on row crops | Some people who drink water containing atrazine well in excess of the MCL over many years could experience problems with their cardiovascular system or reproductive difficulties. |
| Benzo(a)pyrene, PAH (ppt) | 0.0002 | 1,000,000 | 200 | 0 | Leaching from linings of water storage tanks and distribution lines | Some people who drink water containing benzo(a)pyrene in excess of the MCL over many years may experience reproductive difficulties and may have an increased risk of getting cancer. |
| Carbofuran (ppb) | 0.04 | 1000 | 40 | 40 | Leaching of soil fumigant used on rice and alfalfa | Some people who drink water containing carbofuran in excess of the MCL over many years could experience problems with their blood, or nervous or reproductive systems. |
| Chlordane (ppb) | 0.002 | 1000 | 2 | 0 | Residue of banned termiticide | Some people who drink water containing chlordane in excess of the MCL over many years could experience problems with their liver or nervous system, and may have an increased risk of getting cancer. |
| Dalapon (ppb) | 0.2 | 1000 | 200 | 200 | Runoff from herbicide used on rights of way | Some people who drink water containing dalapon well in excess of the MCL over many years could experience minor kidney changes. |
| Di(2-ethylhexyl)adipate (ppb) | 0.4 | 1000 | 400 | 400 | Discharge from chemical factories | Some people who drink water containing di(2-ethylhexyl)adipate well in excess of the MCL over many years could experience toxic effects such as weight loss, liver enlargement, or possible reproductive difficulties. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|-----------------------------------|--------------|---------------------------------|------------------|-------------------|---|---|
| Di(2-ethylhexyl)phthalate (ppb) | 0.006 | 1000 | 6 | 0 | Discharge from rubber and chemical factories | Some people who drink water containing di(2-ethylhexyl)phthalate well in excess of the MCL over many years may have problems with their liver, or experience reproductive difficulties, and may have an increased risk of getting cancer. |
| Dibromochloropropane [DBCP] (ppt) | 0.0002 | 1,000,000 | 200 | 0 | Runoff/leaching from soil fumigant used on soybeans, cotton, pineapples, and orchards | Some people who drink water containing DBCP in excess of the MCL over many years could experience reproductive problems and may have an increased risk of getting cancer. |
| Dinoseb (ppb) | 0.007 | 1000 | 7 | 7 | Runoff from herbicide used on soybeans and vegetables | Some people who drink water containing dinoseb well in excess of the MCL over many years could experience reproductive difficulties. |
| Diquat (ppb) | 0.02 | 1000 | 20 | 20 | Runoff from herbicide use | Some people who drink water containing diquat in excess of the MCL over many years could get cataracts. |
| Dioxin [2,3,7,8-TCDD] (ppq) | 0.00000003 | 1,000,000,000 | 30 | 0 | Emissions from waste incineration and other combustion; discharge from chemical factories | Some people who drink water containing dioxin in excess of the MCL over many years could experience reproductive difficulties and may have an increased risk of getting cancer. |
| Endothall (ppb) | 0.1 | 1000 | 100 | 100 | Runoff from herbicide use | Some people who drink water containing endothall in excess of the MCL over many years could experience problems with their stomach or intestines. |
| Endrin (ppb) | 0.002 | 1000 | 2 | 2 | Residue of banned insecticide | Some people who drink water containing endrin in excess of the MCL over many years could experience liver problems. |
| Epichlorohydrin | TT | | TT | 0 | Discharge from industrial chemical factories; an impurity of some water treatment chemicals | Some people who drink water containing high levels of epichlorohydrin over a long period of time could experience stomach problems, and may have an increased risk of getting cancer. |
| Ethylene dibromide (ppt) | 0.0005 | 1,000,000 | 50 | 0 | Discharge from petroleum refineries | Some people who drink water containing ethylene dibromide in excess of the MCL over many years could experience problems with their liver, stomach, reproductive system or kidneys, and may have an increased risk of getting cancer. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|---------------------------------|--------------|---------------------------------|------------------|-------------------|---|---|
| Glyphosate (ppb) | 0.7 | 1000 | 700 | 700 | Runoff from herbicide use | Some people who drink water containing glyphosate in excess of the MCL over many years could experience problems with their kidneys or reproductive difficulties. |
| Haloacetic Acids (HAA) (ppb) | 0.060 | 1000 | 60 | (footnote 4) | Byproduct of drinking water disinfection | Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer. |
| Heptachlor (ppt) | 0.0004 | 1,000,000 | 400 | 0 | Residue of banned pesticide | Some people who drink water containing heptachlor in excess of the MCL over many years could experience liver damage and may have an increased risk of getting cancer. |
| Heptachlor epoxide (ppt) | 0.0002 | 1,000,000 | 200 | 0 | Breakdown of heptachlor | Some people who drink water containing heptachlor epoxide in excess of the MCL over many years could experience liver damage, and may have an increased risk of getting cancer. |
| Hexachlorobenzene (ppb) | 0.001 | 1000 | 1 | 0 | Discharge from metal refineries and agricultural chemical factories | Some people who drink water containing hexachlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys, or adverse reproductive effects, and may have an increased risk of getting cancer. |
| Hexachlorocyclopentadiene (ppb) | 0.05 | 1000 | 50 | 50 | Discharge from chemical factories | Some people who drink water containing hexachlorocyclopentadiene well in excess of the MCL over many years could experience problems with their kidneys or stomach. |
| Lindane (ppt) | 0.0002 | 1,000,000 | 200 | 200 | Runoff/leaching from insecticide used on cattle, lumber, gardens | Some people who drink water containing lindane in excess of the MCL over many years could experience problems with their kidneys or liver. |
| Methoxychlor (ppb) | 0.04 | 1000 | 40 | 40 | Runoff/leaching from insecticide used on fruits, vegetables, alfalfa, livestock | Some people who drink water containing methoxychlor in excess of the MCL over many years could experience reproductive difficulties. |
| Oxamyl [Vydate] (ppb) | 0.2 | 1000 | 200 | 200 | Runoff/leaching from insecticide used on apples, potatoes, and tomatoes | Some people who drink water containing oxamyl in excess of the MCL over many years could experience slight nervous system effects. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|--|--------------|---------------------------------|------------------|-------------------|--|---|
| PCBs [polychlorinated byphenyls] (ppt) | 0.0005 | 1,000,000 | 500 | 0 | Runoff from landfills; discharge of waste chemicals | Some people who drink water containing PCBs in excess of the MCL over many years could experience changes in their skin, problems with their thymus gland, immune deficiencies, or reproductive or nervous system difficulties, and may have an increased risk of getting cancer. |
| Pentachlorophenol (ppb) | 0.001 | 1000 | 1 | 0 | Discharge from wood preserving factories | Some people who drink water containing pentachlorophenol in excess of the MCL over many years could experience problems with their liver or kidneys, and may have an increased risk of getting cancer. |
| Picloram (ppb) | 0.5 | 1000 | 500 | 500 | Herbicide runoff | Some people who drink water containing picloram in excess of the MCL over many years could experience problems with their liver. |
| Simazine (ppb) | 0.004 | 1000 | 4 | 4 | Herbicide runoff | Some people who drink water containing simazine in excess of the MCL over many years could experience problems with their blood. |
| Toxaphene (ppb) | 0.003 | 1000 | 3 | 0 | Runoff/ leaching from insecticide used on cotton and cattle | Some people who drink water containing toxaphene in excess of the MCL over many years could have problems with their kidneys, liver, or thyroid, and may have an increased risk of getting cancer. |
| Volatile Organic Contaminants | | | | | | |
| Benzene (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from factories; leaching from gasoline storage tanks and landfills | Some people who drink water containing benzene in excess of the MCL over many years could experience anemia or a decrease in blood platelets, and may have an increased risk of getting cancer. |
| Carbon tetrachloride (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from chemical plants and other industrial activities | Some people who drink water containing carbon tetrachloride in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer. |
| Chlorobenzene (ppb) | 0.1 | 1000 | 100 | 100 | Discharge from chemical and agricultural chemical factories | Some people who drink water containing chlorobenzene in excess of the MCL over many years could experience problems with their liver or kidneys. |
| o-Dichlorobenzene (ppb) | 0.6 | 1000 | 600 | 600 | Discharge from industrial chemical factories | Some people who drink water containing o-dichlorobenzene well in excess of the MCL over many years could experience problems with their liver, kidneys, or circulatory system. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|----------------------------------|--------------|---------------------------------|------------------|-------------------|---|--|
| p-Dichlorobenzene (ppb) | 0.075 | 1000 | 75 | 75 | Discharge from industrial chemical factories | Some people who drink water containing p-dichlorobenzene in excess of the MCL over many years could experience anemia, damage to their liver, kidneys, or spleen, or changes in their blood. |
| 1,2-Dichloroethane (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from industrial chemical factories | Some people who drink water containing 1,2-dichloroethane in excess of the MCL over many years may have an increased risk of getting cancer. |
| 1,1-Dichloroethylene (ppb) | 0.007 | 1000 | 7 | 7 | Discharge from industrial chemical factories | Some people who drink water containing 1,1-dichloroethylene in excess of the MCL over many years could experience problems with their liver. |
| cis-1,2-Dichloroethylene (ppb) | 0.07 | 1000 | 70 | 70 | Discharge from industrial chemical factories | Some people who drink water containing cis-1,2-dichloroethylene in excess of the MCL over many years could experience problems with their liver. |
| trans-1,2-Dichloroethylene (ppb) | 0.1 | 1000 | 100 | 100 | Discharge from industrial chemical factories | Some people who drink water containing trans-1,2-dichloroethylene well in excess of the MCL over many years could experience problems with their liver. |
| Dichloromethane (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from industrial chemical factories | Some people who drink water containing dichloromethane in excess of the MCL over many years could have liver problems and may have an increased risk of getting cancer. |
| 1,2-Dichloropropane (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from industrial chemical factories | Some people who drink water containing 1,2-dichloropropane in excess of the MCL over many years may have an increased risk of getting cancer. |
| Ethyl benzene (ppb) | 0.7 | 1000 | 700 | 700 | Discharge from petroleum refineries; leaching from gasoline storage tanks and landfills | Some people who drink water containing ethyl benzene well in excess of the MCL over many years could experience problems with their liver or kidneys. |
| Styrene (ppb) | 0.1 | 1000 | 100 | 100 | Discharge from rubber and plastic factories; leaching from landfills | Some people who drink water containing styrene well in excess of the MCL over many years could have problems with their liver, kidneys, or circulatory system. |
| Tetrachloroethylene (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from factories and dry cleaners | Some people who drink water containing tetrachloroethylene in excess of the MCL over many years could have problems with their liver, and may have an increased risk of getting cancer. |

| Contaminant (CCR units) | MCL, in mg/L | To convert for CCR, multiply by | MCL in CCR units | MCLG in CCR units | Major sources in drinking water | Health effects language |
|------------------------------------|--------------|---------------------------------|------------------|-------------------|---|---|
| 1,2,4-Trichlorobenzene (ppb) | 0.07 | 1000 | 70 | 70 | Discharge from textile-finishing factories | Some people who drink water containing 1,2,4-trichlorobenzene well in excess of the MCL over many years could experience changes in their adrenal glands. |
| 1,1,1-Trichloroethane (ppb) | 0.2 | 1000 | 200 | 200 | Discharge from metal degreasing sites and other factories | Some people who drink water containing 1,1,1-trichloroethane in excess of the MCL over many years could experience problems with their liver, nervous system, or circulatory system. |
| 1,1,2-Trichloroethane (ppb) | 0.005 | 1000 | 5 | 3 | Discharge from industrial chemical factories | Some people who drink water containing 1,1,2-trichloroethane well in excess of the MCL over many years could have problems with their liver, kidneys, or immune system. |
| Trichloroethylene (ppb) | 0.005 | 1000 | 5 | 0 | Discharge from metal degreasing sites and other factories | Some people who drink water containing trichloroethylene in excess of the MCL over many years could experience problems with their liver and may have an increased risk of getting cancer. |
| Total trihalomethanes (TTHM) (ppb) | 0.080 | 1000 | 80 | (footnote 4) | Byproduct of drinking water disinfection | Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer. |
| Toluene (ppm) | 1 | | 1 | 1 | Discharge from petroleum factories; leaching from gasoline storage tanks and landfills | Some people who drink water containing toluene well in excess of the MCL over many years could have problems with their nervous system, kidneys, or liver. |
| Vinyl chloride (ppb) | 0.002 | 1000 | 2 | 0 | Leaching from PVC piping; discharge from plastics factories | Some people who drink water containing vinyl chloride in excess of the MCL over many years may have an increased risk of getting cancer. |
| Xylenes (ppm) | 10 | | 10 | 10 | Discharge from petroleum factories; discharge from chemical factories; leaching from gasoline storage tanks and landfills | Some people who drink water containing xylenes in excess of the MCL over many years could experience damage to their nervous system. |

¹MCL (for systems that collect >40 samples per month): 5% of monthly samples are positive. MCL (for systems that collect <40 samples per month): 1 positive monthly sample.

²Uranium MCL is effective on December 8, 2003. Until then, there is no MCL.

³Beginning on January 23, 2006, the arsenic MCL is 0.010 mg/L and the MCLG is 0. Until then, the MCL is 0.05 mg/L, and there is no MCLG.

⁴The MCLGs for total trihalomethanes and haloacetic acids:

| Disinfection Byproduct | MCLG, mg/L | MCLG in CCR units |
|------------------------|------------|-------------------|
| Bromodichloromethane | 0 | 0 |
| Bromoform | 0 | 0 |
| Chloroform | 0.07 | 70 |
| Dibromochloromethane | 0.06 | 60 |
| Dichloroacetic acid | 0 | 0 |
| Monochloroacetic acid | 0.07 | 70 |
| Trichloroacetic acid | 0.02 | 20 |

CHAPTER 43
WATER SUPPLIES—DESIGN AND OPERATION
[Prior to 12/12/90, portions of this chapter appeared in 567—Ch 41]

567—43.1(455B) General information.

43.1(1) *Emergency actions regarding water supplies.* When, in the opinion of the director, an actual or imminent hazard exists, the supplier of water shall comply with the directives or orders of the director necessary to eliminate or minimize that hazard.

43.1(2) *Prohibition on the use of lead pipes, solder and flux.* Any pipe, solder or flux which is used in the installation or repair of any public water supply system or any plumbing in a residential or nonresidential facility providing water for human consumption which is connected to a public water supply system shall be lead-free as defined in 567—40.2(455B). This action shall not apply to leaded joints necessary for the repair of cast iron pipe.

43.1(3) *Use of noncentralized treatment devices.*

a. Community PWS. Community public water systems shall not use bottled water, point-of-use (POU) or point-of-entry (POE) devices to achieve permanent compliance with a maximum contaminant level, action level, or treatment technique requirement in 567—Chapters 41 and 43.

b. Noncommunity PWS. Noncommunity public water supply systems may be allowed by the department to use point-of-use devices to achieve MCL compliance provided the contaminant does not pose an imminent threat to health (such as bacteria) nor place a sensitive population at risk (such as infants for nitrate or nitrite).

c. Reduced monitoring requirements. Bottled water, point-of-use, or point-of-entry devices cannot be used to avoid the monitoring requirements of 567—Chapters 41 and 43, but the department may allow reduced monitoring requirements in specific instances.

d. Bottled water requirements. The department may require a public water system exceeding a maximum contaminant level, action level, or treatment technique requirement specified in 567—Chapters 41 and 43 to use bottled water as a condition of an interim compliance schedule or as a temporary measure to avoid an unreasonable risk to health. Any bottled water must, at a minimum, meet the federal Food and Drug Administration bottled water standards, listed in the Code of Federal Regulations, Title 21, Chapter 165.110. The system must meet the following requirements:

(1) *Monitoring program.* Submit for approval to the department a monitoring program for bottled water. The monitoring program must provide reasonable assurances that the bottled water complies with all maximum contaminant levels, action levels, or treatment technique requirements in 567—Chapters 41 and 43. The public water system must monitor a representative sample of bottled water for all contaminants regulated under 567—Chapters 41 and 43 the first quarter that it supplies the bottled water to the public, and annually thereafter. Results of the monitoring program shall be provided to the department annually. If the bottled water is from a community public water system that currently meets all of the federal Safe Drinking Water Act requirements, the monitoring requirements of this subparagraph shall be waived by the department. The specific supplier of the bottled water must be identified in order for the department to waive the monitoring requirements.

(2) *Certification requirements.* The public water system must receive a certification from the bottled water company that the bottled water supplied has been taken from an “approved source”; the bottled water company has conducted monitoring in accordance with 43.1(3)“b”(1); and the bottled water meets MCLs, action levels, or treatment technique requirements as set out in 567—Chapters 41 and 43. The public water system shall provide the certification to the department the first quarter after it supplies bottled water and annually thereafter.

(3) *Provision of bottled water to consumers.* The public water supply system is fully responsible for the provision of sufficient quantities of bottled water to every person supplied by the public water system via door-to-door bottled water delivery.

e. Point-of-use devices. Reserved.

f. Point-of-entry devices. Reserved.

43.1(4) Cross-connection control. To prevent backflow or backsiphonage of contaminants into a public water supply, connection shall not be permitted between a public water supply and any other system which does not meet the monitoring and drinking water standards required by this chapter except as provided below in “a” or “b.”

a. Piping and plumbing systems. Piping systems or plumbing equipment carrying nonpotable water, contaminated water, stagnant water, liquids, mixtures or waste mixtures shall not be connected to a public water supply unless properly equipped with an antisiphon device or backflow preventer acceptable to the department.

b. Bulk water loading stations. Positive separation shall be provided through the use of an air gap separation or a backflow preventer, which is acceptable to the department, at all loading stations for bulk transport tanks.

(1) Minimum air gap. The minimum required air gap shall be twice the diameter of the discharge pipe.

(2) Backflow preventer criteria. An approved backflow preventer for this application shall be a reduced pressure backflow preventer or an antisiphon device which complies with the standards of the American Water Works Association and has been approved by the Foundation for Cross-Connection Control and Hydraulic Research, University of Southern California.

When, in the opinion of the department, evidence clearly indicates the source of contamination within the system is the result of a cross-connection, the department may require a public water supply to conduct public notification, identify and eliminate the connection, and implement a systemwide cross-connection program.

43.1(5) Requirement for certified operator. The department maintains a list of operators who are certified in accordance with 567—Chapter 81. The list includes the operator’s name, certification classification (Water Treatment, Water Distribution, or Grade A Water System), and grade (A, I, II, III, or IV), and is periodically updated during the year.

a. CWS and NTNC systems. All community and nontransient noncommunity public water supply systems must have a certified operator in direct responsible charge of the treatment and distribution systems, in accordance with 567—Chapters 40 through 44 and 81.

b. TNC systems. Any transient noncommunity public water supply system which is owned by the state or federal government, such as a state park, state hospital, or interstate rest stop, or is using a groundwater under the direct influence of surface water or surface water source, must have a certified operator in direct responsible charge of the treatment and distribution systems, in accordance with 567—Chapters 40 through 44 and 81. Any TNC which uses chlorine dioxide as a disinfectant or oxidant must have a certified operator in direct responsible charge of the system, pursuant to 567—Chapter 81. The department may require any TNC to have a certified operator in direct responsible charge.

43.1(6) Return water in public water supply systems. Steam condensate, cooling water from engine jackets, water used in conjunction with heat exchange devices, or treated wastewater shall not be returned to the public water supply system.

43.1(7) Sanitary surveys. Each public water supply system must have a periodic sanitary survey, conducted by the department or its designee, which is a records review and on-site inspection of the system. Systems must provide the department, at its request, any existing information that will enable the department to conduct the sanitary survey. The inspection evaluates the system’s ability to produce and distribute safe drinking water and identifies improvements necessary to maintain or improve drinking water quality. The sanitary survey includes review and inspection of the following areas: water source; treatment facilities; distribution system; finished water storage; pumps, pump facilities, controls and other equipment; monitoring, reporting, and data verification, including self-monitoring requirements; system operation and management; maintenance; properly certified operators; and records. A report of the sanitary survey is issued by the department or its designee, and may include both enforceable required actions for remedying significant deficiencies and nonenforceable recommended actions. The frequency of the sanitary survey inspection must be at least once every five years for noncommunity systems and once every three years for community systems. The department or its designee must provide

the system with a written notice describing any significant deficiencies identified no later than 30 days after the department identifies the significant deficiency. The notice may be included in the sanitary survey report and may specify corrective actions and deadlines for completion of corrective actions. Systems must respond in writing to significant deficiencies outlined in the sanitary survey report or written notice within the time period specified in the report, indicating how and on what schedule the system will address significant deficiencies noted in the survey. At a maximum, the written response must be received within 30 days of receiving the survey report. All systems must take the steps necessary to address significant deficiencies identified in the sanitary survey report that are within the control of the system and its governing body.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.2(455B) Permit to operate.

43.2(1) Operation fees.

a. Annual fee. A fee for the operation of a public water supply system shall be paid annually. The fee will not be prorated and is nonrefundable. The fee shall be based on the population served. The fee shall be the greater of \$25 per year or \$0.14 multiplied by the total population served by the public water supply for all community and nontransient noncommunity public water supply systems. The fee shall be \$25 per year for all transient noncommunity water systems. Where a system provides water to another public water supply system (consecutive public water supply system) which is required to have an operation permit, the population of the recipient water supply shall not be counted as a part of the water system providing the water.

b. Fee notices. The department will send annual notices to public water supply systems at least 60 days prior to the date that the operation fee is due.

c. Fee payments. The annual operation fee must be paid to the department by September 1 each year.

d. Fee schedule adjustment. The department may adjust the per capita fee payment by up to +/- \$0.02 per person served so as to achieve the targeted revenue of \$350,000 during each fiscal year. The environmental protection commission must approve any per capita fee rate above \$0.14 per person. The extent of the fee adjustment must comply with Iowa Code section 455B.183A.

e. Exempted public water supply systems. Public water supply systems located on Indian lands are exempt from the fee requirements.

f. Late fees. When the owner of a public water supply fails to make timely application or to remit payment of fees by September 1, the department will notify the system by a single notice of violation. In addition, a late fee of \$100 will be assessed for failure to remit the operation fee by September 1. The department may thereafter issue an administrative order pursuant to Iowa Code section 455B.175(1) or request a referral to the attorney general under Iowa Code section 455B.175(3) as necessary.

43.2(2) Operation permit requirement. Except as provided in 43.2(3) and 43.2(4), no person shall operate any public water supply system or part thereof without, or contrary to any condition of, an operation permit issued by the director.

43.2(3) Application for operation permit. The owner of any public water supply system or part thereof must make application for an operation permit. No such system shall be operated without an operation permit, unless proper application has been made. Upon submission of a completed application form, the time requirement for having a valid operation permit is automatically extended until the application has either been approved or disapproved by the director.

43.2(4) Operation permit application form issuance.

a. Operation permit application form. Application for operation permits shall be made on forms provided by the department. The application for an operation permit shall be filed at least 90 days prior to the date operation is scheduled to begin unless a shorter time is approved by the director. The director shall issue or deny operation permits for facilities within 60 days of receipt of a completed application, unless a longer period is required and the applicant is so notified. The director may require the submission of additional information deemed necessary to evaluate the application. If the application

is incomplete or otherwise deficient, processing of the application shall not be completed until such time as the applicant has supplied the missing information or otherwise corrected the deficiency.

b. Identity of signatories of operation permit applications. The person who signs the application for an operation permit shall be:

(1) Corporation. In the case of a corporation, a principal executive officer of at least the level of vice president. The corporation has the option of appointing a designated signatory to satisfy this requirement.

(2) Partnership. In the case of a partnership, a general partner.

(3) Sole proprietorship. In the case of a sole proprietorship, the proprietor.

(4) Public facility. In the case of a municipal, state or other public facility, by either the principal executive officer or the ranking elected official.

c. Appeal. The denial of a permit, or any permit condition, may be appealed by the applicant to the environmental protection commission pursuant to 567—Chapter 7.

43.2(5) Operation permit conditions.

a. Operation permit conditions. Operation permits may contain such conditions as are deemed necessary by the director to ensure compliance with all applicable rules of the department, to ensure that the public water supply system is properly operated and maintained, to ensure that potential hazards to the water consumer are eliminated promptly, and to ensure that the requirements of the Safe Drinking Water Act are met.

b. Compliance schedule. Where one or more maximum contaminant levels, treatment techniques, designated health advisories, or action levels cannot be met immediately, a compliance schedule for achieving compliance with standards may be made a condition of the permit. A compliance schedule requiring alterations in accordance with the standards for construction in 43.3(1) and 43.3(2) may also be included for any supply that, in the opinion of the director, contains a potential hazard.

c. Treatment. If the department determines that a treatment method identified in 43.3(10) is technically feasible, the department may require the system to install or use that treatment method in connection with a compliance schedule issued under the provisions of 43.2(5)“b.” The department’s determination shall be based upon studies by the system and other relevant information.

43.2(6) Notification of change in operation permit application conditions. The owner of a public water supply system shall notify the director within 30 days of any change in conditions identified in the permit application. This notice does not relieve the owner of the responsibility to obtain a construction permit as required by 567—43.3(455B).

43.2(7) Renewal of operation permits. The department may issue operation permits for durations of up to five years. Operation permits must be renewed prior to expiration in order to remain valid. The renewal date shall be specified in the permit or in any renewal. Application for renewal must be received by the director, or postmarked, 60 days prior to the renewal date, on forms provided by the department.

43.2(8) Denial, modification, or suspension of operation permit. The director may deny renewal of, modify, or suspend, in whole or in part, any operation permit for good cause. Denial of a new permit, renewal of an existing permit, or modification of a permit, may be appealed to the environmental protection commission pursuant to 567—Chapter 7. Suspension or revocation may occur after hearing, pursuant to 567—Chapter 7. Good cause includes the following:

a. Violation of any term or condition of the permit.

b. Obtaining a permit by misrepresentation of fact or failure to disclose fully all material facts.

c. A change in any condition that requires either a permanent or temporary modification of a permit condition.

d. Failure to submit such records and information as the director may require both generally and as a condition of the operation permit in order to ensure compliance with conditions specified in the permit.

e. Violation of any of the requirements contained in 567—Chapters 40 to 43.

f. Inability of a system to either achieve or maintain technical, managerial, or financial viability, as determined in rule 567—43.8(455B).

567—43.3(455B) Public water supply system construction.

43.3(1) Standards for public water supplies. Any public water supply that does not meet the drinking water standards contained in 567—Chapters 41 and 43 shall make the alterations in accordance with the standards for construction contained in 43.3(2) necessary to comply with the drinking water standards unless the public water supply has been granted a variance from a maximum contaminant level or treatment technique as a provision of its operation permit pursuant to 567—43.2(455B), provided that the public water supply meets the schedule established pursuant to 567—43.2(455B). Any public water supply that, in the opinion of the director, contains a potential hazard shall make the alterations in accordance with the standards for construction contained in this rule necessary to eliminate or minimize that hazard. A system that is not operating within the design standards may be required by the department via a compliance schedule to upgrade the deficient areas of the system before a construction permit will be issued for any work in the system that does not address the current deficiencies.

43.3(2) Standards for construction.

a. The standards for a project are the Ten States Standards as adopted through 2012 and the American Water Works Association (AWWA) Standards as adopted through 2016 and 43.3(7) to 43.3(9). To the extent of any conflict between the Ten States Standards and the American Water Works Association Standards and 43.3(7) to 43.3(9), the Ten States Standards, 43.3(2), and 43.3(7) to 43.3(9) shall prevail. Additional standards include the following:

(1) Polyvinyl chloride (PVC) pipe manufactured in accordance with ASTM D2241, AWWA C900, AWWA C905, ASTM F1483, or AWWA C909 may be used for water main construction. The maximum allowable pressure for PVC or polyethylene (PE) pipe shall be determined based on a safety factor of 2.0 and a surge allowance of no less than two feet per second (2 fps).

(2) For CWS groundwater systems, a minimum of two wells shall be provided, unless the system demonstrates to the department's satisfaction that a single well will provide a reliable and adequate source. For NTNC and TNC groundwater systems, a single well is acceptable.

(3) Separation of water mains from sanitary sewers and storm sewers shall be in accordance with the Iowa Wastewater Facilities Design Standards, chapter 12, section 5.8, "Protection of Water Supplies." Where the water main either crosses under or is less than 18 inches above the sewer, one full length of water main shall be located so that both joints are as far as possible from the sewer. The sewer and water pipes must be adequately supported. A low permeability soil shall be used for backfilling material within ten feet of the point of crossing. No water pipe shall pass through or come in contact with any part of a sewer manhole.

b. Variance. When engineering justification satisfactory to the director is provided substantially demonstrating that variation from the design standards will result in equivalent or improved effectiveness, such a variation from design standards may be accepted by the director. A variance denial may be appealed to the environmental protection commission pursuant to 567—Chapter 7. Variance requests for projects qualifying for a waiver from the engineering requirement of 43.3(4) may be made without the retained services of a professional engineer.

43.3(3) Construction permits. No person shall construct, install or modify any project without first obtaining, or contrary to any condition of, a construction permit issued by the director or by a local public works department authorized to issue permits under 567—Chapter 9 except as provided in 43.3(3) "b," 43.3(4) and 43.3(6). Construction permits are not required for point-of-use treatment devices installed by a noncommunity water system except those devices required by the department to meet a drinking water standard pursuant to 567—Chapters 41 and 43. No construction permit will be issued for a new public water supply system without a completed viability assessment, which has been approved by the department, and demonstrates that the system is viable, pursuant to 567—43.8(455B).

a. **Construction permit issuance conditions.** A permit to construct shall be issued by the director if the director concludes from the application and specifications submitted pursuant to 43.3(4) and 567—40.4(455B) that the project will comply with the rules of the department. The construction of the project must begin within one year from the date the permit was issued; if it is not, the permit is no longer valid. If construction is ongoing and continuous (aside from delays due to winter or exceptional weather) and the permitted project cannot be completed within one year, the permit shall remain valid

until the project is completed. The department may grant an extension of the permit for a multiphase project, for a maximum two additional years.

b. Construction permit application. Application for any project shall be submitted to the department at least 30 days prior to the proposed date for commencing construction or awarding of contracts. This requirement may be waived when it is determined by the department that an imminent health hazard exists to the consumers of a public water supply. Under this waiver, construction, installation, or modification may be allowed by the department prior to review and issuance of a permit if all the following conditions are met:

- (1) The construction, installation or modification will alleviate the health hazard;
- (2) The construction is done in accordance with the standards for construction pursuant to 43.3(2);
- (3) Plans and specifications are submitted within 30 days after construction;
- (4) A professional engineer, licensed in the state of Iowa, supervises the construction; and
- (5) The supplier of water receives approval of this waiver prior to any construction, installation, or modification.

c. Construction permit fees. A nonrefundable fee for a construction permit issued in accordance with subrules 43.3(3) and 43.3(4) and 567—subrules 40.3(1) and 40.4(1) shall be submitted with the application for a construction permit prior to the authorization to commence construction. The construction permit fee shall be based upon the following rate structure:

(1) Routine construction permits. The fee shall be determined based upon the total length of water main plus the non-water-main-related construction costs, calculated as follows:

1. Water mains (minimum fee of \$100; maximum fee of \$5,000):

| Length of permitted water main | Rate |
|--------------------------------|----------------------|
| First 1,000 ft. | \$100 |
| Next 19,000 ft. | \$0.10/ft. |
| Next 300,000 ft. | \$0.01/ft. |
| Over 320,000 ft. | No additional charge |

2. Non-water-main-related construction costs, including source, treatment, pumping, storage and waste handling (minimum fee of \$100; maximum fee of \$16,000):

| Estimated construction cost | Rate |
|-----------------------------|-------------------------------------|
| First \$50,000 | \$100 |
| Next \$950,000 | 0.2% of estimated construction cost |
| Next \$14,000,000 | 0.1% of estimated construction cost |
| Over \$15,000,000 | No additional charge |

(2) “As-built” construction. “As-built” construction is defined as construction that occurred before a construction permit is issued. The fee shall be calculated according to 43.3(3) “c”(1), plus an additional fee of \$200, and is effective for construction that occurred after December 1, 2003. The fee for water main projects permitted in accordance with paragraph 43.3(3) “e” shall be calculated in accordance with subparagraph 43.3(3) “c”(1); however, the additional “as-built” fee of \$200 shall not be assessed for these projects.

(3) Change orders, addenda, permit supplements, and request for time extensions. A fee for change orders, addenda, or permit supplements will only be charged if the aggregate of the changes approved for the project to date causes the total project construction cost to exceed the original project construction cost by at least 5 percent. For water main extensions, the fee will be charged if the total length of water main exceeds the original approved length by 5 percent. The request for a time extension is a flat fee.

| Categories | Rate |
|--|---|
| Change orders, addenda, and permit supplements for water mains | \$0.10/ft. of additional water main, minimum fee: \$50 |
| Change orders, addenda, and permit supplements for non-water-main-related construction costs | 0.2% of additional non-water-main-related construction costs, minimum fee: \$50 |
| Request for time extension | \$50 |

(4) Calendar year construction permit fee cap. The total amount of construction permit fees for a public water supply system owner during any calendar year shall not exceed \$5,000 for water mains and \$16,000 for non-water-main-related construction projects.

d. Water well construction. All water well construction must be performed by a certified well contractor in accordance with 567—Chapter 82. It is the responsibility of the public water supply and certified well contractor to ensure that a public well construction permit has been issued by the department prior to initiation of well construction and to ensure that all well construction is performed in accordance with the provisions of this chapter.

e. Minor water main construction permit. A public water system may obtain a minor water main construction permit from the department for construction or replacement of minor water mains that serve additional users. By obtaining this permit, the system is able to construct new minor water mains or extend or replace existing minor water mains without obtaining an individual construction permit for each specific water main. The permit shall allow construction or replacement of minor water mains that do not exceed six inches in diameter and, in aggregation, do not increase the average daily demand (in gallons per day) of the public water supply system by more than 5 percent over the duration of the permit.

The additional users must have been included in the system's hydraulic analysis that has been approved by the department. The water demands of the additional users must be consistent with the water demands in the approved hydraulic analysis.

(1) A minor water main construction permit shall be issued subject to the following conditions:

1. The system has standard specifications for water main construction approved and on file with the department;

2. The system has adequate source capacity and, where treatment is provided, adequate treatment plant capacity to meet the peak day demand of all existing users and the proposed additional users covered under the permit;

3. The system has adequate storage capacity to meet the average day demand of all existing users and the proposed additional users covered under the permit; and

4. The system submits an application for a minor water main construction permit prior to the construction or replacement of any water main covered by the permit. The permit application must be submitted to the department 90 days before the anticipated first use of the permit, and construction shall not commence prior to the issuance of the permit. The minor water main construction permit expires on December 31 of the year in which it is issued. The application shall include the following:

- An up-to-date hydraulic analysis of the system, prepared and submitted by a licensed professional engineer, must be either on file with the department or submitted with the permit application. The hydraulic basis of flow (gallons per minute per connection) used in the analysis must be acceptable to the department. The hydraulic analysis shall include:

- All existing water mains within the system;

- All proposed water mains intended to be covered by the permit;

- A demonstration that the system has adequate hydraulic capacity to serve the existing and new users under peak flow conditions without causing the pressure to fall below 20 psi anywhere within the system;

- The location of all potential users of the system;

- The diameter of all existing and proposed pipes;

- The projected system flows; and

◦ The static and dynamic pressures anticipated throughout the system with the addition of the new users incorporated in the analysis.

● A completed Schedule 1b, Minor Water Main Construction Permit Application (Form 542-3151), listed in 567—subrule 40.3(1).

(2) The system must submit completed Schedule 2c, Notification of Minor Water Main Construction (Form 542-3152), prior to the construction or replacement of each minor water main covered by this permit. Each water main covered by the permit must have either been included in the previously submitted hydraulic analysis or must be included in an update to the hydraulic analysis, submitted with Schedule 2c. If an update to the hydraulic analysis is submitted with Schedule 2c, it must include all portions of the distribution system potentially affected by the new construction.

(3) By January 31 of the following year, the system shall submit the following to the department:

1. A complete set of plans for all water main extensions constructed under the permit. The plans must be prepared and submitted by a licensed professional engineer.

2. Completed Schedules 1a, 1c, and 2a, listed in 567—subrule 40.3(1).

3. The construction permit fee calculated in accordance with subparagraph 43.3(3)“c”(1). The fee calculation shall be based upon the total length of water main constructed under the permit. For the purpose of calculating the total amount of water main construction permit fees, paid by the system in accordance with subparagraph 43.3(3)“c”(4), the fee shall be credited to the calendar year in which the actual fee was received by the department.

(4) A permit shall contain such conditions as are deemed necessary by the director to ensure compliance with all applicable rules of the department.

(5) The director may modify the permit, in whole or in part, at any time. The director may suspend or revoke the permit, in whole or in part, at any time by providing written notice to the permit holder and is not obligated to renew the permit. Cause for modification, suspension, or revocation of the permit includes, but is not limited to, the following:

1. Violation of any term or condition of the permit;

2. Misrepresentation of fact or failure to disclose fully all material facts in order to obtain a permit;

3. Failure to submit the records and information as required by the director, both generally and as condition of the permit;

4. Failure to submit timely reports from previous permits;

5. Failure to construct in accordance with approved design standards in accordance with subrule 43.3(2); or

6. Failure to construct in accordance with the system’s approved standard specifications.

(6) No variance to the design standards is allowed under this permit. If a variance to the design standards is needed, the system must apply for an individual construction permit following the procedures in 567—subrule 40.4(1).

43.3(4) Waiver from engineering requirements. The requirement for plans and specifications prepared by a licensed professional engineer may be waived for the following types of projects, provided the improvement complies with the standards for construction. This waiver does not relieve the supplier of water from meeting the application and permit requirements pursuant to 43.3(3), except that the applicant need not obtain a written permit prior to installing the equipment.

a. Simple chemical feed, if all the following conditions are met:

(1) The improvement consists only of a simple chemical solution application or installation, which in no way affects the performance of a larger treatment process, or is included as part of a larger treatment project;

(2) The chemical application is by a positive displacement pump (of the piston type with a solenoid operated diaphragm), the acceptability of said pump to be determined by the department;

(3) The supplier of water provides the department with a schematic of the installation and manufacturer’s specifications sufficient enough to determine if the simple chemical feed installation meets, where applicable, standards for construction pursuant to 43.3(2);

(4) The final installation is approved based on an on-site review and inspection by department staff; and

(5) The installation includes only the prepackaged delivery of chemicals (from sacks, containers, or carboys) and does not include the bulk storage or transfer of chemicals (from a delivery vehicle).

b. Self-contained treatment unit, if all the following conditions are met:

(1) The equipment is of a type which can be purchased “off the shelf,” is self-contained requiring only a piping hookup for installation and operates throughout a range of 35 to 80 pounds per square inch;

(2) The plant is designed to serve no more than an average of 250 individuals per day;

(3) The department receives adequate information from the supplier of water on the type of treatment unit, such as manufacturer’s specifications, a schematic indicating the installation’s location within the system and any other information necessary for review by the department to determine if the installation will alleviate the maximum contaminant level violation; and

(4) The final installation is approved based on an on-site inspection by department staff.

43.3(5) *Project planning and basis of design.* An engineering report containing information and data necessary to determine the conformance of the project to the standards for construction and operation in 43.3(2) and the adequacy of the project to supply water in sufficient quantity and at sufficient pressure and of a quality that complies with drinking water standards pursuant to 567—Chapters 41 and 43 must be submitted to the department either with the project or in advance.

a. Such information and data must supply pertinent information as set forth in part one of the Ten States Standards.

b. The department may reject receipt or delay review of the plans and specifications until an adequate basis of design is received.

43.3(6) *Standard specifications for water main construction.* Standard specifications for water main construction by an entity may be submitted to the department or an authorized local public works department for approval. Such approval shall apply to all future water main construction by or for that entity for which plans are submitted with a statement requiring construction in accordance with all applicable approved standard specifications unless the standards for public water supply systems specified in 43.3(2) are modified subsequent to such approval and the standard specifications would not be approvable under the modified standards. In those cases where such approved specifications are on file, construction may commence 30 days following receipt of such plans by the department or an authorized local public works department if no response has been received indicating construction shall not commence until a permit is issued.

43.3(7) *Site, separation distance, and monitoring requirements for new raw water source(s) and underground finished water storage facilities.*

a. Approval required. The site for each proposed raw water supply source or finished water below-ground level storage facility must be approved by the department prior to the submission of plans and specifications.

b. Criteria for approval. A site may be approved by the director if the director concludes that the criteria in this paragraph are met.

(1) Groundwater source. Wells shall be planned and constructed to adapt to the geologic and groundwater conditions of the proposed well site to ensure production of water from the wells that is both microbially safe and free of substances that could cause harmful human health effects. Groundwater wells must meet the following requirements:

1. Drainage must be directed away from the well in all directions for a minimum radius of 15 feet.

2. A well site must be separated from contamination sources by the distances specified in Table A at a minimum.

3. After the well site has received preliminary approval from the department, the owner of the proposed well must submit proof of legal control of the land for a 200-foot radius around the well, through purchase, lease, easement, ordinance, or other similar means. Proof of legal control must be submitted as part of the construction permit application, prior to construction. The legal control must be maintained by the public water system for the life of the well, and the system must ensure that the siting criteria indicated in Table A are met.

However, if the proposed well is for an existing noncommunity water system and is replacing an existing well that either does not meet the current standards or is in poor condition, the requirement of 200-foot legal control may be waived by the department provided that:

- The proposed well is located on the best available site;
- The existing facility does not have adequate land to provide the 200-foot control zone;
- The owner has attempted to obtain legal control without success; and
- There is no other public water supply available to which the supply could connect.

4. When the proposed well is located in an existing well field and will withdraw water from the same aquifer as the existing well(s), individual separation distances may be waived if substantial historical data are available indicating that no contamination has resulted.

5. No well shall be constructed within the projected plume of any known anthropogenic groundwater contamination without the department's written approval. The department may allow a well to be constructed within a contamination plume if the applicant can provide adequate treatment to ensure that all drinking water standards are met and that the pumpage of the proposed well will not cause migration of the plume such that it impacts the water quality of other nearby wells. The applicant must demonstrate, using a hydrogeologic model acceptable to the department, that the time of transport is greater than two years for a viral, bacterial, or other microorganism contaminant and greater than ten years for all chemical contaminants. At a minimum, modeling of the projected plume must take into account the proposed pumpage rate of the well. The department may require additional construction standards for these situations to ensure protection of the groundwater from contamination.

6. The department may require that an identification tag be applied to each well and may supply the numbered tag. The responsibility for ensuring that the tag is properly attached to the well is with the certified water well contractor for new wells and with the department for existing wells.

(2) Surface water source. The applicant must submit proof that a proposed surface water source can, through readily available treatment methodology, comply with 567—Chapters 41 and 43, and that the raw water source is adequately protected against potential health hazards including, but not limited to, point source discharges, hazardous chemical spills, and the potential sources of contamination listed in Table A.

After a surface water impoundment has received preliminary approval from the department for use as a raw water source, the owner of the water supply system shall submit proof of legal control through ownership, lease, easement, or other similar means, of contiguous land for a distance of 400 feet from the shoreline at the maximum water level. Legal control shall be for the life of the impoundment and shall control location of sources of contamination within the 400-foot distance. Proof of legal control should be submitted as part of the construction permit application and shall be submitted prior to issuance of a permit to construct.

(3) Below-ground storage facilities. The minimum separation between a below-ground level finished water storage facility and any source of contamination listed in Table A as being 50 feet or more shall be 50 feet. The specific separation distances listed in Table A that are less than 50 feet shall apply to a below-ground level finished water storage facility as indicated in the table.

(4) Separation distances. Greater separation distances may be required where necessary to ensure that no adverse effects to water supplies or the existing environment will result. Lesser separation distances may be considered if detailed justification is provided by the applicant's engineer showing that no adverse effects will result from a lesser separation distance, and the regional staff recommends approval of the lesser distance. Such exceptions must be based on special construction techniques or localized geologic or hydrologic conditions.

c. New source water monitoring requirements. Water quality monitoring shall be conducted on all new water sources and results submitted to the department prior to placing the new water source into service.

(1) All sources. Water samples shall be collected from each new water source and analyzed for all appropriate contaminants as specified in 567—Chapter 41 consistent with the particular water system classification. If multiple new sources are being added, compositing of the samples (within a single system) shall be allowed in accordance with the composite sampling requirements outlined

in 567—Chapter 41. A single sample may be allowed to meet this requirement, if approved by the department.

Subsequent water testing shall be conducted consistent with the water system's water supply operation permit monitoring schedule.

(2) Groundwater sources. Water samples collected from groundwater sources in accordance with 43.3(7) "c"(1) shall be conducted at the conclusion of the drawdown/yield test pumping procedure, with the exception of bacteriological monitoring. Bacteriological monitoring must be conducted after disinfection of each new well and subsequent pumping of the chlorinated water to waste. Water samples must be analyzed for ammonia. Water samples should also be analyzed for alkalinity, pH, calcium, chloride, copper, hardness, iron, magnesium, manganese, potassium, silica, specific conductance, sodium, sulfate, filterable and nonfilterable solids, and zinc.

(3) Surface water sources. Water samples collected from surface water sources in accordance with 43.3(7) "c"(1) should be collected prior to the design of the surface water treatment facility and shall be conducted and analyzed prior to utilization of the source. The samples shall be collected during June, July, and August. In addition, quarterly monitoring shall be conducted in March, June, September, and December at a location representative of the raw water at its point of withdrawal. Monitoring shall be for turbidity, alkalinity, pH, calcium, chloride, color, copper, hardness, iron, magnesium, manganese, potassium, silica, specific conductance, sodium, sulfate, filterable and nonfilterable solids, carbonate, bicarbonate, algae (qualitative and quantitative), total organic carbon, five-day biochemical oxygen demand, dissolved oxygen, surfactants, nitrogen series (organic, ammonia, nitrite, and nitrate), and phosphate.

TABLE A: SEPARATION DISTANCES

| SOURCE OF CONTAMINATION | REQUIRED MINIMUM LATERAL DISTANCE FROM WELL AS HORIZONTAL ON THE GROUND SURFACE, IN FEET | |
|--|---|--|
| | Deep Well ¹ | Shallow Well ¹ |
| WASTEWATER STRUCTURES: | | |
| Point of Discharge to Ground Surface | | |
| Sanitary & industrial discharges | 400 | 400 |
| Water treatment plant wastes | 50 | 50 |
| Well house floor drains | 5 | 5 |
| Sewers & Drains ² | | |

¹Deep and shallow wells, as defined in 567—40.2(455B): A deep well is a well located and constructed in such a manner that there is a continuous layer of low permeability soil or rock at least 5 feet thick located at least 25 feet below the normal ground surface and above the aquifer from which water is to be drawn. A shallow well is a well located and constructed in such a manner that there is not a continuous layer of low permeability soil or rock (or equivalent retarding mechanism acceptable to the department) at least 5 feet thick, the top of which is located at least 25 feet below the normal ground surface and above the aquifer from which water is to be drawn.

²The separation distances are dependent upon two factors: the type of piping that is in the existing sewer or drain, as noted in the table, and that the piping was properly installed in accordance with the standards.

³Solid wastes are those derived from the treatment of water or wastewater. Certain types of solid wastes from water treatment processes may be land-applied within the separation distance on an individual, case-by-case basis.

⁴Solid waste means garbage, refuse, rubbish, and other similar discarded solid or semisolid materials, including but not limited to such materials resulting from industrial, commercial, agricultural, and domestic activities.

43.3(8) Drinking water system components. Any drinking water system component which comes into contact with raw, partially treated, or finished water must be suitable for the intended use in a potable water system. The component must be certified by an American National Standards Institute (ANSI) accredited third party for conformance with American National Standards Institute/National Sanitation Foundation (ANSI/NSF) Standard 61 specifications, if such specification exists for the particular product, unless approved components are not reasonably available for use, in accordance with guidance provided by the department. If the component does not meet the ANSI/NSF Standard 61 specifications or no specification is available, the person seeking to supply or use the component must prove to the satisfaction of the department that the component is not toxic or otherwise a potential hazard in a potable public water supply system.

43.3(9) Water treatment filter media material. For single media filters, grain sizes up to 0.8 mm effective size may be approved for filters designed to remove constituents other than those contained in the primary drinking water standards. Pilot or full-scale studies demonstrating satisfactory treatment efficiency and operation with the proposed media will be required prior to issuing any construction permits which allow filter media sizes greater than 0.55 mm.

43.3(10) Best available treatment technology.

a. BATs for organic compounds. The department identifies as indicated in the table below either granular activated carbon (GAC), packed tower aeration (PTA), or oxidation (OXID) as the best available technology, treatment technique, or other means available for achieving compliance with the maximum contaminant level for organic contaminants identified in 567—paragraph 41.5(1) “b.” For the purposes of setting MCLs for synthetic organic chemicals, any BAT must be at least as effective as granular activated carbon.

| ORGANIC CONTAMINANT | GAC | PTA | OXID |
|-----------------------------|-----|-----|------|
| Alachlor | x | | |
| Aldicarb | x | | |
| Aldicarb sulfone | x | | |
| Aldicarb sulfoxide | x | | |

| Vinyl chloride | | x | |
| Xylene | x | x | |

b. BATs for inorganic compounds and radionuclides.

(1) Inorganic compounds. The department identifies the following as the best technology, treatment techniques, or other means available for achieving compliance with the maximum contaminant levels for the inorganic contaminants listed in 567—paragraph 41.3(1) “b,” except fluoride.

| INORGANIC CHEMICAL | BAT(s) |
|----------------------|---|
| Antimony | 2, 7 |
| Arsenic ^d | 1, 2, 5, 6, 7, 9, 11 ^e |
| Asbestos | 2, 3, 8 |
| Barium | 5, 6, 7, 9 |
| Beryllium | 1, 2, 5, 6, 7 |
| Cadmium | 2, 5, 6, 7 |
| Chromium | 2, 5, 6 ^b , 7 |
| Cyanide | 5, 7, 12 |
| Mercury | 2 ^a , 4, 6 ^a , 7 ^a |
| Nickel | 5, 6, 7 |
| Nitrate | 5, 7, 9 |
| Nitrite | 5, 7 |
| Selenium | 1, 2 ^c , 6, 7, 9 |
| Thallium | 1, 5 |

Key to BATs

| | | |
|-----------------------------------|---------------------|--|
| 1=Activated Alumina | 5=Ion Exchange | 9=Electrodialysis |
| 2=Coagulation/Filtration* | 6=Lime Softening* | 10=Chlorine |
| 3=Direct and Diatomite Filtration | 7=Reverse Osmosis | 11=Oxidation/Filtration |
| 4=Granular Activated Carbon | 8=Corrosion Control | 12=Alkaline Chlorination (pH greater than or equal to 8.5) |

*not BAT for systems with less than 500 service connections

^aBAT only if influent Hg concentrations are less than or equal to 10 micrograms/liter.

^bBAT for Chromium III only.

^cBAT for Selenium IV only.

^dBAT for Arsenic V. Preoxidation may be required to convert Arsenic III to Arsenic V.

^eTo obtain high removals, iron to arsenic ratio must be at least 20:1.

(2) Small system compliance technologies for arsenic. The department identifies in the following table the affordable technology, treatment techniques, or other means available to systems serving 10,000 or fewer persons for achieving compliance with the arsenic maximum contaminant level.

SMALL SYSTEM COMPLIANCE TECHNOLOGIES FOR ARSENIC¹

| Technology | Affordable for listed small system categories ² |
|---------------------------------------|--|
| Activated alumina | All size categories |
| Coagulation/filtration ³ | 501 – 3,300 and 3,301 – 10,000 |
| Coagulation-assisted microfiltration | 501 – 3,300 and 3,301 – 10,000 |
| Electrodialysis reversal ⁴ | 501 – 3,300 and 3,301 – 10,000 |
| Enhanced coagulation/filtration | All size categories |
| Enhanced lime softening (pH > 10.5) | All size categories |
| Ion exchange | All size categories |
| Lime softening ³ | 501 – 3,300 and 3,301 – 10,000 |
| Oxidation/filtration ⁵ | All size categories |
| Reverse osmosis ⁴ | 501 – 3,300 and 3,301 – 10,000 |

¹Technologies are for Arsenic V. Preoxidation may be required to convert Arsenic III to Arsenic V.

²There are three categories of small systems: those serving 25 to 500 people, those serving 501 to 3,300 people, and those serving 3,301 to 10,000 people.

³Unlikely to be installed solely for arsenic removal. May require pH adjustment to optimal range if high removals are needed.

⁴Technologies reject a large volume of water. May not be appropriate for areas where water quantity may be an issue.

⁵To obtain high removals, iron to arsenic ratio must be at least 20:1.

(3) Radionuclides.

1. The department identifies in the following table the best available technology for achieving compliance with the radionuclide maximum contaminant levels as indicated.

RADIONUCLIDE BAT

| Contaminant | Best Available Technology |
|---|---|
| Gross alpha particle activity (excluding radon and uranium) | Reverse osmosis |
| Beta particle and photon radioactivity | Ion exchange, reverse osmosis |
| Combined radium-226 and radium-228 | Ion exchange, reverse osmosis, lime softening |
| Uranium | Ion exchange, reverse osmosis, lime softening, coagulation/filtration |

2. Small system compliance technologies. The following technologies are identified as radionuclide BAT for systems serving 10,000 or fewer people.

RADIONUCLIDES SMALL SYSTEM COMPLIANCE TECHNOLOGIES

| Contaminant | Compliance Technology ^a |
|--|---|
| Gross alpha particle activity | 2 |
| Beta particle and photon radioactivity | 1, 2 |
| Combined radium-226 and radium-228 | 1, 2, 3, 4, 5, 6, 7 |
| Uranium | 1, 2 ^b , 3 ^b , 8, 9 |

^aCompliance technologies are listed with their corresponding number and potential limitations for use, as follows:

- 1: Ion exchange. The regeneration solution contains high concentrations of the contaminant ions. Disposal options should be carefully considered before choosing this technology.
- 2: Reverse osmosis. Reject water disposal options should be carefully considered before choosing this technology.
- 3: Lime softening. The complexity of the water chemistry may make this technology too complex for small systems.
- 4: Green sand filtration. Removal efficiencies can vary depending on water quality.
- 5: Coprecipitation with barium sulfate. This technology has limited applications to small systems, and is most applicable to systems with sufficiently high sulfate levels that already have a suitable filtration treatment train in place.
- 6: Electrodialysis/electrodialysis reversal.
- 7: Pre-formed hydrous manganese oxide filtration. This technology is most applicable to small systems that have existing filtration technology.
- 8: Activated alumina. The regeneration solution contains high concentrations of the contaminant ions. Disposal options should be carefully considered before choosing this technology. Handling of chemicals required during regeneration and pH adjustment requires an adequately trained operator.
- 9: Enhanced coagulation/filtration. This technology assumes that it is a modification to an existing coagulation/filtration process.

^bNot recommended for systems serving 25 to 500 persons.

c. BATs for disinfection byproducts and disinfectants. The department identifies the following as the best technology, treatment techniques, or other means available for achieving compliance with the maximum contaminant levels for the disinfection byproducts listed in 567—paragraph 41.5(2) “b,” and the maximum residual disinfectant levels listed in 567—paragraph 41.5(2) “c.”

| DBP MCL or MRDL | Best Available Technology |
|--|--|
| Bromate MCL | Control of ozone treatment process to reduce production of bromate |
| Chlorite MCL | Control of treatment processes to reduce disinfectant demand and control of disinfection treatment processes to reduce disinfectant levels |
| HAA5 and TTHM MCL running annual average | Enhanced coagulation or enhanced softening or GAC10, with chlorine as the primary and residual disinfectant |
| HAA5 and TTHM MCL LRAA | <ul style="list-style-type: none"> • Non-consecutive system: Enhanced coagulation or enhanced softening, plus GAC10; or nanofiltration with a molecular weight cutoff that is less than or equal to 1000 Daltons; or GAC20 • Consecutive system serving at least 10,000 persons*: Improved distribution system and storage tank management to reduce residence time, plus the use of chloramines for disinfectant residual maintenance • Consecutive system serving fewer than 10,000 persons*: Improved distribution system and storage tank management to reduce residence time |
| MRDL | Control of treatment processes to reduce disinfectant demand and control of disinfection treatment processes to reduce disinfectant levels |

* Applies only to the disinfected water that consecutive systems buy or otherwise receive.

d. Requirement to install BAT. The department shall require community water systems and nontransient noncommunity water systems to install and use any treatment method identified in 43.3(10) as a condition for granting an interim contaminant level except as provided in paragraph “e.” If, after the system’s installation of the treatment method, the system cannot meet the maximum contaminant level, the system shall be eligible for a compliance schedule with an interim contaminant level granted under the provisions of 567—subrule 42.1(9) and rule 567—43.2(455B).

e. Engineering assessment option. If a system can demonstrate through comprehensive engineering assessments, which may at the direction of the department include pilot plant studies, that the treatment methods identified in 43.3(10) would only achieve a de minimis reduction in contaminants, the department may issue a schedule of compliance that requires the system being granted the variance to examine other treatment methods as a condition of obtaining the interim contaminant level.

f. Compliance schedule. If the department determines that a treatment method identified in 43.3(10) “a,” “b,” and “c” is technically feasible, the department may require the system to install or use that treatment method in connection with a compliance schedule issued under the provisions of 567—subrule 42.1(9) and rule 567—43.2(455B). The determination shall be based upon studies by the system and other relevant information.

g. Avoidance of unacceptable risk to health (URTH). The department may require a public water system to use bottled water, point-of-use devices, point-of-entry devices or other means as a condition of granting a variance or an exemption, or issuance of a compliance schedule, from the requirements of 43.3(10) to avoid an unreasonable risk to health.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.4(455B) Certification of completion. Within 30 days after completion of construction, installation or modification of any project, the permit holder shall submit a certification by a licensed professional engineer that the project was completed in accordance with the approved plans and specifications except if the project received a waiver pursuant to 43.3(4).

567—43.5(455B) Filtration and disinfection for surface water and influenced groundwater public water supply systems.

43.5(1) Applicability/general requirements.

a. These rules apply to all public water supply systems using surface water or groundwater under the direct influence of surface water, in whole or in part, and establish criteria under which filtration is

required as a treatment technique. In addition, these rules establish treatment technique requirements in lieu of maximum contaminant levels for *Giardia lamblia*, heterotrophic plate count bacteria, *Legionella*, viruses and turbidity. Each public water system with a surface water source or a groundwater source under the direct influence of surface water must provide treatment of that source water which complies with these treatment technique requirements. Systems which serve at least 10,000 persons must also comply with the requirements of 567—43.9(455B). Systems which serve fewer than 10,000 persons must also comply with the requirements of 567—43.10(455B). The treatment technique requirements consist of installing and properly operating water treatment processes which reliably achieve:

(1) At least 99.9 percent (3-log) removal or inactivation of *Giardia lamblia* cysts between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer; and

(2) At least 99.99 percent (4-log) removal or inactivation of viruses between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer.

b. Criteria for identification of groundwater under the direct influence of surface water. “Groundwater under the direct influence of surface water” means any water beneath the surface of the ground with: (1) significant occurrence of insects or other macroorganisms, algae, or large-diameter pathogens such as *Giardia lamblia*, or (2) significant and relatively rapid shifts in water characteristics such as turbidity (particulate content), temperature, conductivity, or pH which closely correlate to climatological or surface water conditions. Direct influence must be determined for individual sources in accordance with criteria established by the department. The department determination of direct influence may be based on site-specific measurements of water quality or documentation of well construction characteristics and geology with field evaluation. Only surface water and groundwater sources under the direct influence of surface water that are at risk to the contamination from *Giardia* cysts are subject to the requirements of this rule. Groundwater sources shall not be subject to this rule. The evaluation process shall be used to delineate between surface water, groundwater under the direct influence of surface water and groundwater. The identification of a source as surface water and groundwater under the direct influence of surface water shall be determined for an individual source, by the department, in accordance with the following criteria. The public water supply shall provide to the department that information necessary to make the determination. The evaluation process will involve one or more of the following steps:

(1) Preliminary evaluation. The department shall conduct a preliminary evaluation of information on the source provided by the public water supply to determine if the source is an obvious surface water (e.g., pond, lake, stream) or groundwater under the direct influence of surface water. The source shall be evaluated during that period of highest susceptibility to influence from surface water. The preliminary evaluation may include a review of surveys, reports, geological information of the area, physical properties of the source, and a review of departmental and public water system records. If the source is identified as a surface water, no additional evaluation shall be conducted. If the source is a groundwater and identified as a deep well, it shall be classified as a groundwater not under the direct influence of surface water and no additional evaluation shall be conducted, unless through direct knowledge or documentation the source does not meet the requirements of 43.5(1)“b”(2). The deep well shall then be evaluated in accordance with 43.5(1)“b”(3). If the source is a shallow well, the source shall be evaluated in accordance with 43.5(1)“b”(2). If the source is a spring, infiltration gallery, radial collector well, or any other subsurface source, it shall be evaluated in accordance with 43.5(1)“b”(3).

(2) Well source evaluation. Shallow wells greater than 50 feet in lateral distance from a surface water source shall be evaluated for direct influence of surface water through a review of departmental or public water system files in accordance with 43.5(1)“b”(2)“1” and 43.5(1)“b”(2)“2.” Sources that meet the criteria shall be considered to be not under the direct influence of surface water. No additional evaluation will be required. Shallow wells 50 feet or less in lateral distance from a surface water shall be in accordance with 43.5(1)“b”(3) and (4).

1. Well construction criteria. The well shall be constructed so as to prevent surface water from entering the well or traversing the casing.

2. Water quality criteria. Water quality records shall indicate:
 - No record of total coliform or fecal coliform contamination in untreated samples collected over the past three years.
 - No history of turbidity problems associated with the well, other than turbidity as a result of inorganic chemical precipitates.
 - No history of known or suspected outbreak of *Giardia* or other pathogenic organisms associated with surface water (e.g., *Cryptosporidium*) which has been attributed to the well.

3. Other available data. If data on particulate matter analysis of the well are available, there shall be no evidence of particulate matter present that is associated with surface water. If information on turbidity or temperature monitoring of the well and nearby surface water is available, there shall be no data on the source which correlates with that of a nearby surface water.

4. Further evaluation. Wells that do not meet all the requirements listed shall require further evaluation in accordance with 43.5(1)“b”(3) and (4).

- (3) Formal evaluation. The evaluation shall be conducted by the department or a licensed professional engineer at the direction of the public water supply. The evaluation shall include:

1. Complete file review. In addition to the information gathered in 43.5(1)“b”(1), the complete file review shall consider but not be limited to: design and construction details; evidence of direct surface water contamination; water quality analysis; indications of waterborne disease outbreaks; operational procedures; and customer complaints regarding water quality or water-related infectious illness. Sources other than a well source shall be evaluated in a like manner to include a field survey.

2. Field survey. A field survey shall substantiate findings of the complete file review and determine if the source is at risk to pathogens from direct surface water influence. The field survey shall examine the following criteria for evidence that surface water enters the source through defects in the source which include but are not limited to: a lack of a surface seal on wells, infiltration gallery laterals exposed to surface water, springs open to the atmosphere, surface runoff entering a spring or other collector, and distances to obvious surface water sources.

A report summarizing the findings of the complete file review and field survey shall be submitted to the department for final review and classification of the source. If the complete file review or field survey demonstrates conclusively that the source is subject to the direct surface water influence, the source shall be classified as under the direct influence of surface water. Either method or both may be used to demonstrate that the source is a surface water or groundwater under the direct influence of surface water. If the findings do not demonstrate conclusive evidence of direct influence of surface water, the analysis outlined in 43.5(1)“b”(4) should be conducted.

- (4) Particulate analysis and physical properties evaluation.

1. Surface water indicators. Particulate analysis shall be conducted to identify organisms which only occur in surface waters as opposed to groundwaters, and whose presence in a groundwater would indicate the direct influence of surface water.

- Identification of a *Giardia* cyst, live diatoms, and blue-green, green, or other chloroplast containing algae in any source water shall be considered evidence of direct surface water influence.

- Rotifers and insect parts are indicators of surface water. Without knowledge of which species is present, the finding of rotifers indicates that the source is either directly influenced by surface water, or the water contains organic matter sufficient to support the growth of rotifers. Insects or insect parts shall be considered strong evidence of surface water influence, if not direct evidence.

- The presence of coccidia (e.g., *Cryptosporidium*) in the source water is considered a good indicator of direct influence of surface water. Other macroorganisms (greater than 7 um) which are parasitic to animals and fish such as, but not limited to, helminths (e.g., tapeworm cysts), ascaris, and *Diphyllobothrium*, shall be considered as indicators of direct influence of surface water.

2. Physical properties. Turbidity, temperature, pH and conductivity provide supportive, but less direct, evidence of direct influence of surface water. Turbidity fluctuations of greater than 0.5-1.0 NTU over the course of a year may be indicative of direct influence of surface water. Temperature fluctuations may also indicate surface water influence. Changes in other chemical parameters such as pH, conductivity, or hardness may also give an indirect indication of influence by nearby surface water.

c. Compliance. A public water system using a surface water source or a groundwater source under the direct influence of surface water is considered to be in compliance with the requirements of this subrule if it meets the filtration requirements in 43.5(3) and the disinfection requirements in 43.5(2) in accordance with the effective dates specified within the respective subrules.

d. Certified operator requirement. Each public water system using a surface water source or a groundwater source under the direct influence of surface water must be operated by a certified operator who meets the requirements of 567—Chapter 81.

43.5(2) Disinfection. All community and noncommunity public water supply systems using surface water or groundwater under the direct influence of surface water in whole or in part shall be required to provide disinfection in compliance with this subrule and filtration in compliance with 43.5(3). If the department has determined that filtration is required, the system must comply with any interim disinfection requirements the department deems necessary before filtration is installed. A system providing filtration on or before December 30, 1991, must meet the disinfection requirements of this subrule beginning June 29, 1993. A system providing filtration after December 30, 1991, must meet the disinfection requirements of this subrule when filtration is installed. Failure to meet any requirement of this subrule after the applicable date specified in this subrule is a treatment technique violation. The disinfection requirements are as follows:

a. *Disinfection treatment criteria.* The disinfection treatment must be sufficient to ensure that the total treatment processes of that system achieve at least 99.9 percent (3-log) inactivation or removal of *Giardia lamblia* cysts and at least 99.99 percent (4-log) inactivation or removal of viruses, acceptable to the department. At least 0.5 log inactivation of *Giardia lamblia* cysts must be achieved through disinfection treatment using a chemical disinfectant even if the required inactivation or removal is met or exceeded through physical treatment processes. Each system is required to calculate the total inactivation ratio ($CT_{\text{calculated}}/CT_{\text{required}}$) each day the treatment plant is in operation. The system's total inactivation ratio must be equal to or greater than 1.0 in order to ensure that the minimum inactivation and removal requirements have been achieved. If the system's total inactivation ratio for the day is below 1.0, the system must notify the department within 24 hours.

b. *Disinfection system.* The disinfection system must include:

(1) Redundant components, including an auxiliary power supply with automatic start-up and alarm to ensure that disinfectant application is maintained continuously while water is being delivered to the distribution system, or

(2) Automatic shutoff of delivery of water to the distribution system whenever there is less than 0.3 mg/L of residual disinfectant concentration in the water. If the department determines that automatic shutoff would cause unreasonable risk to health or interfere with fire protection, the system must comply with 43.5(2)“b”(1).

c. *Residual disinfectant entering system.* The residual disinfectant concentration in the water entering the distribution system, measured as specified in 43.5(4)“a”(5) and 43.5(4)“b”(2), cannot be less than 0.3 mg/L free residual or 1.5 mg/L total residual chlorine for more than four hours.

d. *Residual disinfectant in the system.* The residual disinfectant concentration in the distribution system, measured as total chlorine, combined chlorine, or chlorine dioxide, as specified in 43.5(4)“a”(5) and 43.5(4)“b”(2), cannot be undetectable in more than 5 percent of the samples each month for any two consecutive months that the system serves water to the public. Water within the distribution system with a heterotrophic plate count bacteria concentration less than or equal to 500/mL, measured as heterotrophic plate count (HPC) as specified in 567—paragraph 41.2(3)“e,” is deemed to have a detectable disinfectant residual for purposes of determining compliance with this requirement. Therefore, the value “V” in the following formula cannot exceed 5 percent in one month for any two consecutive months.

$$V = \left[\frac{c + d + e}{a + b} \right] \times 100$$

where:

- a = number of instances in which the residual disinfectant concentration is measured;
- b = number of instances in which the residual disinfectant concentration is not measured but heterotrophic plate count bacteria (HPC) is measured;
- c = number of instances in which the residual disinfectant concentration is measured but not detected and no HPC is measured;
- d = number of instances in which no residual disinfectant concentration is detected and where the HPC is greater than 500/mL; and
- e = number of instances in which the residual disinfectant concentration is not measured and HPC is greater than 500/mL.

43.5(3) Filtration.

a. *Applicability.* A public water system that uses a surface water source or a groundwater source under the direct influence of surface water must provide treatment consisting of both disinfection, as specified in 43.5(2), and filtration treatment which complies with the turbidity requirements of subrules 43.5(3), 43.5(4), and 43.5(5). A system providing or required to provide filtration on or before December 30, 1991, must meet the requirements of this subrule by June 29, 1993. A system providing or required to provide filtration after December 30, 1991, must meet the requirements of this subrule when filtration is installed. Beginning January 1, 2002, systems serving at least 10,000 people must meet the turbidity requirements in 567—43.9(455B). Beginning January 1, 2005, systems serving fewer than 10,000 people must meet the turbidity requirements in 567—43.10(455B). A system shall install filtration within 18 months after the department determines, in writing, that filtration is required. The department may require and the system shall comply with any interim turbidity requirements the department deems necessary. Failure to meet any requirements of the referenced subrules after the dates specified is a treatment technique violation.

b. *Conventional filtration treatment or direct filtration.*

(1) For systems using conventional filtration or direct filtration, the turbidity level of representative samples of a system's filtered water must be less than or equal to 0.5 nephelometric turbidity units (NTU) in at least 95 percent of the measurements taken each month when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

(2) The turbidity level of representative samples of a system's filtered water must at no time exceed 5 NTU when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

c. *Slow sand filtration.*

(1) For systems using slow sand filtration, the turbidity level of representative samples of a system's filtered water must be less than or equal to 1 NTU in at least 95 percent of the measurements taken each month when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

(2) The turbidity level of representative samples of a system's filtered water must at no time exceed 5 NTU when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

d. *Diatomaceous earth filtration.*

(1) For systems using diatomaceous earth filtration, the turbidity level of representative samples of a system's filtered water must be less than or equal to 1 NTU in at least 95 percent of the measurements taken each month when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

(2) The turbidity level of representative samples of a system's filtered water must at no time exceed 5 NTU when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

e. *Other filtration technologies.* A public water system may use either a filtration technology not listed in 43.5(3) "b" to 43.5(3) "d" or a filtration technology listed in 43.5(3) "b" or 43.5(3) "c" at a higher turbidity level if it demonstrates to the department through a preliminary report submitted by a licensed professional engineer, using pilot plant studies or other means, that the alternative filtration technology in combination with disinfection treatment that meets the requirements of 43.5(2) consistently achieves 99.9 percent removal or inactivation of *Giardia lamblia* and 99.99 percent removal or inactivation of viruses. For a system that uses alternative filtration technology and makes this demonstration, the turbidity treatment technique requirements are as follows:

(1) The turbidity level of representative samples of a system's filtered water must be less than or equal to 1 NTU in at least 95 percent of the measurements taken each month when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

(2) The turbidity level of representative samples of a system's filtered water must at no time exceed 5 NTU when measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

Beginning January 1, 2002, systems serving at least 10,000 people must meet the requirements for other filtration technologies in 43.9(3) "b."

Beginning January 1, 2005, systems serving fewer than 10,000 people must meet the requirements for other filtration technologies in 567—43.10(455B).

43.5(4) Analytical and monitoring requirements.

a. Analytical requirements. Only the analytical method(s) specified in this paragraph, or otherwise approved by the department, may be used to demonstrate compliance with the requirements of 43.5(2) and 43.5(3). Measurements for pH, temperature, turbidity, and residual disinfectant concentrations must be conducted by a Grade II, III or IV operator meeting the requirements of 567—Chapter 81, any person under the supervision of a Grade II, III or IV operator meeting the requirements of 567—Chapter 81, or a laboratory certified by the department to perform analysis under 567—Chapter 83. For consecutive public water supplies from a surface water or groundwater under the direct influence of surface water system, the disinfectant concentration analyses must be conducted by a certified operator who meets the requirements of 567—Chapter 81. Measurements for heterotrophic plate count bacteria must be conducted by a laboratory certified by the department to do such analysis.

(1) Turbidity analytical methodology. Turbidity analysis shall be conducted using the methodology in the following table. Each turbidimeter must be calibrated at least once every 90 days with a primary standard. The calibration of each turbidimeter used for compliance must be verified at least once per week with a primary standard, secondary standards, or the manufacturer's proprietary calibration confirmation device or by a method approved by the department. If the verification is not within plus or minus 0.05 NTU for measurements of less than or equal to 0.5 NTU, or within plus or minus 10 percent of measurements greater than 0.5 NTU, the turbidimeter must be recalibrated.

(2) Temperature analytical methodology. The temperature shall be determined in compliance with the methodology listed in 567—subparagraph 41.4(1) "g"(1).

(3) pH (hydrogen ion concentration) analytical methodology. The pH shall be determined in compliance with the methodology listed in 567—subparagraph 41.4(1) "g"(1).

(4) Heterotrophic plate count bacteria analytical methodology. The heterotrophic plate count bacteria sampling and analysis shall be conducted in compliance with 567—subrule 41.2(3) and 43.5(2) "d." The time from sample collection to initiation of analysis shall not exceed eight hours, and the samples must be held below 10 degrees C during transit.

(5) Residual disinfectant analytical methodology. The residual disinfectant concentrations shall be determined in compliance with one of the analytical methods in the following table. Residual disinfectant concentrations for free chlorine and combined chlorine may also be measured by using DPD colorimetric test kits. Free and total chlorine residuals may be measured continuously by adapting a specified chlorine residual method for use with a continuous monitoring instrument provided the chemistry, accuracy and precision remain the same. Instruments used for continuous monitoring must be verified with a grab sample measurement at least every seven days. The analyzer concentration must be within plus or minus 0.1 mg/L or plus or minus 15 percent (whichever is larger) of the grab sample measurement. If the verification is not within this range, immediate actions must be taken to resolve the issue and another verification must be conducted.

b. Monitoring requirements. A public water system that uses a surface water source or groundwater source under the influence of surface water must monitor in accordance with this paragraph.

(1) Turbidity.

1. Routine turbidity monitoring requirements. Turbidity measurements as required by 43.5(3) must be performed on representative samples of the system's filtered water every four hours (or more frequently as long as measurements are recorded at equal time intervals and detailed in the turbidity protocol) that the system serves water to the public. A public water system may substitute continuous turbidity monitoring for grab sample monitoring or may monitor more frequently than every four hours if it validates the continuous measurement for accuracy on a regular basis using a turbidity protocol approved by the department and audited for compliance during sanitary surveys. Major elements of the protocol shall include, but are not limited to: sample measurement location, method of calibration, calibration frequency, calibration standards, method of verification, verification frequency, documentation, data collection, data recording frequency, and data reporting. For any systems using slow sand filtration or filtration treatment other than conventional treatment, direct filtration, or diatomaceous earth filtration, the department may reduce the sampling frequency to once per day if it determines that less frequent monitoring is sufficient to indicate effective filtration performance. For systems serving 500 or fewer persons, the department may reduce the turbidity sampling frequency to once per day, regardless of the type of filtration treatment used, if the department determines that less frequent monitoring is sufficient to indicate effective filtration performance. Approval shall be based upon documentation provided by the system, acceptable to the department and pursuant to the conditions of an operation permit.

2. Turbidity monitoring requirements for population greater than 100,000. A supplier of water serving a population or population equivalent of greater than 100,000 persons shall provide a continuous or rotating cycle turbidity monitoring and recording device or take hourly grab samples to determine

compliance with 43.5(3). The system must meet the requirements in 43.5(4) “b”(1)“1,” including the turbidity protocol.

3. Failure of the continuous turbidity monitoring equipment. If there is a failure in the continuous turbidity monitoring equipment, the system must conduct grab sampling every four hours in lieu of continuous monitoring until the turbidimeter is repaired and back online. A system has a maximum of five working days after failure to repair the equipment or else the system is in violation. The system must notify the department within 24 hours of both when the turbidimeter was taken offline and when it was returned online.

(2) Residual disinfectant.

1. Residual disinfectant entering the system. The residual disinfectant concentration of the water entering the distribution system shall be monitored continuously, and the lowest value recorded each day, except that if there is a failure in the continuous monitoring equipment, grab sampling every four hours may be conducted in lieu of continuous monitoring, but not to exceed five working days following the failure of the equipment. If acceptable to the department, systems serving 3,300 or fewer persons may take grab samples in lieu of providing continuous monitoring on an ongoing basis at the frequencies prescribed below:

Residual Disinfectant Samples Required of Surface Water or IGW PWS

| System size (persons served) | Samples per day* |
|------------------------------|------------------|
| 500 or fewer | 1 |
| 501 to 1,000 | 2 |
| 1,001 to 2,500 | 3 |
| 2,501 to 3,300 | 4 |

*When more than one grab sample is required per day, the day’s samples cannot be taken at the same time. The sampling intervals must be at a minimum of four-hour intervals.

If at any time the disinfectant concentration falls below 0.3 mg/L free residual or 1.5 mg/L total residual chlorine in a system using grab sampling in lieu of continuous monitoring, the system shall take a grab sample every four hours until the residual disinfectant concentration is equal to or greater than 0.3 mg/L free residual or 1.5 mg/L total residual chlorine.

2. Residual disinfectant in the system. The residual disinfectant concentration must be measured at least daily in the distribution system. Residual disinfectant measurements that are required as part of the total coliform bacteria sample collection under 567—subparagraph 41.2(1) “c”(7) shall be used to satisfy this requirement on the day(s) when a bacteria sample(s) is collected. The department may allow a public water system that uses both a groundwater source and a surface water source or a groundwater source under direct influence of surface water to take residual disinfectant samples at points other than the total coliform sampling points, if these points are included as a part of the coliform sample site plan meeting the requirements of 567—paragraph 41.2(1) “c”(1)“1” and if the department determines that such points are representative of treated (disinfected) water quality within the distribution system. Heterotrophic plate count bacteria (HPC) may be measured in lieu of residual disinfectant concentration, using the analytical methods specified in 567—subparagraph 41.2(3) “e”(1). The time from sample collection to initiation of analysis shall not exceed eight hours. HPC samples must be kept below 10 degrees C during transit to the laboratory. All HPC samples must be analyzed by a department-certified laboratory meeting the requirements of 567—Chapter 83.

43.5(5) Reporting requirements. Public water supplies shall report the results of routine monitoring required to demonstrate compliance with 567—43.5(455B) and treatment technique violations as follows:

a. *Waterborne disease outbreak.* Each system, upon discovering that a waterborne disease outbreak potentially attributable to that water system has occurred, must report that occurrence to the department as soon as possible, but no later than by the end of the next business day.

b. Turbidity exceeds 5 NTU. If at any time the turbidity exceeds 5 NTU, the system must inform the department as soon as possible, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3)“b”(3).

c. Residual disinfectant entering distribution system below 0.3 mg/L free residual chlorine or 1.5 mg/L total residual chlorine. If at any time the residual falls below 0.3 mg/L free residual chlorine or 1.5 mg/L total residual chlorine in the water entering the distribution system, the system must notify the department as soon as possible, but no later than by the end of the next business day. The system also must notify the department by the end of the next business day whether or not the residual was restored to at least 0.3 mg/L free residual chlorine or 1.5 mg/L total residual chlorine within four hours.

d. Routine monitoring reporting requirements. Routine monitoring results shall be provided as part of the monthly operation reports in accordance with 567—40.3(455B) and 567—subrule 42.4(3).

e. Total inactivation ratio below 1.0. If the system’s total inactivation ratio for the day is below 1.0, the system must notify the department within 24 hours.

43.5(6) Filter backwash recycle provisions. All surface water or influenced groundwater systems that employ conventional filtration or direct filtration treatment and that recycle spent filter backwash water, thickener supernatant, or liquids from dewatering processes must meet the requirements of this subrule.

a. Reporting. A system must notify the department in writing by December 8, 2003, if the system recycles spent filter backwash water, thickener supernatant, or liquids from dewatering processes. This notification must include the following information at a minimum:

(1) A plan schematic showing the origin of all flows which are recycled (including, but not limited to, spent filter backwash water, thickener supernatant, and liquids from dewatering processes), the hydraulic conveyance used to transport them, and the location where they are reintroduced back into the treatment plant.

(2) Typical recycle flow in gallons per minute (gpm), the highest observed plant flow experience in the previous year (in gpm), design flow for the treatment plant (in gpm), the minimum plant rate (in gpm) during which the filter backwash will be recycled, and department-approved operating capacity for the plant where the department has made such determinations.

b. Treatment technique requirement. Any system that recycles spent filter backwash water, thickener supernatant, or liquids from dewatering processes must return these flows through the processes of a system’s existing conventional or direct filtration system as defined in 567—40.2(455B) or at an alternate location approved by the department by June 8, 2004. However, if capital improvements are required to modify the recycle location to meet this requirement, all capital improvements must be completed no later than June 8, 2006.

c. Record keeping. The system must collect and retain on file the recycle flow information specified below for review and evaluation by the department beginning June 8, 2004.

(1) A copy of the recycle notification and information submitted to the department under paragraph “a” of this subrule.

(2) A list of all recycle flows and the frequency with which they are returned.

(3) The average and maximum backwash flow rate through the filters and the average and maximum duration of the filter backwash process in minutes.

(4) The typical filter run length and a written summary of how filter run length is determined.

(5) The type of treatment provided for the recycle flow.

(6) Data on the physical dimensions of the equalization and treatment units, typical and maximum hydraulic loading rates, type of treatment chemicals used including average dose and frequency of use, and frequency at which solids are removed, if applicable.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.6(455B) Residual disinfectant and disinfection byproduct precursors.

43.6(1) Residual disinfectant.

a. Applicability.

(1) CWS and NTNC systems. This rule establishes criteria under which CWS and NTNC public water supply systems that add a chemical disinfectant to the water in any part of the drinking water treatment process or that provide water that contains a chemical disinfectant must modify their practices to meet the MCLs listed in 567—41.6(455B), the maximum residual disinfectant levels (MRDL) listed in this subrule, and treatment technique requirements for disinfection byproduct precursors listed in subrule 43.6(3).

(2) TNC systems with chlorine dioxide disinfection. This rule establishes criteria under which TNC public water supply systems that use chlorine dioxide as a disinfectant or oxidant must modify their practices to meet the chlorine dioxide MRDL listed in paragraph 43.6(1)“b.”

(3) Compliance dates. Compliance dates for this rule are based upon the source water type and the population served. Systems are required to comply with this rule as follows, unless otherwise noted:

1. Surface water and IGW CWS and NTNC. CWS and NTNC systems using surface water or groundwater under the direct influence of surface water (IGW) in whole or in part and which serve 10,000 or more persons must comply with this rule beginning January 1, 2002. CWS and NTNC surface water or IGW systems serving fewer than 10,000 persons must comply with this rule beginning January 1, 2004.

2. Groundwater CWS and NTNC. CWS and NTNC systems using only groundwater not under the direct influence of surface water must comply with this rule beginning January 1, 2004.

3. TNC using chlorine dioxide. TNC systems serving over 10,000 persons and using surface water or groundwater under the direct influence of surface water and using chlorine dioxide as a disinfectant or oxidant must comply with any requirements for chlorine dioxide in this rule beginning January 1, 2002. TNC systems serving 10,000 persons or less, regardless of source water type, and using chlorine dioxide as a disinfectant or oxidant must comply with any requirements for chlorine dioxide in this rule beginning January 1, 2004.

4. Extension of compliance period for GAC or membrane technology installation. A system that is installing GAC or membrane technology to comply with this rule may apply to the department for an extension of up to 24 months past the dates in 43.6(1)“a”(3), but not beyond December 31, 2003. In granting the extension, the department will set a schedule for compliance and may specify any interim measures the system must take. Failure to meet a compliance schedule or interim treatment requirements constitutes a violation of the public drinking water supply rules, requires public notification per 567—subrule 42.1(1), and may result in an administrative order.

(4) Control of residual disinfectants. Notwithstanding the MRDLs in this rule, systems may increase residual disinfectant levels of chlorine or chloramines (but not chlorine dioxide) in the distribution system to a level and for a time necessary to protect public health, to address specific microbiological contamination problems caused by circumstances such as, but not limited to, distribution line breaks, storm run-off events, source water contamination events, or cross-connection events.

(5) Consecutive systems. Consecutive systems that provide water containing a disinfectant or oxidant are required to comply with this rule.

(6) Systems with multiple water sources. Systems with water sources that are used independently from each other, are not from the same source as determined by the department, or do not go through identical treatment processes are required to conduct the monitoring for the applicable disinfectants or oxidants and disinfection byproducts during operation of each source. The system must comply with this rule during the use of each water source.

b. Maximum residual disinfectant levels. Maximum residual disinfectant levels (MRDLs) are as follows:

| Disinfection Residual | MRDL (mg/L) |
|-----------------------|-------------------------|
| Chloramines | 4.0 as Cl ₂ |
| Chlorine | 4.0 as Cl ₂ |
| Chlorine dioxide | 0.8 as ClO ₂ |

c. Monitoring requirements for residual disinfectants.

(1) General requirements.

1. Systems must take all samples during normal operating conditions. If the system does not use the disinfectant or oxidant on a daily basis, the system must conduct the required daily monitoring each day the disinfectant or oxidant is used, and any required monthly monitoring during those months in which the disinfectant or oxidant is used during any portion of the month.

2. Failure to monitor in accordance with the monitoring plan required under 43.6(1) "c"(1)"5" is a monitoring violation.

3. Failure to monitor is a violation for the entire period covered by the annual average where compliance is based on a running annual average of monthly or quarterly samples or averages and the system's failure to monitor makes it impossible to determine compliance with MRDLs.

4. Systems may use only data collected under the provisions of this rule or of 567—41.6(455B) to qualify for reduced monitoring.

5. Systems required to monitor under the provisions of this rule or of 567—41.6(455B) must develop and implement a monitoring plan, in accordance with 567—paragraph 41.6(1) "c"(1)"6."

(2) Chlorine and chloramines.

1. Routine monitoring. Community and nontransient noncommunity water systems that use chlorine or chloramines must measure the residual disinfectant level at the same points in the distribution system and at the same time as total coliforms are sampled, as specified in 567—subrule 41.2(1). Surface water and groundwater under the direct influence of surface water systems may use the results of residual disinfectant concentration sampling conducted under 43.5(4) "b"(2)"2," in lieu of taking separate samples.

2. Reduced monitoring. Chlorine and chloramine monitoring may not be reduced.

(3) Chlorine dioxide.

1. Routine monitoring. Any public water supply systems that use chlorine dioxide for disinfection or oxidation must take daily samples at the entrance to the distribution system. For any daily sample that exceeds the MRDL, the system must take samples in the distribution system the following day at the locations required by 43.6(1) "c"(3)"2," in addition to the sample required at the entrance to the distribution system.

2. Additional monitoring. On each day following a routine sample monitoring result that exceeds the MRDL, the system is required to take three chlorine dioxide distribution system samples.

- If chlorine dioxide or chloramines are used to maintain a residual disinfectant in the distribution system, or if chlorine is used to maintain a residual disinfectant in the distribution system and there are no disinfection addition points after the entrance to the distribution system (i.e., no booster chlorination), the system must take three samples as close to the first customer as possible, at intervals of at least six hours.

- If chlorine is used to maintain a residual disinfectant in the distribution system and there are one or more disinfection addition points after the entrance to the distribution system (i.e., booster chlorination), the system must take one sample at each of the following locations: as close to the first customer as possible, in a location representative of average residence time, and as close to the end of the distribution system as possible (reflecting maximum residence time in the distribution system).

3. Reduced monitoring. Chlorine dioxide monitoring may not be reduced.

d. Analytical requirements for residual disinfectants.

(1) Analytical methods. Systems must measure residual disinfectant concentrations for free chlorine, combined chlorine (chloramines), and chlorine dioxide by the methods listed in the following table:

Approved Methods for Residual Disinfectant Compliance Monitoring

| Methodology | Standard Methods | Other Method | Residual measured ¹ | | | |
|------------------------------------|-------------------------|----------------------------------|--------------------------------|-------------------|----------------|------------------|
| | | | Free Chlorine | Combined Chlorine | Total Chlorine | Chlorine Dioxide |
| Amperometric Titration | 4500-Cl D | ASTM: D 1253-86 (96), 03, 08, 14 | X | X | X | |
| Low Level Amperometric Titration | 4500-Cl E | | | | X | |
| DPD Ferrous Titrimetric | 4500-Cl F | | X | X | X | |
| DPD Colorimetric | 4500-Cl G | Hach Method 10260 ⁴ | X | X | X | |
| Syringaldazine (FACTS) | 4500-Cl H | | X | | | |
| Amperometric Sensor | | ChloroSense ³ | X | | X | |
| Online Chlorine Analyzer | | EPA 334.0 ² | X | | X | |
| Indophenol Colorimetric | | Hach Method 10241 ⁶ | X | X | X | |
| Iodometric Electrode | 4500-Cl I | | | | X | |
| DPD | 4500-ClO ₂ D | | | | | X |
| Amperometric Method II | 4500-ClO ₂ E | | | | | X |
| Lissamine Green Spectrophotometric | | EPA: 327.0 Rev. 1.1 | | | | X |
| Amperometric Sensor | | ChlordioX Plus ⁵ | | | | X |

The procedures shall be done in accordance with the documents listed below. The incorporation by reference of the following documents was approved by the Director of the Federal Register on February 16, 1999, in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies of the documents may be obtained from the sources listed below. Information regarding obtaining these documents can be obtained from the Safe Drinking Water Hotline at (800)426-4791. Documents may be inspected at EPA's Drinking Water Docket, 401 M Street, SW, Washington, DC 20460 (telephone: (202)260-3027); or at the Office of Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC 20408.

The following method is available from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428:

Annual Book of ASTM Standards, Volume 11.01, American Society for Testing and Materials, 1996: Method D 1253-86.

The following methods are available from the American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710:

Standard Methods for the Examination of Water and Wastewater, 19th (1995), 20th (1998), 21st (2005), and 22nd (2012) editions, American Public Health Association: Methods: 4500-Cl D, 4500-Cl E, 4500-Cl F, 4500-Cl G, 4500-Cl H, 4500-Cl I, 4500-ClO₂ E. Only the 19th and 20th editions may be used for the chlorine dioxide Method 4500-ClO₂ D.

The following methods are available from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161 (telephone: (800)553-6847):

"Determination of Chlorine Dioxide and Chlorite Ion in Drinking Water Using Lissamine Green B and Horseradish Peroxidase with Detection by Visible Spectrophotometry, Revision 1.1," USEPA, May 2005, EPA 815-R-05-008.

¹X indicates method is approved for measuring specified residual disinfectant. Free chlorine or total chlorine may be measured for demonstrating compliance with the chlorine MRDL, and combined chlorine or total chlorine may be measured for demonstrating compliance with the chloramine MRDL.

⁵ChlordioX Plus. "Chlorine Dioxide and Chlorite in Drinking Water by Amperometry Using Disposable Sensors," November 2013. Available from Palintest Ltd., Jamike Avenue (Suite 100), Erlanger, KY 41018.

⁶Hach Company. "Hach Method 10241 – Spectrophotometric Measurement of Free Chlorine in Finished Drinking Water," November 2015, Revision 1.2. Available at www.hach.com.

(2) Test kit use. Systems may also measure residual disinfectant concentrations for chlorine, chloramines, and chlorine dioxide by using DPD colorimetric test kits acceptable to the department. Free and total chlorine residual disinfectant concentrations may be measured continuously by adapting a specified chlorine residual method for use with a continuous monitoring instrument provided the chemistry, accuracy, and precision remain the same. Instruments used for continuous monitoring must be calibrated with a grab sample measurement at least every five days.

(3) Operator requirement. Measurements for residual disinfectant concentration shall be conducted by a Grade A through IV operator meeting the requirements of 567—Chapter 81, any person under the direct supervision of a Grade A through IV operator meeting the requirements of 567—Chapter 81, or a laboratory certified by the department to perform analysis under 567—Chapter 83.

e. Compliance requirements for residual disinfectants.

(1) General requirements.

1. When compliance is based on a running annual average of monthly or quarterly samples or averages and the system's failure to monitor makes it impossible to determine compliance with MRDLs for chlorine and chloramines, this failure to monitor will be treated as a monitoring violation for the entire period covered by the annual average.

2. All samples taken and analyzed under the provisions of this rule must be included in determining compliance, even if that number is greater than the minimum required.

(2) Chlorine and chloramines.

1. Compliance must be based on a running annual arithmetic average, computed quarterly, of monthly averages of all samples collected by the system under 43.6(1) "c"(2). If the average covering any consecutive four-quarter period exceeds the MRDL, the system is in violation of the MRDL and must notify the public pursuant to 567—42.1(455B), in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d."

2. In cases where systems switch between the use of chlorine and chloramines for residual disinfection during the year, compliance must be determined by including together all monitoring results of both chlorine and chloramines in calculating compliance. Reports submitted pursuant to 567—paragraph 42.4(3) "d" must clearly indicate which residual disinfectant was analyzed for each sample.

(3) Chlorine dioxide.

1. Acute violations. Compliance must be based on consecutive daily samples collected by the system under 43.6(1) "c"(3). If any daily sample taken at the entrance to the distribution system exceeds the MRDL, and on the following day one or more of the three samples taken in the distribution system exceed the MRDL, the system is in violation of the MRDL and shall take immediate corrective action to lower the level of chlorine dioxide below the MRDL and shall notify the public pursuant to the Tier 1 requirements in 567—subrule 42.1(2) in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d." Failure to take samples in the distribution system the day following an exceedance of the chlorine dioxide MRDL at the entrance to the distribution system will also be considered an MRDL violation and the system must notify the public of the violation in accordance with the provisions for Tier 1 violations in 567—subrule 42.1(2), in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d."

2. Nonacute violations. Compliance must be based on consecutive daily samples collected by the system under 43.6(1) "c"(3). If any two consecutive daily samples taken at the entrance to the distribution system exceed the MRDL and all distribution system samples taken are below the MRDL, the system is in violation of the MRDL and must take corrective action to lower the level of chlorine dioxide below the MRDL at the point of sampling and will notify the public pursuant to the Tier 2 requirements in 567—subrule 42.1(3), in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d." Failure to monitor at the entrance to the distribution system the day following an exceedance of the

chlorine dioxide MRDL at the entrance to the distribution system is also an MRDL violation and the system must notify the public of the violation in accordance with the provisions for Tier 2 violations in 567—subrule 42.1(3), in addition to reporting to the department pursuant to 567—paragraph 42.4(3)“d.”

f. Reporting requirements for disinfectants. Systems required to sample quarterly or more frequently must report to the department within ten days after the end of each quarter in which samples were collected, notwithstanding the public notification provisions of 567—42.1(455B). Systems required to sample less frequently than quarterly must report to the department within ten days after the end of each monitoring period in which samples were collected. The specific reporting requirements for disinfectants are listed in 567—subparagraph 42.4(3)“d”(3).

43.6(2) Disinfection byproduct precursors.

a. Applicability.

(1) Surface water or IGW CWS and NTNC systems with conventional filtration. This rule establishes criteria under which surface water or influenced groundwater CWS and NTNC public water supply systems using conventional filtration treatment, as defined in 567—40.2(455B), that add a chemical disinfectant to the water in any part of the drinking water treatment process or which provide water that contains a chemical disinfectant must modify their practices to meet the MCLs listed in 567—41.6(455B) and the maximum residual disinfectant levels (MRDL) and treatment technique requirements for disinfection byproduct precursors listed in this rule.

(2) CWS and NTNC systems using ozone treatment. CWS and NTNC systems that use ozone in their treatment process must comply with the bromide requirements of this subrule.

(3) Compliance dates. Compliance dates for this rule are based upon the population served. CWS and NTNC systems using surface water or groundwater under the direct influence of surface water in whole or in part and which serve 10,000 or more persons must comply with this rule beginning January 1, 2002; while those systems serving fewer than 10,000 persons must comply with this rule beginning January 1, 2004.

(4) The department may require groundwater systems to conduct monitoring for disinfection byproduct precursors as a part of an operation permit.

b. Monitoring requirements for disinfection byproduct precursors.

(1) Routine monitoring for total organic carbon (TOC).

1. Surface water and groundwater under the direct influence of surface water systems which use conventional filtration treatment must monitor each treatment plant for total organic carbon (TOC) no later than at the point of combined filter effluent turbidity monitoring and representative of the treated water. The systems must also monitor for TOC in the source water prior to any treatment at the same time as monitoring for TOC in the treated water. These samples (source water and treated water) are referred to as paired samples. At the same time the source water sample is taken, all systems must monitor for alkalinity in the source water prior to any treatment. Systems must take one paired set of source water and treated water samples and one source water alkalinity sample per month per plant at a time representative of normal operating conditions and influent water quality.

2. Surface water and groundwater under the direct influence of surface water systems which do not use conventional filtration treatment must conduct the TOC monitoring under 43.6(2)“b”(1)“1” in order to qualify for reduced disinfection byproduct monitoring for TTHM and HAA5 under 567—paragraph 41.6(1)“c”(4)“2.” The source water TOC running annual average must be less than or equal to 4.0 mg/L based on the most recent four quarters of monitoring on a continuing basis at each treatment plant to reduce or remain on reduced monitoring for TTHM and HAA5. Once qualified for reduced monitoring for TTHM and HAA5, a system may reduce source water TOC monitoring to quarterly TOC samples taken every 90 days at a location prior to any treatment.

(2) Reduced monitoring. The department may allow surface water and groundwater under the direct influence of surface water systems with an average treated water TOC of less than 2.0 mg/L for two consecutive years, or less than 1.0 mg/L for one year, to reduce monitoring for both TOC and alkalinity to one set of paired samples and one source water alkalinity sample per plant per quarter. The system must revert to routine monitoring in the month following the quarter when the annual average treated water TOC is greater than or equal to 2.0 mg/L.

(3) Bromide. The department may allow systems required to analyze for bromate to reduce bromate monitoring from monthly to once per quarter, if the system demonstrates that the average source water bromide concentration is less than 0.05 mg/L based upon representative monthly measurements for one year. The system must continue bromide monitoring to remain on reduced bromate monitoring.

(4) The department may assign disinfection byproduct precursor monitoring prior to the compliance dates in 43.6(2)“a”(3) as part of an operation permit.

c. Analytical requirements for disinfection byproduct precursors.

(1) Analytical methods. Systems required to monitor disinfectant byproduct precursors must use the following methods, which must be conducted by a certified laboratory pursuant to 567—Chapter 83, unless otherwise specified.

Approved Methods for Disinfection Byproduct Precursor Monitoring¹

| Analyte | Methodology | EPA | Standard Methods | ASTM | Other |
|---|--|--------------------------------|------------------------|------------|--------------------------------|

“Determination of Inorganic Oxyhalide Disinfection By-Products in Drinking Water Using Ion Chromatography Incorporating the Addition of a Suppressor Acidified Postcolumn Reagent for Trace Bromate Analysis, Revision 1.0,” USEPA, June 2002, EPA 815-R-03-007: Method 326.0.

“Determination of Total Organic Carbon and Specific UV Absorbance at 254 nm in Source Water and Drinking Water, Revision 1.1,” USEPA, February 2005, EPA/600/R-05/055: Method 415.3 Revision 1.1.

“Determination of Total Organic Carbon and Specific UV Absorbance at 254 nm in Source Water and Drinking Water, Revision 1.2,” USEPA, September 2009, EPA/600/R-09/122: Method 415.3 Revision 1.2.

The following methods are available from the American Public Health Association, 800 I Street, NW, Washington, DC 20001-3710:

Standard Methods for the Examination of Water and Wastewater, 19th (1995), 21st (2005), and 22nd (2012) editions, American Public Health Association: Methods: 2320B (20th edition, 1998, is also accepted for this method), 4500-H⁺-B, and 5910B (22nd edition, 2012, is also accepted for this method).

Standard Methods for the Examination of Water and Wastewater, Supplement to the 19th edition (1996), 21st (2005), and 22nd editions, American Public Health Association: Methods: 5310B, 5310C, and 5310D.

For method numbers ending “-00”, the year in which each method was approved by the Standard Methods Committee is designated by the last two digits in the method number. The methods listed are the only online versions that are IBR-approved.

Method I-1030-85 is available from the Books and Open-File Reports Section, U.S. Geological Survey, Federal Center, Box 25425, Denver, CO 80225-0425.

²Dissolved Organic Carbon (DOC). DOC and UV₂₅₄ samples used to determine a SUVA value must be taken at the same time and at the same location, prior to the addition of any disinfectant or oxidant by the system. Prior to analysis, DOC samples must be filtered through a 0.45 μ pore-diameter filter, as soon as practical after sampling, not to exceed 48 hours. After filtration, DOC samples must be acidified to achieve pH less than or equal to 2 with minimal addition of the acid specified in the method or by the instrument manufacturer. Acidified DOC samples must be analyzed within 28 days. Inorganic carbon must be removed from the samples prior to analysis. Water passed through the filter prior to filtration of the sample must serve as the filtered blank. This filtered blank must be analyzed using procedures identical to those used for analysis of the samples and must meet a DOC concentration of <0.5 mg/L.

³pH must be measured by a laboratory certified by the department to perform analysis under 567—Chapter 83; a Grade II, III or IV operator meeting the requirements of 567—Chapter 81; or any person under the supervision of a Grade II, III or IV operator meeting the requirements of 567—Chapter 81.

⁴Total Organic Carbon (TOC). Inorganic carbon must be removed from the samples prior to analysis. TOC samples may not be filtered prior to analysis. TOC samples must be acidified at the time of sample collection to achieve a pH less than or equal to 2 with minimal addition of the acid specified in the method or by the instrument manufacturer. Acidified TOC samples must be analyzed within 28 days.

⁵Ultraviolet Absorption at 254 nm (UV₂₅₄). DOC and UV₂₅₄ samples used to determine a SUVA value must be taken at the same time and at the same location, prior to the addition of any disinfectant or oxidant by the system. UV absorption must be measured at 253.7 nm (may be rounded off to 254 nm). Prior to analysis, UV₂₅₄ samples must be filtered through a 0.45 μ pore-diameter filter. The pH of UV₂₅₄ samples may not be adjusted. Samples must be analyzed as soon as practical after sampling, not to exceed 48 hours.

⁶Alkalinity must be measured by a laboratory certified by the department to perform analysis under 567—Chapter 83; a Grade II, III or IV operator meeting the requirements of 567—Chapter 81; or any person under the supervision of a Grade II, III or IV operator meeting the requirements of 567—Chapter 81. Only the listed titrimetric methods are acceptable.

⁷Hach Company. "Hach Method 10267 – Spectrophotometric Measurement of Total Organic Carbon (TOC) in Finished Drinking Water," December 2015, Revision 1.2. Available at www.hach.com.

⁸Hach Company. "Hach Method 10261 – Total Organic Carbon in Finished Drinking Water by Catalyzed Ozone Hydroxyl Radical Oxidation Infrared Analysis," December 2015, Revision 1.2. Available at www.hach.com.

(2) SUVA. Specific Ultraviolet Absorbance (SUVA) is equal to the UV absorption at 254nm (UV₂₅₄) (measured in m⁻¹) divided by the dissolved organic carbon (DOC) concentration (measured as mg/L). In order to determine SUVA, it is necessary to separately measure UV₂₅₄ and DOC. When determining SUVA, systems must use the methods stipulated in subparagraph 43.6(1) "c"(1) to measure DOC and UV₂₅₄. SUVA must be determined on water prior to the addition of disinfectants/oxidants by the system. DOC and UV₂₅₄ samples used to determine an SUVA value must be taken at the same time and at the same location.

(3) Magnesium. All methods approved for magnesium in 567—subparagraph 41.3(1) "e"(1) are approved for use in measuring magnesium under this rule.

d. Compliance requirements for disinfection byproduct precursors.

(1) General requirements. All samples taken and analyzed under the provisions of this rule must be included in determining compliance, even if that number is greater than the minimum required.

(2) Compliance determination. Compliance must be determined as specified by 43.6(3) "c." The department may assign monitoring through an operation permit, or systems may begin monitoring to determine whether Step 1 TOC removals can be met 12 months prior to the compliance date for the system. This monitoring is not required and failure to monitor during this period is not a violation. However, any system that does not monitor during this period and then determines in the first 12 months after the compliance date that it is not able to meet the Step 1 requirements in 43.6(3) "b"(2), and must therefore apply for alternate minimum TOC removal (Step 2) requirements, is not eligible for retroactive approval of alternate minimum TOC removal (Step 2) requirements as allowed pursuant to 43.6(3) "b"(3) and is in violation. Systems may apply for alternate minimum TOC removal (Step 2) requirements anytime after the compliance date. For systems required to meet Step 1 TOC removals, if the value calculated under 43.6(3) "c"(1) "4" is less than 1.00, the system is in violation of the treatment technique requirements and must notify the public pursuant to 567—42.1(455B), in addition to reporting to the department pursuant to 567—paragraph 42.4(3) "d."

e. Reporting requirements for disinfection byproduct precursors. Systems required to sample quarterly or more frequently must report to the department within ten days after the end of each quarter in which samples were collected, notwithstanding the public notification provisions of 567—42.1(455B). Systems required to sample less frequently than quarterly must report to the department within ten days after the end of each monitoring period in which samples were collected. The specific reporting requirements for disinfection byproduct precursors are listed in 567—subparagraph 42.4(3) "d"(4).

43.6(3) Treatment technique for control of disinfection byproduct precursors.

a. Applicability.

(1) Systems using surface water or groundwater under the direct influence of surface water and conventional filtration treatment (as defined in 567—40.2(455B)) must operate with enhanced coagulation or enhanced softening to achieve the TOC percent removal levels specified in paragraph "b" of this subrule unless the system meets at least one of the alternative compliance criteria listed in 43.6(3) "a"(2) or (3).

(2) Alternative compliance criteria for enhanced coagulation and enhanced softening systems. Systems using surface water or groundwater under the direct influence of surface water and conventional filtration treatment may use the alternative compliance criteria in 43.6(3) "a"(2) "1" through "6" to comply with this subrule in lieu of complying with 43.6(3) "b." Systems must still comply with monitoring requirements in 43.6(2) "b."

1. The system's source water TOC level, measured according to 43.6(2) "c"(1), is less than 2.0 mg/L, calculated quarterly as a running annual average.

2. The system's treated water TOC level, measured according to 43.6(2) "c"(1), is less than 2.0 mg/L, calculated quarterly as a running annual average.

3. The system's source water TOC level, measured according to 43.6(2) "c"(1), is less than 4.0 mg/L, calculated quarterly as a running annual average; the source water alkalinity, measured according to 43.6(2) "c"(1), is greater than 60 mg/L as CaCO₃, calculated quarterly as a running annual average; and either the TTHM and HAA5 running annual averages are no greater than 0.040 mg/L and 0.030 mg/L, respectively; or prior to the effective date for compliance in 567—subparagraph 41.6(1) "a"(3) and in 43.6(1) "a"(3) and 43.6(2) "a"(3), the system has made a clear and irrevocable financial commitment not later than the effective date for compliance in 567—subparagraph 41.6(1) "a"(3) and in 43.6(1) "a"(3) and 43.6(2) "a"(3), to use of technologies that will limit the levels of TTHMs and HAA5 to no more than 0.040 mg/L and 0.030 mg/L, respectively. Systems must submit evidence of a clear and irrevocable financial commitment, in addition to a schedule containing milestones and periodic progress reports for installation and operation of appropriate technologies, to the department for approval not later than the effective date for compliance in 567—subparagraph 41.6(1) "a"(3) and in 43.6(1) "a"(3) and 43.6(2) "a"(3). These technologies must be installed and operating not later than June 30, 2005. Failure to install and operate these technologies by the date in the approved schedule will constitute a treatment technique violation.

4. The TTHM and HAA5 running annual averages are less than or equal to 0.040 mg/L and 0.030 mg/L, respectively, and the system uses only chlorine for primary disinfection and maintenance of a residual in the distribution system.

5. The system's source water SUVA, prior to any treatment and measured monthly according to 43.6(2) "c," is less than or equal to 2.0 L/mg-m, calculated quarterly as a running annual average.

6. The system's finished water SUVA, measured monthly according to 43.6(2) "c," is less than or equal to 2.0 L/mg-m, calculated quarterly as a running annual average.

(3) Additional alternative compliance criteria for softening systems. Systems practicing enhanced softening that cannot achieve the TOC removals required by 43.6(3) "b"(2) may use the alternative compliance criteria in 43.6(3) "a"(3) "1" and "2" in lieu of complying with 43.6(3) "b." Systems must still comply with monitoring requirements in 43.6(2) "b."

1. Softening that lowers the treated water alkalinity to less than 60 mg/L as CaCO₃, measured monthly according to 43.6(2) "c" and calculated quarterly as a running annual average.

2. Softening that removes at least 10 mg/L of magnesium hardness as CaCO₃, measured monthly and calculated quarterly as a running annual average.

b. Enhanced coagulation and enhanced softening performance requirements.

(1) Systems must achieve the percent reduction of TOC specified in 43.6(3) "b"(2) between the source water and the combined filter effluent, unless the department approves a system's request for alternate minimum TOC removal (Step 2 requirements under 43.6(3) "b"(3)).

(2) Required Step 1 TOC reductions, indicated in the following table, are based upon specified source water parameters measured in accordance with 43.6(2) "c." Systems using softening are required to meet the Step 1 TOC reductions in the right-hand column (Source water alkalinity > 120 mg/L) for the specified source water TOC:

Step 1 Required Removal of TOC by Enhanced Coagulation and Enhanced Softening for Surface Water or IGW Systems Using Conventional Treatment^{1,2}

| Source water TOC, mg/L | Source water Alkalinity, mg/L as CaCO ₃ | | |
|------------------------|--|---------|-------------------|
| | 0-60 | >60-120 | >120 ³ |
| >2.0 - 4.0 | 35.0% | 25.0% | 15.0% |
| >4.0 - 8.0 | 45.0% | 35.0% | 25.0% |
| >8.0 | 50.0% | 40.0% | 30.0% |

¹Systems meeting at least one of the conditions in 43.6(3) "a"(2) "1" to "6" are not required to operate with enhanced coagulation.

²Softening systems meeting one of the alternative compliance criteria in 43.6(3) "a"(3) are not required to operate with enhanced softening.

³Systems practicing softening must meet the TOC removal requirements in this column.

(3) Surface water and groundwater under the influence of surface water systems using conventional treatment that cannot achieve the Step 1 TOC removals required by 43.6(3)“b”(2) due to water quality parameters or operational constraints must apply to the department for approval of alternative minimum Step 2 TOC removal requirements submitted by the system within three months of failure to achieve the TOC removals required by 43.6(3)“b”(2). If the department approves the alternative minimum Step 2 TOC removal requirements, the department may make those requirements retroactive for the purposes of determining compliance. The system must meet the Step 1 TOC removals contained in 43.6(3)“b”(2) until the department approves the alternate minimum Step 2 TOC removal requirements.

(4) Alternate minimum Step 2 TOC removal requirements. Applications made to the department by enhanced coagulation systems for approval of alternate minimum Step 2 TOC removal requirements under 43.6(3)“b”(3) must include, as a minimum, results of bench-scale or pilot-scale testing conducted under 43.6(3)“b”(4)“1” below and be used to determine the alternate enhanced coagulation level.

1. Alternate enhanced coagulation level. Alternate enhanced coagulation level is defined as coagulation at a coagulant dose and pH as determined by the method described in 43.6(3)“b”(4)“1” to “5” such that an incremental addition of 10 mg/L of alum (or equivalent amount of ferric salt) results in a TOC removal of less than or equal to 0.3 mg/L. The percent removal of TOC at this point on the “TOC removal versus coagulant dose” curve is then defined as the minimum TOC removal required for the system. Once approved by the department, this minimum requirement supersedes the minimum TOC removal required by the table in 43.6(3)“b”(2). This requirement will be effective until such time as the department approves a new value based on the results of a new bench-scale or pilot-scale test. Failure to achieve department-set alternative minimum TOC removal levels is a treatment technique violation.

2. Bench-scale or pilot-scale testing of enhanced coagulation must be conducted by using representative water samples and adding 10 mg/L increments of alum (or equivalent amounts of ferric salt) until the pH is reduced to a level less than or equal to the enhanced coagulation Step 2 target pH shown in the following table:

Enhanced Coagulation Step 2 Target pH

| Alkalinity (mg/L as CaCO ₃) | Target pH |
|---|-----------|
| 0-60 | 5.5 |
| >60-120 | 6.3 |
| >120-240 | 7.0 |
| >240 | 7.5 |

3. For waters with alkalinities of less than 60 mg/L for which addition of small amounts of alum or equivalent addition of iron coagulant drives the pH below 5.5 before significant TOC removal occurs, the system must add necessary chemicals to maintain the pH between 5.3 and 5.7 in samples until the TOC removal of 0.3 mg/L per 10 mg/L alum added (or equivalent addition of iron coagulant) is reached.

4. The system may operate at any coagulant dose or pH necessary (consistent with other public drinking water rules in 567—Chapters 41 through 43) to achieve the minimum TOC percent removal approved under 43.6(3)“b”(3).

5. If the TOC removal is consistently less than 0.3 mg/L of TOC per 10 mg/L of incremental alum dose at all dosages of alum (or equivalent addition of iron coagulant), the water is deemed to contain TOC not amenable to enhanced coagulation. The system may then apply to the department for a waiver of enhanced coagulation requirements.

c. Compliance calculations.

(1) Surface water or groundwater under the influence of surface water systems other than those identified in 43.6(3)“a”(2) or (3) must comply with requirements contained in 43.6(3)“b”(2) or (3). Systems must calculate compliance quarterly, beginning after the system has collected 12 months of data, by determining an annual average using the following method:

1. Step 1: Determine actual monthly TOC percent removal using the following equation, to two decimal places:

$$\text{Actual monthly TOC percent removal} = 1 - \left(\frac{\text{treated water TOC}}{\text{source water TOC}} \right) \times 100$$

2. Step 2: Determine the required monthly TOC percent removal from either 43.6(3) “b”(2) or (3).

3. Step 3: Divide the “actual monthly TOC percent removal” value (from Step 1) by the “required monthly TOC percent removal” value (from Step 2). Determine this value for each of the last 12 months.

$$\text{Monthly percent removal ratio} = \frac{\text{actual monthly TOC percent removal}}{\text{required monthly TOC percent removal}}$$

4. Step 4: Add together the “monthly percent removal ratio” values from Step 3 for each of the last 12 months and divide by 12, to determine the annual average value.

$$\text{Annual average} = \frac{\sum \text{monthly percent removal ratio}}{12}$$

5. Step 5: If the “annual average” value calculated in Step 4 is less than 1.00, the system is not in compliance with the TOC percent removal requirements.

(2) Systems may use the provisions in 43.6(3) “c”(2)“1” through “5” in lieu of the calculations in 43.6(3) “c”(1)“1” through “5” to determine compliance with TOC percent removal requirements.

1. In any month that the system’s treated or source water TOC level, measured according to 43.6(2) “c”(1), is less than 2.0 mg/L, the system may assign a monthly value of 1.0 (in lieu of the value calculated in 43.6(3) “c”(1)“3”) when calculating compliance under the provisions of 43.6(3) “c”(1).

2. In any month that a system practicing softening removes at least 10 mg/L of magnesium hardness as CaCO₃, the system may assign a monthly value of 1.0 (in lieu of the value calculated in 43.6(3) “c”(1)“3”) when calculating compliance under the provisions of 43.6(3) “c”(1).

3. In any month that the system’s source water SUVA, prior to any treatment and measured according to 43.6(2) “c”(2), is less than or equal to 2.0 L/mg-m, the system may assign a monthly value of 1.0 (in lieu of the value calculated in 43.6(3) “c”(1)“3”) when calculating compliance under the provisions of 43.6(3) “c”(1).

4. In any month that the system’s finished water SUVA, measured according to 43.6(2) “c”(2), is less than or equal to 2.0 L/mg-m, the system may assign a monthly value of 1.0 (in lieu of the value calculated in 43.6(3) “c”(1)“3”) when calculating compliance under the provisions of 43.6(3) “c”(1).

5. In any month that a system using enhanced softening lowers alkalinity below 60 mg/L as CaCO₃, the system may assign a monthly value of 1.0 (in lieu of the value calculated in 43.6(3) “c”(1)“3”) when calculating compliance under the provisions of 43.6(3) “c”(1).

(3) Surface water or groundwater under the direct influence of surface water systems using conventional treatment may also comply with the requirements of this subrule by meeting the criteria in 43.6(3) “a”(2) or (3).

d. Treatment technique requirements for disinfection byproduct precursors. The treatment techniques to control the level of disinfection byproduct precursors in drinking water treatment and distribution systems, for surface water or groundwater under the direct influence of surface water systems using conventional filtration treatment, are enhanced coagulation or enhanced softening.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.7(455B) Lead and copper treatment techniques.

43.7(1) Corrosion control treatment for lead and copper control.

a. Applicability. Systems shall complete the applicable corrosion control treatment requirements by the deadlines specified in the following rules:

(1) Large systems serving more than 50,000 persons. A large system (serving greater than 50,000 persons) shall complete the corrosion control treatment steps specified in 43.7(1)“d,” unless the system is deemed to have optimized corrosion control under 43.7(1)“b”(2) or (3).

(2) Small and medium-size systems serving 50,000 or fewer persons. A small system (serving less than or equal to 3,300 persons) or a medium-size system (serving greater than 3,300 and less than or equal to 50,000 persons) shall complete the corrosion control treatment steps specified in 43.7(1)“e,” unless the system has optimized corrosion control under 43.7(1)“b”(1), (2), or (3).

b. Determination that a system has optimized corrosion control. A public water supply system has optimized corrosion control and is not required to complete the applicable corrosion control treatment steps identified in this subrule if the system satisfies one of the criteria specified in subparagraphs 43.7(1)“b”(1) through (3). Any such system deemed to have optimized corrosion control under this paragraph and which has treatment in place shall continue to operate and maintain optimal corrosion control treatment and meet any requirements that the department determines appropriate to ensure optimal corrosion control treatment is maintained.

(1) A small or medium-size water supply system has optimized corrosion control if the system meets the lead and copper action levels during each of two consecutive six-month monitoring periods, conducted in accordance with 567—paragraph 41.4(1)“c.”

(2) Any public water supply system may be deemed to have optimized corrosion control treatment if the system demonstrates to the satisfaction of the department that it has conducted activities equivalent to the corrosion control steps applicable to such system under this subrule. If the department makes this determination, it shall provide the water supply system with written notice explaining the basis for its decision and shall specify the water quality control parameters representing optimal corrosion control in accordance with 43.7(2)“f.” Systems deemed to have optimized corrosion control under this paragraph shall operate in compliance with the department-designated optimal water quality control parameters in accordance with paragraph 43.7(1)“g” and continue to conduct lead and copper tap and water quality parameter sampling in accordance with 567—paragraph 41.4(1)“c”(4)“3” and 567—subparagraph 41.4(1)“d”(4), respectively. A system shall provide the department with the following information in order to support a determination under this paragraph:

1. The results of all test samples collected for each of the water quality parameters in 43.7(2)“c”(3);

2. A report explaining the test methods used by the water system to evaluate the corrosion control treatments listed in 43.7(2)“c”(1), the results of all tests conducted, and the basis for the system’s selection of optimal corrosion control treatment;

3. A report explaining how corrosion control was installed and how it is being maintained to ensure minimal lead and copper concentrations at consumers’ taps; and

4. The results of tap water samples collected in accordance with 567—paragraph 41.4(1)“c” at least once every six months for one year after corrosion control has been installed.

(3) Any water system has optimized corrosion control if it submits results of tap water monitoring conducted in accordance with 567—paragraph 41.4(1)“c” and source water monitoring conducted in accordance with 567—paragraph 41.4(1)“e” that demonstrate for two consecutive six-month monitoring periods that the difference between the 90th percentile tap water lead level computed under 567—subparagraph 41.4(1)“b”(3) and the highest source water lead concentration is less than the practical quantitation level for lead specified in 567—paragraph 41.4(1)“g.”

1. Those systems whose highest source water lead level is below the method detection limit may also be deemed to have optimized corrosion control under this paragraph if the 90th percentile tap water lead level is less than or equal to the practical quantitation level for lead for two consecutive six-month monitoring periods.

2. Any water system deemed to have optimized corrosion control in accordance with this paragraph shall continue monitoring for lead and copper at the tap no less frequently than once every three calendar years using the reduced number of sites specified in 567—subparagraph 41.4(1)“c”(3) and collecting the samples at times and locations specified in 567—paragraph 41.4(1)“c”(4)“4,” fourth bulleted paragraph.

3. Any water system deemed to have optimized corrosion control pursuant to this paragraph shall notify the department in writing pursuant to 567—subparagraph 42.4(2) “a”(3) of any upcoming long-term change in treatment or the addition of a new source as described in 567—subparagraph 42.4(2) “a”(3). The department must review and approve the addition of a new source or long-term change in water treatment before it is implemented by the water system.

4. Unless a system meets the copper action level, it is not deemed to have optimized corrosion control under this paragraph and shall implement corrosion control treatment pursuant to 43.7(1) “b”(3) “5.”

5. Any system triggered into corrosion control because it is no longer deemed to have optimized corrosion control under this paragraph shall implement corrosion control treatment in accordance with the deadlines in paragraph 43.7(1) “e.” Any such large system shall adhere to the schedule specified in that paragraph for medium-size systems, with the time periods for completing each step being triggered by the date the system is no longer deemed to have optimized corrosion control under this paragraph.

c. Requirements to recommence corrosion control steps. Any small or medium-size water system that is required to complete the corrosion control steps due to its exceedance of the lead or copper action level may cease completing the treatment steps whenever the system meets both action levels during each of two consecutive monitoring periods conducted pursuant to 567—paragraph 41.4(1) “c” and submits the results to the department. If any such water system thereafter exceeds the lead or copper action level during any monitoring period, the system shall recommence completion of the applicable treatment steps, beginning with the first treatment step which was not previously completed in its entirety. The department may require a system to repeat treatment steps previously completed by the system when it is determined by the department that this is necessary to implement properly the treatment requirements of this rule. The department will notify the system in writing of such a determination and explain the basis for its decision. The requirement for any small or medium-size system to implement corrosion control treatment steps in accordance with 43.7(1) “e” (including systems deemed to have optimized corrosion control under 43.7(1) “b”(1)) is triggered whenever any small or medium-size system exceeds the lead or copper action level.

d. Treatment steps and deadlines for large systems. Except as provided in 43.7(1) “b”(2) or (3), large systems shall complete the following corrosion control treatment steps (described in the referenced portions of 43.7(1) “b,” subrule 43.7(2), and 567—paragraphs 41.4(1) “c” and “d”) by the dates indicated below.

(1) Step 1. The system shall conduct initial monitoring pursuant to 567—paragraph 41.4(1) “c”(4) “1” and 567—subparagraph 41.4(1) “d”(2) during two consecutive six-month monitoring periods by January 1, 1993.

(2) Step 2. The system shall complete corrosion control studies pursuant to 43.7(2) “c” by July 1, 1994.

(3) Step 3. The department will designate optimal corrosion control treatment within six months of receiving the corrosion control study results (by January 1, 1995).

(4) Step 4. The system shall install optimal corrosion control treatment by January 1, 1997.

(5) Step 5. The system shall complete follow-up sampling pursuant to 567—paragraph 41.4(1) “c”(4) “2” and 567—subparagraph 41.4(1) “d”(3) by January 1, 1998.

(6) Step 6. The department will review installation of treatment and designate optimal water quality control parameters pursuant to 43.7(2) “f” by July 1, 1998.

(7) Step 7. The system shall operate in compliance with optimal water quality control parameters delineated by the department and continue to conduct tap sampling.

e. Treatment steps and deadlines for small and medium-size systems. Except as provided in 43.7(2), small and medium-size systems shall complete the following corrosion control treatment steps (described in subrule 43.7(2) and 567—paragraphs 41.4(1) “c” and “d”) by the indicated time periods listed below.

(1) Step 1. The system shall conduct initial tap sampling pursuant to 567—paragraph 41.4(1) “c”(4) “1” and 567—subparagraph 41.4(1) “d”(2) until the system either exceeds the lead or copper action level or becomes eligible for reduced monitoring under 567—paragraph 41.4(1) “c”(4) “4.”

A system exceeding the lead or copper action level shall recommend optimal corrosion control treatment under 43.7(2)“a” within six months after the end of the monitoring period during which it exceeds one of the action levels.

(2) Step 2. Within 12 months after the end of the monitoring period during which a system exceeds the lead or copper action level, the department may require the system to perform corrosion control studies under 43.7(2)“b.” If the system is not required to perform such studies, the department will specify optimal corrosion control treatment under 43.7(2)“d” as follows: for medium-size systems, within 18 months after the end of the monitoring period during which such system exceeds the lead or copper action level, and, for small systems, within 24 months after the end of the monitoring period during which such system exceeds the lead or copper action level.

(3) Step 3. If a system is required to perform corrosion control studies under Step 2, the system shall complete the studies (under 43.7(2)“c”) within 18 months after such studies are required to commence.

(4) Step 4. If the system has performed corrosion control studies under Step 2, the department will designate optimal corrosion control treatment under 43.7(2)“d” within six months after completion of Step 3.

(5) Step 5. The system shall install optimal corrosion control treatment under 43.7(2)“e” within 24 months after such treatment is designated.

(6) Step 6. The system shall complete follow-up sampling pursuant to 567—paragraph 41.4(1)“c”(4)“2” and 567—subparagraph 41.4(1)“d”(3) within 36 months after optimal corrosion control treatment is designated.

(7) Step 7. The department will review the system’s installation of treatment and designate optimal water quality control parameters pursuant to 43.7(2)“f” within six months after completion of Step 6.

(8) Step 8. The system shall operate in compliance with the department-designated optimal water quality control parameters under 43.7(2)“f” (and continue to conduct tap sampling as per 567—paragraph 41.4(1)“c”(4)“3” and 567—subparagraph 41.4(1)“d”(4)).

43.7(2) Description of corrosion control treatment requirements. Each public water supply system shall complete the corrosion control treatment requirements described below which are applicable to such systems under 43.7(1).

a. Public water supply system recommendation regarding corrosion control treatment. Based upon the results of lead and copper tap monitoring and water quality parameter monitoring, small and medium-size water systems exceeding the lead or copper action level shall recommend installation of one or more of the corrosion control treatments listed in 43.7(2)“c” which the system believes constitute optimal corrosion control for that system. The department may require the system to conduct additional water quality parameter monitoring in accordance with 567—subparagraph 41.4(1)“d”(2) to assist in reviewing the system’s recommendation.

b. Department decision to require studies of corrosion control treatment (applicable to small and medium-size systems). The department may require any small or medium-size system that exceeds the lead or copper action level to perform corrosion control studies under 43.7(2)“c” to identify optimal corrosion control treatment for the system.

c. Performance of corrosion control studies.

(1) Any public water supply system performing corrosion control studies shall evaluate the effectiveness of each of the following treatments and, if appropriate, combinations of the following treatments to identify the optimal corrosion control treatment: alkalinity and pH adjustment; calcium hardness adjustment; and the addition of a phosphate or silicate-based corrosion inhibitor at a concentration sufficient to maintain an effective residual concentration in all test tap samples.

(2) The water system shall evaluate each of the corrosion control treatments using either pipe rig/loop tests, metal coupon tests, partial-system tests, or analyses based on documented analogous treatments with other systems of similar size, water chemistry and distribution system configuration.

(3) The public water supply system shall measure the following water quality parameters in any tests conducted under this paragraph before and after evaluating the corrosion control treatments listed above:

1. Lead;

2. Copper;
3. pH;
4. Alkalinity;
5. Calcium;
6. Conductivity;
7. Orthophosphate (when an inhibitor containing a phosphate compound is used);
8. Silicate (when an inhibitor containing a silicate compound is used);
9. Water temperature.

(4) The public water supply system shall identify all chemical or physical constraints that limit or prohibit the use of a particular corrosion control treatment and outline such constraints with the following: data and documentation showing that a particular corrosion control treatment has adversely affected other water treatment processes when used by another water system with comparable water quality characteristics; or data and documentation demonstrating that the water system has previously attempted to evaluate a particular corrosion control treatment and has found that the treatment is ineffective or adversely affects other water quality treatment processes.

(5) The water system shall evaluate the effect of the chemicals used for corrosion control treatment on other water quality treatment processes.

(6) On the basis of an analysis of the data generated during each evaluation, the water system shall recommend in writing to the department the treatment option that the corrosion control studies indicate constitutes optimal corrosion control treatment for that system. The water system shall provide a rationale for its recommendation along with all supporting documentation required by 43.7(2) "c"(1) through (5).

d. Department designation of optimal corrosion control treatment.

(1) Based upon consideration of available information including, where applicable, studies performed under 43.7(2) "c" and a system's recommended treatment alternative, the department will either approve the corrosion control treatment option recommended by the public water supply system, or designate alternative corrosion control treatment(s) from among those listed in 43.7(2) "c." The department will consider the effects that additional corrosion control treatment will have on water quality parameters and on other water quality treatment processes (when designating optimal corrosion control treatment).

(2) The department will notify the public water supply system of its decision on optimal corrosion control treatment in writing and explain the basis for this determination. If the department requests additional information to aid its review, the public water supply system shall provide the information.

e. Installation of optimal corrosion control. Each public water supply system shall properly install and operate throughout its distribution system the optimal corrosion control treatment designated under 43.7(2) "d."

f. Department review of treatment and specification of optimal water quality control parameters.

(1) The department will evaluate the results of all lead and copper tap samples and water quality parameter samples submitted by the public water supply system and determine whether the system has properly installed and operated the optimal corrosion control treatment designated in 43.7(2) "d." Upon reviewing the results of tap water and water quality parameter monitoring by the public water supply system, both before and after the system installs optimal corrosion control treatment, the department will designate the following:

1. A minimum value or a range of values for pH measured at each entry point to the distribution system;

2. A minimum pH value, measured in all tap samples. Such value shall be equal to or greater than 7.0 unless meeting a pH level of 7.0 is not technologically feasible or is not necessary for the public water supply system to optimize corrosion control;

3. If a corrosion inhibitor is used, a minimum concentration or a range of concentrations for the inhibitor, measured at each entry point to the distribution system and in all tap samples, necessary to form a passivating film on the interior walls of the pipes of the distribution system;

4. If alkalinity is adjusted as part of optimal corrosion control treatment, a minimum concentration or a range of concentrations for alkalinity, measured at each entry point to the distribution system and in all tap samples; or

5. If calcium carbonate stabilization is used as part of corrosion control, a minimum concentration or a range of concentrations for calcium, measured in all tap samples.

(2) The values for the applicable water quality control parameters listed above shall be those which reflect optimal corrosion control treatment for the public water supply system. The department may designate values for additional water quality control parameters determined by the department to reflect optimal corrosion control for the system. The department will notify the system in writing of these determinations and explain the basis for its decisions.

g. Continued operation with optimized corrosion control and water quality parameter monitoring compliance determination. All systems optimizing corrosion control shall continue to operate and maintain optimal corrosion control treatment, including maintaining water quality parameters at or above minimum values or within ranges designated by the department under paragraph 43.7(2) "f," in accordance with this paragraph for all samples collected under 567—subparagraphs 41.4(1) "d"(4) through (6). Compliance with the requirements of this paragraph shall be determined every six months, as specified under 567—subparagraph 41.4(1) "d"(4). A water system is out of compliance with the requirements of this paragraph for a six-month period if it has excursions for any department-specified parameter on more than nine days during the period. An excursion occurs whenever the daily value for one or more of the water quality parameters measured at a sampling location is below the minimum value or outside the range designated by the department. Daily values are calculated as follows. The department has the discretion to invalidate results of obvious sampling errors from this calculation.

(1) On days when more than one measurement for the water quality parameter is collected at the sampling location, the daily value shall be the average of all results collected during the day regardless of whether they are collected through continuous monitoring, grab sampling, or a combination of both.

(2) On days when only one measurement for the water quality parameter is collected at the sampling location, the daily value shall be the result of that measurement.

(3) On days when no measurement is collected for the water quality parameter at the sampling location, the daily value shall be the daily value calculated on the most recent day on which the water quality parameter was measured at the sample site.

h. Modification of department treatment decisions. A determination of the optimal corrosion control treatment under 43.7(2) "d" or optimal water quality control parameters under 43.7(2) "f" may be modified. A request for modification by a public water supply system or other interested party shall be in writing, explain why the modification is appropriate, and provide supporting documentation. The department may modify its determination when it concludes that such change is necessary to ensure that the public water supply system continues to optimize corrosion control treatment. A revised determination will be made in writing, which will set forth the new treatment requirements, explain the basis for the decision, and provide an implementation schedule for completing the treatment modifications.

43.7(3) Source water treatment requirements. Public water supply systems shall complete the applicable source water monitoring and treatment requirements, as described in the referenced portions of 43.7(3) "b," and in 567—paragraphs 41.4(1) "c" and "e," by the following deadlines.

a. Deadlines for completing source water treatment steps.

(1) Step 1. A public water supply system exceeding the lead or copper action level shall complete lead and copper source water monitoring under 567—subparagraph 41.4(1) "e"(2) and make a written treatment recommendation to the department no later than 180 days after the end of the monitoring period during which the lead or copper action level was exceeded.

(2) Step 2. The department will make a determination regarding source water treatment pursuant to 43.7(3) "b"(2) within six months after submission of monitoring results under Step 1.

(3) Step 3. If installation of source water treatment is required, the system shall install the treatment pursuant to 43.7(3) "b"(3) within 24 months after completion of Step 2.

(4) Step 4. The public water supply system shall complete follow-up tap water monitoring under 567—paragraph 41.4(1)“c”(4)“2” and source water monitoring under 567—subparagraph 41.4(1)“e”(3) within 36 months after completion of Step 2.

(5) Step 5. The department will review the system’s installation and operation of source water treatment and specify maximum permissible source water levels under 43.7(3)“b”(4) within six months after completion of Step 4.

(6) Step 6. The public water supply system shall operate in compliance with the specified maximum permissible lead and copper source water levels under 43.7(3)“b”(4) and continue source water monitoring pursuant to 567—subparagraph 41.4(1)“e”(4).

b. Description of source water treatment requirements.

(1) System treatment recommendation. Any system which exceeds the lead or copper action level shall recommend in writing to the department the installation and operation of one of the source water treatments listed in 43.7(3)“b”(2). A system may recommend that no treatment be installed based upon a demonstration that source water treatment is not necessary to minimize lead and copper levels at users’ taps.

(2) Source water treatment determinations. The department will complete an evaluation of the results of all source water samples submitted by the public water supply system to determine whether source water treatment is necessary to minimize lead or copper levels in water delivered to users’ taps. If the department determines that treatment is needed, the department will require installation and operation of the source water treatment recommended by the public water supply system or require the installation and operation of another source water treatment from among the following: ion exchange, reverse osmosis, lime softening or coagulation/filtration. If the department requests additional information to aid in its review, the water system shall provide the information by the date specified in its request. The department will notify the system in writing of its determination and set forth the basis for its decision.

(3) Installation of source water treatment. Public water supply systems shall properly install and operate the source water treatment designated by the department under 43.7(3)“b”(2).

(4) Department review of source water treatment and specification of maximum permissible source water levels. The department will review the source water samples taken by the water supply system both before and after the system installs source water treatment and determine whether the public water supply system has properly installed and operated the designated source water treatment. Based upon its review, the department will designate maximum permissible lead and copper concentrations for finished water entering the distribution system. Such levels shall reflect the contaminant removal capability of the treatment (properly operated and maintained). The department will notify the public water supply system in writing and explain the basis for its decision.

(5) Continued operation and maintenance. Each public water supply system shall maintain lead and copper levels below the maximum permissible concentrations designated by the department at each sampling point monitored in accordance with 567—paragraph 41.4(1)“e.” The system is out of compliance with this paragraph if the level of lead or copper at any sampling point is greater than the maximum permissible designated concentration.

(6) Modification of source water treatment decisions. The department may modify its determination of the source water treatment under 43.7(3)“b”(6), or maximum permissible lead and copper concentrations for finished water entering the distribution system under 43.7(3)“b”(4). A request for modification by a public water supply system or other interested party shall be in writing, explain why the modification is appropriate, and provide supporting documentation. The department may modify its determination where it concludes that such change is necessary to ensure that the system continues to minimize lead and copper concentrations in source water. A revised determination will be made in writing, set forth the new treatment requirements, explain the basis for the decision, and provide an implementation schedule for completing the treatment modifications.

43.7(4) Lead service line replacement requirements.

a. Applicability. Public water supply systems that fail to meet the lead action level in tap samples taken pursuant to 567—paragraph 41.4(1)“c”(4)“2” after installing corrosion control or source water

treatment (whichever sampling occurs later) shall replace lead service lines in accordance with the requirements of this subrule. If a system is in violation of 43.7(1) and 43.7(3) for failure to install source water or corrosion control treatment, the department may require the system to commence lead service line replacement under this subrule after the date by which the system was required to conduct monitoring under 567—paragraph 41.4(1)“c”(4)“2” has passed.

b. Lead service line replacement schedule. A public water supply system shall replace annually at least 7 percent of the initial number of lead service lines in its distribution system. The initial number of lead service lines is the number of lead lines in place at the time the replacement program begins. The system shall identify the initial number of lead service lines in its distribution system, including an identification of the portion(s) owned by the system, based upon a materials evaluation, including the evaluation required under 567—subparagraph 41.4(1)“c”(1), and relevant legal authorities regarding the portion owned by the system such as contracts and local ordinances.

(1) The first year of lead service line replacement shall begin on the first day following the end of the monitoring period in which the action level was exceeded in tap sampling referenced in 43.7(4)“a.” If monitoring is required annually or less frequently, the end of the monitoring period is September 30 of the calendar year in which the sampling occurs. If the department has established an alternate monitoring period, then the end of the monitoring period will be the last day of that period.

(2) Any water system resuming a lead service line replacement program after the cessation of its lead service line replacement program as allowed by 43.7(4)“g” shall update its inventory of lead service lines to include those sites that were previously determined not to require replacement through the sampling provision under 43.7(4)“c.” The system will then divide the updated number of remaining lead service lines by the number of remaining years in the program to determine the number of lines that must be replaced per year. Seven percent lead service line replacement is based on a 15-year replacement program. For example, systems resuming lead service line replacement after previously conducting two years of replacement would divide the updated inventory by 13.

(3) For those systems that have completed a 15-year lead service line replacement program, the department will determine a schedule for replacing or retesting lines that were previously exempted through testing under 43.7(4)“c” from the replacement program when the system re-exceeds the action level.

c. Exemption to lead service line replacement requirement. A public water supply system is not required to replace an individual lead service line if the lead concentration in all service line samples from that line, taken pursuant to 567—paragraph 41.4(1)“c”(2)“3,” is less than or equal to 0.015 mg/L.

d. Lead service line replacement requirements. A water system shall replace that portion of the lead service line that it owns. In cases where the system does not own the entire lead service line, the system shall notify the owner of the line, or the owner’s authorized agent, that the system will replace the portion of the service line that it owns and shall offer to replace the owner’s portion of the line. A system is not required to bear the cost of replacing the privately owned portion of the line, nor is it required to replace the privately owned portion of the line where the owner chooses not to pay the cost of replacing the privately owned portion of the line, or where replacing the privately owned portion would be precluded by state, local, or common law. A water system that does not replace the entire length of the service line shall complete the following tasks.

(1) Notification of residents. At least 45 days prior to commencing with the partial replacement of a lead service line, the water system shall provide to the resident(s) of all buildings served by the line notice explaining that the resident(s) may experience a temporary increase of lead levels in their drinking water, along with guidance on measures consumers may take to minimize their exposure to lead. The department may allow the water system to provide this notice less than 45 days prior to commencing partial lead service line replacement where such replacement is in conjunction with emergency repairs. In addition, the water system shall inform the resident(s) served by the line that the system will, at the system’s expense, collect from each partially replaced lead service line a sample that is representative of the water in the service line for analysis of lead content, as prescribed under 567—paragraph 41.4(1)“c”(2)“3,” within 72 hours after the completion of the partial replacement of the service line. The system shall collect the sample and report the results of the analysis to the owner

and the resident(s) served by the line within three business days of receiving the results. Mailed notices postmarked within three business days of receiving the results shall be considered “on time.”

(2) Notification methods. The water system shall provide the information required by subparagraph 43.7(4) “d”(1) to the residents of individual dwellings by mail or by other methods approved by the department. In instances where multifamily dwellings are served by the line, the water system shall have the option to post the information at a conspicuous location.

e. Lead service line control—department review. Rescinded IAB 1/7/04, effective 2/11/04.

f. Lead service line replacement schedule. The department may require a public water supply system to replace lead service lines on a shorter schedule than that required by this subrule, taking into account the number of lead service lines in the system, where such a shorter replacement schedule is feasible. The department will make this determination in writing and notify the system of its finding within six months after the system is triggered into lead service line replacement based on monitoring referenced in 43.7(4) “a.”

g. Cessation of lead service line replacement. Any public water supply system may cease replacing lead service lines whenever first draw samples collected pursuant to 567—paragraph 41.4(1) “c”(2) “2” meet the lead action level during each of two consecutive monitoring periods and the system submits the results. If the first draw tap samples collected in any such water system thereafter exceed the lead action level, the system shall recommence replacing lead service lines, as detailed in 43.7(4) “b.”

h. Lead service line replacement reporting requirements. To demonstrate compliance with 43.7(4) “a” through “d,” a system shall report the information specified in 567—paragraph 42.4(2) “e.” [ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.8(455B) Viability assessment.

43.8(1) Definitions specific to viability assessment.

“*New system*” for viability assessment purposes includes public water supply systems which are newly constructed after the effective date of this rule, as well as systems which do not currently meet the definition of a PWS, but which expand their infrastructure and thereby grow to become a PWS. Systems not currently meeting the definition of a PWS and which add additional users and thereby become a PWS without constructing any additional infrastructure are not “new systems” for the purposes of this subrule.

“*Nonviable system*” for viability assessment purposes means a system lacking the technical, financial, and managerial ability to comply with 567—Chapters 40 through 43 and 81.

“*Significant noncompliance (SNC)*” for viability assessment purposes means the failure to comply with any drinking water standard as adopted by the state of Iowa as designated by the department.

“*Viability*” for viability assessment purposes is the ability to remain in compliance insofar as the requirements of the federal Safe Drinking Water Act and 567—Chapters 40 through 43 and 81.

“*Viable system*” for viability assessment purposes means a system with the technical, financial, and managerial ability to comply with applicable drinking water standards adopted by the state of Iowa.

43.8(2) Applicability and purpose. These rules apply to all new and existing public water supplies, including the following: new systems commencing operation after October 1, 1999; systems deemed to be in significant noncompliance with the primary drinking water standards; DWSRF applicants; and existing systems. The purpose of the viability assessment program is to ensure the safety of the public drinking water supplies and ensure the viability of new public water supply systems upon commencement of operation. The department may assess public notification requirements and administrative penalties to any public water supply system which fails to fulfill the requirements of this rule.

43.8(3) Contents of a viability assessment. The viability assessment must address the areas of technical, financial, and managerial viability for a public water supply system. The assessment must include evaluation of the following areas at a minimum, and the public water supply system may be required to include additional information as directed by the department. The viability of a system should be forecast for a 20-year period.

a. Technical viability.

- (1) Supply sources and facilities

- (2) Treatment
- (3) Infrastructure (examples: pumping, storage, distribution)

b. Financial viability.

- (1) Capital and operating costs
- (2) Revenue sources
- (3) Contingency plans

c. Managerial viability.

- (1) Operation
- (2) Maintenance
- (3) Management
- (4) Administration

43.8(4) New systems.

a. Submission of system viability assessment. New public water supply systems (including community, nontransient noncommunity systems, and transient noncommunity systems) commencing operation after the effective date of this rule are required to submit a completed system viability assessment for review by the department, prior to obtaining a construction permit. The viability assessment may be submitted with the application for a construction permit. The department may reject receipt or delay review of the construction plans and specifications until an adequate viability assessment is provided. If the department finds, upon review and approval of the viability assessment, that the PWS will be viable, a construction permit will be issued in accordance with 567—Chapters 40 and 43. Prior to beginning operation, a public water supply operation permit must be obtained in accordance with 567—43.2(455B) and 567—40.5(455B).

b. Review of the viability assessment. If the department declines to approve the viability assessment as submitted by the applicant, or if the department finds that the PWS is not viable, approval of construction and operation permit applications will be denied. If the viability assessment is conditionally approved, construction and operation permits will be issued, with conditions and a schedule to achieve compliance specified in the operation permit.

43.8(5) Existing systems.

a. Submission of system viability assessment. Any community, nontransient noncommunity, or transient noncommunity water system which operated prior to October 1, 1999, and was regulated as a public water system by the department shall be considered an existing system. Any system which does not currently meet the definition of a PWS, but which expands their infrastructure and thereby grows to become a PWS is considered a new system. Systems not currently meeting the definition of a PWS and which add additional users and thereby become a PWS without constructing any additional infrastructure are considered existing systems for the purposes of this subrule. All PWSs should complete a viability assessment. However, only those existing PWSs which meet one or more of the following criteria are required to complete a viability assessment for the department's review and approval.

- (1) Systems applying for DWSRF loan funds.
- (2) Systems categorized as being in significant noncompliance by the department, due to their history of failure to comply with drinking water standards.
- (3) Systems identified by the department via a sanitary survey as having technical, managerial, or financial problems as evidenced by such conditions as poor operational control, a poor state of repair or maintenance, vulnerability to contamination, or inability to maintain adequate distribution system operating pressures.
- (4) Systems which have been unable to retain a certified operator in accordance with 567—Chapter 81.

b. Review of viability assessments for systems required to submit an assessment. If the assessment is incomplete and does not include all of the required elements, the supply will be notified in writing and will be given an opportunity to modify and resubmit the assessment within the time period specified by the department. If the system fails to resubmit a completed viability assessment as specified by the department, the department may find that the system is not viable. If the submitted assessment is

complete, the department will either indicate that the system is viable or not viable after the assessment review process. The system will be notified of the results of the evaluation by the department.

c. Review of voluntarily submitted viability assessments. It is recommended that all existing systems complete the viability assessment and submit it to the department. Voluntarily submitted assessments may be reviewed upon request and will be exempt from any requirements to modify the assessment if it is not approved, or from a determination that the system is not viable, providing the system does not meet any of the criteria for mandatory completion of a viability assessment as set forth in 43.8(4) “a” above.

43.8(6) Systems which are determined to be not viable.

a. Applicability. The following applies to community, nontransient noncommunity, and transient noncommunity systems:

(1) Systems applying for DWSRF loan funds must be viable, or the loan funds must be used to assist the system in attaining viable status. If a system making a loan application is found to be not viable, and loan funds will not be sufficient or available to ensure viability, then the situation must be corrected to the department’s satisfaction prior to qualification to apply for loan funds.

(2) Systems which meet the department’s criteria of significant noncompliance are not considered viable. The viability assessment completed by the public water supply and the most recent sanitary survey results will be evaluated by the department to assist the system in returning to and remaining in compliance, which would achieve viability. Required corrective actions will be specified in the system’s operation permit and will include a compliance schedule. Field office inspections will be conducted on an as-needed basis to assist the system in implementing the required system improvements.

(3) Systems experiencing technical, managerial, or financial problems as noted by department in the sanitary survey will be considered not viable. The viability assessment completed by the public water supply will be evaluated by the department to assist the system in attaining viability, and any required corrective actions will be specified in the system’s operation permit.

(4) Systems unable to retain a certified operator will be considered not viable. All community and nontransient noncommunity water systems, and transient noncommunity water systems as denoted by the department, are required to have a certified operator who meets the requirements of 567—Chapter 81. The viability assessment completed by the public water supply will be used to determine the source of the problem, and required corrective actions will be specified in the system’s operation permit.

b. Reserved.

43.8(7) Revocation or denial of operation or construction permit.

a. Revocation or denial of an operation permit. Failure to correct the deficiencies regarding viability, as identified in accordance with a compliance schedule set by the department, may result in revocation or denial of the system’s operation permit. If the department revokes or denies the operation permit, the owner of the system must negotiate an alternative arrangement with the department for providing treatment or water supply services within 30 days of receipt of the notification by the department unless the owner of the supply appeals the decision to the department. The public water supply is required to provide water that continually meets all health-based standards during the appeal process.

b. Denial of new construction permits for an existing system. In addition to the criteria provided in 567—Chapters 40 through 44, new construction permits for water system improvements may be denied until the system makes the required corrections and attains viable status unless the proposed project is necessary to attain viability.

c. Failure to conform to approved construction plans and specifications, or to comply with the requirements of 567—Chapters 40 to 44. Failure of a project to conform to approved construction plans and specifications, or failure to comply with the requirements of 567—Chapters 40 to 44, constitutes grounds for the director to withhold the applicable construction and operation permits. The system is then responsible for ensuring that the identified problem with the project is rectified so that permits may be issued. Once an agreement for correcting the problem is reached between the department and the system, the department will issue the appropriate permits according to the provisions of the agreement. If an agreement cannot be reached within a reasonable time period, the permit shall be denied.

d. Contents of the notification denying the permit. The notification of denial or withholding approval of the operation or construction permit will state the department's reasons for withholding or denying permit approval.

43.8(8) Appeals.

a. Request for formal review of determination of viability. A person or entity who disagrees with the decision regarding the viability of a public water supply system may request a formal review of the action. A request for review must be submitted in writing to the director by the owner or their designee within 30 days of the date of notification by the department of the viability decision.

b. Appeal of denial of operation or construction permit. A decision to deny an operation or construction permit may be appealed by the applicant to the environmental protection commission pursuant to 567—Chapter 7. The appeal must be made in writing to the director within 30 days of receiving the notice of denial by the owner of the public water supply.

567—43.9(455B) Enhanced filtration and disinfection requirements for surface water and IGW systems serving at least 10,000 people.

43.9(1) General requirements.

a. Applicability. The requirements of this rule constitute national primary drinking water regulations. This rule establishes the filtration and disinfection requirements that are in addition to criteria under which filtration and disinfection are required in 567—43.5(455B). The requirements of this rule are applicable, beginning January 1, 2002, to all public water systems using surface water or groundwater under the direct influence of surface water, in whole or in part, and which serve at least 10,000 people. This rule establishes or extends treatment technique requirements in lieu of maximum contaminant levels for the following contaminants: *Giardia lamblia*, viruses, heterotrophic plate count bacteria, *Legionella*, *Cryptosporidium*, and turbidity. Each surface water or groundwater under the direct influence of surface water system serving at least 10,000 people must provide treatment of its source water that complies with these treatment technique requirements and they are in addition to those identified in subrule 43.5(1). The treatment technique requirements consist of installing and properly operating water treatment processes that reliably achieve:

(1) At least 99 percent (2-log) removal of *Cryptosporidium* between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer for filtered systems.

(2) Compliance with the profiling and benchmark requirements under 43.9(2).

(3) The department may require other surface water or groundwater under the direct influence of surface water systems to comply with this rule, through an operation permit.

b. Compliance determination. A public water system subject to the requirements of this rule is considered to be in compliance with the requirements of 43.9(1) "a" if it meets the applicable filtration requirements in either 43.5(3) or 43.9(3) and the disinfection requirements in 43.5(2) and 43.6(2).

c. Prohibition of new construction of uncovered intermediate or finished water storage facilities. Systems that are required to comply with this rule may construct only covered intermediate or finished water storage facilities. For the purposes of this rule, an intermediate storage facility is defined as a storage facility or reservoir after the clarification treatment process.

d. Systems with populations that increased after January 1, 2002, to more than 10,000 people served. Systems using surface water or influenced groundwater sources that did not conduct optional monitoring under 43.9(2) because they served fewer than 10,000 persons when such monitoring was required, but serve more than 10,000 persons prior to January 1, 2005, must comply with 43.9(1), 43.9(3), 43.9(4), and 43.9(5). These systems must also consult with the department to establish a disinfection benchmark. A system that decides to make a significant change to its disinfection practice as described in 43.9(2) "c" (1) "1" through "4" must consult with the department prior to making such a change.

43.9(2) Disinfection profiling and benchmarking.

a. Determination of systems required to profile. A public water system subject to the requirements of this rule must determine its total trihalomethane (TTHM) and haloacetic acid (HAA5) annual averages using the procedures listed below. The annual average is the arithmetic average of the quarterly averages

of four consecutive quarters of monitoring. Both the TTHM and HAA5 samples must be collected as paired samples during the same time period in order for each parameter to have the same annual average period for result comparison. A paired sample is one that is collected at the same location and time and is analyzed for both TTHM and HAA5 parameters.

(1) Allowance of information collection rule data. Those systems that collected data under the provisions of the federal Information Collection Rule listed in Code of Federal Regulations Title 40, Part 141, Subpart M, must use the results of the TTHM and HAA5 samples collected during the last four quarters of monitoring required under 40 CFR 141.142. The system must have submitted the results of the samples collected during the last 12 months of required monitoring.

(2) Systems that have not collected TTHM and HAA5 data under 43.9(2)“a”(1). Those systems that have not collected four consecutive quarters of paired TTHM and HAA5 samples as described under 43.9(2)“a”(1) must comply with all other provisions of this subrule as if the HAA5 monitoring had been conducted and the results of that monitoring required compliance with 43.9(2)“b.” The system that elects this option must notify the department in writing of its decision.

(3) The department may require that a system use a more representative annual data set than the data set determined under 567—subparagraph 42.9(2)“a”(1) for the purpose of determining applicability of the requirements of this subrule.

(4) Profiling determination criteria. Any system having either a TTHM annual average greater than 0.064 mg/L or an HAA5 annual average greater than 0.048 mg/L during the period identified in 43.9(2)“a”(1) through (3) must comply with 43.9(2)“b.”

b. Disinfection profiling.

(1) Applicability. Any system that meets the criteria in 43.9(2)“a”(4) must develop a disinfection profile of its disinfection practice for a period of up to three years.

(2) Monitoring requirements. The system must monitor daily for a period of 12 consecutive calendar months to determine the total logs of inactivation for each day of operation, based on the $CT_{99.9}$ values in Tables 1 through 8 in Appendix A, as appropriate, through the entire treatment plant. This system must begin this monitoring as directed by the department. As a minimum, the system with a single point of disinfectant application prior to entrance to the distribution system must conduct the monitoring in 43.9(2)“b”(2)“1” through “4.” A system with more than one point of disinfectant application must conduct the monitoring in 43.9(2)“b”(2)“1” through “4” for each disinfection segment. The system must monitor the parameters necessary to determine the total inactivation ratio, using analytical methods in 43.5(4)“a” as follows:

1. The temperature of the disinfected water must be measured once per day at each residual disinfectant concentration sampling point during peak hourly flow.

2. If the system uses chlorine, the pH of the disinfected water must be measured once per day at each chlorine residual disinfectant concentration sampling point during peak hourly flow.

3. The disinfectant contact time(s) (“T”) must be determined for each day during peak hourly flow.

4. The residual disinfectant concentration(s) (“C”) of the water before or at the first customer and prior to each additional point of disinfection must be measured each day during peak hourly flow.

(3) Use of existing data. A system that has existing operational data may use those data to develop a disinfection profile for additional years, in addition to the disinfection profile generated under 43.9(2)“b”(2). Such systems may use these additional yearly disinfection profiles to develop a benchmark under the provisions of 43.9(2)“c.” The department must determine whether these operational data are substantially equivalent to data collected under the provisions of 43.9(2)“b”(2). These data must also be representative of inactivation through the entire treatment plant and not just of certain treatment segments.

(4) Calculation of the total inactivation ratio. The system must calculate the total inactivation ratio as follows, using the $CT_{99.9}$ values from Tables 1 through 8 listed in Appendix A:

1. If the system uses only one point of disinfectant application, the system may determine the total inactivation ratio for the disinfection segment based on either of the following two methods:

- Determine one inactivation ratio ($CT_{calc}/CT_{99.9}$) before or at the first customer during peak hourly flow.

- Determine successive $CT_{calc}/CT_{99.9}$ values, representing sequential inactivation ratios, between the point of disinfectant application and a point before or at the first customer during peak hourly flow. Under this alternative, the system must calculate the total inactivation ratio by determining $(CT_{calc}/CT_{99.9})$ for each sequence and then adding the $(CT_{calc}/CT_{99.9})$ values together to determine $\Sigma(CT_{calc}/CT_{99.9})$.

2. If the system uses more than one point of disinfectant application before the first customer, the system must determine the CT value of each disinfection segment immediately prior to the next point of disinfectant application, or for the final segment, before or at the first customer, during peak hourly flow. The $CT_{calc}/CT_{99.9}$ value of each segment and $\Sigma(CT_{calc}/CT_{99.9})$ must be calculated using the method in 43.9(2) "b"(4)"1."

3. The system must determine the total logs of inactivation by multiplying the value calculated in 43.9(2) "b"(4)"1" or "2" by 3.0.

(5) Systems using chloramines or ozone. A system that uses either chloramines or ozone for primary disinfection must also calculate the logs of inactivation for viruses using a method approved by the department.

(6) Profile retention requirements. The system must retain disinfection profile data in graphic form, as a spreadsheet, or in some other format acceptable to the department for review as part of sanitary surveys conducted by the department. The department may require the system to submit the data to the department directly or as part of a monthly operation report.

c. Disinfection benchmarking.

(1) Significant change to disinfection practice. Any system required to develop a disinfection profile under the provisions of 43.9(2) "a" or "b" that decides to make a significant change to its disinfection practice must obtain department approval prior to making such change. Significant changes to disinfection practice are:

1. Changes to the point of disinfection;
2. Changes to the disinfectant(s) used in the treatment plant;
3. Changes to the disinfection process; and
4. Any other modification identified by the department.

(2) Calculation of the disinfection benchmark. Any system that is modifying its disinfection practice must calculate its disinfection benchmark using the procedure specified below:

1. For each year of profiling data collected and calculated under 43.9(2) "b," the system must determine the lowest average monthly *Giardia lamblia* inactivation in each year of profiling data. The system must determine the average *Giardia lamblia* inactivation for each calendar month for each year of profiling data by dividing the sum of daily *Giardia lamblia* inactivation by the number of values calculated for that month.

2. The disinfection benchmark is the lowest monthly average value (for systems with one year of profiling data) or average of lowest monthly average values (for systems with more than one year of profiling data) of the monthly logs of *Giardia lamblia* inactivation in each year of profiling data.

(3) A system that uses either chloramines or ozone for primary disinfection must also calculate the disinfection benchmark for viruses using a method approved by the department.

(4) The system must submit the following information to the department as part of its consultation process:

1. A description of the proposed change;
2. The disinfection profile for *Giardia lamblia* (and, if necessary, viruses) under 43.9(2) "b" and the disinfection benchmark as required by 43.9(2) "c"(2); and
3. An analysis of how the proposed change will affect the current levels of disinfection.

43.9(3) Filtration.

a. Conventional filtration treatment or direct filtration.

(1) Turbidity requirement in 95 percent of samples. For systems using conventional filtration or direct filtration, the turbidity level of representative samples of a system's filtered water (combined filter effluent or CFE) must be less than or equal to 0.3 NTU in at least 95 percent of the measurements taken each month, measured as specified in 43.5(4) "a"(1) and 43.5(4) "b"(1).

(2) Maximum turbidity level. The turbidity level of representative samples of a system's filtered water (combined filter effluent or CFE) must at no time exceed 1 NTU, measured as specified in 43.5(4)"a"(1) and 43.5(4)"b"(1). If at any time the combined filter effluent turbidity exceeds 1 NTU, either in a grab sample used for compliance or in a continuously monitored flow, the system must inform the department as soon as possible, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3)"b"(3).

(3) Systems with lime-softening treatment. A system that uses lime softening may acidify representative samples prior to analysis using a protocol approved by the department.

b. Filtration technologies other than conventional filtration treatment, direct filtration, slow sand filtration, or diatomaceous earth filtration. The department may allow a public water system to use a filtration technology not listed in 43.9(3)"a" or 43.5(3)"c" or "d" if it demonstrates to the department, using pilot plant studies or other means, that the alternative filtration technology, in combination with disinfection treatment that meets the requirements of 43.5(2), consistently achieves 99.9 percent removal or inactivation of *Giardia lamblia* cysts, 99.99 percent removal or inactivation of viruses, and 99 percent removal of *Cryptosporidium* oocysts and the department approves the use of the filtration technology. For each approval, the department will set turbidity performance requirements that the system must meet at least 95 percent of the time and the requirement that the system shall not exceed at any time at a level that consistently achieves 99.9 percent removal or inactivation of *Giardia lamblia* cysts, 99.99 percent removal or inactivation of viruses, and 99 percent removal of *Cryptosporidium* oocysts.

43.9(4) Filtration sampling requirements.

a. Monitoring requirements for systems using filtration treatment. In addition to monitoring required by 43.5(4), a public water system subject to the requirements of this rule that provides conventional filtration treatment or direct filtration must conduct continuous monitoring of turbidity for each individual filter using an approved method in 43.5(4)"a"(1) and must calibrate turbidimeters at least every 90 days with a primary standard. The calibration of each turbidimeter used for compliance must be verified at least once per week with a primary standard, secondary standards, or the manufacturer's proprietary calibration confirmation device or by a method approved by the department. If the verification is not within plus or minus 0.05 NTU for measurements of less than or equal to 0.5 NTU, or within plus or minus 10 percent of measurements greater than 0.5 NTU, then the turbidimeter must be recalibrated. Systems must record the results of individual filter monitoring every 15 minutes.

b. Failure of the continuous turbidity monitoring equipment. If there is a failure in the continuous turbidity monitoring equipment, the system must conduct grab sampling every four hours in lieu of continuous monitoring until the turbidimeter is repaired and back online. A system has a maximum of five working days after failure to repair the equipment, or else it is in violation.

43.9(5) Reporting and record-keeping requirements. In addition to the reporting and record-keeping requirements in 567—paragraph 42.4(3)"c," a system subject to the requirements of this rule that provides conventional filtration treatment or direct filtration must report monthly to the department the information specified in 43.9(5)"a" and "b" beginning January 1, 2002. In addition to the reporting and record-keeping requirements in 567—paragraph 42.4(3)"c," a system subject to the requirements of this rule that provides filtration approved under 43.9(3)"b" must report monthly to the department the information specified in 43.9(5)"a" beginning January 1, 2002. The reporting in 43.9(5)"a" is in lieu of the reporting specified in 567—subparagraph 42.4(3)"c"(1).

a. Turbidity. Turbidity measurements as required by 43.9(3) must be reported in a format acceptable to the department and within ten days after the end of each month that the system serves water to the public. Information that must be reported includes:

(1) The total number of filtered water (combined filter effluent or CFE) turbidity measurements taken during the month;

(2) The number and percentage of filtered water (combined filter effluent or CFE) turbidity measurements taken during the month which are less than or equal to the turbidity limits specified in 43.9(3)"a" or "b"; and

(3) The date and value of any combined filter effluent or CFE turbidity measurements taken during the month which exceed 1 NTU for systems using conventional filtration treatment or direct filtration or which exceed the maximum level set by the department under 43.9(3) “b.”

(4) The dates and summary of calibration and verification of all compliance turbidimeters.

b. Individual filter turbidity monitoring. Systems must maintain the results of individual filter turbidity per monitoring taken under 43.9(4) for at least three years. Systems must report to the department that they have conducted individual filter turbidity monitoring under 43.9(4) within ten days after the end of each month that the system serves water to the public. Systems must report to the department individual filter turbidity measurement results taken under 43.9(4) within ten days after the end of each month that the system serves water to the public only if measurements demonstrate one or more of the conditions specified in 43.9(5) “b”(1) through (4). Systems that use lime softening may apply to the department for alternative exceedance levels for the levels specified in 43.9(5) “b”(1) through (4) if they can demonstrate that higher turbidity levels in individual filters are due to lime carryover only and not due to degraded filter performance.

(1) For any individual filter that has a measured turbidity level of greater than 1.0 NTU in two consecutive measurements taken 15 minutes apart, the system must report the filter number, the turbidity measurement, and the date(s) on which the exceedance occurred. In addition, the system must either produce a filter profile for the filter within seven days of the exceedance (if the system is not able to identify an obvious reason for the abnormal filter performance) and report that the profile has been produced or report the obvious reason for the exceedance.

(2) For any individual filter that has a measured turbidity level of greater than 0.5 NTU in two consecutive measurements taken 15 minutes apart anytime following the first four hours of continuous filter operation after the filter has been backwashed or otherwise taken offline, the system must report the filter number, the turbidity, and the date(s) on which the exceedance occurred. In addition, the system must either produce a filter profile for the filter within seven days of the exceedance (if the system is not able to identify an obvious reason for the abnormal filter performance) and report that the profile has been produced or report the obvious reason for the exceedance.

(3) For any individual filter that has a measured turbidity level of greater than 1.0 NTU in two consecutive measurements taken 15 minutes apart at any time in each month of three consecutive months, the system must report the filter number, the turbidity measurement, and the date(s) on which the exceedance occurred. In addition, the system must conduct a self-assessment of the filter within 14 days of the exceedance and report that the self-assessment was conducted. The self-assessment must consist of at least the following components: assessment of filter performance; development of a filter profile; identification and prioritization of factors limiting filter performance; assessment of the applicability of corrections; and preparation of a filter self-assessment report.

(4) For any individual filter that has a measured turbidity level of greater than 2.0 NTU in two consecutive measurements taken 15 minutes apart at any time in each month of two consecutive months, the system must report the filter number, the turbidity measurement, and the date(s) on which the exceedance occurred. In addition, the system must arrange for a comprehensive performance evaluation to be conducted by the department or a third party approved by the department no later than 30 days following the exceedance and have the evaluation completed and submitted to the department no later than 90 days following the exceedance.

c. Additional reporting requirement for turbidity combined filter effluent.

(1) If at any time the turbidity exceeds 1 NTU in representative samples of filtered water (combined filter effluent or CFE) in a system using conventional filtration treatment or direct filtration, the system must consult with the department as soon as practical, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3) “b”(3).

(2) If at any time the turbidity in representative samples of filtered water (combined filter effluent or CFE) exceeds the maximum level set by the department under 43.9(3) “b” for filtration technologies other than conventional filtration treatment, direct filtration, slow sand filtration, or diatomaceous earth filtration, the system must consult with the department as soon as practical, but no later than 24

hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3) “b”(3).

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.10(455B) Enhanced filtration and disinfection requirements for surface water and IGW systems serving fewer than 10,000 people.

43.10(1) General requirements.

a. Applicability. The requirements of this rule constitute national primary drinking water regulations. This rule establishes requirements for filtration and disinfection that are in addition to criteria under which filtration and disinfection are required in 567—43.5(455B). The requirements of this rule are applicable beginning January 1, 2005, unless otherwise noted, to all public water systems using surface water or groundwater under the direct influence of surface water, in whole or in part, and which serve less than 10,000 people. This rule establishes or extends treatment technique requirements in lieu of maximum contaminant levels for the following contaminants: *Giardia lamblia*, viruses, heterotrophic plate count bacteria, *Legionella*, *Cryptosporidium*, and turbidity. The treatment technique requirements consist of installing and properly operating water treatment processes which reliably achieve:

(1) At least 99 percent (2 log) removal of *Cryptosporidium* between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer for filtered systems; and

(2) Compliance with the profiling and benchmark requirements in subrules 43.10(2) and 43.10(3).

b. Prohibition of new construction of uncovered intermediate or finished water storage facilities. Systems that are required to comply with this rule may construct only covered intermediate or finished water storage facilities. For the purposes of this rule, an intermediate storage facility is defined as a storage facility or reservoir after the clarification treatment process.

43.10(2) Disinfection profile.

a. Applicability. A disinfection profile is a graphical representation of a system’s level of *Giardia lamblia* or virus inactivation measured during the course of a year. All systems required to comply with this rule must develop a disinfection profile unless the department determines that such a profile is unnecessary. Records must be maintained according to subrule 43.10(7).

(1) The department may approve the use of a more representative data set for disinfection profiling than the data set required in paragraph 43.10(2) “b.”

(2) The department may determine that a system’s profile is unnecessary only if a system’s TTHM and HAA5 levels are below 0.064 mg/L and 0.048 mg/L, respectively. To determine these levels, TTHM and HAA5 samples must be collected after January 1, 1998, during the month with the warmest water temperature, and at the point of maximum residence time in the distribution system. The department may approve the use of a more representative annual data set for purpose of determining applicability of the requirements of this subrule. The annual data set must be calculated on an annual average, of the arithmetic average of the quarterly averages of four consecutive quarters of monitoring. At least 25 percent of the samples collected in each quarter must be collected at the maximum residence time location in the distribution system.

1. For systems that provide water to other public water supplies, if the producing system meets the byproduct level requirements of less than 0.064 mg/L for TTHM and less than 0.048 mg/L for HAA5, it will not be required to develop a disinfection profile and benchmark unless:

- The consecutive system cannot meet in its distribution system the byproduct level requirements of less than 0.064 mg/L for TTHM and less than 0.048 mg/L for HAA5, and
- The producing system wants to make a significant change to its disinfection practices.

2. The department will then assign the requirement to the producing system to conduct the disinfection profiling study and determine a disinfection benchmark.

b. Required elements of a disinfection profile.

(1) Collection of the following data for 12 consecutive months, beginning by July 1, 2003, for systems serving 500 to 9,999 people, and by January 1, 2004, for systems serving fewer than 500

people. A system must monitor the following parameters to determine the total log inactivation by using the analytical methods in paragraph 43.5(4) "a," once per week on the same calendar day, over 12 consecutive months.

1. Temperature of the disinfected water at each residual disinfectant concentration sampling point during peak hourly flow, measured in degrees Celsius;
2. For systems using chlorine, the pH of the disinfected water at each residual disinfectant concentration sampling point during peak hourly flow, measured in standard pH units;
3. The disinfectant contact time ("T") during peak hourly flow, measured in minutes; and
4. The residual disinfectant concentration(s) ("C") of the water following each point of disinfection at a point(s) prior to each subsequent point of disinfection and at the entry point to the distribution system or at a location just prior to the first customer during peak hourly flows, measured in mg/L.

(2) The data collected in 43.10(2) "b"(1) must be used to calculate the weekly log inactivation, along with the CT_{99,9} tables listed in Appendix A. The system must calculate the total inactivation ratio as follows and multiply the value by 3.0 to determine log inactivation of *Giardia lamblia*:

1. If the system uses only one point of disinfectant application, it must determine:
 - One inactivation ratio (CT calc/CT_{99,9}) before or at the first customer during peak hourly flow, or
 - Successive (CT calc/CT_{99,9}) values, representing sequential inactivation ratios, between the point of disinfection application and a point before or at the first customer during peak hourly flow. Under this alternative, the system must calculate the total inactivation ratio by determining (CT calc/CT_{99,9}) for each sequence and then adding the (CT calc/CT_{99,9}) values together to determine (ΣCT calc/CT_{99,9}).
2. If a system uses more than one point of disinfectant application before the first customer, the system must determine the (CT calc/CT_{99,9}) value of each disinfection segment immediately prior to the next point of disinfectant application, or for the final segment, before or at the first customer, during peak hourly flow using the procedure specified in 43.10(2) "b"(2) "1," second bulleted paragraph.
3. If a system uses chloramines, ozone, or chlorine dioxide for primary disinfection, the system must also calculate the inactivation logs for viruses and develop an additional disinfection profile for viruses using methods approved by the department.

(3) The weekly log inactivations are used to develop a disinfection profile, as follows:

1. The disinfection profile is developed by graphing each log inactivation data point versus time. Each log inactivation serves as a data point in the disinfection profile. The system will have obtained 52 measurements at a minimum, one for each week of the year.
2. The disinfection profile depicts the variation of microbial inactivation over the course of the year.
3. The system must retain the disinfection profile data both in a graphic form and in a spreadsheet, which must be available for review by the department.
4. This profile is used to calculate a disinfection benchmark if the system is considering changes to its disinfection practices.

43.10(3) Disinfection benchmark.

a. Applicability. Any system required to develop a disinfection profile under 43.10(2) must develop a disinfection benchmark prior to making any significant change in disinfection practice. The system must receive department approval before any significant change in disinfection practice is implemented. Records must be maintained according to subrule 43.10(7).

b. Significant changes to disinfection practice. Significant changes to disinfection practice include:

- (1) Changes to the point of disinfection;
- (2) Changes to the disinfectant(s) used in the treatment plant;
- (3) Changes to the disinfection process; or
- (4) Any other modification identified by the department.

c. Calculation of the disinfection benchmark. The system must calculate the disinfection benchmark in the following manner:

(1) Step 1. Using the data collected to develop the disinfection profile, the system must determine the average *Giardia lamblia* inactivation for each calendar month by dividing the sum of all *Giardia lamblia* inactivations for that month by the number of values calculated for that month.

(2) Step 2. The system must determine the lowest monthly average value out of the 12 values. This value becomes the disinfection benchmark.

d. Information required for department approval of a change in disinfection practice. Any significant change in disinfection practice must have been approved by the department before the system institutes the change. The following information must be submitted by the system to the department as part of the consultation and approval process.

- (1) A description of the proposed change;
- (2) The disinfection profile for *Giardia lamblia* and, if necessary, viruses;
- (3) The disinfection benchmark;
- (4) An analysis of how the proposed change will affect the current levels of disinfection; and
- (5) Any additional information requested by the department.

e. Additional benchmark requirements if chloramines, ozone, or chlorine dioxide is used for primary disinfection. If a system uses chloramines, ozone, or chlorine dioxide for primary disinfection, the system must calculate the disinfection benchmark from the data collected for viruses to develop the disinfection profile in addition to the *Giardia lamblia* disinfection benchmark calculated in paragraph 43.10(3)“c.” This viral benchmark must be calculated in the same manner used to calculate the *Giardia lamblia* disinfection benchmark in paragraph 43.10(3)“c.”

43.10(4) Combined filter effluent turbidity requirements. All systems using surface water or groundwater under the direct influence of surface water which serve less than 10,000 people must use filtration, and the turbidity limits that must be met depend upon the type of filtration used. Systems using lime softening may acidify representative combined filter effluent turbidity samples prior to analysis, using a protocol approved by the department.

a. Conventional filtration treatment or direct filtration.

(1) Turbidity must be measured in the combined filter effluent as described in paragraphs 43.5(4)“a” and “b.”

(2) The turbidity in the combined filter effluent must be less than or equal to 0.3 NTU in 95 percent of the turbidity measurements taken each month.

(3) The turbidity in the combined filter effluent must never exceed 1 NTU at any time during the month. If at any time the combined filter effluent turbidity exceeds 1 NTU, either in a grab sample used for compliance or in a continuously monitored flow, the system must inform the department as soon as possible, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraphs 42.1(3)“b”(3) and 42.1(2)“a”(8).

(4) The monthly reporting requirements are listed in subrule 43.10(6).

b. Slow sand filtration or diatomaceous earth filtration.

(1) Turbidity must be measured in the combined filter effluent as described in paragraphs 43.5(4)“a” and “b.”

(2) The combined filter effluent turbidity limits of subrule 43.5(3) must be met.

(3) The monthly reporting requirements are listed in subrule 43.10(6).

c. Other alternative filtration technologies. By using pilot studies or other means, a system using alternative filtration must demonstrate to the satisfaction of the department that the system’s filtration, in combination with disinfection treatment, consistently achieves 99 percent removal of *Cryptosporidium* oocysts; 99.9 percent removal, inactivation, or a combination of both, of *Giardia lamblia* cysts; and 99.99 percent removal, inactivation, or a combination of both, of viruses. The department will then use the pilot study data to determine system-specific turbidity limits.

(1) Turbidity must be measured in the combined filter effluent as described in paragraphs 43.5(4)“a” and “b.”

(2) The turbidity must be less than or equal to a value set by the department in 95 percent of the combined filter effluent turbidity measurements taken each month, based on the pilot study. The value may not exceed 1 NTU.

(3) The combined filter effluent turbidity must never exceed a value set by the department, based on the pilot study. The value may not exceed 5 NTU.

(4) The monthly reporting requirements are listed in subrule 43.10(6).

43.10(5) Individual filter turbidity requirements. All systems utilizing conventional filtration or direct filtration must conduct continuous monitoring of turbidity for each individual filter. Records must be maintained according to subrule 43.10(7).

a. Continuous turbidity monitoring requirements. Following are the continuous turbidity monitoring requirements.

(1) Monitoring must be conducted using an approved method listed in paragraph 43.5(4)“a”;

(2) Calibration of turbidimeters must be conducted at least every 90 days with a primary standard. The calibration of each turbidimeter used for compliance must be verified at least once per week with a primary standard, secondary standards, or the manufacturer’s proprietary calibration confirmation device or by a method approved by the department. If the verification is not within plus or minus 0.05 NTU for measurements of less than or equal to 0.5 NTU, or within plus or minus 10 percent of measurements greater than 0.5 NTU, the turbidimeter must be recalibrated;

(3) Results of turbidity monitoring must be recorded at least every 15 minutes;

(4) Monthly reporting must be completed according to subrule 43.10(6); and

(5) Records must be maintained according to 43.10(7).

b. Failure of continuous turbidity monitoring equipment. If there is a failure in the continuous turbidity monitoring equipment, the system must conduct grab sampling every four hours in lieu of continuous monitoring until the turbidimeter is back on-line. A system has a maximum of 14 days after failure to repair the equipment, or else the system is in violation. The system must notify the department within 24 hours of both when the turbidimeter was taken off-line and when it was returned on-line.

c. Special provision for one-filter or two-filter systems. If a system has only one or two filters, it may conduct continuous monitoring of the combined filter effluent turbidity instead of individual effluent turbidity monitoring. The continuous monitoring of the combined filter effluent turbidity must meet the requirements listed in 43.10(5)“a” and “b.”

d. Alternative turbidity levels for systems using lime softening. Systems using lime softening may apply to the department for alternative turbidity exceedance levels for the levels specified in 43.10(5)“e.” The system must be able to demonstrate to the satisfaction of the department that higher turbidity levels are due to lime carryover only, and not due to degraded filter performance.

e. Requirements triggered by the individual filter turbidity monitoring data. Systems are required to conduct additional activities based upon their individual filter turbidity monitoring data, as listed in this paragraph.

(1) If the turbidity of an individual filter (or the turbidity of the combined filter effluent for a system with one or two filters, pursuant to 43.10(5)“c”) exceeds 1.0 NTU in two consecutive recordings taken 15 minutes apart, the system must report the following information in the monthly operation report to the department by the tenth day of the following month:

1. The filter number(s);
2. Corresponding date(s);
3. Turbidity value(s) which exceeded 1.0 NTU; and
4. The cause of the exceedance(s), if known.

(2) If the turbidity of an individual filter (or the turbidity of the combined filter effluent for a system with one or two filters, pursuant to 43.10(5)“c”) exceeds 1.0 NTU in two consecutive recordings 15 minutes apart in three consecutive months, the system must meet the following requirements:

1. The system must conduct a self-assessment of the filter(s) within 14 days of the day the filter exceeded 1.0 NTU in two consecutive measurements for the third straight month, unless a comprehensive performance evaluation as specified in the following paragraph is required. Two-filter systems that monitor the combined filter effluent turbidity instead of the individual filters must conduct a self-assessment of both filters.

2. The self-assessment must consist of at least the following components:
 - Assessment of filter performance;

- Development of a filter profile;
- Identification and prioritization of factors limiting filter performance;
- Assessment of the applicability of corrections;
- Preparation of a filter self-assessment report;
- Date the self-assessment requirement was triggered; and
- Date the self-assessment was completed.

(3) If the turbidity of an individual filter (or the turbidity of the combined filter effluent for a system with one or two filters, pursuant to 43.10(5)“c”) exceeds 2.0 NTU in two consecutive recordings 15 minutes apart in two consecutive months, the system must meet the following requirements:

1. The system must arrange to have a comprehensive performance evaluation (CPE) conducted by the department or a third party approved by the department no later than 60 days following the day the filter exceeded 2.0 NTU in two consecutive measurements for the second straight month. The CPE report must be completed and submitted to the department within 120 days following the day the filter exceeded 2.0 NTU in two consecutive measurements for the second straight month.

2. A new CPE is not required if a CPE has been completed by the department or a third party approved by the department within the prior 12 months or if the system and department are jointly participating in an ongoing comprehensive technical assistance project at the system.

(4) The department may conduct a CPE at a system regardless of individual filter turbidity levels.

43.10(6) Reporting requirements. The system must meet the following reporting requirements:

a. Combined filter effluent turbidity monitoring.

(1) The following information must be reported in the monthly operation report to the department by the tenth day of the following month.

1. Total number of filtered water turbidity measurements taken during the month.

2. The number and percentage of filtered water turbidity measurements taken during the month which are less than or equal to the system’s required 95th percentile limit.

3. The date and analytical result of any turbidity measurements taken during the month which exceeded the maximum turbidity limit for the system, in addition to the requirements of (2).

4. The dates and summary of calibration and verification of all compliance turbidimeters.

(2) For an exceedance of the combined filter effluent maximum turbidity limit, the following requirements must be met.

1. If at any time the turbidity exceeds 1 NTU in representative samples of filtered water in a system using conventional filtration treatment or direct filtration, the system must consult with the department as soon as practical, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3)“b”(3).

2. If at any time the turbidity in representative samples of filtered water exceeds the maximum level under subrule 43.5(3) for slow sand filtration or diatomaceous earth filtration, the system must consult with the department as soon as practical, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3)“b”(3).

3. If at any time the turbidity in representative samples of filtered water exceeds the maximum level set by the department under paragraph 43.10(4)“c” for filtration technologies other than conventional filtration treatment, direct filtration, slow sand filtration, or diatomaceous earth filtration, the system must consult with the department as soon as practical, but no later than 24 hours after the exceedance is known, in accordance with the public notification requirements under 567—subparagraph 42.1(3)“b”(3).

b. Individual filter effluent turbidity monitoring. The following information must be reported in the monthly operation report to the department by the tenth day of the following month, unless otherwise noted.

(1) That the system conducted individual filter turbidity monitoring during the month.

(2) For any filter that had two consecutive measurements taken 15 minutes apart that exceeded 1.0 NTU, the following information must be reported:

1. The filter number(s);

2. The corresponding dates;

3. The turbidity values that exceeded 1.0 NTU; and
 4. The cause, if known, of the exceedance.
- (3) If a self-assessment was required, the date it was triggered and the date the assessment was completed must be reported. If the self-assessment requirement was triggered in the last four days of the month, the information must be reported to the department by the 14th day of the following month.
- (4) If a comprehensive performance evaluation was required, the date it was triggered must be reported. A copy of the CPE report must be submitted to the department within 120 days of when the CPE requirement was triggered.
- (5) The dates and summary of calibration and verification of all compliance turbidimeters.
- c. Disinfection profiling.* The following information must be reported to the department by January 1, 2004, for systems serving fewer than 500 people.
- (1) Results of disinfection byproduct monitoring that indicate TTHM levels less than 0.064 mg/L and HAA5 levels less than 0.048 mg/L; or
 - (2) That the system has begun to collect the profiling data.
- d. Disinfection benchmarking.* Before a system that was required to develop a disinfection profile makes a significant change to its disinfection practice, it must report the following information to the department, and the system must receive department approval before any significant change in disinfection practice is implemented.
- (1) Description of the proposed change in disinfection practice;
 - (2) The system's disinfection profile for *Giardia lamblia* and, if applicable, for viruses;
 - (3) The system's disinfection benchmark; and
 - (4) An analysis of how the proposed change will affect the current levels of disinfection.

43.10(7) Record-keeping requirements. The system must meet the following record-keeping requirements, in addition to the record-keeping requirements in 567—paragraph 42.4(3)“c” and 567—42.5(455B).

- a. Individual filter effluent turbidity requirements.* The results of the individual filter effluent turbidity monitoring must be kept for at least three years.
- b. Disinfection profiling requirements.* The results of the disinfection profile, including raw data and analysis, must be kept indefinitely.
- c. Disinfection benchmarking requirements.* The results of the disinfection benchmark, including raw data and analysis, must be kept indefinitely.

[ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.11(455B) Enhanced treatment for *Cryptosporidium*.

43.11(1) Applicability. The requirements of this rule are national primary drinking water regulations and establish or extend treatment technique requirements in lieu of maximum contaminant levels for *Cryptosporidium*. These requirements are in addition to the filtration and disinfection requirements of 567—43.5(455B), 567—43.9(455B) and 567—43.10(455B) and apply to all Iowa public water systems supplied by surface water or influenced groundwater sources.

- a. Wholesale systems.* Wholesale systems must comply with the requirements based on the population of the largest system in the combined distribution system.
- b. Filtered systems.* The requirements of this rule for filtered systems apply to systems that are required to provide filtration treatment pursuant to 567—43.5(455B), whether or not the system is currently operating a filtration system.

43.11(2) General requirements. Systems subject to this rule must comply with the following requirements:

- a. Source water monitoring.* Systems must conduct two rounds of source water monitoring for each plant that treats a surface water or influenced groundwater source. This monitoring may include sampling for *Cryptosporidium*, *E. coli*, and turbidity, as described in 43.11(3), to determine what level, if any, of additional *Cryptosporidium* treatment the systems must provide.

b. Disinfection profiles and benchmarks. Systems that plan to make a significant change to their disinfection practice must develop disinfection profiles and calculate disinfection benchmarks, as described in 43.11(4).

c. Cryptosporidium treatment bin determination. Systems must determine their *Cryptosporidium* treatment bin classification and provide additional treatment for *Cryptosporidium*, if required, according to the prescribed schedule.

d. Additional treatment for Cryptosporidium. Systems required to provide additional treatment for *Cryptosporidium* must implement microbial toolbox options that are designed and operated as described in 43.11(8) through 43.11(13).

e. Record keeping and reporting. Systems must comply with the applicable record-keeping and reporting requirements described in 43.11(14) and 43.11(15).

f. Significant deficiencies. Systems must address significant deficiencies identified during sanitary surveys as described in 43.1(7).

43.11(3) Source water monitoring.

a. Schedule. Systems must conduct the source water monitoring no later than the month and year listed in Table 1. A system may avoid the source water monitoring if the system provides a total of at least 5.5-log treatment for *Cryptosporidium*, equivalent to meeting the treatment requirements of Bin 4 in 43.11(6). The system must install and operate technologies to provide this level of treatment by the applicable treatment compliance date specified in 43.11(7).

Table 1: Source Water Monitoring Schedule

| System | First round of monitoring | Second round of monitoring |
|--|---------------------------|----------------------------|
| Serves at least 100,000 people | October 2006 | April 2015 |
| Serves 50,000-99,999 people | April 2007 | October 2015 |
| Serves 10,000-49,999 people | April 2008 | October 2016 |
| Serves fewer than 10,000 people and only conducts <i>E. coli</i> monitoring | October 2008 | October 2017 |
| Serves fewer than 10,000 people and conducts <i>Cryptosporidium</i> monitoring | April 2010 | April 2019 |

b. Monitoring requirements. The minimum monitoring requirements are listed below. Systems may sample more frequently, provided the sampling frequency is evenly spaced throughout the monitoring period.

(1) Systems serving at least 10,000 people. Systems serving at least 10,000 people must sample their source water for *Cryptosporidium*, *E. coli*, and turbidity at least monthly for 24 months.

(2) Systems serving fewer than 10,000 people. Systems serving fewer than 10,000 people are allowed to first conduct *E. coli* monitoring to determine if further monitoring for *Cryptosporidium* is required.

1. Systems must sample their source water for *E. coli* at least once every two weeks for 12 months. If the annual mean *E. coli* concentration is at or below 100 *E. coli* per 100 mL, the system can avoid further *Cryptosporidium* monitoring in that sampling round.

2. A system may avoid *E. coli* monitoring if the system notifies the department no later than three months prior to the *E. coli* monitoring start date that the system will conduct *Cryptosporidium* monitoring.

3. Systems that fail to conduct the required *E. coli* monitoring or that cannot meet the *E. coli* annual mean limit are required to conduct *Cryptosporidium* monitoring. The system must sample its source water for *Cryptosporidium* either at least twice per month for 12 months or at least monthly for 24 months.

4. A system that begins monitoring for *E. coli* and determines during the sampling period that the system mathematically cannot meet the applicable *E. coli* annual mean limit may discontinue the *E. coli*

sampling. The system is then required to start *Cryptosporidium* monitoring according to the schedule in Table 1.

(3) Plants operating only part of the year. Systems with surface water or influenced groundwater treatment plants that operate for only part of the year must conduct source water monitoring in accordance with this rule, but with the following modifications.

1. Systems must sample their source water only during the months that the plant operates unless the department specifies another monitoring period based on plant operating practices.

2. Systems with plants that operate less than six months per year and that monitor for must collect at least six samples per year for two years. The samples must be evenly spaced throughout the period the plant operates.

(4) New sources. A system that begins using a new surface water or influenced groundwater source after the dates in Table 1 must monitor according to a schedule approved by the department and meet the requirements of this subrule. The system must also meet the requirements of the bin classification and *Cryptosporidium* treatment for the new source on a schedule approved by the department. The system must conduct the second round of source water monitoring no later than six years following the initial bin classification or determination of the mean *Cryptosporidium* level, as applicable.

(5) Monitoring violation determination. Failure to collect any source water sample required under this subrule in accordance with the sampling plan, location, analytical method, approved laboratory, or reporting requirements of 43.11(3)“c” through 43.11(3)“e” is a monitoring violation.

(6) Grandfathered monitoring data. Systems were allowed to use source water monitoring *Cryptosporidium* data collected prior to the applicable start date in Table 1 to meet the requirements of the first round of monitoring, a process referred to as grandfathering data. This grandfathered data substituted for an equivalent number of months at the end of the monitoring period and had to meet the requirements of 40 CFR 141.707 as adopted on January 5, 2006, which the department hereby adopts by reference. Department approval of the grandfathered data application is required.

c. Sampling plan. Systems must submit a sampling plan that specifies the sampling locations in relation to the sources and treatment processes and the calendar dates when the system will collect each required sample. The specific treatment process locations that must be included in the plan are pretreatment, points of chemical treatment, and filter backwash recycle.

(1) The sampling plan must be submitted no later than three months prior to the applicable monitoring date in Table 1. If the department does not respond to a system regarding the submitted sampling plan prior to the start of the monitoring period, the system must sample according to the submitted sampling plan.

(2) The plan must be submitted in a form acceptable to the department.

(3) The system must monitor within two days of the date specified in the plan, unless one of the following conditions occurs.

1. If an extreme condition or situation exists that may pose danger to the sample collector, or that cannot be avoided, and causes the system to be unable to sample in the scheduled five-day period, the system must sample as close to the scheduled date as is feasible unless the department approves an alternative sampling date. The system must submit an explanation for the delayed sampling date to the department within one week of the missed sampling period. A replacement sample must be collected.

2. If a system is unable to report a valid analytical result for a scheduled sampling date due to equipment failure, loss of or damage to the sample, failure to comply with the analytical method or quality control requirements, or failure of the laboratory to analyze the sample, the system must notify the department of the cause of the delay and collect a replacement sample.

3. A replacement sample must be collected within 21 days of the scheduled sampling period or on the resampling date approved by the department.

(4) Missed sampling dates. Systems that fail to meet the dates in their sampling plan for any source water sample must revise their sampling plan to add dates for collecting all missed samples. The revised schedule must be submitted to the department for approval prior to the collection of the missed samples.

d. Sampling locations. Systems must collect samples for each treatment plant that treats a surface water or influenced groundwater source. If multiple plants draw water from the same influent (same pipe

or intake), the department may approve one set of monitoring results to be used to satisfy the requirements for those plants.

(1) Chemical treatment location. Systems must collect source water samples prior to chemical treatment. If the system cannot feasibly collect a sample prior to chemical treatment, the department may grant approval for the system to collect the sample after chemical treatment. This approval would only be granted if the department determines in writing that collecting the samples prior to chemical treatment is not feasible for the system and that the chemical treatment is unlikely to have a significant adverse effect on the analysis of the sample.

(2) Filter backwash recycle return location. Systems that recycle filter backwash water must collect the source water samples prior to the point of filter backwash water addition.

(3) Bank filtration credit sampling location.

1. Systems that receive *Cryptosporidium* treatment credit for bank filtration under 43.9(3) "b" or 43.10(4) "c" must collect source water samples in the surface water source prior to bank filtration.

2. Systems that use bank filtration as pretreatment to a filtration plant must collect source water samples from the well, which is after bank filtration has occurred. Use of bank filtration during monitoring must be consistent with routine operational practice. Systems collecting samples after a bank filtration process may not receive treatment credit for the bank filtration under 43.11(10) "c."

(4) Multiple sources. Systems with plants that use multiple water sources, including multiple surface water sources and blended surface water and groundwater sources, must collect samples as follows:

1. The use of multiple sources during monitoring must be consistent with routine operational practice.

2. If a sampling tap is available where the sources are combined prior to treatment, the system must collect samples from that tap.

3. If a sampling tap where the sources are combined prior to treatment is not available, the system must collect samples at each source near the intake on the same day and must use either of the following options for sample analysis.

- Physically composite the source samples into a single sample for analysis. Systems may composite the sample from each source into one sample prior to analysis. The volume of the sample from each source must be weighted according to the proportion of the source in the total plant flow at the time the sample is collected.

- Analyze the samples separately and mathematically composite the results. Systems may analyze samples from each source separately and calculate a weighted average of the analytical results for each sampling date. The weighted average must be calculated by multiplying the analytical result for each source by the fraction that source contributed to the total plant flow at the time the sample was collected and then summing the weighted analytical results.

e. Analytical methodology, laboratory certification, and data reporting requirements. Systems must have samples analyzed pursuant to the specifications listed in this paragraph. The system must report, in a format acceptable to the department, the analytical results from the source water monitoring no later than ten days after the end of the first month following the month when the sample is collected.

(1) *Cryptosporidium*. Systems must have *Cryptosporidium* samples analyzed by a laboratory that is approved under EPA's Laboratory Quality Assurance Evaluation Program for Analysis of *Cryptosporidium* in Water.

1. These are the approved analytical methods for *Cryptosporidium*:

- "Method 1623: *Cryptosporidium* and *Giardia* in Water by Filtration/IMS/FA," 2005, US EPA, EPA-815-R-05-002. Available at www.nemi.gov;

- "Method 1622: *Cryptosporidium* in Water by Filtration/IMS/FA," 2005, US EPA, EPA-815-R-05-001. Available at www.nemi.gov; and

- "Method 1623.1: *Cryptosporidium* and *Giardia* in Water by Filtration/Immunomagnetic Separation/Immunofluorescence Assay Microscopy," 2012, EPA-816-R-12-001. Available at www.nepis.epa.gov.

2. Using one of the approved methods, the laboratory must analyze at least a 10 L sample or a packed pellet volume of at least 2 mL. Systems unable to process a 10 L sample must analyze as much sample volume as can be filtered by two filters specified in the method, up to a packed pellet volume of at least 2 mL.

3. A matrix spike (MS) sample must be spiked and filtered by the laboratory according to the approved method. If the volume of the MS sample is greater than 10 L, the system may filter all but 10 L of the MS sample in the field and ship the filtered sample and the remaining 10 L of source water to the laboratory. In this case, the laboratory must spike the remaining 10 L of water and filter it through the filter used to collect the balance of the sample in the field.

4. Flow cytometer-counted spiking suspensions must be used for the matrix spike samples and the ongoing precision and recovery samples.

5. The following data elements must be reported for each *Cryptosporidium* analysis:

- PWSID.
- Facility ID.
- Sample collection date.
- Sample type (i.e., field or matrix spike).
- Sample volume filtered (L), to the nearest 0.25 L.
- Whether 100 percent of the filtered volume was examined by the laboratory.
- Number of oocysts counted.
- For matrix spike samples: sample volume spiked and estimated number of oocysts spiked.
- For samples in which less than 10 L is filtered or less than 100 percent of the sample volume is examined: the number of filters used and the packed pellet volume.
- For samples in which less than 100 percent of sample volume is examined: the volume of resuspended concentrate and the volume of this resuspension processed through immunomagnetic separation.

(2) *E. coli*. Systems must have the *E. coli* samples analyzed by a laboratory certified by EPA, the National Environmental Laboratory Accreditation Conference, or the department for total coliform or fecal coliform analysis in drinking water samples using the same approved *E. coli* method for the analysis of source water.

1. The approved analytical methods for the enumeration of *E. coli* in source water are shown in Table 2.

Table 2: *E. coli* Analytical Methods

| Method | EPA | Standard Methods | Other |
|--|-------------------|---------------------------|---|
| Most probable number with multiple tube or multiple well ^{1, 2} | | 9223 B ¹¹ | 991.15 ⁴ Colilert ^{3, 5} Colilert-18 ^{3, 5, 6} |
| Membrane filtration, single step ^{1, 7, 8} | 1603 ⁹ | | m-ColiBlue24 ¹⁰ |
| Membrane filtration, two step | | 9222D/9222G ¹² | |

¹Tests must be conducted to provide organism enumeration (i.e., density). Select the appropriate configuration of tubes/filtrations and dilutions/volumes to account for the quality, consistency, and anticipated organism density in the water sample.

²Samples shall be enumerated by the multiple-tube or multiple-well procedure. Using multiple-tube procedures, employ an appropriate tube and dilution configuration of the sample as needed and report the Most Probable Number (MPN). Samples tested with Colilert® may be enumerated with the multiple-well procedures, Quanti-Tray®, Quanti-Tray® 2000, and the MPN calculated from the table provided by the manufacturer.

³These tests are collectively known as defined enzyme substrate tests, where, for example, a substrate is used to detect the enzyme beta-glucuronidase produced by *E. coli*.

⁴Association of Official Analytical Chemists, International. "Official Methods of Analysis of AOAC International, 16th Ed., Volume 1, Chapter 17, 1995. AOAC, 481 N. Frederick Ave., Suite 500, Gaithersburg, MD 20877-2417.

⁵Descriptions of the Colilert®, Colilert-18®, Quanti-Tray®, and Quanti-Tray® 2000 may be obtained from IDEXX Laboratories, Inc., 1 IDEXX Drive, Westbrook, ME 04092.

⁶Colilert-18® is an optimized formulation of the Colilert® for the determination of total coliforms and *E. coli* that provides results within 18 hours of incubation at 35 degrees C rather than the 24 hours required for the Colilert® test.

⁷The filter must be a 0.45 micron membrane filter or a membrane filter with another pore size certified by the manufacturer to fully retain organisms to be cultivated and to be free of extractables which could interfere with organism growth.

⁸When the membrane filter method has been used previously to test waters with high turbidity or large numbers of noncoliform bacteria, a parallel test should be conducted with a multiple-tube technique to demonstrate applicability and comparability of results.

⁹“Method 1603: *Escherichia coli* (*E. coli*) in Water by Membrane Filtration Using Modified Membrane-Thermotolerant *Escherichia coli* Agar (modified mTEC), USEPA, July 2006.” US EPA, Office of Water, Washington, DC, EPA 821-R-06-011. Available at www.nepis.epa.gov.

¹⁰A description of the m-ColiBlue24® test, Total Coliforms and *E. coli*, is available from Hach Company, 100 Dayton Ave., Ames, IA 50010.

¹¹Standard Methods for the Analysis of Water and Wastewater, 18th (1992), 19th (1995), and 20th (1998) editions, American Public Health Association. Available from APHA, 800 I Street, NW, Washington, DC 20001-3710.

¹²Standard Methods for the Examination of Water and Wastewater, 20th edition (1998). Available from APHA, 800 I Street, NW, Washington, DC 20001-3710.

2. The holding time (the time period from sample collection to initiation of analysis) shall not exceed 30 hours. The department may approve on a case-by-case basis an extension of the holding time to 48 hours, if the 30-hour holding time is not feasible. If the extension is allowed, the laboratory must use the Colilert® reagent version of the Standard Methods 9223B to conduct the analysis.

3. The samples must be maintained between 0 and 10 degrees C during storage and transit to the laboratory.

4. The following data elements must be reported for each *E. coli* analysis:

- PWSID.
- Facility ID.
- Sample collection date.
- Analytical method number.
- Method type.
- Source type (flowing stream or river; lake or reservoir; or influenced groundwater).
- Number of *E. coli* per 100 mL.
- Turbidity in NTU.

(3) Turbidity. The approved analytical methods for turbidity are listed in 43.5(4)“a”(1). Measurements of turbidity must be made by a party approved by the department, and reported on the laboratory data sheet with the corresponding *E. coli* sample.

43.11(4) Disinfection profiling and benchmarking.

a. General requirements. Following completion of the first round of source water monitoring, a system that plans to make a significant change to its disinfection practice must develop disinfection profiles and calculate disinfection benchmarks for *Giardia lamblia* and viruses.

(1) Notification to the department. The system must notify the department prior to changing its disinfection practice and must include in the notice the completed disinfection profile and disinfection benchmark for *Giardia lamblia* and viruses, a description of the proposed change in disinfection practice, and an analysis of how the proposed change will affect the current level of disinfection.

(2) Definition of “significant change.” A significant change to the disinfection practice is defined as follows:

1. Any change to the point of disinfection;
2. Any change to the disinfectant(s) used in the treatment plant;
3. Any change to the disinfection process; or
4. Any other modification identified by the department as a significant change to disinfection practice.

b. Developing the disinfection profile. In order to develop a disinfection profile, a system must monitor at least weekly for a period of 12 consecutive months to determine the total log inactivation for

Giardia lamblia and viruses. If a system monitors more frequently, the monitoring frequency must be evenly spaced. A system that operates for fewer than 12 months per year must monitor weekly during the period of operation. A system must determine log inactivation for *Giardia lamblia* through the entire plant, based on CT_{99.9} values in Appendix A, Tables 1 through 6, as applicable. Systems must determine log inactivation for viruses through the entire treatment plant based on a protocol approved by the department.

(1) Monitoring requirements. Systems with a single point of disinfectant application prior to the entrance to the distribution system must conduct the monitoring listed in this subparagraph. Systems with multiple points of disinfectant application must conduct the same monitoring for each disinfection segment. Systems must monitor the parameters necessary to determine the total inactivation ratio. The analytical methods for the parameters are listed in 43.5(4) "a." All measurements must be taken during peak hourly flow.

1. For systems using a disinfectant other than UV, the temperature of the disinfected water must be measured in degrees Celsius at each residual disinfectant concentration sampling point or at an alternative location approved by the department.

2. For systems using chlorine, the pH of the disinfected water must be measured at each chlorine residual disinfectant concentration sampling point or at an alternative location approved by the department.

3. The disinfectant contact time must be determined in minutes.

4. The residual disinfectant concentrations of the water must be determined in mg/L before or at the first customer and prior to each additional point of disinfectant application.

5. A system may use existing data to meet the monitoring requirements if the data are substantially equivalent to the required data, the system has not made any significant change to its treatment practice, and the system has the same source water as it had when the data were collected. Systems may develop disinfection profiles using up to three years of existing data.

6. A system may use disinfection profiles developed under 43.9(2) or 43.10(2) if the system has not made a significant change to its treatment practice and has the same source water as it had when the profile was developed. The virus profile must be developed using the same data on which the *Giardia lamblia* profile is based.

(2) Calculation of the total inactivation ratio for *Giardia lamblia*.

1. Systems using only one point of disinfectant application may determine the total inactivation ratio ($CT_{\text{calc}}/CT_{99.9}$) for the disinfection segment using either of the following methods.

- Determine one inactivation ratio before or at the first customer during peak hourly flow.

- Determine successive sequential inactivation ratios between the point of disinfectant application and a point before or at the first customer during peak hourly flow. Calculate the total inactivation ratio by determining the inactivation ratio for each sequence ($CT_{\text{calc}}/CT_{99.9}$) and adding the values together.

2. Systems using more than one point of disinfectant application before the first customer must determine the CT value of each disinfection segment immediately prior to the next point of disinfectant application, or for the final segment, before or at the first customer, during peak hourly flow. Calculate the ($CT_{\text{calc}}/CT_{99.9}$) value of each segment and add the values together to determine the total inactivation ratio.

3. Systems must then determine the total logs of inactivation by multiplying the total inactivation ratio by 3.0.

(3) Calculation of the total inactivation ratio for viruses. The system must calculate the log of inactivation for viruses using a protocol approved by the department.

c. *Calculation of the disinfection benchmark.*

(1) For each year of profiling data collected and calculated under this subrule, systems must determine the lowest mean monthly level of both *Giardia lamblia* and virus inactivation. Systems must determine the mean *Giardia lamblia* and virus inactivation for each calendar month for each year of profiling data by dividing the sum of daily or weekly *Giardia lamblia* and virus log inactivation by the number of values calculated for that month.

(2) For a system with one year of profiling data, the disinfection benchmark is the lowest monthly mean value. For a system with more than one year of profiling data, the disinfection benchmark is the mean of the lowest monthly mean values of *Giardia lamblia* and virus log inactivation in each year of profiling data.

43.11(5) Bin classification. Upon completion of the first round of source water monitoring, systems must calculate an initial *Cryptosporidium* bin concentration for each plant for which monitoring was required. Calculation of the bin concentration must use the *Cryptosporidium* results reported under 43.11(3)“a.”

a. Calculation of mean Cryptosporidium or bin concentration value.

(1) Systems that collect at least 48 samples. For systems that collect a total of at least 48 samples, the bin concentration is equal to the arithmetic mean of all sample concentrations.

(2) Systems that collect 24 to 47 samples. For systems that collect at least 24 samples but not more than 47 samples, the bin concentration is equal to the highest arithmetic mean of all sample concentrations in any 12 consecutive months during which *Cryptosporidium* samples were collected.

(3) Systems serving fewer than 10,000 people and monitoring for only one year. For systems that serve fewer than 10,000 people and monitor *Cryptosporidium* for only one year (i.e., 24 samples in 12 months), the bin concentration is equal to the arithmetic mean of all sample concentrations.

(4) Systems with plants operating on a part-time basis. For systems with plants operating only part of the year that monitor fewer than 12 months per year, the bin concentration is equal to the highest arithmetic mean of all sample concentrations during any year of *Cryptosporidium* monitoring.

(5) If the monthly *Cryptosporidium* sampling frequency varies, systems must first calculate a monthly average for each month of monitoring. Systems must then use these monthly average concentrations, rather than individual sample concentrations, in the applicable calculation for bin classification.

b. Determination of bin classification.

(1) First monitoring round. A system must determine the bin classification from Table 3, using its calculated bin concentration from 43.11(5)“a.”

Table 3: Bin Classification Table

| System Type | <i>Cryptosporidium</i> Concentration, in oocysts/L | Bin Classification |
|--|--|--------------------|
| Systems required to monitor for <i>Cryptosporidium</i> under 43.11(3)“b”(1) or 43.11(3)“b”(2)“3” | Fewer than 0.075 oocysts/L | Bin 1 |
| | Between 0.075 and fewer than 1.0 oocysts/L | Bin 2 |
| | Between 1.0 and fewer than 3.0 oocysts/L | Bin 3 |
| | 3.0 oocysts/L or greater | Bin 4 |
| Systems serving fewer than 10,000 and not required to monitor for <i>Cryptosporidium</i> , pursuant to 43.11(3)“b”(2)“1” | Not applicable | Bin 1 |

(2) Second monitoring round. Following completion of the second round of source water monitoring, a system must recalculate its bin concentration and determine its new bin classification, using the same protocols outlined in 43.11(5)“a” and “b.”

c. Reporting bin classification to the department. Within six months of the end of the sampling period, the system must report its bin classification to the department for approval. The report must also include a summary of the source water monitoring data and the calculation procedure used to determine the bin classification.

d. Treatment technique violation. Failure to comply with 43.11(5)“b” and “c” is a violation of the treatment technique requirement.

43.11(6) Additional *Cryptosporidium* treatment requirements. A system must provide the level of additional treatment for *Cryptosporidium* specified in Table 4 based on its bin classification determined in 43.11(5) and according to the schedule in 43.11(7).

a. *Determination of additional Cryptosporidium treatment requirements.* Using Table 4, a system must determine any additional treatment requirements based upon its bin classification. The Bin 1 classification does not require any additional treatment. Bins 2 through 4 require additional *Cryptosporidium* treatment.

Table 4: Additional *Cryptosporidium* Treatment Requirements

| Bin Classification | Treatment Used by the System for Compliance with 43.5, 43.9, and 43.10 | | | |
|--------------------|--|-------------------------|--|-------------------------------------|
| | Conventional filtration (including softening) | Direct filtration | Slow sand or diatomaceous earth filtration | Alternative filtration technologies |
| Bin 1 | No additional treatment | No additional treatment | No additional treatment | No additional treatment |
| Bin 2 | 1-log treatment | 1.5-log treatment | 1-log treatment | At least 4.0-log ¹ |
| Bin 3 | 2-log treatment | 2.5-log treatment | 2-log treatment | At least 5.0-log ¹ |
| Bin 4 | 2.5-log treatment | 3-log treatment | 2.5-log treatment | At least 5.5-log ¹ |

¹The total *Cryptosporidium* removal and inactivation must be at least this value, as determined by the department.

b. *Treatment requirements for Bins 2 through 4.* A system that is classified as Bin 2, 3, or 4 must use one or more of the treatment and management options listed in 43.11(8) to comply with the required additional *Cryptosporidium* treatment. Systems classified as Bins 3 and 4 must achieve at least 1-log of the additional *Cryptosporidium* treatment required by using either one or a combination of the following: bag filters, bank filtration, cartridge filters, chlorine dioxide, membranes, ozone, or UV, as listed in 43.11(9) through 43.11(13).

c. *Treatment technique violation.* Failure by a system in any month to achieve treatment credit by meeting criteria in 43.11(9) through 43.11(13) that is at least equal to the level of treatment required in 43.11(6)“a” is a violation of the treatment technique requirement.

d. *Significant changes to the watershed.* If, after the system’s completion of source water monitoring (either round), the department determines during a sanitary survey or an equivalent source water assessment that significant changes occurred in the system’s watershed that could lead to increased contamination of the source water by *Cryptosporidium*, the system must take actions specified by the department to address the contamination. These actions may include additional source water monitoring and implementing microbial toolbox options listed in 43.11(8).

43.11(7) Schedule for compliance with *Cryptosporidium* treatment requirements. Following the initial bin classification under 43.11(5), systems must provide the level of treatment for *Cryptosporidium* required in 43.11(6), according to the schedule in Table 5. If the bin classification of a system changes following the second round of source water monitoring, the system must provide the level of treatment for *Cryptosporidium* required in 43.11(6), on a schedule approved by the department.

Table 5: *Cryptosporidium* Treatment Compliance Dates

| Schedule | Population Served by System | Compliance Date for <i>Cryptosporidium</i> treatment requirements ¹ |
|----------|------------------------------|--|
| 1 | At least 100,000 people | April 1, 2012 |
| 2 | From 50,000 to 99,999 people | October 1, 2012 |
| 3 | From 10,000 to 49,999 people | October 1, 2013 |
| 4 | Fewer than 10,000 people | October 1, 2014 |

¹The department may allow up to an additional two years for compliance with the treatment requirement if the system must make capital improvements.

43.11(8) Microbial toolbox options for meeting *Cryptosporidium* treatment requirements. Systems receive the treatment credits listed in Table 6 by meeting the conditions for microbial toolbox options

described in 43.11(9) through 43.11(13). Systems apply these treatment credits to meet the treatment requirements in 43.11(6). Table 6 summarizes options in the microbial toolbox.

Table 6: Microbial Toolbox Summary Table: Options, Treatment Credits, and Criteria

| Toolbox Option | Specific Criteria Rule | <i>Cryptosporidium</i> treatment credit with design and implementation criteria |
|--|------------------------|--|
| Source Protection and Management Toolbox Options | | |
| Watershed control program | 43.11(9) | 0.5-log credit for department-approved program comprising required elements, annual program status report to department, and regular watershed survey. |
| Alternative source/intake management | 43.11(9) "b" | No prescribed credit. Systems may conduct simultaneous monitoring for treatment bin classification at alternative intake locations or under alternative intake management strategies. |
| Prefiltration Toolbox Options | | |
| Presedimentation basin with coagulation | 43.11(10) "a" | 0.5-log credit during any month that presedimentation basins achieve a monthly mean reduction of 0.5-log or greater in turbidity or alternative department-approved performance criteria. To be eligible, basins must be operated continuously with coagulant addition and all plant flow must pass through the basins. |
| Two-stage lime softening | 43.11(10) "b" | 0.5-log credit for two-stage softening where chemical addition and hardness precipitation occur in both stages. All plant flow must pass through both stages. Single-stage softening is credited as equivalent to conventional treatment. |
| Bank filtration | 43.11(10) "c" | 0.5-log credit for 25-foot setback; 1.0-log credit for 50-foot setback; aquifer must be unconsolidated sand containing at least 10 percent fines; average turbidity in wells must be less than 1 NTU. A system using a well followed by filtration when conducting source water monitoring must sample the well to determine bin classification and is not eligible for additional credit. |
| Treatment Performance Toolbox Options | | |
| Combined filter performance | 43.11(11) "a" | 0.5-log credit for combined filter effluent turbidity less than or equal to 0.15 NTU in at least 95 percent of measurements each month. |
| Individual filter performance | 43.11(11) "b" | 0.5-log credit (in addition to the 0.5-log combined filter performance credit) if individual filter effluent turbidity is less than or equal to 0.15 NTU in at least 95 percent of samples each month in each filter and is never greater than 0.3 NTU in two consecutive measurements in any filter. |
| Demonstration of performance | 43.11(11) "c" | Credit awarded to unit process or treatment train based on a demonstration to the department with a department-approved protocol. |
| Additional Filtration Toolbox Options | | |
| Bag or cartridge filters (individual filters) | 43.11(12) "a" | Up to 2-log credit based on the removal efficiency demonstrated during challenge testing with a 1.0-log factor of safety. |

| Toolbox Option | Specific Criteria Rule | <i>Cryptosporidium</i> treatment credit with design and implementation criteria |
|--------------------------------------|------------------------|---|
| Bag or cartridge filters (in series) | 43.11(12)“a” | Up to 2.5-log credit based on the removal efficiency demonstrated during challenge testing with a 0.5-log factor of safety. |
| Membrane filtration | 43.11(12)“b” | Log credit equivalent to removal efficiency demonstrated in challenge test for device if supported by direct integrity testing. |
| Second-stage filtration | 43.11(12)“c” | 0.5-log credit for second separate granular media filtration stage if treatment train includes coagulation prior to first filter. |
| Slow sand filtration | 43.11(12)“d” | 2.5-log credit as a secondary filtration step; 3.0-log credit as a primary filtration process. No prior chlorination for either option. |
| Inactivation Toolbox Options | | |
| Chlorine dioxide | 43.11(13) | Log credit based on measured CT in relation to CT table. |
| Ozone | 43.11(13) | Log credit based on measured CT in relation to CT table. |
| Ultraviolet light (UV) | 43.11(13) | Log credit based on validated UV dose in relation to UV dose table; reactor validation testing required to establish UV dose and associated operating conditions. |

43.11(9) Source toolbox components.

a. Watershed control program. Systems receive 0.5-log *Cryptosporidium* treatment credit for implementing a watershed control program that meets the requirements of this paragraph.

(1) Notification. Systems that intend to apply for the watershed control program credit must notify the department of this intent no later than two years prior to the treatment compliance date in 43.11(7) applicable to the system.

(2) Proposed watershed control plan. Systems must submit to the department a proposed watershed control plan no later than one year before the applicable treatment compliance date in 43.11(7). The department must approve the watershed control plan for the system to receive watershed control program treatment credit. The watershed control plan must include the following elements:

1. Identification of an “area of influence” outside of which the likelihood of *Cryptosporidium* or fecal contamination affecting the treatment plant intake is not significant. This is the area to be evaluated in future watershed surveys under 43.11(9)“a”(5)“2.”

2. Identification of both potential and actual sources of *Cryptosporidium* contamination and an assessment of the relative impact of these sources on the system’s source water quality.

3. An analysis of the effectiveness and feasibility of control measures that could reduce *Cryptosporidium* loading from sources of contamination to the system’s source water.

4. A statement of goals and specific actions the system will undertake to reduce source water *Cryptosporidium* levels. The plan must explain how the actions are expected to contribute to specific goals, identify watershed partners and their roles, identify resource requirements and commitments, and include a schedule for plan implementation with deadlines for completing specific actions identified in the plan.

(3) Existing watershed control programs. Systems with watershed control programs that were in place on January 5, 2006, are eligible to seek this credit. The systems’ watershed control plans must meet the criteria in 43.11(9)“a”(2) and must specify ongoing and future actions that will reduce source water *Cryptosporidium* levels.

(4) Department response to submitted plan. If the department does not respond to a system regarding approval of a watershed control plan submitted under this subrule and the system meets the other requirements of this subrule, the watershed control program will be considered approved and

0.5-log *Cryptosporidium* treatment credit will be awarded unless and until the department subsequently withdraws such approval.

(5) System requirements to maintain 0.5-log credit. Systems must complete the following actions to maintain the 0.5-log credit.

1. Submit an annual watershed control program status report to the department. The annual watershed control program status report must describe the system's implementation of the approved plan and assess the adequacy of the plan to meet its goals. The plan must explain how the system is addressing any shortcomings in plan implementation, including those previously identified by the department or as a result of the watershed survey conducted under 43.11(9) "a"(5) "2." It must also describe any significant changes that have occurred in the watershed since the last watershed sanitary survey. If a system determines during implementation that making a significant change to its approved watershed control program is necessary, the system must notify the department prior to making any such changes. If any change is likely to reduce the level of source water protection, the system must also list in its notification the actions the system will take to mitigate this effect.

2. Undergo a watershed sanitary survey every three years for community water systems and every five years for noncommunity water systems and submit the survey report to the department. The survey must be conducted according to department guidelines and by persons acceptable to the department.

- The watershed sanitary survey must meet the following criteria: encompass the region identified in the department-approved watershed control plan as the area of influence; assess the implementation of actions to reduce source water *Cryptosporidium* levels; and identify any significant new sources of *Cryptosporidium*.

- If the department determines that significant changes may have occurred in the watershed since the previous watershed sanitary survey, systems must undergo another watershed sanitary survey by the date specified by the department, which may be earlier than the regular schedule of a three- or five-year frequency.

3. The system must make the watershed control plan, annual status reports, and watershed sanitary survey reports available to the public upon request. These documents must be in a plain language style and include criteria by which to evaluate the success of the program in achieving plan goals. The department may approve systems to withhold portions of an annual status report, watershed control plan, and watershed sanitary survey from the public, based on water supply security considerations.

(6) Withdrawal of watershed control program treatment credit. If the department determines that a system is not carrying out the approved watershed control plan, the department may withdraw the watershed control program treatment credit.

b. Alternative source. A system may conduct source water monitoring that reflects a different intake location (either in the same source or for an alternate source) or a different procedure for the timing or level of withdrawal from the source (alternative source monitoring). If the department approves, a system may determine its bin classification under 43.11(5) based on alternative source monitoring results.

(1) Systems conducting alternative source monitoring must also monitor their current plan intake concurrently, as described in 43.11(3).

(2) Alternative source monitoring must meet the requirements for source monitoring to determine bin classification, as described in 43.11(3). Systems must report to the department the alternative source monitoring results and provide supporting information documenting the operating conditions under which the samples were collected.

(3) If a system determines its bin classification under 43.11(5) using alternative source monitoring results that reflect a different intake location or a different procedure for managing the timing or level of withdrawal from the source, the system must relocate the intake or permanently adopt the withdrawal procedure, as applicable, no later than the applicable treatment compliance date in 43.11(7).

43.11(10) Prefiltration treatment toolbox components.

a. Presedimentation. Systems receive 0.5-log *Cryptosporidium* treatment credit for a presedimentation basin during any month the process meets the criteria in this paragraph.

(1) The presedimentation basin must be in continuous operation and must treat the entire plant flow taken from a surface water or influenced groundwater source.

- (2) The system must continuously add a coagulant to the presedimentation basin.
- (3) The presedimentation basin must achieve either of the following performance criteria:
 1. Demonstrates at least 0.5-log mean reduction of influent turbidity. This reduction must be determined using daily turbidity measurements in the presedimentation process influent and effluent and must be calculated as follows: $\text{LOG}_{10}(\text{monthly mean of daily influent turbidity}) - \text{LOG}_{10}(\text{monthly mean of daily effluent turbidity})$.
 2. Complies with department-approved performance criteria that demonstrate at least 0.5-log mean removal of micron-sized particulate material through the presedimentation process.
 - b. *Two-stage lime softening.* Systems receive an additional 0.5-log *Cryptosporidium* treatment credit for a two-stage lime softening plant if chemical addition and hardness precipitation occur in two separate and sequential softening stages prior to filtration. Both softening stages must treat the entire plant flow taken from a surface water or influenced groundwater source.
 - c. *Bank filtration.* Systems receive *Cryptosporidium* treatment credit for bank filtration that serves as pretreatment to a filtration plant by meeting the criteria in this paragraph. Systems using bank filtration when they begin source water monitoring under 43.11(3)“a” must collect samples as described in 43.11(3)“d”(3) and are not eligible for this credit.
 - (1) Treatment credit. Wells with a groundwater flow path of at least 25 feet receive 0.5-log treatment credit; wells with a groundwater flow path of at least 50 feet receive 1.0-log treatment credit. The groundwater flow path must be determined as specified in 43.11(10)“c”(4).
 - (2) Granular aquifers only. Only wells in granular aquifers are eligible for treatment credit. Granular aquifers are those comprised of sand, clay, silt, rock fragments, pebbles or larger particles, and minor cement. A system must characterize the aquifer at the well site to determine aquifer properties. Systems must extract a core from the aquifer and demonstrate that in at least 90 percent of the core length, grains less than 1.0 mm in diameter constitute at least 10 percent of the core material.
 - (3) Horizontal and vertical wells only. Only horizontal and vertical wells are eligible for treatment credit.
 - (4) Measurement of groundwater flow path. For vertical wells, the groundwater flow path is the measured distance from the edge of the surface water body under high flow conditions (determined by the 100-year floodplain elevation boundary or by the floodway, as defined in Federal Emergency Management Agency flood hazard maps) to the well screen. For horizontal wells, the groundwater flow path is the measured distance from the bed of the river under normal flow conditions to the closest horizontal well lateral screen.
 - (5) Turbidity monitoring at the wellhead. Systems must monitor each wellhead for turbidity at least once every four hours while the bank filtration process is in operation. If monthly average turbidity levels, based on daily maximum values in the well, exceed 1 NTU, the system must report this result to the department and conduct an assessment within 30 days to determine the cause of the high turbidity levels in the well. If the department determines that microbial removal has been compromised, the department may revoke treatment credit until the system implements corrective actions approved by the department to remediate the problem.
 - (6) Springs and infiltration galleries. This treatment credit is not eligible for springs and infiltration galleries. Springs and infiltration galleries are eligible for credit through demonstration of performance study under 43.11(11)“c.”
 - (7) Bank filtration demonstration of performance. The department may approve *Cryptosporidium* treatment credit for bank filtration based on a demonstration of performance study that meets the criteria in this subparagraph. This treatment credit may be greater than 1.0-log and may be awarded to bank filtration that does not meet the criteria in 43.11(10)“c”(1) to (5).
 1. The study must follow a protocol approved by the department and must involve the collection of data on the removal of *Cryptosporidium* or a surrogate for *Cryptosporidium* and related hydrogeologic and water quality parameters during the full range of operating conditions.

2. The study must include sampling both from the production well(s) and from monitoring wells that are screened and located along the shortest flow path between the surface water source and the production well(s).

43.11(11) Treatment performance toolbox components. This option pertains to physical treatment processes.

a. Combined filter performance. Systems using conventional filtration treatment or direct filtration treatment receive an additional 0.5-log *Cryptosporidium* treatment credit during any month the system meets the criteria in this paragraph. Combined filter effluent (CFE) turbidity must be less than or equal to 0.15 NTU in at least 95 percent of the measurements. Turbidity must be measured as described in 43.5(4) and, if applicable, 43.10(4).

b. Individual filter performance. Systems using conventional filtration treatment or direct filtration treatment receive 0.5-log *Cryptosporidium* treatment credit during any month the system meets the criteria in this paragraph, which can be in addition to the CFE 0.5-log credit from 43.11(11)“a.” Compliance with these criteria must be based on individual filter turbidity monitoring as described in 43.9(4) or 43.10(5), as appropriate.

(1) The filtered water turbidity for each individual filter must be less than or equal to 0.15 NTU in at least 95 percent of the measurements recorded each month.

(2) No individual filter may have a measured turbidity greater than 0.3 NTU in two consecutive measurements taken 15 minutes apart.

(3) Any system that has received treatment credit for individual filter performance and fails to meet the requirements of 43.11(11)“b”(2) and (3) during any month shall not receive a treatment technique violation under 43.11(6) if the department determines the following:

1. The failure was due to unusual and short-term circumstances that could not reasonably be prevented through optimizing the treatment plant design, operation, and maintenance.

2. The system has experienced no more than two such failures in any calendar year.

c. Demonstration of performance. The department may approve *Cryptosporidium* treatment credit for drinking water treatment processes based on a demonstration of performance study that meets the criteria in this paragraph. This treatment credit may be greater than or less than the prescribed treatment credits in 43.11(6) or 43.11(10) through 43.11(13) and may be awarded to treatment processes that do not meet the criteria for the prescribed credits.

(1) Systems cannot receive the prescribed treatment credit for any toolbox option in 43.11(10) through 43.11(13) if that toolbox option is included in a demonstration of performance study for which treatment credit is awarded under this paragraph.

(2) The demonstration of performance study must follow a department-approved protocol and must demonstrate the level of *Cryptosporidium* reduction the treatment process will achieve under the full range of expected operating conditions for the system.

(3) Approval by the department must be in writing and may include monitoring and treatment performance criteria that the system must demonstrate and report on an ongoing basis to remain eligible for the treatment credit. The department may designate such criteria where necessary to verify that the conditions under which the demonstration of performance credit was approved are maintained during routine operation.

43.11(12) Additional filtration toolbox components.

a. Bag and cartridge filters. By meeting the criteria in this paragraph, systems receive *Cryptosporidium* treatment credit of up to 2.0-log for the use of individual bag or cartridge filters and up to 2.5-log for the use of bag or cartridge filters operated in series. To be eligible for this credit, systems must report the results of challenge testing that meets the requirements of 43.11(12)“a”(2) through 43.11(12)“a”(9) to the department. The filters must treat the entire plant flow taken from a surface water or influenced groundwater source.

(1) The *Cryptosporidium* treatment credit awarded for use of bag or cartridge filters must be based on the removal efficiency demonstrated during challenge testing that is conducted in accordance with the criteria in 43.11(12)“a”(2) through 43.11(12)“a”(9). A safety factor equal to 1-log for individual bag or cartridge filters and 0.5-log for bag or cartridge filters in series must be applied to challenge testing

results to determine removal credit. Systems may use results from challenge testing conducted prior to January 5, 2006, if the prior testing was consistent with the criteria specified in this paragraph.

(2) Challenge testing must be performed on full-scale bag or cartridge filters, and the associated filter housing or pressure vessel, that are identical in material and construction to the filters and housings the system will use for removal of *Cryptosporidium*. Bag or cartridge filters must be challenge tested in the same configuration that the system will use, either as individual filters or as a series configuration of filters.

(3) Challenge testing must be conducted using *Cryptosporidium* or a surrogate that is removed no more efficiently than *Cryptosporidium*. The microorganism or surrogate used during challenge testing is referred to as the challenge particulate. The concentration of the challenge particulate must be determined using a method capable of discretely quantifying the specific microorganisms or surrogate used in the test; gross measurements such as turbidity shall not be used.

(4) The maximum feed water concentration that can be used during a challenge test must be based on the detection limit of the challenge particulate in the filtrate (i.e., filtrate detection limit) and must be calculated using this equation:

$$\text{Maximum Feed Water Concentration} = 10,000 \times \text{Filtrate Detection Limit}$$

(5) Challenge testing must be conducted at the maximum design flow rate for the filter as specified by the manufacturer.

(6) Each filter evaluated must be tested for a duration sufficient to reach 100 percent of the terminal pressure drop, which thereby establishes the maximum pressure drop under which the filter may be used to comply with the requirements of this paragraph.

(7) Removal efficiency of a filter must be determined from the results of the challenge test and expressed in terms of log removal values using the following equation:

$$\text{LRV} = \text{LOG}_{10}(C_f) - \text{LOG}_{10}(C_p)$$

Where:

LRV = log removal value demonstrated during challenge test;

C_f = the feed concentration measured during the challenge test; and

C_p = the filtrate concentration measured during the challenge test.

Equivalent units must be used for the feed and filtrate concentrations. If the challenge particulate is not detected in the filtrate, the term C_p must be set equal to the detection limit.

(8) Each filter tested must be challenged with the challenge particulate during three periods over the filtration cycle: within two hours of start-up of a new filter; when the pressure drop is between 45 and 55 percent of the terminal pressure drop; and at the end of the cycle after the pressure drop has reached 100 percent of the terminal pressure drop. An LRV must be calculated for each of these challenge periods for each filter tested. The LRV for the filter ($\text{LRV}_{\text{filter}}$) must be assigned the value of the minimum LRV observed during the three challenge periods for that filter.

(9) If fewer than 20 filters are tested, the overall removal efficiency for the filter product line must be set equal to the lowest $\text{LRV}_{\text{filter}}$ among the filters tested. If 20 or more filters are tested, the overall removal efficiency for the filter product line must be set equal to the tenth percentile of the set of $\text{LRV}_{\text{filter}}$ values for the various filters tested. The percentile is defined by $[i/(n+1)]$ where “i” is the rank of “n” individual data points ordered lowest to highest. If necessary, the tenth percentile may be calculated using linear interpolation.

(10) If a previously tested filter is modified in a manner that could change the removal efficiency of the filter product line, challenge testing to demonstrate the removal efficiency of the modified filter must be conducted and submitted to the department.

b. Membrane filtration.

(1) Systems receive *Cryptosporidium* treatment credit for using membrane filtration that meets the criteria of this paragraph. Systems using membrane cartridge filters that meet the definition of membrane filtration in 567—40.2(455B) are eligible for this credit. The level of treatment credit a system receives is equal to the lower of the values determined under the following two paragraphs:

1. The removal efficiency demonstrated during challenge testing conducted under the criteria in 43.11(12)“b”(2).

2. The maximum removal efficiency that can be verified through direct integrity testing used with the membrane filtration process under the conditions in 43.11(12)“b”(3).

(2) Challenge testing. The membrane used by the system must undergo challenge testing to evaluate removal efficiency, and the system must report the results of challenge testing to the department. Challenge testing must be conducted according to the criteria listed in this subparagraph. Systems may use data from challenge testing conducted prior to January 5, 2006, if the prior testing was consistent with the criteria listed in this subparagraph.

1. Challenge testing must be conducted on either a full-scale membrane module, identical in material and construction to the membrane modules used in the system’s treatment facility, or a smaller-scale membrane module, identical in material and similar in construction to the full-scale module. A module is defined as the smallest component of a membrane unit in which a specific membrane surface area is housed in a device with a filtrate outlet structure.

2. Challenge testing must be conducted using *Cryptosporidium* oocysts or a surrogate that is removed no more efficiently than *Cryptosporidium* oocysts. The organisms or surrogate used during challenge testing is referred to as the challenge particulate. The concentration of the challenge particulate, in both the feed and filtrate water, must be determined using a method capable of discretely quantifying the specific challenge particulate used in the test; gross measurements such as turbidity shall not be used.

3. The maximum feed water concentration that can be used during a challenge test is based on the detection limit of the challenge particulate in the filtrate and must be determined according to the following equation:

$$\text{Maximum Feed Water Concentration} = 3,160,000 \times \text{Filtrate Detection Limit}$$

4. Challenge testing must be conducted under representative hydraulic conditions at the maximum design flux and maximum design process recovery specified by the manufacturer for the membrane module. Flux is defined as the throughput of a pressure-driven membrane process expressed as flow per unit of membrane area. Recovery is defined as the volumetric percent of feed water that is converted to filtrate over the course of an operating cycle uninterrupted by events such as chemical cleaning or a solids removal process (i.e., backwashing).

5. Removal efficiency of a membrane module must be calculated from the challenge test results and expressed as a log removal value according to the following equation:

$$\text{LRV} = \text{LOG}_{10}(C_f) - \text{LOG}_{10}(C_p)$$

Where:

LRV = log removal value demonstrated during challenge test;

C_f = the feed concentration measured during the challenge test; and

C_p = the filtrate concentration measured during the challenge test.

Equivalent units must be used for the feed and filtrate concentrations. If the challenge particulate is not detected in the filtrate, the term C_p must be set equal to the detection limit for the purpose of calculating the LRV. An LRV must be calculated for each membrane module evaluated during the challenge test.

6. The removal efficiency of a membrane filtration process demonstrated during challenge testing must be expressed as a log removal value ($\text{LRV}_{C\text{-Test}}$). If fewer than 20 modules are tested, then $\text{LRV}_{C\text{-Test}}$ is equal to the lowest of the representative LRVs among the modules tested. If 20 or more modules are tested, then $\text{LRV}_{C\text{-Test}}$ is equal to the tenth percentile of the representative LRVs among the modules tested. The percentile is defined by $[i/(n+1)]$ where “i” is the rank of “n” individual data points ordered lowest to highest. If necessary, the tenth percentile may be calculated using linear interpolation.

7. The challenge test must establish a quality control release value (QCRV) for a nondestructive performance test that demonstrates the *Cryptosporidium* removal capability of the membrane filtration module. In order to verify *Cryptosporidium* removal capability, this performance test must be applied to each production membrane module that was not directly challenge tested but was used by the system.

Production modules that do not meet the established QCRV are not eligible for the treatment credit demonstrated during the challenge test.

8. If a previously tested membrane is modified in a manner that could change the removal efficiency of the membrane or the applicability of the nondestructive performance test and associated QCRV, additional challenge testing to demonstrate the removal efficiency of the modified membrane must be conducted and submitted to the department, along with determination of a new QCRV.

(3) Direct integrity testing. Systems must conduct direct integrity testing in a manner that demonstrates a removal efficiency equal to or greater than the removal credit awarded for the membrane filtration process and meets the requirements described in this subparagraph. A direct integrity test is defined as a physical test applied to a membrane unit in order to identify and isolate integrity breaches (i.e., one or more leaks that could result in contamination of the filtrate).

1. The direct integrity test must be independently applied to each membrane unit in service. A membrane unit is defined as a group of membrane modules that share common valving that allows the unit to be isolated from the rest of the system for the purpose of integrity testing or other maintenance.

2. The direct integrity method must have a resolution of 3 micrometers or less, where resolution is defined as the size of the smallest integrity breach that contributes to a response from the direct integrity test.

3. The direct integrity test must have a sensitivity sufficient to verify the log treatment credit awarded by the department for the membrane filtration process, where sensitivity is defined as the maximum log removal value that can be reliably verified by a direct integrity test. Sensitivity must be determined using the approach in either of the following paragraphs as applicable to the type of direct integrity test the system uses.

- For direct integrity tests using applied pressure or vacuum, the direct integrity test sensitivity must be calculated according to the following equation:

$$LRV_{DIT} = \text{LOG}_{10} [Q_p / (\text{VCF} \times Q_{\text{breach}})]$$

Where:

LRV_{DIT} = the sensitivity of the direct integrity test;

Q_p = total design filtrate flow from the membrane unit;

Q_{breach} = flow of water from an integrity breach associated with the smallest integrity test response that can be reliably measured; and

VCF = volumetric concentration factor, which is the ratio of the suspended solids concentration on the high-pressure side of the membrane relative to that in the feed water.

- For direct integrity tests using a particulate or molecular marker, the direct integrity test sensitivity must be calculated according to the following equation:

$$LRV_{DIT} = \text{LOG}_{10} (C_f) - \text{LOG}_{10} (C_p)$$

Where:

LRV_{DIT} = the sensitivity of the direct integrity test;

C_f = the typical feed concentration of the marker used in the test; and

C_p = the filtrate concentration of the marker from an integral membrane unit.

4. Systems must establish a control limit within the sensitivity limits of the direct integrity test that is indicative of an integral membrane unit capable of meeting the removal credit awarded by the department.

5. If the result of a direct integrity test exceeds the control limit established under 43.11(12)“b”(3)“4,” the system must remove the membrane unit from service. Systems must conduct a direct integrity test to verify any repairs and may return the membrane unit to service only if the direct integrity test is within the established control limit.

6. Systems must conduct direct integrity testing on each membrane unit at a frequency of not less than once each day that the membrane unit is in operation. The department may approve less frequent testing, based on demonstrated process reliability, the use of multiple barriers effective for *Cryptosporidium*, or reliable process safeguards.

(4) Indirect integrity monitoring. Systems must conduct continuous indirect integrity monitoring on each membrane unit according to the following criteria. Indirect integrity monitoring is defined as monitoring some aspect of filtrate water quality that is indicative of the removal of particulate matter. A system that implements continuous direct integrity testing of membrane units in accordance with the criteria in 43.11(12)“b”(3) is not subject to the requirements for continuous indirect integrity monitoring. Systems must submit a monthly report to the department summarizing all continuous indirect integrity monitoring results triggering direct integrity testing and the corrective action that was taken in each case.

1. Unless the department approves an alternative parameter, continuous indirect integrity monitoring must include continuous filtrate turbidity monitoring.

2. Continuous monitoring must be conducted at a frequency of no less than once every 15 minutes.

3. Continuous monitoring must be separately conducted on each membrane unit.

4. If indirect integrity monitoring includes turbidity and if the filtrate turbidity readings are above 0.15 NTU for a period greater than 15 minutes (i.e., two consecutive 15-minute readings above 0.15 NTU), direct integrity testing must immediately be performed on the associated membrane unit as specified in 43.11(12)“b”(3)“1” through 43.11(12)“b”(3)“5.”

5. If indirect integrity monitoring includes a department-approved alternative parameter and if the alternative parameter exceeds a department-approved control limit for a period greater than 15 minutes, direct integrity testing must immediately be performed on the associated membrane units as specified in 43.11(12)“b”(3)“1” through 43.11(12)“b”(3)“5.”

c. Second-stage filtration. Systems receive 0.5-log *Cryptosporidium* treatment credit for using a separate second stage of filtration that consists of sand, dual media, GAC, or other fine-grain media following granular media filtration if the department approves. To be eligible for this credit, the first stage of filtration must be preceded by a coagulation step and both filtration stages must treat the entire plant flow taken from a surface water or influenced groundwater source. A cap, such as GAC, on a single stage of filtration is not eligible for this credit. The department must approve the treatment credit based on an assessment of the design characteristics of the filtration process.

d. Slow sand filtration (as secondary filter). Systems are eligible to receive 2.5-log *Cryptosporidium* treatment credit for using a slow sand filtration process that follows a separate stage of filtration if both filtration stages treat entire plant flow taken from a surface water or influenced groundwater source and no disinfectant residual is present in the influent water to the slow sand filtration process. The department must base its approval of the treatment credit on an assessment of the design characteristics of the filtration process. This does not apply to treatment credit awarded for slow sand filtration used as a primary filtration process.

43.11(13) Inactivation toolbox components.

a. Calculation of CT values.

(1) CT is the product of the disinfectant contact time (T, in minutes) and disinfectant concentration (C, in milligrams per liter). Systems with treatment credit for chlorine dioxide or ozone under 43.11(13)“b” or “c” must calculate CT at least once each day, with both C and T measured during peak hourly flow as specified in 43.5(4).

(2) Systems with several disinfection segments in sequence may calculate CT for each segment, where a disinfection segment is defined as a treatment unit process with a measureable disinfectant residual level and a liquid volume. Under this approach, systems must add the *Cryptosporidium* CT values in each segment to determine the total CT for the treatment plant.

b. CT values for chlorine dioxide and ozone.

(1) As described in 43.11(13)“a,” systems receive the *Cryptosporidium* treatment credit listed in Table 1 of Appendix B by meeting the corresponding chlorine dioxide CT value for the applicable water temperature.

(2) As described in 43.11(13)“a,” systems receive the *Cryptosporidium* treatment credit listed in Table 2 of Appendix B by meeting the corresponding ozone CT value for the applicable water temperature.

c. Site-specific study. The department may approve alternative chlorine dioxide or ozone CT values to those listed in 43.11(13)“b” on a site-specific basis. The department must base its approval on a site-specific study conducted by the system. The study must follow a department-approved protocol.

d. Ultraviolet light. Systems receive *Cryptosporidium*, *Giardia lamblia*, and virus treatment credits for ultraviolet (UV) light reactors by achieving the corresponding UV dose values shown in Table 3 of Appendix B. Systems must use the following procedures to validate and monitor UV reactors in order to demonstrate that the reactors are achieving a particular UV dose value for treatment credit.

(1) Reactor validation testing. Systems must use UV reactors that have undergone validation testing to determine the operating conditions under which the reactor delivers the required UV dose (i.e., validated operating conditions). These operating conditions must include flow rate, UV intensity as measured by a UV sensor, and UV lamp status.

1. When determining validated operating conditions, systems must account for the following factors: UV absorbance of the water; lamp fouling and aging; measurement uncertainty of on-line sensors; UV dose distributions arising from the velocity profiles through the reactor; failure of UV lamps or other critical system components; and inlet and outlet piping or channel configurations of the UV reactor.

2. Validation testing must include the following: full-scale testing of a reactor that conforms uniformly to the UV reactors used by the system and inactivation of a test microorganism whose dose response characteristics have been quantified with a low-pressure mercury vapor lamp.

3. The department may approve an alternative approach to validation testing.

(2) Reactor monitoring.

1. Systems must monitor their UV reactors to determine if the reactors are operating within validated conditions, as determined under 43.11(13)“d”(1). This monitoring must include UV sensor, flow rate, lamp status, and other parameters the department designates based on UV reactor operation. Systems must verify the calibration of UV sensors and must recalibrate sensors in accordance with a protocol approved by the department.

2. To receive treatment credit for UV light, systems must treat at least 95 percent of the water delivered to the public during each month by UV reactors operating within validated conditions for the required UV dose. Systems must demonstrate compliance with this condition by the monitoring required under 43.11(13)“d”(2)“1.”

43.11(14) Reporting requirements.

a. Sampling schedules and monitoring results. Systems must report source water sampling schedules and monitoring results under 43.11(3)“c” and 43.11(3)“e,” unless the systems notify the department that they will not conduct source water monitoring due to meeting the criteria of 5.5-log treatment for *Cryptosporidium* under 43.11(3)“a.”

b. Cryptosporidium bin classification. Systems must report their *Cryptosporidium* bin classification determined under 43.11(5).

c. Disinfection profiles and benchmarks. Systems must report disinfection profiles and benchmarks to the department as described in 43.11(4)“a” and 43.11(4)“b” prior to making a significant change in disinfection practice.

d. Microbial toolbox options. Systems must report to the department in accordance with Table 7 for any microbial toolbox options used to comply with treatment requirements under 43.11(6).

Table 7: Microbial Toolbox Reporting Requirements

| Toolbox Option | Systems must submit this information | Information must be submitted on this schedule |
|---|---|---|
| 1. Watershed control program | Notice of intention to develop a new or continue an existing watershed control program | No later than two years before the applicable treatment compliance date in 43.11(7) |
| | Watershed control plan | No later than one year before the applicable treatment compliance date in 43.11(7) |
| | Annual watershed control program status report | Every 12 months, beginning one year after the applicable treatment compliance date in 43.11(7) |
| | Watershed sanitary survey report | - For community water systems, every three years beginning three years after the applicable treatment compliance date in 43.11(7) - For noncommunity water systems, every five years beginning five years after the applicable treatment compliance date in 43.11(7) |
| 2. Alternative source/intake management | Verification that system has relocated the intake or adopted the intake withdrawal procedure reflected in monitoring results | No later than the applicable treatment compliance date in 43.11(7) |
| 3. Presedimentation | Monthly verification of the following: - Continuous basin operation - Treatment of 100 percent of the flow - Continuous addition of a coagulant - At least 0.5-log mean reduction of influent turbidity or compliance with alternative department-approved performance criteria | Monthly reporting within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 4. Two-stage lime softening | Monthly verification of the following: - Chemical addition and hardness precipitation occurred in two separate and sequential softening stages prior to filtration - Both stages treated 100 percent of plant flow | Monthly reporting within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 5. Bank filtration | Initial demonstration of the following: - Unconsolidated, predominantly sandy aquifer - Setback distance of at least 25 feet for 0.5-log credit or 50 feet for 1.0-log credit | No later than the applicable treatment compliance date in 43.11(7) |
| | If monthly average of daily maximum turbidity is greater than 1 NTU, then system must report result and submit an assessment of the cause. | Report within 30 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 6. Combined filter performance | Monthly verification of combined filter effluent (CFE) turbidity levels less than or equal to 0.15 NTU in at least 95 percent of the 4-hour CFE measurements taken each month | Monthly reporting within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |

| Toolbox Option | Systems must submit this information | Information must be submitted on this schedule |
|--------------------------------------|--|---|
| 7. Individual filter performance | Monthly verification of the following: - Individual filter effluent (IFE) turbidity levels less than or equal to 0.15 NTU in at least 95 percent of samples each month in each filter - No individual filter effluent turbidity levels greater than 0.3 NTU in two consecutive readings 15 minutes apart | Monthly reporting within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 8. Demonstration of performance | Results from testing following a department-approved protocol | No later than the applicable treatment compliance date in 43.11(7) |
| | As required by the department, monthly verification of operation within conditions of department approval for demonstration of performance credit | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 9. Bag filters and cartridge filters | Demonstration that the following criteria are met: - Process meets the definition of bag or cartridge filtration - Removal efficiency established through challenge testing that meets criteria in this subpart | No later than the applicable treatment compliance date in 43.11(7) |
| | Monthly verification that 100 percent of plant flow was filtered | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 10. Membrane filtration | Results of verification testing demonstrating the following: - Removal efficiency established through challenge testing that meets criteria - Integrity test method and parameters, including resolution, sensitivity, test frequency, control limits, and associated baseline | No later than the applicable treatment compliance date in 43.11(7) |
| | Monthly report summarizing the following: - All direct integrity tests above the control limit - If applicable, any turbidity or alternative department-approved indirect integrity monitoring results triggering direct integrity testing and the corrective action that was taken | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 11. Second-stage filtration | Monthly verification that 100 percent of flow was filtered through both stages and that first stage was preceded by coagulation step | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |

| Toolbox Option | Systems must submit this information | Information must be submitted on this schedule |
|--|---|---|
| 12. Slow sand filtration as a secondary filter | Monthly verification that both a slow sand filter and a preceding separate stage of filtration treated 100 percent of the flow from surface or influenced groundwater sources | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 13. Chlorine dioxide | Summary of CT values for each day as described in 43.11(13) | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 14. Ozone | Summary of CT values for each day as described in 43.11(13) | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |
| 15. Ultraviolet light (UV) | Validation test results demonstrating operating conditions that achieve required UV dose | No later than the applicable treatment compliance date in 43.11(7) |
| | Monthly report summarizing the percentage of water entering the distribution system that was not treated by UV reactors operating within validated conditions for the required dose as specified in 43.11(13) "d" | Within 10 days following the month in which the monitoring was conducted, beginning on the applicable treatment compliance date in 43.11(7) |

43.11(15) Record-keeping requirements.

a. Source water monitoring records. Systems must keep results from the initial round of source water monitoring under 43.11(3) "a" and the second round of source water monitoring under 43.11(3) "b" until three years after bin classification under 43.11(5) for the particular round of monitoring.

b. Systems meeting 5.5-log treatment for Cryptosporidium. Systems must keep for three years records of any notification to the department that the systems will meet the 5.5-log *Cryptosporidium* treatment requirements and avoid source water monitoring.

c. Microbial toolbox treatment monitoring records. Systems must keep the results of treatment monitoring associated with microbial toolbox options under 43.11(8) through 43.11(13) for three years. [ARC 9915B, IAB 12/14/11, effective 1/18/12; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—43.12(455B) Optimization goals.

43.12(1) Turbidity optimization goals. Surface water and IGW systems must meet the requirements listed in 567—43.5(455B), 567—43.9(455B), and 567—43.10(455B). To encourage operational optimization, the department has adopted the following goals for systems using surface water or influenced groundwater and that wish to pursue the optimization of their existing treatment processes. These goals are voluntary. Data collected for optimization purposes will not be used to determine compliance with the requirements in 567—43.5(455B), 567—43.9(455B), 567—43.10(455B), or 567—43.11(455B) unless the optimization data are identical to the compliance data.

a. Sedimentation performance goals. The sedimentation performance goals are based upon the average annual raw water turbidity levels.

(1) When the annual average raw water turbidity is less than or equal to 10 NTU over the course of the calendar year, the turbidity should be less than or equal to 1 NTU in at least 95 percent of measurements based on the maximum daily value of readings taken at least once every four hours from each sedimentation basin while the plant is operating.

(2) When the annual average raw water turbidity is more than 10 NTU over the course of the calendar year, the turbidity should be less than or equal to 2 NTU in at least 95 percent of measurements based on the maximum daily value of readings taken at least once every four hours from each sedimentation basin while the plant is operating.

b. Individual filter performance goals. The individual filter performance goals depend upon the system's capability of filtering to waste.

(1) For systems that have the capability of filtering to waste, the individual filter turbidity should be less than or equal to 0.10 NTU in at least 95 percent of measurements over the course of the calendar year, based on the daily maximum value of readings recorded at least once per minute while the plant is in operation. The maximum individual filter turbidity must not exceed 0.30 NTU at any time. The filter must return to service with a turbidity of 0.10 NTU or less.

(2) For systems that do not have the capability of filtering to waste, the individual filter turbidity should be less than or equal to 0.10 NTU in at least 95 percent of measurements over the course of the calendar year, excepting the 15 minutes following the completion of the backwash process, based on the daily maximum value of readings recorded at least once per minute while the plant is in operation. The maximum individual filter turbidity must not exceed 0.30 NTU following backwash and must return to a level at or below 0.10 NTU within 15 minutes of returning the filter to service.

c. Combined filter performance goal. The combined filter performance goal has two components:

(1) Combined filter effluent turbidity should be less than or equal to 0.10 NTU in at least 95 percent of measurements over the course of the calendar year, based on daily maximum value of readings recorded at least once per minute while the plant is operating.

(2) The maximum individual filter turbidity must not exceed 0.30 NTU at any time.

43.12(2) Disinfection optimization goals. Reserved.

APPENDIX A: CT_{99,9} TABLES FOR DISINFECTION PROFILINGTABLE 1: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Free Chlorine at 0.5°C or Lower¹

| Free Residual Chlorine, mg/L | pH | | | | | | |
|------------------------------|------|-----|-----|-----|-----|-----|------|
| | ≤6.0 | 6.5 | 7.0 | 7.5 | 8.0 | 8.5 | ≤9.0 |
| ≤0.4 | 137 | 163 | 195 | 237 | 277 | 329 | 390 |
| 0.6 | 141 | 168 | 200 | 239 | 286 | 342 | 407 |
| 0.8 | 145 | 172 | 205 | 246 | 295 | 354 | 422 |
| 1.0 | 148 | 176 | 210 | 253 | 304 | 365 | 437 |
| 1.2 | 152 | 180 | 215 | 259 | 313 | 376 | 451 |
| 1.4 | 155 | 184 | 221 | 266 | 321 | 387 | 464 |
| 1.6 | 157 | 189 | 226 | 273 | 329 | 397 | 477 |
| 1.8 | 162 | 193 | 231 | 279 | 338 | 407 | 489 |
| 2.0 | 165 | 197 | 236 | 286 | 346 | 417 | 500 |
| 2.2 | 169 | 201 | 242 | 297 | 353 | 426 | 511 |
| 2.4 | 172 | 205 | 247 | 298 | 361 | 435 | 522 |
| 2.6 | 175 | 209 | 252 | 304 | 368 | 444 | 533 |
| 2.8 | 178 | 213 | 257 | 310 | 375 | 452 | 543 |
| 3.0 | 181 | 217 | 261 | 316 | 382 | 460 | 552 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated pH values may be determined by linear interpolation. Any CT values between the indicated temperatures of different tables may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature and at the higher pH.

TABLE 2: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Free Chlorine at 5.0°C¹

| Free Residual Chlorine, mg/L | pH | | | | | | |
|------------------------------|------|-----|-----|-----|-----|-----|------|
| | ≤6.0 | 6.5 | 7.0 | 7.5 | 8.0 | 8.5 | ≤9.0 |
| ≤0.4 | 97 | 117 | 139 | 166 | 198 | 236 | 279 |
| 0.6 | 100 | 120 | 143 | 171 | 204 | 244 | 291 |
| 0.8 | 103 | 122 | 146 | 175 | 210 | 252 | 301 |
| 1.0 | 105 | 125 | 149 | 179 | 216 | 260 | 312 |
| 1.2 | 107 | 127 | 152 | 183 | 221 | 267 | 320 |
| 1.4 | 109 | 130 | 155 | 187 | 227 | 274 | 329 |
| 1.6 | 111 | 132 | 158 | 192 | 232 | 281 | 337 |
| 1.8 | 114 | 135 | 162 | 196 | 238 | 287 | 345 |
| 2.0 | 116 | 138 | 165 | 200 | 243 | 294 | 353 |
| 2.2 | 118 | 140 | 169 | 204 | 248 | 300 | 361 |
| 2.4 | 120 | 143 | 172 | 209 | 253 | 306 | 368 |
| 2.6 | 122 | 146 | 175 | 213 | 258 | 312 | 375 |
| 2.8 | 124 | 148 | 178 | 217 | 263 | 318 | 382 |
| 3.0 | 126 | 151 | 182 | 221 | 268 | 324 | 389 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated pH values may be determined by linear interpolation. Any CT values between the indicated temperatures of different tables may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature and at the higher pH.

TABLE 3: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Free Chlorine at 10.0°C¹

| Free Residual Chlorine, mg/L | pH | | | | | | |
|------------------------------|------|-----|-----|-----|-----|-----|------|
| | ≤6.0 | 6.5 | 7.0 | 7.5 | 8.0 | 8.5 | ≤9.0 |
| ≤0.4 | 73 | 88 | 104 | 125 | 149 | 177 | 209 |
| 0.6 | 75 | 90 | 107 | 128 | 153 | 183 | 218 |
| 0.8 | 78 | 92 | 110 | 131 | 158 | 189 | 226 |
| 1.0 | 79 | 94 | 112 | 134 | 162 | 195 | 234 |
| 1.2 | 80 | 95 | 114 | 137 | 166 | 200 | 240 |
| 1.4 | 82 | 98 | 116 | 140 | 170 | 206 | 247 |
| 1.6 | 83 | 99 | 119 | 144 | 174 | 211 | 253 |
| 1.8 | 86 | 101 | 122 | 147 | 179 | 215 | 259 |
| 2.0 | 87 | 104 | 124 | 150 | 182 | 221 | 265 |
| 2.2 | 89 | 105 | 127 | 153 | 186 | 225 | 271 |
| 2.4 | 90 | 107 | 129 | 157 | 190 | 230 | 276 |
| 2.6 | 92 | 110 | 131 | 160 | 194 | 234 | 281 |
| 2.8 | 93 | 111 | 134 | 163 | 197 | 239 | 287 |
| 3.0 | 95 | 113 | 137 | 166 | 201 | 243 | 292 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated pH values may be determined by linear interpolation. Any CT values between the indicated temperatures of different tables may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature and at the higher pH.

TABLE 4: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Free Chlorine at 15.0°C¹

| Free Residual Chlorine, mg/L | pH | | | | | | |
|------------------------------|------|-----|-----|-----|-----|-----|------|
| | ≤6.0 | 6.5 | 7.0 | 7.5 | 8.0 | 8.5 | ≤9.0 |
| ≤0.4 | 49 | 59 | 70 | 83 | 99 | 118 | 140 |
| 0.6 | 50 | 60 | 72 | 86 | 102 | 122 | 146 |
| 0.8 | 52 | 61 | 73 | 88 | 105 | 126 | 151 |
| 1.0 | 53 | 63 | 75 | 90 | 108 | 130 | 156 |
| 1.2 | 54 | 64 | 76 | 92 | 111 | 134 | 160 |
| 1.4 | 55 | 65 | 78 | 94 | 114 | 137 | 165 |
| 1.6 | 56 | 66 | 79 | 96 | 116 | 141 | 169 |
| 1.8 | 57 | 68 | 81 | 98 | 119 | 144 | 173 |
| 2.0 | 58 | 69 | 83 | 100 | 122 | 147 | 177 |
| 2.2 | 59 | 70 | 85 | 102 | 124 | 150 | 181 |
| 2.4 | 60 | 72 | 86 | 105 | 127 | 153 | 184 |
| 2.6 | 61 | 73 | 88 | 107 | 129 | 156 | 188 |
| 2.8 | 62 | 74 | 89 | 109 | 132 | 159 | 191 |
| 3.0 | 63 | 76 | 91 | 111 | 134 | 162 | 195 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated pH values may be determined by linear interpolation. Any CT values between the indicated temperatures of different tables may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature and at the higher pH.

TABLE 5: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Free Chlorine at 20.0°C¹

| Free Residual Chlorine, mg/L | pH | | | | | | |
|------------------------------|------|-----|-----|-----|-----|-----|------|
| | ≤6.0 | 6.5 | 7.0 | 7.5 | 8.0 | 8.5 | ≤9.0 |
| ≤0.4 | 36 | 44 | 52 | 62 | 74 | 89 | 105 |
| 0.6 | 38 | 45 | 54 | 64 | 77 | 92 | 109 |
| 0.8 | 39 | 46 | 55 | 66 | 79 | 95 | 113 |
| 1.0 | 39 | 47 | 56 | 67 | 81 | 98 | 117 |
| 1.2 | 40 | 48 | 57 | 69 | 83 | 100 | 120 |
| 1.4 | 41 | 49 | 58 | 70 | 85 | 103 | 123 |
| 1.6 | 42 | 50 | 59 | 72 | 87 | 105 | 126 |
| 1.8 | 43 | 51 | 61 | 74 | 89 | 108 | 129 |
| 2.0 | 44 | 52 | 62 | 75 | 91 | 110 | 132 |
| 2.2 | 44 | 53 | 63 | 77 | 93 | 113 | 135 |
| 2.4 | 45 | 54 | 65 | 78 | 95 | 115 | 138 |
| 2.6 | 46 | 55 | 66 | 80 | 97 | 117 | 141 |
| 2.8 | 47 | 56 | 67 | 81 | 99 | 119 | 143 |
| 3.0 | 47 | 57 | 68 | 83 | 101 | 122 | 146 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated pH values may be determined by linear interpolation. Any CT values between the indicated temperatures of different tables may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature and at the higher pH.

TABLE 6: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Free Chlorine at 25.0°C and Higher¹

| Free Residual Chlorine, mg/L | pH | | | | | | |
|------------------------------|------|-----|-----|-----|-----|-----|------|
| | ≤6.0 | 6.5 | 7.0 | 7.5 | 8.0 | 8.5 | ≤9.0 |
| ≤0.4 | 24 | 29 | 35 | 42 | 50 | 59 | 70 |
| 0.6 | 25 | 30 | 36 | 43 | 51 | 61 | 73 |
| 0.8 | 26 | 31 | 37 | 44 | 53 | 63 | 75 |
| 1.0 | 26 | 31 | 37 | 45 | 54 | 65 | 78 |
| 1.2 | 27 | 32 | 38 | 46 | 55 | 67 | 80 |
| 1.4 | 27 | 33 | 39 | 47 | 57 | 69 | 82 |
| 1.6 | 28 | 33 | 40 | 48 | 58 | 70 | 84 |
| 1.8 | 29 | 34 | 41 | 49 | 60 | 72 | 86 |
| 2.0 | 29 | 35 | 41 | 50 | 61 | 74 | 88 |
| 2.2 | 30 | 35 | 42 | 51 | 62 | 75 | 90 |
| 2.4 | 30 | 36 | 43 | 52 | 63 | 77 | 92 |
| 2.6 | 31 | 37 | 44 | 53 | 65 | 78 | 94 |
| 2.8 | 31 | 37 | 45 | 54 | 66 | 80 | 96 |
| 3.0 | 32 | 38 | 46 | 55 | 67 | 81 | 97 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated pH values may be determined by linear interpolation. Any CT values between the indicated temperatures of different tables may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature and at the higher pH.

TABLE 7: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Chlorine Dioxide and Ozone¹

| Disinfectant | Temperature, °C | | | | | |
|------------------|-----------------|-----|-----|------|------|------|
| | <1 | 5 | 10 | 15 | 20 | ≥25 |
| Chlorine Dioxide | 63 | 26 | 23 | 19 | 15 | 11 |
| Ozone | 2.9 | 1.9 | 1.4 | 0.95 | 0.72 | 0.48 |

¹These CT values achieve greater than a 99.99 percent inactivation of viruses. Any CT values between the indicated temperatures may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature for determining CT_{99,9} values between indicated temperatures.

TABLE 8: CT Values (CT_{99,9}) for 99.9 Percent Inactivation of *Giardia lamblia* Cysts by Chloramines¹

| Disinfectant | Temperature, °C | | | | | |
|--------------|-----------------|------|------|------|------|-----|
| | <1 | 5 | 10 | 15 | 20 | 25 |
| Chloramines | 3800 | 2200 | 1850 | 1500 | 1100 | 750 |

¹These values are for pH values of 6 to 9. These CT values may be assumed to achieve greater than 99.99 percent inactivation of viruses only if chlorine is added and mixed in the water prior to the addition of ammonia. If this condition is not met, the system must demonstrate, based on on-site studies or other information, as approved by the department, that the system is achieving at least 99.99 percent inactivation of viruses. Any CT values between the indicated temperatures may be determined by linear interpolation. If no interpolation is used, use the CT_{99,9} value at the lower temperature for determining CT_{99,9} values between indicated temperatures.

APPENDIX B: CT TABLES FOR *CRYPTOSPORIDIUM* INACTIVATIONTABLE 1: CT Values (mg-min/L) for *Cryptosporidium* Inactivation by Chlorine Dioxide¹

| Log Credit | Water Temperature, °C | | | | | | | | | | |
|------------|-----------------------|------|------|------|------|------|-----|-----|-----|-----|-----|
| | ≤0.5 | 1 | 2 | 3 | 5 | 7 | 10 | 15 | 20 | 25 | 30 |
| 0.25 | 159 | 153 | 140 | 128 | 107 | 90 | 69 | 45 | 29 | 19 | 12 |
| 0.5 | 319 | 305 | 279 | 256 | 214 | 180 | 138 | 89 | 58 | 38 | 24 |
| 1.0 | 637 | 610 | 558 | 511 | 429 | 360 | 277 | 179 | 116 | 75 | 49 |
| 1.5 | 956 | 915 | 838 | 767 | 643 | 539 | 415 | 268 | 174 | 113 | 73 |
| 2.0 | 1275 | 1220 | 1117 | 1023 | 858 | 719 | 553 | 357 | 232 | 150 | 98 |
| 2.5 | 1594 | 1525 | 1396 | 1278 | 1072 | 899 | 691 | 447 | 289 | 188 | 122 |
| 3.0 | 1912 | 1830 | 1675 | 1534 | 1286 | 1079 | 830 | 536 | 347 | 226 | 147 |

¹Systems may use this equation to determine log credit between the indicated values:

$$\text{Log credit} = [0.001506 \times (1.09116)^{\text{Temp}}] \times \text{CT}$$

TABLE 2: CT Values (mg-min/L) for *Cryptosporidium* Inactivation by Ozone¹

| Log Credit | Water Temperature, °C | | | | | | | | | | |
|------------|-----------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|
| | ≤0.5 | 1 | 2 | 3 | 5 | 7 | 10 | 15 | 20 | 25 | 30 |
| 0.25 | 6.0 | 5.8 | 5.2 | 4.8 | 4.0 | 3.3 | 2.5 | 1.6 | 1.0 | 0.6 | 0.39 |
| 0.5 | 12 | 12 | 10 | 9.5 | 7.9 | 6.5 | 4.9 | 3.1 | 2.0 | 1.2 | 0.78 |
| 1.0 | 24 | 23 | 21 | 19 | 16 | 13 | 9.9 | 6.2 | 3.9 | 2.5 | 1.6 |
| 1.5 | 36 | 35 | 31 | 29 | 24 | 20 | 15 | 9.3 | 5.9 | 3.7 | 2.4 |
| 2.0 | 48 | 46 | 42 | 38 | 32 | 26 | 20 | 12 | 7.8 | 4.9 | 3.1 |
| 2.5 | 60 | 58 | 52 | 48 | 40 | 33 | 25 | 16 | 9.8 | 6.2 | 3.9 |
| 3.0 | 72 | 69 | 63 | 57 | 47 | 39 | 30 | 19 | 12 | 7.4 | 4.7 |

¹Systems may use this equation to determine log credit between the indicated values:

$$\text{Log credit} = [0.0397 \times (1.09757)^{\text{Temp}}] \times \text{CT}$$

TABLE 3: UV Dose for *Cryptosporidium*, *Giardia lamblia*, and Virus Inactivation Credit¹

| Log Credit | <i>Cryptosporidium</i> UV dose (mJ/cm ²) | <i>Giardia lamblia</i> UV dose (mJ/cm ²) | Virus UV dose (mJ/cm ²) |
|------------|---|---|--|
| 0.5 | 1.6 | 1.5 | 39 |
| 1.0 | 2.5 | 2.1 | 58 |
| 1.5 | 3.9 | 3.0 | 79 |
| 2.0 | 5.8 | 5.2 | 100 |
| 2.5 | 8.5 | 7.7 | 121 |
| 3.0 | 12 | 11 | 143 |
| 3.5 | 15 | 15 | 163 |
| 4.0 | 22 | 22 | 186 |

¹The treatment credits listed in Table 3 are for UV light at a wavelength of 254 nm as produced by a low-pressure mercury vapor lamp. To receive treatment credit for other lamp types, systems must demonstrate an equivalent germicidal dose through reactor validation testing. The UV dose values in this table are applicable only to post-filter applications of UV in filtered systems.

¹ Effective date of 43.2(3)“b”(1) to (9) and 43.3(3)“b”(1) and (2) delayed until adjournment of the 1995 General Assembly by the Administrative Rules Review Committee at its meeting held March 13, 1995.

CHAPTER 44
DRINKING WATER STATE REVOLVING FUND

567—44.1(455B) Statutory authority. The authority for the Iowa department of natural resources to administer the drinking water state revolving fund (DWSRF) in order to assist in the construction of drinking water treatment facilities is provided by Iowa Code sections 455B.291 to 455B.299.

567—44.2(455B) Scope of title. The department has jurisdiction over the surface water and groundwater of the state to prevent, abate, and control pollution. As a part of that general responsibility, the department and the Iowa finance authority (authority) are jointly designated to administer the DWSRF loan program to assist in the financing of infrastructure projects pursuant to the Safe Drinking Water Act (SDWA). A project must comply with this chapter to be eligible for a DWSRF loan. This chapter provides the background, the general rules of practice for the department's administration of the program, including the criteria for loan eligibility, and the general project and program administration rules.

567—44.3(455B) Purpose. The DWSRF provides financial assistance to eligible public water systems for the design and construction of facilities to ensure public health and the provision of safe and adequate drinking water. The DWSRF reserves a certain percentage of money each year from capitalization grants: for administrative purposes (up to 4 percent), to assist with the administration of the public water supply supervision program (up to 10 percent), to provide technical assistance to smaller drinking water systems (up to 2 percent) and to fund local assistance and other authorized activities (up to 15 percent). The director will coordinate with the authority under the terms of an interagency agreement entered into pursuant to Iowa Code chapter 28E. The department establishes priorities for the use of the DWSRF and publishes them in its intended use plan (IUP). The IUP will identify all proposed uses of available funds. All potentially funded projects or activities must be approved by the department.

The EPA provides capitalization grants for this program to the department. Financial assistance projects must be in conformance with the requirements of the Public Health Service Act (42 U.S.C. 300f et seq.), United States Code, Title XIV, Section 1452, Part E.

567—44.4(455B) Definitions. Definitions provided in 567—Chapter 40 apply to this chapter.

567—44.5(455B) Set-asides. The Safe Drinking Water Act (SDWA) authorizes set-aside funds to enable states to implement specific requirements of the SDWA. The amount and use of set-aside money is set each year in the IUP pursuant to rule 567—44.8(455B) and may be adjusted from year to year based on available funds and priorities as outlined in the IUP. As prescribed in the SDWA, set-asides will include but are not limited to:

44.5(1) Administration expense set-aside. These set-aside funds are to be used to administer the DWSRF. Up to 4 percent of the funds allotted through federal capitalization grants may be used for the reasonable costs of administering the programs and providing technical assistance. These costs may include such activities as issuing debt; DWSRF program start-up costs; audit costs; financial, management and legal consulting fees; development of IUP and priority ranking system; development of affordability criteria; and cost of support services provided by other state agencies. If the entire 4 percent is not obligated for administrative costs in one year, the excess balance may be reserved and used for administrative costs in later years.

44.5(2) Small system technical assistance set-aside. These set-aside funds will be used to provide technical assistance to public water supplies serving 10,000 people or fewer. Up to 2 percent of funds allotted through federal capitalization grants may be used for this purpose. These funds may be used to support a technical assistance team or to contract with outside organizations to provide technical assistance. Applications for third-party technical assistance proposals must be submitted and will be accepted and evaluated pursuant to subrules 44.7(2) through 44.7(7) prior to publication of the IUP in a given year. If the entire 2 percent is not obligated for these activities in one year, the excess balance may be reserved and used for the same activities in later years.

44.5(3) Local assistance and other state programs set-aside. Funds from this set-aside may be used for other categories of activities to assist development or implementation of local drinking water protection initiatives or both. Up to 15 percent of the capitalization grant amount may be used for the following activities, with the stipulation that not more than 10 percent of the capitalization grant amount may be used for any one activity:

- a. Assistance, in the form of a loan, to a public water system to acquire land or a conservation easement for source water protection purposes;
- b. Assistance, in the form of a loan, to a community water system to implement voluntary, incentive-based source water quality protection measures;
- c. Establishment and implementation of wellhead protection programs; and
- d. Provision of funding to a public water system to implement technical or financial assistance under the capacity development strategy.

Source water (quality partnership) petition programs (made by individual or consortiums of public water systems) established under Section 1454 of the SDWA amendments of 1996 (P.L. 104-182, August 6, 1996) will be eligible for money under this set-aside. Applications for third-party source water petition proposals must be submitted and will be accepted and evaluated pursuant to subrules 44.7(2) through 44.7(7) prior to publication of the IUP in a given year. These funds may not be reserved for future use.

44.5(4) State program management set-aside. Funds from this set-aside may be reserved for public water supply supervision (PWSS) programs, including the following uses:

- a. Administration of the state PWSS program;
- b. Administration or provision of technical assistance through source water protection programs, which include the Class V portion of the Underground Injection Control Program;
- c. Development and implementation of a capacity development strategy; and
- d. Development and implementation of an operator certification program.

This set-aside allows a maximum of 10 percent of the total available federal capitalization grant in a particular year and requires a one-to-one match. If the entire 10 percent is not obligated for these activities in one year, the excess balance may be reserved and used for the same activities in later years.

567—44.6(455B) Eligibility.

44.6(1) Eligible systems. The following systems are eligible to receive funds from the DWSRF for improvements as listed and defined in the Safe Drinking Water Act amendments of 1996 (P.L. 104-182, August 6, 1996).

- a. Community drinking water systems.
- b. Nonprofit nontransient noncommunity drinking water systems.
- c. Cities and counties that are PWS or can become viable new PWS as a result of this project.
- d. Any other governmental subdivision of the state responsible for a public water supply.

44.6(2) Ineligible systems. The following systems are ineligible to receive funds from the DWSRF.

- a. Any applicant that has not adopted and implemented satisfactory department-approved water conservation plans and practices, or demonstrated to the department an ongoing effort to adopt and implement such plans and practices within one calendar year from the date of the loan agreement.
- b. Any applicant in significant noncompliance with any applicable primary drinking water regulation, unless the project will return the applicant to compliance.
- c. Any applicant lacking viability (an applicant whose system lacks technical, financial, and managerial viability to comply with the SDWA and is nonviable or lacks capacity according to the definition of the SDWA), unless the applicant commits to undertake appropriate changes in operations, including ownership, management accounting, rates, maintenance, consolidation, alternative sources of water supply, or other procedures if the director determines that such changes are necessary to demonstrate viability.

d. Projects and activities deemed ineligible for participation in the DWSRF by the U.S. Environmental Protection Agency's Drinking Water State Revolving Fund regulations (40 CFR Part 35, Subpart L) or program guidance, or by the department.

44.6(3) *Certified operator requirement.* A system without a certified operator shall not receive loan assistance. The system must submit to the department the name, certification number and certification expiration date of the operator certified, pursuant to 567—Chapter 81, to be directly responsible (in direct responsible charge) for the operation of the facility before receiving a loan.

567—44.7(455B) Project point ranking system (project priority list).

44.7(1) *Project priority list.* The director shall develop and maintain a project priority list of public water systems that have a need for either a new or an upgraded drinking water system, including individual subcomponents. The term “public water system projects” may also include separate segments or phases of a segmented or phased project. The project priority list may include projects which are not ready to proceed (e.g., the list may include projects that by their nature are planned and implemented for a longer term than one year or projects that are unable to be implemented within one calendar year). Projects may be construed as not ready to proceed due to emergencies experienced by the applicant (or the state), or due to construction or other scheduling constraints. Projects will continue to be eligible for loan funding when funded for the first year of a multiyear project effort.

44.7(2) *Application.* Applications for placement on the project priority list shall be accepted by the department on a continuous basis.

44.7(3) *Amendment of project priority list.* The department may amend the project priority list to add eligible projects or remove projects. List adjustment can be done to ensure that the department uses at least 15 percent of each capitalization grant and required state match to provide loan assistance to systems serving fewer than 10,000 persons (allowable under Section 1452(a)(2) of SDWA), to the extent that there are a sufficient number of eligible projects to fund.

44.7(4) *Preliminary engineering study requirements.* To be eligible for placement on the project priority list for a construction loan, the water system must have a preliminary engineering study of potential system needs (e.g., a “planning” study) approved by the department, and must submit to the director a written application for placement on the list. The application must include:

- a. A description of the type of project for which financial assistance is being requested;
- b. The amount of financial assistance being requested; and
- c. A proposed project construction schedule.

Application shall be made on the form from the DWSRF application package provided by the department; the applicant may include additional information in the application. Forms may be obtained from the Environmental Services Division, Iowa Department of Natural Resources, Water Supply Engineering Section, 401 SW 7th Street, Suite M, Des Moines, Iowa 50309, or at www.iowasrf.com.

44.7(5) *Construction project requirements.* An applicant seeking financial assistance for construction must include with the application:

- a. A description of the entity’s current drinking water supply system, including a discussion of existing and potential problems or failures in the current drinking water system and compliance with state and federal criteria;
- b. An estimate of the population and the number of households to be served;
- c. A completed Self-Assessment Manual for Iowa Water System Viability;
- d. A description of the basis for project design;
- e. A map showing the geographical area that the project is expected to serve; and
- f. A cost estimate for the selected project.

44.7(6) *Project priority list ranking criteria.* A construction project’s priority points shall be the total number of points assigned by the department pursuant to the department’s scoring system, delineated in subrule 44.7(7). All projects shall be listed in descending order on the published project priority list according to the number of total priority points assigned each project. When two or more projects have the same priority point total, the project sponsored by a system in the process of consolidation shall receive the higher priority. A private system in the process of forming and becoming a PWS shall have the next highest priority (if the system is determined by U.S. EPA regulations or guidance to be eligible for DWSRF funding), and the entity with the smallest served population shall receive the next highest priority. The most current official census population shall be used for all municipalities which

serve only the population within their incorporated boundaries and which apply for these loan funds. For all other municipalities and other community public water supply systems and for nontransient noncommunity systems, population will be counted based on either the actual population verifiable by the department or population as calculated by multiplying by an occupancy factor of 2.5 persons per service connection. New systems will be counted based on census data, an occupancy factor of 2.5 persons per service connection, an occupancy factor of 2.5 persons per identifiable occupied building, or other means acceptable to the department. Funding shall be offered to the projects with highest rank on the project priority list, subject to the project's readiness to proceed, and shall proceed from the highest project downward, subject to availability of funds. The published project priority list shall also be included in the department's intended use plan (IUP), pursuant to rule 567—44.8(455B). Projects involving a multiyear, phased effort may carry over their original priority point total from the previous year's application, provided that the project owner reapplies at each stage.

44.7(7) Project priority list scoring criteria. Eligible public drinking water supply projects shall be scored pursuant to the following priority point scoring system.

IOWA DWSRF PROJECT SCORING SYSTEM

(Multiple attributes within a lettered subcategory are not additive, but points are additive from other subcategories; consolidation/restructuring is an approved option to correct violations or “improve” treatment.)

| Scoring Criterion | Points |
|--|--------|
| A. Human Health Risk-related Criteria (maximum of 60 points) | |
| 1. Correction of acute MCL or Tier I treatment technique violation as defined in 567—paragraph 42.1(2)“a” (fecal coliform, nitrate, nitrite, chlorine dioxide, turbidity, CT corrective measures, and Giardia) | 60 |
| 2. Correction of nonacute MCL violation (IOCs excluding acute contaminants, radionuclides, SOCs, VOCs) | 50 |
| 3. Correction of an expected MCL or treatment technique violation (acute or nonacute) | 45 |
| 4. Correction of Tier II treatment technique violation as defined in 567—paragraph 42.1(3)“a” (Pb/Cu corrective measures, disinfection byproduct precursor removal) | 40 |
| 5. Mitigation of an imminent threat from groundwater contamination (from UST site, from CERCLA site, from uncontrolled site) | 35 |
| 6. Connection of individual residences to PWS to eliminate use of contaminated individual private wells (bacterial, nitrate, radionuclide, or IOC/VOC/SOC well contamination all eligible) | 35 |
| 7. Replacement of asbestos cement pipe (replace at least 200 feet of pipe) | 15 |
| B. Infrastructure and Engineering-related Improvement Criteria (maximum of 35 points) | |
| 1. Development of system redundancy and additional source to meet peak day demand with largest well or intake out of service; plant process rehabilitation (made to ensure redundancy of treatment units to protect against acute or chronic MCL with system's largest treatment unit out of service); water storage improvements (system reliability enhancement—to increase effective storage to Average Daily Demand, including either at-ground or elevated storage); pumping improvements meeting hydraulic and Ten-State Standard requirements for Average Daily Demand. | 35 |
| 2. Water systems over capacity expansion. Points are allowable only when system is operating at 85% or more of system design capacity. Source, plant, or distribution system improvements for system expansion are all eligible under this category. | 30 |
| 3. Pressure and other distribution system improvements, including pump upgrades, pipe looping, valves, fittings, line replacement, hydrants, pumping stations, and water meters | 20 |
| 4. Treatment plant improvements, excluding operation and maintenance costs | 15 |
| 5. Provision of emergency power/emergency pumping capacity including purchase of diesel generators or installation of automatic switching systems | 15 |

| Scoring Criterion | Points |
|---|--------|
| 6. Security improvements (fencing, lighting, video surveillance, locks, access control) | 10 |
| C. Affordability Criteria (maximum of 10 points) | |
| 1. System serves low-income population (Community Development Block Grant (CDBG) Iowa Department of Economic Development (IDED) Low-Moderate Income Criteria (LMI)) | 10 |
| D. Special Category Improvements (maximum of 15 points) | |
| 1. Wellhead or source water protection plan development or implementation meeting department standards, including loans for land or easement acquisition | 15 |
| 2. Water conservation measures/conservation plan preparation, adoption, and enforcement | 5 |
| E. IDNR Adjustment Factor for Population | |
| 1. (Project Serves) Population less than 10,000 | 10 |
| TOTAL MAXIMUM POINTS | 130 |

567—44.8(455B) Intended use plan.

44.8(1) Development. The director shall prepare an intended use plan (IUP) at least annually and on a quarterly basis as needed. The IUP will be submitted to a public hearing and approved by the commission and U.S. EPA.

44.8(2) Contents. The IUP will identify the anticipated uses of loan funds and will include:

a. The state project priority list (defined in rule 567—44.7(455B)) which includes all projects that are eligible for DWSRF loans and any proposed activities eligible for assistance under set-aside authority of the SDWA. The list will include the name of the eligible recipient, applicable PWS permit number, the projected amount of loan assistance, and a schedule of estimated disbursement of funds. The department will consider the following in developing the list of eligible recipients for the intended use plan:

(1) Whether a project will be ready to proceed on a schedule consistent with time requirements for outlay of funds; and

(2) Whether the project addresses the need upon which the system's priority is based.

b. Discussion of the long-term and the short-term goals of the DWSRF.

c. Information on the types of activities to be supported by the DWSRF, including requests for planning and design loans.

d. The method by which the IUP may be amended.

e. Assurances on how the state intends to meet environmental review requirements of the SDWA.

567—44.9(455B) Department initial approval of projects.

44.9(1) Project initiation conference. The department may require the applicant or the applicant's representative to meet at a location designated by the department.

44.9(2) Required project information. An applicant seeking financial assistance from the DWSRF for a construction project must provide the following information to the director for review and approval:

a. Plans and specifications must be signed by a professional engineer holding current license to practice in Iowa.

b. Plans and specifications must be consistent with the project identified in the application submitted pursuant to subrule 44.7(5).

c. The planned project must be described in full, and the construction requirements necessary to complete the project as proposed must be detailed.

d. The project submittal shall include the latest engineering cost estimate for the project.

e. The plans and specifications shall comply with all applicable state statutes, rules, and design standards.

f. Those portions of projects not meeting eligibility requirements may be excluded from the funded project, but included in the submitted plans and specifications if the applicant chooses to keep the loan-ineligible part of the project as part of the overall system improvement. Ineligible portions of

projects include but are not limited to dams, water rights, monitoring costs, operation and maintenance expenses, projects designed primarily in anticipation of speculative growth, and projects needed primarily for fire protection.

g. The applicant has demonstrated its ability to provide the necessary legal, institutional, managerial, and financial capability to complete the project.

44.9(3) Department review. An applicant seeking financial assistance from the DWSRF for any project appearing on the project priority list must submit information as required under subrule 44.7(5) on forms provided by and acceptable to the department. Departmental review requirements shall consist of the following:

a. Upon review and approval of construction projects submitted as required under subrule 44.7(5), and the plans and specifications as required under subrule 44.9(2), and following a determination that the project meets the applicable requirements of the SDWA, federal regulations, Iowa statutes, and relevant portions of this chapter, the director shall approve the project in writing.

b. If there is an alteration (change order) to a project after the director approves the project, the eligible applicant must request in writing from the department an amended approval. The director shall review the request and proposed project alteration (change order) and, upon a determination that the project meets the applicable requirements of the SDWA, federal regulations, the August 7, 2000, Drinking Water State Revolving Funds: Interim Final Rule (40 CFR Part 35, Subpart L), program guidance, Iowa statutes, and relevant portions of this chapter, the director shall approve the project as amended.

c. If the project is not approved, the director shall notify the applicant in writing of the reason for disapproval.

567—44.10(455B) General administrative requirements.

44.10(1) Allowable costs. Allowable costs shall be limited to those costs deemed necessary, reasonable, and directly related to the efficient completion of the project. The director will determine project costs eligible for state assistance in accordance with rule 567—44.6(455B). Land purchase, easement, or rights-of-way costs are ineligible with the exception of land which is integral to a project needed to meet or maintain public health protection and which is needed to locate eligible treatment or distribution works. Source water protection easements are considered to be integral to a project. (The acquisition of land or easements has to be from a willing seller.) In addition to those costs identified in this chapter, unallowable costs include the following:

a. Costs of service lines, except lead-containing service lines and connectors which are exterior to a home.

b. Costs of in-house plumbing.

c. Administrative costs of the loan recipient.

d. Vehicles and tools.

44.10(2) Audits. The recipient shall provide access at all times for the department, the authority, the state auditor and the Office of the Inspector General (OIG) at EPA to all project records and documents for inspection and audit purposes for a period of three years from the date of the final loan payment. The same access to the project site(s) shall be provided for inspection purposes.

44.10(3) Cross-cutters. Other federal and state statutes and programs, including federal “cross-cutters,” will be applicable to DWSRF projects.

44.10(4) Additional loan amount. If eligible costs exceed the loan amount, the recipient may request an increase. The director in coordination with the authority will evaluate the request by considering available money in the fund as well as compliance with other state and federal requirements.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—44.11 Reserved.

567—44.12(455B) Construction phase and postconstruction phase requirements.

44.12(1) *Estimated project completion date.* The loan recipient must notify the director of the estimated project completion date. A final inspection of the project may be performed by the director to verify that construction is complete (except for weather-related items) and conforms with the approved plans and specifications and all approved change orders.

44.12(2) *Adequate project performance.* The department shall undertake measures to discern adequate project performance as follows:

a. Three months after initiation of operation of the project, the loan recipient must certify to the director that the project is operating as planned and designed. This certification must be made on a form provided by and approved by the department.

b. If the loan recipient is unable to certify that the project is operating as planned and designed, the recipient must submit a corrective action report to the director for review and approval. An acceptable corrective action report must contain an analysis of the project's failure to operate as designed; a discussion of the nature, scope, and cost of the action needed to correct the failure; and a schedule for completing the corrective work.

567—44.13(455B) Sanctions. Failure of a project to conform to approved plans and specifications or failure of a loan recipient to comply with the requirements of 567—Chapter 40 through 567—Chapter 44 pertaining to drinking water supply systems constitutes grounds for the withholding of loan disbursements. The loan recipient is then responsible for ensuring that the identified problem either in the plans and specifications or in the other relevant portion of the project is rectified such that disbursements may be resumed. Once an agreement for correcting the conditions which led to the withholding of funds is reached between the department and the loan recipient, the retained funds shall be released according to the provisions of the agreement.

567—44.14(455B) Disputes. A person or entity that disagrees with the project rankings, department decisions, or the withholding of project funding pursuant to rule 567—44.7(455B), 567—44.8(455B), or 567—44.13(455B) may request a formal review of the action. The person or entity must submit to the director a request for review in writing within 45 days of the date of notification of the final decision made by the department or department staff. A decision by the director in a formal review case may be further appealed to the commission.

These rules are intended to implement Iowa Code sections 455B.291 to 455B.299.

CHAPTER 81
OPERATOR CERTIFICATION: PUBLIC WATER SUPPLY SYSTEMS
AND WASTEWATER TREATMENT SYSTEMS

[Prior to 7/1/83, DEQ Ch 21]

[Prior to 12/3/86, Water, Air and Waste Management[900]]

567—81.1(455B) Definitions. In addition to the definitions in Iowa Code section 455B.211, the following definitions shall apply to this chapter.

“Activated sludge” means a biological wastewater treatment process in which a mixture of wastewater and sludge floc, produced in a raw or settled wastewater by the growth of microorganisms, is agitated and aerated in the presence of a sufficient concentration of dissolved oxygen, followed by sedimentation.

“Aerated lagoon system” means a lagoon system which utilizes aeration to enhance oxygen transfer and mixing in the cell.

“Aeration” means the process of initiating contact between air and water. This definition includes but is not limited to: spraying the water in the air, bubbling air through the water, or forcing the air into the water by pressure.

“Average daily pumpage” means the total quantity of water pumped during the most recent one-year period of record divided by 365 days.

“Chlorination” means the addition of a chlorine compound or chlorine gas to water to inactivate pathogenic organisms.

“Classification” means the type of plant or distribution system: wastewater treatment plants, water treatment plants, or water distribution systems.

“Coagulation” means a process using coagulation chemicals and mixing by which colloidal and suspended materials are destabilized and agglomerated into flocs.

“Community water system (CWS)” means a public water supply system which has at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents.

“Continuing education unit (CEU)” means ten contact hours of participation in an organized education experience approved by an accredited college, university, technical institute, or issuing agency, or by the department, and must be directly related to the subject matter of the particular certificate to which the credit is being applied.

“Directly related post-high school education” means post-high school education in chemistry, microbiology, biology, math, engineering, water, wastewater, or other curriculum pertaining to plant and distribution system operation.

“Director” means the director of the department of natural resources or a designee.

“Direct responsible charge (DRC)” means, where shift operation is not required, accountability for and performance of active, daily on-site operation of the plant or distribution system, or of a major segment of the plant or distribution system. Where shift operation is required, “direct responsible charge” means accountability for and performance of active, daily on-site operation of an operating shift, or a major segment of the plant or distribution system. A city manager, superintendent of public works, city clerk, council member, business manager, or other administrative official shall not be deemed to have direct responsible charge of a plant or distribution system unless this person’s duties include the active, daily on-site operation of the plant or distribution system. On-site operation may not necessarily mean full-time attendance at the plant or distribution system.

“Direct surface water filtration” means a water treatment system that applies surface water and groundwater under the influence (influenced groundwater as defined in rule 567—40.2(455B)) directly to the filters after chemical treatment consisting of coagulation and flocculation or chemical treatment consisting of coagulation. This type of system eliminates the sedimentation unit process.

“Disinfection” means a process which inactivates pathogenic organisms in water by chemical oxidants or equivalent agents.

“Electrodialysis” means the demineralization of water by the removal of ions through special membranes under the influence of a direct-current electric field.

“Fixed film biological treatment” means a treatment process in which wastewater is passed over a media onto which are attached biological organisms capable of oxidizing the organic matter, normally followed by sedimentation. This definition includes but is not limited to: trickling filters, rotating biological contactors, packed towers and activated filters.

“Fluoridation” means the addition of fluoride to produce the optimum fluoride concentration in water.

“Grade” means one of seven certification levels, designated as A, I, IL, II, IIL, III, or IV.

“Ion exchange” means the process of using ion exchange materials such as resin or zeolites to remove undesirable ions from water and substituting acceptable ions, for example, ion exchange for nitrate removal or ion exchange for softening.

“Issuing agency” means a professional, technical/educational organization authorized by the department to provide continuing education for certification renewal or upgrade in accordance with the commitments and guidelines detailed in the written issuing agency agreement and procedures.

“Military service” means honorably serving on federal active duty, state active duty, or national guard duty, as defined in Iowa Code section 29A.1; in the military services of other states, as provided in 10 U.S.C. Section 101(c); or in the organized reserves of the United States, as provided in 10 U.S.C. Section 10101.

“Military service applicant” means an individual requesting credit toward certification for military education, training, or service obtained or completed in military service.

“Nontransient noncommunity water system (NTNC)” means a public water system other than a community water system which regularly serves at least 25 of the same persons four hours or more per day for four or more days per week for 26 or more weeks per year.

“Operating shift” means a specified period of time when an operator is present to conduct testing or evaluation to control operations of the plant or distribution system, to make process control changes, and to be responsible for the repair or maintenance of a plant or distribution system. An operating shift may include on-call shifts.

“Operator-in-charge” means a person or persons on site in direct responsible charge for a plant or distribution system. A city manager, superintendent of public works, city clerk, council member, business manager, or other administrative official shall not be deemed to be the operator-in-charge of a plant or distribution system unless this person’s duties include the active, daily on-site operation of the plant or distribution system. On-site operation may not necessarily mean full-time attendance at the plant or distribution system.

“Plant” means those facilities which are identified as either a water treatment plant, defined as that portion of the water supply system which in some way alters the physical, chemical, or bacteriological quality of the water, or a wastewater treatment plant, defined as the facility or group of units used for the treatment of wastewater from public sewer systems and for the reduction and handling of solids removed from such wastes.

“Population equivalent” for a wastewater treatment plant means the calculated number of people who would contribute the same biochemical oxygen demand (BOD) per day as the system in question, assuming that each person contributes 0.167 pounds of five-day, 20°C, BOD per day.

“Post-high school education” means credit received for completion of courses given or cosponsored by an accredited college, university, technical institute, or issuing agency. Courses offered by regulatory agencies may also be recognized as post-high school education. One year of post-high school education is 30 semester hours or 45 quarter hours or 45 CEUs of credit.

“Primary treatment” means a treatment process designed to remove organic and inorganic settleable solids from wastewater by the physical process of sedimentation.

“Public water system certificate” means a certificate issued by the department certifying that an operator has successfully completed the certification requirements of this chapter. The certificate specifies the grades and classifications for which the certificate is valid.

“Reverse osmosis” means the process in which external pressure is applied to mineralized water against a semipermeable membrane to effectively reduce total dissolved solids (TDS) and radionuclides content as the water is forced through the membrane.

“*Rural water district*” means a water supply incorporated and organized as such pursuant to Iowa Code chapter 357, 357A or 358.

“*Shift operator*” means the operator on site who has responsibility for making process control changes and adjustments to the operation, repair, and maintenance of a plant or distribution system during any operating shift. Duties include testing or evaluation to control operations of the plant or distribution system.

“*Stabilization*” means the addition of chemical compounds to water to maintain an ionic equilibrium whereby the water is not in a depository or corrosive state.

“*Veteran*” means an individual who meets the definition of “veteran” in Iowa Code section 35.1(2).

“*Waste stabilization lagoon*” means an excavation designed and constructed to receive raw or pretreated wastewater in which stabilization is accomplished by several natural self-purification processes. This definition includes both anaerobic and aerobic lagoons.

“*Wastewater treatment plant*” means the facility or group of units used for the treatment of wastewater from public sewer systems and for the reduction and handling of solids removed from such wastes.

“*Water distribution system*” means that portion of the water supply system in which water is conveyed from the water treatment plant or other supply point to the premises of the consumer, including storage facilities and pumping stations. For the purposes of this chapter, a water distribution system does not include individual service lines to the premises of the consumer, which are not under the control of the system.

“*Water supply system*” means the system of pipes, structures, and facilities through which water for a public water supply is obtained, treated, sold or distributed for human consumption or household use.

“*Water treatment plant*” means that portion of the water supply system which in some way alters the physical, chemical, or microbiological quality of the water.

[ARC 1911C, IAB 3/18/15, effective 4/22/15; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—81.2(455B) General.

81.2(1) *Plant grade for system with multiple treatment processes.* A plant having a combination of treatment processes that are in different grades shall be assigned the highest numerical plant grade of that combination.

81.2(2) *Increase in facility grade for complex systems.* The director may increase a plant or water distribution system grade above that indicated in rules 567—81.3(455B) to 567—81.6(455B) for those systems which in the judgment of the director include unusually complex treatment processes, complex distribution systems, or which present unusual operation or maintenance conditions.

81.2(3) *Operator-in-charge certification requirement.* The operator-in-charge shall hold a certificate of the same classification of the plant or water distribution system and of equal or higher grade than the grade designated for that plant or distribution system.

81.2(4) *Shift operator certification.* Any person who is responsible for the operation of an operating shift of a plant or distribution system or major segment of the plant or distribution system and is under the supervision of the operator-in-charge identified in 81.2(3) shall be certified in a grade no less than a Grade II level for Grade III and IV plants and distribution systems and Grade I for Grade I and II plants and distribution systems.

81.2(5) *Public water system certificate requirement.* The operator who is designated by the owner to be the operator-in-charge of both the water treatment plant and the water distribution system shall hold a public water system (PWS) certificate valid for water treatment and water distribution in accordance with 81.2(3) and 81.2(6).

81.2(6) *PWS certificate.* A PWS certificate shall be issued to an operator successfully completing water treatment or water distribution certification. The PWS certificate shall specify the grade and classification for which the certificate is valid. An operator successfully completing both water treatment and water distribution certification shall be issued a PWS certificate valid for both classifications. For purposes of renewal, all renewal fees and CEU requirements shall be applied as one certification. The

number of CEUs required shall be determined by the highest certification grade on the operator's public water system certificate.

81.2(7) PWS certificate issuance. Rescinded IAB 1/7/04, effective 2/11/04.

81.2(8) Notification requirements for a personnel change in the operator-in-charge. The owner of a plant or distribution system must notify the department of a change in operator(s)-in-charge within 30 days after the change.

81.2(9) Change of address or employment. Certified operators must report to the department a change in address or employment within 30 days after the change.

81.2(10) Owner reporting requirements. All owners of plants and distribution systems must report, when requested by the department, the method of treatment provided, the average daily pumpage, and the operator(s)-in-charge.

81.2(11) Compliance plan. When the director allows the owner of a plant or distribution system required to have a certified operator time to obtain an operator, the owner must submit a compliance plan indicating what action will be taken to obtain a certified operator. The plan must be on Form 52, Compliance Plan 542-3120, provided by the department and must be submitted within 30 days of the facility owner's receipt of a notice of violation.

567—81.3(455B) Wastewater treatment plant grades.

81.3(1) Classifications. The wastewater treatment plant classifications are listed in the following table:

Wastewater Treatment Plant Classifications

| Treatment Type | Grade | | | | |
|------------------------------------|---|-------------|------------------|-------------------|---------------------|
| | Based on Design Pounds of BOD ₅ /day | | | | |
| | less than 334 | 334-835 | 836-2,505 | 2,506-8,350 | more than 8,350 |
| | Based on Design Population Equivalent | | | | |
| | less than 2,000 | 2,000-5,000 | 5,001- 15,000 | 15,001- 50,000 | more than 50,000 |
| 1. Primary Treatment | I | I | II | III | IV |
| 2. Waste Stabilization Lagoon | IL | IL | IL | IL | IL |
| 3. Aerated Lagoon System | IL | IL | III | III | III |
| 4. Fixed Film Biological Treatment | II | II | III | III | IV |
| 5. Activated Sludge | II | III | III | IV | IV |

81.3(2) Unknown design BOD₅ loading. When the design BOD₅ loading is unknown, the plant BOD₅ loading shall be determined by using the average pounds of BOD₅ of the 24-hour composite samples taken in the last 12 months. If no 24-hour composite samples were taken, then grab samples shall be used.

81.3(3) IL and IIL wastewater operator requirements. A Grade I, II, III, or IV wastewater treatment certificate will satisfy the certification requirements for a Grade IL plant. A Grade II, III, or IV wastewater treatment certificate will satisfy the certification requirements for a Grade IIL plant.

567—81.4(455B) Water treatment plant grades.

81.4(1) Classifications. The water treatment plant classifications are listed in the following table:

Water Treatment Plant Classifications

| Treatment Type | Grade* | | | |
|---|------------------------------|----------|----------|------|
| | Average Daily Pumpage in MGD | | | |
| | 0-0.1 | >0.1-0.5 | >0.5-1.5 | >1.5 |
| 1. Iron or manganese removal; aeration; chlorination; fluoridation; stabilization; any other chemical addition; or any combination of these processes | I | II | II | III |
| 2. Ion exchange | II | II | III | III |
| 3. Direct surface water filtration | II | II | III | III |
| 4. Utilization of lime, soda ash or other chemical addition for pH adjustment in the precipitation and coagulation of iron or manganese | II | II | III | III |
| 5. Complete surface water clarification or lime softening of surface water or groundwater | III | III | III | IV |
| 6. Reverse osmosis and electro dialysis | II | II | III | IV |
| 7. Activated carbon for THM or synthetic organics removal | III | III | III | IV |

*For Grade A water supply classification, see subrule 81.6(1).

81.4(2) Average daily pumpage. When the average daily pumpage is unknown, the plant grade will be determined from the population of the most recent census and an evaluation of commercial, industrial, and other users.

567—81.5(455B) Water distribution system grades.

81.5(1) Classifications. The water distribution plant classifications are listed in the following table:

Water Distribution System Classifications*

| System Type | Grade** | | | |
|--|------------------------------|------------|--------------|--------|
| | Average Daily Pumpage in MGD | | | |
| | 0-0.1 | >0.1-1.5 | >1.5-5 | >5 |
| All municipal water systems | I | II | III | IV |
| Community water systems not classified as a Grade A water system | I | II | III | IV |
| Nontransient noncommunity water systems not classified as a Grade A water system | I | II | III | IV |
| Rural water districts | Miles of Pipe | | | |
| | 0-100 | >100-1,000 | >1,000-2,500 | >2,500 |
| | II | II | III | IV |

*Note: A public water system with a well, storage, and a distribution system shall be classified as a water distribution system if no treatment is provided.

**For Grade A water system classification, see subrule 81.6(1).

81.5(2) Average daily pumpage. When the average daily pumpage is unknown, the system grade will be determined from the population of the most recent census and an evaluation of commercial, industrial, and other users.

81.5(3) IR certificate holders. Rescinded IAB 1/7/04, effective 2/11/04.

567—81.6(455B) Grade A classification.

81.6(1) Grade A water system classification.

a. *Community water system.* A community water system, other than a municipal or rural water system, which serves a population of 250 persons or less and provides no treatment other than

hypochlorination or treatment which does not require any chemical addition, process adjustment, backwashing or media regeneration by an operator shall be classified as a Grade A water system.

b. Nontransient noncommunity water system. A nontransient noncommunity water system which serves a population of 500 persons or less and provides no treatment other than hypochlorination or treatment which does not require any chemical addition, process adjustment, backwashing or media regeneration by an operator shall be classified as a Grade A water system.

c. Transient noncommunity water system. A transient noncommunity water system which serves a population of 500 or fewer persons and provides no treatment other than hypochlorination or treatment which does not require any chemical addition, process adjustment, backwashing or media regeneration by an operator shall be classified as a Grade A water system.

81.6(2) Certification requirements for Grade A water systems. Any grade of water treatment certification will satisfy the certification requirements for a Grade A water system with hypochlorination. Any grade of water distribution certification will satisfy the certification requirements for a Grade A water system without hypochlorination.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—81.7(455B) Operator education and experience qualifications.

81.7(1) Education and experience requirements. All applicants shall meet the education and experience requirements for the grade of certificate shown in the table below prior to being allowed to take the examination. Experience shall be in the same classification for which the applicant is applying except that partial credit may be given in accordance with 81.7(2) and 81.7(3). Directly related post-high school education shall be in the same subject matter as the classification in which the applicant is applying. The director will determine which courses qualify as “directly related” in cases which are not clearly defined. A military service applicant may apply for credit for verified military education, training, or service toward any education or experience requirement for certification, pursuant to subrule 81.7(4).

Operator Education and Experience Qualifications

| Grade | Education | Substitution for Education | Experience | Substitution for Experience |
|-------|---|----------------------------|---|---|
| A | High school diploma or GED | None | Completion of an IDNR-approved training course | None |
| I | High school diploma or GED | None | 1 year | See 81.7(3) “b”(1), (3) to (5) |
| II | High school diploma or GED | None | 1 year | See 81.7(3) “b”(1), (3) to (5) |
| II | High school diploma or GED | None | 3 years | See 81.7(3) “b”(2) to (5) |
| III | High school diploma or GED | None | 3 years | See 81.7(3) “b”(2) to (5) |
| III | High school diploma or GED and 2 years of post-high school education (1 year must be directly related) | See 81.7(3) “a”(1), (3) | 4 years of experience in a Grade I or higher | See 81.7(3) “b”(2), (3) |
| IV | High school diploma or GED and 4 years of post-high school education (2 years must be directly related) | See 81.7(3) “a”(2), (3) | 4 years of experience including 2 years of DRC in a Grade III or higher | See 81.7(3) “b”(2), (3) and 81.7(3) “c” |

81.7(2) Related work experience. The following substitutions of related work experience for operating experience requirements may be accepted by the director.

a. Laboratory personnel. Laboratory personnel employed in water or wastewater treatment plants may be allowed 50 percent credit for work experience toward meeting the operating experience requirements for Grades I and II certification only. Laboratory experience must be in the same classification for which the applicant is applying.

b. Oversight personnel. Personnel with experience in on-site operation review and evaluation of plants and distribution systems may be allowed 50 percent credit for on-site work experience toward meeting the operating experience requirements for Grades I and II certification only. On-site experience must be in the same classification for which the applicant is applying.

c. Maintenance personnel. Maintenance personnel employed in water or wastewater treatment plants may be allowed 50 percent credit for work experience toward meeting the operating experience requirements for Grades I and II certification only. Maintenance experience may be applied either to the water or to the wastewater experience requirements.

d. Certified operators.

(1) Certified water treatment operators may be allowed 50 percent credit for work experience toward meeting the operating experience requirements for Grades I and II wastewater treatment certification only.

(2) Certified wastewater treatment operators may be allowed 50 percent credit for work experience toward meeting the operating experience requirements for Grades I and II water treatment certification only.

(3) Certified water treatment operators may be allowed 50 percent credit for work experience toward meeting the operating experience requirements for Grades I and II water distribution certification only.

(4) Certified water distribution operators may be allowed 50 percent credit for work experience toward meeting the operating experience requirements for Grades I and II water treatment certification only.

e. Limitation. The portion of related work experience that is substituted for operating experience cannot also be used to substitute for education.

81.7(3) Experience and education substitutions. The following substitutions for experience or education may be accepted by the director.

a. Substitution of experience for education.

(1) One year of operating experience in a Grade II or higher position may be substituted for one year of post-high school education for Grade III certification up to one-half of the post-high school education requirement.

(2) One year of operating experience in a Grade III or higher position may be substituted for one year of post-high school education for Grade IV certification up to one-half of the post-high school education requirement.

(3) Two years of direct responsible charge experience in a Grade III or higher position may be substituted for one year of directly related post-high school education for Grade IV certification up to three-fourths of the post-high school education requirement.

(4) That portion of experience which is applied toward substitution for education cannot also be used for experience.

b. Substitutions of education for experience.

(1) Two semester hours or three quarter hours or three CEUs of directly related post-high school education may be substituted for one-half the experience requirement for Grades I and II.

(2) Thirty semester hours or 45 quarter hours or 45 CEUs of post-high school education may be substituted for one year of experience up to a maximum of one-half the experience requirement for Grades II, III, III and IV.

(3) That portion of education which is applied toward substitution for experience cannot also be used for education.

(4) Class hours involving closely supervised on-the-job type training in a pilot or full-scale facility where there are clearly defined educational objectives may be applied to the on-the-job experience requirement. The substitution value of such training shall be applicable only toward obtaining a Grade I and Grade II certification and shall not exceed one-half year of on-the-job experience. One hour of on-the-job training is equivalent to three hours of on-the-job experience. One month of on-the-job training consists of 20 eight-hour days. Credit for on-the-job training may be applied only to the examination for the type of system in which the experience was obtained.

(5) That portion of on-the-job training courses which is applied toward substitution for the on-the-job experience requirement cannot also be used for education.

c. Substitution of education for direct responsible charge experience. Thirty semester hours or 45 quarter hours or 45 CEUs of directly related post-high school education may be substituted for one year of direct responsible charge experience up to one-half the requirement for Grade IV certification.

81.7(4) Military education, training, and service credit.

a. The applicant shall identify the experience or education certification requirements for which the credit is requested.

b. As part of the examination application pursuant to subrule 81.9(1), the applicant shall provide documents, military transcripts, a certified affidavit, or forms that verify completion of the relevant military education, training, or service, which may include, when applicable, the applicant's Certificate of Release or Discharge from Active Duty (DD Form 214) or Verification of Military Experience and Training (VMET) (DD Form 2586).

[ARC 1911C, IAB 3/18/15, effective 4/22/15; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—81.8(455B) Certification and examination fees.

81.8(1) Examination fee. The examination fee for each examination shall be \$30.

81.8(2) Oral examination fee. Rescinded IAB 4/11/18, effective 5/16/18.

81.8(3) Reciprocity application fee. The reciprocity application fee for each type of classification shall be \$30.

81.8(4) Certification fee. The certification fee shall be \$20 for each one-half year of a two-year period from the date of issuance to June 30 of odd-numbered years.

81.8(5) Renewal fee. The certification renewal fee shall be \$60.

81.8(6) Penalty fee. The certification and renewal penalty fee shall be \$18.

81.8(7) Duplicate certificate fee. The duplicate certificate fee shall be \$20.

81.8(8) Temporary certificate fee. The temporary certificate fee shall be \$60.

81.8(9) Fee adjustments. The department may adjust the fees annually by up to plus or minus 20 percent to cover costs of administering and enforcing these rules and reimbursement for other expenses relating to operator certification. The environmental protection commission must approve any fee increases above those listed in 81.8(1) through 81.8(8). All fees collected shall be retained by the department for administration of the operator certification program.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—81.9(455B) Examinations.

81.9(1) Examination application. All persons wishing to take the examination required to become a certified operator of a wastewater or water treatment plant or a water distribution system shall complete the Operator Certification Examination Application, Form CFN-542-3118/CPG-63997. A listing of dates and locations of examinations is available from the department upon request. The application form requires the applicant to indicate educational background, training and past experience in water or wastewater operation. The completed application and examination fee shall be sent to Iowa Department of Natural Resources, Water Supply Section, 502 East Ninth Street, Des Moines, Iowa 50319-0034. The completed application and examination fee must be received by the department at least 30 days prior to the date of examination.

81.9(2) Application evaluation. The director shall designate department personnel to evaluate all applications for examination, certification, and renewal of certification and upgrading of certification. After evaluation of the application, the department will issue the applicant either a letter of examination

eligibility or a letter of examination noneligibility that includes a description of the education or experience requirements that have not been met. The director will review applications when it is indicated that the applicant has falsified information or when questions arise concerning an applicant's qualifications of eligibility for examination or certification.

81.9(3) *Application expiration.* A properly completed application for examination shall be valid for one year from the date the application is approved by the department. An applicant may request only one class and grade of examination with each application. A new application shall be required with each different class or grade of examination desired by the applicant.

81.9(4) *Refund of examination fee.* An applicant who does not qualify for examination at the time of application will have the examination fee refunded if the applicant cannot qualify for examination within one year. If the applicant will qualify for a scheduled examination within one year, the applicant will be notified when the examination may be taken and the fee will not be refunded.

81.9(5) *Reexamination.* Upon failure of the first examination, the applicant may apply for reexamination. Upon failure of the second examination, the applicant shall be required to wait a period of at least 30 days between each subsequent examination.

81.9(6) *Reexamination fee.* Upon each reexamination when a valid application is on file, the applicant shall submit the examination fee to the department at least ten days prior to the date of examination.

81.9(7) *Application invalidation.* Failure to successfully complete the examination within one year from the date of approval of the application shall invalidate the application.

81.9(8) *Retention of completed examinations.* Rescinded IAB 1/7/04, effective 2/11/04.

81.9(9) *Oral examination.* Rescinded IAB 4/11/18, effective 5/16/18.

81.9(10) *Reasonable accommodation.* Upon request for certification by an applicant, the director will consider on an individual basis reasonable accommodation to allow administration of the examination without discrimination on the basis of disability. The applicant shall request the accommodation 30 days prior to the date of the examination. The applicant must provide documentation of eligibility for the accommodation. Documentation shall be submitted with the completed examination application.

[ARC 1911C, IAB 3/18/15, effective 4/22/15; ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—81.10(455B) Certification by examination.

81.10(1) *Examination requirement.* All applicants not addressed for certification in 81.11(1) shall successfully complete and pass an examination prior to receiving certification.

81.10(2) *Certification application time line.* Application for certification must be received by the department within 30 days of the date the applicant receives notification of successful completion of the examination. All applications for certification shall be made on a form provided by the department and shall be accompanied by the certification fee.

81.10(3) *Late certification application.* Applications for certification by examination which are received more than 30 days but less than 60 days after notification of successful completion of the examination shall be accompanied by the certification fee and the penalty fee. Applicants who do not apply for certification within 60 days' notice of successful completion of the examination will not be certified on the basis of that examination.

567—81.11(455B) Certification by reciprocity.

81.11(1) *Other states' mandatory certification programs.* For applicants who have been certified under other states' mandatory certification programs, the equivalency of which has been previously reviewed and accepted by the department, certification in an appropriate classification and grade, without examination, will be recommended. The applicant must have successfully completed an examination generally equivalent to the Iowa examination and must meet the education and experience qualifications established by the director.

81.11(2) *Other states' voluntary certification programs.* For applicants who have been certified under voluntary certification programs in other states, certification in an appropriate class will be

considered. The applicant must have successfully completed an examination generally equivalent to the Iowa examination and must meet the education and experience qualifications established by the director. The director may require the applicant to successfully complete the Iowa examination.

81.11(3) Reciprocity application.

a. All applicants. Applicants who seek Iowa certification pursuant to subrule 81.11(1) or 81.11(2) shall submit an Operator Certification Reciprocity Application accompanied by a letter requesting certification pursuant to these subrules. Application for certification pursuant to 81.11(1) and 81.11(2) shall be received by the director in accordance with these subrules. The applicant shall be certified at the appropriate grade pursuant to subrule 81.7(1).

b. Veteran applicants. An applicant who is a veteran shall submit an Operator Certification Reciprocity Application pursuant to paragraph 81.11(3) “a” and shall also provide such documentation as is needed to verify the applicant’s status as a veteran under Iowa Code section 35.1(2). The veteran’s application shall be given priority and shall be expedited.

81.11(4) Certification obtained through reciprocity. An applicant who obtains certification in Iowa through reciprocity and subsequently allows the certification to lapse will be required to reapply for certification in accordance with 567—81.10(455B).

[ARC 1911C, IAB 3/18/15, effective 4/22/15]

567—81.12(455B) Restricted certification. Upon written request by an operator, the director may determine that further education requirements be waived when a plant or distribution system grade has been increased and the operator has been in direct responsible charge of the existing plant or distribution system. An operator successfully completing the examination will be restricted to that plant or distribution system until the education requirements are met.

[ARC 3735C, IAB 4/11/18, effective 5/16/18]

567—81.13(455B) Certification renewal.

81.13(1) Renewal period. All certificates shall expire on June 30 of odd-numbered years and must be renewed every two years in order to maintain certification.

81.13(2) Application for renewal. An application for renewal will be mailed to currently certified operators prior to the expiration date of their certificates. Application for renewal must be made in accordance with this rule and the instructions on the form in order to renew the certificate for the next two years. Application for renewal of a certificate without penalty must be received by the director or postmarked prior to the expiration of the certificate, and shall be accompanied by the certification renewal fee.

81.13(3) Late application. A late application for renewal of a certificate may be made provided that the application is received by the director or postmarked within 60 days of the expiration of the certificate on forms provided by the department. Such late application shall be accompanied by the penalty fee and the certification renewal fee.

81.13(4) Failure to renew. If a certificate holder fails to renew within 60 days following expiration of the certificate, the right to renew the certificate is automatically terminated. Certification may be allowed at any time following such termination, provided that the applicant meets all education and experience eligibility requirements pursuant to 567—81.7(455B), and successfully completes an examination. The applicant must then apply for certification in accordance with 567—81.10(455B).

81.13(5) Expired certificate. An operator may not continue as the operator-in-charge of a plant, distribution system, operating shift, or major segment of the plant or distribution system after expiration of a certificate unless the certificate is renewed.

567—81.14(455B,272C) Continuing education.

81.14(1) CEU requirements. Continuing education must be earned during two-year periods between April 1 and March 31 of odd-numbered years. A Grade III or IV certified operator must earn two units or 20 contact hours per certificate during each two-year period. All other certified operators must earn one unit or 10 contact hours per certificate during each two-year period. Newly certified operators (previously uncertified) who become certified after April 1 of a two-year period will not be required to earn CEUs

until the next two-year period. If an operator upgrades a certificate after April 1 of a two-year period and that upgrade increases the CEU requirement, the operator will not be required to meet the higher CEU requirement until the next two-year period but must fulfill the lower CEU requirement for that period. For those certified operators holding both a water treatment and a water distribution certification, no less than 25 percent of the required CEUs may be earned in any one area.

81.14(2) *Certificate renewal.* Only those operators fulfilling the continuing education requirements before the end of each two-year period (March 31) will be allowed to renew their certificate(s). The certificate(s) of operators not fulfilling the continuing education requirements shall expire on June 30 of each odd-numbered year.

81.14(3) *CEU approval.* All activities for which continuing education credit will be granted must be approved by an accredited college, university, technical institute, or issuing agency, or by the department, and must be directly related to the subject matter of the particular certificate to which the credit is being applied. Any entity holding courses in Iowa for which continuing education credit is offered for water treatment, water distribution, or wastewater operator certification must provide at no cost to the department the opportunity for one staff member to audit the training and receive all training materials.

81.14(4) *CEU extensions.* The director may, in individual cases involving hardship or extenuating circumstances, grant an extension of up to three months within which the certified operator may fulfill the minimum continuing education requirements. Hardship or extenuating circumstances include documented health-related confinement or other circumstances beyond the control of the certified operator which prevent attendance at the required activities. All requests for extensions must be made prior to March 31 of each biennium.

81.14(5) *CEU reporting.* It is the certified operator's personal responsibility to maintain a written record and to notify the department of the continuing education credit earned during the period. The continuing education credits earned during the period shall be listed on the application for renewal.

567—81.15(455B) *Upgrading of certificates.* A person holding an unexpired certificate may upgrade the certificate by examination to a higher grade in the same classification in accordance with 567—81.7(455B), 567—81.9(455B) and 567—81.10(455B). The expiration date of the upgraded certificate shall be the same as the unexpired certificate. A person who upgrades a certificate during the biennium must also renew the upgraded certificate in accordance with 567—81.13(455B) and 567—81.14(455B,272C) to maintain the person's certification.

567—81.16(455B) *Operator by affidavit.*

81.16(1) *Affidavit allowance.* The owner of a plant or distribution system that is required to have a Grade A, I, IL, II, IIL certified operator may sign an affidavit with a certified operator of the required classification and grade.

81.16(2) *Affidavit requirements.* This affidavit will verify that the certified operator is the operator-in-charge and has direct responsibility for a plant or distribution system that does not have first rights on the services of that operator. The affidavit form shall be provided by the director and shall require the name and signature of the certified operator, the operator's certification number, class and grade, and the date of last renewal of the operator's certificate. The affidavit form shall be proof that the certified operator has agreed to be directly responsible for the operation and maintenance of the plant or distribution system. The director may specify additional operational and maintenance requirements based on the complexity and size of the plant or distribution system. Four duly notarized copies of the affidavit must be returned to and approved by the director, based upon the ability of the certified operator to properly operate and maintain additional facilities. In event of disapproval, the owner of the plant or distribution system must terminate the agreement with the certified operator and seek the services of another certified operator. Both the owner of the plant or distribution system and the certified operator shall notify the director at least 30 days before the termination of the agreement.

567—81.17(455B,272C) Disciplinary actions.

81.17(1) *Reasons for disciplinary action.* Disciplinary action may be taken against a certified operator on any of the grounds specified in Iowa Code section 455B.219 and chapter 272C and the following more specific grounds.

a. Failure to use reasonable care or judgment or to apply knowledge or ability in performing the duties of a certified operator.

(1) Wastewater operator duties. Examples of a wastewater operator's duties are specified in the Water Environment Federation Manual of Practice #11, 1996; California State University—Sacramento (CSUS) Operation of Wastewater Treatment Plants, Volume I, 4th edition, 1998; CSUS Operation of Wastewater Treatment Plants, Volume II, 4th edition, 1998; CSUS Advanced Waste Treatment, 3rd edition, 1998; and 567—Chapters 60 through 64, 67, and 83, Iowa Administrative Code.

(2) Water treatment or distribution operator duties. Examples of a water treatment or distribution operator's duties are specified in the American Water Works Association (AWWA) Manuals of Water Supply Practice (Volumes 1, 3-7, 9, 11-12, 14, 17, 19-38, 41-42, 44-48); AWWA Water Supply Operations Series, 2nd edition: Vol. 1, 1995; Vol. 2, 1995; Vol. 3, 1996; Vol. 4, 1995; and Vol. 5, 1995; AWWA Water Distribution Operator Handbook, 2nd edition, 1976; and California State University—Sacramento (CSUS) Water Treatment Plant Operation, Volume I, 4th edition, 1999; CSUS Water Treatment Plant Operation, Volume II, 3rd edition, 1998; CSUS Small Water System Operation and Maintenance, 4th edition, 1999; CSUS Water Distribution System Operation and Maintenance, 4th edition, 2000; and 567—Chapters 40 through 43 and 83, Iowa Administrative Code.

b. Failure to submit required records of operation or other reports required under applicable permits or rules of the department, including failure to submit complete records or reports.

c. Knowingly making any false statement, representation, or certification on any application, record, report or document required to be maintained or submitted under any applicable permit or rule of the department.

d. Fraud in procuring a license.

e. Professional incompetence.

f. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the licensee's profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

g. Habitual intoxication or addiction to the use of drugs.

h. Conviction of a felony related to the profession or occupation of the licensee. A copy of the record of conviction or plea of guilty shall be conclusive evidence.

i. Fraud in representations as to skill or ability.

j. Use of untruthful or improbable statements in advertisements.

k. Willful or repeated violations of the provisions of Iowa Code chapter 272C or 455B, division III.

81.17(2) *Disciplinary sanctions.* Disciplinary sanctions may include those specified in Iowa Code section 272C.3(2) and the following:

a. *Revocation of a certificate.* Revocation may be permanent without chance of recertification or for a specified period of time.

b. *Partial revocation or suspension.* Revocation or suspension of the practice of a particular aspect of the operation of a plant or distribution system, including the restriction of operation to a particular plant or distribution system, or a particular type of plant or distribution system.

c. *Probation.* Probation under specified conditions relevant to the specific grounds for disciplinary action.

d. *Additional education, training, and examination requirements.* Additional education, training, and reexamination may be required as a condition of reinstatement.

e. *Penalties.* Civil penalties not to exceed \$1,000 may be assessed for causes identified in 81.17(1).

81.17(3) *Procedure.*

a. Initiation of disciplinary action. The department staff shall initiate a disciplinary action by conducting such lawful investigation as is necessary to establish a legal and factual basis for action. The administrator of the environmental protection commission or designee shall make a decision as to any disciplinary action based on the department staff recommendations. Except as specified by this subrule, the disciplinary action shall be initiated by a notice of intended action in accordance with rule 561—7.16(17A,455A). At any time, the licensee and the department may enter into a settlement agreement, subject to approval by the director, which provides for a disciplinary sanction.

b. Request for hearing. Notwithstanding references in 561—subrule 7.16(4), a licensee shall be deemed to have waived any right to a contested case hearing unless the licensee appeals the action and requests a hearing within 30 days of receipt of the notice of intended action. If a timely appeal is filed, further contested case procedures shall apply in accordance with 561—Chapter 7.

c. Appeal and review of proposed decision. After a contested case hearing conducted in accordance with rule 561—7.14(17A,455A), the director shall review the presiding officer's proposed decision issued in accordance with 561—subrule 7.15(3). The proposed decision shall constitute a final decision of the director and the department unless the licensee or the director and department appeal the proposed decision to the environmental protection commission within 30 days of receipt as provided in 561—subrule 7.15(5).

d. Effective date of suspension or revocation. Notwithstanding any contrary interpretation in 561—subrule 7.16(7), suspension, revocation or other disciplinary action shall be effective 30 days after receipt of the notice of intended action if the licensee fails to file a timely appeal and request for hearing. If a contested case hearing is timely requested, the disciplinary action is effective as specified in the presiding officer's proposed decision unless the licensee obtains a stay of the action in accordance with 561—subrule 7.15(7) pending a timely appeal to the environmental protection commission.

e. Emergency disciplinary action. The director may initiate an emergency suspension or other disciplinary action upon such grounds and following those procedures as provided in 561—subrule 7.16(6). The terms of the emergency order shall be effective upon service as provided in 561—subrule 7.16(7). The department shall promptly give notice of an opportunity to appeal and request a contested case hearing following the procedures as specified above.

f. Reinstatement of revoked certificates. Upon revocation of a certificate in accordance with the authority provided in Iowa Code section 455B.219 and chapter 272C, application for certification may be allowed after two years from the date of revocation unless otherwise specified in accordance with 81.17(2). Any such applicant must meet all education and experience eligibility requirements pursuant to 567—81.7(455B), and successfully complete an examination and be certified in the same manner as a new applicant.

81.17(4) Noncompliance with child support order procedures. Upon receipt of a certification of noncompliance with a child support obligation as provided in Iowa Code section 252J.7, the department will initiate procedures to deny an application for certification or renewal, or to suspend a certification in accordance with Iowa Code section 252J.8(4). The department shall issue to the person by restricted certified mail a notice of its intent to deny or suspend operator certification based on receipt of a certificate of noncompliance. The suspension or denial shall be effective 30 days after receipt of the notice unless the person provides the department with a withdrawal of the certificate of noncompliance from the child support recovery unit as provided in Iowa Code section 252J.8(4) "c." Pursuant to Iowa Code section 252J.8(4), the person does not have a right to a hearing before the department to contest the denial or suspension action under this subrule but may seek a hearing in district court in accordance with Iowa Code section 252J.9.

These rules are intended to implement Iowa Code sections 455B.211 to 455B.224 and chapter 272C.

CHAPTER 83
LABORATORY CERTIFICATION
[Prior to 4/10/96, see 567—Chapter 42]

PART A
GENERAL

567—83.1(455B) Authority, purpose, and applicability.

83.1(1) Authority. Pursuant to Iowa Code section 455B.113, a laboratory certification program is required for laboratories performing analyses of samples which are required to be submitted to the department as a result of Iowa Code provisions, rules, operation permits, or administrative orders. Pursuant to Iowa Code section 455B.114, the department may suspend or revoke the certification of a laboratory upon determination of the department that the laboratory no longer fulfills one or more of the requirements for certification.

83.1(2) Purpose. The purpose of these rules is to provide the procedures for laboratories to use to apply for certification, to establish laboratory certification fees, to maintain certification, and to provide the appropriate methods and references for evaluating laboratory competence including the requirements for laboratories to become certified.

83.1(3) Applicability to environmental program areas.

a. Water supply (drinking water). The requirements of this chapter apply to all laboratories conducting drinking water analyses pursuant to 567—Chapters 40, 41, 42, and 43. Routine, on-site monitoring for alkalinity, calcium, conductivity, residual disinfectant, orthophosphate, pH, silica, temperature, turbidity and on-site operation and maintenance-related analytical monitoring are excluded from this requirement, and may be performed by a Grade I, II, III, or IV certified operator meeting the requirements of 567—Chapter 81, any person under the supervision of a Grade I, II, III, or IV certified operator meeting the requirements of 567—Chapter 81, or a laboratory certified by the department to perform water supply analyses under this chapter.

b. Underground storage tanks. The requirements of this chapter also apply to all laboratories conducting underground storage tank analyses for petroleum constituents pursuant to 567—Chapter 135. Routine on-site monitoring conducted by or for underground storage tank owners for leak detection or a nonregulatory purpose is excluded from this requirement.

c. Wastewater. The requirements of this chapter also apply to all laboratories conducting analyses of wastewater, groundwater or sewage sludge pursuant to 567—Chapters 63, 67, and 69. Routine on-site monitoring for pH, temperature, dissolved oxygen, total residual chlorine and other pollutants that must be analyzed immediately upon sample collection, settleable solids, physical measurements such as flow and cell depth, and operational monitoring tests specified in 567—subrule 63.3(4) are excluded from this requirement.

d. Solid waste and contaminated sites. The requirements of this chapter also apply to all laboratories conducting analyses of solid waste parameters pursuant to 567—Chapters 100 through 130, contaminated site parameters pursuant to 567—Chapters 133 and 137, and regulated substances other than petroleum parameters regulated under 567—Chapter 135. Any parameter that must be analyzed immediately upon sample collection is excluded from the requirements of this chapter. Any samples collected or testing conducted that is not part of the specific monitoring required by the department for regulatory purposes are also excluded from the requirements of this chapter.

[ARC 9915B, IAB 12/14/11, effective 1/18/12]

567—83.2(455B) Definitions.

“*Certified*” means a laboratory demonstrates to the satisfaction of the department its ability to consistently produce valid data within the acceptance limits as specified within the department’s requirements for certification and meets the minimum requirements of this chapter and all applicable regulatory requirements. A laboratory may be certified for an analyte, an analytical series, or an environmental program area, except in the UST program area, where certification for individual analytes is not allowed.

“*Environmental program area*” means the water supply (drinking water) program, underground storage tank program, wastewater program, or solid waste and contaminated site program pursuant to 83.1(3).

“*Manual for the Certification of Laboratories Analyzing Environmental Samples for the Iowa Department of Natural Resources*” (2017) (Iowa Manual) is incorporated by reference in this chapter.

Chapter 1 of the Iowa Manual pertains to certification of laboratories analyzing samples of drinking water and incorporates by reference the Manual for the Certification of Laboratories Analyzing Drinking Water, 5th edition, January 2005, EPA document 815-R-05-004, January 2005; Supplement 1, June 2008, EPA 815-F-08-006; and Supplement 2, November 2012, EPA 815-F-12-006.

Chapter 2 of the Iowa Manual, (2017), pertains to laboratories analyzing samples for the underground storage tank program.

Chapter 3 of the Iowa Manual, (2017), pertains to laboratories analyzing samples for wastewater and sewage sludge disposal programs.

Chapter 4 of the Iowa Manual, (2017), pertains to laboratories analyzing samples for the solid waste and contaminated site programs.

“*Performance evaluation (PE) sample*” means a reference sample provided to a laboratory for the purpose of demonstrating that a laboratory can successfully analyze the sample within limits of performance specified by the department. The true value of the concentration of the reference material is unknown to the laboratory at the time of analysis. A PE sample may also be referred to as a proficiency testing sample or PT sample.

“*Provisional certification*” means a laboratory has deficiencies, which must be corrected within the specified time frames listed in 83.7(2) “d,” but demonstrates to the satisfaction of the department its ability to consistently produce valid data within the acceptance limits as specified within the department’s certification requirements.

“*Revoked certification*” means a laboratory no longer fulfills the requirements of this chapter, and certification is revoked by the director upon determination of the director that the laboratory no longer fulfills the requirements for certification (455B.114).

“*Suspended certification*” means a temporary suspension of certification for a laboratory, conditional upon meeting the time frames in 83.7(4) “d” for the correction of the deficiency.

“*Temporary certification*” means short-term transitional certification granted in certain circumstances when the department implements certification in a new environmental program area. [ARC 3735C, IAB 4/11/18, effective 5/16/18]

PART B CERTIFICATION PROCESS

567—83.3(455B) Application for laboratory certification.

83.3(1) Application forms. Application for laboratory certification, other than for temporary certification, shall be made on forms provided by the department and shall be accompanied by the nonrefundable fee specified in 83.3(2). The application for renewal of certification shall be made at least 60 days prior to the certification expiration date. The department may require submission of additional information necessary to evaluate the application. All required documentation must be supplied to the department prior to the on-site visit. Failure to submit a complete application may result in denial of the renewal.

83.3(2) Fees and expenses.

a. A nonrefundable fee for the administration, completion of on-site laboratory surveys and assessments, and enforcement of laboratory certification requirements shall be paid with the certification application.

(1) The on-site visit will not be conducted and certification will not be issued until the fees and expenses are paid and all other certification requirements are met. The fee for certification will not be refunded if an on-site visit is not performed.

(2) Out-of-state laboratories will be responsible for paying the expenses of an on-site visit, in addition to the standard certification fee if required, and the department or its agent will bill the out-of-state laboratory directly for the expenses.

(3) When a laboratory's certification is changed to "provisional" or "suspended" and the period for correcting deficiencies extends beyond the certification period, the laboratory must continue to pay the required fees in order to maintain its certification status.

(4) Additional fees. Additional fees will be assessed for the following, and the department or its agent will bill the laboratory directly.

1. The laboratory is responsible for paying for any additional on-site visits, at a fee of \$300 per visit. An example of this is when an additional on-site visit is required when a laboratory seeks certification for an entirely new set of parameters for which it had previously not been certified.

2. When an on-site visit is required to inspect for deficiencies that the laboratory has been required to correct, the fee is \$500 per visit.

b. Certification in multiple environmental program areas. Where a laboratory is certified for the same analyte in more than one environmental program area, the laboratory must meet all the applicable certification requirements in addition to the payment of the fees.

c. The applicable fees shall be based on the type of analytical service provided as follows:

| ANALYTICAL GROUP | REGULATORY PROGRAM & PARAMETERS ¹ | FEE |
|------------------------------|--|----------------|
| Asbestos | SDWA | \$400 |
| Basic Drinking Water | SDWA (includes total coliform bacteria, <i>E. coli</i> , heterotrophic plate count, nitrate, nitrite, and fluoride) | \$800 |
| Basic Wastewater | CWA (includes BOD5, cBOD5, total suspended solids, and ammonia) | \$400 |
| Bacteria | CWA (includes total coliform, fecal coliform, and <i>E. coli</i>) | \$800 |
| | SDWA (includes total coliform, <i>E. coli</i> , and heterotrophic plate count) | \$800 |
| | SDWA & CWA combined | \$1,300 |
| Dioxin | SDWA | \$800 |
| Effluent Toxicity Testing | CWA | \$800 |
| Inorganics, including metals | CWA metals, inorganic compounds, and physical characteristics (\$400 per analyte up to a maximum of \$1,600) | \$400 to 1,600 |
| | SDWA (includes metals, nitrate, nitrite, ammonia, cyanide, fluoride, bromate, bromide, chlorite, and total organic carbon) | \$1,600 |
| | SW/CS | \$1,600 |
| | CWA & SDWA combined | \$2,400 |
| | CWA & SW/CS combined | \$2,400 |
| | CWA, SDWA, and SW/CS combined | \$2,800 |
| Radionuclides | CWA | \$400 |
| | SDWA (includes gross alpha, gross beta, photon emitters, radium, strontium, tritium, and uranium) | \$400 |
| | SDWA & CWA combined | \$650 |

| ANALYTICAL GROUP | REGULATORY PROGRAM & PARAMETERS ¹ | FEE |
|--|---|-------------------|
| Synthetic Organic Chemicals (SOC) | CWA | \$1,600 |
| | SDWA | \$1,600 |
| | SW/CS | \$1,600 |
| | CWA & SDWA combined | \$2,400 |
| | CWA & SW/CS combined | \$2,400 |
| | CWA, SDWA, and SW/CS combined | \$2,800 |
| Volatile Organic Chemicals (VOC) | CWA | \$1,600 |
| | SDWA | \$1,600 |
| | SW/CS | \$1,600 |
| | CWA & SDWA combined | \$2,400 |
| | CWA & SW/CS combined | \$2,400 |
| | CWA, SDWA, and SW/CS combined | \$2,800 |
| Underground Storage Tank Program Methods (UST) | OA1 and OA2 for UST, CWA, & SW/CS programs | \$1,600 |
| | OA1, OA2, PAH, and Air Gas for UST, CWA, & SW/CS programs | \$2,000 |
| Other analyte ² | SDWA, CWA, UST, or SW/CS | \$400 per analyte |
