

161A.75 Use of moneys for emergency repairs.

1. The commissioners of a district may allocate moneys otherwise available for voluntary financial incentive programs as provided in section 161A.73 to provide for the restoration of permanent soil and water conservation practices which are damaged or destroyed because of a disaster emergency. In providing for the restoration, the commissioners may allocate moneys under this section for construction, reconstruction, installation, or repair projects. For each project the commissioners must determine that the allocation is necessary in order to restore permanent soil and water conservation practices in order to prevent erosion in excess of the applicable soil loss limits caused by the disaster emergency.

2. In order to allocate moneys under this section, the disaster emergency must have occurred in an area subject to a state of disaster emergency pursuant to a proclamation made by the governor as provided in section 29C.6. The commissioners shall use the moneys only to the extent that moneys from other sources, including any moneys provided by the state or federal government in response to the disaster emergency, are not adequate. The commissioners are not required to allocate the moneys on a cost-share basis.

3. Following the disaster emergency, the commissioners shall submit a report to the committee providing information regarding restoration projects and moneys allocated under this section for the projects.
