

28G.1 Purpose.

The purpose of this chapter is to allow two or more local governments to form a public service monopoly when they find that a public service monopoly is an effective means to protect the public health and welfare, and the environment through any of the following:

1. Adequate solid waste collection, transportation, storage and disposal practices which are the only effective means of allowing the construction and utilization of a resource recovery facility for the recycling of solid waste for use as an energy source.
2. The implementation of other solid waste management projects, such as source reduction and recycling, which are part of an approved comprehensive plan required under section 455B.306, and if the formation of a public service monopoly is the only effective means of accomplishing solid waste reduction and recycling. The public service monopoly shall utilize private recycling industries in the service area when possible.
