

PRIMARY ROADS

313.1 Federal and state co-operation.

The department is empowered on behalf of the state to enter into any arrangement or contract with and required by the duly constituted federal authorities, in order to secure the full co-operation of the government of the United States, and the benefit of all present and future federal allotments in aid of highway construction, reconstruction, improvement or maintenance. The good faith of the state is hereby pledged to cause to be made available each year, sufficient funds to equal the total of any sums now or hereafter apportioned to the state for road purposes by the United States government for such year, and to maintain the roads constructed with said funds.

[C24, § 4688; C27, 31, 35, § 4755-b1; C39, § **4755.01**; C46, 50, 54, 58, 62, 66, 71, 73, 75, 77, 79, 81, § 313.1]

313.2 "Road systems" defined roadside parks.

The roads and streets of the state are, for the purpose of this chapter, those roads and streets established under chapter 306.

Whenever the board of supervisors of a county and the department mutually determine that a portion of a highway under the jurisdiction of either party should be transferred to the jurisdiction of the other party, the board and department may enter into an agreement to effect such transfer. Such agreement may provide that each party may undertake or share responsibility for improving said road with the costs of such improvement to be borne entirely by either the county or the department or equitably divided between the two jurisdictions. All such improvements shall be completed and all actual costs thereof paid or reimbursed prior to the time transfer of the road is made. In carrying out such agreement, the board of supervisors may expend secondary road funds of the county and the department may expend primary road funds.

However, prior to entering into the agreement, a notice of intent to execute such agreement shall be published in a newspaper of general circulation within the county and the cost of such notice shall be jointly borne by the department and the board of supervisors. If one hundred or more residents of the county request by petition or in writing that a hearing be held in regard to such agreement within ten days after the publication of the notice, the board of supervisors and the department shall hold such a hearing not more than seven days after receiving the petition or written instrument, and based upon evidence presented at such hearing shall re-examine the merits of executing such agreement and make a decision in regard to it.

The department may, for the purpose of affording access to cities or state parks, or for the purpose of shortening the direct line of travel on important routes, or to effect connections with interstate roads at the state line, add such road or roads to the primary system.

The department, either alone or in co-operation with any county, shall have the authority to utilize any land acquired incidental to the acquisition of land for highway right of way and to also accept by gift, lands not exceeding two acres in area for roadside parks and parking areas. The department may furnish necessary maintenance. The department shall also have authority to accept by gift, equipment or other installations incidental to the use of said parks and parking areas. Said parks and parking areas shall be a part of the primary road system and the department may at its discretion sell or otherwise dispose of said lands.

Reasonable maintenance and surveillance of rest area sites and buildings located thereon shall be provided by employees of the department within the limits of appropriations provided for such purpose.

313.2A Commercial and industrial highways.

1. *Purpose.* It is the purpose of this section to enhance opportunities for the development and diversification of the state's economy through the identification and improvement of a network of commercial and industrial highways. The network shall consist of interconnected routes which provide long distance route continuity. The purpose of this highway network shall be to improve the flow of commerce; to make travel more convenient, safe, and efficient; and to better connect Iowa with regional, national, and international markets. The commission shall concentrate a major portion of its annual construction budget on this network of commercial and industrial highways. In order to ensure the greatest possible availability of funds for the improvement of the network, primary highway funds shall not be spent beyond continuing maintenance for improvements to route segments that will be bypassed by the relocation of portions of the commercial and industrial highway network.

2. *Network selection.* The commission shall identify, within the primary road system, a network of commercial and industrial highways. The commission shall consider all of the following factors in the identification of this network:

- a. The connection by the most direct routes feasible of major urban areas and regions of the state to each other and to the national system of interstate and defense highways and priority routes in adjacent states.
- b. The existence of high volumes of total traffic and commercial traffic.
- c. Long distance traffic movements.
- d. Area coverage and balance of spacing with service to major growth centers within the state.
- e. Metropolitan area bypasses consistent with metropolitan or regional area plans established through cooperation by the department and local officials.

The network of commercial and industrial highways shall not exceed two thousand five hundred miles including municipal extensions of these highways.

3. *Standards.* The department shall establish standards pertaining to the specific location, design, and access control for each segment of the commercial and industrial highways.

4. *Network development.* In establishing priorities for improvement projects, the department shall take into consideration the following additional criteria: urban area bypasses that improve urban or regional accessibility or improve corridor travel; projects consistent with regional or metropolitan transportation plans established through cooperation by the department and local officials; and the willingness of local officials to provide financial or other assistance for the development of projects.

313.3 Primary road fund.

There is hereby created a primary road fund which shall include and embrace:

1. All road use tax funds which are by law credited to the primary road fund.
