

166D.14 Pseudorabies immunization products.

A person shall not use, sell, or distribute or offer to sell or distribute a pseudorabies immunization product within the state unless the products are approved by the secretary. However, the secretary shall approve a pseudorabies immunization product for purposes of product research or testing by a biological laboratory, government authority, or manufacturer of biological products if the secretary concludes that the use will not be detrimental to the state pseudorabies disease program.

Only a licensed veterinarian may buy and dispense a department-approved immunization product. The veterinarian must report information relating to the use of the product to the department, including the name and address of the owner and the number of doses used. The report shall be signed by the owner or the owner's agent. The report shall be mailed to the department immediately after the use of the product.

A differentiable vaccinate to be classified as a noninfected animal must react negatively to field strains of pseudorabies virus as determined by a companion differentiable serologic test. The swine must be identified as differentiable vaccinated animals.
