

142.1 Delivery of bodies.

The body of every person dying in a public asylum, hospital, county care facility, penitentiary, or reformatory in this state, or found dead within the state, or which is to be buried at public expense in this state, except those buried under the provisions of chapter 249, and which is suitable for scientific purposes, shall be delivered to the medical college of the state university, or some osteopathic or chiropractic college or school located in this state, which has been approved under the law regulating the practice of osteopathy or chiropractic; but no such body shall be delivered to any such college or school if the deceased person expressed a desire during the person's last illness that the person's body should be buried or cremated, nor if such is the desire of the person's relatives. Such bodies shall be equitably distributed among said colleges and schools according to their needs for teaching anatomy in accordance with such rules as may be adopted by the Iowa department of public health. The expense of transporting said bodies to such college or school shall be paid by the college or school receiving the same. In the event the deceased person has not expressed a desire during the person's last illness that the person's body should be buried or cremated and should have no relatives that request the person's body for burial or cremation, if a friend objects to the use of the deceased person's body for scientific purposes, said deceased person's body shall be forthwith delivered to such friend for burial or cremation at no expense to the state or county. Unless such friend provides for burial and burial expenses within five days, the body shall be used for scientific purposes under this chapter.
