

136A.2 Definitions.

As used in this chapter, unless the context otherwise requires:

1. “*Attending health care provider*” means a licensed physician, nurse practitioner, certified nurse midwife, or physician assistant.
2. “*Congenital disorder*” means an abnormality existing prior to or at birth, including a stillbirth, that adversely affects the health and development of a fetus, newborn, child, or adult, including a structural malformation or a genetic, chromosomal, inherited, or biochemical disorder.
3. “*Department*” means the Iowa department of public health.
4. “*Disorder*” means a congenital or inherited disorder.
5. “*Genetics*” means the study of inheritance and how genes contribute to health conditions and the potential for disease.
6. “*Genomics*” means the functions and interactions of all human genes and their variation within human populations, including their interaction with environmental factors, and their contribution to health.
7. “*Inherited disorder*” means a condition caused by an abnormal change in a gene or genes passed from a parent or parents to their child. Onset of the disorder may be prior to or at birth, during childhood, or in adulthood.
8. “*Stillbirth*” means an unintended fetal death occurring after a gestation period of twenty completed weeks, or an unintended fetal death of a fetus with a weight of three hundred fifty or more grams.
