

554.12201 Security procedure.

“*Security procedure*” means a procedure established by agreement between a customer and a receiving bank for the purpose of verifying that a payment order or communication amending or canceling a payment order is that of the customer, or detecting error in the transmission or the content of the payment order or communication. A security procedure may require the use of algorithms or other codes, identifying words or numbers, encryption, callback procedures, or similar security devices. Comparison of a signature on a payment order or communication with an authorized specimen signature of the customer is not by itself a security procedure.
