

249A.27 Indemnity for case management and disallowed costs.

1. If the department contracts with a county or consortium of counties to provide case management services funded under medical assistance, the state shall appear and defend the department's employees and agents acting in an official capacity on the department's behalf and the state shall indemnify the employees and agents for acts within the scope of their employment. The state's duties to defend and indemnify shall not apply if the conduct upon which any claim is based constitutes a willful and wanton act or omission or malfeasance in office.

2. If the department is the case management contractor, the state shall be responsible for any costs included within the unit rate for case management services which are disallowed for medical assistance reimbursement by the federal centers for Medicare and Medicaid services. The contracting county shall be credited for the county's share of any amounts overpaid due to the disallowed costs. However, if certain costs are disallowed due to requirements or preferences of a particular county in the provision of case management services, the county shall not receive credit for the amount of the costs.
