The purpose of [this chapter](#) is to allow two or more local governments to form a public service monopoly when they find that a public service monopoly is an effective means to protect the public health and welfare, and the environment through any of the following:

1. Adequate solid waste collection, transportation, storage and disposal practices which are the only effective means of allowing the construction and utilization of a resource recovery facility for the recycling of solid waste for use as an energy source.
2. The implementation of other solid waste management projects, such as source reduction and recycling, which are part of an approved comprehensive plan required under [section 455B.306](#), and if the formation of a public service monopoly is the only effective means of accomplishing solid waste reduction and recycling. 28G.3 Creation of public service monopoly.

If two or more local governments find that the only effective means of allowing the construction and utilization of a resource recovery facility for the recycling of solid waste for use as an energy source or to implement solid waste management projects as defined in [section 28G.2](#) is to create a public service monopoly, a legal entity shall be created pursuant to [chapter 28E](#) by agreement of two or more local governments to displace competition with regulation and monopoly of a public service for the collection, transportation, storage, and disposal, or diversion of solid waste to the extent reasonably necessary to carry out these functions. The agreement is subject to approval of the environmental protection commission before it becomes effective.

A legal entity created pursuant to [chapter 28E](#) and operating under [this chapter](#) has all the rights, powers, privileges, and immunities of local governments relating to the purpose for which it is created. A legal entity operating under [this chapter](#) may:

1. Engage in, manage, own, operate, and regulate the collection, transportation, storage, and disposal or diversion of solid waste including, but not limited to, the designation of a

specific facility which must be used for the collection, transportation, storage, and disposal or diversion of solid waste within its jurisdiction or geographic area.

2. Grant permits, licenses, or franchises, exclusive or nonexclusive, or a combination of exclusive or nonexclusive franchises, to solid waste management services.

3. Enter into contracts for construction and may contract, license, or permit the construction of resource recovery facilities for recycling of solid waste for an energy source or of facilities necessary to implement solid waste management projects as defined in [section 28G.2](#).

4. Require the use of the resource recovery facilities or of facilities necessary to implement solid waste management projects as defined in [section 28G.2](#), by any person who can be effectively served by the facilities. However, [this subsection](#) does not prohibit a private agency from dumping or depositing solid waste resulting from its own residential, farming, manufacturing, mining, or commercial activities on land owned or leased by it if the action does not violate any statute of this state or rules adopted by the environmental protection commission or local boards of health or local ordinances.
