

**476.95 Findings — statement of policy.**

The general assembly finds all of the following:

1. Communications services should be available throughout the state at just, reasonable, and affordable rates from a variety of providers.
2. In rendering decisions with respect to regulation of telecommunications companies, the board shall consider the effects of its decisions on competition in telecommunications markets and, to the extent reasonable and lawful, shall act to further the development of competition in those markets.
3. In order to encourage competition for all telecommunications services, the board should address issues relating to the movement of prices toward cost and the removal of subsidies in the existing price structure of the incumbent local exchange carrier.
4. Regulatory flexibility is appropriate when competition provides customers with competitive choices in the variety, quality, and pricing of communications services, and when consistent with consumer protection and other relevant public interests.
5. The board should respond with speed and flexibility to changes in the communications industry.
6. Economic development can be fostered by the existence of advanced communications networks.
