

CHAPTER 18B

LAND USE — SMART PLANNING

18B.1	Iowa smart planning principles.	18B.2	Local comprehensive planning and development guidelines.
-------	---------------------------------	-------	----------------------------------------------------------

18B.1 Iowa smart planning principles.

State agencies, local governments, and other public entities shall consider and may apply the following principles during deliberation of all appropriate planning, zoning, development, and resource management decisions, except that nothing in [this section](#) shall be construed to expand the eminent domain authority of a state agency, local government, or other public entity beyond that which is authorized under [chapter 6A](#) or [6B](#):

1. *Collaboration.* Governmental, community, and individual stakeholders, including those outside the jurisdiction of the entity, are encouraged to be involved and provide comment during deliberation of planning, zoning, development, and resource management decisions and during implementation of such decisions. The state agency, local government, or other public entity is encouraged to develop and implement a strategy to facilitate such participation.

2. *Efficiency, transparency, and consistency.* Planning, zoning, development, and resource management should be undertaken to provide efficient, transparent, and consistent outcomes. Individuals, communities, regions, and governmental entities should share in the responsibility to promote the equitable distribution of development benefits and costs.

3. *Clean, renewable, and efficient energy.* Planning, zoning, development, and resource management should be undertaken to promote clean and renewable energy use and increased energy efficiency.

4. *Occupational diversity.* Planning, zoning, development, and resource management should promote increased diversity of employment and business opportunities, promote access to education and training, expand entrepreneurial opportunities, and promote the establishment of businesses in locations near existing housing, infrastructure, and transportation.

5. *Revitalization.* Planning, zoning, development, and resource management should facilitate the revitalization of established town centers and neighborhoods by promoting development that conserves land, protects historic resources, promotes pedestrian accessibility, and integrates different uses of property. Remediation and reuse of existing sites, structures, and infrastructure is preferred over new construction in undeveloped areas.

6. *Housing diversity.* Planning, zoning, development, and resource management should encourage diversity in the types of available housing, support the rehabilitation of existing housing, and promote the location of housing near public transportation and employment centers.

7. *Community character.* Planning, zoning, development, and resource management should promote activities and development that are consistent with the character and architectural style of the community and should respond to local values regarding the physical character of the community.

8. *Natural resources and agricultural protection.* Planning, zoning, development, and resource management should emphasize protection, preservation, and restoration of natural resources, agricultural land, and cultural and historic landscapes, and should increase the availability of open spaces and recreational facilities.

9. *Sustainable design.* Planning, zoning, development, and resource management should promote developments, buildings, and infrastructure that utilize sustainable design and construction standards and conserve natural resources by reducing waste and pollution through efficient use of land, energy, water, air, and materials.

10. *Transportation diversity.* Planning, zoning, development, and resource management should promote expanded transportation options for residents of the community.

Consideration should be given to transportation options that maximize mobility, reduce congestion, conserve fuel, and improve air quality.

2010 Acts, ch 1184, §17

Referred to in §16.194A, 18B.2, 281.4, 329.3, 335.5, 414.3

18B.2 Local comprehensive planning and development guidelines.

1. For the purposes of [this chapter](#), unless the context otherwise requires:

a. (1) “*Development*” means any of the following:

(a) Construction, reconstruction, renovation, mining, extraction, dredging, filling, excavation, or drilling activity or operation.

(b) Man-made changes in the use or appearance of any structure or in the land itself.

(c) The division or subdivision of land.

(d) Any change in the intensity of use or the use of land.

(2) “*Development*” does not include any of the following:

(a) Activities on or uses of agricultural land, farm houses, or agricultural buildings or structures, unless such buildings or structures are located in the flood plain of a river or stream.

(b) Installation, operation, and maintenance of soil and water conservation practices.

(c) The choice of crops or a change in the choice of crops on agricultural land.

b. “*Land development regulations*” means zoning, subdivision, site plan, corridor map, floodplain, or storm water ordinances, rules, or regulations, or other governmental controls that affect the use of property.

c. “*Municipality*” means a city or a county.

2. A municipality shall consider the smart planning principles under [section 18B.1](#) and may include the following information, if applicable, when developing or amending a comprehensive plan under [chapter 335](#) or [chapter 414](#) or when developing or amending other local land development regulations:

a. Information relating to public participation during the creation of the comprehensive plan or land development regulations, including documentation of the public participation process, a compilation of objectives, policies, and goals identified in the public comment received, and identification of the groups or individuals comprising any work groups or committees that were created to assist the planning and zoning commission or other appropriate decision-making body of the municipality.

b. Information relating to the primary characteristics of the municipality and a description of how each of those characteristics impacts future development of the municipality. Such information may include historical information about the municipality, the municipality’s geography, natural resources, natural hazards, population, demographics, types of employers and industry, labor force, political and community institutions, housing, transportation, educational resources, and cultural and recreational resources. The comprehensive plan or land development regulations may also identify characteristics and community aesthetics that are important to future development of the municipality.

c. Objectives, information, and programs that identify current land uses within the municipality and that guide the future development and redevelopment of property, consistent with the municipality’s characteristics identified under paragraph “b”. The comprehensive plan or land development regulations may include information on the amount, type, intensity, and density of existing land use, trends in the market price of land used for specific purposes, and plans for future land use throughout the municipality. The comprehensive plan or land development regulations may identify and include information on property that has the possibility for redevelopment, a map of existing and potential land use and land use conflicts, information and maps relating to the current and future provision of utilities within the municipality, information and maps that identify the current and future boundaries for areas reserved for soil conservation, water supply conservation, flood control, and surface water drainage and removal. Information provided under this paragraph may also include an analysis of the current and potential impacts on local watersheds and air quality.

d. Objectives, policies, and programs to further the vitality and character of established

residential neighborhoods and new residential neighborhoods and plans to ensure an adequate housing supply that meets both the existing and forecasted housing demand. The comprehensive plan or land development regulations may include an inventory and analysis of the local housing stock and may include specific information such as age, condition, type, market value, occupancy, and historical characteristics of all the housing within the municipality. The comprehensive plan or land development regulations may identify specific policies and programs that promote the development of new housing and maintenance or rehabilitation of existing housing and that provide a range of housing choices that meet the needs of the residents of the municipality.

e. Objectives, policies, and programs to guide future development of sanitary sewer service, storm water management, water supply, solid waste disposal, wastewater treatment technologies, recycling facilities, and telecommunications facilities. The comprehensive plan or land development regulations may include estimates regarding future demand for such utility services.

f. Objectives, policies, and programs to guide the future development of a safe, convenient, efficient, and economical transportation system. Plans for such a transportation system may be coordinated with state and regional transportation plans and take into consideration the need for diverse modes of transportation, accessibility, improved air quality, and interconnectivity of the various modes of transportation.

g. Objectives, policies, and programs to promote the stabilization, retention, or expansion of economic development and employment opportunities. The comprehensive plan or land development regulations may include an analysis of current industries and economic activity and identify economic growth goals for the municipality. The comprehensive plan or land development regulations may also identify locations for future brownfield or grayfield development.

h. Objectives, policies, and programs addressing preservation and protection of agricultural and natural resources.

i. Objectives, policies, and programs to assist future development of educational facilities, cemeteries, health care facilities, child care facilities, law enforcement and fire protection facilities, libraries, and other governmental facilities that are necessary or desirable to meet the projected needs of the municipality.

j. Objectives, policies, and programs to identify characteristics and qualities that make the municipality unique and that are important to the municipality's heritage and quality of life.

k. Objectives, policies, and programs that identify the natural and other hazards that have the greatest likelihood of impacting the municipality or that pose a risk of catastrophic damage as such hazards relate to land use and development decisions, as well as the steps necessary to mitigate risk after considering the local hazard mitigation plan approved by the federal emergency management agency.

l. Objectives, policies, and programs for joint planning and joint decision making with other municipalities or governmental entities, including school districts and drainage districts, for siting and constructing public facilities and sharing public services. The comprehensive plan or land development regulations may identify existing or potential conflicts between the municipality and other local governments related to future development of the municipality and may include recommendations for resolving such conflicts. The comprehensive plan or land development regulations may also identify opportunities to collaborate and partner with neighboring jurisdictions and other entities in the region for projects of mutual interest.

m. A compilation of programs and specific actions necessary to implement any provision of the comprehensive plan, including changes to any applicable land development regulations, official maps, or subdivision ordinances.

3. A municipality's comprehensive plan developed using the guidelines under this section shall address prevention and mitigation of, response to, and recovery from a catastrophic flood.
