The investment programs developed by companies shall take into account the safety of the company’s principal, investment yield and return, stability in the value of the investment, and liquidity necessary to meet the company’s expected business needs and investment diversification.

1. United States government obligations.
   a. Bonds or other evidences of indebtedness issued, assumed, or guaranteed by the United States of America, or by any agency or instrumentality of the United States of America.

2. State, District of Columbia, territorial and municipal obligations. Bonds or other evidences of indebtedness issued, assumed, or guaranteed by the District of Columbia, or by any state, insular or territorial possession of the United States of America, or by any county, city, town, school, road, drainage, or other district located within any state, or insular or territorial possession of the United States of America, or by any civil subdivision or governmental authority of any such state, or insular or territorial possession, or by any instrumentality of any such state, or insular or territorial possession, civil subdivision, or governmental authority; provided that the obligations are valid, legally authorized and issued.
