

321B.3 Advanced driver assistance systems.

1. Prior to repairing or replacing damaged motor vehicle glass for an insured person, a motor vehicle glass repair shop shall notify the insured person whether the motor vehicle has an advanced driver assistance system. If the motor vehicle has an advanced driver assistance system, the shop shall also notify the insured person of all of the following:

a. Whether calibration or recalibration of the motor vehicle's advanced driver assistance system is needed after a windshield repair or replacement, in accordance with the vehicle manufacturer's recommendations.

b. Whether the shop intends to calibrate or recalibrate the advanced driver assistance system in a manner that meets the motor vehicle manufacturer's specifications.

c. If the shop is not capable of performing, or does not intend to perform, a calibration or recalibration, the shop shall advise the insured person to take the motor vehicle to the vehicle manufacturer's certified dealership or a qualified specialist capable of performing the calibration or recalibration.

2. If calibration or recalibration of the motor vehicle's advanced driver assistance system is performed, the shop shall provide notice to the insured person of whether the calibration or recalibration was successful. If the calibration or recalibration was not successful, the shop shall advise the insured person to take the motor vehicle to the vehicle manufacturer's certified dealership or a qualified specialist capable of performing the calibration or recalibration.
