(1) If, because of the emergent nature of the patient's condition, a delay in order to provide a written directive would jeopardize the patient's health, an oral directive is acceptable.

(2) The information contained in the oral directive must be documented as soon as possible in writing in the patient's record. A written directive must be prepared within 48 hours of the oral directive.

b. Prior to administration, a written directive must contain the patient's or human research subject's name and the following information:

(1) For any administration of quantities greater than 30 microcuries of sodium iodide I-131: the dosage;

(2) For a therapeutic administration of a radiopharmaceutical other than sodium iodide I-131: the radiopharmaceutical, dosage, and route of administration;

(3) For gamma stereotactic radiosurgery: the total dose, treatment site, and values for the target coordinate setting per treatment for each anatomically distinct treatment site;

(4) For teletherapy: the total dose, dose per fraction, number of fractions, treatment site, and overall treatment period;

(5) For high-dose-rate remote afterloading brachytherapy: the radionuclide, treatment site, dose per fraction, number of fractions and total dose;

(6) For permanent implant brachytherapy:

1. Before implantation: the treatment site, the radionuclide, and the total source strength; and

2. After implantation but before the patient leaves the post-treatment recovery area: the treatment site, the number of sources implanted, the total source strength implanted, and the date; or

(7) For all other brachytherapy, including low-, medium-, and pulsed-dose-rate remote afterloaders:

1. Prior to implantation: treatment site, the radionuclide, and dose; and

2. After implantation but prior to completion of the procedure: the radionuclide, treatment site, number of sources, total source strength and exposure time (or, equivalently, the total dose), and date;

(8) For therapeutic use of radiation machines, see 41.3(14).

c. Prior to each administration, the patient's or human research subject's identity is verified by more than one method as the individual named in the written directive.

d. The final plans of treatment and related calculations for brachytherapy, teletherapy, and gamma stereotactic radiosurgery are in accordance with the respective written directives.

e. Each administration is in accordance with the written directive through checking both manual and computer-generated dose calculations and verifying that any computer-generated dose calculations are correctly transferred into the consoles of the medical units authorized by 641—Chapter 41.

f. Determine if a reportable medical event, as described in 641—38.2(136C), has occurred.

g. Determine, for a permanent implant brachytherapy, within 60 calendar days from the date the implant was performed, the total source strength administered outside of the treatment site compared to the total source strength documented in the postimplantation portion of the written directive, unless a written justification of patient unavailability is documented.

h. A written revision to an existing written directive may be made if the revision is dated and signed by an authorized user before the administration of the dosage of unsealed byproduct material, the brachytherapy dose, the gamma stereotactic radiosurgery dose, the teletherapy dose, or the next fractional dose.

(1) If, because of the patient's condition, a delay in order to provide a written revision to an existing written directive would jeopardize the patient's health, an oral revision to an existing written directive is acceptable.

(2) The oral revision must be documented as soon as possible in the patient's record. A revised written directive must be signed by the authorized user within 48 hours of the oral revision.

i. A copy of the written directive in auditable form shall be retained for three years after the date of administration.

41.2(88) *Other medical uses of byproduct material or radiation from byproduct material.* A licensee may use byproduct material or a radiation source approved for medical use which is not specifically addressed in 641—41.2(136C) (e.g., Y-90 microspheres, liquid brachytherapy, intravascular brachytherapy) if:

- a.* The applicant or licensee has submitted the information required by the agency; and
- b.* The applicant or licensee has received written approval from the agency in a license or license amendment and uses the material in accordance with the regulations and specific conditions the agency considers necessary for the medical use of the material.

41.2(89) *Training for the parenteral administration of unsealed byproduct material requiring a written directive.*

a. Except as provided in 41.2(75), the licensee shall require an authorized user for the parenteral administration requiring a written directive to be a physician who:

(1) Is an authorized user under 41.2(69) for parenteral administration uses listed in 41.2(69) "b"(1) "2," seventh bulleted paragraph, or equivalent NRC or agreement state requirements; or

(2) Is an authorized user under 41.2(70) or 41.2(73) or equivalent NRC or agreement state requirements, and who meets the requirements in 41.2(89) "b"; or

(3) Is certified by a medical specialty board whose certification process has been recognized by the NRC or an agreement state under 41.2(70) or 41.2(73) and who meets the requirements in 41.2(89) "b"; or

b. The physician:

(1) Has successfully completed 80 hours of classroom and laboratory training, applicable to parenteral administrations listed in 41.2(69) "b"(1) "2," seventh bulleted paragraph. The training must include:

- 1. Radiation physics and instrumentation;
- 2. Radiation protection;
- 3. Mathematics pertaining to the use and measurement of radioactivity;
- 4. Chemistry of radioactive material for medical use; and
- 5. Radiation biology; and

(2) Has work experience, under the supervision of an authorized user who meets the requirements in 41.2(69), 41.2(75) or 41.2(89) or equivalent NRC or agreement state requirements, in the parenteral administration listed in 41.2(69) "b"(1) "2," seventh bulleted paragraph. A supervising authorized user who meets the requirements in 41.2(69), 41.2(89), or equivalent NRC or agreement state requirements must have experience in administering dosages in the same category or categories as the individual requesting authorized user status. The work experience must involve:

- 1. Ordering, receiving, and unpacking radioactive materials safely, and performing the related radiation surveys;
- 2. Performing quality control procedures on instruments used to determine the activity of dosages, and performing checks for proper operation of survey meters;
- 3. Calculating, measuring, and safely preparing patient or human research subject dosages;
- 4. Using administrative controls to prevent a medical event involving the use of unsealed byproduct material;
- 5. Using procedures to contain spilled byproduct material safely, and using proper decontamination procedures; and

6. Administering dosages to patients or human research subjects, that include at least three cases involving the parenteral administration as specified in 41.2(69) “b”(1)“2,” seventh bulleted paragraph; and

(3) Has obtained written attestation that the individual has satisfactorily completed the requirements in 41.2(89)“b”(1) or (2), and is able to independently fulfill the radiation safety-related duties as an authorized user for the parenteral administration of unsealed byproduct material requiring a written directive. The attestation must be obtained from either:

1. A preceptor authorized user who meets the requirements in 41.2(69), 41.2(75) or 41.2(89) or equivalent NRC or agreement state requirements. A preceptor authorized user who meets the requirements in 41.2(69), 41.2(89) or equivalent NRC or agreement state requirements must have experience in administering dosages in the same category or categories as the individual requesting authorized user status; or

2. A residency program director who affirms in writing that the attestation represents the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in 41.2(69), 41.2(75), 41.2(89), or equivalent NRC or agreement state requirements; has experience in administering dosages in the same dosage category or categories as the individual requesting authorized user status; and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association and must include training and experience specified in 41.2(89)“b”(1) and (2).

641—41.3(136C) Therapeutic use of radiation machines.

41.3(1) Scope and applicability.

a. This subrule establishes requirements, for which the registrant is responsible, for use of therapeutic radiation machines.

b. The use of therapeutic radiation machines shall be by, or under the supervision of, a physician who meets the training/experience criteria established by 41.3(5).

c. Unless specifically required otherwise by 641—41.3(136C), all registrants are subject to the requirements of 641—Chapters 38 to 40.

41.3(2) Definitions. In addition to the definitions provided in 641—38.2(136C) and 641—40.2(136C), the following definitions are specific to 641—41.3(136C).

“Accessible surface” means surface of equipment or of an equipment part that can be easily or accidentally touched by persons without the use of a tool.

“Added filtration” means any filtration which is in addition to the inherent filtration.

“Beam-limiting device” means a field defining collimator, integral to the therapeutic radiation machine, which provides a means to restrict the dimensions of the useful beam.

“Beam-scattering foil” means a thin piece of material (usually metallic) placed in the beam to scatter a beam of electrons in order to provide a more uniform electron distribution in the useful beam.

“Bent beam linear accelerator” means a linear accelerator geometry in which the accelerated electron beam must change direction by passing through a bending magnet.

“Contact therapy system” means a therapeutic radiation machine with a short target-to-skin distance (TSD), usually less than 5 centimeters.

“Dose monitor unit (DMU)” means a unit response from the beam monitoring system from which the absorbed dose can be calculated.

“External beam radiation therapy” means therapeutic irradiation in which the source of radiation is at a distance from the body.

“Field flattening filter” means a filter used to homogenize the absorbed dose rate over the radiation field.

“Filter” means material placed in the useful beam to change beam quality or its intensity profile in therapeutic radiation machines.

“Gantry” means that part of a radiation therapy system supporting and allowing movements of the radiation head around a center of rotation.

“Interruption of irradiation” means the stopping of irradiation with the possibility of continuing irradiation without resetting of operating conditions at the control panel.

“Isocenter” means the center of the sphere through which the useful beam axis passes while the gantry moves through its full range of motions.

“Megavolt (MV) (mega electron volt (MeV))” means the energy equal to that acquired by a particle with one electron charge in passing through a potential difference of 1 million volts in a vacuum. (Note: Current convention is to use MV for photons and MeV for electrons.)

“Monitor unit (MU).” See “Dose monitor unit.”

“Moving beam radiation therapy” means radiation therapy with continuous displacement of one or more mechanical axes relative to the patient during irradiation. It includes arc therapy, skip therapy, conformal therapy, intensity modulation, and rotational therapy.

“Nominal treatment distance” means:

1. For electron irradiation, the distance from the scattering foil, virtual source, or exit window of the electron beam to the entrance surface of the irradiated object along the central axis of the useful beam.
2. For X-ray irradiation, the virtual source or target to isocenter distance along the central axis of the useful beam. For nonisocentric equipment, this distance shall be that specified by the manufacturer.

“Periodic quality assurance check” means a procedure which is performed to ensure that a previous calibration continues to be valid.

“Practical range of electrons” corresponds to classical electron range where the only remaining contribution to dose is from bremsstrahlung X-rays. A further explanation may be found in “Clinical Electron Beam Dosimetry: Report of AAPM Radiation Therapy Committee Task Group 25” (Medical Physics 18(1): 73-109, Jan/Feb 1991) and ICRU Report 35, “Radiation Dosimetry: Electron Beams with Energies Between 1 and 50 MeV,” International Agency on Radiation Units and Measurements, September 15, 1984.

“Radiation field.” See “Useful beam.”

“Radiation head” means the structure from which the useful beam emerges.

“Radiation therapy physicist” means an individual qualified in accordance with 41.3(6).

“Redundant beam monitoring system” means a combination of two dose monitoring systems in which each system is designed to terminate irradiation in accordance with a preselected number of dose monitor units.

“Shadow tray” means a device attached to the radiation head to support auxiliary beam blocking material.

“Stationary beam radiation therapy” means radiation therapy without displacement of one or more mechanical axes relative to the patient during irradiation.

“Target” means that part of an X-ray tube or accelerator onto which is directed a beam of accelerated particles to produce ionizing radiation or other particles.

“Tenth-value layer (TVL)” means the thickness of a specified material which attenuates X-radiation or gamma radiation to an extent such that the air kerma rate, exposure rate or absorbed dose rate is reduced to one-tenth of the value measured without the material at the same point.

“Therapeutic radiation machine” means X-ray or electron-producing equipment designed and used for external beam radiation therapy.

“Virtual source” means a point from which radiation appears to originate.

41.3(3) Registration or license requirements. No person shall receive, possess, use, transfer, own, or acquire therapeutic radiation machines except as authorized in a registration issued pursuant to 641—39.1(136C) to 641—39.4(136C).

41.3(4) General administrative requirements for facilities using therapeutic radiation machines.

a. Administrative controls. The registrant shall be responsible for directing the operation of the therapeutic radiation machines which have been registered with the agency. The registrant or the registrant’s agent shall ensure that the requirements of 641—41.3(136C) are met in the operation of the therapeutic radiation machine(s).

b. A therapeutic radiation machine which does not meet the provisions of these regulations shall not be used for irradiation of patients unless authorized by the agency.

41.3(5) Training for external beam radiation therapy authorized users. The registrant for any therapeutic radiation machine subject to 41.3(17) or 41.3(18) shall require the authorized user to be a physician who:

a. Is certified in:

- (1) Radiology or therapeutic radiology by the American Board of Radiology; or
- (2) Radiation oncology by the American Osteopathic Board of Radiology; or
- (3) Radiology, with specialization in radiotherapy, as a British “Fellow of the Faculty of Radiology” or “Fellow of the Royal College of Radiology”; or
- (4) Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or

b. Is in the active practice of therapeutic radiology, and has completed 200 hours of instruction in basic radiation techniques applicable to the use of an external beam radiation therapy unit, 500 hours of supervised work experience, and a minimum of three years of supervised clinical experience.

c. To satisfy the requirement for instruction in 41.3(5) “b” above, the classroom and laboratory training shall include:

- (1) Radiation physics and instrumentation;
- (2) Radiation protection;
- (3) Mathematics pertaining to the use and measurement of ionization radiation; and
- (4) Radiation biology.

d. To satisfy the requirement for supervised work experience in 41.3(4) “b” above, training shall be under the supervision of an authorized user and shall include:

- (1) Reviewing the full calibration measurements and periodic quality assurance checks;
- (2) Evaluating prepared treatment plans and calculation of treatment times/patient treatment settings;
- (3) Using administrative controls to prevent misadministrations;
- (4) Implementing emergency procedures to be followed in the event of the abnormal operation of an external beam radiation therapy unit or console; and
- (5) Checking and using radiation survey meters.

e. To satisfy the requirement for a period of supervised clinical experience, training shall include one year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association and an additional two years of clinical experience in therapeutic radiology under the supervision of an authorized user. The supervised clinical experience shall include:

- (1) Examining individuals and reviewing their case histories to determine their suitability for external beam radiation therapy treatment, and any limitations/contraindications;
- (2) Selecting proper dose and how it is to be administered;
- (3) Calculating the external beam radiation therapy doses and collaborating with the authorized user in the review of patients’ progress; consideration of the need to modify originally prescribed doses or treatment plans as warranted by patients’ reaction to radiation; and
- (4) Postadministration follow-up and review of case histories.

f. Notwithstanding the requirements of 41.3(5) “b,” the registrant for any therapeutic radiation machine subject to 41.3(17) and 41.3(18) may also submit the training of the prospective authorized user physician for agency review.

g. A physician shall not act as an authorized user for any therapeutic radiation machine until such time as said physician’s training has been reviewed and approved by the registrant.

41.3(6) Training for radiation therapy physicist. The registrant for any therapeutic radiation machine subject to 41.3(17) or (18) shall require the radiation therapy physicist to:

a. Be registered with the agency, under the provisions of 641—subrule 39.3(3) of these regulations, as a provider of radiation services in the area of calibration and compliance surveys of external beam radiation therapy units; and

b. Be certified by the American Board of Radiology in:

- (1) Therapeutic radiological physics; or

- (2) Roentgen-ray and gamma-ray physics; or
- (3) X-ray and radium physics; or
- (4) Radiological physics; or
- (5) Therapeutic medical physics; or
- c. Be certified by the American Board of Medical Physics in radiation oncology physics; or
- d. Be certified by the Canadian College of Physicists in Medicine; or
- e. Hold a master's or doctor's degree in physics, biophysics, radiological physics, or health physics, and have completed one year of full-time training in therapeutic radiological physics and also one year of full-time work experience under the supervision of a radiation therapy physicist at a medical institution. To meet this requirement, the individual shall have performed the tasks listed in 41.3(16) "a," 41.3(17) "c" and "d," and 41.3(18) "e" and "f" under the supervision of a radiation therapy physicist during the year of work experience.

41.3(7) Qualifications of operators. Individuals who will be operating a therapeutic radiation machine for medical use shall be adequately instructed in the safe operating procedures and hold a current permit to practice in radiation therapy as a radiation therapist under the provisions of 641—Chapter 42. The permit holder shall make the permit available at the individual's place of employment. If the permit holder works at more than one facility, a duplicate of the permit shall be kept at each facility.

41.3(8) Written safety procedures and rules shall be developed by a radiation therapy physicist and shall be available in the control area of a therapeutic radiation machine, including any restrictions required for the safe operation of the particular therapeutic radiation machine. The operator shall be able to demonstrate familiarity with these rules. All individuals associated with the operation of a therapeutic radiation machine shall be instructed in and shall comply with procedures for maintaining written directives.

41.3(9) Individuals shall not be exposed to the useful beam except for medical therapy purposes and unless such exposure has been ordered in writing by a physician. This provision specifically prohibits deliberate exposure of an individual for training, demonstration or other non-healing arts purposes.

41.3(10) Records of visiting authorized users. Notwithstanding the provisions of 41.3(5), a registrant may permit any physician to act as a visiting authorized user for up to 60 days per calendar year under the following conditions:

- a. The visiting authorized user has the prior written permission of the registrant's management and, if the use occurs on behalf of an institution, the institution's radiation safety committee;
- b. The visiting authorized user meets the requirements of 41.3(5); and
- c. The registrant maintains copies of all records specified in 41.3(5) for five years from the date of the last visit.

41.3(11) Information and maintenance record and associated information. The registrant shall maintain the following information in a separate file or package for each therapeutic radiation machine for inspection by the agency:

- a. Report of acceptance testing;
- b. Records of all surveys, calibrations, and periodic quality assurance checks of the therapeutic radiation machine required by 641—41.3(136C), as well as the name(s) of person(s) who performed such activities;
- c. Records of maintenance or modifications, or both, performed on the therapeutic radiation machine after July 9, 1997, as well as the name(s) of person(s) who performed such services;
- d. Signature of person authorizing the return of therapeutic radiation machine to clinical use after service, repair, or upgrade.
- e. Records of training specified in 41.3(5) and 41.3(6).

41.3(12) Records retention. All records required by 641—41.3(136C) shall be retained until disposal is authorized by the agency unless another retention period is specifically authorized in 641—41.3(136C). All required records shall be retained in an active file from at least the time of generation until the next agency inspection. Any required record generated before the last agency inspection may be microfilmed or otherwise archived as long as a complete copy can be retrieved until such time the agency authorizes final disposal.

41.3(13) Reserved.

41.3(14) Written directives. Each registrant shall meet the following:

a. A written directive must be dated and signed by an authorized user prior to the administration of radiation.

(1) If, because of the patient's condition, a delay in the order to provide a written revision to an existing directive would jeopardize the patient's health, an oral revision to an existing written directive will be acceptable, provided that the oral revision is documented as soon as possible in writing in the patient's record and a revised written directive is signed by an authorized user within 48 hours of the oral revision.

(2) The written directive must contain the patient or human research subject's name, the type and energy of the beam, the total dose, dose per fraction, treatment site, and number of fractions.

(3) A written revision to an existing written directive may be made provided that the revision is dated and signed by an authorized user prior to the administration of the external beam dose, or the next fractional dose.

(4) The registrant shall retain a copy of the written directive for three years.

b. Procedures for administration. The registrant shall have written procedures that provide the following information:

(1) Prior to the administration of each course of radiation treatment, the patient's or human research subject's identity is verified by more than one method as the individual named in the written directive;

(2) Each administration is in accordance with the written directive;

(3) External beam radiation therapy final plans of treatment and related calculations are in accordance with the respective written directives by:

1. Checking both manual and computer-generated dose calculations to verify that they are correct and in accordance with the written directive; and

2. Verifying that any computer-generated calculations are correctly transferred into the consoles of authorized therapeutic medical units;

(4) Any unintended deviation from the written directive is identified, evaluated and appropriate action is taken; and

(5) The registrant retains a copy of the procedures for administrations for the duration of the registration.

41.3(15) Reports and notifications of misadministrations.

a. A registrant shall report any event resulting from intervention of a patient or human research subject in which the administration of external beam radiation results, or will result, in unintended permanent functional damage to an organ or a physiological system as determined by a physician.

b. Other than events that result from intervention by a patient or human research subject, a registrant shall report any event in which the administration of an external beam radiation therapy dose results in:

(1) A dose that differs from the prescribed dose by more than 5 rem (0.05 sievert) effective dose equivalent, 50 rem (0.5 sievert) to an organ or tissue, or 50 rem (0.5 sievert) shallow dose equivalent to the skin, and either:

1. The total dose delivered differs from the prescribed dose by 20 percent or more; or

2. The fractionated dose delivered differs from the prescribed dose for a single fraction by 50 percent or more.

(2) A dose that exceeds 5 rem (0.05 sievert) effective dose equivalent, 50 rem (0.5 sievert) to an organ or tissue, or 50 rem (0.5 sievert) shallow dose equivalent to the skin from either of the following:

1. An administration of the wrong treatment modality;

2. An administration to the wrong individual or human research subject.

(3) A dose to the skin or an organ or tissue other than the treatment site that exceeds by 50 rem (0.5 sievert) to an organ or tissue and 50 percent or more of the dose expected from the administration defined in the written directive.

c. The registrant shall notify the agency by telephone no later than the next calendar day after the discovery of a misadministration.

d. The registrant shall submit a written report to the agency within 15 days after the discovery of a misadministration. The written report shall include:

- (1) The registrant's name;
- (2) The name of the prescribing physician;
- (3) A brief description of the event;
- (4) Why the event occurred;
- (5) The effect, if any, on the individual or individuals who received the misadministration;
- (6) Actions, if any, that have been taken, or are planned, to prevent recurrence;
- (7) Certification that the registrant notified the individual or the individual's responsible relative or guardian, and if not, why not.

e. The report to the agency shall not contain the individual's name or any other information that could lead to the identification of the individual.

f. The registrant shall provide notification of the event to the referring physician and also notify the individual who is the subject of the misadministration no later than 24 hours after its discovery, unless the referring physician personally informs the registrant either that the referring physician will inform the individual or that, based on medical judgment, the physician's telling the individual would be harmful. The registrant is not required to notify the individual without first consulting the referring physician. If the referring physician or the affected individual cannot be reached within 24 hours, the registrant shall notify the individual as soon as possible thereafter. The registrant may not delay any appropriate medical care for the individual, including any necessary remedial care as a result of the misadministration, because of any delay in notification. To meet the requirements of this paragraph, the notification of the individual who is the subject of the misadministration may be made instead to that individual's responsible relative or guardian. If a verbal notification is made, the registrant shall inform the individual, or appropriate responsible relative or guardian, that a written description of the event may be obtained from the registrant upon request. The registrant shall provide such a written description if requested.

g. Aside from the notification requirement, nothing in this subrule affects any rights or duties of registrants and physicians in relation to each other, to individuals affected by the misadministration, or to individuals' responsible relatives or guardians.

h. A copy of the record required in this subrule shall be provided to the referring physician, if other than the registrant, within 15 days after discovery of the misadministration.

i. Records of misadministrations. A registrant shall retain a record of misadministrations reported in this subrule for three years. The record must contain the following:

- (1) The registrant's name and the names of the individuals involved;
- (2) The social security number or other identification number, if one has been assigned, of the individual who is the subject of the misadministration;
- (3) A brief description of the event; why it occurred; and the effect, if any, on the individual;
- (4) The actions, if any, taken or planned to prevent recurrence; and
- (5) Whether the registrant notified the individual or the individual's responsible relative or guardian, and, if not, whether such failure to notify was based on guidance from the referring physician.

41.3(16) General technical requirements for facilities using therapeutic radiation machines.

a. Protection surveys.

(1) The registrant shall ensure that radiation protection surveys of all new facilities, and existing facilities not previously surveyed, are performed with an operable radiation measurement survey instrument calibrated within the past 12 months. The radiation protection survey shall be performed by, or under the direction of, a radiation therapy physicist or a certified health physicist and shall verify that, with the therapeutic radiation machine in a "BEAM-ON" condition, with the largest clinically available treatment field and with a scattering phantom in the useful beam of radiation:

1. Radiation levels in restricted areas are not likely to cause personnel exposures in excess of the limits specified in 641—subrule 40.15(1); and

2. Radiation levels in unrestricted areas do not exceed the limits specified in 641—paragraphs 40.26(1) "a" and "b."

(2) In addition to the requirements of 41.3(16) "a"(1), a radiation protection survey shall also be performed prior to any subsequent medical use and:

1. After making any change in the treatment room shielding;

2. After making any change in the location of the therapeutic radiation machine within the treatment room;

3. After relocating the therapeutic radiation machine; or

4. Before using the therapeutic radiation machine in a manner that could result in increased radiation levels in areas outside the external beam radiation therapy treatment room.

(3) The survey record shall indicate all instances where the facility, in the opinion of the radiation therapy physicist or a certified health physicist, is in violation of applicable regulations. The survey record shall also include the date of the measurements, the reason the survey is required, the manufacturer's name, model number and serial number of the therapeutic radiation machine, the instrument(s) used to measure radiation levels, a plan of the areas surrounding the treatment room that were surveyed, the measured dose rate at several points in each area expressed in microsieverts or millirems per hour, the calculated maximum level of radiation over a period of one week for each restricted and unrestricted area, and the signature of the individual responsible for conducting the survey.

(4) If the results of the surveys required by 41.3(16) "a"(1) or (2) indicate any radiation levels in excess of the respective limit specified in 41.3(16) "a"(1), the registrant shall lock the control in the "OFF" position and not use the unit:

1. Except as may be necessary to repair, replace, or test the therapeutic radiation machine, the therapeutic radiation machine shielding, or the treatment room shielding; or

2. Until the registrant has received a specific exemption in writing from the agency.

b. Modification of radiation therapy unit or room before beginning a treatment program. If the survey required by 41.3(16) "a" indicates that an individual in an unrestricted area may be exposed to levels of radiation greater than those permitted by 641—paragraphs 40.26(1) "a" and "b," before beginning the treatment program the registrant shall:

- (1) Either equip the unit with beam direction interlocks or add additional radiation shielding to ensure compliance with 641—paragraphs 40.26(1) "a" and "b";

- (2) Perform the survey required by 41.3(16) "a" again; and

- (3) Include in the report required by 41.3(16) "d" the results of the initial survey, a description of the modification made to comply with 41.3(5) "b"(1), and the results of the second survey; or

- (4) Request and receive written authorization from the agency that authorizes radiation levels in unrestricted areas greater than those permitted by 641—paragraphs 40.26(1) "a" and "b."

c. Dosimetry equipment.

- (1) The registrant shall have a calibrated dosimetry system available for use. The system shall have been calibrated by the National Institute for Standards and Technology (NIST) or by an American Association of Physicists in Medicine (AAPM) Accredited Dosimetry Calibration Laboratory (ADCL). The calibration shall have been performed within the previous 24 months and after any servicing that may have affected system calibration.

1. For beams with energies greater than 1 MV (1 MeV), the dosimetry system shall have been calibrated for Cobalt-60.

2. For beams with energies equal to or less than 1 MV (1 MeV), the dosimetry system shall have been calibrated at an energy (energy range) appropriate for the radiation being measured.

- (2) The registrant shall have available for use a dosimetry system for quality assurance check measurements. To meet this requirement, the system may be compared with a system that has been calibrated in accordance with 41.3(16) "c"(1). This comparison shall have been performed within the previous 12 months and after each servicing that may have affected system calibration. The quality assurance check system may be the same system used to meet the requirement in 41.3(16) "c"(1).

- (3) The registrant shall maintain a record of each dosimetry system calibration, intercomparison, and comparison for the duration of the license or registration. For each calibration, intercomparison, or comparison, the record shall include the date, the model numbers and serial numbers of the instruments that were calibrated, intercompared, or compared as required by 41.3(16) "c"(1) and (2), the correction factors that were determined, the names of the individuals who performed the calibration, intercomparison, or comparison, and evidence that the intercomparison was performed by, or under the direct supervision and in the physical presence of, a radiation therapy physicist.

d. Reports of external beam radiation therapy surveys and measurements. The registrant for any therapeutic radiation machine subject to 41.3(17) or 41.3(18) shall furnish a copy of the records required in 41.3(16) "a" and "b" to the agency within 30 days following completion of the action that initiated the record requirement.

41.3(17) Therapeutic radiation machines of less than 500 kV.

a. Equipment requirements.

(1) Leakage radiation. When the X-ray tube is operated at its maximum rated tube current for the maximum kV, the leakage air kerma rate shall not exceed the value specified at the distance specified for that classification of therapeutic radiation machine:

1. 5-50 kV systems. The leakage air kerma rate measured at any position 5 centimeters from the tube housing assembly shall not exceed 100 mrad (1 mGy) in any one hour.

2. >50 and <500 kV systems. The leakage air kerma rate measured at a distance of one meter from the target in any direction shall not exceed 1 rad (1 cGy) in any one hour. This air kerma rate measurement may be averaged over areas no larger than 100 square centimeters. In addition, the air kerma rate at a distance of 5 centimeters from the surface of the tube housing assembly shall not exceed 30 rad (30 cGy) per hour.

3. For each therapeutic machine, the registrant shall determine, or obtain from the manufacturer, the leakage radiation existing at positions specified in 41.3(17) "a"(1)"1" and 41.3(17) "a"(1)"2" for the specified operating conditions. Records on leakage radiation measurements shall be maintained at the facility for inspection by the agency.

(2) Permanent beam-limiting devices. Permanent diaphragms or cones used for limiting the useful beam shall provide at least the same degree of attenuation as required for the tube housing assembly.

(3) Adjustable or removable beam-limiting devices.

1. All adjustable or removable beam-limiting devices, diaphragms, cones or blocks shall not transmit more than 5 percent of the useful beam for the most penetrating beam used;

2. When adjustable beam-limiting devices are used, the position and shape of the radiation field shall be indicated by a light beam.

(4) Filter system. The filter system shall be so designed that:

1. Filters cannot be accidentally displaced at any possible tube orientation;

2. For equipment installed after July 9, 1997, an interlock system prevents irradiation if the proper filter is not in place;

3. The air kerma rate escaping from the filter slot shall not exceed 1 rad (1 cGy) per hour at one meter under any operating conditions; and

4. Each filter shall be marked as to its material of construction and its thickness.

(5) Tube immobilization.

1. The X-ray tube shall be so mounted that it cannot accidentally turn or slide with respect to the housing aperture; and

2. The tube housing assembly shall be capable of being immobilized for stationary portal treatments.

(6) Source marking. The tube housing assembly shall be so marked that it is possible to determine the location of the source to within 5 millimeters, and such marking shall be readily accessible for use during calibration procedures.

(7) Beam block. Contact therapy tube housing assemblies shall have a removable shield of material, equivalent in attenuation to 0.5 millimeters of lead at 100 kV, which can be positioned over the entire useful beam exit port during periods when the beam is not in use.

(8) Timer. A suitable irradiation control device shall be provided to terminate the irradiation after a preset time interval.

1. A timer which has a display shall be provided at the treatment control panel. The timer shall have a preset time selector and an elapsed time or time remaining indicator;

2. The timer shall be a cumulative timer which activates with an indication of "BEAM-ON" and retains its reading after irradiation is interrupted or terminated. After irradiation is terminated and before irradiation can be reinitiated, it shall be necessary to reset the elapsed time indicator;

3. The timer shall terminate irradiation when a preselected time has elapsed, if any dose monitoring system present has not previously terminated irradiation;

4. The timer shall permit accurate presetting and determination of exposure times as short as one second;

5. The timer shall not permit an exposure if set at zero;

6. The timer shall not activate until the shutter is opened when irradiation is controlled by a shutter mechanism unless calibration includes a timer error correction to compensate for mechanical lag; and

7. Timer shall be accurate to within 1 percent of the selected value or one second, whichever is greater.

(9) Control panel functions. The control panel, in addition to the displays required by other provisions in 41.3(6), shall have:

1. An indication of whether electrical power is available at the control panel and if activation of the X-ray tube is possible;

2. An indication of whether X-rays are being produced;

3. Means for indicating X-ray tube potential and current;

4. The means for terminating an exposure at any time;

5. A locking device which will prevent unauthorized use of the therapeutic radiation machine; and

6. For therapeutic radiation machines manufactured after July 9, 1997, a positive display of specific filter(s) in the beam.

(10) Multiple tubes. When a control panel may energize more than one X-ray tube:

1. It shall be possible to activate only one X-ray tube at any time;

2. There shall be an indication at the control panel identifying which X-ray tube is activated; and

3. There shall be an indication at the tube housing assembly when that tube is energized.

(11) Target-to-skin distance (TSD). There shall be a means of determining the central axis TSD to within one centimeter and of reproducing this measurement to within two millimeters thereafter.

(12) Shutters. Unless it is possible to bring the X-ray output to the prescribed exposure parameters within five seconds after the X-ray "ON" switch is energized, the beam shall be attenuated by a shutter(s) having a lead equivalency not less than that of the tube housing assembly. In addition, after the unit is at operating parameters, the shutter(s) shall be controlled by the operator from the control panel. An indication of shutter position shall appear at the control panel.

(13) Low filtration X-ray tubes. Each therapeutic radiation machine equipped with a beryllium or other low-filtration window shall be clearly labeled as such upon the tube housing assembly and shall be provided with a permanent warning device on the control panel that is activated when no additional filtration is present, to indicate that the dose rate is very high.

b. Facility design requirements for therapeutic radiation machines capable of operating in the range 50 kV to 500 kV. In addition to shielding adequate to meet requirements of 41.3(19), the treatment room shall meet the following design requirements:

(1) Aural communication. Provision shall be made for continuous two-way aural communication between the patient and the operator at the control panel.

(2) Viewing systems. Provision shall be made to permit continuous observation of the patient during irradiation and the viewing system shall be so located that the operator can observe the patient from the control panel. The therapeutic radiation machine shall not be used for patient irradiation unless at least one viewing system is operational.

(3) Additional requirements. Treatment rooms which contain a therapeutic radiation machine capable of operating above 150 kV shall meet the following additional requirements:

1. All protective barriers shall be fixed except for entrance doors or beam interceptors;

2. The control panel shall be located outside the treatment room or in a totally enclosed booth, which has a ceiling, inside the room;

3. Interlocks shall be provided such that all entrance doors, including doors to any interior booths, shall be closed before treatment can be initiated or continued. If the radiation beam is interrupted by any door opening, it shall not be possible to restore the machine to operation without closing the door and reinitiating irradiation by manual action at the control panel; and

4. When any door referred to in 41.3(17)“b”(3)“3” is opened while the radiation machine is activated, the air kerma rate at a distance of one meter from the source shall be reduced to less than 1 mGy (100 mrad) per hour.

c. Full calibration measurements.

(1) Full calibration of a therapeutic radiation machine subject to 41.3(17) shall be performed by, or under the direct supervision of, a radiation therapy physicist:

1. Before the first medical use following installation or reinstallation of the therapeutic radiation machine;

2. At intervals not exceeding one year; and

3. Before medical use under the following conditions:

- Whenever quality assurance check measurements indicate that the radiation output differs by more than 5 percent from the value obtained at the last full calibration and the difference cannot be reconciled; and

- Following any component replacement, major repair, or modification of components that could significantly affect the characteristics of the radiation beam.

4. Notwithstanding the requirements of 41.3(17)“c”(1):

- Full calibration of therapeutic radiation machines with multienergy capabilities is required only for those modes or energies that are not within their acceptable range; and

- If the repair, replacement or modification does not affect all energies, full calibration shall be performed on the affected energy that is in most frequent clinical use at the facility. The remaining energies may be validated with quality assurance check procedures against the criteria in 41.3(17)“b”(3).

(2) To satisfy the requirement of 41.3(17)“c”(1), full calibration shall include all measurements recommended for annual calibration by NCRP Report 69, “Dosimetry of X-ray and Gamma Ray Beams for Radiation Therapy in the Energy Range 10 keV to 50 MeV” (1981).

(3) The registrant shall maintain a record of each calibration for the duration of the registration. The record shall include the date of the calibration, the manufacturer’s name, model number, and serial number for both the therapeutic radiation machine and the X-ray tube, the model numbers and serial numbers of the instruments used to calibrate the therapeutic radiation machine, and the signature of the radiation therapy physicist responsible for performing the calibration.

d. Periodic quality assurance checks.

(1) Periodic quality assurance checks shall be performed on therapeutic radiation machines, subject to 41.3(17), which are capable of operation at greater than or equal to 50 kV.

(2) To satisfy the requirement of 41.3(17)“d”(1), quality assurance checks shall meet the following requirements:

1. The registrant shall perform quality assurance checks in accordance with written procedures established by the radiation therapy physicist; and

2. The quality assurance check procedures shall specify the frequency at which tests or measurements are to be performed. The quality assurance check procedures shall specify that the quality assurance check shall be performed during the calibration specified in 41.3(17)“c”(1). The acceptable tolerance for each parameter measured in the quality assurance check, when compared to the value for that parameter determined in the calibration specified in 41.3(17)“c”(1), shall be stated.

(3) The cause for a parameter exceeding a tolerance set by the radiation therapy physicist shall be investigated and corrected before the system is used for patient or human research subject irradiation;

(4) Whenever a quality assurance check indicates a significant change in the operating characteristics of a system, as specified in the radiation therapy physicist’s quality assurance check procedures, the system shall be recalibrated as required in 41.3(17)“c”(1);

(5) The registrant shall use the dosimetry system described in 41.3(16)“c”(2) to make the quality assurance check required in 41.3(17)“d”;

(6) The registrant shall have the radiation therapy physicist review and sign the results of each radiation output quality assurance check within one month of test completion;

(7) The registrant shall ensure that safety quality assurance checks of therapeutic radiation machines subject to 41.3(17) are performed at intervals not to exceed one month;

(8) Notwithstanding the requirements of 41.3(17)“d”(6) and (7), the registrant shall ensure that no therapeutic radiation machine is used to administer radiation to humans unless the quality assurance checks required by 41.3(17)“d”(6) and (7) have been performed within the 30 days prior to administration;

(9) To satisfy the requirement of 41.3(17)“d”(7), safety quality assurance checks shall ensure proper operation of:

1. Electrical interlocks at each external beam radiation therapy room entrance;
2. The “BEAM-ON” and termination switches;
3. Beam condition indicator lights on the access door(s), control console, and in the radiation therapy room;
4. Viewing systems;
5. If applicable, electrically operated treatment room doors from inside and outside the treatment room.

(10) The registrant shall maintain a record of each quality assurance check required by 41.3(17)“d”(1) and (7) for three years. The record shall include the date of the quality assurance check, the manufacturer’s name, model number, and serial number for the therapeutic radiation machine, the manufacturer’s name, model number and serial number of the instrument(s) used to measure the radiation output of the therapeutic radiation machine, and the signature of the individual who performed the periodic quality assurance check.

e. Operating procedures.

(1) Therapeutic radiation machines shall not be left unattended unless secured by means identified in 41.3(17)“a”(9)“5”;

(2) When a patient must be held in position for radiation therapy, mechanical supporting or restraining devices shall be used;

(3) The tube housing assembly shall not be held by an individual during operation unless the assembly is designed to require such holding and the peak tube potential of the system does not exceed 50 kV. In such cases, the holder shall wear protective gloves and apron of not less than 0.5 millimeters lead equivalency at 100 kV;

(4) A copy of the current operating and emergency procedures shall be maintained at the therapeutic radiation machine control console; and

(5) No individual other than the patient shall be in the treatment room during exposures from therapeutic radiation machines operating above 150 kV. At energies less than or equal to 150 kV, any individual, other than the patient, in the treatment room shall be protected by a barrier sufficient to meet the requirements of 641—40.26(136C).

(6) The therapeutic radiation machine shall not be used for irradiation of patients unless the requirements of 41.3(17)“c” and “d” have been met.

f. Possession of survey instrument(s). Each facility location authorized to use a therapeutic radiation machine in accordance with 41.3(17) shall have at its disposal appropriately calibrated portable monitoring equipment. As a minimum, such equipment shall include a portable radiation measurement survey instrument capable of measuring dose rates over the range 1 mrem (10 µSv) per hour to 1000 mrem (10 mSv) per hour. The survey instrument(s) shall be operable and calibrated at intervals not to exceed 12 months for the radiation measured.

41.3(18) Therapeutic radiation machines—photon therapy systems (500 kV and above) and electron therapy systems (500 keV and above).

a. Equipment requirements.

(1) Leakage radiation outside the maximum useful beam in photon and electron modes.

1. The absorbed dose due to leakage radiation (excluding neutrons) at any point outside the maximum-sized useful beam, but within a circular plane of radius two meters which is perpendicular to and centered on the central axis of the useful beam at the nominal treatment distance (i.e., patient plane), shall not exceed a maximum of 0.2 percent and an average of 0.1 percent of the absorbed dose on the central axis of the beam at the nominal treatment distance. Measurements shall be averaged over an area not exceeding 100 square centimeters at a minimum of 16 points uniformly distributed in the plane;

2. Except for the area defined in 41.3(18)“a”(1)“1,” the absorbed dose due to leakage radiation (excluding neutrons) at one meter from the electron path between the electron source and the target or electron window shall not exceed 0.5 percent of the absorbed dose on the central axis of the beam at the nominal treatment distance. Measurements shall be averaged over an area not exceeding 100 square centimeters;

3. For equipment manufactured after July 9, 1997, the neutron absorbed dose outside the useful beam shall be in compliance with International Electrotechnical Agency (IEC) Document 601-2-1 (most current revision); and

4. For each therapeutic radiation machine, the registrant shall determine, or obtain from the manufacturer, the leakage radiation existing at the positions specified in 41.3(18)“a”(1)“1” to “3” for the specified operating conditions. Records of leakage radiation measurements shall be maintained for inspection by the agency.

(2) Leakage radiation through beam-limiting devices.

1. Photon radiation. All adjustable or interchangeable beam-limiting devices shall attenuate the useful beam such that at the nominal treatment distance, the maximum absorbed dose anywhere in the area shielded by the beam-limiting device(s) shall not exceed 2 percent of the maximum absorbed dose on the central axis of the useful beam measured in a 10-centimeter by 10-centimeter radiation field;

2. Electron radiation. All adjustable or interchangeable electron applicators shall attenuate the radiation including, but not limited to, photon radiation generated by electrons incident on the beam-limiting device and electron applicator and other parts of the radiation head, such that the absorbed dose in a plane perpendicular to the central axis of the useful beam at the nominal treatment distance shall not exceed:

- A maximum of 2 percent and average of 0.5 percent of the absorbed dose on the central axis of the useful beam at the nominal treatment distance. This limit shall apply beyond a line seven centimeters outside the periphery of the useful beam; and

- A maximum of 10 percent of the absorbed dose on the central axis of the useful beam at the nominal treatment distance. This limit shall apply beyond a line two centimeters outside the periphery of the useful beam.

(3) Measurement of leakage radiation.

1. Photon radiation. Measurements of leakage radiation through the beam-limiting devices shall be made with the beam-limiting devices closed and any residual aperture blocked by at least two-tenth value layers of suitable absorbing material. In the case of overlapping beam-limiting devices, the leakage radiation through each set shall be measured independently at the depth of maximum dose. Measurements shall be made using a radiation detector with an area not exceeding ten square centimeters;

2. Electron radiation. Measurements of leakage radiation through the electron applicators shall be made with the electron beam directed into the air and using a radiation detector with an area up to but not exceeding one square centimeter suitably protected against radiation which has been scattered from material beyond the radiation detector. Measurements shall be made using one centimeter of water equivalent buildup material.

(4) Filters/wedges.

1. Each wedge filter which is removable from the system shall be clearly marked with an identification number. For removable wedge filters, the nominal wedge angle shall appear on the wedge or wedge tray (if permanently mounted to the tray). If the wedge or wedge tray is significantly damaged, the wedge transmission factor shall be redetermined;

2. If the absorbed dose rate information required by 41.3(18)“a”(9) relates exclusively to operation with a field-flattening filter or beam-scattering foil in place, such filter or foil shall be removable only by the use of tools;

3. For equipment manufactured after July 9, 1997, which utilizes a system of wedge filters, interchangeable field-flattening filters, or interchangeable beam-scattering foils:

- Irradiation shall not be possible until a selection of a filter or a positive selection to use “no filter” has been made at the treatment control panel, either manually or automatically;

- An interlock system shall be provided to prevent irradiation if the filter selected is not in the correct position;

- A display shall be provided at the treatment control panel showing the wedge filter(s), interchangeable field-flattening filter(s), and interchangeable beam-scattering foil(s) in use; and

- An interlock shall be provided to prevent irradiation if any filter or beam-scattering foil selection operation carried out in the treatment room does not agree with the filter or beam-scattering foil selection operation carried out at the treatment control panel.

(5) Stray radiation in the useful beam. For equipment manufactured after July 9, 1997, the registrant shall determine during acceptance testing, or obtain from the manufacturer, data sufficient to ensure that X-ray stray radiation in the useful electron beam, absorbed dose at the surface during X-ray irradiation and stray neutron radiation in the useful X-ray beam are in compliance with International Electrotechnical Agency (IEC) Document 601-2-1 (most current revision).

(6) Beam monitors. All therapeutic radiation machines subject to 41.3(18) shall be provided with redundant beam monitoring systems. The sensors for these systems shall be fixed in the useful beam during treatment to indicate the dose monitor unit rate.

1. Equipment manufactured after July 9, 1997, shall be provided with at least two independently powered integrating dose meters. Alternatively, common elements may be used if the production of radiation is terminated upon failure of any common element.

2. Equipment manufactured on or before July 9, 1997, shall be provided with at least one radiation detector. This detector shall be incorporated into a useful beam monitoring system. The detector and the system into which that detector is incorporated shall meet the following requirements:

- Each detector shall be removable only with tools and, if movable, shall be interlocked to prevent incorrect positioning;

- Each detector shall form part of a beam monitoring system from whose readings in dose monitor units the absorbed dose at a reference point can be calculated;

- Each beam monitoring system shall be capable of independently monitoring, interrupting, and terminating irradiation; and

3. For equipment manufactured after July 9, 1997, the design of the beam monitoring systems shall ensure that the:

- Malfunctioning of one system shall not affect the correct functioning of the other system(s); and

- Failure of any element common to both systems which could affect the correct function of both systems shall terminate irradiation or prevent the initiation of radiation.

4. Each beam monitoring system shall have a legible display at the treatment control panel. For equipment manufactured after July 9, 1997, each display shall:

- Maintain a reading until intentionally reset;

- Have only one scale and no electrical or mechanical scale multiplying factors;

- Utilize a design such that increasing dose is displayed by increasing numbers; and

- In the event of power failure, the beam monitoring information required in 41.3(18) "a"(6) "4" displayed at the control panel at the time of failure shall be retrievable in at least one system for a 20-minute period of time.

(7) Beam symmetry.

1. Bent-beam linear accelerators with beam-flattening filter(s) subject to 41.3(18) shall be provided with auxiliary device(s) to monitor beam symmetry;

2. The device(s) referenced in 41.3(18) "a"(7) "1" shall be able to detect field asymmetry greater than 10 percent, and shall be configured to terminate irradiation if field asymmetry cannot be maintained at 10 percent or less.

(8) Selection and display of dose monitor units.

1. The preselected number of dose monitor units shall be displayed at the treatment control panel until reset manually;

2. After termination of irradiation, it shall be necessary to reset the dosimeter display before subsequent treatment can be initiated; and

3. For equipment manufactured after July 9, 1997, after termination of irradiation, it shall be necessary for the operator to reset the preselected dose monitor units before irradiation can be initiated.

4. Irradiation shall not be possible until a new selection of a number of dose monitor units has been made at the treatment control panel.

(9) Air kerma rate/absorbed dose rate. For equipment manufactured after July 9, 1997, a system shall be provided from whose readings the air kerma rate or absorbed dose rate at a reference point can be calculated. (The radiation detectors specified in 41.3(18)“a”(6) may form part of this system.) In addition:

1. The dose monitor unit rate shall be displayed at the treatment control panel;

2. If the equipment can deliver under any conditions an air kerma rate or absorbed dose rate at the nominal treatment distance more than twice the maximum value specified by the manufacturer, a device shall be provided which terminates irradiation when the air kerma rate or absorbed dose rate exceeds a value twice the specified maximum. The dose rate at which the irradiation will be terminated shall be a record maintained by the registrant;

3. If the equipment can deliver under any fault condition(s) an air kerma rate or absorbed dose rate at the nominal treatment distance more than ten times the maximum value specified by the manufacturer, a device shall be provided to prevent the air kerma rate or absorbed dose rate anywhere in the radiation field from exceeding twice the specified maximum value and to terminate irradiation if the excess absorbed dose at the nominal treatment distance exceeds 400 rad (4 Gy); and

4. For each therapeutic radiation machine, the registrant shall determine, or obtain from the manufacturer, the maximum value(s) specified in 41.3(18)“a”(7)“2” and “3” for the specified operating conditions. Records of these maximum value(s) shall be maintained at the installation for inspection by the agency.

(10) Termination of irradiation by the beam monitoring system or systems during stationary beam radiation therapy.

1. Each primary system shall terminate irradiation when the preselected number of dose monitor units has been detected by the system;

2. If the original design of the equipment included a secondary dose monitoring system, that system shall be capable of terminating irradiation when not more than 15 percent or 40 dose monitor units above the preselected number of dose monitor units set at the control panel has been detected by the secondary dose monitoring system; and

3. For equipment manufactured after July 9, 1997, an indicator on the control panel shall show which monitoring system has terminated irradiation.

(11) Termination switches. It shall be possible to terminate irradiation and equipment movement or go from an interruption condition to termination condition at any time from the operator’s position at the treatment control panel.

(12) Interruption switches. If a therapeutic radiation machine has an interrupt mode, it shall be possible to interrupt irradiation and equipment movements at any time from the treatment control panel. Following an interruption it shall be possible to restart irradiation by operator action without any reselection of operating conditions. If any change of a preselected value is made during an interruption, irradiation and equipment movements shall be automatically terminated.

(13) Timer. A suitable irradiation control device shall be provided to terminate the irradiation after a preset time interval.

1. A timer shall be provided which has a display at the treatment control panel. The timer shall have a preset time selector and an elapsed time indicator;

2. The timer shall be a cumulative timer which activates with an indication of “BEAM-ON” and retains its reading after irradiation is interrupted or terminated. After irradiation is terminated and before irradiation can be reinitiated, it shall be necessary to reset the elapsed time indicator;

3. The timer shall terminate irradiation when a preselected time has elapsed, if the dose monitoring systems have not previously terminated irradiation.

(14) Selection of radiation type. Equipment capable of both X-ray therapy and electron therapy shall meet the following additional requirements:

1. Irradiation shall not be possible until a selection of radiation type (X-rays or electrons) has been made at the treatment control panel;
2. The radiation type selected shall be displayed at the treatment control panel before and during irradiation;
3. An interlock system shall be provided to ensure that the equipment can principally emit only the radiation type which has been selected;
4. An interlock system shall be provided to prevent irradiation with X-rays, except to obtain a verification image, when electron applicators are fitted;
5. An interlock system shall be provided to prevent irradiation with electrons when accessories specific for X-ray therapy are fitted; and
6. An interlock system shall be provided to prevent irradiation if any selected operations carried out in the treatment room do not agree with the selected operations carried out at the treatment control panel.

(15) Selection of energy. Equipment capable of generating radiation beams of different energies shall meet the following requirements:

1. Irradiation shall not be possible until a selection of energy has been made at the treatment control panel;
2. The nominal energy value selected shall be displayed at the treatment control panel until reset manually for the next irradiation. After termination of irradiation, it shall be necessary to reset the nominal energy value selected before subsequent treatment can be initiated; and
3. Irradiation shall not be possible until the appropriate flattening filter or scattering foil for the selected energy is in its proper location.
4. For equipment manufactured after July 9, 1997, the selection of energy shall be in compliance with International Electrotechnical Commission (IEC) Document 60601-2-1.

(16) Selection of stationary beam radiation therapy or moving beam radiation therapy. Therapeutic radiation machines capable of both stationary beam radiation therapy and moving beam radiation therapy shall meet the following requirements:

1. Irradiation shall not be possible until a selection of stationary beam radiation therapy or moving beam radiation therapy has been made at the treatment control panel;
2. The mode of operation shall be displayed at the treatment control panel;
3. An interlock system shall be provided to ensure that the equipment can operate only in the mode which has been selected;
4. An interlock system shall be provided to prevent irradiation if any selected parameter in the treatment room does not agree with the selected parameter at the treatment control panel;
5. Moving beam radiation therapy shall be controlled to obtain the selected relationships between incremental dose monitor units and incremental movement. For equipment manufactured after July 9, 1997:
 - An interlock system shall be provided to terminate irradiation if the number of dose monitor units delivered in any ten degrees of rotation or one centimeter of linear motion differs by more than 20 percent from the selected value;
 - Where angle terminates the irradiation in moving beam radiation therapy, the dose monitor units delivered shall differ by less than 5 percent from the dose monitor unit value selected;
 - An interlock shall be provided to prevent motion of more than five degrees or one centimeter beyond the selected limits during moving beam radiation therapy;
 - An interlock shall be provided to require that a selection of direction be made at the treatment control panel in all units which are capable of both clockwise and counterclockwise moving beam radiation therapy.
 - Moving beam radiation therapy shall be controlled with both primary position sensors and secondary position sensors to obtain the selected relationships between incremental dose monitor units and incremental movement.
6. Where the beam monitoring system terminates the irradiation in moving beam radiation therapy, the termination of irradiation shall be as required by 41.3(18) "a"(10); and

7. For equipment manufactured after July 9, 1997, an interlock system shall be provided to terminate irradiation if movement:

- Occurs during stationary beam radiation therapy; or
- Does not start or stops during moving beam radiation therapy unless such stoppage is a preplanned function.

b. Facility design requirements for therapeutic radiation machines operating above 500 kV. In addition to shielding adequate to meet requirements of 41.3(19), the following design requirements are made:

(1) Protective barriers. All protective barriers shall be fixed, except for access doors to the treatment room or movable beam interceptors.

(2) Control panel. In addition to other requirements specified in 641—41.3(136C), the control panel shall also:

1. Be located outside the treatment room;
2. Provide an indication of whether electrical power is available at the control panel and if activation of the radiation is possible;
3. Provide an indication of whether radiation is being produced; and
4. Include an access control (locking) device which will prevent unauthorized use of the therapeutic radiation machine.

(3) Viewing systems. Windows, mirrors, closed-circuit television or an equivalent viewing system shall be provided to permit continuous observation of the patient following positioning and during irradiation and shall be so located that the operator may observe the patient from the treatment control panel. The therapeutic radiation machine shall not be used for patient irradiation unless at least one viewing system is operational.

(4) Aural communications. Provision shall be made for continuous two-way aural communication between the patient and the operator at the control panel. The therapeutic radiation machine shall not be used for irradiation of patients unless continuous two-way aural communication is possible.

(5) Room entrances. Treatment room entrances shall be provided with warning lights in a readily observable position near the outside of all access doors, which will indicate when the useful beam is “ON” and when it is “OFF”.

(6) Entrance interlocks. Interlocks shall be provided such that all access controls are activated before treatment can be initiated or continued. If the radiation beam is interrupted by any access control, it shall not be possible to restore the machine to operation without resetting the access control and reinitiating irradiation by manual action at the control panel.

(7) Beam interceptor interlocks. If the shielding material in any protective barrier requires the presence of a beam interceptor to ensure compliance with 641—paragraphs 40.26(1)“a” and “b,” interlocks shall be provided to prevent the production of radiation, unless the beam interceptor is in place, whenever the useful beam is directed at the designated barrier(s).

(8) Emergency cutoff switches. At least one emergency power cutoff switch shall be located in the radiation therapy room and shall terminate all equipment electrical power including radiation and mechanical motion. This switch is in addition to the termination switch required by 41.3(18)“a”(11). All emergency power cutoff switches shall include a manual reset so that the therapeutic radiation machine cannot be restarted from the unit’s control console without resetting the emergency cutoff switch.

(9) Safety interlocks. All safety interlocks shall be designed so that any defect or component failure in the safety interlock system prevents or terminates operation of the therapeutic radiation machine.

(10) Surveys for residual radiation. Surveys for residual activity shall be conducted on all therapeutic radiation machines capable of generating photon and electron energies above 10 MV prior to machining, removing, or working on therapeutic radiation machine components which may have become activated due to photoneutron production.

(11) Possession of survey instrument(s). Each facility location authorized to use a therapeutic radiation machine in accordance with 41.3(18) shall have at its disposal appropriately calibrated portable monitoring equipment. As a minimum, such equipment shall include a portable radiation measurement survey instrument capable of measuring dose rates over the range 1 mrem (10 µSv) per hour to 1000 mrem (10

mSv) per hour. The survey instrument(s) shall be operable and calibrated at intervals not to exceed 12 months for the radiation measured.

c. Radiation therapy physicist support.

(1) The services of a radiation therapy physicist shall be required in facilities having therapeutic radiation machines with energies of 500 kV and above. The radiation therapy physicist shall be responsible for:

1. Full calibration(s) required by 41.3(18)“e” and protection surveys required by 41.3(16)“a”;
2. Supervision and review of dosimetry;
3. Beam data acquisition and transfer for computerized dosimetry, and supervision of its use;
4. Quality assurance, including quality assurance check review required by 41.3(18)“f”(5) of these regulations;
5. Consultation with the authorized user in treatment planning, as needed; and
6. Performing calculations/assessments regarding misadministrations.

(2) If the radiation therapy physicist is not a full-time employee of the registrant, the operating procedures required by 41.3(18)“d” shall also specifically address how the radiation therapy physicist is to be contacted for problems or emergencies, as well as the specific actions, if any, to be taken until the radiation therapy physicist can be contacted.

d. Operating procedures.

(1) No individual, other than the patient, shall be in the treatment room during treatment or during any irradiation for testing or calibration purposes;

(2) Therapeutic radiation machines shall not be made available for medical use unless the requirements of 41.3(16)“a,” 41.3(18)“e,” and 41.3(18)“f” have been met;

(3) Therapeutic radiation machines, when not in operation, shall be secured to prevent unauthorized use;

(4) When adjustable beam-limiting devices are used, the position and shape of the radiation field shall be indicated by a light field;

(5) If a patient must be held in position during treatment, mechanical supporting or restraining devices shall be used; and

(6) A copy of the current operating and emergency procedures shall be maintained at the therapeutic radiation machine control console.

e. Acceptance testing, commissioning, and full calibration measurements.

(1) Acceptance testing, commissioning, and full calibration of a therapeutic radiation machine subject to 41.3(18) shall be performed by, or under the direct supervision of, a radiation therapy physicist:

1. Acceptance testing and commissioning shall be performed in accordance with “AAPM Code of Practice for Radiotherapy Accelerators: AAPM Report No. 47,” prepared by Radiation Therapy Task Group 45, and the manufacturer’s contractual specifications and shall be conducted before the first medical use following installation or reinstallation of the therapeutic radiation machine;

2. Full calibration shall include measurement of all parameters listed in Appendix D of 641—Chapter 41 and shall be performed in accordance with “AAPM Code of Practice for Radiotherapy Accelerators: AAPM Report No. 47,” prepared by Radiation Therapy Task Group 45. Although it shall not be necessary to complete all elements of a full calibration at the same time, all parameters (for all energies) shall be completed at intervals not to exceed 12 calendar months, unless a more frequent interval is required by this agency.

3. The radiation therapy physicist shall perform all elements of a full calibration necessary to determine that all parameters are within acceptable limits:

- Whenever quality assurance check measurements indicate that the radiation output differs by more than 5 percent from the value obtained at the last full calibration and the difference cannot be reconciled. Therapeutic radiation machines with multienergy or multimode capabilities or both shall only require measurements for those modes or energies that are not within their acceptable range; and

- Following any component replacement, major repair, or modification of components that could significantly affect the characteristics of the radiation beam. If the repair, replacement or modification does not affect all modes or energies, measurements shall be performed on the affected mode/energy that is in

most frequent clinical use at the facility. The remaining energies/modes may be validated with quality assurance check procedures against the criteria in 41.3(18)“e”(1)“3.”

(2) The registrant shall use the dosimetry system described in 41.3(16)“c” to measure the radiation output for one set of exposure conditions.

(3) The registrant shall maintain a record of each calibration in an auditable form for the duration of the registration. The record shall include the date of the calibration, the manufacturer’s name, model number, and serial number for the therapeutic radiation machine, the model numbers and serial numbers of the instruments used to calibrate the therapeutic radiation machine, and the signature of the radiation therapy physicist responsible for performing the calibration.

f. Periodic quality assurance checks.

(1) Periodic quality assurance checks shall be performed on all therapeutic radiation machines subject to 41.3(18) at intervals as specified in Appendix D of 641—Chapter 41;

(2) To satisfy the requirement of 41.3(18)“f”(1), quality assurance checks shall include determination of central axis radiation output and a representative sampling of periodic quality assurance checks contained in Appendix D of 641—Chapter 41. Representative sampling shall include all referenced periodic quality assurance checks at intervals not to exceed 12 consecutive calendar months;

(3) The registrant shall use a dosimetry system which has been intercompared within the previous 12 months with the dosimetry system described in 41.3(16)“c”(1) to make the periodic quality assurance checks required in 41.3(18)“f”(2);

(4) The registrant shall perform periodic quality assurance checks required by 41.3(18)“f”(1) in accordance with procedures established by the radiation therapy physicist;

(5) The registrant shall review the results of each periodic radiation output check according to the following procedures:

1. The authorized user and radiation therapy physicist shall be immediately notified if any parameter is not within its acceptable tolerance. The therapeutic radiation machine shall not be made available for subsequent medical use until the radiation therapy physicist has determined that all parameters are within their acceptable tolerances;

2. If all quality assurance check parameters appear to be within their acceptable range, the quality assurance check shall be reviewed and signed by either the authorized user or radiation therapy physicist within three treatment days; and

3. The radiation therapy physicist shall review and sign the results of each radiation output quality assurance check at intervals not to exceed one month.

(6) Therapeutic radiation machines subject to 41.3(18) shall have safety quality assurance checks of each external beam radiation therapy machine performed at intervals not to exceed one week or at longer intervals as recommended by the manufacturer;

(7) To satisfy the requirement of 41.3(18)“f”(6), safety quality assurance checks shall ensure proper operation of:

1. Electrical interlocks at each external beam radiation therapy room entrance;

2. Proper operation of the “BEAM-ON,” interrupt and termination switches;

3. Beam condition indicator lights on the access doors, control console, and in the radiation therapy room;

4. Viewing systems;

5. Aural systems;

6. Electrically operated treatment room door(s) from inside and outside the treatment room;

7. At least one emergency power cutoff switch. If more than one emergency power cutoff switch is installed and not all switches are tested at once, each switch shall be tested on a rotating basis. Safety quality assurance checks of the emergency power cutoff switches may be conducted at the end of the treatment day in order to minimize possible stability problems with the therapeutic radiation machine;

(8) Reserved.

(9) The registrant shall promptly repair any system identified in 41.3(18)“f”(7) that is not operating properly; and

(10) The registrant shall maintain a record of each quality assurance check required by 41.3(18)“f”(1) and 41.3(18)“f”(7) for three years. The record shall include the date of the quality assurance check, the manufacturer’s name, model number, and serial number for the therapeutic radiation machine, the manufacturer’s name, model number and serial number of the instrument(s) used to measure the radiation output of the therapeutic radiation machine, and the signature of the individual who performed the periodic quality assurance check.

41.3(19) Shielding and safety design requirements.

a. Each therapeutic radiation machine subject to 41.3(17) or 41.3(18) shall be provided with such primary or secondary barriers as are necessary to ensure compliance with 641—40.15(136C) and 641—40.26(136C).

b. Facility design information for all new installations of a therapeutic radiation machine or installations of a therapeutic radiation machine of higher energy into a room not previously approved for that energy shall be submitted for agency approval prior to actual installation of the therapeutic radiation machine. The minimum facility design information that must be submitted is contained in Appendix E of 641—Chapter 41.

41.3(20) Calibration of survey instruments.

a. The registrant shall ensure that the survey instruments used to show compliance with 641—41.3(136C) have been calibrated before first use, at intervals not to exceed 12 months, and following repair.

b. To satisfy the requirements of 41.3(20), the registrant shall:

(1) Calibrate all required scale readings up to 1000 mrem (10 mSv) per hour with an appropriate radiation source that is traceable to the National Institute of Standards and Technology (NIST);

(2) Calibrate at least two points on each scale to be calibrated. These points should be at approximately 1/3 and 2/3 of full scale;

(3) Consider a point as calibrated if the indicated dose rate differs from the calculated dose rate by not more than 10 percent; and

(4) Consider a point as calibrated if the indicated dose rate differs from the calculated dose rate by not more than 20 percent if a correction factor or graph is conspicuously attached to the instrument.

c. The registrant shall retain a record of each calibration required in 41.3(20) for three years. The record shall include:

(1) A description of the calibration procedure; and

(2) A description of the source used and the certified dose rates from the source, and the rates indicated by the instrument being calibrated, the correction factors deduced from the calibration data, the signature of the individual who performed the calibration, and the date of calibration.

d. The registrant may obtain the services of individuals licensed by this agency, the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state to perform calibrations of survey instruments. Records of calibrations that contain information required in 41.3(20) shall be maintained by the registrant.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 1639C, IAB 10/1/14, effective 11/5/14]

641—41.4 and 641—41.5 Reserved.

641—41.6(136C) X-ray machines used for screening and diagnostic mammography.

41.6(1) Definitions. In addition to the definitions provided in 641—38.2(136C), 641—40.2(136C), and 641—41.1(136C), the following definitions shall be applicable to this rule.

“*Accreditation body*” means an entity that has been approved by FDA to accredit mammography facilities.

“*Acquisition workstation*” or “*AWS*” means the soft copy display workstation used in conjunction with the mammography unit.

“*Action limits*” or “*action levels*” means the minimum and maximum values of a quality assurance measurement that can be interpreted as representing acceptable performance with respect to the parameter being tested. Values less than the minimum or greater than the maximum action limit or level indicate that

corrective action must be taken by the facility. Action limits or levels are also sometimes called control limits or levels.

“Adverse event” means an undesirable experience associated with mammography activities. Adverse events include but are not limited to:

1. Poor image quality;
2. Failure to send mammography reports within 30 days to the referring physician or in a timely manner to the self-referred patient; and
3. Use of personnel who do not meet the applicable requirements of this chapter.

“Air kerma” means kerma in a given mass of air. The unit used to measure the quantity of air kerma is the Gray (Gy). For X-rays with energies less than 300 kiloelectronvolts (keV), 1 Gray of absorbed dose is delivered by 114 roentgens (R) of exposure.

“Annually” means within 10 to 14 months of previous occurrence.

“Artifact” means a substance or structure not naturally present in living tissue but of which an authentic image appears in a radiograph.

“Automatic exposure control systems” means automatic exposure control systems, often referred to as phototimers, which are designed to automatically determine and provide the exposure needed to produce an adequate density image by sampling the X-ray intensity after passage through the patient and image receptor.

“Average glandular dose” means the energy deposited per unit mass of glandular tissue averaged over all the glandular tissue in the breast, calculated from values of entrance exposure in air, the X-ray beam quality (half-value layer), and compressed breast thickness. For a 50 percent-50 percent adipose and glandular 4.2 centimeter breast, the average glandular dose shall not exceed 300 millirad (3 mGy). See also: “Dose.”

“Breast implant” means a prosthetic device implanted in the breast.

“Calendar quarter” means any one of the following time periods during a given year: January 1 through March 31, April 1 through June 30, July 1 through September 30, or October 1 through December 31.

“Category 1” means medical education activities that have been designated as Category 1 by the Accreditation Council for Continuing Medical Education (ACCME), the American Osteopathic Association (AOA), a state medical society, or an equivalent organization.

“Certificate” means the certificate described in 41.6(2) “a”(2).

“Certification” means the process of approval of a facility by the FDA or this agency to provide mammography services.

“Clinical image” means a mammogram.

“Compression device” means a firm plastic paddle used to help hold the breast stationary and eliminate blurring due to motion, to help separate structures within the breast, and to decrease the thickness of breast tissue, minimizing the amount of radiation used and the amount of scattered radiation reaching the film.

“Computed radiography mammography” means a type of digital mammography in which the digital image receptor must be removed from the X-ray unit for the image to be read and processed by a separate image receptor reader.

“Consumer” means an individual who chooses to comment or complain in reference to a mammography examination, including the patient or representative of the patient (e.g., family member or referring physician).

“Contact hour” means an hour of training received through direct instruction.

“Continuing education unit” or *“continuing education credit”* means one contact hour of training.

“Craniocaudal view” means one of two routine views for mammography. The detector system is placed caudad to (below) the breast and the vertical X-ray beam is directed from cranial to caudad (downward) through the breast.

“Dedicated mammography equipment” means X-ray systems designed specifically for breast imaging, providing optimum imaging geometry, a device for breast compression and low dose exposure that can generate reproducible images of high quality.

“Digital breast tomosynthesis” or *“DBT”* means mammography that uses reconstructions to create three-dimensional images of the breasts.

“Direct detector technology” means a digital mammogram captured using a material which converts the X-ray energies directly to an electric signal.

“Direct instruction” means:

1. Face-to-face interaction between instructor(s) and student(s), as when the instructor provides a lecture, conducts demonstrations, or reviews student performance; or
2. The administration and correction of student examinations by an instructor(s) with subsequent feedback to the student(s).

“Direct supervision” means that:

1. During joint interpretation of mammograms, the supervising interpreting physician reviews, discusses, and confirms the diagnosis of the physician being supervised and signs the resulting report before it is entered into the patient’s records; or
2. During the performance of a mammography examination or survey of the facility’s equipment and quality assurance program, the supervisor is present to observe and correct, as needed, the performance of the individual being supervised who is performing the examination or conducting the survey.

“Dose” means the amount of energy deposited per unit mass of tissue due to X-radiation. The newer unit of absorbed dose is the Gray: 1 Gray=1 Joule of energy deposited per kilogram of tissue. The older unit of absorbed dose is the rad: 1 rad=0.01 Gray, 1 centiGray, or 10 milliGray.

“EQUIP” means Enhancing Quality Using the Inspection Program and uses inspection questions related to the image quality regulations of MQSA to emphasize the significance of continuous clinical image quality.

“Exposure” means the amount of X-radiation, quantitated by measuring the amount of ionization in air caused by the radiation. The units of exposure are Coulombs of charge ionized per kilogram of air. The older unit of exposure is the Roentgen: 1 Roentgen= $2.58 \times 10E-4$ Coulombs of charge per kilogram of air.

“Facility” means a hospital, outpatient department, clinic, radiology practice, mobile unit, office of a physician, or other facility that conducts mammography activities, including the following: operation of equipment to produce a mammogram, initial interpretation of the mammogram, and maintaining viewing conditions for that interpretation. This term does not include a facility of the Department of Veterans Affairs.

“FDA” means the Food and Drug Administration.

“First allowable time” means the earliest time a resident physician is eligible to take the diagnostic radiology boards from an FDA-designated certifying body. The “first allowable time” may vary with the certifying body.

“Full field digital mammography” or *“FFDM”* means radiographic imaging of the breast using a digital image receptor with minimum dimensions of 18×23 cm to allow imaging the average size breast in a single exposure.

“Grids” means a set of thin lead strips spaced close to one another, interspaced by carbon fiber for mammographic grids. The grid is placed between the breast and the screen-film image receptor to reduce scattered radiation reaching the image receptor.

“Image noise.” See “Radiographic noise.”

“Image receptor support device” means, for mammography X-ray systems, that part of the system designed to support the image receptor during a mammographic examination and to provide a primary protective barrier.

“Inspection” means to assess and determine compliance with regulations.

“Interpreting physician” means a licensed radiologist who interprets mammograms and who meets the requirements set forth in 41.6(3)“a.”

“Kerma” means the sum of the initial energies of all the charged particles liberated by uncharged ionizing particles in a material of given mass.

“Laterality” means the designation of either the right or left breast.

“Lead interpreting physician” means the interpreting physician assigned the general responsibility for ensuring that a facility’s quality assurance program meets all of the requirements of this chapter. The

administrative title and other supervisory responsibilities of the individual, if any, are left to the discretion of the facility.

“Mammogram” means a radiographic image produced through mammography.

“Mammographic modality” means a technology for radiography of the breast. Examples are screen-film mammography, full field digital mammography and digital breast tomosynthesis.

“Mammography” means radiography of the breast but, for the purposes of 641—41.6(136C), does not include:

1. Radiography of the breast performed during invasive interventions for localization or biopsy procedures; or
2. Radiography of the breast performed with an investigational mammography device as part of a scientific study conducted in accordance with FDA investigational device exemption regulations; or
3. Radiography of the breast performed as part of either a breast localization procedure or a post-stereotactic clip placement localization procedure.

“Mammography equipment evaluation” means an on-site assessment of the mammography unit or review workstation by a medical physicist for the purpose of making a preliminary determination as to whether the equipment meets all of the applicable standards.

“Mammography medical outcomes audit” means a systematic collection of mammography results and the comparison of those results with outcomes data.

“Mammography unit(s)” means an assemblage of components for the production of X-rays for use during mammography including, at a minimum: an X-ray generator, an X-ray control, a tube housing assembly, a beam limiting device, and the supporting structures for these components.

“Mean optical density” means the average of the optical densities measured using phantom thicknesses of 2, 4, and 6 centimeters with values of kilovolt peak (kVp) clinically appropriate for those thicknesses.

“Medical physicist” means a person trained in evaluating the performance of mammography equipment and facility quality assurance programs and who meets the qualifications for a medical physicist set forth in 41.6(3) “c.”

“Mediolateral view” means one of the routine views for mammography in addition to the craniocaudal view. The detector system is placed lateral to the breast and the horizontal X-ray beam is directed from medial to lateral aspect through the breast.

“MQSA” means the Mammography Quality Standards Act of 1992.

“Multi-reading” means two or more physicians, at least one of whom is an interpreting physician, interpreting the same mammogram. A radiologist may count the current mammographic examination and one prior mammographic examination, provided the radiologist was not the interpreter of the prior mammographic examination. A separate tally shall be kept for the prior examinations.

“Oblique mediolateral view” means one of the standard two views of the breast. The detector system is angled 30-60 degrees from horizontal so that the detector system is parallel to the pectoral muscle and the corner of the detector system fits comfortably into the axilla. The X-ray beam is directed from the supero-medial to the infero-lateral aspect of the breast.

“Patient” means any individual who undergoes a mammography evaluation in a facility, regardless of whether the person is referred by a physician or is self-referred.

“Phantom” means an artificial test object used to simulate radiographic characteristics of compressed breast tissue and containing components that radiographically model aspects of breast disease and cancer.

“Phantom image” means a radiographic image of a phantom.

“Physical science” means physics, chemistry, radiation science (including medical physics and health physics), and engineering.

“Positive mammogram” means a mammogram that has an overall assessment of findings that are either “suspicious” or “highly suggestive of malignancy.”

“Provisional certification” means the six-month certification time period in which a facility has to complete the accreditation/certification process.

“Qualified instructor” means individuals whose training and experience adequately prepare them to carry out specified training assignments. Interpreting physicians, radiologic technologists, or medical physicists who meet the requirements of 41.6(3) would be considered qualified instructors in their

respective areas of mammography. Radiological technologists who meet the requirements of 41.6(3) and have passed a state-approved mammography examination such as the examination given by the American Registry of Radiography Technologists would be considered qualified instructors in their respective areas of mammography. The examination would include, but not necessarily be limited to: breast anatomy and physiology, positioning and compression, quality assurance/quality control techniques, and imaging of patients with breast implants. Other examples of individuals who may be qualified instructors for the purpose of providing training to meet the regulations of this chapter include, but are not limited to, instructors in a post-high school training institution and manufacturers' representatives.

"Quality control technologist" means an individual meeting the requirements of 41.6(5) "a"(4) who is responsible for those quality assurance responsibilities not assigned to the lead interpreting physician or to the medical physicist.

"Radiographic equipment" means X-ray equipment used for the production of static X-ray images.

"Radiologic technologist" means an individual specifically trained in the use of radiographic equipment and in the positioning of patients for radiographic examinations and who meets the requirements set forth in 41.6(3) "b."

"Radiologist continuing experience" means the number of mammograms interpreted by a radiologist in the past 24-month period. For the purpose of counting, a radiologist may count the current mammographic examination and one prior mammographic examination, provided the radiologist was not the interpreter of the prior mammographic examination. A separate tally shall be kept for the prior examinations.

"Reinstatement" means the process of recertification of a facility that has lost or voluntarily given up previous accreditation/certification.

"Review workstation" or *"RWS"* means soft copy display device intended for use in mammography interpretations.

"Screen-film mammography" means mammography performed with high-detailed intensifying screen(s) in close contact with the film.

"Screening mammography" means X-ray breast examination of asymptomatic individuals in an attempt to detect breast cancer when it is small, nonpalpable, and confined to the breast.

"Serious adverse event" means an adverse event that may significantly compromise clinical outcomes or an adverse event for which a facility fails to take appropriate corrective action in a timely manner.

"Serious complaint" means a report of a serious adverse event.

"Standard breast" means a 4.2 centimeter (cm) thick compressed breast consisting of 50 percent glandular and 50 percent adipose tissue.

"Survey" means an on-site physics consultation and evaluation of a facility quality assurance program performed by a medical physicist.

"Time cycle" means the film development time.

"Traceable to a national standard" means an instrument is calibrated at either the National Institute of Standards and Technology (NIST) or at a calibration laboratory that participates in a proficiency program with NIST at least once every two years and the results of the proficiency test conducted within 24 months of calibration show agreement within ± 3 percent of the national standard in the mammography energy range.

"Written report" means interpreting physician's technical narrative of a mammography evaluation.

"Written statement" means interpreting physician's description of a mammography examination written in lay terms.

41.6(2) *Registration and application standards and requirements.*

a. Registration and certificates.

(1) Each radiation machine used to perform mammography shall be registered according to 641—subrule 39.3(2).

(2) A certificate issued by the FDA or this agency is required for lawful operation of all mammography facilities subject to the provisions of this subrule. To obtain a certificate from the FDA or this agency, facilities are required to meet the quality standards in 641—41.6(136C) and to be accredited and approved by an approved accreditation body.

b. Each facility wishing to perform mammography shall apply for authorization by providing or verifying the following information for each mammography machine:

(1) The mammography unit meets the criteria for agency-approved mammography accreditation bodies.

(2) The mammography equipment and facility meet the general requirements of these rules for radiation machines.

(3) The radiation machine is specifically designed to perform mammography.

(4) The radiation machine is used according to these rules on patient radiation exposure and radiation dose levels.

(5) The radiation machine is operated by individuals meeting the requirements of this subrule.

(6) The entire mammography system is evaluated at least annually by a medical physicist.

(7) The equipment, personnel, procedures, and records are evaluated annually by a physician consultant.

(8) Provisional or reinstatement certification. A new facility beginning operation after September 30, 1994, is eligible to apply for provisional or reinstatement certification. This will enable the facility to perform mammography and to obtain the clinical images needed to complete the accreditation process. To apply for and receive provisional or reinstatement certification, a facility must meet the requirements of 641—41.6(136C). Provisional or reinstatement certification shall be effective for up to six months from the date of issuance and cannot be renewed. The facility may apply for one 90-day extension.

c. Suspension, revocation, or denial of mammography certification.

(1) Mammography certification may be suspended or revoked with cause if any facility or machine does not meet one or more of the standards of these rules, will not permit inspections or provide access to records or information in a timely fashion, or has been guilty of misrepresentation in obtaining the certification.

(2) The facility shall have opportunity for a hearing in connection with a denial, suspension or revocation of mammography certification in accordance with 641—Chapter 173.

(3) An emergency order suspending or revoking certification may be issued in accordance with 641—173.31(17A) if the agency finds the radiation unit or facility violates rules that seriously affect the health, safety, and welfare of the public. An opportunity for hearing shall be held within 20 working days after the issuance of the order. The order shall be effective during the proceedings.

(4) If certification is revoked, the radiation machine shall not be used for mammography until reinstated.

(5) If a facility's certification is revoked, no person who owned or operated that facility at the time the act occurred may own or operate a mammography facility in Iowa within two years of the date of revocation.

d. Reinstatement of mammography certification after revocation.

(1) An application for reinstatement shall be submitted and processed as an initial application. Appropriate corrective actions must be submitted with the application.

(2) The agency shall inspect the radiation machine within 60 days of the approved reinstatement application.

(3) A full certificate shall be issued only after the agency has inspected the radiation machine and determined that it meets the requirements of these rules.

e. Inspections. The agency shall conduct an inspection of each radiation machine no later than 14 months after initial mammography certification and at least annually thereafter.

f. An application for authorization shall be submitted to the department and processed for agency approval. A mammography authorization is effective for three years.

g. A phantom image taken with the authorized unit(s) shall be reviewed at the time of annual inspection by the agency.

h. Federal mammography regulations. All Iowa facilities performing mammography shall comply with the applicable regulations found in 21 CFR Part 900 which has an effective date of April 28, 1999. Persons certified to perform mammography in Iowa shall be responsible for ensuring compliance with the appropriate CFR regulations or Iowa administrative rules, whichever are more stringent.

- i. Review workstation (RWS) requirements.
- (1) RWS used for final interpretation of mammogram images must meet the following criteria:
 1. Have 5 megapixel resolution; or
 2. Be approved by the United States Food and Drug Administration 510K process and be intended for digital mammography use.

(2) The workstation must have a quality control program substantially the same as that outlined by the mammography unit manufacturer's quality control manual, that outlined by the RWS monitor manufacturer's quality control manual or the quality control program outlined by an FDA-approved accrediting body.

41.6(3) *Mammography personnel.* The following requirements apply to all personnel involved in any aspect of mammography, including the production, processing, and interpretation of mammograms and related quality assurance activities:

a. *Interpreting physicians.* All radiologists interpreting mammograms shall meet the following qualifications:

(1) Initial qualifications. Unless the exemption in 41.6(3) "a"(3)"1" applies, before beginning to interpret mammograms independently, the interpreting radiologist shall:

1. Be licensed to practice medicine in Iowa;
2. Either:
 - Be certified in an appropriate specialty area by a body determined by FDA to have procedures and requirements adequate to ensure that physicians certified by the body are competent to interpret radiological procedures, including mammography; or
 - Have had at least three months of documented formal training in the interpretation of mammograms and in topics related to mammography. The training shall include instruction in radiation physics, including radiation physics specific to mammography, radiation effects, and radiation protection. The mammographic interpretation component shall be under the direct supervision of a radiologist who meets the requirements of 41.6(3) "a"; and

3. Have a minimum of 60 hours of documented medical education in mammography, which shall include: instruction in the interpretation of mammograms and education in basic breast anatomy, pathology, and physiology, technical aspects of mammography, and quality assurance and quality control in mammography. All 60 of these hours shall be Category 1 and at least 15 of the Category 1 hours shall have been acquired within the 36 months immediately prior to the date that the radiologist qualifies as an interpreting physician. Hours spent in residency specifically devoted to mammography will be considered as equivalent to Category 1 continuing medical education credits and will be accepted if documented in writing by the appropriate representative of the training institution;

4. Unless the exemption in 41.6(3) "a"(3)"2" applies, have interpreted or multi-read at least 240 mammographic examinations within the six-month period immediately prior to the date that the radiologist qualifies as an interpreting physician. This interpretation or multi-reading shall be under the direct supervision of an interpreting physician; and

5. Before an interpreting physician may begin independently interpreting mammograms produced by a new mammographic modality other than the modality in which the initial training was received, the interpreting physician shall have at least eight hours of training in the new mammographic modality.

(2) Continuing experience and education. All interpreting physicians shall maintain their qualifications by meeting the following requirements:

1. Following the second anniversary date of the end of the calendar quarter in which the requirements of 41.6(3) "a"(1) were completed, the interpreting physician shall have read or multi-read at least 960 mammographic examinations during the 24 months immediately preceding the date of the facility's annual MQSA inspection, during the 24-month period ending on the last day of the calendar quarter preceding the inspection, or during any 24-month period between the two. The facility will choose one of these dates to determine the 24-month period.

2. Following the third anniversary date of the end of the calendar quarter in which the requirements of 41.6(3) "a"(1) were completed, the interpreting physician shall have taught or completed at least 15 Category 1 continuing education units in mammography during the 36 months immediately preceding the

date of the facility's annual MQSA inspection, during the 36-month period ending on the last day of the calendar quarter preceding the inspection, or during any 36-month period between the two. The facility will choose one of these dates to determine the 36-month period.

3. Units earned through teaching a specific course can be counted only once towards the 15 required by 41.6(3) "a"(2)"2" even if the course is taught multiple times during the previous 36 months.

4. A current state of Iowa medical license must be in effect whenever mammography interpretations are performed by the physician.

(3) Exemptions.

1. Those physicians who qualified as interpreting physicians under 41.6(3) "a" or FDA interim regulations prior to April 28, 1999, are considered to have met the initial requirements of 41.6(3) "a." They may continue to interpret mammograms provided they continue to meet the licensure requirements of 41.6(3) "a"(1)"1" and the continuing experience and education requirements of this subrule.

2. Physicians who have interpreted or multi-read at least 240 mammographic examinations under the direct supervision of an interpreting physician in any six-month period during the last two years of a diagnostic radiology residency and who become appropriately board certified at the first allowable time, as defined by an eligible certifying body, are otherwise exempt from 41.6(3) "a"(1)"4."

(4) Reestablishing qualifications. Interpreting physicians who fail to maintain the required continuing experience or continuing education requirements shall reestablish their qualifications before resuming the independent interpretation of mammograms, as follows:

1. Interpreting physicians who fail to meet the continuing experience requirements of 41.6(3) "a"(2)"1" shall:

- Interpret or multi-read at least 240 mammographic examinations under the direct supervision of an interpreting physician, or

- Interpret or multi-read a sufficient number of mammographic examinations, under the direct supervision of an interpreting physician, to bring the physician's total to at least 960 examinations for the prior 24 months, whichever is less. The interpretations required under 41.6(3) "a"(4)"1" shall be done within the six months immediately prior to resuming independent interpretation. Consecutive or back-to-back requalification of mammography personnel, due to failure to meet continuing education or experience requirements, will be allowed once without proof of extenuating circumstances. This agency will determine the validity of such proof and render a decision after review of all pertinent information. Those individuals who are denied requalification will be allowed to resubmit for requalification following a 90-day waiting period.

2. Interpreting physicians who fail to meet the continuing education requirements of 41.6(3) "a"(2)"2" shall obtain a sufficient number of additional Category 1 continuing medical education credits in mammography to bring their total up to the required 15 credits in the previous 36 months before resuming independent interpretation.

b. Radiologic technologists. All mammographic examinations shall be performed by general radiographers who meet the following general requirements, mammography requirements, and continuing education and experience requirements:

(1) General requirements. Be permitted to operate as a general radiographer in Iowa; and

(2) Mammography requirements. Have qualified as a radiologic technologist under 41.6(3) "b" before April 28, 1999, or have completed at least 40 contact hours of documented training specific to mammography under the supervision of a qualified instructor after successful completion of a formal radiography training program. The hours of documented training shall include, but not necessarily be limited to:

1. Training in breast anatomy and physiology, positioning and compression, quality assurance/quality control techniques, and imaging of patients with breast implants;

2. The performance of a minimum of 25 examinations under the direct supervision of an individual qualified under 41.6(3) "b"; and

3. Before a radiologic technologist may begin independently performing mammographic examinations using a mammographic modality other than one of those for which the technologist received training under 41.6(3) "b"(2)"3," the technologist shall have at least eight hours of continuing education

units in the new modality. The eight hours may not be derived from the supervised examination of patients; and

(3) Continuing education requirements.

1. Following the third anniversary date of the end of the calendar quarter in which the requirements of 41.6(3)“b”(1) and (2) were completed, the radiologic technologist shall have taught or completed at least 15 continuing education units in mammography during the 36 months immediately preceding the date of the facility’s annual MQSA inspection, during the 36-month period ending on the last day of the calendar quarter preceding the inspection, or during any 36-month period between the two. The facility will choose one of these dates to determine the 36-month period.

2. Units earned through teaching a specific course can be counted only once towards the 15 required in 41.6(3)“b”(3)“1” even if the course is taught multiple times during the previous 36 months.

3. Requalification. A radiologic technologist who fails to meet the continuing education requirements of 41.6(3)“b”(3)“1” shall obtain a sufficient number of continuing education units in mammography to bring the total up to at least 15 in the previous 36 months. The continuing education for requalification cannot be obtained by performing supervised mammography examinations. The technologist may not resume performing unsupervised mammography examinations until the continuing education requirements are completed.

4. An Iowa permit to practice radiography must be in effect whenever mammogram procedures are performed by the radiologic technologist.

5. Only 50 percent of the total required mammography continuing education hours may be obtained through presenting, or acting as a trainer for, a continuing education or training program.

(4) Continuing experience requirements.

1. Following the second anniversary date on which the requirements of 41.6(3)“b”(1) and (2) were completed, the radiologic technologist shall have performed a minimum of 200 mammography examinations during the 24 months immediately preceding the date of the facility’s annual inspection, during the 24-month period ending on the last day of the calendar quarter preceding the inspection, or during any 24-month period between the two. The facility will choose one of these dates to determine the 24-month period.

2. Requalification. Radiologic technologists who fail to meet the continuing experience requirements of this subrule shall perform a minimum of 25 mammography examinations under the direct supervision of a qualified radiologic technologist before resuming the performance of unsupervised mammography examinations.

(5) Consecutive or back-to-back requalification of mammography personnel, due to failure to meet continuing education or experience requirements, will be allowed once without proof of extenuating circumstances. This agency will determine the validity of such proof and render a decision after review of all pertinent information. Those individuals who are denied requalification will be allowed to resubmit for requalification following a 90-day waiting period.

c. *Medical physicists.* All medical physicists conducting surveys of mammography facilities and providing oversight of the facility quality assurance program under 41.6(3)“c”(2) shall meet the following:

(1) Initial qualifications.

1. Be Iowa approved; and

2. Have a master’s degree or higher in a physical science from an accredited institution, with no less than 20 semester hours or 30 quarter hours of college undergraduate or graduate level physics; and

3. Have 20 contact hours of documented specialized training in conducting surveys of mammography facilities; and

4. Have at least eight hours of training in surveying units of a new modality other than the one for which the physicist received training to qualify under 41.6(3)“c”(1)“3” before independently performing the new mammographic modality; and

5. Have experience conducting surveys in at least one mammography facility and have a total of at least 10 mammography units. No more than one survey of a specific unit within a period of 60 days can be counted towards the total mammography unit survey requirement. After April 28, 1999, experience

conducting surveys must be acquired under the direct supervision of a medical physicist who meets all the requirements of this subrule; or

(2) Alternative initial qualifications.

1. Have qualified as a medical physicist under FDA interim regulations and have retained that qualification by maintenance of the active status of any licensure, approval, or certification required under the interim regulations; and

2. Prior to April 28, 1999, have:

- A bachelor's degree or higher in a physical science from an accredited institution with no less than 10 semester hours or equivalent of college undergraduate or graduate level physics.

- Forty contact hours of documented specialized training in conducting surveys of mammography facilities.

- Experience conducting surveys in at least one mammography facility and have a total of at least 20 mammography units. No more than one survey of a specific unit within a period of 60 days can be counted towards the total mammography unit survey requirement. The training and experience requirements must be met after fulfilling the degree requirement.

- At least eight hours of training in surveying units of a new modality other than the one for which the physicist received training to qualify under 41.6(3) "c"(1)"3" before independently performing the new mammographic modality.

(3) Continuing qualifications.

1. Continuing education. Following the third anniversary date on which the requirements of 41.6(3) "c"(1) or (2) were completed, the medical physicist shall have taught or completed at least 15 continuing education units in mammography during the prior 36 months, during the 36-month period ending on the last day of the previous calendar quarter, or during any 36-month period between the two. The facility shall choose one of these dates to determine the 36-month period. Units earned through teaching a specific course shall be counted only once towards the required 15 units in a 36-month period, even if the course is taught multiple times during the 36 months.

2. Continuing experience. Following the second anniversary date on which the requirements of this subrule were completed, the medical physicist shall have surveyed at least two mammography facilities and a total of at least 6 mammography units during the prior 24 months, during the 24-month period ending on the last day of the previous calendar quarter, or during any 24-month period between the two. The facility shall choose one of these dates to determine the 24-month period. No more than one survey of a specific facility within a 10-month period or a specific unit within a period of 60 days shall be counted towards this requirement.

3. Continuing qualifications must be met whenever medical physics services are provided by the medical physicist.

(4) Reestablishing qualifications. Medical physicists who fail to maintain the required continuing qualifications of this subrule may not perform the MQSA surveys without the supervision of a qualified medical physicist. Before independently surveying another facility, medical physicists must reestablish their qualifications as follows:

1. Medical physicists who fail to meet the continuing education requirements of this subrule shall obtain a sufficient number of continuing education units to bring their total units up to the required 15 in the previous three years.

2. Medical physicists who fail to meet the continuing experience requirements of this subrule shall complete a sufficient number of surveys under the direct supervision of a medical physicist who meets the qualifications of this subrule to bring their total surveys up to the required two facilities and 6 units in the previous 24 months. No more than one survey of a specific unit within a period of 60 days can be counted towards the total mammography unit survey requirement.

d. *Retention of personnel records.* Facilities shall maintain records to document the qualifications of all personnel who worked at the facility as interpreting physicians, general radiographers, or medical physicists. These records must be available for review by the MQSA inspectors. Records of personnel no longer employed by the facility should not be discarded until the next annual inspection has been

completed and the agency has determined that the facility is in compliance with the MQSA personnel requirements.

41.6(4) *Obtaining and preserving records.*

a. The facility performing the current mammography examination must make all reasonable efforts to obtain the patient's recent mammography records, including original images or films, copies of written reports prepared by interpreting physicians, and other relevant information pertinent to previous mammograms that might be available from other facilities, for comparison with the current mammography records.

b. The facility must make, for each patient, a written report of each mammography examination performed. This report shall include:

- (1) The date the mammography procedure was performed.
- (2) The date of the interpretation.
- (3) The name of the interpreting physician.
- (4) The name of the patient and an additional patient identifier.
- (5) A description of the procedures performed.
- (6) The name of the referring physician (if any) or other physician (if any) identified by the patient to receive the interpreting physician's written report.
- (7) The date the interpreting physician's written report was sent to the appropriate physician or patient.
- (8) A separate and distinct section entitled, "Assessment" with the appropriate assessment term. One of the following terms in quotations or an approved equivalent must be included in the assessment:
 1. "Negative": Nothing to comment upon (if the interpreting physician is aware of clinical findings or symptoms, despite the negative assessment, these shall be explained).
 2. "Benign": Also a negative assessment.
 3. "Probably benign": Finding(s) has a high probability of being benign.
 4. "Suspicious": Finding(s) without all the characteristic morphology of breast cancer but indicating a definite probability of being malignant.
 5. "Highly suggestive of malignancy": Finding(s) has a high probability of being malignant.
 6. "Incomplete: Need additional imaging evaluation" shall be assigned as an assessment in cases where no final assessment category can be assigned due to incomplete workup, and reasons why no assessment can be made shall be stated by the interpreting physician.
- (9) Recommendations made to the health care provider about what additional actions, if any, should be taken. All clinical questions raised by the referring health care provider shall be addressed in the report to the extent possible, even if the assessment is negative or benign.
- (10) Information on a patient's breast density, as categorized by an interpreting physician at the facility based on standards as defined in nationally recognized guidelines or systems for breast imaging reporting of mammography screening, including the breast imaging reporting and data system of the American College of Radiology.

c. Preservation of records.

(1) The facility must provide satisfactory assurances (as documented in its medical records) that the images or films of the first and subsequent mammography procedures and the related written reports of the interpreting physician for each patient are either placed in the patient's medical record kept by the facility or sent for placement in the patient's medical record as directed by the patient's physician or the patient.

(2) Records retained by the facility must be retained for at least 60 calendar months following the date of service, as long as the patient continues consecutive mammograms. If no additional mammograms of the patient are performed, the records must be retained for at least ten years.

(3) If the facility should cease to exist before the end of the retention period, the records must be transferred to the patient or patient's physician or other mammographic facility.

(4) The facility shall upon request by, or on behalf of, the patient, permanently or temporarily, transfer the original mammograms and copies of the patient's reports to a medical institution, or to a physician or health care provider of the patient, or to the patient directly.

(5) Any fee charged to the patient for providing the services in subparagraph (4) above shall not exceed the documented costs associated with this service.

d. Communication of results to the patient. Each facility shall maintain a system to ensure that the results of each mammographic examination are communicated in lay terms to each patient in a time period not to exceed 30 days from the date of the mammography examination. If assessments are “Suspicious” or “Highly suggestive of malignancy” and the patient has not named a health care provider, the facility shall make reasonable attempts to ensure that the results are communicated to the patient as soon as possible.

(1) As soon as possible, but no later than 30 days from the date of the mammography examination, patients who do not name a health care provider to receive the mammography report shall be sent the report described in 41.6(4) “e”(1) in addition to a written notification of results in lay terms.

(2) Each facility that accepts patients who do not have a primary care provider shall maintain a system for referring such patients to a health care provider when clinically indicated.

(3) The breast density information as designated in the report pursuant to 41.6(4) “b”(10) shall be included in the patient lay letter with a reference to a department-accepted site or document where the patient can obtain more information about breast density. For patients categorized as having heterogeneously dense breasts or extremely dense breasts, or an equivalent determination by another nationally recognized density gradient system, the notification to the patient shall include evidence-based information on dense breast tissue, the increased risk associated with dense breast tissue, and the effects of dense breast tissue on screening mammography and shall be stated in language appropriate for the facility’s patient population.

e. Communication of results to health care providers. When the patient has a referring health care provider or the patient has named a health care provider, the facility shall:

(1) Provide a written report of the mammography examination, including all of the items listed in 41.6(4) “b,” to the health care provider as soon as possible, but no later than 30 days from the date of the examination, and

(2) If the assessment is “Suspicious” or “Highly suggestive of malignancy,” make reasonable attempts to communicate with the health care provider as soon as possible or, if the health care provider is unavailable, to a responsible designee of the health care provider.

f. Mammographic image identification. Each mammographic image shall have the following information indicated on it in a permanent, legible, and unambiguous manner and placed so as not to obscure anatomic structures:

(1) Name of patient and an additional patient identifier.

(2) Date of examination.

(3) View and laterality. This information shall be placed on the image in a position near the axilla. Standardized codes specified by the accreditation body and approved by the FDA shall be used to identify view and laterality.

(4) Facility name and location. At a minimum, the location shall include the city, state, and ZIP code of the facility.

(5) Technologist identification.

(6) Mammography unit identification, if there is more than one unit in the facility.

41.6(5) *Quality assurance program.*

a. The facility shall ensure that the facility has an equipment quality assurance program specific to mammography and covering all components of the system to ensure consistently high-quality images with minimum patient exposure. Responsibility for the quality assurance program and for each of its elements shall be assigned to individuals who are qualified for their assignments and who shall be allowed adequate time to perform these duties.

(1) Lead interpreting physician. The facility shall identify a lead interpreting physician who shall have the general responsibility of ensuring that the quality assurance program, EQUIP included, meets all requirements of these rules. No other individual shall be assigned or shall retain responsibility for quality assurance tasks unless the lead interpreting physician has determined that the individual’s qualifications for, and performance of, the assignment are adequate.

(2) Interpreting physicians. All interpreting physicians interpreting mammograms for the facility shall:

1. Follow the facility procedures for corrective action when the images they are asked to interpret are of poor quality, and

2. Participate in the facility's medical outcomes audit program.

(3) Medical physicist. Each facility shall have the services of a medical physicist available to survey mammography equipment and oversee the equipment-related quality assurance practices of the facility. At a minimum, the medical physicist(s) shall be responsible for performing the surveys and mammography equipment evaluations and providing the facility with the applicable reports.

(4) Quality control technologist. Responsibility for all individual tasks within the quality assurance program not assigned to the lead interpreting physician or the medical physicist shall be assigned to a quality control technologist(s). The tasks are to be performed by the quality control technologist or by other personnel qualified to perform the tasks. When other personnel are utilized for these tasks, the quality control technologist shall ensure that the tasks are completed in such a way as to meet the requirements of 41.6(5) "e" through "j."

b. The facility shall ensure that a general review of the program is conducted at least annually and have available the services of a qualified medical physicist who is capable of establishing and conducting the program.

c. Under the direction of the lead interpreting physician, the medical physicist shall have responsibility for establishing and conducting the equipment quality assurance program. The program shall include:

(1) Conducting or training others to conduct equipment performance monitoring functions.

(2) Analyzing the monitoring results to determine if there are any problems requiring correction.

(3) Ensuring that the facility has procedures in place for carrying out or arranging for the necessary corrective actions as well as for the calibrations and other preventive maintenance.

d. Calibration of equipment. All variable parameters of the equipment shall be calibrated:

(1) When the equipment is first installed.

(2) After any major changes or replacement of parts.

(3) At least annually during use based on recommendations of the mammography imaging medical physicist.

(4) When quality assurance tests indicate that calibration is needed.

e. Performance monitoring. The facility shall routinely ensure that the performance of the mammography system is monitored. The parameters to be monitored shall include all testing as outlined in the manufacturer's mammography unit's quality control manual and the RWS quality control requirements of 41.6(2) "i" (2).

f. Availability and use of technique charts that shall include an indication of the kV-target-filter combination to be used with each image receptor.

g. Evaluation of monitoring results. FFDM and DBT mammography units must comply with the quality control test requirements outlined by the performance criteria in the appropriate manufacturer's quality control manual.

(1) Standards of image quality giving acceptable ranges of values for each of the parameters tested shall be established to aid in the evaluation. The standards of image quality related to dose shall include a requirement that the mean glandular dose for one craniocaudal view of a 4.2 cm compressed breast (50 percent adipose/50 percent glandular) or equivalent phantom shall not exceed 300 millirad for full field digital units.

(2) The monitoring results shall be compared routinely by the facility staff to the standards of image quality in 41.6(5) "j." If any test results fall outside the performance criteria range listed for the unit, specific actions as directed in the appropriate quality control manual shall be followed.

h. Medical outcomes audit. Each facility shall establish a system for reviewing outcome data from all mammography performed, including follow-up on the disposition of positive mammograms and correlation of surgical biopsy results with the interpreting physician's findings. This program shall be designed to ensure the reliability, clarity, and accuracy of the interpretation of mammograms.

(1) Analysis of these outcome data shall be made individually and collectively for all interpreting physicians at the facility. In addition, any cases of breast cancer among women imaged at the facility that

subsequently become known to the facility shall prompt the facility to initiate follow-up on surgical and pathology results, or both, and review of the mammograms taken prior to the diagnosis of a malignancy. Responsibility for each requirement for monitoring shall be assigned to qualified personnel and documented in the facility's records.

(2) Frequency of audit analysis. The facility's first audit analysis shall be initiated no later than 12 months after the date the facility becomes certified, or 12 months after April 28, 1999, whichever date is the latest. This audit analysis shall be completed within an additional 12 months to permit completion of diagnostic procedures and data collection. Subsequent audit analyses will be conducted at least once every 12 months.

(3) Reviewing interpreting physician. Each facility shall designate at least one interpreting physician to review the medical outcomes audit data at least once every 12 months. This individual shall record the dates of the audit period(s) and shall be responsible for analyzing results based on this audit. This individual shall also be responsible for documenting the results and notifying other interpreting physicians of the results and the facility aggregate results. If follow-up actions are taken, the reviewing interpreting physician shall also be responsible for documenting the nature of the follow-up. The reviewing physician shall sign the medical audit as proof of the evaluation of the data.

i. Quality assurance records. The lead interpreting physician, quality control technologist, and medical physicist shall ensure that records concerning employee qualifications to meet assigned quality assurance tasks, mammography technique and procedures, quality control (including monitoring data, problems detected by analysis of that data, corrective actions, and the effectiveness of the corrective actions), safety, and protection are properly maintained and updated. These quality control records shall be kept for each test specified in these rules until the next annual inspection has been completed and the facility is in compliance with the quality assurance requirements or until the test has been performed two additional times at the required frequency, whichever is longer.

j. Quality assurance—equipment.

(1) Daily, weekly, biweekly, monthly, quarterly, semiannual and annual quality control tests. Facilities shall perform quality control tests as required by the manufacturer's mammography unit's quality control manual, the RWS quality control requirements of 41.6(2) "i"(2) or the quality control program outlined by an FDA-approved accrediting body.

(2) Surveys.

1. At least annually, each facility shall undergo a survey by a medical physicist or by an individual under the direct supervision of a medical physicist. The survey shall include testing as required by the manufacturer's mammography unit's quality control manual, the RWS quality control manual or the quality control program outlined by the accrediting body.

2. The results of the tests, any corrective actions taken and their results shall be evaluated for adequacy by the medical physicist performing the survey.

3. The medical physicist shall prepare a survey report that includes a summary of this review and recommendations for necessary improvements.

4. The survey report shall be sent to the facility within 30 days of the date of the survey.

5. The survey report shall be dated and signed by the medical physicist performing or supervising the survey. If the survey was performed entirely or in part by another individual under the direct supervision of the medical physicist, that individual and the part of the survey that individual performed shall also be identified in the survey report.

(3) Mammography equipment evaluations. Additional evaluations of mammography units or image processors or any other applicable mammography system ancillary parts shall be conducted at new installations, at disassembly, at reassembly, at the same or a new location, or when major components are changed or repaired. These evaluations shall be used to determine whether the new or changed equipment meets the requirements of applicable standards in 41.6(5) and 41.6(6). All problems shall be corrected before the new or changed equipment is put into service for examinations. The mammography equipment evaluation shall be performed by a medical physicist or by an individual under the direct supervision of an Iowa-approved medical physicist.

(4) Calibration of air kerma measuring instruments. Instruments used by medical physicists in their annual survey to measure the air kerma or air kerma rate from a mammography unit shall be calibrated at least once every two years and each time the instrument is repaired. The instrument calibration must be traceable to a national standard and calibrated with an accuracy of plus or minus 6 percent (95 percent confidence level) in the mammography energy range.

(5) Infection control. Facilities shall establish and comply with a system specifying procedures to be followed by the facility for cleaning and disinfecting mammography equipment after contact with blood or other potentially infectious materials. This system shall specify the methods for documenting facility compliance with the infection control procedures established and shall:

1. Comply with all applicable federal, state, and local regulations pertaining to infection control; and
2. Comply with the manufacturer's recommended procedures for the cleaning and disinfecting of the mammography equipment used in the facility; or

3. If adequate manufacturer's recommendations are not available, comply with generally accepted guidance on infection control, until such recommendations become available.

k. Mammography procedures and techniques for mammography of patients with breast implants.

(1) Each facility shall have a procedure to inquire whether or not the patient has breast implants prior to the actual mammographic examination.

(2) Except where contraindicated, or unless modified by a physician's directions, patients with breast implants undergoing mammography shall have mammographic views to maximize the visualization of breast tissue.

l. Consumer complaint mechanism. Each facility shall:

- (1) Establish a written and documented system for collecting and resolving consumer complaints;
- (2) Maintain a record of each serious complaint received by the facility for at least three years from the date the complaint was received;

(3) Provide the consumer with adequate directions for filing serious complaints with the facility's accreditation body and any other appropriate regulatory entity if the facility is unable to resolve a serious complaint to the consumer's satisfaction.

(4) Report unresolved serious complaints to the accreditation body in a manner and time frame specified by the accreditation body.

m. Clinical image quality. Clinical images produced by any certified facility must continue to comply with the standards for clinical image quality established by that facility's accreditation body.

n. Additional mammography review and patient notification.

(1) If the agency believes that mammography quality at a facility has been compromised and may present a serious risk to human health, the facility shall provide clinical images and other relevant information, as specified by the agency, for review by the accreditation body or other entity designated by the agency. This additional mammography review will help the agency to determine whether the facility is in compliance with rule 641—41.6(136C) and, if not, whether there is a need to notify affected patients, their physicians, or the public that the reliability, clarity, and accuracy of interpretation of mammograms has been compromised.

(2) If the agency determines that any activity related to the provision of mammography at a facility may present a serious risk to human health such that patient notification is necessary, the facility shall notify patients or their designees, their physicians, or the public of action that may be taken to minimize the effects of the risk. Such notification shall occur within a time frame and a manner specified by the agency.

41.6(6) Equipment standards. The equipment used to perform mammography shall meet the following standards:

a. Design: Be specifically designed for mammography. This prohibits systems that have been modified or equipped with special attachments for mammography.

b. Performance standards: Meet the Food and Drug Administration (FDA) performance standards for diagnostic X-ray systems and their major components found in 21 CFR 1020.30 and FDA standards for radiographic equipment in 21 CFR 1020.31.

c. Image receptor systems:

(1) Have image receptor systems and individual components which are appropriate for mammography and used according to the manufacturer's recommendations.

(2) Systems used for magnification procedures shall be capable of operation with the grid removed from between the source and image receptor.

d. Light fields: For any system with a light beam that passes through the X-ray beam-limiting device, the light shall provide an average illumination of not less than 160 lux (15 foot candles) at 100 centimeters or the maximum source-image receptor distance (SID), whichever is less.

e. Magnification:

(1) Systems used to perform noninterventional problem-solving procedures shall have radiographic magnification capability available for use by the operator.

(2) Systems used for magnification procedures shall provide, at a minimum, at least one magnification value within the range of 1.4 to 2.0.

f. Tube-image receptor assembly:

(1) The assembly shall be capable of being fixed in any position where it is designed to operate. Once fixed in any such position, it shall not undergo unintended motion.

(2) The mechanism ensuring compliance with this subrule shall not fail in the event of power interruption.

g. Focal spot: The focal spot size, magnification factor and source to image receptor distance (SID) shall be appropriate for mammography.

(1) When more than one focal spot is provided, the system shall indicate, prior to exposure, which focal spot is selected.

(2) When more than one target material is provided, the system shall indicate, prior to exposure, the preselected target material.

(3) When the target material or focal spot, or both, is selected by a system algorithm that is based on the exposure or on a test exposure, the system shall display, after the exposure, the target material or focal spot, or both, actually used during the exposure.

h. Compression devices: Shall have compression devices able to immobilize and compress the breast with a force of at least 25 pounds per square inch and shall be capable of maintaining this compression for at least three seconds. Each system shall provide:

(1) An initial power-driven compression activated by hands-free controls operable from both sides of the patient; and

(2) Fine adjustment compression controls operable from both sides of the patient.

(3) Systems shall be equipped with different sized compression paddles that match the sizes of all full field image receptors provided for the system. Compression paddles for special purposes, including those smaller than the full size of the image receptor (for "spot compression"), may be provided. Such compression paddles for special purposes are not subject to 41.6(6) "h" (6) and (7).

(4) Except as provided in 41.6(6) "h," the compression paddle shall be flat and parallel to the breast support table and shall not deflect from parallel by more than 1.0 cm at any point on the surface of the compression paddle when compression is applied.

(5) Equipment intended by the manufacturer's design not to be flat and parallel to the breast support table during compression shall meet the manufacturer's design specifications and maintenance requirements.

(6) The chest wall edge of the compression paddle shall be straight and parallel to the edge of the image receptor. Equipment intended by the manufacturer's design not to be straight and parallel to the edge of the image receptor shall meet the manufacturer's design specifications and maintenance requirements.

(7) The chest wall edge of the compression paddle may allow for patient comfort but shall not appear on the image.

i. Grids: Shall have the capability for using antiscatter grids.

j. AEC: Shall have automatic exposure control such that:

(1) The positioning or selection of the detector shall permit flexibility in the placement of the detector under the target tissue.

- The size and available positions of the detector shall be clearly indicated at the X-ray input surface of the breast compression paddle.
- The selected position of the detector shall be clearly indicated.
- (2) The system shall provide means for the operator to vary the selected optical density from the normal (zero) setting.
 - k. Control panel: Shall have a control panel that:
 - (1) Gives a positive indication when X-rays are being produced.
 - (2) Gives an audible signal indicating termination of exposure.
 - (3) Has manual selection of milliamperere seconds (mAs) or at least one of its component parts (milliamperere (mA) or time, or both).
 - (4) Has the technique factors (peak tube potential in kilovolts (kV) and either tube current in mA and exposure time in seconds or the product of tube current and exposure time in mAs) to be used during an exposure indicated before the exposure begins, except when AEC is used, in which case the technique factors that are set prior to the exposure shall be indicated.
 - (5) Has a system that, following AEC mode use, shall indicate the actual kilovoltage peak (kVp) and mAs used during the exposure.
 - l. mAs: Shall indicate, or provide a means of determining, the mAs resulting from each exposure made with automatic exposure control.
 - m. Mobile units and vans. Appropriate manufacturer's quality control manual procedures and criteria shall be met.

41.6(7) *Safety standards for mammography equipment.*

- a. Proper safety precautions shall be maintained and shall include, but not be limited to, adequate shielding for patients, personnel, and facilities. The equipment shall be operated only from a shielded position.
- b. Equipment operators shall be monitored in accordance with 641—40.37(136C).
- c. Annual inspections shall be conducted by an inspector from the agency to ensure compliance with these rules. Identified hazards shall be promptly corrected.
- d. Equipment shall be shockproof and grounded to protect against electrical hazards.
- e. Records of all inspection reports and medical physicist surveys shall be maintained for at least seven years.

RULE 641—41.6(136C)—APPENDIX I

Rescinded IAB 4/5/00, effective 5/10/00

RULE 641—41.6(136C)—APPENDIX II

Glandular Dose (in mrad) for 1 Roentgen Entrance Exposure

4.2 cm Breast Thickness—50% Adipose/50% Glandular Breast Tissue*

[ARC 1401C, IAB 4/2/14, effective 5/7/14; ARC 3393C, IAB 10/11/17, effective 11/15/17; ARC 6164C, IAB 2/9/22, effective 3/16/22]

641—41.7(136C) X-ray machines used for stereotactically guided breast biopsy.

41.7(1) *Definitions.* In addition to the definitions provided in rules 641—38.2(136C), 641—40.2(136C), and 641—41.1(136C), the following definitions are applicable to this rule.

“Collaborative setting” means a setting in which a qualified radiologist and surgeon (under 41.7(3) “a” or 41.7(3) “c”) are working together in consultation and in performing stereotactically guided breast biopsies with a common goal of the patient's benefit.

“Phantom” means an artificial test object used to simulate radiographic characteristics of compressed breast tissue and containing components that radiographically model aspects of breast disease and cancer.

“Procedure” means a stereotactically guided breast biopsy performed on a patient for diagnostic purposes.

“Qualified training physician” means a physician who is qualified under 41.7(3) to perform stereotactically guided breast biopsies and who has performed at least 24 procedures.

“Stereotactic training phantom” means a training or practice tool or medium used for stereotactically guided breast biopsy procedures.

“Stereotactically guided breast biopsy” means a breast biopsy procedure performed with the utilization of a dedicated system which emits ionizing radiation and is designed specifically for that procedure.

“Supervising physician” means the physician designated by the facility/owner to:

1. Evaluate the equipment, personnel, procedures, and records annually; and
2. Establish and conduct the quality assurance program.

41.7(2) *Registration and application standards and requirements.*

a. Each radiation machine used to perform stereotactically guided breast biopsies shall be registered according to 641—subrule 39.3(2).

b. Each facility wishing to perform stereotactically guided breast biopsies shall apply to the agency for authorization by providing or verifying the following information for each machine:

(1) The stereotactically guided breast biopsy equipment and facility meet the general requirements of these rules for radiation machines.

(2) The radiation machine is specifically designed to perform stereotactically guided breast biopsies.

(3) The radiation machine is used according to these rules on patient radiation exposure and radiation dose levels.

(4) The radiation machine is operated by individuals meeting the requirements of this rule.

(5) The entire stereotactically guided breast biopsy system is evaluated annually by a medical physicist who meets the requirements of this rule.

(6) The equipment, personnel, procedures and records are evaluated annually by the supervising physician.

c. Suspension, revocation, or denial of authorization.

(1) Authorization may be suspended or revoked with cause if any machine does not meet one or more of the standards of these rules.

(2) The facility shall have an opportunity for a hearing in connection with a denial, suspension, or revocation of authorization.

(3) An emergency order suspending or revoking authorization may be issued if the agency finds the radiation machine or facility violates rules that seriously affect the health, safety and welfare of the public. An opportunity for hearing shall be held within 20 working days after the issuance of the order. The order shall be effective during the proceedings.

(4) If authorization is revoked, the radiation machine shall not be used until reinstated.

d. Reinstatement of authorization.

(1) An application for reinstatement shall be submitted and processed the same as an initial application.

(2) The agency shall inspect the radiation machine within 60 days of the approved reinstatement application. If the reinstatement is after a revocation, appropriate corrective action shall be submitted with the application.

(3) A full reinstatement shall be issued only after the agency has inspected the radiation machine and facility and determined that they meet the requirements of these rules.

e. Inspections. The agency shall conduct an inspection of each radiation machine no later than 14 months after initial authorization and at least annually thereafter.

41.7(3) *Physicians.* Physicians must be qualified according to the setting and their role in performing stereotactically guided breast biopsies as outlined below.

a. Requirements for a radiologist in a collaborative setting are as follows:

(1) Initial training and qualifications.

1. Must be qualified according to 41.6(3) “a.”

2. Shall have performed at least 12 stereotactically guided breast biopsies prior to July 1, 1998, or at least 3 hands-on stereotactically guided breast biopsies under a physician who is qualified under 41.7(3) and has performed at least 24 stereotactically guided breast biopsies.

3. Shall have at least three hours of Category 1 CME or three hours of training approved by the agency in stereotactically guided breast biopsy.

4. Shall be responsible for mammographic interpretation, be experienced as noted in 41.7(3) "a"(1)"2" above and be experienced in the specific recommendations for each biopsy and lesion identification at time of each biopsy performed by that physician.

5. Shall be responsible for the supervision of the radiologic technologist during the procedure.

(2) Maintenance of proficiency and CME requirements.

1. Following the first anniversary in which the requirements of this subrule were met, completion of a total of 12 breast biopsy procedures must be met for each calendar year with at least 6 being stereotactic breast biopsies. The remaining 6 can be any combination of the following, and demonstration of the chosen combination needs to be clearly documented:

- Stereotactic breast biopsy procedures.
- Stereotactic biopsy of a stereotactic training phantom with documentation of steps taken or a written report.

- Stereotactic breast biopsy case review, which must be documented to include a review of pre-biopsy mammographic examination, scout and stereotactic positioning, biopsy needle pre-fire and post-fire positioning and targeting, specimen radiograph images, post-biopsy images and review of post-biopsy pathology results.

- Mammographic-guided, stereotactic-guided, or both, wire localization procedures.

- Ultrasound-guided breast biopsy procedures.

- MRI-guided breast biopsy procedures.

If experience is not maintained, the physician must requalify by performing three procedures under direct supervision of a qualified training physician or an agency-approved manufacturer applications specialist before resuming unsupervised procedures.

2. Following the first anniversary in which the requirements of this subrule were met, obtain at least three hours of Category 1 CME or three hours of training approved by the agency in stereotactic-guided breast biopsy during the 36 months immediately preceding the date of the facility's annual stereotactic biopsy inspection, or during the 36-month period ending on the last day of the calendar quarter preceding the inspection. If education is not maintained, the physician must requalify by obtaining additional CME credits to reach 3 CME credits in the prior 36 months before resuming unsupervised procedures. These CMEs cannot be obtained by the performance of supervised procedures.

3. A current state of Iowa medical license must be in effect whenever procedures are performed independently by the physician.

b. Requirements for a physician other than a qualified radiologist in a collaborative setting are as follows:

(1) Initial training and qualifications.

1. Must be licensed to practice medicine in Iowa.

2. Must have at least three hours of Category 1 CME or three hours of training approved by the agency in stereotactically guided breast biopsy which includes instruction on triangulation for lesion location.

3. Must have performed at least 12 stereotactically guided breast biopsies prior to May 9, 2001, or at least 3 hands-on stereotactically guided breast biopsy procedures under a physician who is both qualified to perform stereotactic biopsy procedures according to 41.7(3) and has performed at least 24 stereotactically guided breast biopsies.

4. Shall be responsible for post-biopsy management of the patient.

5. Shall be responsible for supervision of the radiologic technologist during the procedure.

(2) Maintenance of proficiency and CME requirements.

1. Following the first anniversary in which the requirements of this subrule were met, completion of a total of 12 breast biopsy procedures must be met for each calendar year with at least 6 being stereotactic breast biopsies. The remaining 6 can be any combination of the following and demonstration of the chosen combination needs to be clearly documented:

- Stereotactic breast biopsy procedures.

- Stereotactic biopsy of a stereotactic training phantom with documentation of steps taken or a written report.

- Stereotactic breast biopsy case review, which must be documented to include a review of pre-biopsy mammographic examination, scout and stereotactic positioning, biopsy needle pre-fire and post-fire positioning and targeting, specimen radiograph images, post-biopsy images and review of post-biopsy pathology results.

- Mammographic-guided, stereotactic-guided, or both, wire localization procedures.
- Ultrasound-guided breast biopsy procedures.
- MRI-guided breast biopsy procedures.

If experience is not maintained, the physician must requalify by performing three procedures under direct supervision of a qualified training physician or an agency-approved manufacturer applications specialist before resuming unsupervised procedures.

2. Following the first anniversary in which the requirements of this subrule were met, obtain at least three hours of Category 1 CME immediately preceding the date of the facility's annual stereotactic biopsy inspection, or during the 36-month period ending on the last day of the calendar quarter preceding the inspection. If education is not maintained, the physician must requalify by obtaining additional CME credits to reach 3 CME credits in the prior 36 months before resuming unsupervised procedures. These CMEs cannot be obtained by the performance of supervised procedures.

3. A current state of Iowa medical license must be in effect whenever unsupervised procedures are performed by the physician.

c. Requirements for a radiologist performing stereotactically guided breast biopsy independently are as follows:

(1) Initial training and requirements.

1. Must be qualified according to 41.6(3) "a."
2. Initially, must have at least three hours of Category 1 CME or three hours of training approved by the agency in stereotactically guided breast biopsy.
3. Initially, must obtain at least 15 hours of CME in breast imaging including benign and malignant breast diseases.

4. Must have performed at least 12 stereotactically guided breast biopsies prior to July 1, 1998, or at least 3 hands-on stereotactically guided breast biopsy procedures under a physician who is both qualified according to 41.7(3) and has performed at least 24 stereotactically guided breast biopsies.

5. Must be responsible for mammographic interpretation.

6. Must be responsible for patient selection.

7. Must be responsible for the supervision of the radiologic technologist during the procedure.

8. Must be responsible for post-biopsy management of the patient which may include referral to a surgeon for a follow-up on certain lesions.

(2) Maintenance of proficiency and CME requirements.

1. Following the first anniversary in which the requirements of this subrule were met, completion of a total of 12 breast biopsy procedures must be met for each calendar year with at least 6 being stereotactic breast biopsies. The remaining 6 can be any combination of the following and demonstration of the chosen combination needs to be clearly documented:

- Stereotactic breast biopsy procedures.
- Stereotactic biopsy of a stereotactic training phantom with documentation of steps taken or a written report.

- Stereotactic breast biopsy case review, which must be documented to include a review of pre-biopsy mammographic examination, scout and stereotactic positioning, biopsy needle pre-fire and post-fire positioning and targeting, specimen radiograph images, post-biopsy images and review of post-biopsy pathology results.

- Mammographic-guided, stereotactic-guided, or both, wire localization procedures.
- Ultrasound-guided breast biopsy procedures.
- MRI-guided breast biopsy procedures.

If experience is not maintained, the physician must requalify by performing three procedures under direct supervision of a qualified training physician or an agency-approved manufacturer applications specialist before resuming unsupervised procedures.

2. Following the first anniversary in which the requirements of this subrule were met, obtain at least three hours of Category 1 CME immediately preceding the date of the facility's annual stereotactic biopsy inspection, or during the 36-month period ending on the last day of the calendar quarter preceding the inspection which includes post-biopsy management of the patient. If education is not maintained, the physician must requalify by obtaining additional CME credits to reach 3 CME credits in the prior 36 months before resuming unsupervised procedures. These CMEs cannot be obtained by the performance of supervised procedures.

3. A current state of Iowa medical license must be in effect whenever unsupervised procedures are performed by the physician.

d. Requirements for a physician other than a qualified radiologist (under 41.7(3)"c") performing stereotactically guided breast biopsy independently are as follows:

(1) Initial training and requirements.

1. Must be licensed to practice medicine in Iowa.

2. Must have evaluated at least 480 mammograms in the prior 24 months in consultation with a physician who is qualified according to 41.6(3)"a."

3. Initially, must have at least 15 hours of Category 1 CME or 15 hours of training approved by the agency in stereotactically guided breast imaging and biopsy or three years' experience having performed at least 36 stereotactically guided breast biopsies.

4. Must have four hours of Category 1 CME in medical radiation physics.

5. Must have performed at least 12 stereotactically guided breast biopsies prior to May 9, 2001, or at least 3 hands-on stereotactically guided breast biopsy procedures under a physician who is both qualified according to 41.7(3) and has performed at least 24 stereotactically guided breast biopsies.

6. Must be responsible for patient selection.

7. Must be responsible for the supervision of the radiologic technologist during the procedure.

8. Must be responsible for post-biopsy management of the patient.

(2) Maintenance of proficiency and CME requirements.

1. Continue to evaluate at least 480 mammograms every 24 months in consultation with a physician who is qualified according to 41.6(3)"a."

2. Following the first anniversary in which the requirements of this subrule were met, completion of a total of 12 breast biopsy procedures must be met for each calendar year with at least 6 being stereotactic breast biopsies. The remaining 6 can be any combination of the following and demonstration of the chosen combination needs to be clearly documented:

- Stereotactic breast biopsy procedures.

- Stereotactic biopsy of a stereotactic training phantom with documentation of steps taken or a written report.

- Stereotactic breast biopsy case review, which must be documented to include a review of pre-biopsy mammographic examination, scout and stereotactic positioning, biopsy needle pre-fire and post-fire positioning and targeting, specimen radiograph images, post-biopsy images and review of post-biopsy pathology results.

- Mammographic-guided, stereotactic-guided, or both, wire localization procedures.

- Ultrasound-guided breast biopsy procedures.

- MRI-guided breast biopsy procedures.

If experience is not maintained, the physician must requalify by performing three procedures under direct supervision of a qualified training physician or an agency-approved manufacturer applications specialist before resuming unsupervised procedures.

3. Following the first anniversary in which the requirements of this subrule were met, obtain at least three hours of Category 1 CME immediately preceding the date of the facility's annual stereotactic biopsy inspection, or during the 36-month period ending on the last day of the calendar quarter preceding the inspection. If education is not maintained, the physician must requalify by obtaining additional CME credits to reach 3 CME credits in the prior 36 months before resuming unsupervised procedures. The CME credits for requalification cannot be obtained by performing procedures.

4. A current state of Iowa medical license must be in effect whenever unsupervised procedures are performed by the physician.

41.7(4) Medical physicist.

a. Must be qualified according to 41.6(3)“c.”

b. Must have performed three hands-on stereotactically guided breast biopsy system physics surveys prior to July 1, 1998; or one hands-on stereotactically guided breast biopsy system physics survey under the guidance of a medical physicist qualified through 41.7(4)“a” and 41.7(4)“b.”

c. Maintenance of proficiency and continuing education requirements.

(1) Have performed at least one stereotactically guided breast biopsy system physics survey per year after the initial qualifications are met or requalify by performing one survey supervised by a qualified medical physicist; and

(2) Following the third anniversary in which the requirements of this subrule were met, have obtained at least three hours of continuing education in stereotactically guided breast biopsy system physics during the previous 36 months or requalify by obtaining additional CME credits to reach 3 CME credits in the prior 36 months.

41.7(5) Radiologic technologist.

a. Must be qualified according to 41.6(3)“b.”

b. Must meet the following initial requirements:

(1) Five hands-on stereotactically guided breast biopsy procedures on patients under the supervision of a physician or technologist qualified under rule 641—41.7(136C).

(2) Three contact hours in stereotactically guided breast biopsy.

c. Maintenance of proficiency and continuing education and experience requirements.

(1) Following the first anniversary in which the requirements of this subrule were met, completion of a total of 12 breast biopsy procedures must be met for each calendar year with at least 6 being stereotactic breast biopsies. The remaining 6 can be any combination of the following and demonstration of the chosen combination needs to be clearly documented:

1. Stereotactic breast biopsy procedures.

2. Stereotactic biopsy of a stereotactic training phantom with documentation of steps taken or a written report.

3. Stereotactic breast biopsy case review, must be documented to include a review of pre-biopsy mammographic examination, scout and stereotactic images, biopsy needle pre-fire and post-fire images, specimen radiograph images, post-biopsy images and review of post-biopsy pathology results.

4. Mammographic-guided, stereotactic-guided, or both, wire localization procedures.

5. Ultrasound-guided breast biopsy procedures.

6. MRI-guided breast biopsy procedures.

If experience is not maintained, the radiologic technologist must requalify by performing three stereotactically guided breast biopsies under the supervision of a physician or radiologic technologist qualified under 41.7(3) or 41.7(5).

(2) Following the third anniversary in which the requirements of this subrule were met, obtain at least three hours of continuing education in stereotactically guided breast biopsy during the 36 months immediately preceding the date of the facility’s annual stereotactic biopsy inspection, or during the 36-month period ending on the last day of the calendar quarter preceding the inspection, or requalify by obtaining additional CME credits to reach 3 CME credits in the prior 36 months. The CMEs cannot be obtained by the performance of supervised procedures.

(3) If a stereotactic radiologic technologist performs only stereotactic procedures, the radiologic technologist must perform at least 100 stereotactic procedures during the prior 24 months immediately preceding the date of the facility’s annual stereotactic biopsy inspection, during the 24-month period ending on the last day of the previous calendar quarter, or any 24-month period between the two. In this case, all requirements for radiologic technologists must be met with the exception of 41.6(3)“b”(4)“1.”

(4) Only 50 percent of the total required stereotactic continuing education hours may be obtained through presenting or acting as a trainer for a continuing education or training program.

(5) An Iowa permit to practice radiography must be in effect whenever stereotactic procedures are performed by the radiologic technologist.

41.7(6) *Obtaining and preserving records.*

a. The facility must make, for each procedure, a record of the service provided including:

- (1) The date of the procedure.
 - (2) The name of the patient and one additional patient identifier.
 - (3) The name of the radiologic technologists and physicians performing the procedure.
 - (4) A description of the service provided.
 - (5) The name of the referring physician, if any.
- b. Records retained by the medical facility must be retained for at least ten years.

41.7(7) *Quality assurance program.*

a. The facility shall have an equipment quality assurance program specific to stereotactically guided breast biopsy systems and covering all components of the system to ensure high-quality images with minimum patient exposure.

b. The facility shall ensure that a general review of the program is conducted at least annually and have available the services of a qualified medical physicist who is capable of establishing and conducting the program.

c. The facility shall name a supervising stereotactic biopsy physician who shall be responsible for:

- (1) Quality assurance activities including the medical audit,
- (2) Oversight of the quality control program, and
- (3) Supervision of the radiologic technologist(s) and the medical physicist.

d. Under the direction of the supervising physician, the medical physicist shall have the responsibility for establishing and conducting the equipment quality assurance program. The program shall include:

(1) Conducting equipment performance monitoring functions, initially and then at least annually, to include:

1. Evaluation of biopsy unit assembly. Any failed items must be corrected within 30 days of the survey unless the medical physicist deems that the failure poses a serious injury risk to the patient, at which time the failure needs to be corrected before further procedures are performed.

2. Collimation.

- X-ray field must not extend beyond the image receptor by more than 5 mm on any side.
- Any failures must be corrected within 30 days of the survey.

3. Evaluation of focal spot. Focal spot must not degrade from initial measurement. If reduction in lp/mm is found, focal spot must be corrected within 30 days of survey.

4. kVp accuracy/reproducibility. kVp accuracy/reproducibility must be accurate to within +/- 5% of nominal kVp setting. Failures must be corrected before further procedures are performed.

5. Half-value layer measurement. HVL shall be greater than kVp/100 (in units of mm Al). Failures must be corrected before further procedures are performed.

6. Exposure reproducibility. Exposure must be reproducible to within +/- 15% of mean exposure. Failures must be corrected before further procedures are performed.

7. Breast entrance exposure, average glandular dose. Average glandular dose must be less than 300 millirad (3 milliGray) per exposure of a 50 percent glandular/50 percent adipose 4.2 centimeter breast. Failures must be corrected before further procedures are performed.

8. Image quality evaluation.

- Phantom image must meet the criteria of 5 fibers, 4 speck groups and 3 masses for the ACR accreditation phantom or 3 fibers, 3 speck groups and 2.5 masses for the mini phantom unless otherwise stated by the phantom manufacturer.

- Failures must be corrected before further procedures are performed.

9. Artifact evaluation. Any significant black or white artifacts seen in the image detector field must be corrected within 30 days of the survey.

10. Digital field uniformity. For units with region of interest (ROI) capability, the SNR in each corner must be within +/- 15% of the SNR in the center. Failures must be corrected within 30 days of the survey.

11. Localization simulation (gelatin phantom) test. Localization accuracy must be within 1 mm of target, and the test must include a portion of the test “lesion” in the sample chamber. Failures must be corrected before further procedures are performed.

(2) Analyzing the monitoring results to determine if there are any problems requiring correction.

(3) Ensuring that the facility has procedures in place for carrying out or arranging for the necessary corrective actions as well as for the calibrations and other preventative maintenance.

e. The supervising physician shall have the responsibility for establishing and conducting the quality control program in a facility with a fixed unit. In the case of a mobile stereotactic unit, the owner or designee shall assume the responsibility for establishing and conducting the quality assurance program. The program shall include:

(1) Localization accuracy (daily before use and before using the localization unit after it is adjusted). Each coordinate must be within manufacturer specifications for the intended target value. Failures must be corrected before further procedures are performed.

(2) Visual checklist (monthly). Any failed items must be corrected within 30 days.

(3) Phantom image (weekly). Phantom image must meet the criteria of 5 fibers, 4 speck groups and 3 masses for the ACR accreditation phantom or 3 fibers, 3 speck groups and 2.5 masses for the mini phantom unless otherwise stated by the phantom manufacturer. Failures must be corrected before further procedures are performed.

(4) Compression (semiannually). The maximum auto drive compression force shall not exceed 45 pounds. Failures must be corrected within 30 days.

(5) Any additional quality control testing indicated by the stereotactic breast biopsy unit manufacturer must be completed as outlined in the quality control manual applicable to the unit.

f. Each facility shall establish a medical audit program to ensure the accuracy and appropriateness of the procedures performed. This program shall include an imaging-pathology correlation for each biopsy performed, an ongoing analysis of biopsy results and periodic review of the utilization of the procedure. The program must include the number of biopsies performed, the number of cancers found, the number of benign lesions found, and the number of biopsies repeated.

g. Additional medical physicist evaluations of stereotactic units shall be conducted whenever a new unit is installed, a unit is disassembled and reassembled at the same or a new location, or major components of a stereotactic unit are changed or repaired. These evaluations shall be used to determine whether the new or changed equipment meets the requirements of applicable standards in 41.7(7). All problems shall be corrected before the new or changed equipment is put into service for examinations. The stereotactic equipment evaluation shall be performed by a medical physicist qualified under 41.7(4) or by an individual under the direct supervision of a medical physicist qualified under 41.7(4).

41.7(8) *Equipment standards.*

a. Be specifically designed for stereotactically guided breast biopsy.

b. Meet the Food and Drug Administration (FDA) standards found in 21 CFR.

41.7(9) *Safety standards.*

a. Proper safety precautions shall be maintained and shall include, but not be limited to, adequate shielding for patients, personnel and facilities. The equipment shall be operated only from a shielded position.

b. Annual inspections shall be conducted by an inspector from the agency to ensure compliance with these rules. Identified hazards shall be promptly corrected.

c. Equipment shall be shockproof and grounded to protect against electrical hazards.

d. Records of all inspection reports and medical physicist surveys shall be maintained for at least seven years.

This rule is intended to implement Iowa Code chapter 136C.

[ARC 1401C, IAB 4/2/14, effective 5/7/14; ARC 6164C, IAB 2/9/22, effective 3/16/22]

CHAPTER 41—APPENDIX A

INFORMATION ON RADIATION SHIELDING
REQUIRED FOR PLAN REVIEWS (EXCLUDING THERAPY MACHINES)

In order for the agency to provide an evaluation and verification that national standards have been met on shielding requirements for a radiation installation, the following information shall be submitted.

1. The plans should show, as a minimum, the following:

(a) The normal location of the X-ray system's radiation port; the port's travel and traverse limits; general direction(s) of the useful beam; locations of any windows and doors; the location of the operator's booth; and the location of the X-ray control panel.

(b) The structural composition and thickness or lead equivalent of all walls, doors, partitions, floor, and ceiling of the room(s) concerned.

(c) The dimensions of the room(s) concerned.

(d) The type of occupancy of all adjacent areas inclusive of space above and below the room(s) concerned. If there is an exterior wall, show distance to the closest area(s) where it is likely that individuals may be present.

(e) The make and model of the X-ray equipment, the energy waveform (single phase, three phase, etc.) and the maximum technique factors.

(f) The type of examination(s) or treatment(s) which will be performed with the equipment.

2. Information on the anticipated workload of the X-ray system(s) in mA-minutes per week.

3. If the services of a qualified expert have been utilized to determine the shielding requirements, a report, including all basic assumptions used, shall be submitted with the plans.

CHAPTER 41—APPENDIX B
DESIGN REQUIREMENTS FOR AN
OPERATOR'S BOOTH

1. Space requirements:

(a) The operator shall be allotted not less than 7.5 square feet (0.697 m) of unobstructed floor space in the booth.

(b) The operator's booth may be any geometric configuration with no dimension of less than 2 feet (0.61 m).

(c) The space shall be allotted excluding any encumbrance by the X-ray control panel, such as overhang, cables, or other similar encroachments.

(d) The booth shall be located or constructed such that unattenuated direct scatter radiation originating on the examination table or at the wall cassette will not reach the operator's station in the booth.

2. Structural requirements:

(a) The booth walls shall be permanently fixed barriers of at least 7 feet (2.13 m) high.

(b) When a door or movable panel is used as an integral part of the booth structure, it must have an interlock which will prevent an exposure when the door or panel is not closed.

(c) Shielding shall be provided to meet the requirements of 641—Chapter 40.

3. X-ray control placement:

The X-ray control for the system shall be fixed within the booth; and

(a) Shall be at least 40 inches (1.02 m) from any point subject to direct scatter, leakage or primary beam radiation.

(b) Shall allow the operator to use the majority of the available viewing windows or mirrors.

4. Viewing system requirements:

(a) Each booth shall have at least one viewing device which will:

(1) Be so placed that the operator can view the patient during any exposure, and

(2) The device shall be so placed that the operator can have full view of any occupant of the room and should be so placed that the operator can view any entry into the room. If any door which allows access to the room cannot be seen from the booth, then outside that door there shall be an "X-ray" warning sign that will be lighted anytime the rotor of the X-ray tube is activated. Alternatively, that door must have an interlock controlling the exposure which will prevent the exposure if the door is not closed.

(b) When the viewing system is a window, the following requirements also apply:

(1) The viewing area shall be at least 1 square foot (0.0929 m²).

(2) Regardless of size or shape, at least 0.09 m² (1 sq ft) of window area must be centered no less than 0.6 m (2 feet) from the open edge of the booth and no less than 1.5 m (5.0 feet) from the floor.

(3) The material constituting the window shall have the same lead equivalence as that required in the booth's wall in which it is mounted.

(c) When the viewing system is by mirrors, the mirror(s) shall be so located as to accomplish the general requirements of Appendix B, 4(a).

(d) When the viewing system is by electronic means:

(1) The camera shall be so located as to accomplish the general requirements of Appendix B, 4(a), and

(2) There shall be an alternate viewing system as a backup for the primary system.

CHAPTER 41—APPENDIX C
INFORMATION TO BE SUBMITTED BY PERSONS
PROPOSING TO CONDUCT HEALING
ARTS SCREENING

Persons requesting that the agency approve a healing arts screening program shall submit the following information and evaluation:

1. Name and address of the applicant and, where applicable, the names and addresses of agents within this state.
2. Diseases or conditions for which the X-ray examinations are to be used in diagnoses.
3. A detailed description of the X-ray examinations proposed in the screening program.
4. Description of the population to be examined in the screening program, i.e., age, sex, physical condition, and other appropriate information. Any person conducting a screening program for cardiac scoring shall conduct screening only on either women over age 45 or men over age 50 who meet any two of the following criteria: family history, smoker, high blood pressure, high cholesterol, obesity (at least 20 pounds overweight), diabetes.
5. An evaluation of any known alternate methods not involving ionizing radiation which could achieve the goals of the screening program and why these methods are not used instead of the X-ray examinations.
6. An evaluation by a qualified expert of the X-ray system(s) to be used in the screening program. The evaluation by the qualified expert shall show that such system(s) does satisfy all requirements of these regulations. The evaluation shall include a measurement of patient exposures from the X-ray examinations to be performed.
7. A description of the diagnostic film quality control program.
8. A copy of the technique chart for the X-ray examination procedures to be used.
9. The qualifications of each individual who will be operating the X-ray system(s).
10. The qualifications of the individual who will be supervising the operators of the X-ray system(s). The extent of supervision and the method of work performance evaluation shall be specified.
11. The name and address of the physician who will interpret the radiograph(s) and a copy of the physician's license to practice in Iowa.
12. A description of the procedures to be used in advising the individuals screened and their private practitioners of the healing arts of the results of the screening procedure and any further medical needs indicated.
13. A description of the procedures for the retention or disposition of the radiographs and other records pertaining to the X-ray examinations.
14. An indication of the frequency of screening and the duration of the entire screening program.
15. Documentation justifying the reason for the screening. The applicant must submit data which supports the efficacy of the screening test in diagnosing the disease or condition being screened. Data which will be acceptable to the department includes, but is not limited to, the following: (1) the recommendation of a nationally recognized certifying medical or government body; (2) the recommendation of one of the following national organizations: American Cancer Association, American Lung Association, American Heart Association; or (3) medical literature from peer-reviewed journals supporting the screening.
16. The procedures for preventing pregnant individuals from participating in the screening or justification for allowing pregnant individuals to participate.
17. The dates of the screening to include beginning and ending dates.
18. A copy of IRB for a research project or information justifying the research project.

CHAPTER 41—APPENDIX D
QA for Therapeutic Radiation Machines

Frequency	Procedure	Tolerance ^a
Daily	<u>Dosimetry</u>	
	X-ray output constancy	3%
	Electron output constancy ^b	3%
	<u>Mechanical</u>	
	Localizing lasers	2mm
	Distance indicator (ODI)	2mm
Monthly	<u>Safety</u>	
	Door interlocks	functional
	Audiovisual monitors	functional
	<u>Dosimetry</u>	
	X-ray output constancy ^c	2%
	Electron output constancy ^c	2%
	Backup monitor constancy	2%
	X-ray central axis dosimetry parameter (PDD, TAR) constancy	2%
	Electron central axis dosimetry parameter constancy (PDD)	2mm @ therapeutic depth
	X-ray beam flatness constancy	2%
	Electron beam flatness constancy	3%
	X-ray and electron symmetry	3%
	<u>Safety Interlocks</u>	
	Wedge, electron cone interlocks	functional
	<u>Mechanical</u>	
	Light/radiation field coincidence	2mm or 1% on a side ^d
	Gantry/collimator angle indicators	1 degree
	Wedge position	2mm (or 2% change in transmission factor)
	Tray position	2mm
	Applicator position	2mm
	Field size indicators	2mm
Annual	Cross-hair centering	2mm diameter
	Treatment couch position indicators	2mm/1deg
	Latching of wedges, blocking tray	functional
	Jaw symmetry ^e	2mm
	Field Light intensity	functional
	<u>Dosimetry</u>	
	X-ray/electron output calibration constancy	2%
	Field size dependence of X-ray output constancy	2%
	Output factor constancy for electron applicators	2%
	Central axis parameter constancy (PDD, TAR)	2%
	Off-axis factor constancy	2%
	Transmission factor constancy for all treatment accessories	2%

^a The tolerances listed in the tables should be interpreted to mean that if a parameter either: (1) exceeds the tabulated value (e.g., the measured isocenter under the gantry exceeds 2 mm diameter); or (2) that the change in the parameter exceeds the nominal value (e.g., the output changes by more than 2%), then an action is required. The distinction is emphasized by the use of the term constancy for the latter case. Moreover, for constancy, percent values $\pm$ the deviation of the parameter with respect to its nominal value; distances are referenced to the isocenter or nominal SSD.

^b All electron energies need not be checked daily, but all electron energies are to be checked at least twice weekly.

^c A constancy check with a field instrument using temperature pressure corrections.

^d Whichever is greater. Should also be checked after change of light field source.

^e Jaw symmetry is defined as the difference in distance of each jaw from the isocenter.

Frequency	Procedure	Tolerance ^a
	Wedge transmission factor constancy ^f	2%
	Monitor chamber linearity	1%
	X-ray output constancy vs. gantry angle	2%
	Electron output constancy vs. gantry angle	2%
	Off-axis factor constancy vs. gantry angle	2%
	Arc mode	Mfrs. specs.
	<u>Safety Interlocks</u>	
	Follow manufacturer's test procedures	functional
	<u>Mechanical</u>	
	Collimator rotation isocenter	2mm diameter
	Gantry rotation isocenter	2mm diameter
	Couch rotation isocenter	2mm diameter
	Coincidence of collimetry, gantry, couch axes with isocenter	2mm diameter
	Coincidence of radiation and mechanical isocenter	2mm diameter

^f Most wedges' transmission factors are field size and depth dependent.

^a The tolerances listed in the tables should be interpreted to mean that if a parameter either: (1) exceeds the tabulated value (e.g., the measured isocenter under the gantry exceeds 2 mm diameter); or (2) that the change in the parameter exceeds the nominal value (e.g., the output changes by more than 2%), then an action is required. The distinction is emphasized by the use of the term constancy for the latter case. Moreover, for constancy, percent values $\pm$ the deviation of the parameter with respect to its nominal value; distances are referenced to the isocenter or nominal SSD.

CHAPTER 41—APPENDIX E

INFORMATION ON RADIATION SHIELDING REQUIRED
FOR PLAN REVIEWS FOR THERAPY MACHINES

I. All therapeutic radiation machines.

A. Basic facility information including: name, telephone number and agency registration number of the individual responsible for preparation of the shielding plan; name and telephone number of the facility supervisor; and the street address (including room number if applicable) of the external beam radiation therapy facility. The plan should also indicate whether this is a new structure or a modification to existing structure(s).

B. All wall, floor, and ceiling areas struck by the useful beam shall have primary barriers.

C. Secondary barriers shall be provided in all wall, floor, and ceiling areas not having primary barriers.

II. Therapeutic machines up to 150 kV (photons only).

In addition to the requirements listed in Section I above, therapeutic radiation machine facilities which produce only photons with a maximum energy less than or equal to 150 kV shall submit shielding plans which contain, as a minimum, the following additional information:

A. Equipment specifications, including the manufacturer and model number of the therapeutic radiation machine, as well as the maximum technique factors.

B. Maximum design workload for the facility including total weekly radiation output (expressed in gray (rad) or air kerma at one meter), total beam-on time per day or week, the average treatment time per patient, along with the anticipated number of patients to be treated per day or week.

C. A facility blueprint/drawing indicating: scale (0.25 inch = 1 foot is typical); direction of north; normal location of the therapeutic radiation machine's radiation port(s); the port's travel and traverse limits; general direction(s) of the useful beam; locations of any windows and doors; and the location of the therapeutic radiation machine control panel. If the control panel is located inside the external beam radiation therapy treatment room, the location of the operator's booth shall be noted on the plan and the operator's station at the control panel shall be behind a protective barrier sufficient to ensure compliance with 641—40.15(136C).

D. The structural composition and thickness or lead/concrete equivalent of all walls, doors, partitions, floor, and ceiling of the room(s) concerned.

E. The type of occupancy of all adjacent areas inclusive of space above and below the room(s) concerned. If there is an exterior wall, show distance to the closest area(s) where it is likely that individuals may be present.

F. At least one example calculation which shows the methodology used to determine the amount of shielding required for each physical condition (i.e., primary and secondary leakage barriers, restricted and unrestricted areas, entry door(s)) and shielding material in the facility.

(1) If commercial software is used to generate shielding requirements, identify the software used and the version/revision date.

(2) If the software used to generate shielding requirements is not in the open literature, submit quality control sample calculations to verify the result obtained with the software.

III. Therapeutic radiation machines over 150 kV.

In addition to the requirements listed in Section I above, therapeutic radiation machine facilities which produce photons or electrons with a maximum energy in excess of 150 kV or electrons shall submit shielding plans which contain, as a minimum, the following additional information:

A. Equipment specifications including the manufacturer and model number of the therapeutic radiation machine, and gray (rad) at the isocenter and the energy(s) and type(s) of radiation produced (i.e., photon, electron). The target to isocenter distance shall be specified.

B. Maximum design workload for the facility including total weekly radiation output (expressed in gray (rad) at one meter), total beam-on time per day or week, the average treatment time per patient, along with the anticipated number of patients to be treated per day or week.

C. Facility blueprint/drawing (including both floor plan and elevation views) indicating relative orientation of the therapeutic radiation machine, scale (0.25 inch = 1 foot is typical), type(s), thickness and minimum density of shielding material(s), direction of north, the locations and size of all penetrations through each shielding barrier (ceiling, walls and floor), as well as details of the door(s) and maze.

D. The structural composition and thickness or concrete equivalent of all walls, doors, partitions, floor, and ceiling of the room(s) concerned.

E. The type of occupancy of all adjacent areas inclusive of space above and below the room(s) concerned. If there is an exterior wall, show distance to the closest area(s) where it is likely that individuals may be present.

F. Description of all assumptions that were in shielding calculations including, but not limited to, design energy (i.e., room may be designed for 6 MV unit although only a 4 MV unit is currently proposed), workload, presence of integral beam-stop in unit, occupancy and use(s) of adjacent areas, fraction of time that useful beam will intercept each permanent barrier (walls, floor and ceiling) and “allowed” radiation exposure in both restricted and unrestricted areas.

G. At least one example calculation which shows the methodology used to determine the amount of shielding required for each physical condition (i.e., primary and secondary leakage barriers, restricted and unrestricted areas, small angle scatter, entry door(s) and maze) and shielding material in the facility.

(1) If commercial software is used to generate shielding requirements, also identify the software used and the version/revision date.

(2) If the software used to generate shielding requirements is not in the open literature, submit quality control sample calculations to verify the result obtained with the software.

IV. Neutron shielding.

In addition to the requirements listed in Section III above, therapeutic radiation machine facilities which are capable of operating above 10 MV shall submit shielding plans which contain, as a minimum, the following additional information:

A. The structural composition, thickness, minimum density and location of all neutron shielding material.

B. Description of all assumptions that were used in neutron shielding calculations including, but not limited to, neutron spectra as a function of energy, neutron fluency rate, absorbed dose and dose equivalent (due to neutrons) in both restricted and unrestricted areas.

C. At least one example calculation which shows the methodology used to determine the amount of neutron shielding required for each physical condition (i.e., restricted and unrestricted areas, entry door(s) and maze) and neutron shielding material utilized in the facility.

(1) If commercial software is used to generate shielding requirements, also identify the software used and the version/revision date.

(2) If the software used to generate shielding requirements is not in the open literature, submit quality control sample calculations to verify the result obtained with the software.

D. The method(s) and instrumentation which will be used to verify the adequacy of all neutron shielding installed in the facility.

◇ Two or more ARCs

CHAPTER 42
PERMIT TO OPERATE IONIZING RADIATION PRODUCING MACHINES
OR ADMINISTER RADIOACTIVE MATERIALS

641—42.1(136C) Purpose. The purpose of this chapter is to specify the permit requirements of individuals who operate or use ionizing radiation producing machines or administer radioactive materials on or to human patients or human research subjects for diagnostic or therapeutic purposes. This chapter establishes minimum formal education standards and examination, continuing education, and disciplinary procedures.
[ARC 0577C, IAB 2/6/13, effective 3/13/13]

641—42.2(136C) Definitions.

“ARRT” means the American Registry of Radiologic Technologists.

“Authorized user” means an Iowa-licensed physician identified on a specific radioactive materials license or a license of broad scope as defined in 641—subrule 41.2(2).

“Body composition scan” means the use of a low dose X-ray to generate images of a color-coded body map.

“Bone densitometry” means the art and science of applying ionizing radiation to the human body using a dual energy X-ray absorptiometry unit for the sole purpose of measuring bone density.

“Category” defines specific duties allowed in the limited radiologic technologist permit classification.

“Classification” means a specific class of permit that allows the permit holder to perform the duties specified for that permit class.

“Computed tomography” or *“CT”* means a technique for generating a series of X-ray images taken from different angles and processed with computer software.

1. *“Diagnostic computed tomography”* means the use of computed tomography to create cross-sectional images of the human body to be used for diagnosis.

2. *“Attenuation correction”* means the use of X-rays from a CT scan to construct an attenuation map of density differences throughout the body that can then be used to correct for the absorption of the photons emitted from Fludeoxyglucose (18F) decay during a PET/CT scan.

“Continuing education activity” means a learning activity that is recognized as continuing education by the ARRT or NMTCB.

“Department” means the Iowa department of public health.

“Expiration date” means 11:59 p.m. on the stated date.

“Formal education” means a course of classroom and clinical instruction which meets the training standards set by the department.

“Ionizing radiation producing machine” or *“radiation machine”* means an assemblage of components for the controlled production of X-rays. An ionizing radiation producing machine includes minimally an X-ray high-voltage generator, an X-ray control, a tube housing assembly, a beam-limiting device, and the necessary supporting structures. Additional components which function with the system are considered integral parts of the system.

“NMTCB” means Nuclear Medicine Technology Certification Board.

“Nuclear medicine diagnostic computed tomography endorsement” means a qualification that allows a nuclear medicine technologist to perform diagnostic computed tomography of the human body as ordered by an individual authorized by Iowa law to order radiography.

“Nuclear medicine procedure” means any procedure utilizing radiopharmaceuticals for diagnosis or treatment of disease in human beings and any duties performed by the technologist during sealed source procedures, and includes, but is not limited to:

1. Administration of any radiopharmaceutical to human beings for diagnostic purposes.
2. Administration of radioactive material to human beings for therapeutic purposes.
3. Use of radioactive material for diagnostic purposes involving transmission or excitation.
4. Quality control and quality assurance.

“Nuclear medicine technologist” means an individual who performs nuclear medicine procedures while under the supervision of an authorized user. The classifications are as follows:

1. “General nuclear medicine technologist” performs any nuclear medicine procedures and may perform computed tomography for attenuation correction during PET/CT or SPECT/CT only.

2. “Limited nuclear medicine technologist” performs nuclear medicine procedures only as approved by the department at the time the initial permit was issued.

“*Permit*” means the document issued to an individual by the department when the individual has met the requirements of this chapter. This document authorizes the individual to perform the duties allowed for the classification of permit issued.

“*PET/CT*” means an imaging modality that uses positron emission tomography and computed tomography in one device to combine the structural anatomic information with functional data collected during the examination.

“*Radiation therapist*” means an individual who performs radiation therapy under the supervision of a radiation oncologist licensed in Iowa.

“*Radiation therapy*” means the science and art of performing simulation radiography or applying ionizing radiation emitted from X-ray machines, particle accelerators, or radioactive materials in the form of sealed sources to human beings for therapeutic purposes.

“*Radiography*” means a technique for generating and recording an X-ray pattern for the purpose of providing the user with an image(s) during or after termination of the exposure.

“*Radiologic technologist*” means an individual, excluding X-ray equipment operators, who performs radiography of the human body as ordered by an individual authorized by Iowa law to order radiography. The classifications are as follows:

1. “General radiologic technologist” performs radiography and computed tomography of any part of the human body.

2. “Limited radiologic technologist” performs radiography for the chest, spine, extremities, shoulder or pediatrics, excluding computed tomography and fluoroscopy.

3. “Limited in-hospital radiologic technologist” performs radiography of any part of the human body as approved by the department at the time the initial permit was issued.

“*Radiologist assistant*” means an advanced-level radiologic technologist who has completed the necessary requirements in order to perform procedures as outlined in ARRT guidance while under supervision of a radiologist.

“*SPECT/CT*” means an imaging modality that uses single-photon emission computed tomography and computed tomography in one device to combine the structural anatomic information with functional data collected during the examination.

“*Student*” means an individual enrolled in and participating in formal education.

“*Therapeutic*” means a medical treatment using radiation for therapy purposes.

“*X-ray equipment operator*” means an individual performing radiography of the human body using dedicated equipment as ordered by an individual authorized by Iowa law to order radiography. These individuals do not qualify for a permit in any other classification. The classifications are as follows:

1. “Podiatric X-ray equipment operator” performs radiography of only the foot and ankle using dedicated podiatric equipment. Studies using computed tomography, fluoroscopy, or nondedicated equipment are prohibited.

2. “Bone densitometry equipment operator” performs bone densitometry using only dual energy X-ray absorptiometry equipment. Studies using computed tomography, fluoroscopy, or nondedicated equipment are prohibited.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 3239C, IAB 8/2/17, effective 9/6/17; ARC 5683C, IAB 6/16/21, effective 7/21/21]

641—42.3(136C) Exemptions.

42.3(1) The following are exempt from obtaining a permit as required by this chapter:

- a. A licensed physician.
- b. A licensed physician assistant.
- c. A licensed chiropractor.
- d. A licensed dentist.
- e. A licensed dental hygienist.

- f.* A licensed podiatrist.
- g.* An individual certified by the dental board in dental radiography.
- h.* A student as a part of the student's formal education.

42.3(2) The department may, upon application or upon its own initiative, grant such exemptions from the requirements of this chapter as it determines are authorized by law and will not result in undue hazard to public health and safety. Application for exemptions should be made in accordance with 641—Chapter 178.

[ARC 0577C, IAB 2/6/13, effective 3/13/13]

PERMIT APPLICATION AND RENEWAL

641—42.4(136C) Permit application and renewal. An individual shall not operate ionizing radiation producing machines or administer radioactive materials for diagnostic or therapeutic purposes unless the individual possesses a current Iowa permit in the individual's classification of practice.

[ARC 0577C, IAB 2/6/13, effective 3/13/13]

641—42.5(136C) Permit to practice as a general radiologic technologist.

42.5(1) An individual applying for an initial permit shall:

- a.* Be at least 18 years of age.
- b.* Submit the appropriate completed application.
- c.* Submit a nonrefundable \$100 application fee.
- d.* Submit proof of a passing score on the ARRT general radiography examination.

42.5(2) An individual renewing a current permit shall:

- a.* Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.
- b.* Report 24.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.5(3) An individual reinstating an expired permit shall submit the following:

- a.* Application to reinstate and nonrefundable \$150 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of subrule 42.5(1).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 24.0 hours of continuing education obtained within the previous 24 months must be submitted.

- c.* Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 4612C, IAB 8/14/19, effective 9/18/19]

641—42.6(136C) Permit to practice as a general nuclear medicine technologist.

42.6(1) An individual applying for an initial permit shall:

- a.* Be at least 18 years of age.
- b.* Submit the appropriate completed application.
- c.* Submit a nonrefundable \$100 application fee.
- d.* Submit proof of a passing score on ARRT's nuclear medicine examination or the NMTCB nuclear medicine examination.

42.6(2) An individual renewing a current permit shall:

- a.* Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.
- b.* Report 24.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.6(3) An individual reinstating an expired permit shall submit the following:

- a.* Application to reinstate and nonrefundable \$150 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of subrule 42.6(1).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 24.0 hours of continuing education obtained within the previous 24 months must be submitted.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

42.6(4) An individual applying for a nuclear medicine diagnostic computed tomography endorsement shall:

a. Maintain an active permit to practice as a general nuclear medicine technologist. Endorsements may not be held without an active permit.

b. Submit proof of a passing score on the ARRT or NMTCB computed tomography examination.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 3239C, IAB 8/2/17, effective 9/6/17; ARC 4612C, IAB 8/14/19, effective 9/18/19]

641—42.7(136C) Permit to practice as a radiation therapist.

42.7(1) An individual applying for an initial permit shall:

a. Be at least 18 years of age.

b. Submit the appropriate completed application.

c. Submit a nonrefundable \$100 application fee.

d. Submit proof of a passing score on the ARRT's radiation therapy examination.

42.7(2) An individual renewing a current permit shall:

a. Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.

b. Report 24.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.7(3) An individual reinstating an expired permit shall submit the following:

a. Application to reinstate and nonrefundable \$150 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of subrule 42.7(1).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 24.0 hours of continuing education obtained within the previous 24 months must be submitted.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 4612C, IAB 8/14/19, effective 9/18/19]

641—42.8(136C) Permit to practice as a radiologist assistant.

42.8(1) An individual applying for an initial permit shall:

a. Submit the appropriate completed application.

b. Submit a nonrefundable \$100 application fee.

c. Submit proof of completion of formal education for a radiologist assistant.

d. Submit proof of one year of experience as a general radiologic technologist.

e. Submit proof of passing score on the ARRT radiologist assistant examination or another examination that is recognized by the department.

42.8(2) An individual renewing a current permit shall:

a. Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.

b. Report 50.0 hours of continuing education obtained within the biennium indicated on the individual's permit. Radiologist assistant permit holders must obtain at least one-half of the required continuing education in subject areas specific to radiography. The remainder may be earned as physician credit hours.

42.8(3) An individual reinstating an expired permit shall submit the following:

a. Application to reinstate and nonrefundable \$150 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of subrule 42.8(1).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 50.0 hours of continuing education obtained within the previous 24 months must be submitted.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.
[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 4612C, IAB 8/14/19, effective 9/18/19]

641—42.9(136C) Permit to practice as a limited radiologic technologist with categories of chest, spine, extremities, shoulder, pediatric. An individual with a limited radiologic technologist permit shall perform radiography only within the scope of the category(ies) in which the permit is issued.

42.9(1) The scope of each category is defined as follows:

a. “Chest” allows the permit holder to perform radiography of the lung fields including the cardiac shadow, as taught in the limited radiography formal education standards. Chest radiograph techniques shall not be manipulated for the evaluation of the shoulder, clavicle, scapula, ribs, thoracic spine and sternum. Limited radiologic technologists who have completed the appropriate formal education after January 1, 2009, may perform lateral decubitus chest views.

b. “Extremities” allows the permit holder to perform radiography for body parts from:

(1) The distal phalanges of the foot to the head of the femur, including its articulation with the pelvic girdle. True hip radiographs are prohibited.

(2) The distal phalanges of the hand to the head of the humerus. These projections may include the acromioclavicular or glenoid-humeral areas. The radiograph shall not include any of the views in the shoulder category unless the individual holds a limited radiologic technologist permit that includes the shoulder category.

c. “Spine” allows the permit holder to perform radiography of the spine in the approved areas only. Approved areas and limitations are described as:

(1) Cervical vertebrae.

(2) Thoracic (dorsal) vertebrae.

(3) Lumbar vertebrae to include the articulations with the sacrum and coccyx and the sacral articulation with the pelvic girdle. True pelvis radiographs or other projections performed with the image receptor positioned perpendicular to the long axis of the torso are prohibited under this category.

(4) All projections shall be performed as taught in the limited radiologic technologist formal education standards.

d. “Shoulder” allows the permit holder to perform radiography of the shoulder in the approved projections only. Approved projections and limitations are described as:

(1) AP internal and external rotation.

(2) AP neutral.

(3) Transthoracic lateral views.

(4) Scapular “Y” lateral.

(5) The image may not include the proximal end of the clavicle on any AP projection. All other shoulder views are prohibited. The permit holder must hold a limited radiologic technologist permit with a category of either chest or extremity in order to be granted the shoulder category.

e. “Pediatric” allows the permit holder to perform radiography of either chest or extremities or both as defined in paragraphs 42.9(1)“a” and “b” above for patients aged 36 months and under. The permit holder must hold a limited radiologic technologist permit with the minimum categories of chest or extremities or both in order to qualify for pediatric radiography. This designation allows permit holders to perform pediatric radiography within the permit classifications listed on their permit only. All other projections on pediatric patients by limited radiologic technologists are prohibited.

42.9(2) An individual applying for an initial permit shall:

a. Be at least 18 years of age.

b. Submit the appropriate completed application.

c. Submit a nonrefundable \$100 application fee.

d. Submit proof of completion of formal education in all limited diagnostic radiography categories for which the individual is applying. In order to apply for the shoulder category, the individual must also apply for the chest or extremity category. In order to apply for the pediatric category, the individual must also apply for the chest or extremity category. Each individual making application to attend a formal education course provided by the department to fulfill the requirements of 42.9(2)“d” must submit an application and nonrefundable fee of \$200 to the department each time the individual attends a course.

e. Submit proof of completion of testing as applicable for each permit category for which the individual is applying on the limited radiologic technologist permit. No examination is required for the categories of shoulder or pediatric.

(1) The following are passing scores:

1. A score of at least 70 percent on the ARRT limited scope of practice in radiography examination core section and at least 70 percent on each category; or

2. A score of at least 70 percent on the American Chiropractic Registry of Radiologic Technologists Limited Radiography examination; or

3. A score of at least 70 percent on a department-approved examination.

(2) Three failed attempts on the examination in 42.9(2)“e”(1)“1” or “3” will require the individual to repeat the formal education or complete a department-approved review program.

(3) Each individual making application to take an examination as a limited radiologic technologist in 42.9(2)“e”(1)“1” or “3” must submit an application to the department each time the individual takes the examination. The individual must also submit the examination fee directly to the ARRT each time the individual takes the examination.

f. Submit proof of completion of formal education and examination in the category to be added and a nonrefundable \$40 amendment fee to add chest, extremity or spine category to an existing limited radiologic technologist permit. A score of at least 70 percent on each category is required.

g. Submit proof of completion of formal education and a nonrefundable \$40 amendment fee to add shoulder or pediatric category to an existing limited radiologic technologist permit. No examination is required.

42.9(3) An individual renewing a current permit shall:

a. Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.

b. Report 12.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.9(4) An individual reinstating an expired permit shall submit the following:

a. Application to reinstate and nonrefundable \$150 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of rule 641—42.9(136C).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 12.0 hours of continuing education obtained within the previous 24 months must be submitted.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 1931C, IAB 4/1/15, effective 5/6/15; ARC 4612C, IAB 8/14/19, effective 9/18/19; ARC 6436C, IAB 8/10/22, effective 9/14/22]

641—42.10(136C) Permit to practice as an X-ray equipment operator in either podiatric radiography or bone densitometry (dual energy X-ray absorptiometry). After January 1, 2015, all individuals performing only bone densitometry or other examinations using DEXA machines must hold a bone densitometry permit.

42.10(1) An individual applying for an initial permit shall:

a. Be at least 18 years of age.

b. Submit the completed application.

c. Submit a nonrefundable \$40 application fee.

d. Submit proof of completion of formal education that meets the department minimum training standards. Each individual making application to attend an X-ray equipment operator formal education course provided by the department to fulfill the requirement of 42.10(1)“d” must submit an application and nonrefundable fee of \$150 to the department each time the individual attends the course.

e. Submit proof of at least a 70 percent score on a department-approved examination.

(1) Three failed attempts on the examination in 42.10(1)“e” will require the individual to repeat the formal education or complete a department-approved review program.

(2) Each individual making application to take an examination as an X-ray equipment operator to meet the requirements of 42.10(1)“e” must submit an application and nonrefundable fee of \$100 to the department each time the individual takes the examination.

42.10(2) An individual renewing a current permit shall:

a. Renew annually by submitting a renewal application and a nonrefundable \$40 renewal fee.

b. Report 4.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.10(3) An individual reinstating an expired permit shall submit the following:

a. Application to reinstate and nonrefundable \$75 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of subrule 42.10(1).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 4.0 hours of continuing education obtained within the previous 24 months must be submitted.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 4612C, IAB 8/14/19, effective 9/18/19; ARC 5683C, IAB 6/16/21, effective 7/21/21]

641—42.11 Reserved.

641—42.12(136C) Closed classification or category permits.

42.12(1) The following classifications or categories are closed to new applicants. Permits in the following classifications or categories that are expired for more than six months are not eligible to be reinstated, and individuals shall maintain current permits as outlined below:

a. Limited in-hospital radiologic technologist shall:

(1) Perform diagnostic radiography procedures, excluding CT and fluoroscopy, in a hospital setting only for specific body parts for which the individual is qualified.

(2) Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.

(3) Report 24.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

b. Limited nuclear medicine technologist shall:

(1) Perform nuclear medicine procedures for which the individual is qualified and has been authorized by the department.

(2) Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.

(3) Report 12.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

c. Limited radiologic technologist paranasal sinus shall:

(1) Perform diagnostic radiography procedures, excluding CT and fluoroscopy, specific to paranasal sinus.

(2) Renew annually by submitting a renewal application and a nonrefundable \$75 renewal fee.

(3) Report 6.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.12(2) An individual renewing a permit expired less than six months shall submit the following:

a. Application to reinstate and nonrefundable \$150 application fee.

b. Any continuing education hours due at time of renewal.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 4612C, IAB 8/14/19, effective 9/18/19]

641—42.13(136C) Combining permits for an individual qualifying for permits in more than one classification.

42.13(1) An individual applying for an initial permit in more than one classification at the same time shall combine classifications on one permit by:

a. Indicating each classification on the appropriate completed application;

b. Submitting the required documentation for each classification as outlined in each classification section; and

c. Submitting a nonrefundable \$150 application fee.

42.13(2) Permit holders shall add a classification to an existing permit by:

a. Completing the appropriate application;

b. Submitting the required documentation as outlined in the section specific to the classification to be added; and

c. Submitting a nonrefundable \$40 fee.

42.13(3) An individual renewing a combined classification permit must submit the appropriately completed renewal application and submit a nonrefundable \$110 renewal fee.

42.13(4) An individual shall submit a total of 24.0 hours of continuing education obtained within the biennium indicated on the individual's permit. If the permit includes the radiologist assistant classification, then the individual must submit a total of 50.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

42.13(5) An individual reinstating an expired permit shall submit the following:

a. Application to reinstate and a nonrefundable \$150 application fee. If the permit is expired six months or more, all previous exemptions from this chapter are no longer valid and the individual is subject to all requirements of subrule 42.7(1).

b. Any continuing education hours due at time of renewal. If the permit is expired more than one year past the expiration date, 24.0 hours of continuing education obtained within the previous 24 months must be submitted. If the permit includes the radiologist assistant classification, then the individual must submit a total of 50.0 hours of continuing education obtained within the biennium indicated on the individual's permit.

c. Proof that all stipulations of any order(s) of disciplinary or enforcement action have been satisfied.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 4612C, IAB 8/14/19, effective 9/18/19; ARC 5683C, IAB 6/16/21, effective 7/21/21]

641—42.14 to 42.17 Reserved.

PERMIT HOLDER SUBMISSION OF CONTINUING EDUCATION

641—42.18(136C) Submission of proof of completion of continuing education by permit holder to meet continuing education requirements to renew or reinstate a permit.

42.18(1) A permit holder who has a current ARRT or NMTCB registration that has been renewed within 60 days prior to the submission of the permit renewal application required by these rules shall be credited the number of hours recognized by the ARRT or NMTCB registration, or

42.18(2) A permit holder must submit proof of completion of continuing education activities recognized by ARRT or NMTCB.

a. Acceptable proof of completion must be documentation signed and dated by the continuing education provider that includes the participant's name, title of the activity, approval number for the activity, dates of attendance, number of contact hours for the activity, name of the approving organization, and signature of the sponsor or instructor or authorized representative of the sponsor or instructor.

b. Continuing education activities may not be repeated for credit in the same biennium but may be repeated across different biennia.

42.18(3) Podiatric X-ray equipment operator permit holders may submit activities as described in 42.18(2) or may submit activities sponsored by the American Podiatric Medical Association or the Iowa Podiatric Medical Society.

a. Acceptable proof of completion must be documentation signed and dated by the continuing education provider that includes the participant's name, title of the activity, approval number for the activity, dates of attendance, number of contact hours for the activity, the name of the approving organization, and signature of the sponsor or instructor or authorized representative of the sponsor or instructor.

b. Continuing education activities that are lecture presentations may not be repeated for credit in the same biennium.

c. All continuing education activities that are not lecture presentations may not be repeated for credit in the same or any subsequent biennium.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 6436C, IAB 8/10/22, effective 9/14/22]

641—42.19 and 42.20 Reserved.

ADMINISTRATIVE ITEMS AND GROUNDS FOR DISCIPLINARY ACTION

641—42.21(136C) Administrative items.

42.21(1) A nonrefundable \$25 fee shall be assessed for each check returned for any reason. All fees for returned checks plus original fees must be paid by certified bank check or money order.

42.21(2) A permit is valid from the date of issuance until the expiration date, unless otherwise revoked or suspended.

42.21(3) The department may at any time require further documentation to ensure compliance with these rules.

42.21(4) The permit holder shall make the permit available at the individual's place of employment. If the permit holder works at more than one facility, a duplicate of the permit shall be kept at each facility.

42.21(5) The permit holder must maintain proof of continuing education for at least three years.

42.21(6) Continuing education obtained to satisfy disciplinary or enforcement action or as part of a corrective action plan may not be reported to meet continuing education requirements.

42.21(7) All permit holders are subject to a department audit at any time.

[ARC 0577C, IAB 2/6/13, effective 3/13/13]

641—42.22(136C) Rules of conduct, self-reporting requirements, and enforcement actions for all permit holders or applicants.

42.22(1) *Rules of conduct.* These are mandatory standards of minimally acceptable professional conduct intended to promote the protection, safety, and comfort of patients. Any individual who fails to meet or allows any other individual to fail to meet the following standards may be subject to enforcement actions as outlined in subrule 42.22(3). The following shall be grounds for disciplinary action:

a. Failing to perform with reasonable skill and safety all procedures accepted under this chapter's educational guidelines and allowed under the individual's permit.

b. Operating as a permitted individual without meeting the applicable requirements of this chapter. This includes performing procedures not allowed under the individual's current permit.

c. Failing to report immediately to the department any individual who may be operating as a permit holder and who does not meet the requirements of this chapter.

d. Engaging in any practice that results in unnecessary danger to a patient's life, health, or safety. This includes delegating or accepting the delegation of any function when the delegation or acceptance could cause unnecessary danger.

e. Engaging in any action that the department determines may jeopardize the health and safety of the public, other staff or the permit holder. These actions shall include but not be limited to:

(1) A misdemeanor or felony which may impair or limit the individual's ability to perform the duties authorized by the individual's permit.

(2) Any disciplinary action brought against the individual in connection with a certificate or license issued from a certifying or licensing entity.

(3) Being found guilty of incompetence or negligence during the individual's performance as a permit holder.

f. Failing to conform to applicable state and federal statutes and rules. This includes any action that might place a facility in noncompliance with Iowa statutes and rules.

g. Practicing when there is an actual or potential inability to perform with reasonable skill and safety due to illness, use of alcohol, drugs, chemicals, or any other material, or as the result of any mental or physical condition.

- h.* Engaging in any unethical conduct or conduct likely to deceive, defraud, or harm the public; or demonstrating a willful or careless disregard for the health, welfare, or safety of a patient.
- i.* Revealing privileged communication from or relating to former or current patients except as permitted by law.
- j.* Improperly managing patient records, including failing to maintain adequate records, failing to furnish records, or making, causing, or allowing anyone to make a false, deceptive, or misleading entry into a patient record.
- k.* Providing false or misleading information that is directly related to the care of a former or current patient.
- l.* Interpreting or rendering a diagnosis for a physician based on a diagnostic image or prescribing medications or therapies.
- m.* Failing to immediately report to a supervisor information concerning an error made in connection with imaging, treating, or caring for a patient. This includes any departure from the normal standard of care and behavior that is negligent.
- n.* Employing fraud or deceit to obtain, attempt to obtain or renew a permit under this chapter or in connection with a certification or license issued from a certifying or licensing entity. This includes altering documents, failing to provide complete and accurate responses or information, indicating falsely in writing that a permit is valid when that is not the case, or any form of examination subversion.
- o.* Failure to provide truthful, accurate, unaltered, or nondeceptive information related to continuing education activities to the department or a record keeper.
- p.* Assisting others to provide false, inaccurate, altered, or deceptive information related to continuing education to this department or a record keeper. This includes sharing answers, providing or using false certificates of participation, or verifying continuing education hours that have not been earned.
- q.* Failure to pay all fees or costs required to meet the requirements of this chapter. Penalties for working without a current permit will be considered on a case-by-case basis.
- r.* Failure to respond to an audit request or failure to provide proper documentation.
- s.* Submitting false information to a facility that might place the facility in noncompliance with any federal or state statutes or laws.
- t.* Engaging in any conduct that subverts or attempts to subvert a department investigation.
- u.* Failure to comply with a subpoena issued by the department or failure to cooperate with an investigation by the department.
- v.* Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- w.* Sexual harassment of a patient, student or supervisee. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal and physical conduct of a sexual nature.
- x.* Violating a statute of this state, another state, or the United States, without regard to its designation as either a felony or misdemeanor, including but not limited to a crime involving dishonesty, fraud, theft, embezzlement, controlled substances, substance abuse, assault, sexual abuse, sexual misconduct, or homicide. A copy of the record of conviction or plea of guilty is conclusive evidence of the violation.
- y.* Having a permit, license or certification related to the classification of the permit issued to the individual suspended or revoked or having other disciplinary action taken by a licensing or certifying authority of this state or another state, territory or country. A copy of the record or order of suspension, revocation, or disciplinary action is conclusive or prima facie evidence.
- z.* Failure to respond within 30 days of receipt of communication from the department.

42.22(2) Self-reporting. Each permit holder shall:

- a.* Submit a report to the department within five days of the final disposition of all criminal proceedings, convictions, or military court-martials involving alcohol or illegal drug use while operating as a permit holder, sex-related infractions, or patient-related infractions in any state, territory, or country.
- b.* Submit a written report to the department within five days of the initial charge and within five days of the final disposition of any disciplinary action brought against the individual in connection with a

certificate or license issued from a certifying or licensing entity, or any disciplinary action brought against the individual by an employer or patient.

c. Report potential ethics violations (including state licensing issues and criminal charges and convictions) within 30 days of the occurrence or during the permit holder's annual renewal process, whichever comes first.

42.22(3) Enforcement actions. Enforcement actions may include, but are not limited to, denial, probation, suspension or revocation of a permit, directed corrective action, and civil penalty.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 5683C, IAB 6/16/21, effective 7/21/21]

641—42.23(136C) Procedures for demand for information, notice of proposed action, and orders for penalties, suspensions, revocations, and civil penalties for all individuals under this chapter. These actions may be imposed on any permit holder who violates any rule in this chapter.

42.23(1) Demand for information.

a. The department may issue a demand for information for the purpose of determining whether any further action shall be taken. The demand shall state the alleged violations and allow the individual 20 days from the date of the letter to file a written answer with the department.

b. The individual must file a written answer to the department. The answer shall specifically admit or deny each allegation or charge made in the demand for information and provide fact and law on which the answer relies, set forth reasons why the demand should not have been issued, and if the requested information is not provided, the reasons why it is not provided.

c. Upon review of the answer, the department may institute the next level of proceeding or consider the matter closed. If no answer is filed, the department shall institute the notice of proposed action.

42.23(2) Procedures for enforcement actions.

a. Notice of proposed action.

(1) In response to an alleged violation of any provision of the Iowa Code, these rules, or any order issued by the department, the department may issue a written notice of proposed action. The notice of proposed action shall concisely state the alleged violation(s), the action the department is proposing, the time period in which a written response must be received, and the process for requesting a hearing.

(2) A written response must state any facts, explanations, or arguments denying the violations or must demonstrate any extenuating circumstances, error in the notice, or other reason why the proposed action should not be imposed. Responses may also request remission or mitigation of any penalty.

(3) If a request for a hearing is received within the allotted time period, the proposed action shall be suspended pending the outcome of the hearing. Prior to or at the hearing, the department may rescind the notice of proposed action upon satisfaction that the reason for the proposed action has been resolved.

(4) If no answer is filed, the department shall institute the order.

b. Order. An order may be issued upon response to the notice of proposed action or if no answer to the notice has been filed. The order may institute a proceeding to impose a penalty or suspend, revoke, or place on probation the individual's permit, or issue a civil penalty. An order shall concisely state the violation(s), the action the department has imposed, the effective date of the order, the time period for written response to be received by the department, and the process for requesting a hearing. If there has been consent in writing to the notice of proposed action, no written response to the order is necessary.

(1) If a request for a hearing is received within the allotted time period, the proposed action of the order shall be suspended pending the outcome of the hearing. Prior to or at the hearing, the department may rescind the order upon satisfaction that the reason for the proposed action has been resolved.

(2) If no answer is filed, the department shall institute the order. A consent to the order shall constitute a waiver to a hearing, findings of fact and conclusions of law, and of all right to seek department and judicial review or to contest the validity of the order in any form as to those matters which have been consented to or agreed to or on which a hearing has not been requested. An order that has been consented to shall have the same force and effect as an order made after hearing by a presiding officer or the department and shall be effective as provided in the order. Failure to comply with an order either consented to or validated by a hearing officer shall result in further enforcement action.

c. Civil penalty. Before instituting any proceeding to impose a civil penalty, the department shall serve written notice of violation upon the individual charged. This notice shall be included in the notice of

proposed action or order issued. The notice of proposed action or order shall specify the amount of each proposed penalty for each alleged violation. The notice or order shall state that the amount charged may be paid as specified or protested in its entirety or in part. Upon final action of a civil penalty, payment must be made within the specified time stated in the order or the department may refer the matter to the attorney general for collection.

d. Settlement and compromise. At any time after the issuance of a notice or order designating the time and place of hearing in response to an order, the department and the regulated individual may enter into a stipulation for a settlement or compromise of the notice or order. The stipulation of compromise shall be subject to approval by the designated presiding officer or, if none has been designated, by the chief administrative law judge. The presiding officer or chief administrative law judge may order such adjudication of the issued notice or order as deemed to be required in the public interest to dispose of the proceeding. If approved, the terms of the settlement or compromise shall be embodied in a decision or order settling and discontinuing the proceeding.

641—42.24 and 42.25 Reserved.

641—42.26(136C) Rescinded **ARC 5683C**, IAB 6/16/21, effective 7/21/21.

641—42.27 to 42.29 Reserved.

FORMAL EDUCATION

641—42.30(136C) Requirements for formal education. Formal education must meet the following minimum requirements:

42.30(1) General radiologic technology formal education must be recognized by the ARRT to allow students to qualify for the general radiography examination.

42.30(2) Nuclear medicine technology formal education must be recognized by the ARRT or NMTCB to allow students to qualify for the nuclear medicine technology examination.

42.30(3) Radiation therapy formal education must be recognized by the ARRT to allow students to qualify for the radiation therapy examination.

42.30(4) Radiologist assistant formal education must provide training to allow students to qualify for a department-approved radiologist assistant examination.

42.30(5) Limited radiologic technologist formal education must meet the minimum standards specified in 641—42.31(136C).

42.30(6) X-ray equipment operator formal education must meet the minimum standards as outlined in 641—42.32(136C) or 641—42.33(136C).

[ARC 0577C, IAB 2/6/13, effective 3/13/13]

641—42.31(136C) Standards for formal education for limited radiologic technologists.

42.31(1) The formal education may be a single offering that meets all standards of all categories, or it may be offered individually specific to the category the provider wishes to offer.

42.31(2) The following are the minimum standards:

a. A principal instructor shall:

(1) Be an Iowa-licensed chiropractor teaching spine and extremities categories only; or

(2) Be an Iowa-permitted general radiologic technologist and have at least two years of current experience in radiography; or

(3) Hold a current ARRT registration and have at least two years of current experience in radiography if the clinical site is located outside of Iowa.

b. A clinical instructor shall:

(1) Be an Iowa-licensed chiropractor teaching spine and extremities categories only; or

(2) Be an Iowa-permitted general radiologic technologist and have at least two years of current experience in radiography; or

(3) Be an Iowa-permitted limited radiologic technologist in the category of instruction and have at least two years of current experience in radiography; or

(4) Hold a current ARRT registration and have at least two years of current experience in radiography if the clinical site is located outside of Iowa.

- c. Clinical instructors shall be supervised by the principal instructor.
- d. A principal instructor may also act as clinical instructor, if applicable.
- e. Classroom and clinical standards are listed below:

Category	Classroom Hours	Clinical Practice Projections	Clinical Competency Projections
Core: completed by all trainees	60		
Chest	20	30 PA or LAT	5 PA, 5 LAT
Upper extremity	20	30 (any projections)	10 (only 2 of any projection allowed)
Lower extremity	20	30 (any projections)	10 (only 2 of any projection allowed)
Shoulder	20	20 (any projections)	6 (only 2 of any projection allowed)
Spine	20	30 (any projections)	10 (only 2 of any projection allowed)
Pediatric: add on to chest	8 of initial pediatrics	20 (any projections)	2 PA, 2 LAT
Pediatric: add on to upper extremity	8 of initial pediatrics	20 (any projections)	10 (only 2 of any projection allowed)
Pediatric: add on to lower extremity	8 of initial pediatrics	20 (any projections)	10 (only 2 of any projection allowed)

(1) All competency testing for limited radiography shall be directly supervised by the principal or clinical instructor, can only begin after the classroom hours in a category have been completed, and cannot begin until after the clinical site has been approved by the department using the Initial Clinical Site Form.

(2) Clinical instructors shall directly supervise all students before the student's competency for a specific projection is documented and indirectly supervise after the student's competency for a specific projection is documented.

(3) Current permit holders completing formal education to add a category do not need to repeat the core curriculum.

42.31(3) Department approval is required before implementing any formal education or making any changes to a formal education offering.

42.31(4) Administrative items for all formal education:

a. The department reserves the right to audit or evaluate any aspect of the formal education or student progress.

b. The department may at any time require further documentation.

[ARC 0577C, IAB 2/6/13, effective 3/13/13; ARC 5683C, IAB 6/16/21, effective 7/21/21]

641—42.32(136C) Standards for formal education for X-ray equipment operators in podiatric radiography.

42.32(1) The following are the minimum standards:

a. A principal instructor shall:

(1) Be an Iowa-licensed podiatrist; or
 (2) Be an Iowa-permitted general radiologic technologist and have at least two years of current experience in radiography; or

(3) Hold a current ARRT registration and have at least two years of current experience in radiography if the clinical site is located outside of Iowa.

b. A clinical instructor shall:

- (1) Be an Iowa-licensed podiatrist; or
- (2) Be an Iowa-permitted limited radiologic technologist in the category of extremities and have at least two years of current experience in radiography; or
- (3) Be an Iowa-permitted X-ray equipment operator in podiatry and have at least two years of current experience in radiography; or
- (4) Be an Iowa-permitted general radiologic technologist and have at least two years of current experience in radiography; or
- (5) Hold a current ARRT registration and have at least two years of current experience in radiography if the clinical site is located outside of Iowa.

c. Clinical instructors shall be supervised by the principal instructor.

d. A principal instructor may also act as clinical instructor, if applicable.

e. The following are classroom and clinical standards:

(1) A minimum of 8.0 hours of classroom instruction to include radiation safety, equipment operation, patient care, and anatomy.

(2) Clinical instruction to include positioning and a minimum of 20 projections excluding the competency projections.

(3) Clinical competency projections shall include 10 projections with only 2 of any single projection allowed to count toward the competency projections.

(4) All competency testing shall be directly supervised by the principal or clinical instructor.

(5) Clinical instructors shall directly supervise all students before the student's competency for the specific projection is documented and indirectly supervise after the student's competency for the specific projection is documented.

42.32(2) Department approval is required before implementing any formal education or making any changes to a formal education offering.

42.32(3) Administrative items for all formal education:

a. The department reserves the right to audit or evaluate any aspect of the formal education or student progress.

b. The department may at any time require further documentation.

[ARC 0577C, IAB 2/6/13, effective 3/13/13]

641—42.33(136C) Standards for formal education for X-ray equipment operators in bone densitometry.

42.33(1) The following are the minimum standards:

a. A principal instructor shall have at least two years of current experience in radiography and bone densitometry and shall:

(1) Be an Iowa-permitted general radiologic technologist; or

(2) Hold a current ARRT registration if the clinical site is located outside of Iowa.

b. A clinical instructor shall have at least two years of current experience in radiography and bone densitometry and shall:

(1) Be an Iowa-permitted limited radiologic technologist; or

(2) Be an Iowa-permitted X-ray equipment operator in bone densitometry; or

(3) Be an Iowa-permitted general radiologic technologist; or

(4) Hold a current ARRT registration if the clinical site is located outside of Iowa.

c. Clinical instructors shall be supervised by the principal instructor.

d. A principal instructor shall also act as clinical instructor, if applicable.

e. The following are classroom and clinical standards:

(1) A minimum of 8.0 hours of classroom instruction to include radiation safety, equipment operation, quality control, patient care, and anatomy.

(2) Clinical instruction to include positioning and a minimum of 10 projections excluding the competency projections.

(3) Clinical competency projections shall include 5 projections.

(4) All competency testing shall be directly supervised by the principal or clinical instructor.

(5) Clinical instructors shall directly supervise all students before the student's competency for the specific projection is documented and indirectly supervise after the student's competency for the specific projection is documented.

42.33(2) Department approval is required before implementing any formal education or making any changes to a formal education offering.

42.33(3) Administrative items for all formal education:

a. The department reserves the right to audit or evaluate any aspect of the formal education or student progress.

b. The department may at any time require further documentation.

CHAPTER 43
MINIMUM REQUIREMENTS FOR RADON TESTING AND ANALYSIS

641—43.1(136B) Purpose and scope. This chapter establishes requirements for the certification of radon measurement specialists and radon measurement laboratories. All persons performing measurements for radon or radon progeny in buildings, other than those which they own or occupy, and who provide the results of these measurements to the owner or occupant of these structures must be certified in accordance with the provisions of this chapter.

641—43.2(136B) Definitions. The following words and terms when used in this chapter shall have the following meanings, unless the context clearly indicates otherwise.

“*AARST*” means the American Association of Radon Scientists and Technologists.

“*Act*” means the Iowa Radon Testing Act (Iowa Code chapter 136B).

“*ANSI*” means the American National Standards Institute.

“*Building*” means a structure enclosed with exterior walls or fire walls, built, erected and framed of component structural parts, and designed for the housing, shelter, enclosure and support of individuals.

“*Certified person*” means a certified radon measurement specialist or certified radon measurement laboratory as defined by this chapter.

“*Certified radon measurement laboratory (certified laboratory)*” means a commercial laboratory which may analyze samples or test for radon decay products and meets the provisions for certification in this chapter.

“*Certified radon measurement specialist (certified specialist)*” means an individual who performs radon or radon progeny measurements in buildings and provides professional or expert advice on radon and radon progeny measurements, radon entry routes, and other radon-related activities; is knowledgeable in the health risk associated from exposure to radon; and who meets the provisions for certification in this chapter.

“*Compensation*” means any form of monetary gain which in any way directly or indirectly results from a radon or radon progeny measurement being conducted.

“*Department*” means the Iowa department of public health.

“*EPA*” means the United States Environmental Protection Agency.

“*Laboratory*” means any person performing analysis, not at a testing site, on a passive device to measure radon or radon progeny (charcoal canister, alpha-track, electret, etc.).

“*NRPP*” means the National Radon Proficiency Program facilitated by the American Association of Radon Scientists and Technologists (AARST).

“*NRSB*” means the National Radon Safety Board.

“*Person*” means an individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, any other state or political subdivision or agency, and a legal successor, representative, agency or agencies of the entities listed in this paragraph.

“*Picocurie per liter*” means a quantity of radioactive material per liter of air that will produce 2.2 disintegrations per minute of radiation. It may be used as a measure of the concentration of radon gas in air. One curie is equivalent to one trillion picocuries.

“*Radon*” means the radioactive noble gas radon-222.

“*Radon progeny*” means the short-lived radionuclides formed as a result of the decay of radon-222, including polonium-218, lead-214, bismuth-214, and polonium-214.

“*Working level (WL)*” means the concentration of radon progeny that will result in 130,000 million electron volts of alphaparticle energy released per liter of air. Working level is a measure of radon decay product concentration in air.

[ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.3(136B) General provisions.

43.3(1) Except as provided in this chapter, no person may test for the presence of radon or radon progeny in the state of Iowa unless the person has been certified by the department of public health. This

requirement also applies to persons whose place of business is located in Iowa, or in a state other than Iowa, and who offer radon testing to residents of Iowa either directly, through the mail, or by other means.

43.3(2) Individual qualifications for radon measurement specialist. No individual may be certified as a radon measurement specialist unless all of the following conditions are met:

- a. Be at least 18 years of age at the time of application;
- b. Possess two years of relevant professional work experience. Relevant postsecondary education may be substituted for professional work experience. Relevant postsecondary education includes a college curriculum in architecture, engineering, building construction or the physical sciences. Relevant professional work experience includes house testing/evaluation for the presence of radon, design and installation of heating, ventilation and air-conditioning systems, design or construction of buildings, or related activities approved by the department of public health;
- c. Use detection devices approved by the NRPP, the NRSB, or another department-approved national radon proficiency program to measure radon. The detection device must be obtained from an Iowa-certified radon measurement laboratory. The records of calibration must be maintained for review by the department or agents of the department.

43.3(3) Requirements for continued certification shall include the following:

- a. A certified person located within the state of Iowa shall allow the department, its agents, employees, and contractors, upon presentation of appropriate credentials, to have access without undue delay to the person's facilities, offices and files for inspection and examination of records and equipment. The certified person shall also allow the department, its agents, employees, and contractors to accompany the person while performing any radon measurement, for the purpose of inspection of those activities, with the approval of the property owner or resident on whose property the activities are being performed.
- b. The certified person shall remain in compliance with the Act and this chapter.
- c. The certified person shall comply with all EPA, ANSI/AARST and department-approved radon measurement and quality assurance/quality control (QA/QC) guidelines, protocols, and standards and shall conduct measurements following the standard as of March 15, 2023, applicable to the building being tested. The standards include the following:

- (1) ANSI/AARST MS-QA-2019, *Radon Measurement Systems Quality Assurance*.
- (2) ANSI/AARST MAH-2019, *Protocol for Conducting Measurements of Radon and Radon Decay Products in Homes*.
- (3) ANSI/AARST MALB-2014 with 1/2021 Revisions, *Protocol for Conducting Measurements of Radon and Radon Decay Products in Schools and Large Buildings*.
- (4) ANSI/AARST MAMF-2017 with 1/2021 Revisions, *Protocol for Conducting Measurements of Radon and Radon Decay Products in Multifamily Buildings*.

[ARC 2838C, IAB 12/7/16, effective 1/11/17; ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.4(136B) Application for certification.

43.4(1) An application for certification or renewal of certification as a radon measurement specialist or a radon measurement laboratory shall be filed on a form or other electronic document as prescribed by the department and shall contain complete and accurate information.

- a. An application for a radon measurement specialist must include:
 - (1) Proof of successful completion of a department-approved training course on radon/radon progeny measurements. A certificate of attendance is required.
 - (2) Proof of successful completion of an examination approved by this department. A letter from the NRPP or NRSB showing a passing score for the radon measurement specialist examination fulfills this requirement.
 - (3) Proof of two years of postsecondary education in architecture, natural science, engineering, or a related discipline. A college transcript must be included to fulfill this requirement or a detailed resume evidencing two years of relevant professional work experience, such as conducting professional home inspections; or the design and installation of heating, ventilation and air-conditioning systems; or the design or construction of buildings; or related activities approved by the department; or a combination of professional work experience and postsecondary education.

(4) A QA/QC plan for all measurement devices and equipment. If laboratory devices are used, the names and addresses of the Iowa-certified radon measurement laboratories must be included. If a continuous radon monitor is used, the name of the manufacturer, model, and picture of the monitor must be included. The manufacturer of any device used must have NRPP, NRSB or other national agency approval that indicates the device has been approved for measuring radon. Only measurement devices from Iowa-certified radon measurement laboratories or a continuous radon monitor that has been satisfactorily calibrated and approved by the Iowa radon program are allowed for use in performing radon measurements.

(5) Standard operating procedures (SOPs). Procedures must include information concerning the placement and pickup of devices used, who performs the tests, and what measures will be used to ensure all tests are in conformance with EPA protocols and procedures.

(6) A signed statement that the individual will follow all EPA radon measurement guidelines, ANSI/AARST radon measurement standards, and department radon measurement guidelines, standards and protocols.

(7) A signed statement that the individual will submit radon test results every 30 days to the Iowa radon program within the department. The radon test results shall be submitted in a manner that is approved by the department.

(8) A signed statement that the individual will keep all records for a minimum of five years after the radon test is completed.

(9) A copy of the confidentiality waiver that reports results to the customer as outlined in Iowa Code section 136B.2.

(10) A signed statement that the individual will submit to the department within 14 working days any changes in the original application and that the individual will acquire at least eight hours of continuing education credits every two years before certification is renewed.

(11) The fee specified in 43.4(6).

b. An application for a radon measurement laboratory must include:

(1) Proof of meeting the requirements of the NRPP or NRSB Radon/Radon Progeny Measurement Proficiency Program.

(2) A quality assurance plan and quality control procedures for all measurements and equipment.

(3) A signed statement that all EPA, ANSI/AARST, NRPP and NRSB and any department measurement guidelines, standards and protocols will be followed, as applicable.

(4) Name(s) and address(es) of any retail operation(s) selling the laboratory's testing service(s) within Iowa.

(5) A signed statement that all changes in the original application will be submitted to the department within 14 working days.

(6) The fee specified in subrule 43.4(6).

43.4(2) The department may require the applicant to submit supplementary statements containing additional information to enable the department to determine whether an application should be approved or denied, or whether a previously issued certification should be amended, suspended, or revoked.

43.4(3) Each application or supplementary statement shall be signed by either the applicant personally, or a person authorized in writing by the applicant to do so on the applicant's behalf.

43.4(4) A certification will be valid for one year following the date of issuance. No radon measurement covered by this chapter can be conducted after the expiration of the term of certification unless an application for renewal certification has been received by the department 30 days prior to the expiration date of certification and is pending approval. If the application is rejected, no radon test or measurement may be conducted by that applicant in the state of Iowa if a financial arrangement is involved.

43.4(5) Renewal of an annual certification must contain all the information requested in the Notice of Renewal for certification along with the fee specified in subrule 43.4(6). The application to renew credentials must also include a signed and dated continuing education form and a copy of a course certificate which indicates the name of the individual receiving continuing education, the amount of continuing education the individual has received, and the date the continuing education course was given.

43.4(6) Radon certification fees. Any person wishing to become certified as a radon measurement specialist or as a radon measurement laboratory is required to pay fees sufficient to defray the cost of administering this chapter. Fees which must be submitted are as follows:

a. Application fee.

(1) Each person with Iowa residency wishing certification under the provisions of 641—43.1(136B) shall pay a nonrefundable \$25 application fee.

(2) Each person without Iowa residency wishing certification under 641—43.1(136B) shall pay a nonrefundable \$100 application fee.

b. Annual certification fee.

(1) Each individual requesting certification and renewing certification as a radon measurement specialist must pay a nonrefundable annual fee of \$250.

(2) Each person requesting certification and renewing certification as a radon measurement laboratory must pay a nonrefundable annual fee of \$500.

c. Each person wishing to give reciprocal recognition of credentials from another jurisdiction must pay the appropriate fees in 43.4(6).

d. Returned check and late fees. Persons who fail to pay required fees to the department are subject to the following penalty(ies):

(1) \$15 for each insufficient funds check submitted for payment of radon testing fees.

(2) \$25 per month for failure to pay annual radon testing certification fees starting after the annual renewal date or date of expiration.

e. If payment is not received and the certification has been expired 30 days, certification shall become inactive. In order to reinstate certification after 30 days past the expiration date, the person must reapply and pay the appropriate fees as outlined in this subrule.

[ARC 2838C, IAB 12/7/16, effective 1/11/17; ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.5(136B) Enforcement actions.

43.5(1) Rescinded IAB 12/7/16, effective 1/11/17.

43.5(2) The department may deny, suspend, revoke, modify the certification of a person, place on probation, impose a civil penalty, or refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code chapter 136B, or any combination thereof, when it finds that a certified person or a person who is not certified has committed any of the following:

a. Failing to submit required information or notifications in a timely manner;

b. Failing to maintain the required records;

c. Falsifying approval records, qualifications, or other information or documentation related to certification approval;

d. Failing to comply with the training standards and requirements in 43.3(2);

e. Submitting in the application for approval or reapproval false or misleading statements which the department relied upon in approving the application;

f. Failing to comply with federal, state, or local statutes and regulations, including the requirements of this chapter;

g. Knowingly making misleading, deceptive, untrue, or fraudulent representations involving radon, or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established;

h. Using untruthful or improbable statements in advertisements. Use of these statements includes, but is not limited to, the presentation of information to the public by training programs that is false, deceptive, or misleading, or that is promoted through fraud or misrepresentation;

i. Falsifying reports and records required by this chapter;

j. Accepting any fee by fraud or misrepresentation;

k. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority. A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report shall be expunged from the records of the board;

- l.* Failing to comply with the terms of a department order or the terms of a settlement agreement or consent order;
- m.* Representation by a firm or individual that the firm or individual is certified when the certification has been suspended or revoked or has not been renewed;
- n.* Failing to respond within 30 days of receipt of communication from the department that was sent by registered or certified mail;
- o.* Engaging in any conduct that subverts or attempts to subvert a department investigation;
- p.* Failing to comply with a subpoena issued by the department or failing to cooperate with a department investigation;
- q.* Failing to pay costs assessed in any disciplinary action;
- r.* Any condition revealed by the application, supplementary statement, report, record, or other evidence, which would warrant the department's refusal to grant a certification on an original application;
- s.* Being discontinued or removed from the NRPP or NRSB Radon/Radon Progeny Measurement Proficiency Program; or
- t.* Failing to submit radon test data as required in 641—43.6(136B).

[ARC 2838C, IAB 12/7/16, effective 1/11/17; ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.6(136B) Reporting requirements.

43.6(1) A certified person must submit to the department within 30 days after any radon/radon progeny testing, or at the request of the department prior to testing, the address or location of the building, the name and telephone number of the owner(s) of the building where the radon testing will be conducted and the results of any tests performed.

43.6(2) The results for each test conducted shall include, but not necessarily be limited to:

- a.* The method used for radon or radon decay product testing, media tested, and conditions under which the testing was or will be performed.
- b.* The level or floor of building where the test(s) was or will be conducted.
- c.* The results of the test(s) in picocuries/liter (pCi/l) of radon gas or working level (WL) of radon decay products.
- d.* The date on which the test was or will be conducted.
- e.* The purpose of the test.

43.6(3) Rescinded IAB 5/29/91, effective 5/10/91.

43.6(4) A certified person shall:

- a.* Cooperate with the department when conducting field evaluations.
- b.* Notify the department within 14 days of any changes in testing results or procedures.
- c.* Not disclose to any other person, except to the department, the results of a test or the address or the name of the owner of a nonpublic building that the person tested for the presence of radon gas and radon progeny, unless the owner of the building waives, in writing, this right of confidentiality. However, a person certified or credentialed pursuant to Iowa Code section 136B.1 may disclose the results of a test performed by the person for the presence of radon and radon progeny to a potential buyer of a nonpublic building when an offer to purchase has been presented by the buyer and if the potential buyer paid for the testing. Any test results disclosed shall be results of a test performed within the five years prior to the date of the disclosure.

[ARC 2838C, IAB 12/7/16, effective 1/11/17]

641—43.7(136B) Training and continuing education programs. Each person conducting radon-related activities shall complete a radon measurement training program approved by the department. All certified individuals must participate in a continuing education program every other year that consists of a minimum of eight hours of department-approved courses or seminars on either radon measurement or mitigation or both.

641—43.8(136B,280) School district employee measurement training.

43.8(1) School district employee requirements. In order for school district employees to perform radon measurements in buildings within their districts, they must complete a radon measurement training

course approved by the department and the Iowa department of education. A school district employee who has completed an approved training can only test buildings within the employee's district.

43.8(2) Approved training. Training programs shall not state that they have been approved by the state of Iowa unless they have met the requirements of 641—43.8(136B,280) and been approved by the department and the Iowa department of education and are listed on the department's website. An approved training course shall meet the following requirements:

a. Be based on the measurement requirements as found in the ANSI/AARST standard MALB- 2014 with 1/2021 Revisions, *Protocol for Conducting Measurements of Radon and Radon Decay Products in Schools and Large Buildings*.

b. Consist of five to eight instructional hours.

c. Cover at least the following subjects:

(1) Introduction to radon and its health effects.

(2) Guidance for building managers.

(3) Review of the measurement standard including:

1. Purpose and scope of testing.

2. Preparing a testing plan.

3. Test locations.

4. Testing procedures and options.

5. Quality control.

6. Conditions required before and during testing.

7. Documentation, test reports and record keeping.

8. Actions based on test results.

d. Conclude with a quiz to review the learned materials. The course attendee must pass the quiz with a score of 70 percent or better to receive the attendee's completion certificate.

43.8(3) Certificate of completion. The training provider shall provide that a certificate of completion will be issued and that it will contain at minimum the name of the student, the name of the course and the course ID, the name of the course provider, the course date(s), the number of hours, and the signature and typed name of the training provider.

43.8(4) Application for approval of a training course for school district employees. A person or organization that plans to conduct or sponsor a training course shall apply to the department for approval of the course on a form or in a manner approved by the department. The application shall include:

a. The sponsoring organization's name and website URL (if any), contact person, mailing address, email address and telephone number.

b. The name of the course.

c. The type of course: webinar, online or in-person.

d. The course agenda or course outline, including the approximate time allotted to each training segment.

e. A copy of the training materials provided to the student (manual, notes, templates, etc.).

f. A list of reference materials, texts and audiovisual materials used in the course.

g. A copy of the quiz for the course, containing at least 20 questions.

[ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.9(136B) Exemptions. Certification requirements shall not apply to:

1. Those persons who test for radon/radon decay products in buildings that they own or who perform radon tests for no compensation.

2. State officials who are conducting radon testing as part of the state's radon testing program or local officials who are acting on behalf of the state or administering a local program, and approved by the department.

3. Officials who are conducting radon testing as part of government programs in the United States or contractors working for the United States government.

[ARC 2838C, IAB 12/7/16, effective 1/11/17; ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.10(136B) Enforcement.

43.10(1) A certified individual who measures for radon or radon progeny in the state of Iowa must meet the requirements of this chapter.

43.10(2) Any laboratory providing analysis services for radon detectors used in Iowa must meet the provisions of this chapter.

43.10(3) Any certified individual is prohibited from using radon measurement devices in Iowa obtained from a laboratory which is not certified under the provisions of this chapter.

[ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.11(136B) Penalties. It is unlawful for an individual to function as a radon measurement specialist or radon measurement laboratory in violation of the provisions of the Iowa radon testing Act or of any rule adopted pursuant to the Act. In addition to other sanctions provided in this chapter, persons convicted of violating the provisions of the Act or the rules adopted pursuant to the Act shall be guilty of a serious misdemeanor (Iowa Code section 136B.5).

[ARC 2838C, IAB 12/7/16, effective 1/11/17; ARC 6848C, IAB 2/8/23, effective 3/15/23]

641—43.12(136B) Persons exempted from certification. Persons providing radon or radon progeny measurement devices to the public, but not conducting physical tests for the presence of radon or radon progeny with the measurement devices may do so under the following conditions:

1. They must provide measurement devices obtained from a laboratory certified in Iowa.
2. A valid visible expiration date must be permanently affixed to each measurement device.
3. In addition to the required laboratory instructions regarding measurement procedures, each measurement device must be accompanied by clear directions on where to obtain additional information and interpretation for test results. The certified laboratory or a certified specialist must be included as one of the sources of information and interpretation.

[ARC 6848C, IAB 2/8/23, effective 3/15/23]

These rules are intended to implement Iowa Code chapters 136B and 280.

[Filed 9/30/88, Notice 8/10/88—published 10/19/88, effective 11/23/88]

[Filed 1/14/91, Notice 10/17/90—published 2/6/91, effective 3/13/91]

[Filed emergency 5/10/91—published 5/29/91, effective 5/10/91]

[Filed 5/8/92, Notice 4/1/92—published 5/27/92, effective 7/1/92]

[Filed ARC 6848C (Notice ARC 6647C, IAB 11/16/22), IAB 2/8/23, effective 3/15/23]

CHAPTER 44
MINIMUM REQUIREMENTS FOR RADON MITIGATION

641—44.1(136B) Purpose and scope. This chapter establishes requirements for the credentialing of radon mitigation specialists. All persons performing abatement for radon or radon progeny in buildings, other than buildings which the persons occupy or are constructing for their own occupancy, must be credentialed in accordance with the provisions of this chapter. Credentialed mitigation specialists are responsible for ensuring that all radon mitigation systems for which they are responsible are installed following guidelines that are provided in this chapter.

641—44.2(136B) Definitions. The following words and terms when used in this chapter shall have the following meanings, unless the context clearly indicates otherwise.

“Active mitigation system” means any system or materials installed as an active part of a ventilation system used for the purpose of reducing radon or radon progeny concentrations by means of an in-line fan.

“ASTMI E2121” means the American Society for Testing Materials International E2121, Standard Practice for Radon Mitigation Systems in Existing Low-Rise Residential Buildings.

“Credentialed radon mitigation specialist (mitigation specialist)” means an individual who evaluates diagnostic tests to determine appropriate radon or radon progeny mitigation strategies for a building, designs mitigation systems, installs or supervises the installation of radon or radon progeny mitigation techniques on buildings, and meets the requirements for credentialing provided by this chapter.

“Department” means the Iowa department of public health.

“Diagnostic tests” means tests performed or procedures used to determine appropriate mitigation methods for a building.

“EPA” means the United States Environmental Protection Agency.

“Mitigator” means a person who installs mitigation systems for the purpose of abating radon levels within buildings.

“Passive mitigation system” means any system or materials installed for the purpose of reducing radon or radon progeny concentrations without the use of an in-line fan.

“pCi/L” means a measurement of radon in picocuries per liter.

“Radon” means the radioactive noble gas radon-222.

“Radon progeny” means the short-lived radionuclides formed as a result of the decay of radon-222.

“RMS” means EPA Radon Mitigation Standards.

“Working level month (WLM)” means a cumulative exposure to radon decay products calculated by multiplying the radon daughter concentration in units of working levels by the number of hours exposed and dividing by 170.

641—44.3(136B) General provisions.

44.3(1) Except as provided in this chapter, no person may mitigate for radon or radon progeny in Iowa for a fee or other remuneration unless such a person has been credentialed by the department.

44.3(2) Individual qualifications for radon mitigation specialist. No individual may be credentialed as a radon mitigation specialist unless all of the following conditions are met. The individuals shall:

a. Be at least 18 years of age at the time of application.

b. Possess three years of relevant professional work experience. Relevant postsecondary education may be substituted on a year-for-year basis for two of the three years of relevant professional work experience. Relevant postsecondary education includes a college curriculum in architecture, engineering, building construction, or the physical sciences. Relevant professional work experience includes the design or construction of buildings, or associated heating, ventilation, and air-conditioning systems, or closely related activities approved by the department.

c. Have successfully completed a combined radon measurement/mitigation course approved by the department and a radon mitigation examination approved by the department.

44.3(3) All applicants for credentialing must comply with Iowa Code chapter 136B and submit the following to the department:

a. An acceptable mitigation worker protection plan to follow when performing mitigation installations which includes, but is not limited to:

- (1) Procedures to follow to keep radiation exposure to workers as low as is reasonably achievable.
- (2) Methods to follow to reduce or minimize the radon concentration in the work area.
- (3) Criteria for wearing properly fitted respirators anytime the radon decay product level is above one working level.

b. An acceptable quality assurance plan to follow when performing mitigation installations which includes, but is not limited to:

(1) A description of all diagnostic tests performed to determine the mitigation strategy, names of the individuals performing the diagnostic tests, and any other related services offered.

(2) Ensuring that all instruments are properly calibrated according to the manufacturer's recommendations.

(3) A description of all mitigation materials and systems offered.

c. A complete and accurate application on a form prescribed by the department.

44.3(4) Requirements for continued credentialing shall include, at a minimum, the following conditions:

a. An Iowa credentialed person shall allow the department, its agents, employees, and contractors, upon presentation of appropriate credentials and with just cause, to have access during regular business hours without undue delay to their facilities, offices and files for inspection and examination of records and equipment. Credentialed persons shall also allow the department, its agents, employees, and contractors to accompany them while performing any radon abatement measures, for the purpose of inspection of those activities, with the approval of the property owner or resident on whose property the activities are being performed.

b. The credentialed person shall remain in compliance with the Iowa Radon Testing and Abatement Act and this chapter. Any material changes in the information provided in the original application, including changes in credentialed personnel, shall be reported in writing to the department within ten working days of the change.

c. The credentialed person shall comply with department standards and all the requirements as stated in EPA's Radon Mitigation Standards (RMS) EPA 402-R-93-078, October 1993 (Revised April 1994) and ASTM E2121. All "shoulds" in the above document shall be "shalls" according to department standards.

44.3(5) A credentialed person shall:

a. Fully cooperate with the department or its agents when field evaluations are conducted.

b. Be present during scheduled visits by the department.

c. Not disclose to any other person, except to the department or its agents, the addressee or owner of a nonpublic building, the radon levels present in the building or abatement measures needed or performed, unless the building owner waives this right of confidentiality in writing.

d. Ensure that each building is tested for radon levels before and after mitigation work is performed. Such tests shall be of sufficient type, duration and consistency and shall be performed at such times and under such ventilation conditions as to allow for comparison of before and after mitigation radon levels. Premitigation and postmitigation radon tests shall be performed independently by a measurement specialist or technician who is not employed by the same firm as the mitigation specialist performing the mitigation. Postmitigation radon tests shall be started no sooner than one day after mitigation is completed. This requirement is not binding if the building owner waives the procedure, on a form prescribed by the department, before the mitigation process has started.

641—44.4(136B) Application for credentialing.

44.4(1) An application for credentialing or renewal of credentials as a radon mitigation specialist shall be filed on a form prescribed by the department, shall contain complete and accurate information and shall be accompanied by the appropriate fees as outlined in subrule 44.4(6).

44.4(2) The department may require the applicant to submit supplementary statements containing additional information to enable the department to determine whether an application should be approved or denied, or whether a previously issued credential should be amended, suspended, or revoked.

44.4(3) Each application or supplementary statement shall be signed by either the applicant personally, or a person authorized in writing by the applicant to do so on the applicant's behalf.

44.4(4) A credential will be valid for one year following the date of issuance. No radon abatement covered by this chapter can be commenced after the expiration of the term of credentialing unless an application for renewal has been received by the department within 30 days of the notice of expiration and the renewal application is deemed complete and acceptable by the department. All radon mitigation work commenced prior to expiration of credentialing must be completed within 30 days of the expiration date if renewal is not accomplished. If the application is rejected, no radon abatement may be conducted by that applicant in the state of Iowa if a financial arrangement is involved.

44.4(5) An application to renew credentials must be on a form approved by the department and must include the number of mitigation systems installed for the renewal period and any changes in the initial credentialing application, along with the fee specified in subrule 44.4(6).

44.4(6) Radon mitigation credentialing. Any person wishing to become credentialed as a radon mitigation specialist shall be required to pay fees sufficient to defray the cost of administering this chapter.

a. Application fee.

(1) Each person with Iowa residency wishing certification under the provisions of 641—Chapter 44 shall pay a nonrefundable \$25 application fee.

(2) Each person without Iowa residency wishing certification under 641—Chapter 44 shall pay a nonrefundable \$100 application fee.

b. Annual credentialing fee. Each individual requesting credentialing must:

(1) Pay an initial fee of \$150 which is refundable if credentialing is not completed.

(2) Pay annually a renewal fee of \$150 or a mitigation system installation surcharge fee of \$40 per mitigation system installed (as defined in 641—44.2(136B)) costing more than \$200, whichever is greater. With each renewal, a credentialed person must submit legal documentation of the number of mitigation systems installed the previous credentialing year. If an individual decides not to renew credentials the following year, all surcharge fees are to be paid in full within 30 days of the date of expiration of the credentials.

c. Returned check and late fees.

(1) Persons who fail to pay required fees to the department are subject to the following penalty(ies):

1. \$15 for each insufficient funds check submitted for payment of radon mitigation fees.

2. \$25 per month for failure to pay annual radon mitigation credentialing fees starting after the annual renewal date or date of expiration.

(2) If payment is not received and the certification has been expired 30 days, certification will be revoked immediately. In order to regain certification, the individual must reapply and pay the appropriate fees as outlined in this subrule.

d. Applications for initial and renewal credentialing must be submitted along with the appropriate fees specified in this subrule to the Division of Environmental Health, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. The fee must be in the form of a check or money order made payable to the Iowa Department of Public Health and must include on the check or money order an indication of the purpose of the fee (i.e., radon mitigation credentialing).

e. Each person wishing to receive reciprocal recognition of credentialing from another jurisdiction must pay the appropriate fees as outlined in this subrule.

641—44.5(136B) Revocation of credentialing. The department will follow the procedures set forth in Iowa Code chapter 17A when revoking or suspending any credentials, in whole or in part. The department may deny, suspend, revoke, or modify the credentials of a person, or may impose a civil penalty or may refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code chapter 136B when it finds that a credentialed person or a person who is not credentialed has committed any of the following acts:

1. Any material misstatement in the application or in any supplementary statement.

2. Any material misstatement in the renewal application or supplementary statement received upon renewal.

3. Any condition revealed by an inspection of the applicant, the application, supplementary statement, report, record, or other evidence, which would warrant refusal by the department's agents or employees to grant a credentialing on an original application.

4. Falsifying approval records, qualifications, or other information or documentation related to licensing approval.

5. Any violation or failure to observe any of the applicable terms or provisions of credentialing, the public health law, or any other applicable rule, radon testing rule, ordinance, regulation, code or order.

6. Not completing the installation of a radon mitigation system within 30 days of the start date or date contracted to start.

7. Failing to submit a complete and accurate renewal application form before the end of the renewal period which includes the fee specified in subrule 44.4(6).

8. Failing to correct any violation of EPA, ASTM, or department rules that was found during a previous inspection or any violation found on an initial inspection which, as determined by the department, jeopardizes the safety of the building or other occupants.

9. Accepting compensation for installing ineffective radon remedies or for not dropping radon levels below 4 pCi/L in the area or level of the building where a radon mitigation system was installed.

10. Accepting compensation for installing active or nonactive radon mitigation systems that are not acceptable to the department or that do not comply with the requirements of this chapter.

11. Failing to fully cooperate with the department or its agents when field evaluations are conducted.

12. Failing to attend a scheduled meeting or inspection set up by the department or its agents, when the person holding the credentials was previously notified and agreed to the time and location of the inspection.

13. Failing to submit required information or notifications in a timely manner.

14. Failing to maintain the required records in 641—44.6(136B), and in EPA's Radon Mitigation Standards (RMS) EPA 402-R-93-078, October 1993 (Revised April 1994), and ASTM E2121 (NOTE: EPA has incorporated E2121 by reference and retained EPA's Radon Mitigation Standards (RMS) in effect until at least 2007).

15. Failing to comply with the training standards and requirements in 641—44.7(136B).

16. Failing to comply with federal, state, or local statutes and regulations, including the requirements of this chapter.

17. Knowingly making misleading, deceptive, untrue, or fraudulent representations involving radon, or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

18. Using untruthful or improbable statements in advertisements. Use of these statements includes, but is not limited to, the presentation of information to the public by training programs that is false, deceptive, or misleading or that is promoted through fraud or misrepresentation.

19. Falsifying reports and records required by this chapter.

20. Accepting any fee by fraud or misrepresentation.

21. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority. A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report shall be expunged from the record.

22. Failing to comply with the terms of a department order or the terms of a settlement agreement or consent order.

23. Representation by a firm or individual that the firm or individual is credentialed when the credential has been suspended or revoked or has not been renewed.

24. Failing to respond within 30 days of receipt of communication from the department or an agent of the department that was sent by registered or certified mail.

25. Engaging in any conduct that subverts or attempts to subvert a department investigation.

26. Failing to comply with a subpoena issued by the department or failure to cooperate with a department investigation.

27. Failing to pay costs assessed in any disciplinary action.

641—44.6(136B) Additional record-keeping requirements. A credentialed radon mitigation specialist shall maintain, for five years, a report of each mitigation activity which includes, but is not necessarily limited to:

1. The address or location of the building.
2. The name and phone number of the owner(s) of the building where the radon mitigation is conducted.
3. A written description of each mitigation system and materials installed, diagnostic test results and cost of each system.
4. The name of the certified radon measurement specialist or technician used to perform radon or radon progeny testing before and after radon mitigation of a building. This requirement does not apply if the building owner has waived the testing requirement set forth in 641—subrule 44.3(5) and the mitigation specialist maintains a copy of the signed waiver.
5. The results of any initial or follow-up radon or radon progeny measurements performed and the measurement methods utilized. This requirement does not apply if the building owner has waived the testing requirement set forth in 641—subrule 44.3(5) and the mitigation specialist maintains a copy of the signed waiver.
6. The results of the postmitigation radon measurements performed, including method of measurement and all pertinent dates. This requirement does not apply if the building owner has waived the testing requirement set forth in 641—subrule 44.3(5) and the mitigation specialist maintains a copy of the signed waiver.

641—44.7(136B) Continuing education. All credentialed individuals must participate in a continuing education program every other year that consists of a minimum of eight hours of department-approved courses or seminars on radon mitigation or measurement.

641—44.8(136B) Exemptions. Credentialing requirements shall not apply to:

1. Those persons who mitigate radon/radon decay products in buildings that they occupy for their own use.
2. Those persons mitigating radon/radon decay products as part of scientific research approved by the department.

641—44.9(136B) Enforcement. A credentialed individual who mitigates for radon or radon progeny in the state of Iowa must meet the requirements of Chapter 44.

641—44.10(136B) Penalties. It is unlawful for an individual to function as a radon mitigation specialist in violation of the provisions of the Iowa radon testing and abatement Act. Persons convicted of violating the provisions of the Iowa radon testing and abatement Act or 641—Chapter 44 shall be guilty of a serious misdemeanor.

These rules are intended to implement Iowa Code chapter 136B.

CHAPTER 45
RADIATION SAFETY REQUIREMENTS FOR INDUSTRIAL
RADIOGRAPHIC OPERATIONS, PARTICLE ACCELERATORS FOR NONHUMAN USE,
ANALYTICAL X-RAY EQUIPMENT, AND WELL-LOGGING

[Prior to 8/5/92, see 641—41.4(136C)]

641—45.1(136C) General requirements for industrial radiography operations.

45.1(1) Purpose and scope.

a. The rules in this chapter establish radiation safety requirements for using sources of radiation for industrial radiography. The requirements of this chapter are in addition to, and not in substitution for, other applicable requirements of 641—Chapters 38, 39, and 40. The rules in this chapter apply to all licensees or registrants who use sources of radiation for industrial radiography.

b. All references to any Code of Federal Regulations (CFR) in this chapter are those in effect as of July 22, 2020.

45.1(2) Definitions. For the purpose of this chapter, the definitions of 641—Chapter 38 may also apply. As used in this chapter, the following definitions apply:

“Annual refresher safety training” means a review conducted or provided by the licensee for its employees on radiation safety aspects of industrial radiography. The review may include, as appropriate, the results of internal inspections, new procedures or equipment, new or revised regulations, accidents or errors that have been observed, and should also provide opportunities for employees to ask safety questions.

“Associated equipment” means equipment that is used in conjunction with a radiographic exposure device to make radiographic exposures that drives, guides, or comes in contact with the source, e.g., guide tube, control tube, control (drive) cable, removable source stop, “J” tube and collimator when it is used as an exposure head.

“Cabinet X-ray system” means an X-ray system with the X-ray tube installed in an enclosure independent of existing architectural structures except the floor on which it may be placed. The cabinet X-ray system is intended to:

1. Contain at least that portion of a material being irradiated;
2. Provide radiation attenuation; and
3. Exclude personnel from its interior during generation of radiation. Included are all X-ray systems designed primarily for the inspection of carry-on baggage at airline, railroad, and bus terminals, and in similar facilities. An X-ray tube used within a shielded part of a building, or X-ray equipment which may temporarily or occasionally incorporate portable shielding, is not considered a cabinet X-ray system.

“Certifiable cabinet X-ray system” means an existing uncertified X-ray system that has been modified to meet certification requirements specified in 21 CFR 1020.40.

“Certified cabinet X-ray system” means an X-ray system which has been certified in accordance with 21 CFR 1010.2 as being manufactured and assembled pursuant to the provisions of 21 CFR 1020.40.

“Certifying entity” means an independent certifying organization meeting the requirements of Appendix A in 10 CFR Part 34 or an agreement state meeting the requirements in Appendix A, Parts II and III of 10 CFR Part 34.

“Collimator” means a small radiation shield of lead or other heavy metal that is placed on the end of a guide tube or directly onto a radiographic exposure device to restrict the size of the radiation beam when the sealed source is cranked into position to make a radiographic exposure.

“Control (drive) cable” means the cable that is connected to the source assembly and used to drive the source to and from the exposure location.

“Control drive mechanism” means a device that enables the source assembly to be moved to and from the exposure device.

“Control tube” means a protective sheath for guiding the control cable. The control tube connects the control drive mechanism to the radiographic exposure device.

“Crank-out device” means the cable, protective sheath, and handcrank used to move the sealed source from the shielded to the unshielded position to make an industrial radiographic exposure.

“Enclosed radiography” means industrial radiography conducted in an enclosed cabinet or room and includes cabinet radiography and shielded-room radiography.

“Exposure head” means a device that locates the gamma radiography sealed source in the selected working position. (An exposure head is also known as a source stop.)

“Field station” means a facility where licensed material may be stored or used and from which equipment is dispatched.

“Fluoroscopic imaging assembly” means a subsystem in which X-ray photons produce a fluoroscopic image. It includes the image receptors such as the image intensifier and spot-film device, electrical interlocks, if any, and structural material providing linkage between the image receptor and source assembly.

“GED” means general educational development.

“Guide tube (projection sheath)” means a flexible or rigid tube (i.e., “J” tube) for guiding the source assembly and the attached control cable from the exposure device to the exposure head. The guide tube may also include the connections necessary for attachment to the exposure device and to the exposure head.

“Hands-on experience” means experience in all of those areas considered to be directly involved in the radiography process.

“I.D. card” means the document issued by the agency, another agreement state, a licensing state, or third-party certification to industrial radiographers following completion of requirements stated in 45.1(10)“b.”

“Independent certifying organization” means an independent organization that meets all of the criteria of Appendix A in 10 CFR Part 34.

“Lay-barge radiography” means industrial radiography performed on any water vessel used for laying pipe.

“Lixiscope” means a portable light-intensified imaging device using a sealed source.

“Lock-out survey” means a radiation survey performed to verify that a sealed source is in its shielded position. The lock-out survey is performed before moving the radiographic exposure device or source changer to a new location or when securing the radiographic exposure device or source changer.

“Minimal threat” means that during the operations of electronic devices capable of generating or emitting fields of radiation:

1. No deliberate exposure of an individual occurs;
2. The radiation is not emitted in an open beam configuration; and
3. No known physical injury to an individual has occurred.

“Offshore” means within the territorial waters of the United States.

“Offshore platform radiography” means industrial radiography conducted from an offshore platform over a body of water.

“Permanent radiographic installation” means an enclosed shielded room, cell, or vault, not located at a temporary job site, in which radiography is performed.

“Practical examination” means a demonstration through practical application of the safety rules and principles in industrial radiography including use of all appropriate equipment and procedures.

“Radiation safety officer” means an individual named by the licensee or registrant who has a knowledge of, responsibility for, and authority to enforce appropriate radiation protection rules, standards, and practices on behalf of the licensee or registrant and who meets the requirements of 45.1(10)“d.”

“Radiographer” means any individual who has successfully completed the training, testing, and documentation requirements of 45.1(10)“b,” who performs or personally supervises industrial radiographic operations, and is responsible to the licensee or registrant for ensuring compliance with the requirement of these rules and all license and certificate of registration conditions.

“Radiographer certification” means written approval received from a certifying entity stating that an individual has satisfactorily met certain established radiation safety, testing, and experience criteria.

“Radiographer’s assistant” means any individual who has successfully completed the training, testing, and documentation requirements of 45.1(10)“a” and who uses sources of radiation and related handling tools or radiation survey instruments under the direct supervision of a radiographer trainer.

“Radiographer trainer (instructor)” means any individual who instructs and supervises radiographer’s assistants during on-the-job training and who meets the requirements of 45.1(10) “c.”

“Radiographic exposure device” (also called a camera or a projector) means any instrument containing a sealed source fastened or contained therein, in which the sealed source or shielding thereof may be moved or otherwise changed from a shielded to unshielded position for purposes of making a radiographic exposure, or any other X-ray industrial system whereby a permanent or semipermanent image is recorded on an image receptor by action of ionizing radiation.

“Radiographic operations” means all activities associated with the presence of radioactive sources or radiation in a radiographic exposure device during use of the device or transport (except when being transported by a common or contract transport), to include surveys to confirm the adequacy of boundaries, setting up equipment and any activity inside restricted area boundaries.

“Radiographic personnel” means any radiographer or radiographer’s assistant.

“Residential location” means any area where structures in which people lodge or live are located, and the grounds on which such structures are located including, but not limited to, houses, apartments, condominiums, and garages.

“Shielded position” means the location within the radiographic exposure device or source changer where the sealed source is secured and restricted from movement.

“Shielded-room radiography” means industrial radiography conducted in a room shielded so that radiation levels at every location on the exterior meet the limitations specified in 641—40.26(136C).

“Source assembly” means an assembly that consists of the sealed source and a connector that attaches the source to the control cable. The source assembly may also include a stop ball used to secure the source in the shielded position.

“Source changer” means a device designed and used for replacement of sealed sources in radiographic exposure devices, including those source changers also used for transporting and storage of sealed sources.

“Source container” means a shielded device in which sealed sources are secured, transported, and stored.

“Storage area” means any location, facility, or vehicle which is used to store, to transport, or to secure a radiographic exposure device, a storage container, or a sealed source when it is not in use and which is locked or has a physical barrier to prevent accidental exposure, tampering with, or unauthorized removal of the device, container, or source.

“Storage container” means a container in which sealed sources are secured and stored.

“S-tube” means a tube through which the radioactive source travels when inside a radiographic exposure device.

“Temporary job site” means any location where radiographic operations are conducted and where licensed material may be stored other than the location(s) listed in a specific license or certificate of registration.

“Trainee status card” means the document issued by the agency following completion of the requirements of 45.1(10) “a” (1) and (2).

“Transport container” means a package that is designed to provide radiation safety and security when sealed sources are transported and which meets all applicable requirements of the U.S. Department of Transportation.

“Underwater radiography” means industrial radiography performed when the radiographic exposure device and related equipment are beneath the surface of the water.

45.1(3) Exemptions.

a. Uses of certified and certifiable cabinet X-ray systems designed to exclude individuals are exempt from the requirements of this chapter, except for the requirements of 45.2(6) “b” and “c.”

b. Industrial uses of lixiscopes are exempt from the requirements in this chapter.

c. Radiation machines determined by the agency to constitute a minimal threat to human health and safety in accordance with 641—subrule 38.3(1) are exempt from the rules in this chapter, except for the requirements of this subrule.

45.1(4) Receipt, transfer, and disposal of sources of radiation. Each licensee and registrant shall maintain records showing the receipt, transfer, and disposal of sealed sources and devices using DU for

shielding and machine-produced sources of radiation. These records shall include the date, the name of the individual making the record, the radionuclide, number of curies or mass (for DU), and the make, model, and serial number of each source of radiation and device, as appropriate. Records shall be maintained for three years after they are made.

45.1(5) *Radiation survey instruments.*

a. The licensee or registrant shall maintain sufficient calibrated and operable radiation survey instruments at each location where sources of radiation are present to make physical radiation surveys as required by this chapter and 641—subrule 40.36(1). Instrumentation required by this subrule shall have a range such that 2 millirems (0.02 millisievert) per hour through 1 rem (0.01 sievert) per hour can be measured.

b. Notwithstanding the requirements of 641—subrule 40.36(3) each radiation survey instrument shall be calibrated:

(1) At energies appropriate for use and at intervals not to exceed six months and after each instrument servicing;

(2) Such that accuracy within plus or minus 20 percent of the calibration source can be demonstrated at each point checked;

(3) At 2 points located approximately 1/3 and 2/3 of full-scale on each scale for linear scale instruments; at midrange of each decade, and at 2 points of at least 1 decade for logarithmic scale instruments; and at 3 points between 2 and 1000 mrem per hour for digital instruments; and

(4) By a person licensed or registered by the agency, another agreement state, or the U.S. Nuclear Regulatory Commission to perform such service.

c. Records of these calibrations shall be maintained for three years after the calibration date for inspection by the agency.

d. Each radiation survey instrument shall be checked with a radiation source at the beginning of each day of use and at the beginning of each work shift to ensure it is operating properly.

45.1(6) *Quarterly inventory.* Each licensee shall conduct a physical inventory at intervals not to exceed three months to account for all sealed sources and radiography exposure devices received and possessed. Sources of radiation include radiographic exposure devices containing depleted uranium. The records of the inventories shall be maintained for three years from the date of the inventory for inspection by the agency and shall include: the manufacturer, model number, serial number, radionuclide, number of curies, and location of each source of radiation; number of kilograms of depleted uranium shielding; date of the inventory; and name of the individual making the inventory.

45.1(7) *Utilization logs.*

a. Each licensee shall maintain utilization logs of the use of each sealed source. The logs shall include:

(1) A unique description, which includes the make, model, and serial number of each radiographic exposure device containing a sealed source or transport or storage container in which the sealed source is located;

(2) The identity and signature of the radiographer to whom the sealed source is assigned;

(3) The plant or site where each sealed source is used and the date of use; and

(4) The date(s) each sealed source is removed from storage and returned to storage.

b. Each registrant shall maintain current logs of the use of each source of radiation. The logs shall include:

(1) A unique identification, which includes the make, model and serial number of each source of radiation;

(2) The identity of the radiographer using the source of radiation;

(3) The date(s) each source of radiation is energized or used and the number of exposures made.

c. Utilization logs may be kept on clear, legible records containing all the information required by 45.1(7) “a” or “b.” Copies of utilization logs shall be maintained for agency inspection for three years from the date of the recorded event. The records shall be kept at the location specified by the license or certificate of registration.

45.1(8) *Inspection and maintenance.*

a. Each licensee or registrant shall perform visual and operability checks on survey meters, radiographic exposure devices, transport and storage containers, associated equipment and source changers before use on each day the equipment is to be used to ensure that the equipment is in good working condition, that the sources are adequately shielded, and that required labeling is present. Survey instrument operability must be performed using check sources or other appropriate means.

b. Each licensee or registrant shall have written procedures and conduct a program, at intervals not to exceed three months, or prior to the first use thereafter, of inspection and maintenance of radiation machines, radiographic exposure devices, transport and storage containers, source changers, survey instruments, and associated equipment to ensure proper functioning of components important to safety. All appropriate parts shall be maintained in accordance with manufacturer's specifications. Replacement components shall meet design specifications. This program shall cover, as a minimum, the items in Appendix B of this chapter.

c. Each licensee shall have a program and written procedures for the inspection and maintenance necessary to maintain the Type B packaging used to transport radioactive materials. The program must include procedures to ensure that Type B packages are shipped and maintained in accordance with the certificate of compliance or other approval.

d. If equipment problems are found, the equipment must be removed from service until repaired.

e. The record of equipment problems and of any maintenance performed under 45.1(8) must be retained for three years after the record is made. The record must include the date of check or inspection, name of inspector, equipment involved, any problems found, and what repair or maintenance, if any, was performed.

45.1(9) *Permanent radiographic installations.* Permanent radiographic installations having high radiation area entrance controls of the type described in 641—paragraphs 40.42(1) “b” and “c” shall also meet the following requirements:

a. Each entrance that is used for personnel access to the high radiation area shall have both visible and audible warning signals to warn of the presence of radiation. The visible signal shall be activated by radiation. The audible signal shall be activated when an attempt is made to enter the installation while the source is exposed.

b. The control device or alarm system shall be tested for proper operation at the beginning of each day of equipment use. If a control device or alarm system is operating improperly, it shall be immediately labeled as defective and repaired before industrial radiographic operations are resumed. Records of these tests shall be maintained for inspection by the agency for three years from the date of the event.

45.1(10) *Training and testing for radiographic personnel.*

a. Radiographer's assistant requirements. No licensee or registrant shall permit any individual to act as a radiographer's assistant, as defined in this chapter, until:

(1) It has been documented on the appropriate agency form or equivalent that such individual has received copies of and has demonstrated an understanding of:

1. The subjects outlined in Appendix A, presented in a 40-hour course approved by the agency, another agreement state, or the U.S. Nuclear Regulatory Commission;

2. The rules contained in this chapter and the applicable sections of 641—Chapter 38, the applicable U.S. Department of Transportation and NRC transportation regulations in 641—Chapter 39, and 641—Chapter 40;

3. The appropriate conditions of license(s) or certificate(s) of registration;

4. The licensee's or registrant's operating and emergency procedures;

5. And developed competence to use, under the personal supervision of the radiographer, the licensee's or registrant's radiographic exposure devices, sealed sources, associated equipment, and radiation survey instruments that the assistant will use;

6. And has demonstrated competence in the use of radiographic exposure devices, sources, survey instruments and associated equipment described in 45.1(10) “a”(1) by successful completion of a practical examination covering this material.

(2) The individual possesses a current agency-issued trainee status card issued after completion of 45.1(10)“a”(1). Trainee status will be granted only once for each individual and is valid for no longer than two years.

b. Radiographer requirements. No licensee or registrant shall permit any individual to act as a radiographer:

(1) Until it has been documented to the agency that such individual:

1. Has completed the requirements of 45.1(10)“a”(1);

2. Has completed on-the-job training as a radiographic trainee supervised by one or more radiographic trainers. The on-the-job training shall be documented on the appropriate agency form or equivalent and shall include a minimum of two months (320 hours) of active participation in the performance of industrial radiography utilizing radioactive material or one month (160 hours) of active participation in the performance of industrial radiography utilizing radiation machines, or both. Individuals performing industrial radiography utilizing radioactive materials and radiation machines must complete both segments of the on-the-job training (three months or 480 hours). Active participation does not include safety meetings or classroom training;

3. Has demonstrated competence in the use of sources of radiation, radiographic exposure devices, related handling tools, and radiation survey instruments which may be employed in industrial radiographic assignments by successful completion of a practical examination covering this material;

(2) Unless the individual has successfully completed within the last five years the appropriate agency-administered examination prescribed in 45.1(10)“f”(2) or equivalent examination; and

(3) Unless the individual possesses a current I.D. card.

c. Radiographer trainer. No individual shall act as a radiographer trainer unless such individual:

(1) Has met the requirements of 45.1(10)“a”(1) and “b”;

(2) Has one year of documented experience as an industrial radiographer and possesses a current ID card issued at least one year prior to the application for a trainer card; and

(3) Is named on the specific license or certificate of registration issued by the agency and under which an individual is acting as a radiographer trainer, or

(4) Possesses a valid radiographer trainer card issued by the agency.

d. Radiation safety officer. The radiation safety officer shall ensure that radiation safety activities are being performed in accordance with approved procedures and regulatory requirements in the daily operation of the licensee’s program.

(1) A radiation safety officer (RSO) shall be designated for every industrial radiography license and certificate of registration issued by the agency.

(2) The RSO’s qualifications shall include:

1. Possession of a high school diploma or a certificate of high school equivalency based on the GED test;

2. Completion of the training and testing requirements of 45.1(10)“a”(1) and 45.1(10)“b”(1)“3,” (2), and (3);

3. 2000 hours of hands-on experience as a qualified radiographer in industrial radiographic operations; and

4. Formal training in the establishment and maintenance of a radiation protection program.

The agency will consider alternatives when the RSO has either appropriate training or experience, or both, in the field of ionizing radiation and, in addition, has adequate formal training with respect to the establishment and maintenance of a radiation safety protection program.

(3) The specific duties of the RSO include, but are not limited to, the following:

1. To establish and oversee operating, emergency, and ALARA procedures and to review them regularly to ensure that the procedures are current and conform with these rules;

2. To oversee and approve all phases of the training program for radiographic personnel so that appropriate and effective radiation protection practices are taught;

3. To ensure that required radiation surveys and leak tests are performed and documented in accordance with these rules, including any corrective measures when levels of radiation exceed established limits;

4. To ensure that personnel monitoring devices are calibrated and used properly by occupationally exposed personnel, that records are kept of the monitoring results, and that timely notifications are made as required by 641—Chapter 40;

5. To ensure that any required interlock switches and warning signals are functioning and that radiation signs, ropes, and barriers are properly posted and positioned;

6. To investigate and report to the agency each known or suspected case of radiation exposure to an individual or radiation level detected in excess of limits established by these rules and each theft or loss of source(s) of radiation, to determine the cause, and to take steps to prevent its recurrence;

7. To have a thorough knowledge of management policies and administrative procedures of the licensee or registrant;

8. To assume control and have the authority to institute corrective actions including shutdown of operations when necessary in emergency situations or unsafe conditions;

9. To maintain records as required by these rules (see Appendix C);

10. To ensure the proper storing, labeling, transport, and use of exposure devices and sources of radiation;

11. To ensure that quarterly inventory and inspection and maintenance programs are performed in accordance with 45.1(6), 45.1(8), 45.2(3), and 45.3(6) “b”;

12. To ensure that personnel are complying with these rules, the conditions of the license or the registration, and the operating and emergency procedures of the licensee or registrant; and

13. To ensure that annual refresher safety training has been provided for each radiographer and radiographer’s assistant at intervals not to exceed 12 months.

e. Training and testing records. Each licensee and registrant shall maintain, for agency inspection, training and testing records which demonstrate that the applicable requirements of 45.1(10) “a” and “b” are met. Records of training for all industrial radiographic personnel must include personnel certification documents and verification of certification status, copies of written tests, dates of oral and practical examinations, and names of individuals conducting and receiving the oral and practical examinations. Records of annual refresher training and semiannual inspection of job performance for all industrial radiographic personnel must list the topics discussed during the refresher safety training, the dates the annual refresher safety training was conducted, and names of the instructors and attendees. For inspections of job performance, the records must also include a list showing the items checked and any noncompliances observed by the RSO. Records shall be maintained until disposal is authorized by the agency. The agency shall not release records for disposal unless the records have been maintained at least three years.

f. Applications and examinations.

(1) Application.

1. An application for taking the examination shall be on forms prescribed and furnished by the agency along with the fee required in 641—subrule 38.8(3). The application shall be submitted only after the training requirements of 45.1(10) “a” and “b” have been completed.

2. An individual whose I.D. card has been suspended or revoked shall obtain prior approval from the agency to apply to take the examination.

(2) Examination. The examination shall be given for the purpose of determining the qualifications of applicants.

1. A written examination shall be held at such times and places as the agency shall determine. The scope of the examination and the methods of procedure, including determination of the passing score, shall be prescribed by the agency. The examination will emphasize the applicant’s ability to safely use sources of radiation and related equipment and the applicant’s knowledge of these rules.

2. A candidate failing an examination may apply for reexamination in accordance with 45.1(10) “f”(1) and will be reexamined. A candidate shall not retake the same version of the agency-administered examination.

3. The examination will be held at locations designated by the agency. The examination shall normally be offered quarterly. Dates, times, and locations of the examinations will be provided by the agency.

4. The examination will be in the English language.
5. To take the examination, an individual shall have a picture identification card (such as an Iowa driver's license) at the time of the examination.
6. Calculators will be permitted during the examination; however, calculators or computers with preprogrammed data or formulas, including exposure calculations, will not be permitted.
7. The examination will be a "closed book" examination.
8. Examination material shall be returned to the agency at the end of the examination. No photographic or other copying of examination questions or materials shall be permitted. Disclosure by any individual of the contents of any examination prior to the administration is prohibited.
9. Any individual observed by an agency proctor to be compromising the integrity of the examination shall be required to surrender the examination, the answer sheet, and any work paper. Such individual will not be allowed to complete the examination, will forfeit the examination fee, and will leave the examination site to avoid disturbing other examinees. Such individual may resubmit an application and an additional examination fee to take the examination not earlier than three months later.
10. The names and scores of individuals taking the examination shall be a public record.
 - g. Identification procedures.
 - (1) I.D. card.
 1. An I.D. card shall be issued to each person who successfully completes the requirements of 45.1(10) "b" and the examination prescribed in 45.1(10) "f"(2) or an equivalent examination.
 2. Each person's I.D. card shall contain the person's photograph.
 3. The I.D. card remains the property of the state of Iowa and may be revoked or suspended under the provisions of 45.1(10) "h."
 4. Any individual who wishes to replace the I.D. card shall submit to the agency a written request for a replacement I.D. card, stating the reason a replacement I.D. card is needed and the fee required in 641—subrule 38.8(3). The individual shall maintain in possession a copy of the request while performing industrial radiographic operations until a replacement I.D. card is received from the agency.
 - (2) Expiration of I.D. card. Each I.D. card expires at the end of the day, in the month and year stated on the I.D. card.
 - (3) Renewal of I.D. card.
 1. Applications for examination to renew an I.D. card shall be filed in accordance with 45.1(10) "f"(1).
 2. The examination for renewal of an I.D. card shall be administered in accordance with 45.1(10) "f"(2).
 3. A renewed I.D. card shall be issued in accordance with 45.1(10) "g"(1).
 - h. Revocation or suspension of an I.D. card.
 - (1) Any radiographer who violates these rules may be required to show cause at a formal hearing why the I.D. card should not be revoked or suspended.
 - (2) When an agency order has been issued for an industrial radiographer to cease and desist from the use of radioactive material or revoking or suspending the I.D. card, the industrial radiographer shall surrender the I.D. card to the agency until such time as the order is changed or the suspension expires.
 - (3) An agency's inspector may, in certain instances, confiscate any radiographer's I.D. card on the spot while conducting an inspection or investigation. If the inspector determines that the activities being conducted by the radiographer are significant enough to be classified as severity I, II, or III, as specified in 641—38.5(136C), and after obtaining the approval of agency management, the inspector may take any radiographer's I.D. card. The agency will then issue a cease and desist order to the radiographer's employer, forward the I.D. card(s) to the issuing entity, and notify the U.S. Nuclear Regulatory Commission and other agreement states.
 - i. Exemptions. Any person using a source of radiation to determine the presence of explosives in a package or the authenticity of a piece of art is exempt from the provisions of 45.1(10) "a" to "h."
 - j. Reciprocity.
 - (1) Reciprocal recognition by the agency of an individual radiographer certification will be granted provided that:

1. The individual holds a valid certification in the appropriate category and class issued by a certifying entity as defined in 45.1(2).

2. The requirements and procedures of the certifying entity issuing the certification require the same or comparable certification standards as those required by 45.1(10)“a” through “e”; and

3. The individual submits a legible copy of the certification to the agency prior to entry into Iowa.

(2) Enforcement actions with the agency, another agreement state, or the U.S. Nuclear Regulatory Commission or any sanctions by an independent certifying entity may be considered when reviewing a request for reciprocal recognition from a licensee, registrant, or certified radiographer.

(3) Certified radiographers who are granted reciprocity by the agency shall maintain the certification upon which the reciprocal recognition was granted, or prior to the expiration of such certification, shall meet the requirements of 45.1(10)“b.”

45.1(11) Internal audits. Except as provided in 45.1(11)“c,” the RSO or designee shall conduct an inspection program of the job performance of each radiographer and radiographer’s assistant to ensure that these rules, license requirements, and the licensee’s or registrant’s operating and emergency procedures are followed. The inspection program must:

a. Include observation of the performance of each radiographer and radiographer’s assistant during an actual industrial radiographic operation, at intervals not to exceed six months; and

b. Provide that, if a radiographer or radiographer’s assistant has not participated in an industrial radiographic operation for more than six months since the last audit, the radiographer or radiographer’s assistant must demonstrate understanding of the subjects contained in Appendix A of this chapter by a practical examination before the individual can next participate in a radiographic operation.

c. The agency may consider alternatives in those situations where the individual serves as both radiographer and RSO. In those operations where a single individual serves as both radiographer and RSO, and performs all radiography operations, an inspection program is not required.

d. Records of audits shall be maintained by the licensee or registrant for agency inspection for three years from the date of the audit.

45.1(12) Personnel monitoring control.

a. The personnel monitoring program shall meet the applicable requirements of 641—Chapter 40.

b. When performing industrial radiographic operations:

(1) No licensee or registrant shall permit an individual to act as a radiographer, radiographer’s assistant, or radiographer trainer unless at all times during radiographic operations each individual wears, on the trunk of the body, a combination of direct-reading pocket dosimeter, an operating alarm ratemeter, and a film badge, an optically stimulated luminescent device (OSL device) or a thermoluminescent dosimeter (TLD) that is processed and evaluated by an accredited National Voluntary Laboratory Accreditation Program (NVLAP). For permanent radiographic installations where other appropriate alarming or warning devices are in routine use, the wearing of an alarm ratemeter is not required.

(2) Pocket dosimeters or electronic personal dosimeters shall meet the criteria in ANSI N322-1977 and shall have a range of zero to at least 200 millirems. Electronic personal dosimeters may only be used in place of ion-chamber pocket dosimeters.

(3) Pocket dosimeters or electronic personal dosimeters shall be recharged at the start of each work shift.

(4) Pocket dosimeters or electronic personal dosimeters shall be read and exposures recorded at the beginning and at the end of each work shift, and before each recharging.

(5) If an individual’s pocket dosimeter is discharged beyond its range (i.e., goes “off scale”), or if the electronic personal dosimeter reads greater than 200 millirem (2 millisievert), and the possibility of radiation exposure cannot be ruled out as the cause, industrial radiographic operations by that individual shall cease and the individual’s film badge, OSL device, or TLD shall be within 24 hours sent for processing. The individual shall not return to work with sources of radiation until a determination of the radiation exposure has been made. This determination must be made by the RSO or the RSO’s designee. The results of this determination must be included in the exposure records maintained in accordance with 641—Chapter 40.

(6) Each individual monitoring device shall be assigned to and worn by only one individual.

(7) Film badges, OSL devices and TLDs must be replaced at least monthly.

(8) If an individual monitoring device is lost or damaged, the worker shall cease work immediately until a replacement individual monitoring device is provided and the exposure is calculated for the time period from issuance to loss or damage of the individual monitoring device. The results of the calculated exposure and the time period for which the individual monitoring device was lost or damaged must be included in the records maintained in 45.1(12)“c.”

c. Records of pocket dosimeter readings of personnel exposures and yearly operability checks required in 45.1(12)“d” shall be maintained for three years by the licensee or registrant for agency inspection. If the dosimeter readings were used to determine external radiation dose (i.e., no TLD or film badge exposure records exist), the records shall be maintained for three years after they are recorded. Records of estimates of exposures as a result of off-scale personal direct reading dosimeters, or lost or damaged film badges, OSLs, or TLDs, shall be maintained until the agency terminates the license.

d. Pocket dosimeters shall be checked for correct response to radiation at periods not to exceed one year. Acceptable dosimeters shall read within plus or minus 20 percent of the true radiation exposure. Records of this check shall be maintained for inspection by the agency for three years from the date of the event.

e. Reports received from the film badge, OSL device or TLD processor shall be kept for inspection by the agency until the agency terminates the license.

f. Each alarm ratemeter must:

(1) Be checked to ensure that the alarm functions properly (sounds) prior to use at the start of each shift. Records of alarm function checks shall be maintained for two years by the licensee or registrant for agency inspection;

(2) Be set to give an alarm signal at a preset dose rate of 500 mR/hr;

(3) Require special means to change the preset alarm function; and

(4) Be calibrated at periods not to exceed one year for correct response to radiation: Acceptable ratemeters must alarm within plus or minus 20 percent of the true radiation dose rate. Records of the alarming ratemeter calibrations shall be maintained for three years by the licensee or registrant for agency inspection.

45.1(13) *Supervision of radiographer's assistant.* Whenever a radiographer's assistant uses radiographic exposure devices, sealed sources or associated equipment or conducts radiation surveys required by 45.2(5) or 45.3(7) to determine that the sealed source has returned to the shielded position after an exposure, the radiographer's assistant shall be under the direct supervision of a radiographer instructor. The direct supervision must include:

a. The radiographer's physical presence at the site where the source(s) of radiation is being used;

b. The availability of the radiographer to give immediate assistance if required; and

c. The radiographer's direct observation of the radiographer's assistant's performance of the operations referred to in this subrule.

45.1(14) *Access control.*

a. During each industrial radiographic operation, a radiographer or radiographer's assistant shall maintain continuous, direct visual surveillance of the operation to protect against unauthorized entry into a restricted area, radiation area or high radiation area, except at permanent radiographic installations where all entryways are locked to protect against unauthorized or accidental entry and the requirements of 45.1(9) are met.

b. Radiographic exposure devices shall not be left unattended except when in storage or physically secured against unauthorized removal.

45.1(15) *Posting.*

a. Notwithstanding any provisions in 641—subrule 40.62(1) areas in which radiography is being performed shall be conspicuously posted as required by 641—subrules 40.61(1) and 40.61(2).

b. Whenever practicable, ropes or barriers shall be used in addition to appropriate signs to designate areas in accordance with 641—subrule 40.26(1) and to help prevent unauthorized entry.

c. During pipeline industrial radiography operations, sufficient radiation signs and other barriers shall be posted to prevent unmonitored individuals from entering the radiation area.

d. Notwithstanding the requirements of 45.1(15)“a,” a restricted area may be established in accordance with 641—subrule 40.26(1) and may be posted in accordance with 641—subrules 40.61(1) and 40.61(2), i.e., both signs may be posted at the same location at the boundary of the restricted area.

45.1(16) Temporary job site requirements.

a. Documents and records. Each licensee or registrant conducting industrial radiography at a temporary job site shall have the following records available at that site for inspection by the agency:

- (1) Appropriate license or certificate of registration or equivalent document;
- (2) The appropriate operating and emergency procedures;
- (3) The applicable agency rules;
- (4) Survey records required pursuant to 45.2(5)“d” and 45.3(7)“j” for the period of operation at the site;
- (5) Daily pocket dosimeter records for the period of operation at the site;
- (6) The daily alarming ratemeter records for the period of operation at the site; and
- (7) The latest radiation survey instrument calibration and leak test records for specific devices and sealed sources in use at the site. Acceptable records include tags or labels which are affixed to the device or survey meter and decay charts for sources which have been manufactured within the last six months.

b. Reserved.

45.1(17) Specific requirements for radiographic personnel performing industrial radiography.

a. At a job site, the following shall be supplied by the licensee or registrant:

- (1) At least one operable, calibrated radiation survey instrument;
- (2) A current whole body personnel monitor (TLD, OSL device or film badge) for each individual;
- (3) An operable, calibrated pocket dosimeter with a range of 0 to 200 milliroentgens (5.16×10^{-5} C/kg) for each worker; and
- (4) An operable, calibrated alarm ratemeter for each worker; and
- (5) The appropriate barrier ropes and signs.

b. Each radiographer at a job site shall possess a valid I.D. card.

c. Each radiographer’s assistant at a job site shall possess a valid trainee status card issued by the agency.

d. Industrial radiographic operations shall not be performed if any of the items in 45.1(17)“a,” “b,” and “c” are not available at the job site or are inoperable.

e. No individual other than a radiographer or a radiographer’s assistant who is under the direct supervision of a radiographer trainer shall manipulate controls or operate equipment used in industrial radiographic operations.

f. During an inspection by the agency, the agency inspector may terminate an operation if any of the items in 45.1(17)“a” are not available and operable or if the required number of radiographic personnel are not present. Operations shall not be resumed until such conditions are met.

45.1(18) Notifications.

a. The agency shall be notified of thefts or losses of sources of radiation, overexposures, and excessive levels in accordance with 641—40.95(136C) and 641—40.97(136C).

b. Each licensee or registrant shall submit a written report within 30 days to the agency whenever one of the following events occurs:

- (1) The source assembly cannot be returned to the fully shielded position and properly secured;
- (2) The source assembly becomes disconnected from the drive cable;
- (3) The failure of any component (critical to safe operation of the radiographic exposure device) to properly perform its intended function; or
- (4) An indicator on a radiation-producing machine fails to show that radiation is being produced or an exposure switch fails to terminate production of radiation when turned to the off position.

c. The licensee or registrant shall include the following information in each report submitted in accordance with 45.1(18)“b”:

- (1) A description of the equipment problem;
- (2) Cause of each incident, if known;
- (3) Manufacturer and model number of equipment involved in the incident;

- (4) Location, time, and date of the incident;
- (5) Actions taken to establish normal operations;
- (6) Corrective actions taken or planned to prevent recurrence; and
- (7) Names of personnel involved in the incident.

d. Any licensee conducting radiographic operations or storing radioactive material at any location not listed on the license for a period in excess of 180 days in a calendar year shall notify the agency prior to exceeding the 180 days.

45.1(19) *Copies of operating and emergency procedures.* Each licensee or registrant shall maintain a copy of current operating and emergency procedures until the agency terminates the license. Superseded material must be retained for three years after the change is made.

[ARC 8982B, IAB 8/11/10, effective 9/15/10; ARC 1639C, IAB 10/1/14, effective 11/5/14; ARC 3746C, IAB 4/11/18, effective 5/16/18; ARC 5059C, IAB 6/17/20, effective 7/22/20]

641—45.2(136C) Radiation safety requirements for the use of radiation machines in industrial radiography.

45.2(1) *Locking of sources of radiation.* The control panel of each radiation machine shall be equipped with a locking device that will prevent the unauthorized use of an X-ray system or the accidental production of radiation. The radiation machine shall be kept locked and the key removed at all times except when under the direct visual surveillance of a radiographer.

45.2(2) *Permanent storage precautions.* Radiation machines shall be secured while in storage to prevent tampering or removal by unauthorized individuals.

45.2(3) *Requirements for radiation machines used in industrial radiographic operations.*

a. Equipment used in industrial radiographic operations involving radiation machines manufactured after January 1, 1992, shall be certified at the time of manufacture to meet the criteria set forth by ANSI N537-1976.

b. The registrant's name and city or town where the main business office is located shall be prominently displayed with a durable, clearly visible label(s) on all vehicles used to transport radiation machines for temporary job site use.

45.2(4) *Operating and emergency procedures.*

a. The registrant's operating and emergency procedures shall include instructions in at least the following:

- (1) Operation and safety instruction on the radiation machine(s) to be used;
- (2) Methods and occasions for conducting radiation surveys;
- (3) Methods for controlling access to radiographic areas;
- (4) Methods and occasions for locking and securing sources of radiation;
- (5) Personnel monitoring and the use of personnel monitoring equipment, including steps that must be taken immediately by radiography personnel in the event a pocket dosimeter is found to be off-scale;
- (6) Minimizing exposure of individuals in the event of an accident;
- (7) The procedure for notifying proper personnel in the event of an accident;
- (8) Maintenance of records; and
- (9) Inspection and maintenance of radiation machines.

b. Each registrant shall provide, as a minimum, two radiographic personnel when radiation machines are used for any industrial radiography conducted other than at a permanent radiographic installation (shielded room, bay, or bunker). If one of the personnel is a radiographer's assistant, the other shall be a radiographer trainer authorized by the certificate of registration.

c. No individual other than a radiographer or a radiographer's assistant who is under the direct supervision of a radiographer trainer shall manipulate controls or operate equipment used in industrial radiographic operations.

d. Rescinded IAB 4/8/98, effective 7/1/98.

45.2(5) *Radiation surveys and survey records.*

a. No radiographic operation shall be conducted unless calibrated and operable radiation survey instrumentation, as described in 45.1(5), is available and used at each site where radiographic exposures are made.

b. A physical radiation survey shall be made after each radiographic exposure using radiation machines to determine that the machine is “off.”

c. All potential radiation areas where industrial radiographic operations are to be performed shall be posted in accordance with 45.1(15), based on calculated dose rates, before industrial radiographic operations begin. An area survey shall be performed during the first radiographic exposure to confirm that 45.1(15) requirements have been met and that unrestricted areas do not have radiation levels in excess of the limits specified in 641—subrule 40.26(1).

d. Records shall be kept of the surveys required by 45.2(5) “b” and “c.” Such records shall be maintained for inspection by the agency for two years after completion of the survey. If the survey was used to determine an individual’s exposure, however, the records of the survey shall be maintained until the agency authorizes their disposition.

45.2(6) *Special requirements and exemptions for enclosed radiography.*

a. Systems for enclosed radiography, including shielded-room radiography and cabinet radiography, designed to allow admittance of individuals shall:

(1) Comply with all applicable requirements of this chapter and 641—subrule 40.26(1). If such a system is a certified cabinet X-ray system, it shall comply with all applicable requirements of this chapter and 21 CFR 1020.40.

(2) Be evaluated at intervals not to exceed one year to ensure compliance with the applicable requirements as specified in 641—subrule 40.26(1). Records of these evaluations shall be maintained for inspection by the agency for a period of three years after the evaluation.

b. Certified and certifiable cabinet X-ray systems are exempt from the requirements of this chapter except that:

(1) Operating personnel must be provided with individual monitoring devices in accordance with the appropriate provisions of 641—40.37(136C).

(2) No registrant shall permit any individual to operate a cabinet X-ray system until such individual has received a copy of and instruction in the operating procedures for the unit and has demonstrated competence in its use. Records which demonstrate compliance with this subparagraph shall be maintained for inspection by the agency until disposition is authorized by the agency.

(3) Tests for proper operation of interlocks used to control entry to the high radiation area or alarm systems, where applicable, shall be conducted and recorded every three months. Records of these tests shall be maintained for agency inspection until disposal is authorized by the agency.

(4) The registrant shall perform an evaluation, at intervals not to exceed one year, to determine conformance with 641—subrule 40.26(1). If such a system is a certified cabinet X-ray system, it shall be evaluated at intervals not to exceed one year to determine conformance with 21 CFR 1020.40. Records of these evaluations shall be maintained for inspection by the agency for a period of two years after the evaluation.

c. Certified cabinet X-ray systems shall be maintained in compliance with 21 CFR 1020.40 unless prior approval has been granted by the agency pursuant to 641—38.3(136C).

45.2(7) *Registration for industrial radiographic operations.*

a. Radiation machines used in industrial radiographic operations shall be registered in accordance with 641—Chapter 39.

b. In addition to the registration requirements in 641—Chapter 39, an application for a certificate of registration shall include the following information:

(1) A schedule or description of the program for training radiographic personnel which specifies:

1. Initial training,
2. Periodic training,
3. On-the-job training, and

4. Methods to be used by the registrant to determine the knowledge, understanding, and ability of radiographic personnel to comply with agency rules, registration requirements, and the operating and emergency procedures of the applicant.

(2) Written operating and emergency procedures, including all items listed in Appendix D.

(3) A description of the internal inspection system or other management control to ensure that radiographic personnel follow registration provisions, rules of the agency, and the applicant's operating and emergency procedures.

(4) A list of permanent radiographic installations and descriptions of permanent storage and use locations.

(5) A description of the organization of the industrial radiographic program, including delegations of authority and responsibility for operation of the radiation safety program.

c. A certificate of registration will be issued if the requirements of 641—Chapter 39 and this subrule are met.

641—45.3(136C) Radiation safety requirements for use of sealed sources of radiation in industrial radiography.

45.3(1) *Limits on external radiation levels from storage containers and source changers.* The maximum exposure rate limits for storage containers and source changers are 200 millirem (2 millisieverts) per hour at any exterior surface, and 10 millirem (0.1 millisievert) per hour at 1 meter from any exterior surface with the sealed source in the shielded position.

45.3(2) *Locking of sources of radiation.*

a. Each source of radiation shall be provided with a lock or lockable outer container designed to prevent unauthorized or accidental removal of the sealed source. Either the exposure device or its container must be kept locked and, if applicable, the key removed, at all times when not under the direct surveillance of a radiographer or a radiographer's assistant except at permanent radiographic installations as stated in 45.1(14). Each sealed source storage container and source changer must have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. Storage containers and source changers must be kept locked (and if the lock is a keyed lock, with the key removed at all times) when containing sealed sources except when the container is under the direct surveillance of a radiographer or radiographer's assistant.

b. Radiographic exposure devices, source changers, and storage containers, prior to being moved from one location to another and also prior to being secured at a given location, shall be locked and surveyed to ensure that the sealed source is in the shielded position.

c. The sealed source shall be secured in its shielded position by locking the exposure device or securing the remote control each time the sealed source is returned to its shielded position. Then a survey shall be performed to determine that the sealed source is in the shielded position pursuant to 45.3(7) "b."

45.3(3) *Storage precautions.*

a. Labeling, storage, and transportation.

(1) The licensee may not use a source changer or a container to store licensed material unless the source changer or the storage container has securely attached to it a durable, legible, and clearly visible label bearing the standard trefoil radiation caution symbol in conventional colors, i.e., magenta, purple or black on a yellow background, having a minimum diameter of 25 mm, and the wording: "CAUTION RADIOACTIVE MATERIAL, NOTIFY CIVIL AUTHORITIES (or name of company)" or "DANGER RADIOACTIVE MATERIAL, NOTIFY CIVIL AUTHORITIES (or name of company)."

(2) The licensee may not transport licensed material unless the material is packaged, and the package is labeled, marked, and accompanied with appropriate shipping papers in accordance with 641—39.5(136C).

(3) Locked radiographic exposure devices and storage containers must be physically secured to prevent tampering or removal by unauthorized personnel. The licensee shall store licensed material in a manner which will minimize danger from explosion or fire.

(4) The licensee shall lock and physically secure the transport package containing licensed material in the transporting vehicle to prevent accidental loss, tampering, or unauthorized removal of the licensed material from the vehicle.

b. Radiographic exposure devices, source changers, or storage containers that contain radioactive material shall not be stored in residential locations. This requirement does not apply to storage of radioactive material in a vehicle in transit for use at temporary job sites, if the licensee complies with 45.3(3) "c," and if the vehicle does not constitute a permanent storage location as described in 45.1(9).

c. If a vehicle is to be used for storage of radioactive material, a vehicle survey shall be performed after securing radioactive material in the vehicle and before transport to ensure that radiation levels do not exceed the limits specified in 641—subrule 40.26(1) at the exterior surface of the vehicle.

d. A storage or use location is permanent if radioactive material is stored at the location for more than 90 days and any one or more of the following applies to the location:

- (1) Telephone service is established by the licensee;
- (2) Industrial radiographic services are advertised for or from the location;
- (3) Industrial radiographic operations are conducted at other sites due to arrangements made from the location.

45.3(4) *Performance requirements for radiography equipment.* Equipment used in industrial radiographic operations must meet the following minimum criteria:

a. Each radiographic exposure device, source assembly or sealed source, and all associated equipment must meet the requirements specified in American National Standard N432-1980, “Radiological Safety for the Design and Construction of Apparatus for Gamma Radiography” (published as NBS Handbook 136, issued January 1981). This publication has been approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. This publication may be purchased from the American National Standards Institute, Inc., 25 West 43rd Street, New York, New York 10036, telephone (212)642-4900.

b. In addition to the requirements specified in paragraph “a” of this subrule, the following requirements apply to radiographic exposure devices, source changers, source assemblies, sealed sources, and associated equipment.

(1) Each radiographic exposure device must have attached to it by the user a durable, legible, clearly visible label bearing the:

1. Chemical symbol and mass number of the radionuclide in the device;
2. Activity and the date on which this activity was last measured;
3. Model number (or product code) and serial number of the sealed source;
4. Manufacturer’s identity of the sealed source; and
5. Licensee’s name, address, and telephone number.

(2) Radiographic exposure devices intended for use as Type B transport containers must meet the applicable requirements of 641—39.5(136C).

(3) Modification of any radiographic exposure devices, source changers, and source assemblies and associated equipment is prohibited, unless the design of any replacement component, including source holder, source assembly, controls or guide tubes would not compromise the design safety features of the system.

c. In addition to the requirements specified in paragraphs “a” and “b” of this subrule, the following requirements apply to radiographic exposure devices, source assemblies, and associated equipment that allow the source to be moved out of the device for radiographic operation or source changing:

(1) The coupling between the source assembly and the control cable must be designed in such a manner that the source assembly will not become disconnected if cranked outside the guide tube. The coupling must be such that it cannot be unintentionally disconnected under normal and reasonably foreseeable abnormal conditions;

(2) The device must automatically secure the source assembly when it is cranked back into the fully shielded position within the device. This securing system may only be released by means of a deliberate operation on the exposure device;

(3) The outlet fittings, lock box, and drive cable fittings on each radiographic exposure device must be equipped with safety plugs or covers which must be installed during storage and transportation to protect the source assembly from water, mud, sand, or other foreign matter;

(4) Each sealed source or source assembly must have attached to it or engraved in it, a durable, legible, visible label with the words: “DANGER—RADIOACTIVE.” The label must not interfere with safe operation of the exposure device or associated equipment;

(5) The guide tube must be able to withstand a crushing test that closely approximates the crushing forces that are likely to be encountered during use, and be able to withstand a kinking resistance test that closely approximates the kinking forces that are likely to be encountered during use;

(6) Guide tubes must be used when moving the source out of the device;

(7) An exposure head or similar device designed to prevent the source assembly from passing out of the end of the guide tube must be attached to the outermost end of the guide tube during radiographic operations;

(8) The guide tube exposure head connection must be able to withstand the tensile test for control units specified in ANSI N432-1980;

(9) Source changers must provide a system for ensuring that the source will not be accidentally withdrawn from the changer when connecting or disconnecting the drive cable to or from a source assembly.

d. All newly manufactured radiographic exposure devices and associated equipment acquired by licensees after January 10, 1992, must comply with the requirements of this subrule.

e. All radiographic exposure devices and associated equipment in use after January 10, 1996, must comply with the requirements of this subrule.

f. Notwithstanding the requirements of 45.3(4)“a,” equipment used in industrial radiographic operations need not comply with § 8.9.2(c) of the Endurance Test in American National Standards Institute N432-1980, if the prototype equipment has been tested using a torque value representative of the torque that an individual using the radiography equipment can realistically exert on the lever or crankshaft of the drive mechanism.

g. Engineering analysis may be submitted by an applicant or licensee to demonstrate the applicability of previously performed testing on similar individual radiography equipment components. Upon review, the agency may find this an acceptable alternative to actual testing of the component pursuant to the above-referenced standard.

45.3(5) *Leak testing, repair, tagging, opening, modification, and replacement of sealed sources.*

a. The replacement of any sealed source fastened to or contained in a radiographic exposure device and leak testing, repair, tagging, opening, or any other modification of any sealed source shall be performed only by persons specifically authorized to do so by the agency, the U.S. Nuclear Regulatory Commission, or an agreement state.

b. Leak testing requirements.

(1) Each licensee that uses a sealed source shall have the source tested for leakage at intervals not to exceed 6 months. The leak testing of the source must be performed using a method approved by this agency. The wipe sample should be taken from the nearest accessible point to the sealed source where contamination might accumulate. The wipe sample must be analyzed for radioactive contamination. The analysis must be capable of detecting the presence of 0.005 microcuries (185 Bq) of radioactive material on the test sample and must be performed by a person specifically authorized by this agency to perform the analysis.

(2) The licensee shall maintain records of the leak tests results for sealed sources and devices containing depleted uranium (DU). The results must be stated in units of microcuries (becquerels). The licensee shall retain each record for three years after it is made or until the source in storage is removed.

(3) Unless a sealed source is accompanied by a certificate from the transferor that shows that it has been leak tested within 6 months before the transfer, it may not be used by the licensee until tested for leakage. Sealed sources that are in storage and not in use do not require leak testing, but must be tested before use or transfer to another person if the interval of storage exceeds 6 months.

c. Any test conducted under this subrule which reveals the presence of 0.005 microcuries (185 Bq) or more of removable radioactive material must be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw from use the equipment involved and shall have it decontaminated and repaired or disposed of in accordance with agency rules. Within five days after obtaining the results of the test, the licensee shall file a report with the agency describing the equipment involved, the test results, and the corrective action taken.

d. Each exposure device using DU shielding and an “S” tube configuration must be tested for DU contamination at intervals not to exceed 12 months. The analysis must be capable of detecting the presence of 0.005 microcuries (185 Bq) of radioactive material on the test sample and must be performed by a person specifically authorized by the agency to perform the analysis. Should such testing reveal the presence of 0.005 microcuries (185 Bq) or more of removable DU contamination, the exposure device must be removed from use until an evaluation of the wear on the S-tube has been made. Should the evaluation reveal that the S-tube is worn through, the device may not be used again. DU-shielded devices do not have to be tested for DU contamination while in storage and not in use. Before using or transferring such a device, however, the device must be tested for DU contamination if the interval of storage exceeds 12 months.

e. Each radiographic exposure device shall have permanently attached to it a durable label which has, as a minimum, the instruction: “Danger—Radioactive Material—Do Not Handle—Notify Civil Authorities if Found.”

45.3(6) *Operating and emergency procedures.*

a. The licensee’s operating and emergency procedures shall include instructions in at least the following:

- (1) Handling and use of sources of radiation to be employed such that no individual is likely to be exposed to radiation doses in excess of the limits established in 641—Chapter 40;
- (2) Methods and occasions for conducting radiation surveys;
- (3) Methods for controlling access to radiographic areas;
- (4) Methods and occasions for locking and securing sources of radiation;
- (5) Personnel monitoring and the use of personnel monitoring equipment, including steps that must be taken immediately by radiography personnel in the event a pocket dosimeter is found to be off-scale;
- (6) Transportation to field locations, including packing of sources of radiation in the vehicles, posting of vehicles, and control of sources of radiation during transportation;
- (7) Minimizing exposure of individuals in the event of an accident;
- (8) The procedure for notifying proper personnel in the event of an accident;
- (9) Maintenance of records;
- (10) The inspection, maintenance, and operability checks of radiographic exposure devices, survey instruments, source changers, storage containers, and radiation machines;
- (11) The procedure(s) for identifying and reporting defects and noncompliance in 10 CFR Part 21; and
- (12) Source recovery procedure if the licensee will perform source recovery.

b. Rescinded IAB 4/8/98, effective 7/1/98.

c. Whenever radiography is performed at a location other than a permanent radiographic installation, the radiographer must be accompanied by at least one other qualified radiographer or a radiographer’s assistant. If one of the personnel is a radiographer’s assistant, the other shall be a radiographer trainer authorized by the license. The additional qualified individual shall observe the operations and be capable of providing immediate assistance to prevent unauthorized entry. Radiography shall not be performed if only one qualified individual is present.

d. Collimators shall be used in industrial radiographic operations which use crank-out devices except when physically impossible.

e. All radiographic operations conducted at locations of use authorized on the license must be conducted in a permanent radiographic installation, unless specifically authorized by the agency.

45.3(7) *Radiation surveys and survey records.*

a. No radiographic operation shall be conducted unless calibrated and operable radiation survey instrumentation, as described in 45.1(5), is available and for each exposure device used at each site where radiographic exposures are made.

b. A survey with a calibrated and operable radiation survey instrument shall be made after each radiographic exposure to determine that the sealed source has been returned to its shielded position. The entire circumference of the radiographic exposure device shall be surveyed. If the radiographic exposure device has a source guide tube, the survey shall also include the entire length of the guide tube and

collimator. The survey required by this subrule must be done before exchanging films, repositioning the exposure head or dismantling the equipment.

c. (1) All potential radiation areas where industrial radiographic operations are to be performed shall be posted in accordance with 641—40.61(136C), based on calculated dose rates, before industrial radiographic operations begin. An area survey shall be performed during the first radiographic exposure (i.e., with the sealed source in the exposed position) to confirm that 641—40.61(136C) requirements have been met and that unrestricted areas do not have radiation levels in excess of the limits specified in 641—subrule 40.26(1).

(2) Each time the exposure device is relocated or the exposed position of the sealed source is changed, the requirements of 45.3(7) “c”(1) shall be met.

d. A lock-out survey, in which all accessible surfaces of the radiographic exposure device or source changer are surveyed, shall be made to determine that each sealed source is in its shielded position before securing the radiographic exposure device or source changer.

e. The sealed source shall be secured in its shielded position by locking the radiographic exposure device or source changer each time the sealed source is returned to its shielded position.

f. Each radiographic exposure device and source changer shall be locked and the key removed from any keyed lock prior to being moved or transported from one location to another and also prior to being stored at a given location.

g. If a vehicle is to be used for storage of radioactive material, a vehicle survey shall be performed after securing radioactive material in the vehicle and before transport to ensure that radiation levels do not exceed the limits specified in 641—subrule 40.26(1) at the exterior surface of the vehicle.

h. Surveys shall be performed on storage containers to ensure that radiation levels do not exceed the limits specified in 641—40.15(136C). These surveys shall be performed initially with the maximum amount of radioactive material present in the storage location and thereafter at the time of the quarterly inventory and whenever storage conditions change.

i. A survey meeting the requirements of 45.3(7) “b” shall be performed on the radiographic exposure device and the source changer after every sealed source exchange. A survey shall be made of the storage area as defined in 641—45.2(136C) whenever a radiographic exposure device is being placed in storage.

j. Records shall be kept of the surveys required by 45.3(7) “c,” “d,” “g,” “h,” and “i.” Such records shall be maintained for inspection by the agency for two years after completion of the survey. If the survey was used to determine an individual’s exposure, however, the records of the survey shall be maintained until the agency authorizes their disposition.

45.3(8) Requirements for enclosed radiography.

a. Systems for enclosed radiography, including shielded-room radiography designed to allow admittance of individuals shall comply with all applicable requirements of this chapter.

b. Procedures shall be evaluated at intervals not to exceed one year to ensure compliance with the applicable requirements as specified in 641—subrule 40.26(1). Records of these evaluations shall be maintained for inspection by the agency for a period of two years after the evaluation.

c. Tests for proper operation of high radiation area control devices or alarm systems, where applicable, shall be conducted, recorded, and maintained in accordance with 45.1(9) “b.”

45.3(9) Underwater, offshore platform, and lay-barge radiography.

a. Underwater, offshore platform, or lay-barge radiography shall not be performed unless specifically authorized in a license issued by the agency in accordance with 641—paragraph 39.4(27) “e.”

b. In addition to the other rules of this chapter, the following rules apply to the performance of lay-barge or offshore platform radiography:

(1) Cobalt-60 sources with activities in excess of 20 curies (nominal) and iridium-192 sources with activities in excess of 100 curies (nominal) shall not be used in the performance of lay-barge or offshore platform industrial radiography.

(2) Collimators shall be used for all industrial radiographic operations performed on lay-barge or offshore platforms.

45.3(10) Prohibitions. Industrial radiography performed with a sealed source which is not fastened to or contained in a radiographic exposure device (fishpole technique) is prohibited unless specifically authorized in a license issued by the agency.

45.3(11) Licensing for industrial radiographic operations. Rescinded IAB 4/5/00, effective 5/10/00.
[ARC 1639C, IAB 10/1/14, effective 11/5/14; ARC 3746C, IAB 4/11/18, effective 5/16/18]

641—45.4(136C) Radiation safety requirements for the use of particle accelerators for nonhuman use.

45.4(1) Purpose and scope.

a. This rule establishes procedures for the registration or licensing and the use of particle accelerators.

b. Unless specifically required otherwise by this rule, all registrants or licensees performing operations with a particle accelerator are subject to the requirements of 641—Chapters 38 to 40 and 641—45.1(136C).

c. The requirements of 45.1(10)“b”(2) and (3) and 45.1(10)“d”(1)“2” do not apply to nonradiographic uses.

45.4(2) Definitions. For purposes of this subrule, definitions in 641—Chapters 38 and 40 and subrule 45.1(2) may also apply. As used in this rule, the following definitions apply:

“Cold pasteurization” means the process of using radiation for destroying disease-causing microorganisms in commercial products.

“Self-shielded particle accelerator” means a particle accelerator with the accelerator installed in an enclosure independent of the existing architectural structures except the floor on which it may be placed. The enclosure must have been evaluated by a qualified expert and that evaluation approved by an appropriate regulatory authority through a device evaluation. The self-shielded accelerator is intended to contain at least that portion of material being irradiated, provide radiation attenuation, and exclude personnel from its interior during generation of radiation. A particle accelerator used within a shielded part of a building, or which may temporarily or occasionally incorporate portable shielding, is not a self-shielded particle accelerator.

“Shielded facility” means an accelerator facility where shielding is required to be constructed on site in order to assure compliance with the requirements of 641—Chapter 40, or where shielding supplied with the accelerator has been evaluated by qualified experts and that evaluation approved by an appropriate regulatory authority through a device evaluation.

45.4(3) Registration or license requirements. No person shall receive, possess, use, transfer, own, or acquire a particle accelerator except as authorized in a registration or license issued pursuant to 641—39.1(136C) to 39.4(136C) and the following requirements:

a. Accelerator facilities whose operations result in nuclear transformations that produce or are likely to produce radioactive material more than the exempt quantities and concentrations listed in Appendices A and B of 641—Chapter 39 shall be authorized by the issuance of a radioactive material license in accordance with 641—Chapter 39. Accelerator facilities that produce or are likely to produce radioactive material less than the exempt quantities and concentrations shall be authorized by registration.

b. For accelerator facilities required to be licensed in accordance with 45.4(3), those operations that would require personnel monitoring, pursuant to 641—40.37(136C), due to the presence of radioactive material, shall be performed only by a specific licensee. Such operations would normally include installation, testing and maintenance as well as routine operations.

45.4(4) General requirements for the issuance of a registration or license for particle accelerators. Along with the requirements of 641—39.1(136C) to 641—39.4(136C), an application for use of a particle accelerator will be approved only if the agency determines that:

a. The applicant is qualified by reason of training and experience to use the accelerator in question for the purpose requested in accordance with this rule and 641—Chapter 40 in such a manner as to minimize danger to public health and safety or property;

b. The applicant’s proposed or existing equipment, facilities, and operating and emergency procedures are adequate to protect health and minimize danger to public health and safety or property;

c. The issuance of the registration or license will not be inimical to the health and safety of the public, and the applicant satisfies any applicable special requirement in 45.4(4);

d. The applicant has appointed a radiation safety officer responsible for the day-to-day operation of the radiation safety program;

e. The applicant and the applicant's staff have experience in the use of particle accelerators and training sufficient for application to its intended uses;

f. The applicant has an adequate training program for operators of particle accelerators.

45.4(5) *Personnel monitoring.* In addition to the requirements of 641—Chapter 40, personnel monitoring shall be provided to and used by all individuals entering any area for which interlocks are required unless a survey of the area has determined that radiation levels are below that of a high radiation area; and

a. Power to an accelerator cannot be activated; or

b. An accelerated beam cannot be directed to the area.

45.4(6) *Operations.*

a. No registrant shall permit any individual to act as an operator of a particle accelerator until such individual:

(1) Has been instructed in radiation safety and shall have demonstrated an understanding thereof;

(2) Has received copies of and instruction in this rule and the applicable requirements of 641—Chapter 40, pertinent registration and the registrant's operating and emergency procedures, and shall have demonstrated understanding thereof; and

(3) Has demonstrated competence to use the particle accelerator, related equipment, and survey instruments which will be employed.

b. The radiation safety officer or radiation safety committee, if applicable, shall have the authority to terminate the operations at a particle accelerator facility if such action is deemed necessary to minimize danger to public health and safety or property.

c. Along with the audit required in 641—subrule 40.10(3), each operator's performance during an actual accelerator operation shall be audited by the radiation safety officer or designee at intervals not to exceed six months. If an operator has not participated in an accelerator operation for more than six months since the last audit, the individual's performance shall be observed and recorded at the first opportunity the individual participates in an accelerator operation. Records of the audits shall be maintained by the registrant for the agency inspection for three years from the date of the audit.

d. Operators of particle accelerators used for industrial radiography shall meet the requirements of 45.1(10).

45.4(7) *Shielding and safety design requirements.*

a. A qualified expert acceptable to the agency shall be consulted in the design of a particle accelerator installation and called upon to perform a radiation survey when the accelerator is first capable of producing radiation.

b. Each particle accelerator installation shall be provided with such primary and secondary barriers as are necessary to ensure compliance with 641—40.15(136C) and 641—40.26(136C).

c. In addition to the requirements of 45.4(8) "a" and "b," shielded facilities or self-shielded particle accelerators shall meet the following requirements:

(1) Authorization, by issuance of a construction permit, shall be granted upon a determination of adequacy being made pursuant to the review of an initial application of the shielding design, physical plant, and site specifications, and of the applicant's proposed equipment, uses and workloads. For a shielded facility, the applicant shall submit an evaluation of the shielding design by a qualified expert. For a self-shielded particle accelerator, the applicant need not submit an evaluation of a shielding design if an evaluation by an appropriate regulatory authority has been performed. The applicant may instead reference this evaluation. The applicant shall maintain a copy of the evaluation of shielding design for agency review.

(2) Authorization for installation and testing of an accelerator shall be given only after a determination of adequacy of testing protocols, testing safety procedures, staff training, and radiation detection instrumentation has been made; and

(3) Operational use of an accelerator shall be authorized only after determination of adequacy of the items listed in 45.4(4) has been made by the agency.

45.4(8) *Particle accelerator controls and interlock systems.*

a. Instrumentation, readouts, and controls on the particle accelerator control console shall be clearly identified, easily discernible and located outside the high radiation area.

b. Each entrance into a target area or other high radiation area shall be provided with two safety interlocks that shut down the machine when the barrier is breached.

c. Each safety interlock shall be on a circuit that allows it to operate independently of all other safety interlocks.

d. All safety interlocks shall be designed so that any defect or component failure in the safety interlock system prevents operation of the accelerator.

e. When a safety interlock system has been tripped, it shall only be possible to resume operation of the accelerator by manually resetting controls at the position where the safety interlock has been tripped and, lastly, at the main control console.

f. A scram button or other emergency power cutoff switch shall be located and easily identifiable in all high radiation areas. Such a cutoff switch shall include a manual reset so that the accelerator cannot be restarted from the accelerator control console without resetting the cutoff switch.

45.4(9) *Warning devices.*

a. Each location designated as a high radiation area, and each entrance to such location, shall be equipped with easily observable warning lights that operate when, and only when, radiation is being produced.

b. Each high radiation area shall have an audible warning device that shall be activated for 15 seconds prior to the possible creation of such high radiation area. Such warning device shall be clearly discernible in all high radiation areas.

c. Barriers, temporary or otherwise, and pathways leading to high radiation areas shall be posted in accordance with 641—40.61(136C).

45.4(10) *Operating and emergency procedures.*

a. Particle accelerators, when not in operation, shall be secured to prevent unauthorized use.

b. The safety interlock system shall not be used to turn off the accelerator beam except in an emergency.

c. All safety and warning devices, including interlocks, shall be checked for proper operation intervals not to exceed three months. Results of such tests shall be maintained at the accelerator facility for inspection by the agency for three years.

d. All incidents in which the interlock system fails to operate properly or where the operation is terminated by the interlock system shall be investigated and reported to the radiation safety officer or, if applicable, the radiation safety committee. Documentation shall be maintained for inspection by the agency for three years.

e. If, for any reason, it is necessary to intentionally bypass a safety interlock or interlocks, such action shall be:

(1) Authorized by the radiation safety officer and, if applicable, the radiation safety committee;

(2) Recorded in a permanent log and a notice posted at the accelerator control console; and

(3) Terminated as soon as possible.

f. The registrant's operating and emergency procedures shall include the following:

(1) Operation and safety instructions on the accelerator(s) to be used;

(2) Methods for controlling access to restricted areas;

(3) Methods and occasions for locking and securing sources of radiation;

(4) Use of personnel monitoring equipment;

(5) The procedure for notifying proper personnel in the event of an accident;

(6) Maintenance of records;

(7) Inspections and maintenance of the accelerator; and

(8) Steps to be taken in the case of an emergency.

g. A copy of the current operating and emergency procedures shall be maintained at the accelerator control panel.

45.4(11) Radiation monitoring requirements.

a. A radiation protection survey shall be performed and documented by a qualified expert, acceptable to the agency, when changes have been made in shielding, operation, equipment, or occupancy of adjacent areas.

b. Accelerator facilities shall survey with a radiation detection instrument at intervals not to exceed 12 months. Records of this survey shall be maintained for agency review for three years.

c. Accelerator facilities registered or licensed pursuant to 45.4(3)“a” shall survey for removable contamination at intervals not to exceed six months to determine the degree of contamination.

d. Each time removable shields on self-shielded particle accelerators are opened, a visual survey of the shielding must be performed to observe physical damage. In addition, when these shields are returned to the closed position, a physical radiation survey shall be conducted upon initial reactivating of the accelerator. Records of this survey shall be maintained for agency review for three years.

e. Accelerator facilities registered or licensed pursuant to 45.4(3)“a” shall perform a survey with a radiation detection instrument and surveys for removable contamination before maintenance or servicing of its particle accelerator(s) or associated equipment located in the high radiation area.

f. Radiation levels in all high radiation areas shall be continuously monitored. The monitoring devices shall be electrically independent of the accelerator control and safety interlock systems and capable of providing a readout at the control panel.

g. Upon installation, all area monitoring equipment shall be tested to assure proper operation under operating conditions of the particle accelerator. All area monitors shall be calibrated at intervals not to exceed one year and after each servicing and repair.

h. Whenever applicable, accelerator facilities registered or licensed pursuant to 45.4(3)“a” shall perform surveys at intervals not to exceed six months to determine the amount of airborne particulate radioactivity present.

i. All surveys shall be made in accordance with the written procedures established by the radiation safety officer or a qualified expert who is acceptable to the agency.

j. Records of all radiation protection surveys, calibrations, and instrumentation tests shall be maintained at the accelerator facility for inspection by the agency.

45.4(12) Radiation safety officer.

a. Each registrant shall appoint a radiation safety officer that meets the following requirements:

- (1) Possesses a high school diploma or a certificate of high school equivalency based on the GED test;
- (2) Documents two years of radiation protection experience.

b. The specific duties of the RSO include, but are not limited to, the following:

(1) To establish and oversee operating, emergency, and ALARA procedures and to review them regularly to ensure that the procedures are current and conform with these rules;

(2) To oversee and approve all phases of the training program for accelerator operators so that appropriate and effective radiation protection practices are taught;

(3) To ensure that required radiation surveys are performed and documented in accordance with these rules, including any corrective measures when levels of radiation exceed established limits;

(4) To ensure that personnel monitoring devices are calibrated and used properly by occupationally exposed personnel, that records are kept of the monitoring results, and that timely notifications are made as required by 641—Chapter 40;

(5) To ensure that any required interlock switches and warning signals are functioning and that radiation signs, ropes, and barriers are properly posted and positioned;

(6) To investigate and report to the agency each known or suspected case of radiation exposure to an individual or radiation level detected in excess of limits established by these rules and each theft or loss of source(s) of radiation, to determine the cause, and to take steps to prevent its recurrence;

(7) To have a thorough knowledge of management policies and administrative procedures of the licensee or registrant;

- (8) To assume control and have the authority to institute corrective actions including shutdown of operations when necessary in emergency situations or unsafe conditions;
- (9) To maintain records as required by these rules;
- (10) To ensure the proper storing, labeling, and use of the accelerator;
- (11) To ensure that inspection and maintenance programs are performed in accordance with 45.1(6), 45.1(8), 45.4(10) “c”; and
- (12) To ensure that personnel are complying with these rules and the operating and emergency procedures of the registrant.

641—45.5(136C) Radiation safety requirements for analytical X-ray equipment.

45.5(1) Purpose and scope. This rule provides special requirements for analytical X-ray equipment. The requirements of this rule are in addition to, and not in substitution for, 641—Chapters 38, 39, and 40. The requirements of rules 641—45.1(136C) to 641—45.4(136C) do not apply.

45.5(2) Definitions. For the purpose of this subrule, definitions in 641—Chapter 38 may also apply. As used in this rule, the following definitions apply:

“*Analytical X-ray equipment*” means equipment used for X-ray diffraction or fluorescence analysis.

“*Analytical X-ray system*” means a group of components utilizing X-rays or gamma rays to determine the elemental composition or to examine the microstructure of materials.

“*Fail-safe characteristics*” means a design feature which causes beam port shutters to close, or otherwise prevents emergence of the primary beam, upon the failure of a safety or warning device.

“*Local components*” means part of an analytical X-ray system and includes X-ray areas that are struck by X-rays such as radiation source housings, port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors, and shielding, but does not include power supplies, transformers, amplifiers, readout devices, and control panels.

“*Normal operating procedures*” means step-by-step instructions necessary to accomplish the analysis. These procedures shall include sample insertion and manipulation, equipment alignment, routine maintenance by the registrant or licensee, and data recording procedures, which are related to radiation safety.

“*Open-beam configuration*” means an analytical X-ray system in which an individual could accidentally place some part of his body in the primary beam path during normal operation.

“*Primary beam*” means radiation which passes through an aperture of the source housing by a direct path from the X-ray tube or a radioactive source located in the radiation source housing.

45.5(3) Equipment requirements.

a. Safety device. A device which prevents the entry of any portion of an individual’s body into the primary X-ray beam path or which causes the beam to be shut off upon entry into its path shall be provided on all open-beam configurations. A registrant or licensee may apply to the agency for an exemption from the requirement of a safety device. Such application shall include:

- (1) A description of the various safety devices that have been evaluated;
- (2) The reason each of these devices cannot be used; and
- (3) A description of the alternative methods that will be employed to minimize the possibility of an accidental exposure, including procedures to ensure that operators and others in the area will be informed of the absence of safety devices.

b. Warning devices.

- (1) Open-beam configurations shall be provided with a readily discernible indication of:

1. X-ray tube “on-off” status located near the radiation source housing, if the primary beam is controlled in this manner; or

2. Shutter “open-closed” status located near each port on the radiation source housing, if the primary beam is controlled in this manner.

- (2) An easily visible warning light labeled with the words “X-RAY ON,” or words having a similar intent, shall be located:

1. Near any switch that energizes an X-ray tube and shall be illuminated only when the tube is energized; or

2. In the case of a radioactive source, near any switch that opens a housing shutter and shall be illuminated only when the shutter is open.

(3) Warning devices shall be labeled so that their purpose is easily identified. On equipment installed after the effective date of these rules, warning devices shall have fail-safe characteristics.

c. *Ports.* Unused ports on radiation source housings shall be secured in the closed position in a manner which will prevent casual opening.

d. *Labeling.* All analytical X-ray equipment shall be labeled with a readily discernible sign or signs bearing the radiation symbol and the words:

(1) "CAUTION—HIGH INTENSITY X-RAY BEAM," or words having a similar intent, on the X-ray source housing; and

(2) "CAUTION—RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED," or words having a similar intent, near any switch that energizes an X-ray tube if the radiation source is an X-ray tube; or

(3) "CAUTION—RADIOACTIVE MATERIAL," or words having a similar intent, on the source housing in accordance with 641—40.63(136C) if the radiation source is a radionuclide.

e. *Shutters.* On open-beam configurations, each port on the radiation source housing shall be equipped with a shutter that cannot be opened unless a collimator or a coupling has been connected to the port.

f. *Radiation source housing.* Each radiation source housing shall be subject to the following requirements:

(1) Each X-ray tube housing shall be equipped with an interlock that shuts off the tube if it is removed from the radiation source housing or if the housing is disassembled.

(2) Each radioactive source housing or port cover or each X-ray tube housing shall be so constructed that, with all shutters closed, the radiation measured at a distance of 5 centimeters from its surface is not capable of producing a dose in excess of 2.5 millirems (0.025 mSv) in one hour. For systems utilizing X-ray tubes, this limit shall be met at any specified tube rating.

g. *Generator cabinet.* Each X-ray generator shall be supplied with a protective cabinet which limits leakage radiation measured at a distance of 5 centimeters from its surface such that it is not capable of producing a dose in excess of 0.25 millirem (2.5 mSv) in one hour.

45.5(4) Area requirements.

a. *Radiation levels.* The local components of an analytical X-ray system shall be located and arranged and shall include sufficient shielding or access control such that no radiation levels exist in any area surrounding the local component group which could result in a dose to an individual present therein in excess of the dose limits given in 641—40.26(136C). For systems utilizing X-ray tubes, these levels shall be met at any specified tube rating.

b. *Surveys.*

(1) Radiation surveys, as required by 641—40.36(136C), of all analytical X-ray systems sufficient to show compliance with 45.5(4) "a" shall be performed:

1. Upon installation of the equipment, and at least once every 12 months thereafter;
2. Following any change in the initial arrangement, number, or type of local components in the system;
3. Following any maintenance requiring the disassembly or removal of a local component in the system;

4. During the performance of maintenance and alignment procedures if the procedures require the presence of a primary X-ray beam when any local component in the system is disassembled or removed;

5. Anytime a visual inspection of the local components in the system reveals an abnormal condition; and

6. Whenever personnel monitoring devices show a significant increase over the previous monitoring period or the readings are approaching the limits specified in 641—40.15(136C).

(2) Radiation survey measurements shall not be required if a registrant or licensee can demonstrate compliance with 45.5(4) "a" to the satisfaction of the agency.

c. Posting. Each area or room containing analytical X-ray equipment shall be conspicuously posted with a sign or signs bearing the radiation symbol and the words “CAUTION—X-RAY EQUIPMENT” or words having a similar intent in accordance with 641—subrule 40.61(1).

45.5(5) Operating requirements.

a. Procedures. Normal operating procedures shall be written and available to all analytical X-ray equipment workers. No individual shall be permitted to operate analytical X-ray equipment in any manner other than that specified in the procedures unless such individual has obtained written approval of the radiation safety officer.

b. Bypassing. No individual shall bypass a safety device or interlock unless such individual has obtained the approval of the radiation safety officer. Such approval shall be for a specified period of time. When a safety device or interlock has been bypassed, a readily discernible sign bearing the words “SAFETY DEVICE NOT WORKING,” or words having a similar intent, shall be placed on the radiation source housing.

c. Repair or modification of X-ray tube systems. Except as specified in 45.5(5)“b,” no operation involving removal of covers, shielding materials or tube housings or modifications to shutters, collimators, or beam stops shall be performed without ascertaining that the tube is off and will remain off until safe conditions have been restored. The main switch, rather than interlocks, shall be used for routine shutdown in preparation for repairs.

d. Radioactive source replacement, testing, or repair. Radioactive source housings shall be opened for source replacement, leak testing, or other maintenance or repair procedures only by individuals authorized to specifically conduct such procedures under a license issued by the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state.

45.5(6) Personnel requirements.

a. Instruction. No individual shall be permitted to operate or maintain analytical X-ray equipment unless such individual has received instruction in and demonstrated competence as to:

- (1) Identification of radiation hazards associated with the use of the equipment;
- (2) Significance of the various radiation warnings, safety devices, and interlocks incorporated into the equipment, or the reasons they have not been installed on certain pieces of equipment and the extra precautions required in such cases;
- (3) Proper operating procedures for the equipment;
- (4) Recognition of symptoms of an acute localized exposure; and
- (5) Proper procedures for reporting an actual or suspected exposure.

b. Personnel monitoring.

- (1) Finger or wrist dosimetry devices shall be provided to and shall be used by:
 1. Analytical X-ray equipment workers using systems having an open-beam configuration and not equipped with a safety device; and
 2. Personnel maintaining analytical X-ray equipment if the maintenance procedures require the presence of a primary X-ray beam when any local component in the analytical X-ray system is disassembled or removed.
- (2) Reported dose values shall not be used for the purpose of determining compliance with 641—subrule 40.2(1) unless evaluated by a qualified expert.

641—45.6(136C) Radiation safety requirements for well-logging, wireline service operations and subsurface tracer studies.

45.6(1) Purpose. This rule establishes radiation safety requirements for using sources of radiation for wireline service operations including mineral-logging, radioactive markers, and subsurface tracer studies. The requirements of this rule are in addition to, and not in substitution for, the requirements of 641—Chapters 38, 39, and 40. The requirements of 641—45.1(136C) to 641—45.5(136C) do not apply.

45.6(2) Scope. This rule applies to all licensees or registrants who use sources of radiation for wireline service operations including mineral-logging, radioactive markers, or subsurface tracer studies.

45.6(3) Definitions. For the purpose of this subrule, the definitions of 641—Chapter 38 may also apply. As used in this rule, the following definitions apply:

“Energy compensation source (ECS)” means a small sealed source, with an activity not exceeding 3.7 MBq (100 microcuries), used within a logging tool, or other tool components, to provide a reference standard to maintain the tool’s calibration when in use.

“Fresh water aquifer” means a geologic formation that is capable of yielding fresh water to a well or spring.

“Injection tool” means a device used for controlled subsurface injection of radioactive tracer material.

“Logging assistant” means any individual who, under the direct supervision of a logging supervisor, handles sealed sources or tracers that are not in logging tools or shipping containers or who performs surveys required by 45.6(22).

“Logging supervisor” means the individual who uses licensed material or provides direct supervision in the use of licensed material at a temporary job site and who is responsible to the licensee for ensuring compliance with the requirements of these rules and the conditions of the license.

“Logging tool” means a device used subsurface to perform well-logging.

“Personal supervision” means guidance and instruction by the logging supervisor who is physically present at the temporary job site, who is in personal contact with logging assistants, and who can give immediate assistance.

“Radioactive marker” means licensed material used for depth determination or direction orientation. For purposes of this rule, this term includes radioactive collar markers and radioactive iron nails.

“Safety review” means a periodic review on radiation safety aspects of well-logging provided by the licensee for its employees. The review may include, as appropriate, the results of internal inspections, new procedures or equipment, accidents or errors that have been observed, and opportunities for employees to ask safety questions.

“Source holder” means a housing or assembly into which a sealed source is placed to facilitate the handling and use of the source in well-logging operations.

“Subsurface tracer study” means the release of unsealed licensed material or a substance labeled with licensed material in a single well for the purpose of tracing the movement or position of the material or substance in the well or adjacent formation.

“Surface casing” for protecting fresh water aquifers means a pipe or tube used as a lining in a well to isolate fresh water aquifers from the well.

“Temporary job site” means a place where licensed materials are present for the purpose of performing well-logging or subsurface tracer studies.

“Tritium neutron generator target source” means a tritium source used within a neutron generator tube to produce neutrons for use in well-logging applications.

“Uranium sinker bar” means a weight containing depleted uranium used to pull a logging tool down toward the bottom of a well.

“Well” means a drilled hole in which well-logging may be performed. As used in this rule, “well” includes drilled holes for the purpose of oil, gas, mineral, groundwater, or geological exploration.

“Well-logging” means all operations involving the lowering and raising of measuring devices or tools which may contain licensed material or are used to detect licensed materials in wells for the purpose of obtaining information about the well or adjacent formations and which may be used in oil, gas, mineral, groundwater, or geological exploration.

“Wireline” means a cable containing one or more electrical conductors which is used to lower and raise logging tools in the well-bore.

“Wireline service operation” means any evaluation or mechanical service which is performed in the well-bore using devices on a wireline.

45.6(4) Agreement with well owner or operator.

a. A licensee may perform well-logging with a sealed source only after the licensee has a written agreement with the employing well owner or operator. This written agreement must identify who will meet the following requirements:

- (1) If a sealed source becomes lodged in the well, a reasonable effort will be made to recover it;
- (2) A person may not attempt to recover a sealed source in a manner which, in the licensee’s opinion, could result in its rupture;

- (3) The radiation monitoring required in 45.6(8) and 45.6(17) will be performed;
 - (4) If the environment, any equipment, or personnel are contaminated with licensed material, they must be decontaminated before release from the site or release for unrestricted use; and
 - (5) If the sealed source is classified as irretrievable after reasonable efforts at recovery have been expended, the following requirements must be implemented within 30 days:
 1. Each irretrievable well-logging source must be immobilized and sealed in place with a cement plug;
 2. There must be a means to prevent inadvertent intrusion on the source, unless the source is not accessible to any subsequent drilling operations; and
 3. A permanent identification plaque, constructed of long-lasting material, such as stainless steel, brass, bronze, or Monel, must be mounted at the surface of the well, unless the mounting of the plaque is not practical. The size of the plaque must be at least 17 cm (7 inches) square and 3 mm (1/8-inch) thick. The plaque must contain:
 - The word "Caution";
 - The radiation symbol (the color requirement in 641—40.60(136C) need not be met);
 - The date the source was abandoned;
 - The name of the well owner or well operator, as appropriate;
 - The well name and well identification number(s) or other designation;
 - An identification of the sealed source(s) by radionuclide and quantity;
 - The depth of the source and depth to the top of the plug; and
 - An appropriate warning such as, "Do not reenter this well."
 - b. The licensee shall retain a copy of the written agreement for three years after the completion of the well-logging operation.
 - c. A licensee may apply, pursuant to 641—38.3(136C), for agency approval, on a case-by-case basis, of proposed procedures to abandon an irretrievable well-logging source in a manner not otherwise authorized in 45.6(26) "a"(5).
 - d. A written agreement between the licensee and the well owner or operator is not required if the licensee and the well owner or operator are part of the same corporate structure or otherwise similarly affiliated. However, the licensee shall still otherwise meet the requirements in 45.6(26) "a"(1) through (5).
- 45.6(5) *Limits on levels of radiation.*** Sources of radiation shall be used, stored, and transported in such a manner that the transportation requirements of 641—39.5(136C) and the dose limitation requirements of 641—Chapter 40 are met.
- 45.6(6) *Storage precautions.***
- a. Each source of radiation shall be provided with a storage or transport container. The container shall be provided with a lock, or tamper seal for calibration sources, to prevent unauthorized removal of, or exposure to, the source of radiation.
 - b. Sources of radiation shall be stored in a manner which will minimize danger from explosion or fire.
- 45.6(7) *Transport precautions.*** Transport containers shall be physically secured to the transporting vehicle to prevent accidental loss, tampering, or unauthorized removal.
- 45.6(8) *Radiation survey instruments.***
- a. The licensee or registrant shall maintain sufficient calibrated and operable radiation survey instruments at each field station to make physical radiation surveys as required by this subrule and by 641—40.36(136C). Instrumentation shall be capable of measuring 0.1 milliroentgen (25.8 nanocoulombs/kg) per hour through at least 50 milliroentgens (12.9 microcoulombs/kg) per hour.
 - b. Each radiation survey instrument shall be calibrated:
 - (1) At intervals not to exceed six months and after each instrument servicing;
 - (2) For linear scale instruments, at two points located approximately 1/3 and 2/3 of full-scale on each scale; for logarithmic scale instruments, at midrange of each decade, and at two points of at least one decade; and for digital instruments, at appropriate points; and
 - (3) So that accuracy within 20 percent of the true radiation level can be demonstrated on each scale.
 - c. Calibration records shall be maintained for a period of two years for inspection by the agency.

45.6(9) Leak testing of sealed sources.

a. Testing and record-keeping requirements. Each licensee using sealed sources of radioactive material shall have the sources tested for leakage periodically. Records of leak test results shall be kept in units of microcuries (Bq) and maintained for three years after the leak test is performed.

b. Method of testing. Tests for leakage shall be performed only by persons specifically authorized to perform such tests by the NRC, an agreement state, or a licensing state. The wipe of a sealed source must be performed using a leak test kit or method approved by the NRC, an agreement state, or a licensing state. The wipe sample must be taken from the nearest assessable point to the sealed source where contamination might accumulate. The test sample shall be analyzed for radioactive contamination, and the analysis shall be capable of detecting the presence of 0.005 microcurie (185 Bq) of radioactive material on the test sample.

c. Interval of testing.

(1) Each sealed source of radioactive material (except an energy compensation source (ECS)) shall be tested at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made six months prior to the transfer, the sealed source shall not be put into use until tested. If, for any reason, it is suspected that a sealed source may be leaking, it shall be removed from service immediately and tested for leakage as soon as practical.

(2) Each ECS that is not exempt from testing in accordance with 45.6(9)“c”(1) must be tested at intervals not to exceed three years. In the absence of a certificate from a transferor that a test has been made within the three years before the transfer, the ECS may not be used until tested.

d. Leaking or contaminated sources.

(1) If the test in 45.6(9)“c” reveals the presence of 0.005 microcurie (185 Bq) or more of removable radioactive material, the licensee shall immediately withdraw the source from use and shall cause it to be decontaminated, repaired, or disposed of by an NRC, agreement state, or licensing state licensee that is authorized to perform these functions. The licensee shall check the equipment associated with the leaking source for radioactive contamination and, if contaminated, have it decontaminated or disposed of by an NRC, agreement state, or licensing state licensee that is authorized to perform these functions.

(2) A report describing the equipment involved, the test results, any contamination which resulted from the leaking source, and the corrective action taken up to the time of the report shall be filed with the agency within five days of receiving the test results.

e. Exemptions. The following sources are exempted from the periodic leak test requirements of 45.6(9)“a” to “d”:

- (1) Hydrogen-3 (tritium) sources;
- (2) Sources of radioactive material with a half-life of 30 days or less;
- (3) Sealed sources of radioactive material in gaseous form;
- (4) Sources of beta- or gamma-emitting radioactive material with an activity of 100 microcuries (3.7 MBq) or less; and
- (5) Sources of alpha- or neutron-emitting radioactive material with an activity of 10 microcuries (0.370 MBq) or less.

45.6(10) Quarterly inventory. Each licensee or registrant shall conduct a quarterly physical inventory to account for all sources of radiation. Records of inventories shall be maintained for two years from the date of the inventory for inspection by the agency and shall include the quantities and kinds of sources of radiation, the location where sources of radiation are assigned, the date of the inventory, and the name of the individual conducting the inventory.

45.6(11) Utilization records. Each licensee or registrant shall maintain current records, which shall be kept available for inspection by the agency for two years from the date of the recorded event, showing the following information for each source of radiation:

- a.* Make, model number, and a serial number or a description of each source of radiation used;
- b.* The identity of the well-logging supervisor or field unit to whom assigned;
- c.* Locations where used and dates of use; and
- d.* In the case of tracer materials and radioactive markers, the utilization record shall indicate the radionuclide and activity used in a particular well.

45.6(12) *Design, performance, and certification criteria for sealed sources used in well-logging operations.*

- a.* A licensee may use a sealed source for use in well-logging applications if:
 - (1) The sealed source is doubly encapsulated construction;
 - (2) The sealed source contains chemical and physical forms that are as insoluble and nondispersible as practical; and
 - (3) The sealed source meets the requirements of 45.6(12) “b,” “c,” and “d.”
- b.* For a sealed source manufactured on or before July 14, 1989, a licensee may use the sealed source for use in well-logging applications if it meets the requirements of USASI N5.10-1968, “Classification of Sealed Radioactive Sources,” or the requirements in 45.6(12) “c” or “d.”
- c.* For a sealed source manufactured after July 14, 1989, a licensee may use the sealed source for well-logging applications if it meets the oil-well-logging requirements of ANSI/HPS N43.6-1997, “Sealed Radioactive Sources—Classification.”
- d.* For a sealed source manufactured after July 14, 1989, a licensee may use the sealed source for use in well-logging applications if the sealed source’s prototype has been tested and found to maintain its integrity after each of the following tests.
 - (1) Temperature. The test source must be held at -40 degrees C for 20 minutes, 600 degrees C for one hour, and then be subject to a thermal shock test with a temperature drop from 600 degrees C within 15 seconds.
 - (2) Impact test. A 5 kg steel hammer, 2.5 cm in diameter, must be dropped from a height of 1 m onto the test source.
 - (3) Vibration test. The test source must be subject to a vibration from 25 Hz to 500 Hz at 5 g amplitude for 30 minutes.
 - (4) Puncture test. A one gram hammer and pin, 0.3 cm pin diameter, must be dropped from a height of 1 m onto the test source.
 - (5) Pressure test. The test source must be subject to an external pressure of 1.695×10^7 pascals (24,600 pounds per square inch absolute).
- e.* The requirements in 45.6(12) “a,” “b,” “c,” and “d” do not apply to sealed sources that contain licensed material in gaseous form.
- f.* The requirements of 45.6(12) “a,” “b,” “c,” and “d” do not apply to energy compensation sources (ECS). ECSs must be registered with the NRC, licensing state, or agreement state.

45.6(13) *Labeling.*

- a.* Each source, source holder, or logging tool containing radioactive material shall bear a durable, legible, and clearly visible marking or label, which has, as a minimum, the standard radiation caution symbol, without the conventional color requirement, and the following wording:

DANGER¹
RADIOACTIVE

This labeling shall be on the smallest component transported as a separate piece of equipment.

- b.* Each transport container shall have permanently attached to it a durable, legible, and clearly visible label which has, as a minimum, the standard radiation caution symbol and the following wording:

DANGER¹
RADIOACTIVE
NOTIFY CIVIL AUTHORITIES
[OR NAME OF COMPANY]

45.6(14) *Inspection and maintenance.*

- a.* Each licensee or registrant shall conduct, at intervals not to exceed six months, a program of inspection and maintenance of source holders, logging tools, source handling tools, storage containers, transport containers, and injection tools to ensure proper labeling and physical condition. Records of inspection and maintenance shall be maintained for a period of two years for inspection by the agency.
- b.* If any inspection conducted pursuant to 45.6(14) “a” reveals damage to labeling or components critical to radiation safety, the device shall be removed from service until repairs have been made.

c. If a sealed source is stuck in the source holder, the licensee shall not perform any operation, such as drilling, cutting, or chiseling, on the source holder unless the licensee is specifically approved by the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state to perform this operation.

d. The repair, opening, or modification of any sealed source shall be performed only by persons specifically authorized to do so by the agency, the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state.

45.6(15) Training requirements.

a. No licensee or registrant shall permit any individual to act as a logging supervisor as defined in this rule until such individual has:

(1) Received, in a course recognized by the agency, the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state, instruction in the subjects outlined in Appendix E of this chapter and demonstrated an understanding thereof;

(2) Read and received instruction in the rules contained in this chapter and the applicable sections of 641—Chapters 38, 39, and 40 or their equivalent, conditions of appropriate license or certificate of registration, and the licensee's or registrant's operating and emergency procedures, and demonstrated an understanding thereof; and

(3) Demonstrated competence to use sources of radiation, related handling tools, and radiation survey instruments which will be used on the job.

b. No licensee or registrant shall permit any individual to assist in the handling of sources of radiation until such individual has:

(1) Read or received instruction in the licensee's or registrant's operating and emergency procedures and demonstrated an understanding thereof; and

(2) Demonstrated competence to use, under the direct supervision of the logging supervisor, the sources of radiation, related handling tools, and radiation survey instruments which will be used on the job.

c. The licensee or registrant shall maintain employee training records for inspection by the agency for two years following termination of the individual's employment.

45.6(16) Operating and emergency procedures. Each licensee or registrant shall develop and follow written operating and emergency procedures that cover:

a. The handling and use of sources of radiation, including the use of sealed sources in wells without surface casing for protecting fresh water aquifers, if appropriate;

b. The use of remote handling tools for handling sealed sources and radioactive tracer material except low-activity calibration sources;

c. Methods and occasions for conducting radiation surveys, including surveys for detecting contamination, as required by 45.6(22);

d. Minimizing personnel exposure, including exposures from inhalation and ingestion of licensed tracer materials;

e. Methods and occasions for locking and securing stored licensed or registered materials;

f. Personnel monitoring and the use of personnel monitoring equipment;

g. Transportation of licensed or registered materials to field stations or temporary job sites, packaging of licensed or registered materials for transport in vehicles, placarding of vehicles when needed, and physically securing licensed materials in transport vehicles during transportation to prevent accidental loss, tampering, or unauthorized removal;

h. Picking up, receiving, and opening packages containing licensed or registered materials, in accordance with 641—40.65(136C);

i. For the use of tracers, decontamination of the environment, equipment, and personnel;

j. Maintenance of records generated by well logging personnel at temporary job sites;

k. The inspection and maintenance of sealed sources, source holders, logging tools, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars as required by 45.6(14);

l. Identifying and reporting defects and noncompliance;

m. Actions to be taken if a sealed source is lodged in a well;

n. Notifying proper persons in the event of an accident; and

o. Actions to be taken if a sealed source is ruptured that include actions to prevent the spread of contamination and minimize inhalation and ingestion of licensed materials and actions to obtain suitable radiation survey instruments as required in 45.6(8).

45.6(17) *Personnel monitoring.*

a. No licensee or registrant shall permit any individual to act as a logging supervisor or to assist in the handling of sources of radiation unless each such individual wears, at all times during the handling of licensed radioactive materials, a film badge, OSL device or thermoluminescent dosimeter (TLD) that is processed and evaluated by an accredited National Voluntary Laboratory Accreditation Program (NVLAP). Each film badge, OSL device or TLD shall be assigned to and worn by only one individual. Film badges must be replaced at least monthly and OSL devices and TLDs replaced at least quarterly. After replacement, each film badge, OSL device or TLD must be promptly processed.

b. The licensee shall provide bioassay services to individuals using licensed materials in subsurface tracer studies if required by the license.

c. Personnel monitoring records and bioassay results shall be maintained for inspection until the agency authorizes disposition.

45.6(18) *Security.* During each logging or tracer application, the logging supervisor or other designated employee shall maintain direct surveillance of the operation to protect against unauthorized or unnecessary entry into a restricted area, as defined in 641—Chapter 38.

45.6(19) *Handling tools.* The licensee shall provide and require the use of tools that will ensure remote handling of sealed sources other than low activity calibration sources.

45.6(20) *Subsurface tracer studies.*

a. Protective gloves and other appropriate protective clothing and equipment shall be used by all personnel handling radioactive tracer material. Precautions shall be taken to avoid ingestion or inhalation of radioactive material.

b. No licensee shall cause the injection of radioactive material into potable aquifers without prior written authorization from the agency and any other appropriate state agency.

45.6(21) *Particle accelerators.* No licensee or registrant shall permit aboveground testing of particle accelerators, designed for use in well-logging, which results in the production of radiation, except in areas or facilities so controlled or shielded that the requirements of 641—40.15(136C) and 641—40.26(136C), as applicable, are met.

45.6(22) *Radiation surveys.*

a. Radiation surveys or calculations shall be made and recorded for each area where radioactive materials are used and stored.

b. Radiation surveys shall be made and recorded for the radiation levels in occupied positions and on the exterior of each vehicle used to transport radioactive material. Such surveys shall include each source of radiation or combination of sources to be transported in the vehicle.

c. If the sealed source assembly is removed from the logging tool before departing the job site, the logging tool detector shall be energized, or a survey meter used, to ensure that the logging tool is free of contamination.

d. Radiation surveys shall be made and recorded at the job site or wellhead for each tracer operation, except those using hydrogen-3, carbon-14, and sulfur-35. These surveys shall include measurements of radiation levels before and after the operation.

e. Records required pursuant to 45.6(22)“a” to “d” shall include the dates, the identification of individual(s) making the survey, the identification of survey instrument(s) used, and an exact description of the location of the survey. Records of these surveys shall be maintained for inspection by the agency for two years after completion of the survey.

45.6(23) *Documents and records required at field stations.* Each licensee or registrant shall maintain, for inspection by the agency, the following documents and records for the specific devices and sources used at the field station:

- a.* Appropriate license, certificate of registration, or equivalent document(s);
- b.* Operating and emergency procedures;
- c.* Applicable regulations;

- d. Records of the latest survey instrument calibrations pursuant to 45.6(8);
- e. Records of the latest leak test results pursuant to 45.6(9);
- f. Records of quarterly inventories required pursuant to 45.6(10);
- g. Utilization records required pursuant to 45.6(11);
- h. Records of inspection and maintenance required pursuant to 45.6(14);
- i. Survey records required pursuant to 45.6(22); and
- j. Training records required pursuant to 45.6(15).

45.6(24) *Documents and records required at temporary job sites.* Each licensee or registrant conducting operations at a temporary job site shall have the following documents and records available at that site for inspection by the agency:

- a. Operating and emergency procedures;
- b. Survey records required pursuant to 45.6(22) for the period of operation at the site;
- c. Evidence of current calibration for the radiation survey instruments in use at the site;
- d. When operating in the state under reciprocity, a copy of the appropriate license, certificate of registration, or equivalent document(s); and
- e. Shipping papers for the transportation of radioactive material.

45.6(25) *Notification of incidents, abandonment, and lost sources.*

a. Notification of incidents and sources lost in other than downhole logging operations shall be made in accordance with appropriate provisions of 641—Chapter 40.

b. Whenever a sealed source or device containing radioactive material is lodged downhole, the licensee shall:

(1) Monitor at the surface for the presence of radioactive contamination with a radiation survey instrument or logging tool during logging tool recovery operations; and

(2) Notify the agency immediately by telephone and subsequently, within 30 days, by confirmatory letter if the licensee knows or has reason to believe that a sealed source has been ruptured. This letter shall identify the well or other location, describe the magnitude and extent of the escape of radioactive material, assess the consequences of the rupture, and explain efforts planned or being taken to mitigate these consequences.

c. When it becomes apparent that efforts to recover the radioactive source will not be successful, the licensee shall:

(1) Advise the well operator of the regulations of the appropriate state agency regarding abandonment and an appropriate method of abandonment, which shall include:

- 1. The immobilization and sealing in place of the radioactive source with a cement plug;
- 2. The setting of a whipstock or other deflection device; and
- 3. The mounting of a permanent identification plaque at the surface of the well, containing the appropriate information required by 45.6(25) “d.”

(2) Notify the agency by telephone, giving the circumstances of the loss, and request approval of the proposed abandonment procedures, or specify the implemented abandonment before receiving approval because the licensee believed there was an immediate threat to public health and safety; and

(3) File a written report with the agency within 30 days of the abandonment. The licensee shall send a copy of the report to the appropriate state agency that issued permits or otherwise approved of the drilling operation. The report shall contain the following information:

- 1. Date of occurrence;
- 2. A description of the well-logging source involved, including the radionuclide and its quantity, chemical, and physical form;
- 3. Surface location and identification of the well;
- 4. Results of efforts to immobilize and seal the source in place;
- 5. A brief description of the attempted recovery effort;
- 6. Depth of the source;
- 7. Depth of the top of the cement plug;
- 8. Depth of the well;

9. The immediate threat to public health and safety justification for implementing abandonment if prior approval was not obtained in accordance with 45.6(25) “c”(2);

10. Any other information, such as a warning statement, contained on the permanent identification plaque; and

11. The names of state agencies receiving a copy of this report.

d. Whenever a sealed source containing radioactive material is abandoned downhole, the licensee shall provide a permanent plaque¹ for posting the well or well-bore. This plaque shall:

(1) Be constructed of long-lasting material, such as stainless steel or Monel; and

(2) Contain the following information engraved on its face:

1. The word “CAUTION”;

2. The radiation symbol without the conventional color requirement;

3. The date of abandonment;

4. The name of the well operator or well owner;

5. The well name and well identification number(s) or other designation;

6. The sealed source(s) by radionuclide and activity;

7. The source depth and the depth to the top of the plug; and

8. An appropriate warning, depending on the specific circumstances of each abandonment.¹

e. The licensee shall immediately notify the agency by telephone and subsequently by confirming letter if the licensee knows or has reason to believe that radioactive material has been lost in or to an underground potable aquifer. Such notice shall designate the well location and shall describe the magnitude and extent of loss of radioactive material, assess the consequences of such loss, and explain efforts planned or being taken to mitigate these consequences.

45.6(26) Reserved.

45.6(27) *Radioactive markers.* The licensee may use radioactive markers in wells only if the individual markers contain quantities of licensed material not exceeding the quantities specified in 641—Chapter 39, Appendix B, Exempt Quantities. The use of markers is subject only to the requirements of 45.6(10).

45.6(28) *Uranium sinker bars.* The licensee may use uranium sinker bars in well-logging applications only if they are legibly impressed with the words “CAUTION—RADIOACTIVE-DEPLETED URANIUM” and “NOTIFY CIVIL AUTHORITIES [or Company name] IF FOUND.”

45.6(29) *Use of a sealed source in a well without a surface casing.* The licensee may use a sealed source in a well without a surface casing for protecting fresh water aquifers only if the licensee follows a procedure for reducing the probability of the source’s becoming lodged in the well. The procedure must be approved by the NRC or licensing or agreement state.

45.6(30) *Energy compensation source.* The licensee may use an energy compensation source (ECS) which is contained within a logging tool, or other tool components, only if the ECS contains quantities of licensed material not exceeding 100 microcuries (3.7 MBq).

a. For well-logging applications with a surface casing for protecting fresh water aquifers, use of the ECS is only subject to the requirements of 45.6(9) to 45.6(11).

b. For well-logging applications without a surface casing for protecting fresh water aquifers, use of the ECS is only subject to the requirements of 45.6(4), 45.6(9) to 45.6(11), 45.6(25), and 45.6(29).

45.6(31) *Tritium neutron generator target source.*

a. Use of a tritium neutron generator target source that contains quantities not exceeding 30 curies (1110 MBq) and that is in a well with a surface casing to protect fresh water aquifers is subject to the requirements of this rule except subrules 45.6(4), 45.6(12), and 45.6(25).

b. Use of a tritium neutron generator target source that contains quantities exceeding 30 curies (1110 MBq) or that is in a well without a surface casing to protect fresh water aquifers is subject to the requirements of this rule except subrule 45.6(12).

CHAPTER 45—APPENDIX A
SUBJECTS FOR INSTRUCTION OF
RADIOGRAPHER'S ASSISTANTS

Training provided to qualify individuals as radiographer's assistants in compliance with 45.1(10) shall be presented on a formal basis. The training shall include the following subjects:

- I. Fundamentals of radiation safety
 - A. Characteristics of radiation
 - B. Units of radiation dose and quantity of radioactivity
 - C. Significance of radiation dose
 - 1. Radiation protection standards
 - 2. Biological effects of radiation
 - 3. Case histories of radiography accidents
 - D. Levels of radiation from sources of radiation
 - E. Methods of controlling radiation dose
 - 1. Working time
 - 2. Working distances
 - 3. Shielding
- II. Radiation detection instrumentation to be used
 - A. Use of radiation survey instruments
 - 1. Operation
 - 2. Calibration
 - 3. Limitations
 - B. Survey techniques
 - C. Use of personnel monitoring equipment
 - 1. Film badges
 - 2. Thermoluminescent dosimeters (TLDs)
 - 3. Pocket dosimeters
 - 4. OSL devices
- III. The requirements of pertinent federal and state regulations
- IV. The licensee's or registrant's written operating and emergency procedures
- V. Radiographic equipment to be used
 - A. Remote handling equipment
 - B. Operation and control of radiographic exposure devices and sealed sources, including pictures or models of source assemblies (pigtailed)
 - C. Storage and transport containers, source changers
 - D. Operation and control of X-ray equipment
 - E. Collimators

CHAPTER 45—APPENDIX B

GENERAL REQUIREMENTS FOR INSPECTION OF
INDUSTRIAL RADIOGRAPHIC EQUIPMENT

- I. Panoramic devices (devices in which the sealed source is physically removed from the shielded container during exposure) shall be inspected for:
 - A. Radiographic exposure unit
 - 1. Abnormal surface radiation levels anywhere on camera, collimator, or guide tube;
 - 2. Condition of safety plugs;
 - 3. Proper operation of locking mechanism;
 - 4. Condition of pigtail connector;
 - 5. Condition of carrying device (straps, handle, etc.);
 - 6. Proper labeling.
 - B. Source tube
 - 1. Rust, dirt, or sludge buildup inside the source tube;
 - 2. Condition of source tube connector;
 - 3. Condition of source stop;
 - 4. Kinks or damage that could prevent proper operation;
 - 5. Presence of radioactive contamination.
 - C. Control cables and drive mechanism
 - 1. Proper drive mechanism with camera, as appropriate;
 - 2. Changes in general operating characteristics;
 - 3. Condition of connector on drive cable;
 - 4. Drive cable flexibility, wear, and rust;
 - 5. Excessive wear or damage to crank assembly parts;
 - 6. Damage to drive cable conduit that could prevent the cable from moving easily;
 - 7. Connection of the control cable connector with the pigtail connector for proper mating;
 - 8. Proper operation of source position indicator, if applicable;
 - 9. Presence of radioactive contamination.
- II. Directional beam devices shall be inspected for:
 - A. Abnormal surface radiation;
 - B. Changes in the general operating characteristics of the unit;
 - C. Proper operation of shutter mechanism;
 - D. Chafing or binding of shutter mechanism;
 - E. Damage to the device that might impair its operation;
 - F. Proper operation of locking mechanism;
 - G. Proper drive mechanism with camera, as appropriate;
 - H. Condition of carrying device (strap, handle, etc.);
 - I. Proper labeling.
- III. X-ray equipment shall be inspected for:
 - A. Change in the general operating characteristics of the unit;
 - B. Wear of electrical cables and connectors;
 - C. Proper labeling of console;
 - D. Proper console with machine, as appropriate;
 - E. Proper operation of locking mechanism;

F. Timer run-down cutoff;

G. Damage to tube head housing that might result in excessive radiation levels.

CHAPTER 45—APPENDIX C

TIME REQUIREMENTS FOR RECORD KEEPING

Specific Section	Name of Record	Time Interval Required for Record Keeping
45.1(4)	Receipt, transfer and disposal.	3 years.
45.1(5)	Survey instrument calibrations.	3 years.
45.1(6)	Quarterly inventory.	3 years.
45.1(7)	Utilization logs.	3 years.
45.1(8)	Quarterly inspection and maintenance.	3 years.
45.1(9)	High radiation area control devices or alarm systems.	Until disposal is authorized by the agency.
45.1(10)	Training and testing records.	3 years.
45.1(12)	Pocket dosimeter readings.	3 years.
	Pocket dosimeter calibrations.	3 years.
	Film badge, OSL device, or TLD reports.	Until the agency terminates the license.
	Alarming ratemeter calibrations.	3 years.
	Alarming ratemeter functions.	3 years.
	Estimates of overexposures.	Until the agency terminates the license.
45.1(19)	Current operating and emergency procedures.	Until the license is terminated.
	Superseded material.	3 years after change.
40.81(1)	Internal audit program.	3 years.
45.1(11)	Radiographer audits.	3 years.
45.2(5) and 45.3(7)	Radiation surveys.	2 years or until disposal is authorized by the agency if a survey was used to determine an individual's exposure.
45.1(16)	Records at temporary job sites.	During temporary job site operations.
45.2(6) and 45.3(8)	Annual evaluation of enclosed X-ray systems.	2 years.
45.3(5)	Leak tests.	3 years.
45.2(6)	Evaluation of certified cabinet X-ray systems.	2 years.

CHAPTER 45—APPENDIX D

OPERATING AND EMERGENCY PROCEDURES

The licensee's or registrant's operating and emergency procedures shall include instructions in at least the following:

- A. Handling and use of sources of radiation for industrial radiography such that no individual is likely to be exposed to radiation doses that exceed the limits established in 641—Chapter 40;
- B. Methods and occasions for conducting radiation surveys, including lock-out survey requirements;
- C. Methods for controlling access to industrial radiography areas;
- D. Methods and occasions for locking and securing sources or radiation;
- E. Personnel monitoring and the use of personnel monitoring equipment, including steps to be taken immediately by industrial radiographic personnel in the event a pocket dosimeter is found to be off-scale;
- F. Methods of transporting equipment to field locations, including packing of sources of radiation in the vehicles, placarding of vehicles, and controlling of sources of radiation during transportation (including applicable U.S. Department of Transportation requirements);
- G. Methods or procedures for minimizing exposure of individuals in the event of an accident, including procedures for a disconnect accident, a transportation accident, and loss of a sealed source;
- H. Procedures for notifying proper personnel in the event of an accident;
- I. Specific posting requirements;
- J. Maintenance of records (Appendix C); and
- K. Inspection and maintenance of radiographic exposure devices, source changers, storage containers, transport containers, source guide tubes, crank-out devices, and radiation machines.

CHAPTER 45—APPENDIX E

SUBJECTS TO BE INCLUDED IN TRAINING COURSES FOR LOGGING SUPERVISORS

- I. Fundamentals of radiation safety.
 - A. Characteristics of radiation.
 - B. Units of radiation dose and quantity of radioactivity.
 - C. Significance of radiation dose.
 - 1. Radiation protection standards.
 - 2. Biological effects of radiation dose.
 - D. Levels of radiation from sources of radiation.
 - E. Methods of minimizing radiation dose.
 - 1. Working time.
 - 2. Working distances.
 - 3. Shielding.
 - F. Radiation safety practices including prevention of contamination and methods of decontamination.
- II. Radiation detection instrumentation to be used.
 - A. Use of radiation survey instruments.
 - 1. Operation.
 - 2. Calibration.
 - 3. Limitations.
 - B. Survey techniques.
 - C. Use of personnel monitoring equipment.
- III. Equipment to be used.
 - A. Handling equipment.
 - B. Sources of radiation.
 - C. Storage and control of equipment.
 - D. Operation and control of equipment.
- IV. The requirements of pertinent federal and state regulations.
- V. The licensee's or registrant's written operating and emergency procedures.
- VI. The licensee's or registrant's record-keeping procedures.

CHAPTER 45—APPENDIX F

EXAMPLE OF PLAQUE FOR IDENTIFYING WELLS CONTAINING SEALED SOURCES
CONTAINING RADIOACTIVE MATERIAL ABANDONED DOWNHOLE

The size of the plaque should be convenient for use on active or inactive wells, e.g., a 7-inch square. Letter size of the word “CAUTION” should be approximately twice the letter size of the rest of the information, e.g., ½-inch and ¼-inch letter size, respectively.

These rules are intended to implement Iowa Code chapters 136B and 136C.

- [Filed 4/7/80, Notice 2/6/80—published 4/30/80, effective 7/1/80]
- [Filed 5/17/85, Notice 2/27/85—published 6/5/85, effective, see rule 41.7]
- [Filed 11/6/87, Notice 9/23/87—published 12/2/87, effective 1/6/88]
- [Filed 7/17/92, Notice 5/27/92—published 8/5/92, effective 9/9/92]
- [Filed 9/17/93, Notice 8/4/93—published 10/13/93, effective 1/1/94]
- [Filed 7/14/94, Notice 6/8/94—published 8/3/94, effective 9/7/94]
- [Filed 5/15/95, Notice 3/29/95—published 6/7/95, effective 7/12/95]
- [Filed 1/11/96, Notice 10/11/95—published 1/31/96, effective 3/6/96]
- [Filed 9/16/96, Notice 7/17/96—published 10/9/96, effective 11/16/96]
- [Filed 5/16/97, Notice 4/9/97—published 6/4/97, effective 7/9/97]
- [Filed 3/18/98, Notice 1/14/98—published 4/8/98, effective 7/1/98]
- [Filed 4/2/99, Notice 1/13/99—published 4/21/99, effective 7/1/99]
- [Filed 6/25/99, Notice 5/5/99—published 7/14/99, effective 9/15/99]

¹ or CAUTION

² An example of a suggested plaque is shown in Appendix F of this chapter.

³ Appropriate warnings may include: (a) “Do not drill below plug-back depth”; (b) “Do not enlarge casing”; or (c) “Do not re-enter the hole”, followed by the words, “before contacting the Iowa Department of Public Health.”

CHAPTER 46
MINIMUM REQUIREMENTS FOR TANNING FACILITIES

641—46.1(136D) Purpose and scope. This chapter provides for the permitting and regulation of tanning facilities and devices used for the purpose of tanning human skin through the application of ultraviolet radiation. This includes but is not limited to public and private businesses, hotels, motels, apartments, condominiums, and health and country clubs. Tanning facilities that follow these rules are not relieved from the requirements of any other federal and state regulations or local ordinances.

[ARC 7834C, IAB 4/17/24, effective 5/22/24]

641—46.2(136D) Definitions. The definitions set forth in Iowa Code section 136D.2 are incorporated herein by reference.

“Board of health” means a county, city, or district board of health that has a 28E agreement with the department to perform inspections under this chapter.

“Cleansing” means to remove soil, dirt, oils or other residues from the surface of the tanning unit which may come into contact with the skin.

“Cleansing agent” means a substance capable of producing the effect of “cleansing.” These agents shall not adversely affect the equipment or the health of the consumer and be acceptable to the department or board of health.

“Consumer” means any member of the public who is provided access to a tanning facility in exchange for a fee or other compensation, or any individual who, in exchange for a fee or other compensation, is afforded use of a tanning facility as a condition or benefit of membership or access.

“Exposure position” means any position, distance, orientation, or location relative to the radiation surfaces of a tanning device at which the user is intended to be exposed to ultraviolet radiation from the product, as recommended by the manufacturer.

“Formal training” means a course of instruction approved by the department for operators of tanning facilities.

“Health care professional” means an individual, licensed by the state of Iowa, who has received formal medical training in the use of phototherapy.

“Inspection” means an official examination or observation to determine compliance with statutes, rules, orders, or other applicable conditions.

“Manufacturer’s recommendations” means written guidelines established by a manufacturer and approved by the U.S. Food and Drug Administration for the installation and operation of the manufacturer’s equipment.

“Operator” means an individual designated to control operation of the tanning facility and to instruct and assist the consumer in the proper operation of the tanning devices.

“Permit” or *“permit to operate”* means a document issued by the department that authorizes a person to operate a tanning facility in Iowa.

“Person” means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this state, any other state, or political subdivision or agency thereof, and any legal successor, representative, agent, or agency of the foregoing, but does not include federal government agencies.

“Ultraviolet radiation” means electromagnetic radiation with wavelengths in air between 200 and 400 nanometers.

[ARC 7834C, IAB 4/17/24, effective 5/22/24]

641—46.3(136D) Exemptions. The department may, upon application or its own initiative, grant exemptions from these rules as long as it will not result in undue hazard to public health and safety. The following categories of devices are exempt from the provisions of this chapter:

46.3(1) Devices intended for purposes other than the deliberate exposure of human skin to ultraviolet radiation that produce or emit ultraviolet radiation incidental to their proper operation.

46.3(2) Tanning devices that are limited exclusively to personal use by an individual and the individual's immediate family. Multiple ownership of the device by persons for personal use only does not qualify it for the "personal use only" exemption.

46.3(3) Phototherapy devices used by a properly trained health care professional in the treatment of disease.

[ARC 7834C, IAB 4/17/24, effective 5/22/24]

641—46.4(136D) Permits and fees.

46.4(1) *Permit to operate.* No tanning facility may operate without a permit issued by the department.

46.4(2) *Application requirements for permit.* Prior to operating a tanning facility, an individual shall:

a. Apply for a permit on forms provided by the department or board of health, along with a nonrefundable application fee of \$5. A \$15 returned check fee will be charged for each check returned for insufficient funds.

b. Notify the department in writing within 30 days of any changes, additions, or deletions to the initial or renewal application as appropriate. This does not include changes involving replacement of components in tanning equipment.

46.4(3) *Expiration of permit.* Except as provided in paragraph 46.4(4) "b," each permit expires at the end of the specified day stated therein.

46.4(4) *Renewal of permit.*

a. Permits will be renewed annually upon the department's receipt of a completed renewal application and the \$5 fee.

b. If the completed renewal is submitted prior to expiration of the existing permit, the existing permit does not expire until the application has been finally determined by the department.

c. In addition to any annual fee not paid, tanning facilities incur a \$25 per month fee for failure to pay annual permit fees starting the month of expiration of the facility's permit.

46.4(5) *Transfer or termination of permit.* Permits are nontransferable and must be returned to the department or board of health upon cessation of operation or change of ownership.

46.4(6) *Denial, revocation, or termination of permit.*

a. The department may deny, suspend, or revoke a permit for any of the following reasons:

(1) Submission of false information to the department, including in a permit application;

(2) Operation of the tanning facility in a manner that causes or threatens hazard to the public health or safety;

(3) Failure to allow authorized representatives of the department or board of health to enter the tanning facility at reasonable times for the purpose of determining compliance with the provisions of this chapter, conditions of the permit, or an order of the department or board of health;

(4) Failure to pay fees in accordance with rule 641—46.4(136D); and

(5) Violation of any of the provisions of this chapter or Iowa Code chapter 136D.

b. Except in cases where public health and safety require otherwise, prior to the institution of proceedings for suspension or revocation of a permit, the department or board of health will notify the permit holder, in writing, of the facts or conduct warranting such action and provide an opportunity for the permit holder to demonstrate or achieve compliance.

c. Any person aggrieved by a decision by the department to deny, suspend, or revoke a permit may request a contested case hearing pursuant to 481—Chapter 9.

d. After suspension or revocation, a permit may be reinstated upon payment of a \$50 fee and completion of all other requirements. This fee is in addition to any other applicable fee.

46.4(7) *Inspections.*

a. Inspections will be conducted annually at the cost of the permit holder. The cost of an inspection is \$33 per tanning device, up to \$330 per facility maximum. Inspection costs are due upon receipt of notice by the facility. Facilities located within a contracted area of a board of health will be paid to the contracted board of health or its designee. Inspection costs not received within 45 days of the date of billing will be assessed a \$25 per month penalty for each month or fraction thereof that payment is delinquent.

b. A penalty fee of \$25 per facility may be assessed for:

(1) Failure to respond to a notice of violation within 30 days of the date of the inspection.

(2) Failure to correct violations cited during the inspection.

c. Inspections include but are not limited to reviewing proper operation and maintenance of devices, necessary records and training documentation, and operator understanding and competency.

[ARC 7834C, IAB 4/17/24, effective 5/22/24]

641—46.5(136D) Construction and operation of tanning facilities. The following are minimum standards for the construction, operation, and maintenance of tanning facilities:

46.5(1) Warning signs. A tanning facility shall provide and post warning signs and statements as follows:

a. The warning sign must use minimum 0.5-inch (12.7-millimeter) letters for the statement “DANGER, ULTRAVIOLET RADIATION” and 0.25-inch (6.4-millimeter) letters for other lettering; use red lettering against a white background; be at least 9.0 inches by 12.0 inches (22.9 centimeters × 30.5 centimeters); and have the following wording:

DANGER

ULTRAVIOLET RADIATION

— Overexposure can cause

- Eye and skin injury

- Allergic reaction

— Repeated exposure may cause

- Premature aging of the skin

- Skin cancer

— Failure to wear protective eyewear may result in

- Severe burns to eyes

- Long-term injury to eyes

— Medication or cosmetics may increase your sensitivity

b. A warning sign as set forth in paragraph 46.5(1)“a” will be posted in a conspicuous location readily visible to consumers entering the facility and in a conspicuous location within one meter of the tanning device readily visible to a person preparing to use the device.

c. A tanning facility shall require each consumer to read the information in Appendices 1, 2, and 3 prior to the consumer’s initial exposure and annually thereafter. The consumer must sign a statement that the information has been read and understood. The information in Appendices 1, 2, and 3 must also be posted in each tanning room.

46.5(2) Federal certification. Only tanning devices manufactured and certified under the provisions of 21 CFR section 1040.20 may be used in tanning facilities. Compliance is based on the standard in effect at the time of manufacture as shown on the device identification label required by 21 CFR sections 1010.2 and 1010.3. Labeling shall be in accordance with 21 CFR section 1040.20(d).

46.5(3) Tanning device timers. Each tanning device shall have a timer that complies with 21 CFR section 1040.20(c). Each tanning device must have a method of remote timing so consumers cannot control their own exposure time. Tokens for token timers shall not be issued to any consumer in quantities greater than the device manufacturer’s maximum recommended exposure time for the consumer.

46.5(4) Temperature limits. The operator shall ensure that the facility’s interior temperature does not exceed 100 degrees F or 38 degrees C.

46.5(5) Condition of tanning devices. The tanning devices shall be maintained in good repair and comply with all state and local electrical code requirements, and include physical barriers to protect consumers from injury induced by falling against or breaking the lamps.

46.5(6) Stand-up booths. Additionally, stand-up booths shall be constructed:

a. Utilizing physical barriers (e.g., handrails) or other means (floor markings) to indicate the proper exposure distance between ultraviolet lamps and the consumer’s skin.

b. To withstand the stress of use and the impact of a falling person.

c. Utilizing rigid construction, with doors that open outwardly, and with handrails and nonslip floors.

46.5(7) Protective eyewear.

- a. Eyewear shall not be reused by another consumer.
- b. Protective eyewear shall meet the criteria of 21 CFR section 1040.20(c)(4).
- c. Protective eyewear shall not be altered in any manner that would change its use as intended by the manufacturer (e.g., removal of straps).
- d. A tanning facility operator shall verify that a consumer has protective eyewear in accordance with this subrule and not allow a consumer to use a tanning device if that consumer does not use the protective eyewear. The operator should:
 - (1) Ask to see the eyewear before the consumer enters the tanning room; or
 - (2) Provide disposable eyewear in the tanning room at all times and post a sign stating that the disposable eyewear is available and has to be worn.
- e. A tanning facility operator shall instruct the consumer in the proper utilization of the protective eyewear.

46.5(8) Operation.

- a. A trained operator must be present when a tanning device is operated and within hearing distance to allow the consumer to easily summon help if necessary. If the operator is not in the immediate vicinity during use, the consumer must be able to summon help through use of an audible device such as an intercom or buzzer and the operator or emergency personnel must be able to reach the consumer within a reasonable amount of time after being summoned.
- b. The facility's permit will be displayed pursuant to Iowa Code section 136D.6.
- c. A record of each consumer's total number of tanning visits and tanning times, exposure lengths in minutes, times and dates of the exposure, and any injuries or illness resulting from the use of a tanning device must be maintained.
- d. Any tanning injury not requiring a physician's care and any resulting changes in tanning sessions shall be noted in the consumer's file. A written report of any tanning injury requiring a physician's care shall be provided to the department within five working days of its occurrence or operator's notice thereof. The report will include:
 - (1) The name of the affected individual;
 - (2) The name and location of the tanning facility involved;
 - (3) The nature of the injury;
 - (4) The name and address of the health care provider treating the affected individual, if any; and
 - (5) Any other information considered relevant to the situation.
- e. Defective or burned-out lamps or filters shall be replaced with a type intended for use in that device as specified on the product label on the tanning device or with lamps or filters that are "equivalent" under 21 CFR Section 1040.20, and policies applicable at the time of lamp manufacture.
- f. Ultraviolet lamps and bulbs that are not otherwise defective or damaged will be replaced at such frequency or after such duration of use as is recommended by the manufacturer.
- g. Contact surfaces of tanning devices shall be:
 - (1) Cleansed by the operator with a cleansing agent between each use;
 - (2) Covered by a nonreusable protective material during each use; or
 - (3) Cleansed by the consumer after use, provided the following conditions are met:
 - 1. The operator instructs the consumer annually on how to properly cleanse the unit;
 - 2. The consumer annually signs a statement that the consumer agrees to cleanse the unit after each use;
 - 3. Signs are posted in each tanning room reminding the consumer to cleanse the tanning unit after each use and instructing the proper way to cleanse the unit; and
 - 4. The operator cleanses the tanning unit at least once a day.
- h. Records or documentation required by this chapter must be maintained in the tanning facility for a minimum of two years. If maintained electronically, such records must be retrievable as a printed copy.
- i. The operator shall limit a consumer's exposure to the maximum exposure frequency and session duration recommended by the manufacturer.
- j. When a tanning device is being used, no other person can be allowed in the tanning device area.

k. “Unlimited” tanning packages cannot be advertised or promoted unless tanning frequency limits set by the manufacturer are included therein.

46.5(9) *Training of operators.*

a. All operators must satisfactorily complete a training program approved by the department prior to operating a tanning device that includes:

- (1) Education on this chapter;
- (2) Procedures for correct operation of the tanning facility and tanning devices;
- (3) The determination of skin type of consumers and appropriate duration of exposure to tanning devices;
- (4) Recognition of reaction or overexposure;
- (5) Manufacturer’s procedures for operation and maintenance of tanning devices; and
- (6) Competency testing.

b. Owners and managers must complete formal training approved by the department. All owners and managers must satisfactorily pass a certification examination approved by the department before operating a tanning facility or training employees.

c. Owners and managers are responsible to train operators in the above topics and to provide review as necessary. Operators will be questioned during inspections as to the level of their understanding and competency in operating the tanning device.

d. Proof of training for owner/managers and employees must be maintained in the tanning facility and available for inspection. The employee record should be the original test signed by the employee, the date, and a statement signifying that all answers have been completed by the employee and without prior knowledge of the scoring key.

e. Operators shall be at least 16 years of age.

f. Training and testing will be completed every five years.

46.5(10) *Promotional materials.* A tanning facility shall not claim, or distribute materials claiming, that tanning devices are safe, that tanning devices are free from risk, or that use of the device will result in medical or health benefits. The only claim that may be made is that the device is for cosmetic use only.

46.5(11) *Electronically controlled facilities.* Electronically controlled facilities are facilities that rely on electronic means to monitor consumers.

a. Entry into the facility is allowed by card only. Only one individual may enter under each card. The card is specifically activated for tanning use if the facility offers other activities and tanning will not activate if the card is not programmed for tanning. The card will not activate if two individuals are in the tanning room.

b. Police and all emergency services will have access to the facility through a key box located outside the entrance of the facility.

c. The consumer must sign a tanning agreement stating the number of minutes per session, that the consumer agrees to wear protective eyewear, that the consumer will cleanse the unit after tanning, and that the consumer is aware of the emergency access in each room.

d. The card will be programmed for the number of minutes the consumer is allowed to tan and may be reprogrammed for an increase in minutes per session only after the consumer has reviewed and re-signed the tanning agreement. The card will be deactivated after 30 consecutive days without consumer access such that the consumer will then reapply to access the tanning unit.

e. The operator will demonstrate to each consumer how to properly cleanse the unit after tanning, including the top, bottom, and handles. A sign will be placed in each room explaining the cleansing process. The operator will cleanse the units at least once per day when they are in use.

f. Free disposable eyewear will be placed in each room along with a sign stating that the disposable eyewear is available and must be worn.

g. An emergency call button or device that calls the operator or emergency personnel will be placed in each tanning room conveniently located within reach of the tanning bed.

h. During annual inspections, the inspector may ask any consumer about any of the above processes.

[ARC 7834C, IAB 4/17/24, effective 5/22/24]

641—46.6(136D) Inspections, violations and injunctions.

46.6(1) *Access.* The director or an authorized agent has access to any tanning facility as authorized by Iowa Code section 136D.8.

46.6(2) *Civil penalty and enforcement.* The department may take legal action as provided in Iowa Code sections 136D.8(3) and 136D.9.

a. The department will take the following steps or use county ordinances or any other applicable ordinances, resolutions, rules or regulations when enforcement of these rules is necessary.

- (1) Cite each section of the Iowa Code or rules violated and any civil penalty imposed.
- (2) Specify the manner in which the owner or operator failed to comply.
- (3) Specify the steps required for correcting the violation.
- (4) Request a corrective action plan, including a time schedule for completion of the plan.
- (5) Set a reasonable time limit, not to exceed 30 days from the receipt of the notice, within which the permit holder must respond with the corrective action plan and, if applicable, any reasons why the civil penalty should not be imposed or to request a contested case hearing pursuant to 481—Chapter 9.

b. The department will review the corrective action plan and approve it or require that it be modified.

[ARC 7834C, IAB 4/17/24, effective 5/22/24]

These rules are intended to implement Iowa Code chapter 136D.

Appendix 1

POTENTIAL PHOTSENSITIZING AGENTS

1. Not all individuals who use or take these agents will experience a photosensitive reaction or the same degree of photosensitive reaction. An individual who experiences a reaction on one occasion will not necessarily experience it again or every time.

2. Names of agents should be considered only as examples. They do not represent all the names under which a product may be sold. A more complete list is available from the facility operator.

3. If you are using an agent in any of these classes, you should reduce UV exposure even if your particular medication is not listed.

Acne treatment (Retinoic acid, Retin-A) Psoralens (5-Methoxypsoralen, 8-Methoxypsoralen, 4,5,8-trimethyl-psoralen)

Antibacterials (deodorant bar soaps, antiseptics, cosmetics, halogenated carbanilides, halogenated phenols, halogenated salicylanilides, bithionol, chlorhexidine, hexachlorophene)

Antibiotics, anti-infectives (Tetracyclines)

Anticonvulsants (carbamazepine, trimethadione, promethazine)

Antidepressants (amitriptyline, Desipramine, Imipramine, Nortriptyline, Protriptyline), Tranquilizers, anti-emetics (Phenothiazines)

Antidiabetics (glucose-lowering agents) (sulfonylureas, oral antidiabetics, hypoglycemics)

Antihistamines (diphenhydramine, promethazine, triprolidine, chlorpheniramine)

Anti-inflammatory (Piroxicam), Non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen, Piroxicam)

Antimicrobials (griseofulvin), Sulfonamides ("Sulfa drugs," antimicrobials, anti-infectives)

Atropine-like drugs (anticholinergics, antiparkinsonism drugs, antispasmodics, synthetic muscle relaxants)

Coal tar and derivatives (Denorex, Tegrin, petroleum products used for psoriasis and chronic eczema and in shampoos)

Contraceptives, oral and estrogens (birth control pills, estrogens, progesterones)

Dyes (used in cosmetic ingredients, acridine, anthracene, eosin (lipstick), erythrosine, fluorescein, methyl violet, methylene blue, rose bengal)

Perfumes and toilet articles (musk ambrette, oil of bergamot, oil of cedar, oil of citron, oil of lavender, oil of lemon, oil of lime, oil of rosemary, oil of sandalwood)

Thiazide diuretics ("water pills")

Appendix 2

SUN-REACTIVE SKIN TYPES USED IN CLINICAL PRACTICE

SKIN TYPE	SKIN REACTIONS TO SOLAR RADIATION ^(a) EXAMPLES	EXAMPLES
I	Always burns easily and severely (painful burn). Tans little or none and peels.	People most often with fair skin, blue eyes, freckles. Unexposed skin is white.
II	Usually burns easily and severely (painful burn). Tans minimally or lightly, also peels.	People most often with fair skin; red or blonde hair; blue, hazel or even brown eyes. Unexposed skin is white.
III	Burns moderately and tans about average.	Normal average Caucasoid. Unexposed skin is white.
IV	Burns minimally, tans easily, and above average with each exposure. Exhibits IPD (immediate pigment darkening) reaction.	People with white or light brown skin, dark skin, dark brown hair, dark eyes. Unexposed skin is brown.
V	Rarely burns, tans easily and substantially. Always exhibits IPD reaction.	Unexposed skin is brown.
VI	Never burns and tans profusely; exhibits IPD reaction.	Unexposed skin is black.

(a) Based in the first 45-60 minutes (= 2-3 minimum erythema dose) exposure of the summer sun (early June) at sea level

Appendix 3

POTENTIAL NEGATIVE HEALTH EFFECTS
RELATED TO ULTRAVIOLET EXPOSURE

1. Increased risk of skin cancer later in life.
2. Increased risk of skin thickening, age spots, irregular pigmentation, and premature aging.
3. Possibility of burning or rash, especially if using any of the potential photosensitizing drugs and agents. The consumer should consult a physician before using a tanning device if using medications, if there is a history of skin problems or if the consumer is especially sensitive to sunlight.
4. Increased risk of eye damage unless proper eyewear is worn. Iowa law requires the use of proper eyewear during tanning sessions.

TANNING SYSTEMS

1. Low-pressure tanning systems use a higher percentage of UVB rays that penetrate only the upper layer of skin and can cause burning more easily than high-pressure tanning systems. Low-pressure systems require more frequent sessions to maintain a tan.

High-intensity tanning systems use more lamps and shorter tanning sessions than low-intensity tanning systems. These are still classified as low-pressure systems.

2. High-pressure tanning systems use a higher percentage of UVA rays that penetrate more deeply and can permanently damage the lower layers of skin and increase the incidences of skin cancers. High-pressure systems require fewer and less frequent sessions to maintain a tan.

3. The exposure schedule for each specific unit is shown on the labeling on the tanning unit. Iowa law requires the operator to limit the exposure of each consumer to the exposure schedule shown on the unit in which the consumer is tanning.

These rules are intended to implement Iowa Code chapter 136D.

CHAPTER 50 ORAL HEALTH

641—50.1(135) Purpose. The purpose of establishing the state public health dental director position and the oral health bureau within the Iowa department of public health is to create a strong oral health unit with sufficient leadership and capacity to determine priorities, develop plans, make funding decisions, and establish policies that improve the oral health of all Iowans. These rules will enhance the efficiency of state government, strengthen relationships with federal and local authorities, and improve interrelationships between the public and private sectors.

641—50.2(135) Definitions. For purposes of this chapter, the following definitions apply:

“Core public health functions” means the functions of health assessment, policy development, and assurance.

1. Assessment: regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets.

2. Policy development: development, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values and is in accordance with state public health policy.

3. Assurance: ensuring, by encouragement, regulation, or direct action, that programs and interventions which maintain and improve health are carried out.

“Dental care for persons with disabilities program” means the department program to provide dental services to low-income children and young adults with special health care needs.

“Dental home” means a network of individualized care based on risk assessment, which includes oral health education, dental screenings, preventive services, diagnostic services, treatment services, and emergency services.

“Dental sealant program” means the department program implemented through public or private nonprofit agencies to provide dental examinations or screenings and dental sealants to children in a school-based setting.

“Department” means the Iowa department of public health.

“Direct dental services” means those services generally delivered one-on-one between a health professional and a client.

“Enabling services” means services that allow or provide for access to and the derivation of benefits from the array of basic health care services and includes activities such as outreach, case management, health education, transportation, translation, home visits, support services, and other services.

“EPSDT” means the Early and Periodic Screening, Diagnosis, and Treatment program which provides for regular preventive health care services for children aged 0 to 21 as authorized by Title XIX of the Social Security Act.

“Fluoride mouth rinse program” means the department program implemented through elementary schools and middle schools, which includes oral health education and weekly rinsing with fluoride. The program targets schools with children at high risk for tooth decay.

“Gap filling” means direct health services supported by public health staff or resources that are needed but are not otherwise accessible in the community.

“Infrastructure building” means activities directed at improving and maintaining the health status of all clients by providing support for the development and maintenance of comprehensive health service systems, including development and maintenance of health service standards or guidelines, training, data, and planning systems.

“I-Smile program” means the department program implemented through public and private nonprofit agencies and private health care providers to increase access to dental care for children and to ensure a dental home.

“Medicaid” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from the United States Department of Health and Human Services.

“Oral health education” means information provided by a health professional about dental disease, prevention, and anticipatory guidance, including oral habits, oral development, fluoride exposure, and dietary counseling.

“Population-based services” means preventive interventions and personal health services developed for and available to populations of the state rather than for individuals in a one-on-one situation. Disease prevention, health promotion, and statewide outreach are major components.

“Senior smiles program” means the department program implemented through public and nonprofit private agencies to provide oral screenings and interventions for older Iowans.

“Title V” means Title V of the Social Security Act and the federal requirements contained in the Omnibus Reconciliation Act of 1989 (Public Law 101-239) which address the Maternal and Child Health and Children with Special Health Care Needs programs.

“Title V maternal and child health program” means the department program implemented through local public or private nonprofit agencies for the assurance of access to preventive and primary child and maternal health services and services to children with special health care needs in accordance with 641—Chapter 76, Maternal and Child Health Program. Through this program, agencies are responsible for ensuring access to dental services, with an emphasis on early intervention and preventive oral health care beginning at or near the age of 12 months and continuing into adulthood.

“Title XIX” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from the United States Department of Health and Human Services.

“Vulnerable populations” means individuals and groups whose needs are not addressed by traditional dental service providers and health care systems.

[ARC 7672B, IAB 4/8/09, effective 4/15/09]

641—50.3(135) Dental director responsibilities. The state public health dental director shall provide overall leadership of the state oral health program and shall be responsible for the following duties:

1. Plan and direct all work activities of the statewide public health dental program.
2. Develop comprehensive initiatives for oral health prevention and improved access to dental care.
3. Evaluate the effectiveness of the statewide public health dental program and of program personnel.
4. Manage the oral health bureau, including direction, supervision, and fiscal management of bureau staff.
5. Represent the department to external stakeholders, including public and private organizations, providers, and the general public.
6. Other related work as required.

641—50.4(135) Oral health bureau functions. The bureau shall be responsible for the core public health functions of assessment, policy development, and assurance of oral health services in Iowa.

50.4(1) Assessment. The bureau shall develop and implement an ongoing oral health surveillance system to evaluate and monitor the oral health status of children and other vulnerable population groups in Iowa. Assessment activities may include the following:

- a. Assess oral health status and needs so that problems can be identified and addressed.
- b. Assess determinants of identified oral health needs, including resources.
- c. Assess the fluoridation status of water systems and other sources of fluoride.
- d. Identify, investigate, and monitor oral health problems and health hazards.

50.4(2) Policy development. The bureau shall facilitate ongoing strategic planning and application of evidence-based research in oral health policy development to improve access to care and the overall oral health of all Iowans. Policy development activities may include the following:

- a. Develop plans and policies through a collaborative process that supports individual and community oral health efforts to address oral health needs.
- b. Provide leadership to address oral health problems by maintaining a strong oral health unit within the department.
- c. Mobilize partnerships with policymakers, professionals, organizations, groups, the public and others to identify and implement solutions to oral health problems.

50.4(3) Assurance. The bureau shall assist Iowans in maintaining optimal oral health throughout all stages of life by providing or ensuring infrastructure-building, population-based, and enabling services at the state and local level. Infrastructure-building and enabling services shall target the improvement of access to dental care and prevention. Population-based services shall include public health training and technical assistance, educational activities that increase oral health awareness, and activities that improve dental support systems for families.

The bureau shall leverage federal, state, and local resources to administer grant programs which include Title V maternal and child health, including the Medicaid and EPSDT programs; I-Smile program; dental sealant program; fluoride mouth rinse program; dental care for persons with disabilities program; senior smiles program; and other new and existing programs. Assurance activities may include the following:

- a.* Provide assistance and resources to local public health programs for community capacity-building efforts to identify vulnerable populations and to develop innovative approaches that link people to needed oral health services, including gap-filling direct dental services.
- b.* Inform, educate, and empower the public regarding oral health problems and solutions.
- c.* Promote and enforce laws and regulations that protect and improve oral health, ensure safety, and assure public accountability for the public's well-being.
- d.* Assure that the public health and personal health workforce has the capacity and expertise to effectively address oral health needs.
- e.* Evaluate the effectiveness, accessibility, and quality of population-based and personal oral health services.
- f.* Conduct research and support projects to gain new insights and promote innovative solutions to oral health problems.

641—50.5(135) Funding. The oral health bureau and the state public health dental director shall be funded through federal Title V funds and state matching funds, state general funds, department of human services funding, and other funds as available.

These rules are intended to implement Iowa Code Supplement sections 135.14 and 135.15.

[Editorial change: IAC Supplement 8/27/08]

[Editorial change: IAC Supplement 11/5/08]

[Filed Emergency ARC 7672B, IAB 4/8/09, effective 4/15/09]

¹ September 3, 2008, effective date of ARC 7023B [Ch 50] delayed 70 days by the Administrative Rules Review Committee at its meeting held August 12, 2008. At its meeting held October 14, 2008, the Committee delayed the effective date of 641—50.2(135), definition of “Dental home,” until adjournment of the 2009 Session of the General Assembly.

CHAPTER 51 DENTAL SCREENING

641—51.1(135) Purpose. The purpose of the dental screening requirement is to improve the oral health of Iowa's children. Dental screenings will facilitate early detection and referral for treatment of dental disease; reduce the incidence, impact, and cost of dental disease; inform parents and guardians of their children's dental problems; encourage the establishment of effective oral health practices early in life; promote the importance of oral health as an integral component of preparation for school and learning; and contribute to statewide surveillance of oral health. These rules will enhance the I-Smile dental home concepts of prevention, education, care coordination, and treatment to provide a critical step in closing the gap in access to dental care for underserved children.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.2(135) Definitions. For purposes of this chapter, the following definitions apply:

"Admitting official" means the superintendent of schools or the superintendent's designated representative if a public school; if an accredited nonpublic school, the governing official of the school.

"Applicant" means any person seeking first-time enrollment in kindergarten or ninth grade in a public or accredited nonpublic elementary school or high school in Iowa.

"Dental hygienist" means a person licensed to practice as a dental hygienist.

"Dentist" means a person licensed to practice as a dentist.

"Department" means the Iowa department of public health.

"Electronic signature" means a confidential personalized digital key, code, or number that is used for secure electronic data transmission and that identifies and authenticates the signatory.

"Elementary school" means kindergarten through grade six in an Iowa school district or accredited nonpublic school.

"Gum infection" means that gum (gingival) tissue is red, bleeding, or swollen.

"High school" means grades 9 through 12 in an Iowa school district or accredited nonpublic school.

"Injury" means soft tissue laceration or a broken or dislodged tooth.

"I-Smile" means the department program designed to increase access to dental care for children and to ensure a dental home.

"I-Smile coordinator" means a designated dental hygienist who is employed by or under contract with a local public health agency to administer the I-Smile dental home program.

"Local board of health" means a county, city, or district board of health as defined in Iowa Code section 137.102.

"No obvious problems" means a child's hard and soft tissues appear to be visually healthy and there is no apparent reason for the child to be seen before the next routine dental checkup.

"Nurse" means a person licensed to practice as a registered nurse or advanced registered nurse practitioner.

"Physician" means a person licensed to practice medicine and surgery or osteopathic medicine and surgery.

"Physician assistant" means a person licensed to practice as a physician assistant.

"Recorder" means a dentist, dental hygienist, physician, physician assistant, or nurse who is authorized to record screening information and sign the Certificate of Dental Screening form.

"Requires dental care" means that tooth decay or a white spot lesion is suspected in one or more teeth or that gum infection is suspected.

"Requires urgent dental care" means that obvious tooth decay is present in one or more teeth, there is evidence of injury or severe infection, or the child is experiencing pain.

"Severe infection" means excessive bleeding, swelling, or pus discharge; or an abscess.

"Signature" means an original signature, or authorized use of stamped signature, or electronic signature of a dentist, dental hygienist, physician, physician assistant, or nurse.

"Tooth decay" means a visible cavity or hole in a tooth with brown or black coloration, or a retained root.

“White spot lesion” means a demineralized area of a tooth, usually appearing as a chalky, white spot or white line near the gum line. A white spot lesion is considered an early indicator of tooth decay, especially in primary teeth.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.3(135) Persons included. The dental screening requirements specified in this chapter apply to all persons seeking first-time enrollment in kindergarten or ninth grade in a public or accredited nonpublic elementary school or high school in Iowa.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.4(135) Persons excluded. Exclusions to these rules are permitted on an individual basis for religious and financial hardship reasons. Applicants approved for a religious or financial hardship exemption shall submit to the admitting official a valid Iowa department of public health certificate of dental screening exemption.

51.4(1) Religious exemption. A religious exemption may be granted to an applicant if the dental screening conflicts with a genuine and sincere religious belief.

a. The certificate of dental screening exemption for religious reasons shall attest that the dental screening conflicts with a genuine and sincere religious belief and that the belief is in fact religious and not based merely on philosophical, scientific, moral, personal, or medical opposition to dental screenings.

b. The certificate of dental screening exemption for religious reasons shall be signed and dated by the applicant or, if the applicant is a minor, by the parent or guardian.

c. The certificate of dental screening exemption for religious reasons is valid only when notarized.

d. To be valid, the certificate of dental screening exemption for religious reasons shall be the department certificate or a form approved in writing by the department.

51.4(2) Financial hardship exemption. A financial hardship exemption may be granted to an applicant who is unduly burdened by the cost of a dental screening.

a. The certificate of dental screening exemption for financial hardship reasons shall attest that dental screening would cause a genuine financial burden to the applicant.

b. The certificate of dental screening exemption for financial hardship reasons shall be signed and dated by a dentist, dental hygienist, physician, physician assistant, or nurse.

c. The certificate of dental screening exemption for financial hardship reasons shall include the provider type and the provider’s name, business address, and telephone number.

d. To be valid, the certificate of dental screening exemption for financial hardship reasons shall be the department certificate or a form approved in writing by the department.

51.4(3) A faxed copy, photocopy, or electronic copy of the valid certificate of dental screening exemption is acceptable.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.5(135) Dental screening components.

51.5(1) A dental screening is a visual assessment and is noninvasive and nondiagnostic.

51.5(2) Dental instrumentation is not required for a dental screening.

51.5(3) A dental screening can identify obvious or suspected oral health conditions that require or that might require examination by a dentist.

51.5(4) The dental screening shall include the following steps:

a. Visual inspection of the soft tissues, including the lips, cheeks, gums, tongue, floor of mouth, and roof of mouth, to assess infection or injury.

b. Visual inspection of all tooth surfaces to assess tooth decay, white spot lesions, or injury.

c. Documentation of the screening and treatment needs according to 641—51.9(135).

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.6(135) Dental screening providers.

51.6(1) Elementary school. A dental screening for elementary school enrollment shall be performed by a licensed dentist, a licensed dental hygienist, a licensed physician, a licensed physician assistant, or a licensed nurse.

51.6(2) *High school.* A dental screening for high school enrollment shall be provided by a licensed dentist or a licensed dental hygienist.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.7(135) Time line for valid dental screening.

51.7(1) Elementary school. To be valid, a minimum of one dental screening shall be performed on an applicant no earlier than three years of age but no later than four months after the enrollment date.

51.7(2) High school. To be valid, a minimum of one dental screening shall be performed on an applicant no earlier than one year prior to the enrollment date and no later than four months after the enrollment date.

51.7(3) A dental screening may also be deemed valid by the department if the department determines that the applicant has substantially complied with the dental screening requirements.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.8(135) Proof of dental screening. The applicant or, if a minor, the parent or guardian of a child enrolled in elementary school or high school shall submit a valid Iowa department of public health certificate of dental screening to the admitting official of the school district or accredited nonpublic elementary school in which the applicant wishes to enroll.

51.8(1) To be valid, the certificate of dental screening shall be the department certificate or a form approved in writing by the department.

a. The Certificate of Dental Screening form is available on the department's website at idph.iowa.gov/ohds or is available by calling the department at (866)528-4020.

b. The certificate of dental screening shall include all information required by 641—51.9(135).

c. The certificate of dental screening may also be deemed valid by the department if the department determines that the information on the certificate substantially complies with the dental screening requirements.

51.8(2) A faxed copy, photocopy, or electronic copy of the valid certificate of dental screening is acceptable.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.9(135) Dental screening documentation.

51.9(1) *Student information.* A person authorized to perform a dental screening required by this chapter shall record the following student information or ensure that such information is recorded on the certificate of dental screening provided or approved in writing by the department of public health in cooperation with the department of education:

a. Name (first and last); and

b. Birth date.

51.9(2) *Screening information.* A person authorized to perform a dental screening required by this chapter shall record the following screening information on the certificate of dental screening provided or approved in writing by the department of public health in cooperation with the department of education:

a. Date of dental screening;

b. Treatment needs (no obvious problems, requires dental care, requires urgent dental care);

c. Provider type;

d. Provider name and telephone number; and

e. Provider or recorder signature and credentials.

[ARC 8980B, IAB 8/11/10, effective 7/14/10; ARC 5526C, IAB 3/24/21, effective 4/28/21]

641—51.10(135) Assuring dental screening services. Each public and accredited nonpublic school, in collaboration with the department, shall assure that the parent or guardian of a student enrolled in the school has complied with the dental screening requirement. Parents or guardians of students who do not have a valid certificate of dental screening shall be provided with community dental screening referral resources, including contact information for the I-Smile coordinator, the department, or a dental society.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.11(135) Records. It shall be the duty of the admitting official of an elementary school or a high school to ensure that a valid certificate of dental screening or certificate of dental screening exemption is on file for each child enrolled.

51.11(1) The admitting official shall ensure that all certificates of dental screening are properly completed according to 641—51.8(135).

51.11(2) The admitting official shall ensure that all certificates of dental screening exemption are properly completed according to 51.4(1) and 51.4(2).

51.11(3) The admitting official shall keep the certificates of dental screening or certificates of dental screening exemption on file at the school in which the applicant is enrolled and assist the applicant or the applicant's parent or guardian in the transfer of the certificate to another school upon the transfer of the applicant to another school.

51.11(4) The local board of health or its designee, the department of education, and the department or its designee shall have the right to have access to the certificates of dental screening and certificates of dental screening exemption of students enrolled in elementary schools and high schools.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.12(135) Reporting.

51.12(1) It shall be the duty of each local board of health or its designee to audit the certificates of dental screening and certificates of dental screening exemption in the schools within the local board's jurisdiction to determine compliance with 2007 Iowa Acts, chapter 146, and 2008 Iowa Acts, Senate File 2111.

51.12(2) By May 31 annually, each local board of health shall furnish the department with evidence for the preceding school year that each child enrolled in any public or accredited nonpublic school within the local board's jurisdiction met the dental screening requirement.

51.12(3) The evidence shall be in the form of a report that includes:

- a. Name of school, and
- b. Enrollments by grade, and
- c. The number of valid certificates of dental screening by grade, and
- d. The number of valid certificates for religious exemptions by grade, and
- e. The number of valid certificates for financial hardship exemptions by grade.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.13(135) Iowa's dental screening database. The department may develop and maintain a statewide dental screening database to ensure that students receive the required dental screening and to monitor oral health.

51.13(1) The database may consist of information from the valid certificates of dental screening and certificates of dental screening exemption, including identifying and demographic data.

51.13(2) The database may be updated, at a minimum, annually.

51.13(3) Database reporting shall comply with 641—51.13(135).

51.13(4) Restricted uses of database. The database information shall not be used to:

- a. Market services to students or nonstudents,
- b. Assist in bill collection services, or
- c. Locate or identify students or nonstudents for any purpose other than those expressly provided in this rule.

51.13(5) Confidentiality of database information. Dental screening information, including identifying and demographic data maintained in the database, is confidential and may not be disclosed except under the following limited circumstances:

- a. The department may release information from the database to the following:
 - (1) The person who received the dental screening or the parent or guardian of the person who received the dental screening;
 - (2) Users of the database who complete an agreement with the department that specifies the conditions under which the database can be accessed and who have been issued an identification code or password by the department;

(3) Persons or entities requesting dental screening data in an aggregate form that does not identify an individual either directly or indirectly;

(4) Agencies that complete an agreement with the department which specifies conditions for access to database information and how that information will be used. Agencies shall not use information obtained from the database to market services to students or nonstudents, to assist in bill collection services, or to locate or identify students or nonstudents for any purposes other than those expressly provided in this rule; or

(5) A representative of a state or federal agency, or an entity bound by that state or federal agency, to the extent that the information is necessary to perform a legally authorized function of that agency or the department. The state or federal agency is subject to confidentiality regulations that are the same as or more stringent than those in the state of Iowa. State or federal agencies shall not use information obtained from the database to market services to students or nonstudents, to assist in bill collection services, or to locate or identify students or nonstudents for any purposes other than those expressly provided in this rule.

b. Approved database users shall not release dental screening data except to the person who received the dental screening, the parent or guardian of the person who received the dental screening, health records staff of schools, medical, dental, or health care providers providing continuity of care, and other approved users of the database.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.14(135) Release of dental screening information.

51.14(1) *Between a dentist, dental hygienist, physician, physician assistant, or nurse, and the elementary school or high school that the child attends.* A dentist, dental hygienist, physician, physician assistant, or nurse shall disclose a student's dental screening information, including the student's name, date of birth, name of parent or guardian, demographic information, the month, day and year of the screening, and the screening results and treatment needs to an elementary school or a high school upon written or verbal request from the elementary school or high school. Written or verbal permission from a student or the student's parent or guardian is not required to release this information to an elementary school or a high school.

51.14(2) *Among dentists, dental hygienists, physicians, physician assistants, or nurses.* Dental screening information, including the student's name, date of birth, name of parent or guardian, demographic information, the month, day and year of the screening, and the screening results and treatment needs shall be provided by one dentist, dental hygienist, physician, physician assistant, or nurse to another health care provider without written or verbal permission from the student or the student's parent or guardian.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.15(135) Referral requirements. Parents or guardians of students who require dental care or require urgent dental care shall be referred to the parent's or guardian's dentist of choice. Students without a dentist or who have difficulty accessing dental care shall be referred to a local I-Smile coordinator or local public health agency for assistance with completion of dental care. This assistance may include locating dentists, scheduling appointments, and identifying payment sources.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

641—51.16(135) Provider training. For the purpose of quality assurance and consistency, the department shall make training and training materials available for dental screening providers.

[ARC 8980B, IAB 8/11/10, effective 7/14/10]

These rules are intended to implement Iowa Code section 135.17.

[Filed 7/10/08, Notice 5/21/08—published 7/30/08, effective 9/3/08]

[Filed Emergency After Notice ARC 8980B, IAB 8/11/10, effective 7/14/10]

[Filed ARC 5526C (Notice ARC 5270C, IAB 11/18/20), IAB 3/24/21, effective 4/28/21]

CHAPTER 52 VISION SCREENING

641—52.1(135) Purpose. The purpose of the child vision screening program is to improve the eye health and vision of Iowa's children. The child vision screening program establishes a comprehensive vision evaluation effort to facilitate early detection and referral for treatment of visual impairment in order to reduce vision impairment in children.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.2(135) Definitions. For purposes of this chapter, the following definitions apply:

“Advanced registered nurse practitioner” or *“ARNP”* means a person licensed to practice under rule 655—7.1(152).

“Autorefractor” means a method of vision screening involving skiascopy methods or wave-front technology to evaluate the refractive error of each eye. Depending on the autorefractor being used, this method allows for immediate results interpreted by the operator or the instrument as a pass or fail.

“Child vision screening workgroup” means a group of eye health professionals in the state of Iowa established by the director and comprised of licensed ophthalmologists, licensed optometrists, representatives or designees of leading vision organizations, and other stakeholders as determined by the director.

“Community-based organization” means a public or private nonprofit organization of demonstrated effectiveness that is representative of a community or significant segments of a community and that provides educational or related services to individuals in the community that include utilizing approved age-appropriate, acceptable child vision screening tests approved by the department.

“Comprehensive eye examination” means a clinical diagnostic assessment performed by an optometrist or ophthalmologist to assess a person's level of vision and to detect any abnormality or diseases.

“Department” means the Iowa department of public health.

“Elementary school” means an Iowa public or accredited nonpublic school that a kindergarten or third grade student would attend.

“Iowa KidSight” means a joint project of the Lions Clubs of Iowa and the University of Iowa, Department of Ophthalmology and Visual Sciences, dedicated to enhancing the early detection and treatment of vision impairments in Iowa's young children (target population six months of age through kindergarten age) through screening and public education.

“IRIS” means the immunization registry information system as established in 641—Chapter 7.

“Online vision screening” means a vision screening test administered from the Internet to a child to assess vision and includes vision test results and recommendations.

“Ophthalmologist” means a person licensed to practice medicine and surgery or osteopathic medicine and surgery pursuant to Iowa Code chapter 148 and board-certified in ophthalmology as a specialist in medical and surgical eye problems.

“Optometrist” means a person licensed to practice optometry pursuant to Iowa Code chapter 154.

“Photoscreening” means a method of vision screening employing an automated technique that uses the red reflex of the eye to screen for eye problems and produces immediate readable results and a timely report of the results thereafter.

“Physician” means a person licensed to practice medicine and surgery or osteopathic medicine and surgery pursuant to Iowa Code chapter 148.

“Physician assistant” means a person licensed to practice as a physician assistant pursuant to Iowa Code chapter 148C.

“Potential vision impairment” means that a child's vision appears to be compromised and there is reason for the child to be seen by an ophthalmologist or optometrist.

“Prevent Blindness Iowa” means the nonprofit organization dedicated to preventing blindness and preserving sight through vision screening, advocacy, education, community service, training and research.

“Student vision card” means a card distributed by the Iowa Optometric Association to all schools in Iowa pursuant to Iowa Code section 280.7A. The student vision card recommends children receive a complete eye health examination.

“*Vision screening*” means an eye testing program that is age- and developmentally appropriate and that assesses visual acuity or other risk factors contributing to refractive errors and other conditions.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.3(135) Persons included and persons excluded.

52.3(1) The parent or guardian of a child who is to be enrolled in a public or accredited nonpublic elementary school shall ensure the child is screened for vision impairment at least once before enrollment in kindergarten and again before enrollment in grade three. The child vision screening requirements specified in this chapter apply to all persons seeking first-time enrollment in kindergarten or third grade in a public or accredited nonpublic elementary school in Iowa.

52.3(2) The child vision screening requirement shall not apply if the child vision screening conflicts with a parent’s or guardian’s genuine and sincere religious belief.

52.3(3) A child shall not be prohibited from attending school based upon failure of a parent or guardian to ensure the child has received the vision screening required by these rules.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.4(135) Child vision screening components.

52.4(1) The requirement for a child vision screening may be satisfied by any of the following:

- a. A vision screening or comprehensive eye examination by an ophthalmologist or optometrist.
- b. A vision screening conducted at a pediatrician’s or family practice physician’s office, a free clinic, a child care center, a local public health department, a public or accredited nonpublic school, or a community-based organization or by an advanced registered nurse practitioner or physician assistant.

52.4(2) All vision screening methods, including emerging vision screening technologies, shall be age-appropriate and shall be approved by the department. A list of acceptable child vision screening tests will be reviewed and updated annually by the department in consultation with the child vision screening workgroup and will be listed on the department’s Web site. These tests may include but are not limited to instrument-based vision screening methods (such as photoscreening or autorefraction) and online vision screening.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.5(135) Time line for valid vision screening.

52.5(1) *Kindergarten.* To be valid, a minimum of one child vision screening shall be performed on a child no earlier than one year prior to the date of the child’s enrollment in kindergarten and no later than six months after the date of the child’s enrollment in kindergarten.

52.5(2) *Grade three.* To be valid, a minimum of one child vision screening shall be performed on a child no earlier than one year prior to the date of the child’s enrollment in the third grade and no later than six months after the date of the child’s enrollment in the third grade.

52.5(3) *Substantial compliance.* A child vision screening may also be deemed valid by the department if the department determines the child has substantially complied with the child vision screening requirements.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.6(135) Proof of child vision screening.

52.6(1) The parent or guardian of a child enrolled in kindergarten or third grade shall ensure that evidence of a child vision screening is submitted to the school district or accredited nonpublic elementary school in which the child is enrolled either electronically through IRIS pursuant to subrule 52.6(2) or in hard copy or electronic form pursuant to subrule 52.6(3).

52.6(2) If the child’s vision screening results were electronically submitted to IRIS, the parent or guardian may notify the school district or accredited nonpublic elementary school of such submission to satisfy the requirement for evidence of a child vision screening.

52.6(3) If evidence of the child vision screening is not electronically submitted to IRIS, the parent or guardian shall provide evidence of the child vision screening in hard copy or electronic form directly to the school. Hard copy or electronic evidence of the vision screening shall include the child’s first name, last name, date of birth and ZIP code; evidence of the vision screening including the date of screening, left eye

results, right eye results, vision screening result of “pass” or “fail,” and designation of “yes” or “no” for referral made; and the name of the provider who performed the vision screening.

52.6(4) Submission of a faxed copy, photocopy, or electronic copy of the child vision screening results is acceptable.

52.6(5) If a parent or guardian chooses for a child to receive a comprehensive eye examination completed by an ophthalmologist or optometrist in lieu of a vision screening, the parent or guardian may submit a completed student vision card to satisfy the requirement of this rule.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.7(135) Child vision screening reporting.

52.7(1) A person authorized to perform a child vision screening required by this chapter shall report results of the child vision screening to the department.

a. An ophthalmologist or optometrist shall report the hard-copy results to the parent or guardian to be forwarded to the department via the school or shall report the results via IRIS if available.

b. A pediatrician’s or family practice physician’s office, a free clinic, a child care center, a local public health department, a public or accredited nonpublic school, or a community-based organization or an ARNP or physician assistant shall report the hard-copy results to the parent or guardian to be forwarded to the department via the school or shall report the results via IRIS if available.

c. Results from an online vision screening administered from the Internet shall be generated in a hard-copy report to the parent or guardian to be forwarded to the department via the school or the results shall be reported via IRIS if available.

d. The results of photoscreening vision screening, including those performed by Iowa KidSight, shall be reported by hard copy to the parent or guardian to be forwarded to the department via the school or shall be reported via IRIS if available.

52.7(2) The department will collect and maintain results of the vision screenings submitted in hard copy or through IRIS.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.8(135) School requirements.

52.8(1) Each public and accredited nonpublic elementary school, in collaboration with the department, shall provide the parents or guardians of students enrolled in the school with vision screening referral resources prior to enrollment or during the enrollment period.

52.8(2) Each public and accredited nonpublic elementary school shall provide to parents or guardians of students for whom evidence of a child vision screening is not submitted community eye health referral resources, including but not limited to contact information for the local public health department, maternal and child health agency, Iowa KidSight, Prevent Blindness Iowa, the department, or an optometric or ophthalmology society.

52.8(3) Each public and accredited nonpublic elementary school shall arrange for the following to be forwarded to the department:

a. Evidence of child vision screening or comprehensive eye examination results provided by parents or guardians;

b. A list of students whose parents or guardians indicate that the students’ results were reported through IRIS; and

c. Any other evidence of vision screening or comprehensive eye examination provided to the school.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.9(135) Iowa’s child vision screening database module and follow-up. The department may develop and maintain a statewide child vision screening database module in IRIS to collect and maintain child vision screening results, to ensure students receive the required vision screening, and to monitor eye health.

52.9(1) The database module shall consist of vision screening information, including identifying and demographic data.

52.9(2) Database module reporting shall comply with rule 641—52.7(135).

52.9(3) Restricted uses of database module. The database module information shall not be used to:

- a. Market services to students or nonstudents;
- b. Assist in bill collection services; or
- c. Locate or identify students or nonstudents for any purpose other than those expressly provided in this rule.

52.9(4) Confidentiality of database module information. Child vision screening information, including identifying and demographic data maintained in the database module, is confidential and may not be disclosed except under the following limited circumstances:

a. The department may release information from the database module to the following:

(1) The person who received the child vision screening or the parent or guardian of the person who received the child vision screening;

(2) Users of the database module that complete an agreement with the department that specifies the conditions under which the database module can be accessed and that have been issued an organization code and username by the department;

(3) Persons or entities requesting child vision screening data in an aggregate form that does not identify an individual either directly or indirectly;

(4) Agencies that complete an agreement with the department which specifies conditions for access to database module information and how that information will be used;

(5) A representative of a state or federal agency, or an entity bound by that state or federal agency, to the extent the information is necessary to perform a legally authorized function of the agency or the department. The state or federal agency is subject to confidentiality regulations that are the same as or more stringent than those in the state of Iowa; or

(6) Licensed health care providers, agencies, and other persons involved with vision screenings, eye examinations, follow-up services, and intervention services as necessary to administer this chapter.

b. Approved database module users shall not release child vision screening data except to the person who received the child vision screening; the parent or guardian of the person who received the child vision screening; health records staff of schools; medical, optometry, ophthalmology or health care providers providing continuity of care; and other approved users of the database module.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

641—52.10(135) Referral requirements.

52.10(1) If a vision screening identifies a potential vision impairment in a child, the person who performed the vision screening shall, if the person is not an ophthalmologist or optometrist, refer the child to an ophthalmologist or optometrist for a comprehensive eye examination.

52.10(2) Persons performing vision screenings shall contact parents or guardians of children identified as having potential vision impairment based on the results of a vision screening required pursuant to this chapter or a comprehensive eye examination required pursuant to subrule 52.10(1) in order to provide information on obtaining necessary vision correction.

[ARC 1924C, IAB 4/1/15, effective 5/6/15]

These rules are intended to implement Iowa Code section 135.39D.

[Filed ARC 1924C (Notice ARC 1838C, IAB 1/21/15), IAB 4/1/15, effective 5/6/15]

CHAPTER 53
Reserved

CHAPTER 54
CONCUSSION OR OTHER BRAIN INJURY RETURN-TO-PLAY PROTOCOL

641—54.1(280) Purpose. This chapter describes the return-to-play protocol for concussion or other brain injury to be adopted by July 1, 2019, by the board of directors of each school district and the authorities in charge of each accredited nonpublic school with enrolled students who participate in an extracurricular interscholastic activity in grades seven through twelve. Concussions are a type of brain injury that can range from mild to severe and can disrupt the way the brain normally works. Concussions can occur in an organized or unorganized sport or recreational activity and can result from a fall or from players colliding with each other, with the ground, or with obstacles. Concussions can occur with or without loss of consciousness, but the vast majority of concussions occur without loss of consciousness.

[ARC 4193C, IAB 12/19/18, effective 1/23/19]

641—54.2(280) Definitions. For the purpose of these rules, the following definitions shall apply.

“Asymptomatic” means the student is no longer showing signs, symptoms, or behaviors consistent with a concussion or other brain injury.

“Contest” means an interscholastic athletic game or competition.

“Extracurricular interscholastic activity” means any dance or cheerleading activity or extracurricular interscholastic activity, contest, or practice governed by the Iowa High School Athletic Association or the Iowa Girls High School Athletic Union that is a contact or limited contact activity as identified by the American Academy of Pediatrics.

“Licensed health care provider” means a physician, physician assistant, chiropractor, advanced registered nurse practitioner, nurse, physical therapist, or athletic trainer licensed by a board designated under Iowa Code section 147.13.

“Medical clearance” means written clearance from a licensed health care provider releasing the student following a concussion or other brain injury to return to or commence participation in any extracurricular interscholastic activity.

“Rest” means a recovery state at which physical and cognitive activities are reduced or removed with the intent to eliminate the signs, symptoms, or behaviors of brain injury.

“Return-to-learn plan” means the plan developed by personnel of a school district or accredited nonpublic school based on guidance developed as required under Iowa Code section 280.13C(6)“b” to provide adjustments or accommodations as the student returns to the classroom.

“Return-to-play” means the gradual, step-wise approach to returning a student to participation in any extracurricular interscholastic activity following a concussion or other brain injury.

[ARC 4193C, IAB 12/19/18, effective 1/23/19]

641—54.3(280) Return-to-play protocol. The following return-to-play step-wise process shall begin when the student who has been removed from participation in any extracurricular interscholastic activity governed by the Iowa High School Athletic Association or the Iowa Girls High School Athletic Union is no longer showing signs, symptoms, or behaviors consistent with a concussion or other brain injury for a minimum of 24 hours and has received written medical clearance from a licensed health care provider to return to or commence such participation.

54.3(1) Return-to-play process. Each step shall take a minimum of 24 hours.

a. If the student shows signs, symptoms, or behaviors consistent with a concussion or other brain injury at any step of the return-to-play protocol, the student must stop the activity and the student’s licensed health care provider and parent or guardian shall be contacted.

b. If the student shows signs, symptoms, or behaviors consistent with a concussion or other brain injury during this process, an additional 24-hour period of rest shall take place. After the 24-hour period of rest, the student shall drop back to the previous level when the student showed no signs, symptoms, or behaviors consistent with a concussion or other brain injury and begin the progression again.

54.3(2) Return-to-play steps.

Step 1	Athlete has received written medical clearance from a licensed health care provider to begin the return-to-play process, AND the athlete is back to regular activities, including school, without experiencing any concussion signs, symptoms, or behaviors for a minimum of 24 hours.
Step 2	Low impact, light aerobic exercise. Walking or stationary cycling at slow to medium pace. No resistance/weight training.
Step 3	Basic exercise, such as running in the gym or on the field. No helmet or other equipment.
Step 4	Noncontact, sport-specific training drills (dribbling, ball handling, batting, fielding, running drills) in full equipment. Resistance/weight training may begin.
Step 5	Full contact practice and participation in normal training activities.
Step 6	Contest participation.

[ARC 4193C, IAB 12/19/18, effective 1/23/19]

These rules are intended to implement Iowa Code section 280.13C.

[Filed ARC 4193C (Notice ARC 4034C, IAB 9/26/18), IAB 12/19/18, effective 1/23/19]

CHAPTER 55
ADVISORY COUNCIL ON BRAIN INJURIES

[Prior to 9/30/92, see Persons with Disabilities Division[431] Ch 3]

641—55.1(135) Definitions. For the purposes of this chapter, the following definitions shall apply:

“Appointed members” means members of the advisory council on brain injuries who have been appointed by the governor’s office.

“Brain injury” means a brain injury as defined in Iowa Code section 135.22.

“Chairperson” means the chairperson of the advisory council on brain injuries, who has been elected by the majority of the council’s members.

“Council” means the advisory council on brain injuries.

“Department” means the Iowa department of public health.

“Ex officio members” means designated state agency staff who are statutory members of the advisory council on brain injuries.

“Person from the public” means a person or agency who does not have an affiliation with the advisory council on brain injuries but who has knowledge or skills beneficial to the council for specific task forces or projects.

“Service partners” means representatives of organizations who partner with the Iowa department of public health or the advisory council on brain injuries to carry out activities related to the mission of the council.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.2(135) Mission of council. The council’s mission is to represent individuals with brain injury, their families, and all Iowans through advocacy, education, training, rehabilitation, research and prevention. By means of these efforts, the council brings about awareness to others and serves as a source of hope and healing to survivors of brain injury. The council will accomplish this mission through the following activities:

1. Studying the needs of individuals with brain injury and their families.
2. Making recommendations regarding the planning, development, and administration of a comprehensive statewide service delivery system.
3. Promoting and implementing injury prevention strategies.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.3(135) Council established. The advisory council on brain injuries, part of the Iowa department of public health, is established pursuant to Iowa Code section 135.22A.

55.3(1) The council shall consist of a minimum of nine appointed members in addition to the ex officio members.

a. The following persons or their designees shall serve as ex officio, nonvoting members of the council:

- (1) The director of public health.
- (2) The director of human services and any division administrators of the department of human services so assigned by the director.
- (3) The director of the department of education.
- (4) The chief of the special education bureau of the department of education.
- (5) The administrator of the division of vocational rehabilitation services of the department of education.

(6) The director of the department for the blind.

(7) The commissioner of insurance.

b. Appointed members.

(1) Insofar as practicable, the council shall include persons with brain injuries; family members of persons with brain injuries; representatives of industry, labor, business, and agriculture; representatives of federal, state, and local government; and representatives of religious, charitable, fraternal, civic, educational, medical, legal, veteran, welfare, and other professional groups and organizations.

(2) Members shall be appointed to represent every geographic area of the state and shall include members of both sexes.

55.3(2) Appointed members' terms shall be for two years.

55.3(3) Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

55.3(4) Members whose terms expire may be reappointed.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.4(135) Officers.

55.4(1) Officers of the council shall be a chairperson, vice-chairperson and immediate past chairperson.

a. The officers shall be elected at the first meeting of each fiscal year.

b. Vacancy in the office of chairperson shall be filled by elevation of the vice-chairperson.

c. Vacancy in the office of vice-chairperson shall be filled by election at the next meeting after the vacancy occurs.

55.4(2) Duties of the officers.

a. The chairperson shall:

(1) Preside at all meetings of the council,

(2) Appoint such task forces as deemed necessary, and

(3) Designate the chairperson of each task force from the appointed members of the council.

b. The vice-chairperson shall:

(1) Perform the duties of the chairperson if the chairperson is absent or unable to act. When so acting, the vice-chairperson shall have all the powers of and be subject to all restrictions upon the chairperson.

(2) Perform such other duties as may be assigned by the chairperson.

c. The immediate past chairperson shall:

(1) Assist the chairperson at the first meeting of the chairperson's appointment.

(2) Perform the duties of the chairperson if the chairperson and vice-chairperson are absent or unable to act. When so acting, the immediate past chairperson shall have all the powers of and be subject to all restrictions upon the chairperson.

(3) Assist with note taking if there is no council staff person available.

(4) Assist the chairperson to identify council business and necessary task force meetings.

55.4(3) The officers shall serve until their successors are appointed.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.5(135) Duties of the council. The council shall perform the following duties:

55.5(1) Promote meetings and programs for the discussion of methods to reduce the debilitating effects of brain injuries, and disseminate information in cooperation with any other department, agency, or entity on the prevention, evaluation, care, treatment, and rehabilitation of persons affected by brain injuries.

55.5(2) Study and review current prevention, evaluation, care, treatment, and rehabilitation technologies and recommend appropriate preparation, training, retraining, and distribution of personnel and resources in the provision of services to persons with brain injuries through private and public residential facilities, day programs, and other specialized services.

55.5(3) Participate in developing and disseminating criteria and standards which may be required for future funding or licensing of facilities, day programs, and other specialized services for persons with brain injuries in Iowa.

55.5(4) Make recommendations to the governor for developing and administering a state plan to provide services for persons with brain injuries in Iowa.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.6(135) Meetings.

55.6(1) The council shall meet at least quarterly. The annual meeting schedule shall be established by the beginning of the fiscal year.

55.6(2) Notice of routine meetings and agenda will be made available to the members a minimum of five working days prior to the meeting.

55.6(3) Meetings may be scheduled as business requires, but notice must be given to members at least five working days prior to the meeting.

55.6(4) All meetings will be held in facilities accessible to and functional for people with physical disabilities.

55.6(5) Notification for reasonable accommodations should be made to department staff at least three working days prior to the meeting.

55.6(6) All meetings are open to the public in accordance with the open meetings law, Iowa Code chapter 21.

55.6(7) Cameras and recording devices may be used at open meetings, provided they do not obstruct the meeting. The presiding officer may request a person using such a device to discontinue its use if it is obstructing the meeting.

55.6(8) The presiding officer may exclude any person from the meeting for repeated behavior that disrupts or obstructs the meeting.

55.6(9) The operation of council meetings will be governed by the following rules of procedure:

a. A simple majority of the appointed members shall constitute a quorum. Motions may not be made without a quorum.

b. When a quorum is present, a motion is carried by affirmative vote of two-thirds of appointed members present.

c. Time for public comment will be made during each council meeting.

55.6(10) Meeting attendance.

a. Council members are expected to attend council meetings with the exception of extenuating circumstances that have been cleared beforehand by the chairperson.

b. Any council member who is unable to attend a meeting will notify council staff at least 24 hours prior to the start of a regularly scheduled meeting. A meeting may be canceled if attendance is expected to be low.

c. A teleconference option shall be set up for the members to participate in the meeting.

d. Appointed members may be recommended for dismissal from the council if they miss more than three meetings annually.

55.6(11) Special meetings. Special meetings shall be for business of the council that cannot wait until the next scheduled meeting.

a. Special meetings may be called by the chairperson to discuss emergent issues within a 24-hour time period.

b. A majority of council members may call a special meeting.

c. Special meetings shall be held in accordance with Iowa Code chapter 21.

55.6(12) Rescinded IAB 6/17/20, effective 7/22/20.

[ARC 9772B, IAB 10/5/11, effective 11/9/11; ARC 5060C, IAB 6/17/20, effective 7/22/20]

641—55.7(135) Minutes. The advisory council shall keep minutes of all its meetings showing the date, time, place, members present, members absent, and the general topics discussed.

55.7(1) The minutes shall reflect the actions agreed upon by the members for topics requiring the members' input or consensus.

55.7(2) If a meeting is convened within a 24-hour time period to discuss emergent issues, the minutes shall reflect the emergent nature of the meeting.

55.7(3) If a meeting is conducted via telephone, the minutes shall reflect the reason for the use of this method of meeting.

55.7(4) The minutes shall be available at the council staff office for inspection Monday through Friday from 8:30 a.m. to 4:30 p.m.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.8(135) Task forces. The chairperson of the council may establish task forces as needed to carry out the business of the council.

55.8(1) The council will have two standing task forces: the executive task force and the state plan task force.

a. The executive task force shall be made up of the council chairperson, vice-chairperson, immediate past chairperson and chairperson of the state plan task force.

b. The state plan task force shall be made up of members appointed by the chairperson.

55.8(2) The council may designate additional task forces to perform such duties as may be deemed necessary.

55.8(3) Task forces may be composed of appointed members, ex officio members, service partners, and persons from the public.

55.8(4) The chairperson of each task force will be an appointed member of the council.

55.8(5) All members of task forces shall have voting privileges during task force meetings; however, all decisions made by task forces must be approved at the next regular council meeting by a vote of the appointed members.

55.8(6) Task force meetings shall be scheduled at least five working days prior to the meeting.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

641—55.9(135) Expenses of advisory council members. The following may be considered necessary expenses for reimbursement of advisory council members when the expenses are incurred on behalf of advisory council business and are subject to established state reimbursement rates:

1. Reimbursement for travel in a private car.
2. Actual lodging and meal expenses, including sales tax on lodging and meals.
3. Actual expenses of public transportation.

[ARC 9772B, IAB 10/5/11, effective 11/9/11]

These rules are intended to implement Iowa Code section 135.22A.

[Filed 5/17/91, Notice 4/3/91—published 6/12/91, effective 7/17/91]

CHAPTER 56
BRAIN INJURY SERVICES PROGRAM

641—56.1(135) Definitions. For purposes of this chapter, the following definitions apply:

“Assessment” means the review of the consumer’s current functioning with regard to the consumer’s situation, needs, strengths, abilities, desires and goals.

“Brain injury services waiver” means the state’s medical assistance home- and community-based services waiver for persons with brain injury.

“Consumer” means an individual who has applied for and been found eligible to participate in the waiver-eligible component or the cost-share component of the brain injury services program.

“Cost share” means the portion an individual is responsible to pay for services received by the individual.

“Countable income,” when determining initial and ongoing eligibility for the brain injury services program, means all earned and unearned income, unless specifically exempted in 441—subrule 86.2(2).

“Department” means the Iowa department of public health.

“Family size,” for purposes of establishing initial and ongoing eligibility under the brain injury services program, means all persons living together who are children and who are parents of those children as defined in 441—subrule 86.2(3).

“Program administrator” means the division of behavioral health and professional licensure within the department of public health.

641—56.2(135) Purpose. The purpose of the brain injury services program is to provide services, service funding, or other support for persons with a brain injury under one of the program components established pursuant to Iowa Code section 135.22B. The overall purpose of this chapter is to establish administrative rules in accordance with Iowa Code section 135.22B relative to the financial eligibility requirements for services under the waiver-eligible and cost-share components of the brain injury services program.

641—56.3(135) Waiver-eligible component. Persons eligible for the brain injury services waiver and on the waiting list for the waiver are eligible for the waiver-eligible component. The brain injury services program may provide funding for the nonfederal share of the cost of services if the appropriation for the medical assistance program does not have sufficient funding designated to do so.

56.3(1) Provision of funding under this component is not an entitlement and is subject to funding availability.

56.3(2) A person who receives support under the waiver-eligible component of the brain injury services program is not eligible to receive support under the cost-share component of the program.

641—56.4(135) Cost-share component. Persons determined ineligible for the brain injury services waiver, due to fiscal or functional criteria, or persons who are eligible for the waiver but for whom funding was not authorized or available to provide waiver eligibility are eligible for the cost-share component of the brain injury services program.

56.4(1) An individual must meet all of the following requirements:

- a. The individual is aged one month through 64 years.
- b. The individual has a diagnosed brain injury as defined in Iowa Code section 135.22.
- c. The individual is a resident of Iowa and either a United States citizen or a qualified alien as defined in 8 U.S.C. Section 1641.
- d. The individual must meet the cost-share component’s financial eligibility requirements and be willing to pay a cost share for the cost-share component.

56.4(2) Cost-share financial eligibility. Countable income shall be used when determining initial and ongoing eligibility for the program. All of the following criteria must be met.

- a. Individuals who are at 300 percent or below the federal poverty level for a family of the same size will not be assessed a cost share.

b. Individuals whose countable income is between 301 percent and 350 percent of the federal poverty level for a family of the same size will be assessed a 10 percent cost share for services that will be payable to the service provider.

c. Individuals whose countable income is between 351 percent and 400 percent of the federal poverty level for a family of the same size will be assessed a 20 percent cost share for services that will be payable to the service provider.

d. Individuals whose countable income is above 400 percent of the federal poverty level for a family of the same size will be assessed a 30 percent cost share for services that will be payable to the service provider.

56.4(3) The cost-share component must be the source of last resort for payment; the program shall not pay for services when the provision of those services is mandated by law or administrative rule to be the responsibility of another governmental unit, private agency or program. Brain injury cost-share services are not available to an individual who receives services or funding under any type of medical assistance home- and community-based services waiver.

641—56.5(135) Application process.

56.5(1) The applicant must authorize the department of human services to provide the applicant's brain injury services waiver application materials to the brain injury services program.

56.5(2) The department of human services will provide the department the application materials, which shall include but are not limited to the waiver application and any denial letter, financial assessment, and functional assessment regarding the person in an agreed-upon format.

56.5(3) The department will determine eligibility within 45 days of receipt of complete application materials.

a. After determining if the applicant's service needs fit within the scope of the brain injury services program, the department shall inform the discharge planner or case manager on behalf of the applicant or the applicant's legal representative of the applicant's eligibility.

b. The case manager shall establish an interdisciplinary team for each consumer and, with the team, identify the consumer's plan based on the consumer's needs and desires as well as the availability and appropriateness of services. The case manager shall notify the department of the service plan.

c. The date of eligibility for applicants deemed eligible for the cost-share component will be the date when both the service eligibility and financial eligibility assessments have been completed.

d. Notification of eligibility shall be mailed or given to the applicant or the applicant's legal representative within seven days of the date eligibility determination is completed.

56.5(4) After determining an applicant's eligibility, if no payment slot is available, the brain injury services program shall enter the applicant on a waiting list according to the following:

a. The date a completed Form 470-2927 or 470-2927(S), Health Services Application, is date-stamped in the county department of human services office. If more than one application is received on the same date, applicants shall be entered on the waiting list on the basis of the applicant's month of birth, with January designated as month one.

b. As slots become available, applicants shall be selected from the waiting list based on their order on the waiting list to maintain the number of persons approved for participation in the program.

56.5(5) The consumer or the consumer's legal representative shall complete and sign Iowa department of human services Form 470-3349, Brain Injury Functional Assessment, indicating the consumer's choice of caregiver.

56.5(6) The case manager for the consumer will initiate development of the consumer's service plan and commencement of services. All service plans must be approved by the program administrator.

56.5(7) The department will not pay the cost of services provided to a consumer prior to approval of eligibility.

56.5(8) The program administrator shall make the final determination as to whether program funding will be authorized under the cost-share component.

641—56.6(135) Service providers and reimbursement.

56.6(1) A service provider must either be certified to provide services under the brain injury services waiver or have a contract with a county to provide services and apply to become certified to provide services under the brain injury services waiver within 90 days of the date that services commence.

56.6(2) The reimbursement rate payable for the cost of a service provided under the cost-share component is the rate payable under the medical assistance program. However, if the service provider does not have a medical assistance program reimbursement rate, the rate shall be the amount payable under the county contract.

56.6(3) All service providers must contract with the department and will be paid retroactively to the date of service eligibility.

56.6(4) Service providers will be responsible for billing and collection of any cost share from an individual as determined by the program administrator within the department.

641—56.7(135) Available services/service plan.

56.7(1) Services available shall be consistent with the services offered through the Medicaid home- and community-based services waiver.

56.7(2) Service plans must reflect use of all services, including non-cost-shared services, to ensure that no duplication of services occurs.

56.7(3) All service plans must be submitted, either electronically or in hard-copy format, to the program administrator for approval prior to implementation.

56.7(4) Any change to the service plan must be approved by the program administrator.

641—56.8(135) Redetermination.

56.8(1) A complete financial redetermination of continuing eligibility for the brain injury services program shall be completed annually by the department, after consultation with the case manager and the interdisciplinary team.

56.8(2) A redetermination of continuing eligibility shall also be made when a change in financial or functional circumstances occurs that affects eligibility.

641—56.9(135) Appeal rights. Appeal rights for any individual denied funding under either the waiver-eligible or the cost-share component of the program are as defined in 641—176.8(135,17A) with the following exception: An appeal must be submitted within 45 days of receipt of notification of an adverse decision.

These rules are intended to implement Iowa Code section 135.22B.

CHAPTER 61
STATE MECHANICAL CODE

641—61.1(105) Definitions. The following definitions apply to this chapter:

“Ambulatory health care facility” means a facility or portion thereof used to provide services or treatment that provides, on an outpatient basis, treatment for one or more patients that renders the patients incapable of taking action for self-preservation under emergency conditions without the assistance of others; or provides, on an outpatient basis, anesthesia that renders the patient incapable of taking action for self-preservation under emergency conditions without the assistance of others.

“Hospice” means a facility licensed or seeking licensure pursuant to Iowa Code section 135J.2.

“Hospital” means a facility licensed or seeking licensure pursuant to Iowa Code chapter 135B.

“Intermediate care facility for persons with an intellectual disability” means a facility licensed or seeking licensure pursuant to Iowa Code section 135C.2(3) “c.”

“Life Safety Code” means the 2012 edition of the Life Safety Code of the National Fire Protection Association, Batterymarch Park, Quincy, MA 02269, or the most recent version of the Life Safety Code adopted by reference by the federal Centers for Medicare and Medicaid Services.

“Nursing facility” means a facility licensed or seeking licensure pursuant to Iowa Code section 135C.6, including a nursing facility for intermediate care or a nursing facility for skilled care.

[ARC 1494C, IAB 6/11/14, effective 7/16/14; ARC 5627C, IAB 5/19/21, effective 6/23/21]

641—61.2(105) Adoption by reference. Sections 101 and 102 and Chapters 2 to 15 of the International Mechanical Code, 2021 edition, published by the International Code Council, 4051 West Flossmoor Road, Country Club Hills, IL 60478, are hereby adopted by reference as the requirements for the design, installation, maintenance, alteration, and inspection of mechanical systems that are permanently installed and utilized to provide control of environmental conditions and related processes within buildings and premises in Iowa.

[ARC 1494C, IAB 6/11/14, effective 7/16/14; ARC 2473C, IAB 3/30/16, effective 6/1/16; ARC 4613C, IAB 8/14/19, effective 9/18/19; ARC 5627C, IAB 5/19/21, effective 6/23/21]

641—61.3(105) Amendments to International Mechanical Code. The International Mechanical Code (IMC), as adopted by reference in rule 641—61.2(105), shall be amended as follows:

61.3(1) Amend Section 101.2 by deleting the following: “Exception: Detached one- and two-family dwellings and townhomes not more than three stories above grade plane in height with a separate means of egress and their accessory structures not more than three stories above grade plane in height shall comply with this code or the International Residential Code.”

61.3(2) Amend Section 102 by adopting new Section 102.12 as follows:

102.12 Local authority

(a) Local jurisdictions may administer the permit, inspection, testing, and enforcement provisions contained in the state mechanical code adopted and amended by this chapter. Permit, inspection, testing, and enforcement provisions contained in this code shall not be administered by the Plumbing and Mechanical Systems Board or the state unless otherwise provided by law.

(b) Local jurisdictions may not adopt mechanical codes other than the state mechanical code adopted and amended by this chapter. Local jurisdictions may adopt additional amendments to the state mechanical code if the additional amendments are stricter than the state mechanical code as set forth in this chapter. Local jurisdictions that adopt additional amendments must provide copies of any local amendments to the board.

61.3(3) Amend Section 304.11 by deleting the last sentence and inserting in lieu thereof the following new exception:

Exception: Guards are not required where permanent fall arrest/restraint anchorage connector devices that comply with ANSI/ASSE Z 359.1 are affixed for use during the entire lifetime of the roof covering. The devices shall be evaluated for possible replacement when the entire roof covering is replaced. The devices shall be placed not more than 10 feet (3048 mm) on center along hip and ridge lines and placed not less than 10 feet (3048 mm) from roof edges and the open sides of walking surfaces.

61.3(4) Amend Section 306.1 by deleting the last sentence and inserting in lieu thereof: “An unobstructed level working space at least 30 inches deep and 30 inches wide shall be provided on any side of equipment where service access is required. The authority having jurisdiction may approve service reductions prior to equipment installation, provided that the manufacturer’s instructions are met.”

61.3(5) Delete Section 306.2 and insert in lieu thereof the following new section:

306.2 Appliances in rooms and closets. Rooms and closets containing appliances shall be provided with a door and an unobstructed passageway measuring not less than 36 inches wide and 80 inches high. A level service space not less than 30 inches deep and 30 inches wide shall be present at the front service side of the appliance with the door open.

61.3(6) Amend Section 306.5 by:

a. Adding the following to the end of the section: “If the tenants of a multiple tenant building have, or are allowed to have, mechanical facilities on the roof or which penetrate the roof, then roof access ladders must be provided for use by all such tenants and their agents and contractors in a manner that does not require accessing space under the control of another tenant.”

b. Deleting the following: “Exception: This section shall not apply to Group R-3 occupancies.”

c. Adopting new Section 306.5.3 as follows:

306.5.3 Visual screening of rooftop equipment. Equipment screening shall not be installed to the rooftop unit or the curb of the rooftop unit unless specified in the mechanical equipment manufacturer’s installation instructions.

61.3(7) Delete Section 401.1 and insert in lieu thereof the following new section:

401.1 Scope. This chapter shall govern the ventilation of spaces within a building intended to be occupied. These buildings shall meet either the requirements of ASHRAE Standard 62.1, “Ventilation for Acceptable Indoor Air Quality,” 2019 edition, published by the American Society of Heating, Refrigeration, and Air-Conditioning Engineers, 1791 Tullie Circle N.E., Atlanta, GA 30329, or the requirements contained in this chapter. Mechanical exhaust systems, including exhaust systems serving clothes dryers and cooking appliances; hazardous exhaust systems; dust, stock, and refuse conveyor systems; subslab soil exhaust systems; smoke control systems; energy recovery ventilation systems; and other systems specified in Section 502 shall comply with Chapter 5.

61.3(8) Add the following footnote “i” related to the gym, stadium, arena (play area) category of the sports and amusement occupancy classification in Table 403.3.1.1, Minimum Ventilation Rates:

i. When combustion equipment is intended to be used on the playing surface, additional dilution ventilation and/or source control shall be provided.

61.3(9) Add the following footnote “j” to Table 403.3.1.1 anywhere the term “smoking lounges” appears:

j. For ventilation purposes, “smoking” includes both combustible tobacco products and accessories and electronic smoking devices and accessories.

61.3(10) Delete Section 504.8.2 and insert in lieu thereof the following new section:

504.8.2 Duct installation. Exhaust ducts shall be supported at 4-foot (1219 mm) intervals and secured in place. The insert end of the duct shall extend into the adjoining duct or fitting in the direction of airflow. Ducts shall not be joined by screws or similar fasteners that protrude into the inside of the duct.

61.3(11) Delete Subsection 506.3.13.3 and insert in lieu thereof the following new subsection:

506.3.13.3 Termination location. Exhaust outlets shall be located not less than 10 feet (3048 mm) horizontally from parts of the same or contiguous buildings, adjacent buildings and adjacent property lines and shall be located not less than 10 feet (3048 mm) above the adjoining grade level. Exhaust outlets shall be located not less than 20 feet horizontally/vertically from or not less than 5 feet above air intake openings and operable doors and windows into any building.

61.3(12) The first sentence of Section 507.3 shall be amended to read: “Type II hoods shall be installed above dishwashers capable of heating water beyond 140 degrees Fahrenheit and appliances that produce heat or moisture and do not produce grease or smoke as a result of the cooking process, except where the heat and moisture loads from such appliances are incorporated into the HVAC system design or into the design of a separate removal system.”

61.3(13) Delete Section 508.1.1 and insert in lieu thereof the following new section:

508.1.1 Makeup air temperature. All kitchen makeup air systems shall be verified by a certified TAB (testing and balance) contractor to heat makeup air to within 10 degrees of room temperature set point. The TAB contractor shall be certified by NEBB, TABB, or other certifying organization as approved by the Authority Having Jurisdiction.

61.3(14) Amend Section 601.5 by adopting new paragraph “9” as follows:

9. Return air openings shall be located at least 18 inches from supply air openings. Air throw shall be directed away from return air openings to reduce short cycling of air. Exception: Factory-made concentric duct terminations.

61.3(15) Amend Section 601.5 by adopting new paragraph “10” as follows:

10. One return air opening per floor is required on a central duct return system per ACCA Manual D, Appendix 8. Return air transfer openings are required on all bedrooms when dedicated return air openings are not used.

61.3(16) Amend Section 603 by adopting new Section 603.1.1 as follows:

603.1.1 Duct location. Air plenums and ducts located in floor and wall cavities shall be separated from unconditioned space by construction with insulation to meet energy code requirements. These areas include but are not limited to exterior walls, cantilevered floors, and floors above garages.

61.3(17) Delete Section 604.3 and insert in lieu thereof the following new section:

604.3 Coverings and linings. Duct coverings and linings, including adhesives where used, shall have a flame spread index of not more than 25 and a smoke-development index of not more than 50, when tested in accordance with ASTM E84 or UL 723, using the specimen preparation and mounting procedures of ASTM E2231. Duct coverings and linings shall not flame, glow, smolder or smoke when tested in accordance with ASTM C411 at the temperature to which they are exposed in service. The testing temperature shall not fall below 250°F (121°C). Coverings and linings shall be listed and labeled. The use of an air gap to meet R-value requirements for duct insulation shall be prohibited.

61.3(18) Amend Subsection 607.6.2.1 by adopting new Subsections 607.6.2.1.3 and 607.6.2.1.4 as follows:

607.6.2.1.3 Access ceiling radiation dampers shall be provided with an approved means of access that is large enough to permit inspection and maintenance of the damper and its operating parts. Dampers equipped with fusible links, internal operators for both shall be provided with either an access door that is not less than 12 inches (305mm) square, or a removable duct section.

607.6.2.1.4 Identification ceiling radiation damper locations and access points shall be permanently identified on the exterior by a label or marking acceptable to the authority having jurisdiction.

61.3(19) Delete all references to the “International Plumbing Code” and insert in lieu thereof “state plumbing code.”

[ARC 5627C, IAB 5/19/21, effective 6/23/21]

641—61.4(105) Hospitals and health care facilities.

61.4(1) A hospital that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the hospital is in compliance with the provisions of rule 661—205.5(100). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the hospital shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

61.4(2) A nursing facility or hospice that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the nursing facility or hospice is in compliance with the provisions of rule 661—205.10(100). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the nursing facility or hospice shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

61.4(3) An intermediate care facility for persons with an intellectual disability or intermediate care facility for persons with mental illness that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the intermediate care facility is in compliance with the provisions of rule 661—205.15(100). In any other case

in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the intermediate care facility shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

61.4(4) An ambulatory health care facility that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the ambulatory health care facility is in compliance with the provisions of rule 661—205.20(100). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the ambulatory health care facility shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

61.4(5) A religious nonmedical health care institution that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the provisions of the state mechanical code if the institution is in compliance with the provisions of rule 661—205.25(100). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the religious nonmedical health care institution shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

[ARC 1494C, IAB 6/11/14, effective 7/16/14; ARC 5627C, IAB 5/19/21, effective 6/23/21]

641—61.5(105) Enforcement. Any state or local jurisdiction retaining authority to perform inspections of mechanical installations in the state of Iowa shall retain initial interpretive authority over the state mechanical code and may implement an appeals process with respect to such interpretation. Ultimate appeal of any initial interpretation may be made to the plumbing and mechanical systems board by the filing of a petition for declaratory order pursuant to rule 641—57.1(17A) or the filing of a petition for waiver pursuant to 641—Chapter 31.

[ARC 1494C, IAB 6/11/14, effective 7/16/14; ARC 5627C, IAB 5/19/21, effective 6/23/21]

These rules are intended to implement Iowa Code section 105.4.

CHAPTER 67 BLOOD LEAD TESTING

641—67.1(135) Purpose. The purpose of the blood lead testing requirement is to improve the health of Iowa's children. Blood lead testing will facilitate early detection and referral for treatment of lead poisoning; reduce the incidence, impact, and cost of lead poisoning; inform parents and guardians of their children's exposure to lead; promote the importance of reducing exposure to lead as an integral component of preparation for school and learning; and contribute to statewide surveillance of childhood lead poisoning.

641—67.2(135) Definitions. For purposes of this chapter, the following definitions apply:

"Applicant" means any person seeking first-time enrollment in kindergarten in a public or accredited nonpublic elementary school in Iowa.

"Blood lead database" means the database maintained by the department that includes the results of all blood lead testing reported to the department as required by 641—Chapter 1.

"Blood lead testing" means taking a capillary or venous sample of blood and sending it to a laboratory to determine the level of lead in the blood.

"Capillary" means a blood sample taken from the finger or heel for lead analysis.

"Department" means the Iowa department of public health.

"Elementary school" means an Iowa school district or accredited nonpublic school offering kindergarten.

"Health care provider" means a physician licensed under Iowa Code chapter 148, 150, or 150A, a physician assistant licensed under Iowa Code chapter 148C, or an advanced registered nurse practitioner licensed under Iowa Code chapter 152.

"Laboratory" means a laboratory certified to perform either waived or non-waived blood lead analysis according to the federal Clinical Laboratory Improvement Act of 1988 (CLIA).

"Transfer student" means an applicant from any elementary school outside Iowa who is seeking enrollment in kindergarten in an elementary school in Iowa.

"Venous" means a blood sample taken from a vein in the arm for lead analysis.

"Very low risk" means that a child has not (1) lived in, visited, or spent time in any building built before 1960, including but not limited to the child's home, a daycare center, a preschool, a baby-sitter's home or a relative's home; (2) eaten nonfood items; (3) lived with or frequently come in contact with an adult who works with lead on the job or as part of a hobby, including but not limited to painting, welding, foundry work, renovating old homes, working at a shooting range, manufacturing or recycling batteries, working with ceramics or stained glass, working with sheet metal or scrap metal, or plumbing; (4) lived near a battery manufacturing plant, battery recycling plant, lead smelter, or other source of lead emissions; (5) been born in or spent more than three months in Mexico, Central America, eastern Europe, or southeast Asia; (6) ingested food, candy, or remedies containing lead; (7) played with toys, jewelry, or other items that the U.S. Consumer Product Safety Commission has recalled due to lead contamination; or (8) been exposed to any other products or substances determined by the department, the U.S. Environmental Protection Agency, the U.S. Department of Housing and Urban Development, the Centers for Disease Control and Prevention, or the U.S. Food and Drug Administration to contain lead.

641—67.3(135) Persons included. The blood lead testing requirement specified in this chapter applies to all applicants and transfer students as defined in this chapter.

641—67.4(135) Persons excluded. Exclusions to these rules are permitted on an individual basis for religious reasons and for children determined by the department to be at very low risk for elevated blood lead levels. The parent or guardian of an applicant or transfer student approved for a religious exemption or an exemption for very low risk shall submit to the board of directors of each school district and the authorities in charge of each nonpublic school a valid Iowa department of public health certificate of blood lead testing exemption. To be valid, the certificate shall be the certificate of blood lead testing exemption provided or approved by the department.

67.4(1) Religious exemption. A religious exemption may be granted to an applicant or transfer student if the blood lead testing conflicts with a genuine and sincere religious belief.

a. The certificate of blood lead testing exemption for religious reasons shall attest that the blood lead testing conflicts with a genuine and sincere religious belief and that the belief is in fact religious and not based merely on philosophical, scientific, moral, personal, or medical opposition to blood lead testing.

b. The certificate of blood lead testing exemption for religious reasons shall be signed and dated by the applicant's or transfer student's parent or guardian.

c. The certificate is valid only when notarized.

67.4(2) Exemption for very low risk. The department may grant to an applicant or transfer student an exemption for very low risk if the parent or guardian provides evidence satisfactory to the department that the applicant or transfer student meets the definition of very low risk.

a. The certificate of blood lead testing exemption for very low risk shall be signed and dated by the applicant's or transfer student's parent or guardian and by the chief of the bureau of lead poisoning prevention.

b. The certificate of blood lead testing exemption for very low risk is valid only when notarized.

67.4(3) A faxed copy, photocopy, or electronic copy of the valid certificate of blood lead testing exemption is acceptable.

641—67.5(135) Blood lead testing requirement.

67.5(1) Each applicant and transfer student shall meet the requirements of subrule 67.6(1).

67.5(2) The board of directors of each school district and the authorities in charge of each nonpublic school shall, in collaboration with the department, ensure that applicants and transfer students comply with the blood lead testing requirement according to subrule 67.6(1).

641—67.6(135) Time line for valid blood lead testing.

67.6(1) To be valid, a blood lead test shall be performed on an applicant or transfer student before the applicant or transfer student reaches six years of age, or in cases in which the applicant or transfer student has already reached six years of age, as soon as the department notifies the parent or guardian that a blood lead test has not yet been performed.

67.6(2) Desirable age for blood lead testing. A parent or guardian of a child under two years of age is strongly encouraged to have the child tested for elevated blood lead levels by the time that the child reaches two years of age.

641—67.7(135) Proof of blood lead testing.

67.7(1) The board of directors of each school district and the authorities in charge of each nonpublic school shall furnish the department, in the format specified by the department, within 60 days after the start of the school calendar, an electronic list of the children enrolled in kindergarten, including the names of children who have filed certificates of blood lead testing exemption.

67.7(2) The department shall match these electronic lists of children with the department's blood lead database and shall notify the school districts and nonpublic schools of the children who have and who have not met the blood lead testing requirement set forth in this chapter.

67.7(3) If the parent or guardian cannot provide evidence that the child received a blood lead test in accordance with subrule 67.5(1), the board of directors of the school district or the authorities in charge of the nonpublic school shall, in collaboration with the department, provide the parent or guardian with community blood lead testing program information, including contact information for the department. The department shall provide this information to and shall work with the school districts, nonpublic schools, and the local childhood lead poisoning prevention programs to ensure that children who have not met the blood lead testing requirement are tested as required by subrule 67.5(1).

641—67.8(135) Referral requirements. Parents or guardians of children who require a blood lead test shall be referred to a health care provider of choice. The parents or guardians of children without a health care provider or who have difficulty accessing blood lead testing shall be referred to a local childhood lead poisoning prevention program, local child health center, or local public health agency for assistance with

completion of blood lead testing. This assistance may include locating health care providers, scheduling appointments, identifying payment sources, and providing blood lead testing.

641—67.9(135) Blood lead testing documentation. A health care provider performing a blood lead test required by this chapter shall ensure that the results of the blood lead test are reported to the department as required by 641—Chapter 1.

641—67.10(135) Records. The board of directors of each school district and the authorities in charge of each nonpublic school shall, in collaboration with the department, ensure that each applicant and transfer student complies with the blood lead testing requirement according to subrule 67.6(1) or has a valid certificate of blood lead testing exemption on file.

67.10(1) The board of directors of each school district and the authorities in charge of each nonpublic school shall ensure that the certificate of blood lead testing exemption is properly completed according to rule 641—67.4(135).

67.10(2) Within the constraints of the privacy rights of the parents or guardians and students, the local board of health, the department of education, and the department or its designee shall have the right to have access to the department's determination that a child has received a blood lead test and to the certificates of blood lead testing exemption of children enrolled in kindergarten.

641—67.11(135) Provider training. For the purpose of quality assurance and consistency, the department shall make training and training materials available for health care providers who will be performing blood lead testing and for school officials, school health personnel, local childhood lead poisoning prevention programs, local child health centers, and local public health agencies.

These rules are intended to implement Iowa Code Supplement section 135.105D and 2008 Iowa Acts, Senate File 2111.

[Filed 7/10/08, Notice 5/21/08—published 7/30/08, effective 9/3/08]

CHAPTER 68 CONTROL OF LEAD-BASED PAINT HAZARDS

641—68.1(135) Applicability. The provisions of this chapter are applicable in jurisdictions in which a local board has adopted this chapter for the purpose of requiring control of lead-based paint hazards where a child has been identified with an elevated blood lead level. Nothing in this chapter shall be construed as requiring a local board to adopt this chapter as a model regulation.

641—68.2(135) Definitions.

“Certified elevated blood lead (EBL) inspector/risk assessor” means a person who has met the requirements of Iowa Administrative Code 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Chewable surface” means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew.

“Child-occupied facility” means a building, or portion of a building, constructed prior to 1978, visited by the same child under the age of six years on at least two different days within any week (Sunday through Saturday period, provided that each day’s visit lasts at least three hours and the combined weekly visits last at least six hours). Child-occupied facilities may include, but are not limited to, day care centers, preschools and kindergarten classrooms.

“Clearance testing” means an activity conducted following interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation to determine that the hazard reduction activities are complete. Clearance testing includes a visual assessment, the collection and analysis of environmental samples, the interpretation of sampling results, and the preparation of a report.

“Department” means the Iowa department of public health.

“Deteriorated paint” means any interior or exterior paint or other coating that is cracking, flaking, chipping, peeling, or chalking, or any paint or coating located on an interior or exterior surface that is otherwise damaged or separated from the substrate of a building component.

“Dripline” means the area within three feet surrounding the perimeter of a building.

“Dust-lead hazard” means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead greater than or equal to 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is greater than or equal to 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property. If dust samples are not taken, it may be assumed that surfaces in rooms with hazardous lead-based paint or where renovation, remodeling, or repainting has occurred recently are dust-lead hazards.

“Elevated blood lead (EBL) child” means any child who has had one venous blood lead level greater than or equal to 20 micrograms per deciliter or at least two venous blood lead levels of 15 to 19 micrograms per deciliter.

“Elevated blood lead (EBL) inspection” means an inspection to determine the sources of lead exposure for an elevated blood lead (EBL) child and the provision within ten working days of a written report explaining the results of the investigation to the property owner and occupant of the residential dwelling or child-occupied facility being inspected and to the parents of the elevated blood lead (EBL) child. A

certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of an elevated blood lead (EBL) inspection.

“Friction surface” means an interior or exterior surface that is subject to abrasion or friction including, but not limited to, certain window, floor, and stair surfaces.

“Hazardous lead-based paint” means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is equal to or greater than the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of a residential building or child-occupied facility.

“Impact surface” means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of doorframes.

“Lead-based paint” means any paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram of lead per square centimeter or more than 0.5 percent by weight. Lead-based paint is present on any surface that is tested and found to contain lead equal to or in excess of 1.0 milligram per square centimeter or more than 0.5 percent by weight and on any surface like a surface tested in the same room equivalent that has a similar painting history and that is found to be lead-based paint.

“Lead-based paint hazard” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

“Local board” means the local board of health as authorized by Iowa Code chapter 137.

“Mid-yard” means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

“Occupant” means any person living, sleeping, cooking or eating in, or having any actual possession of, a dwelling or dwelling unit.

“Owner” means any person who, alone or jointly with others: (1) has legal title to any dwelling, with or without accompanying actual possession thereof, or (2) has charge, care or control of any dwelling by acting as the agent of the owner or as the executor, administrator, trustee, or guardian of the estate of the owner.

“Paint-lead hazard” means the presence of hazardous lead-based paint in a residential dwelling or a child-occupied facility.

“Play area” means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children’s possessions; observations of play patterns; or information provided by parents, residents, caregivers, or property owners.

“Residential building” means a building containing one or more residential dwellings.

“Residential dwelling” means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including, but not limited to, garages, farm buildings, and fences; or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

“Retaliation” means harassment, termination of the tenancy, discontinuation of utilities or other services, and any other action taken against the lessee.

“Soil-lead hazard” means bare soil on residential real property or on the property of a child-occupied facility that contains total lead greater than or equal to 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is greater than or equal to 400 parts per million. If soil samples are not taken, it may be assumed that bare soil within three feet of the foundation of a garage or other structure built prior to 1978 is a soil-lead hazard.

641—68.3(135) Elevated blood lead (EBL) inspections required. The local board shall appoint a certified elevated blood lead (EBL) inspector/risk assessor to conduct elevated blood lead (EBL) inspections in residential dwellings and child-occupied facilities where an elevated blood lead (EBL) child lives, visits, or has recently lived. All owners and occupants shall allow access to the residential dwellings

and child-occupied facilities that the certified elevated blood lead (EBL) inspector/risk assessor desires to inspect.

641—68.4(135) Refusal of admittance. If the certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board is refused entry to a property, then the certified elevated blood lead (EBL) inspector/risk assessor may make a complaint under oath to any magistrate of the county. The magistrate may issue a warrant directing the owner or occupant to allow the certified elevated blood lead (EBL) inspector/risk assessor to conduct an elevated blood lead (EBL) inspection and directing a peace officer to accompany the certified elevated blood lead (EBL) inspector/risk assessor during the elevated blood lead (EBL) inspection/risk assessment.

641—68.5(135) Lead hazard reduction required.

68.5(1) When the certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board determines that hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard is present in a residential dwelling unit or child-occupied facility where an elevated blood lead (EBL) child lives, frequently visits, or has recently resided, the certified elevated blood lead inspector/risk assessor shall issue a written notice to the owner within two weeks of the inspection and receipt of any laboratory results. The written notice shall require the owner to complete lead hazard reduction in a time period determined by the certified elevated blood lead (EBL) inspector/risk assessor. If the occupant who occupies the residential dwelling at the time that this written notice is issued vacates the residential dwelling, the residential dwelling shall not be leased or occupied by any other person until the certified elevated blood lead (EBL) inspector/risk assessor issues a written notice that the lead hazard reduction has been completed.

68.5(2) The owner of any residential dwelling or child-occupied facility which has been determined to contain hazardous lead-based paint, a soil-lead hazard, or a dust-lead hazard shall correct these hazards within the time period allowed by the certified elevated blood lead (EBL) inspector/risk assessor in the written notice. The following methods shall be used for lead hazard reduction. These methods shall not require the services of a lead abatement contractor certified in accordance with Iowa Administrative Code 641—70.5(135). However, other local, state, or federal regulations may require the use of a contractor who has completed an eight-hour lead-safe work practices course or a lead abatement contractor or lead abatement worker certified in accordance with Iowa Administrative Code 641—70.5(135).

a. On a surface that contains hazardous lead-based paint, but is not chewable and does not have evidence of impact or friction, the lead-based paint hazard shall be reduced by removing all loose and deteriorated paint from the surface, preparing the surface for repainting, and repainting the surface with a lead-free coating.

b. On a surface that contains hazardous lead-based paint and is chewable or has evidence of impact or friction, the lead-based paint hazard shall be reduced by treating the surface one inch back from the edge or corner through one of the following methods:

(1) All lead-based paint on the treatment area shall be removed to the bare substrate. The surface shall be prepared for repainting and repainted with a lead-free coating.

(2) The treatment area shall be covered with a permanently affixed lead-free material such as plastic, wood, or vinyl. Carpet may be used on floors and stair treads.

c. Dust-lead hazards shall be reduced by thoroughly cleaning the affected surface.

d. Soil-lead hazards shall be reduced by planting grass or groundcover, applying sod, or covering the affected area with six inches of bark, gravel, or other material.

e. Lead hazard reduction shall be conducted using lead-safe work practices to protect the safety of the occupants and workers. Occupants shall not enter the work area while work is underway. The following are prohibited methods of lead hazard reduction:

(1) Open-flame burning or torching of lead-based paint.

(2) Machine sanding or grinding or abrasive blasting or sandblasting of lead-based paint unless used with high-efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.

(3) Uncontained water blasting of lead-based paint.

(4) Dry scraping or dry sanding of lead-based paint except in conjunction with the use of a heat gun or around electrical outlets.

(5) Operating a heat gun at a temperature above 1100 degrees Fahrenheit.

68.5(3) The certified elevated blood lead (EBL) inspector/risk assessor shall inspect all areas identified as hazards after lead hazard reduction is complete. The certified elevated blood lead (EBL) inspector/risk assessor may conduct clearance testing pursuant to Iowa Administrative Code 641—Chapter 70 to ensure that no dust-lead hazards exist after the work is complete. Within two weeks of verifying that all lead hazard reduction has been completed as required, the certified elevated blood lead (EBL) inspector/risk assessor shall issue a written notice to the owner and occupant stating that the lead hazard reduction has been completed and that the repaired surfaces must be maintained in good condition.

641—68.6(135) Retaliation prohibited.

68.6(1) The lessor of a dwelling, the employees of the lessor, and agents or persons acting on behalf of the lessor shall not retaliate against lessees of residential dwellings and child-occupied facilities whose occupants or visitors have been tested for lead poisoning and shall not discourage the occupants or visitors from being tested for lead poisoning.

68.6(2) An action taken against the lessee shall not be considered retaliation if it is supported by reasonable cause unrelated to the testing of an occupant for lead poisoning or if it is shown to have occurred as a result of an accident or mistake and not to be the intentional act of the lessor of a dwelling, the employees of the lessor, or agents or persons acting on behalf of the lessor.

641—68.7(135) Enforcement. The certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board shall have the duty and responsibility of enforcing this chapter.

68.7(1) Penalties shall be as provided in Iowa Code section 137.21.

68.7(2) Upon failure of any person to correct a hazard identified through this chapter in the time specified by the certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board, the local board may direct or cause the correction of said hazards. All expenses incurred thereby may be recovered by suit in the name of the local board, or the local board may certify the amount of said expenses, together with a description of the property, to the county treasurer, who shall enter the same upon the tax books as costs for removing a lead hazard, and said amounts shall be collected as other taxes.

641—68.8(135) Hearings. In the event any person is aggrieved by any order of the certified elevated blood lead (EBL) inspector/risk assessor, the person may appeal to the local board in writing within ten days of the date of such order. The appeal shall state the reasons for requesting such order to be rescinded or modified. The local board shall review the action of the certified elevated blood lead (EBL) inspector/risk assessor. The local board shall order compliance with said order or may, with cause, modify or withdraw said order. Any order of the local board may be appealed within ten days to the district court for the county in which the local board is located.

641—68.9(135) Variances. The elevated blood lead (EBL) inspector/risk assessor may determine that a chewable surface that would otherwise be identified as a hazard by this chapter is not causing or does not have reasonable potential to cause lead exposure and is not required to be corrected through lead hazard reduction. The elevated blood lead (EBL) inspector/risk assessor shall document the reason for this determination in the inspection report. However, the elevated blood lead (EBL) inspector/risk assessor shall not, under any circumstances, determine that any other surface meeting the definition of hazardous lead-based paint does not need to be corrected through lead hazard reduction.

641—68.10(135) Injunction. Nothing in this chapter shall prohibit a local board from pursuing injunctive relief or other relief as allowed by law.

641—68.11(135) Effective date. This chapter shall be in effect in a jurisdiction after a local board adopts it.

These rules are intended to implement Iowa Code section 135.102.

[Filed 7/16/04, Notice 5/26/04—published 8/4/04, effective 9/8/04]

CHAPTER 69
RENOVATION, REMODELING, AND REPAINTING—
LEAD HAZARD NOTIFICATION PROCESS

641—69.1(135) Applicability. This chapter applies to all persons who perform renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.2(135) Definitions.

“Arithmetic mean” means the algebraic sum of data values divided by the number of data values. For example, the sum of the concentration of lead in several soil samples divided by the number of samples is the arithmetic mean.

“Certificate of mailing” means certified mail with return receipt or its equivalent.

“Chewable surface” means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew.

“Child-occupied facility” means a building, or portion of a building, constructed prior to 1978, that is described by all of the following: (1) The building is visited on a regular basis by the same child, who is less than six years of age, on at least two different days within any week. For purposes of this chapter, a week is a Sunday through Saturday period. (2) Each day’s visit by the child lasts at least 3 hours, and the combined annual visits total at least 60 hours. A child-occupied facility may include, but is not limited to, a child care center, preschool, or kindergarten classroom. A child-occupied facility also includes common areas that are routinely used by children who are less than six years of age, such as restrooms and cafeterias, and the exterior walls and adjoining space of the building that are immediately adjacent to the child-occupied facility or the common areas routinely used by children under the age of six years. “Child-occupied facility” also includes any building where lead-based paint activities are conducted immediately prior to or during the conversion of the building to a child-occupied facility.

“Common area” means a portion of the building that is generally accessible to all occupants. This includes, but is not limited to, hallways, stairways, laundry and recreational rooms, playgrounds, community centers, garages, and boundary fences.

“Compensation” means payment or reimbursement for services performed. Compensation is not limited to monetary considerations and includes payment of rent for rental units, receipt of a salary from the owner or manager of target housing, and receipt of a salary from the owner or operator of a child-occupied facility.

“Components” means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include, but are not limited to, interior components such as ceilings, crown moldings, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim (including sashes, window heads, jambs, sills or stools and troughs), built-in cabinets, columns, beams, bathroom vanities, countertops, and air conditioners; and exterior components such as painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, fascias, rake boards, cornerboards, bulkheads, doors and door trim, fences, floors, joists, latticework, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, windowsills or stools and troughs, casing, sashes and wells, and air conditioners.

“Department” means the department of public health.

“Dripline” means the area within three feet surrounding the perimeter of a building.

“Dust-lead hazard” means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead equal to or exceeding 10 micrograms per square foot on floors, 100 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is equal to or greater than 10 micrograms per square foot on floors, 100 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on

window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property.

“Dwelling unit” means a single, unified combination of rooms designed for use as a dwelling by one family.

“Emergency renovation, remodeling, or repainting” means renovation, remodeling, or repainting activities necessitated by nonroutine failures of equipment or a structure that were not planned but resulted from a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard or threatens equipment or property with significant damage.

“Friction surface” means an interior or exterior surface that is subject to abrasion or friction including, but not limited to, certain window, floor, and stair surfaces.

“Hazardous lead-based paint” means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is equal to or greater than the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

“Housing for the elderly” means retirement communities or similar types of housing reserved for households composed of one or more persons 62 years of age or older or an age recognized as elderly by a specific federal housing assistance program.

“Impact surface” means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of door frames.

“Lead-based paint” means paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or more than 0.5 percent by weight.

“Lead-based paint hazard” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

“Living area” means any area of a residential dwelling used by at least one child six years of age or less including, but not limited to, living rooms, kitchen areas, dens, playrooms, and children’s bedrooms.

“Mid-yard” means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

“Multifamily dwelling” means a structure that contains more than one separate residential dwelling unit, which is used or occupied, or is intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.

“Person” means individual, corporation, limited liability company, government or governmental subdivision or agency, business trust, estate, trust, partnership, or association, or any other legal entity.

“Play area” means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children’s possessions, observations of play patterns, or information provided by parents, residents, caregivers, or property owners.

“Regulated entity” means any individual or company that is regulated by the department by virtue of these rules, the Iowa Code, or other official regulatory promulgation.

“Renovation, remodeling, repainting” means modifying any existing structure or portion of a structure where painted surfaces are disturbed, unless the activity fits the criteria of lead abatement as defined in 641—70.2(135) and is performed by a certified lead abatement contractor as defined in 641—70.2(135). This includes, but is not limited to, removing walls, ceilings, and other painted building components; window replacement; floor refinishing; and sanding, scraping, stripping, water blasting, or otherwise removing paint.

“Residential dwelling” means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including, but not limited to, garages, farm buildings, and fences, or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

“Soil-lead hazard” means bare soil on residential real property or on the property of a child-occupied facility that contains total lead in excess of 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is equal to or greater than 400 parts per million.

“Target housing” means housing constructed prior to 1978 with the exception of housing for the elderly or for persons with disabilities, unless at least one child under the age of six years resides or is expected to reside in the housing, and housing which does not contain a bedroom.

[ARC 8501B, IAB 2/10/10, effective 1/13/10; ARC 5684C, IAB 6/16/21, effective 7/21/21]

641—69.3(135) Notification required in target housing. A person who performs renovation, remodeling, or repainting of target housing for compensation, except for emergency renovation, remodeling, or repainting of target housing, and except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, must do the following prior to commencing the work:

69.3(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the owner and adult occupant of each dwelling unit where renovation, remodeling, or repainting will be performed. The pamphlet shall be provided no more than 60 days prior to commencing the work.

69.3(2) Obtain a signed, dated acknowledgment from the owner and known adult occupant of each dwelling unit where renovation, remodeling, or repainting will be performed affirming that they have received the pamphlet prior to the start of renovation, remodeling, or repainting and are aware of the potential health hazards from remodeling, renovating, or repainting housing containing lead-based paint. The acknowledgment shall be obtained no more than 60 days prior to commencing the work.

a. The acknowledgment shall include the owner’s and occupant’s names and the address of the residential dwelling undergoing renovation, remodeling, or repainting.

b. The acknowledgment shall include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting housing containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment shall require the signature of the owner and occupant, along with their dates of signature.

d. If a signature cannot be obtained from an adult occupant, the person must certify in writing that the pamphlet has been delivered to the dwelling and that a written acknowledgment could not be obtained from an adult occupant. Such certification must include the address of the unit to be remodeled, renovated, or repainted, the date and method of delivery of the pamphlet, the name of the person delivering the pamphlet, the reason for lack of acknowledgment (e.g., occupant refuses to sign, no adult occupant available), the signature of the person conducting the renovation, remodeling, or repainting, and the date of signature.

e. The type shall be clear and legible.

f. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment must be completed prior to commencing the work.

g. If the parties use a written contract or agreement which is written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

69.3(3) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment at least seven days prior to beginning the work.

69.3(4) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting shall provide further notification to the owners and

occupants providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.4(135) Notification required in multifamily housing. A person who performs renovation, remodeling, or repainting of common areas for compensation, except for emergency renovation, remodeling, or repainting of target housing, and except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, must do the following prior to commencing the work:

69.4(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the owner of the multifamily target housing where renovation, remodeling, or repainting will be performed. The pamphlet shall be provided no more than 60 days prior to commencing the work.

69.4(2) Obtain a signed, dated acknowledgment from the owner of the multifamily target housing where renovation, remodeling, or repainting will be performed affirming that the owner has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting housing containing lead-based paint. The acknowledgment shall be obtained no more than 60 days prior to commencing the work.

a. The acknowledgment shall include the owner's name and the address of the multifamily dwelling undergoing renovation, remodeling, or repainting.

b. The acknowledgment shall include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting housing containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment shall require the signature of the owner, along with the date of signature.

d. The type shall be clear and legible.

e. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment must be completed prior to commencing the work.

f. If the parties use a written contract or agreement which is written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

g. Notify each occupant of the multifamily housing, in writing, of the intended remodeling, repainting, or renovation, and make the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each occupant of the target housing. The notice shall describe:

(1) The general nature and location of the planned renovation, remodeling, or repainting activity.

(2) The expected starting and ending dates of the planned renovation, remodeling, or repainting activity.

(3) A statement of how the owners and occupants can obtain the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, at no charge from the person conducting the renovation, remodeling, or repainting activity.

h. These activities shall be conducted by the person planning to perform the renovation, remodeling, or repainting, or by the owner on behalf of this person.

i. The person planning to perform the renovation, remodeling, or repainting must prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation, remodeling, or repainting, and to provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, at no charge upon request. Regardless of who performs the notification activities required in this subrule, the person planning to conduct the renovation, remodeling, or repainting shall be responsible for ensuring compliance with this subrule and shall be liable for any failures to comply with the notification requirements in this subrule.

69.4(3) In lieu of delivering the pamphlet and written acknowledgment to the owner, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment at least seven days prior to beginning the work.

69.4(4) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting shall provide further notification to the owners and occupants providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.5(135) Emergency renovation, remodeling, or repainting in target housing. A person who performs emergency renovation, remodeling, or repainting of target housing for compensation, except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, must do the following as soon as reasonably possible:

69.5(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the owner of the target housing where renovation, remodeling, or repainting is performed.

69.5(2) Notify each owner and occupant of the target housing, in writing, of the remodeling, repainting, or renovation, and make the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each owner and occupant of the target housing. The notice shall describe:

- a. The general nature and location of the renovation, remodeling, or repainting activity.
- b. The starting and ending dates of the renovation, remodeling, or repainting activity.
- c. A statement of how the owners and occupants can obtain the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, at no charge from the person conducting the renovation, remodeling, or repainting activity.

69.5(3) These activities shall be conducted by the person performing the renovation, remodeling, or repainting, or by the owner on behalf of this person. The person planning to perform the renovation, remodeling, or repainting must prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation, remodeling, or repainting, and to provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, at no charge upon request. Regardless of who performs the notification activities required in this rule, the person conducting the renovation, remodeling, or repainting shall be responsible for ensuring compliance with this rule and shall be liable for any failures to comply with the notification requirements in this rule.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.6(135) Certification of attempted delivery in target housing. When an adult occupant is unavailable for signature or refuses to sign the acknowledgment of receipt of the pamphlet, the person conducting the renovation, remodeling, or repainting is permitted by subrule 69.3(2) to certify delivery for each instance. The certification shall include the address of the unit undergoing renovation, remodeling, or repainting, the date and method of delivery of the pamphlet, name of the person delivering the pamphlet, reason for lack of acknowledgment (e.g., occupant refuses to sign, no adult occupant available), the signature of the person conducting the renovation, remodeling, or repainting, and the date of signature.

69.6(1) *Unavailable for signature.*

a. If an adult occupant is unavailable for signature, the certification shall contain the following language:

I certify that I have made a good-faith effort to deliver the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the unit listed below at the dates and times indicated, and that an adult occupant was unavailable to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the unit with the occupant.

b. Below the statement, the certification shall require the printed name and signature of the person conducting the renovation, remodeling, or repainting, the address of the unit, the attempted delivery dates and times, and the date of signature.

69.6(2) *Refused to sign.*

a. If the occupant refuses to sign the acknowledgment, the certification shall contain the following language:

I certify that I have made a good-faith effort to deliver the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the unit listed below at the dates and times indicated, and that the occupant refused to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the unit.

b. Below the statement, the certification shall require the printed name and signature of the person conducting the renovation, remodeling, or repainting, the address of the unit, the attempted delivery dates and times, the location where the pamphlet was left at the unit (e.g., taped to the door, slipped under the door), and the date of signature.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.7(135) Notification required in child-occupied facilities. A person who performs renovation, remodeling, or repainting of child-occupied facilities for compensation, except for emergency renovation, remodeling, or repainting of child-occupied facilities, and except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, must do the following prior to commencing the work:

69.7(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the owner of the building where renovation, remodeling, or repainting will be performed. The pamphlet shall be provided no more than 60 days prior to commencing the work.

69.7(2) Obtain a signed, dated acknowledgment from the owner of the building where renovation, remodeling, or repainting will be performed affirming that the owner has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting buildings containing lead-based paint. The acknowledgment shall be obtained no more than 60 days prior to commencing the work.

a. The acknowledgment shall include the owner's name and the address of the child-occupied facility undergoing renovation, remodeling, or repainting.

b. The acknowledgment shall include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting buildings containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment shall require the signature of the owner along with the date of signature.

d. If a signature cannot be obtained from the owner, the person must certify in writing that the pamphlet has been delivered to the building and that a written acknowledgment could not be obtained from an owner. Such certification must include the address of the building to be remodeled, renovated, or repainted, the date and method of delivery of the pamphlet, the name of the person delivering the pamphlet, the reason for lack of acknowledgment (e.g., owner refuses to sign, owner not available), the signature of the person conducting the renovation, remodeling, or repainting, and the date of signature.

e. The type shall be clear and legible.

f. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment must be completed prior to commencing the work.

g. If the parties use a written contract or agreement which is written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

69.7(3) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment to the owner at least 7 days prior to beginning the work.

69.7(4) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting shall provide further notification to the owners providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

69.7(5) If the operator of the child-occupied facility is not the owner of the building, provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the operator of the child-occupied facility where renovation, remodeling, or repainting will be performed. The pamphlet shall be provided no more than 60 days prior to commencing the work.

69.7(6) If the operator of the child-occupied facility is not the owner of the building, obtain a signed, dated acknowledgment from the operator of the child-occupied facility where renovation, remodeling, or repainting will be performed affirming that the operator has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting buildings containing lead-based paint. The acknowledgment shall be obtained no more than 60 days prior to commencing the work.

a. The acknowledgment shall include the name of the operator of the child-occupied facility and the address of the child-occupied facility undergoing renovation, remodeling, or repainting.

b. The acknowledgment shall include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting buildings containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment shall require the signature of the operator of the child-occupied facility along with the date of signature.

d. If a signature cannot be obtained from the operator of the child-occupied facility, the person must certify in writing that the pamphlet has been delivered to the building and that a written acknowledgment could not be obtained from the operator of the child-occupied facility. Such certification must include the address of the building to be remodeled, renovated, or repainted, the date and method of delivery of the pamphlet, the name of the person delivering the pamphlet, the reason for lack of acknowledgment (e.g., operator of the child-occupied facility refuses to sign, operator of the child-occupied facility not available), the signature of the person conducting the renovation, remodeling, or repainting, and the date of signature.

e. The type shall be clear and legible.

f. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment must be completed prior to commencing the work.

g. If the parties use a written contract or agreement which is written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

69.7(7) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment to the operator of the child-occupied facility at least 7 days prior to beginning the work.

69.7(8) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting shall provide further notification to the operator of the child-occupied facility providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

69.7(9) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, and information regarding the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date to the parents and guardians of children using the child-occupied facility where renovation, remodeling, or repainting will be performed. The pamphlet and information shall be provided no more than 60 days prior to commencing the work. The person

conducting the renovation, remodeling, or repainting shall provide this information using one of the following methods:

- a.* Mail or hand-deliver the pamphlet and information to each parent or guardian of each child using the child-occupied facility (the pamphlet and information may not be sent home with the child); or
- b.* While the renovation, remodeling, or repainting is ongoing, post informational signs describing the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date. These signs must be posted in areas where they can be seen by the parents of the children frequenting the child-occupied facility. The signs must be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians can review a copy of the pamphlet or obtain a copy from the person conducting the renovation, remodeling, or repainting at no cost to the parents or guardians.

69.7(10) The activities in subrule 69.7(9) shall be conducted by the person planning to perform the renovation, remodeling, or repainting or by the owner or operator of the child-occupied facility on behalf of this person. Regardless of who performs the notification activities required in subrule 69.7(9), the person conducting the renovation, remodeling, or repainting shall be responsible for ensuring compliance with this rule and shall be liable for any failures to comply with the notification requirements in this rule.

69.7(11) The person conducting the renovation, remodeling, or repainting shall prepare, sign, and date a statement describing the steps performed to notify all parents and guardians of the intended renovation, remodeling, or repainting and to provide the pamphlet to them.

69.7(12) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting shall provide revised information on the ongoing or planned activities to the parents and guardians of children frequenting the child-occupied facility providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.8(135) Emergency renovation, remodeling, or repainting in child-occupied facilities. A person who performs emergency renovation, remodeling, or repainting of child-occupied facilities for compensation, except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, must do the following as soon as reasonably possible:

69.8(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the owner of the building where renovation, remodeling, or repainting is performed.

69.8(2) Notify each owner and, if different, the operator of the child-occupied facility, in writing, of the remodeling, repainting, or renovation, and make the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each owner and, if different, operator of the child-occupied facility. The notice shall describe:

- a.* The general nature and location of the renovation, remodeling, or repainting activity.
- b.* The starting and ending dates of the renovation, remodeling, or repainting activity.
- c.* A statement of how each owner and, if different, the operator of the child-occupied facility can obtain the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, at no charge from the person conducting the renovation, remodeling, or repainting activity.

69.8(3) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, and information regarding the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date to the parents and guardians of children using the child-occupied facility where renovation, remodeling, or repainting will be performed. The person conducting the renovation, remodeling, or repainting shall provide this information using one of the following methods:

- a.* Mail or hand-deliver the pamphlet and information to each parent or guardian of each child using the child-occupied facility (the pamphlet and information may not be sent home with the child); or

b. While the renovation, remodeling, or repainting is ongoing, post informational signs describing the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date. These signs must be posted in areas where they can be seen by the parents or guardians of the children frequenting the child-occupied facility. The signs must be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians can review a copy of the pamphlet or obtain a copy from the person conducting the renovation, remodeling, or repainting at no cost to the parents or guardians.

69.8(4) The activities in subrule 69.8(3) shall be conducted by the person planning to perform the renovation, remodeling, or repainting or by the owner or operator of the child-occupied facility on behalf of this person. Regardless of who performs the notification activities required in subrule 69.8(3), the person conducting the renovation, remodeling, or repainting shall be responsible for ensuring compliance with this rule and shall be liable for any failures to comply with the notification requirements in this rule.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.9(135) Certification of attempted delivery for child-occupied facilities. When the owner and, if different, operator of a child-occupied facility are unavailable for signature or refuse to sign the acknowledgment of receipt of the pamphlet, the person conducting the renovation, remodeling, or repainting is permitted by subrule 69.3(2) to certify delivery for each instance. The certification shall include the address of the child-occupied facility undergoing renovation, remodeling, or repainting, the date and method of delivery of the pamphlet, name of the person delivering the pamphlet, reason for lack of acknowledgment (e.g., owner and, if different, operator refuse to sign), the signature of the individual conducting the renovation, remodeling, or repainting, and the date of signature.

69.9(1) *Unavailable for signature.*

a. If the owner and, if different, operator of the child-occupied facility are unavailable for signature, the certification shall contain the following language:

I certify that I have made a good-faith effort to deliver the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the child-occupied facility listed below at the dates and times indicated, and that the owner and, if different, operator of the child-occupied facility were unavailable to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the child-occupied facility with the owner and, if different, operator.

b. Below the statement, the certification shall require the printed name and signature of the person conducting the renovation, remodeling, or repainting, the address of the child-occupied facility, the attempted delivery dates and times, and the date of signature.

69.9(2) *Refused to sign.*

a. If the owner and, if different, operator refuse to sign the acknowledgment, the certification shall contain the following language:

I certify that I have made a good-faith effort to deliver the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, to the child-occupied facility listed below at the dates and times indicated, and that the owner and, if different, operator refused to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the child-occupied facility.

b. Below the statement, the certification shall require the printed name and signature of the person conducting the renovation, remodeling, or repainting, the address of the child-occupied facility, the attempted delivery dates and times, the location where the pamphlet was left at the child-occupied facility (e.g., taped to the door, slipped under the door), and the date of signature.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.10(135) Subcontracts. In cases where renovation, remodeling, or repainting activities involve subcontracts, it is the responsibility of the person receiving the compensation from the property owner, or other party on behalf of the property owner, to provide the notification(s) described in 641—69.3(135), 641—69.4(135), 641—69.5(135), and 641—69.6(135) of this chapter.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.11(135) Exemption. Renovation, remodeling, or repainting in target housing or a child-occupied facility in which a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified pursuant to 641—Chapter 70 has made a written determination that the components affected by the renovation are free of lead-based paint and where the person conducting the renovation, remodeling, or repainting has obtained a copy of the written determination is exempt from the provisions of 641—Chapter 69.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.12(135) Record-keeping requirements. A person who conducts renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility shall retain all records necessary to demonstrate compliance with this chapter for a minimum of three years following completion of the renovation, remodeling, or repainting. The records shall include:

69.12(1) The address or location of the target housing or child-occupied facility where remodeling, renovation, or repainting was conducted.

69.12(2) A list of all known occupants of the dwelling units where renovation, remodeling, or repainting was conducted at the commencement of the work.

69.12(3) Copies of signed, dated acknowledgments as required by subrule 69.3(2) from each owner and occupant of a dwelling unit where renovation, remodeling, or repainting was conducted.

69.12(4) Copies of signed, dated acknowledgments as required by subrule 69.4(2) from each owner of multifamily target housing where renovation, remodeling, or repainting was conducted in common areas.

69.12(5) Copies of all signed, dated statements of notification, as well as copies of all notification materials given to all owners and occupants and acknowledgments as required by subrule 69.4(2) from each owner and occupant of multifamily target housing where renovation, remodeling, or repainting was conducted in common areas.

69.12(6) Copies of signed, dated acknowledgments as required by 641—69.7(135) from the owner and, if different, operator of a child-occupied facility where renovation, remodeling, or repainting was conducted.

69.12(7) Copies of all notification materials given to the parents or guardians of children using a child-occupied facility or the signs posted in areas where the signs can be seen by the parents or guardians of children using the child-occupied facility as required by subrule 69.7(9).

69.12(8) Reports showing that a lead inspector/risk assessor or elevated blood level (EBL) inspector/risk assessor certified pursuant to 641—Chapter 70 has made a written determination that the components affected by the renovation are free of lead-based paint.

69.12(9) Certifications of attempted delivery as described in 641—69.6(135).

69.12(10) Certificates of mailing as described in subrules 69.3(3) and 69.4(3).

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.13(135) Compliance inspections. The department may enter the place of business of a person who conducts renovation, remodeling, or repainting for the purpose of enforcing the notification required by this chapter.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.14(135) Enforcement.

69.14(1) The department may impose a civil penalty pursuant to Iowa Code section 135.105C and this rule and may refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code section 135.38 when it finds that a person has committed any of the following acts:

- a. Failed or refused to comply with any requirements of this chapter.
- b. Failed or refused to establish, maintain, provide, copy, or permit access to records or reports as required by this chapter.
- c. Failed or refused to permit entry or inspection as described in subrule 69.14(1).
- d. Falsified reports and records required by this chapter.
- e. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

f. Failed to respond within 20 days of receipt of communication sent by the department by registered or certified mail.

g. Engaged in any conduct that subverts or attempts to subvert a department investigation.

h. Failed to comply with a subpoena issued by the department or failed to cooperate with a department investigation.

i. Failed to pay costs assessed in any disciplinary action.

69.14(2) Complaints and other requests for action under this rule. Complaints regarding a person who performs renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility shall be submitted in writing to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075. The complainant shall provide the name of the person who performs renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility and the specific details of the person's action(s) that did not comply with the rules.

69.14(3) Civil penalties.

a. Before instituting any proceeding to impose a civil penalty under Iowa Code section 135.105C, the department shall serve a written notice of violation upon the person charged. The notice of violation shall specify the date or dates, facts, and the nature of the alleged act or omission with which the person is charged and shall identify specifically the particular provision or provisions of the law, rule, regulation, or cease and desist order involved in the alleged violation and must state the amount of each proposed penalty. The notice of violation shall also advise the person charged that the civil penalty may be paid in the amount specified therein, or the proposed imposition of the civil penalty may be protested in its entirety or in part, by a written answer, either denying the violation or showing extenuating circumstances. The notice of violation shall advise the person charged that upon failure to pay a civil penalty subsequently determined by the department, if any, unless compromised, remitted, or mitigated, the fee shall be collected by civil action pursuant to Iowa Code section 135.105C.

b. Within 20 days of the date of a notice of violation or other time specified in the notice, the person charged may either pay the penalty in the amount proposed or answer the notice of violation. The answer to the notice of violation shall state any facts, explanations, and arguments denying the charges of violation or demonstrating any extenuating circumstances, error in the notice of violation, or other reason why the penalty should not be imposed and may request remission or mitigation of the penalty.

c. If the person charged with a violation fails to answer within the time specified in paragraph 69.14(3) "b," an order may be issued imposing the civil penalty in the amount set forth in the notice of violation described in paragraph 69.14(3) "a."

d. If the person charged with a violation files an answer to the notice of violation, the department, upon consideration of the answer, will issue an order dismissing the proceeding or imposing, mitigating, or remitting the civil penalty. The person charged may, within 20 days of the date of the order or other time specified in the order, request a hearing.

e. If the person charged with a violation requests a hearing, the department will issue an order designating the time and place of hearing. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

f. If a hearing is held, an order will be issued after the hearing by the presiding officer or the department dismissing the proceeding or imposing, mitigating, or remitting the civil penalty.

g. The department may compromise any civil penalty. If the civil penalty is not compromised or is not remitted by the presiding officer or the department or if the time for requesting a hearing described in paragraph 69.14(3) "d" has expired, the department may refer the matter to the attorney general for collection.

h. Except when payment is made after compromise or mitigation by the department of justice or as ordered by a court of the state, following reference of the matter to the attorney general for collection, payment of civil penalties imposed under Iowa Code section 135.105C shall be made by check, draft, or money order payable to the Iowa Department of Public Health.

69.14(4) Appeals.

a. Notice of the civil penalty shall be sent to the affected person by certified mail, return receipt requested, or by personal service. The affected person shall have a right to appeal the civil penalty.

b. An appeal of a civil penalty shall be submitted by certified mail, return receipt requested, to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075, within 20 days of receipt of the department's notice. If such a request is made within the 20-day time period, the notice of civil penalty shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the civil penalty has been or will be removed. After the hearing, or upon default of the applicant or alleged violator, the administrative law judge shall affirm, modify or set aside the civil penalty. If no appeal is submitted within 20 days, the civil penalty shall become the department's final agency action.

c. Upon receipt of an appeal that meets contested case status, the appeal shall be transmitted to the department of inspections and appeals within 5 working days of receipt pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the civil penalty is based shall be provided to the department of inspections and appeals.

d. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

e. When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. The proposed decision and order then becomes the department's final agency action without further proceedings 10 days after it is received by the aggrieved party unless an appeal to the director is taken as provided in paragraph 69.14(4) "f."

f. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within 10 days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for appeal shall state the reason for appeal.

g. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing or submission to the director. The record shall include the following:

- (1) All pleadings, motions, and rulings.
- (2) All evidence received or considered and all other submissions by recording or transcript.
- (3) A statement of all matters officially noticed.
- (4) All questions and offers of proof, objection, and rulings thereon.
- (5) All proposed findings and exceptions.
- (6) The proposed findings and order of the administrative law judge.

h. The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

i. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

j. Any petition for judicial review of a decision and order shall be filed in the district court within 20 days after the decision and order becomes final. A copy of the notice of appeal shall be sent by certified mail, return receipt requested, or by personal service to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075.

k. The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

[ARC 8501B, IAB 2/10/10, effective 1/13/10]

641—69.15(135) Waivers. Rules in this chapter are not subject to waiver pursuant to 641—Chapter 178 or any other provision of law.

CHAPTER 70 LEAD-BASED PAINT ACTIVITIES

641—70.1(135) Applicability. This chapter applies to all persons who are lead professionals in Iowa, all firms that perform lead professional activities in Iowa, and training providers that offer training for lead professionals. This chapter requires lead professionals and firms to be certified and establishes specific requirements for how lead-based paint activities must be performed if a property owner, manager, or occupant chooses to undertake them. However, nothing in this chapter requires a property owner, manager, or occupant to undertake any particular lead-based paint activity. This chapter also provides for the approval of courses that provide training for lead professionals.

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.2(135) Definitions.

“Adequate quality control” means a plan or design which ensures the authenticity, integrity, and accuracy of samples, including dust, soil, and paint chip or paint film samples. Adequate quality control also includes provisions for representative sampling.

“Approved course” means a course that has been approved by the department for the training of lead professionals.

“Approved lead-safe work practices training program” means a lead-safe work practices training program that has been approved by the department.

“Arithmetic mean” means the algebraic sum of data values divided by the number of data values. For example, the sum of the concentration of lead in several soil samples divided by the number of samples is the arithmetic mean.

“Certified elevated blood lead (EBL) inspector/risk assessor” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified firm” means a firm that employs certified lead professionals and has met the requirements of 641—70.7(135) for certification and has been certified by the department.

“Certified lead abatement contractor” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified lead abatement worker” means a person who has met the requirements of 641—70.5(135) and who has been certified by the department.

“Certified lead inspector/risk assessor” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified lead professional” means a person who has been certified by the department as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, lead abatement worker, project designer, sampling technician, or lead-safe renovator.

“Certified lead-safe renovator” means a person who has met the requirements of 641—70.5(135) for certification and who has been certified by the department.

“Certified project designer” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified sampling technician” means a person who has met the requirements of 641—70.5(135) and who has been certified by the department.

“Chewable surface” means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew. Surfaces can be considered chewable even if there is no evidence of teeth marks.

“Child-occupied facility” means a building, or portion of a building, constructed prior to 1978, that is described by all of the following: (1) The building is visited on a regular basis by the same child, who is less than six years of age, on at least two different days within any week. For purposes of this chapter, a week is a Sunday through Saturday period. (2) Each day’s visit by the child lasts at least 3 hours, and the combined annual visits total at least 60 hours. A child-occupied facility may include, but is not limited to a child care center, preschool, or kindergarten classroom. A child-occupied facility also includes common areas that are routinely used by children who are less than six years of age, such as restrooms and cafeterias, and the exterior walls and adjoining space of the building that are immediately adjacent to the

child-occupied facility or the common areas routinely used by children under the age of six years. “Child-occupied facility” also includes any building where lead-based paint activities are conducted immediately prior to or during the conversion of the building to a child-occupied facility.

“*Cleaning verification card*” means a card developed and distributed, or otherwise approved, by the U.S. Environmental Protection Agency (EPA) for the purpose of determining, through comparison of wet and dry disposable cleaning cloths with the card, whether postrenovation cleaning has been properly completed.

“*Clearance level*” means the value at which the amount of lead in dust on a surface following completion of interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, rehabilitation, or renovation is a dust-lead hazard and fails clearance testing. The clearance level for a single-surface dust sample from a floor is greater than or equal to 10 micrograms per square foot. The clearance level for a single-surface dust sample from an interior windowsill is greater than or equal to 100 micrograms per square foot. The clearance level for a single-surface dust sample from a window trough is greater than or equal to 400 micrograms per square foot.

“*Clearance testing*” means an activity conducted following interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, rehabilitation, or renovation to determine that the hazard reduction activities are complete. Clearance testing includes a visual assessment, the collection and analysis of environmental samples, the interpretation of sampling results, and the preparation of a report.

“*Common area*” means a portion of the building that is generally accessible to all occupants. This includes, but is not limited to, hallways, stairways, laundry and recreational rooms, porches, exteriors, playgrounds, community centers, garages, and boundary fences.

“*Common area group*” means a group of common areas that are similar in design, construction, and function. Common area groups include, but are not limited to, hallways, stairwells, and laundry rooms.

“*Complete criminal record*” includes the complaint and judgment of conviction for each offense of which the applicant has been convicted, regardless of whether the offense is classified as a felony or a misdemeanor, and regardless of the jurisdiction in which the offense occurred.

“*Component*” or “*building component*” means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include, but are not limited to, interior components such as ceilings, crown moldings, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim (including sashes, window heads, jambs, sills or stools and troughs), built-in cabinets, columns, beams, bathroom vanities, countertops, and air conditioners; and exterior components such as painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, fascias, rake boards, cornerboards, bulkheads, doors and door trim, fences, floors, joists, latticework, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, windowsills or stools and troughs, casings, sashes and wells, and air conditioners. Each side of a door is considered a component within its respective room.

“*Component type*” means a group of like components constructed of the same substrate in the same multifamily housing. For example, “wood door” is a component type.

“*Composite sample*” means the collection of more than one sample of the same medium (e.g., dust, soil, or paint) from the same type of surface (e.g., floor, interior windowsill, or window trough) such that multiple samples can be analyzed as a single sample.

“*Concentration*” means the relative content of a specific substance contained within a larger mass, such as the amount of lead (in micrograms per grams or parts per million of weight) in a sample of soil or dust.

“*Containment*” means a system of temporary barriers to protect workers, residents, and the environment by controlling exposures to the dust-lead hazards and debris created during renovation or lead abatement.

“*Conviction*” means a finding, plea, or verdict of guilt made or returned in a criminal proceeding, even if the adjudication of guilt is deferred, withheld, or not entered. “Conviction” includes Alford pleas and pleas of nolo contendere.

“*Course agenda*” means an outline of the key topics to be covered during a training course, including the time allotted to teach each topic.

“*Course test*” means an evaluation of the overall effectiveness of the training which shall test the trainees’ knowledge and retention of the topics covered during the course.

“*Course test blueprint*” means written documentation identifying the proportion of course test questions devoted to each major topic in the course curriculum.

“*Department*” means the Iowa department of public health.

“*Deteriorated paint*” means any interior or exterior paint or other coating that is cracking, flaking, chipping, peeling, or chalking, or any paint or coating located on an interior or exterior surface that is otherwise damaged or separated from the substrate of a building component.

“*Discipline*” means one of the specific types or categories of lead-based paint activities identified in this chapter for which individuals may receive training from approved courses and become certified by the department. For example, “lead inspector/risk assessor” is a discipline, and “lead-safe renovator” is a discipline.

“*Disqualifying offense*” means a conviction directly related to the duties and responsibilities of the profession. A conviction is directly related to the duties and responsibilities of the profession if either (1) the actions taken in furtherance of an offense are actions customarily performed within the scope of practice of a certified profession, or (2) the circumstances under which an offense was committed are circumstances customary to a certified profession.

“*Distinct painting history*” means the application history, as indicated by its visual appearance or a record of application, over time, of paint or other surface coatings to a component or room.

“*Documented methodologies*” means methods or protocols used to sample for the presence of lead in paint, dust, and soil.

“*Dripline*” means the area within three feet surrounding the perimeter of a building.

“*Dry disposable cleaning cloth*” means a commercially available dry, electrostatically charged, white disposable cloth designed to be used for cleaning hard surfaces such as uncarpeted floors or countertops.

“*Dry sanding*” means sanding a surface that is partially coated with paint or other surface coating without moisture and includes hand and mechanical methods of sanding.

“*Dry scraping*” means scraping a surface that is partially coated with paint or other surface coating without moisture and includes hand and mechanical methods of scraping.

“*Dust-lead hazard*” means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead greater than or equal to 10 micrograms per square foot on floors, 100 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is greater than or equal to 10 micrograms per square foot on floors, 100 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property.

“*Elevated blood lead (EBL) child*” means any child who has had one venous blood lead level greater than or equal to 20 micrograms per deciliter or at least two venous blood lead levels of 15 to 19 micrograms per deciliter.

“*Elevated blood lead (EBL) inspection*” means an inspection to determine the sources of lead exposure for an elevated blood lead (EBL) child and the provision within ten working days of a written report

explaining the results of the investigation to the property owner and occupant of the residential dwelling or child-occupied facility being inspected and to the parents of the elevated blood lead (EBL) child. A certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of an elevated blood lead (EBL) inspection.

“Emergency renovation” means renovation, remodeling, or repainting activities necessitated by nonroutine failures of equipment or of a structure that were not planned but resulted from a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard or threatens equipment or property with significant damage. “Emergency renovation” includes interim controls, renovation, remodeling, or repainting activities that are conducted in response to an elevated blood lead (EBL) inspection.

“Encapsulant” means a substance that forms a barrier between lead-based paint and the environment using a liquid-applied coating (with or without reinforcement materials) or an adhesively bonded coating material.

“Encapsulation” means the application of an encapsulant.

“Enclosure” means the use of rigid, durable construction materials that are mechanically fastened to the substrate in order to act as a barrier between lead-based paint and the environment.

“Firm” means a company, partnership, corporation, sole proprietorship, individual doing business, association, or other business entity; a federal, state, tribal, or local government agency; or a nonprofit organization that performs or offers to perform lead-based paint activities.

“Friction surface” means an interior or exterior surface that is subject to abrasion or friction including, but not limited to, certain window, floor, and stair surfaces.

“Guest instructor” means an individual designated by the training program manager or principal instructor to provide instruction specific to the lecture, hands-on work activities, or work practice components of a course.

“Hands-on skills assessment” means an evaluation which tests the trainees’ ability to satisfactorily perform the work practices and procedures identified in 641—70.6(135), as well as any other skill taught in a training course.

“Hazardous lead-based paint” means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is greater than or equal to the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

“Hazardous waste” means any waste as defined in 40 CFR 261.3.

“HEPA exhaust control” means a HEPA vacuum attached to the machine in such a manner that it captures the air, dust, and debris disturbed by the machine.

“HEPA vacuum” means a vacuum cleaner which has been designed, operated, and maintained with a high-efficiency particulate air (HEPA) filter as the last filtration stage. A HEPA filter is a filter that is capable of capturing particles of 0.3 microns with 99.97 percent efficiency. The vacuum cleaner must be designed, operated, and maintained so that all of the air drawn into the machine is expelled through the HEPA filter with none of the air leaking past it. HEPA vacuums must be operated and maintained in accordance with the manufacturer’s instructions.

“Housing for the elderly” means retirement communities or similar types of housing reserved for households composed of one or more persons 62 years of age or older or an age recognized as elderly by a specific federal housing assistance program.

“Immediate family” means spouse, parents and grandparents, children and grandchildren, brothers and sisters, mother-in-law and father-in-law, brothers-in-law and sisters-in-law, daughters-in-law and sons-in-law, and adopted and step family members.

“Impact surface” means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of door frames.

“Inconclusive classification” means any XRF reading falling within the inconclusive range on the performance characteristic sheet, including the boundary values defining the range.

“Interim controls” means a set of measures designed to temporarily reduce human exposure or likely exposure to lead-based paint hazards, including repairing deteriorated lead-based paint, specialized cleaning, maintenance, painting, temporary containment, ongoing monitoring of lead-based paint hazards or potential hazards, and the establishment and operation of management and resident education programs.

“Interior windowsill” means the portion of the horizontal window ledge that protrudes into the interior of the room.

“Lead abatement” means any measure or set of measures designed to permanently eliminate lead-based paint hazards in a residential dwelling or child-occupied facility. Lead abatement includes, but is not limited to, (1) the removal of lead-based paint and dust-lead hazards, the permanent enclosure or encapsulation of lead-based paint, the replacement of lead-painted surfaces or fixtures, and the removal or covering of soil-lead hazards and (2) all preparation, cleanup, disposal, repainting or refinishing, and postabatement clearance testing activities associated with such measures. “Lead abatement” specifically includes projects for which there is a written contract or other documentation, which provides that an individual will be conducting lead abatement in or around a residential dwelling or child-occupied facility.

In addition, “lead abatement” includes, but is not limited to, (1) projects for which there is a written contract or other document, which provides that an individual will be conducting activities in or to a residential dwelling or child-occupied facility that shall result in or are designed to permanently eliminate lead-based paint hazards, (2) projects resulting in the permanent elimination of lead-based paint hazards that are conducted by firms or individuals certified under 641—70.5(135), (3) projects resulting in the permanent elimination of lead-based paint hazards that are conducted by firms or individuals who, through their company name or promotional literature, represent, advertise, or hold themselves out to be in the business of performing lead abatement, and (4) projects resulting in the permanent elimination of lead-based paint that are conducted in response to a lead abatement order. However, in the case of items (1) through (4) of this definition, “lead abatement” does not include renovation, remodeling, landscaping, or other activities, when such activities are not designed to permanently eliminate lead-based paint hazards, but, instead, are designed to repair, restore, or remodel a given structure or dwelling, even though these activities may incidentally result in a reduction or elimination of lead-based paint hazards. Furthermore, “lead abatement” does not include interim controls, operations and maintenance activities, renovation, or other measures and activities designed to temporarily, but not permanently, reduce lead-based paint hazards.

“Lead-based paint” means paint or other surface coatings that contain lead greater than or equal to 1.0 milligram per square centimeter or greater than 0.5 percent by weight. Lead-based paint is present on any surface that is tested and found to contain lead greater than or equal to 1.0 milligram per square centimeter or greater than 0.5 percent by weight and on any surface like a surface tested in the same room equivalent that has a similar painting history and that is found to be lead-based paint.

“Lead-based paint activities” means, in the case of target housing and child-occupied facilities, lead-free inspection, lead inspection, elevated blood lead (EBL) inspection, lead hazard screen, risk assessment, lead abatement, visual risk assessment, clearance testing conducted after lead abatement, clearance testing conducted after renovation, clearance testing conducted after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, and renovation.

“Lead-based paint hazard” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

“Lead-based paint hazard reduction activity” means an activity that permanently or temporarily reduces or eliminates lead-based paint hazards. “Lead-based paint hazard reduction activity” includes lead abatement, renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35.

“Lead-free inspection” means an inspection to determine whether a single dwelling unit or multifamily housing is free of lead-based paint and qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint and the provision of a written report explaining the results of the lead-free inspection and options for reducing lead-based paint hazards to the property owner and to the person requesting the lead inspection.

“Lead hazard screen” means a limited risk assessment activity that involves limited paint and dust sampling and the provision of a written report explaining the results of the lead hazard screen to the property owner and to the person requesting the lead hazard screen.

“Lead inspection” means a surface-by-surface investigation to determine the presence of lead-based paint and a determination of the existence, nature, severity, and location of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead-based paint hazards to the property owner and to the person requesting the lead inspection. A certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of a lead inspection.

“Lead professional” means a person who conducts lead abatement, renovation, lead inspections, elevated blood lead (EBL) inspections, lead hazard screens, risk assessments, visual risk assessments, clearance testing after lead abatement, clearance testing after renovation, paint testing, or clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35.

“Lead-safe work practices” means methods that are used to minimize hazards when conducting renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35.

“Lead-safe work practices training program” means an 8-hour training program that provides training on how to work safely with lead-based paint.

“Living area” means any area of a residential dwelling used by at least one child under the age of six years, including, but not limited to, living rooms, kitchen areas, dens, playrooms, and children’s bedrooms.

“Loading” means the quantity of a specific substance present per unit of surface area, such as the amount of lead in micrograms contained in the dust collected from a certain surface area divided by the surface area in square feet or square meters.

“Mid-yard” means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

“Minor repair and maintenance activities” means activities, including minor heating, ventilation or air-conditioning work, electrical work, and plumbing, that disrupt less than the minimum areas of a painted surface established in this definition where none of the work practices prohibited or restricted by this chapter are used and where the work does not involve window replacement or demolition of painted surface areas. When painted components or portions of painted components are removed, the entire surface area removed is the amount of painted surface disturbed. Projects, other than emergency renovation, performed in the same room within the same 30 days must be considered the same project for the purpose of determining whether the project is a minor repair and maintenance activity. Renovations performed in response to an elevated blood lead (EBL) inspection are not considered minor repair and maintenance activities. The minimum area for minor repair and maintenance activities is:

1. Less than 1.0 square foot of an interior painted or finished wood surface per renovation;
2. Less than 6.0 square feet of a painted or finished drywall or plaster surface per room; or
3. Less than 20.0 square feet of an exterior painted or finished surface per renovation.

Projects performed pursuant to 24 CFR Part 35 shall comply with the de minimis levels in 24 CFR 35.1350 if these de minimis levels are more restrictive than the minimum areas of a painted surface established in this definition.

“Multifamily dwelling” means a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.

“Multifamily housing” means one or more multifamily dwellings that are under the same ownership or management.

“Negative classification” means any value defined by the performance characteristics sheet as indicating that lead-based paint is not present.

“NIST 1.02 standard film” means the National Institute of Standards and Technology 1.02 milligrams of lead per square centimeter standard reference material. If the specific 1.02 milligrams of lead per square centimeter standard is not available from NIST, then the lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the closest available standard from NIST (1.0X).

“Occupant protection plan” means a plan developed by a certified lead abatement contractor prior to the commencement of lead abatement in a residential dwelling or child-occupied facility that describes the measures and management procedures that will be taken during lead abatement to protect the building occupants from exposure to any lead-based paint hazards.

“Ongoing lead-based paint maintenance” means the maintenance of housing pursuant to 24 CFR Part 35.

“Painted component” means a component or building component that is at least partially covered with paint or other surface coating.

“Paint-lead hazard” means the presence of hazardous lead-based paint in a residential dwelling or a child-occupied facility.

“Paint sample” means a sample collected in a representative location using ASTM E1729, “Standard Practice for Field Collection of Dried Paint Samples for Lead Determination by Atomic Spectrometry Techniques,” or equivalent method.

“Paint stabilization” means repairing any physical defect in the substrate of a painted surface that is causing paint deterioration, removing loose paint and other material from the surface to be treated, and applying a new protective coating or paint pursuant to 24 CFR Part 35.

“Paint testing” means the process of determining the presence or the absence of lead-based paint on a specific component or surface. Paint testing shall only be conducted by certified lead inspector/risk assessors or certified elevated blood lead (EBL) inspector/risk assessors using approved methods for testing. Approved methods for paint testing are XRF analysis and laboratory analysis.

“Performance characteristics sheet (PCS)” means an information sheet developed by the U.S. Environmental Protection Agency and U.S. Department of Housing and Urban Development that defines acceptable operating specifications and procedures for a specific model of X-ray fluorescence analyzer (XRF). The PCS contains information about XRF readings taken on specific substrates, calibration check tolerances, interpretation of XRF readings, and other aspects of the model’s performance.

“Permanently covered soil” means soil which has been separated from human contact by the placement of a barrier consisting of solid, relatively impermeable materials, such as pavement or concrete. Grass, mulch, and other landscaping materials are not considered permanent covering.

“Play area” means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children’s possessions, observations of play patterns, or information provided by parents, residents, caregivers, or property owners.

“Positive classification” means any value defined by the performance characteristics sheet as indicating the presence of lead-based paint.

“Postrenovation cleaning verification” means the use of a wet or dry disposable cleaning cloth to wipe the interior windowsill, window trough, uncarpeted floor, and countertops of the renovation work area and the comparison of the cloth to a cleaning verification card to determine if the work area has been adequately cleaned.

“Principal instructor” means the individual who has the primary responsibility for organizing and teaching a particular course.

“Public housing agency” or *“PHA”* means a state, county, municipality, or other governmental entity or public body which is authorized to engage in or assist in the development or operation of low-income housing. A PHA must be approved by the U.S. Department of Housing and Urban Development (HUD).

“Random selection” means a method of choosing residential dwellings from multifamily housing consisting of similarly constructed and maintained residential dwellings such that each residential dwelling has an equal chance of being selected.

“Recognized laboratory” means an environmental laboratory recognized by the U.S. Environmental Protection Agency pursuant to Section 405(b) of the federal Toxic Substance Control Act as capable of performing an analysis for lead compounds in paint, soil, and dust.

“Recognized test kit” means a commercially available kit recognized by the EPA under 40 CFR 745.88 as being capable of allowing a user to determine the presence of lead at levels equal to or in excess of 1.0 milligrams per square centimeter, or more than 0.5 percent by weight, in a paint chip, paint, powder, or painted surface.

“Reduction” means measures designed to reduce or eliminate human exposure to lead-based paint hazards through methods including interim controls and lead abatement.

“Reevaluation” means a visual assessment of painted surfaces and limited dust and soil sampling conducted periodically following a lead-based paint hazard reduction activity where lead-based paint is still present and the provision of a written report explaining the results of the reevaluation.

“Refresher training course” means a course taken by a certified lead professional to maintain certification in a particular discipline.

“Regulated entity” means any lead professional or firm that is regulated by the department by virtue of these rules, the Iowa Code, certification documents, approval documents, lead abatement notices, or other official regulatory promulgation.

“Rehabilitation” means the improvement of an existing structure through alterations, incidental additions, or enhancements. Rehabilitation includes repairs necessary to correct the results of deferred maintenance, the replacement of principal fixtures and components, improvements to increase the efficient use of energy, and installation of security devices.

“Renovation” means the modification of any existing structure, or portion thereof, that results in the disturbance of painted surfaces, unless that activity is performed as part of lead abatement as defined by this chapter. The term “renovation” includes, but is not limited to, the removal, modification, or repair of painted surfaces or painted components such as modification of painted doors, surface restoration, and window repair; surface preparation activity such as sanding, scraping, or other such activities that may generate paint dust; the partial or complete removal of building components such as walls, ceilings, and windows; weatherization projects such as cutting holes in painted surfaces to install blown-in insulation or to gain access to attics and planing thresholds to install weatherstripping; and interim controls that disturb painted surfaces. “Renovation” does not include minor repair and maintenance activities.

“Residential building” means a building containing one or more residential dwellings.

“Residential dwelling” means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including, but not limited to, garages, farm buildings, and fences, or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

“Risk assessment” means an investigation to determine the existence, nature, severity, and location of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead-based paint hazards to the property owner and to the person requesting the risk assessment.

“Room” means a separate part of the inside of a building, such as a bedroom, living room, dining room, kitchen, bathroom, laundry room, or utility room. To be considered a separate room, the room must be separated from adjoining rooms by built-in walls or archways that extend at least six inches from an intersecting wall. Half walls or bookcases count as room separators if built-in. Movable or collapsible partitions or partitions consisting solely of shelves or cabinets are not considered built-in walls. A screened-in porch that is used as a living area is a room. Each exterior side of the house is considered a separate room.

“Soil-lead hazard” means bare soil on residential real property or on the property of a child-occupied facility that contains total lead greater than or equal to 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is greater than or equal to 400 parts per million.

“Soil sample” means a sample collected in a representative location using ASTM E1727, “Standard Practice for Field Collection of Soil Samples by Atomic Spectrometry Techniques,” or equivalent method.

“Standard treatments” means a series of hazard reduction measures designed to reduce all lead-based paint hazards in a residential dwelling without the benefit of a risk assessment or other evaluation pursuant to 24 CFR Part 35. Standard treatments consist of the stabilization of all deteriorated interior and exterior paint, the provision of smooth and cleanable horizontal hard surfaces, the correction of dust-generating conditions (i.e., conditions causing rubbing, binding, or crushing of surfaces known to or presumed to be coated with lead-based paint), and the treatment of bare soil to control known or presumed soil-lead hazards.

“State certification examination” means a discipline-specific examination approved by the department to test the knowledge of a person who has completed an approved training course and is applying for certification in a particular discipline. The state certification examination may not be administered by the provider of an approved course.

“Substrate” means the material underneath the paint or finish on a surface. Substrates are classified as brick, concrete, drywall, metal, plaster, or wood.

“Substrate correction” means adjustments that must be made to readings obtained from some X-ray fluorescence analyzers to correct for systematic biases due to interference from the substrate beneath the paint.

“Substrate correction value” means the value that is used to adjust readings obtained from some X-ray fluorescence analyzers to correct for systematic biases due to interference from the substrate beneath the paint.

“Targeted selection” means selecting residential dwellings from multifamily housing for risk assessments or lead hazard screens using information supplied by the property owner.

“Target housing” means housing constructed prior to 1978 with the exception of housing for the elderly or for persons with disabilities and housing which does not contain a bedroom, unless at least one child under the age of six years resides or is expected to reside in the housing for the elderly or persons with disabilities or housing which does not contain a bedroom. Target housing also includes any nonresidential building where lead-based paint activities are conducted prior to or during the conversion of the nonresidential building to target housing.

“Testing combination” means the unique combination of the room, component, substrate, and distinct painting history.

“Training hour” means at least 50 minutes of actual learning, including, but not limited to, time devoted to lecture, learning activities, small group activities, demonstrations, evaluations, or hands-on experience.

“Training manager” means the individual responsible for administering an approved course and monitoring the performance of principal instructors and guest instructors.

“Training program” means a person or organization sponsoring a lead professional training course(s).

“Visual inspection for clearance testing” means the visual examination of a residential dwelling or a child-occupied facility following lead abatement or following interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR 35.1340 to determine whether or not the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation has been successfully completed.

“Visual risk assessment” means a visual assessment to determine the presence of deteriorated paint or other potential sources of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the assessment to the property owner and to the person requesting the visual risk assessment. For the purpose of compliance with this chapter, housing quality standards inspections conducted in housing owned by a public housing authority and housing that is receiving tenant-based rental assistance from a public housing authority are not considered visual risk assessments.

“Weighted arithmetic mean” means the arithmetic mean of sample results weighted by the number of subsamples in each sample. Its purpose is to give influence to a sample relative to the surface area it represents. A single surface dust sample is comprised of a single dust subsample. A composite dust sample

may contain from two to four dust subsamples of the same area as each other and of each single surface dust sample in the composite. The weighted arithmetic mean is obtained by summing, for all dust samples, the product of the dust sample's result multiplied by the number of dust subsamples in the dust sample, and dividing the sum by the total number of dust subsamples contained in all dust samples. For example, the weighted arithmetic mean of a single surface dust sample containing 60 micrograms per square foot ($\mu\text{g}/\text{ft}^2$), a composite dust sample (three dust subsamples) containing 100 $\mu\text{g}/\text{ft}^2$, and a composite dust sample (four dust subsamples) containing 110 $\mu\text{g}/\text{ft}^2$ is 100 $\mu\text{g}/\text{ft}^2$. This result is based on the equation $[60+(3\times 100)+(4\times 110)] / (1+3+4)$.

“Wet disposable cleaning cloth” means a commercially available, premoistened white disposable cloth designed to be used for cleaning hard surfaces such as uncarpeted floors or countertops.

“Wet mopping system” means a device with the following characteristics: a long handle, a mop head designed to be used with disposable absorbent cleaning pads, a reservoir for cleaning solution, and a built-in mechanism for distributing or spraying the cleaning solution onto a floor, or a method of equivalent efficiency.

“Wet sanding” means a process of removing loose paint in which a surface that is partially coated with paint or other surface coating is kept wet or moist during sanding to minimize the dispersal of paint chips and airborne dust.

“Wet scraping” means a process of removing loose paint in which a surface that is partially coated with paint or other surface coating is kept wet or moist during scraping to minimize the dispersal of paint chips and airborne dust.

“Windowsill” means the portion of the horizontal window ledge that protrudes into the interior of the room when the window is closed.

“Window trough” means, for a typical double-hung window, the portion of the exterior windowsill between the interior windowsill (or stool) and the frame of the storm window. If there is no storm window, the window trough is the area that receives both the upper and lower window sashes when they are both lowered. The window trough is sometimes referred to as the window well.

“Wipe sample” means a sample collected by wiping a representative surface of known area, as determined by ASTM E1728, “Standard Practice for Field Collection of Settled Dust Samples Using Wipe Sampling Methods for Lead Determination by Atomic Spectrometry Techniques,” or equivalent method, with an acceptable wipe material as defined in ASTM E1792, “Standard Specification for Wipe Sampling Materials for Lead in Surface Dust.” The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches.

“Worksite” or *“work area”* means an interior or exterior area where lead-based paint hazard reduction activity or renovation takes place. There may be more than one worksite in a dwelling unit or at a residential property.

“Worst case selection” means conducting a walk-through survey of all residential dwellings in the multifamily housing to select the highest-risk residential dwellings for risk assessments or lead hazard screens.

“X-ray fluorescence analyzer (XRF)” means an instrument that determines lead concentrations in milligrams per square centimeter (mg/cm^2) using the principle of X-ray fluorescence.

“XRF reading” means the number obtained when a surface is tested with an X-ray fluorescence analyzer.

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 0482C, IAB 12/12/12, effective 1/16/13; ARC 3104C, IAB 6/7/17, effective 7/12/17; ARC 4906C, IAB 2/12/20, effective 3/18/20; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.3(135) Lead professional certification. A person or a firm shall not conduct lead abatement, renovation, clearance testing after lead abatement, lead-free inspections, lead inspections, elevated blood lead (EBL) inspections, lead hazard screens, risk assessments, visual risk assessments, clearance testing after renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 unless the person or firm has been certified by the department in the appropriate discipline. However, persons who perform these activities within

residential dwellings that they own are not required to be certified, unless the residential dwelling is occupied by a person other than the owner or a member of the owner's immediate family while these activities are being performed. In addition, elevated blood lead (EBL) inspections shall be conducted only by certified elevated blood lead (EBL) inspector/risk assessors employed by or under contract with the department, a local board of health, or a public housing agency. In addition, persons who perform renovation under the supervision of a certified lead-safe renovator, certified lead abatement contractor, or certified lead abatement worker and who have completed on-the-job training are not required to be certified. However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR Part 35. Lead professionals and firms shall not state that they have been certified by the state of Iowa unless they have met the requirements of 641—70.5(135) and been issued a current certificate by the department.

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 3104C, IAB 6/7/17, effective 7/12/17; ARC 4906C, IAB 2/12/20, effective 3/18/20; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.4(135) Course approval and standards. All lead professional training courses for initial certification and refresher training must be approved by the department. Training programs shall not state that they have been approved by the state of Iowa unless they have met the requirements of 641—70.4(135) and been approved by the department.

70.4(1) Training courses shall meet the following requirements:

a. The training program offering the course shall employ a training manager who has the following qualifications:

(1) A bachelor's or graduate degree in building construction technology, engineering, industrial hygiene, safety, public health, or a related field; or two years of experience in managing a training program specializing in environmental hazards.

(2) Demonstrated experience, education, or training in lead professional activities, including lead inspection, lead abatement, lead-safe work practices, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.

b. The training manager shall designate a qualified principal instructor for each course who has the following qualifications:

(1) Demonstrated experience, education, or training in teaching workers or adults.

(2) Certification as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, or lead abatement contractor. In the case of a course for training lead-safe renovators, the principal instructor may be certified as a sampling technician.

(3) Demonstrated experience, education, or training in lead professional activities, including lead inspection, lead abatement, lead-safe work practices, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.

c. The principal instructor shall be responsible for the organization of the course and oversight of the teaching of all course material. The training manager may designate guest instructors as needed to provide instruction specific to the lecture, hands-on activities, or work practice components of a course.

d. The training program shall ensure the availability of, and provide adequate facilities for, the delivery of the lecture, course test, hands-on training, and assessment activities. This includes providing training equipment that reflects current work practices and maintaining or updating the equipment as needed.

e. The training manager shall maintain the validity and integrity of the hands-on skills assessment to ensure that it accurately evaluates the trainees' performance of the work practices and procedures associated with the course topics contained in subrules 70.4(3) to 70.4(17).

f. The training manager shall maintain the validity and integrity of the course test to ensure that it accurately evaluates the trainees' knowledge and retention of the course topics.

g. The course test shall be developed in accordance with the test blueprint submitted with the course approval application.

h. The training program shall issue unique course completion certificates to each student who passes the course. The course completion certificate shall be issued in color. The course completion certificate shall include:

- (1) The first name, last name and middle initial of the student.
- (2) The address of the student.
- (3) A photograph of the student, and a unique identification number.
- (4) The name of the particular course that the student completed and the course length in hours.
- (5) Dates of course completion and test passage.
- (6) The name, address, and telephone number of the training program.
- (7) The signature of the training manager.
- i.* The training manager shall develop and implement a quality control plan. The plan shall be used to maintain and improve the quality of the training program over time. This plan shall contain at least the following elements:
 - (1) Procedures for periodic revision of training materials and the course test to reflect changes in regulations and recommended practices.
 - (2) Procedures for the training manager to conduct an annual review of the competency of the principal instructor and all other instructors.
- j.* The training program shall offer courses that teach the work practice standards for conducting lead-based paint activities contained in 641—70.6(135) and other standards developed by the department. These standards shall be taught in the appropriate courses to provide trainees with the knowledge needed to perform the lead-based paint activities they are responsible for conducting.
- k.* The training manager shall ensure that each course meets the requirements in this rule for the number of training hours and hours of hands-on training. The training manager shall ensure that any student who misses more than 20 minutes of class time makes up the time before taking the course test.
- l.* The training manager shall ensure that the training program complies at all times with all requirements in this rule.
- m.* The training manager shall allow the department to audit the training program to verify the contents of the application for approval and for reapproval.
- n.* The training program shall maintain, and make available to the department, upon request, the following records:
 - (1) All documents specified in paragraph 70.4(2) “*f.*”
 - (2) Current curriculum/course materials and documents reflecting any changes made to these materials.
 - (3) The course test blueprint and the course test.
 - (4) Information regarding how the hands-on assessment is conducted including, but not limited to, who conducts the assessment, how the skills are graded, what facilities are used, and the pass/fail rate.
 - (5) The quality control plan as described in paragraph 70.4(1) “*i.*”
 - (6) A file for each student who has completed a course. Each student file shall contain the following:
 1. The student’s name, address, and telephone number.
 2. The student’s test and answer sheet.
 3. A copy of the student’s course completion certificate.
 4. A copy of the student’s hands-on skill assessment, if applicable.
 5. A photograph of the student as taken by the training program.
 - (7) A file for each individual course that has been offered. Each file shall include the following:
 1. The dates of the course.
 2. The location of the course.
 3. The instructors who taught the course.
 4. A paper or electronic copy of the curriculum used for the course.
 5. A copy of the test used for the course.
 6. Documentation of the times that each student was present at the course, including documentation of how a student made up missed time.
 7. The course evaluations.
 - (8) Any other materials that have been submitted to the department as part of the program’s application for approval.

o. The training program shall retain all required records at the address specified on the training program approval application for a minimum of six years.

p. The training program shall notify the department within 30 days of changing the address specified on its training program approval application or transferring the records from that address.

q. A training program shall notify the department at least 7 days in advance of offering an approved course. The notification shall include the date(s), time(s), and location(s) where the approved course will be held. A training program shall notify the department at least 24 hours in advance of canceling an approved course.

r. The training program shall take a digital photograph of each student. The digital photograph shall be the same photograph that appears on the training certificate and is submitted to the department. The photograph shall meet the following specifications:

- (1) The individual shall be facing the camera.
- (2) The individual's head shall not be tilted.
- (3) The individual's head shall cover approximately half of the photo area.
- (4) The individual shall be in front of a neutral or light-colored background.
- (5) The individual shall not wear any items that detract from the face, such as hats or sunglasses. Only head coverings worn for religious reasons may be worn. Religious head coverings may not cover the face of the individual.

- (6) Photographs shall be 24-bit color depth.

s. A training program shall roster each student who has taken the approved course into a database specified by the department. All students shall be rostered into the department database within 20 days of conclusion of an approved course. Rostering shall include:

- (1) Name and address.
- (2) Course completion certificate number.
- (3) Test score.
- (4) The photograph of each student as taken by the training program in a format specified by the department.

70.4(2) If a training program desires approval of a course by the department, the training program shall apply to the department for approval at least 90 days before the initial offering of the course. The department may allow courses to be offered sooner if the department completes the approval in less than 90 days. The application shall include:

- a.* Training program name, contact person, address, email address, and telephone number.
- b.* Course for which approval is sought.
- c.* Course locations, including a description of the facilities and equipment to be used for lecture and hands-on training.

- d.* Course agenda, including approximate times allotted to each training segment.

e. A copy of each reference material, text, student manual, instructor manual, and audiovisual material used in the course.

f. The name(s) and qualifications of the training manager, principal instructor(s), and guest instructor(s). The following documents shall be submitted as evidence that training managers and principal instructors have the education, work experience, training requirements, or demonstrated experience required by subrule 70.4(1):

- (1) Official transcripts or diplomas as evidence of meeting the education requirements.
- (2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.

- (3) Certificates from lead-specific training courses, as evidence of meeting the training requirements.

- g.* A copy of the course test blueprint.

h. A description of the activities and procedures that will be used for conducting the assessment of hands-on skills for each course.

- i.* Maximum class size.

- j.* A copy of the quality control plan for the course.

- k.* A nonrefundable fee of \$200.

70.4(3) To be approved for the training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors, a course must be at least 40 training hours with a minimum of 12 hours devoted to hands-on training activities. Lead inspector/risk assessor and elevated blood lead (EBL) inspector/risk assessor training courses shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a. Role and responsibilities of an inspector/risk assessor.
- b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.
- c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d. Lead-based paint inspection methods, including selection of rooms and components for sampling or testing to determine if a property is free of lead-based paint as specified in the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing ((2012), U.S. Department of Housing and Urban Development), and methods to determine if lead-based paint hazards are present in a property.*
- e. Paint, dust, and soil sampling methodologies.*
- f. Clearance standards and testing, including random sampling.*
- g. Collection of background information to perform a risk assessment.
- h. Sources of environmental lead contamination such as paint, surface dust and soil, and water.
- i. Visual inspection to identify lead-based paint hazards.*
- j. Lead hazard screen protocol.
- k. Visual risk assessment protocol.
- l. Reevaluation protocol.
- m. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint.*
- n. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*
- o. Sampling for other sources of lead exposure.*
- p. Interpretation of lead-based paint and other lead sampling results, including all applicable federal, state, and local guidance or regulations pertaining to lead-based paint hazards.*
- q. Development of lead hazard control options.
- r. The role of interim controls, operation and maintenance activities, and renovation in reducing lead-based paint hazards.
- s. Approved methods for conducting lead-based paint abatement, interim controls, operation and maintenance activities, and renovation.
- t. Prohibited methods for conducting lead-based paint abatement, interim controls, operation and maintenance activities, and renovation.
- u. Interior dust abatement and cleanup.
- v. Soil and exterior dust abatement and cleanup.
- w. Preparation of the final reports for lead inspections, lead-free inspections, risk assessments, visual assessments, lead hazard screens, clearance testing after lead abatement, clearance testing after renovation, reevaluation, and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35.
- x. Record keeping.
- y. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.
- z. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state

certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

aa. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(4) To be approved for the training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors who have already completed an approved sampling technician course, a course must be at least 20 training hours with a minimum of 8 hours devoted to hands-on training activities. The training course shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

a. Role and responsibilities of a lead inspector/risk assessor and elevated blood lead (EBL) inspector/risk assessor.

b. Lead-based paint inspection methods, including selection of rooms and components for sampling or testing to determine if a property is free of lead-based paint as specified in the work practice standards in 641—70.6(135), and methods to determine if lead-based paint hazards are present in a property.*

c. Collection of background information to perform a risk assessment.

d. Lead hazard screen protocol.

e. Reevaluation protocol.

f. Sampling for other sources of lead exposure.*

g. Interpretation of lead-based paint and other lead sampling results, including all applicable federal, state, and local guidance or regulations pertaining to lead-based paint hazards.*

h. Development of lead hazard control options, including lead abatement.*

i. The role of interim controls, operation and maintenance activities, and renovation in reducing lead-based paint hazards.

j. Approved methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

k. Prohibited methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

l. Preparation of the final reports for lead inspections, lead-free inspections, risk assessments, lead hazard screens, reevaluation, and clearance testing after lead abatement.

m. Record keeping.

n. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

o. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

p. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(5) To be approved for the training of elevated blood lead (EBL) inspector/risk assessors, a course must be at least eight training hours with a minimum of two hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

a. Role and responsibility of an elevated blood lead (EBL) inspector/risk assessor.

b. Background information on childhood lead poisoning prevention programs in Iowa.

c. EBL lead inspection protocol described in this chapter and the EBL inspection protocol recommended by HUD.

d. Environmental and medical case management of lead-poisoned children.

e. Health effects of lead poisoning including an in-depth review of the scientific studies demonstrating the health effects of lead poisoning.

f. Chelation therapy including at what levels it is recommended and when it might not be needed.

g. Risk of childhood lead exposure from adult occupations or hobbies.

h. Case scenarios.*

i. The course shall conclude with a course test. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

j. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

k. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(6) Rescinded IAB 3/31/04, effective 5/5/04.

70.4(7) Rescinded IAB 3/31/04, effective 5/5/04.

70.4(8) To be approved for the training of lead abatement contractors, a course must be at least 40 training hours with a minimum of 12 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

a. Role and responsibilities of a lead abatement contractor.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Liability and insurance issues relating to lead abatement, interim controls, and renovation.

e. Identification of lead-based paint and lead-based paint hazards.*

f. Interpretation of lead inspection reports.*

g. Development and implementation of an occupant protection plan, lead abatement report, and renovation report.

h. Respiratory protection and protective clothing.*

i. Employee information and training.

j. Approved methods for conducting lead abatement, interim controls, and renovation.*

k. Prohibited methods for conducting lead abatement, interim controls, and renovation.

l. Interior dust abatement and cleanup.*

m. Soil and exterior dust abatement and cleanup.*

n. Clearance standards and testing, including random sampling.

o. Cleanup, waste handling, and waste disposal.

p. In the case of renovation, interior and exterior containment and cleanup methods.*

q. In the case of renovation, providing on-the-job training to other workers.*

r. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

s. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

t. In the case of renovation, record preparation and record keeping.

u. Record keeping for lead abatement.

v. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than

three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

w. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

x. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(9) To be approved for the training of lead abatement contractors who have already completed an approved lead abatement worker course, a course must be at least 16 training hours with a minimum of 4 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a. Role and responsibilities of a lead abatement contractor.
- b. Liability and insurance issues relating to lead abatement.
- c. Interpretation of lead inspection reports.*
- d. Development and implementation of an occupant protection plan and abatement report.
- e. Employee information and training.
- f. Clearance standards and testing, including random sampling.
- g. Record keeping for lead abatement.

h. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

i. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

j. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(10) To be approved for the training of lead abatement workers, a course must be at least 24 training hours with a minimum of 8 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a. Role and responsibilities of a lead abatement worker.
- b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.
- c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d. Identification of lead-based paint and lead-based paint hazards.*
- e. Approved methods for conducting lead abatement, interim controls, and renovation.*
- f. Prohibited methods for conducting lead abatement, interim controls, and renovation.
- g. Interior dust abatement and cleanup.*
- h. Soil and exterior dust abatement and cleanup.*
- i. Cleanup, waste handling, and waste disposal.
- j. Respiratory protection and protective clothing.*
- k. Personal hygiene.
- l. In the case of renovation, interior and exterior containment and cleanup methods.*
- m. In the case of renovation, providing on-the-job training to other workers.*

n. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

o. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

p. In the case of renovation, record preparation and record keeping.

q. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

r. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

s. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(11) To be approved for the training of sampling technicians, a course must be at least 20 training hours with a minimum of 4 hours devoted to hands-on training activities. The training course shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

a. Role and responsibilities of a sampling technician.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Methods of conducting visual risk assessments.*

e. Paint, dust, and soil sampling methodologies.*

f. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint.*

g. Clearance standards and testing.*

h. Identification of lead-based paint hazards.*

i. Sources of environmental lead contamination such as paint, surface dust and soil, and water.

j. Visual inspection to identify lead-based paint hazards.*

k. Approved methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

l. Prohibited methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

m. Methods of interim controls and lead abatement for interior dust and cleanup.

n. Methods of interim controls and lead abatement for exterior dust and soil and cleanup.

o. Preparation of the final visual assessment report.

p. Preparation of clearance testing reports for clearance testing after renovation and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35.

q. Record keeping.

r. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

s. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department

for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

t. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(12) To be approved for the training of project designers, a course must be at least 48 instructional training hours with a minimum of 12 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of a lead abatement contractor.
- b.* Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.
- c.* Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d.* Liability and insurance issues relating to project design.
- e.* Identification of lead-based paint and lead hazards.*
- f.* Interpretation of lead inspection reports.*
- g.* Development and implementation of an occupant protection plan, lead abatement report, and renovation report.
- h.* Respiratory protection and protective clothing.*
- i.* Employee information and training.
- j.* Approved methods for conducting lead abatement, interim controls, and renovation.*
- k.* Prohibited methods for conducting lead abatement, interim controls, and renovation.
- l.* Interior dust abatement and cleanup.*
- m.* Soil and exterior dust abatement and cleanup.*
- n.* Clearance standards and testing, including random sampling.
- o.* Cleanup, waste handling, and waste disposal.
- p.* In the case of renovation, providing on-the-job training to other workers.*
- q.* In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*
- r.* In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*
- s.* In the case of renovation, record preparation and record keeping.
- t.* Record keeping for lead abatement.
- u.* Role and responsibilities of a project designer.
- v.* Development and implementation of an occupant protection plan for large-scale lead abatement projects.
- w.* Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.
- x.* Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.
- y.* Clearance standards and testing for large-scale lead abatement projects.
- z.* Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.
- aa.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.
- ab.* The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state

certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

ac. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(13) To be approved for the training of project designers who have already completed an approved lead abatement contractor course, a course must be at least 8 instructional training hours and shall cover at least the following subjects:

- a.* Role and responsibilities of a project designer.
- b.* Development and implementation of an occupant protection plan for large-scale abatement projects.
- c.* Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.
- d.* Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.
- e.* Clearance standards and testing for large-scale lead abatement projects.
- f.* Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.
- g.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.
- h.* The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.
- i.* All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(14) To be approved for the training of project designers who have already completed an approved lead abatement worker course, a course must be at least 24 instructional training hours with a minimum of 4 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of a lead abatement contractor.
- b.* Liability and insurance issues relating to lead abatement.
- c.* Interpretation of lead inspection reports.*
- d.* Development and implementation of an occupant protection plan and lead abatement report.
- e.* Employee information and training.
- f.* Clearance standards and testing, including random sampling.
- g.* Record keeping.
- h.* Role and responsibilities of a project designer.
- i.* Development and implementation of an occupant protection plan for large-scale lead abatement projects.
- j.* Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.
- k.* Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.
- l.* Clearance standards and testing for large-scale lead abatement projects.
- m.* Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.

n. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

o. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

p. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(15) To be approved for the training of lead-safe renovators, a course must be at least 8 instructional training hours with a minimum of 2 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

a. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

b. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint, lead-based paint activities, and renovation activities.

c. Procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

d. Renovation methods to minimize the creation of dust and lead-based paint hazards.*

e. Prohibited methods of renovation.

f. Interior and exterior containment and cleanup methods.*

g. Methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

h. Waste handling and disposal.

i. Providing on-the-job training to other workers.*

j. Record preparation and record keeping.

k. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

l. The instructor shall provide an introduction of the online certification system used by the department. The instructor shall advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor shall also provide each student with a current copy of this chapter and 641—Chapter 69.

m. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(16) To be approved for refresher training of sampling technicians, lead abatement contractors, lead abatement workers, and project designers, a course must be at least 8 training hours. To be approved for refresher training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors who completed an approved 24-hour training course, a course must be at least 8 training hours to meet the recertification requirements of subrule 70.5(3). To be approved for refresher training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors to meet the recertification requirements of subrule 70.5(6), a course must be at least 16 training hours. To be approved for refresher training of lead-safe renovators, a course must be at least 4 hours and must include a hands-on component. All refresher training courses shall cover at least the following topics:

- a. A review of the curriculum topics of the initial certification course for the appropriate discipline as listed in subrules 70.4(3) to 70.4(15).
- b. An overview of current safety practices relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- c. Current laws and regulations relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- d. Current technologies relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- e. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.
- f. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

70.4(17) Approvals of training courses shall expire three years after the date of issuance. The training manager shall submit the following at least 30 days prior to the expiration date for a course to be reaproved:

- a. Sponsoring organization name, contact person, address, and telephone number.
- b. A list of the courses for which reaproval is sought.
- c. A description of any changes to the training staff, facility, equipment, or course materials since the approval of the training program.
- d. A statement signed by the training manager stating that the training program complies at all times with 641—70.4(135).
- e. A nonrefundable fee of \$200.

70.4(18) The department shall consider a request for approval of a training course that has been approved by a state or tribe authorized by the U.S. Environmental Protection Agency.

- a. The course shall be approved if it meets the requirements of 641—70.4(135).
- b. If the course does not meet all of the requirements of 641—70.4(135), the department shall inform the training provider of additional topics and training hours that are needed to meet the requirements of 641—70.4(135).

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 3104C, IAB 6/7/17, effective 7/12/17; ARC 4906C, IAB 2/12/20, effective 3/18/20; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.5(135) Certification, interim certification, and recertification. The department shall issue certifications and recertifications for a three-year time period. All applications for certification or recertification may be made to the department electronically in a format specified by the department or may be made to the department using a paper application supplied by the department.

70.5(1) A person wishing to become a certified lead professional shall provide the following information:

- a. A completed application form.
- b. A certificate of completion of an approved course for the discipline in which the applicant wishes to become certified.
- c. If wishing to become a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor, documentation of successful completion of the manufacturer's training course or equivalent for the X-ray fluorescence (XRF) analyzer that the inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use to conduct lead inspections.
- d. If wishing to become a certified elevated blood lead (EBL) inspector/risk assessor, documentation of successful completion of an eight-hour elevated blood lead (EBL) inspector/risk assessor course.
- e. Documentation that the applicant meets the additional experience and education requirements in subrule 70.5(2) for the discipline in which the applicant wishes to become certified. The following documents shall be submitted as evidence that the applicant has the education and work experience required by subrule 70.5(2):

- (1) Official transcripts or diplomas as evidence of meeting the education requirements.
- (2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.

f. To become certified as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, or project designer, a certificate showing that the applicant has passed the state certification examination in the discipline in which the applicant wishes to become certified.

g. A \$180 nonrefundable fee.

h. A person may receive interim certification from the department as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, or project designer by submitting the items required by paragraphs 70.5(1)“a” to “e” and “g” to the department. Interim certification shall expire six months from the date of completion of an approved course. An applicant shall upgrade an interim certification to a certification by submitting a certificate to the department showing that the applicant has passed the state certification examination as required by paragraph 70.5(1)“f.” Interim certification is equivalent to certification.

70.5(2) To become certified by the department as a lead professional, an applicant must meet the education and experience requirements for the appropriate discipline:

a. Lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors must meet one of the following requirements:

(1) Bachelor’s degree and one year of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(2) Associate’s degree and two years of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(3) High school diploma and three years of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(4) Certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian, registered environmental health specialist, or registered nurse.

b. Lead abatement contractors must meet one of the following requirements:

(1) One year of experience as a certified lead abatement worker.

(2) Two years of related experience or education (e.g., lead, housing inspection, building trades, property management and maintenance).

c. No additional education or experience is required for lead abatement workers.

d. Sampling technicians must meet one of the following requirements:

(1) Associate’s degree.

(2) High school diploma and one year of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(3) Certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian, registered environmental health specialist, or registered nurse.

e. Project designers must meet one of the following requirements:

(1) Bachelor’s degree in engineering, architecture, or a related profession, and one year of experience in building construction and design or a related field.

(2) Four years of experience in building construction and design or a related field.

f. No additional education or experience is required for lead-safe renovators.

70.5(3) *Use of criminal convictions in eligibility determinations and initial licensing decisions.*

a. License application. Unless an applicant for licensure petitions the department for an eligibility determination pursuant to paragraph 70.5(3)“b,” the applicant’s convictions will be reviewed when the department receives a completed certification application.

(1) An applicant must disclose all convictions on a certification application. Failure to disclose all convictions is grounds for certification denial or disciplinary action following certification issuance.

(2) An applicant with one or more convictions shall submit the complete criminal record for each conviction and a personal statement regarding whether each conviction directly relates to the practice of the profession in order for the certification application to be considered complete.

(3) An applicant must submit as a part of the certification application all evidence of rehabilitation that the applicant wishes to be considered by the department.

(4) The department may deny a certification if the applicant has a disqualifying offense unless the applicant demonstrates by clear and convincing evidence that the applicant is rehabilitated pursuant to Iowa Code section 272C.15.

(5) An applicant with one or more disqualifying offenses who has been found rehabilitated must still satisfy all other requirements for certification.

(6) Any application fees paid will not be refunded if the certification is denied.

b. Eligibility determination. An individual who has not yet submitted a completed certification application may petition the department for a determination of whether one or more of the individual's convictions are disqualifying offenses that would render the individual ineligible for certification. An individual with a conviction is not required to petition the department for an eligibility determination prior to applying for certification. To petition the department for an eligibility determination of whether one or more of the petitioner's convictions are disqualifying offenses, a petitioner shall submit all of the following:

- (1) A completed petition for eligibility determination form;
- (2) The complete criminal record for each of the petitioner's convictions;
- (3) A personal statement regarding whether each conviction directly relates to the duties and responsibilities of the profession and why the department should find the petitioner rehabilitated;
- (4) All evidence of rehabilitation that the petitioner wishes to be considered by the department; and
- (5) Payment of a nonrefundable fee of \$25.

c. Appeal. A petitioner deemed ineligible or an applicant denied a certification because of a disqualifying offense may appeal the decision in the manner and time frame set forth in the department's written decision. A timely appeal will initiate a nondisciplinary contested case proceeding. The department's rules governing contested case proceedings will apply unless otherwise specified in this rule. If the petitioner or applicant fails to timely appeal, the department's written decision will become a final order.

(1) An administrative law judge will serve as the presiding officer of the nondisciplinary contested case proceeding, unless the department elects to serve as the presiding officer. When an administrative law judge serves as the presiding officer, the decision rendered shall be a proposed decision.

(2) The office of the attorney general shall represent the department's initial ineligibility determination or certification denial and shall have the burden of proof to establish that the petitioner or applicant's convictions include at least one disqualifying offense. Upon satisfaction of this burden by a preponderance of the evidence by the office of the attorney general, the burden of proof shall shift to the petitioner or applicant to establish rehabilitation by clear and convincing evidence.

(3) A petitioner or applicant must appeal an ineligibility determination or certification denial in order to exhaust administrative remedies. A petitioner or applicant may only seek judicial review of an ineligibility determination or certification denial after the issuance of a final order following a contested case proceeding. Judicial review of the final order following a contested case proceeding shall be in accordance with Iowa Code chapter 17A.

d. Future petitions or applications. If a final order determines a petitioner is ineligible, the petitioner may not submit a subsequent petition for eligibility determination or a certification application prior to the date specified in the final order. If a final order denies a certification application, the applicant may not submit a subsequent certification application or a petition for eligibility determination prior to the date specified in the final order.

70.5(4) Reserved.

70.5(5) Rescinded IAB 2/12/20, effective 3/18/20.

70.5(6) Individuals applying for recertification as lead professionals must submit the following:

- a.* A completed application form.
- b.* A \$180 nonrefundable fee.

c. A certificate showing that the applicant has successfully completed an approved refresher training course for the appropriate discipline. The refresher training course must be completed no more than three years prior to the date of the application for recertification.

70.5(7) The department shall approve the state certification examinations for the disciplines of lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, and project designer. The state certification examination shall be administered by selected community college testing centers in Iowa. A community college testing center shall set the fee for administering the state certification examination to each applicant and shall collect the fee from each applicant.

a. An individual must achieve a score of at least 80 percent on the examination. An individual may take the state certification examination no more than three times within six months of receiving a certificate of completion from an approved course.

b. If an individual does not pass the state certification examination within six months of receiving a certificate of completion from an approved course, the individual must retake the appropriate approved course before reapplying for certification.

70.5(8) Reciprocity. Each applicant for certification who is certified in any of the disciplines specified in this rule in another state may request reciprocal certification. The department shall evaluate the requirements for certification to determine that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa. For all disciplines except lead-safe renovator and lead abatement worker, if the department determines that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa, the applicant may be certified after passing a proctored test covering Iowa-specific lead information with a score of at least 80 percent. For a lead-safe renovator and lead abatement worker, if the department determines that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa, the applicant may be certified after signing a statement indicating that the applicant has read and understands Iowa-specific lead information provided by the department. Each applicant for certification pursuant to this subrule shall submit the appropriate application accompanied by the fee for each discipline as specified in 641—70.5(135).

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 3104C, IAB 6/7/17, effective 7/12/17; ARC 4906C, IAB 2/12/20, effective 3/18/20; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.6(135) Work practice standards for lead professionals conducting lead-based paint activities in target housing and child-occupied facilities. All lead-based paint activities shall be performed according to the work practice standards in 641—70.6(135), and a certified individual must perform that activity in compliance with the appropriate requirements below.

70.6(1) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct a lead-free inspection according to the following standards. A lead-free inspection shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting a lead-free inspection in a residential dwelling, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint in each room, including each exterior side.

(2) Except for components known to have been replaced after December 31, 1977, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. Except for walls, one sample shall be taken for each testing combination in a room. Each wall in a room shall be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall require one of the following two types of evidence to determine that components were replaced after 1977:

1. Detailed specifications showing which components were to be replaced, restored, enclosed, or encapsulated and evidence that the work was actually completed such as receipts for building materials,

city building records showing a date of remodeling, or a final inspection by the city or another inspector showing that the work was actually completed.

2. A certification under penalty of perjury per Iowa Code section 622.1 from the contractor who did the work or from the person(s) who owned the property at the time outlining all of the components that were removed and replaced.

If one of these two types of evidence is not available, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test the component.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall note any components where lead-based paint has been enclosed or encapsulated. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not make a determination that the residential dwelling is lead-free where components that are painted with lead-based paint have been enclosed or encapsulated.

(4) Paint shall be tested using adequate quality control by X-ray fluorescence (XRF) or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use standards provided by the manufacturer and the NIST 1.02 standard film for calibration of the X-ray fluorescence analyzer.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection, every four hours, and at the end of the inspection.

4. Prior to taking the final set of calibration readings and if recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead

inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If instructed by the property owner or the person requesting the report, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that inconclusive readings are positive, but shall not assume that inconclusive readings are negative.

7. As described by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct retesting of 10 surfaces, calculate the retest tolerance limit, and determine whether the inspection meets the retest tolerance limit. If the retest tolerance limit is not met, then this procedure shall be repeated with 10 additional surfaces. If the retest tolerance limit is not met with the 20 retested surfaces, then all results of the inspection shall be considered invalid.

(5) If each testing combination in the residential dwelling is found to be free of lead-based paint, then the residential dwelling is free of lead-based paint. If any surface in the residential dwelling is found to be painted with lead-based paint, then the residential dwelling is not free of lead-based paint.

(6) If lead-based paint is identified through a lead-free inspection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

(7) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a lead-free inspection is completed. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the lead-free inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The report shall include, at least:

1. A statement that the inspection was conducted to determine whether the residential dwelling is free of lead-based paint;
2. Date of inspection;
3. Address of building;
4. Date of construction;
5. Apartment numbers (if applicable);
6. The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
7. Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;
8. Name and certification number of the certified firm(s) conducting the inspection;
9. Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
10. Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) device;
11. XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated at each required calibration;
12. Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

13. The results of retesting of 10 surfaces, calculations to determine the retest tolerance limit, and the determination of whether the inspection meets the retest tolerance limit;

14. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that the residential dwelling is free of lead-based paint, the report shall contain the following statement:

“The results of this inspection indicate that no lead in amounts greater than or equal to 1.0 mg/cm² in paint was found on any building components, using the inspection protocol in Chapter 7 of the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing ((2012), U.S. Department of Housing and Urban Development). Therefore, this residential dwelling qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint, as defined in the rule. However, some painted surfaces may contain levels of lead below 1.0 mg/cm², which could create lead dust or lead-contaminated soil hazards if the paint is turned into dust by abrasion, scraping, or sanding. This report should be kept by the owner and all future owners for the life of the residential dwelling. Per the disclosure requirements of 24 CFR Part 35 and 40 CFR Part 745, prospective buyers are entitled to all available inspection reports should the property be resold.”;

15. If any lead-based paint is identified, a description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

16. A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

17. Information regarding the owner’s obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

18. Information regarding Iowa’s prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa’s regulations for renovation, remodeling and repainting found in 641—Chapter 70; and

19. The report shall contain the following statement:

“The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135).”

b. When conducting a lead-free inspection in multifamily housing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) A certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may randomly select residential dwellings for testing when conducting a lead-free inspection in multifamily housing. If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not randomly select the residential dwellings for testing or if there are not enough residential dwellings to randomly select them for sampling, all residential dwellings shall be tested. If random selection is used, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor conducting the lead-free inspection shall randomly select the residential dwellings to be tested. The property owner, manager, or another interested party shall not specify which residential dwellings are to be tested. The certified lead inspector/risk assessor

or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

Table 1

Minimum Number of Residential Dwellings to be Randomly Selected in Multifamily Housing for
Lead-Free Inspection, Risk Assessment, Lead Hazard Screen, or Clearance Testing

Number of Similar Residential Dwellings, Similar Common Areas, or Similar Exteriors in Multifamily Housing	Lead-Free Inspection, Risk Assessment, or Lead Hazard Screen		Clearance Testing
	Number of Pre-1960 Residential Dwellings or Residential Dwellings of Unknown Date of Construction to Randomly Select for Testing	Number of 1960-1977 Residential Dwellings to Randomly Select for Testing	Number of Residential Dwellings to Randomly Select for Clearance Testing

(2) A certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may randomly select each type of common area in the multifamily housing, including but not limited to hallways, exterior sides of a building, and laundry rooms, for testing. Each type of common area shall be counted separately. If built before 1960, the multifamily housing shall contain at least 20 of a type of common area in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 of a type of common area in order to use random selection. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not randomly select the common areas for testing or if there are not enough common areas to randomly select them for testing, all common areas shall be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of each type of common area to randomly select for testing.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint in each room of each residential dwelling selected for testing and in each common area selected for testing.

(4) Except for components known to have been replaced after December 31, 1977, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room of a residential dwelling chosen for testing and in each common area chosen for testing. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. Each wall in a room or a common area shall be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall require one of the following two types of evidence to determine that components were replaced after 1977:

1. Detailed specifications showing which components were to be replaced, restored, enclosed, or encapsulated and evidence that the work was actually completed such as receipts for building materials,

city building records showing a date of remodeling, or evidence of a final inspection by the city or another inspector showing that the work was actually completed.

2. A certification under penalty of perjury per Iowa Code section 622.1 from the contractor who did the work or from the person(s) who owned the property at the time outlining all of the components that were removed and replaced.

If one of these two types of evidence is not available, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test the component.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall note any components where lead-based paint has been enclosed or encapsulated. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not make a determination that a component or the multifamily housing is lead-free where components that are painted with lead-based paint have been enclosed or encapsulated.

(6) Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must use an X-ray fluorescence analyzer which has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not use an X-ray fluorescence analyzer using a software version or a mode of operation that could result in inconclusive readings or that recommends substrate correction.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use standards provided by the manufacturer and the NIST 1.02 standard film for calibration of the X-ray fluorescence analyzer.

4. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection, every four hours, and at the end of the inspection.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading as positive or negative according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall count the number of XRF readings taken for each component type. If fewer than 40 of any component type were tested, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall randomly choose additional testing combinations for the component type to reach a total of 40 XRF readings. If fewer than 40 testing combinations are available for testing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination.

(7) For each component type where at least 40 testing combinations have been tested, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine the number and percentage of each component type that is classified as positive or negative. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each component type as follows:

1. Lead-based paint is not present on a component type if all readings are classified as negative.

2. Lead-based paint is present on a component type if at least 15 percent of the readings are classified as positive.

3. Lead-based paint is present on a component type if greater than or equal to 5 percent but less than 15 percent of the XRF readings are classified as positive, unless the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor collects paint samples and obtains laboratory analyses for all positive XRF readings. If the laboratory analyses show that lead-based paint is not present on any components, then the component type is negative. If the laboratory analyses show that lead-based paint is present on any component, then the component type is positive.

4. Lead-based paint is present on a component type if greater than 0 but less than 5 percent of the XRF readings are classified as positive, unless the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor collects paint samples and obtains laboratory analyses for all positive XRF readings or randomly selects a second set of residential dwellings for testing. If the laboratory analyses show that lead-based paint is not present on any components, then the component type is negative. If the laboratory analyses show that lead-based paint is present on any component, then the component type is positive. If a second set of randomly selected residential dwellings is sampled and greater than 0 but less than 2.5 percent of the combined set of results is positive, the component type may be considered as not having lead-based paint developmentwide but rather, having lead-based paint in isolated locations, with a reasonable degree of confidence. Individual components that are classified as positive should be considered lead-based painted and managed or abated appropriately.

5. If a particular component type in the sampled residential dwellings is classified as positive, that same component type in the unsampled residential dwellings is also classified as positive.

(8) If fewer than 40 of a component type are available for testing, each testing combination must be classified individually as positive or negative.

(9) If any component type or individual component is classified as positive, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that the multifamily housing is free of lead-based paint.

(10) As specified by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct retesting of 10 surfaces selected from two residential dwellings, calculate the retest tolerance limit, and determine whether the inspection meets the retest tolerance limit. If the retest tolerance limit is not met, then this procedure shall be repeated with 10 additional surfaces selected from the two residential dwellings. If the retest tolerance limit is not met with the 20 retested surfaces, then all results of the inspection shall be considered invalid.

(11) If lead-based paint is identified on any component or component type, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

(12) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility inspected. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The inspection report shall include, at least:

1. Date of each inspection;
2. Address of each building in the multifamily housing;
3. Date of construction for each building in the multifamily housing;
4. A list of the apartments and common areas in each building in the multifamily housing;
5. The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
6. A statement that the inspection was conducted to determine that lead-based paint is not present;

7. The name of the Iowa-certified inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor who randomly selected the residential dwellings and common areas for testing;
8. The number of residential dwellings and common areas that were selected for testing, how these numbers were determined, and a list of the residential dwellings and common areas that were selected for testing;
9. Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;
10. Name and certification number of the certified firm(s) conducting the inspection;
11. Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
12. Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;
13. XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated at each required calibration;
14. Specific locations by room of each painted component tested for the presence of lead-based paint and by residential dwelling or common area and the results for each component expressed in terms appropriate to the sampling method used;
15. Component aggregations and the determination of whether lead-based paint is present by component type;
16. The results of retesting of 10 surfaces, calculations to determine the retest tolerance limit, and the determination of whether the inspection meets the retest tolerance limit;
17. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that the multifamily housing is free of lead-based paint, the report shall contain the following statement:

“The results of this inspection indicate that no lead in amounts greater than or equal to 1.0 mg/cm² in paint was found on any building components, using the inspection protocol in Chapter 7 of the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing ((2012), U.S. Department of Housing and Urban Development). Therefore, this multifamily housing qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint, as defined in the rule. However, some painted surfaces may contain levels of lead below 1.0 mg/cm², which could create lead dust or lead-contaminated soil hazards if the paint is turned into dust by abrasion, scraping, or sanding. This report should be kept by the owner and all future owners for the life of the multifamily housing. Per the disclosure requirements of 24 CFR Part 35 and 40 CFR Part 745, prospective buyers are entitled to all available inspection reports should the property be resold.”;

18. If any lead-based paint is identified, a description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;
19. A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;
20. Information regarding the owner’s obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;
21. Information regarding Iowa’s prerenovation notification requirements found in 641—Chapter 69 and information regarding Iowa’s regulations for renovation found in 641—Chapter 70; and
22. The report shall contain the following statement:

“The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135).”

70.6(2) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct lead inspections according to the following standards. Lead inspections shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting a lead inspection in a residential dwelling or child-occupied facility, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint in each room, including each exterior side.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. One sample shall be taken for each testing combination in a room, including the walls. If a testing combination is painted and not tested, it shall be assumed to be painted with lead-based paint.

b. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1) / 6 = 1.18$.

+ 1.2 + 1.1)/6 and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

c. If lead-based paint is identified through an inspection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

d. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility inspected. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The inspection report shall include, at least:

(1) A statement that the inspection was conducted to identify lead-based paint and lead-based paint hazards in the residential dwelling;

(2) Date of each inspection;

(3) Address of building;

(4) Date of construction;

(5) Apartment numbers (if applicable);

(6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(7) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;

(8) The name and certification number of the certified firm(s) conducting the inspection;

(9) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;

(11) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

(13) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;

(14) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(15) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(16) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(17) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation found in 641—Chapter 70; and

(18) The report shall contain the following statement:

"The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135)."

70.6(3) A certified elevated blood lead (EBL) inspector/risk assessor must conduct elevated blood lead (EBL) inspections according to the following standards. Elevated blood lead (EBL) inspections shall be conducted only by a certified elevated blood lead (EBL) inspector/risk assessor. This protocol may be used for children who do not meet the definition of an EBL child as defined in this chapter as long as the inspection is authorized by the department, a local board of health, or a public housing agency.

a. When conducting an elevated blood lead (EBL) inspection, the certified elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified elevated blood lead (EBL) inspector/risk assessor shall test paint in each room, including each exterior side.

(2) The certified elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room. One sample shall be taken for each testing combination in a room, including walls. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. If a testing combination is painted and not tested, it shall be assumed to be painted with lead-based paint.

b. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The

certified elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings, then the certified elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

c. If lead-based paint is identified through an elevated blood lead (EBL) inspection, the certified elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

d. No later than two weeks after the receipt of laboratory results, a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where an elevated blood lead (EBL) inspection has been conducted and shall provide a copy of this report to the property owner and the occupant of the dwelling. The report shall include, at least:

(1) A statement that the elevated blood lead (EBL) inspection was conducted to identify lead-based paint and lead-based paint hazards in the residential dwelling;

(2) Date of each elevated blood lead (EBL) inspection;

(3) Address of building;

(4) Date of construction;

(5) Apartment numbers (if applicable);

(6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(7) Name, signature, and certification number of each certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;

(8) Name and certification number of the certified firm(s) conducting the inspection;

(9) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;

(11) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

(13) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;

(14) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(15) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(16) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(17) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation found in 641—Chapter 70; and

(18) The report shall contain the following statement:

"The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by an elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135)."

e. A certified elevated blood lead (EBL) inspector/risk assessor shall maintain for no fewer than ten years a written record for each residential dwelling or child-occupied facility where an elevated blood lead (EBL) inspection has been conducted. The record shall include, at least:

(1) A copy of the written report required by paragraph 70.6(3) "d."

(2) Blood lead test results for the elevated blood lead (EBL) child.

(3) A record of conversations held with the owners and occupants of each residential dwelling or child-occupied facility prior to, during, and after the EBL inspection.

(4) Records of follow-up visits made to each residential dwelling or child-occupied facility where lead-based paint hazards are identified and, when issued, a copy of the clearance report.

70.6(4) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct lead hazard screens according to the following standards. Lead hazard screens shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years shall be collected.

b. A visual inspection of the residential dwelling or child-occupied facility shall be conducted to determine if any deteriorated paint is present and to locate at least two dust sampling locations.

c. If deteriorated paint is present, each surface with deteriorated paint which is determined to have a distinct painting history must be tested for the presence of lead. In addition, friction surfaces where there is evidence of abrasion and impact surfaces that are damaged or otherwise deteriorated from impact and that have a distinct painting history shall be tested for the presence of lead.

d. In residential dwellings, a minimum of two composite or single-surface dust samples shall be collected. One sample shall be collected from the floors and the other from the interior windowsills in rooms, hallways, or stairwells where at least one child under the age of six years is most likely to come in contact with dust.

e. In multifamily dwellings and child-occupied facilities, single-surface or composite dust samples shall also be collected from common areas where at least one child under the age of six years is likely to come in contact with dust.

f. Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

g. Soil samples shall be collected and analyzed for lead content in exterior play areas and dripline areas where bare soil is present. In addition, soil samples shall be collected and analyzed for lead content from any other areas of the yard where bare soil is present. Soil and paint samples shall be collected using the documented methodologies specified in guidance documents issued by the department and shall be analyzed by a recognized laboratory to determine the level of lead.

h. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the National Institute of Standards and Technology 1.02 milligrams of lead per square centimeter standard reference material or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film

were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

i. The following standards shall be used to determine whether a residential dwelling or child-occupied facility fails a lead hazard screen:

(1) A residential dwelling or child-occupied facility shall fail a lead hazard screen if any deteriorated paint or paint on friction or impact surfaces is found to be lead-based paint.

(2) A residential dwelling shall fail a lead hazard screen if any floor dust lead level in a single- surface or composite-surface dust sample is greater than or equal to 25 micrograms per square foot.

(3) A residential dwelling shall fail a lead hazard screen if any interior windowsill dust level in a single-surface or composite-surface dust sample is greater than or equal to 125 micrograms per square foot.

(4) A residential dwelling or child-occupied facility shall fail a lead hazard screen if any bare soil is found to be a soil-lead hazard.

j. When conducting a lead hazard screen in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested. Residential dwellings chosen by targeted selection shall meet as many of the following criteria as possible:

1. The residential dwelling has been cited with a housing or building code violation within the past year.
2. The property owner believes that the residential dwelling is in poor condition.
3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall give preference to residential dwellings that house the largest number of children.
4. The residential dwelling serves as a day care facility.
5. The residential dwelling has been prepared for reoccupancy within the past three months.

If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall select them randomly. If too many residential dwellings meet the criteria, residential dwellings shall be eliminated randomly.

Table 2
Minimum Number of Residential Dwellings in Multifamily Housing for Risk Assessment
or Lead Hazard Screen Through Targeted Selection

Number of Similar Residential Dwellings	Number of Residential Dwellings to Sample*
1-4	All
5-20	4 residential dwellings or 50% (whichever is greater)**
21-75	10 residential dwellings or 20% (whichever is greater)**
76-125	17
126-175	19
176-225	20
226-300	21
301-400	22
401-500	23
501+	24 + 1 residential dwelling for each additional increment of 100 residential dwellings or less

*Does not include residential dwellings housing children with elevated blood lead levels.

**For percentages, round up to determine number of residential dwellings to be sampled.

k. If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested.

l. The following standards shall be used to determine whether multifamily housing fails a lead hazard screen:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean of the dust lead levels for carpeted floors, uncarpeted floors, and interior windowsills. If the arithmetic mean for carpeted floors or uncarpeted floors is greater than or equal to 25 micrograms per square foot, the multifamily housing shall fail the lead hazard screen. If the arithmetic mean for interior windowsills is greater than or equal to 125 micrograms per square foot, the multifamily housing shall fail the lead hazard screen. If the arithmetic mean for carpeted floors or uncarpeted floors is less than 25 micrograms per square foot, but some of the samples have dust lead levels that are greater than or equal to 25 micrograms per square foot, then the residential dwellings where these samples were taken and all other similar residential dwellings in the multifamily housing shall fail the lead hazard screen. If the arithmetic mean for interior windowsills is less than 125 micrograms per square foot, but some of the samples have dust lead levels that are greater than or equal to 125 micrograms per square foot, then the residential dwellings where these samples were taken and all other similar residential dwellings in the multifamily housing shall fail the lead hazard screen.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined to not be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the component is a lead-based paint hazard in all similar residential dwellings. If a component in a residential dwelling is determined or assumed to be lead-based paint, then the entire group of similar residential dwellings in the multifamily housing shall fail the lead hazard screen.

(3) Multifamily housing shall fail a lead hazard screen if any bare soil is found to be a soil-lead hazard.

m. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a lead hazard screen is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the lead hazard screen, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The report shall include, at least:

- (1) Date of each lead hazard screen.
- (2) Address of building.
- (3) Date of construction.
- (4) Apartment numbers (if applicable).
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility.
- (6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the lead hazard screen.
- (7) Name and certification number of the certified firm(s) conducting the lead hazard screen.
- (8) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).
- (9) Results of the visual inspection.
- (10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer.
- (11) If used, XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated.
- (12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component tested expressed in terms appropriate to the sampling method used.
- (13) All results of laboratory analysis of collected paint, dust, and soil samples. The results of dust sampling shall be reported in micrograms of lead per square foot, and the results of soil sampling shall be reported in parts per million of lead. Results shall not be reported as "not detectable."
- (14) Any other sampling results.
- (15) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint.
- (16) Background information collected regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years.

(17) Whether the residential dwelling or child-occupied facility passed or failed the lead hazard screen and recommendations, if warranted, for a follow-up lead inspection or risk assessment, and, as appropriate, any further actions.

(18) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

(19) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation found in 641—Chapter 70.

(20) The report shall contain the following statement:

"The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135)."

70.6(5) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct risk assessments according to the following standards. Risk assessments shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years shall be collected.

b. A visual inspection for risk assessment shall be undertaken to locate the existence of deteriorated paint and other potential lead hazards and to assess the extent and causes of the paint deterioration.

c. If deteriorated paint is present, each surface with deteriorated paint which is determined to have a distinct painting history must be tested for the presence of lead.

d. Friction surfaces where there is evidence of abrasion and impact surfaces that are damaged or otherwise deteriorated from impact and that have a distinct painting history shall be tested for the presence of lead.

e. In residential dwellings, dust samples shall be collected from the interior windowsill, window trough, and floor in all living areas where at least one child is most likely to come in contact with dust. Dust samples shall be analyzed for lead concentration and may be either composite or single-surface samples.

f. In multifamily dwellings, dust samples shall also be collected from interior windowsills, window troughs, and floors in common areas adjacent to the sampled residential dwellings or child-occupied facility and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust. Dust samples shall be analyzed for lead concentration and may be either composite or single-surface samples.

g. In child-occupied facilities, dust samples shall be collected from the interior windowsill, window trough, and floor in each room, hallway, or stairwell utilized by one or more children under the age of six years and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust. Dust samples shall be analyzed for lead concentration and may be either composite or single-surface samples.

h. Soil samples shall be collected and analyzed for lead content in exterior play areas and dripline areas where bare soil is present. In addition, soil samples shall be collected and analyzed for lead content from any other areas of the yard where bare soil is present.

i. Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet. Soil and paint samples shall be collected using the documented methodologies specified in guidance documents issued by the department. Dust and soil samples shall be analyzed by a

recognized laboratory to determine the level of lead. The results of dust sampling shall be reported in micrograms of lead per square foot, and the results of soil sampling shall be reported in parts per million of lead. The results shall not be reported as “not detectable.”

j. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film material or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based

paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

k. When conducting a risk assessment in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested. Residential dwellings chosen by targeted selection shall meet as many of the following criteria as possible. If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall select them randomly. If too many residential dwellings meet the criteria, residential dwellings shall be eliminated randomly. Targeted selection criteria are as follows:

1. The residential dwelling has been cited with a housing or building code violation within the past year.
2. The property owner believes that the residential dwelling is in poor condition.
3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall give preference to residential dwellings that house the largest number of children.
4. The residential dwelling serves as a day care facility.
5. The residential dwelling has been prepared for reoccupancy within the past three months.

(3) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested.

(4) The following standards shall be used to determine the extent of lead-based paint hazards throughout multifamily housing that is sampled by random selection, targeted selection, or worst case selection:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean of the dust lead levels for carpeted floors, uncarpeted floors, interior windowsills, and window troughs. If the arithmetic mean is greater than or equal to the level defined as a dust lead hazard for the component, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine that a dust lead hazard has been identified on the component throughout the multifamily housing. If the arithmetic mean is less than the level defined as a dust lead hazard for the component, but some of the individual components have dust lead levels that are greater than or equal to the level defined as a dust lead hazard, then the certified lead inspector/risk assessor or elevated

blood lead (EBL) inspector/risk assessor shall determine that a dust lead hazard has been identified on the individual components and on all other similar components throughout the multifamily housing.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined to not be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the component is a lead-based paint hazard in all similar residential dwellings.

l. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a risk assessment is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the risk assessment, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of the report for no less than three years. The report shall include, at least:

- (1) Date of each risk assessment;
- (2) Address of building;
- (3) Date of construction;
- (4) Apartment numbers (if applicable);
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the risk assessment;
- (7) Name and certification number of the certified firm(s) conducting the risk assessment;
- (8) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b));
- (9) Results of the visual inspection;
- (10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;
- (11) If used, XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;
- (12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component tested expressed in terms appropriate to the sampling method used;
- (13) All results of laboratory analysis of collected paint, dust, and soil samples;
- (14) Any other sampling results;
- (15) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;
- (16) Background information collected regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years;
- (17) To the extent that they are used as part of the lead-based paint hazard determination, the results of any previous inspections or analyses for the presence of lead-based paint, or other assessments of lead-based paint hazards;
- (18) A description of the location, type, and severity of identified lead-based paint hazards, and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-

based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(19) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(20) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(21) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation found in 641—Chapter 70; and

(22) The report shall contain the following statement:

"The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135)."

70.6(6) A certified lead abatement contractor or certified lead abatement worker must conduct lead abatement according to the following standards. Lead abatement shall be conducted only by a certified lead abatement contractor or a certified lead abatement worker.

a. A certified lead abatement contractor must be on site during all work site preparation and during the postabatement cleanup of work areas. At all other times when lead abatement is being conducted, the certified lead abatement contractor shall be on site or available by telephone, pager, or answering service, and be able to be present at the work site in no more than two hours.

b. A certified lead abatement contractor shall ensure that lead abatement is conducted according to all federal, state, and local requirements.

c. A certified lead abatement contractor shall notify the department in writing at least seven days prior to the commencement of lead abatement in a residential dwelling or child-occupied facility. The notification shall include the following information:

(1) The address, including apartment numbers, where lead abatement will be conducted.

(2) The dates when lead abatement will be conducted.

(3) The name, address, telephone number, Iowa certification number, and signature of the contact for the certified firm that will conduct the work.

(4) The name, address, telephone number, Iowa certification number, and signature of the certified lead abatement contractor who will serve as the contact person for the project.

(5) The name, address, and telephone number of the property owner.

(6) Whether the dwelling is owner-occupied or a rental dwelling.

(7) If the dwelling is an occupied rental, the names of the occupants.

(8) The approximate year that the dwelling was built.

(9) A brief description of the lead abatement work to be done.

d. A certified lead abatement contractor shall submit a revised notification to the department if any information in the original notification changes.

e. A certified lead abatement contractor shall ensure that the worksite(s) is accessed only by certified lead professionals according to Iowa Administrative Code 641—70.3(135) and 641—70.5(135). Noncertified individuals shall not be allowed access to a worksite. A worksite shall remain inaccessible to noncertified individuals until it passes clearance testing.

f. A certified lead abatement contractor or a certified project designer shall develop a written occupant protection plan for all lead abatement projects prior to starting lead abatement and shall implement the occupant protection plan during the lead abatement project. The occupant protection plan shall be unique to each residential dwelling or child-occupied facility. If the occupants will be living at the property where lead abatement is taking place, then the written occupant plan shall be given to the

occupants prior to the start date of the lead abatement project and must contain at least the following information:

(1) A description of the type and location of the physical barriers that will keep occupants out of the designated worksite(s).

(2) An explanation of how the contractor will ensure that the worksite(s) is not entered by the occupants.

(3) An explanation of how the contractor will ensure that the occupants have access to a kitchen, bathroom, and living area that are not in the worksite(s).

g. Approved methods must be used to conduct lead abatement, and prohibited work practices must not be used to conduct lead abatement.

(1) Signs must be posted and readable. All signs must be posted before lead abatement begins and must remain in place until dust-lead clearance has been passed.

1. To the extent practicable, all signage must be posted in the occupants' primary language.

2. The signs must clearly define the work area.

3. The signs must warn occupants and other persons not involved with the lead abatement to remain outside the work area.

4. The signs must be posted at the entrance(s) to all work areas.

(2) The work area must be effectively contained before the lead abatement begins. To be effective, containment must:

1. Isolate the work area so that no dust or debris leaves the work area while the lead abatement is being performed.

2. Be monitored and maintained so that any plastic or other impermeable materials are not torn or displaced.

3. Be installed in such a manner that it does not interfere with occupant and worker egress in an emergency.

(3) For interior lead abatement, containment shall include:

1. The removal or covering of all objects from the work area, including but not limited to furniture, rugs, and window coverings. Objects that are not removed from the work area must be covered with plastic sheeting or other impermeable material with all seams and edges taped or otherwise sealed.

2. Closing and covering all duct openings in the work area. Ducts must be covered with plastic sheeting or other impermeable material that is taped down.

3. Closing windows and doors in the work area. Doors must be covered with plastic sheeting or other impermeable material. Doors used as an entrance to the work area must be covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.

4. Covering the floor surface, including installed carpet, with taped-down plastic sheeting or other impermeable material in the work area six feet beyond the perimeter of the surfaces undergoing lead abatement or a sufficient distance to contain the dust, whichever is greater.

5. Ensuring that all personnel, tools, and other items, including the exteriors of containers of waste, are free of dust and debris before leaving or being removed from the work area.

(4) For exterior lead abatement, containment shall include:

1. Closing all doors and windows within 20 feet of the lead abatement. On multistory buildings, all doors and windows within 20 feet of the lead abatement on the same story as the lead abatement shall be closed, and all doors and windows on all stories below the lead abatement that are the same horizontal distance from the lead abatement shall be closed.

2. Ensuring that doors within the work areas that will be used while the lead abatement is being performed are covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.

3. Covering the ground with plastic sheeting or other disposable impermeable material extending 10 feet beyond the perimeter of surfaces undergoing lead abatement or a sufficient distance to collect falling paint debris, whichever is greater, unless the property line prevents 10 feet of such ground cover. Exterior

ground cover shall include anchors or weights to ensure that the covering remains effective even during weather conditions such as high wind.

4. Vertical containment. In certain situations, such as where other buildings are in close proximity to the work area, when conditions are windy, or where the work area abuts a property line, the certified lead abatement contractor or certified lead abatement worker shall erect a system of vertical containment designed to prevent dust and debris from migrating to adjacent property or contaminating the ground, other buildings, or any object beyond the work area.

(5) The following are prohibited work practices:

1. Open-flame burning or torching of lead-based paint.

2. Machine sanding or grinding or abrasive blasting or sandblasting of lead-based paint unless used with high-efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.

3. Uncontained water blasting of lead-based paint.

4. Dry scraping or dry sanding of lead-based paint except in conjunction with the use of a heat gun or around electrical outlets.

5. Operating a heat gun at a temperature at or above 1100 degrees Fahrenheit.

(6) All waste generated during lead abatement shall be contained to prevent the release of dust and debris before the waste is removed from the work area for storage or disposal. Any chutes used to remove waste from the work area shall be covered.

1. At the conclusion of each workday and at the conclusion of the lead abatement, waste that has been collected from lead abatement activities must be stored under containment, in an enclosure, or behind a barrier that prevents release of dust and debris out of the work area and prevents access to dust and debris.

2. All waste from lead abatement must be contained during transportation so that no dust or debris is released.

(7) The work area shall be cleaned so that no dust, debris, or residue remains after lead abatement. Cleaning shall include:

1. The collection of all paint chips and debris and, without dispersing the paint chips and debris, the sealing of the materials in heavy-duty bags.

2. The removal of the protective sheeting used as required in this subrule. The sheeting shall be misted, then the sheeting shall be folded dirty side inward. All sheeting shall be taped shut or otherwise sealed inside heavy-duty bags. Sheeting used to separate work areas from non-work areas must remain in place until after the cleaning and removal of other sheeting. All sheeting shall be disposed of as waste.

3. For interior lead abatement, all objects and surfaces in the work area and within two feet of the work area must be cleaned from high to low in the following manner:

- Walls must either be vacuumed with a HEPA vacuum or wiped with a wet cloth, beginning at the ceiling and working toward the floor.

- All remaining surfaces including objects and fixtures must be thoroughly vacuumed with a HEPA vacuum. For carpeted floors and rugs, the HEPA vacuum must be equipped with a beater bar.

- All remaining surfaces, except for carpeted or upholstered surfaces, must also be wiped with a damp cloth. Uncarpeted floors must be thoroughly mopped using a method that keeps the wash water separate from the rinse water, such as the two-bucket mopping method, or using a wet mopping system.

h. Soil abatement shall be conducted using one of the following methods:

(1) If soil is removed, soil that is a soil-lead hazard shall be replaced by soil with a lead concentration as close to the local background as practicable, but less than 400 parts per million. The soil that is removed shall not be used as topsoil at another residential property or child-occupied facility.

(2) If soil is not removed, the soil that is a soil-lead hazard shall be remediated to meet the definition of "permanently covered soil."

i. If lead-based paint is removed from a surface, the surface shall be repainted or refinished prior to postabatement clearance dust sampling. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall visually verify that lead-based paint was removed from a surface prior to repainting or refinishing.

j. If components painted with lead-based paint are removed, the replacement components shall be installed prior to postabatement clearance testing.

k. Postabatement clearance procedures shall be conducted by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor. If the abatement is conducted in response to an elevated blood lead (EBL) inspection, clearance must be conducted by a certified elevated blood lead (EBL) inspector/risk assessor. Postabatement clearance testing shall be performed by persons or entities independent of those performing lead abatement, unless the designated party uses qualified in-house employees to conduct postabatement clearance testing. An in-house employee shall not conduct both lead abatement and the postabatement clearance testing for this work. Postabatement clearance testing shall be conducted using the following procedures:

(1) Following a lead abatement, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall review the report of the lead inspection, risk assessment, or visual assessment done prior to the lead abatement project and the lead abatement specifications to determine the lead-based paint hazards that were to be abated by the lead abatement project. The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall perform a visual inspection to determine if all lead-based paint hazards that were to be abated have been abated and to determine if deteriorated paint surfaces or visible amounts of dust, debris, or residue are still present in the rooms where lead abatement was conducted. If lead-based paint hazards that were to be abated by the project or deteriorated paint surfaces or visible amounts of dust, debris, or residue are present in the rooms where lead abatement was conducted, these conditions must be eliminated prior to the continuation of the clearance procedures. However, elimination of deteriorated paint is not required if it has been determined through paint testing or a lead-based paint inspection that the deteriorated paint is not lead-based paint. Following an exterior lead abatement, a visual inspection shall be conducted to determine if all lead-based paint hazards that were to be abated have been abated and to determine if any visible dust or debris remains on any horizontal surfaces in the outdoor living areas close to the abated surface. In addition, a visual inspection shall be conducted to determine the presence of paint chips on the dripline or next to the foundation below any exterior surface that was abated. If lead-based paint hazards that were to be abated by the project are still present, these conditions must be eliminated prior to the continuation of the clearance procedures. If visible dust, debris, or paint chips are present, they must be removed from the site and properly disposed of according to all applicable federal, state, and local standards.

(2) Following the visual inspection and any required postabatement cleanup, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall conduct clearance sampling for lead in dust. Clearance sampling may be conducted by employing single-surface sampling or composite dust sampling. Interior dust-lead testing shall be performed for all projects that include window replacement.

(3) Dust samples shall be collected a minimum of one hour after the completion of final postabatement cleanup activities.

(4) Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

(5) The following postabatement clearance activities shall be conducted as appropriate based upon the extent or manner of lead abatement activities conducted in the residential dwelling or child-occupied facility:

1. After conducting a lead abatement with containment between abated and unabated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells within the containment area. Dust samples shall be taken from one interior windowsill and from one window trough (if available), and one dust sample shall be taken from the floor of each of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample shall be taken from the floor outside of each individual containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, and stairwells shall be sampled.

2. After conducting a lead abatement with no containment between abated and unabated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility. Dust samples shall be taken from one interior windowsill and from one window trough (if available), and one dust sample shall be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility, then all rooms, hallways, and stairwells shall be sampled.

3. The certified lead abatement contractors and certified lead abatement workers who abate or clean the dwellings shall not have any knowledge of which rooms or surfaces will be selected for the dust samples.

(6) Reserved.

(7) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall compare the residual lead level as determined by the laboratory analysis from each single-surface dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs. If the residual lead level in a single-surface dust sample is greater than or equal to the applicable clearance level for a floor, interior windowsill, or window trough, then the failed component in each room with a failed single-surface dust sample and that type of component in each room that was not tested shall be recleaned. Additional clearance samples shall be taken from the failed component in each room where it failed and from enough additional rooms that were not previously tested so that four rooms are sampled. If four rooms are not available, then each available room shall be retested. The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of this testing to determine if the recleaned components meet the clearance level. The components must be recleaned and retested until the clearance level is met.

(8) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall compare the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. If the residual lead level in a composite dust sample is greater than or equal to the applicable clearance level divided by half the number of subsamples in the composite sample, then all the components represented by the failed composite dust sample shall be recleaned and retested until clearance levels are met.

l. In multifamily housing consisting of at least 20 similarly constructed and maintained residential dwellings, random selection for the purpose of clearance testing may be conducted if the following conditions are met:

(1) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall randomly select the residential dwellings that will be sampled. The certified lead abatement contractors and certified lead abatement workers who abate or clean the dwellings do not know which residential dwellings will be selected for the random selection or which rooms or surfaces will be selected for the dust samples.

(2) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the minimum number of residential dwellings selected for dust sampling. This shall provide a 95 percent level of confidence that no more than 5 percent or 50 of the residential dwellings (whichever is smaller) in the randomly sampled population are greater than or equal to the appropriate clearance levels.

(3) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall sample the randomly selected residential dwellings and evaluate them for clearance according to the procedures found in paragraphs 70.6(6) “i” through “k.”

m. No later than three weeks after the property passes clearance, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a report to the lead abatement contractor that contains the items required by subparagraphs 70.6(6) “n”(7) through (9).

n. The certified lead abatement contractor or a certified project designer shall prepare a lead abatement report containing the following information:

(1) A copy of the original and any revised lead abatement notifications.

(2) Starting and completion dates of the lead abatement project.

- (3) The name, address, and telephone number of the property owner(s).
- (4) The name, address, and signature of the certified lead abatement contractor and of the certified firm contact for the firm conducting the lead abatement.
- (5) Whether or not containment was used and, if containment was used, the locations of the containment.
- (6) The occupant protection plan required by paragraph 70.6(6) “f.”
- (7) The name, address, and signature of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting clearance sampling, the date on which the clearance testing was conducted, the results of the visual inspection for the presence of lead hazards that were not abated as specified, deteriorated paint and visible dust, debris, residue, or paint chips in the interior rooms and exterior areas where lead abatement was conducted, and the results of all postabatement clearance testing and all soil analyses, if applicable. The results of dust sampling shall be reported in micrograms of lead per square foot by location of sample, and the results of soil sampling shall be reported in parts per million of lead. The results shall not be reported as “not detectable.” If random selection was used to select the residential dwellings that were sampled, the report shall state that random selection was used, the number of residential dwellings that were sampled, and how this number was determined.
- (8) A statement that the lead abatement was or was not done as specified and that the rooms and exterior areas where lead abatement was conducted did or did not pass the visual clearance and the clearance dust testing. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the clearance testing cannot verify that all lead-based paint hazards have been abated, the report shall contain the following statement:

“The purpose of this clearance report is to verify that the lead abatement project was done according to the project specifications. This residential dwelling may still contain hazardous lead-based paint, soil-lead hazards, or dust-lead hazards in the rooms or exterior areas that were not included in the lead abatement project.”
- (9) The name, address, and telephone number of each recognized laboratory conducting an analysis of clearance samples and soil samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).
- (10) A detailed written description of the lead abatement project, including lead abatement methods used, locations of rooms and components where lead abatement occurred, reasons for selecting particular lead abatement methods, and any suggested monitoring of encapsulants or enclosures.
- (11) Information regarding the owner’s obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.
- (12) Information regarding Iowa’s prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa’s regulations for renovation found in 641—Chapter 70.
- (13) If applicable, a copy of the written consent or waiver required by subrule 70.6(13).
 - o.* The lead abatement report shall be completed no later than 30 days after the lead abatement project passes clearance testing.
 - p.* The certified lead abatement contractor shall maintain all reports and plans required in this subrule for a minimum of three years.
 - q.* The certified lead abatement contractor shall provide a copy of all reports required by this subrule to the building owner and to the person who contracted for the lead abatement, if different.

70.6(7) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician must conduct visual risk assessments according to the following standards. Provided that all of the following standards are met, a certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician may remotely conduct a visual risk assessment using technology that allows for adequate visual evaluation of the painted surfaces. Visual risk assessments shall be conducted only by a certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years shall be collected.

b. A visual inspection for risk assessment shall be undertaken to locate the existence of deteriorated paint and other potential lead-based paint hazards and to assess the extent and causes of the paint deterioration. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall assess each component in each room, including each exterior side. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall identify the following conditions as potential lead-based paint hazards:

- (1) All interior and exterior surfaces with deteriorated paint.
- (2) Horizontal hard surfaces, including but not limited to floors and windowsills, that are not smooth or cleanable.
- (3) Dust-generating conditions, including but not limited to conditions causing rubbing, binding, or crushing of surfaces known or presumed to be coated with lead-based paint.
- (4) Bare soil in the play area and dripline of the home.

c. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall prepare a written report for each residential dwelling or child-occupied facility where a visual risk assessment is conducted. No later than three weeks after completing the visual risk assessment, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall send a copy of the report to the property owner and to the person requesting the visual risk assessment, if different. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall maintain a copy of the report for no less than three years. The report shall include, at least:

- (1) Date of each visual risk assessment;
- (2) Address of building;
- (3) Date of construction;
- (4) Apartment numbers (if applicable);
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (6) Name, signature, and certification number of each certified sampling technician, certified lead inspector/risk assessor, or certified elevated blood lead (EBL) inspector/risk assessor conducting the visual risk assessment;
- (7) Name and certification number of the certified firm(s) conducting the visual risk assessment;
- (8) A statement that all painted or finished components must be assumed to contain lead-based paint;
- (9) Specific locations of painted or finished components identified as likely to contain lead-based paint and likely to be lead-based paint hazards;
- (10) Specific locations of bare soil in the play area and the dripline of a home;
- (11) If a remote visual risk assessment is conducted, a description of the methodologies used;
- (12) Information for the owner and occupants on how to reduce lead hazards in the residential dwelling or child-occupied facility;
- (13) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;
- (14) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69, and information regarding Iowa's regulations for renovation found in 641—Chapter 70; and
- (15) The following statement:

"The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a sampling technician, lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135)."

70.6(8) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician must conduct clearance testing according to the following standards. Clearance testing following lead abatement shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor. Clearance testing after renovation and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35 shall be conducted only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead (EBL) inspector/risk assessors. If the abatement, renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 is conducted in response to an elevated blood lead (EBL) inspection, clearance must be conducted by a certified elevated blood lead (EBL) inspector/risk assessor.

a. Clearance testing following lead abatement shall be conducted according to paragraphs 70.6(6) “i” through “m.”

b. Clearance testing after renovation and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 shall be conducted according to the following standards:

(1) A certified sampling technician shall perform clearance testing only for a single-family property or for individual residential dwellings and associated common areas in multifamily housing. A certified sampling technician shall not perform clearance testing using random selection of residential dwellings or common areas in multifamily housing.

(2) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall review the report of the lead inspection, risk assessment, or visual assessment done prior to interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 and the project specifications to determine the lead-based paint hazards that were to be controlled by the project. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall perform a visual inspection to determine if all lead-based paint hazards that were to be controlled by the project have been controlled and to determine if deteriorated paint surfaces or visible amounts of dust, debris, or residue are still present in the rooms where interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation were conducted pursuant to 24 CFR Part 35. If lead-based paint hazards that were to be controlled by the project, deteriorated paint surfaces or visible amounts of dust, debris, or residue are present in these rooms, these conditions must be eliminated prior to the continuation of the clearance testing. However, elimination of deteriorated paint is not required if it has been determined through a lead-based paint inspection that the deteriorated paint is not lead-based paint. If exterior painted surfaces have been disturbed by the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35, the visual inspection shall include an assessment to determine if all exterior lead-based paint hazards that were to be controlled by the project have been controlled and to determine if any visible dust or debris remains on any horizontal surfaces in the outdoor living areas close to the affected exterior painted surfaces. In addition, a visual inspection shall be conducted to determine if paint chips are present on the dripline or next to the foundation below any exterior painted surface that was treated. If lead-based paint hazards that were to be controlled by the project are still present, these conditions must be eliminated prior to the continuation of the clearance procedures. If visible dust, debris, or paint chips are present, they must be removed from the site and properly disposed of according to all applicable federal, state, and local standards.

(3) Following the visual inspection and any required cleanup, clearance sampling for lead in dust shall be conducted. Clearance sampling may be conducted by employing single-surface sampling or composite dust sampling.

(4) Dust samples shall be collected a minimum of one hour after the completion of final cleanup activities.

(5) Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50

square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

(6) The following clearance activities shall be conducted as appropriate based upon the extent or manner of renovation or of interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 in the residential dwelling or child-occupied facility:

1. After conducting renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, with containment between treated and untreated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells within the containment area. Dust samples shall be taken from one interior windowsill and from one window trough (if available), and one dust sample shall be taken from the floor of each of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample shall be taken from the floor outside of each individual containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, and stairwells shall be sampled. Interior dust-lead testing shall be performed for all projects that include window replacement.

2. After conducting renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, with no containment between treated and untreated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility. Dust samples shall be taken from one interior windowsill and window trough (if available), and one dust sample shall be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility, then all rooms, hallways, and stairwells shall be sampled. Interior dust-lead testing shall be performed for all projects that include window replacement.

(7) The contractors conducting the work or cleaning the dwellings shall not know which rooms or surfaces will be selected for the dust samples.

(8) The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall compare the residual lead level as determined by the laboratory analysis from each single-surface dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs. If the residual lead level in a single-surface dust sample is greater than or equal to the applicable clearance level for a floor, interior windowsill, or window trough, then the failed component in each room with a failed single-surface dust sample and that type of component in each room that was not tested shall be recleaned. Additional clearance samples shall be taken from the failed component in each room where it failed and from enough additional rooms that were not previously tested so that four rooms are sampled. If four rooms are not available, then each available room shall be retested. The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall evaluate the results of this testing to determine if the recleaned components meet the clearance level. The components must be recleaned and retested until the clearance level is met.

(9) The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall compare the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. If the residual lead level in a composite dust sample is greater than or equal to the applicable clearance level divided by half the number of subsamples in the composite sample, then all the components represented by the failed composite dust sample shall be recleaned and retested until clearance levels are met.

c. In multifamily housing consisting of at least 20 similarly constructed and maintained residential dwellings, random selection for the purpose of clearance testing may be conducted if the following conditions are met:

(1) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall randomly select the dwellings that will be sampled. The contractors and the workers who conducted the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation do not know which residential dwellings will be selected for the random selection.

(2) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the minimum number of dwellings selected for dust sampling. This shall provide a 95 percent level of confidence that no more than 5 percent or 50 of the residential dwellings (whichever is smaller) in the randomly sampled population are greater than or equal to the appropriate clearance levels.

(3) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall sample the randomly selected residential dwellings and evaluate them for clearance according to the procedures found in paragraphs 70.6(6) "h" through "j."

(4) The clearance testing is conducted by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

d. A clearance report must be prepared that provides documentation of the lead abatement, renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 as well as the clearance testing. When lead abatement is performed, the report shall be a lead abatement report in accordance with paragraph 70.6(6) "n." When renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 is performed, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall prepare a written report for each residential dwelling or child-occupied facility where clearance testing is conducted. No later than 30 days after the property passes clearance, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall send a copy of the report to the property owner and to the person requesting the clearance testing, if different. The clearance report shall include the following information:

(1) The address of the residential property and, if only part of a multifamily property is affected, the specific dwelling units and common areas affected.

(2) The following information regarding the clearance testing:

1. The date(s) of the clearance testing.

2. The name, address, and signature of each certified lead professional performing the clearance examination, including the certification number.

3. The name and certification number of the certified firm(s) conducting the clearance testing.

4. Whether or not containment was used and, if containment was used, the locations of the containment.

5. If random selection was used to select the residential dwellings that were sampled, the report shall state that random selection was used, the number of residential dwellings that were sampled, and how this number was determined.

6. The results of the visual inspection for the presence of deteriorated paint and visible dust, debris, residue, or paint chips in the rooms where renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation was conducted pursuant to 24 CFR Part 35.

7. All of the results of the analysis of dust samples, in micrograms per square foot, by location of sample. The results shall not be reported as "not detectable."

8. A statement that the renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 was or was not done as specified and that the rooms and exterior areas where these activities were conducted did or did not pass the visual clearance and the clearance dust testing. If the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician conducting the clearance testing cannot verify that all lead-based paint hazards have been controlled, the report shall contain the following statement:

“The purpose of this clearance report is to verify that this lead hazard control project was done according to the project specifications. This residential dwelling may still contain hazardous lead-based paint, soil-lead hazards, or dust-lead hazards in the rooms or exterior areas that were not included in the lead hazard control project.”

9. The name, address, and telephone number of each recognized laboratory conducting an analysis of the dust samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).

(3) The following information on the renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 for which clearance testing was performed:

1. The start and completion dates of the renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation.

2. The name and address of each firm or organization conducting the renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation and the name of each supervisor assigned.

3. A detailed written description of the renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation, including the methods used, locations of exterior surfaces, interior rooms, common areas, and components where the hazard reduction activity occurred.

4. If interim control of soil hazards was conducted, a detailed description of the location(s) of the interim controls and the method(s) used.

5. Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

6. Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation found in 641—Chapter 70.

7. The report shall contain the following statement:

“The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a sampling technician, lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135).”

e. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor or a certified sampling technician shall maintain a copy of the clearance testing information included in the lead abatement report specified in paragraph 70.6(6) “*m*” for no fewer than three years. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall maintain a copy of the clearance testing report specified in paragraph 70.6(8) “*d*” for no fewer than three years.

f. Clearance testing shall be performed by persons or entities independent of those performing lead abatement, renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation, unless the designated party uses qualified in-house employees to conduct clearance testing. An in-house employee shall not conduct both lead abatement, renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation and the clearance examination for this work.

70.6(9) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall conduct paint testing pursuant to 24 CFR Part 35 according to the following standards. Paint testing pursuant to 24 CFR Part 35 shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting paint testing in a residential dwelling or child-occupied facility, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint on each deteriorated paint surface and on each painted surface that will be disturbed or replaced. On windows, the window frame, interior windowsill, window sash, and window trough shall each be tested.

(2) Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

4. If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to

negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

b. If lead-based paint is identified through paint testing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

c. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where paint testing is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The report shall include, at least:

(1) A statement that the inspection was conducted to determine whether lead-based paint is present on deteriorated paint surfaces and on painted surfaces that will be disturbed or replaced;

(2) Date of the testing;

(3) Address of building;

(4) Date of construction;

(5) Apartment numbers (if applicable);

(6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(7) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the paint testing;

(8) Name and certification number of the certified firm(s) conducting the paint testing;

(9) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;

(11) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

(13) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;

(14) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(15) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(16) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(17) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation found in 641—Chapter 70; and

(18) The report shall contain the following statement:

"The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135)."

70.6(10) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct reevaluations according to the following standards. Reevaluations shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. All available information regarding lead-based paint for the property being reevaluated shall be reviewed, including but not limited to reports of any lead-based paint activities conducted in a residential dwelling, multifamily dwelling, or child-occupied facility.

b. A visual inspection of the property shall be undertaken to locate the existence of deteriorated paint; bare soil; recommended lead abatement, interim controls, or standard treatments that were not implemented; and failed interim controls, standard treatments, encapsulation, or enclosure.

c. Deteriorated paint for which the lead content is unknown shall be tested for the presence of lead.

d. Soil samples shall be collected and analyzed from bare soil for which the lead content is unknown. Soil samples shall be collected using the documented methodologies specified in guidance documents issued by the department and shall be analyzed by a recognized laboratory to determine the level of lead.

e. If any lead-based paint hazards, recommended lead abatement, interim controls, or standard treatments that were not implemented, or failed interim controls, standard treatments, encapsulation, or enclosure is identified, then the reevaluation is failed. These conditions shall be controlled through lead abatement or interim controls before the reevaluation can continue. Clearance testing shall be conducted following control of the conditions through lead abatement or interim controls.

f. If there are no lead-based paint hazards present and all of the recommended lead abatement or interim controls were implemented and have not failed, then single-surface or composite dust samples shall be collected. The reevaluation is passed if all of the dust samples taken are below the clearance level.

g. In residential dwellings, single-surface or composite dust samples shall be collected from floors and interior windowsills in at least four rooms, hallways, or stairwells where at least one child under the age of six years is most likely to come in contact with dust.

h. In multifamily dwellings, single-surface or composite dust samples shall also be collected from common areas where at least one child under the age of six years is likely to come in contact with dust.

i. In child-occupied facilities, single-surface or composite dust samples shall be collected from the floor and interior windowsill in at least four rooms, hallways, or stairwells utilized by one or more children under the age of six years and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust.

j. Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

k. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If tested by laboratory analysis, the paint shall be sampled using the documented methodologies specified in guidance

documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings.

(4) If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the

certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

l. When conducting reevaluation in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains 5 or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than 5 similar dwellings, all residential dwellings shall be tested. Residential dwellings chosen by targeted selection shall meet as many of the following criteria as possible. If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall select them randomly. If too many residential dwellings meet the criteria, residential dwellings shall be eliminated randomly. Targeted selection criteria are as follows:

1. The residential dwelling has been cited with a housing or building code violation within the past year.
2. The property owner believes that the residential dwelling is in poor condition.
3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall give preference to residential dwellings that house the largest number of children.
4. The residential dwelling serves as a child-occupied facility.
5. The residential dwelling has been prepared for reoccupancy within the past three months.

(3) If the multifamily housing contains 5 or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than 5 similar dwellings, all residential dwellings shall be tested.

(4) The following standards shall be used to determine the extent of lead-based paint hazards throughout multifamily housing that is sampled by random selection, targeted selection, or worst case selection:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean of the dust-lead levels for carpeted floors, uncarpeted floors, interior windowsills, and window troughs. If the arithmetic mean is greater than or equal to the level defined as a dust-lead hazard for the component, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine that a dust-lead hazard has been identified on the component throughout the multifamily housing. If the arithmetic mean is less than the level defined as a dust-lead hazard for the component, but some of the individual components have dust-lead levels that are greater than or equal to the level defined as a dust-lead hazard, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine that a dust-lead hazard has been identified on the individual components and on all other similar components throughout the multifamily housing.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined not to be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume

this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the component is a lead-based paint hazard in all similar residential dwellings.

m. If reevaluation is conducted, the first reevaluation shall be conducted no later than two years from completion of lead abatement, interim controls, or standard treatments. Subsequent reevaluation shall be conducted at intervals of two years, plus or minus 60 days. To be exempt from additional reevaluation, a residential dwelling or child-occupied facility shall have at least two consecutive passing reevaluations conducted at such two-year intervals. If, however, a reevaluation fails, at least two more consecutive reevaluations conducted at such two-year intervals must be conducted.

n. A certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a reevaluation is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the reevaluation, if different. A certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of the report for no less than three years. The report shall include, at least:

- (1) Date of each reevaluation;
- (2) Address of building;
- (3) Date of construction;
- (4) Apartment numbers (if applicable);
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the reevaluation;
- (7) Name and certification number of the certified firm(s) conducting the reevaluation;
- (8) All of the information gathered for the review as outlined in 70.6(10)“a”;
- (9) Results of the visual inspection including details of any newly identified lead-based paint hazards, the status of past lead hazard control measures, and repair options for any lead-based paint hazards identified during the reevaluation;
- (10) An indication of whether or not the property passed or failed the reevaluation;
- (11) An indication of when the next reevaluation, if any, should occur;
- (12) The results of any environmental samples taken, including all XRF readings, all laboratory analyses and clearance testing results, if necessary;
- (13) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b));
- (14) Information regarding the owner’s obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;
- (15) Information regarding Iowa’s prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa’s regulations for renovation found in 641—Chapter 70; and
- (16) The report shall contain the following statement:

“The Iowa Department of Public Health may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a sampling technician, lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 641—70.3(135) and 70.5(135).”

70.6(11) All renovations performed in target housing and child-occupied facilities, except for emergency renovations and minor repair and maintenance activities, shall be performed according to the

work practice standards in 70.6(11). Renovation activities conducted in housing or on surfaces determined to be free of lead-based paint by a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall be exempt from all work practice standards except record keeping. All renovations shall be performed by a certified firm under the supervision of a certified lead abatement contractor or a certified lead abatement worker who completes initial certification on or after January 13, 2010, or if certified prior to January 13, 2010, completes a lead abatement worker, lead abatement contractor, or lead-safe renovator refresher course on or after January 13, 2010, or shall be performed by a certified lead-safe renovator in accordance with the requirements below.

a. A firm shall assign at least one certified lead abatement contractor, a certified lead abatement worker, or a certified lead-safe renovator to each individual renovation project. The certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator assigned to each individual renovation project shall ensure the following:

(1) A certified lead abatement contractor, a certified lead abatement worker, or a certified lead-safe renovator must be on site during all worksite preparation and during the cleanup of work areas. At all other times when renovation is being conducted, a certified lead abatement contractor, a certified lead abatement worker, or a certified lead-safe renovator shall be on site or available by telephone, pager, or answering service and be able to be present at the worksite in no more than two hours.

(2) Signs are posted and readable. All signs must be posted before the renovation begins and must remain in place until the postrenovation cleaning verification has been completed.

1. To the extent practicable, all signage must be posted in the occupants' primary language.

2. The signs must clearly define the work area.

3. The signs must warn occupants and other persons not involved with the renovation activity to remain outside the work area.

4. The signs must be posted at the entrance(s) to all work areas.

(3) The work area must be effectively contained before the renovation is begun. To be effective, containment must:

1. Isolate the work area so that no dust or debris leaves the work area while the renovation is being performed.

2. Be monitored and maintained so that any plastic or other impermeable materials are not torn or displaced.

3. Be installed in such a manner that it does not interfere with occupant and worker egress in an emergency.

(4) For interior renovations, containment shall include:

1. The removal or covering of all objects from the work area, including but not limited to furniture, rugs, and window coverings. Objects that are not removed from the work area must be covered with plastic sheeting or other impermeable material with all seams and edges taped or otherwise sealed.

2. Closing and covering all duct openings in the work area. Ducts must be covered with plastic sheeting or other impermeable material that is taped down.

3. Closing windows and doors in the work area. Doors must be covered with plastic sheeting or other impermeable material. Doors used as an entrance to the work area must be covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.

4. Covering the floor surface, including installed carpet, with taped-down plastic sheeting or other impermeable material in the work area six feet beyond the perimeter of the surfaces undergoing renovation or a sufficient distance to contain the dust, whichever is greater.

5. Ensuring that all personnel, tools, and other items, including the exteriors of containers of waste, are free of dust and debris before leaving or being removed from the work area.

(5) For exterior renovations, containment shall include:

1. Closing all doors and windows within 20 feet of the renovation. On multistory buildings, all doors and windows within 20 feet of the renovation on the same story as the renovation shall be closed, and all doors and windows on all stories below the renovation that are the same horizontal distance from the renovation shall be closed.

2. Ensuring that doors within the work areas that will be used while the renovation is being performed are covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.

3. Covering the ground with plastic sheeting or other disposable impermeable material extending 10 feet beyond the perimeter of surfaces undergoing renovation or a sufficient distance to collect falling paint debris, whichever is greater, unless the property line prevents 10 feet of such ground cover. Exterior ground cover shall include anchors or weights to ensure the covering remains effective even during weather conditions such as high wind.

4. Vertical containment. In certain situations, such as where other buildings are in close proximity to the work area, when conditions are windy, or where the work area abuts a property line, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall erect a system of vertical containment designed to prevent dust and debris from migrating to adjacent property or contaminating the ground, other buildings, or any object beyond the work area.

(6) Prohibited practices are not used during the renovation. Prohibited practices include:

1. Open-flame burning or torching of paint.

2. Machine sanding or grinding or abrasive blasting or sandblasting of paint unless used with high-efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.

3. Uncontained water blasting of paint.

4. Dry scraping or dry sanding of paint except in conjunction with the use of a heat gun or around electrical outlets.

5. Operating a heat gun at a temperature at or above 1100 degrees Fahrenheit.

(7) All workers that are not certified lead abatement contractors, certified lead abatement workers, or certified lead-safe renovators must have on-the-job training as required by 70.6(11)“d.” However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR 35.1340.

(8) If desired, perform all testing with recognized test kits in accordance with 70.6(11)“e.”

(9) Perform the postrenovation cleaning verification as outlined in 70.6(11)“b.”

(10) All waste generated during renovation activities is contained to prevent the release of dust and debris before the waste is removed from the work area for storage or disposal. Any chutes used to remove waste from the work area shall be covered.

1. At the conclusion of each workday and at the conclusion of the renovation, waste that has been collected from renovation activities must be stored under containment, in an enclosure, or behind a barrier that prevents release of dust and debris out of the work area and prevents access to dust and debris.

2. All waste from renovation activities must be contained during transportation so that no dust or debris is released.

(11) The work area shall be cleaned so that no dust, debris, or residue remains after the renovation. Cleaning shall include:

1. The collection of all paint chips and debris and, without dispersing the paint chips and debris, the sealing of the materials in heavy-duty bags.

2. The removal of the protective sheeting used as required in this subrule. The sheeting shall be misted, then the sheeting shall be folded dirty side inward. All sheeting shall be taped shut or otherwise sealed inside heavy-duty bags. Sheeting used to separate work areas from non-work areas must remain in place until after the cleaning and removal of other sheeting. All sheeting shall be disposed of as waste.

3. For interior renovations, all objects and surfaces in the work area and within two feet of the work area must be cleaned from high to low in the following manner:

- Walls must either be vacuumed with a HEPA vacuum or wiped with a wet cloth, beginning at the ceiling and working toward the floor.

- All remaining surfaces including objects and fixtures must be thoroughly vacuumed with a HEPA vacuum. For carpeted floors and rugs, the HEPA vacuum must be equipped with a beater bar.

- All remaining surfaces, except for carpeted or upholstered surfaces, must also be wiped with a damp cloth. Uncarpeted floors must be thoroughly mopped using a method that keeps the wash water separate from the rinse water, such as the two-bucket mopping method, or using a wet mopping system.

b. Postrenovation cleaning verification. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall use the following procedure for conducting postrenovation cleaning verification. In lieu of postrenovation cleaning verification, clearance testing as outlined in 70.6(8) can be performed. If the work is done in response to an elevated blood lead (EBL) inspection, clearance testing shall be performed by a certified elevated blood lead (EBL) inspector/risk assessor in lieu of postrenovation cleaning verification. Warning signs may be removed after all of the work areas in a renovation project have been adequately cleaned and verified or passed clearance testing.

(1) For interior renovations, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall perform a visual inspection to determine whether dust, debris, or residue is still present. If dust, debris, or residue is still present, these conditions must be removed by recleaning, and another visual inspection must be performed. Following a successful visual inspection, a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator must:

1. Verify that each windowsill and window trough in the work area has been adequately cleaned, using the following procedure:

- Wipe the windowsill and window trough with a wet disposable cleaning cloth that is damp to the touch. If the cloth matches or is lighter than the cleaning verification card, the windowsill has been adequately cleaned.

- If the cloth does not match and is darker than the cleaning verification card, reclean the windowsill or window trough as directed in 70.6(11)“a”(11). Then wipe the windowsill or window trough again, using a new cloth or the same cloth folded in such a way that an unused surface is exposed. If the cloth matches or is lighter than the cleaning verification card, that windowsill has been adequately cleaned.

- If the cloth does not match and is darker than the cleaning verification card, wait for one hour or until the surface has dried completely, whichever is longer.

- After waiting for the windowsill or window trough to dry, wipe the windowsill or window trough with a dry disposable cleaning cloth. After this wipe, that windowsill or window trough has been adequately cleaned.

2. Verify that uncarpeted floors and countertops in the work area have been adequately cleaned, using the following procedure. If the surface within the work area is greater than 40 square feet, the surface within the work area must be divided into roughly equal sections that are each less than 40 square feet.

- Wipe uncarpeted floors and countertops within the work area with a wet disposable cleaning cloth. Floors must be wiped using an application device with a long handle and a head to which the cloth is attached. The cloth must remain damp at all times while it is being used to wipe the surface for postrenovation cleaning verification. Wipe each such section separately with a new wet disposable cleaning cloth. If the cloth used to wipe each section of the surface within the work area matches or is lighter than the cleaning verification card, the surface has been adequately cleaned.

- If the cloth does not match and is darker than the cleaning verification card, reclean the surface as in 70.6(11)“a”(11). Then wipe the floor or countertop again, using a new cloth. If the cloth matches or is lighter than the cleaning verification card, that surface has been adequately cleaned.

- If the cloth does not match and is darker than the cleaning verification card, wait for one hour or until the surface has dried completely, whichever is longer.

- After waiting for the surface to dry, wipe each section of the surface that has not yet achieved the postrenovation cleaning verification with a dry disposable cleaning cloth. After this wipe, that surface has been adequately cleaned.

(2) For exterior renovations, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall perform a visual inspection to determine whether dust, debris, or residue is still present on surfaces in and below the work area, including windowsills and the ground. If dust, debris, or residue is present, these conditions must be eliminated and another visual inspection must be performed. When the area passes the visual inspection, the exterior has been adequately cleaned.

(3) A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall only use cleaning verification cards that are approved by the U.S. Environmental Protection Agency (EPA).

(4) A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall not use cleaning verification cards that have expired.

c. Clearance testing. Postrenovation cleaning verification is not required if the contract between the renovation firm and the person contracting for the renovation or another federal, state, territorial, tribal, or local law or regulation requires the renovation firm to perform clearance testing at the conclusion of a renovation covered by this chapter.

(1) The dust samples must be collected by a certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician. If the work is done in response to an elevated blood lead (EBL) inspection, the dust samples must be collected by a certified elevated blood lead (EBL) inspector/risk assessor.

(2) The firm conducting the renovation is required to reclean the work area until the dust clearance sample results are below the clearance standards in subrule 70.6(8).

d. On-the-job training. The certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator assigned to the renovation project shall ensure that each noncertified individual conducting renovation activities has been or is currently being trained on how to safely conduct renovation activities. However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR Part 35.

(1) All on-the-job training shall be conducted by a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator.

(2) Each noncertified individual shall be trained by a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator who is employed by the same certified firm. A certified firm shall not accept on-the-job training that was performed by another firm. On-the-job training does not meet the requirement for work conducted pursuant to 24 CFR Part 35.

(3) On-the-job training shall be specific for the type of work the noncertified individual is performing and must include at least the following topics:

1. An overview of the requirements described in this chapter.
2. An overview of the health effects of lead poisoning.
3. Methods to prevent taking lead dust home from the worksite.
4. How and why to properly set up a work area for lead-safe renovations.
5. How and where to properly post signage.
6. Personal protection.
7. How and why to properly set up containment.
8. How and why to minimize dust and debris.
9. Proper cleaning techniques and time lines for cleaning in renovation activities.
10. How to properly handle and control waste generated from renovation activities.
11. An overview of the postrenovation cleaning verification and clearance testing.
12. An overview of the prerenovation notification requirements found in 641—Chapter 69.
13. Prohibited work practices.

e. Recognized test kits. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator may use recognized test kits to determine whether surfaces to be affected by renovation activities are painted with lead-based paint. The result from each individual test performed applies only to the individual surface tested. Surfaces which are determined by proper use of a recognized test kit to be free of lead-based paint are exempt from the requirements of 70.6(11)“a” through “d.” Results obtained from recognized test kits are only valid if the testing was performed according to the manufacturer’s directions. Any results from test kits which are not recognized shall be invalid. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall not discard a valid result from a recognized test kit.

f. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator must complete a written report when conducting a renovation. The report shall include the results of any testing performed with a recognized test kit, information regarding the work practices used in the renovation and, if applicable, a copy of the clearance testing report. When the final invoice for the renovation is delivered or within 30 days after the renovation activity is complete, whichever is earlier, the

certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall send a copy of the report to the owner of the building. If the renovation took place within a residential dwelling, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall send a copy of the report to an adult occupant of the residential dwelling and to the person requesting the renovation, if different from the owner. If the renovation took place within a child-occupied facility, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall send a copy of the report to an adult representative of the child-occupied facility and to the person requesting the renovation, if different from the owner. If the renovation took place within common areas of multifamily target housing, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall post in areas where it is likely to be seen by the occupants of all of the affected units the report required by this paragraph or instructions on how interested occupants can obtain a copy of this report at no charge. If the renovation took place within a child-occupied facility, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall post in areas where it is likely to be seen by the parents or guardians of children frequenting the child-occupied facility the report required by this paragraph or instructions on how interested parents or guardians of children frequenting the child-occupied facility can obtain a copy of this report at no charge. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator shall maintain a copy of the report for no less than three years. The report shall include, at least:

- (1) The date(s) of the renovation.
- (2) Address of the building, including apartment numbers, if applicable.
- (3) The name, address, and telephone number of the owner(s) of the address(es) where the renovation took place.
- (4) The name, address, signature, certification number, and telephone number of the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator who performed the renovation.
- (5) The name and certification number of the certified firm performing the renovation.
- (6) If testing was performed with a recognized test kit, the location of each test. The location shall be specific to the room and component.
- (7) The results of testing. The results shall be classified as either positive for lead-based paint or negative for lead-based paint.
- (8) The name and manufacturer of the recognized test kit(s) used, the expiration date, and the EPA approval number.
- (9) The work practices used in the renovation, including the location(s) where each work practice was used. The location shall be specific to the room and component.
- (10) If applicable, a copy of the clearance report.
- (11) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.
- (12) Information regarding Iowa's prerenovation notification requirements found in 641—Chapter 69; and information regarding Iowa's regulations for renovation, remodeling and repainting found in 641—Chapter 70.

g. Record keeping. Records shall be kept for each renovation project that involves target housing or child-occupied facilities. The records for each renovation shall include:

- (1) The name and certification number of the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator responsible for the renovation.
- (2) The name and certification number of the certified firm that performed the renovation.
- (3) The address(es) of the property where the renovation activity was performed.
- (4) The name, address, and telephone number of the property owner where the renovation activity was performed.
- (5) Renovations considered emergency pursuant to 641—70.2(135) shall contain a description of the circumstances explaining why the renovations were immediately required and which work practice standards were not followed as a result.

(6) Any reports or documentation completed by a certified lead professional concerning the renovation project, including documentation from certified lead inspector/risk assessors or certified elevated blood lead (EBL) lead inspector/risk assessors regarding housing, components, or surfaces that have been determined to be free of lead-based paint and clearance reports from clearance testing performed in lieu of postrenovation cleaning verification.

(7) Documentation that each noncertified individual working on the renovation project had, or was receiving, the appropriate on-the-job training outlined in 70.6(11)“d.” The documentation must include the names of all of the noncertified individuals who worked on the renovation. However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR 35.1340.

(8) Documentation that the certified lead-safe renovator followed the work practices for renovation activities outlined in 70.6(11). This shall include documentation that the following work practices were followed:

1. Signs were posted at the entrance to the work area.
2. The work area was contained.
3. All objects in the work area were covered or removed.
4. All HVAC ducts in the work area were closed and covered.
5. All windows in the work area were closed, and all windows within 20 feet of exterior work areas were closed.
6. All doors not used to enter the work area were closed and sealed, and all doors within 20 feet of exterior work areas were closed and sealed.
7. All doors used as an entrance to the work area had containment in place to prevent the spread of dust and debris.
8. All floors in the work area were covered for a sufficient distance to contain the dust and debris from the renovation.
9. Adequate ground cover was in place to contain the dust and debris for exterior renovations.
10. Adequate vertical containment was in place to contain the dust and debris for exterior renovations.
11. All waste generated during the renovations was contained throughout the renovation and the transportation to disposal.

(9) Documentation that the renovation work area was cleaned and passed the postrenovation cleaning verification procedures outlined in 70.6(11)“b,” including the expiration date of the cleaning verification cards used.

(10) Documentation regarding the use of any recognized test kits outlined in 70.6(11)“e.” The documentation shall include a copy of the written report required by 70.6(11)“f.”

h. Emergency renovations.

(1) Renovation activities that are deemed to be an emergency are exempt from the certification requirements and all of the work practice standards, except for the cleaning requirements, postrenovation cleaning verification, and the written report required by 70.6(11)“f.” All postrenovation cleaning must take place under the direction of a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator. The postrenovation cleaning verification after an emergency renovation must be performed by a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator.

(2) Emergency renovations that are required as a result of an elevated blood lead (EBL) inspection are initially exempt from the certification requirements. The work practice standards found in 70.6(11)“a” shall apply. All individuals who perform emergency renovations in response to an elevated blood lead (EBL) inspection are required to obtain certification as a lead-safe renovator, lead abatement contractor, or lead abatement worker within six months from the date the elevated blood lead (EBL) inspection report was issued. Renovations and interim controls performed in response to an elevated blood lead (EBL) inspection are required to pass clearance testing that is performed by a certified elevated blood lead (EBL) inspector/risk assessor.

70.6(12) Rescinded IAB 2/12/20, effective 3/18/20.

70.6(13) A person may be certified as a lead inspector/risk assessor, sampling technician, or elevated blood lead (EBL) inspector/risk assessor and as a lead abatement contractor or lead abatement worker.

Except as specified by paragraph 70.6(6) “k” and paragraph 70.6(8) “f,” a person who is certified both as a lead inspector/risk assessor, sampling technician, or elevated blood lead (EBL) inspector/risk assessor and as a lead abatement contractor or lead abatement worker shall not provide both lead inspection or visual risk assessment and lead abatement services at the same site unless a written consent or waiver, following full disclosure by the person, is obtained from the owner or manager of the site.

70.6(14) Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in subrules 70.6(1) to 70.6(6) and 70.6(9) shall be collected by persons certified as a lead inspector/risk assessor or an elevated blood lead (EBL) inspector/risk assessor. Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in subrule 70.6(8) for clearance testing following lead abatement shall be collected by persons certified as a lead inspector/risk assessor or an elevated blood lead (EBL) inspector/risk assessor. Any dust or soil samples collected pursuant to the work practice standards contained in subrule 70.6(8) for clearance testing after renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35 shall be collected only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead (EBL) inspector/risk assessors. Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in 641—70.6(135) shall be analyzed by a recognized laboratory.

70.6(15) Composite dust sampling shall be conducted only in the situations specified in subrules 70.6(4) to 70.6(6) and 70.6(8). If composite sampling is conducted, it shall meet the following requirements:

- a. Composite dust samples shall consist of at least two subsamples.
- b. Every component that is being tested shall be included in the sampling.
- c. Composite dust samples shall not consist of subsamples from more than one type of component.
- d. The results of composite dust samples shall be evaluated by comparing the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface dust-lead hazard or clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. For example, the applicable clearance level for a composite window trough sample consisting of three subsamples would be 267 micrograms per square foot (400/1.5).

70.6(16) Rescinded IAB 6/7/17, effective 7/12/17.

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 3104C, IAB 6/7/17, effective 7/12/17; ARC 4906C, IAB 2/12/20, effective 3/18/20; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.7(135) Firms. All firms that perform or offer to perform lead-based paint activities must be certified by the department. Firms shall employ only appropriately certified employees to conduct lead-based paint activities, and the firm and its employees shall follow the work practice standards in 641—70.6(135) for conducting lead-based paint activities. A firm must employ at least one certified individual in order to receive or maintain firm certification.

70.7(1) A firm wishing to be certified shall apply to the department electronically in a format specified by the department or may apply using a paper application supplied by the department. The firm must submit:

- a. A completed application.
- b. Documentation that the firm will employ only appropriately certified lead professionals to perform lead-based paint activities. In addition, the firm must document that the agency and its employees or contractors will follow the work practice standards in 641—70.6(135) for conducting lead-based paint activities.
- c. The certified firm must maintain all records required by 641—70.6(135), with the exception of elevated blood lead (EBL) inspection reports, for three years. Certified firms that are also certified as elevated blood lead (EBL) inspection agencies must maintain elevated blood lead (EBL) inspection reports for at least 10 years.

70.7(2) Firms must be recertified every three years. To be recertified, the firm must submit the following:

- a. A completed application.

b. Documentation that the firm will employ only appropriately certified lead professionals to perform lead-based paint activities. In addition, the firm must document that the firm and its employees or contractors will follow the work practice standards in 641—70.6(135) for conducting lead-based paint activities.

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 3104C, IAB 6/7/17, effective 7/12/17; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.8(135) Lead-safe work practices training program approval and lead-safe work practices contractor registration. Rescinded IAB 2/10/10, effective 1/13/10.

641—70.9(135) Compliance inspections.

70.9(1) The department may enter premises or facilities where violations of the provisions regarding lead-based paint activities may occur for the purpose of conducting compliance inspections.

70.9(2) The department may enter premises or facilities where training programs conduct business.

70.9(3) The department may take samples and review records as part of the lead-based paint activities compliance inspection process.

70.9(4) The department may review all reports involving lead-based paint activities.

70.9(5) The department may issue subpoenas pursuant to 641—Chapter 173, Iowa Administrative Code, for the purposes of determining compliance.

[ARC 8502B, IAB 2/10/10, effective 1/13/10; ARC 5763C, IAB 7/14/21, effective 8/18/21]

641—70.10(135) Denial, suspension, or revocation of certification; denial, suspension, revocation, or modification of course approval; and imposition of penalties.

70.10(1) When the department finds that the applicant, certified lead professional, or certified firm has committed any of the following acts, the department may deny an application for certification, may suspend or revoke a certification, may prohibit specific work practices, may require a project conducted by persons or firms that are not certified or a project where prohibited work practices are being used to be halted, may require the cleanup of lead hazards created by the use of prohibited work practices, may impose a civil penalty, may place on probation, may require additional education, may require reexamination of the state certification examination, may issue a warning, may refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code section 135.38, or may impose other sanctions allowed by law as may be appropriate.

a. Failure or refusal to comply with any requirements of this chapter.

b. Failure or refusal to establish, maintain, provide, copy, or permit access to records or reports as required by rules 641—70.3(135) to 641—70.7(135).

c. Failure or refusal to permit entry or inspection as described in subrules 70.9(1) to 70.9(3).

d. Obtaining or attempting to obtain certification through fraudulent representation.

e. Failure to obtain certification from the department and performing work requiring certification.

f. Fraudulently obtaining certification and engaging in any lead-based paint activities requiring certification.

g. Conducting any part of a lead-based paint activity that requires certification without being certified or with a certification that has lapsed.

h. Obtained documentation of training through fraudulent means.

i. Gained admission to an accredited training program through misrepresentation of admission requirements.

j. Obtained certification through misrepresentation of certification requirements or related documents pertaining to education, training, professional registration, or experience.

k. Performed work requiring certification at a job site without having proof of current certification.

l. Permitted the duplication or use of the individual's or firm's own certificate by another.

m. Failed to follow the standards of conduct required by 641—70.6(135).

n. Failed to comply with federal, state, or local lead-based paint statutes and regulations, including the requirements of this chapter.

o. Performed work for which certification is required with employees or persons under the control of the certified elevated blood lead (EBL) inspection agency or certified firm who were not appropriately certified.

p. Knowingly made misleading, deceptive, untrue, or fraudulent representations in the practice of lead professional activities or engaged in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

q. Used untruthful or improbable statements in advertisements. This includes, but is not limited to, an action by a lead professional making information or intention known to the public that is false, deceptive, misleading, or promoted through fraud or misrepresentation.

r. Falsified reports and records required by this chapter.

s. Accepted any fee by fraud or misrepresentation.

t. Negligence by the firm or individual in the practice of lead professional activities. This includes a failure to exercise due care, including negligent delegation of duties or supervision of employees or other individuals, whether or not injury results; or any conduct, practice, or conditions that impair the ability of the firm or individual to safely and skillfully practice the profession.

u. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority. A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report shall be expunged from the records of the board.

v. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

w. Representation by a firm or individual that the firm or individual is certified when the certification has been suspended or revoked or has not been renewed.

x. Failed to respond within 20 days of receipt of communication from the department that was sent by registered or certified mail.

y. Engaged in any conduct that subverts or attempts to subvert a department investigation.

z. Failed to comply with a subpoena issued by the department or failure to cooperate with a department investigation.

aa. Failed to pay costs assessed in any disciplinary action.

ab. Been convicted of a felony or misdemeanor related to lead professional activities or the conviction of any felony or misdemeanor that would affect the ability of the firm or individual to perform lead professional activities. A copy of the record of conviction or plea of guilty shall be conclusive evidence.

ac. Unethical conduct. This includes, but is not limited to, the following:

(1) Verbally or physically abusing a client or coworker.

(2) Improper sexual conduct with or making suggestive, lewd, lascivious, or improper remarks or advances to a client or coworker.

(3) Engaging in a professional conflict of interest.

(4) Mental or physical inability reasonably related to and adversely affecting the ability of the firm or individual to practice in a safe and competent manner.

(5) Being adjudged mentally incompetent by a court of competent jurisdiction.

(6) Habitual intoxication or addiction to drugs.

1. The inability of a lead professional to practice with reasonable skill and safety by reason of the excessive use of alcohol on a continuing basis.

2. The excessive use of drugs which may impair a lead professional's ability to practice with reasonable skill or safety.

3. Obtaining, possessing, attempting to obtain or possess, or administering controlled substances without lawful authority.

(7) Registration on a state sex offender registry.

70.10(2) The department may deny, suspend, revoke, or modify the approval for a course, or may place on probation, or impose other sanctions allowed by law as may be appropriate, or may impose a civil penalty or may refer the case to the office of the county attorney for possible criminal penalties pursuant to

Iowa Code section 135.38 when it finds that the training program, training manager, or other person with supervisory authority over the course has committed any of the following acts:

- a. Misrepresented the contents of a training course to the department or to the student population.
- b. Failed to submit required information or notifications in a timely manner.
- c. Failed to maintain required records.
- d. Falsified approval records, instructor qualifications, or other information or documentation related to course approval.
- e. Failed to comply with the training standards and requirements in 641—70.4(135).
- f. Made false or misleading statements to the department in its application for approval or reapproval which the department relied upon in approving the application.
- g. Failed to comply with federal, state, or local lead-based paint statutes and regulations, including the requirements of this chapter.
- h. Knowingly made misleading, deceptive, untrue, or fraudulent representations in the practice of conducting a training program or engaged in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.
- i. Used untruthful or improbable statements in advertisements. This includes, but is not limited to, an action by a training program making information or intention known to the public that is false, deceptive, misleading, or promoted through fraud or misrepresentation.
- j. Falsified reports and records required by this chapter.
- k. Accepted any fee by fraud or misrepresentation.
- l. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority. A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report shall be expunged from the records of the board.
- m. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- n. Failed to respond within 20 days of receipt of communication from the department that was sent by registered or certified mail.
- o. Engaged in any conduct that subverts or attempts to subvert a department investigation.
- p. Failed to comply with a subpoena issued by the department or failure to cooperate with a department investigation.
- q. Failed to pay costs assessed in any disciplinary action.

70.10(3) Reinstatement.

a. Any individual, training program, or firm that has been revoked, denied, or suspended may apply to the department in accordance with the terms and conditions of the order of revocation or suspension, unless the order of revocation provides that the certification is permanently revoked.

b. If the order of revocation or suspension did not establish terms and conditions upon which reinstatement might occur, or if the certification was voluntarily surrendered, an initial application for reinstatement may not be made until one year has elapsed from the date of the order or the date of the voluntary surrender.

70.10(4) Complaints and other requests for action under this rule. Complaints regarding a certified lead professional, a certified elevated blood lead (EBL) inspection agency, a certified firm, or an approved course shall be submitted in writing to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075. The complainant shall provide:

- a. The name of the certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm and the specific details of the action(s) by the certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm that did not comply with the rules; or
- b. The name of the lead professional or firm that conducted lead professional activities without the appropriate certification or approval as required by the rules; or
- c. The name of the sponsoring person or organization of an approved course and the specific way(s) that an approved course did not comply with the rules; or

d. The name of the sponsoring person or organization that provided a course without the approval required by these rules.

70.10(5) Civil penalties.

a. Before instituting any proceeding to impose a civil penalty under Iowa Code section 135.105A, the department shall serve a written notice of violation upon the person charged. The notice of violation shall specify the date or dates, facts, and the nature of the alleged act or omission with which the person is charged and shall identify specifically the particular provision or provisions of the law, rule, regulation, certification, approval, or cease and desist order involved in the alleged violation and must state the amount of each proposed penalty. The notice of violation shall also advise the person charged that the civil penalty may be paid in the amount specified therein, or the proposed imposition of the civil penalty may be protested in its entirety or in part, by a written answer, either denying the violation or showing extenuating circumstances. The notice of violation shall advise the person charged that upon failure to pay a civil penalty subsequently determined by the department, if any, unless compromised, remitted, or mitigated, the fee shall be collected by civil action, pursuant to Iowa Code section 135.105A.

b. Within 20 days of the date of a notice of violation or other time specified in the notice, the person charged may either pay the penalty in the amount proposed or answer the notice of violation. The answer to the notice of violation shall state any facts, explanations, and arguments denying the charges of violation, or demonstrating any extenuating circumstances, error in the notice of violation, or other reason why the penalty should not be imposed and may request remission or mitigation of the penalty.

c. If the person charged with violation fails to answer within the time specified in paragraph 70.10(5) “*b*,” an order may be issued imposing the civil penalty in the amount set forth in the notice of violation described in paragraph 70.10(5) “*a*.”

d. If the person charged with violation files an answer to the notice of violation, the department, upon consideration of the answer, will issue an order dismissing the proceeding or imposing, mitigating, or remitting the civil penalty. The person charged may, within 20 days of the date of the order or other time specified in the order, request a hearing.

e. If the person charged with violation requests a hearing, the department will issue an order designating the time and place of hearing. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

f. If a hearing is held, an order will be issued after the hearing by the presiding officer or the department dismissing the proceeding or imposing, mitigating, or remitting the civil penalty.

g. The department may compromise any civil penalty. If the civil penalty is not compromised, or is not remitted by the presiding officer or the department, and if payment is not made within ten days following either the service of the order described in paragraph 70.10(5) “*c*” or “*f*,” or the expiration of the time for requesting a hearing described in paragraph 70.10(5) “*d*,” the department may refer the matter to the attorney general for collection.

h. Except when payment is made after compromise or mitigation by the department of justice or as ordered by a court of the state, following reference of the matter to the attorney general for collection, payment of civil penalties imposed under Iowa Code section 135.105A shall be made by check, draft, or money order payable to the Iowa Department of Public Health.

70.10(6) Appeals.

a. Notice of denial, suspension or revocation of certification, or denial, suspension, revocation, or modification of course approval shall be sent to the affected individual or organization by restricted certified mail, return receipt requested, or by personal service. The affected individual or organization shall have a right to appeal the denial, suspension or revocation.

b. An appeal of a denial, suspension or revocation or other disciplinary action shall be submitted by certified mail, return receipt requested, within 20 days of the receipt of the department’s notice to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075. If such a request is made within the 20-day time period, the notice of denial, suspension or revocation or other disciplinary action shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, suspension or revocation or other disciplinary action has been or will be removed. After the hearing, or upon default of the applicant

or alleged violator, the administrative law judge shall affirm, modify or set aside the denial, suspension or revocation or other disciplinary action. If no appeal is submitted within 20 days, the denial, suspension or revocation or other disciplinary action shall become the department's final agency action.

c. Upon receipt of an appeal that meets contested case status, the appeal shall be transmitted to the department of inspections and appeals within five working days of receipt pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the denial, suspension or revocation is based shall be provided to the department of inspections and appeals.

d. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

e. When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. The proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in paragraph 70.10(6) "f."

f. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for appeal shall state the reason for appeal.

g. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing or submission to the director. The record shall include the following:

- (1) All pleadings, motions, and rulings.
- (2) All evidence received or considered and all other submissions by recording or transcript.
- (3) A statement of all matters officially noticed.
- (4) All questions and offers of proof, objection, and rulings thereon.
- (5) All proposed findings and exceptions.
- (6) The proposed findings and order of the administrative law judge.

h. The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

i. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

j. Any petition for judicial review of a decision and order shall be filed in the district court within 20 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075.

k. The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

70.10(7) Public notification.

a. The public shall be notified of the suspension, revocation, modification, or reinstatement of course approval through appropriate mechanisms.

b. The department shall maintain a list of courses for which the approval has been suspended, revoked, modified, or reinstated.

c. The public shall be notified of the suspension or revocation of the certification of a lead professional or firm.

d. The department shall maintain a list of lead professionals and firms for which certification has been suspended or revoked.

CHAPTER 71
EMERGENCY INFORMATION SYSTEM ON PESTICIDES FOR USE BY HEALTH CARE
PROVIDERS DURING MEDICAL EMERGENCIES

641—71.1(139A) Scope. Except as otherwise specifically provided, these rules apply to requirements for the operation of an emergency information system operated by providers of pesticides in Iowa who register with the Iowa department of agriculture and land stewardship (IDALS). These rules do not pertain to registrants who do not operate their own emergency information system.

641—71.2(139A) Definitions. As used in this chapter, these terms have the definition set forth below.

“Department” means the Iowa department of public health.

“Emergency information system (EIS)” means a system developed by a registrant that is accessible by Iowa health care providers and poison control centers 24 hours per day, every day of the year. The system must provide ready access to pesticide product profiles of the registrants to include but not be limited to characterization of inert ingredient(s) and their general proportion whether openly defined or confidentially maintained as a trade secret.

“Registrant” means the person registering any pesticide or device or who has obtained a certificate of license from IDALS pursuant to the provisions of Iowa Code chapter 206.

641—71.3(139A) Operation of EIS.

71.3(1) Registrants operating their own EIS shall:

a. Provide emergency treatment information to health care providers engaged in the emergency care of a real-time human exposure to a registrant’s product(s) upon request 24 hours per day, every day of the year. These services shall identify required inert ingredients, pursuant to Iowa Code section 206.12(2) “c”(2), even if they are considered trade secret, for the sole purpose of assisting in the medical management of persons exposed to pesticides;

b. Ensure that information response time to provide appropriate pesticide ingredient information, which may be responsible for the medical emergency, to a health care provider or poison control center, as defined in Iowa Code section 206.2, does not exceed 15 minutes;

c. Have in operation a toll-free number (800 number, reverse charges number, etc.) which can be accessed anywhere in Iowa;

d. Have qualified responders on duty at all times. A qualified responder who provides the information to the inquiring health care provider shall:

(1) Have a college degree in one of the life sciences or its equivalent and have a minimum of two years’ experience in the hazardous chemical (pesticide) field. This experience shall be in the routine handling and working with hazardous substances of the type that would, in the normal course of events, require emergency response; or

(2) Be an individual who is under the direct supervision of an individual who meets the requirements of 71.3(1)“d”(1); and

(3) Have comprehensive emergency response and accident mitigation training.

e. Have an adequate contingency plan to continue operation in the event of equipment or power failure;

f. Have facsimile (fax) capabilities;

g. Provide at a minimum:

(1) The immediate health hazards posed by internal or external exposure to a given pesticide,

(2) Risks of fire or explosion of a material,

(3) Immediate precautions to take in the event of an accident or incident,

(4) Preliminary first-aid measures, and

(5) A comprehensive list of compounds in a given product including identification of the inert ingredients only upon request from the health care provider who is treating a real-time human exposure to a registrant’s product.

h. Provide to poison control centers, defined in Iowa Code subsection 206.2(24), the telephone number(s) to be used to obtain treatment information for a person exposed to a registrant’s product.

71.3(2) Reserved.

These rules are intended to implement Iowa Code subsection 139A.21(7).

CHAPTER 72
CHILDHOOD LEAD POISONING
PREVENTION PROGRAM

641—72.1(135) Definitions.

“Approved program” means a program that meets the requirements of subrule 72.2(3) and has been approved by the department.

“Department” means the Iowa department of public health.

“Local board” means a county, district, or city board of health.

“Local childhood lead poisoning prevention program” means a program in which the services listed in subrule 72.2(3) are provided by agencies located in a community.

[ARC 3833C, IAB 6/6/18, effective 7/11/18]

641—72.2(135) Approved programs.

72.2(1) A local board of health representing a geographic area with a population of at least 15,000 is eligible to apply for status as an approved program pursuant to Iowa Code section 135.104, which sets forth the eligibility requirements contained in the application.

72.2(2) A local board wishing to apply for status as an approved program shall make application to the Iowa department of public health in the format which will be made available from the Lead Poisoning Prevention Program, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. All materials submitted as part of the application for status as an approved program are public records.

72.2(3) The program administered by a local board of health or city receiving funding for an approved childhood lead poisoning prevention grant program shall include:

- a. A public education program about lead poisoning and dangers of lead poisoning to children.
- b. An effective outreach effort to ensure availability of services in the predicted geographic area.
- c. A screening program for children, with an emphasis on children less than six years of age.
- d. Access to laboratory services for lead analysis.
- e. A program of referral of identified children for assessment and treatment.
- f. An environmental assessment of suspect dwelling units.
- g. Surveillance to ensure correction of the identified hazardous settings.
- h. A plan of intent to continue the program on a maintenance basis after the grant is discontinued.

[ARC 3833C, IAB 6/6/18, effective 7/11/18]

641—72.3(135) Reallocation of funding. On January 1 of each year, the department shall ask each approved program to estimate the amount of funds that the approved program has been awarded but will not use. The department may reallocate these funds to approved programs with demonstrated special needs for childhood lead poisoning prevention services.

[ARC 3833C, IAB 6/6/18, effective 7/11/18]

641—72.4(135) Appeals.

72.4(1) Any applicant that has timely filed an application and is aggrieved by the decision made pursuant to these rules regarding the applicant’s status as an approved program may request a reconsideration of the applicant’s proposal by filing a written request for reconsideration with the director of the Iowa department of public health. The request shall be filed within three working days of the date of notification of the decision regarding the applicant’s status as an approved program.

72.4(2) A request for reconsideration must be in writing and clearly state the reasons for reconsideration. The director’s scope of review for requests shall be limited to a finding that the department erred in following the rules or procedures of the approval process as outlined in these administrative rules.

72.4(3) The department shall refrain from allocating any funds until it has received the decision of the director as to any reconsideration. The review shall be conducted as expeditiously as possible so that all funds can be allocated in a timely fashion.

72.4(4) This procedure shall end the review process at the administrative level.

These rules are intended to implement Iowa Code sections 135.100 to 135.105.

CHAPTER 73
SPECIAL SUPPLEMENTAL NUTRITION PROGRAM
FOR WOMEN, INFANTS, AND CHILDREN (WIC)

[Prior to 7/29/87, Health Department[470] Ch 73]

641—73.1(135) Program explanation. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is a federal program operated pursuant to agreement with the states. The purpose of the program is to provide supplemental foods and nutrition education to eligible pregnant, postpartum, and breastfeeding women, infants, and young children from families with inadequate incomes. The WIC program is administered on the federal level by the U.S. Department of Agriculture, Food and Nutrition Service (FNS). The Iowa department of public health serves as the administering agency for the state of Iowa. The Iowa department of public health enters into contracts with selected local agencies on an annual basis for the provision of WIC services to eligible participants.

641—73.2(135) Adoption by reference. Federal regulations in 7 CFR Part 246 found at www.gpo.gov/fdsys/pkg/CFR-2018-title7-vol4/pdf/CFR-2018-title7-vol4-part246.pdf (effective as of February 13, 1985, as amended through January 1, 2018, and any additional amendments), WIC EBT operating rules found at www.fns.usda.gov/sites/default/files/wic/WIC-EBT-Operating-Rules-September-2014.pdf (effective as of November 2009, as amended through September 2014, and any additional amendments), the WIC EBT technical implementation guide found at www.fns.usda.gov/sites/default/files/WICEBT-TechnicalImplementationGuide.pdf (as amended through September 30, 2012, and any additional amendments), FNS Handbook 901 v2 found at fns-prod.azureedge.net/sites/default/files/apd/FNS_HB901_v2.2_Internet_Ready_Format.pdf (as amended through January 2017, and any additional amendments), and FNS Instruction 113-1 found at www.fns.usda.gov/sites/default/files/113-1.pdf (effective as of November 8, 2005, and any additional amendments) shall be the authority for rules governing the Iowa WIC program and are incorporated by reference herein. The Iowa WIC Policy and Procedure Manual, which provides procedural guidance in the implementation of these regulations to contract agencies administering the WIC programs and which contains policies and procedures as approved by the United States Department of Agriculture, is incorporated herein by reference.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.3(135) Availability of rules and policy and procedure manual. Copies of the federal rules and the Iowa WIC Policy and Procedure Manual adopted by reference in 641—73.2(135) are available from: Chief, Bureau of Nutrition and Physical Activity, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075; (515)281-7095 or 1-800-532-1579.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.4(135) Definitions.

“Above-50-percent vendor” means a vendor that derives more than 50 percent of the vendor’s annual food sales revenue from WIC food instruments, and a new vendor applicant expected to meet this criterion under guidelines approved by FNS.

“Applicant” means a pregnant woman, breastfeeding woman, postpartum woman, an infant or a child who is applying to receive WIC benefits and the breastfed infant(s) of an applicant breastfeeding woman. *“Applicant”* includes an individual who is currently participating in the program and who is reapplying because the individual’s certification period is about to expire.

“Authorized supplemental food” means supplemental food authorized by the state or local agency for issuance to a participant.

“Breastfeeding” means the practice of feeding a mother’s breast milk to her infant(s) on the average of at least once a day.

“Breastfeeding woman” means a woman up to one year postpartum who is breastfeeding her infant(s).

“Cash-value benefit” means a fixed-dollar amount food instrument which is used by a participant to obtain authorized fruits and vegetables.

“Categorical eligibility” means a person who meets the definition of a pregnant woman, breastfeeding woman, postpartum woman, or infant or child.

“Certification” means the implementation of criteria and procedures to assess and document each applicant’s eligibility for the program.

“Chief state health officer” or *“director”* means the director of the Iowa department of public health.

“Child” means a person who has had his or her first birthday but has not yet attained his or her fifth birthday.

“Clinic” means a facility where applicants are certified.

“Competent professional authority” or *“CPA”* means an individual on the staff of the contract agency who, using standardized WIC screening tools and eligibility criteria provided by the department, determines whether an applicant for WIC services is eligible to receive those services. A CPA shall be a member of one of the following categories:

1. A dietitian licensed by the Iowa board of dietetics;
2. A nutrition educator as defined in the Iowa WIC Policy and Procedure Manual;
3. A physician, registered nurse or licensed physician assistant.

“Compliance buy” means a covert, on-site investigation in which a representative of the WIC program poses as a participant, parent or caretaker of an infant or child participant, or proxy, transacts one or more food instruments or cash-value benefits, and does not reveal during the visit that he or she is a program representative.

“Contract agency” means a private, nonprofit or public agency that has a contract with the department to provide WIC services and receives funds from the department for that purpose.

“Conventional eggs” means eggs other than specialty eggs.

“Department” means the Iowa department of public health.

“Disqualification” means the act of ending the WIC program participation of a participant, authorized food vendor, or authorized state or local agency, whether as a punitive sanction or for administrative reasons.

“Division director” means the director of the division of health promotion and chronic disease prevention, Iowa department of public health.

“Dual participation” means simultaneous participation in the WIC program in one or more than one WIC clinic, or participation in the WIC program and in the commodity supplemental food program (CSFP) during the same period of time.

“ECR” means electronic cash register.

“Eggs” means shell eggs that are graded as “AA,” “A,” or “B” pursuant to 7 CFR Part 56, Subpart A, and that are sold at retail in commercial markets.

“eWIC” means functions related to the electronic benefits transfer (EBT) card.

“Exempt infant formula” means an infant formula that meets the requirements for an exempt infant formula under Section 412(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 350a(h)) and the regulations at 21 CFR Parts 106 and 107.

“Family” means a group of related or nonrelated individuals who are living together as one economic unit, except that residents of a homeless facility or an institution shall not all be considered as members of a single family.

“Fiscal year” means the period of 12 calendar months beginning October 1 of any calendar year and ending September 30 of the following calendar year.

“FNS” means the Food and Nutrition Service of the U.S. Department of Agriculture.

“Food instrument” means a voucher, check, coupon, electronic benefits transfer (EBT-eWIC) card or any other document used to obtain supplemental foods.

“Health professional” means an individual who is licensed to provide health care or social services within the individual’s scope of practice.

“Health services” means ongoing, routine pediatric and obstetric care (such as infant and child care and prenatal and postpartum examinations) or referral for treatment.

“Hearing officer” means the contract agency director, health professional, community leader or impartial citizen who is designated to hear the appeal of a participant, and is not to be confused with the statutory definition of a hearing officer, which is an administrative law judge.

“Homeless facility” means the following types of facilities which provide meal service: a supervised publicly or privately operated shelter (including a welfare hotel or congregate shelter) designed to provide temporary living accommodations; a facility that provides a temporary residence for individuals intended to be institutionalized; or a public or private place not designed for, or normally used as, a regular sleeping accommodation for human beings.

“Homeless participant” means a woman, infant or child:

1. Who lacks a fixed and regular nighttime residence; or
2. Whose primary nighttime residence is:
 - A supervised publicly or privately operated shelter (including a welfare hotel, a congregate shelter, or a shelter for victims of domestic violence) designated to provide temporary living accommodations;
 - An institution that provides a temporary residence for individuals intended to be institutionalized;
 - A temporary accommodation of not more than 365 days in the residence of another individual; or
 - A public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

“Infant” means a person under one year of age.

“Infant formula” means a food that meets the definition of an infant formula in Section 201(z) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(z)) and that meets the requirements for an infant formula under Section 412 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 350a) and the regulations at 21 CFR Parts 106 and 107.

“Iowa WIC Policy and Procedure Manual” means all of the state WIC policies and procedures that describe the manner in which the department implements and operates all aspects of program administration within its jurisdiction in accordance with 7 CFR Part 246.

“Nutritional risk” means:

1. Detrimental or abnormal nutritional conditions detectable by biochemical or anthropometric measurements;
2. Other documented nutritionally related medical conditions;
3. Dietary deficiencies that impair or endanger health;
4. Conditions that directly affect the nutritional health of a person, including alcoholism or drug abuse; or
5. Conditions that predispose persons to inadequate nutritional patterns or nutritionally related medical conditions, including, but not limited to, homelessness and migrancy.

“Nutrition education” means an individual or group education session and the provision of materials designed to improve health status, achieve positive change in dietary and physical activity habits, and emphasize relationships between nutrition, physical activity, and health, all in keeping with the personal and cultural preferences of the individual.

“Participant” means a pregnant woman, breastfeeding woman, postpartum woman, infant or child who is receiving supplemental foods under the program, and the breastfed infant(s) of a participant breastfeeding woman.

“Participant violation” means any deliberate action of a participant, parent or caretaker of an infant or child participant, or proxy that violates federal or state statutes, regulations, policies, or procedures governing the WIC program. Participant violations include, but are not limited to, deliberately making false or misleading statements or deliberately misrepresenting, concealing, or withholding facts to obtain benefits; selling or offering to sell WIC benefits, including cash-value vouchers, food instruments, EBT cards, or supplemental foods in person, in print, or online; exchanging or attempting to exchange WIC benefits, including cash value vouchers, food instruments, EBT cards, or supplemental foods for cash, credit, services, nonfood items, or unauthorized food items, including supplemental foods in excess of those listed on the participant’s food instrument; threatening to harm or physically harming clinic, farmer, or vendor staff; and dual participation.

“Peer group” means a system of grouping WIC vendors according to structure; type; number of cash registers; square footage; and sales. Peer groups are used to establish statistical norms that an individual vendor may be compared against and provide the numeric baselines for the process of determining what may be fraudulent behavior.

“PIN” means personal identification number.

“Postpartum woman” means a woman up to six months after termination of pregnancy.

“Pregnant woman” means a woman determined to have one or more embryos or fetuses in utero.

“Proxy” means any person designated by a woman participant, or by a parent or caretaker of an infant or child participant, to obtain and transact food instruments or cash-value vouchers or to obtain supplemental foods on behalf of a participant.

“Rebate” means the amount of money refunded under cost containment procedures to the department from the manufacturer of the particular food product as the result of the purchase of the supplemental food with a voucher or other purchase instrument by a participant in the department’s WIC program. Such rebates shall be payments made subsequent to the exchange of a food instrument for food.

“Routine monitoring” means overt, on-site monitoring during which WIC program representatives identify themselves to vendor personnel.

“SNAP” or *“Supplemental Nutrition Assistance Program,”* formerly known as the Food Stamp Program, means the program authorized by the Food and Nutrition Act of 2008 (7 U.S.C. 2011, et seq.), in which eligible households receive benefits that can be used to purchase food items from authorized retail vendors and farmers’ markets.

“Specialty eggs” means eggs produced by domesticated chickens, and sold at retail in commercial markets, if the chickens producing such eggs are advertised as being housed in any of the following environments:

1. Cage-free.
2. Free-range.
3. Enriched colony cage.

“USDA” means the United States Department of Agriculture.

“Vendor” means a retail outlet that provides supplemental food to WIC program participants.

“Vendor authorization” means the process by which the department assesses, selects, and enters into agreements with vendors that apply or subsequently reapply to be authorized as vendors.

“Vendor overcharge” means intentionally charging the department more for authorized supplemental foods than is permitted under the WIC vendor agreement. It is not a vendor overcharge when a vendor submits a food instrument for redemption and the department makes a price adjustment to the food instrument.

“Vendor violation” means any intentional or unintentional action of a vendor’s current owners, officers, managers, agents, or employees (with or without the knowledge of management) that violates the WIC vendor agreement or federal or state statutes, regulations, policies, or procedures governing the WIC program.

“WIC-eligible nutritionals” means certain enteral products that are specifically formulated to provide nutritional support for individuals with a qualifying condition, when the use of conventional foods is precluded, restricted, or inadequate. Such WIC-eligible nutritionals must serve the purpose of a food, meal or diet (may be nutritionally complete or incomplete) and provide a source of calories and one or more nutrients; be designed for enteral digestion via an oral or tube feeding; and may not be a conventional food, drug, flavoring, or enzyme. WIC-eligible nutritionals include many, but not all, products that meet the definition of medical food in Section 5(b)(3) of the Orphan Drug Act (21 U.S.C. 360ee(b)(3)).

“WIC program” means the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) authorized by Section 17 of the Child Nutrition Act of 1966, 42 U.S.C. 1786.

“WIC vendor agreement” means the WIC Vendor Agreement and Handbook.

“WIC Vendor Instructions and Agreement Booklet” means the grocery vendor application, grocery vendor application guidance, special purpose vendor application, special purpose vendor application guidance, and WIC Vendor Agreement and Handbook.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.5(135) Staffing of contract agencies.

73.5(1) The competent professional authority (CPA) shall conduct the nutrition interview and shall attest to the applicant's eligibility for services after the certification process is completed.

73.5(2) Contract agencies shall maintain on file documentation of qualifications for any individual employed or under contract as a CPA.

73.5(3) All contract agencies shall employ at least one licensed dietitian to provide services for participants determined to be at high risk. Nutrition educators employed by a contract agency shall be supervised by a licensed dietitian.

73.5(4) Proposed staffing patterns within contract agencies shall be subject to approval from the department following review in accord with established statewide WIC staff patterns.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.6(135) Certification of participants. The certification process to determine eligibility for WIC services, as defined in 7 CFR 246.7, shall include the following procedures and definitions:

73.6(1) *Application.* Information on identity, address, family incomes, and nutritional risk must be collected in accordance with the Iowa WIC Policy and Procedure Manual.

73.6(2) *Income.*

a. The income guidelines used shall be the same as the National School Lunch Program guidelines for reduced price school lunches, which are equal to 185 percent of the current federal poverty guidelines. Definitions of income are mandated by federal regulation and are described in the Iowa WIC Policy and Procedure Manual. Revised dollar figures for the 185 percent poverty level are published annually in the Federal Register and become effective for WIC no later than July 1 following their publication. Copies of the income definitions and monetary guidelines are available from the department.

b. Applicants must provide the contract agency written proof of their income as part of each certification process, pursuant to the Iowa WIC Policy and Procedure Manual.

73.6(3) *Time frame for services.*

a. The date of initial visit shall be the day on which an applicant first requests services from a contract agency. A visit to another WIC program office to complete a common application form does not constitute an initial visit.

b. Pregnant women shall be certified for the duration of their pregnancy and for up to six weeks postpartum. Pregnant women precertified with referral data require a full certification within 30 days.

73.6(4) *Medical equipment.*

a. Medical equipment used in conducting WIC clinics shall be subject to approval by the department.

b. Standards for conducting the medical and nutritional assessments on WIC program applicants shall be as described in the Iowa WIC Policy and Procedure Manual.

c. Medical equipment shall be recalibrated in accord with procedures outlined in the Iowa WIC Policy and Procedure Manual.

73.6(5) *Documentation of health and nutrition information.* Documentation of health and nutrition information in individual participant records shall be as described in the Iowa WIC Policy and Procedure Manual.

73.6(6) *Documentation of nonmedical information.* Documentation of nonmedical information in individual participant and collective program records shall be as described in the Iowa WIC Policy and Procedure Manual.

73.6(7) *Transfer of participant information.* Requirements for use and disclosure of confidential applicant and participant information for non-WIC purposes were revised in the Federal Register September 27, 2006, Department of Agriculture, Food and Nutrition Service, 7 CFR Part 246, Miscellaneous Provisions; Final Rule 246.25(a)(4).

a. *Designation by chief state health officer.* The chief state health officer must designate in writing the permitted non-WIC uses of the information and the names of the organizations to which such information may be disclosed.

b. *Notice to applicants and participants.* The applicant or participant will be notified at the time of application (in accordance with 7 CFR 246.7(i)(11)) or through a subsequent notice that the chief state health officer may authorize the use and disclosure of information about an applicant's or participant's

participation in the WIC program for non-WIC purposes. This statement will also indicate that such information will be used by state and local WIC agencies and public organizations only in the administration of programs that serve persons eligible for the WIC program.

c. Written agreement and policy and procedure manual. The state or local agency disclosing the information will enter into a written agreement with the other public organization or, in the case of a non-WIC use by a state or local WIC agency, the unit of the state or local agency that will be using the information. The department will also include in the Iowa WIC Policy and Procedure Manual, as specified in 7 CFR 246.4(a)(24), a list of all organizations (including units of the department or local agencies) with which the department or its local agencies have executed or intend to execute a written agreement. The written agreement must:

(1) Specify that the receiving organization may use the confidential applicant and participant information only for:

1. Establishing the eligibility of WIC applicants or participants for the programs that the organization administers;
2. Conducting outreach to WIC applicants and participants for such programs;
3. Enhancing the health, education, or well-being of WIC applicants or participants who are currently enrolled in such programs, including the reporting of known or suspected child abuse or neglect that is not otherwise required by state law;
4. Streamlining administrative procedures in order to minimize burdens on staff, applicants, or participants in either the receiving program or the WIC program; or
5. Assessing and evaluating the responsiveness of a state's health system to participants' health care needs and health care outcomes; and

(2) Contain the receiving organization's assurance that the organization will not use the information for any other purpose or disclose the information to a third party.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.7(135) Food delivery. Food delivery refers to all aspects of the method by which WIC participants receive food benefits, including but not limited to the issuing, distribution, and processing of personal food instruments redeemable through retail food markets and the statewide banking system. Food delivery shall be uniform throughout the state as provided for by these rules.

73.7(1) Responsibilities of WIC participants.

a. Prompt redemption of food instruments. A WIC participant must redeem WIC benefits within the validated date of use.

b. Claiming food instruments and benefits. Enrolled participants are required to appear in person to claim food instruments and benefits when they have appointments to certify or have face-to-face, scheduled nutrition education contacts. Enrolled participants who complete their nutrition education contacts via a state-approved Internet nutrition education platform are not required to appear in person to claim food instruments and benefits. A proxy may pick up food instruments as described in the Iowa WIC Policy and Procedure Manual.

c. Adherence to standards for use of the food instrument. The WIC participant in using the WIC food instrument to obtain the specified foods shall:

- (1) At the time of receipt of food benefits in the clinic, electronically sign that food benefits were received.
- (2) Swipe the eWIC card at the vendor's ECR and enter the participant's PIN at point of purchase.
- (3) Not accept money in exchange for unused food benefits or portions of the food allotment.
- (4) Attempt to redeem food benefits only with a WIC-contracted vendor.

73.7(2) Responsibilities of contract agencies.

a. Loss or theft of food instruments. The contract agency is responsible for any financial loss due to theft or other loss of food instruments from clinics. Steps for minimizing the chances of theft or loss are followed in accord with the Iowa WIC Policy and Procedure Manual.

b. Mailing of WIC food instruments. Mailing of food instruments to participants is allowed only in specific situations as described in the Iowa WIC Policy and Procedure Manual. Any mailing of WIC food instruments must have prior approval from the state.

c. *Training/monitoring of WIC vendors.* The contract agency shall communicate information regarding the Iowa WIC program to vendors, as instructed by the department. Monitoring and training of vendors and securement of contracts shall be carried out in accordance with department directives outlined in the Iowa WIC Policy and Procedure Manual.

d. *Food instrument/benefits distribution on non-clinic days.* It is the policy of the Iowa WIC program to ensure maximum accessibility to program benefits by establishing alternate procedures for distributing WIC food instruments to participants on days other than regularly scheduled clinic days when the participant notified the contract agency on or before the clinic day of the participant's inability to appear at the clinic. Each contract agency shall establish written guidelines for assessing the adequacy of reasons presented for inability to appear and shall establish written procedures for alternative means of food instrument/benefits distribution when a participant timely presents adequate reasons for inability to appear on a regularly scheduled clinic day. These written guidelines and procedures shall be subject to review and approval by the department.

73.7(3) Responsibilities of department. Provision of foods through retail grocers and special purpose vendors is an integral part of the WIC program's function. It is the responsibility of the department to ensure that there are a sufficient number of vendors authorized to provide reasonable access for WIC participants. The department also has an obligation to ensure that both food and administrative funds are expended in the most efficient manner possible. As with all other purchases made by state government, this means that all vendors must meet minimum criteria for approval. The Iowa WIC program does not limit the number of vendors that may participate in the agency service area. A retailer that intends to derive more than 50 percent of annual revenue of the sale of food items from the redemption of WIC food instruments will not be allowed. The department shall be responsible for the following:

a. Approving or denying vendor applications. The department shall determine if applications meet the mandatory specifications in 73.7(4) and meet the minimum review points in 73.7(4) for a subsequent agreement.

b. Compiling the statewide or local area composite data against which vendor applications are reviewed, determining if applications meet the selection criteria which require use of that data, providing training, and signing the initial authorization agreement if a vendor is determined eligible.

c. Developing procedures, forms, and standards for agencies to use in conducting on-site review of vendor applications, monitoring, compliance buys, educational buy monitoring, or compliance investigations as defined in 73.7(5).

d. Determining when compliance investigation activities are necessary to verify WIC program violations, developing or approving standards and procedures to be used in conducting the activities, and arranging for an appropriate state or private agency to conduct the compliance buying investigation as required.

e. Providing to vendors written notice of WIC program violations and sanctions.

f. Ensuring that activities related to eWIC follow information provided by FNS's WIC EBT operating rules, WIC EBT Technical Implementation Guide and FNS Handbook 901.

73.7(4) Responsibilities of WIC vendors. A potential vendor shall make application to the Iowa department of public health WIC program and shall accept the obligations imposed by the signing of a WIC vendor agreement prior to acceptance of any WIC food instrument. The two categories for which any potential vendor may apply are grocery vendors and special purpose vendors. A retailer that intends to derive more than 50 percent of annual revenue of the sale of food items, for grocery vendors, or of infant and special medical formula, for special purpose vendors, from the redemption of WIC food instruments will not be approved.

a. *WIC vendor agreement.* To qualify for a WIC vendor agreement with the Iowa WIC program, a retail outlet shall meet all of the following criteria:

(1) The vendor must stock all of the following categories of items to be defined as a grocery vendor: a minimum of 5 linear feet of raw fruits and vegetables; a minimum of 12 linear feet of unbreaded fresh or frozen meats and poultry (prepackaged luncheon meats do not qualify); canned and frozen vegetables; dairy products; cereals; and breads.

(2) No more than 20 percent of the vendor's gross retail sales may be from the sale of gasoline or other automotive supplies.

(3) No more than 20 percent of the vendor's gross retail sales may be from the sale of alcoholic beverages and tobacco products.

(4) The vendor must maintain regular business hours. This shall include a minimum of two 4-hour blocks of time on each of five days per week. Daily operating hours shall be consistent from week to week and shall be posted.

(5) The vendor must stock the minimum variety and quantity of WIC-approved foods as defined in the latest revised version of the Iowa WIC vendor application.

1. The specific brands of products that are included on the WIC-approved food list shall be made available to the vendor at the time of application and prior to renewal of each agreement.

2. The variety and quantity in stock are defined as including both inventory on display and in on-premises storage, but not inventory on order from suppliers.

(6) The vendor must purchase formula only from state-licensed wholesalers, distributors, retailers, and infant formula manufacturers registered with the Food and Drug Administration (FDA) through a list maintained by the WIC program.

(7) A vendor shall charge a price to WIC participants that is equal to or less than the price charged to all other customers. The vendor's average price for any category of WIC items, as reported on the application, at the time of the on-site review, and throughout the agreement period, shall not exceed 115 percent of the average price charged for the same category by all other WIC vendors in the same peer group. Categories refer to the broad groupings of items rather than specific brands. For purposes of making the price comparisons, the average price for all other WIC vendors in the peer group shall be computed from the most recent Price Assessment Reports on file from those vendors. If a vendor intends to comply with this provision by charging WIC participants a lower price than the price charged to other customers, the WIC price for each approved item must be identified on the package or shelf front.

(8) Vendors will also be selected based on access to WIC participants. If at all possible, at least one vendor contract will be maintained in rural counties where a WIC clinic is located. The Iowa WIC program does not limit the number of vendors that may participate in the agency service area.

(9) The vendor must have a current state of Iowa food establishment license.

(10) The vendor must consistently identify WIC products by using shelf labels that meet specific criteria and price points as described in the WIC Vendor Instructions and Agreement Booklet as found in the Iowa WIC Policy and Procedure Manual.

(11) The vendor must not have had a Supplemental Nutrition Assistance Program (SNAP) disqualification or civil monetary penalty imposed within the 12 months preceding the date of the application or reauthorization.

(12) The vendor must not have had a WIC program suspension imposed or a WIC application denied within the six-month period preceding the date of the application.

(13) The vendor must not have had a conviction or civil judgment for any activity that indicates a lack of business integrity against any of the officers or owners during the previous six years.

(14) The vendor must accept training on WIC program regulations prior to signing an agreement and must agree to provide training to all employees who will handle WIC food instruments prior to accepting any food instruments.

(15) The vendor must agree to adhere to all provisions of the WIC Vendor Instructions and Agreement Booklet as found in the Iowa WIC Policy and Procedure Manual.

b. Special purpose vendor. To qualify as a special purpose vendor, a retail outlet shall meet all of the following criteria:

(1) The vendor may be primarily a retailer of any type of merchandise but shall be authorized to provide only specified infant formula in exchange for WIC food instruments.

(2) The vendor must be able to provide the specified formula within 48 hours; 72 hours if a weekend or holiday is involved.

(3) The prices charged to WIC participants must be equal to or less than the prices charged to all other customers. The average price of each brand of infant formula sold to WIC participants as reported must not

exceed the average price of the same brands of infant formula charged by all authorized WIC grocery vendors in the same peer group.

(4) The vendor shall meet the criteria in paragraph 73.7(4) “a,” subparagraphs (2) through (4), (6) through (8), and (10) through (15), for grocery vendors.

(5) The vendor must agree to adhere to applicable provisions of the WIC Vendor Instructions and Agreement Booklet as found in the Iowa WIC Policy and Procedure Manual.

c. Application review. The department shall review each vendor application within five working days of receipt and determine if the information provided indicates that the retail outlet meets the selection criteria. If the application shows that the vendor does not meet one or more of the criteria, the department shall deny the application. If the vendor’s application indicates that the vendor would qualify, the department or contract agency shall make an on-site visit to verify that the information provided in the application is correct, to provide training, and sign the agreement. If the department or contract agency finds that the vendor has two or more types of out-of-date, stale, or moldy WIC foods in stock during the on-site visit, the vendor’s application may be denied. If the contract agency or department determines during the on-site visit that the vendor does not qualify, the contract agency or department shall not sign the agreement. Within five working days of disapproving an application or agreement, the department will advise the vendor in writing of the reasons for denial of the application and the procedure for appeal. During the on-site visit, the contract agency representative is acting as an agent of the department and has the authority to approve or deny an application.

A vendor that is denied an agreement, either at the application review level or at the on-site review, is required to wait six months prior to submitting a new application. Prior to completing its review, the department may, at its discretion, request a vendor to resubmit an application if the application has not been completed to the extent that a determination of eligibility can be made.

d. Reauthorization. If ownership of an authorized vendor changes during the agreement period, the agreement becomes void. The new owner must file an application and be approved prior to accepting WIC food instruments. The WIC vendor agreement is valid only for the period of time specified, and a vendor may not continue accepting food instruments past the expiration date unless a new agreement is signed. When a currently authorized vendor makes application for a subsequent agreement, an agreement shall be signed only if the vendor has been assessed less than 60 violation points under paragraph 73.19(2) “b” during a contract period.

Vendors must complete a new application and sign a new WIC vendor agreement at least every three years to continue accepting WIC food instruments.

The department shall send the vendor written notice at least 30 days prior to the expiration of the agreement that it does not intend to offer the vendor a new agreement if the vendor has been assessed 60 or more violation points under paragraph 73.19(2) “b” during a contract period or if any of the following conditions are in effect:

(1) The vendor has failed to submit any of the preceding year’s Price Assessment Reports by the specified dates.

(2) Any of the selection criteria listed in 73.7(4) “a” and “b” above are no longer met.

Expiration of a WIC vendor agreement is not subject to appeal. A vendor who is not offered a new agreement by the department has the right to file a new application. If that application is denied, the vendor has the right to appeal.

e. Training. Vendors shall accept training in WIC program policies and procedures at the on-site review prior to becoming an authorized vendor and shall be responsible for training all employees who will be handling WIC food instruments. The manager and person responsible for staff training must allow time at this visit for training; the agreement will not be signed until training is completed. Vendors shall be responsible for all actions of their employees in conducting WIC transactions.

If violations of WIC program policies and procedures are documented, either through on-site monitoring or other indirect means, the vendor shall implement a corrective action training plan developed jointly by the vendor and the department or contract agency.

f. Cooperation during monitorings. Contracted WIC vendors shall cooperate with department and contract agency staff who are present on site to monitor the vendor’s WIC activities.

g. *Reimbursement to the WIC program.* Vendors determined by the department to have collected more moneys than the true value of food items received shall make reimbursement to the department.

73.7(5) Vendor monitoring. To maintain WIC program integrity and accountability for federal or state program funds, the department and contract agencies shall conduct ongoing monitoring of authorized vendors, both through on-site visits and through indirect means. A sample of 10 percent of currently authorized vendors receives on-site monitoring every year. Vendors that change ownership during the year or that apply during the contract period receive an on-site visit prior to signing an agreement. The types of on-site monitoring are defined as follows:

a. Routine or representative monitoring is used for vendors for which there is no record of violations or complaints or other indication of problems. It may include any or all of the following: use of a food instrument or observation of a participant, educational buys, review of inventory levels, review of vendor policies on return items, and review of employee training procedures. The results of the monitoring are reviewed with the owner or manager on duty, and a follow-up letter confirming the findings is sent from the department. Routine monitoring may be performed by the department or by contract agency staff under the direction of the department. Depending on the nature and severity of violations noted, the department may schedule additional visits, initiate a compliance investigation, or apply sanctions.

Educational buy monitoring is a specialized type of routine monitoring. Department or contract agency staff attempt to use a WIC food instrument to purchase unauthorized types or brands of foods to test the level of training of vendor employees. At the conclusion of the transaction, the results of the buy are discussed with the vendor owner or manager on duty. After an educational buy is conducted, the purchased food may be donated. Educational buys are used on authorized vendors selected by the department. If unauthorized items are allowed to be purchased, the vendor shall agree to a corrective action training plan. A follow-up educational buy is scheduled within 30 to 90 days. A letter is sent from the department documenting the violation. By signing a WIC vendor agreement, a vendor gives consent for educational buys by the department or contract agency. Vendors are not notified in advance that an educational buy is scheduled. The protocol for educational buys, including procedures, appropriate items to purchase, and forms to be used, is specified in the Iowa WIC Policy and Procedure Manual.

b. Electronic monitoring is examination of indicators tracked in the vendor computer database. It allows the analysis of data collected via computer from the contract agencies and the state's bank, from which patterns indicating compliance with or deviation from established patterns for Iowa WIC vendors emerge. Data is collected daily and reviewed on an ongoing basis. Trends identified can necessitate another type of monitoring, depending on the nature of each exception.

c. Compliance investigations may be used for any vendors. Compliance investigations will be conducted annually in a minimum percentage of vendors as mandated in federal regulations. A compliance investigation includes a sufficient number of compliance buys to provide evidence of WIC program noncompliance, two compliance buys in which no WIC program violations are found, or when an inventory audit has been completed. A compliance buy means a covert, on-site investigation in which a representative of the WIC program poses as a participant, parent or caretaker, or proxy, transacts one or more food instruments and does not reveal during the visit that he or she is a WIC representative. Compliance buys may be performed by the department or another state agency or private company under contract with the department. The department is responsible for identifying the vendors to be investigated and for approving the protocol to be used during the investigation. Upon completion of a compliance buy documenting WIC program violations, the department shall issue the vendor a notice of violation points assessed unless such notification would hinder an investigation.

The department also monitors vendor performance through in-office review of information. Such information, specifically the total amount of WIC redemptions, is confidential as provided for in Iowa Code section 22.7(6). This business information could provide an advantage to competitors and would serve no public purpose if made available.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.8(135) Food package. The authorized supplemental foods shall be prescribed for participants by a CPA in the contract agency from food packages outlined in 7 CFR 246.10 and in accordance with the following:

73.8(1) *Prescription of foods.* Food packages shall maintain a balance between cost and nutrition integrity. There are two components to this balance: (1) administrative adjustments by the department; and (2) nutrition tailoring by both the department and the CPA in the contract agencies.

a. Administrative adjustments include restrictions in the packaging methods, brands, sizes, types, and forms (but not quantities) of the federally allowable foods in order to establish the approved food list for the state. Administrative adjustments include decisions to eliminate more expensive brands or prohibit more costly food items allowed by regulations. Criteria for considering foods for inclusion in the approved food list are found in 73.8(3).

b. Nutrition tailoring includes changes or substitutions to food types, forms, and quantities in order to prescribe food packages that better meet the nutritional needs of participants. Tailoring is done to reduce quantities of foods based on nutritional needs, to accommodate participant preferences, to accommodate household conditions, such as lack of refrigeration or other special needs and problems of homeless or transient participants, and to recommend or prescribe specific forms of the allowable WIC foods based upon a participant's nutritional needs or goals.

73.8(2) *Tailoring to meet individual nutritional needs.* Food packages are individually tailored to meet the needs of specific participants according to USDA regulations and the Iowa WIC Policy and Procedure Manual.

73.8(3) *Criteria for approving products for inclusion in the WIC food package.*

a. A product shall meet the federal regulations governing the WIC food package.

b. Variety in the food package is encouraged to increase the likelihood of products being used and to allow participants to exercise responsibility in shopping.

c. Inquiries from food companies about new and continuing products can be submitted at any time. Food items that are required to be listed by brand on the approved food list will be reviewed and approved on a quarterly basis. Food items that are not required to be listed by brand on the approved food list will be reviewed and approved as they are received. The state reserves the right to change the food list more frequently if necessary.

d. Cereals shall meet federal guidelines for content and shall also meet the following conditions:

(1) The brand is carried by current Iowa WIC-approved vendors.

(2) The department reserves the right to limit the number of approved cereals for administrative efficiency.

e. Juices shall meet the federal guidelines for vitamin C content and all of the following conditions:

(1) Juices are 100 percent juice and contain no added sugar, sweeteners or artificial sweeteners.

(2) The brand is carried by current Iowa WIC-approved vendors.

f. The following conditions apply to dairy products:

(1) To qualify, brands of whole, 1%, or fat-free skim milk marketed in Iowa must contain or be fortified with vitamins A and D to meet the federal standards. The department reserves the right to disqualify brands which have a retail value of 115 percent or higher than the state average for this product.

(2) Fluid milk with added bacterial cultures or enzymes, including but not limited to sweet acidophilus or lactose-reduced milk, may qualify. Brands are approved by the department on a case-by-case basis.

(3) All brands of natural cheese designated in the USDA WIC regulations qualify. The cheese shall have no added flavors (e.g., smoke flavoring, peppers, wine).

(4) Yogurt shall meet federal guidelines for content and shall also meet the following conditions:

1. The brand or any private-label (store) brand is carried by current Iowa WIC-approved vendors.

2. Nonfat, lowfat, and whole yogurts cannot contain artificial sweeteners. No frozen yogurt, yogurt tubes, or drinkable yogurts are allowed.

g. All brands of packaged dried beans or peas are approved; however, no soup mixes and no dried beans or peas with added vegetables, fruits, meat, sugars, fats, or oils are allowed.

h. Peanut butter must meet federal guidelines. Brands may be either refrigerated or nonrefrigerated.

i. Eggs shall be fresh, Grade A large chicken eggs. Eggs which have a retail value of 115 percent or higher than the state average for this product may not be approved.

j. If a vendor offers specialty eggs for retail sale, the vendor shall maintain an inventory of conventional eggs for retail sale sufficient to meet federal and state requirements for participation in the WIC program.

k. Any brand of tuna or salmon qualifies if it is either water- or oil-packed, in cans or pouches, chunked, solid, or flaked. Fish packaged with other items such as crackers, relish or other flavorings may not be purchased. Albacore tuna is not allowed.

l. Commercial infant formula shall meet the following conditions:

(1) It is registered with the Food and Drug Administration as complying with the legal definition of infant formula.

(2) It complies with the calorie and iron content prescribed by the USDA.

(3) It is approved by the USDA for use in the WIC program.

(4) The product form and marketing approach are consistent with the promotion of good nutrition and education.

m. At least two whole grain options that meet federal guidelines will be provided.

n. Infant food fruits, vegetables and meats must meet the federal guidelines.

o. Fresh and frozen vegetables and fruits that meet federal guidelines will be available for purchase with cash-value benefits specifically for fruits and vegetables.

p. Soy beverages shall meet federal guidelines.

q. Tofu shall meet federal guidelines.

r. Products will be evaluated for use in the Iowa WIC program based on nutrient content, packaging, container size, labeling, availability to wholesale distributors, cost and participant preference. The state reserves the right to limit the number of foods, infant formulas, exempt infant formulas, and WIC-eligible nutritionals for the WIC-approved food list based on accessibility, availability, retail value of product, USDA recommendations, increased number of WIC participants, changes in appropriation of funds and administrative efficiency.

s. The approved food list provides more specifics on what is allowed or not allowed for each of the WIC-approved foods.

t. In addition to the criteria specified above, the department reserves the right to further restrict the number and types of brands of any products in order to contain the cost of the food package through competitive procurement of rebate contracts or other similar means.

u. The department reserves the right to discontinue specific brand names and products if the cost is 115 percent or more higher than the state average for that particular product.

v. If a group of food products within a food category from one manufacturer have similar names and package designs and some of the food products do not qualify, the department reserves the right to not approve those types that would otherwise qualify, to reduce the potential for confusion by retail vendors and participants.

w. The department reserves the right to make changes to the criteria for approving products for inclusion in the WIC food package.

x. The department reserves the right to add or delete products pursuant to federal regulations.

[ARC 7984B, IAB 7/29/09, effective 9/2/09; ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.9(135) Education.

73.9(1) *Nutrition education for WIC participants.*

a. Nutrition education is provided as a benefit to all women and to parents of all children enrolled in the WIC program.

b. A minimum of two nutrition education contacts shall be offered to each woman participant or the parent/guardian of children/infants participating in WIC during each certification period.

c. Nutrition education shall be based on information obtained through the nutrition interview and shall be tailored to the specific nutrition need of the participant.

d. All pregnant women enrolled in WIC shall be offered education on the benefits of breastfeeding.

e. Education in normal nutrition, i.e., education in nutrition for life-cycle stages, shall be provided in accordance with the Iowa WIC Policy and Procedure Manual.

f. Participants who are at high risk, as defined in the Iowa WIC Policy and Procedure Manual, shall receive counseling and a nutrition plan of care developed by a licensed dietitian. The plan of care shall be documented in the participant record and shall include scheduling a minimum of one individual education contact by a licensed dietitian.

g. The department shall make nutrition education materials and resources available at no cost to contract agencies. The department reserves the right to review and approve or disapprove any printed materials or lesson plans developed by contract agencies.

h. To the extent that time and resources are available, nutrition education may be provided to applicants who are not eligible to receive other WIC services.

73.9(2) *Education of contract agency personnel.* Agencies accepting WIC funds shall be responsible for ensuring that all agency staff or contractors are adequately trained for their responsibilities. At a minimum, training shall include the components described in the Iowa WIC Policy and Procedure Manual.

Continuing education is an allowable WIC administrative expense for contract agency staff and contractors who provide nutrition education.

[ARC 7984B, IAB 7/29/09, effective 9/2/09; ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.10(135) Health services. The WIC program shall serve in the arrangement of ongoing health services for its participants. Contract agencies not able to provide such health services directly shall enter into written agreements with other public health agency(ies) or private physician to ensure availability of health services.

73.10(1) *Written agreements.*

a. Contract for services. Contract agencies shall maintain an annual written, contractual agreement with any health agency performing WIC health assessments, whether for fee or exchange of service.

b. Memorandum of understanding. Contract agencies shall maintain a current memorandum of understanding with any health agency designated to provide ongoing health services to WIC participants and with any agency providing referral data.

73.10(2) *Referral procedures.* The contract agency shall be responsible for referral of WIC participants to appropriate health care providers, as determined by the WIC health professional's assessment of their condition.

a. Authorization for release of information. Except as indicated below, before releasing medical or other personal information, including name, to an outside agency, the contract agency shall secure the participant's or parent/legal guardian's written authorization to release such information. A statement shall be signed for each specific provider to which information is being sent. The information contained in individual participant records shall be confidential pursuant to 7 CFR 246.26.

Referrals to the department of human services' child protective services for investigation of potential child abuse may be made without obtaining a written release of information. Procedures for responding to a subpoena are made in accordance with the Iowa WIC Policy and Procedure Manual.

b. The referral form. A standard referral form, as provided by the department, shall be completed and sent to the referral agency. Documentation and follow-up are made in accord with the Iowa WIC Policy and Procedure Manual.

[ARC 2839C, IAB 12/7/16, effective 1/11/17]

641—73.11(135) Appeals and fair hearings—local agencies.

73.11(1) *Right of appeal.*

a. Applicant. An applicant may appeal the denial or rejection of a timely submitted application.

b. Contract agencies. The right to appeal shall be granted when, during the course of the contract or agreement period, a local agency is disqualified or any other action which affects participation is taken.

73.11(2) *Request for hearing.* The appeal shall be submitted in writing within ten business days of receipt of notification of the adverse decision. The appeal shall be addressed to the contract administrator cited in the competitive selection application guidance, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

a. Applicant. In the event of an appeal, the department will continue working with the applicant awarded funding pending the outcome of the appeal.

b. Contract agencies. For participating contract agencies, a minimum of 60 days' advance notice will be given before the effective date of the action.

73.11(3) *Contested cases.* Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals (DIA) pursuant to the administrative rules adopted by DIA regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to DIA.

73.11(4) *Notice of hearing.* Parties shall receive notice of the hearing in advance. The administrative law judge (ALJ) shall schedule the time, place, and date of the hearing so that the hearing is held as expeditiously as possible.

73.11(5) *Conduct of hearing.* The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code, and federal regulations found at 7 CFR 246.24. Copies of these regulations are available from the department of inspections and appeals upon request.

73.11(6) *Decision.* A written decision of the ALJ shall be issued, where possible, within 60 days from the date of the request for a hearing unless the parties agree to a longer period of time.

73.11(7) *Decision of ALJ.* When the ALJ makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is filed by either of the parties as provided in 641—subrule 176.8(5) or the director serves notice on the parties of the director's intent to review the decision.

73.11(8) *Appeal to director.* Any appeal to the director for review of the proposed decision and order of the ALJ shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the ALJ's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the ALJ. Any request for an appeal shall state the reason for appeal.

73.11(9) *Record of hearing.* Upon receipt of an appeal request, the ALJ shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a.* All pleadings, motions, and rules.
- b.* All evidence received or considered and all other submissions by recording or transcript.
- c.* A statement of all matters officially noticed.
- d.* All questions and offers of proof, objections and rulings thereon.
- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the ALJ.

73.11(10) *Decision of director.* Upon receipt of a properly filed appeal, the director shall establish a briefing schedule and, at the discretion of the director, an opportunity for oral argument. An appeal to the director shall be based on the record made at the hearing. The director may reverse or modify any finding of fact if a preponderance of the evidence will support a determination to reverse or modify such a finding, or may reverse or modify any conclusion of law the director finds to be in error. The decision and order of the director shall be delivered by certified mail, return receipt requested, or by personal service, and becomes the department's final decision upon receipt by the aggrieved party.

73.11(11) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review pursuant to Iowa Code chapter 17A.

73.11(12) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa

Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. The party who appeals a final agency action to district court shall pay the costs of the preparation of a transcript of the contested case hearing for the district court.

[ARC 2839C, IAB 12/7/16, effective 1/11/17]

641—73.12(135) Right to appeal—participant.

73.12(1) *Right of appeal.* A WIC participant shall have the right to appeal whenever a decision or action of the department or contract agency results in the individual's denial of participation, disqualification, or termination from the WIC program. All hearings shall be conducted in accordance with these rules.

73.12(2) *Notification of appeal rights and right to hearing.* Each WIC program participant shall be notified in writing of the participant's right to appeal at the time of application and at the time of denial of eligibility or termination from the WIC program and at the time a participant receives a notice of a claim being established for repayment of improperly issued benefits. Appeal and hearing notices shall also be written, posted, and immediately available at contract agencies to explain the method by which a hearing is requested, and that the participant may present arguments at the hearing either personally or through a representative such as a relative, friend, legal counsel, or other spokesperson.

73.12(3) *Request for hearing.* A request for hearing by an individual or the individual's parent, guardian, or other representative must be made in writing or verbally. The request for hearing shall be made to the contract agency within 60 days from the date the individual receives notice of the decision or action that is the subject of appeal.

73.12(4) *Denial or dismissal of request.* The request for hearing shall not be denied or dismissed unless:

- a. The request is not received within the required time frame;
- b. The request is withdrawn in writing by the appellant or a representative of the appellant; or
- c. The appellant has been denied participation by a previous hearing and cannot provide evidence that circumstances relevant to WIC program eligibility have changed in such a way as to justify a hearing.

73.12(5) *Receipt of benefits during appeal.* Participants who appeal the termination of benefits within the 15-day advance adverse action notice period must continue to receive WIC program benefits until the hearing official reaches a decision or the certification period expires, whichever occurs first, provided that subsequent certifications are completed as required. Participants who are terminated because of categorical ineligibility (e.g., a child over five years of age) shall not continue to receive benefits during the administrative appeal period. Participants who are terminated at the end of a certification period for failure to reapply, following notice of expiration of certification, shall not continue to receive benefits during the administrative appeal period. Applicants who are denied WIC program benefits at the initial certification or at subsequent recertifications, due to a finding of ineligibility, shall not receive benefits during the administrative appeal period.

73.12(6) *Hearing officer.* The hearing officer shall be impartial, shall not have been directly involved in the initial determination of the action being contested, and shall not have a personal stake in the decision. If the party filing the appeal objects prior to a scheduled hearing to a contract agency director serving as a hearing officer in a case involving the director's own agency, another hearing officer shall be selected and, if necessary, the hearing shall be rescheduled as expeditiously as possible. Contract agencies may seek the assistance of the state WIC office in the appointment of a hearing officer.

73.12(7) *Notice of hearing.* The hearing officer shall schedule the time, place and date of the hearing as expeditiously as possible. Parties shall receive notice of the hearing at least ten days in advance of the scheduled hearing. The hearing shall be accessible to the party requesting the hearing. The hearing shall be scheduled within three weeks from the date the contract agency received the request for a hearing, or as soon as possible thereafter, unless a later date is agreed upon by the parties.

73.12(8) *Conduct of hearing.* The hearing shall be conducted in accordance with federal regulations found at 7 CFR 246.23. Copies of these regulations are available from the contract agency and the department.

- a. At a minimum, the party requesting the hearing or the party's representative shall have the opportunity to:

- (1) Examine, prior to and during the hearing, the documents and records presented to support the decision under appeal;
- (2) Be assisted or represented by an attorney or other person at the party's own expense;
- (3) Bring witnesses;
- (4) Question or refute any testimony or evidence, including an opportunity to confront and cross-examine adverse witnesses;
- (5) Submit evidence to establish all pertinent facts and circumstances in the case;
- (6) Advance arguments without undue interference.

b. If a participant fails to attend the hearing, the agency will reschedule the hearing and give the participant 20 days' notice. The participant may have another person as the participant's designee. If neither the participant nor the designee attends the second hearing, the appeal will be closed.

73.12(9) *Decision.* Decisions of the hearing officer shall be in writing and shall be based on evidence presented at the hearing. The decision shall summarize the facts of the case, specify the reasons for the decision, and identify the supporting evidence and pertinent regulations or policy. The decision shall be issued within 45 days of the receipt of the request for a hearing, unless a longer period is agreed upon by the parties.

73.12(10) *Appeal of decision to the department.* If either party to a hearing receives an unfavorable decision, that decision may be appealed to the department. Such appeals must be made within 15 days of the mailing date of the decision. Appeals shall be sent to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

73.12(11) *Contested case.* Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the Iowa department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to the Iowa department of inspections and appeals.

73.12(12) *Receipt of benefits during appeal to the department.* If the decision being appealed concerns disqualification from the WIC program, the appellant shall not continue to receive benefits while an appeal to the department of a decision rendered on appeal at the local level is pending.

73.12(13) *Hearing.* Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the Iowa department of inspections and appeals found in 481—Chapter 10.

73.12(14) *Decision of administrative law judge.* The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 73.12(15).

73.12(15) *Appeal to director.* Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

73.12(16) *Record of hearing.* Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.

f. The proposed decision and order of the administrative law judge.

73.12(17) *Decision of director.* An appeal to the director shall be based on the record of the hearing before the administrative law judge. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

73.12(18) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

73.12(19) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

73.12(20) *Benefits after decision.* If a final decision is in favor of the person requesting a hearing and benefits were denied or discontinued, benefits shall begin immediately and continue pending further review should an appeal to district court be filed. If a final decision is in favor of the contract agency, benefits shall be terminated, if still being received, as soon as administratively possible after the issuance of the decision. Benefits denied during an administrative appeal period may not be awarded retroactively following a final decision in favor of a person applying for benefits.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.13(135) Right to appeal—vendor.

73.13(1) *Right of appeal.* The right of appeal shall be granted when a vendor's application to participate is denied. The right to appeal shall also be granted when, during the course of the contract or agreement period, a vendor is disqualified or any other action which affects participation is taken. For participating vendors, a minimum of 15 days' advance notice will be given before the effective date of the action. The right to appeal shall not be granted in the following circumstances:

- a. When a vendor's contract expires.
- b. When the department makes a determination regarding participant access.
- c. When a vendor is disqualified from the WIC program as a result of a Supplemental Nutrition Assistance Program (SNAP) disqualification.
- d. When there are disputes regarding food instrument or cash-value benefit payments and vendor claims (other than the opportunity to justify or correct a vendor overcharge or other error, as permitted by 7 CFR 246.12(k)(3)).
- e. The denial of authorization, if the department vendor authorization is subject to the procurement procedures applicable to the department.
- f. When a vendor does not agree with the validity or appropriateness of the department's vendor selection and limiting criteria, the department's peer group criteria, the department's above-50-percent vendor criteria, and the department's prohibition of incentive items and the department's denial of an above-50-percent vendor's request to provide an incentive item to customers pursuant to 7 CFR 246.12(h)(8).

g. Determination of the following by the department:

- (1) Whether or not a vendor had an effective policy and program in effect to prevent trafficking and that the ownership of the vendor was not aware of, did not approve of, and was not involved in the conduct of the violation,
- (2) To include or exclude an infant formula, manufacturer, wholesaler, distributor, or retailer from the approved-formula list required pursuant to 7 CFR 246.12(g)(11),
- (3) Whether to notify a vendor in writing when an investigation reveals an initial violation to impose a sanction, pursuant to 7 CFR 246.12(l)(3).

73.13(2) *Request for hearing.* An appeal is brought by filing a written request for a hearing with the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within ten days of receipt of

notification of the adverse action. The written request for hearing shall state the adverse action being appealed.

73.13(3) *Contested cases.* Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

73.13(4) *Notice of hearing.* The administrative law judge (ALJ) shall schedule the time, place and date of the hearing as expeditiously as possible. Hearings shall be conducted by telephone or in person in Des Moines, Iowa, at the Lucas State Office Building or other suitable location.

73.13(5) *Conduct of hearing.* The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code, and federal regulations found at 7 CFR 246.18. Copies of these regulations are available from the department of inspections and appeals upon request.

73.13(6) *Decision.* A written decision of the ALJ shall be issued, where possible, within 60 days from the date of the request for a hearing unless the parties agree to a longer period of time.

73.13(7) *Decision of ALJ.* When the ALJ makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 73.13(8).

73.13(8) *Appeal to director.* Any appeal to the director for review of the proposed decision and order of the ALJ shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the ALJ's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the ALJ. Any request for an appeal shall state the reason for appeal.

73.13(9) *Record of hearing.* Upon receipt of an appeal request, the ALJ shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the hearing officer.

73.13(10) *Decision of director.* The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

73.13(11) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review pursuant to Iowa Code chapter 17A.

73.13(12) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of petition for judicial review shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.14(135) *State monitoring of contract agencies.* The department shall review contract agency operations through use of reports and documents submitted, state-generated data processing reports, and on-site visits for evaluation and technical assistance.

73.14(1) *On-site visits.* Department staff shall visit contract agencies whenever necessary, to review operations and ensure compliance with state and federal regulations.

73.14(2) *Request for written reports.* The department may request written progress reports from contract agencies within specified times.

73.14(3) *Qualifications of department reviewers.* At minimum, one of the persons from the department responsible for reviewing a contract agency shall be a licensed dietitian.

641—73.15(135) Migrant services. To meet the WIC needs of migrant workers within the state, a contract or work agreement shall be maintained with at least one contract migrant service agency within the state to provide or assist in the provision of service to this population.

641—73.16(135) Civil rights. The Iowa WIC program shall operate in compliance with state and federal regulations to ensure the rights of all individuals under the WIC program.

[ARC 2839C, IAB 12/7/16, effective 1/11/17]

641—73.17(135) Audits. Each contract agency shall ensure an audit of the WIC program within the agency at least every two years, to be conducted by a private certified public accountant or in accord with applicable Office of Management and Budget Circulars: A-128, Audits of State and Local Governments, and A-133, Audits of Institutions of Higher Education and Other Nonprofit Institutions. Each audit shall cover all unaudited periods through the end of the previous grant year. The department's audit guide shall be followed to ensure an audit that meets federal and state requirements.

641—73.18(135) Reporting. Completion of grant applications, budgets, expenditure reports and written responses to the department's monitoring for the WIC program shall be conducted by contract agencies in compliance with the formats and procedures outlined by the department in the Iowa WIC Policy and Procedure Manual, as specified in the contract entered into by the department and the contract agency.

641—73.19(135) WIC program violation. Participants or vendors are subject to the sanctions outlined below if determined by contract agency or department staff to be guilty of abusing the WIC program or its regulations.

73.19(1) *Participant violation.* Violations may be reported by contract agency staff, vendors, the public, FNS staff, or department staff. All suspected cases of fraud will be investigated by the department. All sanctions will be administered by the department. Contract agencies will be notified of any actions taken against WIC participants by the department.

a. Whenever possible, the participant is contacted via telephone concerning the violation. Documentation is maintained according to procedures set forth in the Iowa WIC Policy and Procedure Manual.

b. Participants who violate WIC program regulations are subject to sanction in accordance with the schedule below:

Violation	Sanction Action
1. Intentional false statement(s) or misrepresentation of income, name, residence, family size (including receiving and using benefits for children no longer in the family), medical data, pregnancy, and/or date of birth to obtain WIC benefits.	One-year disqualification and pay full restitution
2. Return of WIC foods to vendor for unapproved food items, nonfood items, credit or cash (attempted or actual). Claim amount less than \$100.	Two-month disqualification and pay full restitution Subsequent violation of any claim amount: one-year disqualification and pay full restitution
Buy, trade, exchange, transfer, sell, or offer to buy, trade, exchange, transfer, sell, or allow any other person to buy, trade, exchange, transfer, sell or offer to buy, trade, exchange, transfer or sell eWIC card/ benefits for unapproved food items, nonfood items, cash or favors. Claim amount less than \$100.	

3.	Return of WIC foods to vendor for unapproved food items, nonfood items, credit or cash (attempted or actual). Claim amount greater than \$100. Buy, trade, exchange, transfer, sell, or offer to buy, trade, exchange, transfer, sell or allow any other person to buy, trade, exchange, transfer, sell or offer to buy, trade, exchange, transfer, or sell WIC foods for unapproved food items, nonfood items, cash or favors. Claim amount greater than \$100.	One-year disqualification and pay full restitution
4.	Creating a public nuisance or disrupting normal activities through verbal misconduct or physical disruptions at the local WIC agency, farmers market, or vendor location.	First violation: Education/counseling Second subsequent violation: Warning letter Third subsequent violation: Two-month disqualification Fourth subsequent violation: Any subsequent violation(s) will result in a one-year disqualification.
5.	Verbal abuse or harassment of WIC staff, vendors, farmers market vendors and/or other WIC participants. This includes verbal abuse or harassment in person, on social media, or over the telephone.	Two-month disqualification Subsequent violation will result in a one-year disqualification.
6.	Physical abuse (directly or indirectly carrying out the actual harm or threatening to do harm) of WIC staff, vendors, vendor staff, farmers market vendors, farmers market vendor staff, and/or other WIC participants.	Any violation will result in a one-year disqualification.
7.	Destruction of property, theft of eWIC card(s) or theft from a local WIC agency, vendor, vendor staff, farmers market vendor, farmers market vendor staff, and/or another WIC participant.	Any violation will result in a one-year disqualification.
8.	Collusion with staff to improperly obtain benefits.	One-year disqualification and pay full restitution
9.	Dual participation resulting from intentional misrepresentation.	One-year disqualification and pay full restitution
10.	Trafficking WIC food benefits, WIC benefits, or WIC items and/or collusion with an authorized vendor.	One-year disqualification and pay full restitution
11.	Other violations of this chapter or the Iowa WIC Policy and Procedure Manual.	As appropriate per this chapter or the Iowa WIC Policy and Procedure Manual

c. Local law enforcement may be notified in appropriate cases.

d. Fifteen days' notice must be given prior to all disqualifications. In all cases, the participant must be informed of the reason for the disqualification, of the right to appeal the decision through the fair hearing process, and of eligibility to receive WIC services at the end of the disqualification period.

e. A disqualification may apply to all members of a family who are on the WIC program.

f. Violations are cumulative. However, a participant will not have sanctions assessed for committing a second violation when the second violation occurs before the participant receives notice of the first violation and the second violation is the same as the first. A participant who commits the same violation a second time following receipt of a notice for the first violation is subject to a one-year disqualification.

g. When a participant improperly received benefits as a result of intentionally making a false or misleading statement(s) or intentionally misrepresenting, concealing, or withholding facts or sells or attempts to sell benefits the participant received from the WIC program and is disqualified from the WIC program, the participant may be required to make restitution of the cash value of the improperly received or used WIC benefits. The department may establish a claim against the participant for the full value of the improperly received benefits.

The department shall issue a written notice of restitution and disqualification.

If the participant chooses a repayment plan for claims, the department will assist in developing a payment schedule. If the participant has not paid the department directly within 30 days of the notice of restitution and disqualification, the department will pursue collection of the dollar amount owed and benefits will be discontinued until the claim is paid.

h. The department may decide not to impose a mandatory disqualification if a family makes full restitution for a monetary claim, establishes a repayment schedule within 30 days of receipt of the letter

demanding repayment, makes full restitution or agrees to a repayment schedule or, in the case of a participant who is an infant, a child, or under the age of 18, the state or local agency approves the designation of a proxy. The department may permit the participant to receive WIC services before the end of a mandatory disqualification period if full restitution is made or a repayment schedule is agreed upon or, in the case of a participant who is an infant, a child, or under the age of 18, the department or local agency approves the designation of a proxy. All decisions are at the discretion of the department.

i. When a disqualification period has ended, the individual disqualified may be reinstated if the individual's certification period is still current. If the individual's certification period is not current, the individual will need to complete a certification appointment.

j. The department shall maintain a master list of all participant violation notices, disqualifications, and statements of restitution. The participant's notice of violation must also indicate when it is a second offense.

73.19(2) Vendor violations. There are five types of sanctions that are applied to vendors for violations of WIC program regulations: nonpayment of food instruments, issuance of violation points, temporary disqualification, permanent disqualification, and civil money penalties.

a. Nonpayment of food instruments. If the vendor has been terminated from the WIC program and submits a claim, it will be fully denied.

b. Administrative and procedural violation points. Administrative and procedural violations are offenses to the provisions of the WIC vendor agreement that do not rise to the level of fraud against the WIC program or its participants.

These violations are an indication of a vendor's inattention to or disregard of the requirements of the WIC vendor agreement. It is in the department's interest to record and consider these violations when considering whether to continue its contractual relationship with the vendor.

One or more transactions prior to notification of the vendor constitute only one violation if they contain the same error.

The assignment of violation points does not limit the department's right to effect stronger penalties and sanctions in cases in which there is evidence of an intentional or systematic practice of abusing or defrauding the Iowa WIC program.

Violation	Points Per Event
1. Developing and using promotional materials including stickers, tags, labels, or channel strips with the WIC service mark to identify WIC-approved foods.	5
2. Developing and using vendor-created WIC vendor identification decals to indicate vendor is an authorized vendor.	5
3. Failure to allow WIC participants to leave the vendor with WIC foods that were debited/removed from their eWIC account during a WIC transaction.	5
4. Failure to post eWIC signs in the cash register lane that has a working WIC terminal if the vendor is not integrated.	5
5. Failure to provide vendor ECR system participant receipts to WIC participants during each WIC transaction.	5
6. Failure to reimburse department for potentially overpaid food instrument or provide reasonable explanation for the cost of the food instrument.	10
7. Refusal to accept valid WIC food instruments from participants.	10
8. Discriminatory treatment of WIC participants, such as requiring WIC participants to use special checkout lanes or provide extra identification, or disallowing the use of coupons or other vendor discounts in WIC transactions that are allowed in non-WIC transactions.	10
9. Treating WIC customers differently by offering them incentive items, vendor discounts, coupons, or other promotions that are not offered to non-WIC customers.	10
10. Providing to WIC participants incentive items not prior authorized by the department.	10
11. Failure to carry out corrective action plan developed as a result of monitoring visit.	10
12. Accepting the return of food purchased with WIC food instruments for cash or credit toward other purchases.	10
13. Issuing "rain checks" or credit in exchange for WIC food instruments.	10
14. Stocking out-of-date, stale, or moldy WIC foods.	10
15. Failure to submit vendor price assessment reports as requested.	10

Violation	Points Per Event
16. Failure to train all employees and ensure their knowledge regarding WIC program procedures set forth in the vendor's current agreement and in the current publication of the Iowa WIC program's vendor instruction booklet.	10
17. Requiring WIC participants to purchase a particular brand when other WIC-approved brands are available.	10
18. Not allowing WIC participants to use discount coupons or promotional specials to reduce the WIC food instrument amount.	10
19. Requiring to enter the PIN for the participant and/or asking for the participant's PIN.	10
20. For vendors that have special WIC prices, failure to post WIC prices on the shelf or on the package.	15
21. Contacting WIC participants in an attempt to recover funds not paid by WIC.	15
22. Providing false information on the price assessment report.	15
23. Knowingly entering false information or altering information on the eWIC receipt/benefits.	10
24. Requiring other cash purchases to redeem WIC food instruments.	15
25. Failure to obtain infant and/or special needs formula from an approved source listed by the Iowa WIC program.	15
26. Offering incentive items with a value of more than \$1.99.	15
27. Scanning any UPC code that is not affixed to the actual item being purchased by the WIC participant.	20
28. Failure to allow purchase of up to the full amount of WIC foods authorized on the food instrument if such foods are available and desired by the WIC participant.	20
29. Other violations of this chapter or the WIC vendor agreement or the Iowa WIC Policy and Procedure Manual.	As appropriate per this chapter, the WIC Vendor Agreement and Handout, or the Iowa WIC Policy and Procedure Manual

c. One-year disqualification. With an administrative finding of the following patterns of sanctions, the vendor will be disqualified for one year.

(1) A pattern of allowing purchase of nonapproved food items in exchange for WIC food instruments or for foods provided in excess of those listed on the WIC food instrument. (federally mandated sanction)

(2) Accumulation of 45 or more violations points within a single federal fiscal year of the agreement period. (department sanction)

(3) Failure to provide access to vendor premises or in any manner to hinder, impede or misinform authorized WIC personnel in the act of conducting an on-site education, monitoring or investigation visit. (department sanction)

(4) Loss of Iowa department of inspections and appeals license. (department sanction)

(5) Submitting for payment a WIC food instrument redeemed by another authorized vendor. (department sanction)

(6) Threatening or verbally abusing WIC participants or authorized WIC program personnel in the conduct of legitimate WIC program transactions. (department sanction)

(7) Submitting for payment WIC food instruments known by the vendor to have been lost or stolen. (department sanction)

(8) Participating with other individuals, including but not limited to WIC employees, vendors, and participants, in systematic efforts to submit false claims for reimbursement of improper WIC food instrument. (department sanction)

d. With an administrative finding of the following federally mandated sanctions, the vendor will be disqualified from being a WIC vendor for three years.

(1) A pattern of charging WIC participants more than non-WIC customers or charging WIC participants more than the current shelf price.

(2) A pattern of charging for items not received by the WIC participant or for foods provided in excess of those listed on the WIC food instrument.

(3) A pattern of providing credit or nonfood items, except for alcohol, alcoholic beverages, or tobacco products, in exchange for WIC food instruments.

(4) One incidence of allowing the purchase of alcohol, alcoholic beverages, or tobacco products with a WIC food instrument.

(5) A pattern of receiving, transacting, or redeeming WIC food instruments outside authorized channels, including through unauthorized vendors or persons.

(6) A pattern of claiming reimbursement for the sale of a quantity of a specific food item which exceeds the vendor's documented inventory of that food item for a specified period of time.

e. With an administrative finding of the following federally mandated sanctions, the vendor will be disqualified for six years.

(1) One incidence of buying or selling food instruments for cash (trafficking).

(2) One incidence of selling firearms, ammunition, explosives, or controlled substances (as defined in Section 102 of the Controlled Substances Act (21 U.S.C. 802)) in exchange for WIC food instruments.

f. With a conviction in a criminal court of law for trafficking in WIC food instruments or selling firearms, ammunition, explosives, or controlled substances (as defined in Section 102 of the Controlled Substances Act (21 U.S.C. 802)) in exchange for WIC food instruments, the vendor will be permanently disqualified from the Iowa WIC program. The department may impose a civil money penalty (CMP) in lieu of a disqualification when it determines, in its sole discretion, that:

(1) Disqualification of the vendor would result in inadequate participant access; or

(2) The vendor had, at the time of the violation, an effective policy and program in effect to prevent trafficking; and the ownership of the vendor was not aware of, did not approve of, and was not involved in the conduct of the violation.

g. The following does not have a point value, but shall result in or extend a disqualification period:

For each month in which a vendor accepts WIC food instruments during a disqualification period, the disqualification period shall be extended by 30 days.

h. The above sanctions notwithstanding, the state of Iowa reserves the right to seek civil and criminal prosecution of WIC vendors for any and all instances of dealing in stolen or lost food instruments, trading cash and other inappropriate commodities for food instruments, or cases in which there exists evidence of a clear business practice to improperly obtain WIC funds, or other practices meeting the definition of fraud as defined in 7 CFR Part 246 or the Iowa Code.

i. A vendor shall not be entitled to receive any compensation for revenues lost as a result of any temporary or permanent disqualification.

j. A minimum of 15 days' notice is provided prior to all disqualifications, except for permanent disqualifications assessed under paragraph 73.19(2)"f," which are effective on the date of receipt of the notice of administrative action. When the department determines that an offense has occurred, a disqualification letter with supporting documentation is prepared for the WIC director's signature. The disqualification letter identifies the specific offenses that the vendor is charged with and the procedures for filing an appeal. Voluntary withdrawal from the WIC vendor agreement to avoid a sanction is not allowed.

k. The department is responsible for issuing all warning and disqualification letters. Contract agencies are informed of all vendor correspondence regarding violations. In situations where participant violations are also involved, the contract agency is responsible for follow-up, as detailed in subrule 73.19(1).

l. Federal Supplemental Nutrition Assistance Program (SNAP) regulations require automatic disqualification from SNAP for vendors disqualified by the WIC program for certain types of violations. When a vendor is disqualified from the WIC program, the disqualification letter to the vendor will include the following statement: "This disqualification from WIC may result in disqualification as a retailer in the Supplemental Nutrition Assistance Program (SNAP). Such disqualification may not be subject to administrative or judicial review under SNAP." For all vendor disqualifications from the WIC program, notice will be sent to the United States Department of Agriculture for appropriate action.

m. The department shall disqualify a vendor who has been disqualified from SNAP. The disqualification shall be for the same length of time as the SNAP disqualification, may begin at a later date than the SNAP disqualification, and shall not be subject to administrative or judicial review under the WIC

program. If the department determines that disqualification of a vendor would result in inadequate participant access, it will impose a civil money penalty (CMP) in lieu of disqualification.

n. Civil money penalties.

(1) When the department determines that a civil money penalty (CMP) shall be imposed in lieu of disqualification for reasons specified under paragraph 73.19(2)“*f*” or 73.19(2)“*m*,” it shall use the civil money penalty formula in accordance with Title 7 CFR 246.12(k)(1)(x) to determine the CMP.

(2) If a vendor does not pay, only partially pays, or fails to timely pay a CMP, the department will disqualify the vendor for the length of the disqualification corresponding to the violation for which the CMP was assessed. “Failure to timely pay a CMP” includes the failure to pay a CMP in accordance with an installment plan approved by the department.

(3) Money received by the state WIC agency as a result of civil money penalties or fines assessed against a vendor and any interest charged in the collection of these penalties and fines shall be considered as WIC program income.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.20(135) Data processing. All contract agencies shall comply with the instructions outlined in the Iowa WIC Policy and Procedure Manual for use of the automated data processing system in provision of WIC food instruments and monitoring of WIC services. No contract agency is exempted from adherence to any portion of these instructions.

641—73.21(135) Outreach. Outreach efforts within the Iowa WIC program shall be directed toward extension of services to the neediest Iowans of high priority by reason of their WIC status (see 7 CFR 246.1(d)(3)). The department and contract agencies shall share responsibility for the conduct of outreach efforts.

73.21(1) Contract agency responsibilities. Contract agencies shall conduct any or all of the following outreach activities annually:

- a. Distribute WIC brochures to numerous community organizations and offices.*
- b. Complete outreach activities as specified in the local agency contract.*

73.21(2) Reserved.

[ARC 2839C, IAB 12/7/16, effective 1/11/17]

641—73.22(135) Caseload management. The statewide caseload (number of participants) shall be managed by the department in accord with funding limitations and federal regulations or directives. The federally established priority categories of participant shall be followed when limitation of services is necessary in accord with 7 CFR 246.7(d)(3). In addition the following rules shall apply:

73.22(1) A contract agency shall maintain a waiting list only when the department determines that sufficient funds are not available to meet demand.

73.22(2) When a waiting list has been authorized, contract agencies shall certify applicants of potential highest priority first (e.g., women and infants) and potential lower priority second (children). Within these priority groups, applicants shall be offered certification appointments in the order of placement on the list.

73.22(3) When insufficient funds are available to serve all priority categories, the department shall provide instructions to contract agencies regarding which priority categories may continue to be certified.

73.22(4) When necessitated by federal funding restrictions, the department reserves the right to terminate or temporarily suspend benefits for categories of participants prior to the end of their certification period. Each participant shall be advised in writing 15 days before the effective date of the reasons for the action and of the right to a fair hearing.

[ARC 2839C, IAB 12/7/16, effective 1/11/17]

641—73.23(135) Grant application procedures for contract agencies. Private, nonprofit or public agencies wishing to provide WIC services may be required to file a letter of intent to make application to the department no later than April 1 of the competitive year. Applications shall be to administer WIC services for a specified project period, as defined in the request for proposal, with an annual continuation

application. The contract period shall be from October 1 to September 30 annually. All materials submitted as part of the grant application are considered public records in accordance with Iowa Code chapter 22, after a notice of award is made by the department. Notification of the availability of funds and grant application procedures will be provided in accordance with the department rules found in 641—Chapter 176.

Contract agencies are selected on the basis of the grant applications submitted to the department. The department will consider only applications from private, nonprofit or public agencies. Copies of review criteria are available from: Chief, Bureau of Nutrition and Physical Activity, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075; (515)281-7095 or 1-800-532-1579.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.24(135) Participant rights. The WIC program shall be open to all eligible persons regardless of race, color, sex, creed, age, mental/physical handicap or national origin. The USDA Nondiscrimination Statement can be found on the following USDA website: www.fns.usda.gov/sites/default/files/cr/Nondiscrimination-Statement.pdf.

[ARC 2839C, IAB 12/7/16, effective 1/11/17; ARC 4487C, IAB 6/5/19, effective 7/10/19]

641—73.25(135) Confidentiality. The department and local agencies shall protect the confidentiality of participant, applicant, and vendor information in accordance with 7 CFR Part 246.

[ARC 2839C, IAB 12/7/16, effective 1/11/17]

641—73.26(135) WIC online ordering project. Notwithstanding any conflicting provision of law to the contrary, a participant, vendor, or contract agency may participate in the WIC online ordering project, provided that such participation conforms to the terms and conditions of the Iowa WIC Policy and Procedure Manual as modified to incorporate the WIC online ordering project.

[ARC 6437C, IAB 8/10/22, effective 9/14/22]

These rules are intended to implement federal law 42 U.S.C. Section 1786, and Iowa Code section 135.11(12).

CHAPTER 74
FAMILY PLANNING SERVICES
[Prior to 7/29/87, Health Department[470] Ch 74]

641—74.1(135) Program explanation. The Iowa department of public health is a designated agency to operate the family planning program pursuant to an agreement with the federal government. Congress authorized grants to assist in the establishment and operation of family planning projects which offer a broad range of acceptable and effective family planning methods, including natural family planning, infertility services and services to adolescents. The majority of the funding available is from the Title X, family planning services grant, administered by the United States Department of Health and Human Services (DHHS).

The purpose of the program is to promote the health of persons of reproductive age and families by providing access to family planning and reproductive health promotion services.

The department, bureau of family health, enters into contracts with selected private and public agencies within the department family planning service area for the provision of family planning services. A description of the department family planning service area can be obtained from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

The maternal and child health (MCH) advisory council assists in the development of the state plan for MCH, including children with special health care needs and family planning. The advisory council assists with the assessment of need, prioritization of services, establishment of objectives, and encouragement of public support for MCH and family planning programs. In addition, the advisory council advises the director regarding health and nutrition services for women and children, supports the development of special projects and conferences and advocates for health and nutrition services for women and children. The director appoints the council membership. Membership shall include parents of and service providers for children with special health care needs. Council membership shall also include the chairs, or designees, of the department's advisory committee for perinatal guidelines and the birth defects advisory committee to ensure coordination of each committee's respective issues and priorities. The chair of the family services grantee committee or the designee of the chair may serve as an ex officio member of the council.

641—74.2(135) Adoption by reference. Federal regulations found at 42 CFR Subpart A, Part 59, and the Program Guidelines for Project Grants for Family Planning Services shall be the regulations governing the Iowa family planning program and are incorporated by reference herein.

Copies of the federal regulations adopted by reference are available from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—74.3(135) Rule coverage. These rules cover the agencies that have a contract with the department to provide family planning services and receive funds from the department for that purpose.

641—74.4(135) Definitions.

"Applicant" means a private nonprofit or public agency that seeks a contract with the department to provide family planning services and receives funds from the department for that purpose.

"Client" means an individual who receives family planning services through a contract agency.

"Contract agency or contractor" means a private nonprofit or public agency within the department family planning service area that has a contract with the department to provide family planning services and receives funds from the department for that purpose.

"Department" means the Iowa department of public health.

"DHHS" means the United States Department of Health and Human Services.

"DIA" means the Iowa department of inspections and appeals.

"Director" means the director of the Iowa department of public health.

"Family" means a group of two or more persons related by birth, marriage, or adoption or residing together. A pregnant woman is considered as two individuals when calculating the number of individuals in the family. If a pregnant woman is expecting multiple births, the family size is increased by the number expected in the multiple birth.

“Family planning” means the promotion of reproductive and family health by the prevention of and planning for pregnancy, and reproductive health education.

“Health education” means services provided by a health professional to include teaching about normal anatomy and physiology, contraception, risk assessment, safety and injury prevention, signs or symptoms indicating need for medical care, and other anticipatory guidance topics.

“Health professional” means an individual who is licensed to provide health care or social services within their scope of practice.

“Health services” means services provided by family planning contract agencies.

“Medicaid” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from DHHS.

“OMB” means the United States Department of the Treasury, Office of Management and Budget.

“Performance standards” means criteria or indicators of the quality of service provided or the capability of an agency to provide services in a cost-effective or efficient manner as defined in “Iowa Department of Public Health Family Planning Manual” and the federal regulations found at 42 CFR Subpart A, Part 59, and the Program Guidelines for Project Grants for Family Planning Services.

“Title X” means the federal requirements contained in 42 CFR Subpart A, Part 59, and the Program Guidelines for Project Grants for Family Planning Services.

“Title XX” means the combined federal and state dollars in the Social Services Block Grant allocated to pay for family planning services.

641—74.5(135) Grant application procedures for contract agencies. Notification of the availability of funds and grant application procedures will be provided in accordance with the department rules found in 641—Chapter 176. Eligible applicants include only private nonprofit or public agencies. Private nonprofit or public agencies seeking to provide Title X family planning center services shall file a letter of intent to make application to the department no later than April 1 of the competitive year. The request for proposals shall identify the project period and the contract period. Contract agencies are selected on the basis of the grant applications submitted to the department. In the case of competing applications, the contract will be awarded to the applicant that scores the highest number of points in the review. Copies of review criteria are available from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. All materials submitted as part of the grant application are considered public records in accordance with Iowa Code chapter 22, after a notice of award is made by the department.

641—74.6(135) Funding levels for contract agencies. The amount of funds available to each contract agency on an annual basis shall be determined by the department using a methodology based upon dollars available, number of clients enrolled, and selected needs criteria.

641—74.7(135) Agency performance. Contract agencies are required to provide services in accordance with these rules.

74.7(1) Performance standards. The department shall establish performance standards that contract agencies shall meet in the provision of public health services in addition to meeting all federal requirements. The performance standards for community-based agencies are published in the document “Iowa Department of Public Health Family Planning Manual.” Copies of the performance standards are available from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. Contract agencies that do not meet the performance standards shall not be eligible for continued funding as a family planning agency unless the contract agency has secured an exception.

74.7(2) Contract agency review. The state agency shall review contract agency operations through use of reports and documents submitted, state-generated data reports, chart audits, on-site and clinic visits for evaluation and technical assistance.

74.7(3) Exception. An agency that does not meet a performance standard or fails to meet action plans as approved by the department may be granted an exception for up to one year in order to improve performance. Such an exception must be requested in writing. If granted, the approval for the exception

will include the conditions necessary for the successful completion of the standard, a time frame, and additional reporting requirements. The procedures for applying for and approving an exception are outlined in the “Iowa Department of Public Health Family Planning Manual.”

641—74.8(135) Reporting. Contract agencies shall complete grant applications, a budget, expenditure reports, an annual progress report, a family planning annual report, and data forms in compliance with the terms of the contract.

641—74.9(135) Fiscal management. All contract agencies are required to meet certain fiscal management policies.

74.9(1) Last pay. Family planning grant funds are considered last pay. Title XIX, Title XX and other third parties are to be billed first if the client is covered by those sources.

74.9(2) Program income. Program income means gross income earned by the contractor from activities in which part or all of the cost is either borne as a direct cost by a grant or counted as a direct cost toward providing services. It includes but is not limited to such income in the form of Title XIX and Title XX fees for services, third-party reimbursements, client fees, and proceeds from sales of tangible personal or real property.

Program income shall be used for allowable costs of the project. Program income shall be used prior to the use of funds received from the department. Excess program income may be retained to establish a three-month operating capital. Program income shall be used during the current fiscal year or the following fiscal year. Five percent of unobligated program income may be used by the contract agency for special purposes or projects provided such use furthers the mission of the family planning program and does not violate state rules or federal regulations governing the program.

74.9(3) Advances. A contract agency may request an advance up to one-sixth of its contract at the beginning of a contract year. The amount of any advance shall be deducted prior to the end of the fiscal year.

74.9(4) Subcontracts. Contract agencies may subcontract a portion of the project activity to another entity provided such subcontract is approved by the department. Subcontract agencies must follow the same rules, procedures, and policies as required of the contract agency by these rules and contract with the department. The contract agency is responsible for ensuring the compliance of the subcontract agency. Subcontract agencies may not subcontract these project activities with other entities.

641—74.10(135) Audits. Every two years, each contract agency shall undergo financial audit of the family planning program. The audit shall be conducted in compliance with OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Each audit shall cover all unaudited periods through the end of the previous grant year. The department’s audit guide should be followed to ensure an audit which meets federal and state requirements.

641—74.11(135) Denial, suspension, revocation, or reduction of contracts with contract agencies. The department may deny, suspend, revoke, or reduce contracts with contract agencies in accord with applicable federal regulations or contractual relationships. Notice of such action shall be in writing.

641—74.12(135) Right to appeal—contract agency. Contract agencies may appeal denial of a contract or the suspension, revocation or reduction of an existing contract.

74.12(1) Appeal. The appeal shall be made in writing to the department within ten days of receipt of notification of the adverse action. Notice is to be addressed to the Director, Division of Community Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

74.12(2) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the DIA pursuant to the rules adopted by the DIA regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the DIA.

74.12(3) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as

possible. The hearing shall be conducted according to the procedural rules of the DIA found in 481—Chapter 10, Iowa Administrative Code.

74.12(4) *Decision of administrative law judge.* The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 76.17(5).

74.12(5) *Appeal to the director.* Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

74.12(6) *Record of hearing.* Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

74.12(7) *Decision of director.* An appeal to the director shall be based on the record made at the hearing. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

74.12(8) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A. Petition for judicial review must be filed within 30 days after decision becomes final.

These rules are intended to implement Iowa Code section 135.11.

CHAPTER 75
FAMILY PLANNING SERVICES FUNDING PRIORITIZATION, RESTRICTIONS AND
REPORTING

641—75.1(88GA,ch85) Program explanation. The Iowa department of public health is a designated agency to operate the family planning program pursuant to an agreement with the federal government. Congress authorized grants to assist in the establishment and operation of family planning projects which offer a broad range of acceptable and effective family planning methods, including natural family planning, infertility services and services to adolescents. The majority of the funding available is from the Title X, family planning services grant, administered by the United States Department of Health and Human Services (DHHS).

The purpose of the program is to promote the health of persons of reproductive age and families by providing access to family planning and reproductive health promotion services.

The department, bureau of family health, will annually apply to the DHHS for grant funding under Title X of the federal Public Health Services Act, 42 U.S.C. §300 et seq. The department, bureau of family health, enters into contracts according to these rules with selected private and public agencies within the department family planning service area for the provision of family planning services. A description of the department family planning service area can be obtained from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

[ARC 4829C, IAB 12/18/19, effective 1/22/20]

641—75.2(88GA,ch85) Definitions.

“Department” means the Iowa department of public health.

“Nonprofit health care delivery system” means an Iowa nonprofit corporation that controls, directly or indirectly, a regional health care network consisting of hospital facilities and various ambulatory and clinic locations that provide a range of primary, secondary, and tertiary inpatient, outpatient, and physician services.

[ARC 4829C, IAB 12/18/19, effective 1/22/20]

641—75.3(88GA,ch85) Distribution of grant funds. Distribution of grant funds utilizing the following prioritization shall be made in a manner that continues access to family planning services.

75.3(1) Priority. The department shall distribute all grant funds received to applicants in the following order of priority:

- a. Public entities that provide family planning services including state, county, or local community health clinics; federally qualified health centers; and community action organizations.
- b. Nonpublic entities that, in addition to family planning services, provide required primary health services as described in 42 U.S.C. §254b(b)(1)(A).
- c. Nonpublic entities that provide family planning services but do not provide required primary health services as described in 42 U.S.C. §254b(b)(1)(A).

75.3(2) Funds restrictions—abortion.

a. Funds shall not be distributed to any entity that performs abortions, promotes abortions, maintains or operates a facility where abortions are performed or promoted, contracts or subcontracts with an entity that performs or promotes abortions, becomes or continues to be an affiliate of any entity that performs or promotes abortions, or regularly makes referrals to an entity that performs or promotes abortions or maintains or operates a facility where abortions are performed.

b. This prohibition shall not be interpreted to include a nonpublic entity that is a distinct location of a nonprofit health care delivery system, if the distinct location provides family planning services but does not perform abortions or maintain or operate as a facility where abortions are performed.

c. For the purposes of these rules, “abortion” does not include any of the following:

(1) The treatment of a woman for a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death.

(2) The treatment of a woman for a spontaneous abortion, commonly known as miscarriage, when not all of the products of human conception are expelled.

75.3(3) *Distinct provider identification number and attestation.*

a. Each distinct location of a nonprofit health care delivery system receiving funds from the department under these rules shall be assigned a unique identification number by the department.

b. Each distinct location of a nonprofit health care delivery system receiving funds from the department under these rules shall provide to the department, on forms provided by the department, a signed attestation that abortions are not performed at the distinct location.

[ARC 4829C, IAB 12/18/19, effective 1/22/20]

641—75.4(88GA,ch85) Indirect funds restrictions—abortion. Grant funds shall not be used for direct or indirect costs, including but not limited to administrative costs or expenses, overhead, employee salaries, rent, and telephone or other utility costs, related to performing or promoting abortions as specified in these rules.

[ARC 4829C, IAB 12/18/19, effective 1/22/20]

641—75.5(88GA,ch85) Report requirement.

75.5(1) The department shall submit a report, by calendar year, to the governor and the general assembly annually by January 1.

75.5(2) The report shall include:

a. A list of each entity that received funds under 75.3(1)“c” and the amount and type of funds received.

b. A detailed explanation of how the department determined that the distribution of funds to each entity under 75.3(1)“c,” instead of an entity under 75.3(1)“a” or “b,” was necessary to prevent severe limitations or elimination of access to family planning services in the region of the state where the entity was located.

[ARC 4829C, IAB 12/18/19, effective 1/22/20]

These rules are intended to implement 2019 Iowa Acts, chapter 85, section 98.

[Filed ARC 4829C (Notice ARC 4672C, IAB 9/25/19), IAB 12/18/19, effective 1/22/20]

CHAPTER 76
MATERNAL AND CHILD HEALTH PROGRAM

641—76.1(135) Program overview. The maternal and child health (MCH) programs are operated by the Iowa department of public health as the designated state agency pursuant to an agreement with the federal government. The majority of the funding available is from the Title V MCH block grant, administered by the Health Resources and Services Administration (HRSA) within the United States Department of Health and Human Services (DHHS).

76.1(1) Purpose. The purpose of the program is to promote the health of mothers, children, and youth by ensuring or providing access to quality maternal and child health care services (especially for low-income families or families with limited availability of health care services); to reduce infant mortality and the incidence of preventable diseases and handicapping conditions; to increase the number of children appropriately immunized against disease; and to facilitate the development of community-based systems of health care for children, youth and their families. The program provides and promotes family-centered, community-based coordinated care, including care/service coordination for children and youth with special health care needs.

76.1(2) Services.

a. The department's bureau of family health (BFH) enters into contracts with selected private nonprofit or public agencies for the assurance of access to prenatal and postpartum care for women, preventive and primary child health care services, and services to children and youth with special health care needs.

b. The department's bureau of oral and health delivery systems (OHDS) collaborates with BFH to develop oral health programs to reduce barriers to oral health care and reduce dental disease through prevention.

c. The children and youth with special health care needs program is administered by the Child Health Specialty Clinics (CHSC) at the University of Iowa. The department contracts with the University of Iowa department of pediatrics' CHSC to provide services for children and youth with special health care needs. In accordance with the MCH Title V Block Grant Program administered by DHHS, HRSA, and MCHB, the CHSC shall ensure that public health funds will be used to cover the cost of services only after all other sources of reimbursement have been exhausted.

76.1(3) MCH advisory council. The MCH advisory council assists in developing the state plan for MCH, assessing need, prioritizing services, establishing objectives, and encouraging public support for MCH and family planning programs. In addition, the council advises the director regarding health and nutrition services for women and children, supports the development of special projects and conferences and advocates for health and nutrition services for women and children.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.2(135) Adoption by reference. Federal requirements contained in the Omnibus Reconciliation Act of 1989 (Public Law 101-239), Title V MCH block grant shall be the rules governing the Iowa MCH program and are incorporated by reference herein. Copies of the federal legislation adopted by reference are available from Chief, Bureau of Family Health, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.3(135) Rule coverage. These rules cover agencies contracting with the department to provide community-based MCH public health care services and to receive funds from the department for that purpose. The contract agencies conduct essential public health care services directed toward MCH populations consistent with the state's Title V MCH block grant state plan. The state plan is developed and administered collaboratively by BFH and OHDS of the department and CHSC.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.4(135) Definitions.

“Applicant” means a private nonprofit or public agency that seeks a contract with the department to provide MCH services.

“BFH” means the bureau of family health.

“Care/service coordination” or *“care coordination”* means a comprehensive, family-centered approach that proactively engages and links clients and families to needed health care services, including medical, dental, emotional, behavioral, and health education services. Care coordination encompasses a specific set of activities that promote a client’s potential for optimal health and facilitate quality outcomes. By working with the client, family, and other involved disciplines, a care coordinator can promote seamless access and a holistic approach to service provision. Care coordination incorporates the following:

1. Meaningful assessment of needs and concerns.
2. Shared development of care plans.
3. Mobilization of agency and community resources.
4. Continued monitoring and follow-up.
5. Clear and transparent communication.
6. Complete documentation.

“Chairperson” means the chairperson of the MCH advisory council, who has been elected by the majority of the council’s members.

“Children and youth with special health care needs” or *“CYSHCN”* means children and youth with chronic physical, developmental, behavioral, or emotional conditions that require health and related services of a type or amount beyond that required by children and youth generally.

“CHSC” means Child Health Specialty Clinics, a statewide program for children and youth with special health care needs authorized under Title V of the Social Security Act.

“Client” means an individual who receives MCH services through a contract agency.

“CMS” means the DHHS Centers for Medicare and Medicaid Services.

“Contract agency” means a private nonprofit or public agency that has a contract with the department to provide MCH services and receives funds from the department for that purpose.

“Core public health functions” means the functions of community health assessment, policy development, and assurance.

1. Assessment: regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets in a community.
2. Policy development: development, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values and is in accordance with state public health policy.
3. Assurance: ensuring, by encouragement, regulation, or direct action, that programs and interventions that maintain and improve health are carried out.

“Council” or *“MCH advisory council”* means the maternal and child health advisory council.

“Dental home” means a network of individualized care based on risk assessment, which includes oral health education, dental screenings, preventive services, diagnostic services, treatment services, and emergency services.

“Department” means the Iowa department of public health.

“DHHS” means the United States Department of Health and Human Services.

“DIA” means the Iowa department of inspections and appeals.

“Direct health services” means those services generally delivered one-on-one between a health professional and a client in an office or clinic.

“Director” means the director of the Iowa department of public health.

“Enabling services” means services that are designed to help families gain access to health care. Enabling services include but are not limited to outreach, informing/reinforming, and care coordination services to link women, children, and families to needed health care services.

“EPSDT” means the Early and Periodic Screening, Diagnosis, and Treatment program which provides for regular preventive health care services for children aged 0 to 21 as authorized by Title XIX of the Social Security Act.

“Essential public health services” means those activities carried out by public health entities and their contractors that fulfill the core public health functions in the promotion of maternal and child health.

“Family,” for the purpose of establishing eligibility, means a group of two or more persons related by birth, marriage or adoption or residing together and functioning as one socioeconomic unit. For the purpose of these rules, a pregnant woman is considered as two individuals when calculating the number of individuals in the family. If a pregnant woman is expecting multiple births, the family size is thereby increased by the number expected in the multiple birth.

“Family planning” means the promotion of reproductive and family health by the prevention of and planning for pregnancy, and reproductive health education.

“Gap filling” means direct health care services supported by Title V staff or resources that are not otherwise accessible in the community.

“HAWK-I” means healthy and well kids in Iowa and is the child health insurance program in Iowa as authorized in Title XXI of the Social Security Act.

“Health care services” means services provided through MCH contract agencies.

“Health professional” means an individual who possesses specialized knowledge in a health or social science field or is licensed to provide health care.

“HRSA” means the Health Resources and Services Administration with the United States Department of Health and Human Services.

“Infrastructure building” means activities that support developing and maintaining comprehensive health care service systems. These activities include but are not limited to needs assessment, data collection, strategic planning, working with community partners, developing protocols, quality assurance, and training.

“I-Smile™ program” means the department program implemented through public and private nonprofit agencies and private health care providers to increase access to dental care for children and to ensure a dental home.

“Maternal and child health services” means services provided through local contract agencies to meet the needs of the client. The types of services provided include infrastructure building, population-based services, enabling services, and direct health care services.

“Medicaid” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from the DHHS.

“Medical home” means a team approach to providing health care that originates in a primary care setting; fosters a partnership among the client, the personal provider, and other health care professionals, and where appropriate, the client’s family; utilizes the partnership to access all medical and nonmedical health-related services needed by the client and the client’s family to achieve maximum health potential; maintains a centralized, comprehensive record of all health-related services to promote continuity of care; and has all of the characteristics specified in Iowa Code section 135.158.

“MIECHV” means the Maternal, Infant and Early Childhood Home Visiting program.

“OHDS” means the bureau of oral and health delivery systems.

“OMB” means the United States Department of the Treasury, Office of Management and Budget.

“Performance measures” means National Performance Measures (NPM) and State Performance Measures (SPM) required through the HRSA, Maternal and Child Health Bureau (MCHB), Title V MCH Block Grant.

“Physician” means a person currently licensed to practice under Iowa Code chapter 148.

“Population-based services” means services that include preventive personal health care services for groups of individuals (rather than one-on-one). Payer status of the individuals is not assessed, and services are not billed. Population-based services may be provided to an entire community, county, or region. Examples include but are not limited to mass immunizations, classroom oral health education, and the use of media for health promotion and education.

“Prenatal and postpartum care” means those types of services as recognized by the American College of Obstetricians and Gynecologists.

“Presumptive eligibility determination” means temporary Medicaid eligibility that pays for medical services while a formal Medicaid decision is being made by the Iowa department of human services. Presumptive eligibility is available for children, youth, and pregnant women.

“Program income” means gross income earned by the MCH contract agency resulting from activities related to fulfilling the terms of the contract. “Program income” includes but is not limited to such income as fees for services, third-party reimbursements, and proceeds from sales of tangible, personal or real property.

“Title V” means Title V of the Social Security Act and the federal requirements contained in the Omnibus Reconciliation Act of 1989 (Public Law 101-239) which address the MCH and CYSHCN programs.

“Title X” means the program authorized in the federal regulations found in 42 CFR Subpart A, Part 59, published in the Federal Register on June 3, 1980, and the Program Guidelines for Project Grants for Family Planning Services.

“Title XIX” means the Medicaid program authorized in the Social Security Act and funded through the Iowa department of human services from the DHHS.

“Title XXI” means the child health insurance program authorized in the Social Security Act and implemented in Iowa as the HAWK-I program as administered by the Iowa department of human services.

“WIC” means the Special Supplemental Nutrition Program for Women, Infants and Children, funded through the department from the United States Department of Agriculture.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.5(135) MCH services. Maternal and child health services provided by contract agencies, as outlined in the annual application and contract for services, shall align with the MCH pyramid or model provided by the DHHS, HRSA, state policy manuals, and interagency agreements.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.6(135) Client eligibility criteria. The certification process to determine eligibility for direct health care under the program shall include the following requirements:

76.6(1) Age.

- a. Maternal health program—no age restrictions.
- b. Child health program—birth through 21 years of age.
- c. CYSHCN program—birth through 21 years of age.

76.6(2) Income.

a. Income guidelines will be the same as those established for the state’s Title XXI program. Guidelines are published annually by DHHS. Department income guidelines will be adjusted following any change in DHHS guidelines.

b. Income information will be provided by the individual.

c. Proof of Title XIX, Title XXI (HAWK-I), or WIC eligibility will automatically serve in lieu of an application.

d. All income of family members as defined by DHHS poverty guidelines will be used in calculating the individual’s gross income for purposes of determining initial and continued eligibility.

e. Income will be calculated as follows:

(1) Annual income will be estimated based on the individual’s income for the past three months unless the individual’s income will be changing or has changed, or

(2) In the case of self-employed families the past year’s income tax return (adjusted gross income) will be used in estimating annual income unless a change has occurred.

(3) Terminated income will not be considered.

f. Individuals will be screened for eligibility for Title XIX, Title XXI (HAWK-I), and WIC. If an individual’s income falls within the eligibility guidelines for Title XIX, Title XXI (HAWK-I), or WIC, the individual may be referred to the Iowa department of human services or other enrollment source to apply for coverage. Children, youth and pregnant women shall be considered for Title XIX presumptive eligibility.

g. An individual whose income is above the poverty level established by Title XXI and below 302 percent of the federal poverty guidelines will qualify for services on a sliding fee scale, as determined by the local agency's cost for the service. The department provides annual guidelines based on poverty levels established annually by DHHS. An individual whose income is at or above 302 percent will qualify for services at full fee.

h. Eligibility determinations must be performed at least once annually. Should the individual's circumstances change in a manner which affects third-party coverage or Title XIX/Title XXI eligibility, eligibility determinations shall be completed more frequently.

76.6(3) *Residency.* Individuals must be currently residing in Iowa.

76.6(4) *Pregnancy.* An individual applying for the prenatal program shall have verification of pregnancy by an independent health provider, the maternal health contract agency, a family planning (Title X) agency, or a positive home pregnancy test.

76.6(5) *Children and youth with special health care needs.* An individual applying for CHSC services shall be determined to have a special health care need as defined by the federal MCHB. Care/service coordination, family support or other non-clinic services are provided at no charge to the family. Clinic services are provided without charge to families with adjusted gross incomes below 185 percent of the federal poverty guidelines. Families above this threshold are responsible for payment according to a sliding fee scale based on tax exemptions, adjusted gross income, and extenuating circumstances.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.7(135) Client application procedures for MCH services.

76.7(1) A person or the parent or guardian of a minor desiring direct health services other than those provided to children and youth with special health care needs may apply to a contract agency using a Health Services Application, Form 470-2927 or 470-2927(S). Individuals requesting presumptive eligibility must complete the Application for Health Coverage and Help Paying Costs, Form 470-5192, or the alternate form authorized by the HAWK-I board.

76.7(2) The contract agency shall verify the following information to receive services under the Title V MCH program:

- a. The information requested on the application form under "Household Information."
- b. Income information for all family members or proof of eligibility for Title XIX (Medicaid), Title XXI (HAWK-I), or WIC.
- c. Information about health insurance coverage.
- d. The signature of the individual or responsible adult, dated and witnessed.

76.7(3) If an individual has completed a Health Services Application, Form 470-2927, within the last year and the form accurately documents the current financial and family status, the MCH contract agency shall accept a copy of that application and determine eligibility without requiring completion of any other application form.

76.7(4) If an individual indicates on the Health Services Application, Form 470-2927, that the individual also wishes to apply for WIC or Medicaid or HAWK-I, the contract agency shall forward the appropriate copy to the indicated agency within two working days.

76.7(5) The contract agency shall determine the eligibility of the family and the percent of the cost of care that is the family's responsibility. The individual shall be informed in writing of eligibility status prior to incurring costs for care.

76.7(6) Once an individual has been determined to be eligible, the individual shall report any changes in income, family composition, or residency to the contract agency within 30 days from the date the change occurred.

76.7(7) A family seeking direct health care or care/service coordination services, or family support for a child or youth with special health care needs shall follow CHSC policies and procedures. Insurance status and eligibility for the sliding fee scale are determined during the client registration process.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.8(135) Right to appeal—client.

76.8(1) *Right of appeal.* Individuals applying for MCH services and clients receiving MCH services shall have the right to appeal whenever a decision or action of the department or contract agency results in the denial of participation, suspension, or termination from the approved MCH program. Notification of the denial of participation, suspension or termination shall be made in writing and shall state the basis for the action. All hearings shall be conducted in accordance with these rules.

76.8(2) *Notification of appeal rights and right to hearing.* Individuals applying for MCH services shall be notified of the right to appeal and the procedures for requesting a hearing at the time of application for MCH services. Information about the appeal and hearing process shall be provided in writing and shall be immediately available at MCH centers. A health professional shall be available to explain the method by which an appeal or hearing is requested and the manner in which the appeal and hearing will be conducted.

76.8(3) *Request for hearing.* A request for a hearing is a written expression by an individual or the individual's parent, guardian, or other representative that an opportunity to present the individual's case is desired. The request shall be filed with the contract agency within 60 days from the date the individual receives notice of the decision or action which is the subject of appeal.

76.8(4) *Receipt of benefits during appeal.* Individual applicants, who are denied program benefits due to a finding of ineligibility, shall not receive benefits during the administrative appeal period. Clients who are involuntarily suspended or terminated from the MCH program shall continue to receive program benefits during the administrative appeal period.

76.8(5) *Hearing officer.* The hearing officer shall be impartial, shall not have been directly involved in the initial determination of the action being contested, and shall not have a personal stake in the decision. Hearing officers may be contract agency directors, health professionals, community leaders, or any impartial citizen. If prior to the hearing the appealing party objects to a contract agency director serving as the hearing officer in a case involving the director's own agency, another hearing officer shall be selected and, if necessary, the hearing shall be rescheduled as expeditiously as possible. Contract agencies may seek the assistance of the Chief, Bureau of Family Health, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075, in the appointment of a hearing officer.

76.8(6) *Notice of hearing.* The hearing officer shall schedule the time, place and date of the hearing as expeditiously as possible. Parties shall receive notice of the hearing at least ten days in advance of the scheduled hearing. The hearing shall be accessible to the party requesting the hearing. The hearing shall be scheduled within three weeks from the date the contract agency received the request for a hearing or as soon as possible thereafter, unless a later date is agreed upon by the parties.

76.8(7) *Conduct of hearing.* The party requesting the hearing or the party's representative shall have the opportunity to:

- a. Examine, prior to and during the hearing, the documents and records presented to support the decision under appeal;
- b. Be represented by an attorney or other person at the party's own expense;
- c. Bring witnesses;
- d. Question or refute any testimony or evidence, including an opportunity to confront and cross-examine adverse witnesses;
- e. Submit evidence to establish all pertinent facts and circumstances in the case; and
- f. Advance arguments without undue interference.

76.8(8) *Decision.* Decisions of the hearing officer shall be in writing and shall be based on evidence presented at the hearing. The decision shall summarize the facts of the case, specify the reasons for the decision, and identify the supporting evidence and pertinent regulations or policy. The decision shall be issued within 90 days of the receipt of the request for the hearing, unless a longer period is agreed upon by the parties.

76.8(9) *Appeal of decision to the department.* A party receiving an unfavorable decision may file an appeal with the department. Such appeals must be filed in writing within ten working days of the mailing date of the hearing decision. Appeals shall be sent to the Contract Administrator, Division of Administration and Professional Licensure, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075.

76.8(10) *Contested case.* Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the DIA pursuant to the rules adopted by the DIA regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information, which may be provided by the aggrieved party, shall also be provided to the DIA.

76.8(11) *Hearing.* Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the DIA found in 481—Chapter 10, Iowa Administrative Code.

76.8(12) *Decision of administrative law judge.* The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 76.8(13).

76.8(13) *Appeal to the director.* Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

76.8(14) *Record of hearing.* Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

76.8(15) *Decision of director.* An appeal to the director shall be based on the record of the hearing before the administrative law judge. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

76.8(16) *Exhausting administrative remedies.* It is not necessary to file an application for the rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

76.8(17) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the director by certified mail, return receipt requested, or by personal service. The address is Director, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

76.8(18) *Benefits after decision.* If a final decision is in favor of the person requesting a hearing and benefits were denied or discontinued, benefits shall begin immediately and continue pending further review should an appeal to district court be filed. If a final decision is in favor of the contract agency, benefits shall be terminated, if still being received, as soon as administratively possible after the issuance of the decision. Benefits denied during an administrative appeal period may not be awarded retroactively following a final decision in favor of a person applying for MCH services.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.9(135) Grant application procedures for community-based contract agencies. Private nonprofit or public agencies seeking to provide community-based Title V MCH public health services shall submit an application to the department during the competitive year to administer MCH services for a specified project period, as defined in the request for proposal, with an annual continuation application. The

contract period shall be from October 1 to September 30 annually. After a notice of award is made by the department, all materials submitted as part of the grant application are considered public records in accordance with Iowa Code chapter 22. Notification of the availability of funds and grant application procedures will be provided in accordance with the department rules found in 641—Chapter 176.

Contract agencies are selected on the basis of the grant applications submitted to the department. The department will consider only applications from private nonprofit or public agencies. In the event that competitive proposals receive an equal number of points, two department division directors and the respective bureau chief administering the program may conduct a second review utilizing the same scoring process.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.10(135) Funding levels for community-based contract agencies. The amount of Title V MCH funds available to each contract agency on an annual basis shall be determined by the department using a methodology based upon dollars available, number of clients enrolled, and selected needs criteria.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.11(135) Contract agency performance. Contract agencies are required to provide services in accordance with these rules.

76.11(1) Performance measures. Contract agencies must report on activities and progress toward meeting NPM, SPM, and other performance measures identified by the department.

76.11(2) Contract agency review. The department shall review contract agency operations through the use of reports and documents submitted, state-generated data reports, chart audits, on-site and clinic visits for direct care services as applicable for evaluation and technical assistance.

76.11(3) Exception. Rescinded IAB 10/3/12, effective 11/7/12.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.12(135) Reporting. Completion of grant applications, budgets, expenditure reports, annual progress reports, and data forms shall be performed by contract agencies in compliance with the contract with the department.

641—76.13(135) Fiscal management. All contract agencies are required to meet fiscal management policies.

76.13(1) Last pay. Title V MCH funds are considered last pay. Title XIX and other third-party payers are to be billed first if other resources cover the service.

76.13(2) Program income. Program income may be used for allowable costs of the MCH contract agency. A spending plan must be approved by the department for use of program income in excess of 5 percent above the amount approved in the program budget. Program income must be used before the funds received from the department are used. Excess program income may be retained to build a three-month operating capital.

76.13(3) Advances. A contract agency may request an advance of up to one-sixth of its contract at the beginning of a contract year. The amount of any advance will be deducted prior to the end of the fiscal year.

76.13(4) Local share. Community-based contract agencies are required to match the Title V MCH funds received from the department at a minimum rate of one dollar of local match for every four dollars received from the department. Sources that may be used for match are reimbursement for service from third parties such as insurance and Title XIX, client fees, local funds from nonfederal sources, or in-kind contributions. In-kind contributions must be documented in accordance with generally accepted accounting principles.

76.13(5) Subcontracts. Contract agencies may subcontract a portion of the project activity to another entity provided such subcontract is approved by the department. Subcontract agencies must follow the same rules, procedures, and policies as required of the contract agency by these rules and contract with the department. The contract agency is responsible for ensuring the compliance of the subcontract. Subcontract agencies may not subcontract these project activities with other entities.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.14(135) Audits. Every two years, each contract agency shall undergo financial audit of the MCH program. The audit shall be conducted in compliance with OMB Circular A-133 Audits of States, Local Governments, and Non-Profit Organizations. Each audit shall cover all unaudited periods through the end of the previous grant year. The department's audit guide should be followed to ensure an audit which meets federal and state requirements.

641—76.15(135) Diagnosis and therapeutic services for children. Rescinded IAB 2/6/02, effective 3/13/02.

641—76.16(135) Denial, suspension, revocation or reduction of contracts with contract agencies. The department may deny, suspend, revoke or reduce contracts with contract agencies in accord with applicable federal regulations or contractual relationships. Notice of such action shall be in writing.

641—76.17(135) Right to appeal—contract agency. Community-based contract agencies may appeal the denial of a contract or the suspension, revocation or reduction of an existing contract.

76.17(1) Appeal. The appeal shall be made in writing to the department within ten days of receipt of notification of the adverse action. Notice is to be addressed to the Contract Administrator, Division of Administration and Professional Licensure, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075.

76.17(2) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the DIA pursuant to the rules adopted by the DIA regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information, which may be provided by the aggrieved party, shall also be provided to the DIA.

76.17(3) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the DIA found in 481—Chapter 10.

76.17(4) Decision of administrative law judge. The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 76.17(5).

76.17(5) Appeal to the director. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

76.17(6) Record of hearing. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions and rules;
- b. All evidence received or considered and all other submissions by recording or transcript;
- c. A statement of all matters officially noticed;
- d. All questions and offers of proof, objections and rulings thereon;
- e. All proposed findings and exceptions; and
- f. The proposed decision and order of the administrative law judge.

76.17(7) Decision of director. An appeal to the director shall be based on the record made at the hearing. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

76.17(8) Exhausting administrative remedies. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all

administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A. Petition for judicial review must be filed within 30 days after decision becomes final.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.18 to 76.20 Reserved.

MATERNAL AND CHILD HEALTH ADVISORY COUNCIL

641—76.21(135) Purpose. The MCH advisory council assists in the development of the state plan for MCH, including children and youth with special health care needs and family planning. The council assists with assessment of need, prioritization of services, establishment of objectives, and encouragement of public support for MCH and family planning programs. In addition, the council advises the director regarding health and nutrition services for women and children, supports the development of special projects and conferences, and advocates for health and nutrition services for women and children.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.22(135) Mission. The mission of the MCH advisory council is to assist the department in improving coordination of and promoting an integrated health system serving children and families in Iowa. Areas of emphasis include Title V MCH and any other programs in the department that address the well-being of children and families.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.23(135) Membership. Membership of the MCH advisory council shall include representatives of professional groups, agency representatives, legislators, and individuals with an interest in promoting health services for women and children.

76.23(1) Appointments to the council shall be made by the director.

a. Each appointment shall be for a term of three years, commencing on July 1.

b. No member shall serve more than two full consecutive terms (this provision may be waived by the director in exceptional cases).

c. In order to ensure that one third of the council rotates each year, staggered terms shall be initiated in June. For terms expiring during the calendar year, appointments and reappointments shall be staggered, resulting in a council with approximately one third of the terms of membership expiring in each year.

d. The goal is to attempt to implement a gender-balanced council membership.

e. The number of members shall not be fewer than 15 or more than 25.

76.23(2) The council shall be composed of the following categories:

a. Required members.

(1) The chair (or designee) of the department's perinatal advisory committee.

(2) The chair (or designee) of the congenital and inherited disorders advisory committee.

(3) With approval of the director:

1. A representative chosen by the Iowa State Association of Counties.

2. A representative chosen by the Iowa Dental Association.

3. A representative chosen by the Iowa Dietetic Association.

4. A representative chosen by the American Academy of Family Physicians, Iowa chapter.

5. A representative chosen by the American Academy of Pediatrics, Iowa chapter.

6. A representative chosen by the American College of Obstetricians and Gynecologists, Iowa chapter.

7. A representative chosen by the state board of health.

(4) Three family representatives, appointed by the director, may represent parents with children and youth with special health care needs, parents with children participating in Medicaid or HAWK-I, or parents with children participating in child care or early childhood education.

b. Discretionary members. A maximum of 13 additional members from among the following may be appointed by the director:

(1) Adolescent health.

(2) Women's health.

- (3) Insurance (private sector).
- (4) Child care.
- (5) Legal services.
- (6) Child advocate.
- (7) Social service.
- (8) Infant mortality prevention.
- (9) University extension services.
- (10) Voluntary agency.
- (11) Children's mental health.
- (12) Youth.
- (13) Child health.
- (14) Adult mental health.
- (15) Substance abuse.
- (16) Domestic violence or sexual violence services, or both.
- (17) Juvenile justice.
- (18) Oral health.

c. Ex officio members. The following may serve as ex officio, nonvoting members of the council:

- (1) One state senator and one state representative.
- (2) A representative from a local maternal and child health contract agency.
- (3) A representative of the department of education, division of learning and results.
- (4) A representative of the department of human services, Iowa Medicaid enterprise.
- (5) A representative of the department of human services, division of adult, children and family services, bureau of child care and community services.
- (6) Director (or designee) of Child Health Specialty Clinics.
- (7) The chair (or designee) of the early childhood Iowa board.

76.23(3) Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term. The nominations committee will make recommendations to the director for appointments.

[ARC 0364C, IAB 10/3/12, effective 11/7/12; ARC 4075C, IAB 10/10/18, effective 11/14/18]

641—76.24(135) Officers.

76.24(1) Officers of the council shall be a chairperson and a vice chairperson who shall be elected by the members at the last scheduled meeting of each fiscal year.

- a. The term of elected office shall be one year.
- b. A member shall not serve as chairperson for more than three full consecutive years.
- c. Vacancies in the office of chairperson shall be filled by elevation of the vice chairperson.
- d. Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

76.24(2) Duties of officers.

- a. The chairperson shall:
 - (1) Preside at all meetings of the council,
 - (2) Represent the council at appropriate or designated meetings,
 - (3) Appoint such committees as deemed necessary, and
 - (4) Designate the chairperson of ad hoc committees.
- b. The vice chairperson shall:
 - (1) Perform the duties of the chairperson if the chairperson is absent or unable to act. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson.
 - (2) Perform such other duties as may be assigned by the chairperson.
 - (3) Represent the council at designated meetings at the request of the chairperson.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.25(135) Duties of the council. The council shall perform the following duties:

76.25(1) Review the state's maternal, child, and adolescent health needs and the adequacy of health care services, programs, and providers to meet those needs.

76.25(2) Review local health statistics and program data to assess improvement in the overall health status of women and children.

76.25(3) Represent the concerns of consumers and local service providers in their relationship with the department programs and initiatives and other state agency initiatives.

76.25(4) Provide input and feedback in the development of the MCH state plan, the I-Smile™ program, family planning grant application and programming objectives, MIECHV state plan, and the WIC state plan, including the assessment of need, the prioritization of services and the establishment of objectives.

76.25(5) Identify potential collaborative partners to help achieve the mission and goals of the MCH advisory council and the department.

76.25(6) Disseminate information and report back to representative consumer groups and local providers regarding department programs, initiatives, services, and state plans.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.26(135) Meetings.

76.26(1) Meetings of the council will be held as necessary and at the call of the director or the chairperson. There shall be a minimum of four meetings per year.

a. At the last scheduled meeting of the fiscal year, the regular meetings for the following year will be scheduled.

b. Notice of meetings will be sent at least two weeks prior to the meeting date.

c. Materials for the meeting will be sent at least one week prior to the meeting date.

76.26(2) All meetings are open to the public in accordance with the open meetings law, Iowa Code chapter 21.

76.26(3) A majority of the required and discretionary membership shall constitute a quorum.

76.26(4) At all meetings of the council, the act of the majority of the members present at the meeting shall be the act of the council.

76.26(5) Meeting attendance.

a. Attendance shall be expected at all meetings unless circumstances prohibit attendance.

b. Participation by telephone or other means is permissible so long as arrangements can be made by the department for such participation.

c. Three unexcused absences per fiscal year shall result in termination of membership as determined by the director or the director's designee.

76.26(6) The council shall maintain information sufficient to indicate the results of each vote. If necessary, members may be polled telephonically or electronically.

76.26(7) Subcommittees shall meet as necessary.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.27(135) Executive committee.

76.27(1) The executive committee shall be composed of the chairperson and vice chairperson, assisted by two members appointed by the chairperson at the beginning of the fiscal year.

76.27(2) The executive committee will meet as necessary to act on behalf of the full council to develop a recommendation when the council is not in session.

76.27(3) The executive committee may request staff support and assistance from department management.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

641—76.28(135) Committees. The council may designate one or more committees to perform such duties as may be deemed necessary.

76.28(1) The chairperson appoints the nominations committee, which will submit a slate of potential members and officers.

76.28(2) Additional committees or ad hoc committees may be formed as needed.

76.28(3) Committees should be utilized whenever possible to review particular substantive areas by previewing recommendations, framing issues for the larger group and presenting on issues that need to be addressed by the council.

[ARC 0364C, IAB 10/3/12, effective 11/7/12]

These rules are intended to implement Iowa Code subsection 135.11(17).

CHAPTER 77
LOCAL BOARDS OF HEALTH

[Prior to 7/29/87, Health Department[470] Ch 77]

641—77.1(137) Purpose. The local board of health shall have jurisdiction over public health matters within its designated geographic area in accordance with Iowa Code chapter 137. The local board of health shall promote and protect the health of the residents and shall carry out the powers of local boards as specified in Iowa Code sections 137.103 and 137.104 and all applicable Iowa Code chapters.
[ARC 9773B, IAB 10/5/11, effective 11/9/11]

641—77.2(137) Definitions. For the purpose of these rules, the following definitions apply:

“Core public health functions” means the functions of assessment, policy development, and assurance.

1. Assessment: Regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets in a community.

2. Policy development: Development, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values and in accordance with state public health policy.

3. Assurance: Ensuring by encouragement, regulation, or direct action that programs and interventions that maintain and improve health are carried out.

“County health department” refers to the personnel and property under the jurisdiction of a county board.

“Department” means the Iowa department of public health.

“District” means any two or more geographically contiguous counties.

“District board” means a board of health representing at least two geographically contiguous counties formed with the approval of the department in accordance with Iowa Code chapter 137, or any district board of health in existence prior to July 1, 2010.

“District health department” refers to the personnel and property under the jurisdiction of a district board.

“Environmental health services” means services focused on the environment to support population-based health services.

“Essential public health services” means those activities carried out by public health that fulfill the core functions.

“Local board of health” means a city, county, or district board of health.

“Personal health services” means services focused on the care of individuals.

“Population-based health services” means services focused on the health status of population groups and their environments.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.3(137) Local boards of health—roles and responsibilities. Public health is responsible for safeguarding the community’s health. This goal is pursued through three core functions: assessment, policy development and assurance.

77.3(1) Assessment: Regularly and systematically collect, assemble, analyze, and make available information on the health of the community, including statistics on health status, community health needs, personal health services, and epidemiologic and other studies of health problems. A local board of health may perform the following essential public health services:

- a. Monitor health status to identify community health problems;
- b. Diagnose and investigate health problems and health hazards in the community; and
- c. Evaluate effectiveness, accessibility, and quality of personal, population-based, and environmental health services.

77.3(2) Policy development: Exercise responsibility to serve the public interest in the development of comprehensive public health policies. This core function can be accomplished by promoting use of a scientific knowledge base in decision making about public health and by taking the lead in public health policy development.

- a. A local board of health may perform the following essential public health services:
 - (1) Develop policies and plans that support individual and community health efforts; and
 - (2) Research new insights and innovative solutions to health problems and health threats.
- b. A local board of health shall perform the following essential public health services:
 - (1) Enforce laws and regulations that protect public health and enforce lawful orders of the department;
 - (2) Make and enforce reasonable rules and regulations not inconsistent with the law or the rules of the state board as may be necessary for the protection and improvement of the public health; and
 - (3) Employ persons as necessary for the efficient discharge of the board's duties. Employment practices shall meet the requirements of Iowa Code chapter 8A, subchapter IV, or any civil service provision adopted under Iowa Code chapter 400.

77.3(3) Assurance: Assure constituents that services necessary to achieve agreed-upon goals are provided either by encouraging action by other entities (private or public sector), by requiring such action through regulation, or by providing services directly. Each local board of health must involve key policymakers and the general public in determining a set of high-priority personal and population-based health services. A local board of health may perform the following essential public health services:

- a. Link people to needed personal health services; provide such personal, population-based and environmental health services as deemed necessary for the promotion and protection of the health of the public; and charge reasonable fees for personal health services;
- b. Ensure the competence of the public health, environmental health, and personal health care workforce;
- c. Inform, educate, and empower people about health issues;
- d. Mobilize community partnerships to identify and solve health problems;
- e. Issue licenses and permits and charge reasonable fees in relation to the construction or operation of nonpublic water supplies or private sewage disposal systems;
- f. Engage in joint operations by:
 - (1) Contracting with colleges and universities, the department, other public, private, and nonprofit agencies, and individuals; or
 - (2) Forming a district health department to provide personal and population-based health services; and
- g. Enforce, by written agreement with the council of any city within its jurisdiction, appropriate ordinances of the city relating to public health.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.4(137) Organization of local boards of health.

77.4(1) Qualifications. Members of a local board of health should have experience or education related to the core public health functions, essential public health services, public health, environmental health services, personal health services, population-based services, or community-based initiatives.

77.4(2) Officers of local boards of health. Each local board of health shall, at its first meeting during any calendar year, elect one of its members to serve as chairperson until the first meeting of the following calendar year.

- a. The local board of health may elect a vice-chairperson, secretary, or other such officers as it may deem advisable.
- b. In case of a vacancy of the office of chairperson, a successor, who shall serve the remainder of the term, shall be elected at the next meeting of the board.

77.4(3) Meetings of local boards of health. The place, date and time of regular meetings of the local board of health shall be determined by vote of the board, and such meetings shall comply with the provisions of the open meetings law which is found in Iowa Code chapter 21.

- a. Each local board of health shall meet at least six times per year.
- b. Special meetings of a local board of health may be called, as needed, by the chairperson or by any three board members. The local board of health shall provide at least 24 hours' notice of special meetings, except in case of emergency.
- c. A majority of the members of a local board of health shall be considered a quorum, and an affirmative vote of the majority of the members present is necessary for action taken by a local board of

health. The majority shall not include any member who has a conflict of interest, and a statement by the member that a conflict of interest exists shall be conclusive for this purpose.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.5(137) Operation of local boards of health. Local boards of health shall submit to the department the following information:

77.5(1) Names, addresses, E-mail addresses and telephone numbers of members of the local board of health, within one month after their appointment.

77.5(2) Names of the chairperson and any other officers elected by the local board of health, within one month after their election.

77.5(3) A copy of the minutes of each regular and special meeting of the local board of health, within two weeks of their being approved. The minutes shall include at least:

- a. The date and place of the meeting;
- b. A list of members present; and
- c. A report of any official board actions.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.6(137) Expenses of local board of health members.

77.6(1) The following may be considered necessary expenses of local board of health members:

a. Travel in private car on local board of health business at the same rate as provided for a public officer or employee in Iowa Code section 70A.9.

b. Lodging and meal expenses including sales tax on lodging and meals.

c. Expense of public transportation when traveling on local board of health business.

d. Miscellaneous expenses related to performance of duties as approved by the local board of health.

e. Training and education expenses.

77.6(2) This rule shall not be construed as requiring the payment of reimbursement to any person or as prohibiting local boards of health from imposing additional restrictions or administrative requirements on expenses of their members.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.7(137) Dissolution of city boards. A city board of health may voluntarily dissolve by submitting notice to the department. The notice shall set an effective date for the action.

[ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.8(137) Request to form district board of health. The county boards of health of any two or more geographically contiguous counties may at any time submit to the department a written request to form a district board of health.

77.8(1) A request to form a district board of health shall be executed by the county board of supervisors and the county board of health for each county comprising the proposed district.

77.8(2) A request to form a district board of health shall be submitted to the department and shall be completed on the department's application form. The application form shall include:

a. A written narrative that explains how the formation of a district board of health will attain the capability to provide population-based and personal health services.

b. The composition of the district board of health, including the number of members each county shall appoint pursuant to Iowa Code section 137.105 and the total number of members on the district board of health.

c. Proof of approval by all county boards of supervisors and county boards of health involved in the request to form a district and of the elements included in the formation plan.

d. A service delivery plan. The service delivery plan shall detail how population-based and environmental health services will be delivered throughout the district.

e. The budget and fiscal plan for the proposed district health department. The budget plan shall include an estimate of the proposed expenditures and revenues and an allocation of the revenue responsibilities of each of the counties participating in the proposed district.

f. A table of organization.

g. A personnel system description, including identification of the district health department treasurer and district health department auditor and a section which addresses the employment issues contained in Iowa Code section 137.110.

h. The location of the district health department offices and workforce throughout the jurisdiction. The request shall include a map showing district boundaries.

i. An inventory of the property and equipment in the custody of each county health department and a description as to whether such property and equipment shall remain in the custody of the county health department or shall be transferred to the district health department to become property of the district health department. Property and equipment include any item which costs more than \$5,000.

j. An information technology (IT) plan.

k. A proposed date upon which the district board of health shall be formed and established and a timeline for the adoption of district board of health rules and regulations.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.9(137) Review, approval or denial of district board of health formation.

77.9(1) Upon receipt of the application form and all information contained in rule 641—77.8(137), the department shall review such information and shall determine, within 30 days, whether the required elements have been presented by the proposed district.

77.9(2) The department shall present its findings to the state board of health at the board's next regularly scheduled meeting, at which time the state board of health may approve formation of the district board of health.

77.9(3) The state board of health shall immediately provide notice of approval of district board of health formation, including effective dates, to the county board of health of each county in the district and to the board of supervisors of each county in the district.

77.9(4) Upon receipt of the notice of approval of district board of health formation, each appointing authority shall, prior to the effective date of district board of health formation, appoint district board of health members as specified in Iowa Code section 137.105.

77.9(5) The state board of health has the authority to deny formation of a district board of health if the application fails to conform with Iowa Code chapter 137 as amended by 2016 Iowa Acts, Senate File 2159, or this chapter.

77.9(6) The department will notify, in writing, all local boards of health in the proposed district of the reason and rationale for the denial of the district board of health formation within 30 days of the decision.

77.9(7) The local boards of health in the proposed district shall have the right to request reconsideration of the decision by submitting the request to the department within 30 days of receiving notice of the decision.

77.9(8) The state board of health shall reconsider the request by the local boards of health at its next regularly scheduled meeting. The reconsideration shall not constitute a contested case hearing. The state board of health's final decision following reconsideration shall constitute final agency action pursuant to Iowa Code section 17A.19, and judicial review of any such decision shall be treated as other agency action.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.10(137) Adding to a district board of health. A county may be added to an existing district board of health by submission and approval of a request, as specified in Iowa Code sections 137.106 and 137.107.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

641—77.11(137) Withdrawal from a district board of health. A county may voluntarily withdraw from a district board of health by submitting a request for withdrawal to the department for approval. The request shall include a time line and plan to reestablish a county board of health or to join a different district board of health to provide the core public health functions and essential public health services to the county's geographic area.

77.11(1) If the request for withdrawal of the applicant county from the district board of health is approved by the state board of health, an effective date shall be set for the action, and notification shall be sent to the district board of health and the board of supervisors of the applicant county.

77.11(2) The ownership of property and equipment shall follow the guidelines submitted in the original request to form the district board of health.

77.11(3) The remaining counties in the district shall submit an application including the information specified in rule 641—77.8(137) to the department for review as provided in Iowa Code section 137.107.

[ARC 9773B, IAB 10/5/11, effective 11/9/11; ARC 2840C, IAB 12/7/16, effective 1/11/17]

These rules are intended to implement Iowa Code chapter 137.

CHAPTER 78
PERSONAL RESPONSIBILITY EDUCATION PROGRAM AND TITLE V STATE SEXUAL RISK
AVOIDANCE EDUCATION GRANT PROGRAM FUNDING AND RESTRICTIONS

641—78.1(88GA,HF766) Purpose. The purpose of this chapter is to set forth guidelines and limitations for the use of funds from the Personal Responsibility Education Program (PREP) and the Title V State Sexual Risk Avoidance Education Grant Program (SRAE).

[ARC 6269C, IAB 4/6/22, effective 5/11/22]

641—78.2(88GA,HF766) Definitions.

“Administer” means to implement PREP or SRAE through contracts entered into by the department and selected private, governmental, and nonprofit organizations to provide programming directly to youth participants. “Administer” does not mean the evaluation of PREP or SRAE or the management of federal performance measures data collection for PREP or SRAE programming. “Administer” also does not mean providing training and technical assistance.

“Affiliate” means a business, corporate, or financial relationship in which an entity is controlled by or under common control with an entity that performs or promotes abortions.

“Department” means the Iowa department of public health.

“Nonprofit health care delivery system” means an Iowa nonprofit corporation that controls, directly or indirectly, a regional health care network consisting of hospital facilities and various ambulatory and clinic locations that provide a range of primary, secondary, and tertiary inpatient, outpatient, and physician services.

“PREP” means the Personal Responsibility Education Program as specified in 42 U.S.C. Section 713.

“Regularly” means recurring, routine, and conducted in conformity with established or prescribed rules or policy.

“SRAE” means the Sexual Risk Avoidance Education Grant Program authorized pursuant to Section 510 of Title V of the federal Social Security Act, 42 U.S.C. Section 710 as amended by Section 50502 of the federal Bipartisan Budget Act of 2018, Public Law 115-123, and as further amended by Division S, Title VII, Section 701 of the federal Consolidated Appropriations Act of 2018, Public Law 115-141.

[ARC 6269C, IAB 4/6/22, effective 5/11/22]

641—78.3(88GA,HF766) Distribution of grant funds. Distribution of grant funds shall be made in a manner that continues access to PREP and SRAE programming.

78.3(1) Priority. The department shall distribute all grant funds received to eligible private, governmental, and nonprofit organizations or agencies that are able to deliver services to a county or counties as defined and prioritized by the department.

78.3(2) Funds restrictions—abortion.

a. Any contract entered into on or after July 1, 2019, by the department to administer PREP or SRAE shall exclude as an eligible applicant any applicant entity that performs abortions, promotes abortions, maintains or operates a facility where abortions are performed or promoted, contracts or subcontracts with an entity that performs or promotes abortions, becomes or continues to be an affiliate of any entity that performs or promotes abortions, or regularly makes referrals to an entity that provides or promotes abortions or maintains or operates a facility where abortions are performed.

b. This prohibition shall not be interpreted to include a nonpublic entity that is a distinct location of a nonprofit health care delivery system, if the distinct location provides programming through PREP or SRAE but does not perform abortions or maintain or operate a facility where abortions are performed.

c. For the purposes of these rules, “abortion” does not include any of the following:

(1) The treatment of a woman for a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death.

(2) The treatment of a woman for a spontaneous abortion, commonly known as a miscarriage, when not all of the products of human conception are expelled.

78.3(3) Distinct provider identification number and attestation.

a. Each distinct location of a nonprofit health care delivery system receiving funds from the department under these rules shall be assigned a unique identification number by the department.

b. Each distinct location of a nonprofit health care delivery system receiving funds from the department under these rules to administer PREP or SRAE shall provide to the department, on forms provided by the department, a signed attestation that abortions are not performed at the distinct location. The attestation will be completed annually during the application process.

[ARC 6269C, IAB 4/6/22, effective 5/11/22]

These rules are intended to implement 2019 Iowa Acts, House File 766, section 99.

[Filed ARC 6269C (Notice ARC 6160C, IAB 1/26/22), IAB 4/6/22, effective 5/11/22]

CHAPTER 79
PUBLIC HEALTH NURSING
[Prior to 7/29/87, Health Department[470] Ch 79]
Rescinded IAB 4/11/07, effective 7/1/07; see 641—Ch 80

CHAPTER 80
LOCAL PUBLIC HEALTH SERVICES

[Prior to 8/3/94, "Homemaker-Home Health Aide Services"]

[Prior to 4/11/07, see also 641—Ch 79]

641—80.1(135) Purpose. The purpose of the local public health services (LPHS) contract is to assure core public health functions are met, to assure essential public health services are delivered, and to increase the capacity of local boards of health to meet the unique needs of the population while promoting healthy people in healthy communities throughout their life spans.

[ARC 6270C, IAB 4/6/22, effective 7/1/22]

641—80.2(135) Definitions. For the purposes of these rules, the following definitions apply:

"Allocation" means the process to distribute funds.

"Appropriation" means the funding amount approved in the state budget.

"Community" means the aggregate of persons with common characteristics such as race, ethnicity, age, occupation, or other similarities such as location.

"Contractor" means a local board of health (LBOH).

"Core public health functions" means the functions of assessment, policy development, and assurance:

1. Assessment means regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets in a community.

2. Policy development means formulation, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values in accordance with state public health policy.

3. Assurance means that programs and interventions, which maintain and improve health, are carried out by encouragement, regulation, or direct action.

"Department" means the Iowa department of public health.

"Elderly" means an individual aged 60 years and older.

"Essential public health services" means a framework for public health to promote and protect the health of all people in all communities.

"Formula" means the mathematical calculation applied to the state appropriation and granted to each local board of health pursuant to Iowa Code section 135.11(13) to determine the amount of available funds to be distributed to each county.

"Local board of health" or *"LBOH"* means a county or district board of health as defined in Iowa Code chapter 137.

"Low income" means the U.S. Census Bureau's small area income and poverty estimates (SAIPE) used to determine low income.

"LPHS" means local public health services.

"Public health intervention" means an organized effort to promote behaviors and habits that can improve physical, mental, and emotional health for specific groups of people.

"Work plan" means the plan established by the contractor to identify the details for implementing core functions and essential public health services.

[ARC 6270C, IAB 4/6/22, effective 7/1/22]

641—80.3(135) Contractor assurances.

80.3(1) The contractor may directly provide or subcontract all or part of the delivery of essential public health services and public health interventions.

80.3(2) The contractor shall make certain the following:

a. A work plan is submitted annually through an application process that identifies the intended public health interventions and essential public health services for the designated fiscal year;

b. Staff are available to meet the core public health functions, deliver essential public health services, and implement the public health interventions outlined in the work plan;

c. As applicable, contractors will assure that policies and procedures are available for public health interventions and essential public health services identified in the work plan;

d. Fiscal accountability of funds is monitored;

- e. Contract-required documentation, including performance metrics, is submitted by the established deadline;
- f. A local appeal process is available for public health interventions identified in the work plan; and
- g. All applicable local, state, and federal requirements are met.

[ARC 6270C, IAB 4/6/22, effective 7/1/22]

641—80.4(135) Utilization of LPHS contract funding. The contractor may bill the department for staff time, salaries and benefits, and other necessary costs to implement the approved work plan.

80.4(1) Planning process. Annually, the contractor shall conduct a planning process to identify the utilization of LPHS contract funding that considers the unique and changing needs of the communities served.

80.4(2) Reallocation. The department will annually determine the potential for unused funds from contracts. Reallocation of the funds shall be at the discretion of the department.

[ARC 6270C, IAB 4/6/22, effective 7/1/22]

641—80.5(135) LPHS funds.

80.5(1) Allocation for LPHS funds. Allocation for LPHS funds to each contractor is determined by the following formula:

- a. Eighteen percent of the total LPHS funds shall be divided so that an equal amount is available for use in each county in the state.
- b. Eight percent of the total LPHS funds shall be allocated to each county according to the county's population based upon the published data of the U.S. Census Bureau, which is the most recent data available three months prior to the release of the LPHS application.
- c. Forty-four percent of the total LPHS funds shall be allocated according to the proportion of state residents who are elderly persons living in a county based upon the bridged-race population estimates produced by the U.S. Census Bureau in collaboration with the National Center for Health Statistics (NCHS).
- d. Thirty percent of the total LPHS funds shall be allocated according to the proportion of state residents who are low-income persons living in a county based upon the U.S. Census Bureau's small area income and poverty estimates (SAIPE).

80.5(2) Reserved.

[ARC 6270C, IAB 4/6/22, effective 7/1/22]

CHAPTER 81
GENERAL RULES FOR MIGRATORY LABOR CAMPS

[Prior to 7/29/87, Health Department[470] Ch 81]

641—81.1(138) Shelters.

81.1(1) *Heating season.* The season requiring artificial heating as provided in Iowa Code section 138.13 is designated as the period between September 15 and June 1.

81.1(2) *Minimum floor space requirements.* The following floor space requirements shall be provided:

a. At least 50 square feet per occupant for sleeping purposes only in family units and dormitory accommodations.

b. At least 40 square feet per occupant for sleeping purposes only in accommodations using double bunk beds.

81.1(3) *Inspection.* The operator of a migrant labor camp shall be in possession of keys to all migrant shelters in order that inspections can be made of the facilities at any reasonable time.

81.1(4) *Register.* A register of all occupants of a migrant labor camp shall be maintained and open to inspection by the Iowa department of public health representatives at all times when the camp is occupied.

81.1(5) *Separate rooms.* Housing used for families with one or more children six years of age or older shall have a room or partitioned sleeping area for the husband and wife. The partition shall be of rigid materials and installed so as to provide reasonable privacy.

81.1(6) *Storage.* Arrangements for hanging clothing and storing personal effects for each person or family shall be provided.

641—81.2(138) Water supply.

81.2(1) *General.*

a. The water supply shall be of a safe bacterial and chemical quality.

b. Where a public water supply is available, such water shall be used in the camp. If a private water source under pressure is provided, the water system shall be capable of delivering at least 35 gallons per person per day to the camp site.

c. Cistern supplies consisting of roof or other surface runoff water shall not be used for drinking or culinary purposes.

d. The adequacy of a well as a source of water for drinking or culinary purposes shall be determined by inspection and bacteriological examination. Defects found by inspection or contaminated samples shall be sufficient grounds for requiring repair, chlorination or condemnation of the well.

e. Water containing 45 or more parts per million nitrates shall not be used for drinking or preparation of formula for infants under one year of age. When the supply contains nitrates in the quantity above, water for infant feeding shall be obtained from another source that has been tested and found to be bacterially satisfactory and contains less than 45 parts per million nitrates. A water supply containing 45 or more parts per million of nitrates shall be placarded or posted stating the water shall not be used for infant feeding.

f. Wooden well platforms or manhole covers are prohibited.

g. Hand-pump bases shall be of the solid one-piece type bolted, including suitable gaskets, secured to the well casing by thread or weld connection. Handpumps secured to the platform by bolts cast in the concrete shall be provided with a rubber or neoprene gasket between the pump base and the platform to ensure a watertight joint.

h. The pump head shall be of a type designed to prevent external water or other contaminating material from entering the water chamber.

i. The pump spout shall be of the closed, downward-directed type.

j. No hand-operated type of pump or cylinder which requires priming shall be used. No pail and rope, bailer, or chain-bucket systems shall be used.

81.2(2) *Existing pump pits.* Existing pump pits may be approved if the construction conforms to the following minimum standards:

a. Walls, floor and top of pit shall be of watertight concrete or masonry construction or equivalent. The well casing shall extend at least 6 inches above the pit floor.

b. A positive seal shall be provided for the annular opening between the casing wall and the drop pipe.

c. A positive drain shall be provided by either a watertight sump and automatic sump pump discharging with at least a 6-inch free fall above the ground surface or an independent drain line discharging to the ground surface above any possible flood level. Pit drains discharging to any other drain or sewer are prohibited.

81.2(3) *Water supply systems.* The water supply system shall be installed so as to prevent backflow of contaminated water from appliances, fixtures, drains and sewers and shall have no cross-connections with any nonpotable supply or any other water supply which does not comply with these requirements.

81.2(4) *Water tanks.* All water to be hauled for a camp shall be obtained from an approved source. All equipment used for hauling or storage of potable water shall be thoroughly cleaned and disinfected with a solution containing at least 200 parts per million of chlorine immediately before use. No equipment, tanks or reservoirs used for hauling or storing potable water shall be used for any other purpose.

641—81.3(138) Waste disposal.

81.3(1) *Solid waste disposal.* Solid waste shall be disposed of in a sanitary disposal project approved by the Iowa department of public health, or if disposed of on the premises, the solid wastes shall be buried so as to create no health hazard or nuisance.

81.3(2) *Liquid waste.*

a. Existing wastewater disposal systems shall be located and constructed so as not to create a nuisance or condition of pollution.

b. Water-carriage toilets shall discharge to a septic tank and solid absorption system or other type disposal system approved by the Iowa department of public health located, designed and constructed in accordance with the specifications set forth in the Iowa department of natural resources' current publication, "Residential Sewage Disposal Systems."

c. A leaching pit or other type disposal system approved by the Iowa department of public health shall be provided to receive the wastes from sinks, laundries, showers and tubs when no septic tank and absorption system is available. Such leaching pits shall be located and constructed in accordance with the specifications set forth in the Iowa department of natural resources' current publication, "Residential Sewage Disposal Systems."

641—81.4(138) Bathing facilities.

81.4(1) Showers shall be supplied with hot and cold water under pressure. Shower enclosures shall be sufficient to provide privacy for the user. An adjacent, enclosed dry area shall be provided for dressing. No duckboards, mats or other such accessories shall be permitted.

81.4(2) Automatic water-heating equipment, or storage tanks with hand-fired heating coils, shall be equipped with combination pressure and temperature relief valves or separate pressure and temperature relief valves. Temperature relief valves shall be located in the top one-eighth or not more than 3 inches above the top of the tank served. Pressure relief valves may be located adjacent to the tank. Gas-fired or other combustion-type water heaters shall be vented to the outside atmosphere.

641—81.5(138) Central dining facilities.

81.5(1) *Physical facilities.* When central dining facilities are provided by a concessionaire, operator or the manager of a camp, the size of the kitchen and dining hall shall be commensurate with the capacity of the housing and shall be separate from the sleeping quarters.

81.5(2) *Requirements.* When central cooking and eating facilities are provided by a concessionaire, operator or the manager of a camp, such facilities shall comply with the laws and rules of the Iowa department of inspections and appeals.

641—81.6(138) Safety and fire.

81.6(1) *Fire exits.*

a. Shelters of one story construction housing less than ten persons shall have two means of escape, one of which may be a readily accessible window with an openable space of at least 24 by 24 inches.

b. Sleeping quarters designed for ten or more persons, central dining facilities and common assembly rooms shall have at least two doors remotely separated so as to provide alternate means of escape.

c. Floors, above the first floor, used for sleeping quarters or common assembly rooms shall have a stairway and a permanent affixed exterior ladder or a second stairway.

81.6(2) *Shelter spacing.* In camps established after July 1, 1972, there shall be at least 10 feet of space in all directions between shelters.

These rules are intended to implement Iowa Code section 138.18.

CHAPTER 86
PLACES WHERE DEAD HUMAN BODIES ARE PREPARED
FOR BURIAL OR ENTOMBMENT

[Prior to 7/29/87, Health Department[470] Ch 86]

641—86.1(156) Purpose. The purpose of this chapter is to establish standards for the operation and inspection of places where dead human bodies are prepared for burial, cremation or entombment.

641—86.2(156) Definitions.

“Board” means the board of mortuary science examiners.

“Cremated remains” means the body of a deceased person, including any form of body prosthesis that has been permanently attached to or implanted in the body.

“Cremation” means the technical process, using heat and flame, that reduces human remains to bone fragments. The reduction takes place through heat and evaporation. Cremation shall include the processing, and may include the pulverization, of the bone fragments.

“Cremation chamber” means the enclosed space within which the cremation takes place.

“Cremation establishment” means a place of business which provides any aspect of cremation of human remains.

“Cremation room” means the room in which the cremation chamber is located.

“Department” means the Iowa department of public health.

“Funeral establishment” means a place of business, as defined by the board of mortuary science examiners, devoted to providing any aspect of mortuary science.

“Human remains” means a deceased human being for which a death certificate or fetal death certificate is required.

“Listed” means equipment or materials included in a list published by an agency that maintains periodic inspection on current production of listed equipment or materials and whose listing states either that the equipment or material complies with approved standards or has been tested and found suitable for use in a specified manner.

“Preparation room” means a room in a funeral establishment where human remains are prepared, sanitized, embalmed or held for ceremonies and final disposition.

641—86.3(156) Licensing. No person, business or corporation shall operate a funeral establishment, preparation room or cremation chamber without first licensing the establishment with the board.

641—86.4(156) Public access areas. Public access areas of funeral homes and crematorium establishments shall have a public rest room with hot and cold running water.

641—86.5(156) Preparation room. The preparation room shall meet the following standards:

86.5(1) The preparation room shall be of such size and dimensions to accommodate and shall contain an embalming table, an appropriate sink, or other liquid waste receptacle with sewer and water connections, suitable cabinet or shelves, and hand-washing facilities to include hot water, soap and towels.

86.5(2) The preparation room shall be private. It shall not be used as a passageway from room to room. No toilet or commode shall be located within the preparation room. Only equipment necessary for use in preparation of bodies for burial, shipment or cremation shall be permitted in the preparation room.

86.5(3) There shall be a toilet and hand-washing facility accessible elsewhere in the building.

86.5(4) Ventilation shall be provided by an exhaust fan vented to the outside of the building.

86.5(5) Doors and windows of the preparation room shall be so installed and constructed as to obstruct view from outside and to prevent fumes and odors from entering any other part of the building.

86.5(6) There shall be adequate lighting. Light fixtures shall be easy to clean and kept clean.

86.5(7) The preparation room shall be provided with an adequate water supply with hot and cold running water.

86.5(8) The building drainage system must be discharged into the municipal sewage system where such a system is available. Where a municipal sewage system is not available, the building drainage system

must be discharged into a private system of waste disposal acceptable to the Iowa department of natural resources and the Iowa department of public health.

86.5(9) Backflow prevention.

a. Funeral homes not meeting the requirements of 86.5(9)“c” shall have water-supplied aspirators equipped with a listed atmospheric vacuum breaker mounted at least six inches above the aspirator. The discharge of the aspirator shall be through an air gap.

b. Funeral homes not meeting the requirements of 86.5(9)“c” shall have hose bibbs protected by a listed nonremovable hose bibb type backflow preventer. Potable water outlets with a tube connection fitting shall be protected by a listed atmospheric vacuum breaker mounted at least six inches above the highest point of water usage.

c. In new construction, the water supply to the preparation room and to fixtures in the preparation room shall be protected against backflow in accordance with the Iowa state plumbing code (641—Chapter 25) or in accordance with the ordinance of the political subdivision in which the facility is located, provided that the requirements of the ordinance are equal to or greater than the requirements of the Iowa state plumbing code.

86.5(10) The embalming table shall have a top composed of stainless steel, porcelain or other rustproof material, and the edges shall be raised at least three-fourths inch around the entire table. There shall be a drain opening in the table.

86.5(11) Each preparation room shall have a covered, watertight receptacle for solid refuse.

86.5(12) All preparation rooms shall be maintained in a clean and sanitary condition. All embalming tables, sinks, receptacles, instruments and other appliances used in embalming dead human bodies shall be thoroughly cleaned with hot water and disinfectant. There shall be available a suitable means to sterilize instruments.

641—86.6(156) Crematorium chambers.

86.6(1) Cremation chambers shall be installed according to the manufacturer’s recommendations.

86.6(2) Cremation chambers shall be vented to the outside of the building.

86.6(3) There shall be a means to bring in a fresh air supply to aid in combustion.

86.6(4) The room where the cremation chamber is located shall have adequate exhaust to prevent heat buildup.

86.6(5) The cremation chamber shall be cleaned after each use, with cremated remains and pulverized materials being placed in containers as defined in 645—100.1(156).

641—86.7(156) Inspection fees. Inspection fees shall be billed to the owner of a funeral home or crematorium upon the completion of an inspection. Inspection fees are due upon receipt of a notice of payment due. When the funeral home or crematorium is located within the contracted area of a board of health that has a 28E agreement for inspections with the department, inspection fees billed shall be paid to the contracted board of health or its designee.

86.7(1) The fee for the inspection of a funeral home or crematorium shall be \$15 for each facility.

86.7(2) Penalty. Inspection fees not received by the department or contracted board of health within 45 days of the date of billing will be assessed a \$25 penalty for each month or fraction thereof that the payment is delinquent.

These rules are intended to implement Iowa Code chapter 156.

[Filed 6/9/70]

[Filed 1/18/79, Notice 12/13/78—published 2/7/79, effective 4/1/79]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed 2/26/98, Notice 9/10/97—published 3/25/98, effective 4/29/98]

CHAPTER 87
HEALTHY FAMILIES IOWA (HFI)

641—87.1(135) Purpose. These rules are intended to establish standards for the healthy families Iowa (HFI) program, a family support program that provides services to families and children during the prenatal period through three years of age through home visitation. This program shall be identified as healthy opportunities for parents to experience success—healthy families Iowa (HOPES-HFI). The HOPES-HFI program is intended to promote optimal child health and development; improve family coping skills and functioning; promote positive parenting skills and parent-child interaction; and prevent child abuse and neglect and infant mortality and morbidity. These rules outline the process by which the department manages HOPES-HFI funds.

[ARC 5014C, IAB 4/8/20, effective 5/13/20]

641—87.2(135) Definitions. For the purpose of these rules, the following terms shall have the meaning indicated in this rule:

“Accreditation” means national recognition of compliance with Healthy Families America standards through a peer review process.

“Applicant” means a governmental or nonprofit agency that is fully accredited by Healthy Families America (HFA) or in the process of HFA accreditation, and applies to the department during a competitive year. In any year in which expansion funds are available for the HOPES-HFI program, the department shall award new grants, subject to annual renewal, to selected applicants in a competitive process.

“At-risk community” means a county or group of counties that are identified as at risk in the most recently available needs assessment conducted by the department.

“Competitive grant” means the competitive grant application process to determine the grant awards for a project period.

“Contractor” means a governmental or nonprofit agency that holds a contract with the department to provide HOPES-HFI services.

“Department” means the Iowa department of public health.

“Family support program” means group-based parent education or home visiting programs that are designed to strengthen protective factors, including parenting skills, increasing parental knowledge of child development, and increasing family functioning and problem-solving skills. A family support program may be used as an early intervention strategy to improve birth outcomes, parental knowledge, family economic success, the home learning environment, family and child involvement with others, and coordination with other community resources. A family support program may have a specific focus on preventing child maltreatment or ensuring children are safe, healthy, and ready to succeed in school.

“Healthy Families America” or *“HFA”* means an evidence-based national program model designed to help at-risk families. HFA is a family support program that provides services to families and children during the prenatal period through three years of age through home visitation.

“Healthy families Iowa” or *“HFI”* means the state family support program that provides services to families and children during the prenatal period through three years of age through home visitation utilizing the Healthy Families America model.

“Home visitation” means a face-to-face visit with a family in their home, or other alternate location, to facilitate meeting the family’s goals. Home visitation is a strategy to deliver family support or parent education services. Temporary use of an alternate location may happen when meeting in the family home presents safety concerns for the worker or the family or on rare occasions to facilitate meeting the program’s outcomes such as medical appointments or school staffing. Home visitation typically lasts one hour and is provided in person. The use of telephonic or other media to communicate with the family does not substitute for home visitation.

“HOPES-HFI” means the healthy opportunities for parents to experience success—healthy families Iowa program. The HOPES-HFI program is intended to promote optimal child health and development; improve family coping skills and functioning; promote positive parenting skills and parent-child interaction; and prevent child abuse and neglect and infant mortality and morbidity.

“Nonprofit” means an entity that meets the requirement for tax-exempt status under Internal Revenue Code Section 501(c)(3) or 501(c)(4).

“Participant” means a family voluntarily enrolled in and receiving services from the program.

“Project period” means the period of time the department intends to support the project without requiring competition for funds.

[ARC 5014C, IAB 4/8/20, effective 5/13/20]

641—87.3(135) Applicant eligibility. Governmental or nonprofit agencies that are fully accredited by HFA or in the process of accreditation by HFA are eligible to apply to the department during a competitive year and are eligible applicants for funding. The purpose of the applications is to administer HOPES-HFI services for a specified project period in an at-risk community, as defined in the request for proposals, with an annual continuation application.

[ARC 5014C, IAB 4/8/20, effective 5/13/20]

641—87.4(135) Participant eligibility. Families must meet the following requirements to be eligible to participate in the HOPES-HFI program: (1) A family member is pregnant or the family has a child aged birth through three years; (2) The family is determined to be eligible for enrollment according to a universal risk assessment as defined by HFA standards; and (3) The family resides within the at-risk community.

[ARC 5014C, IAB 4/8/20, effective 5/13/20]

641—87.5(135) Program requirements. Contractors shall meet the following minimum program requirements:

87.5(1) Accreditation. Contractors shall comply with Healthy Families America (HFA) standards and maintain HFA accreditation status. HOPES-HFI contractors will be required to submit evidence of reaccreditation reports to the department within 30 days of receipt. Applicants that are not fully accredited with HFA at the time of application must become accredited within three years of the initial contract execution.

87.5(2) Participant identification. Contractors shall collaborate with health care, human services, education, and other partners serving pregnant women and women of childbearing age to identify families who are at risk in order to promote positive birth and parenting outcomes.

87.5(3) Standardized tools. Contractors shall utilize standardized tools approved by the department to assess and reassess a participant’s risk status and achievements and the appropriate level of service.

87.5(4) Quality assessment and improvement. Contractors shall develop a process for annual program evaluation. The process shall include the following:

a. The outcome of the program evaluation shall be reviewed by the program’s governing or advisory board with recommendations made for program improvement.

b. The evaluation shall demonstrate the effectiveness of the program through program outcomes, including acceptance and retention rates.

[ARC 5014C, IAB 4/8/20, effective 5/13/20]

641—87.6(135) Contractor assurance. In order to receive funding, the contractor shall provide to the department assurance that all applicable federal, state, and local requirements are met. The contractor shall ensure compliance with Title IV of the Civil Rights Act, the Americans with Disabilities Act of 1990 (ADA), Section 504 of the 1973 Rehabilitation Act, and all affirmative action requirements. In addition, the contractor shall ensure the following:

87.6(1) Program policies and procedures. Policies and procedures shall be in accordance with HFA standards.

87.6(2) Personnel policies and procedures. The personnel policies and procedures shall, at a minimum, include:

a. Conditions of employment, including recruitment, selection, termination, promotion, and compensation.

b. A leave of absence policy.

c. A grievance procedure.

- d. Annual employee performance evaluations.
 - e. A nondiscrimination policy.
 - f. Fringe benefits.
 - g. Employment application forms that comply with civil rights regulations.
 - h. Current job descriptions that delineate qualifications, responsibilities, and essential functions, that reflect current responsibilities, and that are dated.
 - i. A current salary schedule.
- 87.6(3) *Fiscal management.*** Fiscal management shall, at a minimum, include the following:
- a. An annual budget.
 - b. Fiscal policies and procedures that follow generally accepted accounting practices.
 - c. Utilization of other funds such as private and third-party funds when available.

641—87.7(135) Applicant appeal process.

87.7(1) *Right of appeal.* The right to appeal shall be granted when an applicant's application to participate is denied. The right to appeal shall also be granted when, during the course of the contract or agreement period, a contractor is disqualified or any other action that affects participation is taken. For participating contractors, a minimum of 60 days' advance notice shall be given before the effective date of the action.

87.7(2) *Request for hearing.* An appeal is brought by filing a written request for a hearing with the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within ten days of receipt of notification of the adverse action. The written request for hearing shall state the adverse action being appealed.

87.7(3) *Contested cases.* Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

87.7(4) *Notice of hearing.* The administrative law judge (ALJ) shall schedule the time, place and date of the hearing as expeditiously as possible. Hearings shall be conducted by telephone or in person in Des Moines at the Lucas State Office Building or another suitable location. If necessary, parties will be provided at least two opportunities to have the hearing rescheduled.

87.7(5) *Conduct of hearing.* The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

87.7(6) *Decision.* A written decision of the ALJ shall be issued, when possible, within 60 days from the date of the request for a hearing unless the parties agree to a longer period of time. The decision of the ALJ shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action, without further proceedings, ten days after it is received by the aggrieved party unless an appeal to the director is filed as provided in subrule 87.7(7).

87.7(7) *Appeal to director.* Any appeal to the director for review of the proposed decision of the ALJ shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the ALJ's proposed decision by the aggrieved party. A copy of the appeal shall also be mailed to the ALJ. Any request for an appeal shall state the reason for appeal.

87.7(8) *Record of hearing.* Upon receipt of an appeal request, the ALJ shall prepare the record of the hearing for submission to the director of the department. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.

f. The proposed decision and order of the hearing officer.

87.7(9) *Decision of director.* The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

87.7(10) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review pursuant to Iowa Code chapter 17A.

87.7(11) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—87.8(135) Participant right to appeal.

87.8(1) *Denial, reduction or termination of services.*

a. When a contractor denies, reduces or terminates services funded by the HOPES-HFI grant against the wishes of a participant, the contractor shall notify the participant of the following:

- (1) The action taken;
- (2) The reason for the action; and
- (3) The participant's right to appeal.

b. If a participant files an appeal, the contractor shall provide services to the participant throughout the appeals process, unless the contractor receives a waiver from the department pending the outcome of the appeal.

87.8(2) *Local appeals process.*

a. All contractors shall have a written local procedure to hear appeals. The local procedure shall, at a minimum, include:

- (1) The method of notification of the right to appeal;
- (2) The procedure for conducting the appeal;
- (3) Time limits for each step; and
- (4) The method of notification of the outcome of the local appeal and notification of the participant's right to appeal to the state. Notifications of the outcome of the local appeal shall include the facts used to reach the decision and the conclusions drawn from the facts to support the contractor's decision.

b. The written appeals procedure and the record of appeals filed (including the record and disposition of each) shall be available for inspection by authorized representatives of the Iowa department of public health.

87.8(3) *Appeal to department.*

a. *Procedure for appeal.* If a participant is dissatisfied with the decision of the local appeal, the participant may appeal to the state. The appeal shall be made in writing by certified mail, return receipt requested, to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within 15 days of receipt of the local contractor's appeal decision.

b. *Department review.* The department shall evaluate the appeal based upon the merits of the local appeal documentation. A department decision affirming, reserving, or modifying the local appeal decision shall be issued within 30 days of the receipt of all local appeal documentation. The department decision shall be in writing and shall be sent by certified mail, return receipt requested, to the participant and the contractor.

87.8(4) *Further appeal.* The participant may appeal the department's decision by submitting an appeal, within 10 days of receipt of the department's decision, to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. Upon receipt of an appeal that meets contested case status, the department shall forward the appeal within 5 working days to the department of inspections and appeals pursuant to the rules adopted by the department of inspections and appeals regarding the transmission of

contested cases. The continued process for appeals shall be governed by 641—Chapter 173, Iowa Administrative Code.

These rules are intended to implement Iowa Code section 135.106.

CHAPTER 88
VOLUNTEER HEALTH CARE PROVIDER PROGRAM

641—88.1(135) Purpose. The volunteer health care provider program (VHCPP) is established to defend and indemnify eligible individual volunteer health care providers and protected clinics providing free health care services as provided in Iowa Code section 135.24 and these rules.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

641—88.2(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“Charitable organization” means a charitable organization within the meaning of Section 501(c)(3) of the Internal Revenue Code.

“Defend” means that the office of the attorney general shall provide the individual volunteer health care provider and protected clinic with legal representation at no cost to the individual volunteer health care provider or protected clinic.

“Department” means the Iowa department of public health.

“Field dental clinic” means a dental clinic temporarily or periodically erected at a location where mobile dental equipment, instruments, or supplies, as necessary, are utilized to provide dental services.

“Free clinic” means a facility, other than a hospital or health care provider’s office, which is exempt from taxation under Section 501(c)(3) of the Internal Revenue Code and which has as its sole purpose the provision of health care services without charge to individuals who are otherwise unable to pay for the services.

“Health care facility” means a residential care facility, a nursing facility, an intermediate care facility for persons with mental illness, or an intermediate care facility for persons with an intellectual disability.

“Health care provider” means an emergency medical care provider certified pursuant to Iowa Code chapter 147A; a physician licensed pursuant to Iowa Code chapter 148; a physical therapist licensed pursuant to Iowa Code chapter 148A; an occupational therapist licensed pursuant to Iowa Code chapter 148B; a physician assistant licensed pursuant to Iowa Code chapter 148C and practicing under the supervision of a physician; a podiatrist licensed pursuant to Iowa Code chapter 149; a chiropractor licensed pursuant to Iowa Code chapter 151; a respiratory therapist licensed pursuant to Iowa Code chapter 152B; an advanced registered nurse practitioner, a licensed practical nurse or a registered nurse licensed pursuant to Iowa Code chapter 152 or 152E; a dentist, dental assistant, or dental hygienist licensed or registered pursuant to Iowa Code chapter 153; an optometrist licensed pursuant to Iowa Code chapter 154; a psychologist licensed pursuant to Iowa Code chapter 154B; a bachelor social worker, a master social worker, or an independent social worker licensed pursuant to Iowa Code chapter 154C; a marital and family therapist or mental health counselor licensed pursuant to Iowa Code chapter 154D; a speech pathologist or audiologist licensed pursuant to Iowa Code chapter 154F; or a pharmacist licensed pursuant to Iowa Code chapter 155A.

“Health care services” means services received from a health care provider at a protected clinic or sponsor entity, as provided in Iowa Code section 135.24 and these rules, and approved in a protection agreement or sponsor entity agreement. The agreement covers “health care services” that are volunteer, uncompensated services. For those services to qualify as volunteer, uncompensated services under this chapter, the individual volunteer health care provider, health care provider, protected clinic, or sponsor entity must receive no compensation for any services provided under the agreement and must not bill or accept compensation from the person, or any public or private third-party payor, for the specific services provided.

“Indemnify” means that the state of Iowa shall pay all sums that the individual volunteer health care provider or protected clinic holding a protection agreement with the VHCPP is legally obligated to pay as damages because of any claim made against the individual volunteer health care provider or protected clinic which arises out of the provision of free health care services rendered or which should have been rendered by the individual volunteer health care provider or protected clinic.

“Individual volunteer health care provider” means any one of the following health care providers who has a fully executed protection agreement with the VHCPP: an emergency medical care provider certified pursuant to Iowa Code chapter 147A; a physician licensed pursuant to Iowa Code chapter 148; a physical

therapist licensed pursuant to Iowa Code chapter 148A; an occupational therapist licensed pursuant to Iowa Code chapter 148B; a physician assistant licensed pursuant to Iowa Code chapter 148C and practicing under the supervision of a physician; a podiatrist licensed pursuant to Iowa Code chapter 149; a chiropractor licensed pursuant to Iowa Code chapter 151; a respiratory therapist licensed pursuant to Iowa Code chapter 152B; an advanced registered nurse practitioner, a licensed practical nurse or a registered nurse licensed pursuant to Iowa Code chapter 152 or 152E; a dentist, dental assistant, or dental hygienist licensed or registered pursuant to Iowa Code chapter 153; an optometrist licensed pursuant to Iowa Code chapter 154; a psychologist licensed pursuant to Iowa Code chapter 154B; a bachelor social worker, a master social worker, or an independent social worker licensed pursuant to Iowa Code chapter 154C; a marital and family therapist or mental health counselor licensed pursuant to Iowa Code chapter 154D; a speech pathologist or audiologist licensed pursuant to Iowa Code chapter 154F; or a pharmacist licensed pursuant to Iowa Code chapter 155A.

“License” means a license, certification or registration issued to a person by a licensing authority which evidences the granting of authority to engage in a profession or occupation.

“Major surgical procedure” means a surgical procedure not ordinarily performed in a private provider’s office, free clinic, or specialty health care provider office and includes the surgery performed in a hospital as defined in Iowa Code section 135B.1(3) or an outpatient surgical facility.

“Minor surgical procedure” means a surgical procedure ordinarily performed in a private provider’s office, free clinic, or specialty health care provider office.

“Outpatient surgical facility” means a facility defined in Iowa Code section 135.61(21).

“Permanent site” means a site at which free health care services will be provided on a continuous basis.

“Protected clinic” means field dental clinic, free clinic, or specialty health care provider office providing free care to the uninsured and underinsured. Each protected clinic has a signed protection agreement, which provides for defense and indemnification of the protected clinic. The protection agreement shall allow the protected clinic to deliver health care services to uninsured and underinsured persons as an agent of the state.

“Protection agreement” means a signed contract providing for defense and indemnification between an individual volunteer health care provider or protected clinic and the volunteer health care provider program (VHCPP). This agreement shall allow the individual health care provider or protected clinic to deliver health care services to uninsured and underinsured persons as an agent of the state. The agreement covers “health care services” that are volunteer, uncompensated services. For those services to qualify as volunteer, uncompensated services under this chapter, the individual volunteer health care provider, health care provider, and protected clinic must receive no compensation for any services provided under the agreement and must not bill or accept compensation from the person, or any public or private third-party payor, for the specific services provided by the individual volunteer health care provider covered by the agreement.

“Specialty health care provider office” means the private office or clinic of an individual specialty health care provider or a group of specialty health care providers but does not include a field dental clinic, a free clinic, or a hospital.

“Sponsor entity” or *“sponsor entity clinic”* means a hospital, clinic, free clinic, health care facility, health care referral program, charitable organization, specialty health care provider office, outpatient surgical facility, or field dental clinic. Each sponsor entity has a fully executed sponsor entity agreement. The sponsor entity agreement shall allow an individual volunteer health care provider to deliver health care services to uninsured and underinsured persons as an agent of the state.

“Sponsor entity agreement” means a signed contract between the VHCPP and a hospital, clinic, free clinic, health care facility, health care referral program, charitable organization, specialty health care provider office, outpatient surgical facility, or field dental clinic allowing an individual volunteer health care provider to deliver free health care services through the VHCPP at the sponsor entity location.

“Temporary site” means a site at which free health care services will be provided for a short period of time not to exceed three days. “Temporary site” includes but is not limited to temporary health fairs, flu shot clinics, and temporary sites that provide back-to-school physicals.

“*Underinsured*” means that a person does not have adequate insurance, which is determined on cost-exposure to family income with at least one of three indicators: (1) out-of-pocket medical expenses equal to or greater than 10 percent of income; (2) out-of-pocket medical expenses equal to or greater than 5 percent of income if income is less than 200 percent of the federal poverty level; and (3) health plan deductibles equal to or greater than 5 percent of income.

“*Volunteer health care provider program*” or “*VHCPP*” means the volunteer health care provider program of the department.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 9535B, IAB 6/1/11, effective 5/11/11; ARC 9536B, IAB 6/1/11, effective 5/11/11; ARC 9645B, IAB 8/10/11, effective 9/14/11; ARC 4703C, IAB 10/9/19, effective 11/13/19; ARC 5015C, IAB 4/8/20, effective 5/13/20]

641—88.3(135) Eligibility for the volunteer health care provider program.

88.3(1) *Individual volunteer health care provider eligibility.* To be eligible for protection as an employee of the state under Iowa Code chapter 669 for a claim arising from covered health care services, an individual volunteer health care provider shall satisfy each of the following conditions at the time of the act or omission allegedly resulting in injury:

a. The individual volunteer health care provider shall hold an active unrestricted license, registration, or certification to practice in Iowa under Iowa Code chapter 147A, 148, 148A, 148B, 148C, 149, 151, 152, 152B, 152E, 153, 154, 154B, 154C, 154D, 154F, or 155A. The individual volunteer health care provider shall provide a sworn statement attesting that the license, registration, or certification to practice is free of restrictions. The statement shall describe any disciplinary action that has ever been taken against the individual volunteer health care provider by any professional licensing, registering, or certifying authority or health care facility, including any voluntary surrender of license, registration, or certification or other agreement involving the individual volunteer health care provider’s license, registration, or certification to practice or any restrictions on practice, suspension of privileges, or other sanctions. The statement shall also describe any malpractice suits that have been filed against the individual volunteer health care provider. The statement provided by a pharmacist shall also describe any disciplinary action that has ever been taken against any pharmacy in which the pharmacist has ever been owner, partner, or officer.

b. Application. The applicant shall submit the following information on forms provided by the VHCPP:

(1) The individual volunteer health care provider current licensure identification number and expiration date;

(2) The health care services to be voluntarily provided that meet all of the following requirements:

1. The services fall under the individual volunteer health care provider’s licensed scope of practice;
2. The services are covered health care services listed in paragraph 88.5(1)“d”; and
3. The individual volunteer health care provider applicant is willing to voluntarily provide the health care services to those persons who are uninsured and underinsured for the public health purpose of improved health, prevention of illness/injury, and disease management.

c. Agreement. The individual volunteer health care provider shall have a signed and current protection agreement with the VHCPP which identifies the covered health care services within the respective scope of practice and conditions of defense and indemnification as provided in rules 641—88.5(135) and 641—88.6(135).

(1) The protection agreement is only valid during the time that the individual volunteer health care provider maintains a current unrestricted license and only for voluntary services provided in conjunction with a sponsor entity or protected clinic which has its own valid VHCPP protection agreement in effect at the time of service provision.

(2) The protection agreement with the VHCPP shall provide that the individual volunteer health care provider shall:

1. Perform only those health care services identified and approved by the VHCPP;
2. Promptly notify the VHCPP of any changes in licensure status;
3. Maintain proper records of the health care services;
4. Make no representations concerning eligibility for the VHCPP or eligibility of services for indemnification by the state except as authorized by the department;

5. Cooperate fully with the state in the defense of any claim or suit relating to participation in the VHCPP, including attending hearings, depositions and trials and assisting in securing and giving evidence, responding to discovery and obtaining the attendance of witnesses;

6. Accept financial responsibility for personal expenses and costs incurred in the defense of any claim or suit related to participation in the VHCPP, including travel, meals, compensation for time and lost practice, and copying costs, and agree that the state will not compensate the individual volunteer health care provider for the individual volunteer health care provider's expenses or time needed for the defense of the claim or suit;

7. Receive no direct monetary compensation of any kind for services provided in the VHCPP;

8. Comply with the protection agreement with the VHCPP concerning approved health care services.

88.3(2) *Protected clinic eligibility.* To be eligible for protection as a state agency under Iowa Code chapter 669 for a claim arising from the provision of covered health care services at a protected clinic, the protected clinic shall satisfy each of the following conditions at the time of the act or omission allegedly resulting in injury:

a. The protected clinic shall comply with subrules 88.4(1) through 88.4(5).

b. The protected clinic shall, upon request from the department, provide to the department a list of all health care providers who provided health care services at the protected clinic at the time of a claim made against the individual health care provider or protected clinic which arises out of the provision of free health care service rendered or which should have been rendered by the individual volunteer health care provider or protected clinic.

c. The protected clinic shall only be covered under the VHCPP for the provision of covered health care services by a health care provider providing health care services at the protected clinic who either:

(1) Holds a current individual volunteer health care provider protection agreement with the VHCPP, or

(2) Holds current professional liability insurance coverage and an active unrestricted license, registration, or certification to practice in Iowa under Iowa Code chapter 147A, 148, 148A, 148B, 148C, 149, 151, 152, 152B, 152E, 153, 154, 154B, 154C, 154D, 154F, or 155A.

d. The protected clinic shall submit a list of the clinic board of directors and contact information for the board of directors, if applicable.

e. If the protected clinic is a charitable organization within the meaning of Section 501(c)(3) of the Internal Revenue Code, the protected clinic shall provide proof of Section 501(c)(3) status to the VHCPP.

f. A protected clinic may allow health care profession students to volunteer at the protected clinic provided that the following conditions are satisfied:

(1) The college, university, or other health care profession educational institution provides professional liability insurance which covers the students; and

(2) The protected clinic or the health care profession institution provides general liability and professional liability insurance which covers the students; and

(3) The students provide only those services or activities as are authorized by the education agreement, and such services and activities are provided under the on-site supervision of a health care provider.

88.3(3) *Sponsor entity or sponsor entity clinic.* As a condition of sponsoring individual volunteer health care providers in the VHCPP, a hospital, clinic, free clinic, health care facility, health care referral program, charitable organization, specialty health care provider office, outpatient surgical facility, or field dental clinic shall comply with subrules 88.4(1) through 88.4(5).

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 9535B, IAB 6/1/11, effective 5/11/11; ARC 9536B, IAB 6/1/11, effective 5/11/11; ARC 9645B, IAB 8/10/11, effective 9/14/11; ARC 5015C, IAB 4/8/20, effective 5/13/20]

641—88.4(135) Sponsor entity and protected clinic.

88.4(1) Licensure. The sponsor entity or protected clinic shall be licensed to the extent required by law for the facility in question.

88.4(2) If the sponsor entity or protected clinic is a charitable organization within the meaning of Section 501(c)(3) of the Internal Revenue Code, the sponsor entity or protected clinic shall provide proof of Section 501(c)(3) status to the VHCPP.

88.4(3) Application. The sponsor entity or protected clinic shall submit the following information on forms provided by the VHCPP:

- a. By category, the patient groups to be served;
- b. The health care services to be provided;
- c. The site where free health care services are to be provided;
- d. Classification of each site as a permanent site or temporary site;
- e. The services that will be provided to those persons who are uninsured and underinsured for the public health purpose of improved health, prevention of illness/injury, and disease management.

88.4(4) Agreement. A signed and current sponsor entity agreement or protected clinic agreement shall exist with the VHCPP which shall:

- a. Provide that the individual volunteer health care provider or health care provider within a protected clinic and the individual volunteer health care provider within a sponsor entity shall perform only those health care services identified and approved by the VHCPP;
- b. Identify by category the patient groups to be served;
- c. Identify the sites at which the free health care services will be provided;
- d. Identify as a permanent site or temporary site for the provision of free health care services through the VHCPP;

- e. Provide that the sponsor entity or protected clinic shall maintain proper records of health care services for a period of seven years from the date of service or, in the case of a minor, for a period of one year after the minor has reached the age of majority; and

- f. Provide that the sponsor entity agrees that only the individual volunteer health care provider or protected clinic covered under a current VHCPP protection agreement at the time of the service provision in a claim is afforded protection under Iowa Code section 135.24 and that the state assumes no obligation to the sponsor entity, its employees, officers, or agents. The sponsor entity or protected clinic shall submit a statement, which shall be submitted on forms provided by the VHCPP, attesting that the sponsor entity or protected clinic and its staff, employees and volunteers agree to:

- (1) Cooperate fully with the state in the defense of any claim or suit relating to participation in the VHCPP, including attending hearings, depositions and trials and assisting in securing and giving evidence, responding to discovery and obtaining the attendance of witnesses;

- (2) Accept financial responsibility for the sponsor entity's or protected clinic's expenses and costs incurred in the defense of any claim or suit related to participation in the VHCPP, including travel, meals, compensation for time and lost practice, and copying costs, and agree that the state will not compensate the sponsor entity or protected clinic for expenses or time needed for the defense of the claim or suit;

- (3) Receive no direct monetary compensation of any kind for health care services provided in the sponsor entity or protected clinic;

- (4) Comply with the sponsor entity agreement or protected clinic agreement with the VHCPP concerning approved health care services.

88.4(5) General liability insurance. The sponsor entity or protected clinic shall submit proof of general liability insurance for the clinic site.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 9536B, IAB 6/1/11, effective 5/11/11; ARC 9645B, IAB 8/10/11, effective 9/14/11; ARC 5015C, IAB 4/8/20, effective 5/13/20]

641—88.5(135) Covered health care services. An individual volunteer health care provider holding a current protection agreement with the VHCPP shall be afforded the protection of an employee of the state under Iowa Code chapter 669, and a protected clinic holding a current protection agreement with the VHCPP shall be afforded protection as an agency of the state under Iowa Code chapter 669, only for claims for injury alleged to have been proximately caused by an individual volunteer health care provider's provision of covered health care services or solely on the basis of the individual volunteer health care provider's participation in the sponsor entity or protected clinic.

88.5(1) Covered health care services are only those that are:

- a. Identified in the protection agreement with the VHCPP;
- b. In compliance with these rules;
- c. Provided by or under the direct supervision of the individual volunteer health care provider;

d. Health care services of:

(1) Advanced registered nurse practitioners for: well-child examinations; annual adult examinations; diagnosis and treatment of acute and chronic conditions; health education; health maintenance; immunizations; and minor surgical procedures. Certified registered nurse anesthetists may provide anesthesia services for major surgical procedures only if the following conditions are satisfied:

1. The surgery is performed in a hospital as defined in Iowa Code section 135B.1(3) or an outpatient surgical facility;

2. The hospital or outpatient surgical facility at which the surgery is performed has executed a sponsor entity agreement;

3. The physician performing the surgery provides or assures the provision of adequate presurgical and postsurgical care, including any follow-up necessary to address postoperative complications; and

4. The physician performing the surgery is an individual specialty health care provider or part of a group of specialty health care providers which has registered with the department as a specialty health care provider office.

(2) Audiologists for: testing, measurement and evaluation related to hearing and hearing disorders and associated communication disorders for the purpose of nonmedically identifying, preventing, modifying or remediating such disorders and conditions including the determination and use of appropriate amplification; patient instruction/counseling; patient habilitation/rehabilitation; and referrals.

(3) Bachelor social workers for: psychosocial assessment and intervention through direct contact with clients; referral to other qualified resources for assistance; performance of social histories; problem identification; establishment of goals and monitoring of progress; interviewing techniques; counseling; social work administration; supervision; evaluation; interdisciplinary consultation and collaboration.

(4) Chiropractors for: examinations; diagnosis and treatment; health education; and health maintenance.

(5) Dental assistants for: intraoral services; extraoral services; infection control; radiography; and removal of plaque or stain by toothbrush, floss, or rubber cup coronal polish.

(6) Dental hygienists for: assessments and screenings; health education; health maintenance; and preventive services (cleaning, X-rays, sealants, fluoride treatments, fluoride varnish).

(7) Dentists for: dental examinations; diagnosis and treatment of acute and chronic conditions; health education; health maintenance; and minor surgical procedures.

(8) Emergency medical care providers for: airway/ventilation/oxygenation; assisted medications - patient's; cardiovascular/circulation; immobilization; IV initiation/maintenance/fluids; and medication administration - routes.

(9) Independent social workers for: psychosocial assessment, diagnosis, and treatment; performance of psychosocial histories; problem identification; evaluation of symptoms and behavior; assessment of psychosocial and behavioral strengths and weaknesses and effects of the environment on behavior; psychosocial therapy; differential treatment planning; and interdisciplinary consultation.

(10) Licensed practical nurses for: supportive or restorative care.

(11) Marital and family therapists for: marital and family therapy; and application of counseling techniques in the assessment and resolution of emotional conditions.

(12) Master social workers for: psychosocial assessment, diagnosis, and treatment; performance of psychosocial histories; problem identification; evaluation of symptoms and behavior; assessment of psychosocial and behavioral strengths and weaknesses and effects of the environment on behavior; psychosocial therapy; differential treatment planning; and interdisciplinary consultation.

(13) Mental health counselors for: mental health counseling; and counseling services involving assessment, referral and consultation.

(14) Occupational therapists for: evaluation and treatment of problems interfering with functional performance in persons impaired by physical illness or injury, emotional disorder, congenital or developmental disability or the aging process.

(15) Optometrists for: examinations; diagnosis and treatment of the human eye and adnexa; health education; and health maintenance.

(16) Pharmacists for: drug dispensing; patient counseling; health screenings and education; and immunizations.

(17) Physical therapists for: interpretation of performance, tests, and measurements; evaluation and treatment of human capabilities and impairments; use of physical agents, therapeutic exercises, and rehabilitative procedures to prevent, correct, minimize, or alleviate a physical impairment; establishment and modification of physical therapy program; treatment planning; and patient instruction/education.

(18) Physicians and physician assistants for: well-child examinations; annual adult examinations; diagnosis and treatment of acute and chronic conditions; health education; health maintenance; immunizations; and minor surgical procedures. Physicians may perform major surgical procedures only if the following conditions are satisfied:

1. The surgery is performed in a hospital as defined in Iowa Code section 135B.1(3) or an outpatient surgical facility;

2. The hospital or outpatient surgical facility at which the surgery is performed has executed a sponsor entity agreement;

3. The physician provides or assures the provision of adequate presurgical and postsurgical care, including any follow-up necessary to address postoperative complications; and

4. The physician performing the surgery is an individual specialty health care provider or part of a group of specialty health care providers which has registered with the department as a specialty health care provider office.

(19) Podiatrists for: examinations; diagnosis and treatment; health education; health maintenance; and minor surgical procedures.

(20) Psychologists for: counseling and the use of psychological remedial measures with persons with adjustment or emotional problems.

(21) Registered nurses for: well-child examinations; annual adult examinations; treatment of acute and chronic conditions; health education; health maintenance; and immunizations.

(22) Respiratory therapists for: diagnostic and therapeutic use of administration of medical gases, aerosols, and humidification, not including general anesthesia; pharmacologic agents relating to respiratory care procedures; bronchopulmonary hygiene; specific diagnostic and testing techniques employed in the medical management of patients to assist in diagnosis, monitoring, treatment, and research of cardiopulmonary abnormalities; and pulmonary function testing.

(23) Speech pathologists for: testing, measurement and evaluation related to the development and disorders of speech, fluency, voice or language for the purpose of nonmedically preventing, ameliorating, modifying or remediating such disorders and conditions; patient instruction/counseling; patient habilitation/rehabilitation; and referrals.

88.5(2) Experimental procedures or procedures and treatments which lack sufficient evidence of clinical effectiveness are excluded from the VHCPP.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 9535B, IAB 6/1/11, effective 5/11/11; ARC 4703C, IAB 10/9/19, effective 11/13/19]

641—88.6(135) Defense and indemnification. The state shall defend and indemnify an individual volunteer health care provider or a protected clinic for a claim arising from the VHCPP only to the extent provided by Iowa Code chapter 669 and Iowa Code section 135.24. Persons or entities other than the participating individual volunteer health care provider or protected clinic are not considered state employees or state agencies under Iowa Code chapter 669. Defense and indemnification of the individual volunteer health care provider or a protected clinic under Iowa Code chapter 669 and Iowa Code section 135.24 shall occur only if all of the following requirements are met:

88.6(1) The claim involves medical injury alleged to have been proximately caused by health care services which were identified and approved in the protection or sponsor agreement with the VHCPP and then only to the extent the health care services were provided by or under the direct supervision of the individual volunteer health care provider, including claims based on negligent delegation of health care, or the individual volunteer health care provider is named as a defendant solely because of the individual volunteer health care provider's participation in the protected clinic or sponsor entity clinic.

88.6(2) The claim arises from covered health care services that were performed at a site identified and approved in the protection agreement with the VHCPP.

88.6(3) The claim arises from covered health care services provided through a protected clinic or sponsor entity clinic identified and approved in the individual volunteer health care provider's protection agreement with the VHCPP and which meets the requirements of rule 641—88.3(135).

88.6(4) The individual volunteer health care provider, health care provider, protected clinic, or sponsor entity clinic that provided the health care services receives no direct monetary compensation of any kind and no promise to pay compensation for the health care services which allegedly resulted in medical injury.

88.6(5) The health care services are provided to a patient who is a member of a patient group identified in the sponsor entity or protected clinic protection agreement with the VHCPP.

88.6(6) The individual volunteer health care provider, protected clinic, or sponsor entity clinic is eligible and registered as provided in rule 641—88.3(135) or the care is provided by a health care provider who holds current professional liability insurance coverage and an active unrestricted license to practice in Iowa under Iowa Code chapter 147A, 148, 148A, 148B, 148C, 149, 151, 152, 152B, 152E, 153, 154, 154B, 154C, 154D, 154F, or 155A and has been approved by the VHCPP.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 9535B, IAB 6/1/11, effective 5/11/11; ARC 9536B, IAB 6/1/11, effective 5/11/11; ARC 9645B, IAB 8/10/11, effective 9/14/11; ARC 5015C, IAB 4/8/20, effective 5/13/20]

641—88.7(135) Term of agreement.

88.7(1) *Individual volunteer health care provider.* The protection agreement with the VHCPP shall expire five years from the date of execution. Individual volunteer health care providers may apply for renewal by filing an application at least 30 days prior to expiration of the protection agreement.

88.7(2) *Protected clinic.* The protection agreement with the VHCPP shall expire five years from the date of execution. The protected clinic may apply for renewal by filing an application at least 30 days prior to expiration of the protection agreement. It is anticipated that temporary sites may change over the five-year period. An updated list of temporary site location or service provision changes shall be provided to the department for review and acceptance at least one week prior to service provision at the temporary site. Location or service provision changes to permanent sites shall require a protection agreement amendment.

88.7(3) *Sponsor entity.* The sponsor entity agreement with the VHCPP shall expire five years from the date of execution. Sponsor entities may apply for renewal by filing an application at least 30 days prior to expiration of the sponsor entity agreement. It is anticipated that temporary sites may change over the five-year period. An updated list of temporary site location or service provision changes shall be provided to the department for review and acceptance at least one week prior to service provision at the temporary site. Location or service provision changes to permanent sites shall require a protection agreement amendment.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 5015C, IAB 4/8/20, effective 5/13/20]

641—88.8(135) Reporting requirements and duties.

88.8(1) Upon obtaining knowledge or becoming aware of any injury allegedly arising out of the negligent rendering of, or the negligent failure to render, covered health care services under the VHCPP, a participating individual volunteer health care provider, protected clinic, or sponsor entity shall provide to the VHCPP, as soon as practicable, written notice containing, to the extent obtainable, the circumstance of the alleged injury, the names and addresses of the injured, and any other relevant information.

88.8(2) Upon obtaining knowledge or becoming aware of an injury as defined in subrule 88.8(1), the participating protected clinic or sponsor entity shall promptly take all reasonable steps to prevent further or other injury from arising out of the same or similar incidents, situations or conditions.

88.8(3) A participating individual volunteer health care provider, protected clinic, or sponsor entity shall immediately notify the Iowa Department of Justice, Special Litigation Division, Hoover State Office Building, Des Moines, Iowa 50319, of service or receipt of an original notice, petition, suit or claim seeking damages from the individual volunteer health care provider, protected clinic or sponsor entity related to participation in the VHCPP.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

641—88.9(135) Revocation of agreement. The VHCPP may deny, suspend, revoke, or condition the agreement of an individual volunteer health care provider, protected clinic or sponsor entity for cause, including but not limited to:

1. Failure to comply with the protection agreement or sponsor entity agreement with the VHCPP.
2. Violation of state law governing the respective scope of practice or other law governing the health care services provided under the VHCPP.
3. Making false, misleading, or fraudulent statements in connection with the VHCPP, including determination of eligibility of the individual volunteer health care provider, protected clinic, or sponsor entity or handling of a claim against the individual volunteer health care provider, protected clinic, sponsor entity or the state.
4. Evidence of substance abuse or intoxication affecting the provision of health care services under the VHCPP.
5. Reasonable grounds to believe that the individual volunteer health care provider or health care provider may have provided incompetent or inadequate care to a patient under the VHCPP or is likely to do so.
6. Reasonable grounds to believe that the individual volunteer health care provider's, protected clinic's, or sponsor entity's participation in the VHCPP may expose the state to undue risk.
7. Failure to immediately notify the VHCPP of any disciplinary action brought against the individual volunteer health care provider by the applicable state licensing board.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 9536B, IAB 6/1/11, effective 5/11/11; ARC 9645B, IAB 8/10/11, effective 9/14/11]

641—88.10(135) Procedure for revocation of agreement. A proceeding for revocation of an individual volunteer health care provider's protection agreement or a protected clinic's protection agreement or a sponsor entity's agreement for participation shall be conducted as a contested case proceeding pursuant to Iowa Code chapter 17A and 641—Chapter 173. Iowa Code section 17A.18 does not preclude emergency summary suspension of a protection agreement or a sponsor entity agreement. The VHCPP shall immediately notify the appropriate licensing board and the appropriate protected clinic or sponsor entity of revocation of an individual volunteer health care provider's protection agreement.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

641—88.11(135) Effect of suspension or revocation. If the VHCPP suspends or revokes an individual volunteer health care provider's protection agreement, sponsor entity protection agreement, or protected clinic's protection agreement, the action shall suspend or revoke future protection but shall not negate defense and indemnification coverage for covered acts or omissions which occurred during the effective dates of the protection agreement.

[ARC 8791B, IAB 6/2/10, effective 7/7/10; ARC 5015C, IAB 4/8/20, effective 5/13/20]

641—88.12(135) Protection denied.

88.12(1) Protection denied—appeal procedure. An applicant who has been denied protection by the VHCPP may appeal the denial and request a hearing on the issues related to the denial by serving a notice of the appeal and request for hearing to the Director, Iowa Department of Public Health, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319-0075, in writing, not more than 30 days following the date of the mailing of the notification of protection denial to the applicant or not more than 30 days following the date upon which the applicant was served notice if notification was made in the manner of service of an original notice. The request for hearing shall specifically delineate the facts to be contested and determined at the hearing.

88.12(2) Protection denied—hearing. If an applicant who has been denied protection by the VHCPP appeals the protection denial and requests a hearing pursuant to subrule 88.12(1), the hearing and subsequent procedures shall be conducted pursuant to Iowa Code chapter 17A and 641—Chapter 173.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

641—88.13(135) Board notice of disciplinary action. The applicable state licensing board shall notify the VHCPP of the initiation of a contested case against a protected individual volunteer health care provider or the imposition of disciplinary action, including providing copies of any contested case decision or

settlement agreement with the protected individual volunteer health care provider upon request of the VHCPP.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

641—88.14(135) Effect of eligibility protection. A fully executed protection agreement of an individual volunteer health care provider or protected clinic as eligible for participation in the VHCPP by the applicable state licensing board and the department is solely a determination that the state will defend and indemnify the individual volunteer health care provider or the protected clinic to the extent provided by Iowa Code section 135.24 and these rules. The protection is not an approval or indication of ability or competence and may not be represented as such. The protected clinic or sponsor entity through which the individual volunteer health care provider provides free health care services shall retain responsibility for determining that health care personnel are competent and capable of adequately performing the health care services to be provided.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

641—88.15(135) Reporting by a protected clinic or sponsor entity. A reporting form will be provided by the VHCPP to the participating protected clinic or sponsor entity at the time the protected clinic or sponsor entity agreement is approved by the VHCPP. Within 60 days following each calendar quarter, the protected clinic or sponsor entity shall provide a report to the VHCPP. At a minimum, the report shall include the number of clinic patients receiving free health care services and patient demographics by age, ethnicity, and insurance status.

[ARC 8791B, IAB 6/2/10, effective 7/7/10]

These rules are intended to implement Iowa Code section 135.24.

CHAPTER 89
DECISION-MAKING ASSISTANCE PROGRAM
AND PARENTAL NOTIFICATION OF INTENT
TO TERMINATE A PREGNANCY THROUGH ABORTION

641—89.1(135L) Title. This chapter may be cited as “Decision-Making Assistance Program and Parental Notification of Intent to Terminate a Pregnancy Through Abortion.”

641—89.2(135L) Purpose and scope. The rules contained in this chapter govern the procedures and documentation necessary for notification of a parent or grandparent of a pregnant minor prior to the termination of the pregnancy through abortion. These rules also describe the certification procedure for the decision-making assistance program.

641—89.3(135L) Definitions. The following definitions shall apply throughout the chapter.

“*Abortion*” means an abortion as defined in Iowa Code chapter 146.

“*Adult*” means a person 18 years of age or older.

“*Certification form*” means the form included in the written decision-making materials developed by the department.

“*Court*” means juvenile court.

“*Department*” means the Iowa department of public health.

“*Grandparent*” means the parent of an individual who is the parent of the pregnant minor.

“*Licensed physician*” means a physician as licensed by the Iowa board of medical examiners, Iowa Code chapters 148, 150, and 150A.

“*Medical emergency*” means a condition which, based upon a physician’s judgment, necessitates an abortion to avert the pregnant minor’s death, or for which a delay will create a risk of serious impairment of a major bodily function.

“*Minor*” means a person under 18 years of age who has not been and is not married.

“*Parent*” means a parent or a legal guardian or custodian of a pregnant minor.

“*Video*” means the video developed by the Iowa department of public health which provides information regarding the various options available to a pregnant minor with regard to the pregnancy, including a decision to continue the pregnancy to term and retain parental rights following the child’s birth, a decision to continue the pregnancy to term and place the child for adoption following the child’s birth, and a decision to terminate the pregnancy through abortion.

“*Written decision-making materials*” means the materials developed by the Iowa department of public health which provide information regarding the various options available to a pregnant minor with regard to the pregnancy as outlined in the definition of video.

641—89.4 to 89.10 Reserved.

DECISION-MAKING ASSISTANCE PROGRAM

641—89.11(135L) Purpose. The program is intended to provide assistance to minors in making informed decisions relating to pregnancy through the use of the video and written decision-making materials developed by the department.

89.11(1) The video and written decision-making materials contain information regarding the following options available to a pregnant minor with regard to the pregnancy:

- a. Continue the pregnancy to term and retain parental rights following the child’s birth;
- b. Continue the pregnancy to term and place the child for adoption following the child’s birth; and
- c. Terminate the pregnancy through abortion.

89.11(2) Reserved.

641—89.12(135L) Initial appointment of a pregnant minor with a licensed physician from whom an abortion is sought and certification procedure for the decision-making assistance program.

89.12(1) A licensed physician from whom a pregnant minor is seeking the performance of an abortion shall offer the viewing of the video and the written decision-making materials to the pregnant minor during the initial appointment relating to those services.

89.12(2) The pregnant minor shall sign and date the certification form provided in the written decision-making materials or an exact replica certifying that she has been offered a viewing of the video and the written decision-making materials.

a. The minor shall complete a certification form for the licensed physician providing medical services relating to the termination of the minor's pregnancy.

b. The licensed physician from whom an abortion is sought shall keep the original certification form as a part of the minor's medical record relating to the termination of the pregnancy.

c. A copy of the completed certification form shall be provided to the pregnant minor.

89.12(3) A licensed physician shall not knowingly perform an abortion on a pregnant minor prior to obtaining the completed certification form and completing the notification process.

641—89.13 to 89.20 Reserved.

NOTIFICATION PROCESS

641—89.21(135L) Notification of parent prior to the performance of abortion on a pregnant minor.

89.21(1) Notification shall be made to the parent of the pregnant minor at least 48 hours prior to the termination of a pregnancy through abortion unless a judicial waiver is granted as provided in Iowa Code section 135L.3, or unless any of the conditions of rule 89.22(135L) have been met.

a. The licensed physician who will perform the abortion shall provide notification in person or by mailing the notification by restricted certified mail to a parent of the pregnant minor at the usual place of abode of the parent.

b. For the purpose of delivery by restricted certified mail, the time of delivery is deemed to occur at 12 noon on the next day on which regular mail delivery takes place, subsequent to the mailing.

c. The notification form shall be in duplicate in the form that may be provided by the department or shall be in duplicate and include, at a minimum, the following:

(1) The name of the minor.

(2) Notification of the intent to terminate the pregnancy.

(3) The name, address, and relationship of the person to be notified.

d. The licensed physician who will perform the abortion shall keep the original notification form as a part of the minor's medical record relating to the termination of the pregnancy.

e. A copy of the completed notification form shall be provided to the pregnant minor.

89.21(2) If the pregnant minor objects to the notification of a parent prior to the performance of an abortion on the pregnant minor, the pregnant minor may petition the court to authorize waiver of the notification requirement pursuant to Iowa Code section 135L.3.

641—89.22(135L) Exceptions to notification of parent. The requirements of rule 89.21(135L) do not apply if any of the following conditions exist:

89.22(1) The abortion is authorized in writing by a parent entitled to notification.

89.22(2) The pregnant minor declares, in a written statement submitted to the licensed physician who will perform the abortion, a reason for not notifying a parent and a reason for notifying a grandparent of the pregnant minor in lieu of the notification of a parent.

a. The licensed physician who will perform the abortion shall keep all written documentation as a part of the minor's medical record relating to the termination of the pregnancy.

b. Upon receipt of the written statement from the pregnant minor, the licensed physician who will perform the abortion shall provide notification to a grandparent of the pregnant minor, specified by the pregnant minor, in the manner in which the notification of a parent was prescribed in rule 89.21(135L).

c. The notification form shall be in duplicate in the form that may be provided by the department or shall be in duplicate and include, at a minimum, the following:

- (1) The name of the minor.
- (2) Notification of the intent to terminate the pregnancy.
- (3) The name, address, and relationship of the person to be notified.
- (4) A declaration which informs the grandparent of the pregnant minor that the grandparent of the pregnant minor may be subject to civil action if the grandparent accepts notification.
- (5) A provision that the grandparent of the pregnant minor may refuse acceptance of notification and a provision that the grandparent immediately contact the licensed physician if refusing acceptance of the notification.

d. The licensed physician who will perform the abortion shall keep the original notification form as a part of the minor's medical record relating to the termination of the pregnancy.

e. A copy of the completed notification form shall be provided to the pregnant minor.

89.22(3) The licensed physician who will perform the abortion certifies in writing that a medical emergency exists which necessitates the immediate performance of an abortion in accordance with Iowa Code chapter 135L. The physician shall certify in writing the basis for the medical judgment that a medical emergency exists and place this written certification in the medical file of the pregnant minor.

89.22(4) The pregnant minor declares that the pregnant minor is a victim of child abuse pursuant to Iowa Code section 232.68, the person responsible for the care of the child is a parent of the child, and either the abuse has been reported pursuant to the procedures prescribed in Iowa Code chapter 232, division III, part 2, or a parent of the child is named in a report of founded child abuse.

89.22(5) The pregnant minor declares that the pregnant minor is a victim of sexual abuse as defined in Iowa Code chapter 709 and has reported the sexual abuse to law enforcement.

89.22(6) The pregnant minor elects not to allow notification of the pregnant minor's parent and a court authorizes waiver of the notification requirement following completion of the proceedings prescribed under Iowa Code chapter 135L.

641—89.23(135L) Physician compliance. A licensed physician shall not perform an abortion on a pregnant minor prior to compliance with the requirements outlined in rule 89.21(135L) or 89.22(135L).

641—89.24 and 89.25 Reserved.

641—89.26(135L) Fraudulent practice. A person who does any of the following is guilty of a fraudulent practice in the fourth degree pursuant to Iowa Code section 714.12:

89.26(1) Knowingly tenders a false original or copy of the signed and dated certification form described in rule 89.12(135L) or Iowa Code section 135L.2, to be retained by the licensed physician.

89.26(2) Knowingly tenders a false original or copy of the notification document mailed to a parent or grandparent of the pregnant minor under this chapter, a false original or copy of the written certification to be provided to a parent of a pregnant minor pursuant to rule 89.22(135L) or Iowa Code section 135L.6, or a false original or copy of the order waiving notification relative to the performance of an abortion on a pregnant minor.

These rules are intended to implement Iowa Code chapter 135L as amended by 1997 Iowa Acts, House File 121.

[Filed emergency 11/14/96 after Notice 10/9/96—published 12/4/96, effective 1/1/97]

[Filed emergency 7/11/97 after Notice 6/4/97—published 7/30/97, effective 7/11/97]

CHAPTER 90
IOWA CHILD DEATH REVIEW TEAM

641—90.1(135) Purpose. The purpose of the Iowa child death review team is to aid in the reduction of preventable deaths of children under the age of 18 years through the identification of unsafe consumer products; identification of unsafe environments; identification of factors that play a role in accidents, homicides and suicides which may be eliminated or counteracted; and promotion of communication, discussion, cooperation, and exchange of ideas and information among agencies investigating child deaths.
[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.2(135) Definitions.

“Team” means the Iowa child death review team.

“Unexcused absence” means failure by a team member to notify the chairperson of an anticipated absence from a team meeting.

641—90.3(135) Agency. The Iowa child death review team is established as part of the office of the state medical examiner. The office of the state medical examiner shall provide staffing and administrative support to the team as needed to collect data, organize meetings, and issue an annual report.
[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.4(135) Membership. The membership of the review team is subject to the provisions of Iowa Code sections 69.16 and 69.16A, relating to political affiliation and gender balance. Review team members who are not designated by another appointing authority shall be appointed by the state medical examiner. Membership terms shall be for three years. Members may not serve more than two consecutive terms.

90.4(1) The review team shall include the following:

- a. The state medical examiner’s designee.
- b. A certified or licensed professional who is knowledgeable concerning sudden infant death syndrome.
- c. A pediatrician who is knowledgeable concerning deaths of children.
- d. A family practice physician who is knowledgeable concerning deaths of children.
- e. One mental health professional who is knowledgeable concerning deaths of children.
- f. One social worker who is knowledgeable concerning deaths of children.
- g. A certified or licensed professional who is knowledgeable concerning domestic violence.
- h. A professional who is knowledgeable concerning substance abuse.
- i. A local law enforcement official.
- j. A county attorney.
- k. An emergency room nurse who is knowledgeable concerning the deaths of children.
- l. A perinatal expert.
- m. A representative of the health insurance industry.
- n. One other appointed at large.

The state medical examiner’s office may temporarily appoint other members to serve as experts, as needed, on a case-by-case basis.

90.4(2) Vacancies shall be filled in the same manner in which the original appointments were made. An appointment shall complete the original member’s term.

90.4(3) Three consecutive unexcused absences shall be grounds for the state medical examiner to consider dismissal of the team member and to appoint another. The chairperson of the team is charged with providing notification of absences.

[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.5(135) Officers. The review team shall elect a chairperson, a vice chairperson, and other officers as deemed necessary by the review team. Officers shall be elected at the first meeting of each fiscal year. Vacancy in the office of the chairperson shall be filled by elevation of the vice chairperson. Vacancy in the office of the vice chairperson shall be filled by election at the next meeting after the vacancy occurs. The

chairperson shall preside at all meetings of the team, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.6(135) Meetings. The team shall meet as determined by the state medical examiner or as determined by the review team.

[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.7(135) Expenses of team members. Rescinded ARC 4703C, IAB 10/9/19, effective 11/13/19.

641—90.8(135) Team responsibilities. The state medical examiner's office will be responsible for the collection of data for sudden unexpected or nonnatural deaths for all children under the age of 18 years that occur in the state of Iowa. The state medical examiner's office will review all child deaths in Iowa and will refer those deemed preventable for additional review by the child death review team. The state medical examiner's office will be responsible for data entry. The team shall perform the following responsibilities:

90.8(1) Collect, review, and analyze child death certificates and child death data, including patient records, other pertinent confidential information, and other information the review team deems appropriate concerning deaths of children under 18 years of age which have been deemed preventable by the state medical examiner's office. An annual report will be prepared for the governor and the general assembly concerning the cause and manner of child deaths. The report shall include factual information obtained through review and recommendations regarding prevention of child deaths.

90.8(2) Recommend to the governor and the general assembly interventions to prevent deaths of children based on an analysis of the cause and manner of such deaths.

90.8(3) Recommend to the agencies represented on the review team and to other agencies changes which may prevent child deaths.

90.8(4) Maintain the confidentiality of any patient records or other confidential information reviewed.

90.8(5) If deemed appropriate by the team at any point in the review, the team may recommend to the department of human services, appropriate law enforcement agencies, and any person involved with child protection interventions that may prevent harm to a child who is related to or is living in the same home as a child whose case is reviewed by the team.

90.8(6) Develop protocols for a child fatality review committee (see 641—Chapter 92) to be appointed by the state medical examiner on an ad hoc basis to immediately review the child abuse assessments which involve the fatality of a child under the age of 18 years. The state medical examiner shall appoint a medical examiner, a pediatrician, and a person involved with law enforcement to the committee.

90.8(7) The team may establish subcommittees to which the team may delegate some or all of the team's responsibilities set out in this rule.

[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.9(135) Liaisons.

90.9(1) The following individuals shall each designate a liaison to assist the team in fulfilling its responsibilities.

- a. Director of public health.
- b. Director of human services.
- c. Commissioner of public safety.
- d. Administrator of the bureau of vital records of the Iowa department of public health.
- e. Attorney general.
- f. Director of transportation.
- g. Director of the department of education.

90.9(2) The chairperson shall designate a liaison from the public at large.

90.9(3) The membership terms of the liaisons shall be for three years. The liaisons may not serve more than two consecutive terms.

[ARC 9248B, IAB 12/1/10, effective 1/5/11]

641—90.10(135) Confidentiality and disclosure of information. The team and liaisons shall maintain the confidentiality of all information and records used in the review and analysis of child deaths, including disclosure of information which is confidential under Iowa Code chapter 22 or any other provisions of state law. No information on individual deaths contained in the records described in this rule shall be disclosed except for the purposes of the team, committee or subcommittee meeting, and no confidential information received in preparation for or during the course of such meeting shall be removed from the meeting room except for further review as authorized by the team chairperson.

In preparation for review of an individual death by the team or its authorized committee or subcommittee, the chairperson of the team or the chairperson's designee is authorized to gather all information pertinent to the review. This information may include, but is not limited to, hospital records, physician's records, school records, day-care records, autopsy records, child abuse registry, investigation or assessment records, state public assistance records, traffic records, public safety records, law enforcement records, fire marshal's records, birth records, death records, and other relevant records necessary to conduct a complete review.

A person in possession or control of medical, investigative or other information pertaining to a child death and child abuse review shall allow the inspection and reproduction of the information by the department upon the request of the department, to be used only in the administration and for the duties of the Iowa child death review team. Information and records which are confidential under Iowa Code section 22.7 and chapter 235A, and information or records received from the confidential records, remain confidential under this rule. A person does not incur legal liability by reason of releasing information to the department as required under and in compliance with this rule.

641—90.11(135) Immunity and liability. Review team members and their agents are immune from any liability, civil or criminal, which might otherwise be incurred or imposed as a result of any act, omission, proceeding, decision, or determination undertaken or performed, or recommendation made as a review team member or agent provided that the review team members or agents acted in good faith and without malice in carrying out their official duties in their official capacity. A complainant bears the burden of proof in establishing malice or lack of good faith in an action brought against review team members involving the performance of their duties and powers.

A person who releases or discloses confidential data, records, or any other type of information in violation of this chapter is guilty of a serious misdemeanor.

These rules are intended to implement Iowa Code Supplement section 135.43.

CHAPTER 91
IOWA DOMESTIC ABUSE DEATH REVIEW TEAM

641—91.1(135) Purpose. The purpose of the domestic abuse death review team is to aid in the reduction of the incidence of domestic abuse deaths by accurately identifying the cause and manner of deaths occurring from domestic violence and by making recommendations for changes in policy and practice to improve community interventions for preventing domestic abuse deaths.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.2(135) Definitions.

“Team” means the Iowa domestic abuse death review team.

“Unexcused absence” means failure by a team member to notify the chairperson of an anticipated absence from a team meeting.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.3(135) Agency. The Iowa domestic abuse death review team is established as an independent agency of state government. The Iowa department of public health shall provide staffing and administrative support to the team.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.4(135) Membership. The membership of the team is subject to the provisions of Iowa Code sections 69.16 and 69.16A, relating to political affiliation and gender balance. Team members who are not designated by another appointing authority shall be appointed by the director of public health, in consultation with the attorney general. At least one member shall also be a member of the Iowa child death review team. Membership terms shall be for three years. One-third of the initial members shall serve for three years, one-third of the initial members shall serve for two years, and one-third of the initial members shall serve for one year, as designated by the appointing authority.

91.4(1) The team shall include the following:

- a. The state medical examiner or the state medical examiner’s designee.
- b. A licensed physician, physician assistant or nurse who is knowledgeable concerning domestic abuse injuries and deaths, including suicides.
- c. A licensed mental health professional who is knowledgeable concerning domestic abuse.
- d. A representative or designee of the Iowa coalition against domestic violence.
- e. A certified or licensed professional who is knowledgeable concerning substance abuse.
- f. A law enforcement official who is knowledgeable about domestic abuse and is a member of a state law enforcement association.
- g. A law enforcement investigator experienced in domestic abuse investigation.
- h. A prosecuting attorney experienced in prosecuting domestic abuse cases.
- i. A member of the judiciary appointed by the chief justice of the supreme court.
- j. A clerk of the district court appointed by the chief justice of the supreme court.
- k. A department of correctional services’ employee or subcontractor who is assigned batterers’ treatment program responsibilities and is knowledgeable about risk level assessment.
- l. An attorney licensed in this state who provides criminal defense assistance or child custody representation and who is experienced in dissolution of marriage proceedings.
- m. Both a female and a male victim of domestic abuse.
- n. A family member of a decedent whose death resulted from domestic abuse.

91.4(2) Vacancies shall be filled in the same manner in which the original appointments were made. An appointee shall complete the original member’s term.

91.4(3) Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the team member and the appointment of another. The chairperson of the team is charged with providing notification of absences.

91.4(4) The department may temporarily appoint other members to serve as experts, as needed, on a case-by-case basis.

91.4(5) Members of the team who are currently practicing attorneys or current employees of the judicial branch shall not participate in the following:

- a. A case review involving a case in which the team member is presently involved by professional capacity.
- b. Development of protocols for domestic abuse death investigations and team review.
- c. Development of regulatory changes related to domestic abuse deaths.

[ARC 9110B, IAB 10/6/10, effective 11/10/10; ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—91.5(135) Officers. Officers of the team shall be a chairperson and a vice chairperson and shall be elected at the first meeting of each fiscal year unless designated at the time of appointment. Vacancy in the office of chairperson shall be filled by elevation of the vice chairperson. Vacancy in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs. The chairperson shall preside at all meetings of the team, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.6(135) Meetings. The team shall meet upon the call of the chairperson, upon the request of a state agency, or as determined by the team. Robert's Rules of Order shall govern all meetings.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.7(135) Expenses of team members. The members of the team are eligible for reimbursement of actual and necessary expenses incurred in the performance of their official duties.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.8(135) Team duties and responsibilities.

91.8(1) The team shall perform the following duties:

- a. Prepare a biennial report to the governor, supreme court, attorney general, and the general assembly concerning the following subjects:

- (1) The causes and manner of domestic abuse deaths, including an analysis of factual information obtained through review of domestic abuse death certificates and domestic abuse death data, including patient records and other pertinent confidential and public information concerning domestic abuse deaths.

- (2) The contributing factors of domestic abuse deaths.

- (3) Recommendations regarding the prevention of future domestic abuse deaths, including actions to be taken by communities, based on an analysis of the contributing factors.

- b. Advise and consult the agencies represented on the team and other state agencies regarding program and regulatory changes that may prevent domestic abuse deaths.

- c. Develop protocols for domestic abuse death investigations and team review.

91.8(2) In performing duties pursuant to subrule 91.8(1), the review team shall:

- a. Review information concerning the relationship between the decedent victim and the alleged or convicted perpetrator from the point when the abuse began until the death occurred in order to identify any correlation between events in the relationship and the escalation of the abuse.

- b. Review documents such as orders of protection, dissolution, custody, and support or related court records.

- c. Determine whether patterns regarding these events can be established in relation to domestic abuse deaths in general, and consider such conclusions in making recommendations for the biennial report.

91.8(3) The team may establish committees or panels to which the team may assign some or all of the team's responsibilities set out in this rule.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.9(135) Liaisons. The following individuals shall each designate a liaison to assist the team in fulfilling its responsibilities:

1. Director of public health.
2. Director of human services.
3. Commissioner of public safety.
4. Director of corrections.
5. Attorney general.
6. Director of education.
7. State court administrator.
8. Director of the law enforcement academy.
9. Director of human rights.
10. Administrator of the bureau of vital records of the department of public health.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.10(135) Confidentiality and disclosure of information. The team and liaisons shall maintain the confidentiality of all information and records used in the review and analysis of domestic abuse deaths, including disclosure of information which is confidential under Iowa Code chapter 22 or any other provisions of state law.

91.10(1) No information on individual deaths contained in the records described in this rule shall be disclosed except for the purposes of the team, committee or subcommittee meeting, and no confidential information received in preparation for or during the course of such meeting shall be removed from the meeting room except for further review as authorized by the team chairperson.

91.10(2) In preparation for review of an individual death by the team or its authorized committee or subcommittee, the chairperson of the team or the chairperson's designee is authorized to gather all information pertinent to the review. This information may include, but is not limited to:

- a. Hospital records;
- b. Physician's records;
- c. School and child care records;
- d. Autopsy records;
- e. Child abuse registry, investigation or assessment records;
- f. State public assistance records;
- g. Traffic and public safety records;
- h. Law enforcement records;
- i. Fire marshal's records;
- j. Birth and death records; and
- k. Other relevant records necessary to conduct a complete review.

91.10(3) A person in possession or control of medical, investigative or other information pertaining to a domestic abuse death and related incidents and events preceding the domestic abuse death shall allow the inspection and reproduction of the information by the department upon the request of the department to be used only in the administration and for the duties of the Iowa domestic abuse death review team.

91.10(4) Information and records which are confidential under Iowa Code section 22.7 and Iowa Code chapter 235A, and information or records received from the confidential records, remain confidential under this rule.

91.10(5) A person does not incur legal liability by reason of releasing information to the department as required under and in compliance with this rule.

91.10(6) A person who releases or discloses confidential data, records, or any other type of information in violation of this rule is guilty of a serious misdemeanor.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

641—91.11(135) Immunity and liability.

91.11(1) Review team members and their agents are immune from any liability, civil or criminal, which might otherwise be incurred or imposed as a result of any act, omission, proceeding, decision, or determination undertaken or performed, or recommendation made as a review team member or agent provided that the review team members or agents acted in good faith and without malice in carrying out their official duties in their official capacity.

91.11(2) A complainant bears the burden of proof in establishing malice or lack of good faith in an action brought against review team members involving the performance of their duties and powers.

[ARC 9110B, IAB 10/6/10, effective 11/10/10]

These rules are intended to implement Iowa Code sections 135.108 to 135.112.

[Filed 11/10/98, Notice 9/9/98—published 12/2/98, effective 1/6/99]

[Filed ARC 9110B (Notice ARC 8974B, IAB 7/28/10), IAB 10/6/10, effective 11/10/10]

[Filed ARC 6847C (Notice ARC 6645C, IAB 11/16/22), IAB 2/8/23, effective 3/15/23]

CHAPTER 92
IOWA FATALITY REVIEW COMMITTEE

641—92.1(135) Purpose. The purpose of the child fatality review committee is to determine whether the department of human services and others involved with the case of child abuse responded appropriately.

641—92.2(135) Definitions.

“Child abuse assessment” means an assessment performed in accordance with Iowa Code section 232.71B.

“Child fatality” means the death of a child under the age of 18.

“Committee” means the Iowa child fatality review committee.

“Department” means the department of public health.

“Multidisciplinary team” means the group of individuals as defined in Iowa Code section 235A.13.

[ARC 9355B, IAB 2/9/11, effective 3/16/11]

641—92.3(135) Committee. The committee is an ad hoc committee appointed by the state medical examiner on a case-by-case basis. The committee shall include a medical examiner, a pediatrician who is knowledgeable concerning deaths of children, and a person involved in law enforcement. The committee may also consult with individuals with specific child death expertise as necessary to perform the duties and responsibilities of the committee. The office of the state medical examiner shall provide staffing and administrative support to the committee.

[ARC 9355B, IAB 2/9/11, effective 3/16/11]

641—92.4(135) Formation of the committee. The state medical examiner may appoint a committee to review the death of a child under the age of 18 upon the request from a member of the legislature or the governor in cases in which a report of suspected child abuse had been filed with the department of human services pursuant to Iowa Code section 232.70 within two years preceding the child’s death.

[ARC 9355B, IAB 2/9/11, effective 3/16/11]

641—92.5(135) Committee protocol for review. In determining whether the department of human services and others involved with the case of child abuse responded appropriately, the committee shall review records relevant to the child’s death, which may include but are not limited to the following:

1. All reports of suspected child abuse on the identified child made to the department of human services pursuant to Iowa Code section 232.70;
2. All child abuse assessments performed on the identified child in accordance with Iowa Code section 232.71B;
3. All other department of human services records maintained on the identified child;
4. All relevant law enforcement records which refer to the identified child;
5. All relevant medical and hospital records of the identified child;
6. All relevant court records which refer to the identified child;
7. Records of any multidisciplinary team which reviewed the case of the identified child;
8. Records of any public entity which reviewed the case of the identified child; and
9. All relevant records maintained by a day care provider, other child care provider, preschool, elementary school, middle school, or high school which refer to the identified child.

The committee shall also consult with any multidisciplinary team that is operating in the area where the fatality occurred.

641—92.6(135) Content of report.

92.6(1) Upon completion of the review, the state medical examiner shall submit the committee’s report to:

- a. The governor or the governor’s designee;
- b. The member of the senate or employee of the general assembly designated by the majority leader or minority leader of the senate;

c. The member of the house of representatives or employee of the general assembly designated by the speaker or minority leader of the house of representatives.

92.6(2) The committee report shall include findings concerning the case and recommendations for changes to prevent child fatalities when similar circumstances exist. The report shall include but is not limited to the following information:

a. The dates, outcomes, and results of any actions taken by the department of human services and others in regard to each report and allegation of child abuse involving the child who died.

b. The results of any review of the case performed by a multidisciplinary team, or by any other public entity that reviewed the case.

c. Confirmation of the department of human services' receipt of any report of child abuse involving the child, including confirmation as to whether or not any assessment involving the child was performed in accordance with Iowa Code section 232.71B, the results of any assessment, a description of the most recent assessment and the services offered to the family, the services rendered to the family, and the basis for the department's decisions concerning the case.

92.6(3) If deemed appropriate by the committee, the committee may, at any point in the review, recommend to the department of human services, appropriate law enforcement agencies, and any other person involved with child protection, interventions intended to prevent harm to a child who is related to or is living in the same home as a child whose case is reviewed by the committee.

[ARC 9355B, IAB 2/9/11, effective 3/16/11]

641—92.7(135) Consultation with county attorney. Prior to issuing the report, the committee shall consult with the county attorney responsible for prosecution of the alleged perpetrator of the child fatality. The committee's report shall include child abuse information associated with the case and the child but is subject to the restrictions applicable to the department of human services for release of information concerning a child fatality or near fatality in accordance with Iowa Code section 235A.15(9).

641—92.8(135) Supplemental report. Following the completion of the trial of any alleged perpetrator of the child fatality and the appeal period for the granting of a new trial, the committee shall issue a supplemental report containing the information that was withheld, in accordance with rule 92.7(135), so as not to jeopardize the prosecution or the rights of the alleged perpetrator to a fair trial as described in Iowa Code section 235A.15(9) "f" and "g."

641—92.9(135) Confidentiality and disclosure of information. The committee shall have access to patient records and other confidential information. The committee may disseminate confidential information in the committee's report which shall be submitted to the governor and the general assembly. For all other purposes, the committee shall maintain the confidentiality of all records which are confidential under Iowa Code section 22.7, Iowa Code chapter 235, or other provision of law. A person in possession or control of medical, investigative, or assessment information or other information pertaining to a child death and child abuse review shall allow the inspection and reproduction of the information by the department, upon the request of the department, to be used only in the administration and for the duties of the Iowa child fatality review committee. A person does not incur legal liability by reason of releasing information to the department as required under and in compliance with this rule.

641—92.10(135) Immunity and liability. Review committee members are immune from any liability, civil or criminal, which might otherwise be incurred or imposed as a result of any act, omission, proceeding, decision, or determination undertaken or performed, or recommendation made as a review committee member provided that the review committee members acted in good faith and without malice in carrying out their official duties in their official capacity. A complainant bears the burden of proof in establishing malice or lack of good faith in an action brought against review committee members involving the performance of their duties and powers.

A person who releases or discloses confidential data, records, or any other type of information in violation of this chapter is guilty of a serious misdemeanor.

These rules are intended to implement Iowa Code section 135.43(4).

CHAPTER 93
MANDATORY REPORTER TRAINING CURRICULA
Rescinded **ARC 4704C**, IAB 10/9/19, effective 11/13/19

CHAPTER 94
CHILD PROTECTION CENTER GRANT PROGRAM

641—94.1(135) Scope and purpose. A child protection center grant program is established to provide grants to eligible applicants for the purpose of establishing new child protection centers and to support existing child protection centers. Grants may be available to eligible organizations that meet, or that are in the process of implementing, child protection center standards established by the National Children's Alliance. If sufficient funding is available, the program shall, at a minimum, award a grant to a child protection center in or available to each department of human services region in Iowa. Implementation of the grant program is subject to the availability of funding.

641—94.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

"Child abuse" means abuse as defined by Iowa Code section 232.68(2).

"Child protection center" or *"child advocacy center"* means a comprehensive, child-focused program, designed by communities to meet their needs, based in a facility that allows law enforcement, child protection professionals, prosecutors, and the mental health and medical communities to work together to handle child abuse cases. Child advocacy center is synonymous with child protection center.

"Child protection worker" means a worker as defined by Iowa Code section 232.68(2A).

"Culturally competent" means the capacity to function in more than one culture, requiring the ability to appreciate, understand and interact with members of diverse populations within the community.

"Department" means the Iowa department of public health.

"Developmentally appropriate" means that services are based on human development and learning, individual characteristics and experiences, social and cultural contexts.

"Director" means the director of the Iowa department of public health.

"Family advocate" means an individual who supports a child provided service through a child protection center and ensures access to formal or informal community services as needed by the child or the child's family.

"Forensic interview" means a face-to-face meeting between individuals to elicit information and that follows a process suitable for a law court or public debate.

"Multidisciplinary team" means individuals with many education levels that encompass the individuals' beliefs and training in fields of health, education, human service, justice, faith, and others.

641—94.3(135) Goals. A child protection center's goals for victims of child abuse allegations shall be:

1. To provide consistent and expedient response and follow-up to abuse reports.
2. Coordination of activities to investigate, prosecute, and treat child abuse.
3. To advocate for medical and mental health resources to effectively help the child and the child's family.
4. To reduce the number of interviews and interactions with a victim.
5. To provide consistent and compassionate support for the child and the child's family.
6. To ensure that the child is not further victimized by the system designed to protect the child.
7. To increase successful prosecutions.

641—94.4(135) Review process.

94.4(1) The department shall establish a request for proposal and application process for organizations eligible to receive funding. The department shall establish a process to review applications, which includes receiving input from a review committee. The review process and review criteria shall be described in the request for proposals.

94.4(2) The director shall create a committee to review proposals and make recommendations to the director. At a minimum, committee membership shall include representation from:

- a. State departments of human services, justice and public health;
- b. Iowa Medical Society;
- c. Iowa Hospital Association;
- d. Iowa Nurses Association; and

- e.* Iowa chapter of the National Association of Social Workers.

641—94.5(135) Eligibility and criteria. To be eligible for a child protection center grant, an organization shall:

94.5(1) Have acquired partial membership rank as a child advocacy center from the National Children's Alliance and shall identify a plan to acquire full membership rank within one year of receiving a state grant.

94.5(2) Have in place an interagency memorandum of understanding which meets the requirements of Iowa Code section 135.118. The applicant shall provide in the application written information in the following areas:

- a.* Data, statistics and facts from an assessment of need and assets in the community to support a child protection center for children.
- b.* Identification of barriers to the child protection center to reach the purpose and goals for children as may exist in federal, state or local rules, regulations, codes, policies or procedures.
- c.* A plan to request and advocate waivers of federal, state, or local rules, regulations, codes, policies, or procedures to remove or reduce barriers.
- d.* The child protection center's access to information regarding all suspected or confirmed child abuse/neglect victims in the identified service area.
- e.* The child protection center's provision of 24-hour access to center staff for support, questions and referrals regarding child abuse.
- f.* Identification of matching local funds to support and sustain the child protection center in the community.
- g.* A plan for community education on prevention of child abuse and neglect.
- h.* Collaboration agreements with providers of human services, child health services, early education services, and all other potential community partners to support the purpose and goals of the child protection center.
- i.* The child protection center's ability to access and utilize alternate funds for activities provided.

641—94.6(135) Appeals. An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by rule 641—176.8(135,17A).

These rules are intended to implement Iowa Code section 135.118.

[Filed 3/14/03, Notice 2/5/03—published 4/2/03, effective 5/7/03]

CHAPTER 95
VITAL RECORDS: GENERAL ADMINISTRATION

[Prior to 12/12/12, see [641] Ch 96, 98.1, Chs 103, 104]

641—95.1(144) Definitions. For the purpose of 641—Chapters 95 to 100, the following definitions shall apply:

“Administrative costs” means costs for the registration, collection, preservation, modification and certification of records, including but not limited to costs related to copying, regular mailing, searching, staffing, and maintenance of systems.

“Advanced registered nurse practitioner” or *“ARNP”* means an individual licensed pursuant to Iowa Code chapter 152.

“Age of majority” means the chronological moment when a child legally assumes majority control over the child’s own person and actions and decisions, thereby terminating the legal control and legal responsibilities of the child’s parents over and for the child. The period of minority extends to the age of 18 years, but every minor attains majority by marriage.

“Amendment” means a change made by the state registrar upon request from an entitled person as described in 641—95.8(144) to an obvious error, omission, or transposition of letters in a word of common knowledge one year or more after the event.

“Birth center” means a facility or institution, which is not an ambulatory surgical center or a hospital or in a hospital, in which births are planned to occur following a normal, uncomplicated, low-risk pregnancy.

“Birthing institution” means a private or public hospital licensed pursuant to Iowa Code chapter 135B that has a licensed obstetric unit or is licensed to provide obstetric services.

“Burial-transit permit” means a permit which is required to assume custody of a dead body or fetus pursuant to Iowa Code section 144.32.

“Certificate” means the written or electronic legal document containing the facts of an event; also used interchangeably with the term “record.”

“Certificate of birth resulting in stillbirth,” pursuant to Iowa Code section 144.31A, means a noncertified copy issued based upon a properly filed fetal death certificate to record the birth of a stillborn fetus.

“Certified copy” means an official copy of a registered vital record that is authenticated by the state registrar or county registrar. A certified copy contains a statement certifying the facts are true and accurate as recorded, is printed on security paper, and has authentication seals and signatures. A certified copy excludes all entries indicated as confidential or for statistical information.

“Commemorative certificate,” pursuant to Iowa Code section 144.45A, means a commemorative abstract of an Iowa birth or marriage record that has been properly filed.

“Competent and disinterested person” means an individual of legal age who is acquainted with both applicants who plan to marry.

“Confidential information” means data or information that is on a vital record, is not considered public information, and is restricted as to its release pursuant to Iowa Code chapter 144 or other provision of federal or state law.

“Correction” means a change made by the state registrar upon observation, upon query, or upon request from an entitled person as described in 641—95.8(144) to an obvious error, omission, or transposition of letters in a word of common knowledge within one year and prior to the first anniversary of the event.

“County registrar” means the county recorder with the authority to record vital records and issue certified copies. The county registrar operates under the state vital records laws and rules and the guidance of the state registrar pursuant to Iowa Code sections 144.5 and 144.9. Pursuant to Iowa Code section 331.601(4), if the office of the county recorder has been abolished, “county registrar” means the office to which the duties are assigned by the county board of supervisors.

“County resident copy” means a properly filed, clearly marked working copy of a decedent’s death certificate which is sent to and recorded by the county registrar of the county of the decedent’s residence in the event the death occurred outside the county of the decedent’s residence.

“Court of competent jurisdiction” means the appropriate court for the type of action. When used to refer to inspection of an original certificate of birth based upon an adoption, “court of competent jurisdiction” means the court in which the adoption was ordered.

“Cremated remains” means all the remains of the cremated human body recovered after the completion of the cremation process, including pulverization which leaves only bone fragments reduced to unidentifiable dimensions, and may include the residue of any foreign matter including casket material, bridgework, or eyeglasses that were cremated with the human remains.

“Cremation” means the technical process, using heat and flame, that reduces human remains to bone fragments, with the reduction taking place through heat and evaporation. Cremation shall include the processing, and may include the pulverization, of the bone fragments.

“Custody” means guardianship or control of vital records, including both physical possession, referred to as physical custody, and legal responsibility, referred to as legal custody, unless one or the other is specified. The state registrar shall not transfer legal custody of vital records to another agency for purposes of granting public access until all the records have been purged of all confidential information.

“Day” means calendar day.

“Dead human body” means a lifeless human body or parts or bones of a body, if, from the state of the body, parts, or bones, it may reasonably be concluded that death recently occurred.

“Death” means the condition as defined in Iowa Code section 702.8.

“Declaration of paternity registry” means a registry for a putative father to declare paternity pursuant to Iowa Code section 144.12A. The declaration does not constitute an affidavit of paternity filed pursuant to Iowa Code section 252A.3A.

“Delayed birth record” means the registration of a live birth event occurring in Iowa one or more years after the date of birth which is clearly marked as delayed and shall show on its face the date of the delayed registration.

“Delayed death record” means the registration of a death event occurring in Iowa one or more years after the date of death which is clearly marked as delayed and shall show on its face the date of the delayed registration.

“Delayed marriage record” means the registration of a marriage event occurring in Iowa one or more years after the event which is clearly marked as delayed and shall show on its face the date of the delayed registration.

“Department” means the Iowa department of public health.

“Disinterment permit” means a permit which allows the removal of a dead human body or fetus from its original place of burial, entombment or interment for the purpose of autopsy or reburial.

“Electronic access” means authority given by the state registrar to a county registrar to access electronic vital records through the electronic statewide vital records system for purposes of retrieving information. The state registrar shall provide guidelines for electronic access and the retrieval of information from the electronic statewide vital records system.

“Electronic statewide vital records system” means the combined vital records system for registration of birth records, registration of death records, issuance of certified copies of vital records by the state registrar and county registrar, and fee accounting.

“Emancipated minor” means a person younger than 18 years of age who has obtained the age of majority by court order.

“Fetal death” means a death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy which is not an induced termination of pregnancy. The death is indicated by the fact that, after such expulsion or extraction, the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles. In determining a fetal death, heartbeats shall be distinguished from transient cardiac contractions, and respirations shall be distinguished from fleeting respiratory efforts or gasps.

“Filing” means the presentation of a certificate, report, or other record of a live birth, death, fetal death, adoption, marriage, dissolution, or annulment for registration pursuant to Iowa Code chapter 144.

“Final disposition” means the burial, interment, cremation, removal from the state, or other disposition of a dead body or fetus.

“Foundling” means a living infant of unknown parentage whose place of birth is where the infant is found and whose date of birth shall be determined by approximation.

“Funeral director” means a person licensed in Iowa to practice mortuary science pursuant to Iowa Code chapter 156.

“Gestational surrogate arrangement” or *“surrogate mother arrangement,”* as defined in Iowa Code section 710.11, means an arrangement whereby a female agrees to be artificially inseminated with the sperm of a donor, to bear a child, and to relinquish all rights regarding that child to the donor or donor couple.

“Health care provider” means an individual licensed under Iowa Code chapter 148, 148C, 148D, or 152 or any individual who provides medical services under the authorization of the licensee.

“Induced termination of pregnancy” means the use of any means to terminate the pregnancy of a woman known to be pregnant with the intent other than to produce a live birth or to remove a dead fetus as defined in Iowa Code section 144.29A(7) “b.”

“Institution” means a facility as defined in Iowa Code section 144.1(10), including “hospital” as defined in Iowa Code section 135B.1(3) but not including “birth center” as defined in Iowa Code section 135.61(2).

“Institutional health facility” means a hospital as defined in Iowa Code section 135B.1, including a facility providing medical or health services that is open 24 hours per day, seven days per week and that is a hospital emergency room or a health care facility as defined in Iowa Code section 135C.1.

“Jurisdiction” means the state or county to which legal authority for the system of vital statistics has been granted by statute.

“Last name” means surname.

“Lineal consanguinity” means the existence of a line of descent in which one person is descended in a direct lineal relationship to another: as between the registrant and the registrant’s parent, grandparent, great-grandparent, and so upward, in the direct ascending line; or between the registrant and the registrant’s child, grandchild, great-grandchild and so downward in the direct descending line; or any siblings of the registrant.

“Live birth” means the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. In determining a live birth, heartbeats shall be distinguished from transient cardiac contractions, and respirations shall be distinguished from fleeting respiratory efforts or gasps.

“Marriage license valid date” means the day on which the marriage license becomes valid and on or after which the parties are authorized to marry. When the marriage license valid date is computed, the date of application shall be excluded. The marriage license shall become valid after the expiration of three calendar days after the date of application, unless earlier validated by a court of competent jurisdiction.

“Medical certification” means a statement which attests that the medical information reported on the certificate of death or fetal death is accurate to the best of the medical certifier’s knowledge.

“Medical certifier” means an Iowa-licensed physician, physician assistant, advanced registered nurse practitioner, or medical examiner who attests that the death event has taken place and who determines the cause and manner of death.

“Medical examiner” means the medical legal officer who makes the determination of the cause of death in nonroutine deaths such as non-natural, sudden, or unattended deaths or other deaths which affect the public interest.

“Modification” means any change made to a record that has been accepted and registered, such as a correction, an amendment, a change after adoption or paternity determination, or any other change.

“Mutual consent voluntary adoption registry” means a registry which authorizes adult adopted children, adult siblings, and the biological parents of adult adoptees to register to obtain identifying birth information.

“Natural cause of death” means a death due to a disease or the aging process and not due to external causes.

“Newborn safe haven registration” means the registration of the birth of a living infant of unknown parentage who has been abandoned or left at some unknown time after birth in a location other than the place of delivery.

“Non-birthing institution” means a private or public hospital licensed pursuant to Iowa Code chapter 135B that does not have a licensed obstetric unit or is not licensed to provide obstetric services but may provide obstetric services on an emergency basis.

“Non-institution birth” means a live birth that occurs outside of an institution and not en route to an institution.

“Non-natural cause of death,” pursuant to Iowa Code section 144.28(1) *“a,”* means the death is a direct or indirect result of physical, chemical, thermal, or electrical trauma, or drug or alcohol intoxication or other poisoning.

“Notification of record search” means the document issued to the applicant when the record requested cannot be located through a search of registered records. The document contains a certification statement, is printed on security paper, and has authentication seals and signatures.

“Officiant” means (1) a judge of the Iowa supreme court, court of appeals, or district court, including a district associate judge, an associate juvenile judge, or a judicial magistrate, and including a senior judge as defined in Iowa Code section 602.9202(3), or (2) a person ordained or designated as a leader of the person’s religious faith.

“Physician” means an individual licensed pursuant to Iowa Code chapter 148.

“Physician assistant” means an individual licensed pursuant to Iowa Code chapter 148C.

“Presumptive death” means a death event presumed to have occurred in Iowa where no human body is found and a court of competent jurisdiction has determined the death has occurred.

“Putative father” means a man who is alleged to be or who claims to be the biological father of a child born to a woman to whom the man is not married at the time of the conception or birth of the child or at any time during the period between the conception and birth of the child.

“Record of death” means the compilation of those entries of a death, whether electronic or paper, which are contained in indexed systems which record the death event occurring in Iowa. “Record of death” shall include the certificate of death.

“Record of fetal death” means the compilation of those entries of a fetal death, whether electronic or paper, which are contained in indexed systems which record a fetal death event occurring in Iowa. “Record of fetal death” shall include the certificate of fetal death.

“Record of foreign born adoption” means the compilation of those entries of a live birth event for a child born in a foreign country and adopted by an Iowa resident. “Record of foreign born adoption” shall include the certificate of foreign birth and shall not constitute U.S. citizenship.

“Record of live birth” means the compilation of those entries of a live birth event, whether electronic or paper, which are contained in indexed systems which record a live birth event occurring in Iowa. “Record of live birth” shall include the certificate of live birth.

“Record of marriage” means the compilation of those entries of a marriage event, whether electronic or paper, which are contained in indexed systems which record a marriage event occurring in Iowa. “Record of marriage” shall include the certificate of marriage.

“Registrant” means the person named on the certificate as the person who was born, died, or was married.

“Registration” means the process by which vital statistics records are completed, filed, and incorporated by the state registrar in the official records.

“Report of dissolution or annulment” means the statistical report of dissolution or annulment, whether electronic or paper, excluding all entries indicated as confidential or for statistical information only.

“Report of termination of pregnancy” means the aggregated compilation of the information received by the department on terminations of pregnancies for each information item listed, with the exception of the report tracking number, the health care provider code, and any set of information for which the number is so small that the confidentiality of any person to whom the information relates may be compromised.

“Research” means the systematic investigation designed primarily to develop or contribute to scientific, medical, public health or psychosocial disciplines and generalized knowledge and not for private gain.

“Sealed” means the removal from inspection of any copy of an original certificate in the custody of the county registrar and the state registrar.

“Security paper” means standardized paper for issuing certified copies of vital record events that meets, at a minimum, national requirements for security features embedded within the paper to deter tampering, counterfeiting, photocopying, or imaging in order to help prevent fraudulent use of the certified copy and prevent identity theft.

“Single parent birth” means any record of live birth for which there is a reference or statement on the certificate or entry which directly indicates “no” regarding “born in wedlock” or “married”; or any record of live birth for which there is reference or statement on the certificate or entry that either parent is “unknown” or “anonymous”; or any certificate or entry which reflects the omission or absence of the name of the father of the child.

“Spontaneous termination of pregnancy” means the occurrence of an unintended termination of pregnancy at any time during the period from conception to 20 weeks’ gestation and is not a spontaneous termination of pregnancy at any time during the period from 20 weeks or greater which is reported to the department as a fetal death under Iowa Code section 144.29.

“Standard birth registration” means a vital record of a live birth event that occurred in Iowa which was submitted and accepted for registration within one year of the event.

“State registrar” means the director of the department or the director’s designee.

“Stillbirth” means an unintended fetal death occurring after a gestation period of 20 completed weeks or more or an unintended fetal death of a fetus with a weight of 350 or more grams.

“System of vital statistics” or *“system”* means the registration, collection, preservation, amendment, and certification of vital statistics records, and activities and records related thereto including the data processing, analysis, and publication of statistical data derived from such records.

“Uncertified copy” means an unofficial copy of a registered vital record which is not printed on security paper and which does not contain any authentication by the issuing jurisdiction. Uncertified copies shall contain an overstamp such as: “Not for Legal Purposes,” “Administrative Use Only,” “Deceased,” “For Genealogical Purposes Only,” “Working Copy,” or any other overstamp as authorized by the state registrar.

“Vital records” means certificates or reports of birth, death, fetal death, marriage, dissolution, annulment, and related data.

“Vital statistics” means data derived from reports, certificates, and records of live birth, death, fetal death, induced termination of pregnancy, marriage, dissolution of marriage or annulment, and data related thereto.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2275C, IAB 12/9/15, effective 1/13/16; ARC 5199C, IAB 10/7/20, effective 11/11/20]

641—95.2(144) Vital records and statistics. There is established a division in the department which shall install, maintain, and operate the system of vital statistics throughout the state. No official system for the registration of births, deaths, fetal deaths, adoptions, marriages, dissolutions, and annulments shall be maintained in the state or any of its political subdivisions other than the one provided for in Iowa Code chapter 144, including, but not limited to, a system maintained by any agency or private entity.

95.2(1) No person shall prepare or issue any certificate which purports to be an original certified copy or a copy of a certificate of birth, death, fetal death, adoption, marriage, dissolution, or annulment except as provided for in Iowa Code chapter 144 and authorized by the state registrar.

95.2(2) The state registrar and the county registrar shall not maintain or issue copies of any vital record of an event occurring outside the state registrar’s or county registrar’s jurisdiction except as provided for in Iowa Code chapter 144 and authorized by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2933C, IAB 2/1/17, effective 3/8/17; see Delay note at end of chapter]

641—95.3(144) Forms—property of department. All forms, certificates and reports pertaining to the registration of vital events are the property of the department and shall be surrendered to the state registrar upon demand. Official designated forms used for the express purpose of creating a vital record event shall not be accessible to the general public unless authorized by rule.

95.3(1) The forms supplied or approved for reporting vital events shall be used for official purposes as provided for by law, rules and instructions of the state registrar.

95.3(2) No forms, except those furnished or approved by the state registrar, shall be used in the reporting of vital events or the making of copies of vital records.

95.3(3) Security paper used to report vital events shall be maintained in a secure location accessible only to the state and county registrars and their employees for administrative purposes.

95.3(4) Security paper shall be used to issue certified copies of Iowa vital records and shall be maintained in a secure location accessible only to the state and county registrars and their employees for administrative purposes.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—95.4(144) Information by others.

95.4(1) Any person having knowledge of the facts shall furnish information that the person possesses regarding any birth, death, fetal death, adoption, marriage, dissolution, or annulment, upon demand of the state registrar.

95.4(2) Every person in charge of an institution, or the person's designee, shall maintain a record of personal particulars and data concerning each person admitted or confined to the institution pursuant to Iowa Code section 144.47. This record shall include information required by the standard certificate of birth, death, and fetal death forms issued under the direction of the state registrar. The record shall be made at the time of admission based on the information provided by such person, but when information cannot be obtained from the person, it shall be obtained from the most knowledgeable relative or person acquainted with the facts. The name and address of the person providing the information shall be a part of the record.

95.4(3) Records maintained under this rule shall be retained for a period of not less than ten years and shall be made available for inspection by the state registrar upon demand.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—95.5(144) Handling of vital records.

95.5(1) State equipment and state vital records shall not be handled or accessed except by the state registrar, the state registrar's employees, or other authorized personnel for administrative purposes.

95.5(2) The county registrar shall provide assistance to the public in accessing vital records designated as public records in the custody of the county registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—95.6(144) Fees.

95.6(1) *Fees for services provided by state registrar or county registrar.* The following fees shall be charged and remitted for the various services provided by the state registrar or the county registrar.

a. The state registrar or county registrar, as applicable, shall charge a fee of \$15 for a certified copy of a vital record. If, following a search, no record is found and no certified copy is printed, the \$15 fee may be retained.

b. The state registrar shall charge a fee of \$15 to prepare an adoption certificate, amend a certificate, amend a certificate of live birth to reflect a legal change of name, prepare a delayed certificate, process other administrative or legal actions, prepare a noncertified copy of an original certificate of birth pursuant to Iowa Code sections 144.23A and 144.24A, or prepare copies of supporting documents on file in the state registrar's office. No fee shall be charged for establishment of paternity.

c. The state registrar shall charge a fee of \$25 to file a completed application for the mutual consent voluntary adoption registry.

d. The state registrar shall charge a fee of \$5 to update applicant information maintained in the mutual consent voluntary adoption registry and the declaration of paternity registry.

e. The state registrar shall charge a fee of \$15 to amend an abstract or other legal documentation in support of the preparation of a new certificate.

f. The state registrar shall charge a fee of \$35 to issue a commemorative copy of a certificate of birth or a certificate of marriage pursuant to Iowa Code section 144.45A. Fees collected shall be deposited in the emergency medical services fund established in Iowa Code section 135.25.

g. The state registrar shall charge a fee of \$15 for the purpose of issuing an uncertified copy of a certificate of birth resulting in stillbirth pursuant to Iowa Code section 144.31A.

h. The state registrar shall charge a fee of \$15 for the purpose of issuing a certificate of nonviable birth pursuant to Iowa Code section 144.31B.

95.6(2) *Overpayments.* Any overpayment of \$5 or less received by the state registrar for the copying of vital records or for the preparation or amending of a certificate shall not be refunded and shall be retained by the department.

95.6(3) *Certified copy of modified vital record.* When an individual is in possession of a previously issued certified copy of a vital record and the original record is subsequently modified, the individual may request and receive a certified copy of the modified record without charge if the certified copy prior to modification is relinquished to the registrar's office that issued the certified copy, unless otherwise directed by the state registrar.

95.6(4) *Search of county registrar's records—fee for uncertified copy.* A person who is requesting an uncertified copy of a vital record in the custody of the county registrar shall conduct the search of the county files to locate the record. If a copy is requested, the county registrar may charge a fee pursuant to Iowa Code section 22.3. The fee shall be retained by the county.

95.6(5) *Distribution of fees.*

a. All fees collected by the county registrar and the state registrar shall be distributed as follows:

(1) For fees collected by a county registrar, with the exception of the fee in subrule 95.6(4), the county registrar shall retain \$4 of each \$15 fee collected by that office. Fees collected shall be divided as follows:

1. For a birth certificate or a marriage certificate, the state registrar shall receive \$8, and \$3 shall be deposited in the general fund of the state, except for the fee collected pursuant to paragraph 95.6(1) "f."

2. For a death certificate, the state registrar shall receive \$6, the office of the state medical examiner shall receive \$3, and \$2 shall be deposited in the general fund of the state.

(2) For fees collected by the state registrar, the state registrar shall retain all fees, with the exception of the fees in paragraph 95.6(1) "a," of which the state registrar shall retain \$9 of each \$15 fee collected for the issuance of certified copies. The \$6 balance of certified copy fees collected by the state registrar shall be divided as follows:

1. For a birth certificate or a marriage certificate, \$6 shall be deposited in the general fund of the state.

2. For a death certificate, the office of the state medical examiner shall receive \$3, and \$3 shall be deposited in the general fund of the state.

b. All fees retained by the state registrar shall be added to the vital records fund established by the department pursuant to Iowa Code section 144.46A.

c. All fees received by the office of the state medical examiner shall be added to the operating budget established for the operation of that office.

95.6(6) *Fee for search to verify vital statistics record.* A fee shall be charged by the state registrar for each search conducted for the purpose of providing verification of vital statistics data to an agency authorized to receive such data under subrule 95.12(2).

a. The amount of the fee shall be determined in an agreement with the department and shall be dependent on the nature and scope of the project and the resources required to obtain the data requested.

b. The state registrar shall retain the full amount of all fees collected under this subrule in the vital records fund established pursuant to Iowa Code section 144.46A.

95.6(7) *Fee for researcher access to vital statistics data.* A fee shall be charged to each researcher who is provided access to vital statistics data in accordance with Iowa Code section 144.44 and the required agreement executed with the department. The amount of the fee shall be based on the nature and scope of the research project and resources required to obtain the data requested.

a. The state registrar shall allocate the fees for copies of birth, marriage, and death certificates provided to researchers pursuant to the distribution of fees set forth in subrule 95.6(5).

b. The state registrar shall retain in the vital records fund established pursuant to Iowa Code section 144.46A the full amount of fees collected from researchers for searching files or records to create a data file.

95.6(8) *Service member who died while on active duty—waiver of fee.* The certified copy fee for a birth certificate or a death certificate of a service member, as defined in Iowa Code section 29A.90, who died while on active duty shall be waived for a period of one year from the date of death. Application for the certified copy shall be made by an entitled family member as described in 641—95.8(144) of the deceased service member or the entitled family member’s legal representative. Documentation shall be submitted at the time of application to substantiate the date of death and active duty status.

95.6(9) *Retention of applications and reports.* An application for a certified copy of a vital record in Iowa shall be retained by the county registrar for a minimum of six months from date of issuance of the certified copy. All financial reports for vital records fees shall be retained by the county registrar for a minimum of three calendar years.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1074C, IAB 10/2/13, effective 1/1/14; see Delay note at end of chapter; ARC 1402C, IAB 4/2/14, effective 5/7/14; ARC 2275C, IAB 12/9/15, effective 1/13/16; ARC 4398C, IAB 4/10/19, effective 5/15/19; ARC 6108C, IAB 12/29/21, effective 2/2/22; ARC 6849C, IAB 2/8/23, effective 3/15/23; ARC 8043C, IAB 5/29/24, effective 7/3/24]

641—95.7(144) General public access of vital records in the custody of the county registrar. A vital record may be in the custody of the county registrar if the event occurred in that county and the record is not excluded by statute or definition for purposes of confidentiality.

95.7(1) There shall be public access and the right to inspect all vital records in the custody of the county registrar after the vital records are purged of confidential information pursuant to rule 641—95.11(144). The county registrar shall allow the general public access to the electronic statewide vital records system to search as a public user as a right under Iowa Code chapter 22 for events which occurred in that county.

95.7(2) Information inspected and copied shall not be used to establish an official system for the registration of vital statistics except as authorized by Iowa Code chapter 144.

95.7(3) County registrars may issue uncertified copies of vital records held in the registrars’ physical custody or accessible through the electronic statewide vital records system, except those records excluded by statute. Uncertified copies issued by the county registrar shall be issued on plain white paper and clearly stamped “not for legal purposes.” Security paper provided by the state registrar shall not be used to produce uncertified copies.

95.7(4) For records available in the electronic statewide vital records system, the state registrar shall send to the county registrars a list of all records that have been modified. County registrars shall, as directed by the state registrar, remove all forms of any vital record in their physical custody from the county vital records system if the vital record appears on the list of modified records.

95.7(5) For records not available in the electronic statewide vital records system, the state registrar shall send a copy of any modified vital record to the county of event and, if the record is a death record, to the county of residence.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2275C, IAB 12/9/15, effective 1/13/16; ARC 2933C, IAB 2/1/17, effective 3/8/17; see Delay note at end of chapter]

641—95.8(144) Direct tangible interest in and entitlement to a vital record. Certified copies of vital records may be issued by the state registrar or county registrar upon written application, payment of the required fee pursuant to paragraph 95.6(1) “a,” and demonstration of a verifiable, direct tangible interest and entitlement.

95.8(1) The following persons shall be considered to have a direct tangible interest and entitlement and are authorized to obtain a certified copy of a vital record:

a. The registrant, if the registrant is of legal age, has reached the age of majority, or is an emancipated minor.

b. A member of the registrant’s immediate legal family, including:

- (1) Current spouse or surviving spouse;
- (2) Children;
- (3) Mother or father if listed on the registrant's birth certificate;
- (4) Sibling, if sibling has reached the age of majority;
- (5) Maternal grandparents, or paternal grandparents if the father is listed on the birth certificate; or
- (6) Step-parent or step-child if:
 - 1. Legal parent and step-parent are currently married at the time of application; or
 - 2. Step-parent is the surviving spouse of the legal parent and not remarried.
- c. The documented legal representative of the registrant or the registrant's immediate legal family, including:
 - (1) An attorney;
 - (2) A court-appointed guardian;
 - (3) A foster parent;
 - (4) A funeral director, for up to one year following the decedent's date of death; or
 - (5) A legal executor.
- d. Other persons who demonstrate a direct tangible interest and entitlement when it is shown that the certified copy is needed to determine or protect a personal or property interest and the interest is for the benefit of the registrant.

95.8(2) The following persons shall not be deemed to have direct tangible interest and entitlement or be authorized to secure vital records:

- a. Biological parents of adopted persons in the absence of a court order from the court of competent jurisdiction;
- b. Biological family members of adopted persons;
- c. Adopted persons requesting biological family records; or
- d. Commercial firms or agencies requesting lists of vital record events, or lists of names, or lists of addresses, or that are not legal representatives requesting records on behalf of entitled individuals.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—95.9(144) Search and issuance of a certified copy of a vital record. The search and issuance of a certified copy of a vital record shall be requested from the state registrar or county registrar.

95.9(1) Only entitled applicants as described in rule 641—95.8(144) may submit requests for certified copies of vital records.

95.9(2) A person requesting a search and issuance of a certified copy of a vital record shall provide in writing the following:

- a. The name of the person or persons whose vital record is to be searched;
- b. The purpose of such request;
- c. The relationship to the registrant of the person making the request; and
- d. The notarized signature and the address of the person making the request.

95.9(3) In addition to a completed written application, the applicant shall provide:

- a. A current, legible government-issued photo identification of the applicant making the request or other identification documents acceptable to the state registrar; and
- b. Payment of the required fee before the search is conducted.

95.9(4) The state registrar and county registrar shall have the authority to require additional supporting documents to prove direct tangible interest and entitlement pursuant to rule 641—95.8(144).

95.9(5) If, after the search is conducted, no record is on file and the state registrar or county registrar issues a "notification of record search" on certified paper, the fee for the search may be retained pursuant to paragraph 95.6(1) "a."

95.9(6) If a certified copy of a vital record is issued and sent to the applicant using a mail service and the applicant does not receive the certified copy, the state registrar or the county registrar may replace the certified copy without an additional fee using an Affidavit of Non-Receipt. The applicant must contact the issuing registrar within 90 days of the date of request. A minimum of 30 days must have elapsed from the time the certified copy was mailed. The applicant shall read the instructions, complete the Affidavit of Non-Receipt and have the applicant's signature notarized. The original Affidavit of Non-Receipt and a

photocopy of the applicant's driver's license must be reviewed by the issuing registrar before the certified copy can be replaced for no additional fee. The state registrar or county registrar may refuse any Affidavit of Non-Receipt when the state registrar or county registrar determines proof of receipt, fraud or misrepresentation. The state registrar shall give to the registrant a notice in writing of the state registrar's reason and intention to refuse the Affidavit of Non-Receipt.

95.9(7) If printed from the electronic statewide vital records system by a county registrar, the certified copy of a vital record shall be stamped by the issuing county registrar to reflect the county in which the certified copy was issued.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2275C, IAB 12/9/15, effective 1/13/16]

641—95.10(144) Search and issuance for genealogy or family history. The search and issuance of a vital record for genealogy may be requested from the state registrar or county registrar upon written application and payment of the required fee pursuant to paragraph 95.6(1) "a."

95.10(1) The state registrar or county registrar may issue certified copies of a vital record for genealogy or family history to an applicant who can satisfactorily demonstrate a line of direct lineal consanguinity and to aunts, uncles, and cousins not past twice removed.

95.10(2) All certified copies issued for genealogy or family history shall be clearly marked "for genealogical purposes only."

95.10(3) No certified copy shall be issued for genealogy or family history if the registrant is known to be living.

95.10(4) If, after the search is conducted, no record is on file, the state registrar or county registrar shall issue a "notification of record search" on certified paper, and the fee for the search shall be retained pursuant to paragraph 95.6(1) "a."

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2933C, IAB 2/1/17, effective 3/8/17; see Delay note at end of chapter]

641—95.11(144) Registrars' responsibility for maintenance of confidentiality.

95.11(1) The state registrar and county registrar shall maintain the confidentiality of the following material, records, and information:

a. Entries indicated as confidential or statistical in nature on the face of the record or otherwise confidential by law;

b. Any record which is ordered sealed by the state registrar or pursuant to a court order.

95.11(2) The county registrar shall take all necessary steps to ensure that confidential information reflected on vital records has been redacted from general public access. If confidential information is included with accessible information, only accessible information shall be made available to the general public for examination.

95.11(3) The county registrar shall employ at a minimum all of the following methods to ensure confidentiality:

a. Permanently cover or remove, by appropriate means, confidential information;

b. Promptly process the notice to seal a record as directed by the state registrar; and

c. Seal and not reproduce confidential information when copies of vital records are made.

95.11(4) The county registrar may charge reasonable administrative costs to reflect the expenses for efforts required to allow general public access, examination and the assurance of confidentiality of this material and information pursuant to the authority of Iowa Code chapter 22.

a. The administrative cost is to be paid by persons who request the services provided by the county registrar, including supervising, copying or providing a suitable place for such work.

b. The county registrar shall retain all administrative costs collected to allow general public access, examination, and the assurance of confidentiality of the vital record and information pursuant to the authority of Iowa Code chapter 22.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2275C, IAB 12/9/15, effective 1/13/16]

641—95.12(144) Disclosure of data.

95.12(1) The state registrar may disclose data from the system of vital statistics to federal, state, county or municipal agencies of government that request such data in the conduct of their official duties,

subject to conditions the state registrar may impose to ensure that the use of the data is limited to official purposes.

a. The aforementioned agencies shall not provide the certified copy or a copy of the vital record, or release information contained therein, to the person named on the certificate, a member of the person's legal family, or the person's legal representative.

b. Certified copies issued to the aforementioned agencies shall be appropriately stamped, for example, "administrative purposes only" or "for veteran affairs purposes only."

95.12(2) Confidential verifications of the facts contained in vital records may be furnished by the state registrar to any federal, state, county or municipal government agency or other entity in the conduct of the agency's or entity's official duties, subject to conditions the state registrar may impose to ensure that the verification is limited to official purposes. Confidential verification of the facts contained in vital records may be furnished by a county registrar to another county office, within the county jurisdiction, in the conduct of the county's official duties, subject to conditions the state and county registrar may impose to ensure that the verification is limited to official purposes.

a. Such confidential verifications shall be on forms prescribed and furnished by the state registrar or on forms furnished by the requesting agency or entity and acceptable to the state registrar, or the state registrar may authorize the verification in other ways.

b. The aforementioned agencies and entities shall not provide the original or a copy of the verified certificate, or release information contained therein, to the person named on the certificate, a member of the person's legal family, or the person's legal representative.

95.12(3) The state registrar may permit the use of data from vital statistics for research purposes subject to conditions the state registrar may impose to ensure the use of the data is limited to such research purposes. No data shall be furnished from vital statistics for research purposes until the state registrar has prepared in writing the conditions under which the data may be used and has received an agreement signed by a responsible agent of the research organization agreeing to meet and conform to such conditions.

95.12(4) The state registrar may transmit to the county registrar data needed to produce certified copies of vital records pursuant to rule 641—95.8(144).

95.12(5) The state registrar may transmit to the statewide immunization registry information from birth certificates for the sole purpose of identifying those children in need of immunizations. The state registrar may impose conditions to ensure that the use of the information is limited to official purposes.

95.12(6) The state medical examiner or the county medical examiner may request an uncertified copy of a death certificate before the death certificate is accepted and filed at the county registrar's office.

a. The copy shall be clearly stamped "administrative purposes only."

b. The death certificate shall be for the sole use of the state medical examiner or county medical examiner and shall not be used as a legal document, be distributed, be copied or be maintained other than to be made a part of the investigatory file.

c. If the state medical examiner or any county medical examiner determines the death does not warrant further investigation, the state medical examiner or county medical examiner shall destroy the uncertified copy of the death certificate.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2275C, IAB 12/9/15, effective 1/13/16]

641—95.13(144) Preparation of certified copies. Certified copies of vital records may be prepared and issued by the state registrar or the county registrar pursuant to rules 641—95.3(144) and 641—95.9(144).

95.13(1) Certified copies of vital records may be made by mechanical, electronic, or other reproductive processes, except for confidential information. Certified copies shall be issued using security paper that is prescribed by the state registrar.

95.13(2) When a certified copy is issued, each certification shall contain a statement certifying that the facts are the true facts recorded in the issuing office, the date issued, the name of the issuing office, the registrar's signature or an authorized copy thereof, and the seal of the issuing office.

95.13(3) No person shall prepare or issue any certificate which purports to be an original, certified copy, or copy of a certificate of birth, death, fetal death, or marriage.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—95.14(144) Access to original certificate of birth prior to adoption. Notwithstanding any provision of law to the contrary, an adopted person who was born in this state and whose original certificate of birth was substituted with a new certificate of birth pursuant to Iowa Code section 144.24 based upon the adoption, or an entitled person, may apply for and obtain a noncertified copy of the original certificate of birth of the adopted person who is the subject of the original certificate of birth in accordance with this rule, including with any required redaction of personally identifiable information pursuant to Iowa Code section 144.24A(2).

95.14(1) Entitlement.

a. If an adopted person who is the subject of the original certificate of birth is submitting the application, the adopted person shall be at least 18 years of age at the time the application is filed.

b. If an entitled person is submitting the application, the adopted person who is the subject of the original certificate of birth shall be deceased at the time the application is filed.

95.14(2) The adopted person or the entitled person requesting a noncertified copy of the original certificate of birth shall file a written application with the state registrar on a form and in the manner prescribed by the state registrar.

95.14(3) Upon receipt of the written application, proof of identification pursuant to paragraph 95.9(3) “*a.*,” and payment of a fee pursuant to paragraph 95.6(1) “*b.*,” the state registrar shall issue a noncertified copy of the original certificate of birth to the applicant in accordance with this rule, including with any required redaction of personally identifiable information pursuant to Iowa Code section 144.24A(2). At the time of such issuance, the state registrar shall also provide to the applicant any contact preference form or medical history form completed and submitted to the state registrar including with any required redaction of personally identifiable information pursuant to Iowa Code section 144.24A(2).

a. A biological parent may file a contact preference form prescribed by the state registrar in accordance with the provisions outlined in Iowa Code section 144.24A(2) and state the biological parent’s preference for contact by an adopted person or an entitled person following application for and issuance of the noncertified copy of the original certificate of birth under this rule. The contact preference form shall be provided to the biological parent in accordance with Iowa Code section 600A.4. A contact preference form may be completed or updated by the biological parent at any time at the request of the biological parent.

b. A biological parent may file a medical history form prescribed by the state registrar in accordance with the provisions outlined in Iowa Code section 144.24A(3) and provide medical history of the biological parent and any blood relatives. The medical history form shall be provided to the biological parent in accordance with Iowa Code section 600A.4. A medical history form may be completed or updated by the biological parent at any time at the request of the biological parent.

c. Upon receipt of a completed contact preference form or medical history form, the state registrar shall attach any such completed form to the original certificate of birth.

d. For the purposes of this rule, “entitled person” means the spouse of the adopted person who is deceased or an adult related to the adopted person who is deceased within the second degree of consanguinity.

e. An application may be submitted under this rule by an adopted person or an entitled person to obtain a noncertified copy of an adopted person’s original certificate of birth in accordance with this rule, if the adopted person who is the subject of the original certificate of birth was born before January 1, 1971.

f. Beginning January 1, 2022, an application may be submitted under this rule by an adopted person or an entitled person to obtain a noncertified copy of an adopted person’s original certificate of birth in accordance with this rule, notwithstanding the date of birth of the adopted person who is the subject of the original certificate of birth prescribed under paragraph 95.14(3) “*b.*”

This rule is intended to implement Iowa Code sections 144.24A and 600A.4.

[ARC 6108C, IAB 12/29/21, effective 2/2/22]

641—95.15(144) Certificate of nonviable birth.

95.15(1) As used in this rule:

“*Certificate of nonviable birth*” means a document issued based upon a nonviable birth.

“*Health care provider*” means the same as defined in Iowa Code section 144.29A.

“*Hospital*” means the same as defined in Iowa Code section 135B.1.

“Nonviable birth” means an unintentional, spontaneous fetal demise occurring after demonstration of a doppler-detected heartbeat and prior to the twentieth week of gestation during a pregnancy that has been verified by a health care provider.

95.15(2) A health care provider who attends or diagnoses a nonviable birth or a hospital at which a nonviable birth occurs shall advise a patient who experiences a nonviable birth that the patient may request a certificate of nonviable birth as provided in this section and, upon request by the patient, shall provide a letter certifying the nonviable birth to the patient on the form prescribed by the state registrar.

95.15(3) The department shall issue a certificate of nonviable birth to a patient within 60 days of receipt of a request and certification letter. The request shall be made on the form prescribed by the state registrar.

95.15(4) The certificate of nonviable birth shall contain all of the following:

a. The date of the nonviable birth.

b. The name and gender of the baby, if known.

(1) If the name is not furnished by the patient, the department shall complete the certificate with the name “baby boy” or “baby girl” and the last name of the patient.

(2) If the gender is unknown, the department shall complete the certificate with the name “baby” and the last name of the patient.

c. The name of the patient and, if married, the patient’s spouse.

d. The statement: “This certificate is not proof of live birth.”

95.15(5) The fees collected shall be remitted to the treasurer of state for deposit in the general fund of the state and the vital records fund in accordance with Iowa Code section 144.46A.

95.15(6) A certificate of nonviable birth shall not be filed or registered with the department. The department shall not register the nonviable birth associated with a certificate issued under this section or use the nonviable birth in calculating live birth statistics.

95.15(7) A certificate of nonviable birth shall not be used to establish, bring, or support a civil cause of action seeking damages against any person for bodily injury, personal injury, or wrongful death for a nonviable birth.

95.15(8) This section shall only apply to, and a certificate of nonviable birth may be requested and issued for, nonviable births occurring on or after January 1, 2000.

This rule is intended to implement Iowa Code section 144.31B.

[ARC 6849C, IAB 2/8/23, effective 3/15/23]

641—95.16(144) Cancellation of fraudulent records.

95.16(1) When the state registrar determines that a certificate was registered through fraud or misrepresentation, the state registrar shall give to the registrant a notice in writing of the state registrar’s intention to cancel said certificate.

95.16(2) The notice of cancellation shall give the registrant an opportunity to appear and show cause why the certificate shall not be canceled.

a. The notice may be served on the registrant, or, in the case of a minor or incompetent person, on the parent or guardian, by the forwarding of the notice by certified mail to the last-known address on file in the office of the state registrar.

b. The certificate shall not be available for certification unless the registrant, parent or guardian within 30 days after the date of mailing the notice shows cause satisfactory to the state registrar why the certificate shall not be canceled.

95.16(3) Upon presentation to the state registrar of a court order stating a marriage certificate was registered through fraud or misrepresentation, the state registrar shall remove said record from the vital statistics system. The state registrar shall order the county registrar to remove any record related to the marriage.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; ARC 6108C, IAB 12/12/12, effective 2/2/22; see Delay note at end of chapter; ARC 6849C, IAB 2/8/23, effective 3/15/23]

641—95.17(144) Unlawful acts.

95.17(1) *Serious misdemeanors.* Any person who reports information required under Iowa Code chapter 144 and who commits any of the following acts is guilty of a serious misdemeanor:

- a.* Willfully and knowingly makes any false statement in a report, record, or certificate required to be filed or in an application for an amendment or willfully and knowingly supplies false information intending that such information be used in the preparation or amendment of any such report, record, or certificate.
- b.* Without lawful authority and with the intent to deceive, makes, alters, amends, or mutilates any report, record, or certificate required to be filed or a certified copy of such report, record, or certificate.
- c.* Willfully and knowingly uses or attempts to use or furnish to another for use for any purpose of deception any certificate, record, or report or certified copy thereof.
- d.* Willfully and knowingly alters, amends, or mutilates any copy, certified copy, record or report.
- e.* Willfully, with the intent to deceive, uses or attempts to use any certificate of birth or certified copy of a record of birth knowing that such certificate or certified copy was issued based upon a record which is false in whole or in part or which relates to the birth of another person.
- f.* Willfully and knowingly furnishes a certificate of birth or certified copy of a record of birth with the intention that it be used by a person other than the person to whose birth the record relates.
- g.* Disinterring a body in violation of Iowa Code section 144.34.
- h.* Knowingly violates a provision of Iowa Code section 144.29A.

95.17(2) *Simple misdemeanors.* Any person committing any of the following acts is guilty of a simple misdemeanor:

- a.* Knowingly transports or accepts for transportation, interment, or other disposition a dead body without an accompanying permit as provided in Iowa Code sections 144.32, 144.33, and 144.34.
- b.* Refuses to provide information required by Iowa Code chapter 144.
- c.* Willfully violates any of the provisions of Iowa Code chapter 144 or refuses to perform any of the duties imposed upon the person.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; ARC 6108C, IAB 12/12/12, effective 2/2/22; see Delay note at end of chapter; ARC 6849C, IAB 2/8/23, effective 3/15/23]

641—95.18(144) Enforcement assistance.

95.18(1) The department shall report cases of alleged violations to the proper county attorney, with a statement of the facts and circumstances, for such action as is appropriate.

95.18(2) Upon request of the department, the attorney general shall assist in the enforcement of the provisions of Iowa Code chapter 144.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; ARC 6108C, IAB 12/12/12, effective 2/2/22; see Delay note at end of chapter; ARC 6849C, IAB 2/8/23, effective 3/15/23]

These rules are intended to implement Iowa Code chapter 144.

CHAPTER 96 BIRTH REGISTRATION

[Prior to 12/12/12, see [641] 95.1 to 95.4, Ch 99, 100.3]

641—96.1(144) Definitions. For the purpose of this chapter, the definitions in 641—Chapter 95 shall apply.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.2(144) Forms—property of department. All forms, certificates and reports pertaining to the registration of vital events are the property of the department and shall be surrendered to the state registrar upon demand.

96.2(1) The forms supplied or approved for reporting birth events shall be used for official purposes as provided for by law, rules and instructions of the state registrar.

96.2(2) No forms, except those furnished or approved by the state registrar, shall be used in the reporting of birth events or the making of copies of vital records.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.3(144) Standard birth registration—up to seven days.

96.3(1) A certificate of live birth for each live birth which occurs in this state shall be filed as directed by the state registrar within seven days after the birth.

96.3(2) The person responsible for registering the certificate of live birth pursuant to rules 641—96.5(144), 641—96.6(144) and 641—96.7(144) shall:

- a. Utilize the official birth worksheet to report all information and any additional documentation as needed to complete the standard form for a certificate of live birth; and
- b. Submit all required fees and reports with the birth registration.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.4(144) Standard birth registration—seven days to one year.

96.4(1) After seven days but within one year, a certificate of live birth for each live birth which occurs in this state shall be filed as directed by the state registrar.

96.4(2) The person responsible for registering the certificate of live birth pursuant to rules 641—96.5(144), 641—96.6(144) and 641—96.7(144) shall:

- a. Utilize the official birth worksheet to report all information and any additional documentation as needed to complete the standard form for a certificate of live birth; and
- b. Submit all required fees and reports with the birth registration.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.5(144) Birthing institutions.

96.5(1) When a live birth occurs in an institution or en route to an institution, the person in charge of the institution or the person's designated representative, utilizing the official birth worksheet, shall within seven days:

- a. Obtain the personal data;
- b. Obtain the signature of the mother or her legal spouse or other signature as directed by the state registrar;
- c. Provide the medical information required;
- d. Certify that the child was born alive at the place, date, and time stated; and
- e. File the certificate using the electronic birth registration system or as directed by the state registrar.

96.5(2) The birthing institution shall submit the fee report and remit the fees to the state registrar pursuant to rule 641—96.16(144).

96.5(3) The birthing institution shall maintain the birth worksheet for a minimum of ten years.

96.5(4) Upon demand of the state registrar, the birth worksheet and other information about the birth event shall be made available for inspection by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—96.6(144) Non-birthing institutions.

96.6(1) Institutions that do not register birth records through the electronic birth registration system shall request instructions from the state registrar.

96.6(2) The person in charge of the non-birthing institution or the person's designee shall submit to the state registrar for registration of the live birth at a minimum the following:

- a.* A cover letter that is on business letterhead of the institution and that identifies the live birth submitted for registration, supports the facts of the live birth, and contains the original signature of the person responsible for registering the live birth;
- b.* A copy of the hospital delivery report, emergency department admittance, or physician notes;
- c.* The original Iowa official birth worksheet completed and signed by the mother, or her legal spouse, or as directed by the state registrar; and
- d.* Payment of the fees, which shall be included with the birth worksheet.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—96.7(144) Non-institution birth.

96.7(1) In case of a non-institution Iowa live birth, the official non-institution birth worksheet shall be completed and filed with the state registrar by one of the following in the indicated order of priority:

- a.* The physician in attendance at or immediately after the live birth.
- b.* Any other person, including a certified nurse midwife or any person providing assistance with the birth, in attendance at or immediately after the live birth.
- c.* The mother or her legal spouse.
- d.* The person in charge of the premises where the live birth occurred.

96.7(2) Evidence in support of the facts of live birth shall be included in a cover letter, which shall contain the notarized signature of the person responsible for registering the birth. A certificate of live birth shall be completed and filed upon presentation of the following clear and convincing evidence by the individual responsible for filing the certificate:

- a.* Evidence of pregnancy including:
 - (1) Prenatal record;
 - (2) A statement from a physician, certified nurse midwife, or other health care provider qualified to determine pregnancy;
 - (3) A statement from a public health nurse or other health care provider documenting a prenatal home visit; or
 - (4) Other evidence acceptable to the state registrar.
- b.* Evidence the infant was born alive including:
 - (1) A statement from the physician, certified nurse midwife or other health care provider who saw or examined the infant;
 - (2) A statement from a public health nurse or other health care provider documenting a postnatal home visit; or
 - (3) Other evidence acceptable to the state registrar.
- c.* Clear and convincing evidence acceptable to the state registrar of the mother's presence in this state at the reported place and date of the live birth.

96.7(3) An Iowa-licensed certified nurse midwife may preregister with the state registrar by submitting a completed Iowa-Licensed CNM Pre-Registration Application For Home Births and a clear photocopy of that person's current government-issued photo identification.

a. To register a live birth, certified nurse midwives who are preregistered shall submit to the state registrar the following:

- (1) A cover letter that is on the business letterhead, that identifies the live birth submitted for registration, that supports the facts of the live birth, and that contains the original signature of the person responsible for registering the live birth;
- (2) The original official non-institution birth worksheet completed and signed pursuant to subrule 96.7(5) or as directed by the state registrar;
- (3) Payment of fees, which shall be included with the birth worksheet; and
- (4) Other evidence acceptable to the state registrar as requested.

b. It is the responsibility of the individual preregistering to update any information provided in the individual's original registration.

96.7(4) A certified nurse midwife, or any person providing assistance with the birth, who is not preregistered prior to submitting a certificate of live birth for registration shall follow subrules 96.7(1), 96.7(2) and 96.7(5) for all live births the person attends outside a birthing institution.

96.7(5) The official non-institution birth worksheet shall include a notarized signature of the mother or her legal spouse and shall be accompanied by a clear photocopy of that person's current government-issued photo identification. If photo identification is unavailable, other identifying documentation may be acceptable to the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—96.8(144) Gestational surrogate arrangement birth registration. Establishment of a certificate of live birth for a child born of a gestational surrogate arrangement shall conform to the process established pursuant to rule 641—99.15(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.9(144) Foundling birth registration.

96.9(1) The person assuming physical custody of a foundling shall, within one business day of finding the infant, contact the state registrar for specific directions and guidance for filing the certificate of live birth.

96.9(2) Foundling registration shall be completed in the standard manner by the state registrar pursuant to Iowa Code section 144.14. Within five days after assuming physical custody of the foundling, the custodian of the foundling shall provide on the official birth worksheet the following minimum birth data and other data required by the state registrar:

- a.* The date when and the place where the child was found;
- b.* The sex, color or race, and approximate age of the child;
- c.* The name and address of the person or institution that has assumed physical custody of the child;
- d.* The name given to the child by the custodian;
- e.* The name, title, and license number, if any, of the person acting as the certifier to the facts of the foundling registration;
- f.* Parentage information, if the parent is known;
- g.* A cover letter with supporting documentation; and
- h.* Any additional information known.

96.9(3) The place where the child was found shall be entered as the place of birth and the date of birth shall be determined by approximation. The information provided on the official birth worksheet shall constitute the certificate of live birth.

96.9(4) The record shall be on file only at the state registrar's office, and all supporting documentation shall be placed in a sealed file, which shall be opened only by order of a court of competent jurisdiction or for vital records administrative purposes.

96.9(5) Pursuant to Iowa Code section 144.14, if the child is properly identified after the registration, the certificate of live birth shall be reestablished as needed and all records pertaining to the foundling registration shall be sealed along with the original supporting documentation, which shall be opened only by order of a court of competent jurisdiction or for vital records administrative purposes.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.10(144) Newborn safe haven registration.

96.10(1) Newborn safe haven registration procedures shall apply to living infants who have been abandoned or left at an institutional health facility.

96.10(2) The person assuming physical custody of the living infant pursuant to Iowa Code section 233.2(2)"a" shall, within one business day of assuming custody, contact the state registrar for specific directions and guidance for registering the birth.

96.10(3) If the name of the parent is unknown, newborn safe haven registration shall be completed in the standard manner by the state registrar pursuant to Iowa Code section 144.14. Within five days after

assuming physical custody of the infant, the custodian shall provide on the official birth worksheet the following minimum birth data and other data required by the state registrar:

- a. The date when and the place where the child was found;
- b. The sex, color or race, and approximate age of the child;
- c. The name and address of the person or institution that has assumed physical custody of the child;
- d. The name given to the child by the custodian;
- e. The name, title, and license number, if any, of the person acting as the certifier to the facts of the newborn safe haven registration;
- f. A cover letter with supporting documentation; and
- g. Any additional information known.

96.10(4) If the name of the parent is disclosed to the institutional health facility, the facility shall file the certificate of live birth as required pursuant to Iowa Code sections 144.13 and 233.2(2) “c.”

96.10(5) Pursuant to Iowa Code section 144.14, if the child is properly identified after the newborn safe haven registration, the birth record shall be reestablished as needed and all records pertaining to the newborn safe haven registration shall be sealed along with the original supporting documentation, which shall be opened only by order of a court of competent jurisdiction or for vital records administrative purposes.

96.10(6) The record shall be on file only at the state registrar’s office, and all supporting documentation shall be placed in a sealed file which shall be opened only by order of a court of competent jurisdiction or for vital records administrative purposes. The confidentiality of the live birth certificate shall be maintained pursuant to Iowa Code sections 233.2(2) “c” and 144.43.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.11(144) Birth registration following a foreign-born adoption.

96.11(1) A certificate of foreign birth shall be established by the state registrar for a child born in a foreign nation upon the state registrar’s receipt of a completed Certificate of Adoption Report form from an Iowa court of competent jurisdiction or upon request of the resident adoptive parent or parents and the state registrar’s receipt of all of the following documents:

- a. The authenticated adoption decree in both the foreign language and the English translation, which shall contain the official signature of the translator, or a certified copy of an adoption decree from an Iowa court of competent jurisdiction;
- b. If the decree does not contain information to establish the certificate of foreign birth, the adoptee’s authenticated birth certificate in both the foreign language and the English translation, which shall contain the official signature of the translator;
- c. Evidence of the adoptee’s permanent residence such as a passport or citizenship papers;
- d. A certified copy of the certificate of live birth of each adoptive parent; and
- e. A notarized statement that is on letterhead from the licensed adoption agency or certified adoption investigator and that establishes the parent or parents were residents of Iowa at the time the adoption was final in the foreign nation. The statement will not be required if the parent’s or parents’ Iowa address is shown in the adoption documents.

96.11(2) The certificate of foreign birth shall not constitute U.S. citizenship.

96.11(3) The state registrar shall charge the adoptive parent or parents the appropriate fee for the registration of a certificate of foreign birth for a foreign-born child adopted by a parent who resided in Iowa at the time of adoption pursuant to Iowa Code section 144.13A.

96.11(4) Administrative and certified copy fees shall be charged and remitted as provided in rule 641—95.6(144).

96.11(5) The evidence presented shall be on file only at the state registrar’s office, and all supporting documentation shall be placed in a sealed file which shall be opened only by order of a court of competent jurisdiction or for vital records administrative purposes.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.12(144) Birth registration fees. A fee is required for each birth registered pursuant to Iowa Code sections 144.13, 144.13A, 144.15, 144.18, 144.23, 144.25A, and 600.15.

96.12(1) The parents shall be charged and the person responsible for filing the certificate of live birth shall remit to the state registrar the \$20 fee for the standard registration of a certificate of live birth and the \$15 fee for a certified copy of the birth certificate pursuant to Iowa Code section 144.13A.

96.12(2) The individual filing a delayed certificate of live birth shall be charged and shall remit to the state registrar the \$20 fee for the registration of a delayed certificate of live birth for a registrant 17 years of age or younger pursuant to Iowa Code sections 144.13A, 144.15, and 144.18.

96.12(3) The adoptive parents shall be charged and shall remit to the state registrar the \$20 fee for the registration of a certificate of foreign birth pursuant to Iowa Code sections 144.13A and 144.25A.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.13(144) Fee collection. If a person responsible for the registration of a certificate of live birth under Iowa Code section 144.13 is not the parent, the person shall collect the fees from the parent and remit the fees to the state registrar.

96.13(1) The person collecting the fee on behalf of the state registrar shall not charge an administrative fee for collection of the registration and certified copy fees pursuant to Iowa Code section 144.13A(3).

96.13(2) A person is discharged from the duty to collect and remit the fees when the person has made a good-faith effort to collect the fees from the parent or has established that the fees are to be waived pursuant to Iowa Code section 144.13A(3).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.14(144) Waivers. The registration fee and certified copy fee are waived if the expenses of the birth are reimbursed under the medical assistance program established by Iowa Code chapter 249A or if the parent is indigent and unable to pay the expenses of the birth and no other means of payment is available to the parent.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.15(144) Fee deposit. Birth registration and certified copy fees collected on behalf of the state registrar and forwarded to the state registrar shall be remitted to the treasurer of state for deposit in the appropriate state fund.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.16(144) Responsibilities of institutions. Institutions responsible for filing certificates of live birth shall collect both the registration fee and the certified copy fee from the parent.

96.16(1) The institution shall complete the Summary of Fee Report for Birth Registration and Certified Copy form. The institution shall submit the completed form and the total fee amount by check or money order, to the state registrar, within seven days of the live birth or as directed by the state registrar. All live births shall be reported and indicate for each birth that:

- a. The fee was collected for the registration and certified copy;
- b. The fee was waived, as applicable, and the reason for waiver; or
- c. No fee was collected after a good-faith effort was made.

96.16(2) If a late birth registration fee is received, it shall be noted on the original Summary of Fee Report for Birth Registration and Certified Copy form.

96.16(3) The institution shall maintain copies of the submitted Summary of Fee Report for Birth Registration and Certified Copy form for three state fiscal years.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.17(144) Responsibility for births occurring in non-institutions and non-birthing institutions.

96.17(1) The state registrar shall collect the registration and certified copy fees and complete a Summary of Fee Report for Birth Registration and Certified Copy form.

96.17(2) If a late birth registration fee is received, it shall be noted on the original Summary of Fee Report for Birth Registration and Certified Copy form.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—96.18(144) Delayed birth registration—one year or more after event. All Iowa births registered one year or more after the date of the birth shall be prepared on a Delayed Certificate of Live Birth form. The state registrar shall require documentary evidence to prove the facts of the birth pursuant to subrule 96.18(2). The delayed birth record shall be registered and maintained solely at the state registrar's office.

96.18(1) Application—certificate form. A completed Delayed Certificate of Live Birth form shall be signed before a notary and filed with the state registrar by the following applicants in the indicated order of priority:

- a. The registrant, if 18 years of age or older, whose birth occurred in Iowa but was not recorded within one year of the birth;
- b. The registrant's parent or current legal court-appointed guardian; or
- c. If no parent or legal guardian exists, a member of the registrant's family who has direct tangible interest and entitlement and who is competent to affirm to the accuracy of the information.

96.18(2) Facts to be established.

a. The applicant shall submit a notification of record search certified by the state registrar, which shall indicate that no prior certificate of live birth is on file for the person whose delayed birth record is to be filed. The notification of record search shall be returned to the applicant and shall not be exchanged for a certified copy of delayed certificate of live birth.

b. The applicant shall substantiate the following with documentary evidence:

- (1) The full name of the registrant at the time of the birth, except that the delayed certificate may reflect the name established by adoption or legitimation when such evidence is submitted;
- (2) The date and place of the birth;
- (3) The full name of the mother prior to any marriage as it is listed on her birth certificate;
- (4) The full name of the mother at the time of the birth; and
- (5) The full name of the mother's legal spouse. However, if the mother was not married at the time of conception or birth or at any time during the period between conception and birth, the name of a second parent shall not be entered on the delayed certificate unless the child has been adopted or legitimated or parentage has been determined by a court of competent jurisdiction.

96.18(3) Documentary evidence.

a. To be acceptable for purposes of registration, the name of the registrant and the date and place of birth entered on a Delayed Certificate of Live Birth form shall be supported at a minimum by the following documentary evidence:

- (1) Two pieces of dated documentary evidence if the Delayed Certificate of Live Birth form is filed within seven years after the registrant's date of birth; or
- (2) Three pieces of dated documentary evidence if the Delayed Certificate of Live Birth form is filed seven years or more after the registrant's date of birth.

b. Each piece of documentary evidence must be from an independent source. Facts of parentage shall be supported by at least one of the documents.

c. Documentary evidence shall be in the form of the original record, a certified copy thereof, or a notarized statement from the custodian of the record or document on the custodian's letterhead.

d. All documentary evidence submitted shall consistently support the facts of birth to be established.

e. All documentary evidence shall have been executed at least five years prior to the date of filing or shall have been established prior to the registrant's seventh birthday.

f. Documents not acceptable to establish a delayed certificate of live birth include, but are not limited to:

- (1) Baptismal record,
- (2) Confirmation record,
- (3) Family bible entries,
- (4) Hospital commemorative birth certificate,
- (5) Crib card,
- (6) Cradle roll,
- (7) Baby book memento, and
- (8) Personal affidavit.

96.18(4) *Abstraction and certification by the state registrar.* The state registrar shall abstract on the Delayed Certificate of Live Birth form a description of each document submitted to support the facts of birth. This description shall include:

- a. The title or description of the document;
- b. The name and address of the custodian who has attested to the fact on the original documents in the custodian's custody;
- c. The date of the original filing of the document being abstracted; and
- d. The information regarding the registrant's birth and parentage.

96.18(5) *Acceptance of documentary evidence for registration.*

- a. The state registrar shall by signature certify that:
 - (1) No prior certificate of live birth is on file for the person whose birth is to be recorded;
 - (2) The evidence has been reviewed and substantiates the alleged facts of the birth; and
 - (3) The abstract of the evidence appearing on the Delayed Certificate of Live Birth form accurately reflects the nature and content of the documents.
- b. All documents submitted in support of the delayed registration of live birth shall be returned to the applicant after review, abstraction, and registration.

96.18(6) *Denial of registration.*

- a. When the applicant does not submit substantiating evidence or the state registrar finds reason to question the validity or adequacy of the evidence submitted to establish a delayed certificate of live birth, the state registrar shall not register the delayed certificate of live birth. The written notice of refusal from the state registrar shall include:

- (1) The rejected form;
- (2) The Delayed Birth Evidence Refusal form; and
- (3) Information related to the applicant's right of appeal to the district court pursuant to Iowa Code sections 144.17 and 144.18.

- b. The application to establish a delayed certificate of live birth shall be dismissed if not actively pursued within six months of the date the notice of refusal was sent to the applicant.

96.18(7) *Duties of the county registrar.* The county registrar may assist the registrant, registrant's parent, or current court-appointed guardian in the completion and notarization of the delayed form, excluding the portion restricted for state use only. The county registrar may forward the form, documents and fees to the state registrar for final review and possible acceptance.

96.18(8) *Fees.* Administrative and certified copy fees shall be charged as provided in rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

These rules are intended to implement Iowa Code sections 144.12, 144.13, 144.13A, 144.14, 144.15, 144.17, 144.18, 233.2(2) "c" and 600.15.

¹ January 16, 2013, effective date of the rescission of Chapter 96 and the adoption of new Chapter 96 [ARC 0483C] delayed until adjournment of the 2013 General Assembly by the Administrative Rules Review Committee at its meeting held January 8, 2013; delay lifted at the meeting held March 8, 2013.

CHAPTER 97
DEATH REGISTRATION AND DISPOSITION OF DEAD HUMAN BODIES

[Prior to 12/12/12, see [641] 98.2, Chs 99, 101]

641—97.1(144) Definitions. For the purpose of this chapter, the definitions in 641—Chapter 95 shall apply.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.2(144) Forms—property of department. All forms, certificates and reports pertaining to the registration of death events are the property of the department and shall be surrendered to the state registrar upon demand.

97.2(1) The forms supplied or approved for reporting death events shall be used for official purposes as provided for by law, rules and instructions of the state registrar.

97.2(2) No forms, except those furnished or approved by the state registrar, shall be used in the reporting of death events or the making of copies of vital records.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.3(144) Standard registration of death—up to one year. Iowa death records submitted for registration within one year from the date of death shall be prepared on the standard Certificate of Death form.

97.3(1) The county in which the death occurs or in which the dead human body is found is the county of death.

97.3(2) If the death occurs in a moving conveyance, the county in which the dead human body is first removed from the conveyance is the county of death.

97.3(3) Each person with a duty related to death certificates shall participate in the electronic death record system. A person with a duty related to a death certificate includes but is not limited to a physician as defined in Iowa Code section 135.1, a physician assistant, an advanced registered nurse practitioner, a funeral director and a county recorder.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 5199C, IAB 10/7/20, effective 11/11/20]

641—97.4(144) Standard registration of fetal death—up to one year. Iowa fetal death records submitted for registration within one year from the date of fetal death shall be prepared on the standard Certificate of Fetal Death form. A fetal death certificate shall not be filed after one year from the date of the event. A fetal death record shall not be entered into the electronic death record system.

97.4(1) When a fetal death occurs in an institution, the person in charge of the institution or the person's designee, the physician in attendance at or after delivery, or a medical examiner may assist in preparation of the Certificate of Fetal Death form as directed by the state registrar.

97.4(2) In cases in which a fetus has reached the gestation period of 20 completed weeks or more or a weight of 350 grams or more, a Certificate of Fetal Death form shall be:

- a. Registered and maintained solely at the state registrar's office; and
- b. Filed within three days after delivery and prior to final disposition of the fetus.

97.4(3) The county in which the dead human fetus is found is the county of death. The certificate shall be filed within three days after the fetus is found.

97.4(4) If the fetal death occurs in a moving conveyance, the county in which the fetus is first removed from the conveyance is the county of death.

97.4(5) A blank Certificate of Fetal Death form shall be used only by the state registrar or authorized agents.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 5199C, IAB 10/7/20, effective 11/11/20]

641—97.5(144) Preparation of the certificate of death or fetal death.

97.5(1) The funeral director or person other than the funeral director who first assumes custody of a dead human body or fetus for the purposes of disposition shall:

- a. Obtain the personal data from the next of kin or the best-qualified person or source available;
- b. Obtain the medical certification of cause of death from the medical certifier; and

c. Within three days after the death and prior to final disposition of the dead human body, file the completed certificate of death using the electronic statewide vital records system or, within three days after delivery and prior to disposition of the fetus, file the completed certificate of fetal death with the state registrar.

97.5(2) The funeral director or person other than the funeral director who first assumes custody of the dead human body for the purposes of disposition shall prepare the certificate of death using the electronic statewide vital records system.

97.5(3) The funeral director or person other than the funeral director who first assumes custody of the dead fetus for the purposes of disposition shall prepare the certificate of fetal death on the official form and paper issued by the state registrar.

97.5(4) Unless otherwise directed by the state registrar, a certificate of fetal death shall be accepted for filing and registration only when:

- a. All names are documented in the spaces provided;
- b. All items are completed as required;
- c. No alterations or erasures are apparent;
- d. All signatures are original and genuine and are in dark blue or black ink;
- e. The certificate presented for registration is on the approved form and official paper prescribed by the state registrar;
- f. Data are consistent with the facts of death; and
- g. The form is prepared in conformity with these rules or instructions issued by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2276C, IAB 12/9/15, effective 1/13/16; ARC 5199C, IAB 10/7/20, effective 11/11/20]

641—97.6(144) Medical certification of death. The funeral director shall submit the completed fact of death portion of the certificate of death to the physician, physician assistant, advanced registered nurse practitioner, or medical examiner for the completion of the medical portion.

97.6(1) For a natural cause of death, the physician, physician assistant or advanced registered nurse practitioner in charge of the patient's care for the illness or condition which resulted in death shall complete and sign the medical certification within 72 hours after receipt of the death certificate from the funeral director or individual who initially assumed custody of the body.

97.6(2) If there is a non-natural cause of death, the state medical examiner or county medical examiner shall be notified and shall conduct an inquiry.

97.6(3) If the decedent was an infant or child and the cause of death is not known, a medical examiner's inquiry shall be conducted and an autopsy performed as necessary to exclude a non-natural cause of death.

97.6(4) If upon inquiry into a death, the state medical examiner or county medical examiner determines that a preexisting natural disease or condition was the likely cause of death and that the death does not affect the public interest as described in Iowa Code section 331.802(3), the state medical examiner or county medical examiner may elect to defer to the physician, physician assistant or advanced registered nurse practitioner in charge of the patient's preexisting condition the certification of the cause of death.

97.6(5) When an inquiry is required by the state medical examiner or county medical examiner, the state medical examiner or county medical examiner shall investigate the cause and manner of death and shall complete and sign the medical certification within 72 hours after determination of the cause and manner of death.

97.6(6) The medical certifier completing the medical certification of cause of death shall attest to the accuracy of the medical certification either by signature or by an electronic process approved by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.7(144) Medical certification of fetal death.

97.7(1) The medical certification for a fetal death shall be completed by the physician in attendance at or after delivery of the fetus within 72 hours after delivery, except when an inquiry is required by a medical examiner.

97.7(2) When an inquiry by a medical examiner is required, or when a fetal death occurs without medical attendance upon the mother at or after delivery, the medical examiner shall investigate the cause of fetal death and shall complete the medical certification of the fetal death within 72 hours after taking charge of the case.

97.7(3) The physician or medical examiner completing the medical certification of fetal death shall attest to the accuracy either by signature or by an electronic process approved by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.8(144) Medical certifier.

97.8(1) Only an Iowa-licensed physician, physician assistant, advanced registered nurse practitioner, or medical examiner shall certify to the cause and manner of death.

97.8(2) If the medical certifier is unavailable, an alternate medical certifier may complete the cause and manner of death when:

- a. The alternate medical certifier has access to the medical history of the case;
- b. The alternate medical certifier views the deceased at the time of death or after death has occurred; and
- c. The death is from natural causes.

97.8(3) In all other cases in which a medical certifier is unavailable, the medical examiner shall prepare the medical certification of cause of death.

97.8(4) The medical certifier who signs the medical certification on a certificate of death shall be entitled to view the death record through the electronic statewide vital records system for up to one year from the date of death.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 2276C, IAB 12/9/15, effective 1/13/16]

641—97.9(144) Report of autopsy findings.

97.9(1) In cases in which an autopsy is to be performed, it shall not be necessary to defer the entry of the cause of death pending a full report of microscopic or toxicological studies.

97.9(2) In any case in which the gross findings of an autopsy are inadequate to determine the cause of death, the medical certifier shall mark the cause of death as “pending investigation” on the certificate and sign the certificate. Immediately after the medical data necessary for determining the cause of death have been made known, the medical certifier shall provide to the state registrar a signed statement that identifies the decedent and the cause of death. The signed statement shall be on the medical certifier’s official letterhead.

97.9(3) In any case in which the autopsy findings significantly change the medical diagnosis of cause of death, the medical certifier shall make a report of the cause of death and submit it to the state registrar as soon as the findings are available. Such report shall be a signed statement that identifies the decedent and the revised cause of death and shall be on the medical certifier’s official letterhead. Such report shall amend the original certificate, and the report shall be maintained in a sealed file.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.10(144) Extension of time. If the medical certifier is unable to complete the medical certification of cause of death or if the funeral director is unable to obtain the personal information about the deceased within the statutory time period, the funeral director shall file the certificate of death or fetal death with all available information.

97.10(1) Such certificate of death or fetal death shall be considered appropriate authority to issue a burial-transit permit.

97.10(2) As soon as possible, the person responsible for completing the information missing from the original certificate shall report the missing information to the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.11(144) Removal of a dead human body or fetus.

97.11(1) A person assuming custody of a dead human body shall:

a. Contact the attending physician, physician assistant, or advanced registered nurse practitioner and receive assurance that the death was from natural causes and that the physician, physician assistant, or advanced registered nurse practitioner will assume responsibility for certifying to the cause of death; or

b. Contact the medical examiner and receive authorization to remove the dead human body if the case is within the jurisdiction of the medical examiner.

97.11(2) A person assuming custody of a dead human fetus shall:

a. Contact the attending physician and receive assurance that the death was from natural causes and that the physician will assume responsibility for certifying to the cause of fetal death; or

b. Contact the medical examiner and receive authorization to remove the dead human fetus if the case is within the jurisdiction of the medical examiner.

97.11(3) A person other than a funeral director, medical examiner, or emergency medical service provider who assumes custody of a dead human body or fetus shall first register the certificate of death or fetal death and then secure a burial-transit permit pursuant to rule 641—97.12(144) prior to removal of the dead human body or fetus from the place of death.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.12(144) Burial-transit permit. If a person other than a funeral director, medical examiner, or emergency medical service assumes custody of a dead human body or fetus, the person shall secure a burial-transit permit pursuant to Iowa Code section 144.32. Pursuant to rule 645—100.4(144), an unlicensed employee of the funeral establishment shall be considered an agent of the funeral director.

97.12(1) The burial-transit permit shall be issued upon a form prescribed by the state registrar and shall state:

- a.* The name of the decedent;
- b.* The date and place of death;
- c.* If the death was from a communicable disease;
- d.* The name and location of the cemetery, crematory, or other location where final disposition of the remains is to be made;
- e.* The method of disposition;
- f.* That a certificate of death or fetal death has been filed; and
- g.* That permission is granted to inter, remove or otherwise dispose of the dead human body or fetus.

97.12(2) To be valid, the burial-transit permit must be issued by the county medical examiner, a funeral director, or the state registrar. The burial-transit permit shall be obtained prior to the removal of the dead human body or fetus from the place of death and shall accompany the body or fetus to the place of final disposition. The person responsible for obtaining the burial-transit permit shall provide the permit to the person in charge of the place of final disposition.

97.12(3) The person in charge of the place of final disposition shall ensure that all of the requirements of this chapter relative to the burial-transit permit have been complied with before the final disposition of the remains. Such person shall retain the burial-transit permit for a period of one year from the date of the final disposition.

97.12(4) The burial-transit permit shall not be issued prior to the presentation of the completed certificate of death or certificate of fetal death.

97.12(5) A burial-transit permit shall not be issued to a person other than a licensed funeral director if the death or fetal death was caused by a suspected or known communicable disease as defined by Iowa Code section 139A.2.

97.12(6) In cases in which a fetus has reached the gestation period of 20 completed weeks or more, or a weight of 350 grams or more, a burial-transit permit shall be obtained prior to the final disposition of the fetus.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.13(144) Transportation and disposition of a dead human body or fetus.

97.13(1) A dead human body or fetus shall be transported only after enclosure in a container for transfer that will control odor and prevent leakage of body fluids, unless the body or fetus has been embalmed or is being transported by a licensed funeral director, emergency medical service provider or

medical examiner. The transport of a dead human body or fetus shall be in a manner that is respectful of the dead, the feelings of relatives, and the sensibilities of the community.

97.13(2) When a dead human body or fetus is transported from the state for final disposition, the burial-transit permit shall accompany the body or fetus. When a dead human body or fetus is brought into the state for final disposition, a burial-transit permit under the law of the state in which the death occurred shall accompany the body or fetus.

97.13(3) If the final disposition of a dead human body or fetus is cremation at a licensed cremation establishment, scattering of cremated remains shall be subject to the local ordinances of the political subdivision and any and all regulations of the cemetery, if applicable, in which the scattering site is located. However, such local ordinances and cemetery regulations shall not allow the scattering of cremated remains upon public property or upon private property without the property owner's consent. In the absence of an applicable local ordinance or cemetery regulation, the scattering of cremated remains shall not be allowed upon any public property or upon private property without the property owner's consent. Cremation shall be considered final disposition by the department, and no further burial-transit permit shall be required.

97.13(4) If the final disposition of a dead human body or fetus is burial, interment, or entombment, local ordinances of the political subdivision in which the final disposition site is located and any and all regulations of the cemetery, if applicable, shall apply. In the absence of an applicable local ordinance, the depth of the grave at its shallowest point shall be at least three feet from the top of the burial container.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.14(144) Disinterment permits.

97.14(1) A disinterment permit may be issued as follows:

- a.* Disinterment of a dead human body or fetus, without a court order, shall be allowed for the purpose of autopsy or reburial only, and then only if supervised by a funeral director.
- b.* Disinterment of cremated remains, without a court order, shall be allowed, but only if supervised by a funeral director.
- c.* The state registrar, without a court order, shall not issue a permit without the consent of the person authorized to control the decedent's remains under Iowa Code section 144C.5.
- d.* Disinterment of a dead body or fetus for the purpose of reburial may be allowed by court order only upon a showing of substantial benefit to the public, and then only if supervised by a funeral director.
- e.* Disinterment of a dead body or fetus for the purpose of autopsy by court order shall be allowed only when reasonable cause is shown that someone is criminally or civilly responsible for such death, after hearing, upon reasonable notice prescribed by the court to the person authorized to control the decedent's remains under Iowa Code section 144C.5, and then only if supervised by a funeral director.
- f.* Disinterment of a dead body or fetus for the purpose of cremation may be allowed by court order if supervised by a funeral director. Subsequent to the disinterment, cremation of the body shall only be allowed upon a determination by the state or county medical examiner that the death was due to natural causes.

97.14(2) A permit for disinterment shall be issued by the state registrar according to rules adopted pursuant to Iowa Code chapter 17A or when ordered by the district court of the county in which such body is buried. A person authorized to control final disposition of a decedent's remains under Iowa Code section 144C.5 is an interested person and shall be entitled to notice prior to the obtaining of a court order.

97.14(3) Disinterment permits shall be required for any relocation aboveground or belowground of remains from the original site of interment. Disinterment permits shall be valid for 30 days after the date the permit is signed by the state registrar. Disinterment permits are issued on a form as prescribed by the state registrar with copies to be distributed as follows:

- a.* One copy filed with the sexton or person in charge of the cemetery in which disinterment is to be made;
- b.* One copy to be used during transportation of the remains;
- c.* One copy filed with the sexton or person in charge of the cemetery of reburial; and
- d.* One copy to be returned to the state registrar by the funeral director within ten days after the date of disinterment.

97.14(4) When removed from the vault for final burial, a dead human body or fetus, properly embalmed and placed in a receiving vault, shall not be considered a disinterment.

97.14(5) The following persons who are competent adults may acquire a disinterment permit without a court order pursuant to Iowa Code section 144.34 as amended by 2020 Iowa Acts, Senate File 2135, and section 144C.5 in the following descending order:

- a.* A designee, or alternate designee, acting pursuant to the decedent's declaration.
- b.* The surviving spouse of the decedent, if not legally separated from the decedent, whose whereabouts are reasonably ascertainable.
- c.* A surviving child of the decedent or, if there is more than one surviving child, a majority of the surviving children whose whereabouts are reasonably ascertainable.
- d.* The surviving parent or parents of the decedent whose whereabouts are reasonably ascertainable.
- e.* A surviving grandchild of the decedent or, if there is more than one surviving grandchild, a majority of the surviving grandchildren whose whereabouts are reasonably ascertainable.
- f.* A surviving sibling of the decedent or, if there is more than one surviving sibling, a majority of the surviving siblings whose whereabouts are reasonably ascertainable.
- g.* A surviving grandparent of the decedent or, if there is more than one surviving grandparent, a majority of the surviving grandparents whose whereabouts are reasonably ascertainable.
- h.* A person in the next degree of kinship to the decedent in the order named by law to inherit the estate of the decedent under the rules of inheritance for intestate succession or, if there is more than one such surviving person, a majority of such surviving persons whose whereabouts are reasonably ascertainable.
- i.* A person who represents that the person knows the identity of the decedent and who signs an affidavit warranting the identity of the decedent and assuming the right to control final disposition of the decedent's remains and the responsibility to pay any expense attendant to such final disposition. A person who warrants the identity of the decedent pursuant to this paragraph is liable for all damages that result, directly or indirectly, from that warrant.
- j.* The county medical examiner, if responsible for the decedent's remains.

97.14(6) A funeral director may await a court order before proceeding with disinterment of a decedent's remains if the funeral director is aware of a dispute among:

- a.* Persons who are members of the same class of persons described in subrule 97.14(5); or
- b.* Persons who are authorized under subrule 97.14(5) and the executor named in the decedent's will or personal representative appointed by the court.

97.14(7) Due consideration under this rule shall be given to the public health, the preferences of a person authorized to control final disposition of a decedent's remains under Iowa Code section 144C.5, and any court order.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 5199C, IAB 10/7/20, effective 11/11/20]

641—97.15(144) Delayed death registration—one year or more after event. Iowa deaths registered one year or more after the date of death shall be prepared on a Delayed Certificate of Death form developed by the state registrar. The state registrar shall require documentary evidence to prove the facts of the death pursuant to Iowa Code section 144.16. The delayed certificate of death shall be registered and maintained solely at the state registrar's office.

97.15(1) Application. Registration of a delayed certificate of death may be requested by the surviving next of kin of the deceased, or the surviving next of kin's legal representative, in the following descending order:

- a.* Executor of the decedent's estate;
- b.* Spouse, if not legally separated from the decedent;
- c.* Child or legal guardian of the child if the child is under the age of majority;
- d.* Parent;
- e.* Grandchild or legal guardian of the grandchild if the grandchild is under the age of majority;
- f.* Sibling;
- g.* Grandparent; or
- h.* Funeral director responsible for the disposition of the decedent.

97.15(2) *Facts to be established.*

a. The applicant shall submit a notification of record search certified by the state registrar, which shall indicate that no prior certificate of death is on file for the person whose delayed death record is to be filed. The notification of record search shall be returned to the applicant and shall not be exchanged for a certified copy of the delayed certificate of death.

b. The applicant shall substantiate the following with documentary evidence:

- (1) The full legal name and gender of the deceased at the time of the death;
- (2) The date and place of birth;
- (3) The date and time of death;
- (4) The place of death, including the type of place and location where the death occurred;
- (5) The method and location of the final disposition;
- (6) The full name and address of the person responsible for the final disposition;
- (7) Cause and manner of death; and
- (8) The full name, address, and relationship to the decedent of the person applying to register the delayed certificate of death.

97.15(3) *Documentary evidence.*

a. The application to register the delayed certificate of death shall be supported by a minimum of the following:

(1) An affidavit of the person filing the certificate attesting to the accuracy of the information on the certificate; and

(2) Three dated documents from independent sources that consistently support the information required pursuant to subrule 97.15(2). The documents shall be in the form of the original record, a certified copy thereof, or a notarized statement from the custodian of the record or document on the custodian's letterhead. Personal affidavits are not acceptable.

b. The state registrar may require additional documentary evidence to prove the facts of the death event.

97.15(4) *Abstraction and certification by the state registrar.* The state registrar shall abstract on the Delayed Certificate of Death form a description of each document submitted to support the facts of death. This description shall include:

a. The title or description of the document;

b. The name and address of the custodian who attested to the facts on the original documents in the custodian's custody;

c. The date of the original filing of the document being abstracted; and

d. The information regarding the death for delayed registration.

97.15(5) *Acceptance of documentary evidence for registration.* All documents submitted in support of the delayed registration shall be returned to the applicant after review, abstraction, and registration. The state registrar shall by signature certify that:

a. No prior certificate of death is on file for the decedent;

b. The evidence has been reviewed and substantiates the facts of death; and

c. The abstract of the evidence appearing on the delayed certificate of death accurately reflects the nature and content of the documents.

97.15(6) *Denial of registration.* In the absence of adequate substantiating evidence or if the state registrar finds reason to question the validity or adequacy of the evidence required to establish a delayed certificate of death, the state registrar shall not register the delayed record.

a. The written notice of rejection from the state registrar shall include:

(1) The Delayed Certificate of Death form stamped "rejected"; and

(2) The Delayed Evidence Refusal form.

b. Applications for delayed certificates which have not been completed within one year from the date of application may be dismissed at the discretion of the state registrar. Upon dismissal, the state registrar shall advise the applicant, and all documents submitted in support of such registration shall be returned to the applicant.

97.15(7) *Duties of county registrar.* The county registrar may assist the applicant in the completion and notarization of the delayed form, excluding the portion restricted for state use only. The county registrar may forward the partially completed delayed form, documents and fees to the state registrar for final review and possible acceptance.

97.15(8) *Fees.* Administrative and certified copy fees shall be charged as provided in rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.16(144) Registration of presumptive death.

97.16(1) A petition shall be filed with the district court in the county where the presumptive death occurred and shall be supported with the completed Affidavit of Personal Knowledge of a Missing Person form. The form shall be completed by the surviving next of kin of the deceased, or the surviving next of kin's legal representative, in the following descending order:

- a. Spouse, if not legally separated from the decedent;
- b. Child or the child's legal guardian if the child is under the age of majority;
- c. Parent;
- d. Grandchild or the grandchild's legal guardian if the grandchild is under the age of majority;
- e. Sibling;
- f. Grandparent;
- g. Aunt or uncle;
- h. Niece or nephew; or
- i. A person in the next degree of kinship to the decedent in the order named by law to inherit the estate of the decedent pursuant to Iowa Code sections 633.210 to 633.226.

97.16(2) In addition to the Affidavit of Personal Knowledge of a Missing Person form or in the absence of the next of kin, the petition may be supported by the following:

- a. Affidavit by Employer for an Employee Who Was Working at Time of Disappearance form;
- b. Affidavit by Government Official for a Government Employee Missing While Involved in Rescue Efforts form; or
- c. Affidavit by Reliable Informant of Missing Person form.

97.16(3) The state registrar shall provide the affidavit forms and the certificate of presumptive death. The affidavits and the certificate of presumptive death shall be registered and maintained solely at the state registrar's office.

97.16(4) Upon presentation of a certified copy of a court order, the state registrar shall file a certificate of presumptive death pursuant to Iowa Code sections 633.517 to 633.520. The order from the district court shall only establish the presumptive death record.

97.16(5) In cases under the jurisdiction of the medical examiner, the certified copy of the court order and the completed supporting affidavits listed in subrules 97.16(1) and 97.16(2) shall be delivered to the medical examiner. The medical examiner shall complete the certificate of presumptive death and certify to the cause of death.

97.16(6) The certificate of presumptive death shall be registered and maintained solely at the state registrar's office.

97.16(7) The certificate of presumptive death shall be recorded based on the date of the court order and shall not be registered as a delayed certificate.

97.16(8) If the missing person is located and found to be alive, the certificate of presumptive death shall be voided and removed from the vital records system of registration. Any issued certified copies shall be surrendered to the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.17(144) Release or final disposition of a dead human body or fetus by an institution.

97.17(1) When a dead human body or fetus is released by an institution, the person in charge of the institution shall maintain a record showing:

- a. Name of the deceased;
- b. Date, time, and place of death;

- c. Name, title, and license number of person who pronounced death;
- d. Name and address of the medical certifier;
- e. Name and address of the person to whom the dead human body or fetus is released; and
- f. Date of removal of the dead human body or fetus from the institution.

97.17(2) When a dead human body or fetus is released or final disposition is completed by an institution, the person in charge of the institution shall keep a record showing the date, place, and manner of release or final disposition.

97.17(3) At the direction of the state registrar, the institution shall provide the information listed in subrule 97.17(1) to the funeral director or person acting as such who assumes custody of the dead human body for purposes of final disposition.

97.17(4) Records maintained under this rule shall be retained for a period of not less than ten years and shall be made available for inspection by the state registrar upon demand.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—97.18(144) Additional record by funeral director.

97.18(1) In addition to filing any certificate or other form required by Iowa Code chapter 144, a funeral director or other person who removes from the place of death or transports or completes final disposition of a dead human body or fetus shall maintain a record which shall identify the following:

- a. Name of the deceased;
- b. Date, time, and place of death;
- c. Name and address of the person to whom the dead human body or fetus is released;
- d. Name of institution or other place of death releasing the dead human body or fetus;
- e. Date of removal from the place of death; and
- f. Place and method of final disposition of the dead human body or fetus.

97.18(2) Records maintained under this rule shall be retained for a period of not less than ten years at the funeral establishment responsible for disposition and shall be made available for inspection by the state registrar upon demand.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

These rules are intended to implement Iowa Code sections 135.11(7), 144.12, 144.16 to 144.18, 144.26 to 144.29, 144.30 to 144.35, 144.47, 144.49 to 144.51, 144C.5, 331.802(3) and 633.517 to 633.520.

[Filed ARC 0483C (Notice ARC 0376C, IAB 10/3/12), IAB 12/12/12, effective 1/16/13]¹

[Filed ARC 2276C (Notice ARC 2156C, IAB 9/30/15), IAB 12/9/15, effective 1/13/16]

[Filed ARC 5199C (Notice ARC 5087C, IAB 7/15/20), IAB 10/7/20, effective 11/11/20]

¹ January 16, 2013, effective date of Chapter 97 [ARC 0483C] delayed until the adjournment of the 2013 General Assembly by the Administrative Rules Review Committee at its meeting held January 8, 2013; delay lifted at the meeting held March 8, 2013.

CHAPTER 98
MARRIAGE REGISTRATION

[Prior to 12/12/12, see [641] Ch 96, 99.13]

641—98.1(144,595) Definitions. For the purpose of this chapter, the definitions in 641—Chapter 95 shall apply.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—98.2(144,595) Forms—property of department. All forms, certificates and reports pertaining to the registration of a marriage are the property of the department and shall be surrendered to the state registrar upon demand.

98.2(1) The forms supplied or approved for reporting a marriage shall be used for official purposes as provided for by statute, rules and instructions of the state registrar.

98.2(2) No forms, except those furnished or approved by the state registrar, shall be used in the reporting of a marriage or the making of copies of vital records.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—98.3(144,595) Standard registration of marriage—up to one year. A marriage event that takes place in Iowa shall be prepared on the standard Certificate of Marriage form and submitted for registration within one year from the date of marriage.

98.3(1) Prior to marriage, the applicants shall:

- a. Obtain an Application for a License to Marry in Iowa form from the county registrar;
- b. Submit to the county registrar the completed application and fee pursuant to Iowa Code section 331.605(6); and
- c. Receive a license to marry in Iowa and a Certificate of Marriage form from the county registrar.

98.3(2) Once the marriage is solemnized, the completed certificate of marriage shall be filed with the county registrar where the license to marry was issued. The county registrar shall then forward the certificate of marriage to the state registrar for filing.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—98.4(144,595) Application for a license to marry in Iowa.

98.4(1) The Application for a License to Marry in Iowa form is available from any county registrar. The applicants are the parties to be married.

98.4(2) The application shall not be processed until all items on the double-sided application form, including the affidavit of a competent and disinterested person, have been completed. The affidavit shall be completed and signed in front of a notary public by an individual of legal age who is acquainted with both applicants who plan to marry. A family member may serve as the competent and disinterested person.

98.4(3) Each applicant shall verify the personal information by notarized signature.

98.4(4) If an applicant is 16 or 17 years of age, the Certificate of Consent of Underage Party to Marry form shall be completed in accordance with Iowa Code section 595.2(4) and shall be approved by a judge in the county's judicial district before the application for a marriage license may be accepted by the county registrar. Persons 15 years of age or younger may not marry in Iowa.

98.4(5) The Application for a License to Marry in Iowa form shall be signed in front of a notary public by both parties to be married and their competent and disinterested person. By signature, the applicants and their competent and disinterested person are attesting that the applicants are:

- a. Eighteen years of age or older or, if either or both are 16 or 17 years of age, that they have provided a signed Certificate of Consent of Underage Party to Marry form;
- b. Competent to enter into a civil contract pursuant to Iowa Code section 595.1A;
- c. Not legally married to each other and that neither is legally married to someone else who is living; and
- d. Acknowledging that they have provided accurate information on the application form.

98.4(6) An applicant is not required to be a U.S. citizen.

98.4(7) The application for a license to marry in Iowa shall be submitted to the registrar in the county where the application and marriage certificate are to be filed. The marriage license is valid in any county in Iowa.

98.4(8) A fee is due upon the submittal of a completed application for the license to marry pursuant to Iowa Code section 331.605(1) “g.”

98.4(9) At the time of completion of the Application for a License to Marry in Iowa form, the applicants shall indicate the adoption of the legal name to be used after marriage pursuant to Iowa Code section 595.5(1). When the application is filed, the county registrar shall enter the legal name on the License to Marry in Iowa form and the original Certificate of Marriage form. Once the application is filed, any changes to the legal name to be adopted shall only be made prior to the marriage by reapplication and repayment of the application fee unless it can be proven that an obvious typographical error was made when the license or the certificate was prepared. An individual shall have only one legal name at any one time pursuant to Iowa Code section 595.5(2).

98.4(10) The original certificate of marriage shall not later be modified to reflect a court-ordered legal change of name.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—98.5(144,595) License to marry.

98.5(1) Upon receipt and acceptance of a completed application for a license to marry in Iowa, the county registrar may issue the license to marry. When the marriage license valid date is computed, the day of application shall be excluded. The license shall become valid after the expiration of three calendar days after the date of application to marry.

98.5(2) The three-day waiting period may be waived by a district judge in the county’s judicial district pursuant to Iowa Code section 595.4. An Application for Waiver of 3-Day Waiting Period form is available from the county registrar. If the waiver is granted, the county registrar shall collect the \$5 fee for the waiver pursuant to Iowa Code section 595.4.

98.5(3) When a license is issued, the county registrar shall deliver to the applicant the Certificate of Marriage form and provide instructions to ensure the return of a complete and accurate certificate of marriage for filing.

98.5(4) If the license to marry in Iowa is not retrieved from the county registrar within six months from the date of application, the application is void.

98.5(5) The license to marry is proof that proper application to marry in Iowa has been made. The parties to be married shall present the license to the person who will solemnize the marriage pursuant to Iowa Code section 595.10.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—98.6(144, 595) Certificate of marriage.

98.6(1) At the time the license to marry in Iowa is issued, the county registrar shall also prepare the original copy of the Certificate of Marriage form. The person solemnizing the marriage shall complete the blank items pertaining to the marriage ceremony and obtain the required signatures.

98.6(2) All participants in the marriage ceremony shall be present at the same time and location within the geographic boundaries of the state of Iowa, including the parties to be married, two witnesses and the officiant. Marriage ceremonies shall not occur by proxy, telephone, or other electronic means.

98.6(3) After the marriage ceremony:

a. The parties married shall sign, at a minimum, their first and last legal name on the Certificate of Marriage form as indicated on the Application for a License to Marry in Iowa form; and

b. Two witnesses present at the ceremony and the officiant shall sign and print their names on the Certificate of Marriage form in the spaces provided. If there is more than one officiant, the signature and name of only one of the officiants shall be on the Certificate of Marriage form.

98.6(4) Photocopies of the certificate of marriage are prohibited prior to registration of the certificate with the county registrar. The officiant shall not affix any kind of seal to the certificate of marriage.

98.6(5) Within 15 days after the marriage ceremony, the officiant who solemnized the marriage shall file for registration the certificate of marriage with the county registrar that issued the marriage license, except as directed pursuant to Iowa Code section 595.16.

98.6(6) Upon registration of the certificate of marriage, the application for a license to marry becomes part of the record of marriage, including the three-day waiver and consent to marriage of a minor, if applicable.

98.6(7) Original certificates of marriage registered by the county registrar shall be forwarded to the state registrar weekly or as directed by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—98.7(144,595) Delayed registration of marriage—one year or more after date of event. All Iowa marriages registered one year or more after the date of the marriage shall be prepared on the Delayed Certificate of Marriage form. The state registrar shall require documentary evidence to establish the facts of the marriage pursuant to Iowa Code section 144.16 and subrule 98.7(2). The delayed marriage record shall be registered and maintained solely at the state registrar's office.

98.7(1) Application. A completed Delayed Certificate of Marriage form shall be signed before a notary by both parties to the marriage and filed with the state registrar.

98.7(2) Facts to be established.

a. The applicant shall submit a notification of record search certified by the state registrar, which shall indicate that no prior certificate of marriage is on file for the persons whose delayed marriage record is to be filed. The notification of record search shall be returned to the applicant and shall not be exchanged for a certified copy of delayed certificate of marriage.

b. The applicant shall substantiate the following with documentary evidence:

- (1) The county in Iowa where the license to marry was issued;
- (2) The full name of the registrants before and after the marriage;
- (3) The date and place of the marriage in Iowa;
- (4) The full names of the registrants' parents;
- (5) The full names of the two witnesses present at the marriage ceremony; and
- (6) The full name and address of the officiant who performed the marriage ceremony.

98.7(3) Documentary evidence.

a. To be acceptable for purposes of registration by the state registrar, the delayed certificate of marriage must be supported by:

(1) All of the following:

1. A copy of the issued license to marry in Iowa or the completed application for the license to marry in Iowa secured from the county registrar in the county where the license to marry was issued;
 2. A notarized affidavit from two witnesses to the wedding ceremony attesting to the facts of the marriage; and
 3. A certified copy transcribed from the official records where the marriage was performed including the date and place of such marriage as attested to by the custodian of such records; or
- (2) An affidavit of the person who performed the ceremony documenting that there was a marriage and the date and place of such marriage.

b. The state registrar may require additional documentary evidence to prove the facts of the marriage event.

98.7(4) Abstraction and certification by the state registrar. The state registrar shall abstract on the Delayed Certificate of Marriage form a description of each document submitted to support the facts of the marriage event. This abstract shall include:

- a. The title, description and signatory from each document presented;
- b. The date of the original filing of the document being abstracted; and
- c. The facts of the marriage event as established pursuant to paragraph 98.7(2) "b."

98.7(5) Acceptance of documentary evidence for registration. All documents submitted in support of the delayed registration shall be returned to the applicant after review, abstraction, and registration. The state registrar shall by signature certify that:

- a. No prior certificate of marriage is on file for the registrants;

- b. The evidence has been reviewed and substantiates the facts of the marriage event; and
- c. The abstract of the evidence appearing on the delayed certificate of marriage accurately reflects the nature and content of the document.

98.7(6) *Denial of registration.* In the absence of adequate substantiating evidence or if the state registrar finds reason to question the validity or adequacy of the evidence required to establish a delayed certificate of marriage, the state registrar shall not register the delayed record.

- a. The written notice of rejection from the state registrar shall include:
 - (1) The Delayed Certificate of Marriage form stamped “rejected”; and
 - (2) The Delayed Evidence Refusal form.
- b. Applications for delayed certificates which have not been completed within one year from the date of application may be dismissed at the discretion of the state registrar. Upon dismissal, the state registrar shall advise the applicant, and all documents submitted in support of such registration shall be returned to the applicant. The state registrar shall provide information related to the applicant’s right of appeal to the district court.

c. If a request to establish a delayed certificate of marriage is rejected under the provisions of Iowa Code section 144.16, a petition may be filed with the district court for an order to establish a delayed certificate of marriage. The petition shall:

- (1) Be made on a form prescribed and furnished by the state registrar.
- (2) Allege that diligent efforts by the petitioner have failed to obtain the evidence required in accordance with Iowa Code section 144.16.
- (3) Allege that the state registrar has refused to establish the delayed certificate of marriage.
- (4) Include such other allegations as may be required.
- (5) Be accompanied by a statement of the registration official made in accordance with Iowa Code section 144.16 and all documentary evidence which was submitted to the registration official in support of such registration.
- (6) Be verified by the petitioner.

98.7(7) *Duties of county registrar.* The county registrar may assist the applicant in the completion and notarization of the delayed form, excluding the portion restricted for state use only. The county registrar may forward the partially completed delayed form, documents and fees to the state registrar for final review and possible acceptance.

98.7(8) *Fees.* Administrative and certified copy fees shall be charged as provided in rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—98.8(144,595) Dissolution of marriage or annulment.

98.8(1) The completed Report of Dissolution of Marriage or Annulment form shall be filed with the clerk of district court within one month from the date of the dissolution of marriage or annulment and be prepared on the official paper issued by the state registrar by one of the following means:

- a. Use of a typewriter using a dark blue or black ribbon on the standard form of the report;
- b. Use of a computer program that is preapproved by the state registrar;
- c. Use of an electronic form prescribed by the state registrar; or
- d. As directed by the state registrar.

98.8(2) If an attorney or clerk of district court uses a computer software program to generate the report of dissolution of marriage or annulment, the form shall be reviewed by the state registrar for approval. The state registrar shall deny approval if the form does not conform to the standard Report of Dissolution of Marriage or Annulment form as prescribed.

98.8(3) Clerks of district court shall submit reports of dissolution of marriage or annulment to the state registrar weekly or as directed by the state registrar.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

These rules are intended to implement Iowa Code sections 144.12, 144.16, 331.605(1) “f” and “g,” 595.2(4), 595.4, 595.5, 595.10, and 595.16.

[Filed ARC 0483C (Notice ARC 0376C, IAB 10/3/12), IAB 12/12/12, effective 1/16/13]¹

[Filed ARC 4398C (Notice ARC 4127C, IAB 11/21/18), IAB 4/10/19, effective 5/15/19]

- ¹ January 16, 2013, effective date of the rescission of Chapter 98 and the adoption of new Chapter 98 [ARC 0483C] delayed until adjournment of the 2013 General Assembly by the Administrative Rules Review Committee at its meeting held January 8, 2013; delay lifted at the meeting held March 8, 2013.

CHAPTER 99
VITAL RECORDS MODIFICATIONS

[Prior to 12/12/12, see [641] Chs 100, 102]

641—99.1(144) Definitions. For the purpose of this chapter, the definitions in 641—Chapter 95 shall apply.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.2(144) Forms—property of department. All forms, certificates and reports pertaining to the registration of vital events are the property of the department and shall be surrendered to the state registrar upon demand.

99.2(1) The forms supplied or approved for reporting vital events shall be used for official purposes as provided for by law, rules and instructions of the state registrar.

99.2(2) No forms, except those furnished or approved by the state registrar, shall be used in the reporting or modification of vital events or the making of copies of vital records.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.3(144) Forms used in the establishment of new records. The standard certificate form for reporting of live birth, death, fetal death, or marriage in use at the time of the event shall be used to prepare a new certificate.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.4(144) Corrections of minor error in vital record—within one year of event.

99.4(1) Corrections of minor errors may be made by the state registrar within one year and prior to the first anniversary of the date of the event upon observation, upon request of the data provider, upon query, or upon request from an entitled person. Minor errors include obvious errors, omissions, or transpositions of letters in words of common knowledge.

99.4(2) For a certificate of live birth, entitled persons include in the following descending order of priority:

- a. Either parent as shown on the child's certificate of live birth; or
- b. The legal guardian or agency having legal custody of the child.

99.4(3) For a certificate of death or fetal death other than the medical certification, entitled persons include in the following descending order of priority:

- a. The surviving spouse as shown on the certificate of death;
- b. A parent as shown on the certificate of death or fetal death;
- c. The informant as shown on the certificate; or
- d. The data provider in the case of a data entry error.

99.4(4) For a certificate of marriage, entitled persons include:

- a. The county registrar that issued the license to marry; or
- b. Either of the parties married.

99.4(5) Entitled persons requesting a correction shall submit to the state registrar:

- a. A notarized statement and a legible copy of current government-issued photo identification or other identification documents acceptable to the state registrar; and
- b. Supporting evidence if requested by the state registrar.

(1) The state registrar shall determine a priority of best evidence and may, at the state registrar's discretion, require additional documentary evidence to support the requested correction.

(2) The state registrar shall evaluate the evidence submitted in support of any correction, and when there is reason to question the validity or adequacy of the evidence, the state registrar may reject the request for correction and shall advise the applicant of the reasons for this action.

99.4(6) Only the state registrar shall make corrections on a vital record. The source of information and the date of correction shall be documented on the record but shall not appear on the certified copy.

99.4(7) There are no administrative fees required to correct a certificate pursuant to this rule.

99.4(8) Certificates corrected pursuant to this rule shall not be marked "amended."

99.4(9) Any certified copies of the incorrect certificate shall be surrendered to the state registrar for replacement at no cost pursuant to 641—subrule 95.6(3). Additional certified copies of the corrected certificate may be obtained upon receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to 641—paragraph 95.6(1)“a.”

99.4(10) The corrected certificate shall be on file at the county registrar’s office pursuant to rule 641—95.7(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—99.5(144) Amendment of certificate of live birth to add first or middle given name—within one year of event.

99.5(1) The first or middle given name for a child whose birth was reported without a first or middle given name may be amended to add the first or middle given name within one year and prior to the first anniversary of the date of the live birth based upon a completed and notarized Affidavit to Add Child’s Given Name form as provided by the department pursuant to Iowa Code section 144.38. The affidavit shall be submitted to the state registrar by entitled persons in the following descending order of priority:

- a. The single parent or both parents as shown on the child’s certificate of live birth;
- b. The mother, in the case of the death or incapacity of the second parent;
- c. The second parent if listed on the birth certificate, in the case of the death or incapacity of the mother; or
- d. The legal guardian or agency having legal custody of the child.

99.5(2) A first or middle given name may be added to the certificate of live birth once in this manner. Thereafter, a first or middle given name shall be changed only upon submission of a court order for a legal change of name from a court of competent jurisdiction pursuant to Iowa Code chapter 674.

99.5(3) An administrative fee shall be charged and remitted pursuant to 641—paragraph 95.6(1)“b.”

99.5(4) The original certificate shall be marked “amended” and shall be endorsed on the certified copy. The date of amendment and a summary description of the evidence submitted in support of the amendment shall be made a part of the record.

99.5(5) The certificate shall be on file at the county registrar’s office pursuant to rule 641—95.7(144).

99.5(6) Any certified copies of the incorrect certificate shall be surrendered for replacement at no cost. Additional certified copies of the amended certificate may be obtained upon the state registrar’s receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar, and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—99.6(144) Amendment of vital record—one year or more after the event.

99.6(1) Amendments of vital records may be made by the state registrar one year or more after the date of the event upon request from an entitled person or by an order to amend the record by a court of competent jurisdiction. Amendments include the correction of obvious errors, omissions, or transposition of letters in words of common knowledge.

99.6(2) For a certificate of live birth, entitled persons include in the following descending order of priority:

- a. The registrant, if the registrant is of legal age, has reached the age of majority or is an emancipated minor;
- b. Either parent as shown on the child’s certificate of live birth; or
- c. The legal guardian or agency having legal custody of the child.

99.6(3) For a certificate of death or fetal death other than the medical certification, entitled persons include:

- a. The surviving spouse as shown on the certificate of death;
- b. A parent as shown on the certificate of death or fetal death; or
- c. The informant as shown on the certificate of death or fetal death.

99.6(4) Amendment of a medical certification of cause of death or fetal death shall be requested solely by the medical certifier listed on the certificate of death or fetal death.

99.6(5) For a certificate of marriage, entitled persons include either of the parties married.

99.6(6) Entitled persons requesting an amendment shall submit the following to the state registrar:

a. A completed and notarized amendment request on the applicable form as follows:

- (1) Amendment to Certificate of Live Birth form.
- (2) Amendment to Certificate of Death or Fetal Death form.
- (3) Amendment to Certificate of Marriage form;

b. A legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar;

c. Certified copies of one or more pieces of documentary evidence supporting the amendment; and

d. The required fees pursuant to rule 641—95.6(144).

99.6(7) The documentary evidence shall have been established at least five years prior to the date of the application or within seven years of the date of the event.

a. The state registrar shall determine a priority of best evidence and may, at the state registrar's discretion, require additional documentary evidence to support the requested amendment.

b. The state registrar shall evaluate the evidence submitted in support of any amendment, and when there is reason to question the validity or adequacy of the evidence, the state registrar may reject the amendment and shall advise the applicant of the reasons for this action and provide information related to the applicant's right of appeal to the district court pursuant to Iowa Code section 144.38.

c. If a request to amend a certificate of birth is rejected under the provisions of Iowa Code section 144.38, a petition may be filed with the district court for an order amending a vital record. The petition shall:

(1) Be made on a form prescribed and furnished by the state registrar.

(2) Allege that diligent efforts by the petitioner have failed to obtain the evidence required in accordance with Iowa Code section 144.38.

(3) Allege that the state registrar has refused to amend the certificate of vital record.

(4) Include such other allegations as may be required.

(5) Be accompanied by a statement of the registration official made in accordance with Iowa Code section 144.38 and all documentary evidence which was submitted to the registration official in support of such registration.

(6) Be verified by the petitioner.

99.6(8) An administrative fee shall be charged and remitted pursuant to rule 641—95.6(144).

99.6(9) The original certificate shall be clearly marked "amended" and the date of the amendment shall be endorsed on the certified copy. A summary description of the evidence submitted in support of the amendment shall be made a part of the record.

99.6(10) The amended certificate shall be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.6(11) Any certified copies of the incorrect certificate shall be surrendered for replacement at no cost. Additional certified copies of the amended certificate may be obtained upon the state registrar's receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—99.7(144) Method of amendment of vital records.

99.7(1) Records not on the electronic vital records system shall be amended by drawing a single line through the incorrect item and inserting the correct or missing data immediately above or to the side of the item or by completing a blank item. In all cases in which a line must be drawn through an original entry, the line must not obliterate the original entry. The following shall be endorsed on or made a part of the record:

a. The word "amended" and the date of the amendment action; and

b. A summary of the evidence submitted in support of the amendment.

99.7(2) Records on the electronic vital records system shall be amended by correction of the incorrect item. The following shall be endorsed on or made a part of the record:

- a. The word “amended” and the date of the amendment action;
- b. A statement identifying the amendment; and
- c. A summary of the evidence submitted in support of the amendment.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.8(144) Correction or amendment of same item more than once. After a correction or an amendment is made on a vital record, that entry shall not be corrected again unless:

99.8(1) It can be proven that an error was made in processing the first correction or amendment; or

99.8(2) A court order is received from a court of competent jurisdiction to correct or amend the item. If a court order for a correction or an amendment is received, an administrative fee shall be charged and remitted pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.9(144) Other amendments to certificate of live birth.

99.9(1) The parent’s name or both parents’ names as reported by the parent or parents on the birth worksheet used to establish the certificate of live birth shall only be amended if the amendment is supported by a certified copy of a vital record or amended by an order from a court of competent jurisdiction.

99.9(2) Certificates of live birth of deceased persons shall only be amended if the amendment is supported by a certified copy of a vital record or amended by an order from a court of competent jurisdiction.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—99.10(144) Correction or amendment to medical certification of cause of death.

99.10(1) Corrections or amendments to the medical certification of cause of death shall be requested solely by the medical certifier listed on the certificate of death or fetal death.

99.10(2) The medical certifier may correct the medical certification of cause of death within 90 days following the date of death or fetal death. The request shall be submitted on official letterhead signed and dated by the medical certifier listed on the certificate of death or fetal death.

99.10(3) Any amendment after 90 days following the date of death or fetal death shall be made by order of a court of competent jurisdiction. However, the medical certification of cause of death may be amended at any time upon submission of a report of autopsy or toxicological findings or additional findings by the county or state medical examiner.

99.10(4) No fee shall be charged for correction or amendment made pursuant to this rule.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.11(144) Correction or amendment to a certificate of marriage.

99.11(1) The request to correct a certificate of marriage during the first year may be made by the county registrar that issued the license to marry. The written request shall be submitted to the state registrar with supporting evidence.

99.11(2) The request to correct or amend a certificate of marriage may be made by either of the parties married. The written request shall be submitted to the state registrar with supporting evidence.

99.11(3) An order from a court of competent jurisdiction is required to correct or amend a legal name after marriage.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 4398C, IAB 4/10/19, effective 5/15/19]

641—99.12(144) Correction to a report of dissolution of marriage or annulment.

99.12(1) A written notice to correct a report of dissolution of marriage or annulment may be submitted to the state registrar by the clerk of district court maintaining the record from which the original report was prepared. The notice shall state in what manner the report shall be corrected.

99.12(2) Those items appearing on the Report of Dissolution of Marriage or Annulment form that are not a part of the divorce decree may be corrected either by query or upon application of either party to the dissolution of marriage or annulment or the legal representative.

99.12(3) Corrections to the report of dissolution of marriage or annulment shall be accepted only within the first year from the date of dissolution of marriage or annulment.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.13(144) Minimum information required to establish a new certificate of live birth.

99.13(1) A request to establish a new certificate of live birth shall be submitted to the state registrar and include at a minimum the following information:

- a. The full name of the child as stated on the original certificate of live birth;
- b. The full name of the child to be listed on the new certificate of live birth;
- c. The date and place of birth as stated on the original certificate of live birth;
- d. The full name of the parent or parents as listed on the original certificate of live birth; and
- e. The full name, place of birth, date of birth, and complete residential address of the parent or parents to be listed on the new certificate of live birth.

99.13(2) The new certificate of live birth shall contain the same state file number and registration file date as were assigned to the original certificate of live birth.

99.13(3) The clerk of the court shall, within 30 days of issuance, deliver one certified copy of any adoption decree, and any contact preference form or medical history form associated with the certified copy of any adoption decree for the purposes of Iowa Code section 144.24A, and fee pursuant to rule 641—95.6(144) to the state registrar of vital statistics to prepare a certificate of birth as prescribed in Iowa Code section 144.19.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 6108C, IAB 12/29/21, effective 2/2/22]

641—99.14(144) Establishment of new certificate of live birth following adoption.

99.14(1) Upon receipt of a completed Certificate of Adoption Report form or a certified copy of the decree of adoption from a court of competent jurisdiction and the information required pursuant to rule 641—99.13(144), the state registrar shall establish a new certificate of live birth for a person who was born in Iowa and has been adopted.

99.14(2) The new certificate of live birth shall not be marked “amended.”

99.14(3) When a new certificate of live birth is established, the actual date and place of birth shall be shown on the certificate.

99.14(4) The county registrar and state registrar shall seal the original certificate of live birth. The state registrar shall place the original certificate of live birth and all related adoption information in a sealed file, and the file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24 or as provided in Iowa Code section 144.24A.

99.14(5) In accordance with Iowa Code section 144.23A, an adopted person may apply to the state registrar to have the adopted person’s original certificate of birth prior to adoption reestablished to include the name of an omitted biological parent.

99.14(6) The new certificate of live birth after adoption shall not be on file at the county registrar’s office.

99.14(7) The state registrar shall reveal the date of the adoption and the name and address of the court that issued the adoption decree upon the receipt of a completed, notarized Revelation of County of Adoption form from an adult adopted person, a biological parent, an adoptive parent, or the legal representative of the adult adopted person, the biological parent, or the adoptive parent pursuant to Iowa Code section 144.24.

99.14(8) Administrative and certified copy fees shall be charged and remitted pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 6108C, IAB 12/29/21, effective 2/2/22; ARC 8043C, IAB 5/29/24, effective 7/3/24]

641—99.15(144) Establishment of new certificate of live birth following a birth by gestational surrogate arrangement.

99.15(1) All live births shall be considered the product of the woman who delivered the live infant and shall be filed in the standard manner, with that woman named as the birth mother on the original record submitted for registration.

99.15(2) For the purpose of filing for registration the record of a live birth by a gestational surrogate, the institution's or non-institution's person responsible for filing the certificate of live birth shall:

- a. Notify the state registrar of the birth of a child pursuant to a gestational surrogate arrangement;
- b. Follow directives for completion of the official birth worksheet;
- c. Submit the birth record for registration based on the birth mother's information; and
- d. Notify the state registrar when the birth record has been submitted for registration.

99.15(3) In addition, the institution's or non-institution's person responsible for filing the record for registration shall:

- a. Provide the prenatal and medical data on the medical portion of the birth worksheet pertinent to the pregnancy and the birth mother's prenatal care;
- b. Waive all birth registration and copy fees as collected on behalf of the state registrar;
- c. Indicate on the registration that the birth mother does not have custody of the infant;
- d. Assist in advising the intended parents of the procedures required to file the original birth record for registration and to reestablish the record to reflect the intended parents' information; and
- e. Advise the birth mother to complete the mother's portion of the birth worksheet and to mark "no" for the social security card for the child.

99.15(4) Two intended parents—both intended parents are biological parents to the child. If the intended mother is the egg donor and the intended father is the sperm donor to the child being carried by the gestational surrogate:

- a. After the birth of the child, the intended parents shall petition a court of competent jurisdiction to establish legal paternity and maternity of the child.
- b. The court shall enter an order requiring the state registrar to reestablish the certificate of live birth naming the intended mother and father as the legal mother and father and requiring the state registrar to seal the original birth certificate and all related documentation.
- c. The court order shall:
 - (1) Identify the child's full name as stated on the original certificate of live birth;
 - (2) State the child's date of birth and place of birth;
 - (3) Identify the full names of the birth mother and her legal spouse, if married;
 - (4) Disestablish the birth mother and her legal spouse, if married, as the legal parents of the child; and
 - (5) Identify the intended parents' full names prior to any marriage, full current legal names, dates of birth, birthplaces, social security numbers, and full current residential address including county.
- d. The intended parents or their legal representative shall:
 - (1) Submit a certified copy of the court order to the state registrar;
 - (2) Remit administrative and certified copy fees pursuant to rule 641—95.6(144); and
 - (3) Include a notarized written request with mailing instructions for the certified copy of the certificate of live birth.

99.15(5) Two intended parents—intended mother is biological mother to the child; her legal spouse is not a biological parent. If the intended mother is the egg donor but her legal spouse is not the sperm donor, the intended mother shall petition a court of competent jurisdiction after the birth of the child to establish legal maternity.

a. The court shall enter an order requiring the state registrar to reestablish the certificate of live birth naming the intended mother as the legal mother and shall require the state registrar to seal the original certificate of live birth and all related documents.

b. The court order establishing legal maternity shall:

- (1) Identify the child's full name as stated on the original certificate of live birth;
- (2) State the child's date of birth and place of birth;
- (3) Identify the full names of the birth mother and her legal spouse, if married;

- (4) Disestablish the birth mother and her legal spouse, if married, as the legal parents of the child; and
- (5) Identify the intended mother's full name prior to any marriage, full current name, date of birth, birthplace, social security number, and full current residential address including county.

c. The intended mother or her legal representative shall:

- (1) Submit a certified copy of the court order to the state registrar;
- (2) Remit administrative and certified copy fees pursuant to rule 641—95.6(144); and
- (3) Include a notarized written request with mailing instructions for the certified copy of the certificate of live birth.

99.15(6) Two intended parents—intended father is biological father to the child; his legal spouse is not a biological parent.

a. If the surrogate birth mother is unmarried and the intended father is the sperm donor, the unmarried surrogate birth mother and the intended father may complete a Voluntary Paternity Affidavit form after the child's birth to place the intended father's name and information on the certificate of live birth.

b. If the surrogate birth mother is married and the intended father is the sperm donor, the married surrogate birth mother and the intended father shall by court order disestablish the surrogate birth mother's legal spouse as the legal parent and may complete a Voluntary Paternity Affidavit form pursuant to Iowa Code section 144.13.

c. The court order that disestablishes the married surrogate birth mother's legal spouse and the completed Voluntary Paternity Affidavit form shall be submitted to the state registrar.

d. If a certified copy of the certificate of live birth is requested, a notarized written request shall also be submitted to the state registrar with the certified copy fee and mailing instructions.

e. There is no administrative fee to process the completed Voluntary Paternity Affidavit form.

f. Adoption laws shall be followed to reestablish the certificate of live birth by establishing the nonbiological parent on the certificate of live birth pursuant to Iowa Code chapter 600.

99.15(7) Two intended parents—neither biological parent to the child. If the intended parents are neither the egg donor nor sperm donor, adoption laws shall be followed to reestablish the certificate of live birth by disestablishing the birth mother and her legal spouse, if any, and establishing the nonbiological parents on the certificate of live birth pursuant to Iowa Code chapter 600.

99.15(8) One female intended parent—biological mother to the child. If the intended mother is the egg donor to the child being carried by the gestational surrogate:

a. After the birth of the child, the intended mother shall petition a court of competent jurisdiction to establish legal maternity of the child.

b. The court shall enter an order requiring the state registrar to reestablish the certificate of live birth naming the intended mother as the legal mother and requiring the state registrar to seal the original certificate of live birth and all related documentation.

c. The court order shall:

- (1) Identify the child's full name as stated on the original certificate of live birth;
- (2) State the child's date of birth and place of birth;
- (3) Identify the full names of the birth mother and her legal spouse, if married;
- (4) Disestablish the birth mother and her legal spouse, if married, as the legal parents of the child; and
- (5) Identify the intended parent's full name prior to any marriage, full current legal name, date of birth, birthplace, social security number, and full current residential address including county.

d. The intended parent or her legal representative shall:

- (1) Submit a certified copy of the court order to the state registrar;
- (2) Remit administrative and certified copy fees pursuant to rule 641—95.6(144); and
- (3) Include a notarized written request with mailing instructions for the certified copy of the certificate of live birth.

99.15(9) One male intended parent—biological father to the child.

a. If the surrogate birth mother is unmarried and the intended father is the sperm donor, the unmarried surrogate birth mother and the intended father may complete a Voluntary Paternity Affidavit

form after the child's birth to place the intended father's name and information on the certificate of live birth.

b. If the surrogate birth mother is married and the intended father is the sperm donor, the married surrogate birth mother and the intended father shall by court order disestablish the surrogate birth mother's legal spouse as the legal parent and may complete a Voluntary Paternity Affidavit form pursuant to Iowa Code section 144.13.

c. The court order that disestablishes the married surrogate birth mother's legal spouse and the completed Voluntary Paternity Affidavit form shall be submitted to the state registrar.

d. If a certified copy of the certificate of live birth is requested, a notarized written request shall also be submitted to the state registrar with the certified copy fee and mailing instructions.

e. There is no administrative fee to process the completed Voluntary Paternity Affidavit form.

f. If the intended father has been established as the legal father pursuant to paragraph 99.15(9) "a" or "b" and the surrogate birth mother and the intended father wish to remove the surrogate birth mother as the legal mother from the certificate of live birth, the parties shall seek a court order. The court order disestablishing legal maternity shall:

- (1) Identify the child's full name as stated on the original certificate of live birth;
- (2) State the child's date of birth and place of birth;
- (3) Identify the full name of the birth mother; and
- (4) Disestablish the birth mother as the legal parent of the child.

g. The intended parent or his legal representative shall:

- (1) Submit a certified copy of the court order to the state registrar;
- (2) Remit administrative and certified copy fees pursuant to rule 641—95.6(144); and
- (3) Include a notarized written request with mailing instructions for the certified copy of the certificate of live birth.

99.15(10) One intended parent—not biological parent to the child. If the intended parent is neither the egg donor nor sperm donor, adoption laws shall be followed to reestablish the certificate of live birth by disestablishing the birth mother and her legal spouse, if any, and establishing the nonbiological parent on the certificate of live birth pursuant to Iowa Code chapter 600.

99.15(11) The state registrar shall seal the original certificate of live birth. The state registrar shall place the original certificate of live birth and all related documents in a sealed file, and the file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24.

99.15(12) The new certificate of live birth shall not be marked "amended."

99.15(13) The new certificate of live birth shall not be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.15(14) A certified copy fee and an administrative fee to replace a parent's information on a certificate of live birth shall be charged and remitted pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—99.16(144) Certificate of live birth following voluntary paternity affidavit.

99.16(1) If the birth mother was legally married at the time of conception or birth or at any time during the period between conception and birth, the name of her spouse shall be entered on the certificate of live birth as a parent pursuant to Iowa Code section 144.13.

99.16(2) If the birth mother was not legally married at the time of conception or birth or at any time during the period between conception and birth, the birth mother and the alleged biological father may:

- a.* Complete a Voluntary Paternity Affidavit form after the birth of the child; and
- b.* Submit the completed form to the state registrar.

99.16(3) If the birth mother was legally married at the time of conception or birth or at any time during the period between conception and birth, and her legal spouse is not the biological father, the birth mother and the alleged biological father may:

- a.* Complete a Voluntary Paternity Affidavit form after the birth of the child;
- b.* Obtain a court order that disestablishes her legal spouse as a parent; and
- c.* Submit the completed form and a certified copy of the court order to the state registrar.

99.16(4) If the birth mother and the biological father of an Iowa-born child subsequently marry each other after a voluntary affidavit of paternity has been processed, the parents may submit a second completed Voluntary Paternity Affidavit form with a certified copy of the parents' certificate of marriage to establish a new certificate changing the child's last name to that of the father.

99.16(5) If another man is shown as the father on the original certificate of live birth, a new certificate of live birth may be established only when a determination of paternity is made by a court of competent jurisdiction.

99.16(6) There is no age limitation and no fee for filing a completed Voluntary Paternity Affidavit form.

99.16(7) The county registrar and the state registrar shall seal the original certificate of live birth. The state registrar shall place the original certificate of live birth and all related documents in a sealed file, and the file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24.

99.16(8) A copy of the completed and processed Voluntary Paternity Affidavit form may be acquired by either parent or either parent's legal representative upon notarized application and payment of the fee pursuant to rule 641—95.6(144). The notarized application shall include at a minimum the following items:

- a. The child's full name;
- b. The child's date and place of birth;
- c. The mother's full name prior to any marriage; and
- d. The full name and mailing address of the applicant.

99.16(9) The new certificate of live birth shall not be marked "amended."

99.16(10) The new certificate of live birth shall be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.16(11) The birth mother and the biological father shall surrender any incorrect certified copies of the child's certificate of live birth for replacement at no cost. Additional certified copies of the new certificate of live birth shall be acquired upon receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—99.17(144) Certificate of live birth following court determination of paternity.

99.17(1) If the birth mother was married at the time of conception or birth or at any time during the period between conception and birth, the name of her spouse shall be entered on the certificate of live birth as a parent unless paternity has been determined otherwise by a court of competent jurisdiction pursuant to Iowa Code section 144.13.

99.17(2) Upon receipt of a certified copy of the court determination of paternity order from a court of competent jurisdiction or the completed Abstract From Court Determination of Paternity form, the state registrar shall establish a new certificate of live birth to be filed in place of the original certificate of live birth.

99.17(3) The new certificate of live birth shall list the name of the child as stated in the court determination of paternity order.

99.17(4) The state child support recovery unit may not change the child's name.

99.17(5) After a court determination of paternity has been completed, the parents as listed on the court order may submit a completed Voluntary Paternity Affidavit form to change the child's last name to that of the established father.

99.17(6) The county registrar and the state registrar shall seal the original certificate of live birth. The state registrar shall place the original certificate of live birth and all related documents in a sealed file, and the file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24.

99.17(7) The new certificate of live birth shall not be marked "amended."

99.17(8) The new certificate of live birth shall be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.17(9) There are no administrative fees required to establish a new certificate of live birth following a court determination of paternity.

99.17(10) Any incorrect certified copy of the child's certificate of live birth shall be surrendered for replacement at no cost. Additional certified copies of the new certificate of live birth shall be acquired upon receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 1075C, IAB 10/2/13, effective 11/6/13]

641—99.18(144) Certificate of live birth following rescision of paternity affidavit or disestablishment of paternity.

99.18(1) An application to rescind a voluntary paternity affidavit shall be made on the Rescison of Paternity Affidavit form by either the birth mother or the putative father who originally completed and signed the Voluntary Paternity Affidavit form pursuant to Iowa Code section 252A.3A.

a. The completed Rescison of Paternity Affidavit form shall be notarized and received by the state registrar within the earlier of either 60 days from the latest notarized parental signature on the original Voluntary Paternity Affidavit form or entry of a court order regarding the child by the Iowa child support recovery unit pursuant to Iowa Code section 252A.3A.

b. Acceptance of the completed Rescison of Paternity Affidavit form shall remove the alleged biological father's information from the certificate of live birth and rescind the voluntary paternity affidavit.

c. The child's last name shall revert to the last name as it was listed on the certificate of live birth prior to the voluntary paternity affidavit.

d. The state registrar shall send a written notice of the rescision to the last-known address of the signatory of the voluntary paternity affidavit who did not sign the Rescison of Paternity Affidavit form.

e. After the completed Rescison of Paternity Affidavit form has been accepted and processed, the state registrar shall not accept any subsequent Voluntary Paternity Affidavit forms signed by the same mother and putative father relating to the same child pursuant to Iowa Code section 252A.3A.

99.18(2) Upon receipt of a court-ordered disestablishment of paternity, the father's information shall be removed from the certificate of live birth. The child's last name shall revert to the last name as it was listed on the certificate of live birth prior to the establishment of paternity.

99.18(3) An administrative fee shall be charged and remitted pursuant to rule 641—95.6(144).

99.18(4) The county registrar and the state registrar shall seal the original certificate of live birth. The state registrar shall place the rescision of paternity information in the same sealed file as the original certificate of live birth and all previous related documents. The file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24.

99.18(5) The new certificate of live birth shall not be marked "amended."

99.18(6) The new certificate of live birth shall be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.18(7) Any incorrect certified copies of the child's certificate of live birth shall be surrendered for replacement at no cost. Additional certified copies of the new certificate of live birth shall be acquired upon receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.19(144) Certificate of live birth following court-ordered change of name.

99.19(1) For a court-ordered name change, a certified copy of an order from a court of competent jurisdiction pursuant to Iowa Code chapter 674 or an Abstract to Change Registrant's Legal Name form completed by the clerk of district court changing the name shall be submitted to the state registrar.

99.19(2) Only the person named on the record, parent or parents if the registrant is a minor child, legal guardian, or legal representative may request a court-ordered change of name.

99.19(3) The court order or abstract shall contain:

- a. The registrant's full name as it appears on the original certificate of live birth;
- b. The registrant's date and place of birth;
- c. The mother's full maiden name and father's full name as it appears on the original certificate of live birth;
- d. The registrant's full new name; and
- e. The certification of the clerk of district court.

99.19(4) The certified copy of a certificate of live birth after a legal change of name shall be clearly marked "legal change of name" and note the following:

- a. The registrant's full name as shown on the original certificate;
- b. Any previous legal name changes;
- c. The registrant's full new name according to the court order;
- d. The date the legal change of name order was granted; and
- e. The name of the court that ordered the name change pursuant to Iowa Code chapter 674.

99.19(5) A parent cannot be added to the certificate of live birth with a court-ordered change of name.

99.19(6) The county registrar and the state registrar shall seal the original certificate of live birth. The state registrar shall place the original certificate of live birth and all related documents in a sealed file, and the file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24.

99.19(7) After the court-ordered change of name, the certificate of live birth shall not be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.19(8) An administrative fee shall be charged and remitted pursuant to rule 641—95.6(144).

99.19(9) Any incorrect certified copies of the certificate shall be surrendered for replacement at no cost. Additional certified copies of the new certificate shall be acquired upon receipt of a notarized application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—99.20(144) Certificate of live birth following sex designation change.

99.20(1) After surgery or other treatment to change a sex designation, the registrant shall submit to the state registrar a notarized affidavit from the physician and surgeon, or osteopathic physician and surgeon, completing the sex designation treatment stating the following:

- a. The sex designation has been permanently changed by surgery or other treatment;
- b. Description of the medical procedures; and
- c. The physician and surgeon or osteopathic physician and surgeon's full name, address, state of medical license, and medical license number.

99.20(2) The medical affidavit shall be accompanied by a completed and notarized Amendment to Certificate of Live Birth form.

99.20(3) If the registrant's name is to be changed on the certificate of live birth, the registrant shall submit to the state registrar a certified copy of the court-ordered change of name.

99.20(4) Pursuant to Iowa Code section 144.23, the state registrar may make further investigation or require further information necessary to determine whether a sex change has occurred.

99.20(5) The county registrar and the state registrar shall seal the original certificate of live birth. The state registrar shall place the original certificate of live birth and all related documents in a sealed file, and the file shall not be opened and inspected except by the state registrar for administrative purposes or upon an order from a court of competent jurisdiction pursuant to Iowa Code section 144.24.

99.20(6) The certificate of live birth after the sex designation change shall not be on file at the county registrar's office pursuant to rule 641—95.7(144).

99.20(7) The new certificate of live birth shall not be marked "amended."

99.20(8) Administrative fees shall be charged and remitted pursuant to rule 641—95.6(144).

99.20(9) Any incorrect certified copies of the certificate shall be surrendered for replacement at no cost. Additional certified copies of the new certificate shall be acquired upon receipt of a notarized

application, legible copy of a current government-issued photo identification or other identification documents acceptable to the state registrar and payment of the fee pursuant to rule 641—95.6(144).

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

These rules are intended to implement Iowa Code sections 144.19 to 144.21, 144.23, 144.24, 144.25A, 144.38 to 144.41, 252A.3A, 600.15, 600.16A, 674.2, 674.7 and 674.9.

¹ January 16, 2013, effective date of the rescission of Chapter 99 and the adoption of new Chapter 99 [ARC 0483C] delayed until adjournment of the 2013 General Assembly by the Administrative Rules Review Committee at its meeting held January 8, 2013; delay lifted at the meeting held March 8, 2013.

CHAPTER 100
VITAL RECORDS REGISTRIES AND REPORTS

[Prior to 12/12/12, see [641] Chs 105 to 107]

641—100.1(144) Definitions. For the purpose of this chapter, the definitions in 641—Chapter 95 shall apply. In addition, the following definitions shall apply solely to this chapter:

“Abortion” means the termination of a human pregnancy with the intent other than to produce a live birth or to remove a dead fetus.

“Adult,” when used in reference to the mutual consent voluntary adoption registry, means an individual who has reached the age of 18 years at the time application is made.

“Aggregate form” means a compilation of the information received by the department on the Statistical Report of Termination of Pregnancy form for each item listed, with the exception of the report tracking number, the health care provider code, and any set of data for which the number is so small that the confidentiality of any person to whom the information relates may be compromised.

“Attempt to perform an abortion” means an act, or an omission of a statutorily required act, that, under the circumstances as the actor believes them to be, constitutes a substantial step in a course of conduct planned to culminate in the performing of an abortion.

“Child,” when used in reference to the declaration of paternity registry, means a person under 18 years of age for whom paternity has not been established.

“Court” means the juvenile court when used in reference to the declaration of paternity registry.

“Father” means the male, biological parent of a child when used in reference to the declaration of paternity registry.

“Fertilization” means the fusion of a human spermatozoon with a human ovum.

“Health care provider” means an individual licensed under Iowa Code chapter 148, 148C, 148D, or 152, or any individual who provides medical services under the authorization of the licensee.

“Inducing a termination of pregnancy” means the use of any means to terminate the pregnancy of a woman known to be pregnant with the intent other than to produce a live birth or to remove a dead fetus.

“Inducing a termination of pregnancy” includes abortion.

“Major bodily function” includes but is not limited to functions of the immune system, normal cell growth, and digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions.

“Medical emergency” means a situation in which an abortion is performed to preserve the life of the pregnant woman whose life is endangered by a physical disorder, physical illness, or physical injury, including a life-endangering physical condition caused by or arising from the pregnancy, or when continuation of the pregnancy will create a serious risk of substantial and irreversible impairment of a major bodily function of the pregnant woman.

“Medical facility” means any public or private hospital, clinic, center, medical school, medical training institution, health care facility, physician’s office, infirmary, dispensary, ambulatory surgical center, or other institution or location where medical care is provided to any person.

“Perform,” “performed,” or *“performing,”* relative to an abortion, means the use of any means, including medical or surgical, to terminate the pregnancy of a woman known to be pregnant with the intent other than to produce a live birth or to remove a dead fetus.

“Physician” means a person licensed under Iowa Code chapter 148.

“Postfertilization age” means the age of the unborn child as calculated from fertilization.

“Probable postfertilization age” means what, in reasonable medical judgment, will with reasonable probability be the postfertilization age of the unborn child at the time the abortion is to be performed.

“Reasonable medical judgment” means a medical judgment made by a reasonably prudent physician who is knowledgeable about the case and the treatment possibilities with respect to the medical conditions involved.

“Registrant,” when used in reference to the declaration of paternity registry, means a person who has registered and claims to be the father of a child.

“Registry” means the declaration of paternity registry or the mutual consent voluntary adoption registry.

“*Sibling*” means one of two or more persons who are born of the same parents or, sometimes, who have at least one parent in common. “*Sibling*” also means brother or sister when used in reference to the mutual consent voluntary adoption registry.

“*Spontaneous termination of pregnancy*” means the occurrence of an unintended termination of pregnancy at any time during the period from conception to 20 weeks gestation and which is not a spontaneous termination of pregnancy at any time during the period from 20 weeks or greater which is reported to the department as a fetal death under Iowa Code chapter 144.

“*Unborn child*” means an individual organism of the species *Homo sapiens* from fertilization until live birth.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 3394C, IAB 10/11/17, effective 11/15/17]

641—100.2(144) Forms—property of department. All forms, certificates and reports pertaining to the registration of vital events are the property of the department and shall be surrendered to the state registrar upon demand.

100.2(1) The forms supplied or approved for reporting vital events shall be used for official purposes as provided for by law, rules and instructions of the state registrar.

100.2(2) No forms, except those furnished or approved by the state registrar, shall be used in the reporting of vital events or the making of copies of vital records.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—100.3(144) Declaration of paternity registry established. Pursuant to Iowa Code section 144.12A, there is established in the department a registry for the declaration of paternity of a putative father who wishes to register prior to the birth of a child and no later than the date of the filing of the petition for termination of parental rights.

100.3(1) The putative father who files a Declaration of Paternity Registry form with the state registrar shall provide the following:

- a. Registrant’s name, current address, social security number, and notarized signature and date signed;
- b. The name, last-known address, and social security number, if known, of the mother of the child; and
- c. The name of the child, if known, and the date and location of the birth of the child, if known.

100.3(2) The putative father who files the Declaration of Paternity Registry form shall be responsible to notify the state registrar in writing of any change in address.

100.3(3) The state registrar shall forward a copy of the declaration of paternity to the mother as notification that the person has registered, if the mother’s name and address have been provided.

100.3(4) There shall be no fee required to file the declaration of paternity.

100.3(5) A fee as established pursuant to rule 641—95.6(144) shall be charged and remitted for conducting a search of the registry. The fee shall be retained for the search.

100.3(6) Upon written request and remittance of the required fee, the department shall conduct a search of the registry. Written requests may be submitted by only:

- a. The biological mother of the child;
- b. A court;
- c. The department of human services;
- d. The child support recovery unit for an action to establish paternity or support; or
- e. The attorney of any party to an adoption, termination of parental rights, or establishment of paternity or support action.

100.3(7) If a declaration of paternity is on file, the department shall provide the name, address, and social security number of a registrant to the following:

- a. The biological mother of the child;
- b. A court;
- c. The department of human services;
- d. The child support recovery unit for an action to establish paternity or support; or

e. The attorney of any party to an adoption, termination of parental rights, or establishment of paternity or support action.

100.3(8) If no declaration of paternity is on file, a written statement to that effect shall be provided to the person making the inquiry.

100.3(9) Information from the declaration of paternity registry shall not be divulged to any person other than those listed in subrule 100.3(6) and shall be considered a confidential record as to any other person, except upon order of the court for good cause shown.

100.3(10) Information provided to the registry may be revoked by the registrant by the submission of a written statement, signed and acknowledged by the registrant before a notary public.

a. The statement shall include a declaration that to the best of the registrant's knowledge:

- (1) The registrant is not the father of the named child; or
- (2) That paternity of the true father has been established.

b. Revocation shall nullify the registration, and the information provided by the registrant shall be expunged.

c. Revocation is effective only following the birth of the child.

100.3(11) The Declaration of Paternity Registry form shall be available from the state registrar of vital records or the county registrar.

100.3(12) The declaration of paternity registry does not constitute an affidavit of paternity filed pursuant to Iowa Code section 252A.3A. Declarations filed shall be maintained in a registry separate and distinct from the affidavit of paternity registry.

100.3(13) A declaration of paternity filed with the registry may be used as evidence of paternity in an action to establish paternity or to determine a support obligation with respect to the putative father.

100.3(14) Failure or refusal to file a declaration of paternity shall not be used as evidence to avoid a legally established obligation of financial support for a child.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—100.4(144) Mutual consent voluntary adoption registry established. There is established in the department a mutual consent voluntary adoption registry. Adult adopted children, adult siblings, and the biological parents of adult adoptees may register with the mutual consent voluntary adoption registry to obtain identifying birth information.

100.4(1) All identifying information maintained in the registry is confidential.

100.4(2) All requests shall be completed on the Mutual Consent Voluntary Adoption Registry Application form available from the state registrar of vital records or the county registrar.

100.4(3) Pursuant to rule 641—95.6(144), a fee shall be charged and remitted for the filing of a completed application for the registry, and a fee shall be charged and remitted for updating applicant information maintained in the registry.

100.4(4) The state registrar shall reveal the identity of the biological parent to the adult adopted child or reveal the identity of the adult adopted child to the biological parent if all the following conditions are met:

- a. A biological parent has filed a completed request form and provided consent to the revelation of the biological parent's identity to the adult adopted child, upon request of the adult adopted child;
- b. An adult adopted child has filed a completed request form and provided consent to the revelation of the identity of the adult adopted child to a biological parent, upon request of the biological parent; and
- c. The state registrar has been provided sufficient information to make the requested match with certainty.

100.4(5) The state registrar shall reveal the identity of the adult adopted child to an adult sibling or shall reveal the identity of an adult sibling to the adult adopted child if all of the following conditions are met:

- a. An adult adopted child has filed a completed request form and provided consent to the revelation of the adult adopted child's identity to an adult sibling;
- b. The adult sibling has filed a completed request form and provided consent to the revelation of the identity of the adult sibling to the adult adopted child; and

c. The state registrar has been provided sufficient information to make the requested match with certainty.

100.4(6) If the adult adopted child has a sibling who is a minor and who has also been adopted, the state registrar shall not grant the request of either the adult adopted child or the biological parent to reveal the identities of the parties.

100.4(7) A person who has filed a request or provided consent may withdraw the consent at any time prior to the release of any information by submitting a written withdrawal of consent statement with the state registrar.

100.4(8) The adult adoptee, adult sibling, and biological parent completing an application shall be responsible for updating the contact information.

100.4(9) The state registrar shall notify the parties via telephone, verify the address information, and provide written notice to the parties.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter]

641—100.5(144) Statistical report of termination of pregnancy report. A health care provider who initially identifies and diagnoses a spontaneous termination of pregnancy or who induces a termination of pregnancy shall file with the department a Statistical Report of Termination of Pregnancy form for each termination.

100.5(1) The health care provider shall make a good-faith effort to obtain all of the following information that is available with respect to each termination:

- a. The confidential health care provider code as assigned by the department.
- b. The report tracking number.
- c. The maternal health services region of the Iowa department of public health, as designated as of July 1, 1997, in which the patient resides. If the patient resides in another state, the residence shall be reported as “nonresident.”
- d. The race of the patient.
- e. The age of the patient.
- f. The marital status of the patient.
- g. The educational level of the patient.
- h. The number of previous pregnancies, live births, and spontaneous or induced terminations of pregnancies.
- i. The month and year in which the termination occurred.
- j. The number of weeks since the patient’s last menstrual period and a clinical estimate of gestation.
- k. Whether the termination was spontaneous or induced.
- l. The method used for an induced termination, including whether mifepristone was used.

100.5(2) In addition, a physician who performs or attempts to perform an abortion shall report to the department all of the following:

- a. If a determination of probable postfertilization age of the unborn child was made, the probable postfertilization age determined and the method and basis of the determination.
- b. If a determination of probable postfertilization age of the unborn child was not made, the basis of the determination that a medical emergency existed.
- c. If the probable postfertilization age of the unborn child was determined to be 20 or more weeks:
 - (1) The basis of the determination of a medical emergency, or
 - (2) The basis of the determination that the abortion was necessary to preserve the life of an unborn child.
- d. The method used for the abortion and:
 - (1) In the case of an abortion performed when the probable postfertilization age was determined to be 20 or more weeks, whether the method of abortion used was one that, in the physician’s reasonable medical judgment, provided the best opportunity for an unborn child to survive, or
 - (2) If such a method was not used, the basis of the determination that termination of the human pregnancy in that manner would pose a greater risk than would any other available method of the death of the pregnant woman or of the substantial and irreversible physical impairment of a major bodily function.

100.5(3) The health care provider who identifies a spontaneous termination or performs an induced termination shall prepare the report on the standard form and forward to the state registrar on or before the tenth day of each calendar month all records for the preceding month. Reports may be sent by certified mail to the state registrar. Termination reports shall be submitted within 30 days of the date of the occurrence.

100.5(4) The department shall provide the forms, or the provider may use the master copy of the form provided by the department to make copies for reporting.

100.5(5) The information shall be collected, reproduced, released, and disclosed in a manner which ensures the anonymity of:

- a. The patient who experiences a termination of pregnancy;
- b. The health care provider who identifies and diagnoses or induces a termination of pregnancy; and
- c. The hospital, clinic, or health facility in which a termination of pregnancy is identified and diagnosed or induced.

100.5(6) The department may share information with federal public health officials for the purpose of securing federal funding or conducting public health research. However, in sharing the information, the department shall not relinquish control of the information, and any agreement entered into by the department with federal public health officials to share information shall prohibit the use, reproduction, release, or disclosure of the information by federal public health officials in a manner which violates Iowa Code section 144.29A.

100.5(7) By June 30, annually, the department shall publish a demographic summary of the statistics for the previous calendar year, compiled from the reports for that year, except that the department shall not reproduce, release, or disclose any information obtained which reveals the identity of any patient, health care provider, hospital, clinic, or other health facility, and shall ensure anonymity in the following ways:

- a. The department may use information concerning the report tracking number or concerning the identity of a reporting health care provider, hospital, clinic, or other health facility only for the purpose of information collection. The department shall not reproduce, release, or disclose this information for any purpose other than for use in annually publishing the demographic summary.
- b. The department shall enter information from any report of termination submitted within 30 days of receipt of the statistical report of termination of pregnancy and, following entry of the information, shall immediately destroy the report by shredding it. However, entry of the information from a report shall not include any health care provider, hospital, clinic, or other health facility identification information including, but not limited to, the confidential health care provider code, as assigned by the department.
- c. To protect confidentiality, the department shall limit release of information in an aggregate form which prevents identification of any individual patient, health care provider, hospital, clinic, or other health facility.
- d. The department shall establish and use a methodology to provide a statistically verifiable basis for any determination of the aggregate level at which information may be released so that the confidentiality of any person is not comprised. The methodology shall consider both the counts of the events for each item of information and the population that could be represented.

100.5(8) Reports, information, and records submitted and maintained are strictly confidential and shall not be released or made public upon subpoena, search warrant, discovery proceedings, or by any other means.

100.5(9) The department shall assign a code to any health care provider who may be required to report a termination. An application procedure shall not be required for assignment of a code to a health care provider.

100.5(10) A health care provider shall assign a report tracking number which enables the health care provider to access the patient's medical information without identifying the patient. The report tracking number shall be maintained by the provider for a period of six months after the end of the calendar year.

100.5(11) For reporting of spontaneous terminations of pregnancy, a health care provider who practices within a hospital, clinic, or other health facility may file the required reporting forms with the department or may authorize one staff person to fulfill the reporting requirements. For reporting of induced terminations of pregnancy, the physician performing the termination shall file the required reporting forms with the department.

100.5(12) Reporting penalties.

a. A physician who fails to submit a report in accordance with 2017 Iowa Acts, Senate File 471, section 3(3), and these rules by the end of 30 days following the due date shall be subject to a late fee of \$500 for each additional 30-day period or portion of a 30-day period the report is overdue. The fee shall be collected by the department.

b. A physician required to report in accordance with 2017 Iowa Acts, Senate File 471, section 3(3), who has not submitted a report or who has submitted only an incomplete report more than one year following the due date may, in an action brought by the board of medicine in the manner in which actions are brought to enforce Iowa Code chapter 148, be directed by a court of competent jurisdiction to submit a complete report within a time period stated by court order or be subject to contempt of court.

c. A physician who intentionally or recklessly falsifies a report required under 2017 Iowa Acts, Senate File 471, section 3, is subject to a civil penalty of \$100. The civil penalty shall be collected by the department pursuant to Iowa Code chapter 17A and 641—Chapter 173.

100.5(13) Any person who knowingly violates a provision of these rules is guilty of a serious misdemeanor pursuant to Iowa Code section 144.52.

[ARC 0483C, IAB 12/12/12, effective 1/16/13; see Delay note at end of chapter; ARC 3394C, IAB 10/11/17, effective 11/15/17]

These rules are intended to implement Iowa Code sections 144.29A, 144.52 and 252A.3A and 2017 Iowa Acts, Senate File 471, section 3.

CHAPTER 106
STATE-FUNDED FAMILY MEDICINE OBSTETRICS FELLOWSHIP PROGRAM

641—106.1(135) Definitions.

“Rural area” means all nonmetropolitan (metro) counties and all metro census tracts with rural-urban commuting area (RUCA) codes 4 through 10. The U.S. Department of Agriculture’s (USDA’s) Economic Research Service (ERS) creates RUCA codes using U.S. Census data.

“Underserved area” means an area, population group, or facility designated by the U.S. Department of Health and Human Services as a health professional shortage area for primary care.

[ARC 8193C, IAB 8/7/24, effective 9/11/24]

641—106.2(135) Fellowship cost reimbursement to participating teaching hospital.

106.2(1) A teaching hospital may apply to the department of health and human services through a request for proposal (RFP) process if the teaching hospital intends to administer an obstetrics (OB) fellowship program and request reimbursement for expenses from the family medicine OB fellowship program fund. After the first RFP, RFPs will be posted as needed based on expressed interest from additional teaching hospitals.

106.2(2) A participating teaching hospital that has been accepted into the family medicine OB fellowship program through the RFP process may submit a reimbursement claim to the department for a fellow who has completed the requirements in Iowa Code section 135.193. A copy of the program agreement between the teaching hospital and the fellow must be submitted to the department for verification that the fellow has committed to serve the required five years of service in a rural or underserved area as defined in rule 641—106.1(135).

106.2(3) Subject to availability, funds from the family medicine OB fellowship program fund shall be used in accordance with Iowa Code section 135.193, and reimbursement will be no greater than the lesser of the amount of funds expended by the teaching hospital on the OB fellow or \$140,000 per fellow.

106.2(4) If the department receives more claims than funds available, the department will maintain a wait list of eligible fellows and will manage reimbursements to a participating teaching hospital for eligible fellows’ claims on a first-come, first-served basis. The department will reimburse a participating teaching hospital for eligible fellows who are on the wait list if additional funds become available.

106.2(5) The fellow shall enter into a recoupment agreement with the department prior to commencing any training with a participating hospital. The program agreement between a participating hospital and a fellow shall include notification of this requirement.

[ARC 8193C, IAB 8/7/24, effective 9/11/24]

These rules are intended to implement Iowa Code section 135.193.

[Filed ARC 8193C (Notice ARC 7508C, IAB 1/24/24), IAB 8/7/24, effective 9/11/24]

CHAPTER 107
BOARD-CERTIFIED BEHAVIOR ANALYST AND BOARD-CERTIFIED ASSISTANT
BEHAVIOR ANALYST (BCBA/BCaBA) GRANTS PROGRAM

641—107.1(135) Scope and purpose. The board-certified behavior analyst and board-certified assistant behavior analyst (BCBA/BCaBA) grants program is established to increase access for Iowans to applied behavior analysis services by providing grants to Iowa resident and nonresident applicants who have been accepted for admission or are attending a university, a community college, or an accredited private institution, within or outside the state of Iowa; are enrolled in a program, offered at a physical location or online, that is accredited and meets coursework requirements to prepare the applicant to be eligible for board certification as a behavior analyst or assistant behavior analyst; and demonstrate financial need.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

641—107.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

“Board-certified assistant behavior analyst” or *“BCaBA”* means a person who has a bachelor’s degree from an accredited university, has completed approved coursework as defined by the international Behavior Analyst Certification Board, has completed a defined period of supervised practical experience, and has passed the BCaBA examination.

“Board-certified behavior analyst” or *“BCBA”* means a person who has an acceptable graduate degree from an accredited university as defined by the international Behavior Analyst Certification Board, has completed acceptable graduate coursework in behavior analysis, has completed a defined period of supervised practical experience, and has passed the BCBA examination.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Full-time enrollment” means the applicant is enrolled in a program to be eligible for board certification as a behavior analyst or assistant behavior analyst with the appropriate number of semester credit hours as defined by the educational institution.

“Nonresident” means a person who is not a resident.

“Part-time enrollment” means the applicant is enrolled in a program to be eligible for board certification as a behavior analyst or assistant behavior analyst with the appropriate number of semester credit hours as defined by the educational institution.

“Resident” means a natural person who physically resides in Iowa as the person’s principal and primary residence and who establishes evidence of such residency by providing the department with one of the following:

1. A valid Iowa driver’s license,
2. A valid Iowa nonoperator’s identification card,
3. A valid Iowa voter registration card,
4. A current Iowa vehicle registration certificate,
5. A utility bill,
6. A statement from a financial institution,
7. A residential lease agreement,
8. A check or pay stub from an employer,
9. A child’s school or child care enrollment documents,
10. Valid documentation establishing a filing for homestead or military tax exemption on property located in Iowa, or
11. Other valid documentation as deemed acceptable by the department to establish residency.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

641—107.3(135) Eligibility criteria. To be eligible for a grant, the applicant shall:

107.3(1) Be an Iowa resident or nonresident.

107.3(2) Be accepted for admission to or be attending a university, a community college, or an accredited private institution, within or outside the state of Iowa, be enrolled in a program, offered at a physical location or online, that is accredited and meets coursework requirements to prepare the applicant

to be eligible for board certification as a behavior analyst or assistant behavior analyst, and demonstrate financial need.

107.3(3) Have on file with the college student aid commission a current Free Application for Federal Student Aid (FAFSA) and Iowa Financial Aid Application or similar financial aid documentation from another state and submit documentation of financial need as described in the department's request for proposal process.

107.3(4) Agree to practice in the state of Iowa for a period of time, not to exceed four years, as specified in the contract entered into between the applicant and the department at the time the grant is awarded.

107.3(5) Agree, as specified in the contract between the applicant and the department at the time the grant is awarded, that during the contract period, the applicant will assist in supervising an individual working toward board certification as a behavior analyst or assistant behavior analyst or to consult with schools and service providers that provide services and supports to individuals with autism.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

641—107.4(135) Priority in grant awards. Priority in the awarding of a grant shall be given to resident applicants.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

641—107.5(135) Amount of a grant. The department shall award funds based upon the amount set aside in the special fund, as identified in Iowa Code section 135.181 as amended by 2016 Iowa Acts, House File 2460, sections 57 and 58. Moneys appropriated to, and all other moneys specified for deposit in, the fund shall be dedicated to the board-certified behavior analyst and board-certified assistant behavior analyst (BCBA/BCaBA) grants program as established in Iowa Code section 135.181 as amended by 2016 Iowa Acts, House File 2460, sections 57 and 58. These rules shall be implemented only to the extent that funding is available. The amount of funding awarded to each applicant shall be based on the applicant's enrollment status (full-time enrollment or part-time enrollment), the number of applicants, and the total amount of available funds. The total amount of funds awarded to an individual applicant shall not exceed 50 percent of the total costs attributable to program tuition and fees, annually. Awarded grant funds will be payable to the student and prorated on the number of semesters or other terms of study to complete the program.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

641—107.6(135) Use of funds. Funds awarded may be used to offset the costs attributable to tuition and fees for the accredited behavior analyst or assistant behavior analyst program.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

641—107.7(135) Review process.

107.7(1) An applicant shall complete and submit an application to the program in the manner specified by the department. An applicant, if awarded a grant, shall enter into a contract with the department. The department shall follow requirements for competitive selection contained in 641—Chapter 176 in awarding these funds.

107.7(2) The department shall establish an application process for applicants eligible to receive funding. The application review process and review criteria for preference in awarding the grants shall be described in a request for proposals.

107.7(3) An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by rule 641—176.8(135).

[ARC 2765C, IAB 10/12/16, effective 11/16/16; ARC 3105C, IAB 6/7/17, effective 7/12/17]

641—107.8(135) Reporting. The department shall submit a report to the governor and the general assembly by January 1, annually. The report shall include the number of applications received for the immediately preceding fiscal year; the number of applications approved; the total amount of funding awarded in grants in the immediately preceding fiscal year; the cost of administering the program in the immediately preceding fiscal year; and recommendations for any changes to the program.

[ARC 2765C, IAB 10/12/16, effective 11/16/16]

These rules are intended to implement Iowa Code section 135.181 as amended by 2016 Iowa Acts, House File 2460, sections 57 and 58.

[Filed ARC 2765C (Notice ARC 2460C, IAB 3/16/16; Amended Notice ARC 2621C, IAB 7/20/16),
IAB 10/12/16, effective 11/16/16]

[Filed ARC 3105C (Notice ARC 2970C, IAB 3/15/17), IAB 6/7/17, effective 7/12/17]

CHAPTER 108
MEDICAL RESIDENCY TRAINING STATE MATCHING GRANTS PROGRAM

641—108.1(135) Scope and purpose. The medical residency training state matching grants program is established to provide greater access to health care by increasing the number of practicing physicians in Iowa through the expansion of residency positions in Iowa. The department shall provide funding to sponsors of accredited graduate medical education residency programs for the establishment, expansion, or support of medical residency training programs that will increase the number of residents trained. For the period beginning July 1, 2021, and ending June 30, 2026, the department shall provide funding to sponsors of accredited medical education residency programs for the support of medical residency training program liability costs. Funding for the program may be provided through the health care workforce shortage fund, medical residency training account, and is specifically dedicated to the medical residency training state matching grants program as established in Iowa Code section 135.176. These rules shall be implemented only to the extent funding is available.

[ARC 1480C, IAB 6/11/14, effective 7/16/14; ARC 6165C, IAB 2/9/22, effective 3/16/22]

641—108.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

“Accredited medical residency training program” means a graduate medical education program approved by the Accreditation Council for Graduate Medical Education (ACGME) or by the American Osteopathic Association (AOA).

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Health professional shortage areas” means federal designations that are based on general health professional shortage area (HPSA) designation criteria, plus additional criteria and guidelines specific to each of the three types of designations from the Health Resources and Services Administration Federal Office of Shortage Designations. The three types of designations include primary care, dental and mental health.

“In excess of the federal residency cap” means a residency position for which no federal Medicare funding is available because the residency position is a position beyond the cap for residency positions established by the federal Balanced Budget Act of 1997, Pub. L. No. 105-33.

“New or alternative campus accredited medical residency training program” means a program that is accredited by a recognized entity approved for such purpose by the ACGME or the AOA with the exception that a new medical residency training program that, by reason of an insufficient period of operation is not eligible for accreditation on or before the date of submission of an application for a grant, may be deemed accredited if the ACGME or the AOA finds, after consultation with the appropriate accreditation entity, that there is reasonable assurance that the program will meet the accreditation standards of the entity prior to the date of graduation of the initial class in the program.

“Primary care” means care that shall include psychiatry, obstetrics, gynecology, family medicine, internal medicine, and emergency medicine.

“Sponsor” means a hospital, school, or consortium located in Iowa that sponsors and maintains primary organizational and financial responsibility for a graduate medical education residency program in Iowa and is accountable to the accrediting body.

[ARC 1480C, IAB 6/11/14, effective 7/16/14; ARC 5334C, IAB 12/16/20, effective 1/20/21]

641—108.3(135) Eligibility criteria—establishment or expansion. To be eligible for a matching grant for the establishment or expansion of medical residency training programs, a sponsor shall satisfy the following requirements and qualifications:

108.3(1) A sponsor shall be financially and organizationally responsible for a residency training program that is accredited by the ACGME or by the AOA.

108.3(2) A sponsor shall demonstrate through documented financial information that funds have been budgeted and will be expended by the sponsor in the amount required to provide matching funds for each residency proposed in the request for state matching funds. A sponsor shall document this requirement by

providing with its request a line-item budget showing sponsor funding amounts and state matching funds requested.

108.3(3) A sponsor shall demonstrate a need for such residency program in the state by providing with its request for state matching funds objective evidence of such need including:

- a. Workforce data, including state and federal workforce data and data from tracking databases;
- b. Population data, including community health needs assessments;
- c. Supply and demand data, including health professional shortage area designations; and
- d. Other related research including unique community- or state-level factors which establish a need for such residency program.

108.3(4) A sponsor shall submit with its request for state matching funds a recruitment and retention plan to encourage residents to enter practice in Iowa with a preference for health professional shortage areas and to demonstrate over time the impact on Iowa's workforce.

108.3(5) A sponsor shall offer persons to whom a primary care residency position is awarded the opportunity to participate in a rural rotation to expose the resident to the rural areas of the state.

[ARC 1480C, IAB 6/11/14, effective 7/16/14; ARC 2179C, IAB 9/30/15, effective 1/13/16; ARC 4830C, IAB 12/18/19, effective 1/22/20; ARC 5334C, IAB 12/16/20, effective 1/20/21; ARC 6165C, IAB 2/9/22, effective 3/16/22]

641—108.4(135) Eligibility criteria—support. To be eligible for a matching grant for the support of medical residency training program liability costs, a sponsor shall satisfy the following requirements and qualifications:

108.4(1) A sponsor shall be financially and organizationally responsible for a residency training program that is accredited by the ACGME or by the AOA.

108.4(2) A sponsor shall not be subject to Iowa Code chapter 669.

108.4(3) A sponsor shall demonstrate through documented financial information that funds have been budgeted and will be expended by the sponsor in the amount required to provide dollar-for-dollar matching funds for the cost of the medical residency program liability.

108.4(4) A sponsor shall demonstrate that the funding of the medical residency program liability costs falls within the period of July 1, 2021, and June 30, 2026.

[ARC 6165C, IAB 2/9/22, effective 3/16/22]

641—108.5(135) Amount of grant.

108.5(1) The department shall award funds based upon the funds budgeted as demonstrated in the request, as identified in subrule 108.3(2) or 108.4(3).

108.5(2) Grant award per activity.

a. The total amount of a grant awarded to a sponsor proposing the establishment of a new or alternative campus accredited medical residency training program shall be limited to no more than 100 percent of the amount of funds the sponsor has budgeted as demonstrated through a line-item budget for each residency sponsored for the purpose of the residency program.

b. The total amount of a grant awarded to a sponsor proposing the provision of a new residency position within an existing accredited medical residency or fellowship training program, or a sponsor funding residency positions which are in excess of the federal residency cap, shall be limited to no more than 25 percent of the amount of funds the sponsor has budgeted as demonstrated through a line-item budget for each residency position sponsored for the purpose of the residency program.

c. The total amount of a grant awarded to a sponsor proposing to fund medical residency program liability costs shall be limited to no more than 50 percent of the total cost the sponsor has budgeted as demonstrated through a line-item budget for the medical residency program liability costs.

108.5(3) A sponsor shall receive funds based on budgeted expenses that include but are not limited to:

- a. Stipends and fringe benefits for residents and fellows;
- b. The portion of teaching physician salaries and fringe benefits associated with teaching and supervision of residents and fellows;
- c. Other direct costs that can be attributed to medical education (e.g., clerical salaries, telephone, office supplies).

108.5(4) An individual sponsor that establishes a new or alternative campus accredited medical residency training program shall not receive more than 50 percent of the state matching funds available each year to support the program. An individual sponsor proposing the provision of a new residency position within an existing accredited medical residency or fellowship training program, a sponsor funding residency positions which are in excess of the federal residency cap, or the funding of the payment by the sponsor of medical residency program liability costs subject to provision by the sponsor of dollar-for-dollar matching funds used for payment of such costs shall not receive more than 25 percent of the state matching funds available each year to support the program.

[ARC 1480C, IAB 6/11/14, effective 7/16/14; ARC 2179C, IAB 9/30/15, effective 1/13/16; ARC 4830C, IAB 12/18/19, effective 1/22/20; ARC 6165C, IAB 2/9/22, effective 3/16/22]

641—108.6(135) Application and review process.

108.6(1) The department shall follow requirements for competitive selection contained in 641—Chapter 176 in awarding these funds.

108.6(2) The department shall establish a request for proposal process for sponsors eligible to receive funding. The request for proposal and review process and review criteria for preference in awarding the grants shall be described in the request for proposal, including preference in the residency specialty and preference for candidates who are residents of Iowa, attended and earned an undergraduate degree from an Iowa college or university, or attended and earned a medical degree from a medical school in Iowa. The residency specialty preference may be reflective of a subspecialty where particular demands for services have been demonstrated, of geographic areas of preference, or of other particular preferences that advance the objectives of the program.

108.6(3) Each request for proposal issued by the department will identify one or more of the following purposes for use of the funding:

- a. The establishment of new or alternative campus accredited medical residency training programs;
- b. The provision of new residency positions within existing accredited medical residency or fellowship training programs;
- c. The funding of residency positions which are in excess of the federal residency cap; or
- d. The funding of the payment by the sponsor of medical residency program liability costs subject to provision by the sponsor of dollar-for-dollar matching funds used for the payment of such costs for the period beginning July 1, 2021, and ending June 30, 2026. The funding shall not apply to medical residency programs to which Iowa Code chapter 669 applies.

108.6(4) An applicant may appeal the denial of a properly submitted request for proposal. Appeals shall be governed by rule 641—176.8(135,17A).

[ARC 1480C, IAB 6/11/14, effective 7/16/14; ARC 4830C, IAB 12/18/19, effective 1/22/20; ARC 6165C, IAB 2/9/22, effective 3/16/22]

These rules are intended to implement Iowa Code section 135.176.

[Filed ARC 1480C (Notice ARC 1392C, IAB 4/2/14), IAB 6/11/14, effective 7/16/14]

CHAPTER 109
PRESCRIPTION DRUG DONATION REPOSITORY PROGRAM

641—109.1(135M) Definitions. For purposes of this chapter, the following definitions apply:

“Centralized repository” means an entity approved by the contractor and licensed pursuant to applicable regulations of the Iowa board of pharmacy that accepts donated drugs, conducts a safety inspection of the drugs, and ships the donated drugs to a local repository to be dispensed in compliance with this chapter and federal and state laws, rules and regulations.

“Contractor” means the third party approved by the department to implement and administer the prescription drug donation repository program.

“Controlled substance” means the same as defined in Iowa Code section 124.101.

“Department” means the Iowa department of public health.

“Indigent” means a person with an income that is below 200 percent of the federal poverty level (FPL) as defined by the most recently revised poverty income guidelines published by the United States Department of Health and Human Services.

“Local repository” means a pharmacy or medical facility that elects to accept and dispense donated drugs and that meets the eligibility requirements of rule 641—109.3(135M).

“Medical facility” means any of the following:

1. A physician’s office.
2. A hospital.
3. A health clinic.
4. A nonprofit health clinic, including a federally qualified health center as defined in 42 U.S.C. § 1396d(l)(2)(B); a rural health clinic as defined in 42 U.S.C. § 1396d(l)(1); and a nonprofit health clinic that provides medical care to patients who are indigent, uninsured, or underinsured.
5. A free clinic as defined in Iowa Code section 135.24.
6. A charitable organization as defined in Iowa Code section 135.24.
7. A nursing facility as defined in Iowa Code section 135C.1.

“NDC #” means the unique national drug code number that identifies a specific approved drug.

“Nurse practitioner” means an advanced registered nurse practitioner as defined in 655 IAC Chapter 7.

“Pharmacist” means a pharmacist as defined in Iowa Code section 155A.3.

“Pharmacy” means a pharmacy as defined in Iowa Code section 155A.3.

“Physician” means an individual licensed under Iowa Code chapter 148.

“Physician assistant” means an individual licensed under Iowa Code chapter 148C.

“Prescription drug” means the same as defined in Iowa Code section 155A.3 and includes cancer drugs and antirejection drugs, but does not include controlled substances.

“Supplies” means the supplies necessary to administer the prescription drugs donated.

“USP” means United States Pharmacopoeia.

[ARC 6166C, IAB 2/9/22, effective 3/16/22; ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—109.2(135M) Purpose. The overall purpose of this chapter is to establish administrative rules in accordance with Iowa Code chapter 135M relative to the following:

1. Requirements for medical facilities and pharmacies to accept and dispense donated prescription drugs and supplies.
2. Eligibility criteria for individuals to receive donated prescription drugs and supplies.

641—109.3(135M) Eligibility criteria for program participation by medical facilities and pharmacies.

109.3(1) To be eligible for participation in the prescription drug donation repository program, a medical facility or pharmacy shall be in compliance with all applicable federal and state laws, including laws applicable to the storage and distribution of drugs and the appropriate licensure standards, and shall hold active, nonrestricted, state-issued licenses or registrations in good standing.

109.3(2) Participation in the prescription drug donation repository program is voluntary.

109.3(3) A pharmacy or medical facility may elect to participate in the prescription drug donation repository program by providing, on a form prescribed by the department and available on the program's web page, written notification to the centralized repository of all of the following:

a. The name, street address, and telephone number of the pharmacy or medical facility, and any state-issued license or registration number issued to the pharmacy or medical facility, including the name of the issuing agency.

b. The name and telephone number of the responsible pharmacist, physician, physician assistant or nurse practitioner who is employed by or under contract with the pharmacy or medical facility.

c. A statement, signed and dated by the responsible pharmacist, physician, physician assistant or nurse practitioner, indicating that the pharmacy or medical facility meets the eligibility requirements under this rule and shall comply with the requirements of this chapter.

109.3(4) Withdrawal from participation. A pharmacy or medical facility may withdraw from participation in the prescription drug donation repository program at any time by providing written notice to the centralized repository on a form prescribed by the department and available on the program's web page.

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—109.4(135M) Standards and procedures for accepting donated prescription drugs and supplies.

109.4(1) Any individual who is 18 years of age or older may donate legally obtained prescription drugs or supplies to the centralized repository or a local repository if the drugs or supplies meet the requirements of this rule, as determined by a pharmacist who is employed by or under contract with a drug repository.

109.4(2) No drugs that require storage temperatures other than normal room temperature as specified by the manufacturer or United States Pharmacopoeia shall be donated or accepted as part of the prescription drug donation repository program. Drugs that require storage temperatures other than normal room temperature as specified by the manufacturer or USP shall not be donated or accepted because of the increased potential for these drugs to become adulterated. Excluded from this restriction are drugs donated directly from a drug manufacturer.

109.4(3) Controlled substances shall not be donated or accepted. Pursuant to federal and state laws, a controlled substance cannot be returned or reused once the drug has been dispensed to a patient.

109.4(4) The centralized repository or a local repository may accept a prescription drug only if all of the following requirements are met:

a. The drug is in its original sealed and tamper-evident packaging. However, a drug in a single-unit dose or blister pack with the outside packaging opened may be accepted if the single-unit-dose packaging is undisturbed;

b. The drug has been stored according to manufacturer or USP storage requirements;

c. The packaging contains the lot number and expiration date of the drug. If the lot number is not retrievable, all specified medications will be destroyed in the event of a recall, pursuant to Iowa board of pharmacy rules;

d. The drug has an expiration date that is more than six months after the date that the drug was donated. However, a donated prescription drug bearing an expiration date that is six months or less after the date the prescription drug was donated may be accepted and distributed if the drug is in high demand and can be dispensed for use prior to the drug's expiration date;

e. The drug does not have any physical signs of tampering or adulteration, and there is no reason to believe that the drug is adulterated;

f. The packaging does not have any physical signs of tampering, misbranding, deterioration, compromised integrity or adulteration; and

g. All drugs shall be inventoried at the centralized repository or a local repository. The inventory shall include the name of the drug, strength of the drug, quantity of the drug, and the date of donation if the drug has been continually under the control of a health care professional. If the drug has not been continually under the control of a health care professional, the repository shall collect a donation form provided by the prescription drug donation repository program that is signed by the person making the donation or that person's authorized representative.

109.4(5) A repository may accept supplies necessary to administer the prescription drugs donated only if all of the following requirements are met:

- a. The supplies are in their original, unopened, sealed packaging;
- b. The supplies are not adulterated or misbranded; and
- c. All supplies shall be inventoried at the centralized repository or a local repository. The inventory shall include a description of the supplies and the date donated. Such inventory shall be recorded on a form provided by the prescription drug donation repository program.

109.4(6) Drugs and supplies may be donated on the premises of a participating centralized repository or a local repository to a person designated by the repository. A drop box may not be used to deliver or accept donations.

641—109.5(135M) Standards and procedures for inspecting and storing donated prescription drugs and supplies.

109.5(1) A licensed pharmacist employed by or under contract with the centralized repository or a local repository shall inspect donated prescription drugs and supplies to determine, to the extent reasonably possible in the judgment of the pharmacist, that the drugs and supplies are not adulterated or misbranded, are safe and suitable for dispensing, and are not ineligible drugs or supplies. The pharmacist who inspects the drugs shall sign an inspection record stating the above and attach it to the copy of the inventory or donor record provided with the drugs. If a local repository receives drugs and supplies from the centralized repository, the local repository does not need to reinspect the drugs and supplies.

109.5(2) The centralized repository and local repositories shall store donated drugs and supplies in a secure storage area under environmental conditions appropriate for the drugs or supplies being stored. Donated drugs and supplies may not be stored with nondonated inventory. When donated drugs are not inspected immediately upon receipt, a repository shall quarantine the donated drugs separately from all dispensing stock until the donated drugs have been inspected and approved for dispensing under the program.

109.5(3) Repositories shall destroy donated noncontrolled substances that are not suitable for dispensing and make a record of such destruction according to board of pharmacy 657—subrule 8.7(5). The destruction record shall be made in the same manner as prescribed for the record of return or destruction of a controlled substance in subrule 109.5(4).

109.5(4) Controlled substances shall not be accepted for donation.

a. Controlled substances submitted for donation shall be documented and returned immediately to the donor or the donor's representative that provided the drugs.

b. In the event controlled substances enter the centralized repository or a local repository and it is not possible or practicable to return the controlled substances to the donor or the donor's representative due to inability to identify the donor or the donor's representative or due to refusal by the donor or the donor's representative to receive them, abandoned controlled substances shall be documented and destroyed beyond reclamation pursuant to rules of the board of pharmacy. Such destruction shall be performed by a pharmacist or other person that has authority to dispense controlled substances and shall be witnessed by another responsible adult employee of the repository.

109.5(5) If a repository receives a recall notification, the repository shall perform a uniform destruction of all of the recalled prescription drugs in the repository and complete the destruction information form for all donated drugs destroyed. If a recalled drug has been dispensed, the repository shall immediately notify the recipient of the recalled drug pursuant to established drug recall procedures.

[ARC 6166C, IAB 2/9/22, effective 3/16/22]

641—109.6(135M) Standards and procedures for dispensing donated prescription drugs and supplies.

109.6(1) Donated drugs and supplies may be dispensed only if the drugs or supplies are prescribed by a health care practitioner for use by an eligible individual and are dispensed by a licensed pharmacist, physician, physician assistant or nurse practitioner.

109.6(2) A repository shall prioritize dispensing to an individual requesting drugs through the program as follows:

- a. First, to an indigent individual;
- b. Second, to an individual who has no active third-party prescription drug reimbursement coverage for the drug prescribed; and
- c. Third, to any other individual if an indigent or uninsured individual is unavailable.

109.6(3) A repository shall dispense donated prescription drugs in compliance with applicable federal and state laws and regulations for dispensing prescription drugs, including all requirements relating to packaging, labeling, record keeping, drug utilization review, and patient counseling.

109.6(4) The centralized repository and a local repository shall remove the original donor's identification and the name of the dispensing pharmacy from the package prior to dispensing the drugs or supplies.

109.6(5) The centralized repository and a local repository shall be responsible for drug recalls and shall have an established mechanism to notify recipients in the event of a drug recall.

109.6(6) Prescription drugs or supplies donated under this program shall not be resold.

109.6(7) The participating centralized repository and local repositories may distribute drugs and supplies donated under this program to other participating repositories for use pursuant to the program. The repository distributing the drugs or supplies shall complete a transfer form.

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—109.7(135M) Eligibility criteria for individuals to receive donated prescription drugs and supplies.

109.7(1) An individual who requests drugs from the prescription drug donation repository program shall certify to the repository that the individual is a resident of Iowa and meets one or both of the following criteria:

- a. Is indigent;
- b. Has no active third-party prescription drug reimbursement coverage for the drug prescribed.

109.7(2) The local repository shall collect from each individual recipient a signed intake collection form provided by the department or its contractor.

- a. The intake collection form shall attest that:

- (1) The individual is a resident of the state of Iowa;
- (2) The individual's income does not exceed 200 percent of the FPL;
- (3) The individual is uninsured and has no prescription coverage or is underinsured and has no prescription coverage;
- (4) The individual acknowledges that the drugs may have been donated; and
- (5) The individual consents to a waiver of the requirement for child resistant packaging of the Poison Prevention Packaging Act.

- b. The intake collection form will include an identification card to be given to the recipient for continued use for one year.

109.7(3) The identification card is valid for one year or until the new federal poverty guidelines have been published for all prescriptions and supplies.

109.7(4) A summary of data taken from the intake collection form is to be sent via regular mail, email or facsimile to the centralized repository for data collection.

641—109.8(135M) Forms and record keeping.

109.8(1) The following forms developed for the administration of this program shall be utilized by participants of the program and are available on the program's web page on the department's web site, idph.iowa.gov.

- a. Prescription drug donation repository program notice of participation or withdrawal.
- b. Prescription drug donation repository program donation, transfer, inventory or destruction record.
- c. A record of medications dispensed.

109.8(2) The prescription drug donation repository program recipient data collection form and identification card are given to the recipient by the local repository, and the completed data collection form is collected from the recipient by the local repository.

109.8(3) Record-keeping requirements.

- a.* All records required to be maintained as a part of the prescription drug donation repository program shall be maintained for a minimum of five years by participating pharmacies and medical facilities.
- b.* Records required as part of this program shall be maintained pursuant to all current applicable practice acts.
- c.* Data collected by the prescription drug donation repository program from all participating repositories shall be submitted quarterly or upon request to the centralized repository. The data will consist of the information collected in accordance with 641—109.8(135M), Forms and record keeping.
- d.* The centralized repository and the contractor shall submit reports to the department as required by the contract or upon request of the department.

641—109.9(135M) Handling fee. A repository may charge the recipient of a donated drug a handling fee, not to exceed a maximum of 200 percent of the Medicaid professional dispensing fee as established by rule of the department of human services, to cover stocking and dispensing costs. A prescription drug dispensed through the prescription drug donation repository program shall not be eligible for reimbursement under the medical assistance program.

641—109.10(135M) List of drugs and supplies program will accept. All prescription drugs, excluding controlled substances, that have been approved for medical use in the United States, that are listed in the USP or National Formulary (USP/NF), and that meet the criteria for donation established by these rules may be accepted for donation under the prescription drug donation repository program.

641—109.11(135M) Exemption from disciplinary action, civil liability and criminal prosecution.

109.11(1) A drug manufacturer acting reasonably and in good faith is not subject to criminal prosecution or civil liability for injury, death, or loss to a person or property for matters related to the donation, acceptance, or dispensing of a prescription drug manufactured by the drug manufacturer that is donated under this chapter, including liability for failure to transfer or communicate product or consumer information or the expiration date of the donated prescription drug.

109.11(2) Except as provided in subrule 109.11(3), a person other than a drug manufacturer subject to subrule 109.11(1), acting reasonably and in good faith, is immune from civil liability and criminal prosecution for injury to or the death of an individual to whom a donated prescription drug is dispensed under this chapter and shall be exempt from disciplinary action related to the person's acts or omissions related to the donation, acceptance, distribution, or dispensing of a donated prescription drug under this chapter.

109.11(3) The immunity and exemption provided in subrule 109.11(2) does not extend to any of the following:

- a.* The donation, acceptance, distribution, or dispensing of a donated prescription drug under this chapter by a person if the person's acts or omissions are not performed reasonably and in good faith.
- b.* Acts or omissions outside the scope of the program.

641—109.12 and 109.13 Reserved.

641—109.14(135M) Prescription drug donation repository in disaster emergencies. The following are the requirements for the department to receive and distribute prescription drugs and supplies in preparation for a disaster emergency proclaimed by the governor or in preparation for a public health disaster.

109.14(1) The department may receive prescription drugs and supplies directly from the prescription drug donation repository contractor and dispense prescription drugs and supplies through licensed personnel during or in preparation for a disaster emergency proclaimed by the governor pursuant to Iowa Code section 29C.6 or during or in preparation for a public health disaster as defined in Iowa Code section 135.140(6).

109.14(2) The department may receive and distribute prescription drugs and supplies as defined in Iowa Code section 135.142 to any Iowan who has been a victim of a disaster emergency proclaimed by the governor.

[**ARC 8983B**, IAB 8/11/10, effective 9/15/10; **ARC 6166C**, IAB 2/9/22, effective 3/16/22]

These rules are intended to implement Iowa Code chapter 135M.

CHAPTER 110
CENTER FOR RURAL HEALTH
AND PRIMARY CARE

641—110.1(135) Purpose and scope. The following rules developed by the department of public health govern the organization of the center for rural health and primary care within the department of public health.

[ARC 4076C, IAB 10/10/18, effective 11/14/18; ARC 4703C, IAB 10/9/19, effective 11/13/19]

641—110.2(135,135B) Definitions.

“Center for rural health and primary care” means the department of public health administrative entity that is responsible for provision of technical planning assistance to rural communities and counties, administration of a comprehensive primary care provider recruitment and retention endeavor, coordination of services to provide research of rural occupational health injuries and hazards, and coordination with the following: the center for agricultural health and safety, the center for health effects of environmental contamination, and the department of agriculture and land stewardship.

“Community health services assessment and developmental plan” means a comprehensive health services assessment and plan which has been developed through a communitywide collaborative effort of public and private entities, including citizens at large, located in rural communities.

“Department” means the Iowa department of public health.

“Director” means the director of the department of public health.

“Health care workforce and community support grant program” means a program that provides assistance in the form of a forgivable loan, grant, or other nonfinancial assistance to communities to support the effort of a community and that is part of the community’s long-term community health services assessment and developmental plan.

“Primary care health professional” means an individual who is providing primary health services and is licensed to practice in the state of Iowa.

“Primary care provider loan repayment program” means a loan repayment for qualifying loans to eligible health professionals who choose to establish practices in designated health professional shortage areas of the state.

“Primary care provider recruitment and retention endeavor” or *“PRIMECARRE”* means a comprehensive primary health care initiative which promotes and assists local efforts in developing health care provider recruitment and retention programs and which includes a health care workforce and community support grant program and a primary care provider loan repayment program.

“Primary health services” means health services regarding family practice, internal medicine, pediatrics, obstetrics and gynecology, dentistry, or mental health that are provided by physicians or other health professionals.

[ARC 4076C, IAB 10/10/18, effective 11/14/18; ARC 4703C, IAB 10/9/19, effective 11/13/19]

641—110.3(135) Responsibilities of the center.

110.3(1) The center for rural health and primary care shall provide technical planning assistance to rural communities and counties exploring innovative means of delivering rural health services through community health services assessment, planning, and implementation, including but not limited to hospital conversions, cooperative agreements among hospitals, physician and health practitioner support, recruitment and retention of primary health care providers, public health services, emergency medical services, medical assistance facilities, rural health care clinics, and alternative means which may be included in the long-term community health services assessment and developmental plan.

110.3(2) The center for rural health and primary care shall encourage collaborative efforts of the local boards of health, hospital governing boards, and other public and private entities located in rural communities to adopt a long-term community health services assessment and developmental plan.

110.3(3) The center for rural health and primary care shall provide technical assistance to assist rural communities in improving Medicare reimbursements or establishing additional sources of funding through initiatives such as rural health clinics, distinct part skilled nursing facility beds, and the swing-bed program.

110.3(4) The center for rural health and primary care shall coordinate services to provide research for the following:

- a. Examination of the prevalence of rural occupational health injuries in the state.
- b. Assessment of training and continuing education available through local hospitals and others relating to diagnosis and treatment of diseases associated with rural occupational health hazards.
- c. Determination of continuing education support necessary for rural health practitioners to diagnose and treat illnesses caused by exposure to rural occupational health hazards.
- d. Determination of the types of actions that can help prevent agricultural accidents, surveillance and reporting of disabilities suffered by persons engaged in agricultural-related injuries and diseases in the state.
- e. Identifying causal factors associated with agricultural-related injuries and diseases and indicating the effectiveness of intervention programs designed to reduce injuries and diseases.

110.3(5) The center for rural health and primary care shall cooperate with the center for agricultural health and safety, the center for health effects of environmental contamination and the department of agriculture and land stewardship to coordinate programs to the extent practicable.

110.3(6) The center for rural health and primary care shall administer grants for farm safety education efforts directed to rural families for the purpose of preventing farm-related injuries to children.

110.3(7) The center for rural health and primary care shall administer the PRIMECARRE.

- a. PRIMECARRE shall include the following:
 - (1) A health care workforce and community support grant program.
 - (2) A primary care provider loan repayment program.
- b. PRIMECARRE shall promote and accommodate local creativity in efforts to recruit and retain health care professionals to provide services in the locality. The focus shall be on developing health care provider recruitment and retention programs.

- c. The center for rural health and primary care may enter into an agreement with the college student aid commission for the administration of the center's grant and loan repayment program.

PRIMECARRE HEALTH CARE WORKFORCE AND COMMUNITY SUPPORT GRANT PROGRAM

641—110.11(135) Purpose. The purpose of the PRIMECARRE health care workforce and community support grant program is to support community efforts which are part of the community's long-term community health services assessment and developmental plan. The application process is based upon the department's strategic plan. A community or region applying for assistance must complete a community health services assessment and adopt a long-term developmental plan. The community may request assistance with the assessment from the department. The community's or region's plan shall include, to the extent possible, a clear commitment to informing high school students of the health care opportunities which may be available to such students. The grant assistance may be in the form of a forgivable loan, grant, or other nonfinancial assistance as deemed appropriate by the center for rural health and primary care. Grants or other assistance provided by the center are intended to promote and accommodate local creativity in efforts to recruit and retain health care professionals to provide services in the locality. Notice of the availability of these public funds shall be published in the Iowa Administrative Bulletin in accordance with 641—Chapter 176.

110.11(1) Eligibility. The following requirements must be met in order to be eligible for the program:

a. The community or region must have illustrated efforts to meet the health care provider needs of the locality and surrounding area.

b. The community or region must have completed a community health services assessment and adopted a long-term developmental plan as established herein.

c. Participation in a community health services assessment process shall be documented by the community or region.

110.11(2) *Funding.* Grants awarded under the program shall be awarded to rural, underserved areas or special populations as identified by the department's strategic plan or evidence-based documentation.

110.11(3) *Use of funds.* Funds may be used for the following:

a. The procurement of clinical equipment, clinical facilities, and telecommunications facilities.

b. Support for locum tenens arrangements and primary care provider mentor programs.

c. Other capacity-building activities as they relate to recruitment and retention of primary health care providers.

110.11(4) *Matching funds.* Applications submitted may contain a commitment of matching funds for the grant assistance.

110.11(5) *Application process.* Applicants for grant funds must complete application forms provided by the department. Application materials shall be made available by the department at least 45 days prior to the application due date. Grant applications will be issued in accordance with 641—Chapter 176.

110.11(6) *Selection criteria and review process.* Selection criteria will be based on illustrated efforts to meet the health care provider needs of the locality and surrounding area. Selection criteria and the process for evaluation of applications shall be described in the application materials provided by the department. A competitive grant application review committee shall be appointed by the administrative head of the center for rural health and primary care. Grants will be awarded according to review criteria developed by the center, in accordance with 641—Chapter 176.

110.11(7) *Notice of grant award.* The department shall notify all applicants of the decision of grant awards.

110.11(8) *Appeals.* Applicants with a denied request for funding may appeal the decision of grant awards. The appeal shall be made in writing to the director, Iowa department of public health, within 10 days of the notification date of the grant awards decision. The appeal shall be mailed by certified mail, return receipt requested, or delivered by personal service. The decision of the director of public health becomes the department's final action and shall be sent by certified mail, return receipt requested, or delivered by personal service within 14 days of the receipt of the appeal.

110.11(9) *Grantee oversight.* The department shall monitor the use of funds granted to communities to ensure accountability and conformance with legislative intent. Oversight processes shall be described in the application materials provided by the department.

[ARC 4076C, IAB 10/10/18, effective 11/14/18]

641—110.12 to 110.15 Reserved.

PRIMECARRE PRIMARY CARE PROVIDER LOAN REPAYMENT PROGRAM

641—110.16(135) Purpose. A primary care provider loan repayment program is established to increase the number of health professionals practicing primary care in federally designated health professional shortage areas of the state. If sufficient state funds are available, applications will be considered for loan repayment for primary care providers practicing in communities not located in federally designated shortage areas. Under the program, loan repayment may be made to a recipient for educational loans incurred while completing an accredited health education program directly related to obtaining credentials necessary to practice the recipient's health profession. Notice of the availability of these public funds shall be published in the Iowa Administrative Bulletin in accordance with 641—Chapter 176.

110.16(1) *Health care professional eligibility.* The following requirements must be met by health care professionals in order to be eligible for the program:

a. The status of the health care professional's citizenship must meet requirements of the National Health Service Corps loan repayment program.

b. The health care professional must be licensed or certified to practice in the state of Iowa as a primary care health professional as defined in 641—110.2(135) and approved by the state for purposes of program priorities and requirements. Physicians must have completed a primary care residency and be board-eligible or board-certified.

c. The health care provider must possess evidence of a contractual agreement to practice full time at a site in a designated shortage area within the state and approved by the state for the minimum number of years required by federal programs providing support for the program.

d. The health care provider shall provide one year of obligated service in exchange for each year of loan repayment, unless federal requirements otherwise require.

e. The health care provider must agree to comply with all contract provisions and the rules and regulations as promulgated by the department.

f. The health care provider must possess a license that is not restricted by a medical regulatory authority of any jurisdiction of the United States, other nations, or territories.

g. The health care professional must be eligible under Section 338B of the Public Health Service Act as amended November 16, 1990, by Public Law 101-597.

h. The health care provider must agree to provide full-time primary health care services at a clinical site in a designated health professional shortage area.

i. The health care provider must agree not to discriminate on the basis of the ability of the individual to pay for such care or on the basis that payment for such care will be made pursuant to the program established in Title XVIII (Medicare) of the Social Security Act, or pursuant to the program established in Title XIX (Medicaid) of such Act.

j. The health care provider must agree to accept assignment under Section 1842(b)(3)(B)(ii) of the Social Security Act for all services for which payment may be made under Part B of Title XVIII and to enter into an appropriate agreement with the state agency that administers the state plan for medical assistance under Title XIX of such Act to provide service to individuals entitled to medical assistance under the plan.

k. The health care provider must complete an application form provided by the Iowa department of public health.

110.16(2) Site eligibility. The following requirements must be met in order to be eligible for placement of a health professional qualified under the PRIMECARRE loan repayment program:

a. The site must be located in a designated health professional shortage area in the state.

b. The site must agree to accept Medicare/Medicaid assignment.

c. The site must have a sliding fee schedule in place that is based upon the ability to pay.

d. The site must have completed a community health services assessment and adopted a long-term developmental plan.

e. The site must be part of a system of care. For the purpose of receiving federal assistance, a system of care is defined as a service continuum that includes comprehensive primary care for all regardless of ability to pay, and appropriate arrangements for secondary and tertiary care, including a referral system and arrangements for call coverage.

f. The site must complete an application form provided by the department.

g. The site must agree to report to the department those individuals unable to fulfill the contract.

110.16(3) Federal grant requirements. Use of federal grant dollars for loan repayment contracts requires that eligibility be determined as authorized by federal grant requirements.

110.16(4) Funding limitations. Loan repayment contracts provided under this program shall be determined annually, based upon the legislative appropriation for the PRIMECARRE initiative and other sources of funds.

110.16(5) Other sources of funds. The department of public health shall seek participation in federal programs supporting repayment of loans of health care providers and acceptance of gifts, grants, and other aid or amounts from any person, association, foundation, trust, corporation, governmental agency, or other entity for the purposes of the program.

110.16(6) Review process. The department of public health shall establish a review committee which will review all applications and make recommendations for loan repayment contracts. The department shall

provide the review committee with a methodology for prioritization of federal shortage areas and eligible nonfederal shortage areas to be utilized in the application review process. The department shall provide the review committee with the criteria and scoring methodology to be used in reviewing the applications, in accordance with 641—Chapter 176. Evaluation criteria will include the applicant's outstanding educational loans and professional credentials.

110.16(7) *Contract oversight and administration.* The department of public health shall establish and enforce the terms of the contract, including implementation of any methods, e.g., legal action, that may be necessary to recoup loan repayment funds in the event of failure on the part of a program recipient to fulfill the terms and conditions of the contract. The department shall take into consideration mitigating circumstances which may prohibit a recipient from fulfilling the recipient's contractual obligation or for whom fulfilling the obligation would cause undue hardship. The department of public health shall also provide for cancellation of contracts for reasonable cause to be determined by the department, unless federal requirements otherwise require.

110.16(8) *Appeals.* Applicants with a denied request for loan repayment funding may appeal the decision of loan repayment awards. The appeal shall be made in writing to the director, Iowa department of public health, within 10 days of the notification date of the loan repayment awards decision. The appeal shall be mailed by certified mail, return receipt requested, or delivered by personal service. The decision of the director of public health becomes the department's final action and shall be sent by certified mail, return receipt requested, or delivered by personal service within 14 days of the receipt of the appeal.

[ARC 4076C, IAB 10/10/18, effective 11/14/18]

These rules are intended to implement Iowa Code sections 135.107 and 135B.33.

CHAPTER 111
IOWA NEEDS NURSES NOW INFRASTRUCTURE ACCOUNT

641—111.1(135) Scope and purpose. The Iowa needs nurses now infrastructure account is established to award grants for clinical simulators, laboratory facilities, health information technology and other infrastructure to improve the education of nurses and nurse educators in the state and to enhance the clinical experience for nurses. Moneys in the account shall consist of moneys appropriated or allocated for deposit in or received by the fund or the account and specifically dedicated to the Iowa needs nurses now infrastructure account for the purposes of the account. Grants from the account may not be used for the construction of buildings. Grants awarded shall authorize the use of a reasonable portion of the grant moneys for training in the use of the infrastructure purchased with the grant moneys. These rules shall be implemented only to the extent funding is available.

[ARC 9247B, IAB 12/1/10, effective 1/5/11]

641—111.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

“Department” means the Iowa department of public health.

“Iowa Needs Nurses Now Coalition” means the coalition of nurse, health, education and business leaders who understand that nurses are important to families and communities.

[ARC 9247B, IAB 12/1/10, effective 1/5/11]

641—111.3(135) Eligibility and criteria. To be eligible for an Iowa needs nurses now infrastructure grant, an organization shall:

111.3(1) Be an educational institution with prelicensure nursing education programs approved by the Iowa board of nursing.

111.3(2) Address the long-term sustainability of the infrastructure project to be funded through the grant.

[ARC 9247B, IAB 12/1/10, effective 1/5/11]

641—111.4(135) Review process.

111.4(1) The department shall follow requirements for competitive selection contained in 641—Chapter 176 in awarding grants pursuant to this chapter.

111.4(2) The department shall establish a request for proposal and application process for organizations eligible to receive funding. The review process and review criteria shall be described in the request for proposal.

111.4(3) The department shall establish a committee to review proposals and make recommendations to the department. The committee membership may include representation from the following:

- a. Iowa board of nursing;
- b. Iowa Nurses Association;
- c. Iowa Needs Nurses Now Coalition; and
- d. Iowa department of education.

111.4(4) The department shall consider financial need of the applying entity as a criterion in determining grant awards.

111.4(5) The department shall consider geographic areas where there is limited access to clinical facilities due to geographic location or limited patient census to support eligible students as a criterion in determining grant awards.

111.4(6) The department shall consider collaboration between education programs and clinical facilities as a criterion in determining grant awards.

[ARC 9247B, IAB 12/1/10, effective 1/5/11]

641—111.5(135) Performance standards. A grantee shall provide clinical experiences for nurses and nurse educators that:

1. Expand the capacity of its nursing program in terms of opportunities for increased learning by the students completing the program.

2. Offer educational opportunities in geographic areas where there is limited access to clinical facilities due to geographic location or limited patient census to support eligible students.

3. Enhance learning opportunities for the students in the nursing program.

[ARC 9247B, IAB 12/1/10, effective 1/5/11]

641—111.6(135) Appeals. An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by rule 641—176.8(135,17A).

[ARC 9247B, IAB 12/1/10, effective 1/5/11]

These rules are intended to implement 2009 Iowa Code Supplement section 135.175(5) as amended by 2010 Iowa Acts, Senate File 2384, section 5.

[Filed ARC 9247B (Notice ARC 9096B, IAB 9/22/10), IAB 12/1/10, effective 1/5/11]

CHAPTER 112
BIOLOGICAL AGENT RISK ASSESSMENT
Rescinded **ARC 3395C**, IAB 10/11/17, effective 11/15/17

CHAPTER 113
PUBLIC HEALTH RESPONSE TEAMS

641—113.1(135) Definitions. For purposes of this chapter, the following definitions shall apply:

“Defend” means that the office of the Iowa attorney general shall provide a public health response team member with legal representation at no cost to the public health response team member.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Disaster medical assistance team” or *“DMAT”* means a public health response team that is sponsored by the department or a sponsor agency, and approved by the department, to provide medical assistance in the event of a disaster or threatened disaster or other incident as defined in Iowa Code section 135.143.

“Environmental health response team” or *“EHRT”* means a public health response team that is sponsored by the department or a sponsor agency, and approved by the department, to provide environmental health expertise and assistance in the event of a disaster or threatened disaster or other incident defined in Iowa Code section 135.143.

“Indemnify” means that the state of Iowa shall pay all sums that a public health response team member is legally obligated to pay as damages because of any claim made against the public health response team member which arises out of the provision of direct medical care or other support services rendered or which should have been rendered during a disaster, threatened disaster, or other incident defined in Iowa Code section 135.143, or arising out of a training exercise to prepare for a disaster or other incident defined in Iowa Code section 135.143.

“Iowa mortuary operational response team” or *“IMORT”* means a public health response team that is sponsored by the department or a sponsor agency, and approved by the department, to provide decedent care in the event of a mass fatality disaster or threatened disaster or other incident defined in Iowa Code section 135.143.

“Logistical support response team” or *“LSRT”* means a public health response team that is sponsored by the department or a sponsor agency, and approved by the department, to provide logistical support and assistance in the event of a disaster or threatened disaster or other incident defined in Iowa Code section 135.143.

“Public health response team” or *“PHRT”* means a team of professionals, including licensed health care providers, nonmedical professionals skilled and trained in disaster or emergency response, and public health practitioners, that is sponsored by the department or a sponsor agency, a hospital or other entity, and approved by the department, to provide assistance in the event of a disaster or threatened disaster or other incident defined in Iowa Code section 135.143. “Public health response team” shall include a disaster medical assistance team, an environmental health response team, a logistical support response team, the Iowa mortuary operational response team and other teams established and approved upon written order of the director to supplement and support disrupted or overburdened local medical and public health personnel, hospitals, and resources.

“Public health response team member” or *“PHRT member”* means an individual who has registered with the department and has received approval from the department to serve on a public health response team.

“Sponsor agreement” means a signed agreement between a sponsor agency and the department which defines the terms and conditions under which the agency shall sponsor a public health response team.

[ARC 0578C, IAB 2/6/13, effective 3/13/13; ARC 2476C, IAB 3/30/16, effective 5/5/16]

641—113.2(135) Purpose.

113.2(1) The department, through the division of acute disease prevention, emergency response and environmental health, bureau of emergency and trauma services, shall establish, register, and approve public health response teams to supplement and support disrupted or overburdened local medical and public health personnel, hospitals, and resources in the event of a disaster or threatened disaster or other incident as defined in Iowa Code section 135.143. The primary purpose of the public health response teams is to respond to Iowa incidents and to provide support for Iowa medical and public health personnel, hospitals, and resources. A public health response team may also be requested to respond to an out-of-state

disaster or emergency pursuant to the emergency management assistance compact at Iowa Code section 29C.21.

113.2(2) PHRTs shall be established, registered and approved pursuant to this chapter. Additional PHRTs may be established, registered and approved as necessary upon written order of the director.

[ARC 0578C, IAB 2/6/13, effective 3/13/13; ARC 2476C, IAB 3/30/16, effective 5/5/16]

641—113.3(135) Sponsor agency.

113.3(1) *Sponsor agency approval.* A hospital or other entity may apply to the department to be a sponsor agency of a public health response team. The applicant shall apply on a form approved by the department and shall provide all information requested by the department. The department may approve an application when the department is satisfied that the sponsor agency will operate the PHRT in compliance with Iowa Code section 135.143 and this chapter. Upon approval of the application, the department and the sponsor agency shall execute a sponsor agreement which shall provide that the agency is registered with the department and has been approved to sponsor a public health response team. The sponsor agreement shall also include the effective date of the approval and the terms and conditions of approval.

113.3(2) *Sponsor agency denial and revocation.* The department may deny approval to an applicant sponsor agency or may revoke a sponsor agency's approval if the department determines that the sponsor agency has violated or failed to comply with Iowa Code section 135.143 or this chapter, any term or condition contained in the sponsor agreement, any operational procedure, or state or federal law. The department shall notify the applicant or sponsor agency of the department's decision in writing by certified mail, return receipt requested. In the event an applicant or a sponsor agency is dissatisfied with the department's decision, the applicant or sponsor agency may submit a request for reconsideration with the division director. Such request shall be delivered by certified mail, return receipt requested, within 20 days of the date of the denial or revocation notification, to Division Director, Division of Acute Disease Prevention and Emergency Response, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319. The division director shall review the matter and issue a written decision within 20 days of receipt of the request. The division director's decision shall be final agency action. This appeal process does not constitute a contested case proceeding as defined in Iowa Code chapter 17A.

641—113.4(135) Public health response team members.

113.4(1) *Registration and approval.* An individual may apply to the department to be a public health response team member. The applicant shall apply on the Iowa statewide registry of volunteers (iSERV) Web site or on a form approved by the department and shall provide all requested information. The department shall register and approve an individual to serve as a PHRT member when the department is satisfied that the individual satisfies the requirements of this chapter and will perform on a PHRT in compliance with Iowa Code section 135.143 and this chapter. Upon registration and approval of an individual, the department shall provide the individual with written notification that the individual is registered with the department and has been approved to serve on a public health response team. The written notification shall also include the effective date of the approval and the terms and conditions of approval.

113.4(2) *Denial and revocation.* The department may deny approval to an individual or may revoke an individual's approval if the department determines that the individual has violated or failed to comply with Iowa Code section 135.143 or this chapter, any term or condition contained in the written approval notification from the department, any operational procedure, or state or federal law, or has exposed or may expose the state to undue risk. The department shall notify the individual of the department's decision in writing by certified mail, return receipt requested. In the event an individual is dissatisfied with the department's decision, the individual may submit a request for reconsideration with the division director. Such request shall be delivered by certified mail, return receipt requested, within 20 days of the date of the denial or revocation notification, to Division Director, Division of Acute Disease Prevention and Emergency Response, Lucas State Office Building, 321 E. 12th Street, Des Moines Iowa 50319. The division director shall review the matter and issue a written decision within 20 days of receipt of the request. The division director's decision shall be final agency action. This appeal process does not constitute a contested case proceeding as defined in Iowa Code chapter 17A.

113.4(3) *Effect of revocation.* If the department revokes a public health response team member's approval, the action may preclude future eligibility, but shall not negate defense and indemnification coverage or other protection for covered acts or omissions which occurred during the effective date of approval.

[ARC 2476C, IAB 3/30/16, effective 5/5/16]

641—113.5(135) Public health response team.

113.5(1) *General requirements.*

a. An entity may make application to the department to be a sponsor agency pursuant to subrule 113.3(1). An individual may make application to be a member of a PHRT pursuant to subrule 113.4(1).

b. The department shall establish the Iowa Volunteer Public Health Response Team Operational Procedures Manual. The operational procedures shall be in writing and shall be provided to each PHRT member. All PHRT members and sponsor agencies shall follow the PHRT operational procedures as established by the department. The Iowa Volunteer Public Health Response Team Operational Procedures Manual is available through the Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

c. If the department notifies a PHRT member or sponsor agency of a violation of Iowa Code section 135.143, this chapter, or an operational procedure, the PHRT member or sponsor agency shall correct the deficiency or violation identified by the department within a time frame determined by the department. If a PHRT member or sponsor agency fails to correct a deficiency or violation within the time frame identified by the department, or if the deficiency or violation constitutes an immediate danger to the public health, safety, or welfare, the department may initiate action to revoke approval pursuant to subrule 113.3(2) or 113.4(2).

113.5(2) *Team composition.*

a. A PHRT shall be comprised of health care professionals and administrative personnel as identified in the Iowa Volunteer Public Health Response Team Operational Procedures Manual.

b. The sponsor agency or department, as applicable, shall be responsible for maintaining adequate staffing.

113.5(3) *Licensure and educational requirements.*

a. Each PHRT member shall hold and maintain an active unrestricted license, registration, or certification to practice in Iowa (if applicable) in the member's respective medical or health care profession.

b. Each PHRT member shall complete required training as listed in the Iowa Volunteer Public Health Response Team Operational Procedures Manual, including training specified in respective team annexes.

c. A sponsor agency may provide specific position training to PHRT members as determined to be necessary by the sponsor agency and as approved by the department.

d. The department shall develop and implement training exercises to test the team's notification process, deployment readiness, and response capabilities.

e. The sponsor agency or department, as applicable, shall be responsible for documenting each PHRT member's completion of required training.

113.5(4) *Deployment and standdown.*

a. PHRTs shall prepare to deploy within two to four hours of notification by the department. PHRTs shall not self-deploy and shall not be covered by the provisions of Iowa Code section 135.143 and this chapter if the PHRTs self-deploy or are deployed by another agency or entity.

b. Deployment and standdown procedures are outlined in the Iowa Volunteer Public Health Response Team Operational Procedures Manual and shall be followed by all PHRT members.

[ARC 0578C, IAB 2/6/13, effective 3/13/13; ARC 2476C, IAB 3/30/16, effective 5/5/16]

641—113.6(135) Legal and other protections. A public health response team member acting pursuant to Iowa Code section 135.143 and this chapter shall be considered an employee of the state under Iowa Code section 29C.21 and chapter 669, shall be afforded protection as an employee of the state under Iowa Code section 669.21 whom the state shall defend and indemnify, and shall be considered an employee of the state

for purposes of workers' compensation, disability, and death benefits, provided that the member has done all of the following:

1. Registered with and received approval from the department pursuant to subrule 113.4(1) to serve on a public health response team.
2. Provided direct medical care or other support services during a disaster, threatened disaster, or other incident described in Iowa Code section 135.143(1); or participated in a training exercise to prepare for a disaster or other incident described in Iowa Code section 135.143(1).

[ARC 0578C, IAB 2/6/13, effective 3/13/13]

641—113.7(135) Reporting requirements and duties.

113.7(1) Upon obtaining knowledge or becoming aware of any injury allegedly arising out of the negligent rendering of, or the negligent failure to render, medical or other services as a public health response team member, the member shall provide written notice to the department, as soon as practicable, containing to the extent obtainable the circumstance of the alleged injury, the name and address of the injured, and any other relevant information.

113.7(2) Upon obtaining knowledge or becoming aware of any injury as defined in subrule 113.7(1), a public health response team member shall promptly take all reasonable steps to prevent further or additional injury from the same or similar circumstances, situations, or conditions.

113.7(3) A public health response team member shall immediately notify the Iowa Department of Justice, Special Litigation Division, Hoover State Office Building, Des Moines, Iowa 50319, of service or receipt of an original petition, suit, or claim seeking damage from the public health response team member related to participation on a public health response team.

113.7(4) Each public health response team member shall fully cooperate with the state in the defense of any claim or suit related to participation on a public health response team, including attending hearings, depositions, and trials and assisting in securing and giving evidence, responding to discovery and ensuring the attendance of witnesses.

113.7(5) Each public health response team member shall accept financial responsibility for personal expenses and costs incurred in the defense of any claim or suit related to participation on a public health response team, including travel, meals, and compensation for time and lost practice.

[ARC 0578C, IAB 2/6/13, effective 3/13/13; ARC 2476C, IAB 3/30/16, effective 5/5/16]

These rules are intended to implement Iowa Code section 135.143.

[Filed 1/10/07, Notice 11/22/06—published 1/31/07, effective 3/7/07]

[Filed ARC 0578C (Notice ARC 0474C, IAB 11/28/12), IAB 2/6/13, effective 3/13/13]

CHAPTER 114
PREPAREDNESS ADVISORY COMMITTEE

641—114.1(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Chairperson*” means the chairperson of the preparedness advisory committee, who has been elected by a majority of advisory committee members.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*PAC*” means the preparedness advisory committee.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.2(135) Purpose. The preparedness advisory committee (PAC) shall provide technical assistance and make recommendations for the planning and implementation of the public health emergency preparedness and hospital preparedness programs for the department. The committee shall advise the department on matters of policy, plan development, funding allocations, and coordination of state, regional and local entities that are responsible for promoting and protecting the health and safety of all Iowans prior to, during, or after a public health emergency or disaster.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.3(135) Appointment and membership.

114.3(1) The voting members of the PAC shall be appointed by the director.

114.3(2) The appointments shall be for three-year staggered terms, which shall expire on June 30.

114.3(3) Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

114.3(4) Membership. The voting membership of the PAC shall be comprised of individuals nominated from, but not limited to, the following organizations:

- a. American Red Cross.
- b. Indian Health Services.
- c. Upper Midwest Preparedness and Emergency Response Learning Center.
- d. Three representatives identified by the Iowa Counties Public Health Association representing one small, one midsized, and one large public health agency.
- e. Two representatives identified by the Iowa Environmental Health Association.
- f. Iowa Emergency Management Association.
- g. Iowa Emergency Medical Services Association.
- h. Six representatives identified by the Iowa Hospital Association representing two rural, two regional, and two urban hospitals.
- i. Iowa Medical Society.
- j. Iowa Primary Care Association.
- k. Iowa Nurses Association.
- l. Iowa Osteopathic Medical Association.
- m. Iowa Pharmacy Association.
- n. Iowa Poison Control Center.
- o. Three representatives identified by the Iowa Public Health Association representing one small, one midsized, and one large public health agency.
- p. Iowa National Guard.
- q. State hygienic laboratory.
- r. Veterans Health Administration.
- s. Safeguard Iowa Partnership.
- t. School Administrators of Iowa.
- u. A mental health association.
- v. American Academy of Pediatrics.

114.3(5) The PAC may also include, as nonvoting members, representation from the following agencies:

- a. The Iowa department of public health.
- b. The Iowa department of human services.
- c. The Iowa homeland security and emergency management department.
- d. The Iowa department of natural resources.
- e. The Iowa department of agriculture and land stewardship.
- f. The Iowa department on aging.
- g. The Iowa department of education.

114.3(6) Absences.

- a. Three unexcused absences in a 12-month period shall be grounds for the director to request nomination of an alternate representative to fill the position.
- b. Absences may be excused by notification provided to the chairperson prior to the meeting.
- c. The chairperson of the PAC shall be charged with providing notification of absences to the department.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.4(135) Officers.

114.4(1) Officers of the PAC shall consist of a chairperson and a vice chairperson, who shall be elected at the first meeting of each fiscal year.

- a. Officers may serve no more than three consecutive terms as chairperson or vice chairperson.
- b. Vacancies in the office of chairperson shall be filled by elevation of the vice chairperson.
- c. Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

114.4(2) Duties of officers.

- a. The chairperson shall:
 - (1) Preside at all meetings of the PAC,
 - (2) Appoint such subcommittees as deemed necessary, and
 - (3) Designate the chairperson of each subcommittee.
- b. The vice chairperson shall:
 - (1) Perform the duties of the chairperson if the chairperson is absent or unable to act. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson.
 - (2) Perform such other duties as may be assigned by the chairperson.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.5(135) Meetings.

114.5(1) The PAC shall establish a meeting schedule on an annual basis to conduct its business. There shall be a minimum of four meetings per year.

- a. Meetings may be scheduled as business requires, but notice to members must be given at least five working days prior to the meeting date unless action is required by the PAC on an emergency basis.
- b. Notice given four weeks in advance is encouraged to accommodate the schedules of professional members.

114.5(2) Any PAC member who is unable to attend the meeting will notify the chairperson.

114.5(3) A majority of appointed members constitutes a quorum.

114.5(4) When a quorum is present, a position is carried by affirmative vote of the majority of those present. No official business that requires a vote of the membership shall be conducted without a quorum present.

114.5(5) Persons wishing to make a presentation to the PAC shall submit the request to the chairperson not less than 14 days prior to the meeting. Presentations may be made at the discretion of the chairperson.

114.5(6) Persons wishing to submit written materials should do so at least 14 days in advance of the scheduled meeting to ensure that PAC members have adequate time to receive and evaluate the materials.

114.5(7) The PAC may conduct meetings by electronic means pursuant to Iowa Code section 21.8.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.6(135) Subcommittees. The PAC may designate one or more subcommittees to perform such duties as may be deemed necessary.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.7(135) Expenses of preparedness advisory committee voting members. The following may be considered necessary expenses for reimbursement of PAC members when incurred on behalf of advisory committee business and are subject to established state reimbursement rates:

1. Reimbursement for travel in a private car.
2. Actual lodging and meal expenses, including sales tax on lodging and meals.
3. Actual expense of public transportation.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

641—114.8(135) Committee composition. The committee's composition shall be developed and maintained pursuant to Iowa Code chapter 69.

[ARC 2564C, IAB 6/8/16, effective 7/13/16]

These rules are intended to implement Iowa Code chapter 135.

[Filed 7/10/08, Notice 5/21/08—published 7/30/08, effective 9/3/08]

CHAPTER 122
ANATOMICAL GIFT PUBLIC AWARENESS AND TRANSPLANTATION FUND

641—122.1(142C) Scope and purpose. The anatomical gift public awareness and transplantation fund was established by the legislature as a separate fund consisting of monetary contributions collected by county treasurers during the vehicle registration process and other contributions to the fund. Not more than 20 percent of the moneys in the fund annually may be expended in the form of grants to state agencies or to nonprofit legal entities. Not more than 30 percent of the moneys in the fund annually may be expended in the form of grants to hospitals for reimbursement for costs directly related to the development of in-hospital anatomical gift public awareness projects, anatomical gift referral protocols, and associated administrative expenses. Any unobligated moneys in the fund annually may be expended in the form of grants to transplant recipients, transplant candidates, living organ donors, or to legal representatives on behalf of transplant recipients, transplant candidates, or living organ donors for the reimbursement of out-of-pocket expenses not covered by insurance. These rules shall be implemented only to the extent that funding is available.

[ARC 2766C, IAB 10/12/16, effective 11/16/16]

641—122.2(142C) Definitions. For purposes of this chapter, the following definitions apply:

“Anatomical gift” means a human organ donated by a living or deceased person for the purpose of transplantation.

“Caretaker” means a person who provides care, protection, or services to a transplant recipient or living organ donor.

“Department” means the Iowa department of public health.

“Donor” means an individual whose body or body part is the subject of an anatomical gift.

“Human organ” means an eye, heart, lung, liver, pancreas, kidney, cornea, bone, tendon, heart valve, blood vessel, vein, or skin.

“Recipient” means the person receiving a human organ via transplant surgery.

“Resident” means a natural person who physically resides in Iowa as the person’s principal and primary residence and who establishes evidence of such residency by providing the department with one of the following:

1. A valid Iowa driver’s license,
2. A valid Iowa nonoperator’s identification card,
3. A valid Iowa voter registration card,
4. A current Iowa vehicle registration certificate,
5. A utility bill,
6. A statement from a financial institution,
7. A residential lease agreement,
8. A check or pay stub from an employer,
9. A child’s school or child care enrollment documents,
10. Valid documentation establishing a filing for homestead or military tax exemption on property located in Iowa, or
11. Other valid documentation as deemed acceptable by the department to establish residency.

“Transplantation” means surgically moving a human organ from an organ donor to a recipient.

“Transplant social worker” means the hospital social worker assisting the organ donor or recipient.

[ARC 2766C, IAB 10/12/16, effective 11/16/16]

641—122.3(142C) State agencies or nonprofit legal entities. Funding is available for state of Iowa agencies or nonprofit legal entities to conduct anatomical gift public awareness projects.

122.3(1) Eligibility criteria. To be eligible for a grant, the applicant shall be a state agency or nonprofit legal entity which, through a competitive bid process, submits a plan for an anatomical gift public awareness project.

122.3(2) Amount of grant. The department may offer a grant opportunity to state agencies and nonprofit entities through a competitive bid process. The total amount of grant funds awarded to an

applicant shall be based on the number of applicants and the availability of funds. Awarded grant funds will be made payable to the applicant.

122.3(3) Review process.

a. An applicant shall make an application to the program in the manner specified by the department. The department shall follow the requirements for competitive selection contained in 641—Chapter 176 in awarding these funds.

b. The department shall establish a request for bids and application process for applicants eligible to receive funding. The application review process and review criteria for preference in awarding the grants shall be described in the request for bids.

c. An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by rule 641—176.8(135,17A).

[ARC 2766C, IAB 10/12/16, effective 11/16/16]

641—122.4(142C) Hospitals. Funding is available to hospitals for reimbursement for costs directly related to the development of in-hospital anatomical gift public awareness projects, anatomical gift referral protocols, and associated administrative expenses.

122.4(1) Eligibility criteria. To be eligible for a grant, the applicant shall be a hospital physically located in Iowa which, through a competitive bid process, submits a plan for an anatomical gift public awareness project or an implementation or improvement of referral protocol.

122.4(2) Amount of grant. The department may offer a grant opportunity to Iowa hospitals through a competitive bid process. The total amount of grant funds awarded to an applicant shall be based on the number of applicants and the availability of funds. Awarded grant funds will be made payable to the applicant.

122.4(3) Review process.

a. An applicant shall make an application to the program in the manner specified by the department. The department shall follow the requirements for competitive selection contained in 641—Chapter 176 in awarding these funds.

b. The department shall establish a request for bids and application process for applicants eligible to receive funding. The application review process and review criteria for preference in awarding the grants shall be described in the request for bids.

c. An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by rule 641—176.8(135,17A).

[ARC 2766C, IAB 10/12/16, effective 11/16/16]

641—122.5(142C) Transplant recipients and donors. Funding is available to transplant recipients, donors, and a single caretaker for the reimbursement of out-of-pocket expenses not covered by insurance.

122.5(1) Eligibility criteria. To be eligible for a grant, an applicant (or the applicant's legal representative) must be a U.S. citizen and a resident of the state of Iowa or be a living organ donor to a resident of Iowa who:

a. Has undergone a transplant surgery, or

b. Is in need of dental clearance in order to be placed on a transplant list as maintained by the United Network for Organ Sharing (UNOS), or

c. Has been tested as a potential donor and been rejected.

122.5(2) Grant application. The department shall make the grant application form available on the department's Web site. Awards shall be made on a reimbursement basis to Iowa resident donors and donor recipients. The total amount of grant funds awarded to an applicant shall be based on the number of applicants and the availability of funds. Awarded grant funds will be made payable to the applicant.

122.5(3) Application process.

a. The applicant shall complete the application, as provided by the department, in its entirety and forward the application to the applicant's transplant social worker for review, comment and approval.

b. The transplant social worker shall review the information and documentation provided by the applicant and attest to their accuracy.

c. The completed application shall be mailed to the address provided on the application. Applications that are incomplete or illegible shall be returned via U.S. mail to the applicant or to the attention of transplant social workers for completion. Original receipts shall be submitted with the application.

d. Grant application documentation shall be retained by the applicant and the transplant social workers for a minimum of five years.

122.5(4) Eligible expenses. The department may reimburse applicants for the following expenses. A more comprehensive list of items eligible for reimbursement is located in the Guidelines - Category 3 document at <http://idph.iowa.gov/anatomical-gift>.

a. Dental expenses required for placement of the recipient on a transplant list and expenses directly related to the transplant, to include:

- (1) Initial routine exam.
 - (2) Complete cleaning.
 - (3) Full mouth X-rays.
 - (4) Up to \$1,500 of remaining expenses.
- b. Prescription medication (maximum of \$2,000).
- c. Lodging (rate determined by the department).

d. Airfare (coach) for donor and caretaker for a maximum of two people at a rate determined by the department.

e. Expenses immediately preceding and immediately following transplant surgery until the recipient and living organ donor are medically released by the hospital.

f. Disposable, short-term cleaning and daily life items, such as paper towels, paper plates, tin foil, toilet paper, etc.

g. Rehospitalization.

h. Mileage at current rate of state reimbursement.

i. Child care when both parents undergo surgery related to a single organ transplant.

122.5(5) Ineligible expenses. The department may not reimburse for the following.

a. Lost wages.

b. Alcohol or nonfood items, such as gum, breath mints, candy, etc.

c. Delivery fees and charges, Internet access, or garage rental.

d. In-domicile meals, food, or lodging.

e. Medication not directly associated with the transplant or medication taken prior to the transplant.

f. Medication and supplies available over the counter, such as blood pressure cuffs, gauze, bandages, scales, support hose, etc.

g. Credit card fees, check processing fees, and nonrefundable security deposits.

h. Lodging and meals for visitors.

i. Dentures.

j. Nondisposable or long-term cleaning and daily life expenses, such as vacuum, broom, towels, bedding, etc.

k. Personal items, such as shampoo, lotion, toothbrush, toothpaste, personal hygiene items, or clothing, etc.

l. Labels, stamps, envelopes, notebooks, etc.

m. Follow-up visit meals, lodging, etc.

n. Expenses covered by primary, secondary, or tertiary insurance.

122.5(6) Review process.

a. The department shall review grant applications and supporting documentation on a first-come, first-served basis.

b. Grant reimbursement limits and eligibility shall be determined by the department.

c. Grant applications and payments are not considered public records pursuant to Iowa Code section 22.7(2).

These rules are intended to implement Iowa Code section 142C.15.

[ARC 2766C, IAB 10/12/16, effective 11/16/16]

CHAPTER 124
INTERAGENCY COORDINATING COUNCIL
FOR THE STATE MEDICAL EXAMINER

641—124.1(691) Purpose. The purposes of the interagency coordinating council for the state medical examiner are to provide guidance concerning medicolegal death investigation for the state of Iowa, facilitate optimal relationships between the state and county medical examiners and other agencies involved in death investigation, and provide a venue for both the exchange of information vital to the continued operations of the Iowa office of the state medical examiner and the effective coordination of the functions and operations of the office of the state medical examiner with the needs and interests of the department of public safety and the department of public health, with input and guidance from the governor's office and other council members.

[ARC 4705C, IAB 10/9/19, effective 11/13/19]

641—124.2(691) Membership. Members shall include representatives from agencies and organizations that are directly involved with the office of the state medical examiner and medicolegal death investigation in the state of Iowa.

124.2(1) The interagency coordinating council for the state medical examiner members shall include the following:

- a. The state medical examiner or, when the state medical examiner is not available, the deputy state medical examiner;
- b. The commissioner of public safety or the commissioner's designee;
- c. The director of public health or the director's designee;
- d. The governor or the governor's designee;
- e. A representative from the office of the attorney general;
- f. A representative from the Iowa County Attorneys Association;
- g. A representative from the Iowa Medical Society;
- h. A representative from the Iowa Association of Pathologists;
- i. A representative from the Iowa Association of County Medical Examiners;
- j. A representative from the statewide emergency medical system; and
- k. A representative from the Iowa Funeral Directors Association.

124.2(2) Each specific organization listed in paragraphs 124.2(2) "e" through "k" shall designate a representative to serve on the coordinating council. Representatives shall be approved by the state medical examiner in consultation with the director of public health.

124.2(3) The state medical examiner may invite representatives from other relevant organizations to provide specific insights to a particular issue, as needed.

[ARC 4705C, IAB 10/9/19, effective 11/13/19]

641—124.3(691) Meetings.

124.3(1) The interagency coordinating council shall schedule two meetings per year to be held at the office of the director of public health.

124.3(2) Meetings may be scheduled more frequently or less frequently depending upon the circumstances and the need for consultation.

124.3(3) Meetings may be canceled by any member with the agreement of the other members.

124.3(4) All meetings are open to the public in accordance with the open meetings law, Iowa Code chapter 21.

[ARC 8229B, IAB 10/7/09, effective 11/11/09]

641—124.4(691) Duties. The interagency coordinating council shall do all of the following:

124.4(1) Advise and consult with the state medical examiner on a range of issues affecting the organization and functions of the office of the state medical examiner and the effectiveness of the medical examiner system in the state.

124.4(2) Advise the state medical examiner concerning the assurance of effective coordination of the functions and operations of the office of the state medical examiner with the department of public safety and the department of public health in order to better serve the needs of the citizens of Iowa.

124.4(3) Provide information to council members regarding the current operations and functions of the office of the state medical examiner.

124.4(4) Provide to and receive from the governor's office updated information relevant to the mission of the state medical examiner's office.

124.4(5) Discuss legislative and budgetary decisions that may impact the functions and operations of any agency or member entity represented by the interagency coordinating council.

124.4(6) Elicit council members' suggestions and recommendations to improve the overall operations of the office of the state medical examiner.

[ARC 4705C, IAB 10/9/19, effective 11/13/19]

641—124.5(691) Minutes. The office of the state medical examiner shall keep minutes of all meetings showing the date, time, place, members present, and the general topics presented.

124.5(1) The minutes shall be provided to the members of the interagency coordinating council prior to the next scheduled meeting.

124.5(2) The minutes shall be available at the office of the state medical examiner for public inspection Monday through Friday from 8:30 a.m. to 4:30 p.m.

These rules are intended to implement Iowa Code section 691.6B.

CHAPTER 125
ADVISORY COUNCIL FOR THE STATE MEDICAL EXAMINER
Rescinded **ARC 4705C**, IAB 10/9/19, effective 11/13/19

CHAPTER 126
STATE MEDICAL EXAMINER
[Prior to 4/20/88, see Medical Examiner, State[566] Ch 1]
[Prior to 6/30/99, see Public Safety Department[661] Ch 21]

641—126.1(144,331,691) Definitions.

“Autopsy” means the external and internal postmortem examination of a deceased person.

“County of appointment” means the county which requests a medical examiner to conduct an investigation, perform or order an autopsy, or prepare a report(s) in a death investigation case. The request may be authorized by the county attorney or the county medical examiner. The county of appointment shall be the county in which the death occurred.

641—126.2(691) Medical examiner coverage. Rescinded IAB 12/12/01, effective 1/16/02.

641—126.3(691) Fees for autopsies and related services and reimbursement for related expenses. Autopsies performed by the state medical examiner are provided on a fee-for-service basis. Costs of autopsies and related services and expenses are the responsibility of the county of appointment. The county of residence of the deceased shall reimburse the county of appointment.

126.3(1) Fee schedule. The fees collected under this subrule shall be considered repayment receipts as defined in Iowa Code section 8.2.

a. The following fees shall apply to autopsies conducted by the state medical examiner:

Autopsy.	\$1400 — Beginning July 1, 2018, \$1900
Copies of reports.	\$20

EXCEPTIONS: A copy of the autopsy report is automatically sent to the county medical examiner and to the county attorney without fee. A single copy of an autopsy report may be provided to the immediate next of kin of the deceased without fee. Copies of autopsy reports may be provided to public officials and physicians of record for official purposes without fee.

b. The following fee is for time spent reviewing case materials, preparing for deposition or court, testifying in deposition or court, and travel time.

State, deputy, or associate medical examiner(s) time for all court cases	\$450 per hour with a one-hour minimum

c. A cremation permit fee of \$75 will be assessed for each permit investigated and authorized by the state medical examiner’s office.

126.3(2) Expense reimbursement. Other laboratory services associated with an autopsy, which shall include, but not be limited to, photography, toxicology, radiology, microbiology, and morgue fees, shall be billed by the department to the county of appointment. Moneys collected pursuant to this subrule shall be paid by the department to the laboratory or other entity providing the service.

126.3(3) State medical examiner acting as county medical examiner. When the state medical examiner acts in the capacity of county medical examiner, the state medical examiner shall receive from the county of appointment a fee of \$100 per hour, with a one-hour minimum, for each report prepared plus the state medical examiner’s actual expenses. Counties may not depend on the state medical examiner for full-time coverage.

[ARC 9533B, IAB 6/1/11, effective 7/6/11; ARC 9880B, IAB 11/30/11, effective 1/4/12; ARC 3499C, IAB 12/6/17, effective 1/10/18]

641—126.4(691) Fees for tissue recovery. When the tissue recovery room located within the office of the state medical examiner is utilized by an authorized tissue recovery agency, a fee of \$400 per case shall be assessed. The tissue recovery agency is responsible for this fee, payable to the office of the state medical examiner.

These rules are intended to implement Iowa Code section 691.6.

CHAPTER 127
COUNTY MEDICAL EXAMINERS
[Prior to 7/29/87, Health Department [470] Ch 127]

641—127.1(144,331,691) Definitions.

“Autopsy” means the external and internal postmortem examination of a deceased person.

“Cause of death” means the disease or injury which sets in motion the chain of events which eventually result in the death of a person. The physician shall consider “but for” this injury or disease the person would still be living.

“County medical examiner” or *“CME”* means a medical or osteopathic physician or surgeon licensed in the state of Iowa and appointed by the board of supervisors to serve in this capacity.

“County medical examiner investigator” or *“CME-I”* means an individual appointed by a county medical examiner, with approval by the board of supervisors and the state medical examiner, to serve under the supervision of a county medical examiner to assist in death investigations.

“County of appointment” means the county which requests a medical examiner to conduct an investigation, perform or order an autopsy, or prepare a report(s) in a death investigation case. The request may be authorized by the county attorney or the county medical examiner. The county of appointment shall be the county in which the death occurred.

“Cremation” means the technical process, using heat and flame, that reduces human remains to bone fragments.

“Day” means calendar day.

“Death” means the condition as described in Iowa Code section 702.8.

“Death affecting the public interest” means any death of a human being in which the circumstances are sudden, unexpected, violent, suspicious, or unattended, including but not limited to those deaths listed at Iowa Code section 331.802(3) and described as follows:

1. Violent death. Violent death includes homicide, suicide, or accidental death resulting from physical, mechanical, thermal, chemical, electrical, or radiation injury. A medical examiner’s investigation and report are required irrespective of the period of survival following injury.

2. Death caused by criminal abortion, including self-induced.

3. Death related to disease thought to be virulent or contagious which may constitute a public hazard. Any such case investigated by a medical examiner shall be reported to the department and to the local health authority.

4. Death that has occurred unexpectedly or from an unexplained cause. This term includes the following situations:

- Death without prior medical conditions accounting for the death.

- Apparently instantaneous death without obvious cause.

- Death during or following an unexplained syncope or coma.

- Death during an unexplained, acute, or rapidly fatal illness.

5. Death of a person confined in a prison, jail, or correctional institution.

6. Death of a person when unattended by a physician during the period of 36 hours immediately preceding death.

- This term includes the following situations:

- Persons found dead without obvious or probable cause.

- Death when the person was unattended by a physician during a terminal illness.

- Fetal death unattended by a physician. A fetal death is a fetus born dead after a gestation period of 20 completed weeks or greater or a fetus which weighs 350 grams or more (Iowa Code section 144.29).

- This term does not include a prediagnosed terminal or bedfast case in which a physician has been in attendance within 30 days preceding the death.

- This term does not include a terminally ill patient who was admitted to and received services from a hospice program as defined in Iowa Code section 135J.1, if a physician or registered nurse employed by the program was in attendance within 30 days preceding the death.

7. Death of a person if the body is not claimed by a relative or friend.

8. Death of a person if the identity of the deceased is unknown.
 9. Death of a child under the age of two years if death results from an unknown cause or if the circumstances surrounding the death indicate that sudden infant death syndrome may be the cause of death.
- “Department”* means the Iowa department of public health.
- “Deputy county medical examiner”* or *“DCME”* means an individual appointed by a county medical examiner, with approval by the board of supervisors and the state medical examiner, to assist the county medical examiner in the performance of the county medical examiner’s duties.
- “External examination”* means a close inspection of the exterior of a deceased human body for the purpose of locating, describing, and delineating any and all injuries or other abnormalities. External examination of a body does not constitute an autopsy, even if toxicology samples are obtained.
- “Fee”* means an amount to be paid to a county medical examiner’s office as determined by the board of supervisors of the county of appointment for completion of an investigation, autopsy, or report(s). Fees for services provided by the state medical examiner’s office are established at 641—126.3(691).
- “Form ME-1”* means the Preliminary Report of Investigation by Medical Examiner form.
- “Form ME-2”* means the Medical Examiner Embalming Certificate form.
- “Form ME-3”* means the Permit by Medical Examiner for Autopsy form.
- “Form ME-4”* means the Preliminary Report of Child/Infant Death Scene Investigation form.
- “Form ME-5”* means the Cremation Permit by Medical Examiner form.
- “Form ME-6”* means the Iowa State Medical Examiner’s Office Personal Effects form.
- “Form ME-7”* means the Medication List form.
- “Form ME-8”* means the Body Identification Record form.
- “Manner of death”* means the circumstances under which the cause of death occurred and may be specified as follows: natural, accident, suicide, homicide, undetermined, or pending.
- “Medical care provider”* means an individual licensed or certified in any medical profession, including but not limited to a physician, physician assistant, nurse, emergency medical care provider, certified nurse’s aide, pharmacist, physical therapist, and medical technologist.
- “Medical examiner”* means the state medical examiner, deputy state medical examiner, county medical examiner, or deputy county medical examiner.

641—127.2(331,691) Duties of medical examiners—jurisdiction over deaths which affect the public interest.

127.2(1) Jurisdiction. Upon receiving notification of a death which affects the public interest, a medical examiner shall notify any appropriate law enforcement agency not otherwise notified and shall take charge of the body of the decedent. The body shall not be disturbed or removed from the position in which it was found without authorization from the medical examiner except for the purpose of preserving the body from loss or destruction or permitting the passage of traffic on a highway, railroad, or airport, or unless the failure to remove the body might endanger life, safety, or health.

127.2(2) Investigation. A county medical examiner shall conduct a preliminary investigation of the cause and manner of death and shall utilize the investigative protocol outlined in the most current edition of the County Medical Examiner’s Handbook, available from the state medical examiner’s office. A medical examiner may perform or authorize performance of any scientific study to assist in identifying the cause, circumstances, and manner of death. A medical examiner shall cooperate with other investigating officials and agencies involved and shall share reports, information, and conclusions with these officials and agencies.

127.2(3) Reports required.

a. Form ME-1.

(1) Preparation and filing. A county medical examiner shall prepare a written report of the examiner’s findings on the Preliminary Report of Investigation by Medical Examiner, Form ME-1. A county medical examiner shall file the original Form ME-1 with the state medical examiner’s office within 14 days of the date of death and shall file a copy of the Form ME-1 with the county attorney within 14 days of the date of the death and shall retain a copy for the medical examiner’s records.

(2) Content. Form ME-1 shall be completed as fully as possible in light of all available information and may be signed by either a county medical examiner or a county medical examiner investigator acting

under the supervision of a county medical examiner. If the cause or manner of death, identity of the decedent, or other information is unknown or pending at the time of filing, “unknown” or “pending” may be written in the appropriate area of the form. If additional information becomes available, this information shall be forwarded to the state medical examiner in written form at such time as it becomes available to be added as a supplement to the file.

b. Jurisdiction declined or terminated. A form designated by the office of the state medical examiner shall be completed and filed in accordance with subparagraphs (1) and (2) of paragraph “a” above in cases reported to the county medical examiner where jurisdiction is terminated or declined.

127.2(4) Disposition of body. After an investigation, including an autopsy if one was performed, the body of the decedent shall be made available to the funeral home designated by a relative or friend of the decedent for burial or appropriate disposition. A medical examiner shall not use influence in favor of a particular funeral director or funeral home. If no one claims a body, it shall be disposed of as provided in Iowa Code chapter 142.

127.2(5) Coverage.

a. When an individual is required to report a death to a medical examiner and the county medical examiner cannot be located or is not available, the individual shall contact a county medical examiner from any adjacent Iowa county to perform those duties outlined in this chapter. The responding medical examiner shall have full authority to conduct any procedures necessary to the investigation of the cause and manner of death. If an adjacent county medical examiner is not available, the state medical examiner shall be contacted and may act in the capacity of a county medical examiner.

b. The responding county medical examiner shall be reimbursed by the county for which the service is provided for all fees and expenses at the rate which is customarily paid by the county for which the service is provided or at a rate agreed upon by the medical examiner and the board of supervisors of the county for which the service is provided.

641—127.3(331,691) Autopsies.

127.3(1) Autopsy required. A county medical examiner shall perform an autopsy or order that an autopsy be performed in the following cases:

a. All cases of homicide or suspected homicide, irrespective of the period of survival following injury.

b. All cases in which the manner of death is undetermined.

c. All cases involving unidentified bodies.

d. All deaths of children under the age of two when there is not a clear cause of death, including suspected cases of sudden infant death syndrome. A summary of the findings of the autopsy shall be transmitted by the physician who performed the autopsy to the county medical examiner within two days of completion of the report. Autopsies performed on children under the age of two when the circumstances surrounding the death indicate that sudden infant death syndrome may be the cause of death or the cause of death is not clearly explained by known medical history shall conform to Form ME-4.

e. All work- and farm-related deaths unless there is an obvious natural cause of death.

f. All drowning deaths.

g. All deaths of commercial vehicle drivers that occur during the performance of their job duties.

h. Deaths due to poisoning.

i. Deaths of airplane pilots who die as a result of an airplane crash. The National Transportation Safety Board and the Federal Aviation Administration should be contacted prior to the autopsy to request specimen kit(s).

j. Deaths due to a natural disaster, including tornadoes and floods.

k. Deaths in a prison, jail or correctional institution or under police custody, where there is not a natural disease process that accounts for the death.

127.3(2) Autopsy recommended. It is recommended that a county medical examiner should perform an autopsy or order that an autopsy be performed in the following cases:

a. Deaths of adolescents less than 18 years of age when there is not a natural cause of death.

b. All cases which involve a motor vehicle crash, unless it is a single motor vehicle accident with no potential for litigation and there is an obvious cause of death or the injuries have been clearly documented by hospitalization.

c. Rescinded IAB 3/29/06, effective 5/3/06.

d. Deaths from suicide.

e. All pedestrian, bicycle, motorcycle, snowmobile, boating, watercraft, three- or four-wheeler or all-terrain vehicle fatalities.

f. Deaths due to failure of a consumer product.

g. Deaths due to a possible public health hazard.

h. Deaths due to drug or alcohol abuse or overdose.

i. Electrical- and lightning-related deaths.

j. Deaths from burns or smoke or soot inhalation.

k. All deaths related to exposure, such as hypothermia and hyperthermia.

l. All sport-related deaths, including but not limited to deaths from auto racing and deaths resulting from injuries sustained in football, basketball, baseball, softball, soccer, or other games or sports.

127.3(3) Other deaths. For those deaths not listed in subrule 127.3(1) or 127.3(2), a county medical examiner shall determine whether the public interest requires an autopsy and may perform an autopsy or order that an autopsy be performed. A county medical examiner may consult with the state medical examiner to assist in determining the need for an autopsy.

127.3(4) Performance of autopsy.

a. *Who may authorize.* Autopsies may be authorized by the state medical examiner, the county medical examiner for the county in which the death occurred or the county where any injury contributing to or causing the death was sustained, or the county attorney who would have jurisdiction in any criminal proceeding related to the death.

b. *Who may perform.* An autopsy shall be performed by a pathologist trained or with experience in forensic pathology, licensed to practice medicine and surgery or osteopathic medicine and surgery in the state of Iowa and board-certified by the American Board of Pathology, or under the direct supervision of a physician with these qualifications. If an autopsy is performed by a physician who does not satisfy these criteria and who is not performing under the direct supervision of a physician who satisfies these criteria, the physician shall submit a supplemental report with the Permit by Medical Examiner for Autopsy, Form ME-3, which details the specific training, education, and experience which qualify the physician to perform an autopsy. The following cases/types of deaths shall be transported to the office of the state medical examiner for autopsy unless otherwise approved by the state medical examiner:

(1) Deaths of adolescents through 18 years of age when there is not a known or preexisting natural cause of death.

(2) All cases of homicide or suspected homicide, irrespective of the period of survival following injury.

(3) Deaths of children under the age of 2 years if death results from an unknown cause or if the circumstances surrounding the death indicate that Sudden Infant Death Syndrome may be the cause of death.

(4) All suspicious suicides.

(5) All high-profile deaths including, but not limited to, deaths of elected officials in municipal, state or federal government.

(6) All deaths of inmates occurring in any institutions under the department of corrections as outlined in Iowa Code section 904.102, excluding those deaths that result from a pre-existing medical condition.

c. *Permit required—Form ME-3.* A medical examiner shall complete the Permit by Medical Examiner for Autopsy, Form ME-3. All reasonable efforts shall be made to complete the Form ME-3 prior to the performance of an autopsy and to submit the form with the body of the decedent or to submit the form via facsimile to the state medical examiner.

127.3(5) Autopsy report. A complete record of the findings of the autopsy shall be submitted to the state medical examiner's office, the county attorney of the county where the death occurred and the county attorney of the county where the injury contributing to or causing the death was sustained within 90 days

following the date of death, unless unusual circumstances requiring further investigation or testing exist. The report filed shall include all diagrams, transcriptions of the autopsy observations and opinions, and toxicology reports.

127.3(6) *Out-of-state autopsy.* The body of a decedent may be sent out of state for an autopsy or postmortem examination only if the county medical examiner certifies in writing that the out-of-state autopsy or examination is necessary for any of the following reasons:

- a. A forensic pathologist practicing in the state of Iowa is unavailable;
- b. Requiring an in-state autopsy would cause financial hardship; or
- c. Requiring an in-state autopsy would delay the funeral or burial more than three days.

127.3(7) *Retention and disposal of tissues, organs, and bodily fluids.* The office of the state medical examiner shall retain tissues, organs, and bodily fluids as necessary to determine the cause and manner of death or as deemed advisable by the state medical examiner for medical or public health investigation, teaching, or research. Tissues, organs, and bodily fluids shall be retained at a minimum for the time periods established by the National Association of Medical Examiners and may be retained for a longer time period at the discretion of the state medical examiner. Tissues, organs, and bodily fluids retained under this subrule shall be disposed of without the specific consent or notification of the legal next of kin and in accordance with applicable federal and state regulations including but not limited to OSHA-recommended biohazard and blood-borne pathogen standards. The anatomical material shall be removed from the laboratory premises through use of a contracted, licensed, and bonded medical waste removal service to a medical waste processing center for final disposition.

641—127.4(331,691) Fees.

127.4(1) *Payment of fee and expenses.*

a. A medical examiner shall receive from the county of appointment or the county of the decedent's residence a fee for each preliminary investigation and report submitted in a case in which a death affects the public interest. A county medical examiner shall also receive from the county of appointment or the county of the decedent's residence the examiner's actual expenses. The fee and expenses shall be submitted by the county medical examiner to the county of appointment, which may immediately pay the invoice or forward the invoice to the county of the decedent's residence for payment to the county medical examiner. If the county medical examiner does not receive payment from the county of the decedent's residence within 60 days of receiving the invoice, the county of appointment shall pay the invoice.

b. A pathologist or other physician who performs an autopsy under medical examiner authorization shall be paid for the services by the county of appointment.

c. Invoices produced for services performed by a county medical examiner, deputy county medical examiner or county medical examiner investigator shall be submitted as a joint invoice to the county of appointment when services were rendered in a case by multiple county medical examiner staff.

127.4(2) *Reimbursement.*

a. *County of residence different from county of appointment—Iowa resident.* The county of the decedent's residence shall reimburse the county of appointment for the fee and expenses paid by the county of appointment.

b. *Death caused by criminal defendant.* If the person's death is caused by a criminal defendant who has been convicted and sentenced for murder, voluntary manslaughter, involuntary manslaughter, or homicide by vehicle, the county of the person's residence may recover from the defendant the fee and expenses.

c. *Out-of-state resident—law enforcement involvement.* The fee and expenses of a county medical examiner who performs an investigation or autopsy of a person who dies after being brought into the state for emergency medical treatment by or at the direction of an out-of-state law enforcement officer or public authority shall be paid by the state. A claim for payment shall be filed with the state appeal board.

d. *Out-of-state resident—no law enforcement involvement.* The fee and expenses of a county medical examiner who performs an investigation or autopsy of an out-of-state resident shall be paid by the county of appointment.

e. *Child under the age of two.* Rescinded IAB 4/2/14, effective 5/7/14.

[ARC 1403C, IAB 4/2/14, effective 5/7/14; ARC 2841C, IAB 12/7/16, effective 1/11/17]

641—127.5(144,331,691) Death certificates—deaths affecting the public interest.

127.5(1) Completion. The funeral director to whom the body is released shall complete the personal data on the death certificate. The medical examiner shall complete the manner of death and cause of death sections of the death certificate within 72 hours after determination of the cause of death. If an autopsy is performed by the state medical examiner, the death certificate shall be submitted to the state medical examiner's office for completion. All information included on the certificate shall be typewritten.

127.5(2) Filing. The funeral director shall file the certificate with the county registrar in the county in which the death occurred. A death certificate shall be filed prior to the issuance of a burial transit permit and prior to disposal of the body.

127.5(3) Extension of time. If a medical examiner is unable to complete the manner of death and cause of death sections of the death certificate within the 24-hour time period, the funeral director shall file a death certificate form completed with all available information. Such certificate shall be authority for the issuance of a burial transit permit. Within 15 days, a supplemental report shall be filed with the local registrar which provides the information missing from the original certificate.

127.5(4) Additional standards. Additional rules relative to death certificates may be found at 641—Chapter 101.

641—127.6(331,691) Cremation.

127.6(1) Permit obtained prior to cremation—Form ME-5. A permit for cremation shall be obtained from a county medical examiner prior to cremation of a body of a decedent. For purposes of this requirement, a facsimile or electronic copy of the cremation permit has the same legal effect as the original. Cremation permits shall be issued on the Cremation Permit by Medical Examiner, Form ME-5.

127.6(2) Requirements for issuance of permit. A county medical examiner shall direct an inquiry into the cause and manner of death and shall determine whether the death is one which affects the public interest prior to issuing a cremation permit.

a. Death which affects the public interest. If the death occurred in a manner specified in Iowa Code section 331.802(3) or if reasonable suspicion that the death occurred in such a manner exists, a medical examiner shall view the body, make a personal inquiry into the cause and manner of death, and complete or cause to be completed all necessary autopsy or postmortem examinations prior to issuing a cremation permit.

b. Death which does not affect the public interest. If, following an inquiry into the cause and manner of death, the county medical examiner determines that the death did not occur in a manner specified in Iowa Code section 331.802(3), a medical examiner is not required to view the body prior to issuing a cremation permit. A county medical examiner shall certify on the Cremation Permit by Medical Examiner, Form ME-5, that the medical examiner's inquiry into the cause and manner of death did not disclose evidence that the death occurred in a manner specified in Iowa Code section 331.802(3).

127.6(3) Fee. A fee for the Cremation Permit by Medical Examiner, Form ME-5, shall be paid by the family, next of kin, guardian of the decedent, or other person authorized to act on behalf of the decedent.

641—127.7(331,691) County medical examiner investigators.

127.7(1) Appointment. A county medical examiner may appoint one or more county medical examiner investigators upon approval by the board of supervisors and the state medical examiner.

127.7(2) Qualifications.

a. Prior to appointment, a CME-I should possess a minimum of two years of experience as a licensed or certified nurse or medical care provider. A certified peace officer may be appointed to the position of CME-I if a nurse or medical care provider is not available.

b. A CME-I shall satisfy the following criteria:

(1) Prior to or within two years of appointment, attend the St. Louis University School of Medicine Basic Medicolegal Death Investigation Course or its state medical examiner-approved equivalent; and

(2) Prior to or within five years of appointment, obtain certification at the registry-level as a death investigator by the American Board of Medicolegal Death Investigators.

c. A CME-I is not required to meet the requirements of paragraph "a" or "b" if the individual has functioned in the capacity of a CME-I for a period of five years as of January 1, 2002.

d. If a CME is unable to appoint a CME-I who possesses the qualifications required by paragraph “a,” “b,” or “c,” the CME may request a waiver. Waiver requests shall be submitted in writing to the state medical examiner and shall include the efforts undertaken by the CME to locate a CME-I who meets the above qualifications; the qualifications of the individual willing to serve in the capacity of CME-I; and the period of time for which the waiver is requested, not to exceed two years. The state medical examiner has sole discretion to waive the requirements of this rule and may withdraw or modify a waiver request upon a finding that the CME-I has failed to adequately perform the duties of the position or for other good cause.

e. If a CME-I is unable to meet the eligibility requirements for obtaining registry certification due to the small number of cases requiring investigation in the county of appointment, then a waiver shall be obtained from the state medical examiner in order for the investigator to continue his or her duties. The county medical examiner shall submit a request for a waiver in writing with documentation of the number of deaths occurring in the county of appointment which require death investigation. The waiver must be renewed every five years if the required number of investigations has still not been achieved.

127.7(3) Duties. A CME-I shall assist in death investigations. A CME-I acting under the supervision of a county medical examiner may sign the Form ME-1. A CME-I shall not sign a certificate of death or a Form ME-5.

127.7(4) Supervision. A CME-I shall serve under the supervision of a county medical examiner. A CME-I provides services under the direction of a county medical examiner or state medical examiner’s office. A CME-I shall at all times perform services in a manner which is consistent with the protocol outlined in the most current edition of the County Medical Examiner’s Handbook and any policies or protocols of the supervising county medical examiner.

127.7(5) Fees. Fees for the services provided by a CME-I shall be paid by the county of appointment or by the county of the decedent’s residence. A CME-I shall also receive from the county of appointment or the county of the decedent’s residence reimbursement for actual expenses. The fee and expenses shall be submitted by the CME-I to the county of appointment, which may immediately pay the invoice or forward the invoice to the county of the decedent’s residence for payment to the CME-I. If the CME-I does not receive payment from the county of the decedent’s residence within 60 days of receiving the invoice, the county of appointment shall pay the invoice.

[ARC 8526B, IAB 2/10/10, effective 3/17/10; ARC 2841C, IAB 12/7/16, effective 1/11/17]

641—127.8(331,691) Deputy county medical examiners.

127.8(1) Appointment. A county medical examiner may appoint one or more deputy county medical examiners upon approval by the board of supervisors and the state medical examiner.

127.8(2) Qualifications. A DCME shall be licensed in the state of Iowa as a medical or osteopathic physician or surgeon.

127.8(3) Duties. A DCME shall serve at the direction of the county medical examiner and may perform any duty of a county medical examiner which is delegated by the county medical examiner to the DCME.

127.8(4) Fees. Fees for the services provided by a DCME shall be paid by the county of appointment or by the county of the decedent’s residence. A DCME shall also receive from the county of appointment or the county of the decedent’s residence reimbursement for actual expenses. The fee and expenses shall be submitted by the DCME to the county of appointment, which may immediately pay the invoice or forward the invoice to the county of the decedent’s residence for payment to the DCME. If the DCME does not receive payment from the county of the decedent’s residence within 60 days of receiving the invoice, the county of appointment shall pay the invoice.

[ARC 2841C, IAB 12/7/16, effective 1/11/17]

641—127.9(331,691) Failure to comply with rules. If a county medical examiner, deputy county medical examiner, county medical examiner investigator, pathologist, or other physician fails to comply with these rules, the state medical examiner may provide written notice of the failure to comply to that individual, the appropriate county medical examiner, and the appropriate county board of supervisors. Within 30 days of the date of the notice, the individual to whom the notice was provided shall submit a written response to the state medical examiner, outlining a proposed corrective action plan. If no response is received within the 30

days or if the proposed corrective action plan is unacceptable, the state medical examiner shall forward copies of the notice and all pertinent correspondence and information to the board of supervisors for the county which appointed the individual, notifying the board of the individual's failure to comply with these rules.

641—127.10(331,691,22) Confidentiality. Records and reports of a medical examiner may be confidential records pursuant to Iowa Code sections 22.7(2), 22.7(5), and 22.7(41) and other provisions of Iowa law. Prior to releasing a medical examiner record or report to a member of the public, a county medical examiner may inform the appropriate law enforcement agency, the county attorney, and the state medical examiner to determine whether release is authorized under Iowa law.

641—127.11(331,691,670) Indemnification. A board of supervisors shall defend, hold harmless, and indemnify a county medical examiner and any properly appointed staff members to the extent provided in Iowa Code chapter 670.

These rules are intended to implement Iowa Code chapters 331 and 691.

CHAPTER 130
EMERGENCY MEDICAL SERVICES ADVISORY COUNCIL

641—130.1(147A) Definitions. For the purposes of this chapter, the following definitions shall apply:

“*Chairperson*” means the chair of the advisory council, who has been elected by the majority of the advisory council’s members.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency medical care provider*” means an emergency medical care provider as defined in rule 641—131.1(147A).

“*Emergency medical services*” or “*EMS*” means emergency medical services as defined in rule 641—131.1(147A).

[ARC 2565C, IAB 6/8/16, effective 7/13/16]

641—130.2(147A) Purpose. The EMS advisory council shall advise the director and develop policy recommendations concerning the regulation, administration, and coordination of emergency medical services in the state.

641—130.3(147A) Appointment and membership.

130.3(1) The EMS advisory council shall be appointed by the director.

130.3(2) The appointments shall be for three-year staggered terms, which shall expire on June 30.

130.3(3) Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

130.3(4) Membership of the council shall be comprised of individuals nominated from, but not limited to, the following state or national organizations:

a. One physician from each of the following organizations:

- (1) Iowa Osteopathic Medical Association.
- (2) Iowa Medical Society.
- (3) American College of Emergency Physicians.
- (4) Iowa Academy of Family Physicians.
- (5) University of Iowa Hospitals and Clinics.
- (6) American Academy of Emergency Medicine.
- (7) American Academy of Pediatrics.

b. A representative from each of the following organizations:

- (1) Iowa Physician Assistant Society.
- (2) EMS Education Programs Committee.
- (3) Iowa Nurses Association.
- (4) Iowa Hospital Association.
- (5) Iowa State Association of Counties.

c. Two out-of-hospital emergency medical care providers from the Iowa Firefighters Association.

d. One out-of-hospital emergency medical care provider from the Iowa Professional Firefighters.

e. Three out-of-hospital emergency medical care providers, with at least one representing volunteer EMS and one representing a private service program, from the Iowa EMS Association.

f. Two at-large volunteer emergency medical care providers.

130.3(5) Absences.

a. Three unexcused absences in a 12-month period shall be grounds for the director to request nomination of an alternative representative to fill the position.

b. Absences may be excused by notification provided to the chairperson prior to the meeting.

c. The chairperson shall be charged with providing notification of absences to the department.

[ARC 9356B, IAB 2/9/11, effective 3/16/11; ARC 2565C, IAB 6/8/16, effective 7/13/16]

641—130.4(147A) Officers.

130.4(1) Officers of the advisory council shall be a chairperson and a vice chairperson, who shall be elected at the first meeting of each fiscal year.

- a. Officers may serve no more than three consecutive terms as chairperson or vice chairperson.
- b. Vacancies in the office of chairperson shall be filled by the vice chairperson.
- c. Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

130.4(2) Duties of officers.

- a. The chairperson shall:
 - (1) Preside at all meetings of the advisory council,
 - (2) Appoint such subcommittees as deemed necessary, and
 - (3) Designate the chairperson of each subcommittee.
- b. The vice chairperson shall:
 - (1) Perform the duties of the chairperson if the chairperson is absent or unable to act. When so acting, the vice chairperson shall have all the powers of and be subject to all the restrictions upon the chairperson.
 - (2) Perform such other duties as may be assigned by the chairperson.

[ARC 2565C, IAB 6/8/16, effective 7/13/16]

641—130.5(147A) Meetings.

130.5(1) The advisory council shall establish a meeting schedule on an annual basis to conduct business. There shall be a minimum of four meetings per year.

- a. Meetings may be scheduled as business requires, but notice to members must be given at least five working days prior to the meeting date.
- b. Notice given four weeks in advance is encouraged to accommodate the schedules of professional members.

130.5(2) Any advisory council member who is unable to attend a meeting will notify the chairperson.

130.5(3) A majority of appointed members constitutes a quorum.

130.5(4) When a quorum is present, a position is carried by affirmative vote of the majority of those present. No official business that requires a vote of the membership shall be conducted without a quorum present.

130.5(5) Persons wishing to make a presentation to the advisory council shall submit the request to the chairperson not less than 14 days prior to the meeting. Presentations may be made at the discretion of the chairperson.

130.5(6) Persons wishing to submit written materials should do so at least 14 days in advance of the scheduled meeting to ensure that advisory council members have adequate time to receive and evaluate the materials.

130.5(7) The advisory council may conduct a meeting by electronic means pursuant to Iowa Code section 21.8.

[ARC 2565C, IAB 6/8/16, effective 7/13/16]

641—130.6(147A) Subcommittees. The advisory council may designate one or more subcommittees to perform such duties as may be deemed necessary.

[ARC 2565C, IAB 6/8/16, effective 7/13/16]

641—130.7(147A) Expenses of advisory council members. Rescinded ARC 4703C, IAB 10/9/19, effective 11/13/19.

641—130.8(147A) Council composition. The council's composition shall be developed and maintained pursuant to Iowa Code chapter 69.

[ARC 2565C, IAB 6/8/16, effective 7/13/16]

These rules are intended to implement Iowa Code chapter 147A.

CHAPTER 131
EMERGENCY MEDICAL SERVICES—PROVIDERS—INITIAL CERTIFICATION—RENEWAL
AND REACTIVATION—AUTHORITY—COMPLAINTS AND INVESTIGATIONS

641—131.1(147A) Purpose. This chapter establishes the regulations and requirements for emergency medical provider initial certification for individuals who have been trained to provide emergency and nonemergency medical care at the EMR, EMT, AEMT, paramedic or other certification level recognized by the department before 2011; describes the authority, permission to practice and scope of practice for certified emergency medical care providers in the state of Iowa; and establishes the regulations and requirements for renewal, extension and reactivation of an emergency medical care provider certification in the state of Iowa.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—131.2(147A,147D,272C) Definitions. For the purpose of these rules, the following definitions shall apply:

“Advanced emergency medical technician” or *“AEMT”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Advanced Emergency Medical Technician Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the AEMT, and is currently certified by the department as an AEMT.

“Bureau” or *“BETS”* means the bureau of emergency and trauma services, the bureau designated by the department as the lead agency for coordinating and implementing the provision of emergency medical services in this state.

“CAPCE” means the Commission on Accreditation for Prehospital Continuing Education. CAPCE is an accrediting body charged with the review and accreditation of EMS continuing education.

“CEH” means continuing education hour, which is based upon a minimum of 50 minutes of training per hour.

“Certification” or *“certificate”* means a document issued by the department authorizing a person to practice as an emergency medical care provider in Iowa.

“Certification period” means the length of time an emergency medical care provider certificate is valid. The certification period shall be for two years from initial issuance or from renewal, unless otherwise specified on the certificate or unless sooner suspended or revoked.

“Certification status” means the status of an individual EMS certificate holder.

1. *“Active”* means the holder of the certification has the authority to function as an emergency medical care provider at the level certified in accordance with subrule 131.5(1).

2. *“Probation,”* which is an active certification, means the holder of the certification has the authority to function as an emergency medical care provider at the level certified in accordance with subrule 131.5(1) and under the conditions of probation.

3. *“Denied”* means the certificate is inactive and the holder of the certification has no authority to function as an emergency medical care provider.

4. *“Inactive”* means the certificate is inactive and the holder of the certification has no authority to function as an emergency medical care provider.

5. *“Revoked”* means the certification is inactive and the holder of the certification has no authority to function as an emergency medical care provider.

6. *“Surrendered”* means the certification is inactive and the holder of the certification has no authority to function as an emergency medical care provider.

7. *“Suspended”* means the certification is inactive and the holder of the certification has no authority to function as an emergency medical care provider.

“Certified” means being officially recognized as meeting department-approved testing and training standards and being issued a certificate by the department in accordance with Iowa Code chapters 272C and 147A to practice as an emergency medical care provider in the state of Iowa.

“Cognitive examination” or *“written examination”* means the portion of the NREMT certification examination process evaluating the candidate’s level of EMS knowledge.

“Compact” means the emergency medical services personnel licensure interstate compact according to Iowa Code chapter 147D. The compact facilitates the day-to-day movement of emergency medical services personnel across state boundaries in the performance of emergency medical services duties and authorizes the department to afford immediate permission to practice to emergency medical services personnel licensed in a member state.

“Complete criminal record” includes the complaint and judgment of conviction for each offense of which the applicant has been convicted, regardless of whether the offense is classified as a felony or a misdemeanor, and regardless of the jurisdiction in which the offense occurred.

“Conviction” means a finding, plea, or verdict of guilt made or returned in a criminal proceeding, even if the adjudication of guilt is deferred, withheld, or not entered. “Conviction” includes Alford pleas and pleas of nolo contendere.

“Core continuing education” means education obtained during a certification period to renew certification. Core continuing education shall have an assigned sponsor number from CAPCE, an authorized EMS training program, the board of nursing, the board of medicine or the department.

“Critical care paramedic” or *“CCP”* means a currently certified paramedic who has successfully completed a critical care course of instruction approved by the department and has received endorsement from the department as a critical care paramedic.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Disqualifying offense” means a conviction directly related to the duties and responsibilities of the profession. A conviction is directly related to the duties and responsibilities of the profession if either (1) the actions taken in furtherance of an offense are actions customarily performed within the scope of practice of a certified profession, or (2) the circumstances under which an offense was committed are circumstances customary to a certified profession.

“Emergency medical care” means any medical procedure authorized by Iowa Code chapter 147A and these rules.

“Emergency medical care provider” means an individual who has been trained to provide emergency and nonemergency medical care at the EMR, EMT, AEMT, paramedic, or other certification level recognized by the department before 2011 and has been issued a certificate by the department, or a person practicing in accordance with Iowa Code chapter 147D.

“Emergency medical care student” means an individual registered with the department and enrolled in an EMS training program with an active EMS student registration.

“Emergency medical responder” or *“EMR”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Emergency Medical Responder Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the EMR, and is currently certified by the department as an EMR.

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“Emergency medical technician” or *“EMT”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Emergency Medical Technician Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the EMT, and is currently certified by the department as an EMT.

“Emergency medical technician-defibrillation” or *“EMT-D”* means an individual who has successfully completed an approved program and is currently certified by the department as an EMT-D.

“EMS clinical guidelines” or *“minimum EMS clinical guidelines”* means a minimum clinical standard approved by the department upon which a service program’s medical director shall base service program protocols.

“EMS instructor” or *“EMS-I”* means an individual who has successfully completed an EMS instructor curriculum approved by the department and is currently endorsed by the department as an EMS-I.

“Endorsement” or *“endorsed”* means an approval granted by the department authorizing an individual to serve as an EMS-I or CCP.

"Fees" means those fees received pursuant to Iowa Code chapters 147A and 147D.

"First responder" or *"FR"* means an individual who has successfully completed an approved program and is currently certified by the department as an FR.

"First responder-defibrillation" or *"FR-G"* means an individual who has successfully completed an approved program and is currently certified by the department as a FR-G.

"NREMT" means the National Registry of Emergency Medical Technicians. The NREMT provides a valid, uniform process to assess the knowledge and skills required for competent practice by EMS professionals.

"Paramedic" or *"PM"* means an individual who has successfully completed a course of study based on the United States Department of Transportation's Paramedic Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the paramedic, and is currently certified by the department as a paramedic.

"Patient" means an individual who is sick, injured, or otherwise incapacitated and has been evaluated or provided treatment by an emergency medical care provider.

"Patient abandonment" means a termination of the provider/patient relationship at a time when a continuous level of care is needed. Patient abandonment does not occur when a scene is unsecured, deteriorates or becomes too dangerous for the emergency medical care provider to safely function. Patient abandonment does not occur when patient care is transferred to another emergency medical care provider following assessment or triage.

"Physician" means an individual licensed under Iowa Code chapter 148.

"Physician assistant" or *"PA"* means an individual licensed pursuant to Iowa Code chapter 148C.

"Protocols" means written directions and orders approved by a service program's medical director utilizing the EMS clinical guidelines.

"Psychomotor examination" or *"practical examination"* means the portion of the department-approved or NREMT certification examination process that evaluates the skill and procedure capabilities of the candidate.

"Registered nurse" or *"RN"* means an individual licensed pursuant to Iowa Code chapter 152.

"Service program" or *"service"* means any transport service or nontransport service, inclusive of associated satellites and service program affiliates, that has received full or conditional authorization from the department.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 5764C, IAB 7/14/21, effective 8/18/21]

641—131.3(147A,272C) Initial certification.

131.3(1) An individual who has successfully completed the training program requirements at the EMR, EMT, AEMT or paramedic level and has a valid certification with NREMT shall submit the following to the department for initial Iowa emergency medical care provider certification:

- a. A completed EMS certification application.
- b. An NREMT active certification number.
- c. Payment of the initial application fee.
- d. Two completed fingerprint cards for background checks.
- e. Payment of the background check fee.

131.3(2) Once the above items are received and approved, the department may issue an initial emergency medical care provider certification.

131.3(3) Initial Iowa certification dates shall be consistent with the NREMT certification dates.

131.3(4) The individual seeking an Iowa emergency medical provider care certification shall submit all application materials within two years from the Iowa training program course completion date.

131.3(5) If the individual is unable to complete the requirements within two years due to medical reasons or military obligation, an extension may be granted upon submission of a signed statement from an appropriate medical or military authority and approval by the department.

131.3(6) Fees may be waived in accordance with provisions in Iowa Code chapter 272C for individuals demonstrating the following:

- a. Income that does not exceed 200 percent of the federal poverty level;

b. Initial licensing fees and one renewal fee for an applicant who has been honorably or generally discharged from federal active duty or national guard duty, as those terms are defined in Iowa Code section 29A.1, who would otherwise be charged within five years of the discharge.

131.3(7) Use of criminal convictions in eligibility determinations and initial licensing decisions.

a. *License application.* Unless an applicant for licensure petitions the department for an eligibility determination pursuant to paragraph 131.3(7)“b,” the applicant’s convictions will be reviewed when the department receives a completed license application.

(1) An applicant must disclose all convictions on a license application. Failure to disclose all convictions is grounds for license denial or disciplinary action following license issuance.

(2) An applicant with one or more convictions shall submit the complete criminal record for each conviction and a personal statement regarding whether each conviction directly relates to the practice of the profession in order for the license application to be considered complete.

(3) An applicant must submit as a part of the license application all evidence of rehabilitation that the applicant wishes to be considered by the department.

(4) The board may deny a license if the applicant has a disqualifying offense unless the applicant demonstrates by clear and convincing evidence that the applicant is rehabilitated pursuant to Iowa Code section 272C.15.

(5) An applicant with one or more disqualifying offenses who has been found rehabilitated must still satisfy all other requirements for licensure.

(6) Any application fees paid will not be refunded if the license is denied.

b. *Eligibility determination.* An individual who has not yet submitted a completed license application may petition the department for a determination of whether one or more of the individual’s convictions are disqualifying offenses that would render the individual ineligible for licensure. An individual with a conviction is not required to petition the department for an eligibility determination prior to applying for licensure. To petition the department for an eligibility determination of whether one or more of the petitioner’s convictions are disqualifying offenses, a petitioner shall submit all of the following:

(1) A completed petition for eligibility determination form;

(2) The complete criminal record for each of the petitioner’s convictions;

(3) A personal statement regarding whether each conviction directly relates to the duties and responsibilities of the profession and why the department should find the petitioner rehabilitated;

(4) All evidence of rehabilitation that the petitioner wishes to be considered by the board; and

(5) Payment of a nonrefundable fee of \$25.

c. *Appeal.* A petitioner deemed ineligible or an applicant denied a license because of a disqualifying offense may appeal the decision in the manner and time frame set forth in the board’s written decision. A timely appeal will initiate a nondisciplinary contested case proceeding. The department’s rules governing contested case proceedings will apply unless otherwise specified in this rule. If the petitioner or applicant fails to timely appeal, the department’s written decision will become a final order.

(1) An administrative law judge will serve as the presiding officer of the nondisciplinary contested case proceeding, unless the department elects to serve as the presiding officer. When an administrative law judge serves as the presiding officer, the decision rendered shall be a proposed decision.

(2) The contested case hearing shall be closed to the public and the board’s review of a proposed decision shall occur in closed session.

(3) The office of the attorney general shall represent the department’s initial ineligibility determination or license denial and shall have the burden of proof to establish that the petitioner or applicant’s convictions include at least one disqualifying offense. Upon satisfaction of this burden by a preponderance of the evidence by the office of the attorney general, the burden of proof shall shift to the petitioner or applicant to establish rehabilitation by clear and convincing evidence.

(4) A petitioner or applicant must appeal an ineligibility determination or license denial in order to exhaust administrative remedies. A petitioner or applicant may only seek judicial review of an ineligibility determination or license denial after the issuance of a final order following a contested case proceeding. Judicial review of the final order following a contested case proceeding shall be in accordance with Iowa Code chapter 17A.

d. Future petitions or applications. If a final order determines a petitioner is ineligible, the petitioner may not submit a subsequent petition for eligibility determination or a license application prior to the date specified in the final order. If a final order denies a license application, the applicant may not submit a subsequent license application or a petition for eligibility determination prior to the date specified in the final order.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 5764C, IAB 7/14/21, effective 8/18/21; ARC 7032C, IAB 5/31/23, effective 7/5/23]

641—131.4(147A) Background check results.

131.4(1) Negative information on the criminal history will not necessarily preclude an individual from certification. The department will directly communicate with the individual to carefully consider the results of the background check. The following will be taken into consideration during the evaluation and analysis:

- a.* The nature and gravity of the conviction.
- b.* The length of time between the conviction and the application for certification.
- c.* Frequency and severity of the criminal activity and child or dependent adult abuse activity included in the background check results.
- d.* Mitigating factors at the time the activity occurred.
- e.* Cooperation with federal or state officials in the investigation and treatment/rehabilitation plan.
- f.* The maturity of the individual at the time of any criminal activity or child or dependent adult abuse activity.

131.4(2) The department will take reasonable steps to ensure the accuracy of the information contained in the background checks. An individual who believes the background checks contain inaccurate information will be informed of the steps the individual may wish to pursue to correct the information.

131.4(3) All criminal history records are confidential and will only be used in accordance with this policy to determine eligibility. All background check records will be stored in a secure location. Background check records shall not be disseminated by the department.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—131.5(147A) Authority.

131.5(1) *Authority of emergency medical care provider.* An emergency medical care provider who holds an active Iowa certification issued by the department or has permission to practice in Iowa pursuant to Iowa Code chapter 147D may:

a. As a member of a responding authorized service program, render emergency medical care and perform emergency medical care without contacting medical direction if written protocols have been approved by the service program medical director.

b. Function in any hospital or any other entity in which health care is ordinarily provided only when:

(1) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided when under the direct supervision of a physician as a member of an authorized service program, or in an individual capacity, by rendering lifesaving services in the facility in which employed or assigned pursuant to the emergency medical care provider's certification and under direct supervision of a physician, physician assistant, or registered nurse. An emergency medical care provider shall not routinely function without the direct supervision of a physician, physician assistant, or registered nurse. However, when the physician, physician assistant, or registered nurse cannot directly assume emergency care of the patient, the emergency medical care provider may perform, without direct supervision, emergency medical care procedures for which certified, if the life of the patient is in immediate danger and such care is required to preserve the patient's life;

(2) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided when under the direct supervision of a physician, as a member of an authorized service program, or in an individual capacity, to perform nonlifesaving procedures for which certified and designated in a written job description. Such procedures may be performed after the patient is observed by and when the emergency medical care provider is under the supervision of the physician, physician assistant, or registered nurse and where the procedure may be immediately abandoned without risk to the patient.

131.5(2) Scope of practice.

a. Emergency medical care providers shall perform only those skills and procedures that are authorized within the scope of practice for which certified.

b. The Iowa Emergency Medical Care Provider Scope of Practice (September 2019) is hereby incorporated and adopted by reference for emergency medical care providers. For any differences that may occur between the scope of practice adopted by reference and these rules, the rules shall prevail.

c. The Iowa Emergency Medical Care Provider Scope of Practice (September 2019) is available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

d. The department may grant a waiver for changes to the scope of practice that have not yet been adopted by reference in these rules pursuant to 641—Chapter 178.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—131.6(147A) Renewal standards, reactivation procedures, fees, and continuing education.**131.6(1) Renewal of certification.**

a. An emergency medical care provider shall submit an application for renewal of an active Iowa EMS certification within 90 days prior to the certification expiration date.

b. The renewal application and process are completed online via an individual Iowa EMS provider account. The electronic portal to access individual accounts is located at: dphregprograms.iowa.gov/PublicPortal/Iowa/IDPH/common/index.jsp.

c. Renewal notifications will be sent to Iowa emergency medical care providers who have an active certification set to expire in 90 days. The notification will be sent by email to the address on file in the emergency medical care provider's electronic profile.

d. It is the emergency medical care provider's responsibility to ensure the electronic profile information, including the email address, is updated and correct within 30 days of any change.

e. A renewal certificate shall be valid for two years from the current expiration date unless sooner surrendered, suspended or revoked.

f. A lower-level certificate may be renewed if the individual voluntarily chooses to move from a higher level to a lower level by completing all applicable continuing education requirements for the lower level during the certification period and submitting a change of status request, available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

g. A certification status shall become inactive if the certificate has not been renewed by the certification expiration date unless the emergency medical care provider is granted an extension as described in subrule 131.6(3).

h. An emergency medical care provider may request an inactive status. The request must be made by submitting a change of status request, available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information). A request for inactive status, when accepted in connection with a disciplinary investigation or proceeding, has the same effect as an order of revocation.

131.6(2) Late renewal of certification.

a. An emergency medical care provider who has completed the required continuing education during the certification period but fails to submit the EMS renewal of certification application and applicable fees prior to the certification expiration date is eligible for late renewal of the inactive certification.

b. The emergency medical care provider shall complete the EMS renewal of certification application, submit a late fee in addition to the applicable renewal fee and submit an audit report form provided by the department. The fee and audit report form shall be submitted before the last day of the month following the certification expiration date. If the late renewal submission is not completed by the last day of the month following the certification expiration date, the certification remains inactive.

c. An emergency medical care provider who has not completed the required continuing education during the certification period is not eligible for late renewal. The certification is inactive.

131.6(3) Extension of certification.

a. An emergency medical care provider who is unable to attain all continuing education requirements within the certification period may request a 45-day extension. To complete the extension process, the provider shall:

(1) Submit a request for extension application, available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information), at least 7 days prior to the certification expiration date, but no more than 90 days prior to the certification expiration date, and payment of the extension fee.

(2) Complete the continuing education requirements.

(3) Complete and submit the EMS affirmative renewal of certification application, with all applicable renewal fees, to the department prior to the extended expiration date.

(4) Submit an audit report form provided by the department.

b. If an emergency medical care provider fails to submit any of the items required in subparagraphs 131.6(3)“a”(2) and (3) by the forty-fifth day of the extended certification period, the certification will be inactive.

c. The emergency medical care provider may not use continuing education completed during the extension period in the subsequent renewal period.

131.6(4) *Reactivation of an inactive certification.*

a. *Certification inactive up to 24 months.* An emergency medical care provider may apply to reactivate an inactive certification up to 24 months after the certification became inactive.

(1) An individual will submit to the department an EMS certification reactivation application, which is available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

(2) If the department approves the application, the individual must submit an audit report form with 36 core continuing education hours prorated per lapsed year by core topic area and the reactivation fee.

(3) Upon receipt and approval of the items required in subparagraphs 131.6(4)“a”(1) and (2), the department may issue a new certification.

(4) An emergency medical care provider who fails to complete the reactivation process within 12 months from the date of application approval must reapply for reactivation of the inactive certification.

b. *Certification inactive from 25 months to 48 months.* An emergency medical care provider may apply to reactivate an inactive certification that has been inactive for 25 months but no more than 48 months.

(1) An individual will submit to the department an EMS certification reactivation application, which is available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

(2) If the department approves the application, the individual must submit documentation of successful completion of an approved EMS refresher course that includes successful completion of psychomotor and cognitive certification examinations. In addition, the individual must:

1. Submit two fingerprint cards.

2. Submit reactivation and background check fees.

3. Upon receipt and approval of the items required in subparagraphs 131.6(4)“b”(1) and (2), the department may issue a new certification.

4. An emergency medical care provider who fails to complete the reactivation process within 12 months from the date of application approval must reapply for reactivation of the inactive certification.

c. *Certification inactive for more than 48 months.* An emergency medical care provider may not apply to reactivate a certification that has been inactive for more than 48 months.

131.6(5) *Reactivation of revoked or suspended certification.*

a. Any person whose certification to practice has been revoked or suspended may apply to the department for reactivation in accordance with the terms and conditions of the order of revocation or suspension, unless the order of revocation provides that the certification is permanently revoked.

b. If the order of revocation or suspension did not establish terms and conditions upon which reactivation might occur or if the certification was voluntarily surrendered, an initial application for reactivation may not be made until one year has elapsed from the date of the order or the date of the voluntary surrender.

c. All proceedings for reactivation shall be initiated by the person whose certification has been revoked or suspended in accordance with subrule 131.6(4). An application for reactivation shall allege facts which, if established, will be sufficient to enable the department to determine that the basis for the revocation or suspension of the person's certification no longer exists and that it will be in the public

interest for the certification to be reinstated. The burden of proof to establish such facts shall be on the person whose certification has been suspended or revoked.

d. An order denying or granting reactivation shall be based upon a decision which incorporates findings of facts and conclusions of law.

131.6(6) Fees. The nonrefundable fees are as follows:

- a.* Application for initial Iowa certification at all certification levels: \$30.
- b.* Reactivation of a certification to practice: \$30.
- c.* Renewal of a certification to practice as a first responder, EMR: no fee.
- d.* Renewal of a certification to practice as an emergency medical technician: no fee.
- e.* Renewal of a certification to practice as an advance emergency medical technician: \$10.
- f.* Renewal of a certification to practice as a paramedic: \$25.
- g.* Late renewal of a certification to practice: \$30.
- h.* Returned payment due to insufficient funds: \$15.
- i.* Extension of certification: \$50.
- j.* Criminal history background checks by the Iowa division of criminal investigation (DCI) and the Federal Bureau of Investigation (FBI) and fingerprint card evaluation: \$50.

131.6(7) Continuing education renewal.

a. The table below illustrates the minimum number of core CEHs by topic area for each level of emergency medical care provider to renew an Iowa EMS certification.

Core Topics	EMR/FR	EMT/EMT-D	AEMT	PM
Airway, Respirations, Ventilations	1	1	2	3
Cardiology	2	6	7	9
Trauma	1	2	3	3
Medical	3	6	8	9
Operations	1	5	5	6
Totals	8	20	25	30

b. All core continuing education hours used to renew an Iowa EMS certification must have a sponsor number by an authorized Iowa training program, the department, the board of nursing, the board of medicine, or CAPCE before the emergency medical care provider attends the offering.

c. An emergency medical care provider who is registered with the NREMT may renew the provider's Iowa EMS certification by meeting the NREMT's requirements. The emergency medical care provider must submit the Iowa affirmative renewal of certification application and all appropriate fees.

d. An emergency medical care provider shall be deemed to have complied with the continuing education requirements during periods in which the provider serves honorably on active duty in the military services or for periods in which the provider is a government employee working as an emergency medical care provider and assigned to duty outside the United States. The emergency medical care provider must submit the Iowa affirmative renewal of certification application, all appropriate fees and documentation of assignment.

e. The emergency medical care provider shall maintain a file containing documentation of CEHs accrued during each certification period for four years from the end of each certification period.

f. A group of emergency medical care providers will be audited for each certification period. Emergency medical care providers to be audited will be chosen in a random manner or at the discretion of BETS. Falsifying reports or failure to comply with the audit request may result in formal disciplinary action. Those audited will be required to submit a department-provided audit report form within 45 days of the request. If audited, the emergency medical care provider must provide the following information:

- (1) Date of program.
- (2) Program sponsor number.
- (3) Title of program.
- (4) Number of approved hours.

131.6(8) Continuing education approval. The following standards shall be applied for approval of continuing education:

a. CEHs shall have an assigned sponsor number from CAPCE, an authorized EMS training program, the board of nursing, the board of medicine or the department.

b. Human health-related college courses may be approved in advance by BETS at one quarter credit equal to 10 CEHs, one semester credit equal to 15 CEHs.

131.6(9) Out-of-state continuing education. Out-of-state continuing education courses shall be accepted for CEHs if all criteria in subrule 131.6(7) are met and if the courses have been approved for emergency medical care personnel in the state in which the courses were held. A copy of course completion certificates (or other verifying documentation) shall, upon request, be submitted to the department.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20]

641—131.7(147A,272C) Discipline—denial, citation and warning, probation, suspension, or revocation of certificates or renewal.

131.7(1) This rule is not subject to waiver pursuant to 641—Chapter 178 or any other provision of law.

131.7(2) Prohibited grounds for discipline. The department shall not suspend or revoke the certification of a person who is in default or is delinquent on repayment or a service obligation under federal or state postsecondary educational loans or public or private services-conditional postsecondary tuition assistance solely on the basis of such default or delinquency.

131.7(3) Methods of discipline.

a. The department has the authority to impose the following disciplinary sanctions against an emergency medical care provider:

- (1) Issue a citation and warning.
- (2) Impose a civil penalty not to exceed \$1,000.
- (3) Require reexamination.
- (4) Require additional education or training.
- (5) Impose a period of probation under specific conditions.
- (6) Prohibit permanently, until further order of the department, or for a specific period, a provider's ability to engage in specific procedures, methods, acts or activities incident to the practice of the profession.
- (7) Suspend a certificate until further order of the department or for a specific period.
- (8) Deny an application for certification.
- (9) Revoke a certification.
- (10) Impose such other sanctions as allowed by law and as may be appropriate.

b. A request for inactive status in connection with a disciplinary investigation or proceeding has the same effect as an order of revocation.

c. A citation and warning, denial, probation, restriction, suspension revocation, or civil penalty imposed upon an individual certificate holder by the department shall be considered applicable to all certificates and endorsements issued to that individual by the department.

d. An emergency medical care provider who has knowledge of an emergency medical care provider, service program or training program that has violated Iowa Code chapter 147A or these rules shall report such information to the department within 30 days.

131.7(4) The department may deny an application for issuance or renewal of an emergency medical care provider certificate, including endorsement, or may impose any of the disciplinary sanctions provided in subrule 131.7(3) when it finds that the individual or certificate holder has committed any of the following acts or offenses:

- a. Negligence in performing emergency medical care.
- b. Failure to follow the directions of supervising physicians or their designees.
- c. Rendering treatment not authorized under Iowa Code chapter 147A.
- d. Patient abandonment.
- e. Fraud in procuring certification or renewal including, but not limited to:

(1) An intentional perversion of the truth in making application for a certification to practice in this state;

(2) False representations of a material fact, whether by word or by conduct, by false or misleading allegations, or by concealment of that which should have been disclosed when making application for a certification in this state; or

(3) Attempting to file or filing with the department or training program any false or forged diploma or certificate or affidavit or identification or qualification in making an application for a certification in this state.

f. Professional incompetency. Professional incompetency includes, but is not limited to:

(1) A substantial lack of knowledge or ability to discharge professional obligations within the scope of practice.

(2) A substantial deviation from the standards of learning or skill ordinarily possessed and applied by other emergency medical care providers in the state of Iowa acting in the same or similar circumstances.

(3) A failure to exercise the degree of care which is ordinarily exercised by the average emergency medical care provider acting in the same or similar circumstances.

(4) Failure to conform to the minimal standard of acceptable and prevailing practice of certified emergency medical care providers in this state.

(5) A substantial lack of knowledge or ability to discharge professional obligations within the minimum clinical standards approved by the department.

g. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established. Acts which may constitute unethical conduct include, but are not limited to:

(1) Verbally or physically abusing a patient, coworker or any other individual encountered while a certified emergency medical care provider.

(2) Improper sexual contact with or making suggestive, lewd, lascivious or improper remarks or advances to a patient, coworker or any other individual encountered while certified as an emergency medical care provider in the state of Iowa.

(3) Betrayal of a professional confidence.

(4) Engaging in a professional conflict of interest.

(5) Falsification of medical records, official documents or other writings or records.

h. Engaging in any conduct that subverts or attempts to subvert a department investigation.

i. Failure to comply with a subpoena issued by the department or failure to cooperate with an investigation of the department.

j. Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.

k. Failure to report another emergency medical care provider to the department for any violations listed in these rules, pursuant to Iowa Code chapter 147A.

l. Knowingly aiding, assisting or advising a person to unlawfully practice EMS.

m. Representing oneself as an emergency medical care provider when one's certification has been suspended or revoked or when one's certification is lapsed or has been placed on inactive status.

n. Permitting the use of a certification by a noncertified person for any purpose.

o. Mental or physical inability reasonably related to and adversely affecting the emergency medical care provider's ability to practice in a safe and competent manner as determined by an evaluation from a licensed evaluator of the provider's mental or physical status.

p. Being adjudged mentally incompetent by a court of competent jurisdiction.

q. Sexual harassment of a patient, student, coworker or any other individual encountered while certified as an emergency medical care provider in the state of Iowa. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature communicated in person, in writing, via a third person or through electronic communication.

r. Habitual intoxication or addiction to drugs.

- (1) The inability of an emergency medical care provider to practice with reasonable skill and safety by reason of the excessive use of alcohol on a continuing basis.
- (2) The excessive use of drugs which may impair an emergency medical care provider's ability to practice with reasonable skill or safety.
- (3) Obtaining, possessing, attempting to obtain or possess, or administering controlled substances without lawful authority.
 - s. Fraud in representation as to skill, ability or certification.
 - t. Willful or repeated violations of Iowa Code chapter 147A or these rules.
 - u. Conviction of a disqualifying offense. A copy of the guilty plea or order of conviction constitutes conclusive evidence of conviction.
 - v. Having certification to practice emergency medical care suspended or revoked or having other disciplinary action taken by a licensing or certifying authority of this state or another state, territory or country. A copy of the record or order of suspension, revocation or disciplinary action is conclusive or prima facie evidence.
 - w. Falsifying certification renewal reports or failure to comply with the renewal audit request.
 - x. Acceptance of any fee by fraud or misrepresentation.
 - y. Repeated failure to comply with standard precautions for preventing transmission of infectious diseases as issued by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services.
 - z. Violating privacy and confidentiality. An emergency medical care provider shall not disclose or be compelled to disclose patient information unless disclosure is required or authorized by law.
 - aa. Discrimination. An emergency medical care provider shall not practice, condone, or facilitate discrimination against a patient, student, or any other individual encountered while acting as certified as an emergency medical care provider in the state of Iowa on the basis of race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability, diagnosis, or social or economic status.
 - ab. Practicing emergency medical services or using a designation of certification or otherwise holding oneself out as practicing emergency medical services at a certain level of certification when the emergency medical care provider is not certified at such level.
 - ac. Failure to respond within 30 days of receipt, unless otherwise specified, to communication from the department which was sent by registered or certified mail.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 5528C, IAB 3/24/21, effective 4/28/21; ARC 5764C, IAB 7/14/21, effective 8/18/21]

641—131.8(147A) Certification denial.

131.8(1) An individual who has been denied certification by the department may appeal the denial and request a hearing on the issues related to the licensure denial by serving a notice of appeal and request for hearing upon the department not more than 20 days following the date of mailing of the notification of certification denial to the individual. The request for hearing shall specifically delineate the facts to be contested at hearing.

131.8(2) All hearings held pursuant to this rule shall be held pursuant to the process outlined in this chapter.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—131.9(147A) Emergency adjudicative proceedings. To the extent necessary to prevent or avoid immediate danger to the public health, safety or welfare and consistent with the Constitution and other provisions of law, the department may issue a written order in compliance with Iowa Code section 17A.18 to suspend a certificate in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the department by emergency adjudicative order.

131.9(1) Before issuing an emergency adjudicative order, the department shall consider factors including, but not limited to, the following:

- a. Whether there has been a sufficient factual investigation to ensure that the department is proceeding on the basis of reliable information;

- b.* Whether the specific circumstances which pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;
- c.* Whether the individual required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;
- d.* Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and
- e.* Whether the specific action contemplated by the department is necessary to avoid the immediate danger.

131.9(2) Issuance of order.

a. An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the department's decision to take immediate action. The order is a public record.

b. The written emergency adjudicative order shall be immediately delivered to the individual who is required to comply with the order. Delivery shall be made by one or more of the following procedures:

- (1) Personal delivery.
- (2) Certified mail, return receipt requested, to the last address on file with the department.
- (3) Fax. Fax may be used as the sole method of delivery if the individual required to comply with the order has filed a written request that agency orders be sent by fax and has provided a fax number for that purpose.

c. To the degree practicable, the department shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

d. Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order issues, the department shall make reasonable immediate efforts to contact by telephone the individual who is required to comply with the order.

e. After the issuance of an emergency adjudicative order, the department shall proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

f. Issuance of a written emergency adjudicative order shall include notification of the date on which department proceedings are scheduled for completion. After issuance of an emergency adjudicative order, continuance of further department proceedings to a later date will be granted only in compelling circumstances upon application in writing unless the individual who is required to comply with the order is the party requesting the continuance.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—131.10(147A) Complaints, investigations and appeals.

131.10(1) This rule is not subject to waiver pursuant to 641—Chapter 178 or any other provision of law.

131.10(2) All complaints regarding emergency medical care personnel, training programs or continuing education providers, or those purporting to be or operating as the same, shall be reported to the department in writing. The address is Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

131.10(3) An emergency medical care provider who has knowledge of an emergency medical care provider or service program that has violated Iowa Code chapter 147A, 641—Chapter 132 or these rules shall report such information to the department.

131.10(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

131.10(5) A determination of mental incompetence by a court of competent jurisdiction automatically suspends a certificate for the duration of the certificate unless the department orders otherwise.

131.10(6) Notice of denial, issuance of a citation and warning, probation, suspension or revocation shall be affected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, probation, suspension or revocation shall be served by certified mail, return receipt requested, or by personal service.

131.10(7) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

131.10(8) Upon receipt of a request for hearing, the department shall forward the request within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

131.10(9) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10.

131.10(10) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 131.10(11).

131.10(11) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

131.10(12) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

131.10(13) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

131.10(14) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

131.10(15) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

131.10(16) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

131.10(17) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, the news media or employer.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 5528C, IAB 3/24/21, effective 4/28/21]

These rules are intended to implement Iowa Code chapters 147A and 147D and section 272C.4.

CHAPTER 132
EMERGENCY MEDICAL SERVICES—SERVICE PROGRAM AUTHORIZATION

[Joint Rules pursuant to 147A.4]
[Prior to 7/29/87, Health Department[470] Ch 132]

641—132.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“Advanced emergency medical technician level service” or *“AEMT level service”* means a service program that provides emergency medical care that does not exceed the scope of practice of a certified AEMT provider as outlined in 641—subrule 131.5(2).

“Advanced registered nurse practitioner” or *“ARNP”* means a nurse licensed pursuant to 655—7.1(152) with current licensure as a registered nurse in Iowa who is registered in Iowa to practice in an advanced role.

“Ambulance” means any privately or publicly owned ground vehicle equipped with life-support systems and specifically designed to transport the sick or injured who require emergency medical care.

“Applicant” means an owner of a transport or nontransport program or service program that is applying to the department for authorization as a service program or renewal of current authorization as a service program.

“Biohazardous sharp” means any object that has the potential to puncture the skin and may be contaminated with a biological material that is an infectious disease transmission risk.

“Biomedical hazardous waste” means waste product such as a biohazardous sharp or other material that may be contaminated with a biological material that is an infectious disease transmission risk.

“Bureau” or *“BETS”* means the bureau of emergency and trauma services, the bureau designated by the department as the lead agency for coordinating and implementing the provision of emergency medical services in this state.

“Communication system” means but is not limited to a telecommunication system, radio communication system, or mobile data communication system.

“Conditional service level authorization” means an enhanced service program authorization under which a service program may provide an advanced level of service from that routinely provided under the service program’s full authorization level, on an intermittent basis with department and medical director approval.

“Continuous quality improvement” or *“CQI”* means a program that is an ongoing process to monitor standards at all EMS operational levels.

“Credentialing” means a clinical determination that is the responsibility of a physician medical director. It is the employer or affiliating organization’s responsibility to act on the clinical credentialing status of EMS personnel in making employment or deployment decisions.

“Critical care transport” or *“CCT”* means a paramedic level service program that has received an endorsement from the department to provide specialty care patient transportation and that is staffed by one or more paramedics with a critical care paramedic endorsement from the department or that is staffed by other health care professionals in an appropriate specialty area.

“Deficiency” means noncompliance with Iowa Code chapter 147A or these administrative rules.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Emergency medical care” means any medical procedure authorized by Iowa Code chapter 147A and 641—Chapter 131.

“Emergency medical care provider” means an individual who has been trained to provide emergency and nonemergency medical care at the EMR, EMT, AEMT, paramedic, or other certification level recognized by the department before 2011 and has been issued a certificate by the department, or a person practicing in accordance with Iowa Code chapter 147D.

“Emergency medical responder level service” or *“EMR level service”* means a nontransport service program that provides emergency medical care that does not exceed the scope of practice of a certified EMR provider as outlined in 641—subrule 131.5(2).

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or out-of-hospital during patient transportation in an ambulance.

“Emergency medical technician level service” or *“EMT level service”* means a service program that provides emergency medical care that does not exceed the scope of practice of a certified EMT provider as outlined in 641—subrule 131.5(2).

“Emergency medical transportation” means transportation of a patient by an ambulance.

“EMS clinical guidelines” or *“minimum EMS clinical guidelines”* means a minimum clinical standard approved by the department upon which a service program’s medical director shall base service program protocols.

“Emergency vehicle driver” or *“driver”* means a currently licensed driver rostered with the service program or other emergency response personnel with emergency vehicle driving training.

“Endorsement” means an approval granted by the department authorizing a paramedic level service program to provide critical care transport (CCT).

“First response vehicle” means any privately or publicly owned vehicle that is not an ambulance and that is used solely for the transportation of personnel and equipment to and from the scene of an emergency.

“Full authorization” means a service program authorization under which a service is authorized to provide and routinely provides a specific level of emergency medical care for initial 911 or emergency calls 24 hours per day, seven days per week.

“Hospital” means any hospital licensed under the provisions of Iowa Code chapter 135B.

“Iowa EMS Registry Data Dictionary” means reportable EMS data elements and definitions determined by the department and adopted by reference.

“Medical direction” means direction, advice, or orders provided by a medical director, supervising physician, PA, or ARNP to emergency medical care personnel.

“Medical director” means a physician designated by the service program and responsible for providing medical direction and overall supervision of the medical aspects of the service program.

“Nontransport service” means any privately or publicly owned service program which does not provide patient transportation and provides emergency medical care at the scene of an emergency.

“Paramedic level service” or *“PM level service”* means a service program that provides emergency medical care that does not exceed the scope of practice of a certified paramedic provider as outlined in 641—subrule 131.5(2).

“Patient care report” or *“PCR”* means a report that documents the assessment and management of the patient by the emergency care provider.

“Physician” means an individual licensed under Iowa Code chapter 148.

“Physician assistant” or *“PA”* means an individual licensed pursuant to Iowa Code chapter 148C.

“Primary response ambulance” means any ambulance utilized by a service program and dispatched as the initial ambulance response to a 911 or emergency call.

“Protocols” means written directions and orders approved by a service program’s medical director utilizing the EMS clinical guidelines.

“Registered nurse” or *“RN”* means an individual licensed pursuant to Iowa Code chapter 152.

“Service director” means an individual designated by the service program who is responsible for the operation and administration of a service program.

“Service program” or *“service”* means any transport service or nontransport service, inclusive of associated satellites, that has received full or conditional authorization from the department.

“Service program affiliate” or *“affiliate”* means an independently owned service program affiliated with one or more service programs or a separate management entity.

“Service program affiliate agreement” or *“affiliate agreement”* means a written agreement executed between one or more service programs or one or more management entities and filed with the department that clearly defines the responsibilities of each service program to ensure compliance with these rules.

“Service program base of operation” means the physical location from which a service program responds and at which the service program houses emergency medical care personnel and equipment.

“Service program ownership” means the legal owner of the service program responsible for providing emergency medical care and compliance with Iowa Code chapter 147A and these rules.

“Service program satellite” or *“satellite”* means one or more additional service program locations owned by the same service program.

“Tiered response” means a rendezvous between service programs to allow the transfer, continuation, or enhancement of patient care.

“Transport agreement” means a written agreement executed between two or more service programs and filed with the department that ensures response and transportation for initial 911 or emergency calls. A transport agreement may be a component of an affiliate agreement.

“Transport service” means any privately or publicly owned service program which utilizes ambulances in order to provide patient transportation.

[ARC 5144C, IAB 8/12/20, effective 9/16/20]

641—132.2(147A) Service program—authorization and renewal procedures and inspections.

132.2(1) *Requirements for initial service program authorization.*

a. An entity that desires to provide emergency medical care services in the out-of-hospital setting in this state shall apply to the department for service program full authorization and may apply for a conditional service level authorization if the entity can demonstrate advanced emergency medical care provider availability and medical director approval for conditional authorization at such level.

b. Information for initial authorization can be found on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

c. Transport service—full authorization. An entity seeking authorization as a transport service program shall apply for full authorization at a minimum of the EMT level or the level of care which will be provided by the service program or through a transport agreement for initial 911 or emergency calls 24 hours per day, seven days per week at the following EMS service levels:

- (1) EMT.
- (2) AEMT.
- (3) Paramedic.

d. Transport service—conditional service level authorization. An entity seeking authorization as a transport service which is capable of providing emergency medical care beyond the full authorization level on an intermittent basis may apply for conditional service level authorization at one or more of the following conditional service levels:

- (1) AEMT.
- (2) Paramedic.

e. Nontransport service—full authorization. An entity seeking authorization as a nontransport service program shall apply for full authorization at a minimum of the EMR level or at the level of care which will be provided for initial 911 or emergency calls 24 hours per day, seven days per week. The nontransport service program shall have an executed written transport agreement ensuring simultaneous dispatch with an authorized transport service program for all 911 or emergency calls. The nontransport service shall apply for full authorization at the following EMS service levels:

- (1) EMR.
- (2) EMT.
- (3) AEMT.
- (4) Paramedic.

f. Nontransport service—conditional service level authorization. An entity seeking authorization as a nontransport service program that has an executed written transport agreement ensuring simultaneous dispatch with an authorized transport service program for all 911 or emergency calls and is capable of providing emergency medical care beyond the full authorization level on an intermittent basis may apply for conditional service level authorization at one or more of the following conditional service levels:

- (1) EMT.
- (2) AEMT.
- (3) Paramedic.

g. Conditional service level authorization restrictions and requirements.

(1) A service program which has been granted conditional service level authorization shall only advertise or otherwise hold itself out to the public as an authorized service program at the level of full authorization.

(2) A service program authorized to operate at a conditional service level shall operate at such level only when an emergency medical care provider certified at the advanced certification level is listed on the service roster, physically present and directly responsible for patient care.

h. An applicant should expect a minimum of a 30-day time period for review of the application, completion of an inspection, and response by the department regarding authorization status.

i. Deficiencies that are identified during the application review and inspection process by the department shall be corrected prior to service program authorization.

j. An applicant may be authorized as a service program when the department is satisfied that the program proposed by the applicant and associated satellites or affiliates will be operated in compliance with Iowa Code chapter 147A and these rules.

k. An applicant for authorization as a service program shall be fully operational upon the effective date specified on the certificate of authorization and shall ensure compliance with Iowa Code chapter 147A and these rules.

l. Initial service program authorization shall be valid for a period of one year from its effective date unless otherwise specified on the certificate of authorization or unless sooner suspended or revoked or surrendered.

m. An applicant shall provide evidence of liability insurance coverage for the service program and emergency medical care provider staff. Any change in insurance status must be reported to the department no later than 30 days from the change.

n. An applicant seeking endorsement as a CCT must provide verification that the service program will be staffed by one or more paramedics with a critical care paramedic endorsement from the department or by other health care professionals when providing specialty care and transport.

132.2(2) *Requirements for renewal of service program authorization.*

a. A service program seeking renewal of current authorization shall complete a process initiated by the department for renewal of the service program that includes the service program base of operations and all associated satellites and affiliates.

b. A service program seeking renewal of current authorization shall submit all required documentation to the department at least 90 days prior to the current authorization expiration date.

c. Transport service—full authorization. An entity seeking renewal authorization as a transport service program shall apply for full authorization at a minimum of the EMT level or the level of care which will be provided by the service program or through a transport agreement for initial 911 or emergency calls 24 hours per day, seven days per week at the following EMS service levels:

- (1) EMT.
- (2) AEMT.
- (3) Paramedic.

d. Transport service—conditional service level authorization. An entity seeking renewal authorization as a transport service which is capable of providing emergency medical care beyond the full authorization level on an intermittent basis may apply for conditional service level authorization at one or more of the following conditional service levels:

- (1) AEMT.
- (2) Paramedic.

e. Nontransport service—full authorization. An entity seeking renewal authorization as a nontransport service program shall apply for full authorization at a minimum of the EMR level or at the level of care which will be provided for initial 911 or emergency calls 24 hours per day, seven days per week at the following EMS service levels:

- (1) EMR.
- (2) EMT.
- (3) AEMT.
- (4) Paramedic.

f. Nontransport service—conditional service level authorization. An entity seeking renewal authorization as a nontransport service program which is capable of providing emergency medical care beyond the full authorization level on an intermittent basis may apply for conditional service level authorization at one or more of the following conditional service levels:

- (1) EMT.
- (2) AEMT.
- (3) Paramedic.

g. Conditional service level authorization restrictions and requirements.

(1) A service program which has been granted conditional service level authorization shall only advertise or otherwise hold itself out to the public as an authorized service program at the level of full authorization.

(2) A service program authorized to operate at a conditional service level shall operate at such level only when an emergency medical care provider certified at the advanced certification level is listed on the service roster, physically present and directly responsible for patient care.

h. Effective January 1, 2022, a service program which has submitted to the department fewer than 100 data reports per year for each of the previous two consecutive calendar years shall only be eligible for renewal of current authorization as an affiliate. The department will provide technical assistance in developing affiliations.

i. The department shall review the application and complete an inspection of the service program base of operations and all associated satellites and affiliates prior to renewal of current authorization.

j. A service program shall receive a renewal of authorization only when the department is satisfied that the service program and all associated satellites and affiliates will be operated in compliance with Iowa Code chapter 147A and these rules.

k. A service program shall be fully operational upon the effective date specified on the certificate of authorization and shall ensure compliance with Iowa Code chapter 147A and these rules.

l. A service program renewal authorization shall be valid for a period not to exceed three years from its effective date unless otherwise specified on the certificate of authorization or unless sooner revoked or suspended or surrendered.

m. A certificate of authorization shall be issued to the service program owner listed on the application.

n. A service program shall provide evidence of liability insurance coverage for the service program and emergency medical care provider staff. Any change in insurance status must be reported to the department no later than 30 days after the change.

o. An applicant seeking endorsement as a CCT must provide verification that the service program will be staffed by one or more paramedics with critical care paramedic endorsement by the department or other health care professionals when providing specialty care and transport.

132.2(3) *Reinstatement of service program authorization.*

a. A service program whose full authorization or conditional service level authorization has been revoked or suspended or surrendered may apply to the department for reinstatement in accordance with the terms and conditions of the order of revocation or suspension, unless the order of revocation provides that the authorization is permanently revoked.

b. If the order of revocation or suspension did not establish terms and conditions upon which reinstatement might occur or if the authorization was voluntarily surrendered, an initial application for reinstatement may not be made until one year has elapsed from the date of the order or the date of the voluntary surrender.

c. All proceedings for reinstatement shall be initiated by the service program, which shall file with the department an application for reinstatement of the authorization. Such application shall be docketed in the original case in which the authorization was revoked, suspended, or relinquished. All proceedings upon the application for reinstatement shall be subject to the same rules of procedure as other cases before the department.

d. An application for reinstatement shall be made in accordance with 132.2(1) and shall contain facts that will be sufficient to enable the department to determine that the basis for the revocation or suspension

of the service program's authorization no longer exists and that it will be in the public interest for the authorization to be reinstated. The burden of proof to establish such facts shall be on the service program.

e. An order denying or granting reinstatement shall be based upon a decision which incorporates findings of facts and conclusions of law. The order shall be published as provided for in this chapter.

132.2(4) Out-of-state service programs.

a. An emergency medical service program authorized and based in another state shall provide the department with verification of current state authorization upon request and may provide emergency medical care to patients in Iowa to:

- (1) Transport from locations outside of Iowa to destinations within Iowa;
- (2) Transport to or from locations outside of Iowa that require travel through Iowa;
- (3) Transport from locations in Iowa to destinations outside of Iowa;
- (4) Respond to a request for mutual aid.

b. A service program authorized and based in another state shall meet all requirements of Iowa Code chapter 147A and these rules and must be authorized by the department to respond to 911 requests in Iowa to transport patients in Iowa to locations within Iowa.

132.2(5) Service program inspections.

a. The department at a minimum shall complete an inspection of each base of operations, all associated satellites, and all affiliate locations prior to initial authorization or renewal of current full authorization or conditional service level to ensure compliance with Iowa Code chapter 147A and these rules.

b. The department without prior notification may make additional inspections at times, at places and under such circumstances as it deems necessary to ensure compliance with Iowa Code chapter 147A and these rules.

c. Service program inspection forms are available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

d. Following a service program inspection, the department shall provide a copy of the completed inspection form and report to the service program.

e. A service program shall correct deficiencies identified during a service program inspection within the time period specified by the department on the inspection form. Failure to correct identified deficiencies within the specified time period may result in disciplinary action.

f. The department may request additional information from or may inspect the records of any service program or associated satellite or associated affiliate which is currently authorized or which is seeking authorization to ensure continued compliance or to verify the validity of any information presented on the application for initial service program authorization or renewal of current authorization.

g. The department may inspect the patient care records of a service program to verify compliance with Iowa Code chapter 147A and these rules.

h. No person shall interfere with the inspection activities of the department or its agents pursuant to Iowa Code section 135.36.

i. Interference with or failure to allow an inspection by the department or its agents may be cause for disciplinary action.

[ARC 5144C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20]

641—132.3(147A) Service program operations.

132.3(1) Ownership.

a. Each service program will have a unique authorization number assigned by the department.

b. A service program with satellites will have a single authorization number assigned by the department for all locations.

c. A service program owner shall ensure compliance with Iowa Code chapter 147A and these rules.

d. A service program shall report any change in ownership to the department at least seven days prior to the change.

e. A service program changing ownership shall apply to the department at least seven days prior to the change in ownership for initial authorization in accordance with 132.2(1).

132.3(2) Medical director.

- a. Each service program shall have a designated medical director at all times.
 - b. A medical director shall:
 - (1) Be accessible for medical direction 24 hours per day, seven days per week or ensure accessibility to alternate medical direction.
 - (2) Ensure that all duties and responsibilities of the medical director are not relinquished before a new or temporary replacement is functioning in that capacity.
 - (3) Complete a department-sponsored medical director training within one year of assuming duties as a medical director and at a minimum once every three years thereafter.
 - (4) Develop, approve, and update service program protocols that meet or exceed the minimum EMS clinical guidelines approved by the department.
 - (5) Ensure that the emergency medical care providers rostered with the service program are credentialed in the emergency medical skills to be provided and the duties of the emergency medical care provider do not exceed the provider's scope of practice as referenced in 641—subrule 131.5(2) and the service program's EMS service level of authorization.
 - (6) Be available for individual evaluation and consultation with service program personnel.
 - (7) Have authority to restrict a service program's authorized functional EMS service level.
 - (8) Have the authority to permanently or temporarily restrict a service program member to function within a lower level scope of practice or prohibit a service program member from providing patient care.
 - (9) Approve the service program's CQI program.
 - (10) Perform or complete, or appoint a designee to perform or complete, the medical audits in the service program's established CQI policy.
 - (11) Randomly audit (on at least a quarterly basis) documentation of calls where emergency medical care was provided.
 - (12) Randomly review audits performed by the qualified appointee.
 - c. A medical director may:
 - (1) Make additions to the department-approved EMS clinical guidelines when developing service protocols provided the additions are within the service program's level of authorization, the EMS provider's scope of practice, and acceptable medical practice.
 - (2) Request that service program providers provide additional emergency medical care skills on a limited pilot project basis. The pilot project applications are available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information). The department will issue written notice of an approved or rejected pilot project.
 - (3) Approve the PA and RN exception form identifying the level of EMS provider equivalency not to exceed the service program's EMS service level authorization for each PA and RN who will be providing emergency medical care as part of the service program.
 - d. A medical director who receives no compensation for the performance of the director's volunteer duties under this chapter shall be considered a state volunteer as provided in Iowa Code section 669.24 while performing volunteer duties as an emergency medical services medical director. Compensation does not include payments for reimbursement of expenses.
 - e. A medical director, supervising physician, PA, or ARNP who gives orders to an emergency medical care provider is not subject to criminal liability by reason of having issued the orders and is not liable for civil damages for acts or omissions relating to the issuance of the orders unless the acts or omissions constitute recklessness.
 - f. Nothing in these rules requires or obligates a medical director, supervising physician, PA, or ARNP to approve requests for orders received from an emergency medical care provider.
 - g. A service program medical director who fails to comply with Iowa Code chapter 147A or these rules may be referred to the Iowa board of medicine.

132.3(3) Service director.

- a. Each service program shall have a designated service director at all times.
 - b. A service director shall:
 - (1) Be accessible 24 hours per day, seven days per week or ensure accessibility to a service director designee.

(2) Be responsible for providing direction and overall supervision of the administrative and operational aspects of the service program.

(3) Ensure that all duties and responsibilities of the service director are not relinquished before a new or temporary replacement is functioning in that capacity.

(4) Complete a department-sponsored training within one year of assuming duties as a service director and at a minimum once every three years thereafter.

(5) Ensure the service program is in compliance with service program policy, Iowa Code chapter 147A and these rules.

(6) Ensure that duties of the service program's emergency medical care providers do not exceed the providers' scope of practice as referenced in 641—subrule 131.5(2) or the service program's EMS service level of authorization.

132.3(4) *Service program requirements.*

a. A service program shall:

(1) Not advertise or otherwise imply or hold itself out to the public as a service program unless currently authorized by the department.

(2) Only advertise at or otherwise hold itself out as having the level of full authorization.

(3) Select a new or temporary medical director if the current medical director cannot or no longer wishes to serve in that capacity. Selection shall be made before the current medical director relinquishes the duties and responsibilities of that position.

(4) Notify the department in writing within seven days prior to any change in medical director or any reduction or discontinuance of operations.

(5) Select a new or temporary service director if the current service director cannot or no longer wishes to serve in that capacity. Selection shall be made before the current service director relinquishes the duties and responsibilities of that position.

(6) Notify the department in writing within seven days prior to any change in service director or any reduction or discontinuance of operations.

(7) Notify the department within seven days prior to any change in location of a service program base of operations, administrative office, satellite, or affiliate.

(8) Notify the department within seven days when entering into agreements with one or more service programs or a management entity to form multiservice systems for shared service program management, administration, data submission, or other services to ensure compliance with these rules.

(9) Report the termination or resignation in lieu of termination of an emergency medical care provider due to negligence, professional incompetency, unethical conduct, substance use, or violation of any of these rules to the department in writing within ten days.

(10) Report theft of drugs to the department in writing within 48 hours following the occurrence of the incident.

(11) Develop a notification process for service members in the event of a motor vehicle collision involving a first response vehicle, ambulance, rescue vehicle or personal vehicle when used by a service program member responding as a member of the service program.

(12) Notify the department in writing within 48 hours of a motor vehicle collision resulting in personal injury or death.

(13) Ensure a response to an initial 911 or emergency call request to the service program, 24 hours per day, seven days per week.

(14) Utilize protocols developed and approved by the service program medical director that meet or exceed the minimum EMS clinical guidelines approved by the department.

(15) Ensure alterations to the minimum EMS clinical guidelines by the service program's medical director are approved by and filed with the department.

(16) Maintain a communication system at a minimum between medical direction, receiving facility, and other emergency responders.

(17) Maintain a current personnel roster utilizing a department-approved registry system. Ensure all rostered personnel are currently certified as active EMS providers in the state of Iowa.

(18) Maintain files with medical director and department-approved PA and RN exception forms for appropriate personnel. PA and RN forms are available on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

(19) Ensure all service program members who operate motorized emergency response vehicles, ambulances, and rescue vehicles when used by a service member responding as a member of the service have a valid driver's license and attend driver training prior to driving an emergency vehicle.

(20) Develop, maintain and follow a written driver training policy that includes a review of Iowa laws regarding emergency vehicle operations (Iowa Code section 321.231), frequency of service required driver training, a review of service program policies and criteria for response with lights or sirens or both, speed limits, procedure for approaching intersections, and use of the service program communications equipment.

(21) Ensure the emergency medical care provider with the highest level of certification attends the patient unless otherwise indicated by patient assessment and approved by the service program's protocols.

b. A transport service program shall:

(1) Provide as a minimum, on initial 911 or emergency calls, the following staff on each primary response ambulance:

1. One currently certified emergency medical care provider certified at the service program full level of authorization.

2. One driver.

(2) Provide as a minimum on each subsequent call or nonemergency call, when responding, the following staff:

1. One currently certified EMT.

2. One driver.

(3) Establish a transport decision policy that requires a complete assessment of a patient in order to determine transport needs. The service transport decision policy shall include:

1. The Out-of-Hospital Trauma and Triage Destination Decision Protocol as described in 641—Chapter 135.

2. Time critical condition considerations for transport to facilities that specialize in conditions such as cardiac conditions or stroke.

3. A process for a service program provider to determine transportation to a hospital, medical clinic, extended care facility, or other facilities where health care is routinely provided.

4. A process for patient refusal or nontransport if emergency transport is not warranted. The service program provider will obtain a signed transport/treatment refusal document or liability release if transport is not required.

5. A process by which a service program provider may make arrangements for alternate transport if emergency transport is not needed and remain with the patient until alternate transport arrives unless the provider is called to respond to another emergency.

c. Nontransport service programs.

(1) Nontransporting service programs, when responding to 911 or emergency calls, shall provide as a minimum one currently certified emergency medical care provider certified at the service program full level of authorization.

(2) Nontransport service programs shall have an executed written transport agreement ensuring simultaneous dispatch with an authorized transport service program for all 911 or emergency calls.

(3) Nontransport service programs may transport patients in an ambulance only in an emergency situation when lack of transporting resources would cause an unnecessary delay in patient care.

132.3(5) Data reporting.

a. "The Iowa Emergency Medical Services Data Dictionary" (September 2019) is incorporated by reference for data to be reported to the EMS data registry. For any differences which may occur between the adopted reference and the rules in this chapter, the rules shall prevail.

b. "The Iowa Emergency Medical Services Data Dictionary" is available through the Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

- c. A service program shall report data electronically to the department.
 - d. A service program shall submit data in a format approved by the department.
 - e. A service program shall submit reportable data to the department no later than the last day of the month following the month services were provided.
 - f. The department shall prepare compilations for release or dissemination on reportable data entered into the EMS data registry during the reporting period. The compilations shall include, but not be limited to, trends and clinical outcomes for local, regional and statewide evaluations. The compilations shall be made available to all providers submitting reportable patient data to the registry.
 - g. The data collected by the EMS data registry and furnished to the department pursuant to this rule are confidential records of the condition, diagnosis, care, or treatment of patients or former patients including outpatients, pursuant to Iowa Code section 22.7. The compilations prepared for release or dissemination from the data collected are not confidential under Iowa Code section 22.7(2). However, information which individually identifies patients shall not be disclosed, and state and federal law regarding patient confidentiality shall apply.
 - h. The department may approve requests for reportable patient data for special studies and analysis provided:
 - (1) The request has been reviewed and approved by the department with respect to the scientific merit and confidentiality safeguards.
 - (2) The department has given administrative approval for the proposal.
 - (3) The confidentiality of patients and service programs is protected pursuant to Iowa Code section 22.7 and chapter 147A.
 - (4) The department may require those requesting the data to pay any or all of the reasonable costs associated with furnishing the reportable data.
 - i. For the purpose of ensuring the completeness and quality of reportable data, the department or authorized representative may examine all or part of the data record as necessary to verify or clarify all reportable data submitted by a service program.
 - j. To the extent possible, activities under this subrule shall be coordinated with other health data collection methods.
 - k. A service program will develop, maintain and follow a written data submission policy.
- 132.3(6) Patient care reporting.**
- a. Each service program, satellite, and affiliate shall complete and maintain a patient care report documenting the care provided to each patient.
 - b. The patient care report is a confidential document and shall be exempt from disclosure pursuant to Iowa Code section 22.7(2) and shall not be accessible to the general public. Information contained in these reports, however, may be utilized by any of the indicated distribution recipients and may appear in any document or public health record in a manner which prevents the identification of any patient or person named in these reports.
 - c. To facilitate the continuum of care, transport service programs shall provide at a minimum, upon delivery of a patient to a receiving facility, a verbal patient care report that contains details of the assessment and care provided.
 - d. Transport service programs shall provide a final patient care report within 24 hours to the receiving facility. Transport services and receiving facilities must work together to initiate reasonable and realistic mechanisms (including but not limited to paper, secure email, secure links, secure electronic system retrieval, and access to printers at the receiving facility) to ensure the delivery of the patient care report.
 - e. A service program will develop, maintain, and follow a written patient care report policy.
- 132.3(7) Continuous quality improvement (CQI).**
- a. A service program shall develop, maintain, and follow a CQI program that follows a written CQI policy.
 - b. The CQI program shall include medical audits that review patient care provided.
 - c. The CQI program shall be utilized to identify deficiencies or potential deficiencies regarding medical knowledge or skill or procedure performance.

- d. The CQI program shall review at a minimum 911 response and scene times.
 - e. The CQI program shall develop a written plan that monitors, identifies and documents at a minimum continuing education, credentialing of skills and procedures, and personnel performance for the service program's emergency medical care providers, drivers, PA and RN exceptions.
 - f. The CQI program shall establish measurable outcomes that reflect the goals and standards of the service program.
 - g. The CQI program shall ensure completion of loop closure/resolution of identified areas of concern.
- 132.3(8) Medications in service programs.**
- a. A service program shall have written pharmacy agreements in accordance with the Iowa board of pharmacy's 657—Chapter 11.
 - b. A service program shall maintain all medications in accordance with the rules of the Iowa board of pharmacy's 657—Chapters 10 and 11.
 - c. A service program shall develop, maintain, and follow a written pharmacy policy.
- 132.3(9) Vehicle standards, supplies, equipment and maintenance.**
- a. Effective January 1, 2022, all service programs, regardless of their designation as governmentally owned, not-for-profit, or privately operated, shall annually systematically inspect, repair, and maintain, or cause to be systematically inspected, repaired, and maintained, all ambulances operated by the service program.
 - b. A service program shall utilize a vehicle inspection report approved by the department to record the results of an annual ambulance safety inspection. Annual safety inspection forms which comply with the requirements of 49 CFR 396 shall be approved by the department. A sample annual vehicle inspection form which complies with the reporting requirements of 49 CFR 396 can be found on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).
 - c. A service program shall ensure individuals performing annual safety inspections are qualified and capable of performing an inspection by reason of experience, training, or both.
 - d. A service program shall not use an ambulance that fails to meet or maintain the requirements of this subrule to transport patients.
 - e. A service program shall house primary response ambulances in a garage or other enclosed facility that is maintained in a clean, safe condition, free of debris or other hazards; is temperature controlled; and has an unobstructed exit to the street.
 - f. A service program shall secure all equipment stored in the ambulance patient compartment so the patient and service program personnel are not injured by moving equipment.
 - g. Effective January 1, 2022, new ambulances manufactured and placed into service shall meet at a minimum either the Commission on Accreditation of Ambulance Services (CAAS) Ground Vehicle Standard for Ambulances or the National Fire Protection Association (NFPA) Standard for Automotive Ambulances (NFPA 1917).
 - h. A service program shall maintain first response and rescue vehicles in safe operating condition and provide regular maintenance. Vehicles shall have the exterior clean and the interior clean and disinfected.
 - i. A service program shall ensure medical and patient care supplies are monitored for expiration dates, cleaned, laundered or disinfected. All medical supplies shall be stored in clean environments.
 - j. A service program shall ensure personal protection equipment and supplies are available to ensure emergency medical care responder safety during every response.
 - k. A service program shall ensure supplies to properly dispose of biomedical hazardous waste are available in all response vehicles, and all waste shall be disposed of according to accepted biomedical waste practices.
 - l. A service program shall ensure medical equipment is maintained per manufacturer requirements for safe emergency medical care provider and patient use.
 - m. A service program shall develop, maintain, and follow vehicle standards, supplies, and equipment maintenance policies.

[ARC 5144C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20]

641—132.4(147A) Waivers. If during a period of authorization, a service program is unable to maintain compliance with Iowa Code chapter 147A and these rules, the department may grant a waiver.

132.4(1) Waivers of these rules may be granted by the department to a currently authorized service program.

132.4(2) Requests for waivers shall apply only to the service program requesting the waiver and shall apply only to those requirements and standards for which the department is responsible.

132.4(3) A service program shall apply for a waiver in accordance with 641—Chapter 178.
[ARC 5144C, IAB 8/12/20, effective 9/16/20; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—132.5(147A) Complaints and investigations—denial, citation and warning, probation, suspension or revocation of service program authorization or renewal.

132.5(1) All complaints regarding the operation of authorized emergency medical care service programs, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

132.5(2) Complaints and the investigative process will be treated as confidential in accordance with Iowa Code section 22.7 and chapter 272C. An emergency medical care provider who has knowledge of an emergency medical care provider, service program or training program that has violated Iowa Code chapter 147A or these rules shall report such information to the department within 30 days following knowledge of the violation.

132.5(3) Service program authorization may be denied, issued a civil penalty not to exceed \$1,000, issued a citation and warning, placed on probation, suspended, revoked, or otherwise disciplined by the department in accordance with Iowa Code section 147A.5(3) for any of the following reasons:

- a. Knowingly allowing the falsifying of a patient care report (PCR).
- b. Failure to submit required reports and documents.
- c. Delegating professional responsibility to a person when the service program knows that the person is not qualified by training, education, experience or certification to perform the required duties.
- d. Practicing, condoning, or facilitating discrimination against a patient, student or employee based on race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability diagnosis, or social or economic status.
- e. Knowingly allowing sexual harassment of a patient, student or employee. Sexual harassment includes sexual advances, sexual solicitations, requests for sexual favors, and other verbal or physical conduct of a sexual nature.
- f. Failure or repeated failure of the applicant or alleged violator to meet the requirements or standards established pursuant to Iowa Code chapter 147A or the rules adopted pursuant to that chapter.
- g. Obtaining or attempting to obtain or renew or retain service program authorization by fraudulent means or misrepresentation or by submitting false information.
- h. Engaging in conduct detrimental to the well-being or safety of the patients receiving or who may be receiving emergency medical care.
- i. Failure to correct a deficiency within the time frame required by the department.
- j. Engaging in any conduct that subverts or attempts to subvert a department investigation.
- k. Failure to comply with a subpoena issued by the department or failure to cooperate with an investigation of the department.
- l. Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- m. Knowingly aiding, assisting or advising a person to unlawfully practice EMS.
- n. Acceptance of any fee by fraud or misrepresentation.
- o. Repeated failure to comply with standard precautions for preventing transmission of infectious diseases as issued by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services.
- p. Violating privacy and confidentiality. A service program shall not disclose or be compelled to disclose patient information unless disclosure is required or authorized by law.
- q. Practicing emergency medical services or using a designation of certification or otherwise holding itself out as practicing emergency medical services at a certain level of authorization when the service program is not authorized at such level.

r. Failure to respond within 30 days of receipt, unless otherwise specified, of communication from the department which was sent by registered or certified mail.

132.5(4) The department shall notify the applicant of the granting or denial of authorization or renewal, or shall notify the alleged violator of action to issue a citation and warning, place on probation or suspend or revoke authorization or renewal pursuant to Iowa Code sections 17A.12 and 17A.18. Notice of issuance of a denial, citation and warning, probation, suspension or revocation shall be served by restricted certified mail, return receipt requested, or by personal service.

132.5(5) Any requests for appeal concerning the denial, citation and warning, probation, suspension or revocation of service program authorization or renewal shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice. The address is: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If such a request is made within the 20-day time period, the notice shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. After the hearing, or upon default of the applicant or alleged violator, the administrative law judge shall affirm, modify or set aside the denial, citation and warning, probation, suspension or revocation. If no request for appeal is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

132.5(6) Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

132.5(7) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10.

132.5(8) When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in 132.5(9).

132.5(9) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

132.5(10) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a.* All pleadings, motions, and rules.
- b.* All evidence received or considered and all other submissions by recording or transcript.
- c.* A statement of all matters officially noticed.
- d.* All questions and offers of proof, objections, and rulings thereon.
- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the administrative law judge.

132.5(11) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

132.5(12) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

132.5(13) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to

the department by certified mail, return receipt requested, or by personal service. The address is: Bureau of Emergency and Trauma Services, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

132.5(14) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

132.5(15) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, the news media or employer.

132.5(16) This rule is not subject to waiver pursuant to 641—Chapter 178 or any other provision of law.

132.5(17) Emergency adjudicative proceedings.

a. Necessary emergency action. To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare, and consistent with the Constitution and other provisions of law, the department may issue a written order in compliance with Iowa Code section 17A.18 to suspend an authorization in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the department by emergency adjudicative order.

b. Before issuing an emergency adjudicative order, the department shall consider factors including, but not limited to, the following:

(1) Whether there has been a sufficient factual investigation to ensure that the department is proceeding on the basis of reliable information;

(2) Whether the specific circumstances which pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;

(3) Whether the program required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;

(4) Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and

(5) Whether the specific action contemplated by the department is necessary to avoid the immediate danger.

c. Issuance of order.

(1) An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the department's decision to take immediate action. The order is a public record.

(2) The written emergency adjudicative order shall be immediately delivered to the service program that is required to comply with the order by utilizing one or more of the following procedures:

1. Personal delivery.

2. Certified mail, return receipt requested, to the last address on file with the department.

3. Fax. Fax may be used as the sole method of delivery if the service program required to comply with the order has filed a written request that agency orders be sent by fax and has provided a fax number for that purpose.

(3) To the degree practicable, the department shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

(4) Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order issues, the department shall make reasonable immediate efforts to contact by telephone the service program that is required to comply with the order.

(5) After the issuance of an emergency adjudicative order, the department shall proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

(6) Issuance of a written emergency adjudicative order shall include notification of the date on which department proceedings are scheduled for completion. After issuance of an emergency adjudicative order, continuance of further department proceedings to a later date will be granted only in compelling circumstances upon application in writing unless the service program that is required to comply with the order is the party requesting the continuance.

CHAPTER 133
WHITE FLASHING LIGHT AUTHORIZATION

641—133.1(321) Definitions. For the purpose of these rules, the following definitions shall apply:

“Ambulance” means ambulance as defined in 641—132.1(147A).

“Ambulance service” means ambulance service as defined in 641—132.1(147A).

“Authorization certificate” means a permit issued to an emergency medical care provider which authorizes the use of a white flashing light.

“Authorized vehicles” means any vehicles owned by members of the service program that are authorized by the department to use flashing white lights.

“Department” means Iowa department of public health.

“Emergency medical care provider” means emergency medical care provider as defined in 641—131.1(147A).

“First response vehicle” means first response vehicle as defined in 641—132.1(147A).

“Medical director” means medical director as defined in 641—132.1(147A).

“Member” means any individual utilized by an ambulance or nontransport service to provide emergency medical care.

“Nontransport service” means nontransport service as defined in 641—132.1(147A).

“Rescue vehicle” means rescue vehicle as defined in 641—132.1(147A).

“Service director” means service director as defined in 641—132.1(147A).

“Service program” or *“service”* means service program as defined in 641—132.1(147A).

“White light” means a white or clear rotating, flashing, or strobe lighting device utilized for identification purposes only. Any such lighting device shall not display a constant white or clear light to the rear of the vehicle.

[ARC 0901C, IAB 8/7/13, effective 9/11/13]

641—133.2(321) Purpose.

133.2(1) Flashing white lights may be used on emergency vehicles or other authorized vehicles utilized by emergency medical care providers and service programs for identification purposes only.

133.2(2) Flashing white lights shall be used only on an authorized vehicle and shall not be used except in any of the following circumstances:

- a. When responding to an emergency in the line of duty requiring the services of the member.
- b. When at the scene of an emergency.
- c. When transporting a patient during a disaster situation.

133.2(3) Owners and operators of authorized vehicles are responsible for ensuring that the lighting devices are utilized in a safe manner. This shall include, but not be limited to, ensuring that lighting devices do not:

- a. Obstruct the view of the vehicle operator.
- b. Overburden the electrical system of the vehicle.
- c. Interfere with the vision of the vehicle operator, passengers, or drivers of other vehicles.

133.2(4) Operators of authorized vehicles shall ensure that the authorization certificate is carried in the vehicle.

641—133.3(321) Application.

133.3(1) Authorization certificates shall be issued by the service director for service vehicles and vehicles owned by emergency medical care providers who are members in good standing with the service. Authorization certificates are available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems). Vehicle authorization shall be limited to:

- a. Vehicles owned or exclusively operated by the ambulance or nontransport service.
- b. Vehicles owned or operated by emergency medical care provider members of the ambulance or nontransport service.
- c. Vehicles owned or operated by the service program’s medical director.

d. One authorization certificate per vehicle.

133.3(2) Nothing in these rules shall prevent the use of white flashing lights on vehicles which are authorized to use red or blue flashing lights.

133.3(3) The service director shall report the issuance of white light authorization certificates within 15 days to the department on forms approved by the department. Information required by the department shall include, but not be limited to:

- a. Demonstrated necessity for authorization.
- b. Vehicle liability insurance.
- c. Current Iowa vehicle registration.
- d. The member's current driver's license number, if the authorized vehicle is privately owned.

133.3(4) The service director shall provide, upon request of the department or its agents, proof of the information required in 133.3(3) for each authorization certificate issued.

133.3(5) The service director shall provide an informational sheet which explains the requirements for use of the white lights to each member who is issued an authorization certificate. The information sheet is available upon request from the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

133.3(6) The service director shall encourage members operating authorized vehicles to complete a course in emergency driving techniques and the laws and rules governing emergency vehicle operation.

133.3(7) The authorization shall expire five years from the date issued unless sooner suspended or revoked.

133.3(8) The department may issue authorization certificates for vehicles used by employees of the department when responding to emergencies or disasters.

[ARC 0901C, IAB 8/7/13, effective 9/11/13]

641—133.4(321) Approval, denial, probation, suspension and revocation of authorization.

133.4(1) The service director or the department may approve or deny an application and the department may place on probation, suspend or revoke an authorization certificate if the service director or the department finds reason to believe that the applicant or certificate holder:

- a. Has failed to meet all applicable requirements of these rules.
- b. Has been convicted of a moving violation while using flashing white lights.
- c. Has utilized a white flashing light without obtaining an authorization certificate.
- d. Does not have a valid driver's license.
- e. Does not have a current vehicle registration.

133.4(2) The authorization certificate shall be surrendered upon the request of the department or its agents.

133.4(3) An emergency medical care provider or service director who has knowledge of any emergency medical care provider or service program that has violated Iowa Code chapter 147A, Iowa Administrative Code 641—Chapter 132 or these rules shall, within 30 days, report that information to the department.

133.4(4) A denial, probation, suspension or revocation ordered by the department shall be effected, and may be appealed according to the provisions set forth in rule 641—133.5(321).

641—133.5(321) Appeal of denial, probation, or revocation of authorization.

133.5(1) Denial, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice of denial, probation, suspension or revocation shall be served to the alleged violator by restricted certified mail, return receipt requested, or by personal service.

133.5(2) Any request for appeal concerning denial, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 30 days of the receipt of the department's notice. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 30-day time period, the notice shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, probation, suspension or revocation has been or will be removed. If no request for appeal is received within the 30-

day time period, the department's notice of denial, probation, suspension or revocation shall become the department's final agency action.

133.5(3) Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

133.5(4) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 4, Iowa Administrative Code.

133.5(5) When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 133.5(6).

133.5(6) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

133.5(7) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

133.5(8) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

133.5(9) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

133.5(10) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

133.5(11) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

These rules are intended to implement Iowa Code section 321.423.

CHAPTER 134
TRAUMA CARE FACILITY CATEGORIZATION
AND VERIFICATION

641—134.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Categorization*” means a preliminary determination by the department that a hospital or emergency care facility is capable of providing trauma care at Level I, II, III or IV care capabilities.

“*Certificate of verification*” means a document awarded by the department that identifies a hospital or emergency care facility’s level and term of verification as a trauma care facility.

“*Criteria deficiency*” or “*deficiency*” means a failure to meet criteria requirements as outlined in paragraph 134.2(3)“a.”

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency care facility*” means a physician’s office, clinic, or other health care center which provides emergency medical care in conjunction with other primary care services.

“*Emergency medical care provider*” means emergency medical care provider as defined in 641—131.1(147A).

“*Final report*” means the verification report issued by the department following a verification review conducted by trauma survey team members and department staff.

“*Governing body*” means a group of individuals responsible for the governance of a hospital, including but not limited to a board of directors or board of trustees.

“*Hospital*” means any hospital licensed under Iowa Code chapter 135B.

“*On-site verification survey*” means an on-site survey conducted by the department or survey team members to assess a hospital or emergency care facility’s ability to meet the level of categorization requested.

“*Persistently occurring deficiencies*” means deficiencies identified in two sequential verification reviews.

“*Trauma*” means a single or multisystem life-threatening or limb-threatening injury, or an injury requiring immediate medical or surgical intervention or treatment to prevent death or permanent disability.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Level I, Level II, Level III or Level IV care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23(2)“c.”

“*Trauma care system*” means an organized approach to providing personnel, facilities, and equipment for effective and coordinated trauma care.

“*Trauma survey team*” means a group of health care providers contracted by the department to assist in verifying trauma care facilities’ compliance with trauma criteria adopted in 134.2(3).

“*Type I criteria*” or “*Type I criteria deficiency*” indicates criteria requirements that may significantly impact a trauma care facility’s ability to provide optimal care for trauma patients.

“*Type II criteria*” or “*Type II criteria deficiency*” indicates criteria that are required but have a less critical impact on the trauma care facility’s ability to provide optimal care for trauma patients than Type I criteria.

“*Verification*” means a process by which the department certifies a trauma care facility’s capacity to provide trauma care in accordance with criteria established for Level I, Level II, Level III or Level IV trauma care facilities and these rules.

[ARC 1079C, IAB 10/2/13, effective 1/6/14; ARC 3240C, IAB 8/2/17, effective 9/6/17]

641—134.2(147A) Trauma care facility categorization and verification. Categorization and verification of trauma care facilities shall be made by the department based upon the trauma care facilities’ resources available for providing trauma care services.

134.2(1) Categorization.

a. Categorization as a trauma care facility shall be determined by the department from self-reported information provided to the department by a hospital or emergency care facility through a self-assessment categorization application provided by the department.

b. Categorization applications shall be submitted by all hospitals. New hospitals shall submit a categorization application no later than 90 days after licensing by the department of inspections and appeals, health facilities division. Categorization applications may be submitted by emergency care facilities. New emergency care facilities may submit a categorization application no later than 90 days after opening or reopening.

c. Categorization applications may be obtained from the department upon written request to: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.2(2) Categorization levels for trauma care facilities shall be identified as:

- a.* Level I.
- b.* Level II.
- c.* Level III.
- d.* Level IV.

134.2(3) Adoption by reference.

a. Criteria specific to Level I trauma care facilities identified in the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma (ACS-COT) is incorporated and adopted by reference for Level I hospital and emergency care facility categorization criteria. Criteria specific to Level II trauma care facilities identified in the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma is incorporated and adopted by reference for Level II hospital and emergency care facility categorization criteria. Criteria specific to Level III trauma care facilities identified in the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma is incorporated and adopted by reference for Level III hospital and emergency care facility categorization criteria. Criteria specific to Level IV trauma care facilities identified in the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma is incorporated and adopted by reference for Level IV hospital and emergency care categorization criteria. For any differences which may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

b. “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma is available through the Iowa Department of Public Health, Bureau of Emergency and Trauma Services (BETS), Lucas State Office Building, Des Moines, Iowa 50319-0075, or the BETS website (idph.iowa.gov/BETS/Trauma).

c. Trauma care facilities shall transition to the criteria outlined in paragraph 134.2(3)“*a.*”

(1) Level IV trauma care facilities shall transition to the criteria outlined in paragraph 134.2(3)“*a.*” on or before October 1, 2017.

(2) Level III trauma care facilities shall maintain, at a minimum, the criteria requirements effective in 2013 until a transition to the criteria in paragraph 134.2(3)“*a.*” at the next scheduled verification visit. Transition to paragraph 134.2(3)“*a.*” criteria shall be completed on or before December 31, 2020.

(3) Level II trauma care facilities shall maintain, at a minimum, the criteria requirements effective in 2013 until American College of Surgeons Committee on Trauma verification on or before October 31, 2021.

d. The 2013 criteria for all levels of trauma care facilities are available through the Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the BETS website (idph.iowa.gov/BETS/Trauma).

134.2(4) Categorization shall not be construed to imply any guarantee on the part of the department as to the level of trauma care services available at a trauma care facility.

134.2(5) A trauma care facility may apply to the department for a change in level of categorization through submission of a self-assessment categorization application. Hospitals, emergency care facilities, or trauma care facilities applying for initial verification or a change in level of categorization shall be verified based on the criteria outlined in paragraph 134.2(3)“*a.*”

134.2(6) Verification. Verification of a trauma care facility shall be determined by the department upon successful completion of the categorization application and completion of a verification survey. All categorized hospitals and emergency care facilities shall be verified.

a. Level I and Level II trauma care facilities shall be verified by the American College of Surgeons Committee on Trauma on or before October 31, 2021.

b. Trauma care facilities verified by the American College of Surgeons Committee on Trauma shall be accepted by the department as equivalent for categorization and verification as a trauma care facility in Iowa provided that all policy, reporting, and administrative rules have been met. The department may issue a certification of verification provided that the trauma care facility has been verified by the American College of Surgeons Committee on Trauma. The facility shall provide the department documentation including, but not limited to, a current copy of the ACS-COT verification.

c. A Level I or Level II trauma care facility which fails to attain American College of Surgeons Committee on Trauma verification shall submit an application to the department to be verified as a Level III or Level IV trauma care facility to ensure compliance with Iowa Code section 147A.23(2) “a.”

d. Level III and Level IV trauma care facilities shall be verified by the department in consultation with the trauma survey team.

134.2(7) The department shall conduct a verification survey for categorized hospitals or emergency care facilities.

a. A verification survey shall assess the ability of the hospital or emergency care facility to meet criteria for the level of categorization pursuant to 134.2(3).

b. Verification criteria are weighted by criteria types, Type I and Type II, as indicated in the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma and adopted in 134.2(3) “a.”

c. Type II criteria deficiencies identified during the verification process may result in disciplinary action. Criteria deficiencies shall be resolved in accordance with the trauma care facility’s final report. Failure to rectify deficiencies in accordance with the trauma care facility’s final report shall result in disciplinary action.

d. Type I criteria deficiencies or persistently occurring Type II criteria deficiencies identified during the verification process shall result in disciplinary action. The department shall notify the trauma care facility’s governing body of Type I or persistently occurring Type II criteria deficiencies. The trauma care facility shall implement a plan of correction within 45 days of issuance of the trauma facility’s final report. Criteria deficiencies shall be resolved in accordance with the trauma care facility’s final report and the implemented plan of correction. Failure to rectify deficiencies shall result in disciplinary action.

e. The department may conduct electronic review or on-site verification that criteria deficiencies have been resolved as outlined in final reports or disciplinary actions.

f. The department shall approve trauma care facility verification when the department is satisfied that the proposed facility will provide services and be operated in compliance with Iowa Code section 147A.23 and these administrative rules.

g. The department shall notify the applicant, in writing, as to the approval or denial of verification as a trauma care facility within 90 days after the completion of a verification survey.

h. Verification shall not be construed to imply any guarantee on the part of the department as to the level of trauma care services available at a hospital or emergency care facility.

i. Trauma care facility verification is valid for a period of three years from the effective date unless otherwise specified on the certificate of verification or unless sooner suspended or revoked.

j. Trauma care facilities shall be fully operational at their verified level upon the effective date specified on the certificate of verification. Trauma care facilities shall meet all requirements of Iowa Code section 147A.23 and these administrative rules.

k. As part of the verification and renewal process, the department or its designated trauma survey team may conduct periodic on-site reviews of the services and facilities of trauma care facilities including chart review at those facilities.

l. Trauma care facilities that are unable to maintain their categorization or verification, or both, shall notify the department within 48 hours.

m. The director, pursuant to 641—Chapter 178, may grant a waiver from the requirements of rules adopted under this chapter for any trauma care facility.

n. Proceedings, records, and reports developed pursuant to this chapter constitute peer review records under Iowa Code section 147.135, and are not subject to discovery by subpoena or admissible as evidence. All information and documents received from a hospital, emergency care facility, or trauma care facility under Iowa Code chapter 147A shall be confidential pursuant to Iowa Code section 272C.6(4).

134.2(8) Prohibited acts. A hospital or emergency care facility that imparts or conveys, or causes to be imparted or conveyed, that it is a trauma care facility, or that uses any other term to indicate or imply that the hospital or emergency care facility is a trauma care facility without having obtained a certificate of verification by the department is subject to civil penalty not to exceed \$100 per day for each offense. The director may apply to the district court for a writ of injunction to restrain the use of the term “trauma care facility.”

134.2(9) Nothing in Iowa Code section 147A.23 or these administrative rules shall be construed to restrict a hospital or emergency care facility from providing any services for which it is duly authorized.

[ARC 9445B, IAB 4/6/11, effective 5/11/11; ARC 1079C, IAB 10/2/13, effective 1/6/14; ARC 3240C, IAB 8/2/17, effective 9/6/17; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—134.3(147A) Complaints and investigations and appeals—denial, citation and warning, probation, suspension, and revocation of verification as a trauma care facility.

134.3(1) The department may deny verification as a trauma care facility or may give a citation and warning, place on probation, suspend, or revoke existing verification if the department finds reason to believe that the facility has not been or will not be operated in compliance with Iowa Code section 147A.23 and these administrative rules or that there is insufficient assurance of adequate protection for the public. The denial, citation and warning, period of probation, suspension, or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

134.3(2) All complaints regarding the operation of a trauma care facility, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.3(3) An EMS provider who has knowledge of a hospital, emergency care facility or trauma care facility that has violated Iowa Code section 147A.23, or these administrative rules, shall immediately report such information to the department. The address is: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.3(4) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code sections 22.7 and 147A.24 and Iowa Code chapter 272C.

134.3(5) Complaint investigations may result in the department’s issuance of a notice of denial, citation and warning, probation, suspension or revocation.

134.3(6) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, citation and warning, probation, suspension, or revocation shall be served by certified mail, return receipt requested, or by personal service.

134.3(7) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department’s notice to take action. The address is: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department’s notice of denial, citation and warning, probation, suspension or revocation shall become the department’s final agency action.

134.3(8) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding

the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

134.3(9) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

134.3(10) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

134.3(11) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

134.3(12) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

134.3(13) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

134.3(14) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

134.3(15) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.3(16) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

134.3(17) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, news media or employer.

CHAPTER 135
TRAUMA TRIAGE AND TRANSFER PROTOCOLS

641—135.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Out-of-Hospital Trauma Triage Destination Decision Protocol*” means written directives to assist in the decision making, established and approved by the department, that address the method of transport and trauma care facility destination to be followed by the service program.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

“*Transfer*” means the process of a patient being transferred from the scene of an injury to a trauma care facility or from one trauma care facility to another.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23, subsection 2, paragraph “c.”

“*Trauma system advisory council*” means an advisory council established pursuant to Iowa Code section 147A.24 to advise the department on issues and strategies to achieve optimal trauma care delivery throughout the state.

“*Trauma triage and transfer*” means to determine trauma care facility destination and mode of transportation.

“*TSAC*” means trauma system advisory council.

[ARC 1080C, IAB 10/2/13, effective 2/1/14]

641—135.2(147A) Trauma triage and transfer protocols.

135.2(1) Trauma triage and transfer protocols approved by the department shall be utilized to assist personnel from each service program and trauma care facility. This requirement shall not preclude service programs or trauma care facilities from making emergency revisions of the approved triage and transfer protocols when an incident overburdens medical care resources causing unnecessary delay in patient care.

a. Adoption by reference. The “Out-of-Hospital Trauma Triage Destination Decision Protocol” (Adult, 2013) and the “Out-of-Hospital Trauma Triage Destination Decision Protocol” (Pediatric, 2013) are incorporated by reference and adopted as the out-of-hospital trauma triage destination decision protocols. For any differences which may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

b. The protocols adopted by reference in paragraph 135.2(1)“a” are available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS website (idph.iowa.gov/BETS/Trauma).

c. Revisions and modifications to the protocols adopted by reference in paragraph 135.2(1)“a” may be made upon recommendation to the department from the trauma system advisory council (TSAC). Revisions and modifications shall be approved by the department.

d. The director, pursuant to rule, may grant a waiver from the requirements of rules adopted under this chapter for any hospital, emergency care facility, or service program provided that the waiver is related to undue hardships in complying with this chapter or the rules adopted pursuant to this chapter.

135.2(2) Reserved.

[ARC 1080C, IAB 10/2/13, effective 2/1/14; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—135.3(147A) Offenses and penalties.

135.3(1) The department may deny verification as a trauma care facility or deny authorization as a service program or may give a citation and warning, place on probation, suspend, or revoke existing trauma care facility verification or service program authorization if the department finds reason to believe that the facility or service program has not been or will not be operated in compliance with Iowa Code section 147A.27 and these administrative rules. The denial, citation and warning, period of probation, suspension,

or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

135.3(2) All complaints regarding the operation of a trauma care facility or service program, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

135.3(3) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code section 22.7.

135.3(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

135.3(5) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, citation and warning, probation, suspension, or revocation shall be served by certified mail, return receipt requested, or by personal service.

135.3(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

135.3(7) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

135.3(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

135.3(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

135.3(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

135.3(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

135.3(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or personal service.

135.3(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

135.3(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

135.3(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

135.3(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, news media or employer.

These rules are intended to implement Iowa Code section 147A.23.

CHAPTER 136 TRAUMA REGISTRY

641—136.1(147A) Definitions. For the purposes of these rules, the following definitions shall apply:

“*Cases*” means trauma patients that meet the trauma registry inclusion criteria.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Health care providers*” for the purpose of this chapter includes licensed physicians, nurse practitioners, physician assistants, and registered nurses.

“*Inclusion criteria*” means criteria determined by the department and adopted by reference to determine which trauma patients are to be included in the trauma registry.

“*Reportable patient data*” means data and definitions determined by the department and adopted by reference to be reported to the trauma registry on trauma patients meeting the inclusion criteria.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Level I, Level II, Level III or Level IV care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23(2)“c.”

“*Trauma patient*” means a victim of an external cause of injury that results in major or minor tissue damage or destruction caused by intentional or unintentional exposure to thermal, mechanical, electrical or chemical energy, or by the absence of heat or oxygen as defined in the “Iowa Trauma Patient Data Dictionary” as established in 136.2(1)“a.”

“*Trauma registry*” means the data repository operated by the department to collect and analyze reportable patient data on the incidence, severity, and causes of trauma, including the central registry for brain and spinal cord injuries (rule 641—21.1(135)) and farm-related injuries.

“*Trauma survey team*” means a group of health care providers contracted by the department to assist in verifying trauma care facilities’ compliance with trauma criteria adopted by reference in 641—subrule 134.2(3).

[ARC 3106C, IAB 6/7/17, effective 7/12/17; ARC 3834C, IAB 6/6/18, effective 7/11/18]

641—136.2(147A) Trauma registry.

136.2(1) Adoption by reference.

a. “Iowa Trauma Patient Data Dictionary” (January 2017) is incorporated by reference for inclusion criteria and reportable patient data to be reported to the trauma registry. For any differences which may occur between the adopted reference and this chapter, the administrative rules shall prevail.

b. “Iowa Trauma Patient Data Dictionary” (January 2017) is available through the Iowa Department of Public Health, Bureau of Emergency and Trauma Services (BETS), Lucas State Office Building, Des Moines, Iowa 50319-0075, or the BETS website idph.iowa.gov/Portals/1/userfiles/43/Trauma_Patient_Registry_Data_Dictionary.pdf.

136.2(2) A trauma care facility shall report data as follows:

a. Trauma care facilities shall submit reportable patient data identified in 136.2(1) electronically to the department. Data shall be submitted in a format approved by the department.

b. Trauma care facilities that enter required trauma data identified in 136.2(1)“a” directly into the state registry shall, at a minimum, enter 80 percent of cases within 60 days of a patient’s discharge. Within 120 days of a patient’s discharge, 100 percent of cases shall be entered into the registry.

c. Trauma care facilities that submit required trauma data identified in 136.2(1)“a” via upload shall, at a minimum, submit 80 percent of cases discharged within the previous 60 days of the first business day of every even-numbered calendar month. Within 120 days of a patient’s discharge or next scheduled data upload, 100 percent of cases shall be entered into the registry.

136.2(3) Reportable patient data compilations. The department shall prepare compilations for release or dissemination on reportable patient data entered into the trauma registry during the reporting period. The compilations shall include, but not be limited to, trends and patient care outcomes for local, regional and statewide evaluations. The compilations shall be made available to all providers submitting reportable patient data to the registry.

136.2(4) Access and release of reportable patient data and information.

a. The data collected by the trauma registry and furnished to the department pursuant to this rule are confidential records of the condition, diagnosis, care, or treatment of patients or former patients, including outpatients, pursuant to Iowa Code section 22.7. The compilations prepared for release or dissemination from the data collected are not confidential under Iowa Code section 22.7(2). However, information which individually identifies patients shall not be disclosed and state and federal law regarding patient confidentiality shall apply.

b. The department may approve requests for reportable patient data for special studies and analysis provided:

(1) The request has been reviewed and approved by the department with respect to the scientific merit and confidentiality safeguards; and

(2) The department has given administrative approval for the proposal.

(3) The confidentiality of patients and trauma care facilities is protected pursuant to Iowa Code sections 22.7 and 147A.24.

c. The department may require those requesting the data to pay any or all of the reasonable costs associated with furnishing the reportable patient data.

136.2(5) Data collection methods. To the extent possible, activities under this rule shall be coordinated with other health data collection methods.

136.2(6) Quality assurance of reported data.

a. For the purpose of ensuring the completeness and quality of reportable patient data, the department or its designated trauma survey team may examine medical records to validate the accuracy of data submitted by a trauma care facility.

b. Review of medical records by the department or its designated trauma survey team shall be scheduled in advance with the trauma care facility and completed in a timely manner.

c. The director, pursuant to 641—Chapter 178, may grant a waiver from the requirements of rules adopted under this chapter for a trauma care facility that meets the requirements of this chapter.

CHAPTER 137
TRAUMA EDUCATION AND TRAINING

641—137.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“Advanced registered nurse practitioner” or “ARNP” means a nurse pursuant to 655—7.1(152) with current licensure as a registered nurse in Iowa who is registered in Iowa to practice in an advanced role. The ARNP is prepared for an advanced role by virtue of additional knowledge and skills gained through a formal advanced practice education program of nursing in a specialty area approved by the board. In the advanced role, the nurse practices nursing assessment, intervention, and management within the boundaries of the nurse-client relationship. Advanced nursing practice occurs in a variety of settings within an interdisciplinary health care team, which provide for consultation, collaborative management, or referral. The ARNP may perform selected medically delegated functions when a collaborative practice agreement exists.

“Department” means the Iowa department of public health.

“Formal education” means education in standardized educational settings with a curriculum.

“Licensed practical nurse” or “LPN” means an individual licensed pursuant to Iowa Code chapter 152.

“Physician” means an individual licensed under Iowa Code chapter 148, 150 or 150A.

“Physician assistant” or “PA” means an individual licensed pursuant to Iowa Code chapter 148C.

“Practitioner” means a person who practices medicine or one of the associated health care professions.

“Registered nurse” or “RN” means an individual licensed pursuant to Iowa Code chapter 152.

“Trauma” means a single or multisystem life-threatening or limb-threatening injury, or an injury requiring immediate medical or surgical intervention or treatment to prevent death or disability.

“Trauma care facility” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Level I, Level II, Level III or Level IV care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23(2)“c.”

“Trauma nursing course objectives” means the trauma nursing course objectives recommended to the department by the trauma system advisory council and adopted by reference in these rules.

“Trauma patient” means a victim of an external cause of injury that results in major or minor tissue damage or destruction caused by intentional or unintentional exposure to thermal, mechanical, electrical or chemical energy, or by the absence of heat or oxygen.

“Trauma system advisory council” or “TSAC” means the council established by the department pursuant to Iowa Code section 147A.24.

“Trauma team” means a team of multidisciplinary health care providers established and defined by a trauma care facility that provides trauma care commensurate with the level of trauma care facility verification.

“Verification” means a process by which the department certifies a trauma care facility’s capacity to provide trauma care in accordance with criteria established for Level I, Level II, Level III or Level IV trauma care facilities and these rules.

[ARC 1081C, IAB 10/2/13, effective 11/6/13; ARC 3241C, IAB 8/2/17, effective 9/6/17]

641—137.2(147A) Initial trauma education requirements. Trauma education is required of physicians, physician assistants, advanced registered nurse practitioners, registered nurses, and licensed practical nurses who are identified or defined as trauma team members by a trauma care facility and who participate directly in the initial resuscitation of the trauma patient.

137.2(1) General requirements for initial trauma education.

a. Completion of initial trauma education shall be done within three years of the trauma care facility’s initial verification or within one year of the practitioner’s joining the trauma care facility’s trauma team.

b. Trauma nursing course objectives (2007) are incorporated and adopted by reference for all trauma care facilities. For any differences which may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

c. Trauma nursing course objectives are available from the Department of Public Health, Bureau of Emergency and Trauma Services (BETS), Lucas State Office Building, Des Moines, Iowa 50319-0075, or the BETS Web site (<http://idph.iowa.gov/BETS/Trauma>).

137.2(2) Specific requirements for initial trauma education for each provider category are as follows:

a. Physicians, PAs and ARNPs shall comply with education criteria specific to the level for which the trauma care facility is verified according to the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma.

b. RNs and LPNs: successful completion of trauma nursing course objectives (2007) recommended by TSAC.

[ARC 1081C, IAB 10/2/13, effective 11/6/13; ARC 3241C, IAB 8/2/17, effective 9/6/17]

641—137.3(147A) Continuing trauma education requirements. Continuing trauma education is required every four years of physicians, physician assistants, advanced registered nurse practitioners, registered nurses, and licensed practical nurses who are identified or defined as trauma team members by a trauma care facility and who participate directly in the initial resuscitation of the trauma patient.

137.3(1) Specific requirements for continuing trauma education for each provider category are as follows:

a. Physicians, PAs and ARNPs shall comply with education criteria specific to the level for which the trauma care facility is verified according to the “Resources for Optimal Care of the Injured Patient 2014” (6th edition) published by the American College of Surgeons Committee on Trauma.

b. RN and LPN: 16 hours of continuing trauma education is required, with a minimum of 4 hours as formal education.

c. RN and LPN: Sustainment of training using trauma nursing course objectives (2007) recommended by TSAC. Continuing education hours earned sustaining trauma nurse course objectives may be applied to continuing education requirements identified in paragraph 137.3(1)“b.”

137.3(2) to 137.3(4) Rescinded IAB 8/2/17, effective 9/6/17.

[ARC 1081C, IAB 10/2/13, effective 11/6/13; ARC 3241C, IAB 8/2/17, effective 9/6/17]

641—137.4(147A) Offenses and penalties. Offenses and penalties will be addressed pursuant to 641—Chapter 134, Trauma Care Facility Categorization and Verification.

[ARC 3241C, IAB 8/2/17, effective 9/6/17]

These rules are intended to implement Iowa Code chapter 147A.

[Filed 5/14/99, Notice 2/10/99—published 6/2/99, effective 7/7/99]

[Filed 1/13/05, Notice 11/24/04—published 2/2/05, effective 3/9/05]

[Filed ARC 1081C (Notice ARC 0773C, IAB 5/29/13), IAB 10/2/13, effective 11/6/13]

[Filed ARC 3241C (Notice ARC 3076C, IAB 5/24/17), IAB 8/2/17, effective 9/6/17]

CHAPTER 138
TRAUMA SYSTEM ADVISORY COUNCIL

641—138.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Emergency medical care provider” means emergency medical care provider as defined in rule 641—131.1(147A).

“Trauma care system” means an organized approach to providing personnel, facilities, and equipment for effective and coordinated trauma care.

“TSAC” means the trauma system advisory council established pursuant to Iowa Code section 147A.24.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.2(147A) Purpose and duties.

138.2(1) The TSAC shall advise the department on issues and strategies to achieve optimal trauma care delivery throughout the state.

138.2(2) Duties of the TSAC shall include, but not be limited to:

a. Annually reviewing Iowa Administrative Code rules related to the trauma care system to make recommendations to the department for changes to further promote optimal trauma care, including but not limited to review of this chapter and the following chapters:

- (1) 641—Chapter 134, Trauma Care Facility Categorization and Verification.
- (2) 641—Chapter 135, Trauma Triage and Transfer Protocols.
- (3) 641—Chapter 136, Trauma Registry.
- (4) 641—Chapter 137, Trauma Education and Training.

b. Assisting the department in development and implementation of an Iowa trauma care plan inclusive of all aspects of the statewide trauma system utilizing a system assessment and annual benchmarking.

c. Developing and maintaining criteria for the categorization of all hospitals and emergency care facilities according to their trauma care capabilities. These categories shall be for Levels I, II, III, and IV, based on the most current guidelines published by the American College of Surgeons’ committee on trauma, the American College of Emergency Physicians, and the model trauma care plan of the U.S. Department of Health and Human Services’ Health Resources and Services Administration. These criteria are established in 641—Chapter 134, and TSAC shall, pursuant to paragraph 138.2(2)“a,” annually review the criteria.

d. Developing and maintaining a process for the verification of the trauma care capacity of each facility and the issuance of a certificate of verification. This process is established in 641—Chapter 134, and TSAC shall, pursuant to paragraph 138.2(2)“a,” annually review the process.

e. Developing and maintaining standards for medical direction, trauma care, and triage and transfer protocols. These standards are established in 641—Chapter 135, and TSAC shall, pursuant to paragraph 138.2(2)“a,” annually review these standards.

f. Developing and maintaining standards for trauma registries. These standards are established in 641—Chapter 136, and TSAC shall, pursuant to paragraph 138.2(2)“a,” annually review these standards.

g. Collaborating with the department to develop trauma standards for medical direction, procedures, and protocols to support a statewide trauma system.

h. Developing, implementing, and conducting trauma care system evaluation, quality assessment, and quality improvement in coordination with the department.

i. Partnering with the department to promote public information and educational activities for injury prevention and in support of the statewide trauma system.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.3(147A) Appointment and membership.

138.3(1) The seven members of the TSAC shall be appointed by the director from the recommendations of the organizations listed in subrule 138.3(4).

138.3(2) Appointments shall be for two-year staggered terms, which shall expire on June 30.

138.3(3) Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

138.3(4) Membership. The voting membership of the TSAC shall be comprised of seven members, appointed by the director, who are selected from the pool of individuals recommended from the following organizations or entities:

- a.* American Academy of Pediatrics.
- b.* American College of Emergency Physicians, Iowa chapter.
- c.* American College of Surgeons, Iowa chapter.
- d.* Department of public health.
- e.* Governor's traffic safety bureau.
- f.* Iowa Academy of Family Physicians.
- g.* Iowa Emergency Medical Services Association.
- h.* Iowa Emergency Nurses Association.
- i.* Iowa Hospital Association representing rural hospitals.
- j.* Iowa Hospital Association representing urban hospitals.
- k.* Iowa Medical Society.
- l.* Iowa Osteopathic Medical Society.
- m.* Iowa Physician Assistant Society.
- n.* Iowa Society of Anesthesiologists.
- o.* Orthopedic System Advisory Council of the American Academy of Orthopedic Surgeons, Iowa representative.
- p.* Rehabilitation services delivery representative.
- q.* Iowa's Medicare quality improvement organization.
- r.* State medical examiner.
- s.* Trauma nurse coordinator representing a trauma registry hospital.
- t.* University of Iowa, Injury Prevention Research Center.

138.3(5) Absences.

- a.* Three unexcused absences in a 12-month period shall be grounds for the director to consider an alternate representative to fill the position.
- b.* Absences may be excused by notification provided to the chairperson prior to the meeting.
- c.* The chairperson of the TSAC shall be charged with providing notification of absences to the department.

[ARC 2566C, IAB 6/8/16, effective 7/13/16; ARC 4703C, IAB 10/9/19, effective 11/13/19]

641—138.4(147A) Officers.

138.4(1) Officers of the TSAC shall consist of a chairperson and a vice chairperson, who shall be elected at the first meeting of each fiscal year.

- a.* Officers may serve no more than three consecutive terms as chairperson or vice chairperson.
- b.* Vacancies in the office of chairperson shall be filled by elevation of the vice chairperson.
- c.* Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

138.4(2) Duties of officers.

- a.* The chairperson shall:
 - (1) Preside at all meetings of the TSAC,
 - (2) Appoint such subcommittees as deemed necessary, and
 - (3) Designate the chairperson of each subcommittee.
- b.* The vice chairperson shall:
 - (1) Perform the duties of the chairperson if the chairperson is absent or unable to act. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson.

- (2) Perform such other duties as may be assigned by the chairperson.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.5(147A) Meetings.

138.5(1) The TSAC shall establish a meeting schedule on an annual basis to conduct its business. There shall be a minimum of four meetings per year.

a. Meetings may be scheduled as business requires, but notice to members must be given at least five working days prior to the meeting date.

b. Notice given four weeks in advance is encouraged to accommodate the schedules of professional members.

138.5(2) Any TSAC member who is unable to attend the meeting will notify the chairperson.

138.5(3) A majority of appointed members constitutes a quorum.

138.5(4) When a quorum is present, a position is carried by affirmative vote of the majority of those present. No official business that requires a vote of the membership shall be conducted without a quorum present.

138.5(5) Persons wishing to make a presentation to the TSAC shall submit the request to the chairperson not less than 14 days prior to the meeting. Presentations may be made at the discretion of the chairperson.

138.5(6) Persons wishing to submit written materials should do so at least 14 days in advance of the scheduled meeting to ensure that TSAC members have adequate time to receive and evaluate the materials.

138.5(7) TSAC may conduct meetings by electronic means pursuant to Iowa Code section 21.8.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.6(147A) Subcommittees. TSAC may designate one or more subcommittees to perform such duties as may be deemed necessary.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.7(147A) Confidentiality.

138.7(1) The data collected by and furnished to the department pursuant to Iowa Code section 147A.26 are confidential records of the condition, diagnosis, care, or treatment of patients or former patients, including outpatients, and shall not be public record under Iowa Code chapter 22. The confidentiality of patients is to be protected, and the laws of this state shall apply with regard to patient confidentiality.

138.7(2) Proceedings, records, and reports reviewed or developed pursuant to Iowa Code section 147A.24 constitute peer review records under Iowa Code section 147.135 and are not subject to discovery by subpoena or admissible as evidence. All information and documents received from a hospital or emergency care facility under Iowa Code chapter 147A shall be confidential pursuant to Iowa Code section 272C.6(4).

138.7(3) TSAC or subcommittees of TSAC may enter into closed session proceeding pursuant to Iowa Code section 21.5.

138.7(4) All council and subcommittee members shall sign a confidentiality agreement not to divulge or discuss information obtained during a TSAC or subcommittee closed session proceeding. The signed confidentiality statements shall be kept on file at the department.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.8(147A) Documentation.

138.8(1) The department, pursuant to Iowa Code section 21.3, shall keep minutes of open session proceedings.

138.8(2) The department, pursuant to Iowa Code section 21.5, shall also maintain minutes and tape recordings of closed session proceedings.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

641—138.9(147A) Expenses of advisory council members. Rescinded ARC 4703C, IAB 10/9/19, effective 11/13/19.

641—138.10(147A) Council composition. The council's composition shall be developed and maintained pursuant to Iowa Code chapter 69.

[ARC 2566C, IAB 6/8/16, effective 7/13/16]

These rules are intended to implement Iowa Code chapter 147A.

[Filed ARC 2566C (Notice ARC 2448C, IAB 3/16/16), IAB 6/8/16, effective 7/13/16]

[Filed ARC 4703C (Notice ARC 4539C, IAB 7/17/19), IAB 10/9/19, effective 11/13/19]

CHAPTER 139
EMERGENCY MEDICAL SERVICES—TRAINING PROGRAMS—STUDENTS—COMPLAINTS
AND INVESTIGATIONS

641—139.1(147A) Purpose. This chapter establishes the standards and requirements for authorization of emergency medical care training programs in the state of Iowa; establishes the requirements of the training program related to preparing students for emergency medical provider certification in the state of Iowa; and describes the authority of the department to impose disciplinary sanctions against a training program.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—139.2(147A) Definitions.

“Advanced emergency medical technician” or *“AEMT”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Advanced Emergency Medical Technician Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the AEMT, and is currently certified by the department as an AEMT.

“Bureau” or *“BETS”* means the bureau of emergency and trauma services, the bureau designated by the department as the lead agency for coordinating and implementing the provision of emergency medical services in this state.

“CAAHEP” means the Commission on Accreditation of Allied Health Education Programs.

“CAPCE” means the Commission on Accreditation for Prehospital Continuing Education. CAPCE is an accrediting body charged with the review and accreditation of EMS continuing education.

“CEH” means continuing education hour, which is based upon a minimum of 50 minutes of training per hour.

“Certification” or *“certificate”* means a document issued by the department authorizing a person to practice as an emergency medical care provider in Iowa.

“Certified” means being officially recognized as meeting department-approved training and testing standards and being issued a certificate by the department in accordance with Iowa Code chapters 272C and 147A.

“Cognitive examination” or *“written examination”* means the portion of the NREMT certification examination process evaluating the candidate’s level of EMS knowledge.

“Core continuing education” means education obtained during a certification period to renew certification. Core continuing education shall have an assigned sponsor number from CAPCE, an authorized EMS training program, the board of nursing, the board of medicine or the department.

“Course completion date” means the date of the final classroom session of an emergency medical care provider course.

“Course coordinator” means an individual who has been assigned by the training program to coordinate the activities of an emergency medical care provider course.

“Critical care paramedic” or *“CCP”* means a currently certified paramedic who has successfully completed a critical care course of instruction approved by the department and has received endorsement from the department as a critical care paramedic.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Emergency medical care” means any medical procedure authorized by Iowa Code chapter 147A and 641—Chapter 131.

“Emergency medical care provider” means an individual who has been trained to provide emergency and nonemergency medical care at the EMR, EMT, AEMT, paramedic, or other certification level recognized by the department before 2011 and has been issued a certificate by the department, or a person practicing in accordance with Iowa Code chapter 147D.

“Emergency medical care student” or *“student”* means any individual registered with the department and enrolled in an EMS training program with an active EMS student registration.

“Emergency medical responder” or *“EMR”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Emergency Medical Responder

Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the EMR, and is currently certified by the department as an EMR.

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care.

“Emergency medical technician” or *“EMT”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Emergency Medical Technician Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the EMT, and is currently certified by the department as an EMT.

“EMS evaluator” or *“EMS-E”* means an individual who has successfully completed an EMS evaluator curriculum approved by the department and is currently endorsed by the department as an EMS-E.

“EMS instructor” or *“EMS-I”* means an individual who has successfully completed an EMS instructor curriculum approved by the department and is currently endorsed by the department as an EMS-I.

“EMS training program” or *“training program”* means an Iowa college approved by the Higher Learning Commission, an Iowa hospital, or a service program that has received authorization from the department to conduct emergency medical care training.

“Endorsement” or *“endorsed”* means an approval granted by the department authorizing an individual to serve as an EMS-I, EMS-E or CCP.

“Higher Learning Commission” means the independent corporation which accredits degree-granting postsecondary institutions in the north central region of the United States.

“NREMT” means the National Registry of Emergency Medical Technicians. The NREMT provides a valid, uniform process to assess the knowledge and skills required for competent entrance-level practice by EMS professionals.

“Out-of-state student” means any individual participating in clinical or field experience as a student in an approved out-of-state training program.

“Out-of-state training program” means an EMS training program located outside the state of Iowa that is approved by the authorizing agency of the program’s home state to conduct initial EMS training for EMR, EMT, AEMT, paramedic or other level certified by the department.

“Outreach course coordinator” means an individual assigned by the training program to coordinate the activities of an emergency medical care provider course held outside the training program facilities.

“Paramedic” or *“PM”* means an individual who has successfully completed a course of study based on the United States Department of Transportation’s Paramedic Instructional Guidelines (January 2009), has passed the psychomotor and cognitive examinations for the paramedic, and is currently certified by the department as a paramedic.

“Physician” means an individual licensed under Iowa Code chapter 148.

“Physician assistant” or *“PA”* means an individual licensed pursuant to Iowa Code chapter 148C.

“Preceptor” means an individual assigned by the training program, clinical facility or service program to supervise EMS students while the students are completing their classroom, clinical or field experience. A preceptor shall be an emergency medical care provider certified at the level at which the preceptor is providing supervision or at a higher level or be licensed as a physician, physician assistant or registered nurse.

“Primary instructor” means an individual who is responsible for teaching the majority of an emergency medical care provider course.

“Psychomotor examination” or *“practical examination”* means the portion of the department-approved or NREMT certification examination process that evaluates the skill and procedure capabilities of the candidate.

“Registered nurse” or *“RN”* means an individual licensed pursuant to Iowa Code chapter 152.

“Service program” or *“service”* means any transport service or nontransport service, inclusive of associated satellites and service program affiliates, that has received full or conditional authorization from the department.

“Training program director” means a health care professional (full-time educator or practitioner of emergency or critical care) assigned by the training program to direct the operation of the training program.

“Training program medical director” means a physician licensed under Iowa Code chapter 148 who is responsible for providing medical oversight to an EMS training program.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 6070C, IAB 12/15/21, effective 1/19/22]

641—139.3(147A) Initial application, renewal application, inspection and approval.

139.3(1) *Initial application, inspection and approval.*

a. An applicant seeking initial authorization as an EMS training program shall complete and submit to the department an Iowa EMS training program self-assessment application. The application can be downloaded from the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

b. An applicant seeking initial authorization shall submit, along with the Iowa EMS training program self-assessment application, a needs assessment that justifies the need for the training program.

c. The department shall perform an on-site inspection of the applicant’s facilities and clinical resources. The purpose of the inspection is to examine educational objectives, patient care practices, facilities and administrative practices.

d. Following the on-site inspection, the department will provide the applicant an application report detailing the status of the application.

e. The department will approve the application and authorize the training program, determine timelines for the correction of deficiencies in the application, or deny the application. If the deficiencies are not corrected within the time period established by the department, the application will be denied.

f. A training program’s initial authorization shall not exceed one year.

g. No person shall interfere with the inspection activities of the department or its agents. Interference with or failure to allow an inspection may be cause for denial of authorization.

139.3(2) *Renewal application, inspection and approval.*

a. A training program seeking renewal as an EMS training program shall complete and submit to the department the Iowa EMS training program self-assessment renewal application. The application can be downloaded from the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).

b. EMS training program renewal applications will be submitted at least 90 days before the end of the current authorization period.

c. The department will complete an on-site inspection and review the self-assessment prior to the end of the current authorization period.

d. Following the on-site inspection, the department will provide the training program a renewal application report detailing the status of the application.

e. The department will authorize the training program or determine timelines for the correction of deficiencies in the renewal application.

f. If the deficiencies are not corrected within the time period established by the department, the training program is subject to disciplinary action as described in rule 641—139.9(147A).

g. A training program’s approved renewal authorization shall not exceed four years.

h. No person shall interfere with the inspection activities of the department or its agents. Interference with or failure to allow an inspection may be cause for denial of authorization.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20]

641—139.4(147A) Training program standards, student requirements and waivers.

139.4(1) *Education standards.* A training program shall:

a. Have a sponsoring institution that has received authorization from the department to conduct emergency medical care services training.

b. Use the United States Department of Transportation’s Instructional Guidelines (January 2009) for any courses leading to Iowa certification.

c. Use the Iowa CCP curriculum (January 2016) for courses leading to the CCP endorsement.

d. Be accredited by, or have submitted a self-study application to, the CAAHEP if graduating students at the paramedic certification level.

e. Document equivalent training and what portions of any course have been waived for equivalency. A training program may waive portions of the required emergency medical care provider training for students currently certified as emergency medical care providers or licensed in other health care

professions, including but not limited to nursing, physician assistant, respiratory therapist, dentistry, and military.

139.4(2) *Clinical or field experience resources.* Training programs shall:

- a. Have a mechanism to clearly identify students in the clinical or field setting, or both.
- b. Have sufficient equipment and supplies to be used in the provision of instruction. The equipment and supplies shall be available and consistent with the needs of the curriculum and adequate for the number of students enrolled.
- c. Ensure that clinical experiences available are consistent with the needs of the curriculum and adequate for the number of students enrolled.
- d. Ensure that clinical affiliations that are outside of the sponsoring training program are established and confirmed in written agreements with institutions or agencies that provide clinical experience under appropriate medical direction and clinical supervision.
- e. Only allow students to perform skills and procedures in the classroom, clinical or field setting for which the students have received training with direct supervision by a preceptor designated and approved by the training program.
- f. Have sufficient classrooms, laboratories, and administrative offices and facility design to accommodate the number of students in the program and the supporting faculty.
- g. Have current approved curriculum and library resources related to the curriculum readily accessible to all enrolled students (on campus and off campus) and shall include current EMS and medical periodicals, scientific texts, audiovisual and self-instructional resources, and other appropriate references.

139.4(3) *Staff.* Training programs shall:

- a. Have a training program director who is a health care professional (full-time educator or practitioner of emergency or critical care) assigned by the training program to direct the operation of the training program.
- b. Have a training program medical director who shall, at a minimum, review the educational content of each training program curriculum, evaluate the quality of medical instruction, and supervise delivery of the curriculum by the faculty members.
- c. Have qualified faculty through academic preparation, training, and experience to teach and evaluate the courses or topics to which they are assigned. At a minimum, each course coordinator, outreach course coordinator, and primary instructor utilized by the training program shall be endorsed as an Iowa EMS instructor.
- d. Be allowed to conduct the NREMT psychomotor examination according to the policies and procedures of the department and the NREMT.

139.4(4) *Student eligibility.* Training programs shall ensure that emergency medical care students meet the following requirements.

- a. Be at least 17 years of age on the date of enrollment.
- b. Have a high school diploma or its equivalent if enrolling in an AEMT or paramedic course.
- c. Be able to speak, write and read English.
- d. Be able to meet the minimum requirements for the cognitive and psychomotor components of the examination with reasonable and appropriate accommodations for those persons with documented disabilities, as required by the Americans with Disabilities Act (ADA).
- e. Be currently certified, at a minimum, as an EMT if enrolling in an AEMT or paramedic course.
- f. Be a current emergency medical care provider, RN, PA, or physician and submit a recommendation in writing from an approved EMS training program if enrolling in an EMS instructor course.

139.4(5) *Students.* Training programs shall:

- a. Ensure that each student submits a completed EMS student registration no later than 14 days from the beginning of an emergency medical training program course. The student registration link can be found on the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).
- b. Have defined processes for review of academic history, criminal history, and health-related issues for the admission of students.

- c. Have a process to evaluate students on a recurring basis and with sufficient frequency to provide both the student and training program faculty with valid and timely indicators of the student's progress and achievement of the competencies and objectives stated within the program's curriculum.
- d. Have student guidance procedures that include documentation of regular and timely discussions with qualified faculty or counselors.
- e. Maintain student records for each student enrolled in each program.
- f. Notify the NREMT of each student's successful completion of a training course to ensure NREMT cognitive examination eligibility.
- g. Verify that a student completes all training program requirements before being eligible to attempt the cognitive and psychomotor certification examinations.
- h. Report to the NREMT successful completion of psychomotor examination of each EMR and EMT student to ensure NREMT registration eligibility.
- i. Verify that a student completes all training program coursework, completes the cognitive and psychomotor testing and possesses a current certification with the NREMT before making application to the department for an initial Iowa emergency medical care provider certification.
- j. Notify the department of the successful or unsuccessful status of each student at the completion of each training course.
- k. Ensure that students function and only perform skills or procedures learned in the training program until an Iowa emergency medical care provider certification is obtained.
- l. Ensure that a student is not substituted for the regular personnel of any affiliated medical facility or service program but may be employed while enrolled in the training program.

139.4(6) *Financing and administration.* Training programs shall:

- a. Have adequate financial resources to ensure the continued operation of the educational program(s) in which students are enrolled.
- b. Have a program evaluation process to gather and analyze data on the effectiveness of the program.
- c. Notify the department, in writing, of any change in ownership or control of the training program.
- d. Have liability insurance and offer liability insurance to students while they are enrolled in the training program.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20; ARC 5528C, IAB 3/24/21, effective 4/28/21; ARC 6070C, IAB 12/15/21, effective 1/19/22]

641—139.5(147A) Out-of-state training programs.

139.5(1) *Application, inspection and approval.*

- a. An out-of-state training program shall complete and submit to the department for review and approval the out-of-state training program self-assessment application. The application can be downloaded from the BETS website (www.idph.iowa.gov/BETS/EMS/provider-information).
- b. An out-of-state training program's approval by the department shall not exceed four years.
- c. An out-of-state training program seeking initial or renewal approval and graduating students at the paramedic level must also be accredited by, or must have submitted a self-study application to, the CAAHEP.
- d. An out-of-state training program shall be limited to utilization of clinical sites or field sites, or both, within Iowa.
- e. An authorized out-of-state training program shall provide the department with a current roster of students who will be participating in the clinical or field experience within the state of Iowa and, for each program, the sites where the students will be participating. This roster will be provided prior to commencement of any clinical or field experience.
- f. An out-of-state training program shall provide documentation of liability insurance for each student participating in the clinical or field setting within the state of Iowa.
- g. Failure to comply with these requirements may lead to disciplinary action or denial of utilization of clinical or field sites in Iowa.
- h. The department may perform an on-site inspection of the out-of-state training program's facilities and clinical and field resources as part of the initial or renewal review process.

- i.* The department without prior notification may make inspections at times, places and under such circumstances as it deems necessary to ensure compliance with Iowa Code chapter 147A and these rules.
- j.* No person shall interfere with the inspection activities of the department or its agents.
- k.* Interference with or failure to allow an inspection may be cause for disciplinary action regarding training program approval.
- l.* Representatives of the training program may be required to meet with the department at the time the application and inspection report are discussed.
- m.* A written report of department action and the department inspection report shall be sent to the training program.
- n.* A training program shall notify the department, in writing, of any change in ownership or control within 30 days.

139.5(2) *Out-of-state students.*

- a.* An out-of-state student shall be registered in good standing in an approved out-of-state training program.
- b.* An out-of-state student may perform any procedures and skills for which the student is receiving training provided that the procedure or skill is within the Iowa scope of practice of a comparable Iowa emergency medical care provider. The student shall be under the direct supervision of a physician or physician designee or under the remote supervision of a physician or physician designee with direct supervision by a preceptor designated and approved by the training program.
- c.* An out-of-state student shall not be substituted for personnel of any affiliated medical facility or service program.
- d.* An out-of-state student is not eligible to continue functioning as a student of the approved out-of-state training program in the clinical or field setting (1) if the student is not in good standing with the approved out-of-state training program, (2) once the student has met the training program's requirements, or (3) once the student has been approved for certification testing.
- e.* Once all training requirements are met and the out-of-state student acquires a valid NREMT certification, the student may apply for initial Iowa EMS certification as described in rule 641—131.3(147A).

[ARC 5143C, IAB 8/12/20, effective 9/16/20; Editorial change: IAC Supplement 11/18/20]

641—139.6(147A) Failure to comply with rules. Failure of a training program to comply with these rules may result in disciplinary action according to rule 641—139.9(147A).

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—139.7(147A) Temporary waivers. If during a period of authorization there is some occurrence that temporarily causes a training program to be in noncompliance with these rules, the department may grant a temporary waiver.

139.7(1) Waivers of these rules may be granted by the department to a currently authorized training program.

139.7(2) Requests for waivers shall apply only to the training program requesting the waiver and shall apply only to those requirements and standards for which the department is responsible.

139.7(3) A training program shall apply for a waiver in accordance with 641—Chapter 178.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—139.8(147A) Continuing education providers—approval, record keeping and inspection.

139.8(1) A training program may conduct continuing education courses utilizing training program instructors.

139.8(2) Each training program shall assign a sponsor number to each core continuing education course using an assignment system approved by the department.

139.8(3) Course approval shall be completed prior to the course's being offered.

139.8(4) Each training program shall maintain a participant record that includes, as a minimum:

- a.* Name.
- b.* Address.

- c. Certification number.
- d. Course sponsor number.
- e. Course instructor.
- f. Date of course.
- g. CEHs awarded.

139.8(5) The department may request additional information or inspect the records of any continuing education provider who is currently approved or who is seeking approval.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

641—139.9(147A) Discipline—denial, citation and warning, probation, suspension, or revocation of training program approval or renewal.

139.9(1) This rule is not subject to waiver pursuant to 641—Chapter 178 or any other provision of law.

139.9(2) Method of discipline. The department has the authority to impose the following disciplinary sanctions against a training program:

- a. Issue a citation and warning.
- b. Impose a period of probation under specific conditions.
- c. Prohibit permanently, until further order of the department, or for a specific period, a program's ability to engage in specific procedures, methods, acts or activities incident to the practice of the profession.
- d. Suspend an authorization until further order of the department or for a specific period.
- e. Deny an application for authorization.
- f. Revoke an authorization.
- g. Impose such other sanctions as allowed by law and as may be appropriate.

139.9(3) The department may impose any of the disciplinary sanctions provided in subrule 139.9(2) when it finds that the training program or applicant has failed to meet the applicable provisions of these rules or has committed any of the following acts or offenses:

- a. Fraud in procuring approval or renewal.
- b. Falsification or failure to document training or continuing education records.
- c. Suspension or revocation of approval to provide emergency medical care training or other disciplinary action taken pursuant to Iowa Code chapter 147A. A certified copy of the record or order of suspension, revocation or disciplinary action is conclusive or prima facie evidence.
- d. Engaging in any conduct that subverts or attempts to subvert a department investigation.
- e. Failure to respond within 30 days of receipt of communication from the department which was sent by registered or certified mail.
- f. Failure to comply with a subpoena issued by the department or failure to cooperate with an investigation of the department.
- g. Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- h. Submission of a false report of continuing education or failure to submit the quarterly report of continuing education.
- i. Knowingly aiding, assisting or advising a person to unlawfully practice EMS.
- j. Representing itself as an approved training program or continuing education provider when approval has been suspended or revoked or when approval has lapsed or has been placed on inactive status.
- k. Using an unqualified individual as an instructor or evaluator.
- l. Allowing verbal or physical abuse of a student or staff.
- m. Failing to verify registration of a student with the department within the timeline established by the department or allowing an unregistered student to function in a clinical environment.
- n. A training program provider or continuing education provider shall not sexually harass a patient, student, or coworker. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature communicated in person, in writing, via a third person or through electronic communication.
- o. Betrayal of a professional confidence.

- p.* Engaging in a professional conflict of interest.
- q.* Discrimination. A training program or continuing education provider shall not practice, condone, or facilitate discrimination against a patient, student, or supervisee on the basis of race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability, diagnosis, or social or economic status.
- r.* Failure to comply with the 2015 Standards and Guidelines for the Accreditation of Educational Programs in the Emergency Medical Services Professions published by the Commission on Accreditation of Allied Health Education Programs.

[ARC 5143C, IAB 8/12/20, effective 9/16/20; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—139.10(147A) Complaints, investigations and appeals.

139.10(1) All complaints regarding an emergency medical care student, training programs or continuing education providers or those purporting to be or operating as the same shall be reported to the department in writing. The address is Iowa Department of Public Health, Bureau of Emergency and Trauma Service, Lucas State Office Building, Des Moines, Iowa 50319-0075.

139.10(2) Any emergency medical care provider, emergency medical care student, training program or continuing education provider who has knowledge of an emergency medical care provider or service program that has violated Iowa Code chapter 147A, 641—Chapter 132 or these rules shall report such information to the department.

139.10(3) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

139.10(4) A determination of mental incompetence by a court of competent jurisdiction automatically suspends a certificate for the duration of the certificate unless the department orders otherwise.

139.10(5) Notice of denial, issuance of a citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, probation, suspension or revocation shall be served by certified mail, return receipt requested, or by personal service.

139.10(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

139.10(7) Upon receipt of a request for hearing, the department shall forward the request within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

139.10(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10.

139.10(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 139.10(10).

139.10(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

139.10(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a.* All pleadings, motions, and rules.
- b.* All evidence received or considered and all other submissions by recording or transcript.
- c.* A statement of all matters officially noticed.
- d.* All questions and offers of proof, objections and rulings on them.
- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the administrative law judge.

139.10(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

139.10(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

139.10(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

139.10(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

139.10(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, the news media or employer.

[ARC 5143C, IAB 8/12/20, effective 9/16/20]

These rules are intended to implement Iowa Code chapter 147A.

CHAPTER 140
EMERGENCY MEDICAL SERVICES SYSTEM DEVELOPMENT GRANTS FUND

641—140.1(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“Ambulance service” means ambulance service as defined in 641—132.1(147A).

“CEHs” means CEH as defined in 641—131.1(147A).

“Continuing education” means continuing education as defined in 641—131.1(147A).

“County EMS association” means a countywide group of EMS providers and various agency and organization representatives and consumers who provide leadership for the local EMS system on needs and objectives. The county EMS association should also include representatives of services located in a neighboring county if service is provided on a regular basis to residents of the county receiving funding.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Emergency medical care provider” means emergency medical care provider as defined in 641—131.1(147A).

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“EMS course” means a course for emergency medical care personnel pursuant to Iowa Code section 147A.4, subsection 2.

“Fiscal year” means the 12-month period beginning July 1 and ending June 30.

“Infrastructure” means those elements that make up an EMS system.

“Nontransport service” means nontransport service as defined in 641—132.1(147A).

“Regional EMS council” means a multicounty nonprofit corporation whose purpose is to facilitate EMS development on a regional basis.

“Service program” means service program as defined in 641—131.1(147A).

“Strategic plan” means a document produced via a multiagency effort to evaluate and define needs and goals to improve the local EMS system.

“Training” means EMS-related courses designed and intended for EMS providers and includes any item used in training including, but not limited to, slides, films, mannequins, emergency care devices, books and other items pertinent and necessary for training purposes.

[ARC 0756C, IAB 5/29/13, effective 7/3/13]

641—140.2(135) Purpose. The EMS system development grant is intended to supplement EMS funds at the regional, county or local level to promote EMS system development.

641—140.3(135) County EMS associations. Each county shall have a county EMS association, council or board to develop and maintain the countywide EMS system strategic plan and to provide leadership on related EMS system development funding needs and objectives.

641—140.4(135) County EMS system development grants. Grants for EMS system development proposals at the regional, county, and local level are available through a grant process from the department to county boards of supervisors or local boards of health for equipment, training, and support of infrastructure needs as identified in the countywide EMS strategic plan and the department system standards. County boards of supervisors or local boards of health may not take any administrative fee from these funds to support their work under this rule. County recipients of funds may subcontract work under this agreement to a county EMS association. Funds for training will be used to train members of a service program that provides service on a regular basis to residents of the county being funded. Funds for equipment require a \$1 match of regional, county, or local funds for each \$1 of EMS system development grant funds.

140.4(1) Eligible costs. Costs which are eligible for EMS system development grant expenditures as defined in the request for proposal (RFP) include:

- a. Training.

(1) Reimbursement for initial training tuition, fees and materials up to an amount that is the lowest fee charged by the training entity following successful completion of an EMS course. Practical and written examination fees may also be included.

(2) Payment of continuing education tuition, fees and materials. Education provided by an EMS service program for the general public is an allowable expense.

(3) Payment for EMS training aids.

b. Other equipment as defined by the RFP.

c. Infrastructure support.

(1) Development and enhancement of EMS systems.

(2) Office equipment and supplies necessary to coordinate a countywide EMS system.

(3) Personnel services for staffing to provide countywide continuous quality improvement and medical direction.

The title to any EMS equipment purchased with these funds shall not lie with the department, but shall be determined by the county.

140.4(2) *Ineligible costs.* Costs which are not eligible for funding include, but are not limited to, the following:

a. Certification/recertification fees.

b. Building and construction costs.

c. Debt amortization.

d. Land.

e. Rent.

f. Utilities.

g. Vehicles including, but not limited to, ambulances, fire apparatus, boats, rescue/first response vehicles, snowmobiles and vehicle parts.

[ARC 0756C, IAB 5/29/13, effective 7/3/13]

641—140.5(135) Disbursement of funds. Rescinded IAB 2/2/05, effective 3/9/05.

641—140.6(135) Application denial or partial denial—appeal. Rescinded IAB 2/2/05, effective 3/9/05.

These rules are intended to implement Iowa Code section 135.25.

[Filed 2/26/98, Notice 9/10/97—published 3/25/98, effective 4/29/98]

[Filed emergency 5/8/02—published 5/29/02, effective 5/8/02]

CHAPTER 141
LOVE OUR KIDS GRANT

641—141.1(321) Definitions. For the purpose of these rules, the following definitions shall apply:

“Applicant” means an individual, organization, or entity that has as its responsibility the development, promotion, and implementation of injury prevention and education initiatives for children and who has submitted an application for a love our kids grant.

“Department” means the Iowa department of public health.

“Project period” means the period of time which the department intends to support the project.

“Service program” means any medical care ambulance service or nontransport service that has received authorization by the department.

[ARC 2477C, IAB 3/30/16, effective 5/5/16]

641—141.2(321) Purpose. The purpose of the love our kids grant is to provide grant funding to statewide, regional and local agencies and service programs that have as their responsibility the development, promotion, and implementation of injury prevention and education initiatives for children in Iowa.

641—141.3(321) Funding limitations. Grants awarded under this program shall be subject to the guidelines within the contract and the following, including but not limited to:

141.3(1) Up to 10 percent of the funds generated by this program may be retained by the department for program management.

141.3(2) Rescinded IAB 12/6/06, effective 11/8/06.

141.3(3) Following the disbursement of the funds pursuant to subrule 141.3(1), funding may be made available to statewide, regional and local agencies or service programs that are responsible for development, promotion, and implementation of injury prevention and education initiatives for children. To the extent possible, funds shall be awarded and equally distributed to applicants across all geographic areas of the state.

141.3(4) Expenditures occurring prior to the project period are not eligible for reimbursement.

141.3(5) Grant awards shall be subject to the availability of funds.

[ARC 2477C, IAB 3/30/16, effective 5/5/16]

641—141.4(321) Use of funds. Funds may be used for injury prevention initiatives specified within the guidelines for children aged birth to 21, including but not limited to:

1. Education and training materials;
2. Equipment, supplies, and materials;
3. Public information and education campaigns;
4. Conferences/seminars/workshops;
5. Contractual services;
6. Personnel costs.

[ARC 2477C, IAB 3/30/16, effective 5/5/16]

641—141.5(321) Application process. An application for a love our kids grant is required. Applications are available from the Iowa Department of Public Health, Bureau of Emergency and Trauma Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. The application process is as follows:

141.5(1) Applications from qualified applicants shall be submitted to the department in accordance with the department’s approved application process.

141.5(2) The department shall review the application and may request clarification, approve the application, or deny the application.

[ARC 2477C, IAB 3/30/16, effective 5/5/16]

641—141.6(321) Application denial—appeal. An applicant may appeal the denial of a timely submitted application. Appeals shall be conducted pursuant to 641—Chapter 176.

[ARC 2477C, IAB 3/30/16, effective 5/5/16]

These rules are intended to implement Iowa Code section 147A.4 and Iowa Code Supplement section 321.34.

CHAPTER 142
OUT-OF-HOSPITAL DO-NOT-RESUSCITATE ORDERS

641—142.1(144A) Definitions. For the purpose of these rules, the following definitions shall apply:

“Adult” means an individual 18 years of age or older.

“Attending physician” means a physician selected by, or assigned to, the patient who has primary responsibility for the treatment and care of the patient.

“Attending physician assistant” means the physician assistant selected by, or assigned to, the patient who has primary responsibility for the treatment and care of the patient.

“Comfort care” means care within the scope of the health care provider’s training and certification to alleviate pain and suffering, but does not include resuscitative measures.

“Department” means the Iowa department of public health.

“Emergency medical care” means such medical procedures as:

1. Administration of intravenous solutions.
2. Intubation.
3. Performance of cardiac defibrillation and synchronized cardioversion.
4. Administration of emergency drugs as provided by rule by the department.
5. Any other medical procedure approved by the department, by rule, as appropriate to be performed by emergency medical care providers who have been certified in that procedure.

“EMS provider” means an emergency medical care provider as defined in Iowa Code section 147A.1.

“Health care provider” means a person, including an emergency medical care provider, who is licensed, certified, or otherwise authorized or permitted by the law of this state to administer health care in the ordinary course of business or in the practice of a profession.

“Hospital” means any hospital licensed under the provisions of Iowa Code section 135B.1.

“Life-sustaining procedure” means any medical procedure, treatment, or intervention, including resuscitation, which utilizes mechanical or artificial means to sustain, restore or supplant a spontaneous vital function, and when applied to a patient in a terminal condition, would serve only to prolong the dying process. “Life-sustaining procedure” does not include the provision of nutrition or hydration except when required to be provided parenterally or through intubation or the administration of medication or performance of any medical procedure deemed necessary to provide comfort care or to alleviate pain.

“Medical direction” means direction, advice, or orders provided by a medical director, supervising physician, or physician designee (in accordance with written parameters and protocols) to emergency medical care providers.

“Medical director” means any physician licensed under Iowa Code chapter 148 who shall be responsible for overall medical direction of the service program and who has completed a medical director workshop, sponsored by the department, within one year of assuming duties.

“On-line medical direction” means immediate medical direction provided directly to service program emergency medical care providers, in accordance with written parameters and protocols, by the medical director, supervising physician or physician designee either on scene or by any telecommunications system.

“Out-of-hospital do-not-resuscitate identifier” or *“OOH DNR identifier”* means a durable yet easily removable unique identification approved by the department and worn by a patient who has an out-of-hospital do-not-resuscitate order.

“Out-of-hospital do-not-resuscitate order” or *“OOH DNR order”* means a written order on a form approved by the department, signed by an attending physician, executed in accordance with the requirements of Iowa Code section 144A.7A and issued consistent with Iowa Code section 144A.2, that directs the withholding or withdrawal of resuscitation when an adult patient in a terminal condition is outside the hospital.

“Out-of-hospital do-not-resuscitate protocol” or *“OOH DNR protocol”* means the statewide protocol approved by the department and intended to avoid unwarranted resuscitation by emergency medical care providers when a valid out-of-hospital do-not-resuscitate order or identifier is encountered.

“Patient” means any individual who is sick, injured, or otherwise incapacitated.

“Physician” means any individual licensed under Iowa Code chapter 148.

“Physician assistant” or “PA” means an individual licensed pursuant to Iowa Code chapter 148C.

“Physician designee” means any registered nurse licensed under Iowa Code chapter 152, or any physician assistant licensed under Iowa Code chapter 148C and approved by the board of physician assistants. The physician designee acts as an intermediary for a supervising physician in accordance with written policies and protocols in directing the actions of emergency medical care providers.

“Qualified patient” means any adult patient as defined in Iowa Code section 144A.2.

“Registered nurse” or “RN” means an individual licensed pursuant to Iowa Code chapter 152.

“Resuscitation” means any medical intervention that utilizes mechanical or artificial means to sustain, restore, or supplant a spontaneous vital function, including but not limited to chest compression, defibrillation, intubation, and emergency drugs intended to alter cardiac function or otherwise to sustain life.

“Service program” or “service” means any medical care ambulance service or nontransport service that has received authorization by the department.

“Supervising physician” means any physician licensed under Iowa Code chapter 148, 150, or 150A. The supervising physician is responsible for medical direction of emergency medical care providers when such providers are providing emergency medical care.

“Terminal condition” means an incurable or irreversible condition that, without the administration of life-sustaining procedures, will, in the opinion of the attending physician, result in death within a relatively short period of time or a state of permanent unconsciousness from which, to a reasonable degree of medical certainty, there can be no recovery.

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—142.2(144A) Purpose. These rules direct EMS providers and service programs on the processes for the recognition of OOH DNR orders or identifiers and implementation of the OOH DNR protocol. In addition, these rules set forth guidelines for consideration by health care providers and organizations to help ensure uniform and orderly understandings, processes and procedures for the use and implementation of OOH DNR orders consistent with the provisions of Iowa Code chapter 144A.

641—142.3(144A,147A) Responsibilities of the department.

142.3(1) OOH DNR physician or physician assistant order. The department designates the OOH DNR order form contained in Appendix A as the uniform OOH DNR order form to be used statewide. If an attending physician or attending physician assistant issues an OOH DNR order for a qualified patient, the physician or physician assistant shall use the form contained in Appendix A.

142.3(2) OOH DNR personal identifier. The department designates the identifier supplied by MedicAlert® as the uniform personal identifier to be used for mobile qualified patients statewide. Instructions for obtaining a uniform personal identifier are contained in Appendix A.

142.3(3) OOH DNR protocol. The department designates the OOH DNR protocol contained in Appendix B as the uniform protocol to be used by EMS providers in implementing an OOH DNR order.

142.3(4) Appendix A and Appendix B forms. Forms referenced in subrules 142.3(1) through 142.3(3) are available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or through the bureau of EMS’s website at www.idph.state.ia.us/ems.

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—142.4(144A,147A) EMS providers.

142.4(1) Uniform protocol. EMS providers shall act in accordance with the department’s OOH DNR protocol when implementing an OOH DNR order. EMS service programs shall incorporate the OOH DNR protocol as part of their service protocols and, using educational materials consistent with the curriculum developed and approved by the department, shall inform and educate EMS providers on the protocol’s requirements as well as the requirements of Iowa Code chapter 144A and these rules.

142.4(2) Responsibility of the EMS provider. The EMS provider responding outside a hospital as a member of a service program shall:

a. Evaluate the patient’s status and needs through an assessment consistent with the provider’s training and certification.

- b.* Determine the existence of an OOH DNR order or that the patient is wearing an OOH DNR identifier.
- c.* Honor the OOH DNR order or OOH DNR identifier worn by the patient.
- d.* Discontinue resuscitation if the OOH DNR order or OOH DNR identifier worn by the patient is discovered after resuscitation has begun.
- e.* Follow the OOH DNR protocol.
- f.* Provide comfort care to the patient at all times.
- g.* Contact on-line medical direction for further instructions as necessary to provide appropriate patient care.
- h.* If uncertainty exists regarding the validity or applicability of the OOH DNR order or identifier, the EMS provider shall provide the necessary and appropriate resuscitation.
- i.* Document compliance or noncompliance with the OOH DNR order and the reasons for not complying with the order, including evidence that the order was revoked or uncertainty regarding the validity or applicability of the order.

641—142.5(144A) Guidelines for non-EMS health care providers, patients, and organizations. In order to encourage understanding and implementation of OOH DNR orders and protocols throughout Iowa and honor a qualified patient's wishes and intent regarding the provision of life-sustaining procedures in an out-of-hospital setting consistent with the requirements of Iowa Code chapter 144A, the following guidelines should be considered.

142.5(1) *Attending physicians or attending physician assistants who issue OOH DNR orders.* The attending physician or attending physician assistant should ensure that the following are accomplished:

- a.* Establish that the patient is qualified because the patient:
 - (1) Is an adult; and
 - (2) Has a terminal condition.
- b.* Explain to the patient or the individual legally authorized to act on the patient's behalf the implications of an OOH DNR order.
- c.* If the qualified patient or individual legally authorized to act on the patient's behalf decides that the patient should not be resuscitated, the attending physician or attending physician assistant may issue the OOH DNR order on the prescribed uniform order form. The order will direct health care providers to withhold or withdraw resuscitation.
- d.* Explain to the qualified patient or the individual legally authorized to act on the patient's behalf how the OOH DNR order is revoked.
- e.* Include a copy of the order in the qualified patient's medical record.
- f.* Provide a copy of the order to the qualified patient or the individual legally authorized to act on the patient's behalf.

142.5(2) *Qualified patients or legally authorized persons.* A qualified patient or a person legally authorized to act on a qualified patient's behalf should:

- a.* Make an informed decision concerning resuscitation in the face of a terminal condition.
- b.* Ensure that the qualified patient's family members are aware of this decision and inform them of the location of the OOH DNR order and the purpose of an OOH DNR identifier.
- c.* Understand the process for revocation as described in rule 641—142.6(144A).

142.5(3) *Non-EMS health care providers.* A non-EMS health care provider contemplating resuscitation for a patient should:

- a.* Evaluate the patient's status and needs through an assessment consistent with the provider's training, certification and licensure.
- b.* Determine that the presenting condition is within the scope of the patient's terminal condition and is not the result of a motor vehicle collision, fire, mass casualty or other cause of a sudden accident or injury.
- c.* Determine the existence of an OOH DNR order or that the patient is wearing an OOH DNR identifier.
- d.* Honor the OOH DNR order or OOH DNR identifier worn by the patient.

- e. Discontinue resuscitation if the OOH DNR order or OOH DNR identifier worn by the patient is discovered after resuscitation has begun.
- f. Provide comfort care to the patient at all times.
- g. If uncertainty exists regarding the validity or applicability of the OOH DNR order or identifier, the health care provider shall provide the necessary and appropriate resuscitation.
- h. Document compliance or noncompliance with the OOH DNR order and the reasons for not complying with the order, including evidence that the order was revoked or uncertainty regarding the validity or applicability of the order or OOH DNR identifier.

142.5(4) Hospitals. A hospital licensed under Iowa Code chapter 135B:

- a. Shall not be precluded from honoring an OOH DNR order entered in accordance with this chapter and in compliance with established hospital policies and protocols.
- b. Should, to avail itself of the immunities provided within Iowa Code chapter 142, establish such policies and protocols to address an OOH DNR order or identifier encountered on a person who presents to the emergency department or in any other area within the facility if the person presents as a patient or visitor.
- c. Should integrate policies and procedures with the OOH DNR protocol for hospital-based ambulance service programs, if present.

142.5(5) Other health care organizations. A nursing home, home health care agency, hospice, or other health care organization should establish policies and protocols consistent with these rules to address admitted patients who have OOH DNR orders.

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—142.6(144A) Revocation of the out-of-hospital do-not-resuscitate order. An OOH DNR order is deemed revoked at any time that a patient, or an individual authorized to act on the patient's behalf as designated on the OOH DNR order, is able to communicate in any manner the intent that the order be revoked, without regard to the mental or physical condition of the patient. A revocation is only effective as to the health care provider upon communication to that provider by the patient, an individual authorized to act on the patient's behalf as designated in the OOH DNR order, or by another person to whom the revocation is communicated by the patient.

641—142.7(144A) Personal wishes of family members or other individuals who are not authorized to act on the patient's behalf. The personal wishes of family members or other individuals who are not authorized in the order to act on the patient's behalf shall not supersede a valid OOH DNR order.

641—142.8(144A) Transfer of patients.

142.8(1) An attending physician or attending physician assistant who is unwilling to comply with an OOH DNR order or who is unwilling to comply with the provisions of Iowa Code section 144A.7A shall take all reasonable steps to effect the transfer of the patient to another physician or physician assistant.

142.8(2) If the policies of a hospital, nursing home, home health care agency, hospice or other health care organization preclude compliance with the OOH DNR order of a qualified patient, the provider shall take all reasonable steps to effect the transfer of the patient to an organization in which the provisions of Iowa Code section 144A.7A can be carried out.

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

641—142.9(144A) Application to existing orders.

142.9(1) An OOH DNR order or similar order executed prior to September 10, 2003, is valid and shall be honored in accordance with the then-applicable provisions of the law.

142.9(2) Health care providers may honor an OOH DNR order or identifier from another state if it can be validated and applied in a manner consistent with the OOH DNR order or identifier prescribed in these rules. In cases where there is uncertainty, clarification should be sought through on-line medical direction or resuscitation efforts should be initiated.

These rules are intended to implement Iowa Code sections 144A.7A and 147A.4.

[Filed ARC 7550B (Notice ARC 7357B, IAB 11/19/08), IAB 2/11/09, effective 3/18/09]

[Filed ARC 6847C (Notice ARC 6645C, IAB 11/16/22), IAB 2/8/23, effective 3/15/23]

APPENDIX A

**Iowa Department of Public Health
OUT-OF-HOSPITAL DO-NOT-RESUSCITATE ORDER
(Please type or print)**

Date of Order: ____/____/____

Patient Information:

Name: (Last)____(First)____(Middle)____

Address:____(City)____(Zip)____

Date of Birth: ____/____/____

Gender (Circle): M or F

Name of Hospice or Care Facility (if applicable): _____

Attending Physician or Physician Assistant Order

As the attending physician or attending physician assistant for the above-named patient, I certify that this individual is over 18 years of age and has a terminal diagnosis. After consultation with this patient (or the patient's legal representative), I hereby direct any and all health care providers, including qualified emergency medical services (EMS) personnel, to withhold or withdraw the following life-sustaining procedures in accordance with Iowa law (Iowa Code chapter 142A):

- Cardiopulmonary Resuscitation/Cardiac Compression (Chest Compressions).
- Endotracheal Intubation/Artificial or Mechanical Ventilation (Advance Airway Management).
- Defibrillation and Related Procedures.
- Use of Resuscitation Drugs.

This directive does NOT apply to other medical interventions for comfort care.

**Signature of Attending Physician (MD, DO) or
Attending Physician Assistant**

_____/_____/_____
Date

**Printed Name of Attending Physician or Attending
Physician Assistant**

(____)____-_____
**Physician's or Physician Assistant's
Telephone (Emergency)**

To the extent that it is possible, a person designated by the patient may revoke this order on the patient's behalf. If the patient wishes to authorize any other person(s) to revoke this order, the patient MUST list those persons' names below:

Name: _____

Name: _____

Name: _____

Name: _____

Patients, please note: Directions for obtaining a uniform identifier are listed on the back of this form. The uniform identifier is the key way the health care provider and/or EMS personnel can quickly recognize that you have an Out-of-Hospital Do-Not-Resuscitate order. If you are not wearing an identifier, the health care provider and/or EMS personnel may not realize that you do not want to be resuscitated.

Physicians or physician assistants, please note: Information regarding the completion of an Out-of-Hospital Do-Not-Resuscitate order is on the back of this form.

APPENDIX A

Directions for obtaining a uniform identifier:

The uniform identifier may be obtained through MedicAlert®¹, which requires:

1. A completed MedicAlert® application, which is available in physician or physician assistant offices or through MedicAlert® by phoning (800)432-5378 or the website www.medicalert.org, and fee.
2. A copy of this completed OOH DNR order, which must accompany the MedicAlert® application or be sent to MedicAlert® prior to the identifier's being mailed.

¹*MedicAlert® is a nonprofit 501C membership organization.*

Suggested guidelines for physicians or physician assistants:

1. Please review the Iowa Out-of-Hospital Do-Not-Resuscitate order and related protocol with the patient/patient's legal representative(s). The following points may be helpful:

- Patient/patient's legal representative(s) listed on this order must understand the significance of this order, that in the event the patient's heart or breathing stops or malfunctions, the anticipated result of this order is death.
- Patient/patient's legal representative(s) listed on this order may revoke this directive at any time. However, the desire to revoke must be communicated to the EMS or other health care professionals at the scene.
- It is important to emphasize that this order does not apply to medical interventions to make the patient more comfortable.
- The importance of wearing the uniform identifier for those qualified patients who would benefit from the mobility this offers should be stressed. It is also helpful to walk patients through the process they must follow to acquire the identifier.

2. Provide a copy of this order to the patient/patient's legal representative(s) listed on this order and place the original in the patient's medical records.

The OOH DNR Order form is available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or through the Bureau of EMS's website idph.iowa.gov/BETS/EMS/rules.

[ARC 7550B, IAB 2/11/09, effective 3/18/09]

APPENDIX B

EMS OUT-OF-HOSPITAL DO-NOT-RESUSCITATE PROTOCOL

Purpose: This protocol is intended to avoid unwarranted resuscitation by emergency care providers in the out-of-hospital setting for a *qualified patient*.¹ There must be a valid Out-of-Hospital Do-Not-Resuscitate (OOH DNR) order signed by the qualified patient's attending physician or physician assistant or the presence of the OOH DNR identifier indicating the existence of a valid OOH DNR order.

No resuscitation: Means withholding any medical intervention that utilizes mechanical or artificial means to sustain, restore, or supplant a spontaneous vital function, including but not limited to:

1. Chest compressions,
2. Defibrillation,
3. Esophageal/tracheal/double-lumen airway; endotracheal intubation, or
4. Emergency drugs to alter cardiac or respiratory function or otherwise sustain life.

Patient criteria: The following patients are recognized as qualified patients to receive no resuscitation:

1. The presence of the uniform OOH DNR order or uniform OOH DNR identifier, or
2. The presence of the attending physician or attending physician assistant to provide direct verbal orders for care of the patient.

The presence of a signed physician or physician assistant order on a form other than the uniform OOH DNR order form approved by the department may be honored if approved by the service program EMS medical director. However, the immunities provided by law apply only in the presence of the uniform OOH DNR order or uniform OOH DNR identifier. When the uniform OOH DNR order or uniform OOH DNR identifier is not present, contact must be made with on-line medical control and on-line medical control must concur that no resuscitation is appropriate.

Revocation: An OOH DNR order is deemed revoked at any time that a patient, or an individual authorized to act on the patient's behalf as listed on the OOH DNR order, is able to communicate in any manner the intent that the order be revoked. The personal wishes of family members or other individuals who are not authorized in the order to act on the patient's behalf shall not supersede a valid OOH DNR order.

Comfort Care (♥): When a patient has met the criteria for no resuscitation under the foregoing information, the emergency care provider should continue to provide that care which is intended to make the patient comfortable (a.k.a. ♥ Comfort Care). Whether other types of care are indicated will depend upon individual circumstances for which medical control may be contacted by or through the responding ambulance service personnel.

♥ Comfort Care may include, but is not limited to:

1. Pain medication.
2. Fluid therapy.
3. Respiratory assistance (oxygen and suctioning).

¹*Qualified patient* means an adult patient determined by an attending physician or attending physician assistant to be in a terminal condition for which the attending physician or attending physician assistant has issued an Out-of-Hospital DNR order in accordance with the law. (Rule 641—142.1(144A), definitions)

[ARC 6847C, IAB 2/8/23, effective 3/15/23]

CHAPTER 143
AUTOMATED EXTERNAL DEFIBRILLATOR MAINTENANCE

641—143.1(613) Purpose. These rules establish standards for the maintenance of automated external defibrillators for a person or entity that owns, manages or is otherwise responsible for the premises on which an automated external defibrillator is located if the person or entity maintains the automated external defibrillator in accordance with Iowa Code section 613.17.

[ARC 7551B, IAB 2/11/09, effective 3/18/09; ARC 3396C, IAB 10/11/17, effective 11/15/17]

641—143.2(613) Definition. For the purposes of these rules, the following definition shall apply:

“Automated external defibrillator” or “AED” means an external semiautomatic device that determines whether defibrillation is required.

[ARC 7551B, IAB 2/11/09, effective 3/18/09; ARC 3396C, IAB 10/11/17, effective 11/15/17]

641—143.3(613) AED maintenance. The person or entity maintaining the AED shall:

143.3(1) Ensure that the AED is maintained and inspected in accordance with the manufacturer’s guidelines.

143.3(2) Maintain records of all maintenance and inspections of the AED for the usable life of the device.

143.3(3) Ensure that the AED is programmed to conform to nationally accepted guidelines for treatment of cardiac arrest patients.

[ARC 7551B, IAB 2/11/09, effective 3/18/09; ARC 3396C, IAB 10/11/17, effective 11/15/17]

These rules are intended to implement Iowa Code section 613.17.

[Filed emergency 11/10/04—published 12/8/04, effective 11/10/04]

[Filed 1/13/05, Notice 12/8/04—published 2/2/05, effective 3/9/05]

[Filed ARC 7551B (Notice ARC 7358B, IAB 11/19/08), IAB 2/11/09, effective 3/18/09]

[Filed ARC 9358B (Notice ARC 9241B, IAB 11/17/10), IAB 2/9/11, effective 3/16/11]

[Filed ARC 3396C (Notice ARC 3204C, IAB 7/19/17), IAB 10/11/17, effective 11/15/17]

CHAPTER 144
EMERGENCY MEDICAL SERVICES—AIR MEDICAL SERVICE
PROGRAM AUTHORIZATION

641—144.1(147A) Definitions. For the purposes of this chapter, the following definitions shall apply:

“Air ambulance” means any privately or publicly owned rotorcraft or fixed-wing aircraft which may be specifically designed, modified, constructed, equipped, staffed and used regularly to transport the sick, injured or otherwise incapacitated who are in need of out-of-hospital emergency medical care or whose condition requires treatment or continuous observation while being transported.

“Air ambulance crew member” means an individual who has been trained to provide emergency and nonemergency medical care at the certification or licensure levels recognized by the department and who has been issued a certificate or license by the department.

“Air ambulance service” means any privately or publicly owned service program which utilizes rotorcraft or fixed-wing aircraft in order to provide patient transportation and emergency medical services.

“Continuous quality improvement” or *“CQI”* means a program that is an ongoing process to monitor standards at all EMS operational levels including the structure, process, and outcomes of the patient care event.

“Critical care paramedic” or *“CCP”* means a currently certified paramedic specialist who has successfully completed a critical care course of instruction approved by the department and has received endorsement from the department as a critical care paramedic.

“Critical care transport” or *“CCT”* means specialty care patient transportation when medically necessary, for a critically ill or injured patient needing CCP skills, between medical care facilities, and provided by an authorized ambulance service that is approved by the department to provide critical care transportation and staffed by one or more critical care paramedics or other health care professional in an appropriate specialty area.

“Deficiency” means noncompliance with Iowa Code chapter 147A or these rules.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Direct supervision” means services provided by an EMS provider in a hospital setting or other health care entity in which health care is ordinarily performed when in the personal presence of a physician or under the direction of a physician who is immediately available or under the direction of a physician assistant or registered nurse who is immediately available and is acting consistent with adopted policies and protocols of a hospital or other health care entity.

“Emergency medical care” means such medical procedures as:

1. Administration of intravenous solutions.
2. Intubation.
3. Performance of cardiac defibrillation and synchronized cardioversion.
4. Administration of emergency drugs as provided by protocol.
5. Any medical procedure authorized by 641—subrule 131.3(3).

“Emergency medical care provider” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“Emergency medical technician-basic” or *“EMT-B”* means an individual who has successfully completed the current United States Department of Transportation’s Emergency Medical Technician-Basic curriculum and department enhancements, has passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-B.

“Emergency medical technician-paramedic” or *“EMT-P”* means an individual who has successfully completed the current United States Department of Transportation’s (DOT) EMT-intermediate curriculum

or the 1985 or earlier DOT EMT-P curriculum, has passed the department's approved written and practical examinations, and is currently certified by the department as an EMT-P.

"Emergency medical transportation" means the transportation by ambulance of sick, injured or otherwise incapacitated persons who require emergency medical care.

"EMS advisory council" means a council appointed by the director to advise the director and develop policy recommendations concerning regulation, administration, and coordination of emergency medical services in the state.

"EMS system" means any specific arrangement of emergency medical personnel, equipment, and supplies designed to function in a coordinated fashion.

"Endorsement" means providing approval in an area related to emergency medical care including, but not limited to, CCP and emergency medical services.

"FAA" means Federal Aviation Administration.

"FAR" means Federal Aviation Regulation.

"Fixed-wing ambulance" means any privately or publicly owned fixed-wing aircraft specifically designed, modified, constructed, equipped, staffed and used regularly to transport the sick, injured or otherwise incapacitated who are in need of out-of-hospital emergency medical care or whose condition requires treatment or continuous observation while being transported.

"Hospital" means any hospital licensed under the provisions of Iowa Code chapter 135B.

"Inclusion criteria" means criteria determined by the department and adopted by reference to determine which patients are to be included in the Iowa EMS service program registry or the trauma registry.

"Iowa EMS Patient Registry Data Dictionary" means reportable data elements for all ambulance service responses and definitions determined by the department and adopted by reference.

"Medical direction" means direction, advice, or orders provided by a medical director, supervising physician, or physician designee (in accordance with written parameters and protocols) to emergency medical care personnel.

"Medical director" means any physician licensed under Iowa Code chapter 148, who shall be responsible for overall medical direction of the service program and who has completed a medical director workshop, sponsored by the department, within one year of assuming duties.

"Nonemergency transportation" means transportation that may be provided for those persons determined to need transportation only.

"NTSB" means National Transportation Safety Board.

"Off-line medical direction" means the monitoring of EMS providers through retrospective field assessments and treatment documentation review, critiques of selected cases with the EMS personnel, and statistical review of the system.

"On-line medical direction" means immediate medical direction provided directly to service program EMS providers, in accordance with written parameters and protocols, by the medical director, supervising physician or physician designee either on-scene or by any telecommunications system.

"Paramedic" or *"EMT-P"* means an emergency medical technician-paramedic.

"Paramedic specialist" or *"PS"* means an individual who has successfully completed the current United States Department of Transportation's EMT-Paramedic curriculum or equivalent, has passed the department's approved written and practical examinations, and is currently certified by the department as a paramedic specialist.

"Patient" means any individual who is sick, injured, or otherwise incapacitated.

"Patient care report" or *"PCR"* means a computerized or written report that documents the assessment and management of the patient by the emergency care provider in the out-of-hospital setting.

"Physician" means any individual licensed under Iowa Code chapter 148.

"Physician assistant" or *"PA"* means an individual licensed pursuant to Iowa Code chapter 148C.

"Physician designee" means any registered nurse licensed under Iowa Code chapter 152, or any physician assistant licensed under Iowa Code chapter 148C and approved by the board of physician assistants. The physician designee acts as an intermediary for a supervising physician in accordance with written policies and protocols in directing the care provided by emergency medical care providers.

“Preceptor” means an individual who has been assigned by the training program, clinical facility or service program to supervise students while the students are completing their clinical or field experience. A preceptor must be an emergency medical care provider certified at the level being supervised or higher, or must be licensed as a registered nurse, physician assistant or physician.

“Protocols” means written directions and orders, consistent with the department’s standard of care, that are to be followed by an emergency medical care provider in emergency and nonemergency situations. Protocols must be approved by the service program’s medical director and must address the care of both adult and pediatric patients.

“Registered nurse” or *“RN”* means an individual licensed pursuant to Iowa Code chapter 152.

“Reportable patient data” means data elements and definitions determined by the department and adopted by reference to be reported to the Iowa EMS service program registry or the trauma registry or a trauma care facility on patients meeting the inclusion criteria.

“Rotorcraft ambulance” means any privately or publicly owned rotorcraft specifically designed, modified, constructed, equipped, staffed and used regularly to transport the sick, injured or otherwise incapacitated who are in need of out-of-hospital emergency medical care or whose condition requires treatment or continuous observation while being transported.

“Service director” means an individual who is responsible for the operation and administration of a service program.

“Service program” or *“service”* means any medical care air ambulance service that has received authorization by the department.

“Service program area” means the geographic area of responsibility served by any given ambulance or nontransport service program.

“Student” means any individual enrolled in a training program and participating in the didactic, clinical, or field experience portions.

“Supervising physician” means any physician licensed under Iowa Code chapter 148. The supervising physician is responsible for medical direction of emergency medical care personnel when such personnel are providing emergency medical care.

“Training program” means an NCA-approved Iowa college, the Iowa law enforcement academy or an Iowa hospital approved by the department to conduct emergency medical care training.

“Transport agreement” means a written agreement between two or more service programs that specifies the duties and responsibilities of the agreeing parties to ensure appropriate transportation of patients in a given service area.

[ARC 8662B, IAB 4/7/10, effective 5/12/10]

641—144.2(147A) Authority of emergency medical care provider.

144.2(1) An emergency medical care provider who holds an active certification issued by the department may:

a. Render via on-line medical direction emergency and nonemergency medical care in those areas for which the emergency medical care provider is certified, as part of an authorized service program:

- (1) At the scene of an emergency;
- (2) During transportation to a hospital;
- (3) While in the hospital emergency department;
- (4) Until patient care is directly assumed by a physician or by authorized hospital personnel; and
- (5) During transfer from one entity where health care is normally provided to another.

b. Function in any hospital or any other entity in which health care is ordinarily provided only when under the direct supervision of a physician when:

- (1) Enrolled as a student in and approved by a training program;
- (2) Fulfilling continuing education requirements;
- (3) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided only when under the direct supervision of a physician as a member of an authorized service program, or in an individual capacity, by rendering lifesaving services in the facility in which employed or assigned pursuant to the emergency medical care provider’s certification and under direct supervision of a physician, physician assistant, or registered nurse. An emergency medical care provider shall not routinely function

without the direct supervision of a physician, physician assistant, or registered nurse. However, when the physician, physician assistant, or registered nurse cannot directly assume emergency care of the patient, the emergency medical care personnel may perform, without direct supervision, emergency medical care procedures for which certified, if the life of the patient is in immediate danger and such care is required to preserve the patient's life;

(4) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided only when under the direct supervision of a physician, as a member of an authorized service program, or in an individual capacity, to perform nonlifefaving procedures for which certified and designated in a written job description. Such procedures may be performed after the patient is observed by and when the emergency medical care provider is under the supervision of the physician, physician assistant, or registered nurse, including when the registered nurse is not acting in the capacity of a physician designee, and where the procedure may be immediately abandoned without risk to the patient.

144.2(2) When emergency medical care personnel are functioning in a capacity identified in paragraph 144.2(1)“a”144.2(1)“a,” they may perform emergency and nonemergency medical care without contacting a supervising physician or physician designee if written protocols have been approved by the service program medical director which clearly identify when the protocols may be used in lieu of voice contact.

144.2(3) An emergency medical care provider who has knowledge of an emergency medical care provider, service program or training program that has violated Iowa Code chapter 147A or these rules shall report such information to the department within 30 days.

[ARC 8662B, IAB 4/7/10, effective 5/12/10]

641—144.3(147A) Air ambulance service program—authorization and renewal procedures, inspections and transfer or assignment of certificates of authorization.

144.3(1) *General requirements for air ambulance authorization and renewal of authorization.*

a. An air ambulance service in this state that desires to provide emergency medical care in an out-of-hospital setting shall apply to the department for authorization to establish a program utilizing certified emergency medical care providers for delivery of care at the scene of an emergency or a nonemergency, during transportation to a hospital, during transfer from one medical care facility to another, or while in the hospital emergency department and until care is directly assumed by a physician or by authorized hospital personnel. Application for authorization shall be made on forms provided by the department. Applicants shall complete and submit the forms to the department at least 30 days prior to the anticipated date of authorization.

b. To renew service program authorization, the service program shall continue to meet the requirements of Iowa Code chapter 147A and these rules. The renewal application shall be completed and submitted to the department at least 30 days before the current authorization expires.

c. Applications for authorization and renewal of authorization may be obtained upon request to: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS website (idph.iowa.gov/BETS/EMS/application).

d. The department shall approve an application when the department is satisfied that the program proposed by the application will be operated in compliance with Iowa Code chapter 147A and these rules.

e. Service program authorization is valid for a period of three years from its effective date unless otherwise specified on the certificate of authorization or unless sooner suspended or revoked.

f. Service programs shall be fully operational upon the effective date and at the level specified on the certificate of authorization and shall meet all applicable requirements of Iowa Code chapter 147A and these rules. Deficiencies that are identified shall be corrected within a time frame determined by the department.

g. Any service program owner in possession of a certificate of authorization as a result of transfer or assignment shall continue to meet all applicable requirements of Iowa Code chapter 147A and these rules. In addition, the new owner shall apply to the department for a new certificate of authorization within 30 days following the effective date of the transfer or assignment.

h. Service programs that acquire and maintain current status with a nationally recognized EMS service program accreditation entity that meets or exceeds Iowa requirements may be exempted from the

service application/inspection process. A copy of the state service application and accreditation inspection must be filed with the department for approval.

144.3(2) *Out-of-state air ambulance service programs.*

a. Service programs located in other states which wish to provide emergency medical care in Iowa must meet all requirements of Iowa Code chapter 147A and these rules and must be authorized by the department except when:

- (1) Transporting patients from locations within Iowa to destinations outside of Iowa;
- (2) Transporting patients from locations outside of Iowa to destinations within Iowa;
- (3) Transporting patients to and from locations outside of Iowa when doing so requires travel through Iowa;
- (4) Responding to a request for mutual aid in this state; or
- (5) Making less than 30 EMS responses per year to locations within Iowa and then transporting the patients to destinations within Iowa.

b. An out-of-state service program that meets any of the exception criteria established in this subrule shall be authorized to provide emergency medical care by the state in which the program resides and shall provide the department with verification of current state authorization upon request.

144.3(3) *Air ambulance service program inspections.*

a. The department shall inspect each service program at least once every three years. The department without prior notification may make additional inspections at times, places and under such circumstances as it deems necessary to ensure compliance with Iowa Code chapter 147A and these rules.

b. The department may request additional information from or may inspect the records of any service program which is currently authorized or which is seeking authorization to ensure continued compliance or to verify the validity of any information presented on the application for service program authorization.

c. The department may inspect the patient care records of a service program to verify compliance with Iowa Code chapter 147A and these rules.

d. No person shall interfere with the inspection activities of the department or its agents pursuant to Iowa Code section 135.36.

e. Interference with or failure to allow an inspection by the department or its agents may be cause for disciplinary action in reference to service program authorization.

144.3(4) *Temporary service program authorization.*

a. A temporary service program authorization may be issued to services that wish to operate during special events that may need emergency medical care coverage at a level other than basic care. Temporary authorization is valid for a period of 30 days unless otherwise specified on the certificate of authorization or unless sooner suspended or revoked. Temporary authorization shall apply to those requirements and standards for which the department is responsible. Applicants shall complete and submit the necessary forms to the department at least 30 days prior to the anticipated date of need.

b. The service shall meet applicable requirements of these rules but may apply for a waiver using the criteria outlined in rule 641—144.7(147A).

c. The service shall submit a justification which demonstrates the need for the temporary service program authorization.

d. The service shall submit a report to the department within 30 days after the expiration of the temporary authorization which includes as a minimum:

- (1) Number of patients treated;
- (2) Types of treatment rendered;
- (3) Any operational or medical problems.

[ARC 8662B, IAB 4/7/10, effective 5/12/10; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—144.4(147A) Service program levels of care and staffing standards.

144.4(1) An air ambulance service program seeking authorization shall:

a. Apply for authorization at the following levels:

- (1) EMT-Basic.
- (2) Paramedic specialist.
- (3) Critical care transport.

- b. Conduct all air ambulance service flights under a minimum of FAR rules, Part 135.
 - c. Maintain an adequate number of aircraft and personnel to provide 24-hour-per-day, 7-day-per-week coverage. The number of aircraft and personnel to be maintained shall be determined by the service and shall be based upon, but not limited to, the following:
 - (1) Number of calls;
 - (2) Service area and population; and
 - (3) Availability of other services in the area.
 - d. Staff fixed-wing ambulances, at a minimum on each flight request, with the following staff while a patient is being transported:
 - (1) One health care provider who is certified or licensed in the state from which the aircraft launches and is certified as an EMT-Basic or higher level; and
 - (2) One FAA-certified commercial pilot who is appropriately rated in the aircraft being used for the transport.
 - e. Staff rotorcraft ambulances, at a minimum on each flight request, with the following staff while a patient is being transported:
 - (1) Two health care providers who are certified or licensed in the state from which the aircraft launches, one of whom must at a minimum be certified as a paramedic specialist; and
 - (2) One FAA-certified commercial pilot who is appropriately rated in the aircraft being used for the transport.
 - f. Train medical crew members in the following areas:
 - (1) Patient care limitations in flight.
 - (2) Altitude physiology.
 - (3) Appropriate utilization of air medical services.
 - (4) Communication system.
 - (5) Aircraft operations and safety.
 - (6) Emergency safety and survival.
 - (7) Prehospital scene response and safety.
 - (8) Crew resource management.
 - (9) Program flight risk assessment procedures.
 - g. Apply to the department to receive approval to provide critical care transportation based upon appropriately trained staff and approved equipment.
 - h. Ensure that the health care provider with the highest level of certification (on the transporting service) attends the patient, unless otherwise established by protocol approved by the medical director.
- 144.4(2)** Air ambulance service program operational requirements. Air ambulance service programs shall:
- a. Complete and maintain a patient care report concerning the care provided to each patient. Services shall provide, at a minimum, a verbal report upon delivery of a patient to a receiving facility and shall provide a complete PCR within 24 hours to the receiving facility.
 - b. Ensure that personnel duties are consistent with the level of certification and the service program's level of authorization.
 - c. Maintain current personnel rosters and personnel files. The files shall include the names and addresses of all personnel and documentation that verifies EMS provider credentials including, but not limited to:
 - (1) Current provider level certification.
 - (2) Current course completions/certifications/endorsements as may be required by the medical director.
 - d. If requested by the department, notify the department in writing of any changes in personnel rosters.
 - e. Have a medical director and 24-hour-per-day, 7-day-per-week on-line medical direction available.
 - f. Ensure that the appropriate service program personnel respond as required in this rule and that personnel respond in a reasonable amount of time.

g. Notify the department in writing within seven days of any change in service director or ownership or control or of any reduction or discontinuance of operations.

h. Select a new or temporary medical director if for any reason the current medical director cannot or no longer wishes to serve in that capacity. Selection shall be made before the current medical director relinquishes the duties and responsibilities of that position.

i. Within seven days of any change of medical director, notify the department in writing of the selection of the new or temporary medical director who must have indicated in writing a willingness to serve in that capacity.

j. Implement a continuous quality improvement program for patient transport missions to include as a minimum:

- (1) Medical audits.
 - (2) Skills competency.
 - (3) Flight safety procedures.
 - (4) Appropriateness of air medical response.
 - (5) Review of flight risk assessment.
 - (6) Loop closure requiring physician review of patient transport missions.
- k. Document an equipment maintenance program to ensure proper working condition and appropriate quantities.

144.4(3) Air ambulance equipment and vehicle standards.

a. All air ambulance service programs shall carry equipment and supplies in quantities as determined by the medical director and appropriate to the service program's level of care and available medical crew member personnel, and as established in the service program's approved protocols.

b. Pharmaceutical drugs may be carried and administered by appropriate staff upon completion of training and pursuant to the service program's established protocols approved by the medical director.

c. All pharmaceuticals shall be maintained in accordance with the rules of the state board of pharmacy.

d. Accountability for drug exchange, distribution, storage, ownership, and security shall be subject to applicable state and federal requirements. The method of accountability shall be described in the written pharmacy agreement. A copy of the written pharmacy agreement shall be submitted to the department.

e. Each aircraft shall be equipped and maintained in accordance with FAA operating requirements.

f. Each aircraft shall be equipped with a survival kit.

144.4(4) Communications and flight dispatch program.

a. Each service program shall maintain a telecommunications system between the medical crew member and the source of the service program's medical direction and other appropriate entities.

b. All telecommunications shall be conducted in an appropriate manner and on a frequency approved by the Federal Communications Commission and the department.

c. A flight-following policy shall be adopted. This policy shall at a minimum contain the following:

- (1) Minimum time between communications with aircraft and its monitoring center;
- (2) Documentation of communications with flight;
- (3) Lost communications procedures; and
- (4) Overdue aircraft procedures.

d. Flight programs shall provide staff or contract with a flight dispatch system for receiving flight requests. Communication specialists shall be trained in the following:

- (1) Flight operations;
- (2) Aviation weather;
- (3) Aviation maintenance;
- (4) Flight following;
- (5) Flight risk assessment;
- (6) Flight service minimum safety standards; and
- (7) Overdue aircraft procedures.

144.4(5) Flight risk assessment policy.

a. Each service shall have a flight risk assessment policy in accordance with current FAA guidelines.

- b. Flight risk assessment policies shall mandate adherence to policy for all flights.
- c. Flight risk assessment policies shall address other flight services being requested, en route, or having been denied request to same incident.

144.4(6) Air ambulance service program—incident and accident response and reports.

- a. Air medical services shall have a policy in place outlining missing/overdue/accident issues. This policy will contain at a minimum the following:

- (1) Overdue aircraft procedures; and
- (2) Postincident action plans.

- b. Incidents of fire or other destructive or damaging occurrences or theft of a service program aircraft, vehicle, equipment, or drugs shall be reported to the department within 48 hours following the occurrence of the incident.

- c. A report relating to an accident resulting in personal injury, death or property damage shall be submitted to the department within seven days following an accident involving a service program aircraft or vehicle. A complete FAA/NTSB accident report shall be submitted to the bureau of EMS upon completion of the report.

144.4(7) Reportable patient data—adoption by reference.

- a. The department shall prepare compilations for release or dissemination on all reportable patient data entered into the EMS service program registry during the reporting period. The compilations shall include, but not be limited to, trends and patient care outcomes for local, regional, and statewide evaluations. The compilations shall be made available to all service programs submitting reportable patient data to the registry.

- b. Access and release of reportable patient data and information.

- (1) The data collected by and furnished to the department pursuant to this subrule are confidential records of the condition, diagnosis, care, or treatment of patients or former patients, including outpatients, pursuant to Iowa Code section 22.7. The compilations prepared for release or dissemination from the data collected are not confidential under Iowa Code subsection 22.7(2). However, information which individually identifies patients shall not be disclosed, and state and federal law regarding patient confidentiality shall apply.

- (2) The department may approve requests for reportable patient data for special studies and analysis provided that the request has been reviewed and approved by the deputy director of the department with respect to the scientific merit and confidentiality safeguards and the department has given administrative approval for the proposal. The confidentiality of patients and the EMS service program shall be protected.

- (3) The department may require entities requesting the data to pay any or all of the reasonable costs associated with furnishing the reportable patient data.

- c. To the extent possible, activities under this subrule shall be coordinated with other health data collection methods.

- d. Quality assurance.

- (1) For the purpose of ensuring the completeness and quality of reportable patient data, the department or an authorized representative may examine all or part of the patient care report as necessary to verify or clarify all reportable patient data submitted by a service program.

- (2) Review of a patient care report by the department shall be scheduled in advance with the service program and completed in a timely manner.

- e. “Iowa Trauma Patient Data Dictionary” is available through the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS website (idph.iowa.gov/BETS/Trauma/data-registry).

- f. “Iowa EMS Patient Registry Data Dictionary” identified in 641—paragraph 136.2(1)“c” is incorporated by reference for inclusion criteria and reportable patient data to be reported to the department. For any differences which may occur between the adopted reference and this chapter, the administrative rules shall prevail.

- g. “Iowa EMS Patient Registry Data Dictionary” identified in 641—paragraph 136.2(1)“c” is available through the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas

State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS website (idph.iowa.gov/BETS/EMS/data-registry).

144.4(8) An air ambulance service program shall:

a. Submit reportable patient data identified in subrule 144.4(7) via electronic transfer. Data shall be submitted in a format approved by the department.

b. Submit reportable patient data identified in subrule 144.4(7) to the department for each calendar quarter. Reportable patient data shall be submitted no later than 90 days after the end of the quarter.

144.4(9) The patient care report is a confidential document and shall be exempt from disclosure pursuant to Iowa Code subsection 22.7(2) and shall not be accessible to the general public. Information contained in these reports, however, may be utilized by any of the indicated distribution recipients and may appear in any document or public health record in a manner which prevents the identification of any patient or person named in these reports.

144.4(10) Implementation. The director may grant waivers from the requirements of this chapter for any air medical service. Waivers shall be reasonably related to undue hardships which existing services experience in complying with this chapter. Services requesting waivers shall be subject to other applicable rules adopted pursuant to Iowa Code chapter 147A. Nothing in this chapter shall be construed to require any service to provide a level of care beyond minimum basic care standards.

[ARC 8662B, IAB 4/7/10, effective 5/12/10; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—144.5(147A) Air ambulance service program—off-line medical direction.

144.5(1) The medical director shall be responsible for providing appropriate medical direction and overall supervision of the medical aspects of the service program and shall ensure that those duties and responsibilities are not relinquished before a new or temporary replacement is functioning in that capacity.

144.5(2) The medical director's duties include, but need not be limited to:

a. Developing, approving and updating protocols to be used by service program personnel that meet or exceed the minimum standard protocols developed by the department.

b. Developing and maintaining liaisons between the service, other physicians, physician designees, hospitals, and the medical community served by the service program.

c. Monitoring and evaluating the activities of the service program and individual personnel performance, including establishment of measurable outcomes that reflect the goals and standards of the EMS system.

d. Assessing the continuing education needs of the service and individual service program personnel and assisting them in the planning of appropriate continuing education programs.

e. Being available for individual evaluation and consultation to service program personnel.

f. Performing or appointing a designee to complete the medical audits required in subrule 144.5(4).

g. Developing and approving an applicable continuous quality improvement policy to be used for all patient care encounters, including an action plan and follow-up.

h. Informing the medical community of the emergency medical care being provided according to approved protocols in the service program area.

i. Helping to resolve service operational problems.

j. Approving or removing an individual from service program participation.

144.5(3) Supervising physicians, physician designees, or other appointees as defined in the continuous quality improvement policy referenced in paragraph 144.5(2)“g” may assist the medical director by:

a. Providing medical direction.

b. Reviewing the emergency medical care provided.

c. Reviewing and updating protocols.

d. Providing and assessing continuing education needs for service program personnel.

e. Helping to resolve operational problems.

144.5(4) The medical director or other qualified designees shall randomly audit (at least quarterly) documentation of calls where emergency medical care was provided. The medical director shall randomly review audits performed by the qualified appointee. The audit shall be in writing and shall include, but need not be limited to:

- a. Reviewing the patient care provided by service program personnel and remedying any deficiencies or potential deficiencies that may be identified regarding medical knowledge or skill performance.
- b. Response time and time spent at the scene.
- c. Overall EMS system response to ensure that the patient's needs were matched to available resources including, but not limited to, mutual aid and tiered response.
- d. Completeness of documentation.

144.5(5) On-line medical direction when provided through a hospital.

a. The medical director shall designate in writing at least one hospital which has established a written on-line medical direction agreement with the department. It shall be the medical director's responsibility to notify the department in writing of changes regarding this designation.

b. Hospitals signing an on-line medical direction agreement shall:

(1) Ensure that the supervising physicians or physician designees will be available to provide on-line medical direction via telecommunications on a 24-hour-per-day basis.

(2) Identify the service programs for which on-line medical direction will be provided.

(3) Establish written protocols for use by supervising physicians and physician designees who provide on-line medical direction.

(4) Administer a quality assurance program to review orders given. The program shall include a mechanism for the hospital and service program medical directors to discuss and resolve any identified problems.

c. A hospital which has a written medical direction agreement with the department may provide medical direction for any or all service program authorization levels and may also agree to provide backup on-line medical direction for any other service program when that service program is unable to contact its primary source of on-line medical direction.

d. Only supervising physicians or physician designees shall provide on-line medical direction. However, a physician assistant, registered nurse or EMT (of equal or higher level) may relay orders to emergency medical care personnel, without modification, from a supervising physician. A physician designee may not deviate from approved protocols.

e. The hospital shall provide, upon request to the department, a list of supervising physicians and physician designees providing on-line medical direction.

f. The department may verify a hospital's communications system to ensure compliance with the on-line medical direction agreement.

g. A supervising physician or physician designee who gives orders (directly or via communications equipment from some other point) to an emergency medical care provider is not subject to criminal liability by reason of having issued the orders and is not liable for civil damages for acts or omissions relating to the issuance of the orders unless the acts or omissions constitute recklessness.

h. Nothing in these rules requires or obligates a hospital, supervising physician or physician designee to approve requests for orders received from emergency medical care personnel.

NOTE: Hospitals in other states may participate provided that the applicable requirements of this subrule are met.

[ARC 8662B, IAB 4/7/10, effective 5/12/10]

641—144.6(147A) Complaints and investigations—denial, citation and warning, probation, suspension or revocation of service program authorization or renewal.

144.6(1) All complaints regarding the operation of authorized air medical service programs, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

144.6(2) Complaints and the investigative process will be treated as confidential in accordance with Iowa Code section 22.7 and chapter 272C.

144.6(3) Air ambulance service program authorization may be denied or a program may be disciplined as provided in subrule 144.6(4) by the department in accordance with Iowa Code subsections 147A.5(3) and 272C.3(2) for any of the following reasons:

- a. Knowingly allowing the falsifying of a patient care report (PCR).

- b.* Failure to submit required reports and documents.
- c.* Delegating professional responsibility to a person when the service program knows that the person is not qualified by training, education, experience or certification to perform the required duties.
- d.* Practicing, condoning, or facilitating discrimination against a patient, student or employee based on race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability diagnosis, or social or economic status.
- e.* Knowingly allowing sexual harassment of a patient, student or employee. Sexual harassment includes sexual advances, sexual solicitations, requests for sexual favors, and other verbal or physical conduct of a sexual nature.
- f.* Failure or repeated failure of the applicant or alleged violator to meet the requirements or standards established pursuant to Iowa Code chapter 147A or the rules adopted pursuant to that chapter.
- g.* Obtaining or attempting to obtain or renew or retain service program authorization by fraudulent means or misrepresentation or by submitting false information.
- h.* Engaging in conduct detrimental to the well-being or safety of the patients receiving or who may be receiving emergency medical care.
- i.* Failure to correct a deficiency within the time frame required by the department.

144.6(4) Method of discipline. The department has the authority to impose the following disciplinary sanctions against an authorized service program:

- a.* Issue a citation and warning.
- b.* Impose a civil penalty not to exceed \$1,000.
- c.* Require additional education or training.
- d.* Impose a period of probation under specified conditions.
- e.* Prohibit permanently, until further order of the department, or for a specific period a service program's ability to engage in specific procedures, methods, acts, or activities incident to the practice of the profession.
- f.* Suspend an authorization until further order of the department or for a specific period.
- g.* Revoke an authorization.
- h.* Impose such other sanctions as allowed by law and as may be appropriate.

144.6(5) The department shall notify the applicant of the granting or denial of authorization or renewal, or shall notify the alleged violator of action to issue a citation and warning, place on probation, suspend or revoke authorization or renewal pursuant to Iowa Code sections 17A.12 and 17A.18. Notice of issuance of a denial, citation and warning, probation, suspension or revocation shall be served by restricted certified mail, return receipt requested, or by personal service.

144.6(6) Any requests for appeal concerning the denial, citation and warning, probation, suspension or revocation of service program authorization or renewal shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If such a request is made within the 20-day time period, the notice shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. After the hearing, or upon default of the applicant or alleged violator, the administrative law judge shall affirm, modify or set aside the denial, citation and warning, probation, suspension or revocation. If no request for appeal is received within the 20-day time period, the department's notice of denial, probation, citation and warning, suspension or revocation shall become the department's final agency action.

144.6(7) Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

144.6(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10.

144.6(9) When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 144.6(10).

144.6(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

144.6(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections, and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

144.6(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

144.6(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

144.6(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Bureau of Emergency Medical Services, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

144.6(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

144.6(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, the news media or an employer.

144.6(17) This rule is not subject to waiver pursuant to 641—Chapter 178 or any other provision of law.

144.6(18) Emergency adjudicative proceedings.

a. Necessary emergency action. To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare, and consistent with the Constitution and other provisions of law, the department may issue a written order in compliance with Iowa Code section 17A.18 to suspend authorization in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the department by emergency adjudicative order.

b. Before issuing an emergency adjudicative order, the department shall consider factors including, but not limited to, the following:

(1) Whether there has been a sufficient factual investigation to ensure that the department is proceeding on the basis of reliable information;

(2) Whether the specific circumstances which pose immediate danger to the public health, safety, or welfare have been identified and determined to be continuing;

(3) Whether the program required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety, or welfare;

(4) Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety, or welfare; and

(5) Whether the specific action contemplated by the department is necessary to avoid the immediate danger.

c. Issuance of order.

(1) An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the department's decision to take immediate action. The order is a public record.

(2) The written emergency adjudicative order shall be immediately delivered to the service program that is required to comply with the order by utilizing one or more of the following procedures:

1. Personal delivery.

2. Certified mail, return receipt requested, to the last address on file with the department.

3. Facsimile. Fax may be used as the sole method of delivery if the service program required to comply with the order has filed a written request that agency orders be sent by fax and has provided a fax number for that purpose.

(3) To the degree practicable, the department shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

(4) Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order issues, the department shall make reasonable immediate efforts to contact by telephone the service program that is required to comply with the order.

(5) After the issuance of an emergency adjudicative order, the department shall proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

(6) Issuance of a written emergency adjudicative order shall include notification of the date on which department proceedings are scheduled for completion. After issuance of an emergency adjudicative order, continuance of further department proceedings to a later date will be granted only in compelling circumstances upon application in writing unless the service program that is required to comply with the order is the party requesting the continuance.

[ARC 8662B, IAB 4/7/10, effective 5/12/10; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—144.7(147A) Temporary waivers.

144.7(1) If during a period of authorization there is some occurrence that temporarily causes a service program to be in noncompliance with these rules, the department may grant a temporary waiver. Temporary waivers from these rules (not to exceed six months in length per any approved request) may be granted by the department to a currently authorized service program. Requests for temporary waivers shall apply only to the service program requesting the temporary waiver and shall apply only to those requirements and standards for which the department is responsible.

144.7(2) To request a waiver, the service program shall:

a. Notify the department verbally (as soon as possible) of the need to request a temporary waiver. Submit to the department, within ten days after having given verbal notification to the department, a written explanation for the temporary waiver request. The address and telephone number are Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075; (515)725-0326.

b. Cite the rule from which the temporary waiver is requested.

c. State why compliance with the rule cannot be maintained.

d. Explain the alternative arrangements that have been or will be made regarding the temporary waiver request.

e. Estimate the period of time for which the temporary waiver will be needed.

144.7(3) Upon notification of a request for a temporary waiver, the department shall consider, but shall not be limited to the following:

a. Examining the rule from which the temporary waiver is requested to determine if the request is appropriate and reasonable.

b. Evaluating the alternative arrangements that have been or will be made regarding the temporary waiver request.

c. Examining the effect of the requested temporary waiver upon the level of care provided to the general populace served.

d. Requesting additional information if necessary.

144.7(4) Preliminary approval or denial shall be provided verbally within 24 hours. Final approval or denial shall be issued in writing within ten days after department receipt of the written explanation for the temporary waiver request and shall include the reason for approval or denial. If approval is granted, the effective date and the duration of the temporary waiver shall be clearly stated.

144.7(5) Any request for appeal concerning the denial of a request for temporary waiver shall be in accordance with the procedures outlined in rule 641—144.6(147A).

[ARC 8662B, IAB 4/7/10, effective 5/12/10; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—144.8(147A) Transport options for air medical services.

144.8(1) Upon responding to an emergency call, air medical services may make a determination at the scene as to whether air medical transportation is needed. The determination shall be made by a medical crew member and shall be based upon protocol and concurrence of medical control approved by the service program's medical director. When the medical crew member applies this protocol to determine the appropriate transport option, the following criteria, as a minimum, shall be used:

- a. Primary assessment;
- b. Focused history and physical examination;
- c. Chief complaint;
- d. Name, address and age of the individual in need of emergency assistance; and
- e. Nature of the call for assistance.

144.8(2) Air medical transportation shall be provided whenever any of the above criteria indicate that treatment should be initiated. If treatment is not indicated, the air medical service program shall make arrangements for alternate transportation, if indicated.

[ARC 8662B, IAB 4/7/10, effective 5/12/10]

These rules are intended to implement Iowa Code chapter 147A.

[Filed ARC 8662B (Notice ARC 8499B, IAB 1/27/10), IAB 4/7/10, effective 5/12/10]

[Filed ARC 5528C (Notice ARC 5271C, IAB 11/18/20), IAB 3/24/21, effective 4/28/21]

CHAPTER 145
IOWA PHYSICIAN ORDERS FOR SCOPE OF TREATMENT

641—145.1(144D) Definitions. For the purpose of these rules, the following definitions shall apply:

“Advanced registered nurse practitioner” means an advanced registered nurse practitioner licensed pursuant to Iowa Code chapter 152 or 152E.

“Department” means the department of public health.

“Director” means the director of the department of public health.

“Emergency medical care provider” means emergency medical care provider as defined in Iowa Code section 147A.1.

“Health care facility” means health care facility as defined in Iowa Code section 135C.1, a hospice program as defined in Iowa Code section 135J.1, an elder group home as defined in Iowa Code section 231B.1, and an assisted living program as defined in Iowa Code section 231C.2.

“Health care provider” means an individual, including an emergency medical care provider and an individual providing home- and community-based services, and including a home health agency, licensed, certified, or otherwise authorized or permitted by the law of this state to administer health care in the ordinary course of business or in the practice of a profession.

“Home health agency” means home health agency as defined in 42 CFR Part 484.

“Hospital” means hospital as defined in Iowa Code section 135B.1.

“Legal representative” means an individual authorized to execute a POST form on behalf of a patient who is not competent to do so, in the order of priority set out in Iowa Code section 144A.7, subsection 1, and guided by the express or implied intentions of the patient or, if such intentions are unknown, by the patient’s best interests given the patient’s overall medical condition and prognosis.

“Patient” means an individual who is frail and elderly or who has a chronic, critical medical condition or a terminal illness and for which a physician orders for scope of treatment is consistent with the individual’s goals of care.

“Physician” means a person licensed to practice medicine and surgery or osteopathic medicine and surgery in this state.

“Physician assistant” means a person licensed as a physician assistant under Iowa Code chapter 148C.

“Physician orders for scope of treatment form” or *“POST form”* means a document containing medical orders which may be relied upon across medical settings that consolidates and summarizes a patient’s preferences for life-sustaining treatments and interventions and acts as a complement to and does not supersede any valid advance directive.

[ARC 2280C, IAB 12/9/15, effective 1/13/16]

641—145.2(144D) Purpose. The purpose of this chapter is to establish the process for the development, review, modification, and posting of the POST form.

[ARC 2280C, IAB 12/9/15, effective 1/13/16]

641—145.3(144D) Responsibilities of the department.

145.3(1) The department shall prescribe the uniform POST form and shall post the form on the department’s Web site www.idph.iowa.gov for public availability.

145.3(2) The POST form shall be a uniform form based upon the national physician orders for life-sustaining treatment (POLST) paradigm form. The form shall have all of the following characteristics:

- a. The form shall include the patient’s name and date of birth.
- b. The form shall be signed and dated by the patient or the patient’s legal representative.
- c. The form shall be signed and dated by the patient’s physician, advanced registered nurse practitioner, or physician assistant.
- d. If preparation of the form was facilitated by an individual other than the patient’s physician, advanced registered nurse practitioner, or physician assistant, the facilitator shall also sign and date the form.
- e. The form shall include the patient’s wishes regarding the care of the patient, including but not limited to all of the following:

- (1) The administration of cardiopulmonary resuscitation.
 - (2) The level of medical interventions in the event of a medical emergency.
 - (3) The use of medically administered nutrition by tube.
 - (4) The rationale for the orders.
- f. The form shall be easily distinguishable to facilitate recognition by health care providers, hospitals, and health care facilities.
- g. An incomplete section on the form shall imply the patient's wishes for full treatment for the type of treatment addressed in that section.

145.3(3) The POST form shall be reviewed by the department on an annual basis and may be reviewed more frequently at the discretion of the director. The POST form may be modified based on changes to the national POLST paradigm, input from interested parties, advances in evidence-based research or quality improvement processes, or clinical experience. The director shall annually designate a task force to review and recommend modifications to the POST form. The director shall review the task force recommendations and approve all final modifications to the POST form before it is posted on the department's Web site.

[ARC 2280C, IAB 12/9/15, effective 1/13/16]

These rules are intended to implement Iowa Code section 144D.2.

[Filed ARC 2280C (Notice ARC 2084C, IAB 8/5/15), IAB 12/9/15, effective 1/13/16]

CHAPTER 146 STROKE CARE REPORTING

641—146.1(135) Purpose. The purpose of this chapter is to identify the statewide stroke database where nationally certified comprehensive stroke centers and nationally certified primary stroke centers in the state are required to report stroke care data in accordance with Iowa Code chapter 135.

[ARC 3748C, IAB 4/11/18, effective 5/16/18]

641—146.2(135) Definitions.

“Comprehensive stroke center” means a hospital certified as a comprehensive stroke center by a nationally recognized certifying body with certification criteria consistent with the most current nationally recognized, evidence-based stroke guidelines related to reducing the occurrence of and disabilities and death associated with stroke.

“Department” means the Iowa department of public health.

“Primary stroke center” means a hospital certified as a primary stroke center by a nationally recognized certifying body with certification criteria consistent with the most current nationally recognized, evidence-based stroke guidelines related to reducing the occurrence of and disabilities and death associated with stroke.

“Stroke” means a clinical diagnosis of acute stroke or principal International Classification of Disease, 10th Revision, Clinical Modification (ICD-10-CM) discharge code of “stroke,” or “transient ischemic attack,” or “cerebral infarction,” or “cerebral hemorrhage.”

“Stroke care” means care provided to individuals with confirmed cases of stroke.

[ARC 3748C, IAB 4/11/18, effective 5/16/18]

641—146.3(135) Stroke care reporting.

146.3(1) *Iowa statewide stroke database.* The department designates the Get with the Guidelines stroke module of the American Heart Association/American Stroke Association as the Iowa stroke database established in Iowa Code section 135.191.

146.3(2) *Who is required to report.* All nationally certified comprehensive stroke centers and all nationally certified primary stroke centers operating in the state of Iowa are required to report stroke data. Nationally certified acute stroke-ready hospitals and emergency medical services operating in the state of Iowa are encouraged to report stroke care data.

146.3(3) *What is required to be reported.* Reportable data of stroke care are required to be reported. Reportable data are those data identified by a clinical diagnosis of acute stroke or by the following ICD-10 coding:

ICD-10-CM Code	Short Description
I60.00 - I60.9	Nontraumatic subarachnoid hemorrhage
I61.0 - I61.9	Nontraumatic intracerebral hemorrhage
I63.00 - I63.9	Cerebral infarction (occlusion and stenosis of cerebral and precerebral arteries, resulting in cerebral infarction)
G45.0 - G45.2	TIA and related syndromes
G45.8 - G45.9	TIA and related syndromes
O99.411 - O99.43	Diseases of the circulatory system complicating pregnancy, childbirth and puerperium
G97.31 - G97.32	Intraoperative hemorrhage and hematoma of a nervous system organ or structure complicating a procedure
G97.51 - G97.52	Postprocedural hemorrhage and hematoma of a nervous system organ or structure following a procedure
I97.810 - I97.821	Intraoperative and postoperative cerebrovascular infarction

[ARC 3748C, IAB 4/11/18, effective 5/16/18]

641—146.4(135) Method and frequency of reporting.

146.4(1) Stroke centers shall report the required stroke care information for any reportable stroke case no later than 120 days after the patient was discharged, transferred to another hospital, or pronounced dead.

146.4(2) Reports shall meet the data quality, format, and timeliness standards prescribed by the Iowa statewide stroke database.

[ARC 3748C, IAB 4/11/18, effective 5/16/18]

641—146.5(135) Confidentiality. The Iowa statewide stroke database shall comply with federal and state law and other health information and data collection, storage, and sharing requirements of the department.

[ARC 3748C, IAB 4/11/18, effective 5/16/18]

641—146.6(135) Penalties and enforcement. If a stroke center required to report under this chapter does not comply with the reporting requirements, the department may request a review of the certification of the comprehensive stroke center or the primary stroke center by the certifying entity.

[ARC 3748C, IAB 4/11/18, effective 5/16/18]

These rules are intended to implement Iowa Code section 135.191.

[Filed ARC 3748C (Notice ARC 3575C, IAB 1/17/18), IAB 4/11/18, effective 5/16/18]

CHAPTERS 147 to 149
Reserved

CHAPTER 150
IOWA REGIONALIZED SYSTEM OF PERINATAL HEALTH CARE

641—150.1(135) Purpose and scope. Hospitals within the state shall determine whether to participate in Iowa's regionalized system of perinatal health care and shall select the hospital's level of participation in the regionalized system. A hospital having determined to participate in the regionalized system shall comply with the rules appropriate to the levels of participation for maternal care and neonatal care selected by the hospital. Maternal levels of designation and neonatal levels of designation are evaluated separately, and a hospital may have a level of designation for maternal care that is different from the level of designation for neonatal care; however, a pregnant woman should be cared for at the hospital that best meets both her and her newborn infant's needs.

Iowa's regionalized system of perinatal health care helps practitioners in rural Iowa to rapidly access specialty services for their patients even though such services may not exist in the local community. This is predicated on several factors, including the willingness of certain hospitals in moderate-to-large Iowa cities to provide specialty services and the presence of a functional system of patient transportation. These rules address how participating Iowa hospitals relate to the regionalized system and suggest a level of functioning which should identify the role each participating hospital plays in the system.

The following rules present a description of the levels of care among Iowa perinatal hospitals. The levels are as follows: maternal levels of care, which include Level I maternal care hospital, Level II maternal care hospital, Level III maternal care hospital and Level IV maternal care hospital, and neonatal levels of care, which include Level I neonatal care hospital, Level II neonatal care hospital, Level III neonatal care hospital and Level IV neonatal care hospital. Due to the need for organization of limited resources in a rural state, the rules are designed to encourage and support the presence of Level II and Level III maternal care and neonatal care hospitals in areas not populous enough to support a Level IV maternal care and neonatal care hospital.

The rules are not meant to hold Iowa hospitals and Iowa perinatal professionals to an impractical ideal. The rules specify particulars for a tiered provision of care on the basis of functional capabilities, based on national recommendations from the American Academy of Pediatrics and the American Congress of Obstetricians and Gynecologists.

The primary purpose of the level of care designation is to ensure Iowa perinatal patients receive appropriate maternal and neonatal care as close to their homes as possible.

The rules provide a framework to ensure that, when a participating hospital represents itself at a particular level of perinatal care, the hospital is capable of providing that care. The public is entitled to know the level of functioning of a hospital. The rules provide the framework for defining and evaluating the level of perinatal services offered by a hospital.

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.2(135) Definitions. For the purpose of these rules, the following definitions shall apply:

"Categorization" means a preliminary determination by the department that a hospital is capable of providing maternal care and neonatal care at Level I, Level II, Level III, or Level IV.

"Certificate of verification" means a document awarded by the department that identifies a hospital's level of maternal care and neonatal care at Level I, Level II, Level III, or Level IV and the term of verification at that level.

"Department" means the Iowa department of public health.

"Director" means the director of the Iowa department of public health.

"Hospital" means a facility licensed under Iowa Code chapter 135B.

"Late preterm" means that a newborn infant is born between 34 0/7 and 36 6/7 weeks' gestation.

"Levels-of-care assessment tool" or *"tool"* means a tool to assess the maternal and neonatal risk-appropriate care, using the minimum information necessary to identify a hospital's maternal level of care based on criteria by the American Congress of Obstetricians and Gynecologists/Society for Maternal-Fetal Medicine and a hospital's neonatal level of care based on criteria by the American Academy of Pediatrics. The tool will be chosen by the department in consultation with the perinatal guidelines advisory committee.

"Neonate" means a newborn infant, up to 28 days of life.

“On-site verification survey” means an on-site survey conducted by the department’s statewide perinatal care team based at the University of Iowa hospitals and clinics or by a survey team of members (medical experts) contracted to assess a hospital’s ability to meet the level of designation selected by the hospital.

“Perinatal” means the five months before and one month after birth.

“Perinatal center” means a medical facility capable of providing complex obstetric, fetal and neonatal care.

“Perinatal guidelines advisory committee” means the committee that provides consultation to the department regarding these rules for the regionalized system of perinatal health care, reviews and updates Guidelines for Perinatal Services and provides review and counsel to the statewide perinatal care program.

“Prenatal” means during pregnancy.

“Readily available” means on site or at a closely related institution by prearranged consultative agreement.

“Regionalized system of perinatal health care” means the department’s program for designating regional perinatal health care services at a verified level of care, based on a hospital’s functional capabilities. Levels of care designations are stratified in an increasing order of intensity and complexity for both maternal health care and neonatal health care.

“Regionalized system of perinatal health care coordinator” means the department’s program manager for the regionalized system of perinatal health care.

“Respiratory distress” means tachypnea (respiratory rate of 60 or more per minute), grunting, tugging, retracting, nasal flaring, or cyanosis. Any or all of these may constitute respiratory distress in a neonate.

“Reverification” means the process of periodic review, conducted at least every three years, to certify that a hospital has maintained its designated level of care in accordance with criteria established under these rules for hospitals that are participating in the regionalized system of perinatal health care.

“Statewide perinatal care program” means a program consisting of the regionalized system of perinatal health care coordinator, the statewide perinatal care team contracted by the department, and the regionalized system of perinatal health care as defined in these rules.

“Statewide perinatal care team” means the educational team based at the University of Iowa hospitals and clinics and contracted by the department to support the regionalized system of perinatal health care and to provide services to decrease perinatal morbidity and mortality.

“Verification” means a process by which the department certifies a hospital’s capacity to provide perinatal care in accordance with criteria established under these rules for hospitals that are participating in the regionalized system of perinatal health care.

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.3(135) Perinatal guidelines advisory committee.

150.3(1) Purpose. The director shall appoint an advisory committee to consult with the department in its development and maintenance of the regionalized system of perinatal health care and to provide review and counsel to the statewide perinatal care program.

150.3(2) Appointment. Appointments to the committee shall be made by the director.

a. Each appointment shall be for a term of three years, commencing on July 1.

b. No member shall serve more than three consecutive terms, unless this provision is waived by the director.

c. In order to ensure that one third of the committee rotates each year, staggered terms shall be initiated in June. For terms expiring during the calendar year, appointments and reappointments shall be staggered, resulting in a committee with approximately one third of the terms of membership expiring each year.

d. Members of the perinatal guidelines advisory committee shall include:

(1) A representative from each of the following organizations that chooses to designate a nominee to the director:

1. Iowa Hospital Association;
2. Iowa Medical Society;
3. Iowa Osteopathic Medical Association;

4. Iowa Chapter, American Academy of Pediatrics;
5. Iowa Section, American Congress of Obstetricians and Gynecologists;
6. Iowa Academy of Family Physicians;
7. Iowa Nurses Association;
8. Iowa Association of Neonatal Nurses;
9. Iowa Association of Women's Health, Obstetrical and Neonatal Nurses.
- (2) The director or designee of the statewide perinatal care team.
- (3) One designated representative each from a Level I, Level II, Level III, and Level IV hospital (either maternal or neonatal). Hospital representatives in this category will be appointed based on recommendations made by the Iowa Hospital Association to the director of the department.
- (4) Representatives from the department of inspections and appeals and the bureau of family health at the department, who shall serve as nonvoting ex officio members of the committee.
- e. Vacancies shall be filled in the same manner in which the original appointments were made.
- f. Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the committee member and appointment of another.

150.3(3) Officers. Officers of the committee are the chairperson and vice-chairperson. The vice-chairperson succeeds the chairperson at the end of the chairperson's term. A new vice-chairperson shall be elected, by majority vote of the committee, at the first meeting of the sitting chairperson's third or final year in office. The chairperson shall preside at all meetings of the committee, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice-chairperson shall perform the duties of the chairperson. When so acting, the vice-chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice-chairperson shall also perform such other duties as may be assigned by the chairperson.

150.3(4) Meetings.

a. The committee shall establish a meeting schedule on an annual basis to conduct its business. Meetings may be scheduled as business requires, but notice to members must be given at least five working days prior to the meeting date. A four-week notice is encouraged to accommodate the schedules of members.

b. Action on any issue before the committee can be taken only by a majority vote of the entire membership. The committee shall maintain information sufficient to indicate the vote of each member present.

150.3(5) Subcommittees. The committee may designate one or more subcommittees to perform such duties as may be deemed necessary.

150.3(6) Expenses of committee members. When incurred on behalf of committee business, the following may be considered necessary expenses for reimbursement of committee members and are subject to established state reimbursement rates:

- a. Reimbursement for travel in a private car.
- b. Actual lodging and meal expenses including sales tax on lodging and meals.
- c. Actual expense of public transportation.

150.3(7) Confidentiality.

a. All committee members and subcommittee members shall sign a confidentiality agreement and shall agree not to divulge or discuss confidential information.

b. The signed confidentiality agreements shall be kept on file at the department.

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.4(135) Duties of statewide perinatal care team. The team shall:

1. Promote evidence-based and evidence-informed care of pregnant women and newborns.
2. Provide education and consultation to regional and primary providers of perinatal care.
3. Provide chart review to assess quality of care provided and additional education required.
4. Promote change in practice when needed through sharing best practice ideas, policies and procedures.
5. Promote maternal-fetal transfer if delivery of an at-risk infant or mother is anticipated and a higher level of care is anticipated.

6. Provide on-site verification to determine a hospital's ability to meet its level-of-care designation. This rule is intended to implement Iowa Code section 135.11(27).

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.5(135) Duties of the department. The department shall:

1. Certify a hospital's capacity to provide perinatal health care in accordance with criteria established under these rules.
2. Provide technical assistance to the hospitals that choose to participate.
3. Review the submitted levels-of-care assessment tool from all participating hospitals.
4. Conduct or coordinate the on-site verification of determined levels of care for maternal and neonatal care hospitals designated as Level II, Level III and Level IV.
5. Facilitate all meetings of the perinatal guidelines advisory committee.

This rule is intended to implement Iowa Code section 135.11(27).

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.6(135) Maternal and neonatal levels of care—categorization and verification. Categorization and verification of hospitals participating in Iowa's regionalized system of perinatal health care shall be made by the department based on national recommendations from the American Academy of Pediatrics and the American Congress of Obstetricians and Gynecologists.

150.6(1) Application for initial verification.

- a. An application for initial verification may be submitted when:

- (1) A new hospital with a perinatal service is opened;
- (2) A hospital is reopening a previously inactive obstetrical unit; or
- (3) A hospital requests a change to a higher-level designation in maternal care or neonatal care.

- b. A hospital requesting an initial verification may obtain application materials from the department upon written request to:

Iowa Department of Public Health
Bureau of Family Health
Regionalized System of Perinatal Health Care Coordinator
Lucas State Office Building
321 East 12th Street
Des Moines, Iowa 50319-0075

- c. Upon receipt of an application from a hospital that is requesting to change to a higher level of maternal or neonatal care, the department will request and review copies of the results of the last site visit to the hospital by the statewide perinatal team or request a site visit. The results of the site visit along with the application will be shared with the statewide perinatal team and the perinatal guidelines advisory committee to determine if all requirements are met. The committee recommendations will be sent to the department, which will notify the hospital if its application is approved or denied. If the application is denied, the applicant will be informed of the applicant's right to appeal the department's decision.

150.6(2) Application for a hospital that has previously participated in the regionalized system of perinatal health care.

- a. If a hospital chooses to continue its participation, the hospital must select the levels for maternal care and neonatal care appropriate for the hospital's capacity to provide perinatal health care in accordance with the criteria outlined in these rules.

- b. To maintain continuous participation in the regionalized system of perinatal health care, a hospital shall complete the levels-of-care assessment tool and an attestation statement available at idph.iowa.gov/perinatal-care and mail them by April 11, 2019, to:

Iowa Department of Public Health
Bureau of Family Health
Regionalized System of Perinatal Health Care Coordinator

Lucas State Office Building
321 East 12th Street
Des Moines, Iowa 50319-0075

c. The department shall set dates when each hospital's certification of verification will expire based on the statewide perinatal health care team's site visit schedule and the level of care selected.

150.6(3) *Reverification of level designation.* The levels-of-care assessment tool will be used for all reverifications. The tool is found at idph.iowa.gov/perinatal-care. The process of reverification of a hospital participating in the regionalized system of perinatal health care will take place once every three years as follows:

a. Reverification of a Level I maternal care or neonatal care hospital will be completed through the use of the levels-of-care assessment tool. A hospital shall complete and return the levels-of-care assessment tool to the department at least 60 days before the hospital's certification is due to expire.

b. Reverification of a Level II or Level III maternal care or neonatal care hospital will be completed through use of the levels-of-care assessment tool and an on-site reverification visit. A hospital shall complete and return the levels-of-care assessment tool to the department at least 120 days before the hospital's certification is due to expire. The department will ensure that arrangements are made for the on-site reverification visit. Level II and Level III hospitals may utilize one of two on-site reverification visit options:

(1) A review conducted by the statewide perinatal care team, or

(2) A review by an independent out-of-state team identified by the hospital, approved by the department and paid for by the hospital.

c. Reverification of a Level IV maternal care and neonatal care hospital will be completed through the same process as that for a Level II or Level III maternal care or neonatal care hospital except that the on-site reverification team will consist of an out-of-state team identified by the hospital and approved by the department. The team will include, at a minimum, a maternal-fetal specialist, a neonatologist, an obstetrical nurse and a neonatal nurse. The Level IV hospital will pay the expense of the review team. All department staff and staff contracted by the department involved in the on-site reverification process will sign a confidentiality statement that will be kept on file at the department.

d. Reverification shall not be construed to imply any guarantee on the part of the department as to the level of perinatal health care services available at a hospital.

e. Hospital reverification of the level of care is valid for a period of three years from the effective date unless otherwise specified on the certificate of verification or unless sooner suspended or revoked.

f. As part of the reverification and renewal process, the department or a designated survey team may conduct periodic on-site reviews of the services of the maternal care and neonatal care hospitals, including chart reviews.

150.6(4) *Level designation maintenance, waiver and confidential records.*

a. A hospital which is unable to maintain its designated level of care shall notify the department, in writing, within 60 days of the change in capacity to meet the designated level of care.

b. The director may grant a waiver from the requirements of rules adopted under this chapter for any hospital participating in the regionalized system of perinatal health care.

c. Proceedings, records, and reports developed pursuant to this chapter are confidential pursuant to Iowa Code section 135.11(27) and constitute peer review records under Iowa Code section 147.135, and are not subject to discovery, subpoena, or other means of legal compulsion for their release to a person other than the affected hospital, and are not admissible in evidence in a judicial or administrative proceeding other than a proceeding involving verification of the participating hospital.

This rule is intended to implement Iowa Code section 135.11(27).

[ARC 3835C, IAB 6/6/18, effective 7/11/18; ARC 5528C, IAB 3/24/21, effective 4/28/21]

641—150.7(135) Levels of maternal care. The levels of maternal care include basic obstetrical care Level I, specialty care Level II, subspecialty care Level III and regional perinatal health care Level IV. The levels reflect the overall evidence for risk-appropriate care in a hospital through the availability of appropriate

personnel, physical space, equipment, technology, and organization. Each level reflects the minimal capabilities, provider type and functional criteria required.

150.7(1) Level I maternal care hospital.

a. *Provider of basic obstetrical care.* A Level I maternal care hospital provides care to women who are low risk and are expected to have an uncomplicated birth.

b. *Capabilities.* A Level I maternal care hospital has the following capabilities:

(1) To perform routine intrapartum and postpartum care that is anticipated to be uncomplicated. Care of uncomplicated pregnancies includes the ability to detect, stabilize and initiate management of unanticipated maternal, fetal or neonatal problems that occur during the antepartum, intrapartum, or postpartum period until the patient can be transferred to a facility that provides specialty maternal care.

(2) To begin an emergency cesarean delivery within a time interval that best incorporates maternal and fetal risks and benefits with the provision of emergency care.

c. *Types of health care providers.* A Level I maternal care hospital will have:

(1) Maternity care providers, including certified nurse-midwives, family practice physicians, or obstetrician-gynecologists, available to attend all births.

(2) Every birth attended by at least two professionals, including the primary maternal care provider and a person competent to provide neonatal resuscitation and postnatal care to stabilize the infant.

(3) Adequate numbers of registered nurses available who have completed orientation and demonstrated competence in the care of obstetric patients, including women and fetuses, consistent with Level I care criteria and who are able to stabilize and transfer high-risk women and newborns.

(4) Nursing leadership with expertise in perinatal nursing care.

(5) A provider with privileges to perform an emergency cesarean delivery, available to attend all deliveries. The provider may be a general surgeon, an obstetrician-gynecologist, or a family practice physician with certification.

(6) A provider of anesthesia services available to provide labor analgesia and surgical anesthesia.

d. *Functional criteria of support services.* Support services include, but are not limited to, access to obstetric ultrasonography, laboratory testing, and blood bank supplies at all times. A Level I maternal care hospital will:

(1) Have protocols and capabilities in place for:

1. Massive transfusion,
2. Emergency release of blood products (before full compatibility testing is complete),
3. Management of multiple component therapy.

(2) Ensure optimal care of all pregnant women by having formal transfer plans established in partnership with a higher-level receiving hospital. These plans will include:

1. Risk identification,
2. Determination of conditions necessitating consultation,
3. Referral and transfer, and
4. A reliable, accurate, and comprehensive communication system between the participating hospital and the transport team.

(3) Have education and quality improvement programs to maximize patient safety, provide such programs through collaboration with facilities with higher levels of care that receive transfers, or both.

(4) Have data collection, storage and retrieval to support quality improvement.

150.7(2) Level II maternal care hospital.

a. *Provider of specialty care.* In addition to meeting the criteria of a Level I maternal care hospital, a Level II maternal care hospital provides care of appropriate high-risk pregnant women, both those directly admitted to the hospital and those transferred from another hospital.

b. *Capabilities.* In addition to having the capabilities of a Level I maternal care hospital, a Level II maternal care hospital has the following capabilities:

(1) The infrastructure for continuous availability of adequate numbers of registered nurses who have demonstrated competence in the care of obstetric patients (women and fetuses).

(2) Orientation and demonstrated competence consistent with Level II care criteria and the capability to stabilize and transfer high-risk women and newborns who exceed Level II care criteria.

c. *Types of health care providers.* In addition to meeting the health care provider requirements of a Level I maternal care hospital, a Level II maternal care hospital will have:

- (1) Health care providers, including certified nurse-midwives or family physicians.
- (2) Nursing leaders and staff with formal training and experience in the provision of perinatal nursing care who can coordinate with respective neonatal care services.
- (3) An attending obstetrician-gynecologist available at all times.
- (4) A board-certified or board-eligible obstetrician-gynecologist with special interest and experience in obstetric care as the director of obstetric services.
- (5) Access to a maternal-fetal medicine subspecialist for consultation, available on site, by telephone, or by telemedicine as needed.
- (6) A provider of anesthesia services available at all times to provide labor analgesia and surgical anesthesia.
- (7) A board-certified or board-eligible anesthesiologist with special training or experience in obstetric anesthesia, available for consultation.
- (8) Medical and surgical consultants available to stabilize obstetric patients who have been directly admitted to the facility or transferred from other hospitals.

d. *Functional criteria of support services.* In addition to meeting the support services requirements of a Level I maternal care hospital, a Level II maternal care hospital will have:

- (1) Computed tomography scan and, ideally, magnetic resonance imaging with interpretation available.
- (2) Basic ultrasonographic imaging services for maternal and fetal assessment at all times, either in house or on call.
- (3) Special equipment needed to accommodate the care and services needed for obese women. In addition, based on the patient's BMI and other risk factors, a consultation with an obstetrician-gynecologist or a maternal fetal medicine specialist should be considered.
- (4) The ability to provide high-risk obstetrical care, but efforts should be made to transfer women whose newborns are likely to need a higher level of care than a Level II maternal care hospital can provide, or when the pregnancy has risk factors that require the consultation or care of a maternal-fetal medicine specialist.

150.7(3) Level III maternal care hospital.

a. *Provider of subspecialty care.* A Level III maternal care hospital provides care to women that includes all Level I and Level II services and has subspecialists available on site, by telephone, or by telemedicine to assist in providing care for more complex maternal and fetal conditions.

b. *Capabilities.* A Level III maternal care hospital functions as the regional perinatal health care center for some areas of Iowa if there are no Level IV maternal care hospitals available. In these areas, a Level III maternal care hospital will be responsible for the leadership; facilitation of transport and referral; educational outreach; and data collection, storage and retrieval to support quality improvement. Designation of Level III maternal care hospital should be based on the demonstrated experience and capability of the facility to provide comprehensive management of severe maternal and fetal complications.

c. *Types of health care providers.* In addition to meeting the health care provider requirements of a Level II maternal care hospital, a Level III maternal care hospital will have:

- (1) An obstetrician-gynecologist with inpatient privileges, available on site at all times.
- (2) A maternal-fetal medicine subspecialist with inpatient privileges, available at all times, either on site, by telephone, or by telemedicine.
- (3) A director of the maternal-fetal medicine service who is a board-certified or board-eligible maternal-fetal medicine subspecialist.
- (4) A board-certified or board-eligible obstetrician-gynecologist with special interest and experience in obstetric care directing obstetric services.
- (5) A provider of anesthesia services available at all times on site.
- (6) A board-certified or board-eligible anesthesiologist with special training or experience in obstetric anesthesia who is in charge of obstetric anesthesia services.

(7) A full complement of subspecialists, available for inpatient consultations, including subspecialists in:

1. Critical care,
2. General surgery,
3. Infectious disease,
4. Hematology,
5. Cardiology,
6. Nephrology,
7. Neurology, and
8. Neonatology.

(8) Nursing leaders and adequate numbers of registered nurses who have completed orientation and demonstrated competence in the care of obstetric patients (women and fetuses) consistent with Level III care criteria, including the transfer of high-risk women who exceed Level III care criteria, and who have special training and experience in the management of women with complex maternal illnesses and obstetric complications. Nursing personnel will be continuously available.

d. Functional criteria of support services. In addition to meeting the support services requirements of a Level II maternal care hospital, a Level III maternal care hospital will have:

- (1) An on-site intensive care unit to accept pregnant women.
- (2) Critical care providers on site to actively collaborate with maternal-fetal specialists at all times.
- (3) Equipment and personnel with expertise available on site to ventilate and monitor women in the labor and delivery unit until they can be safely transferred to the intensive care unit.
- (4) The ability to provide the following imaging services, with interpretation available at all times:
 1. Basic interventional radiology,
 2. Maternal echocardiography,
 3. Computed tomography,
 4. Magnetic resonance imaging, and
 5. Nuclear medicine imaging.
- (5) The ability to perform detailed obstetric ultrasonography and fetal assessment, including Doppler studies.

150.7(4) Level IV maternal care hospital.

a. Provider of services as a regional perinatal health care center. In addition to meeting the requirements for a Level III maternal care hospital, a Level IV maternal care hospital provides care to women with additional requirements and has considerable experience in the care of the most complex and critically ill pregnant women throughout antepartum, intrapartum, and postpartum care. The particular specialty of fetal surgery, advanced neurosurgery, transplant, and advanced cardiovascular capabilities may not all be available at an individual Level IV maternal care hospital. In some cases, specific advanced care will require care coordination to the Level IV maternal care hospital by availability of specific expertise, including but not limited to fetal surgery, advanced neurosurgery, transplant, and advanced cardiovascular capabilities. Each hospital will have a clear understanding of the categories of perinatal patients who can be managed appropriately in the local hospital and those who must be transferred.

b. Capabilities. Although Level III and Level IV maternal care hospitals may seem to overlap, a Level IV maternal care hospital is distinct from a Level III maternal care hospital in the approach to the care of pregnant women and women in the postpartum period with complex and critical illnesses. In addition to having an intensive care unit on site for obstetric patients, a Level IV maternal care hospital must have evidence of a maternal-fetal medicine care team that has the expertise to assume responsibility for pregnant women and women in the postpartum period who are in critical condition or have complex medical conditions. The maternal-fetal medicine team collaborates actively in the co-management of all obstetric patients who require critical care and intensive care unit services, including co-management of intensive care unit-admitted obstetric patients.

c. Types of health care providers. In addition to meeting the health care provider requirements of a Level III maternal care hospital, a Level IV maternal care hospital will have:

- (1) A maternal-fetal medicine team member with full privileges, available at all times for on-site consultation and management.
- (2) A board-certified maternal-fetal medicine subspecialist with expertise in critical care obstetrics to lead the team.
- (3) A maternal-fetal medicine team with expertise in critical care at the physician level, nursing level, and ancillary services level.
- (4) Institutional support for the routine involvement of a maternal-fetal medicine care team with the critical care units and specialists. A key principle of caring for critically ill pregnant and peripartum women is the hospital's recognition of the need for seamless communication between maternal-fetal medicine subspecialists and other subspecialists in the planning and facilitation of care for women with the most high-risk complications of pregnancy.
- (5) A commitment to having physician and nursing leaders with expertise in maternal intensive and critical care, as well as adequate numbers of available registered nurses in a Level IV maternal care hospital who have experience in the care of women with complex medical illnesses and obstetric complications; this experience includes completed orientation and demonstrated competence in the care of obstetric patients (women and fetuses) consistent with Level IV maternal care criteria.
- (6) A director of obstetric services who is a board-certified maternal-fetal medicine subspecialist or a board-certified obstetrician-gynecologist with expertise in critical care obstetrics.
- (7) A provider of anesthesia services available on site at all times.
- (8) A board-certified anesthesiologist with special training or experience in obstetric anesthesia who is in charge of obstetric anesthesia services.
- (9) Adult medical and surgical specialty and subspecialty consultants, a minimum of those listed for a Level III maternal care hospital, available on site at all times to collaborate with the maternal-fetal medicine care team.

d. Functional criteria of support services. In addition to meeting the support services requirements of a Level III maternal care hospital, a Level IV maternal care hospital will have:

- (1) The capability for on-site medical and surgical care of complex maternal conditions (e.g., congenital maternal cardiac lesions, vascular injuries, neurosurgical emergencies, and transplants) with the availability of critical (or intensive) care unit beds.
- (2) Perinatal system leadership, including facilitation of maternal referral and transport, outreach education for facilities and health care providers in the region and analysis and evaluation of regional data, including perinatal complications, outcomes and quality improvement.

This rule is intended to implement Iowa Code section 135.11(27).

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.8(135) Maternal-fetal transport—all levels. Maternal-fetal transport is an essential component of perinatal care. A hospital participating in the regionalized system of perinatal health care must be familiar with its own resources and capabilities in dealing with obstetrical and neonatal complications. In most instances, maternal-fetal transport is preferable to neonatal transport. Each hospital, when transporting or accepting a transport, needs a system in place to facilitate a smooth transition of care in the most expeditious manner possible. The majority of maternal-fetal transports can be carried out by ground transportation. It is important for ambulance services to be equipped for maternal-fetal transport and have appropriately trained staff.

This rule is intended to implement Iowa Code section 135.11(27).

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.9(135) Levels of neonatal care. The levels of neonatal care include basic neonatal care Level I, specialty care Level II, and subspecialty intensive care Level III and Level IV. The levels reflect the overall evidence for risk-appropriate care through the availability of appropriate functional criteria, physical facilities, medical and nursing personnel, outreach education, allied health personnel and services, infection control, newborn or neonatal safety, neonatal transport and quality improvement.

150.9(1) Level I neonatal care hospital.

a. Provider of basic neonatal care. A Level I neonatal care hospital provides a basic level of care to neonates without complications. A Level I neonatal care hospital has the following capabilities:

- (1) To provide neonatal resuscitation at every delivery.
- (2) To evaluate and provide postnatal care to stable term newborn infants.
- (3) To stabilize and provide care for infants born at 35 to 37 weeks' gestation who remain physiologically stable.
- (4) To stabilize newborn infants who are ill and those born at less than 35 weeks' gestation until transfer to a higher level of care.
- (5) To provide leadership in early risk identification before and after birth.
- (6) To seek consultation or referral for high-risk neonates.
- (7) To provide public and professional education.

b. Functions. A Level I neonatal care hospital has a family-centered philosophy. Parents have reasonable access to their newborns 24 hours a day within all functional units and are encouraged to participate in the care of their newborns. Generally, a newborn can be with its parents in the mother's room.

c. Physical facilities. A Level I neonatal care hospital will maintain a nursery for normal-term or late preterm neonates.

d. Medical personnel. At a Level I neonatal care hospital, neonatal care is under the supervision of one of the following:

- (1) A board-eligible or board-certified neonatologist,
- (2) A pediatrician,
- (3) A family medicine physician,
- (4) A board-eligible or board-certified advanced registered nurse practitioner, or
- (5) A physician assistant.

e. Nursing personnel. At a Level I neonatal care hospital, a registered nurse assigned to the neonatal service has nursing orientation to and demonstrates competency in the care of a neonate.

f. Outreach education. A Level I neonatal care hospital will assume an active role in the development and coordination of wellness and preventive programs concerning neonatal and child health at the community level, including parenting, breastfeeding, and cessation of smoking.

g. Allied health personnel and services. A Level I neonatal care hospital will have available, at a minimum, the following allied health personnel and services:

- (1) Dietitian with knowledge of maternal and neonatal nutrition management,
- (2) Social worker,
- (3) Bioengineer-safety and environmental control,
- (4) Pharmacy,
- (5) Radiology,
- (6) Laboratory,
- (7) Pathology, and
- (8) Chaplain, spiritual support.

h. Infection control.

(1) Each Level I neonatal care hospital will establish written policies and procedures for assessing the health of personnel assigned to the perinatal care services and of those who have significant contact with the newborn. The policies and procedures will include restricting contact with patients when necessary and screening per department recommendations for health care providers. Routine culturing of specimens obtained from personnel is not useful, although selective culturing may be of value when a pattern of infection is suspected.

(2) No special or separate isolation facility is required for neonates born at home or in transit to the hospital. Detailed descriptions of the isolation categories and requirements will be available in each hospital's infection control manual.

i. Newborn safety. At a Level I neonatal care hospital, the protection of newborns is the responsibility of all personnel in the neonatal care hospital. Newborns will always be within the sight and supervision of hospital staff, the mother, or other family members or friends designated by the mother. Each neonatal care hospital has a policy established that addresses strategies to promote newborn safety.

150.9(2) Level II neonatal care hospital.

a. Provider of specialty care. In addition to meeting the requirements for care and services as a Level I neonatal care hospital, a Level II neonatal care hospital will:

- (1) Provide management of certain high-risk neonates with selected complications.
- (2) Have a board-certified or board-eligible neonatologist(s) or a board-certified or board-eligible pediatrician(s) on staff, one of whom directs the special care nursery.

b. Functions. In addition to performing the functions of a Level I neonatal care hospital, a Level II neonatal care hospital will have the capability to:

- (1) At a minimum, manage neonates of greater than or equal to 32 weeks' gestation and weighing greater than or equal to 1,500 grams who have physiological immaturity or who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis and, for neonates of 32 weeks' gestation and weighing less than 1,500 grams, recommend consultation with a higher-level facility by prearranged consultative agreement.
- (2) Provide mechanical ventilation for a brief duration (less than 24 hours).
- (3) Provide continuous positive airway pressure as needed (less than 24 hours).
- (4) Stabilize infants born before 32 weeks and weighing less than 1,500 grams until transfer to a Level III or Level IV neonatal care hospital.
- (5) Provide care for infants convalescing after intensive care.

c. Physical facilities. In addition to having the physical facilities of a Level I neonatal care hospital, a Level II neonatal care hospital will have:

- (1) A special care nursery (a special area designated for the care of sick neonates),
- (2) A mechanical ventilator,
- (3) A portable X-ray machine,
- (4) A laboratory with a blood gas analyzer,
- (5) Physiologic monitoring equipment, and
- (6) A pharmacy.

d. Medical personnel. In addition to having the medical personnel of a Level I neonatal care hospital, a Level II neonatal care hospital will:

- (1) Be under the co-direction/supervision of a board-eligible or board-certified neonatologist or pediatrician.
- (2) Have a neonatologist or pediatrician on staff. Other provider types that may be utilized include a pediatric hospitalist, a neonatal nurse practitioner or pediatric nurse practitioner or a physician assistant with appropriate training.
- (3) Have allied medical specialists in various disciplines on staff, including specialists in internal medicine, radiology, and pathology.

e. Nursing personnel. In addition to having the nursing personnel of a Level I neonatal care hospital, a Level II neonatal care hospital has nursing orientation to and demonstrates competency in the care of sick neonates.

f. Outreach education. A Level II neonatal care hospital has the same responsibility for outreach education as that of a Level I neonatal care hospital.

g. Allied health personnel and services. In addition to having the allied health personnel and services of a Level I neonatal care hospital, a Level II neonatal care hospital has:

- (1) Respiratory therapists,
- (2) Certified laboratory technicians/blood gas technicians, and
- (3) X-ray technologists and ultrasound technicians with neonatal/perinatal experience.

h. Infection control. A Level II neonatal care hospital has the same infection control guidelines as those for a Level I neonatal care hospital.

i. Neonatal safety. A Level II neonatal care hospital has the same requirements for newborn safety as those for a Level I neonatal care hospital.

j. Neonatal transport. In addition to having the Level I neonatal care hospital capabilities for neonatal transport, a Level II neonatal care hospital is expected to accept patient referrals when appropriate. A critical function of providers at a Level II neonatal care hospital is to communicate with the providers at

a Level I neonatal care hospital in deciding whether a particular patient should be transported to the Level II neonatal care hospital. Careful assessment of the hospital's capabilities for perinatal management will be critical in these decisions. This information will need to be disseminated among the hospital staff. Providers of obstetric care need to know the critical gestational age limitations for their particular nursery. Below this gestational age, maternal-fetal transport should be utilized if delivery is anticipated and the circumstances permit.

k. Perinatal care committee.

(1) A Level II neonatal care hospital must maintain a perinatal care committee. Members of this committee will represent, at a minimum, the fields of:

1. Obstetrics,
2. Pediatrics,
3. Family practice,
4. Nursing,
5. Administration,
6. Laboratory,
7. Respiratory therapy,
8. Anesthesia, and
9. Social services.

(2) Responsibilities of the perinatal care committee include the following:

1. To develop policies for the unit, including provisions to ensure adequate patient care by qualified providers.
2. To conduct a meeting, at least semiannually, to resolve problems related to the unit.
3. To review educational activities conducted by the unit.
4. To serve as a general liaison between the various groups represented on the committee.

150.9(3) *Level III neonatal care hospital.*

a. Provider of subspecialty intensive care. In addition to providing the care and services of a Level II neonatal care hospital, a Level III neonatal care hospital will manage high-risk neonates, including infants born at less than 32 weeks or weighing less than 1,500 grams. High-risk neonates requiring surgical intervention or pediatric subspecialty should go to a Level IV neonatal care hospital.

b. Functions. In addition to performing the functions of a Level II neonatal care hospital, a Level III neonatal care hospital will have the capability to:

- (1) Provide sustained life support.
- (2) Provide comprehensive care for infants born at less than 32 weeks and weighing less than 1,500 grams and infants born at all gestations and birth weights who have critical illness.
- (3) Provide an organized program for monitoring treatment and follow-up of retinopathy of prematurity.
- (4) Maintain a prearranged consultative agreement with a higher-level hospital within the Level III neonatal care hospital's referral area.
- (5) Transfer a surgical patient within approximately two hours from the time the referral call is made until arrival at the referral hospital.
- (6) Provide follow-up care for high-risk newborns.

c. Physical facilities. In addition to having the physical facilities of a Level II neonatal care hospital, a Level III neonatal care hospital:

- (1) Has a neonatal intensive care unit with continuously available personnel, including a neonatologist, neonatal nurses and respiratory therapists to provide life support for as long as necessary.
- (2) Provides a full range of respiratory support that includes invasive mechanical ventilation and may include high-frequency ventilation or inhaled nitric oxide or both.
- (3) Performs advanced imaging, with interpretation on an urgent basis, including computed tomography, magnetic resonance imaging, and echocardiography.
- (4) Maintains a neonatal transport team for the regional area served.

d. Medical personnel. In addition to having the medical personnel of a Level II neonatal care hospital, a Level III neonatal care hospital will:

(1) Have a medical director of the neonatal intensive care unit who is a full-time, board-eligible or board-certified neonatologist.

(2) Provide prompt and readily available access to the following, either on site or by prearranged consultative agreement. Using telemedicine technology or telephone consultation, a prearranged consultation can be performed from a distant location by:

1. Pediatric medical subspecialists,
2. A pediatric surgical specialist,
3. A pediatric anesthesiologist, and
4. A pediatric ophthalmologist.

(3) Have a neonatologist on the premises when an unstable critically ill infant is in the Level III neonatal care hospital.

e. Nursing personnel. A Level III neonatal care hospital has the same requirements for nursing personnel as those of a Level II neonatal care hospital.

f. Outreach education. Outreach education is provided to each hospital in the referral area at least once per year. This outreach education can be achieved by one or more of the following:

- (1) Sponsoring an annual conference.
- (2) Visiting a Level I neonatal care hospital and a Level II neonatal care hospital.
- (3) Providing educational programs and materials for the staff members of the Level I and Level II neonatal care hospitals.

g. Allied health personnel and services. In addition to having the allied health personnel and services of a Level II neonatal care hospital, a Level III neonatal care hospital has:

- (1) X-ray technologists and ultrasound technicians with neonatal/perinatal experience, available on a 24-hour basis.
- (2) Social work services with social workers assigned specifically to the neonatal units.

h. Infection control. A Level III neonatal care hospital has the same infection control guidelines as those of a Level I neonatal care hospital.

i. Neonatal safety. A Level III neonatal care hospital has the same requirements for newborn safety as those for a Level I neonatal care hospital.

j. Neonatal transport. In addition to having the Level II neonatal care hospital transport capabilities, a Level III neonatal care hospital is capable of providing neonatal transport with crews who have demonstrated competence in neonatal resuscitation and stabilization. Important decisions to be made jointly will include:

- (1) The appropriateness of transport.
- (2) The best mode of transportation.
- (3) The need for additional personnel accompanying the transport.
- (4) The appropriate medical management to initiate prior to transport.

k. Perinatal care committee. A Level III neonatal care hospital shall maintain a perinatal care committee that meets the same criteria as those for a Level II neonatal care hospital.

150.9(4) Level IV neonatal care hospital.

a. Provider of subspecialty intensive care. In addition to providing the level-of-care services of a Level III neonatal care hospital, a Level IV neonatal care hospital manages higher-risk neonates. The differentiating factor between a Level III neonatal care hospital and a Level IV neonatal care hospital is primarily one of having additional professional staff with considerable experience in the care of the most complex and critically ill infants and having the ability to provide surgical repair of complex congenital or acquired conditions.

b. Physical facilities. In addition to having the physical facilities of a Level III neonatal care hospital, a Level IV neonatal care hospital has more equipment, more extensive physical facilities and will serve a more complicated patient population.

c. Medical personnel. In addition to having the medical personnel of a Level III neonatal care hospital, a Level IV neonatal care hospital will:

- (1) Have a medical director of the neonatal intensive care unit who is a full-time, board-certified neonatologist.

(2) Have anesthesia providers on staff with special training or experience in pediatric anesthesia.
(3) Maintain a full range of pediatric medical subspecialists and pediatric surgical subspecialists at the site.

(4) Have the subspecialist physicians immediately available to the Level IV neonatal care hospital.

(5) Have a neonatologist on the premises when an unstable critically ill infant is in the Level IV neonatal care hospital.

d. Nursing personnel. A Level IV neonatal care hospital has the same requirements for nursing personnel as those for a Level II neonatal care hospital.

e. Outreach education. A Level IV neonatal care hospital has the same responsibilities for outreach education as those for a Level III neonatal care hospital.

f. Allied health personnel and services. A Level IV neonatal care hospital has the same level of allied health personnel and services as that of a Level III neonatal care hospital.

g. Infection control. A Level IV neonatal care hospital has the same infection control guidelines as those for a Level I neonatal care hospital.

h. Neonatal safety. A Level IV neonatal care hospital has the same requirements for neonatal safety as those for a Level I neonatal care hospital.

i. Neonatal transport. In addition to meeting the neonatal transport requirements of a Level III neonatal care hospital, a Level IV neonatal care hospital is capable of providing ground and air transportation with crews who have demonstrated competencies in neonatal resuscitation and stabilization.

j. Perinatal care committee. In addition to maintaining a perinatal care committee that meets the same criteria as those for a Level II neonatal care hospital, a Level IV neonatal care hospital maintains a perinatal care committee that has additional representation by surgical specialties. The Level IV neonatal care hospital's perinatal care committee will maintain and analyze data on long-term outcomes to evaluate the effectiveness of the delivery of perinatal health care services.

This rule is intended to implement Iowa Code section 135.11(27).

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.10(135) Grant or denial of certificate of verification; and offenses and penalties.

150.10(1) Upon receipt of the levels-of-care assessment tool and the on-site survey results, if required, the department shall within 30 days issue its decision to grant or deny the hospital a certificate of verification. The department may deny verification or may give a citation and warning, place on probation, suspend, or revoke existing verification if the department finds reason to believe the hospital's perinatal care program has not been or will not be operated in compliance with these rules. The denial, citation and warning, period of probation, suspension or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

150.10(2) All complaints regarding the operation of a participating hospital's perinatal care program shall be reported to the department and to the department of inspections and appeals.

150.10(3) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code sections 22.7 and 135.11(27).

150.10(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

150.10(5) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the hospital of denial, citation and warning, probation, suspension or revocation shall be served by certified mail, return receipt requested, or by personal service.

150.10(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is: Iowa Department of Public Health, Bureau of Family Health, Regionalized System of Perinatal Health Care Coordinator, 321 East 12th Street, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has

been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

150.10(7) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information, which may be provided by the aggrieved party, shall also be provided to the department of inspections and appeals.

150.10(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

150.10(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

150.10(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

150.10(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

150.10(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

150.10(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

150.10(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Family Health, Regionalized System of Perinatal Health Care Coordinator, 321 East 12th Street, Lucas State Office Building, Des Moines, Iowa 50319-0075.

150.10(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

150.10(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the department of inspections and appeals and to the appropriate professional associations or news media.

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.11(135) Prohibited acts. A hospital that imparts or conveys, or causes to be imparted or conveyed, that it is a participating hospital in Iowa's regionalized system of perinatal health care, or that uses any other term, such as a designated level of care, to indicate or imply that the hospital is a participating hospital in the regionalized system of perinatal health care without having obtained a certificate of verification from the department is subject to licensure disciplinary action by the department of inspections and appeals, as well as to the application by the director to the district court for a writ of injunction to restrain the use of the term or terms "Level I maternal care or neonatal care hospital," "Level

II maternal care or neonatal care hospital,” “Level III maternal care or neonatal care hospital” and “Level IV maternal care or neonatal care hospital” in relation to the provision of perinatal health care services.

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

641—150.12(135) Construction of rules. Nothing in these administrative rules shall be construed to restrict a hospital from providing any services for which it is duly authorized.

[ARC 3835C, IAB 6/6/18, effective 7/11/18]

These rules are intended to implement Iowa Code section 135.11(27).

CHAPTER 151
TOBACCO USE PREVENTION AND CONTROL
COMMUNITY PARTNERSHIP INITIATIVE

641—151.1(142A) Scope. These rules apply to community partnerships established under Iowa Code chapter 142A as part of a comprehensive tobacco use prevention and control initiative to reduce tobacco use by youth and pregnant women, to promote compliance by minors and retailers with tobacco sales laws and ordinances, to enhance the capacity of youth to make healthy choices and to foster a social and legal climate in which tobacco use becomes undesirable and unacceptable.

641—151.2(142A) Community partnership areas. It is the goal of the commission on tobacco use prevention and control that the entire state be divided into multiple community partnership areas, so that all portions of the state are included in a community partnership area and no portion of the state is without the services of a community partnership. Toward this goal, the commission will encourage formation of community partnership areas that incorporate surrounding communities in a manner that does not isolate any geographic region of the state, and encourages optimal use of resources. In addition to the requirements of Iowa Code section 142A.8(1), a community partnership area:

151.2(1) Shall be composed of one or more counties, school districts, economic development enterprise zones, or community empowerment areas.

151.2(2) Shall follow existing boundaries of one or more counties, school districts, economic development enterprise zones, or community empowerment areas.

151.2(3) Shall serve a population of at least 4,000, including a minimum school-age population of 500.

151.2(4) Shall serve a minimum geographic area of one county.

641—151.3(142A) Community partnerships. A community partnership is a public agency or nonprofit organization which utilizes broad community involvement and represents a broad coalition of community groups, organizations, and interests. Community partnerships shall promote a wide range of activities that discourage tobacco use and support smoke-free environments. Some of these activities include developing coalitions with local organizations, conducting educational programs and encouraging policies that support tobacco use prevention and cessation.

641—151.4(142A) Application requirements for community partnerships. In order to qualify for funding through the tobacco use prevention and control program, a public agency or nonprofit organization seeking to be designated as a community partnership must apply to, and be approved by, the department of public health. Only one application per community partnership will be accepted. An application must provide the following information:

151.4(1) A description of the community partnership area to be served by the community partnership, including:

a. The geographic boundaries of the area;

b. Population, including both general population and school-age population, of the area;

151.4(2) A description of the applicant, including a description of the governing structure of the agency or organization, a table of organization, and the applicant's mission statement;

151.4(3) A description of the tobacco use prevention and control services currently provided by the applicant;

151.4(4) A description of the community outreach and educational programming services currently provided by the applicant;

151.4(5) A description of the number of years the applicant has provided tobacco use prevention and control services and the number of clients served annually by the applicant;

151.4(6) A description of the funds currently received by the applicant which are targeted to provide tobacco use prevention and control services, including the source of funds, the dollar amount, and the period of funding;

151.4(7) A list of the other agencies, organizations, and entities currently providing tobacco use prevention and control services in the proposed community partnership area and a description of the tobacco use prevention and control services currently provided by the other agencies, organizations, or entities;

151.4(8) A description of the collaborative efforts the applicant has undertaken with the agencies, organizations, and entities described in subrule 151.4(6) and an action plan describing anticipated collaborative efforts during the funding period;

151.4(9) An assessment of the needs of the community partnership area which incorporates, but is not limited to, the following information for each county in the community partnership area:

a. Tobacco-related information from the community health needs assessment and health improvement plan (CHNA and HIP, Healthy Iowans);

b. Tobacco-related information from the most recent Iowa youth survey;

c. Relevant data regarding tobacco use;

d. Relevant Synar data;

e. Information or data received from other service providers, organizations, or law enforcement agencies;

151.4(10) A description of how the applicant intends to implement the initiative's goals described in Iowa Code section 142A.6(2) in light of the community needs identified in subrule 151.4(11), including a proposed budget and a description of how performance measures shall be developed and utilized;

151.4(11) Identification of the source and amount of local matching funds, services, or support;

151.4(12) A description of how youth (aged 5 to 24 years) will be involved in the community partnership.

[ARC 1225C, IAB 12/11/13, effective 1/15/14]

641—151.5(142A) Performance indicators. Periodic reports shall be submitted to the department by the community partnerships. These required reports shall be based on the degree to which the partnerships have achieved goals set out in the application and shall include information such as how many events/meetings were held and how many participants were in attendance.

641—151.6(142A) Application deadline. An applicant seeking to be approved as a community partnership for distribution of funds during the current fiscal year may apply once the RFA/RFP has been posted.

151.6(1) Rescinded IAB 12/11/13, effective 1/15/14.

151.6(2) Any change in the geographic boundaries of a community partnership area after a community partnership has been approved must be submitted to the tobacco use prevention and control division as a request to amend the application. The request shall describe the boundary change, explain the reason for the boundary change and describe any impact the boundary change will have on the information provided in response to rule 641—151.4(142A).

[ARC 1225C, IAB 12/11/13, effective 1/15/14]

641—151.7(142A) Distribution of funding.

151.7(1) Applications submitted in accordance with these rules will be evaluated by the administrator of the division of tobacco use prevention and control, or the administrator's designee, to determine whether the application meets the requirements for funding as designated in these rules. The administrator or designee may request additional information from any applicant regarding the content of the application and may condition funding based on an applicant's submission of additional information or based on an applicant's willingness to change any term of the application, including geographic boundaries of the community partnership area.

151.7(2) The department in consultation with the commission shall allocate funding to the community partnerships from the total moneys appropriated to the tobacco use prevention and control initiative. If sufficient funds are available, the department shall distribute the funding allocated to the community partnerships in accordance with this rule.

151.7(3) The department shall fund one community partnership per community partnership area. Funds shall be distributed equitably among the state's community partnership areas based on general population, school-age population, and designation of county or counties which comprise the community partnership area as a rural county or an urban county as defined by the Office of Management and Budget. Available funds will be distributed under the following formulas, using United States Census Bureau annual population estimates:

Rural counties:

\$.84 per school-age youth plus an additional \$.84 per non-school-age county resident

Urban counties:

\$.52 per school-age youth plus an additional \$.52 per non-school-age county resident; provided that application of the funding formula results in distribution to a community partnership of a minimum amount per county included in each community partnership area as determined annually by the department in consultation with the commission.

If application of the funding formula would result in distribution of less than the minimum established amount, the department shall distribute to such community partnership no less than the minimum established amount per county included in the community partnership area.

As sufficient funds become available, the department in consultation with the commission may also distribute to community partnerships funds for special or pilot projects within a community partnership area.

151.7(4) Funding received by a community partnership shall be matched on a one-to-four basis. The match may include in-kind services, office support, or other tangible support or offset of costs.

Any offers to assist the applicant in reaching the match must be disclosed to the department in writing. In regard to any cash offers that are declined, the applicant must disclose reasons and rationale as to why these offers were declined.

151.7(5) Prior to receiving funding, a community partnership shall be required to execute a contract with the department.

151.7(6) Funding may be denied on grounds including, but not limited to:

- a. Applications from more than one entity have been received covering the same, or portions of the same, geographic area and another application more closely satisfies application criteria.
- b. The application is incomplete, untimely, or includes misleading or inaccurate information.
- c. Program funds are no longer available.
- d. Local matching funds, services, or support is not available.
- e. The applicant refuses to execute a contract with the department.
- f. The applicant fails to comply with the statute or administrative rules governing this program.

[ARC 1225C, IAB 12/11/13, effective 1/15/14]

641—151.8(142A) Gifts. The commission shall solicit and accept gifts of money or services or property from governmental or private sources for use in support of the comprehensive tobacco use prevention and control initiative.

151.8(1) The commission shall not accept gifts of money or services or property from a manufacturer of tobacco products.

a. A gift means a rendering of anything of value in return for which legal consideration of equal or greater value is not given and received. A gift does not include funds deposited by any manufacturer of tobacco products into the tobacco settlement fund.

b. A manufacturer of tobacco products means every person who ships cigarettes or other tobacco products as defined in Iowa Code section 453A.1 into this state from outside the state.

151.8(2) The commission shall not accept a gift of money or services or property from a corporation or other private legal entity which is controlled by a manufacturer of tobacco products. A manufacturer of tobacco products controls a corporation or other private legal entity when the manufacturer possesses, directly or indirectly, the power to direct or cause the direction of the management and policies of a corporation or other private legal entity, whether through the ownership of voting rights, by contract, or otherwise.

151.8(3) The commission may not accept a gift of money or services or property from a corporation or other private legal entity in which a manufacturer of tobacco products has a noncontrolling interest. A manufacturer of tobacco products has a noncontrolling interest in a corporation or other private legal entity when the manufacturer has a commercial contract for goods or nonmanagement services, or holds the power to vote, or holds proxies representing less than 10 percent of the voting rights of any other person.

151.8(4) The commission, in its discretion, may require any corporation or other private legal entity from which it solicits, or which offers to it, a gift of money or services or property for use in support of the comprehensive tobacco use prevention and control initiative to submit a statement describing the relationship, if any, between the corporation or other private legal entity and a manufacturer of tobacco products.

151.8(5) If the commission accepts a gift from a corporation or other private legal entity under the circumstances described in subrule 151.8(3), the commission may require the gift to be contingent on a waiver by the manufacturer of tobacco products of any right to advertise with regard to, claim responsibility for, or otherwise publicize the gift.

These rules are intended to implement Iowa Code chapter 142A.

CHAPTER 152
TOBACCO USE PREVENTION AND CONTROL FUNDING PROCESS

641—152.1(78GA, HF2565) Scope and purpose. In addition to funding community partnerships in accordance with 641—Chapter 151, it is the goal of the commission on tobacco use prevention and control to provide funding for other programs for the purpose of achieving the goals of the initiative as defined in 2000 Iowa Acts, House File 2565. Toward this end, the commission intends to provide funding on a competitive basis for school programs; a media, marketing, and communications program; and a cessation program for pregnant women.

641—152.2(78GA, HF2565) Funding.

152.2(1) In addition to other requests for proposals necessary to implement the initiative, the commission shall issue a request for proposal (RFP) for the youth program, the media, marketing and communications program, and the cessation program for pregnant women. The RFP for each program shall include the amount of funding available, the project period, the services to be delivered, performance measures, application due date and other relevant time frames, a description of the review process, the review criteria to be used, expected contract terms, and a reference to the appeal process in the event an application is denied.

152.2(2) Applications submitted in accordance with these rules shall be evaluated in accordance with the review process described in the RFP. The administrator of the division of tobacco use prevention and control shall make the final determination regarding funding and shall notify all applicants regarding funding decisions by restricted certified mail, return receipt requested.

641—152.3(78GA, HF2565) Appeals.

152.3(1) Any request for an appeal concerning denial or partial denial of an application for funding shall be submitted by an aggrieved party in writing to the department by certified mail, return receipt requested, within ten days of receipt of the notice of denial. The address is Department of Public Health, Tobacco Use Prevention and Control Division, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319. The request for appeal must state the party's complete legal name, street address, telephone number, fax number, and the specific grounds upon which the party challenges the board's denial, including legal authority, if any. The request for appeal commences a contested case.

152.3(2) Upon receipt of an appeal, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by the department regarding transmission of contested cases.

152.3(3) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 4.

152.3(4) When the hearing officer makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceeding ten days after it is received by the aggrieved party unless an appeal to the commission is taken as provided in subrule 152.3(5).

152.3(5) Any appeal to the commission for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the commission by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for appeal shall state the reasons for appeal.

152.3(6) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the commission.

152.3(7) Review of a proposed decision shall be based on the record and limited to the issues raised in the hearing. The issues shall be specified in the notice of appeal of a proposed decision. The party requesting the review shall be responsible for transcribing any tape of the oral proceedings or arranging for a transcript of oral proceedings reported by a certified shorthand reporter.

152.3(8) Each party shall have the opportunity to file exceptions and present briefs. The administrator may set deadlines for the submission of exceptions or briefs. If oral argument will be held, the administrator shall notify all parties of the date, time and location at least ten days in advance.

152.3(9) The commission shall not receive any additional evidence, unless it grants an application to present additional evidence. Any such application must be filed by a party no less than five business days in advance of oral argument. Additional evidence shall be allowed only upon a showing that it is material to the outcome and that there were good reasons for failure to present it at hearing. If an application to present additional evidence is granted, the commission shall order the conditions under which it shall be presented.

152.3(10) The commission's final decision shall be in writing and it may incorporate all or part of the proposed decision.

152.3(11) The decision and order of the commission becomes the department's final agency action pursuant to Iowa Code chapter 17A upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

These rules are intended to implement Iowa Code chapter 17A and 2000 Iowa Acts, House File 2565.

[Filed emergency 10/13/00—published 11/1/00, effective 10/13/00]

CHAPTER 153
SMOKEFREE AIR

641—153.1(142D) Definitions. For the purposes of this chapter, definitions found in Iowa Code section 142D.2 and the following definitions apply:

“Ashtray” means any receptacle, including a can, bottle, bowl, tray, or other vessel that is used for extinguishing or disposing of any lighted cigar, cigarette, pipe, or other tobacco product in any manner or form including ash, cigarette butts or filters, or cigar stubs. However, “ashtray” shall not include any receptacle located outdoors and on the perimeter of any public place, the perimeter of the grounds of any public building, the perimeter of school grounds, or the perimeter of any other outdoor space subject to the prohibition in Iowa Code chapter 142D.

“Entrance” means any doorway to an enclosed area used by the public or employees for ingress to any public place or place of employment, but does not include any doorway designated for use as an exit in an emergency only. “Entrance” also includes the commonly understood points of entry to an outdoor area, subject to the prohibitions of this chapter, such as a driveway, sidewalk, pathway, access road, gate, or dedicated point of entry, but not including a street, road, highway, or sidewalk in the public right-of-way.

“Grounds of any public building” means an outdoor area of a public building that is used in connection with the building, including but not limited to a sidewalk or driveway immediately adjacent to the building, but not including a sidewalk in the public right-of-way; a sitting or standing area immediately adjacent to the building; a patio; a deck; a curtilage or courtyard; a swimming or wading pool; a beach; or any other outdoor area as designated by the person having custody or control of the public building. A person having custody or control of a public building may exclude from the designated grounds of any public building the following: a parking lot, the course of play at a golf course, a hiking trail, locations of an individual campsite or campfire, or a lake, river, or other body of water. Nothing in this definition prohibits any owner, operator, manager, or other person having custody or control of an area that is exempt from the prohibitions of Iowa Code chapter 142D from declaring the entire area or property a nonsmoking place.

“Public building” means an enclosed area owned, leased, or operated by or under the control of the state government or its political subdivisions.

“Solid wall” means any physical barrier, whether temporary or permanent, covering more than 75 percent of the combined surface area of the vertical planes constituting the perimeter of the area. Solid walls also include the floor and ceiling of the enclosed area.

[ARC 8756C, IAB 1/8/25, effective 7/1/25]

641—153.2(142D) Duties of employers, owners, operators, managers, and persons having custody or control of a public place, place of employment, area declared nonsmoking pursuant to Iowa Code chapter 142D or outdoor areas where smoking is prohibited.

153.2(1) The employer, owner, operator, manager, or person having custody or control of a place where smoking is prohibited under Iowa Code chapter 142D shall:

a. Not permit smoking in a public place, place of employment, outdoor area where smoking is prohibited, or area declared nonsmoking pursuant to Iowa Code chapter 142D.

b. Inform all current employees and all prospective employees upon application for employment of the prohibitions of Iowa Code chapter 142D.

c. Not retaliate against any employee, applicant for employment, or customer who exercises any rights, registers a complaint, or attempts to prosecute a violation pursuant to Iowa Code chapter 142D.

d. Post signs in and at every entrance to the public place, place of employment, area declared nonsmoking, and outdoor area where smoking is prohibited that inform persons that they are entering a “no smoking” facility or area.

(1) The signs shall be clear and conspicuous in or at the entrance where posted.

(2) The signs shall be at least 24 square inches in size (for example, 4 inches by 6 inches) and shall be in legible font type.

(3) The signs shall contain the words “No Smoking” or the international “no smoking” symbol; the telephone number for reporting complaints, 1.888.944.2247; and the department website, hhs.iowa.gov/smokefreeair.

e. Place “no smoking” signs in every vehicle that constitutes a public place, place of employment, or area declared nonsmoking pursuant to Iowa Code section 142D.5.

(1) Such signs shall be clear and conspicuous from the exterior of the vehicle.

(2) The signs shall be at least 9 square inches (for example, 3 inches by 3 inches) and shall be in legible font type.

(3) The signs shall contain the words “No Smoking” or the international “no smoking” symbol; the telephone number for reporting complaints, 1.888.944.2247; and the department’s website, hhs.iowa.gov/smokefreeair.

(4) Nothing in this rule requires the placement of a sign in any vehicle that the director of the department of administrative services or the director of transportation orders to receive a regular registration plate pursuant to Iowa Code section 321.19.

f. Remove all ashtrays from areas where smoking is prohibited.

153.2(2) The owner or operator of a building or facility that contains more than one public place, place of employment, or area declared nonsmoking pursuant to Iowa Code chapter 142D that is controlled by other employers, owners, or operators shall comply with the provisions of these rules for the area of the building or facility under the owner’s or operator’s control.

153.2(3) An employer, owner, or operator of a public place, place of employment or area declared nonsmoking pursuant to Iowa Code chapter 142D that is within a public place that is owned or operated by another person shall comply with the provisions of these rules for the area under the control of the employer, owner, or operator within that public place.

153.2(4) An employer, owner, operator, manager, or person having custody or control of a place where smoking is prohibited under Iowa Code chapter 142D shall inform any individual smoking in a place where smoking is prohibited that the individual is violating the smokefree air Act and shall request that the individual stop smoking immediately.

a. If the individual refuses to stop smoking, the employer, owner, operator, manager, or person having custody or control of the place where smoking is prohibited may discontinue service to that individual.

b. If the individual refuses to stop smoking, the employer, owner, operator, manager, or person having custody or control of the place where smoking is prohibited may request that the individual leave the area where smoking is prohibited.

c. If the individual refuses to leave the area where smoking is prohibited, the employer, owner, operator, manager, or person having custody or control of the place where smoking is prohibited may notify the state or local law enforcement agency with jurisdiction over the area where smoking is prohibited.

[ARC 8756C, IAB 1/8/25, effective 7/1/25]

641—153.3(142D) Leases. Any lease entered into by the state or its political subdivisions shall require that all areas where smoking is prohibited pursuant to Iowa Code chapter 142D comply with the provisions of these rules and Iowa Code chapter 142D.

[ARC 8756C, IAB 1/8/25, effective 7/1/25]

641—153.4(142D) Complaints and enforcement.

153.4(1) Duties of department. The department will maintain a system for receiving and investigating complaints against persons who own, operate, manage, or otherwise have custody or control of a place where smoking is prohibited and who fail to comply with the provisions of Iowa Code chapter 142D.

a. The department may designate one or more public agencies through a 28E agreement or other written contract to assist with enforcement.

b. The department may refer complaints regarding a violation to the law enforcement authorities of the state or of the political subdivision of the state in which the alleged violation occurred.

153.4(2) Enforcement against a person who smokes in an area where smoking is prohibited. Pursuant to Iowa Code chapter 142D, the department designates the law enforcement authorities of the state and of each political subdivision of the state to assist with enforcement. A peace officer may issue a citation in lieu of arrest pursuant to Iowa Code chapter 805 against a person who smokes in an area where smoking is

prohibited pursuant to Iowa Code chapter 142D, and such person shall pay a civil penalty pursuant to Iowa Code section 805.8C(3) for each violation.

153.4(3) *Enforcement against a person who owns, operates, manages, or otherwise has control of a place where smoking is prohibited.* Pursuant to Iowa Code chapter 142D, the department designates the law enforcement authorities of the state and of each political subdivision of the state to assist with enforcement. The department or its designee may initiate a civil action against an owner, operator, manager, or person who otherwise has custody or control of a place where smoking is prohibited pursuant to Iowa Code chapter 142D, and such person shall pay the applicable civil penalty pursuant to Iowa Code chapter 142D.

153.4(4) *Manner of filing a complaint.* Any person may register a complaint with the department by calling the toll-free number, 1.888.944.2247, or on the department's website, hhs.iowa.gov/smokefreeair.

153.4(5) *Contents of the complaint.* A complaint filed with the department shall include:

a. The name or location of the public place, place of employment, area declared a nonsmoking place pursuant to Iowa Code chapter 142D, or outdoor area where smoking is prohibited that is the subject of the complaint;

b. A description of the occurrence that prompted the complaint; and

c. Any other information relevant to the occurrence.

153.4(6) *Review of complaint by department.* Upon receipt of a complaint, the department or its designee may contact the individual making the complaint to confirm the details of the complaint and obtain any additional information.

153.4(7) *Information from inspections.* Information received by the department of one or more violations of Iowa Code chapter 142D as a result of an inspection of a public place by the state or political subdivision of the state shall be considered a credible complaint under this rule.

153.4(8) *Notice of potential violation.* If the department determines that a complaint against a public place, place of employment, area declared nonsmoking pursuant to Iowa Code chapter 142D, or outdoor areas where smoking is prohibited is credible:

a. For the first complaint, the department shall:

(1) Issue a written notice of potential violation to the owner, operator or person having custody or control including the details of the complaint.

(2) Include in the notice educational materials about how to comply with Iowa Code chapter 142D, and information on whom to contact for further information and assistance for compliance.

b. For the second and subsequent complaints within one year, the department:

(1) Shall issue a subsequent notice of potential violation to the owner, operator, or person having custody or control.

(2) May authorize one or more public agencies to conduct a compliance check of the location.

(3) May pursue any remedy authorized by Iowa Code chapter 142D, including the enforcement of civil penalties.

[ARC 8756C, IAB 1/8/25, effective 7/1/25]

641—153.5(142D) Limitation of rules. Nothing in these rules is intended to limit any other state administrative rule or federal regulation that prohibits smoking.

[ARC 8756C, IAB 1/8/25, effective 7/1/25]

These rules are intended to implement Iowa Code chapter 142D.

[Filed emergency 6/30/08—published 7/30/08, effective 7/1/08]

[Filed 11/12/08, Notice 7/30/08—published 12/3/08, effective 1/7/09]

CHAPTER 154
MEDICAL CANNABIDIOL PROGRAM

641—154.1(124E) Definitions. For the purposes of these rules, the following definitions shall apply:

“Acceptance criteria” means the specified limits placed on characteristics of an item or method that are used to determine data quality.

“Action level” means the threshold value that provides the criterion for determining whether a sample passes or fails a test performed pursuant to these rules.

“Advertisement” means all representations disseminated in any manner or by any means, other than by labeling, for the purpose of inducing, or that are likely to induce, directly or indirectly, the purchase of medical cannabidiol.

“Analyte” means a chemical, compound, element, bacteria, yeast, fungus, or toxin to be identified or measured.

“Analytical batch” means a group of samples that are prepared together for the same analysis and analyzed sequentially using the same instrument calibration curve and common analytical quality control checks.

“Analytical method” means a technique used qualitatively or quantitatively to determine the composition of a sample or a microbial contamination of a sample.

“Audit” means a review by authorized personnel that includes select scope engagement or other methods of review that analyze operational or compliance issues.

“Background investigation” means a thorough review of an entity, an owner, investors, and employees conducted by the department of public safety, including but not limited to state and national criminal history records, credit records, and internal revenue service records.

“Batch” means a specifically identified quantity of dried flower and other cannabis plant matter that is uniform in strain or cultivar, harvested at the same time, and cultivated using the same pesticides and other crop inputs.

“Biosecurity” means a set of preventative measures designed to reduce the risk of transmission of:

1. Infectious diseases in crops;
2. Quarantined pests;
3. Invasive alien species;
4. Living modified organisms.

“Cannabinoid” means a chemical compound that is unique to and derived from cannabis.

“Cannabis” means seeds, plants, cuttings, or plant waste material from *Cannabis sativa* L. or *Cannabis indica* used in the manufacture of medical cannabidiol.

“CBD” means cannabidiol, Chemical Abstracts Service number 13956-29-1.

“CBDA” means cannabidiolic acid, Chemical Abstracts Service number 1244-58-2.

“Certificate of analysis” means the report prepared for the requester about the analytical testing performed and the results obtained by a laboratory.

“Certified” means that a laboratory demonstrates to the satisfaction of the department its ability to consistently produce valid data within the acceptance limits as specified in the department’s requirements for certification and meets the minimum requirements of this chapter and all applicable regulatory requirements.

“Certified reference material” means a reference material prepared by a certifying body.

“Combusted” means the addition of a flame to medical cannabidiol or raw flower cannabis for the purposes of burning for inhalation, or smoking cannabis.

“Consumable hemp product” means a hemp product that includes a substance that is metabolized or is otherwise subject to a biotransformative process when introduced into the human body.

1. A consumable hemp product may be introduced into the human body by ingestion or absorption by any device including but not limited to an electronic device.
2. A consumable hemp product may exist in a solid or liquid state.
3. A hemp product is deemed to be a consumable hemp product if it is any of the following:
 - Designed by the processor, including the manufacturer, to be introduced into the human body.

- Advertised as an item to be introduced into the human body.
- Distributed, exported, or imported for sale or distribution to be introduced into the human body.

“Consumable hemp product” includes but is not limited to any of the following:

1. A noncombustible form of hemp that may be digested, such as food; internally absorbed, such as chew or snuff; or absorbed through the skin, such as a topical application.
2. Hemp processed or otherwise manufactured, marketed, sold, or distributed as food, a food additive, a dietary supplement, or a drug.

“Consumable hemp product” does not include a hemp product if the intended use of the hemp product is introduced into the human body by any method of inhalation, as prohibited under Iowa Code section 204.14A.

“*Crop input*” means any substance applied to or used in the cultivation and growth of a cannabis plant. “Crop input” includes but is not limited to pesticides, fungicides, fertilizers, and other soil or medium amendments.

“*Date of expiration*” means one year from the date of issuance of the medical cannabidiol registration card by the department of transportation.

“*Date of issuance*” means the date of issuance of the medical cannabidiol registration card by the department.

“*Debilitating medical condition*” means any of the following:

1. Cancer, if the underlying condition or treatment produces one or more of the following:
 - Severe or chronic pain.
 - Nausea or severe vomiting.
 - Cachexia or severe wasting.
2. Multiple sclerosis with severe and persistent muscle spasms.
3. Seizures, including those characteristic of epilepsy.
4. AIDS or HIV as defined in Iowa Code section 141A.1.
5. Crohn’s disease.
6. Amyotrophic lateral sclerosis.
7. Any terminal illness with a probable life expectancy of under one year, if the illness or its treatment produces one or more of the following:
 - Severe or chronic pain.
 - Nausea or severe vomiting.
 - Cachexia or severe wasting.
8. Parkinson’s disease.
9. Chronic pain.
10. Severe, intractable autism with self-injurious or aggressive behaviors.
11. Post-traumatic stress disorder.
12. Corticobasal degeneration.
13. Ulcerative colitis.
14. Any medical condition that is recommended by the medical cannabidiol board and adopted by the board of medicine by rule pursuant to Iowa Code section 124E.5 and that is listed in 653—subrule 13.15(1).

“*Dispensary*” means an individual or entity licensed by the department to dispense medical cannabidiol to patients and primary caregivers pursuant to Iowa Code chapter 124E and these rules. “Dispensary” includes the employees and agents of the dispensary.

“*Dispensary facility*” means any secured building, space, grounds, and physical structure of a dispensary licensed by the department to dispense medical cannabidiol and where the dispensing of medical cannabidiol is authorized.

“*Dispense*” or “*dispensing*” means to supply medical cannabidiol to patients pursuant to Iowa Code chapter 124E and these rules.

“*Disqualifying felony offense*” means the same as defined in Iowa Code section 124E.2.

“*Edible medical cannabidiol products*” means food items containing medical cannabidiol. “Edible medical cannabidiol products” does not include pills, tinctures, oils, or other forms of medical cannabidiol

that may be consumed orally or through the nasal cavity that do not contain food or food additives; provided that food or food additives used as carriers, excipients, or processing aids shall not be considered food or food additives.

“Field duplicate sample” means a sample that is taken in the identical manner and from the same batch, process lot, or lot being sampled as the primary sample. A field duplicate sample is analyzed separately from the primary sample and is used for quality control only.

“Health care practitioner” means the same as defined in Iowa Code section 124E.2.

“Inspection” means an on-site evaluation by the department; the department of public safety; or a department-approved independent consultant of facilities, records, personnel, equipment, methodology, and quality assurance practices for compliance with these rules.

“Investor” means a person making a cash investment of at least 5 percent interest in an applicant or licensed manufacturer or dispensary with the expectation of receiving financial returns.

“Laboratory” means the same as defined in Iowa Code section 124E.2.

“Limit of detection” or *“LOD”* means the lowest quantity of a substance or analyte that can be distinguished from the absence of that substance within a stated confidence limit.

“Limit of quantitation” or *“LOQ”* means the minimum concentration of an analyte in a specific matrix that can be reliably quantified while also meeting predefined goals for bias and imprecision.

“Lot” means a specific quantity of medical cannabidiol that is uniform and intended to meet specifications for identity, strength, purity, and composition, and that is manufactured, packaged, and labeled during a specified time period according to a single manufacturing, packaging, and labeling record.

“Lot number” means a unique numeric or alphanumeric identifier assigned to a lot by a manufacturer when medical cannabidiol is produced. The lot number shall contain the manufacturer’s number and a sequence to allow for inventory, traceability, and identification of the plant batches used in the production of a lot of medical cannabidiol.

“Manufacture” or *“manufacturing”* means the process of converting harvested cannabis plant material into medical cannabidiol.

“Manufacturer” means an individual or entity licensed by the department to produce medical cannabidiol and distribute it to dispensaries pursuant to Iowa Code chapter 124E and these rules. “Manufacturer” includes the employees and agents of the manufacturer.

“Manufacturing facility” means any secured building, space, grounds, and physical structure of a manufacturer for the cultivation, harvesting, packaging, processing, storage, and distribution of cannabis or medical cannabidiol and where access is restricted to designated employees of a manufacturer and escorted visitors.

“Matrix” means the component or substrate that contains the analyte of interest.

“Matrix spike duplicate” means a duplicate sample prepared by adding a known quantity of a target analyte to a field sample matrix or other matrix that is as closely representative of the matrix under analysis as possible.

“Matrix spike sample” means a sample prepared by adding a known quantity of the target analyte to a field sample matrix or to a matrix that is as closely representative of the matrix under analysis as possible.

“Medical assistance program” means IA Health Link, Medicaid Fee-for-Service, or hawki, as administered by the Iowa Medicaid enterprise of the department.

“Medical cannabidiol” means the same as defined in Iowa Code section 124E.2.

“Medical cannabidiol waste” means medical cannabidiol that is unused, unwanted, damaged, defective, expired, or contaminated and that is returned to a dispensary or manufacturer for disposal.

“Medical cannabis goods” means medical cannabidiol process lots, medical cannabidiol products, and cannabis plant material, including dried tissue.

“Method blank” means an analyte-free matrix to which all reagents are added in the same volumes or proportions as are used in sample preparation.

“National criminal history background check” means fingerprint processing through the department of public safety and the Federal Bureau of Investigation (FBI) and review of records on file with national organizations, courts, and law enforcement agencies to the extent allowed by law.

“*Owner*” means a person with a 5 percent or greater ownership interest in an applicant or licensed manufacturer or dispensary.

“*Patient*” means a person who is a permanent resident of the state of Iowa who suffers from a debilitating medical condition that qualifies for the use of medical cannabidiol pursuant to Iowa Code chapter 124E and these rules.

“*Patient registration number*” means the unique identification number issued to a patient by the department upon approval of a patient’s application by the department as described in these rules.

“*Percent recovery*” means the percentage of a measured concentration relative to the added (spiked) concentration in a reference material, matrix spike sample, or matrix spike duplicate.

“*Plant material*” means any plant of *Cannabis sativa* L. or *Cannabis indica*, or any part thereof, including flowers, leaves, trichomes, and tissue.

“*Plant material waste*” means plant material that is not used in the production of medical cannabidiol in a form allowable under these rules.

“*Primary caregiver*” means the same as defined in Iowa Code section 124E.2.

“*Primary care provider*” means any health care practitioner involved in the diagnosis and treatment of a patient’s debilitating medical condition.

“*Primary sample*” means a portion of a batch, process lot, or lot that is used for testing for identity, strength, purity, and composition.

“*Process lot*” means any amount of cannabinoid concentrate or extract that is uniform, produced from one or more batches, and used for testing for identity, strength, purity, and composition prior to being packaged.

“*Product expiration date*” means the date after which a medical cannabidiol product shall not be sold by a manufacturer or a dispensary.

“*Production*” or “*produce*” means:

1. Cultivating or harvesting plant material;
2. Processing or manufacturing; or
3. Packaging of medical cannabidiol.

“*Proficiency test*” means an evaluation of a laboratory’s performance against preestablished criteria by means of interlaboratory comparisons of test measurements.

“*Qualitative analysis*” means identification of an analyte in a substance or mixture.

“*Quality assurance*” means a set of operating principles to produce data of known accuracy and precision. “Quality assurance” encompasses employee training, equipment preventative maintenance procedures, calibration procedures, and quality control testing, among other things.

“*Quality control*” means a set of measures implemented within an analytical procedure to ensure that the measurement system is operating in a state of statistical control in which errors have been reduced to acceptable levels.

“*Quality control samples*” means samples produced and used for the purpose of ensuring quality control. Quality control samples include but are not limited to blank samples, spike samples, duplicate samples, and reference material samples.

“*Reagent*” means a compound or mixture added to a system to cause a chemical reaction or to test if a reaction occurs. A reagent may be used to tell whether or not a specific chemical substance is present by causing a reaction to occur with the chemical substance.

“*Recall*” means the return of medical cannabidiol from patients and dispensaries to a manufacturer because of the potential for serious health consequences from the use of the medical cannabidiol.

“*Reference material*” means a material containing a known concentration of an analyte of interest that is in solution or in a homogeneous matrix. Reference material is used to document the bias of the analytical process.

“*Relative percent difference*” or “*RPD*” means a comparative statistic used to calculate precision or random error. RPD is calculated using the following equation: $RPD = \frac{\text{absolute value (primary sample measurement - duplicate sample measurement)}}{([\text{primary sample measurement} + \text{duplicate sample measurement}] / 2)} \times 100$.

“Requester” means a person who submits a request to a licensed testing laboratory for state-mandated testing of medical cannabis goods. The requester may be a licensed manufacturer or the department.

“Residual solvents and processing chemicals” means volatile organic chemicals that are used or produced in the manufacture or production of medical cannabidiol.

“Restricted access area” means a building, room, or other contiguous area on the premises where plant material is grown, cultivated, harvested, stored, packaged, or processed for sale under control of the manufacturer, and where no person under the age of 18 is permitted.

“Sample” means a representative part of or a single item from a larger whole or group.

“Sanitize” means to sterilize, disinfect, or make hygienic.

“Security alarm system” means the same as defined in rule 661—277.2(100C).

“Semiquantitative analysis” means less than quantitative precision and does not involve a full calibration. Analyte identification is based on a single-point reference or high-probability library match. The determination of amount uses the ratio of the unknown chemical analyte to that of a known analyte added to the sample before analysis. Uncertainty for semiquantitative results is higher than for quantitative results.

“Significant figures” means the number of digits used to express a measurement.

“Stability study” or *“studies”* means the process of determining the shelf-life or expiration date of a medical cannabidiol product. After storage of an unopened package of medical cannabidiol at a licensed manufacturing facility or dispensary facility, the contents shall not vary in concentrations of THC and CBD by more than an amount determined by the department and listed in the laboratory testing requirements and acceptance criteria document described in 641—Chapter 154.

“Standard operating procedure” means a written document that provides detailed instructions for the performance of all aspects of an analysis, operation, or action.

“Synthetic or semisynthetic cannabinoid” means a cannabinoid extracted from a cannabis plant, a cannabis flower, a hemp plant, or hemp plant parts with a chemical makeup that is changed after extraction to create a different cannabinoid or other chemical compound by applying a catalyst other than heat or light. “Synthetic or semisynthetic cannabinoid” includes but is not limited to any tetrahydrocannabinol created from cannabidiol.

“Tamper-evident” means that one or more one-time-use seals are affixed to the opening of a package, allowing a person to recognize whether or not the package has been opened.

“Testing laboratory record” means information relating to the testing laboratory and the analyses it performs that is prepared, owned, used, or retained by the laboratory and includes electronic files and video footage.

“THC” or *“delta-9 THC”* means tetrahydrocannabinol, Chemical Abstracts Service number 1972-08-3.

“THCA” means tetrahydrocannabinolic acid, Chemical Abstracts Service number 23978-85-0.

“Total tetrahydrocannabinol” means 87.7 percent of the amount of tetrahydrocannabinolic acid plus the amount of tetrahydrocannabinol.

“Tracking number” means the sales identification number assigned by a dispensary to a transaction at the time of the sale of a medical cannabidiol product.

“Trade name” means the name that manufacturers give to a product or range of products.

“Validation” means the confirmation by examination and objective evidence that the particular requirements for a specific intended use are fulfilled.

“Valid photo identification” means any of the following for a patient or primary caregiver: (1) a valid Iowa driver’s license, (2) a valid Iowa nonoperator’s identification card, or (3) an alternative form of valid photo identification. An individual who possesses or is eligible for a driver’s license or a nonoperator’s identification card shall present such document as valid photo identification. An individual who is ineligible to obtain a driver’s license or a nonoperator’s identification card may apply for an exemption and request submission of an alternative form of valid photo identification. An individual who applies for an exemption is subject to verification of the primary caregiver’s identity through a process established by the department to ensure the genuineness, regularity, and legality of the alternative form of valid photo identification.

“Vaporization” means the heating of a medical cannabidiol concentrate or extract to a specific temperature using a device. For the purposes of these rules, vaporization does not include raw or dried cannabis flower.

“Written certification” means a document signed by a health care practitioner, with whom the patient has established a patient-provider relationship, that states that the patient has a debilitating medical condition and identifies that condition and provides any other relevant information.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

REGISTRATION CARDS

641—154.2(124E) Health care practitioner certification—duties and prohibitions.

154.2(1) Prior to a patient’s submission of an application for a medical cannabidiol registration card pursuant to this rule, a health care practitioner shall follow all provisions of Iowa Code section 124E.3, this chapter and requests from the department for more information.

a. The written documentation required by Iowa Code section 124E.3(1) “a” shall be submitted on the application form at the department’s website.

b. Explanatory information pursuant to Iowa Code section 124E.3(1) “b” is located at the department’s website.

154.2(2) A health care practitioner may make a written request to the department to rescind a written certification the practitioner previously provided, based on reasons deemed appropriate by the health care practitioner.

154.2(3) Health care practitioner prohibitions. A health care practitioner shall not:

a. Accept, solicit, or offer any form of remuneration from or to any individual, including but not limited to a patient, a primary caregiver, or an employee, investor, or owner of a manufacturer or dispensary for the purposes of:

(1) Certifying a patient’s condition, other than accepting a fee for a patient consultation to determine if the patient should be issued a certification under Iowa Code chapter 124E.

(2) Certifying an individual as a primary caregiver, other than accepting a fee for a consultation to determine if the individual is a necessary caretaker taking responsibility for managing the well-being of the patient with respect to the use of medical cannabidiol.

b. Advertise the certification of patients as one of the health care practitioner’s services.

c. Certify a qualifying debilitating medical condition for a patient who is the health care practitioner or a family or household member of the health care practitioner.

d. Be designated to act as a primary caregiver for a patient for whom the health care practitioner has certified a qualifying debilitating medical condition.

e. Receive or provide medical cannabidiol product samples.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.3(124E) Medical cannabidiol registration card—application and issuance to patient.

154.3(1) The department may issue a registration card to a patient who meets the criteria listed at Iowa Code section 124E.4(1). The application form is available on the department’s website. The department shall not approve an application that does not include the information requested on the application form.

154.3(2) Upon the completion, verification, and approval of the patient’s application and the receipt of the required fee, the department shall issue a registration card to the patient.

154.3(3) A registration card issued to a patient shall contain all of the following:

a. The patient’s full legal name, Iowa residence address, date of birth, and sex designation, as shown on the patient’s valid photo identification. If the patient’s information has changed since the issuance of the patient’s valid photo identification, the patient shall first update the patient’s valid identification to reflect the patient’s current information.

b. The date of issuance and the date of expiration, which shall be one year from the date of issuance.

c. A distinguishing registration number that is not the patient’s social security number.

d. A statement that the registration card is not valid for identification purposes.

154.3(4) Every patient 18 years of age or older must obtain a valid registration card to use medical cannabidiol in Iowa.

154.3(5) An authorization to use medical cannabidiol or cannabis for medicinal purposes issued by another state, territory, or jurisdiction does not satisfy the requirements of Iowa Code chapter 124E and is not a valid registration card for purposes of purchasing medical cannabidiol at dispensaries in Iowa.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.4(124E) Medical cannabidiol registration card—reciprocity. A medical cannabidiol registration card shall hold reciprocity with other states pursuant to Iowa Code section 124E.18.

154.4(1) A patient with a valid registration card from another state or jurisdiction shall maintain the affirmative defense for possession of medical cannabidiol, provided the form of cannabis product in the patient's possession is allowable in Iowa.

154.4(2) A patient with a valid registration card under the laws of another state or jurisdiction has no affirmative defense for medical cannabidiol if the cannabis product in the patient's possession is prohibited in Iowa. Prohibited forms of medical cannabidiol include:

- a. Raw cannabis flower that may be combusted or smoked;
- b. Edible products with a total THC concentration greater than 0.3 percent that is not a consumable hemp product.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.5(124E) Medical cannabidiol registration card—application and issuance to primary caregiver.

154.5(1) For a patient in a primary caregiver's care, the department may issue a registration card to a primary caregiver who meets the criteria listed at Iowa Code section 124E.4(3). The application form is available on the department's website. The department shall not approve an application that does not include the information requested on the application form.

154.5(2) Upon the completion, verification, and approval of the primary caregiver's application, the department shall issue a registration card to the primary caregiver.

154.5(3) A registration card issued to a primary caregiver shall contain all of the following:

- a. The primary caregiver's full legal name, current residence address, date of birth, and sex designation, as shown on the primary caregiver's valid photo identification. If the primary caregiver's information has changed since issuance of the primary caregiver's valid photo identification, the primary caregiver shall first update the primary caregiver's valid photo identification to reflect the primary caregiver's current information.
- b. The date of issuance and the date of expiration, which shall be one year from the date of issuance.
- c. A distinguishing registration number that is not the primary caregiver's social security number.
- d. The registration number for each patient in the primary caregiver's care. This number shall not be the primary caregiver's or patient's social security number. If the patient in the primary caregiver's care is under the age of 18, the full name of the patient's parent or legal guardian shall be printed on the primary caregiver's registration card in lieu of the patient's registration number.
- e. A statement that the registration card is not valid for identification purposes.
- f. A statement distinguishing the registration cardholder as a primary caregiver.

154.5(4) An authorization to use, or to act as a primary caregiver for a patient authorized to use, medical cannabidiol or cannabis for medicinal purposes issued by another state, territory, or jurisdiction does not satisfy the requirements of Iowa Code chapter 124E and is not a valid registration card for purposes of purchasing medical cannabidiol at dispensaries in Iowa.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.6(124E) Denial and cancellation. The department may deny an application for a registration card, or may cancel a registration card, for any of the following reasons:

1. Information contained in the application is illegible, incomplete, falsified, misleading, deceptive, or untrue.

2. The department is unable to verify the identity of the applicant from the photo identification or other documentation presented during application.
 3. The department has reasonable belief, or proof, that the patient is engaged in diversion of medical cannabidiol.
 4. The applicant violates or fails to satisfy any of the provisions of Iowa Code chapter 124E or these rules.
 5. A patient, the patient's legal guardian, or other person with durable power of attorney requests in writing that the department cancel the patient's registration card. The department shall notify a primary caregiver in writing when the registration card of the primary caregiver's patient has been canceled.
 6. A primary caregiver requests in writing that the department cancel the primary caregiver's registration card. The department shall notify a patient in writing when the registration card of the patient's primary caregiver has been canceled.
 7. The department becomes aware of the death of a patient or primary caregiver.
 8. A health care practitioner requests in writing that the department rescind the written certification the practitioner provided to a patient or caregiver.
 9. A patient requests in writing that the department cancel the patient's primary caregiver's registration card.
- [ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.7(124E) Appeal.

154.7(1) *Written notice of denial or cancellation.* If the department denies an application for or cancels a registration card, the department shall inform the applicant or cardholder of the denial or cancellation, state the reasons for the denial or cancellation in writing, and state the effective date of the denial or cancellation. If the department cancels a card upon request from a patient or primary caregiver, or the department becomes aware of the death of a patient or primary caregiver, the cancellation is effective immediately upon issuance of the written notice of cancellation. If the department cancels a card upon any other ground listed, the cancellation shall become effective 30 days following issuance of the written notice of cancellation.

154.7(2) *Effect of written notice of cancellation on use and possession of medical cannabidiol.* A cardholder is authorized to purchase, possess, and use medical cannabidiol up to and including the effective date of the cancellation. For purposes of the affirmative defenses in Iowa Code section 124E.12, a patient or primary caregiver shall be deemed to be in possession of a valid registration card up to and including the effective date of the cancellation.

154.7(3) *Request for appeal.* A request for appeal concerning the denial or cancellation of a registration card shall be submitted pursuant to the provisions of 441—Chapter 7. In the event of a timely appeal, cancellation of the card shall be deemed to be suspended pending the outcome of the contested case proceeding. If the cancellation is affirmed following the contested case proceeding, the card cancellation shall become effective 30 days following issuance of the department's final agency action.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.8(124E) Duplicate card.

154.8(1) *Lost, stolen, or destroyed card.* To replace a registration card that is lost, stolen, or destroyed, a cardholder shall present to the department the cardholder's valid photo identification that was provided at the time of application.

154.8(2) *Change in card information and voluntary replacement.*

a. To replace a registration card that is damaged, the cardholder shall surrender the card to be replaced to the department and present the cardholder's valid photo identification that was provided at the time of application.

b. A patient or primary caregiver to whom a registration card is issued shall notify the department of a change in information listed on the card, within ten calendar days of the change. To replace a registration card to change the patient or primary caregiver's information, the cardholder shall surrender the card to be replaced to the department and present the patient or primary caregiver's updated valid photo identification.

c. To replace a registration card held by a primary caregiver to change, add, or remove a patient's registration number or the name of a patient's parent or legal guardian listed on the primary caregiver's card, the primary caregiver shall submit a new application to the department pursuant to rule 641—154.5(124E). A registration card issued pursuant to this paragraph shall not be considered a duplicate card.

154.8(3) Expiration date. A duplicate registration card shall have the same expiration date as the registration card being replaced, changed, or amended.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.9(124E) Renewal. A registration card shall be valid for one year from the date of issuance, unless canceled. Renewal of a registration card will follow the application and issuance rules of this chapter.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.10(124E) Confidentiality. The department will follow the confidentiality provisions in Iowa Code section 124E.11(1).

154.10(1) Personally identifiable information of patients and primary caregivers will be maintained as confidential and is not accessible to the public. The department will release aggregate and statistical information regarding the registration card program in a manner that prevents the identification of any patient or primary caregiver.

154.10(2) Personally identifiable information of patients and primary caregivers may be disclosed only pursuant to Iowa Code section 124E.11(1)“b” and to a patient, primary caregiver, or health care practitioner, upon written authorization of the patient or primary caregiver.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.11(124E) Fees. All fees are nonrefundable. Application fees are established in Iowa Code section 124E.4.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.12(124E) Consumption of medical cannabidiol. In accordance with Iowa Code section 124E.12, patients and caregivers are entitled to a complete and affirmative defense for unlawful possession of marijuana. Medical cannabidiol is intended to be consumed privately, and patients are subject to all applicable laws regarding public impairment and operating a vehicle, including but not limited to Iowa Code section 123.46 and chapter 321J. Medical cannabidiol products shall not be consumed in the following places:

a. In places open to the public, except for within a health care facility if pursuant to the standard operating procedures of the health care facility.

b. On the property of a school, unless pursuant to the standard operating procedure of the school.

c. On the property of a medical cannabidiol dispensary or manufacturer.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.13(124E) Allowable forms of medical cannabidiol.

154.13(1) Modification of allowable forms. Allowable forms of medical cannabidiol may be modified by approval of a recommendation by the medical cannabidiol board, subsequent approval of the board of medicine, and adoption of the recommendations by the department.

154.13(2) Allowable forms.

a. A manufacturer may only manufacture medical cannabidiol in the following forms:

(1) Oral forms, including but not limited to:

1. Tablet.
2. Capsule.
3. Liquid.
4. Tincture.
5. Sublingual.

(2) Topical forms, including but not limited to:

1. Gel.
2. Ointment, cream or lotion.
3. Transdermal patch.
- (3) Inhaled forms, limited to:
 1. Nebulizable.
 2. Vaporizable.
- (4) Rectal/vaginal forms, including but not limited to suppository.
- b. A manufacturer shall not produce medical cannabidiol in any form that may be smoked.
- c. A manufacturer shall not produce edible medical cannabidiol products.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

MANUFACTURER AND DISPENSARY LICENSING

641—154.14(124E) Notice to law enforcement. The department shall notify local law enforcement agencies and the department of public safety of the locations of manufactures and dispensaries. If the department has sufficient cause to believe that there is a threat to public safety, the department shall notify local law enforcement agencies and the department of public safety.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.15(124E) Manufacturer and dispensary licensure.

154.15(1) To be eligible for licensure, an applicant manufacturer or dispensary shall complete a background investigation pursuant to Iowa Code section 124E.19. Applicants must provide information on forms and in a manner required by the department of public safety.

154.15(2) The license shall be renewed annually unless a manufacturer or dispensary relinquishes the license, there is a change in state law prohibiting the department from renewing the license, or the license is revoked pursuant to Iowa Code chapter 124E or these rules.

154.15(3) A license to manufacture or dispense medical cannabidiol issued by the department is not assignable or transferable unless for the purpose of intra-organization restructure, subject to review and approval by the department.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.16(124E) Collection of fees in competitive licensing. Except as provided in this rule, all fees are nonrefundable, shall be retained by the department, and shall be considered repayment receipts as defined in Iowa Code section 8.2.

154.16(1) *Fees to the department for manufacturers and dispensaries.*

a. Fees for manufacturing applicants are established by Iowa Code section 124E.6(4). Fees for dispensary applicants are established by Iowa Code section 124E.8(4).

b. Licensed manufacturers and dispensaries shall pay an annual fee to the department to cover costs associated with regulating and inspecting, and for other expenses necessary for the administration of the medical cannabidiol program. The department shall assess the fee with the notice of approval of license, payable to the department no later than December 1. Annual fees assessed by the department shall not exceed \$100,000 for a manufacturing license and shall not exceed \$50,000 for a dispensary license.

154.16(2) *Fees to the department of public safety.*

a. An applicant manufacturer or dispensary shall reimburse the department of public safety the full cost of conducting background investigations related to an application for licensure. The department of public safety retains the right to bill a licensee for additional background investigations, as needed.

b. Each manufacturer or dispensary awarded a license shall, at the time of award to license, submit to the department of public safety a deposit of \$10,000 for each business owner subject to a background investigation and a national criminal history background check. Background investigation costs shall be deducted from the funds deposited. If the background investigation fees exceed the funds deposited, the applicant shall submit additional funds as required by the department of public safety. If the background investigation fees are less than the funds deposited, the department of public safety may refund or retain the fees as mutually agreed with the manufacturer or dispensary.

c. A licensed manufacturer or dispensary shall pay a deposit of \$200 per employee to the department of public safety for a background investigation and a national criminal history background check on any person being considered for hire as an employee of the manufacturer or dispensary. Background investigation costs shall be deducted from the funds deposited. If the background investigation fees exceed the funds deposited, the manufacturer or dispensary shall submit additional funds as required by the department of public safety. If the background investigation fees are less than the funds deposited, the department of public safety may refund or retain the fees as mutually agreed with the manufacturer or dispensary. The department shall retain the right to preclude a potential employee from hire based upon the results of the background investigation and national criminal history background check.

154.16(3) *Criminal background checks.*

a. A manufacturer or the owner of a dispensary shall not have been convicted of a disqualifying felony offense and shall be subject to a background investigation conducted by the department of public safety, including but not limited to a national criminal history record check.

b. An employee of a manufacturer or a dispensary shall not have been convicted of a disqualifying felony offense and shall be subject to a background investigation conducted by the department of public safety, including but not limited to a national criminal history background check.

c. An applicant or licensed manufacturer or dispensary shall respond within 30 days to a request from the department or the department of public safety for more information to complete a background investigation and national criminal history background check on an owner, investor, or employee.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.17(124E) Licensure renewal.

154.17(1) A licensed manufacturer or dispensary shall apply to renew its license with the department at least six months before the license expires. The application shall be submitted on a form on the department's website.

154.17(2) The department shall notify a manufacturer or dispensary of the decision to approve or deny the manufacturer or dispensary's license by August 1 of the year in which the renewal application is submitted.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.18(124E) Suspension or revocation of a manufacturing or dispensary license.

154.18(1) The department may suspend or revoke a manufacturer or dispensary license upon any of the following grounds:

a. Submission of false, inaccurate, misleading, or fraudulent information to the department in the application or inspection processes.

b. Failure to submit required reports and documents.

c. Violation of Iowa Code chapter 124E or these rules, or violation of state or local law related to operation of the licensee.

d. Conduct or practices detrimental to the safety, health, or welfare of a patient, primary caregiver, or the public.

e. Criminal, civil, or administration action taken against a license or registration in this or another state or country related to manufacturing or dispensing medical cannabidiol.

f. False, misleading, or deceptive representations to the department, another state or federal agency, or a law enforcement agency.

g. Discontinuance of operation for more than 30 days, unless the department approves an extension of such period for good cause shown.

h. Failure to maintain effective controls against diversion, theft, or loss of medical cannabidiol.

i. Failure to correct a deficiency within the time frame required by the department.

j. Failure of a manufacturer or dispensary's business owner or investors to have a satisfactory result in a background investigation or national criminal history background check as determined by the department.

154.18(2) The department shall notify the manufacturer or dispensary of the proposed action pursuant to Iowa Code sections 17A.12 and 17A.18. Notice of issuance of a suspension or revocation shall be served by restricted certified mail, return receipt requested, or by personal service.

154.18(3) A request for appeal concerning the suspension or revocation of a license shall be submitted pursuant to the provisions of 441—Chapter 7.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.19(124E) Assessment of penalties. The department shall assess to a manufacturer a civil penalty of up to \$1,000 per violation of Iowa Code chapter 124E or these rules in addition to other applicable penalties.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.20(124E) Closure of operations.

154.20(1) A manufacturer or dispensary shall notify the department at least six months before the closure of the manufacturing facility.

154.20(2) If a manufacturer or dispensary ceases operation, the manufacturer or dispensary shall work with the department to verify the remaining inventory of the manufacturer or dispensary and ensure that any plant material, plant material waste, medical cannabidiol products, or combination thereof are destroyed at a waste facility or returned to a manufacturer.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.21(124E) Manufacturer and dispensary security requirements.

154.21(1) *Restricted access.* A manufacturer or dispensary shall limit entrance to all restricted areas by completing all of the following:

a. Mark restricted access areas with signs that state: “Do Not Enter—Restricted Access Areas Access Limited to Authorized Personnel Only”.

b. Use a controlled access system that:

- (1) Limits access to authorized individuals;
- (2) Maintains a log of individuals with approved access, including dates of approvals and revocations;
- (3) Tracks times of personnel entry to and exit from the facility;
- (4) Stores data for retrieval for a minimum of one year; and
- (5) Limits access to authorized individuals in the event of a power failure.

c. If the controlled access system cannot electronically record visitors, visitors to restricted access areas sign manifests with name, date, and times of entry and exit. These manifests shall be kept and stored for a minimum of one year.

d. Visitors wear badges that are visible at all times and identify them as visitors.

e. If requested by the department, submit stored controlled access system data to the department within five business days.

154.21(2) *Perimeter intrusion detection system.*

a. *Computer-controlled video surveillance system.* A manufacturer or dispensary shall operate and maintain a computer-controlled, closed-circuit television surveillance system on its premises that operates 24 hours per day, seven days per week, and visually records:

- (1) All phases of medical cannabidiol production, if applicable;
- (2) All areas that might contain plant material, medical cannabidiol, or both;
- (3) All points of entry and exit;
- (4) The entrance to the video surveillance control room; and
- (5) Parking areas, which shall have appropriate lighting for the normal conditions of the area under surveillance.

b. *Camera specifications.* Cameras shall:

(1) Capture clear and certain identification of any person entering or exiting a manufacturer or dispensary or its parking areas;

(2) Produce a clear, color still photograph live or from a recording;

- (3) Have an embedded date-and-time stamp that is synchronized to the recording and does not obscure the picture; and
- (4) Continue to operate during a power outage.
- c. Video recording specifications.* Video recording equipment shall:
 - (1) Export still images in an industry standard image format, such as .jpg, .bmp, or .gif;
 - (2) Archive exported video in a format that ensures authentication and guarantees that the recorded image has not been altered; and
 - (3) Save exported video in an industry standard file format that can be played on a standard computer operating system.
- d. Location.* A dispensary shall maintain all security system equipment and recordings in a secure location to prevent theft, loss, destruction, corruption, and alterations.
- e. Retention.* A manufacturer or dispensary shall ensure that recordings from all video cameras are:
 - (1) Available for viewing by the department upon request;
 - (2) Retained for at least 60 days; and
 - (3) Maintained free of alteration or corruption.
- f. Required signage.* A manufacturer or dispensary shall post a sign in capital letters in a conspicuous location at every entrance to the manufacturing facility or dispensary that reads, "THESE PREMISES ARE UNDER CONSTANT VIDEO SURVEILLANCE."

154.21(3) Security alarm system requirements.

- a.* A manufacturer or dispensary shall use a professionally monitored security alarm system that provides intrusion and fire detection of all the following:
 - (1) Dispensary entrances and exits;
 - (2) Facility entrances and exits;
 - (3) Rooms with exterior windows;
 - (4) Rooms with exterior walls;
 - (5) Roof hatches;
 - (6) Skylights; and
 - (7) Storage rooms.
- b.* A manufacturer or dispensary's security alarm system and all devices shall continue to operate during a power outage.
- c.* A manufacturer or dispensary shall provide documentation of the annual inspection and device testing, by a qualified alarm vendor, to the department upon request.

154.21(4) Personnel identification system. A manufacturer or dispensary shall use a personnel identification system that controls and monitors individual employee access to restricted access areas.

- a.* An employee identification card shall contain:
 - (1) The name of the employee;
 - (2) The date of issuance and expiration;
 - (3) An alphanumeric identification number that is unique to the employee; and
 - (4) A photographic image of the employee.
- b.* A manufacturer or dispensary's employee shall keep the identification card visible at all times when the employee is in a manufacturing facility, a dispensary, or a vehicle transporting medical cannabidiol.
- c.* Upon termination or resignation of an employee, a manufacturer or dispensary shall immediately:
 - (1) Revoke the employee's access to the manufacturing facility or dispensary; and
 - (2) Destroy the employee's identification card, if possible.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.22(124E) Advertising and marketing.

154.22(1) Permitted marketing and advertising activities. A manufacturer or dispensary must include medical cannabidiol pricing and hours of operation on its website and may do the following:

- a.* Display the manufacturer or dispensary's business name and logo on medical cannabidiol labels, signs, website, and informational material provided to patients. The name or logo shall not include:
 - (1) Images of cannabis or cannabis-use paraphernalia;

- (2) Colloquial references to cannabis;
 - (3) Names of cannabis plant strains or varieties;
 - (4) Unsubstantiated medical claims; or
 - (5) Medical symbols that bear a reasonable resemblance to established medical associations.
 - b. Display signs on the manufacturing facility or dispensary; and
 - c. Maintain a business website that contains the following information:
 - (1) The manufacturer or dispensary's name and contact information;
 - (2) The medical cannabidiol forms and quantities manufactured or available in Iowa; and
 - (3) Other information as approved by the department.
- 154.22(2) *Prohibited conduct, statements and illustration.***
- a. An advertisement for medical cannabidiol shall not contain:
 - (1) Colloquial references to cannabis;
 - (2) Names of cannabis plant strains or varieties;
 - (3) Any statement that is false or misleading;
 - (4) Any statement that disparages a competitor's products;
 - (5) Any statement, design, or representation, picture or illustration that is obscene or indecent;
 - (6) Any statement, design, representation, picture or illustration that reasonably appeals to or targets children. Appealing to children means:
 1. When taken literally or as a plain language reading, there is a resemblance to food or product used by children;
 2. Contains child-appealing visuals/graphics, such as intense colors, bubble letters, or other interesting fonts or lettering;
 3. Unconventional or interesting product names;
 4. Unconventional or unexpected flavor, color, or shape of the product;
 5. Games or activities present on the package; or
 6. Presence of branded characters, spokespersons, licensed characters, cartoons, or celebrities;
 - (7) Any statement, design, representation, picture or illustration that encourages or represents the use of medical cannabidiol for a condition other than a qualifying debilitating medical condition;
 - (8) Any statement, design, representation, picture or illustration that encourages or represents the recreational use of medical cannabidiol or marijuana, tobacco or nicotine products, or alcohol;
 - (9) Any statement, design, representation, picture or illustration related to the safety or efficacy of medical cannabidiol, unless supported by substantial evidence, substantial clinical data, direct patient testimonials, or combination thereof;
 - (10) Any statement, design, representation, picture or illustration portraying anyone reasonably appearing to be under the age of 18, objects suggestive of the presence of anyone under the age of 18, or containing the use of a figure, symbol or language that is customarily associated with anyone under the age of 18, except that an advertisement may address medical cannabidiol products as they relate to minor patients;
 - (11) Any offer of a prize, award or inducement to a qualifying patient, primary caregiver, or health care practitioner related to the purchase of medical cannabidiol or a certification for the use of medical cannabidiol, except that non-product-specific price discounts are allowed;
 - (12) Any statement or assertion that medical cannabidiol products are safe because they are regulated under this chapter or have been tested by an approved laboratory;
 - (13) Any reference to a prohibited form of medical cannabidiol;
 - (14) Any statement that claims that medical cannabidiol products are endorsed or supported by any government agency; or
 - (15) Any statement that indicates or implies that the product or entity in the advertisement has been approved or endorsed by the department, the state of Iowa or any person or entity associated with the state of Iowa.
 - b. A manufacturer or dispensary shall not engage in any of the following activities:
 - (1) Host, promote, refer, or otherwise advertise a third-party patient certification service;

(2) Engage in any advertising, marketing, or branded educational activities within 1,000 feet of a school;

(3) Host, promote, sponsor, or otherwise participate in a cannabis consumption lounge or other such encouragement of public consumption of cannabis or medical cannabidiol; or

(4) Advertise, or make reference to, non-approved forms of medical cannabidiol in any of its advertisements, including but not limited to:

1. Referring to an approved form of medical cannabidiol as a prohibited form of medical cannabidiol.

2. Advertising non-approved forms of medical cannabidiol. Consumable hemp products regulated under Iowa Code chapter 204 and 641—Chapter 156 are exempt from this provision.

154.22(3) *Review of advertisements by the department.* Any advertisement for medical cannabidiol shall be submitted to the department, on a form or in a format prescribed by the department, at the same time as, or prior to, the dissemination of the advertisement.

a. The department may:

(1) Require a specific disclosure be made in the advertisement in a clear and conspicuous manner if the department determines that the advertisement would be false or misleading without such a disclosure; or

(2) Require changes that are necessary to protect the public health, safety and welfare; or

(3) Require statements for inclusion in the advertisement to address the specific efficacy of medical cannabidiol as it relates to specific disease states or approved debilitating medical conditions, disease symptoms, and population groups.

b. The department reserves the right to require that a licensee amend or remove a public advertisement.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.23(124E) Sales and inventory tracking system. The department shall establish and maintain a secure, electronic system that is available 24 hours per day, seven days per week to track:

1. Inventory of plant material and medical cannabidiol;
2. Transport of plant material and laboratory samples;
3. Application and use of crop inputs and other solvents and chemicals;
4. Sales of medical cannabidiol to dispensaries;
5. Sales of medical cannabidiol from dispensaries to patients and primary caregivers.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.24(124E) Financial transactions.

154.24(1) A manufacturer or dispensary shall maintain records that reflect all financial transactions and the financial condition of the business.

154.24(2) The following records shall be maintained for at least five years and made available for review upon request of the department:

a. Purchase invoices, bills of lading, sales records, copies of bills of sale, and any supporting documents, including the items or services purchased, from whom the items were purchased, and the date of purchase;

b. Bank statements and canceled checks for all business accounts;

c. Accounting and tax records; and

d. Records of all financial transactions, including contracts and agreements for services performed or services received.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.25(124E) Inspection by department or independent consultant. A manufacturer or dispensary is subject to reasonable inspection by the department, a department-approved consultant, or another agency pursuant to Iowa Code chapter 124E and these rules and as authorized by laws and regulations.

154.25(1) *Types of inspections.* Inspections may include:

a. Aspects of the business operations;

b. The manufacturing facility or the physical location of a dispensary, including any storage facility;

- c. Vehicles used for transport or delivery of medical cannabidiol or plant material;
- d. Financial information and inventory documentation;
- e. Physical and electronic security alarm systems;
- f. Health and sanitary inspection; and
- g. Other inspections as determined by the department.

154.25(2) Compliance required. A manufacturer or dispensary shall respond to deficiencies found during inspections or inventory reconciliation as follows:

- a. Deficiencies not related to inventory reconciliation.

(1) Upon written notification by the department of deficiencies that do not involve reconciliation of inventory, a manufacturer or dispensary shall have up to 30 days to submit an action plan to the department with proposed remedies and timelines for completion of the remedies.

- (2) The department shall have up to two weeks to accept or require revision of the action plan.

- b. Deficiencies related to inventory reconciliation.

(1) Upon notifying the department that the manufacturer or dispensary cannot reconcile the physical inventory with the inventory recorded in the secure sales and inventory tracking system, the manufacturer or dispensary shall have up to two business days to submit an action plan to the department with proposed remedies and timelines for completion of the remedies.

- (2) The department shall have up to two business days to accept or require revision of the action plan.

(3) Failure to complete actions in the action plan within the timelines mutually agreed upon by the manufacturer and the department shall result in assessment of penalties or in suspension or revocation of a manufacturer or dispensary license.

(4) At the department's request and in a timely manner, a manufacturer or dispensary shall pay for and undergo an independent health and sanitary inspection in accordance with this rule.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

MANUFACTURING

641—154.26(124E) Manufacturer operations.

154.26(1) Operating documents.

a. A manufacturer shall maintain operating documents that accurately reflect the manufacturer's standard operating procedures. Unless otherwise noted, a manufacturer shall make the operating documents available to the department upon request, through secure means.

- b. The operating documents of a manufacturer shall include all of the following:

(1) Procedures for the oversight of the manufacturer, including descriptions of operational and management practices regarding:

1. The forms and quantities of medical cannabidiol products that are produced at the manufacturing facility;

2. The methods of planting, harvesting, drying, and storing cannabis. A manufacturer may make operating documents for these procedures available on site only;

3. The estimated types and amounts of all crop inputs used in the production of medical cannabidiol;

4. The disposal methods for all waste materials;

5. Employee training methods for the specific phases of production. A manufacturer may make operating documents for these procedures available on site only;

6. Biosecurity measures and standard operating procedures used in the production and manufacturing of medical cannabidiol. A manufacturer may make operating documents for these procedures available on site only;

7. Strategies for identifying and reconciling discrepancies in inventory of plant material or medical cannabidiol;

8. Sampling strategy and quality testing for labeling purposes. A manufacturer may make operating documents for these procedures available on site only;

9. Medical cannabidiol packaging and labeling procedures;

10. Procedures for recall of medical cannabidiol;

11. Plans for responding to a security breach at a manufacturing facility or while medical cannabidiol is in transit to a dispensary. A manufacturer may make operating documents for these procedures available on site only;

12. A business continuity plan. A manufacturer may make this operating document available on site only;

13. Records relating to all transport activities; and

14. Other information requested by the department.

(2) Procedures to ensure accurate recordkeeping.

(3) Procedures for the implementation of appropriate security measures to deter and prevent the theft of medical cannabidiol and unauthorized entrance into areas containing medical cannabidiol. A manufacturer may make operating documents for these procedures available on site only.

154.26(2) *Prohibited activities.* In addition to following all provisions of Iowa Code section 124E.7, a manufacturer shall not:

a. Produce or manufacture medical cannabidiol in any location except in those areas approved by the department;

b. Sell, deliver, transport, or distribute medical cannabidiol from any location except its manufacturing facility or a dispensary facility;

c. Produce or manufacture medical cannabidiol in Iowa for sales or distribution outside of Iowa;

d. Sell or distribute medical cannabidiol to any person or business other than a dispensary or manufacturer licensed by the department under Iowa Code chapter 124E;

e. Refuse to sell, deliver, transport, or distribute medical cannabidiol in any form or quantity produced by the manufacturer to a dispensary, unless deemed appropriate in the manufacturer's reasonable business judgment and approved by the department in writing;

f. Transport or deliver medical cannabidiol to any location except as allowed in subrule 154.22(1);

g. Introduce synthetic or semisynthetic cannabinoids derived from hemp into medical cannabidiol products;

h. Produce synthetic or semisynthetic cannabinoids within the licensed manufacturing facility.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.27(124E) Recordkeeping requirements.

154.27(1) *Manufacturer sales and distribution.* A manufacturer shall maintain complete and accurate electronic sales transaction records in the department's secure sales and inventory tracking system, including:

a. The date of each sale or distribution;

b. The item number, product name and description, and quantity of medical cannabidiol sold or otherwise distributed; and

c. The sale price.

154.27(2) *Manufacturer operations and inventory reporting other records.*

a. A manufacturer or dispensary shall maintain the following for at least five years, unless otherwise noted, and provide to the department upon request:

(1) All personnel records;

(2) Records of any theft, loss, or other unaccountability of any medical cannabidiol or plant material;

(3) Transportation manifests and incident reports; and

(4) Records of all samples sent to a testing laboratory and the quality assurance test results.

b. A manufacturer or dispensary shall maintain for at least one year and provide to the department upon request its controlled access system data and visitor manifests.

154.27(3) *Manufacturer entry into the secure sales and tracking system.*

a. A manufacturer or dispensary shall use the secure sales and inventory tracking system to maintain the following:

(1) Batch and harvest records;

(2) Crop input and additive records;

(3) Extraction and production records;

(4) Transportation records;

- (5) Inventory records;
- (6) Solvent and processing chemical records; and
- (7) Other records as determined by the department.
- b. Unless otherwise provided in these rules, a manufacturer shall adhere to the following schedule for entering data into the secure sales and inventory tracking system. A manufacturer shall enter data in real time for data related to:
 - (1) Transport of medical cannabidiol, plant material, and laboratory samples;
 - (2) Sales of medical cannabidiol to dispensaries;
 - (3) The creation of process lots containing a unique identifier; and
 - (4) The creation of package lots containing a unique identifier.
- c. A manufacturer shall enter inventory reports on key inventory events into the secure sales and inventory tracking system within five business days in which the event occurred. These inventory reports include but are not limited to:
 - (1) Batch reports;
 - (2) Crop input and additive reports;
 - (3) Harvest reports;
 - (4) Extraction reports;
 - (5) Solvent and processing chemical reports;
 - (6) Package lot reports;
 - (7) Certificates of analysis from a laboratory;
 - (8) Other records as determined by the department.
- d. State of Iowa manufacturer API guide. The department shall maintain a document describing the IT requirements and acceptance criteria for reporting information to the secure sales and inventory tracking system. The department shall provide manufacturers no less than 14 days in which to comment on proposed revisions to the document, and the department shall provide no less than 30 days' notice before a revision takes effect. The document shall include:
 - (1) The schedule and means of data reporting;
 - (2) Integration requirements for third-party vendors; and
 - (3) Be available on the department's website (hhs.iowa.gov).

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.28(124E) Recall of medical cannabidiol products. Medical cannabidiol products may be recalled in the following ways:

154.28(1) Voluntarily by a licensed manufacturer.

154.28(2) By the department. If the department determines, based on an evaluation, that there is a reasonable probability that use of, or exposure to, a violative medical cannabidiol product will cause a serious adverse health consequence or death, the department may require a manufacturer to recall such violative medical cannabidiol products from dispensaries. An evaluation of the health hazard presented by medical cannabidiol being considered for recall shall be conducted by an ad hoc committee of scientists appointed by the department and shall consider, but need not be limited to, each of the following factors:

- a. Whether any disease or injuries have already occurred from the product.
- b. Whether any existing conditions could contribute to a clinical situation that could expose humans to a health hazard. Any conclusion shall be supported as completely as possible by scientific documentation, statements, or both that the conclusion is the opinion of the individual(s) making the health hazard determination.
- c. A holistic assessment of the hazard and its present and future potential consequences.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.29(124E) Quality assurance and control.

154.29(1) *Quality control program.* A manufacturer shall develop and implement a written quality assurance program that assesses the chemical and microbiological composition of medical cannabidiol. Assessment includes a profile of the active ingredients, including stability studies, and the presence of

inactive ingredients and contaminants. A manufacturer shall use these testing results to determine appropriate storage conditions and product expiration dates.

154.29(2) *Sampling protocols.* A manufacturer shall develop and follow written procedures for sampling medical cannabidiol that require the manufacturer to:

- a. Conduct sample collection in a manner that provides analytically sound and representative samples;
- b. Document every sampling event and provide this documentation to the department upon request;
- c. Describe all sampling and testing plans in written procedures that include the sampling method and the number of units per lot to be tested;
- d. Ensure that random samples from each lot are:
 - (1) Taken in an amount necessary to conduct the applicable test;
 - (2) Labeled with the lot number; and
 - (3) Submitted for testing;
- e. Retain the results from the random samples for at least five years; and
- f. Notify the department at least two business days prior to sample collection and allow the department or its designees to be present to observe the sampling procedures when the samples are to be sent to a laboratory for testing.

154.29(3) *Sampling and testing.* A manufacturer shall:

- a. Work with the department and laboratory personnel to develop acceptance criteria for contaminants, including but not limited to cannabinoid content, metals, microbiological impurities, solvents, or other contaminants that the manufacturer uses in cultivating and producing medical cannabidiol;
- b. Conduct sampling and testing of plant material and medical cannabidiol lots using acceptance criteria that are protective of patient health. Sampling method results shall be approved by the department and laboratory personnel and shall ensure that lots of medical cannabidiol are homogenous and representative of the process or package lot;
- c. Reject and destroy medical cannabidiol from a lot that fails to meet established standards, and any other relevant quality control criteria, when remixing and retesting are not warranted;
- d. Develop and follow a written procedure for responding to results failing to meet established standards, and any other relevant quality control criteria, including:
 - (1) Criteria for when remixing and retesting are warranted;
 - (2) Instructions for destroying contaminated or substandard medical cannabidiol when remixing and retesting are not warranted; and
 - (3) Instructions for determining the source of contamination;
- e. Retain documentation of test results, assessment, and destruction of medical cannabidiol for at least five years.

154.29(4) *Stability testing.*

- a. The quality assurance program shall include procedures for performing stability testing of each product type produced to determine product expiration dates. The procedures shall describe:
 - (1) Sample size and test intervals based on departmental guidance pursuant to subrule 154.47(1);
 - (2) Storage conditions for samples retained for testing; and
 - (3) Reliable and specific test methods.
- b. Stability studies shall include:
 - (1) Medical cannabidiol testing at appropriate intervals; and
 - (2) Medical cannabidiol testing in the same container-closure system in which the medical cannabidiol is marketed and dispensed.
- c. If product-expiration-date studies have not been completed, a manufacturer shall assign a tentative product expiration date, not to exceed one year, based on any available stability information.
- d. If a manufacturer determines a product expiration date beyond one year, a manufacturer shall submit justification to the department, and receive approval, prior to labeling a product with an expiration date beyond one year.

154.29(5) *Reserve samples.*

a. A manufacturer shall retain a uniquely labeled reserve sample that represents each lot of medical cannabidiol and store the reserve sample under conditions consistent with product labeling. The reserve sample shall be stored in the same immediate container-closure system in which the medical cannabidiol is marketed or in one that has similar characteristics. The reserve sample shall consist of at least twice the quantity necessary to perform all the required tests.

b. A manufacturer shall retain the reserve for at least one year from the date of manufacture.

c. After one year from the date of manufacture, reserve samples shall be destroyed.

154.29(6) Retesting. If the department deems that public health may be at risk, the department may require the manufacturer to retest any sample of medical cannabidiol.

154.29(7) Disposal of substandard product. A manufacturer shall dispose of all medical cannabidiol when samples fail to meet established standards, and other relevant quality control criteria.

154.29(8) Recall procedures. Each manufacturer shall establish a procedure for recalling product from the market that has a reasonable probability of causing an unexpected or harmful response in a patient population, despite appropriate use, that outweighs the potential benefit of the medical cannabidiol. This procedure shall include:

a. Factors that make a recall necessary;

b. Manufacturer's personnel who are responsible for overseeing the recall; and

c. How to notify affected parties of a recall.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.30(124E) Packaging and labeling.

154.30(1) Trade names. A manufacturer's medical cannabidiol trade names shall comply with the following:

a. Names shall be limited to those that clearly reflect the form's medical cannabidiol nature;

b. Any name that is identical to, or similar to, the name of an existing nonmedical cannabidiol product is prohibited;

c. Any name that is identical to, or similar to, the name of an unlawful product or substance is prohibited; and

d. Any name that contains language that suggests using medical cannabidiol for recreational purposes or for a condition other than a qualifying debilitating medical condition is prohibited.

154.30(2) Medical cannabidiol packaging.

a. Requirements of medical cannabidiol package containers. The manufacturer shall use medical containers that are:

(1) Of sufficient size to accommodate a separate dispensary label containing the information described in paragraph 154.30(2) "c";

(2) Designed to maximize the shelf life of the contained medical cannabidiol;

(3) Tamper-evident; and

(4) Child-resistant.

b. Medical cannabidiol package prohibitions. The packaging for medical cannabidiol shall not:

(1) Bear a reasonable resemblance to commonly available nonmedical commercial products;

(2) Depict images other than the manufacturer's business name or logo on the packaging;

(3) Reasonably appeal to children. More information is provided in rule 641—154.22(2); or

(4) Reasonably appeal to recreational or adult use.

c. Requirements of medical cannabidiol packaging. A manufacturer shall ensure that all medical cannabidiol packaging includes the following information:

(1) The name of the manufacturer, and trade name if applicable;

(2) A label claim concentration for cannabinoid content including:

1. Tetrahydrocannabinol;

2. Tetrahydrocannabinolic acid. Concentrations of tetrahydrocannabinolic acid may be omitted if the manufacturer uses decarboxylation or other means to substantially remove the acids from the product prior to testing;

3. Cannabidiol; and

4. Cannabidiolic acid. Concentrations of cannabinolic acid may be omitted if the manufacturer uses decarboxylation or other means to substantially remove the acids from the product prior to testing;

(3) The number of servings per package (excluding products intended for inhalation);

(4) The directions for use of the product, including recommended and maximum amount by age and weight, if applicable;

(5) All ingredients of the product shown with common or usual names, including but not limited to any additives, terpenes or artificial flavors, diluents and carriers, and preservatives, listed in descending order by predominance of weight. Any third-party hemp-derived cannabinoids in medical cannabidiol products shall be specifically indicated on the ingredients list, separately from medical cannabidiol produced within the manufacturer's facility;

(6) Instructions for storage, including light and temperature requirements, if any; and

(7) The universal warning symbol provided by the department.

d. The following information shall be included with medical cannabidiol packaging, or contained within a package insert:

(1) A notice with the statement, including capitalization: "This product has not been analyzed or approved by the United States Food and Drug Administration. There is limited information on the side effects of using this product, and there may be associated health risks and medication interactions. This product is not recommended for use by pregnant or breastfeeding women. KEEP THIS PRODUCT OUT OF REACH OF CHILDREN.";

(2) A notice with the statement: "This medical cannabidiol is for therapeutic use only. Use of this product by a person other than the patient listed on the label is unlawful and may result in the cancellation of the patient's medical cannabidiol registration card. Return unused medical cannabidiol to a dispensary for disposal.";

A package may contain multiple labels if the information required by this rule is not obstructed.

154.30(3) Medical cannabidiol labeling.

a. After receiving a passing certification of analysis for a package lot from a laboratory, and prior to distribution to dispensaries, a manufacturer shall affix a label to each individual package of medical cannabidiol that contains the following information:

(1) A unique lot number;

(2) The date of manufacture;

(3) Product expiration date. This date shall be one year from the date of manufacture unless a manufacturer has conducted stability studies and received approval from the department for an extended expiration date.

b. Cannabinoid content for:

(1) Tetrahydrocannabinol;

(2) Tetrahydrocannabinolic acid. Concentrations of tetrahydrocannabinolic acid may be omitted if the manufacturer uses chemical decarboxylation or other means to substantially remove the acids from the product prior to testing;

(3) Cannabidiol; and

(4) Cannabidiolic acid.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.31(124E) Transportation of medical cannabidiol and plant material.

154.31(1) Transport of medical cannabidiol or plant material. A manufacturer is authorized to transport medical cannabidiol or plant material to and from:

a. Dispensaries;

b. A laboratory for testing;

c. A waste facility for disposal;

d. A manufacturer licensed by the department under Iowa Code chapter 124E;

e. Other sites only with departmental approval.

154.31(2) Chain-of-custody tracking system.

a. A manufacturer shall use the secure sales and inventory tracking system, if available, or a department-approved manifest system to track shipping of medical cannabidiol. The system shall include a chain of custody that records:

- (1) The name and address of the destination;
- (2) The unique ID of each individual process lot or package lot that is part of the shipment, and the total number of individual packages;
- (3) The date and time the medical cannabidiol shipment is placed into the transport vehicle;
- (4) The date and time the shipment is accepted at the delivery destination;
- (5) The person's identity; and
- (6) Any handling or storage instructions.

b. Before transporting medical cannabidiol, a manufacturer shall:

- (1) Record in the secure sales and inventory tracking system or on the manifest information the material to be transported; and
- (2) Notify the dispensary, laboratory, manufacturer, or waste facility, as applicable, of the expected arrival time and transmit a copy of the manifest to the dispensary, laboratory, manufacturer, or waste facility, if applicable.

c. Each transport shall be approved electronically or in writing by:

- (1) An authorized manufacturer employee when the transport vehicle is departing the manufacturing facility; and
- (2) An authorized employee of the receiving dispensary, laboratory, manufacturer, or waste facility.

d. An authorized employee at the dispensary, laboratory, manufacturer, or waste facility receiving medical cannabidiol shall:

- (1) Verify and document the type and quantity of the transported medical cannabidiol against the information in the secure sales and inventory tracking system or written manifest;
- (2) Approve the transport electronically or return a signed copy of the manifest to the manufacturing facility; and
- (3) Record the medical cannabidiol that is received as inventory in the secure sales and inventory tracking system, if available. If a manifest system is being used, the dispensary, laboratory, manufacturer, or waste facility shall also maintain a signed copy of the manifest and shall maintain records of the inventory received consistent with these rules.

e. A manufacturer shall maintain all manifests for at least five years and make them available upon request of the department.

154.31(3) *Vehicle requirements for transport.*

a. A manufacturer shall ensure that all medical cannabidiol transported on public roadways is:

- (1) Packaged in tamper-evident, bulk containers;
- (2) Transported so it is not visible or recognizable from outside the vehicle; and
- (3) Transported in a vehicle that does not bear any markings to indicate that the vehicle contains medical cannabidiol or bears the name or logo of the manufacturer.

b. When the motor vehicle contains medical cannabidiol, manufacturer employees who are transporting the medical cannabidiol on public roadways shall:

- (1) Travel directly to a dispensary or other department-approved locations; and
- (2) Document refueling and all other stops in transit, including:
 1. The reason for the stop;
 2. The duration of the stop; and
 3. The location of the stop.

c. If the vehicle must be stopped due to an emergency situation, the employee shall notify 911 and complete an incident report on a form approved by the department.

d. Under no nonemergency circumstance shall any person other than a designated manufacturer employee have actual physical control of the motor vehicle that is transporting the medical cannabidiol.

e. An employee in a transport motor vehicle shall have telephone access with the manufacturer's personnel.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.32(124E) Disposal of medical cannabidiol and plant material.

154.32(1) *Return of medical cannabidiol from dispensaries and laboratory.* A manufacturer may collect at no charge medical cannabidiol waste from dispensaries. A manufacturer that chooses to collect medical cannabidiol waste may use it for research and development or retained samples, but the manufacturer shall not introduce medical cannabidiol returned from a laboratory into lots of products intended for sale. Notwithstanding this provision, a manufacturer shall:

- a. Dispose of medical cannabidiol waste; and
- b. Maintain a written record of disposal.

154.32(2) *Medical cannabidiol and plant material waste.* A manufacturer shall store, secure, manage, and record medical cannabidiol waste and plant material waste in accordance with all applicable federal, state, and local regulations.

a. The manufacturer shall dispose of medical cannabidiol waste and plant material waste at an approved facility.

b. Before transport of plant material waste, the manufacturer shall render the plant material waste unusable and unrecognizable.

c. A manufacturer shall dispose of all liquid and chemical product waste generated in the process of cultivating, manufacturing, and distributing medical cannabidiol in accordance with applications regulations.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.33(124E) Production requirements.**154.33(1)** *Cultivation and processing.*

a. All phases of production shall take place in designated, restricted access areas in accordance with rule 641—154.21(124E).

b. The production process shall be designed to limit contamination.

c. Each production area shall allow for access, observation, and inventory of each plant group.

154.33(2) *Crop inputs and plant batches.*

a. The manufacturer shall use the secure sales and inventory tracking system to maintain an electronic record of all crop inputs. The record shall include the following:

- (1) The date of input application;
- (2) The name of the employee applying the crop input;
- (3) The crop input that was applied;
- (4) The plants that received the application; and
- (5) A copy of or electronic link to the safety data sheet for the crop input applied.

b. At the time of harvesting, all plants shall be tracked in a batch process with a unique batch number that shall remain with the batch through final processing into medical cannabidiol.

c. Each batch or part of a batch of cannabis plants that contributes to a lot of medical cannabidiol shall be recorded in the secure sales and inventory tracking system or other manifest system.

154.33(3) *Production of medical cannabidiol.*

a. A manufacturer shall obtain approval from the department for use of any hydrocarbon-based extraction process.

b. Medical cannabidiol shall be prepared, handled, and stored in compliance with the sanitation requirements in this rule.

c. A manufacturer shall produce shelf-stable, nonperishable forms of medical cannabidiol.

d. A manufacturer shall ensure that the cannabinoid content of the medical cannabidiol it produces is homogenous.

e. Each lot of medical cannabidiol shall be assigned a unique lot number and recorded in the secure sales and inventory tracking system or other manifest system.

154.33(4) *General sanitation requirements.* A manufacturer shall take all reasonable measures and precautions to ensure that:

a. Any employee who has a communicable disease does not perform any tasks that might contaminate plant material or medical cannabidiol;

b. Hand-washing facilities are:

- (1) Convenient and furnished with running water at a suitable temperature;
 - (2) Located in all production areas; and
 - (3) Equipped with effective hand-cleaning and -sanitizing preparations and sanitary towel service or electronic drying devices;
- c. All employees working in direct contact with plant material and medical cannabidiol use hygienic practices while on duty, including:
- (1) Maintaining personal cleanliness; and
 - (2) Washing hands thoroughly in a hand-washing area before starting work and at any other time when the hands may have become soiled or contaminated;
- d. Litter and waste are routinely removed and the operating systems for waste disposal are routinely inspected;
- e. Floors, walls, and ceilings are constructed with a surface that can be easily cleaned and maintained in good repair to inhibit microbial growth;
- f. Lighting is adequate in all areas where plant material and medical cannabidiol are processed, stored, or sold;
- g. Screening or other protection against the entry of pests is provided, including that rubbish is disposed of to minimize the development of odor and the potential for the waste becoming an attractant, harborage, or breeding place for pests;
- h. Any buildings, fixtures, and other facilities are maintained in a sanitary condition;
- i. Toxic cleaning compounds, sanitizing agents, and other potentially harmful chemicals are identified and stored in a separate location away from plant material and medical cannabidiol and in accordance with applicable local, state, or federal law;
- j. All contact surfaces, utensils, and equipment used in the production of plant material and medical cannabidiol are maintained in a clean and sanitary condition;
- k. The manufacturing facility water supply is sufficient for necessary operations;
- l. Employees have accessible toilet facilities that are sanitary and in good repair; and
- m. Plant material and medical cannabidiol that could support the rapid growth of undesirable microorganisms are isolated to prevent the growth of those microorganisms.

154.33(5) Storage.

- a. A manufacturer shall store plant material and medical cannabidiol during production, transport, and testing, ensuring that:
- (1) Plant material and medical cannabidiol are returned to a secure location immediately after completion; and
 - (2) The tanks, vessels, bins, or bulk containers containing plant material or medical cannabidiol are locked inside a secure area.
- b. A manufacturer shall store all plant material and medical cannabidiol during production, transport, and testing, and all saleable medical cannabidiol:
- (1) In areas that are maintained in a clean, orderly, and well-ventilated condition; and
 - (2) In storage areas that are free from infestation by insects, rodents, birds, and other pests of any kind.
- c. To prevent degradation, at all times, a manufacturer shall store all plant material and medical cannabidiol under conditions that will protect the product and its container against physical, chemical, and microbial contamination and deterioration.
- d. A manufacturer shall maintain a separate secure storage area for medical cannabidiol that is returned from a dispensary.

154.33(6) Scales. All scales used to weigh usable plant material for purposes of these rules shall be certified in accordance with ISO/IEC 17025 dated 2017, which is incorporated herein by reference.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.34(124E) Supply and inventory.

154.34(1) Reliable and ongoing supply. A manufacturer shall provide a reliable and ongoing supply of medical cannabidiol to medical cannabidiol dispensaries.

154.34(2) *Inventory controls and procedures.* A manufacturer shall establish inventory controls and procedures for conducting inventory reviews to prevent and detect any diversion, theft, or loss in a timely manner.

154.34(3) *Inventory tracking required.* A manufacturer shall use the secure sales and inventory tracking system to track medical cannabidiol production from seed or plant cutting through distribution of medical cannabidiol to a dispensary.

154.34(4) *Reconciliation.* No less often than every two calendar weeks, a manufacturer shall reconcile its physical inventory with the inventory recorded in the secure sales and inventory tracking system.

a. Reconciliation shall include:

- (1) Plant material at the manufacturing facility and in transit; and
- (2) Medical cannabidiol at the manufacturing facility.

b. Discrepancies between the physical inventory of the manufacturer and the inventory recorded in the secure sales and inventory system shall be handled as follows:

(1) A manufacturer shall report suspected diversion of medical cannabidiol to the department within 72 hours of discovery.

(2) A manufacturer shall have up to 72 hours to reconcile discrepancies in the manufacturer's physical inventory with the inventory recorded in the secure sales and inventory tracking.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

DISPENSING

641—154.35(124E) Duties of the department.

154.35(1) *Inspection of dispensaries.* The department or its agents shall conduct regular inspections of dispensaries and their facilities.

154.35(2) *Establishment and maintenance of a secure sales and inventory tracking system.* The department shall establish and maintain a secure, electronic system that is available 24 hours per day, seven days per week to track:

- a.* Inventory of medical cannabidiol and waste material;
- b.* Sales of medical cannabidiol from dispensaries to patients and primary caregivers;
- c.* Total tetrahydrocannabinol purchased in the last 90 days by a patient and the patient's primary caregiver.

154.35(3) *Recall of medical cannabidiol products.* If the department determines, based on an evaluation of the health hazard presented, that there is a reasonable probability that use of, or exposure to, a violative medical cannabidiol product will cause a serious adverse health consequence or death, the department may require a dispensary to recall such violative medical cannabidiol products from the dispensary facility and from patients. An evaluation of the health hazard presented by medical cannabidiol being considered for recall shall be conducted by an ad hoc committee of scientists appointed by the director of the department and shall consider, but need not be limited to, each of the following factors:

- a.* Whether any disease or injuries have already occurred from the product.
- b.* Whether any existing conditions could contribute to a clinical situation that could expose humans to a health hazard. Any conclusion shall be supported as completely as possible by scientific documentation, statements, or both that the conclusion is the opinion of the individual(s) making the health hazard determination.

c. A holistic assessment of the hazard and its present and future potential consequences.

154.35(4) *Permissible disclosure.* The department may disclose patient-specific dispensing data to the certifying provider upon written request by the patient, caregiver, or certifying provider.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.36(124E) Dispensary operations.

154.36(1) *Operating documents.*

a. A dispensary shall maintain operating documents that accurately reflect the dispensary's standard operating procedures. Unless otherwise noted, a dispensary shall make the operating documents available to the department upon request, through secure means.

b. The operating documents of a dispensary shall include all of the following:

(1) Procedures for the oversight of the dispensary, including descriptions of operational and management practices regarding:

1. The forms and quantities of medical cannabidiol products that will be stored and dispensed at the dispensary;

2. The estimated forms and quantities of medical cannabidiol waste to be generated or collected;

3. The disposal methods for all waste materials;

4. Employee training methods for the dispensary employees;

5. Strategies for identifying and reconciling discrepancies in inventory of medical cannabidiol;

6. Procedures to ensure the dispensary does not dispense more than a patient's certified limit of total tetrahydrocannabinol to a patient and the patient's primary caregiver(s) in a 90-day period;

7. Medical cannabidiol labeling procedures;

8. Procedures for recall of medical cannabidiol;

9. Plans for responding to a security breach at the dispensary facility;

10. A business continuity plan; and

11. Other information requested by the department.

(2) Procedures to ensure accurate recordkeeping.

(3) Procedures for the implementation of appropriate security measures to deter and prevent the theft of medical cannabidiol and unauthorized entrance into areas of the dispensary facility containing medical cannabidiol.

154.36(2) *Prohibited activities.* In addition to following all provisions of Iowa Code section 124E.7, a dispensary shall not:

a. Dispense medical cannabidiol in any location except in those areas approved by the department;

b. Sell, receive, transport, or distribute medical cannabidiol from any location except its dispensary;

c. Sell, receive, or distribute medical cannabidiol from any entity other than a manufacturer licensed by the department;

d. Sell or distribute medical cannabidiol to any person other than an approved patient or primary caregiver;

(1) Transport or deliver medical cannabidiol to any location, unless approved by the department;

(2) Sell medical cannabidiol that is not packaged and labeled in accordance with rules;

(3) Repackage medical cannabidiol or remove the manufacturer's label.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.37(124E) Recordkeeping requirements.

154.37(1) *Dispensary sales.* Within one business day of sale, a dispensary shall record complete and accurate electronic sales transaction records in the secure sales and inventory tracking system, including:

a. The name of the patient and, if purchase is made by the primary caregiver, the name of the primary caregiver;

b. The date and time of each sale;

c. The item number, product name and description, and quantity of medical cannabidiol sold;

d. The sale price;

e. Other information required by the department.

154.37(2) Reserved.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.38(124E) Storage.

154.38(1) *Storage of saleable medical cannabidiol.*

a. A dispensary shall store medical cannabidiol to prevent diversion, theft, or loss, including ensuring that:

(1) Medical cannabidiol is kept in a secure and monitored location within the dispensary; and

(2) Cabinets or storage containers inside the secure and monitored area are locked at the end of a business day.

b. A dispensary shall store all medical cannabidiol:

(1) In areas that are maintained in a clean, orderly, and well-ventilated condition;

(2) In areas that are free from infestation by insects, rodents, birds, and other pests of any kind;

(3) According to the manufacturer's requirements regarding temperature, light exposure, or other environmental conditions;

(4) Under conditions that will protect the product and its container against physical, chemical, and microbial contamination and deterioration.

154.38(2) *Storage of returned medical cannabidiol.* A dispensary shall maintain a separate secure storage area for medical cannabidiol that is to be returned to a manufacturer for disposal, including medical cannabidiol that is outdated, damaged, deteriorated, mislabeled, or contaminated, or whose containers or packaging has been opened or breached, until the medical cannabidiol is collected by a manufacturer.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.39(124E) Dispensing.

154.39(1) *Access to all forms of product.* A dispensary shall provide access to all medical cannabidiol forms produced by each licensed manufacturer.

154.39(2) *Dispensing to a patient or primary caregiver.* Prior to dispensing any medical cannabidiol to a patient, a dispensary shall do all of the following:

a. Verify the patient or primary caregiver's identity using acceptable photo identification and that the patient or primary caregiver is over 18 years of age. Acceptable photo identification includes:

(1) A valid Iowa driver's license;

(2) A valid Iowa nonoperator's identification card;

(3) A U.S. passport;

(4) A U.S. military ID or veteran ID; or

(5) A tribal ID card/document;

b. Verify that the patient or primary caregiver, if applicable, is registered and listed in the secure sales and inventory tracking system and has a valid medical registration card;

c. Check the secure sales and inventory tracking system for the patient's total tetrahydrocannabinol 90-day purchase limit and the amount of total tetrahydrocannabinol that the patient and the patient's primary caregiver(s) have purchased on behalf of the patient in the past 90 days to ensure that the amount of total tetrahydrocannabinol sold by the dispensary to the patient does not exceed the patient's purchase limit;

d. Assign a tracking number to any medical cannabidiol that is to be dispensed to the patient or primary caregiver; or

e. Issue a label that contains the following information, which may be printed on a secondary label or package insert:

(1) The medical cannabidiol tracking number;

(2) The patient registration number;

(3) The date and time the medical cannabidiol is dispensed;

(4) The name and address of the dispensary; and

(5) Any specific instructions for use based upon manufacturer guidelines or department rules. Text shall not include any false, misleading, or unsubstantiated statements regarding health or physical benefits to the patient.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.40(124E) Transportation of medical cannabidiol. A dispensary is not authorized to transport medical cannabidiol, unless approved by the department. Any approved transport shall be logged in the secure sales and inventory tracking system.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.41(124E) Disposal of medical cannabidiol.

154.41(1) *Identification of excess, expired, or damaged medical cannabidiol.* Dispensaries shall identify unused, excess, expired, or damaged medical cannabidiol.

154.41(2) *Return of medical cannabidiol from a patient or primary caregiver to a dispensary.*

a. A dispensary shall accept at no charge medical cannabidiol waste from any patient or primary caregiver. A dispensary may provide all medical cannabidiol waste to the manufacturer for disposal.

b. The dispensary shall enter the following information into the secure sales and inventory tracking system for medical cannabidiol returned from a patient or primary caregiver being returned to the manufacturer:

(1) The tracking number assigned at the time of the dispensing, if available, or the name of the patient, if the tracking number is unavailable;

(2) The date the medical cannabidiol was returned;

(3) The quantity of medical cannabidiol returned; and

(4) The type and lot number of medical cannabidiol returned.

c. A dispensary shall store medical cannabidiol returned from patients and primary caregivers.

154.41(3) *Unused, excess, expired, damaged, or returned medical cannabidiol.* Unused, excess, expired, damaged, or returned medical cannabidiol shall be stored as described in subrule 154.38(2).

154.41(4) *Return of medical cannabidiol to a manufacturer.* A dispensary shall record information on all medical cannabidiol collected by the manufacturer in the secure sales and inventory tracking system. Information shall include:

a. The date the medical cannabidiol was collected by the manufacturer;

b. The quantity of medical cannabidiol collected; and

c. The type and lot number of medical cannabidiol collected.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.42(124E) Inventory.

154.42(1) *Inventory controls and procedures.* A dispensary shall establish inventory controls and procedures for conducting inventory reviews to prevent and detect any diversion, theft, or loss in a timely manner.

154.42(2) *Real-time inventory required.* A dispensary shall use the secure sales and inventory tracking system to maintain a real-time record of the dispensary's inventory of medical cannabidiol to include:

a. The quantity and form of saleable medical cannabidiol maintained at the dispensary on a daily basis;

b. The amount of damaged, expired, or returned medical cannabidiol being held at the dispensary for return to a manufacturer; and

c. Other information deemed necessary and requested by the department.

154.42(3) *Reconciliation.* At least once per calendar week, a dispensary shall reconcile all medical cannabidiol with the inventory recorded in the secure sales and inventory tracking system. Discrepancies shall be handled as follows:

a. A dispensary shall report suspected diversion of medical cannabidiol to the department and law enforcement within 24 hours of discovery.

b. A dispensary shall have up to 24 hours to reconcile the dispensary's physical inventory with the inventory recorded in the secure sales and inventory tracking system. If the dispensary cannot reconcile the dispensary's physical inventory with the secure sales and inventory tracking system's inventory within 24 hours but diversion of product is not suspected, the dispensary shall immediately contact the department to report the discrepancy and to initiate a compliance action.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.43(124E) Quality assurance and control. A dispensary shall cooperate with manufacturers and the department on quality assurance and control procedures, including participating in stability-testing studies, developing sampling strategies, and returning medical cannabidiol that has been recalled.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

MEDICAL CANNABIDIOL BOARD

641—154.44(124E) Purpose and duties of board. The purpose of the board is to administer the provisions of Iowa Code section 124E.5.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.45(124E) Organization of board and proceedings.

154.45(1) Membership. The board shall be composed of members as set forth in Iowa Code section 124E.5. The appointments, unless provided otherwise by law, shall be for three-year staggered terms that shall expire on June 30. Board members shall be knowledgeable about the use of medical cannabidiol. The medical practitioners appointed to the board shall be licensed in Iowa and be nationally board-certified in their area of specialty.

154.45(2) Vacancies. Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

154.45(3) Absences. Three consecutive unexcused absences shall be grounds for the governor to consider dismissal of a board member and to appoint another. Department staff is charged with providing notification of absences to the governor's office.

154.45(4) Board meetings.

a. Board meetings shall be conducted in accordance with the open meetings requirements of Iowa Code chapter 21.

b. The department's bureau of cannabis regulation shall schedule the time, date and location of meetings.

c. A majority of the members shall constitute a quorum for conducting business of the board.

d. An affirmative vote of a majority of the board members present at a meeting is required for a motion to pass.

154.45(5) Facilities and staffing. The department shall furnish the board with the necessary facilities and employees to perform the duties required by this chapter but shall be reimbursed for all costs incurred by fee revenue generated from licensing activities and registration card applications.

154.45(6) Subcommittees. The board may designate one or more subcommittees to perform such duties as may be deemed necessary.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.46(124E) Petitions for the addition or removal of medical conditions, medical treatments or debilitating diseases. Pursuant to Iowa Code section 124E.5(3)“a,” the board shall accept and review petitions to modify the list of debilitating medical conditions for the medical use of cannabidiol. The petition shall be in accordance with 441—Chapter 4, except that the caption should read “Petition for Addition or Removal.”

154.46(1) Inquiries. Inquiries concerning the status of a petition may be made to the bureau of cannabis regulation at the department's address.

154.46(2) Additional information. The board may request that the petitioner submit additional information concerning the petition. The board may also solicit comments from any person on the substance of the petition. Comments on the substance of the petition may be submitted to the board by any person.

154.46(3) Presentation to the board. The board may request or allow the petitioner to make an oral presentation of the contents of a petition at a board meeting following submission of the petition.

154.46(4) Board response. The board shall notify the petitioner in writing of the decision within six months after the filing, unless the petitioner agrees to a time extension. If the petition is granted, the board will recommend addition or removal of the medical condition, medical treatment or debilitating disease to the board of medicine. If the petition is denied, the board will provide the rationale for the denial. Notification occurs when the board mails the writing to the petitioner.

154.46(5) *Denials.* Denial of a petition because it does not substantially conform to the required form does not preclude the filing of a new petition on the same subject that seeks to eliminate the grounds for the agency's rejection of the petition.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

LABORATORY TESTING

641—154.47(124E) Requirements of the department.

154.47(1) *Laboratory testing requirements and acceptance criteria.* The department shall work with manufacturers and laboratories to create and maintain a document describing required sampling methodology, acceptance criteria, stability-testing procedures, and other guidance for manufacturers and laboratories on testing procedures. The department shall provide manufacturers and laboratories no less than 14 days in which to comment on proposed revisions to the document, and the department shall provide no less than 30 days' notice before a revision takes effect. The document shall:

- a. Describe the minimum number of sample units and reserve samples required for testing by the laboratory;
- b. Describe an option for manufacturers to reduce the amount of testing conducted by allowing compositing of sample units or other techniques that reduce the number of tests required without compromising the safety of the products once a manufacturer has satisfactorily completed a control study for a specific extraction or production process;
- c. Describe the minimum requirements for sample size and testing intervals for stability testing; and
- d. Be available on the department's website (hhs.iowa.gov).

154.47(2) *Review and approval of manufacturer sampling protocols.* The department shall have two weeks to review and approve or request revisions to a manufacturer's sampling protocols.

154.47(3) *Review and approval of manufacturer stability-testing procedures.* The department shall have two weeks to review and approve or request revisions to a manufacturer's stability-testing procedures.

154.47(4) *Establish a laboratory review committee.* The department shall establish a laboratory review committee to assist with the review of applications by laboratories and the establishment of accepted laboratory testing standards and practices.

154.47(5) *Review of laboratory applications.* The department shall establish a process to review applications from prospective medical cannabidiol testing laboratories. Prospective laboratories shall apply on a form created by the department. The department will determine whether the laboratory meets the criteria for an independent medical cannabidiol testing facility as set forth in the definition of "laboratory" in Iowa Code section 124E.2 in addition to determining whether the laboratory meets laboratory requirements pursuant to these rules.

154.47(6) *Regulation of independent laboratories.* The department shall determine on an annual basis whether any approved independent laboratory continues to meet the application criteria of this rule. The department shall establish a process for the annual review of approved independent laboratories. An independent laboratory is subject to reasonable inspection by the department, a department-approved consultant, or another agency pursuant to Iowa Code chapter 124E and these rules and as authorized by laws and regulations.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.48(124E) Requirements of a laboratory.

154.48(1) *Minimum testing requirements.* A laboratory shall establish and implement test methods and corresponding standard operating procedures for the analyses of cannabinoids, residual solvents and processing chemicals, pesticides, microbiological impurities, and metals and other analyses as requested by the department.

154.48(2) *Level of quantitation.* A laboratory shall be able to demonstrate that its level of quantitation (LOQ) is below any action level established by the department.

154.48(3) *Inventory tracking.* A laboratory shall record the following:

- a. The receipt of medical cannabidiol from a manufacturer for testing.
- b. The return of medical cannabidiol or waste to a manufacturer.

154.48(4) *Hazardous waste disposal.* A laboratory shall do the following when dealing with hazardous waste:

a. Discard hazardous waste, including hazardous waste containing medical cannabis goods, in accordance with federal and state hazardous waste laws.

b. Document the waste disposal procedures followed for each sample.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.49(124E) Requirements of a manufacturer.

154.49(1) *Assuming costs.* A manufacturer shall assume the costs for all laboratory testing pertaining to verification studies on new products, the cost of standard testing protocols as outlined in a Laboratory Acceptance and Criteria Document and other tests as requested by the department. A manufacturer shall provide any necessary reference materials to the laboratory at no cost.

154.49(2) *Obtaining approval for sampling protocols.* A manufacturer shall obtain approval from the department for the manufacturer's sampling protocols prior to submitting samples for laboratory testing related to content and contamination.

154.49(3) *Obtaining approval for stability-testing procedures.* A manufacturer shall obtain approval from the department for the manufacturer's stability-testing procedures prior to submitting samples for laboratory testing related to stability testing and product-expiration-date studies.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.50(124E) Content testing.

154.50(1) *Cannabinoids.*

a. For each unique lot of medical cannabidiol, and if asked to do so by a requester for other medical cannabis goods, a laboratory shall, at minimum, test for and report measurements for the following cannabinoid analytes:

- (1) THC;
- (2) THCA;
- (3) CBD; and
- (4) CBDA.

b. A laboratory shall report that the primary sample passed or failed THC and CBD potency testing according to guidance in the Laboratory Acceptance and Criteria Document described in subrule 154.47(1).

c. For each cannabinoid analyte test, a laboratory shall issue a certificate of analysis that contains the following:

(1) Concentrations of cannabinoid analytes in mg/ml for liquids and mg/g for solids, or other measures approved by the department.

(2) Whether the primary sample passed or failed the test in accordance with paragraph 154.50(1) "b."

d. The laboratory may test for and provide test results for additional cannabinoid analytes if asked to do so by a requester.

154.50(2) *Contaminants testing.*

a. For each unique lot of medical cannabidiol, unless otherwise referenced in the laboratory testing requirements and acceptance criteria document described in subrule 154.47(1), a laboratory shall conduct contaminants testing for the following analytes:

- (1) Residual solvents and processing chemicals.
- (2) Pesticides.
- (3) Microbiological impurities.
- (4) Heavy metals.

b. The laboratory may test and provide test results for additional contaminants if asked to do so by a requestor.

c. The department shall provide a list of contaminants for which primary samples are to be tested with corresponding action levels on the department's website (hhs.iowa.gov).

d. For each contaminant for which a laboratory tests, the laboratory shall report that the primary sample passed the testing if the concentration of contaminant is at or below the action level approved by the department.

e. For each contaminant for which a laboratory tests, the laboratory shall report that the primary sample failed the testing if the concentration of contaminants is above the action level approved by the department.

f. If a laboratory is using gas chromatography-mass spectrometry instrumentation to analyze primary samples for contaminants and the laboratory determines that a primary sample contains contaminants or chemical analytes that are not included in the department-approved list of required tests, the laboratory shall attempt to achieve tentative identification and semiquantitative results of the contaminant analytes.

g. The laboratory may test for and provide test results for additional contaminants or processing chemicals if asked to do so by a requester.

h. For each primary sample tested, a laboratory shall issue a certificate of analysis that contains the following:

(1) The name and concentration of each contaminant for which the primary sample was tested.

1. The concentrations shall be listed in parts per million (ppm) or other units as determined by the department.

2. The laboratory shall report a result of “detected but not quantified” for any contaminant that falls below the LOQ, has a signal-to-noise ratio of greater than 3:1, and meets identification criteria.

(2) Whether the primary sample passed or failed the test in accordance with paragraphs 154.50(2) “c” and “d.”

(3) The names and amounts of any additional contaminants identified by the laboratory.

i. If the primary sample fails testing for residual solvents and processing chemicals, the lot fails laboratory testing.

j. When a laboratory identifies additional contaminants in a primary sample, the laboratory shall:

(1) Notify the department of the additional contaminants and the amounts detected, if applicable.

(2) Refrain from issuing a final certificate of analysis until given approval to do so by the department.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.51(124E) Reporting requirements.

154.51(1) *Reporting test results.* The laboratory shall generate a certificate of analysis for each primary sample that it tests and make the certificate of analysis available to the manufacturer and the department.

154.51(2) *Tentatively identified analytes.* A laboratory shall report on the certificate of analysis any tentatively identified analytes detected during the analysis of the primary sample. When a laboratory identifies additional analytes in a primary sample, the laboratory shall:

a. Notify the department of the additional analytes detected.

b. Refrain from issuing a final certificate of analysis until given approval to do so by the department.

154.51(3) *Additional reporting requirements.* In addition to the requirements described in rule 641—154.50(124E), the certificate of analysis shall contain, at a minimum, the following information:

a. All requirements of ISO/IEC 17025 dated 2017;

b. Date of primary sample collection;

c. Date the primary sample was received by the laboratory;

d. Date of each analysis;

e. The LOQ and action level for each analyte, as applicable;

f. Whether the primary sample and lot passed or failed laboratory testing; and

g. A signature by the laboratory quality officer or delegate and the date the certificate of analysis was validated as being accurate by the laboratory quality officer or delegate.

154.51(4) *Measurements.*

a. Any test result that is not covered under the laboratory’s ISO/IEC 17025 scope of accreditation shall be clearly identified on the certificate of analysis.

b. Measurements below a method’s limit of detection shall be reported as “<” (less than) or “not detected” and reference the reportable limit. The reporting of zero concentration is not permitted.

c. Measurements greater than or equal to LOD but less than LOQ shall be reported as “detected but not quantified.”

d. The number of significant figures reported shall reflect the precision of the analysis.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.52(124E) Recordkeeping requirements.

154.52(1) *Data package.* A laboratory shall create a data package for each analytical batch of primary samples that the laboratory analyzes. The data package shall contain at minimum the following information:

- a. The name and address of the laboratory that performed the analytical procedures;
- b. The names, functions, and signatures (electronic or handwritten) of the laboratory personnel who performed the primary sample preparation, analyzed the primary samples, and reviewed and approved the data;
- c. All primary sample and analytical batch quality control sample results;
- d. Raw data for each primary sample analyzed;
- e. Instrument raw data, if any was produced;
- f. Instrument test method with parameters;
- g. Instrument tune report, if one was created;
- h. All instrument standard calibration data;
- i. Test-method worksheets or forms used for primary sample identification, characterization, and calculations, including chromatograms, sample-preparation worksheets, and final datasheets;
- j. The quality control report with worksheets, forms, or copies of laboratory notebook pages containing pertinent information related to the identification and traceability of all reagents, reference materials, and standards used for analysis;
- k. The analytical batch sample sequence;
- l. The field sample log; and
- m. The chain-of-custody form.

154.52(2) *Review of data package.* After the laboratory has compiled a data package, an individual at the laboratory who was not previously involved in the creation of the data package shall:

- a. Assess the analytical results for technical correctness and completeness;
- b. Verify that the results of each analysis carried out by the laboratory are reported accurately, clearly, unambiguously, and objectively;
- c. Verify that the measurements can be traced back; and
- d. Approve the measurement results by signing and dating the data package prior to release of the certificate of analysis by the laboratory.

154.52(3) *Data package record retention.* The entire data package shall be stored by a laboratory for a minimum of five years and shall be made available upon request by the department or the requester of the laboratory testing.

154.52(4) *Other records.* A laboratory shall maintain all documents, forms, records, and standard operating procedures associated with the testing of medical cannabidiol.

- a. A laboratory shall maintain analytical testing laboratory records in such a manner that the analyst, the date the analysis was performed, the approver of the certificate of analysis, the reviewer and approver of the data package, the test method, and the materials that were used can be determined by the department.
- b. Records shall be stored in such a way that the data may be readily retrieved when requested by the department.
- c. All testing laboratory records shall be kept for a minimum of five years, unless otherwise noted in these rules.
- d. The department shall be allowed access to all electronic data, including standards records, calibration records, extraction logs, and laboratory notebooks.
- e. A laboratory shall keep and make available to the department the following records related to the testing of medical cannabidiol:

(1) Personnel qualification, training, and competency documentation, including but not limited to résumés, training records, continuing education records, analytical proficiency testing records, and demonstration of competency records for laboratory work. These records shall be kept current.

(2) Method verification and validation records, including method modification records, method detection limit and quantitation limit determination records, ongoing verification records such as proficiency test records and reference material analysis records.

(3) Quality control and quality assurance records, including the laboratory's quality assurance manual and control charts with control limits.

(4) Chain-of-custody records, including chain-of-custody forms, field sample logs, sample-receipt records, sample-description records, sample-rejection records, laboratory information management system records, sample-storage records, sample-retention records, and disposal records.

(5) Purchasing and supply records, equipment-services records, and other equipment records, including purchase requisition records, packing slips, supplier records, and certificates of analysis.

(6) Laboratory equipment installation records, maintenance records, and calibration records. These records shall include the date and name of the person performing the installation of, calibration of, or maintenance on the equipment, with a description of the work performed, maintenance logs, pipette calibration records, balance calibration records, working and reference mass calibration records, and daily verification-of-calibration records.

(7) Customer service records, including customer contracts, customer requests, certificates of analysis, customer transactions, customer feedback, records related to the handling of complaints and nonconformities, and corrective action pertaining to complaints.

(8) Nonconforming work and corrective action records, including corrective action, nonconformance, nonconformities resolved by correction, customer notification of nonconformities, internal investigations, implementation of corrective action, and resumption-of-work records.

(9) Internal-audit and external-audit records, including audit checklists, standard operating procedures, and audit observation and findings reports. These records shall include the date and name of the person performing the audit.

(10) Management review records, including technical data review reports and final management-review reports. These records shall include the review date and the name of the reviewer.

(11) Laboratory data reports, data review, and data approval records, including instrument and equipment identification records, records with unique sample identifiers, analysts' laboratory notebooks and logbooks, traceability records, test-method worksheets and forms, instrumentation-calibration data, and test-method raw data. These records shall include the analysis date and the name of the analyst.

(12) Proficiency testing records, including the proficiency test schedule, proficiency tests, data-review records, data-reporting records, nonconforming work and corrective actions, and quality control and quality assurance records related to proficiency testing.

(13) Electronic data, backed up data, records regarding the protection of data, including unprocessed instrument output data files and processed quantitation output files, electronic data protocols and records, and authorized personnel records.

(14) Security data, including laboratory-security records and laboratory-access records, surveillance-equipment records, and security-equipment records. These records shall be stored for at least one year.

(15) Traceability, raw data, standards records, calibration records, extraction logs, reference materials records, analysts' laboratory notebooks and logbooks, supplier records, and certificates of analysis, and all other data-related records.

(16) Laboratory contamination and cleaning records, including autoclave records, acid-wash logs and records, and general laboratory-safety and chemical-hygiene protocols.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.53(124E) Quality control. The laboratory shall have quality control protocols that include the following elements:

154.53(1) *Quality control samples required.*

a. The laboratory shall run quality control samples with every analytical batch of samples for chemical and microbiological analysis.

b. For microbiological analysis, the laboratory shall develop procedures for quality control requirements for each analytical batch of samples.

c. The laboratory shall analyze the quality control samples in exactly the same manner as the test samples to validate the laboratory testing results.

154.53(2) *Types of quality control samples.* At a minimum, a laboratory shall have the following quality control samples as part of every analytical batch tested for chemical analytes:

a. Negative control (method blank). A laboratory shall prepare and run at least one method blank sample with an analytical batch of samples along with and under the same conditions, including all sample preparation steps, as the other samples in the analytical batch, to demonstrate that the analytical process did not introduce contamination.

b. Positive control (laboratory control sample). A laboratory shall prepare and run at least one laboratory control sample with an analytical batch of samples along with and under the same conditions, including all sample preparation steps, as the other samples in the analytical batch.

c. Matrix spike sample. A laboratory shall prepare and run one or more matrix spike samples for each analytical batch.

(1) A laboratory shall calculate the percent recovery for quantitative chemical analysis by dividing the sample result by the expected result and multiplying that by 100. All quality control measures shall be assessed and evaluated on an ongoing basis, and quality control acceptance criteria shall be used. When necessary, the department may establish acceptance criteria on the department's website (hhs.iowa.gov).

(2) If quality control acceptance criteria are not acceptable, a laboratory shall investigate the cause, correct the problem, and rerun the analytical batch of samples. If the problem persists, the laboratory shall reprepare the samples and run the analysis again, if possible.

d. Field duplicate sample. A laboratory shall prepare and run a duplicate sample as described in the laboratory testing requirements and acceptance criteria document in subrule 154.47(1). The acceptance criterion between the primary sample and the duplicate sample is less than or equal to 20 percent relative percent difference.

154.53(3) *Certified reference material for chemical analysis.* The laboratory shall use a reference material for each analytical batch in accordance with the following standards:

a. The reference material should be certified and obtained from an outside source, if possible. If a reference material is not available from an outside source, the laboratory shall make its own in-house reference material.

b. Reference material made in-house should be made from a different source of standards than the source from which the calibration standards are made.

c. The test result for the reference material shall fall within the quality control acceptance criteria. If it does not, the laboratory shall document and correct the problem and run the analytical batch again.

154.53(4) *Calibration standards.* The laboratory shall prepare calibration standards by serially diluting a standard solution to produce working standards used for calibration of an instrument and quantitation of analyses in samples.

154.53(5) *Quality control-sample report.* A laboratory shall generate a quality control-sample report that includes quality control parameters and measurements, analysis date, and type of matrix.

154.53(6) *Limit-of-detection and limit-of-quantitation calculations.* For chemical method analysis, a laboratory shall calculate the limit of detection and limit of quantitation using generally accepted methodology.

[ARC 8124C, IAB 7/10/24, effective 8/14/24]

641—154.54(124E) Security requirements.

154.54(1) *Security policy requirement.* A laboratory shall maintain a security policy to prevent the loss, theft, or diversion of medical cannabidiol samples. The security policy shall apply to all staff and visitors at a laboratory facility.

154.54(2) *Restricted access.* A laboratory shall limit entrance to all restricted areas by completing all of the following:

a. The controlled access system shall do all of the following:

- (1) Limit access to authorized individuals;
- (2) Maintain a log of individuals with approved access, including dates of approvals and revocations;
- (3) Track when personnel enter and exit the laboratory;

- (4) Track times of personnel movement between restricted access areas;
 - (5) Store data for retrieval for a minimum of one year; and
 - (6) Remain operable in the event of a power failure.
- b. A laboratory shall promptly, but no later than five business days after receipt of request, submit stored controlled access system data to the department.

154.54(3) *Personnel identification system.* A laboratory shall use a personnel identification system that controls and monitors individual employee access to restricted access areas within the laboratory facility.

- a. An employee identification card shall contain:
- (1) The name of the employee;
 - (2) The date of issuance and expiration;
 - (3) An alphanumeric identification number that is unique to the employee; and
 - (4) A photographic image of the employee.
- b. A laboratory employee shall keep the identification card visible at all times when the employee is in the laboratory.
- c. Upon termination or resignation of an employee, a laboratory shall immediately:
- (1) Revoke the employee's access to the laboratory; and
 - (2) Obtain and destroy the employee's identification card, if possible.

154.54(4) *Video monitoring and surveillance.* A laboratory shall operate and maintain in good working order a video surveillance system for its premises that operates 24 hours per day, seven days a week, and visually records all areas where medical cannabis goods are stored or tested.

- a. *Camera specifications.* Cameras shall:
- (1) Capture clear and certain identification of any person entering or exiting a restricted access area containing medical cannabis goods;
 - (2) Produce a clear, color still photograph live or from a recording;
 - (3) Have an embedded date-and-time stamp that is synchronized to the recording and does not obscure the picture; and
 - (4) Continue to operate during a power outage.
- b. *Video recording specifications.* Video recording equipment shall:
- (1) Export still images in an industry standard image format, such as .jpg, .bmp, or .gif.
 - (2) Archive in a format that ensures authentication and guarantees that the recorded image has not been altered.
 - (3) Save exported video in an industry standard file format that can be played on a standard computer operating system.
 - (4) All recordings shall be erased or destroyed at the end of the retention period and prior to disposal of any storage medium.
- c. *Additional requirements.* A laboratory shall maintain all security system equipment and recordings in a secure location to prevent theft, loss, destruction, corruption, and alterations.
- d. *Retention.* A laboratory shall ensure that 24-hour recordings from all video cameras are:
- (1) Available for viewing by the department upon request;
 - (2) Retained for a minimum of 60 days;
 - (3) Maintained free of alteration or corruption; and
 - (4) Retained longer, as needed, if a laboratory is given actual notice of a pending criminal, civil, or administrative investigation, or other legal proceeding for which the recording may contain relevant information.

154.54(5) *Chain-of-custody policy and procedures.* A laboratory shall maintain a current chain-of-custody policy and procedures. The policy should ensure that:

- a. Chain of custody is maintained for samples that may have probable forensic evidentiary value; and
- b. Annual training is available for individuals who will be involved with testing medical cannabis goods.

154.54(6) *Information technology systems security.* A laboratory shall maintain information technology systems protection by employing comprehensive security controls that include security firewall

protection, antivirus protection, network and desktop password protection, and security patch management procedures.

CHAPTER 155
LICENSURE STANDARDS FOR SUBSTANCE USE DISORDER AND
PROBLEM GAMBLING TREATMENT PROGRAMS

[Prior to 7/27/88, see Substance Abuse, Iowa Department of[805] Ch 3]

[Prior to 3/29/06, see 643—Ch 3]

641—155.1(125,135) Definitions. Unless otherwise indicated, the following definitions shall apply to the specific terms used in these rules:

“Addictive disorder” means a substance use disorder and problem gambling.

“Addictive disorder professional” means an individual who is qualified by virtue of certification or license and education, training and experience to provide program services.

“Administration” means the direct application of a prescription medication to a patient by a prescriber or the prescriber’s authorized agent.

“Admission” means the point at which an initial assessment has been completed sufficient to determine the patient’s need and eligibility for program services, and the patient has agreed to begin treatment.

“Admission, continued service, and discharge criteria” means the ASAM criteria dimensions to be considered in determining the level of care appropriate for the patient.

“Applicant” means a person, facility, or legal entity that has applied for an initial license, renewal of a license, or a license under deemed status pursuant to these rules.

“Application” means the process through which an applicant requests an initial license, renewal of a license, or a license under deemed status pursuant to these rules.

“ASAM criteria” means the most current version of the clinical guide for the treatment of addictive, substance use and co-occurring conditions as published by the American Society of Addiction Medicine (ASAM).

“Assessment” means the ongoing process of evaluating a patient’s strengths, resources, preferences, limitations, problems, and needs; determining the licensed program services needed by the patient; determining the patient’s eligibility for program services; and identifying treatment plan priorities, in accordance with the ASAM criteria and accepted standards of practice.

“Board” means the state board of health created pursuant to Iowa Code chapter 136.

“Care coordination” or *“case management”* means the collaborative process which assesses, plans, implements, coordinates, monitors and evaluates the options and services, both internal and external to the program, to meet patient needs, using communication and available resources to promote quality care and effective outcomes.

“Chemical substance” means alcohol, wine, spirits and beer as defined in Iowa Code chapter 123 and controlled substances as defined in Iowa Code section 124.101.

“Chemical substitutes and antagonists program” means an opioid treatment program that provides opioid treatment services in accordance with Iowa Code section 125.21 and rule 641—155.35(125,135).

“Clinically managed” means that program services are directed by addictive disorder professionals.

“Clinically managed high-intensity residential treatment” means the ASAM criteria level of care totaling at least 50 hours of clinically managed inpatient treatment services per week.

“Clinically managed low-intensity residential treatment” means the ASAM criteria level of care totaling at least five hours of clinically managed inpatient treatment services per week.

“Clinically managed medium-intensity residential treatment” means the ASAM criteria level of care totaling at least 30 hours of clinically managed inpatient treatment services per week.

“Clinical oversight” means oversight provided by an individual who, by virtue of certification or license and education, training and experience is qualified to oversee treatment services in accordance with subrule 155.21(3).

“Committee” means the substance abuse and gambling treatment program committee appointed by the state board of health pursuant to Iowa Code section 136.3(13).

“Concerned person” means an individual who is seeking treatment services due to problems arising from a personal relationship with an individual with an addictive disorder.

“Confidentiality” means protection of patient information in compliance with state and federal law.

“Crisis stabilization” means medically monitored subacute inpatient services for individuals with urgent addictive disorder needs requiring immediate intervention, assessment, and mobilization of family, community and program resources.

“Culturally and environmentally specific” means integrating into assessment and treatment the customs and beliefs of a given population, as well as awareness and acceptance of diversity regarding conditions, circumstances and influences affecting an individual or group.

“Data reporting” means the required submission of certain patient demographic and program services information to the department by a program.

“Department” means the Iowa department of public health.

“Detoxification” means the safe management of intoxication states and withdrawal states in accordance with the ASAM criteria and accepted standards of practice.

“Dimension” means one of the six ASAM criteria patient biopsychosocial areas to be considered in the assessment process to identify patient needs and determine the appropriate level of care for admission and continued services.

“Director” means the director of the Iowa department of public health.

“Discharge” means the point at which the patient ceases participation in licensed program services, marking the end of a specific encounter or episode of care. Discharge does not require termination of the relationship between the patient and the program.

“Discharge planning” means the process, begun at admission, of determining a patient’s continued need for licensed program services and of developing a plan to address ongoing patient needs following discharge.

“Division” means the department’s division of behavioral health, which acts as the single state authority for the federal substance abuse prevention and treatment block grant and associated state of Iowa addictive disorder appropriations and funding.

“Early intervention” means the ASAM criteria level of care which explores and addresses problems or risk factors that appear to be related to an addictive disorder and which helps the individual recognize potential harmful consequences.

“Enhanced program” means a licensee that provides enhanced treatment services in accordance with paragraph 155.2(2)“j” and rule 641—155.34(125,135).

“Enhanced treatment services” means licensed program services provided in accordance with paragraph 155.2(2)“j” and rule 641—155.34(125,135).

“Facility” means an institution, a detoxification center, or an installation providing care, maintenance or treatment for persons with substance use disorders licensed by the department under Iowa Code section 125.13, hospitals licensed under Iowa Code chapter 135B, or the state mental health institutes designated by Iowa Code chapter 226. “Facility” also means the physical areas such as grounds, buildings, or portions thereof under administrative control of the program.

“Governing body” means the person, group, or legal entity that has ultimate authority and responsibility for the overall operation of the program.

“Inpatient” means 24-hour licensed program services.

“Intensive outpatient treatment” means the ASAM criteria level of care totaling a minimum of nine hours of clinically managed outpatient treatment services per week for adults or a minimum of six hours of clinically managed outpatient treatment services per week for juveniles.

“Level of care” or *“level of service”* means the different ASAM criteria service options. “Level of care” also means certain licensed program services under these rules.

“Licensed program services” means the services a licensee may be authorized to provide under these rules.

“Licensee” means a program licensed by the department pursuant to these rules.

“Licensure” means the issuance of a license by the department pursuant to these rules which validates the licensee’s compliance with these rules and authorizes the licensee to operate a program in the state of Iowa.

“Licensure weighting report” means the division’s report that is used to determine an applicant’s level of compliance with these rules and the length of time a license will be in effect.

“Maintenance” means the prolonged, scheduled administration of an opiate agonist medication such as buprenorphine or methadone by an opioid treatment program in accordance with federal and state laws, rules and regulations.

“Management of care” means the ongoing application of the ASAM criteria and the coordination of care to ensure the appropriate provision of licensed program services to a patient.

“May” means a term used in the interpretation of a standard to reflect an acceptable method that is recognized but not necessarily preferred.

“Medically managed” means that the inpatient program services that involve daily medical care in a hospital setting are directed by a prescriber.

“Medically managed intensive inpatient treatment” means the ASAM criteria level of care for medically managed inpatient treatment services.

“Medically monitored” means that the program services are directed by addictive disorder professionals with medical oversight by a prescriber.

“Medically monitored intensive inpatient treatment” means the ASAM criteria level of care for medically monitored subacute inpatient treatment services.

“Medication-assisted treatment” means the medically monitored use of certain substance use disorder medications in combination with other treatment services.

“Opioid treatment program” means a substance use disorder treatment program or a substance use disorder and problem gambling treatment program licensed to provide opioid treatment services in accordance with Iowa Code section 125.21 and rules 641—155.2(125,135) and 641—155.35(125,135).

“Opioid treatment services” means medically monitored outpatient maintenance services provided in accordance with federal and state laws, rules and regulations.

“Outpatient” means non-24-hour licensed program services.

“Outpatient treatment” means the ASAM criteria level of care totaling less than nine hours of clinically managed outpatient treatment services per week for adults and less than six hours of clinically managed outpatient treatment services per week for juveniles.

“OWI evaluation” means an assessment completed solely for the purpose of compliance with the substance abuse evaluation requirements of Iowa Code chapter 321J.

“Partial/day treatment” means the ASAM criteria level of care totaling 20 or more hours of clinically managed outpatient treatment services per week.

“Patient” means an individual who participates in licensed program services.

“Placement” means selection of an appropriate licensed program service, based on ongoing assessment.

“Prescriber” means a licensed health care professional with the authority to prescribe medication in accordance with Iowa law.

“Prevention” means activities aimed at minimizing the use of potentially addictive substances, lowering risk in at-risk individuals, or minimizing potential adverse consequences of substance use or gambling.

“Prime programming time” means any period of the day, as determined by a program treating juveniles, when special attention or supervision is necessary.

“Problem gambling” means a gambling disorder that results in a functional impairment of sufficient impact and duration to meet diagnostic criteria specified within the most current Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association.

“Program” means a person, facility, institution, building, agency or legal entity that provides one or more of the services stated in subrule 155.2(2) and is required to be licensed under these rules.

“Quality improvement” means the process of objectively and systematically monitoring and evaluating the quality and appropriateness of patient care and program services and operations to resolve identified problems and to make continued improvements.

“Recovery” means the process of addressing an addictive disorder and working toward personally defined health and well-being.

“Recovery supports” means the broad range of nontreatment services, such as transportation, that assists patients in their recovery efforts.

“Region” means the geographic grouping of counties for conducting the department’s responsibilities under Iowa Code chapter 125.

“Rehabilitation” means the restoration of an optimal state of health by medical, psychological, and social means, including peer group support.

“Residential” means clinically managed inpatient treatment services.

“Resiliency- and recovery-oriented system of care” means coordinated, person-centered approaches to health promotion, prevention, early intervention, treatment and recovery support that build on the protective factors and strengths of individuals to sustain or achieve health and well-being.

“Rule” means each department statement of general applicability that implements, interprets, or prescribes law or policy, or that describes the procedure or practice requirements of the division. The term includes the amendment or repeal of existing rules as specified in the Iowa Code.

“Screening” means the brief review of a patient’s or potential patient’s current risk factors for an addictive disorder or medical or mental health condition to determine if they indicate a need for immediate admission or referral. Screening is not an assessment and is not sufficient to develop a treatment plan, rule out an addictive disorder, or determine that admission to treatment or referral to other services is not indicated.

“Self-administration of medication” means the process whereby a properly trained and qualified staff person observes a patient take medication prescribed by a prescriber.

“Shall” means the term used to indicate a mandatory statement, the only acceptable method under these rules.

“Should” means the term used in the interpretation of a standard to reflect the commonly accepted method, but allowing for the use of effective alternatives.

“Staff” means any individual who conducts an activity on behalf of a program as an employee, agent, consultant, contractor, volunteer or other status.

“Standards category” means the grouping of standards, such as clinical, administrative or programming, in the licensure weighting report.

“Subacute” means medically monitored inpatient services for individuals who require management, supervision and treatment to reduce immediate risk of danger to self or others or severe disability or complication of an addictive disorder or an addictive disorder and a medical or mental health condition.

“Substance abuse treatment and rehabilitation facility” or *“substance abuse treatment program”* means a program required to be licensed under these rules.

“Substance use disorder” means a substance use disorder that results in a functional impairment of sufficient impact and duration to meet diagnostic criteria specified within the most current Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association.

“Time frames” means the periods of time specified throughout the standards.

“Treatment” means the broad range of planned services to identify and change patterns of behavior that are maladaptive, destructive or injurious to health; or to restore appropriate levels of physical, psychological or social functioning. Such services may include assessment; care coordination; crisis stabilization; detoxification; early intervention; health promotion; individual, group and family counseling; management of care; and medication administration, provided by addictive disorder professionals and a mix of medical, mental health and peer professionals as appropriate to the structure of the program.

“Treatment planning” means the process, based on ongoing assessment, by which a patient and qualified staff identify and rank problems, establish agreed-upon goals, and decide on the treatment services and resources to be utilized.

“Waiver” means action by the committee or division that suspends the requirements of a standard on a case-by-case basis in accordance with 641—Chapter 178.

[ARC 1926C, IAB 4/1/15, effective 5/6/15; ARC 5334C, IAB 12/16/20, effective 1/20/21]

641—155.2(125,135) Licensing. In accordance with Iowa Code section 125.13, a person shall not maintain or conduct a substance use disorder program without having first obtained a license for the program from the department, and in accordance with Iowa Code section 135.150, a person shall not maintain or conduct a problem gambling treatment program funded by the department unless the person has obtained a license for the program from the department. The provision of treatment to a patient through any electronic means,

regardless of the location of the program or facility, shall constitute the practice of treatment in the state of Iowa and shall be subject to regulation in accordance with Iowa Code chapter 125, Iowa Code section 135.150, and these rules. An applicant shall apply for one license only. The department shall award one license only to an applicant or licensee.

155.2(1) *Program licenses.* The department shall offer the following program licenses:

- a. A substance use disorder assessment and OWI evaluation-only program license.
- b. A substance use disorder treatment program license.
- c. A problem gambling treatment program license.
- d. A substance use disorder and problem gambling treatment program license.

155.2(2) *Licensed program services.* The license will delineate the licensed program service(s) the program is authorized to provide and will specify that each licensed program service is licensed for adults, juveniles, or adults and juveniles. Licensed program services are:

- a. Substance use disorder assessment and OWI evaluation only, provided by a substance use disorder assessment and OWI evaluation-only program;
- b. Outpatient treatment, provided by a substance use disorder treatment program, a problem gambling treatment program, or a substance use disorder and problem gambling treatment program;
- c. Intensive outpatient treatment, provided by a substance use disorder treatment program, a problem gambling treatment program, or a substance use disorder and problem gambling treatment program;
- d. Partial/day treatment, provided by a substance use disorder treatment program, a problem gambling treatment program, or a substance use disorder and problem gambling treatment program;
- e. Clinically managed low-intensity residential treatment, provided by a substance use disorder treatment program, a problem gambling treatment program, or a substance use disorder and problem gambling treatment program;
- f. Clinically managed medium-intensity residential treatment, provided by a substance use disorder treatment program, a problem gambling treatment program, or a substance use disorder and problem gambling treatment program;
- g. Clinically managed high-intensity residential treatment, provided by a substance use disorder treatment program, a problem gambling treatment program, or a substance use disorder and problem gambling treatment program;
- h. Medically monitored intensive inpatient treatment, provided by a substance use disorder treatment program or a substance use disorder and problem gambling treatment program;
- i. Medically managed intensive inpatient treatment, provided by a substance use disorder treatment program or a substance use disorder and problem gambling treatment program;
- j. Enhanced treatment services, provided by a substance use disorder treatment program or a substance use disorder and problem gambling treatment program;
- k. Opioid treatment services, provided by a substance use disorder treatment program or a substance use disorder and problem gambling treatment program.

155.2(3) *Licensing body.* The committee shall:

- a. Consider and approve or deny all license applications, suspensions and revocations;
- b. Advise the department on policies governing the performance of the department in the discharge of any duties imposed on the department by law;
- c. Advise or make recommendations to the board relative to addictive disorder programs in this state; and
- d. Perform other duties as assigned by the board.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.3(125,135) Types of licenses.

155.3(1) The department may issue an initial license for 270 days to a new applicant scoring a minimum rating of 70 percent in each standards category on the licensure weighting report. An initial license shall expire in 270 days and shall not be extended or renewed.

155.3(2) The department may issue a license subsequent to an initial license for one, two, or three years based on the applicant's rating on the licensure weighting report.

- a.* An applicant achieving a rating of 95 percent or higher in each standards category may qualify for a three-year license.
- b.* An applicant achieving a rating of less than 95 percent but not less than 90 percent in each standards category may qualify for a two-year license.
- c.* An applicant achieving a rating of less than 90 percent but not less than 70 percent in each standards category may qualify for a one-year license.
- d.* A license for one, two, or three years shall expire on the date noted on the license and shall not be extended but may be renewed upon application.

155.3(3) The department may issue a license under deemed status to an applicant providing required documentation of accreditation by a recognized accreditation body. A deemed-status license shall be effective for the same time frame as that of the accreditation granted by the accreditation body, up to three years.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.4(125,135) Nonassignability.

155.4(1) A license issued by the department for the operation of a program applies both to the licensee and the facility in which the program is operated. A license is not transferable.

155.4(2) A closing program is one which intends to cease providing licensed program services. The licensee shall notify the division 30 days before ceasing service provision. The licensee shall be responsible for the transition of patients to another program and for the preservation of all records. The licensee shall include in its notice to the division its plan to transition patients and locate records. When a program closes, the program's license is void on the date the program ceases providing licensed program services, and the license shall be returned to the department.

155.4(3) A closed program is one which has ceased providing licensed program services. The licensee shall notify the division immediately of ceased service provision. The licensee shall be responsible for the transition of patients to another program and for the preservation of all records. The licensee shall include in its notice to the division its plan to transition patients and locate records. When a program is closed, the program's license is void on the date the program ceased providing licensed program services, and the license shall be returned to the department.

155.4(4) A person, facility or legal entity acquiring a licensed, closing or closed program for the purpose of operating a program shall apply for a license.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.5(125,135) Application procedures. The division shall provide license application forms on the department's website and at its office. An applicant shall submit application materials to the division. The division will proceed with inspection of the applicant upon receipt of a complete application. To be complete, an application must include all required materials and be responsive to all licensure standards, as described in these rules.

155.5(1) *Application information.* An applicant shall submit application materials on the forms provided and in the required format. Application materials shall include, but may not be limited to:

- a.* The name and address of the applicant and, if the applicant is part of a larger organization, the name and address of the larger organization.
- b.* The name and address of the applicant's executive director and, if the applicant is part of a larger organization, the name and address of the executive director of the larger organization.
- c.* The names, titles, dates of employment, education, and years of current job-related experience of the applicant's staff; and the table of organization. If the applicant is part of a larger organization or has multiple organizational components and physical facilities, the relationships between the larger organization, organizational components and physical facilities must be shown on the table of organization, with the applicant and applicant's staff positions clearly delineated.
- d.* The names and addresses of members of the applicant's governing body, sponsors, and advisory boards; and the current articles of incorporation and bylaws.
- e.* The names and addresses of individuals, facilities, organizations, and legal entities with which the applicant has a contractual or affiliation agreement pertaining to licensed program services.

f. A description of the licensed program services to be provided by the applicant and a calendar showing program services each week.

g. For each physical facility, copies of reports substantiating compliance with federal, state and local laws, rules and regulations, to include appropriate Iowa department of inspections and appeals rules, state fire marshal rules and fire ordinances, and local health, fire, occupancy, and safety regulations.

h. Information required for programs admitting juveniles as described under Iowa Code section 125.14A.

i. Fiscal management information, to include a recent audit or opinion of auditor and program board minutes to reflect approval of the program's budget and insurance.

j. Insurance coverage related to professional and general liability, building, workers' compensation, and fidelity bond.

k. The address of each physical facility.

l. The written policies and procedures manual that covers all the requirements of these rules.

155.5(2) *Application time frame.* An applicant seeking to be licensed subsequent to a 270-day initial license or a licensee seeking to renew a one-, two-, or three-year license or to significantly change a currently licensed program shall submit an application at least 90 days before expiration of the current license or before the program change.

155.5(3) *License under deemed status.* An organization seeking to be licensed under deemed status shall submit an application.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.6(125,135) Technical assistance. The division may provide technical assistance to an applicant or licensee.

155.6(1) An applicant may request technical assistance regarding these rules and the licensure process.

155.6(2) A licensee may request technical assistance regarding these rules and the licensure process or to bring areas of noncompliance with these rules into compliance.

155.6(3) The division may require a licensee to receive technical assistance to bring areas of noncompliance with these rules into compliance.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.7(125,135) Inspection of applicants.

155.7(1) *Inspection of applicants.* The division shall inspect each applicant. Inspection shall include review of the complete application and may include, but may not be limited to, review of patient records, review of applicant data reporting, and interviews with staff and patients. Inspection shall include on-site inspection unless specifically waived as allowed under these rules. The division will send the applicant a report of inspection findings within 30 business days of the inspection.

155.7(2) *On-site inspection.* The division will schedule an on-site inspection of an applicant within 60 business days of receipt of the applicant's complete application.

a. The division may waive on-site inspection of an applicant that is:

(1) A licensee applying to renew a license when the applicant's licensed program services are limited to substance use disorder assessment and OWI evaluation services only, outpatient treatment, or intensive outpatient treatment.

(2) An applicant applying for a license under deemed status.

b. The department shall not be required to provide advance notice of the on-site inspection to the applicant.

c. The on-site inspection team will consist of designated employees or agents of the division.

d. The on-site inspection team will inspect the applicant to verify application information and determine compliance with all laws, rules and regulations.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.8(125,135) License—approval. The department shall issue a license upon approval of an application for a license by the committee. The license shall become effective on the date approved by the committee.

155.8(1) Committee meeting preparation. The division shall prepare an inspection findings report with a license recommendation for presentation at a committee meeting held within 60 business days from the date of the inspection findings report.

a. The division will provide public notice of committee meetings in accordance with Iowa Code section 21.4.

b. The division shall provide committee members with the inspection findings report and license recommendation for each application to be acted upon at each committee meeting.

155.8(2) Committee meeting format.

a. The chairperson or chairperson's designee shall call the meeting to order at the designated time.

b. Division staff will review each application, inspection findings report, and license recommendation, as directed by the chairperson or the chairperson's designee.

c. The chairperson or the chairperson's designee may give the applicant and the public the opportunity to provide comment on each application.

d. After any applicant and public comments are heard, the committee will make a decision to approve or initially deny the application for a license.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.9(125,135) Written corrective action plan. A program approved for a license shall submit a written corrective action plan to the division within 30 days following the committee meeting to bring any area of noncompliance with these rules into compliance.

155.9(1) The written corrective action plan shall include, but may not be limited to:

a. Any area of noncompliance specified in the inspection findings report;

b. The corrective measures to be taken by the program for each area of noncompliance; and

c. The completion date for each corrective measure.

155.9(2) The department may inspect the licensee, including on-site inspection, to review the implemented corrective measures and report to the committee.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.10(125,135) Grounds for denial of license.

155.10(1) The committee may deny an application for a license for any of the following reasons:

a. The application is not complete, is not timely or otherwise does not meet the requirements of these rules.

b. The applicant fails to achieve the minimum licensure weighting report rating required for a 270-day initial license or a one-, two- or three-year license.

c. Lack of patients or patient records for review.

d. Violation of any of the following grounds for discipline:

(1) Submission of fraudulent or misleading information.

(2) Violation by a program or staff of any statute or rule pertaining to programs, including violation of any provision of these rules, or failure to adhere to program policies and procedures adopted pursuant to these rules.

(3) Failure to comply with licensure, inspection, health, fire, occupancy, safety, sanitation, zoning, or building codes or regulations required by federal, state or local law.

(4) Sanction, modification, termination, withdrawal, refused renewal, suspension, or revocation of accreditation by an accreditation body.

(5) Sanction, modification, termination, withdrawal, refused renewal, suspension, revocation, or refused issuance of a federal registration to distribute or dispense controlled substances.

(6) Commission of or permitting, aiding or abetting commission of an unlawful act.

(7) Conviction of a member of the governing body, a director, administrator, chief executive officer, or other managing staff person of a felony or misdemeanor related to the management, operation or integrity of the program.

- (8) Use of untruthful or improbable statements in advertising.
- (9) Conduct or practices determined to be detrimental to the general health, safety, or welfare of a patient, potential patient, concerned person, visitor, staff or member of the public.
- (10) Violation of a patient's confidentiality or willful, substantial, or repeated violation of a patient's rights.
- (11) Defrauding a patient, potential patient, concerned person, visitor, staff or third-party payor.
- (12) Inappropriate conduct by staff, including sexual or other harassment or exploitation of a patient, potential patient, concerned person, visitor or staff.
- (13) Utilization of treatment techniques that endanger the health, safety, or welfare of a patient, potential patient, concerned person, visitor, staff or member of the public.
- (14) Discrimination or retaliation against a patient, potential patient, concerned person, visitor, staff, or member of the public who has submitted a complaint or information to the department.
- (15) Failure to allow an employee or agent of the department access to the program or facility for the purpose of inspection, investigation, or other activity necessary to the performance of the department's duties.
- (16) Failure to submit an acceptable written corrective action plan or failure to comply with a corrective action plan issued pursuant to rule 641—155.9(125,135) or 641—155.16(125,135).
- (17) Violation of an order of the committee or violating the terms or conditions of a consent agreement or informal settlement between a program and the committee.

155.10(2) Reserved.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.11(125,135) Denial, suspension or revocation of a license. The committee may deny an application for a license. The committee may suspend or revoke a license for any of the grounds for discipline pursuant to paragraph 155.10(1)“d.”

155.11(1) Initial notice from committee. When the committee determines to deny, suspend or revoke a one-, two-, or three-year license or a license under deemed status, the division shall notify the applicant or licensee by certified mail, return receipt requested. Such notice shall provide the applicant or licensee the opportunity to submit a written corrective action plan or written objections to the division.

155.11(2) Submission of corrective action plan or objections. An applicant notified of denial of a one-, two-, or three-year license or a license under deemed status or a licensee notified of suspension or revocation of a license may submit a written corrective action plan or written objections to the division within 20 days after receipt of the notice.

a. Written corrective action plan. The written corrective action plan must meet the requirements of paragraphs 155.9(1)“a” to “c.” If the applicant or licensee submits a written corrective action plan, the applicant or licensee shall have 90 days from the date of submission within which to show compliance with the plan. The applicant or licensee shall submit any information to the committee that the committee requests or that the applicant or licensee deems pertinent to show compliance with the plan. The department may inspect the licensee, including on-site inspection, to review the implemented corrective measures and report to the committee.

b. Objections. If the applicant or licensee submits written objections, the applicant or licensee shall submit to the committee any information that the committee or the applicant or licensee deems pertinent to support the applicant's or licensee's defense.

155.11(3) Decision of committee. Following receipt of a written corrective action plan and expiration of the 90-day compliance period, or following receipt of written objections, or when a written corrective action plan or written objections have not been received within the 20-day time period, the committee may meet to determine whether to proceed with the denial, suspension or revocation. The division shall send notice of this meeting to the applicant or licensee by certified mail, return receipt requested, ten days prior to the committee meeting, notifying the program director and the program board chairperson of the time, place and date of the committee meeting.

155.11(4) Notice of decision and opportunity for contested case hearing.

a. When the committee determines to deny, suspend, or revoke a license, the applicant or licensee shall be given written notice by restricted certified mail.

b. The applicant or licensee may request a hearing on the determination. The request must be in writing and sent by certified mail, return receipt requested, to the department's address within 30 days of the notice issued by the division. Failure to request a hearing will result in final action by the committee.

155.11(5) Summary suspension. If the committee or department finds that the health, safety or welfare of the public is endangered by continued operation of a program, the committee or department may order summary suspension of a license, pursuant to Iowa Code sections 17A.18 and 125.15A, pending proceedings for revocation or other actions in accordance with Iowa Code sections 17A.18A and 125.15A. These proceedings shall be promptly instituted and determined.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.12(125,135) Contested case hearing. An applicant or licensee may contest the denial, suspension or revocation of a license by requesting a hearing before an administrative law judge from the department of inspections and appeals. The applicant or licensee will be notified by certified mail, return receipt requested, of the date of the hearing, no less than 30 days before the hearing.

155.12(1) Failure to appear. If a party fails to appear in a contested case hearing proceeding after proper service of notice, the administrative law judge shall, in such a case, enter a default judgment against the party failing to appear.

155.12(2) Conduct of hearing. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved and to be represented by counsel at their own expense.

a. The hearing shall be informal, and all relevant evidence shall be admissible. Effect will be given to the rules of privilege recognized by law. Objections to evidentiary offers may be made and shall be noted in the record. When the hearing will be expedited and the interests of the parties will not be prejudiced substantially, any part of the evidence may be required to be submitted in verified written form.

b. Documentary evidence may be received in the form of copies or excerpts if the original is not readily available. Upon request, parties shall be given an opportunity to compare the copy with the original, if available.

c. Witnesses present at the hearing shall be subject to cross-examination by any party as necessary for a full and true disclosure of the facts.

d. The record in a contested case shall include:

- (1) All pleadings, motions and intermediate rulings.
- (2) All evidence received or considered and all other submissions.
- (3) A statement of all matters officially noticed.
- (4) All questions and offers of proof, objections and rulings therein.
- (5) All proposed findings and exceptions.
- (6) Any decision, opinion or report by the administrative law judge presiding at the hearing.

e. Oral proceedings shall be open to the public and shall be recorded either by mechanized means or by certified shorthand reporters. Oral proceedings or any part thereof shall be transcribed at the request of any party with the expense of the transcription charged to the requesting party. The recording or stenographic notes of oral proceedings or the transcription thereof shall be filed with and maintained by the agency for at least five years from the date of decision.

f. Findings of fact shall be based solely on the evidence in the record and on matters officially noticed in the record.

155.12(3) Continuance. For good cause, the administrative law judge may continue hearings beyond the time originally scheduled or recessed. Requests for continuance shall be made to the administrative law judge in writing at least three days prior to the scheduled hearing date. Continuances will not be granted less than three days before the hearing except in exigent circumstances.

155.12(4) Decision. Findings of fact shall be based solely on the evidence in the record and upon matters officially noticed in the record.

a. The decision of the administrative law judge shall be the final decision unless there is an appeal to the board within 20 days of the receipt of the decision.

b. A proposed or final decision or order in a contested case hearing shall be in writing. A proposed or final decision shall include findings of fact and conclusions of law, separately stated. Parties will be promptly notified of each proposed or final decision or order by the delivery to them of a copy of such

decision or order by certified mail, return receipt requested. In the case of a proposed decision, parties shall be notified of the right to appeal the decision to the board.

155.12(5) *Appeal to the board.*

a. Either party may request that the board review the proposed decision. The request shall be in writing and mailed within 20 days of receipt of the proposed decision.

b. The parties shall have an opportunity to submit briefs to the board. The board will review the record and any briefs. No new evidence shall be admitted unless requested and allowed by the board.

c. Oral presentation will be made to the board at a time set by the board.

d. The board shall issue its decision in writing within 30 days after conclusion of the hearing.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.13(125,135) Rehearing application. Any party may file an application for rehearing, stating the specific grounds therefor and the relief sought, within 20 days after the issuance of any final decision by the board in a contested case. A copy of such application for rehearing shall be timely mailed by the applicant to all parties of record not joining therein. Such an application for rehearing shall be deemed to have been denied unless the board grants the application within 20 days after its filing.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.14(125,135) Judicial review. An applicant or licensee that is aggrieved or adversely affected by the board's final decision and that has exhausted all adequate administrative remedies may seek judicial review of the board's decision pursuant to and in accordance with Iowa Code section 17A.19.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.15(125,135) Issuance of a license after denial, suspension or revocation. After denial, suspension, or revocation of a license, the former applicant or licensee shall not have a license issued within one year of the effective date of the denial, suspension or revocation. After one year, the former applicant or licensee may submit an application for a 270-day initial license. For purposes of this rule, "former applicant or licensee" shall include any director, officer, administrator, chief executive officer, or other managing staff of the former applicant or licensee.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.16(125,135) Complaints and investigations.

155.16(1) *Complaints.* Any person may file a complaint with the department against any program licensed pursuant to this chapter. The complaint shall be made in writing and shall be emailed, mailed or delivered to the health facility officer at the Division of Behavioral Health, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075. The complaint shall include the name and address of the complainant, the name of the program, and a concise statement of the allegations against the program, including the specific alleged violations of Iowa Code chapter 125 or this chapter, if known. A complaint may also be initiated upon the committee's own motion or by the department when an emergency exists that is deemed to endanger the health, safety or welfare of a patient, potential patient, concerned person, visitor, staff or the public, pursuant to evidence received by the department. Timely filing of complaints is required to ensure the availability of witnesses and to avoid initiation of an investigation under conditions which may have been significantly altered during the period of delay.

155.16(2) *Evaluation and investigation.* Upon receipt of a complaint, the division shall make a preliminary review of the allegations contained in the complaint. The division may request that the complainant submit the complaint to the program's grievance process. Unless the division concludes that the complaint is intended solely to harass a program or lacks a reasonable basis, or is more reasonably addressed through the program's grievance process, the department shall conduct an investigation of the program that is the subject of the complaint as soon as is practicable. The program that is the subject of the complaint shall be given an opportunity to informally respond to the allegations contained in the complaint either in writing or through a personal interview or conference with department staff.

155.16(3) *Investigative report.* Within 30 days after completion of the investigation, the division shall prepare a written investigative report and shall submit the report to the executive director of the program,

the chairperson of the governing body of the program, and the committee. This report shall include the nature of the complaint and shall indicate if the complaint allegations were substantiated, unsubstantiated, or undetermined; the basis for the finding; the specific statutes or rules at issue; a response from the program, if received; and a recommendation for action.

155.16(4) *Review of investigations.* The committee shall review the investigative report at its next regularly scheduled meeting and shall determine appropriate action.

a. Closure. If the committee determines that the allegations contained in the complaint are unsubstantiated, the committee shall close the case and the division shall promptly notify the complainant and the program by letter.

b. Referral for further investigation. If the committee determines that the complaint warrants further investigation, the committee shall refer the complaint to the department for further investigation.

c. Written corrective action plan. If the committee determines that the allegations contained in the complaint are substantiated and corrective action is warranted, the committee may require the program to submit and comply with a written corrective action plan. A program shall submit a written corrective action plan to the division within 20 business days after receiving a request for such plan. The written corrective action plan shall include a plan for correcting areas of noncompliance as required by the committee and a time frame within which such plan shall be implemented. The plan is subject to department approval. Requiring a written corrective action plan is not formal disciplinary action. Failure to submit or comply with a written corrective action plan may result in formal disciplinary action against the program.

d. Disciplinary action. If the committee determines that the allegations contained in the complaint are substantiated and disciplinary action is warranted, the committee may proceed with such action in accordance with rule 641—155.11(125,135).

155.16(5) *Confidential information and public information.* Information contained in a complaint may be confidential pursuant to Iowa Code section 22.7(2), 22.7(18), or 125.37 or any other provision of state or federal law. Investigative reports, written corrective action plans, and all notices and orders issued pursuant to rule 641—155.11(125,135) shall refer to patients by number and shall not include patient identifying information. Investigative reports, written corrective action plans, and all notices and orders issued pursuant to rule 641—155.11(125,135) shall be available to the public as open records pursuant to Iowa Code chapter 22.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.17(125,135) License revision. A licensee shall submit a written request to the division to revise a license at least 30 days prior to any change of address, executive director, clinical oversight staff, facility, or licensed program service. The division will determine if the requested revision can be approved or if the change is significant enough to require the submission of an application for license renewal by the licensee.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.18(125,135) Deemed status.

155.18(1) *Accreditation.* The committee shall approve a license under deemed status for an applicant accredited by a recognized national accreditation body when the committee determines that the accreditation is for the same licensed program services as those addressed by these rules and when such accreditation is consistent with these rules.

a. An applicant for a license under deemed status shall submit a copy of the entire accreditation body survey or inspection report, certificate of accreditation, accreditation conditions, and corrective action requirements and plans with the applicant's application.

b. The committee may accept the division's review of an accreditation body's survey or inspection report, certificate of accreditation, and conditions or corrective action plans as meeting the requirements for inspection for those licensed program services described in these rules.

c. An applicant for a license under deemed status shall be licensed only for licensed program services that are described in these rules.

d. A program licensed under deemed status shall be licensed for the same period of time as that for which the program is accredited, up to three years.

155.18(2) *National accreditation bodies.* The national accreditation bodies recognized for the purposes of licensure under deemed status are:

- a. The Joint Commission.
- b. The Council on Accreditation of Rehabilitation Facilities (CARF).
- c. The Council on Accreditation of Children and Family Services (COA).
- d. The American Osteopathic Association (AOA).

155.18(3) *Credentials and expectations of accreditation bodies.* The accreditation credentials of an accreditation body shall specify the types of organizations, programs and services the body accredits.

155.18(4) *Responsibilities of programs licensed under deemed status.*

a. A program licensed under deemed status shall meet all requirements of these rules and all applicable laws and regulations.

b. A program licensed under deemed status may submit an application for licensure of licensed program services covered by these rules that are not covered by the accreditation.

155.18(5) *Rights and responsibilities of committee and department.* The committee and the department shall retain the following responsibilities and rights for deemed status applicants and licensees:

- a. The department may inspect the applicant or licensee.
- b. The division shall investigate complaints in accordance with these rules and recommend and require corrective action or other sanctions. Complaints, findings, and required corrective action may be reported to the accreditation body.
- c. The committee shall review and act upon a license under deemed status when complaints have been founded, when the national accreditation body identifies noncompliance with accreditation, when accreditation expires without renewal, or when accreditation is sanctioned, modified, terminated, withdrawn, suspended or revoked.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.19(125,135) *Funding.* The issuance of a license shall not be construed as a commitment on the part of either the state or federal government to provide funds to such licensee.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.20(125,135) *Inspection.* An applicant or licensee agrees as a condition of licensure:

155.20(1) To permit properly designated representatives of the department to enter into and inspect any and all programs and facilities for which a license has been applied or issued to verify information contained in the application or to ensure compliance with all laws, rules, and regulations relating thereto, during all hours of operation of said applicant or licensee and at any other reasonable hour.

155.20(2) To permit properly designated representatives of the department to audit and collect statistical data from all records maintained by the applicant or licensee. An applicant or licensee that does not permit inspection by the department or examination of all records, including financial records, records pertaining to methods of administration, general and special dietary programs, and the disbursement of medications and methods of supply, and any other records the committee deems relevant, shall not be licensed.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.21(125,135) *General standards for all programs.* The following standards shall apply to all programs. For programs for which both the general standards and specific standards apply, both sets of standards shall be met.

155.21(1) *Governing body.* The program shall have a formally designated governing body that complies with Iowa Code chapter 504 and that is the ultimate authority for program operations.

a. The governing body shall develop and adopt written bylaws and policies that define the powers and duties of the governing body, its committees, its advisory groups, and the executive director. These bylaws and policies shall be reviewed and revised by the governing body as necessary.

b. The bylaws shall minimally specify the following:

- (1) The type of membership;
- (2) The term of appointment;

- (3) The frequency of meetings;
- (4) The attendance requirements; and
- (5) The quorum necessary to transact business.
- c. The governing body shall maintain minutes of all meetings, and the minutes shall be available for review by the department and shall include, but not necessarily be limited to:
 - (1) Date of the meeting;
 - (2) Names of members attending;
 - (3) Topics discussed; and
 - (4) Decisions reached and actions taken.
- d. The duties of the governing body shall include, but may not be limited to:
 - (1) Appointment of a qualified executive director, who shall have the responsibility and authority for the management of the program in accordance with the governing body's established policies;
 - (2) Establishment of effective controls to ensure that quality services are provided;
 - (3) Review and approval of the program's annual budget; and
 - (4) Approval of all contracts.
- e. The governing body shall approve policies and procedures for the effective operation of the program.
- f. The governing body shall be responsible for all funds, equipment, and supplies and the facility in which the program operates. The governing body shall be responsible for the appropriateness and adequacy of services provided by the program.
- g. The governing body shall at least annually prepare a report, which shall include, but may not be limited to:
 - (1) The name, address, occupation, and place of employment of each governing body member;
 - (2) Disclosure of any family relationship a member of the governing body has with a program staff member;
 - (3) The names and addresses of any owners or controlling parties whether they are individuals, partnerships, a corporation body, or a subdivision of other bodies;
 - (4) Disclosure of any potential conflict of interest a member of the governing body may have.
- h. The governing body shall ensure that the program has malpractice, liability and workers' compensation insurance for all staff and a fidelity bond that covers all staff.
- 155.21(2) *Executive director.*** The executive director shall have primary responsibility for program operations. The duties of the executive director shall be clearly defined in accordance with the policies established by the governing body.
- 155.21(3) *Clinical oversight.*** The program shall designate a treatment supervisor to oversee provision of licensed program services.
- 155.21(4) *Policies and procedures manual.*** The program shall maintain and implement a written policies and procedures manual that documents the program's compliance with these rules. The manual shall describe the program's licensed program services and related activities, specify the policies and procedures to be followed, and govern all staff.
 - a. The manual shall have a table of contents.
 - b. Revisions to the manual shall be entered with the date and with the name and title of the staff person making the revisions.
- 155.21(5) *Staff development and training.*** The program's policies and procedures shall establish a staff development and training plan that encompasses all staff and all licensed program services, considers the professional continuing education requirements of certified and licensed staff, and is available to all staff.
 - a. The program shall designate a staff person responsible for the staff development and training plan.
 - b. The staff person responsible for the staff development and training plan shall conduct an annual needs assessment.
 - c. The staff development and training plan shall describe orientation for new staff which includes an overview of the program and licensed program services, confidentiality, tuberculosis and blood-borne pathogens, including HIV/AIDS, and culturally and environmentally specific information. Orientation shall

also address the specific responsibilities of each staff person and community resources specific to the staff person's responsibilities.

d. The staff development and training plan shall address training when program operations or licensed program services change.

e. The staff development and training plan may include on-site training activities. The program shall maintain minutes of on-site training that include the name and date of the training, the training topic, the name and title of the trainer, and the names of staff attending the training.

155.21(6) *Data reporting.* The program's policies and procedures shall describe how the program reports required data to the division in accordance with department requirements and processes.

155.21(7) *Fiscal management.* The program's policies and procedures shall ensure proper fiscal management, which shall include:

a. The preparation and maintenance of an annual written budget, which shall be reviewed and approved by the governing body prior to the beginning of the budget year.

b. A fiscal management system maintained in accordance with generally accepted accounting principles, including internal controls to reasonably protect program assets. This shall be verified by an annual independent fiscal audit of the program by the state auditor's office or a certified public accountant based on an agreement entered into by the governing body. A program with an annual budget of \$100,000 or less shall conduct a fiscal audit no less than every three years.

c. An insurance program that provides for the protection of the physical and financial resources of the program and provides coverage for all people, buildings, and equipment. The insurance program shall be reviewed annually by the governing body.

155.21(8) *Personnel.* The program shall have personnel policies and procedures.

a. Personnel policies and procedures shall address:

- (1) Recruitment and selection of staff;
- (2) Wage and salary administration;
- (3) Promotions;
- (4) Employee benefits;
- (5) Working hours;
- (6) Vacation and sick leave;
- (7) Lines of authority;
- (8) Rules of conduct;
- (9) Disciplinary actions and termination;
- (10) Methods for handling cases of inappropriate patient care;
- (11) Work performance appraisal;
- (12) Staff accidents and safety;
- (13) Staff grievances;
- (14) Prohibition of sexual harassment;
- (15) Implementation of the Americans with Disabilities Act;
- (16) Implementation of the Drug-Free Workplace Act;
- (17) Use of social media; and
- (18) Implementation of equal employment opportunity.

b. The program shall have for each position and each staff person a written job description that describes the duties of each position and staff and the qualifications required for each position.

(1) A staff person providing screening, OWI evaluation, assessment or treatment services in accordance with these rules shall be qualified as an addictive disorder professional by meeting at least one of the following conditions:

1. Be certified or licensed as a substance use disorder or problem gambling counselor by a national or state organization approved by the division.

2. Be licensed as a marital and family therapist or a mental health counselor under Iowa Code chapters 154D and 147, an independent social worker under Iowa Code chapters 154C and 147, or another independent professional authorized by the Iowa Code to diagnose and treat mental disorders as specified

in the most current Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association.

3. Be licensed as a master social worker under Iowa Code chapters 154C and 147.
4. Be licensed as a bachelor social worker under Iowa Code chapters 154C and 147.
5. Be temporarily or provisionally certified or licensed as allowed under a certification or license acceptable to the division. Such staff person must meet all requirements of the temporary or provisional certification or license, must be supervised by a staff person meeting one of the requirements of paragraphs “1” to “4” above, and must be fully certified or licensed within two years of the date on which the person began to provide licensed program services.

6. A staff person employed on and after July 1, 2010, who is not qualified as described in any of the paragraphs “1” to “5” above shall be deemed qualified while the person is in the process of being certified or licensed under a certification or license acceptable to the division. Such staff must meet the requirements of the certification or licensure process, must be supervised by a staff person meeting one of the requirements of paragraphs “1” to “4” above, and must be fully certified or licensed within two years of the date on which the person began to provide licensed program services. The two-year time frame is continuous from the person’s date of first employment by the program, including if the person changes employment from one program to another.

7. A person employed before July 1, 2010, and continuously since that date at a program licensed pursuant to this chapter, who is not qualified as described in any of the paragraphs “1” to “5” above, shall be deemed qualified as long as such person remains employed by that program and that program remains licensed. Such staff shall maintain a minimum of 30 hours of training every two years, including a minimum of 3 hours of ethics training, and shall be supervised by a staff person meeting at least one of the conditions of paragraphs “1” to “4” above.

(2) The program shall review job descriptions annually and whenever there is a change in a position’s duties or required qualifications.

(3) The program shall include job descriptions in the personnel section of the policies and procedures manual.

c. The program shall conduct a written evaluation of job performance with each staff person at least annually. The evaluation shall include the opportunity for the staff person to comment.

d. The program shall maintain a personnel record on each staff person. The record shall contain, as applicable:

- (1) Verification of training, experience, qualifications, and professional credentials;
- (2) Job performance evaluations;
- (3) Incident reports;
- (4) Disciplinary action taken; and
- (5) Documentation of review of and agreement to adhere to confidentiality laws and regulations. This review and agreement shall occur prior to the staff person’s assumption of duties.

e. The personnel policies and procedures shall ensure confidentiality of personnel records and shall specify staff authorized to have access to personnel information.

f. The program shall notify the division in writing within ten days of being informed that a staff person has been sanctioned or disciplined by a certifying or licensing body. Such notice shall include the sanction or discipline order.

155.21(9) *Child abuse, dependent adult abuse and criminal history background checks.* The program’s policies and procedures shall address child abuse, dependent adult abuse and criminal history background checks.

a. The program shall prohibit mistreatment, neglect, or abuse of children and dependent adults and shall specify reporting and enforcement procedures. Alleged violations shall be reported immediately to the program’s executive director and appropriate department of human services personnel. Policies and procedures on reporting alleged violations shall be in compliance with subrule 155.21(10). A staff person found to be in violation of Iowa Code sections 232.67 through 232.70, as substantiated by a department of human services investigation, shall be subject to the program’s policies concerning termination.

b. For each staff person working with juveniles as set forth in Iowa Code section 125.14A or with dependent adults as set forth in Iowa Code chapter 235B, the personnel record shall contain:

(1) Documentation of a criminal history background check with the Iowa division of criminal investigation on all new staff applicants. The background check shall include asking whether the applicant has been convicted of a crime.

(2) A written, signed and dated statement furnished by a new staff applicant which discloses any substantiated report of child abuse, neglect or sexual abuse or dependent adult abuse.

(3) Documentation of a check prior to permanent acceptance of a person as staff, with the Iowa central registry for any substantiated reports of child abuse, neglect or sexual abuse pursuant to Iowa Code section 125.14A or substantiated reports of dependent adult abuse for all staff hired or accepted on or after July 1, 1994, pursuant to Iowa Code chapter 235B.

c. A person who has a record of a criminal conviction or founded child abuse report or founded dependent adult abuse report shall not be hired or accepted as staff unless an evaluation of the crime or founded child abuse or founded dependent adult abuse has been made by the department of human services which concludes that the crime or founded child abuse or founded dependent adult abuse does not merit prohibition of employment. If a record of criminal conviction or founded child abuse or founded dependent adult abuse does exist, the person shall be offered the opportunity to complete and submit Form 470-2310, Record Check Evaluation. In its evaluation, the department of human services shall consider the nature and seriousness of the crime or founded abuse in relation to the position sought, the time elapsed since the commission of the crime or founded abuse, the circumstances under which the crime or founded abuse was committed, the degree of rehabilitation and the number of crimes or founded abuses committed by the person involved.

d. A staff person providing screening, OWI evaluation, assessment or treatment in accordance with this chapter shall complete two hours of child abuse identification and reporting training and two hours of dependent adult abuse identification and reporting training within six months of initial employment and at least two hours of additional child abuse identification and reporting training and two hours of additional dependent adult abuse identification and reporting training every three years thereafter. If the staff person completes at least one hour of additional child abuse identification and reporting training and one hour of additional dependent adult abuse identification and reporting training prior to the three-year expiration period, the staff person shall be deemed in compliance with the training requirements for an additional three years. An employer of a staff person subject to these requirements may provide supplemental training, specific to identification and reporting of child abuse or dependent adult abuse as it relates to the person's professional practice, in addition to the core training provided. A training certificate relating to the identification and reporting of child abuse or dependent adult abuse issued prior to July 1, 2019, remains effective and continues in effect as issued for the five-year period following its issuance.

155.21(10) Patient records. The program's policies and procedures shall describe compilation, storage and dissemination of patient records and release or disclosure of information.

a. The policies and procedures shall ensure that:

(1) The program protects the patient record against loss, tampering or unauthorized disclosure of information;

(2) The content and format of patient records are uniform;

(3) All entries in the patient record are in chronological order, signed, dated and legible. When records are maintained electronically, a staff identification code number authorizing access shall be accepted in lieu of a signature;

(4) Each entry in the patient record is made in permanent ink, by typewriter, or by computer; and

(5) Entries in the patient record use language consistent with generally accepted standards of practice and do not include abstract terms, technical jargon or slang.

b. The program shall provide adequate physical facilities for the secure storage, processing and handling of patient records.

c. Appropriate patient records shall be readily accessible to staff as specifically authorized by program policy.

d. The program shall appropriately maintain and dispose of patient records. Patient records shall be maintained for not less than seven years from the date they are officially closed.

e. Each file cabinet or storage area containing patient records shall be locked.

f. The program shall release or disclose information on individuals seeking program services or on patients in strict accordance with the Health Insurance Portability and Accountability Act (HIPAA) and state and federal confidentiality laws, rules and regulations.

(1) The confidentiality of substance use disorder patient records and information is protected by HIPAA and the regulations on confidentiality of alcohol and drug abuse patient records, 42 CFR Part 2, which implement federal statutory provisions, 42 U.S.C. 290dd-3 applicable to alcohol abuse patient records, and 42 U.S.C. 290ee-3 applicable to drug abuse patient records.

(2) The confidentiality of problem gambling patient records and information is protected by HIPAA, Iowa Code chapter 228 and Iowa Code section 22.7(35).

g. A program that provides licensed program services via electronic means shall inform the patient of the limitations and risks associated with such services and shall document in the patient record that such notice has been provided.

h. Upon receipt of a properly executed written release of information or authorization to disclose signed by the patient, the program shall release patient records in a timely manner. A program shall not refuse to release patient records related to continuation of care solely because payment has not been received. A program may refuse to release patient records that are unrelated to continuation of care if payment has not been received. A program may refuse to file the reporting form required by 641—subrule 157.3(1), “Notice Iowa Code 321J—Confidential Medical Record,” reporting screening, evaluation, and treatment completion, if payment has not been received for such services.

155.21(11) *Assessment and admission.* The program’s policies and procedures shall address screening, assessment, referral and admission and documentation of such activities in the patient record.

a. The program shall conduct an assessment with each patient prior to admission unless the patient’s current risk factors indicate a need for immediate admission.

(1) If the program admits a patient based on a screening or initial assessment that indicates the patient requires immediate admission, that screening or initial assessment must be updated and expanded to a full assessment when the patient’s current risk factors are stabilized.

(2) The assessment shall be documented in the patient record and shall be organized in a manner that supports development of a treatment plan by the program or by any program to which the patient is referred.

b. The program shall implement a uniform assessment process that describes:

(1) The information to be gathered;

(2) Procedures for accepting a referral from another program, agency or organization;

(3) Procedures for referring a patient to another program, agency or organization.

c. A substance use disorder treatment program, problem gambling treatment program, or substance use disorder and problem gambling treatment program shall update the assessment on an ongoing basis, when clinically indicated, and within the periods of time specified for each level of care in the management-of-care review process.

d. The results of each assessment shall be clearly explained to the patient, and to the patient’s family when appropriate, and such explanation shall be documented in the patient record.

e. At the time of admission, a substance use disorder treatment program, problem gambling treatment program, or substance use disorder and problem gambling treatment program shall document that the patient has been informed of:

(1) The general nature and goals of the program;

(2) Rules governing patient conduct and infractions that can lead to disciplinary action or discharge from the program;

(3) The hours during which services are available;

(4) The costs to be borne by the patient;

(5) Patient rights and responsibilities;

(6) Confidentiality laws, rules and regulations; and

(7) Safety and emergency procedures.

155.21(12) *Treatment plans.* The policies and procedures for substance use disorder treatment programs, problem gambling treatment programs, and substance use disorder and problem gambling treatment programs shall describe the program's uniform process for developing individualized treatment plans based on ongoing assessment and documentation of such plans in the patient record.

a. Staff shall initiate development of the treatment plan as soon after the patient's admission as is clinically feasible and within the period of time between admission and the review date specified for that level of care in the management-of-care review process.

b. The treatment plan shall minimally contain:

- (1) A summary of assessment findings;
- (2) Patient short- and long-term goals;
- (3) The type and frequency of planned treatment activities;
- (4) The staff responsible for the patient's treatment; and
- (5) Culturally and environmentally specific considerations.

c. Staff shall develop each treatment plan in partnership with the patient, with patient participation documented in the patient record. The treatment plan shall be written in a manner clearly understandable to the patient. Staff shall give the patient a copy of each treatment plan. The patient and staff shall review and revise the treatment plan when clinically indicated and in accordance with the time frames specified in the management-of-care review process.

d. Treatment plan reviews shall be based on ongoing assessment and shall specify the indicated level of care and licensed program services and any revision of treatment plan goals. The date of the review and any revision of the treatment plan shall be documented in the patient record.

155.21(13) *Progress notes.* The policies and procedures for substance use disorder treatment programs, problem gambling treatment programs, and substance use disorder and problem gambling treatment programs shall describe the program's uniform process for reviewing a patient's current status and progress in meeting treatment plan goals and documenting such review in the patient record.

a. Progress notes shall include the date each service was provided or observation was made and the name and title of the staff person providing each service.

b. Staff shall enter a progress note following each individual counseling session.

c. Staff shall enter a summary progress note at least weekly for group counseling sessions.

d. Progress notes that involve subjective interpretations of a patient's status or progress should be supplemented with a description of the behavioral observations that were the basis for the interpretation.

155.21(14) *Patient record contents.* The program's policies and procedures shall require that a record be maintained for each patient and shall specify the contents of the patient record.

a. The patient record shall include:

- (1) Any screening;
- (2) Each assessment;
- (3) Results of any physical examination or laboratory test;
- (4) Admission information;
- (5) Any report from a referring source or outside resource;
- (6) Notes from any case conference, consultation, care coordination or case management;
- (7) Any correspondence related to the patient, including letters, electronic communications and telephone conversations;
- (8) Any treatment consent form;
- (9) Any release of information or authorization to disclose;
- (10) Notes on any service provided; and
- (11) Any incident report.

b. For substance use disorder treatment programs, problem gambling treatment programs, and substance use disorder and problem gambling treatment programs, the patient record shall also include:

- (1) Treatment plans;
- (2) Management-of-care reviews;

(3) Medication records, which shall allow for the monitoring of all medications administered and self-administered and detection of adverse drug reactions;

(4) Progress notes;

(5) Discharge summaries completed within 30 days of discharge, which shall be sufficiently detailed to identify the types of services the patient received, action taken to address specific problems identified, and plans for services and referrals postdischarge.

c. For problem gambling treatment programs and substance use disorder and problem gambling treatment programs, the patient record shall also include documentation of financial counseling services that assist problem gambling patients in preparing a budget and addressing financial debt options, including restitution and bankruptcy.

155.21(15) *Drug screening.* The program's policies and procedures shall address collection of drug-screening specimens and utilization of drug-screening results. Such policies may state that the program does not conduct drug screening.

a. A specimen obtained from a patient shall be collected under direct supervision and analyzed in accordance with program policies, or the program shall have a policy in place to reduce the patient's ability to alter the drug screening.

b. Any laboratory used by the program for drug screening and analysis shall comply with federal and state requirements.

c. A program conducting on-site drug screening shall comply with the Clinical Laboratory Improvement Act regulations.

d. The manner in which drug-screening results are utilized shall be documented in the patient record.

155.21(16) *Medical and mental health services.* The program's policies and procedures shall address patient medical and mental health conditions.

a. In addition to assessment of biomedical conditions and complications as described in the ASAM criteria, the program shall take a medical history and perform a physical examination and necessary laboratory tests as follows for patients admitted to the level of care specified:

(1) Medically managed intensive inpatient treatment and medically monitored intensive inpatient treatment: within 24 hours of admission.

(2) Clinically managed high-intensity residential treatment and clinically managed medium-intensity residential treatment: within 7 days of admission.

(3) Clinically managed low-intensity residential treatment: within 21 days of admission.

(4) Crisis stabilization services and opioid treatment program services: within 24 hours of admission.

b. A program may accept a medical history or physical examination from a qualified source if the history or examination was completed no more than 90 days prior to the patient's current admission.

c. In addition to assessment of emotional, behavioral, and cognitive conditions and complications as described in the ASAM criteria, a program may accept a mental health history from a qualified source if the history was completed no more than three days prior to the patient's current admission.

155.21(17) *Emergency services.* The program's policies and procedures shall address the availability of emergency services for substance use disorders and medical and mental health conditions.

a. Emergency services shall be available 24 hours a day, seven days a week.

b. Emergency services may be provided by the program or by any other qualified individual, institution, facility, or other legal entity.

c. The program shall communicate the availability of emergency services by posting notice at facilities, having a recorded message on the program's telephone system, posting notice on the program's website and through program materials.

155.21(18) *Medication control.* The program's policies and procedures shall describe how medications are administered or self-administered in accordance with federal, state and local laws, rules and regulations. Such policies may state that the program does not conduct medication administration or self-administration.

a. Staff authorized to administer medications shall be qualified, and a current list of such staff shall be maintained. The following health professionals are designated by rule 657—8.32(124,155A) as qualified individuals to whom a prescriber can delegate the administration of medications:

(1) Persons who have successfully completed a medication administration course reviewed by the board of pharmacy.

(2) Advanced emergency medical technicians and paramedics.

(3) Licensed physician assistants.

(4) Licensed pharmacists.

(5) Nurses, interns or other qualified individuals delegated the responsibility to administer medications by a prescriber licensed by the appropriate state board to administer medications to patients, in accordance with Iowa Code section 155A.4(2) "c."

b. Medication shall be administered only in accordance with the instructions of the attending prescriber. The type and amount of the medication, the time and date, and the staff person administering the medication shall be documented in the patient record.

c. Self-administration of medication shall be observed by a staff person who has been oriented to the program's policies and procedures on self-administration. Self-administration of medication shall be permitted only when the patient's medication is clearly labeled. The policies and procedures on self-administration shall include:

(1) Medications are ordered or prescribed by a prescriber.

(2) The prescriber agrees that the patient can self-administer the medication.

(3) The medication taken and how and when the medication is taken are documented in the patient record.

d. Prescription medication shall not be administered to or self-administered by a patient without a written order signed by a prescriber. All prescribed medications shall be clearly labeled indicating the patient's full name, the prescriber's name, the prescription number, and the name and strength of the medication, the dosage, the directions for use, and the date of issue; and the name, address and telephone number of the pharmacy or prescriber issuing the medication. Medications shall be packaged and labeled according to state and federal guidelines.

e. If a medication the patient brings to the program is not used, it shall be packaged, sealed and stored. The sealed package of medication shall be returned to the patient, family or designee at the time of discharge.

f. Accountability and control of medications.

(1) There shall be a specific routine for medication administration, indicating dose schedules and standardization of abbreviations.

(2) There shall be specific methods for control and accountability of medication products throughout the program.

(3) The staff person in charge of medications shall provide for monthly inspection of all storage units.

(4) Prescription medication containers having soiled, damaged, illegible, or makeshift labels shall be returned to the issuing pharmacist, pharmacy, or prescriber for relabeling or disposal.

(5) Unused prescription medication prescribed for a patient who leaves a program without the patient's medication shall be destroyed by a staff person with a staff witness, and a notation shall be made in the patient record. When a patient is discharged or leaves the program, medication currently being administered shall be sent, in the original container, with the patient or with a responsible agent, as approved by a prescriber.

g. Medication storage shall be maintained in accordance with the security requirements of federal, state and local laws.

(1) All medication shall be maintained in locked storage. Controlled substances shall be maintained in a locked box within the locked cabinet.

(2) Medications requiring refrigeration shall be kept in a refrigerator and separated from food and other items.

(3) Disinfectants and medication for external use shall be stored separately from internal and injectable medications.

(4) The medication for each patient shall be stored in the original container.

(5) All poisonous or caustic medication shall be plainly labeled, stored separately from other medication in a specific well-illuminated cabinet, closet, or storeroom and made accessible only to authorized staff.

h. Prescription medication provided to a patient shall be dispensed only from a licensed pharmacy in the state of Iowa in accordance with the pharmacy laws in the Iowa Code, or from a licensed pharmacy in another state according to the laws of that state, or by a licensed prescriber.

i. Prescription medication prescribed for one patient shall not be administered to or allowed to be in the possession of another patient.

j. Any unusual patient reaction to a medication shall be documented in the patient record and reported to the prescriber immediately.

k. Dilution or reconstitution and labeling of medication shall be done only by a licensed pharmacist.

155.21(19) *Management of care and discharge planning.* The program's policies and procedures shall use the ASAM criteria for assessment, admission, continued service and discharge decisions and shall describe management-of-care processes.

a. The program shall conduct care coordination to meet each patient's needs and promote effective outcomes.

b. The program shall conduct management-of-care activities at least minimally within the time frames specified for each level of care.

(1) Medically managed intensive inpatient treatment and medically monitored intensive inpatient treatment: daily.

(2) Clinically managed high-intensity residential treatment, clinically managed medium-intensity residential treatment, partial/day treatment, and intensive outpatient treatment: within seven days of the patient's admission.

(3) Clinically managed low-intensity residential treatment and outpatient treatment: within 30 days of the patient's admission.

c. The program shall coordinate patient care with other programs for any licensed program service for which the program is not licensed and with qualified individuals and organizations for any related services the program does not provide, such as crisis stabilization, medical services, mental health services, and social services.

d. At the time of the patient's admission, the program shall initiate discharge planning that includes a determination of the patient's continued need for licensed program services and development of a plan to address ongoing patient needs postdischarge.

155.21(20) *Quality improvement.* The program's policies and procedures shall describe a written quality improvement plan that encompasses all licensed program services and related program operations.

a. The program shall designate a staff person responsible for the quality improvement plan.

b. The quality improvement plan shall describe and document monitoring, problem-solving and evaluation activities designed to systematically identify and resolve problems and make continued improvements.

(1) The quality improvement plan shall include specific goals, objectives, and methods.

(2) The quality improvement plan shall include objective criteria to measure its effectiveness.

c. The program shall document whether the quality of patient care and program operations are improved and identified problems are resolved.

d. The program shall communicate quality improvement plan activities and findings to all staff.

e. Quality improvement plan findings are used to detect trends, patterns of performance, and potential problems that affect patient care and program operations.

f. The program shall evaluate the effectiveness of the quality improvement plan at least annually and revise the plan as necessary.

155.21(21) *Facility safety and cleanliness.* The program's policies and procedures shall ensure that program physical facilities are clean, well-ventilated, heated, free from vermin, and appropriately furnished and are designed, constructed, equipped, and maintained in a manner that provides for the physical safety of patients, concerned persons, visitors and staff.

a. If required by local jurisdiction, the program shall maintain a certification of occupancy.

b. During all phases of construction or alterations of buildings, the level of life safety shall not be diminished in any occupied area. The construction shall be in compliance with all applicable federal, state, and local codes. New construction shall comply with Iowa Code chapter 104A and all applicable federal and local codes and provide for safe and convenient use by disabled individuals.

c. The program shall have specific policies and procedures for each of the following:

(1) Identification, development, implementation, maintenance and review of safety policies and procedures.

(2) Promotion and maintenance of an ongoing, facilitywide hazard surveillance program to detect and report all safety hazards.

(3) Safe and proper disposal of biohazardous waste.

(4) Stairways, halls, and aisles. Stairways, halls, and aisles shall be of substantial, nonslippery material, maintained in a good state of repair, adequately lighted and kept free from obstructions at all times. All stairways shall have handrails.

(5) Radiators, registers, and steam and hot water pipes, each of which shall have protective covering or insulation. Electrical outlets and switches shall have wall plates.

(6) For programs serving juveniles, fuse boxes that shall be under lock and key or six feet above the floor.

(7) Safe and proper handling and storage of hazardous materials.

(8) Prohibition against weapon possession; safe and proper removal of weapons.

(9) Swimming pools. Swimming pools shall conform to state and local health and safety rules and regulations. Adult supervision shall be provided at all times when juveniles are using the pool.

(10) Ponds, lakes, or any bodies of water located on or near the program and accessible to patients, concerned persons, visitors and staff.

(11) The written plan to be followed in the event of fire or tornado. The plan shall be conspicuously displayed at the facility.

155.21(22) *Therapeutic environment.* The program's policies and procedures shall provide for the establishment of an environment that preserves human dignity. Program facilities shall have adequate space for the program to provide licensed program services.

a. The program's policies and procedures shall include a description of how all licensed program services are accessible to people with disabilities or how the program provides accommodations for people with disabilities. All programs shall comply with the Americans with Disabilities Act.

b. The waiting or reception areas shall be of adequate size and be located so as to ensure patient confidentiality.

c. Staff shall be available in waiting or reception areas to address the needs of the patients, potential patients, concerned persons, and visitors.

d. The program's policies and procedures shall include:

(1) Possession and use of chemical substances in the facility.

(2) Prohibition of smoking.

(3) Prohibition of the sale or other provision of any tobacco product.

(4) Informing patients of their legal and human rights at the time of admission.

(5) Patient communication, opinions, or grievances, with a mechanism for redress.

(6) Prohibition of sexual harassment.

(7) Patient right to privacy.

[ARC 1926C, IAB 4/1/15, effective 5/6/15; ARC 4706C, IAB 10/9/19, effective 11/13/19]

641—155.22(125,135) Inpatient and residential program facilities. Specific standards apply for programs providing clinically managed low-intensity residential treatment, clinically managed medium-intensity residential treatment, clinically managed high-intensity residential treatment, medically monitored intensive inpatient treatment, and medically managed intensive inpatient treatment. The program's policies and procedures shall address each standard.

155.22(1) *Health and fire safety inspections.* Inpatient and residential programs shall comply with applicable department of inspections and appeals rules; state fire marshal's rules and fire ordinances; and

applicable local health, fire, occupancy, and safety regulations. The program shall maintain documentation of such compliance.

a. Inpatient and residential programs shall comply with standards for food service sanitation in accordance with rules promulgated by the department of inspections and appeals pursuant to 481—Chapter 32 and Iowa Code chapter 137B.

b. The use of door locks or closed sections shall be documented in written policies and procedures approved by the fire marshal and governing body.

155.22(2) *Emergency preparedness.* Inpatient and residential programs shall have a written emergency preparedness plan for continuation of licensed program services during an emergency or disaster.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.23(125,135) Specific standards for inpatient and residential programs. The program's policies and procedures shall address each standard.

155.23(1) *Hours of operation.* Inpatient and residential programs shall operate seven days per week, 24 hours per day.

155.23(2) *Meals.* Inpatient and residential programs shall provide a minimum of three meals per day to each patient. A program where patients are not present during mealtime shall make provisions to make available the necessary meals. Menus shall be prepared in consultation with a dietitian. If patients are allowed to prepare meals, the program shall document conformity with all commonly accepted policies and procedures of state health rules and regulations and food hygiene.

155.23(3) *Consultation with counsel.* Patients shall have opportunity for and access to consultation with legal counsel at any reasonable time.

155.23(4) *Visitation with family and friends.*

a. Each patient shall have opportunities for continuing contact with family and friends. If such contact is clinically contraindicated, it may be restricted. Any restriction shall be approved by the treatment supervisor and the executive director. Justification for the restriction shall be documented in the patient record. Any restriction shall be reviewed within three calendar days by the treatment supervisor, who may continue or end the restriction. Continuation of a restriction shall be documented in the patient record and shall be reviewed by the treatment supervisor every three calendar days.

b. The program shall establish visiting hours, which shall be conspicuously displayed at the facility and in such a manner to be visible to those entering the facility.

155.23(5) *Telephone use.*

a. Each patient shall have opportunities to conduct private telephone conversations. If such conversations are clinically contraindicated, they may be restricted. Any restriction shall be approved by the treatment supervisor and the executive director. Justification for the restriction shall be documented in the patient record. Any restriction shall be reviewed within three calendar days by the treatment supervisor, who may continue or end the restriction. Continuation of a restriction shall be documented in the patient record and shall be reviewed by the treatment supervisor every three calendar days.

b. The program shall establish telephone hours. Emergency telephone conversations may be received at the time of the call or made when necessary.

155.23(6) *Written communication.*

a. Each patient shall have opportunities to conduct private written communications. If such communications are clinically contraindicated, they may be restricted. Any restriction shall be approved by the treatment supervisor and the executive director. Justification for the restriction shall be documented in the patient record. Any restriction shall be reviewed within three calendar days by the treatment supervisor, who may continue or end the restriction. Continuation of a restriction shall be documented in the patient record and shall be reviewed by the treatment supervisor every three calendar days.

b. The program shall establish access to written communications. The program shall not intercept, read, or censor the U.S. mail.

155.23(7) *Facility.* Inpatient and residential program facilities shall be appropriate for 24-hour occupancy.

a. Patient bedrooms shall include:

- (1) A sturdily constructed bed;
 - (2) A clean mattress protected with a clean mattress pad;
 - (3) A designated space for personal possessions and for hanging clothing in proximity to the sleeping area; and
 - (4) Curtains or window blinds on any windows.
- b. Sleeping areas.*
- (1) Sleeping areas shall include doors for privacy.
 - (2) Sleeping areas shall include partitioning or placement of furniture to provide privacy for all patients.
 - (3) The number of patients in a room shall be appropriate to the goals of the facility and to the ages, developmental levels, and clinical needs of the patients.
 - (4) Patients will be allowed to keep and display personal belongings and add personal touches to the decoration of their rooms in accordance with program policy.
 - (5) Staff shall respect the patient's right to privacy by knocking on the door of the patient's room before entering.
- c. Clean linen, towels and washcloths shall be available minimally on a weekly basis and more often as needed.*
- d. Bathrooms.*
- (1) Bathrooms shall provide the facilities necessary for patients' personal hygiene and personal privacy, including:
 1. A safe supply of hot and cold running potable water;
 2. Clean towels, electric hand dryers or paper towel dispensers, toilet paper and soap;
 3. Natural or mechanical ventilation capable of removing odors;
 4. Tubs or showers that have slip-proof surfaces;
 5. Partitions with doors which provide privacy if a bathroom has multiple toilet stools; and
 6. Toilets, wash basins, and other plumbing or sanitary facilities that shall at all times be maintained in good operating condition.
 - (2) The ratio of bathroom facilities to inpatient and residential patients shall be one tub or shower head per 12 patients, one wash basin per 12 patients and one toilet per 8 patients.
 - (3) If the facility is coeducational, the program shall designate and so identify separate bathrooms for male and female patients.
- e. The written plan to be followed in the event of fire or tornado shall be conspicuously displayed on each floor or in each area that patients, concerned persons, staff or visitors occupy at the facility and shall be explained to all inpatient and residential patients as a part of their orientation to the program. Fire drills shall be conducted at least monthly, and tornado drills shall be conducted monthly from April through October.*
- f. Written reports of annual inspections by state or local fire safety officials or private fire protection companies approved by the department shall be maintained with records of corrective action taken by the program based on recommendations articulated in such reports.*
- g. Every facility shall have an adequate water supply from an approved source. A municipal water system shall meet this requirement. Private water sources shall be tested annually.*
- h. The facility shall allow for the following:*
- (1) Areas in which a patient may be alone when appropriate; and
 - (2) Areas for private conversations with others.
- i. Articles of grooming and personal hygiene that are appropriate to the patient's age, developmental level, and clinical state shall be readily available in a space reserved near the patient's sleeping area. If access to such articles is clinically contraindicated as approved by the treatment supervisor, a patient's personal articles may be kept under lock and key by staff. Staff shall explain to the patient the conditions under which the articles may be used. Justification for this restriction shall be documented in the patient record.*

j. If patients maintain their own living quarters or perform day-to-day housekeeping activities, these responsibilities shall be clearly defined in writing and be a part of the patient orientation program. Staff assistance and equipment shall be provided as needed.

k. Patients shall be allowed to wear their own clothing in accordance with program rules. If clothing is provided by programs, it shall be suited to the climate and appropriate. A laundry room shall be accessible so patients may wash their clothing.

l. The program shall ensure that the use and location of noise-producing equipment and appliances, such as television sets, radios, computers, and CD players, do not interfere with clinical and therapeutic activities.

m. The program shall provide recreation and outdoor activities unless clinically contraindicated.

155.23(8) Religion-culture. Program policies and procedures shall include a written description of any religious orientation, religious practice, or religious restrictions. For juvenile patients, this description shall be provided to the patient, parent(s) or guardian, and placing agency at the time of admission in compliance with HIPAA and DHHS, 42 CFR Part 2, regulations on the confidentiality of alcohol and drug abuse patient records. For adult patients, this information shall be available during orientation. The patient shall have the opportunity to participate in religious activities and services in accordance with the patient's faith or that of a patient's parent(s) or guardian if the patient is a minor. The program shall, when necessary and reasonable, arrange transportation to religious activities.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.24(125,135) Specific standards for inpatient and residential programs licensed to provide services to juveniles. Inpatient and residential programs that provide services to juveniles under the age of 18 shall also comply with the following standards. The program's policies and procedures shall address each standard.

155.24(1) Personal possessions. A program shall allow a patient to bring personal belongings. The program may limit or supervise the use of these items. The program shall ensure that each patient has adequate, clean, well-fitting, attractive, and seasonable clothing as required for health, comfort, and physical well-being. The clothes should be appropriate to the patient's individual needs, age, and sex.

155.24(2) Family involvement. The program shall encourage family involvement.

155.24(3) Money. Money earned or received as a gift or as an allowance by a patient shall be that patient's personal property. The program shall maintain a separate accounting system for patient money and shall address the patient's use of funds.

155.24(4) Discipline. The program's methods for control and discipline of juveniles shall be available to all staff and to the juvenile's family. Staff shall be in control of and responsible for discipline at all times. Discipline shall not include withholding basic necessities such as food, clothing, or sleep.

a. The program shall prohibit staff or patients from utilizing corporal punishment as a method of disciplining or correcting patients. This policy shall be communicated in writing to all staff.

b. The program's written policies on behavior expectations shall be made available to the patient and the patient's parent(s) or guardian, including:

(1) The general expectations of behavior, including the program's rules and practices.

(2) The range of reasonable consequences that may be used to deal with inappropriate behavior.

155.24(5) Number of staff. The program shall have staff coverage seven days per week, 24 hours per day. The number and qualifications of the staff will vary depending on the needs of the patients.

a. The program shall have a 24-hour supervisory consultation on-call system. During prime programming time, there shall be at least a one-to-eight staff-to-patient ratio.

b. Comprehensive residential facilities, as defined in 441—Chapter 115, shall have at least a one-to-five staff-to-patient ratio during prime programming time. A staff person shall be in each living unit at all times when juveniles are in residence, and there shall be a minimum of three nighttime checks between the hours of 12 midnight and 6 a.m. These checks shall be logged. The program's policies and procedures shall address nighttime checks.

c. The program shall define its prime programming time.

155.24(6) Illness, accident, death, or absence from the inpatient or residential program. The program shall notify the patient's parent(s), guardian, and responsible agency of any serious illness, incident

involving serious bodily injury, absence, or removal of the juvenile from the facility, in compliance with HIPAA and DHHS, 42 CFR Part 2, regulations on the confidentiality of alcohol and drug abuse patient records. In the event of the death of a patient, the program shall immediately notify the prescriber, the patient's parent(s) or guardian, the placing agency, and the appropriate state authority.

155.24(7) Educational services. The program's educational program shall meet the requirements of the department of education and shall be available for each patient in accordance with abilities and needs.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.25(125,135) Specific standards for substance use assessment and OWI evaluation-only programs. Programs that provide substance use assessment and OWI evaluation-only services shall also comply with the following standards. The program's policies and procedures shall address each standard.

155.25(1) A program conducting OWI evaluations on persons convicted of operating a motor vehicle while intoxicated (OWI) pursuant to Iowa Code section 321J.2 and on persons whose driver's license or nonresident operating privileges are revoked under Iowa Code chapter 321J shall do so in accordance with 641—Chapter 157.

155.25(2) The program shall make its fees public and shall inform potential patients of the fee at the time the assessment or evaluation is scheduled.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.26 to 155.33 Reserved.

641—155.34(125,135) Specific standards for enhanced treatment services. Substance use disorder and problem gambling treatment programs licensed to provide enhanced treatment services shall also comply with the following standards. The program's policies and procedures shall address each standard.

155.34(1) Personnel. The program shall meet the requirements in subrule 155.21(8). In addition:

a. The program's policies and procedures shall include job descriptions for positions that provide prevention services for substance use disorders and problem gambling, treatment for substance use disorders and problem gambling, services for medical conditions, and services for mental health conditions.

b. The program shall have staff on site who are qualified to provide prevention and early intervention services for substance use disorders and problem gambling, treatment for substance use disorders and problem gambling, services for medical conditions, and services for mental health conditions.

155.34(2) Reserved.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.35(125,135) Specific standards for opioid treatment programs. All programs that use methadone or other medications approved by the Food and Drug Administration under Section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and by the state of Iowa for use in the treatment of opioid addiction shall comply with this rule, HIPAA, and Part II, Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, 42 CFR Part 8, Opioid Drugs in Maintenance and Detoxification Treatment of Opiate Addiction, effective May 18, 2001.

155.35(1) Definitions.

"Accredited opioid treatment program" means an opioid treatment program that is the subject of a current, valid accreditation from an accreditation body approved by the Substance Abuse and Mental Health Services Administration (SAMHSA).

"Certification" means the process by which SAMHSA determines that an opioid treatment program is qualified to provide opioid treatment under the federal opioid treatment standards.

"Certification application" means the application filed by an opioid treatment program for purposes of obtaining certification from SAMHSA.

"Certified opioid treatment program" means an opioid treatment program that is the subject of a current, valid certification.

"Comprehensive maintenance treatment" means maintenance treatment provided in conjunction with a comprehensive range of appropriate medical and rehabilitative services.

“Detoxification treatment” means the dispensing of an opioid agonist treatment medication in decreasing doses to an individual to alleviate adverse physical or psychological effects incident to withdrawal from the continuous or sustained use of an opioid drug and as a method of bringing the individual to a drug-free state within such a period.

“Interim maintenance treatment” means detoxification treatment for a period of more than 30 days but not in excess of 180 days.

“Maintenance treatment” means the dispensing of an opioid agonist treatment medication at stable dosage levels for a period in excess of 21 days in the treatment of an individual for opioid addiction.

“Medical and rehabilitative services” means services such as medical evaluations, counseling, and rehabilitative and other social programs (e.g., vocational and educational guidance, employment placement) that are intended to help patients in opioid treatment programs become or remain productive members of society.

“Medical director” means a physician who is licensed to practice medicine in accordance with Iowa Code chapter 148, 150, or 150A and who assumes responsibility for administering all medical services performed by the program, either by performing them directly or by delegating specific responsibility to authorized program physicians and health care professionals functioning under the medical director’s direct supervision.

“Medication unit” means a facility established as part of, but geographically separate from, an opioid treatment program from which licensed private practitioners or community pharmacists dispense or administer opioid agonist treatment medications or collect samples for drug testing or analysis.

“Opiate addiction” means a cluster of cognitive, behavioral, and physiological symptoms in which the individual continues use of opiates despite significant opiate-induced problems. Opiate dependence is characterized by an individual’s repeated self-administration of opiates that usually results in opiate tolerance, withdrawal symptoms, and compulsive drug-taking. Dependency may occur with or without the physiological symptoms of tolerance and withdrawal.

“Opioid agonist treatment medication” means any opioid agonist drug that is approved by the Food and Drug Administration under Section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) for use in the treatment of opiate addiction.

“Opioid drug” means any drug having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having such addiction-forming or addiction-sustaining liability.

“Opioid treatment” means the dispensing of an opioid agonist treatment medication, along with providing a comprehensive range of medical and rehabilitative services, when clinically necessary, to an individual to alleviate the adverse medical, psychological, or physical effects incident to opiate addiction. This term encompasses detoxification treatment, short-term detoxification treatment, long-term detoxification treatment, maintenance treatment, comprehensive maintenance treatment, and interim maintenance treatment.

“Opioid treatment program” or *“OTP”* means a program or practitioner engaged in opioid treatment or interim maintenance treatment.

“Patient” means any individual who undergoes treatment in an opioid treatment program.

“Program sponsor” means the person responsible for the operation of the opioid treatment program and who assumes responsibility for all its employees, including any practitioners, agents, or other persons providing medical, rehabilitative, or counseling services at the program or any of its medication units. The program sponsor need not be a licensed physician but shall employ a licensed physician for the position of medical director.

“Short-term detoxification treatment” means detoxification treatment for a period not in excess of 30 days.

“State authority” means the Iowa department of public health, division of behavioral health, which regulates the treatment of opiate addiction with opioid drugs.

“Treatment plan” means a plan which outlines for each patient attainable short-term treatment goals that are mutually acceptable to the patient and the opioid treatment program and which specifies the services to be provided and the frequency and schedule for their provision.

155.35(2) Required approvals. All opioid treatment programs shall be licensed or approved by the committee and shall maintain all other approvals required by the Drug Enforcement Administration, Substance Abuse and Mental Health Services Administration and the Iowa board of pharmacy in order to provide services.

155.35(3) Central registry system. To prevent simultaneous enrollment of a patient in more than one program, all opioid treatment programs shall participate in a central registry as established by the division.

Prior to admission of an applicant to an opioid treatment program, the program shall submit to the registry the applicant's name, birth date, and date of intended admission, and any other information required for the clearance procedure. No person shall be admitted to a program who is found by the registry to be participating in another such program. All opioid treatment programs shall report all admissions, discharges, and transfers to the registry immediately. All information reported to the registry from the programs and all information reported to the programs from the registry shall be treated as confidential in accordance with HIPAA and DHHS regulations on the confidentiality of alcohol and drug abuse patient records, 42 CFR Part 2.

a. Definitions. For purposes of this subrule:

"Central registry" means the system through which the Iowa department of public health, division of behavioral health, obtains patient identifying information about individuals applying for maintenance or detoxification treatment for the purpose of preventing an individual's concurrent enrollment in more than one such program.

"Opioid treatment program" means a detoxification or maintenance treatment program which is required to report patient identifying information to the central registry and which is located in the state.

b. Restrictions on disclosure. A program may disclose patient identifying information to a central registry for the purpose of preventing the multiple enrollment of a patient only if:

- (1) The disclosure is made when:
 1. The patient is admitted for treatment; or
 2. The treatment is interrupted, resumed or terminated.
- (2) The disclosure is limited to:
 1. Patient identifying information; and
 2. Relevant dates of admission.

The program shall inform the patient of the required disclosure prior to admission.

c. Use of information limited to prevention of multiple enrollments. Any information disclosed to the central registry to prevent multiple enrollments shall not be redisclosed by the registry nor shall such information be used for any other purpose than the prevention of multiple enrollments unless so authorized by court order in accordance with HIPAA and 42 CFR Part 2.

d. Permitted disclosure by the central registry to prevent a multiple enrollment. If a program petitions the central registry and an identified patient is enrolled in another program, the registry may disclose:

- (1) The name, address, and telephone number of the program in which the patient is currently enrolled to the inquiring program; and
- (2) The name, address, and telephone number of the inquiring program to the program in which the patient is currently enrolled. The programs may communicate as necessary to verify that no error has been made and to prevent or eliminate any multiple enrollment.

155.35(4) Admission requirements.

a. Prior to or at the time of a patient's admission to an opioid treatment program, the program shall conduct a comprehensive assessment so as to determine appropriateness for admission.

b. The program shall verify, to the extent possible, the patient's name, address, and date of birth.

c. The program physician shall determine and document in the patient's record that the patient is physiologically dependent on narcotic substances and has been physiologically dependent for at least one year prior to the patient's admission. A one-year history of addiction means that the patient was physiologically dependent on a narcotic at a time one year before the patient's admission to a program and was addicted for most of the year preceding admission.

(1) When physiological addiction cannot be clearly documented, the program physician or an appropriately trained staff member designated and supervised by the physician shall record in the patient's

record the criteria used to determine the patient's current physiologic dependence and history of addiction. In the latter circumstance, the program physician shall review, date, and countersign the supervised staff member's evaluation to demonstrate the physician's agreement with the evaluation. The program physician shall make the final determination concerning a patient's physiologic dependence and history of addiction. The program physician shall also sign, date, and record a statement that the physician has reviewed all the documented evidence to support a one-year history of addiction and current physiologic dependence by the patient and that in the physician's reasonable clinical judgment the patient fulfills the requirements for admission to maintenance treatment. Before the program administers any medication to the patient, the program physician shall complete and record the statement documenting the patient's addiction and current physiologic dependence.

(2) When a patient has voluntarily left an opioid treatment program in good standing and seeks readmission within two years of discharge, the program shall document the following information about the patient:

1. Prior opioid treatment of six months or more; and
2. That in the physician's medical judgment, treatment of the patient is warranted. Such documentation shall be entered in the patient's record by the program physician.

d. The program shall collect a drug screening sample for analysis. Where dependence is substantially verified through other indicators, a negative drug screen will not necessarily preclude admission to the program.

e. Prior to a patient's admission, the program shall confirm with the central registry that the patient is not currently enrolled in another opioid treatment program.

f. If a potential patient has previously been enrolled in another program, the admitting program shall request from the previous program a copy of the patient's assessment data, treatment plan, and discharge summary including the type of or reason for discharge. All programs subject to these rules shall promptly respond to such a request upon receipt of a valid release of information.

g. A person under the age of 18 is required to have had two documented attempts at short-term detoxification or drug-free treatment to be eligible for maintenance treatment. A one-week waiting period is required after such a detoxification attempt, however, before an attempt is repeated. The program physician shall document in the patient's record that the patient continues to be, or is again, physiologically dependent on narcotic drugs.

h. Program staff shall ensure that a patient is voluntarily participating in the program, and the patient shall sign a Consent to Treatment Form.

i. Pregnant patients may be admitted to opioid treatment in accordance with the following provisions:

- (1) Evidence of current physiological dependency is not needed if the program physician certifies the pregnancy and, in the physician's reasonable judgment, finds treatment to be justified. Documentation of all findings and justifications for admission shall be documented in the patient's record by the program physician prior to the administration of the initial dose of medication.

- (2) Pregnant patients shall be offered comprehensive prenatal care. If the program cannot provide prenatal services, the program shall assist the patient in obtaining such services and shall coordinate ongoing care with the collateral provider.

- (3) The program physician shall document that the patient has been informed of the possible risks to the unborn child from the use of medication and the risks of continued use of illicit substances.

- (4) Should a program have a waiting list for admission to the program, pregnant patients shall be given priority.

155.35(5) Placement, admission and assessment. The program shall have written criteria for considering an individual for placement and admission. In addition, the program shall maintain current procedures to ensure that patients are admitted to maintenance treatment by qualified staff who have determined by using accepted medical criteria, such as those outlined in the Diagnostic and Statistical Manual for Mental Disorders, that the person is currently addicted to an opioid drug.

a. The program physician or a designee who is a qualified medical professional shall complete a medical evaluation and a current psychological/mental status evaluation of the patient prior to the

administration of the initial dose of medication. If the history and current psychological/mental status evaluation is completed by an individual other than the program physician, the program shall document in the patient's case record that this information was reviewed by the program physician prior to administration of the initial dose of medication.

b. The medical evaluation of the patient shall include, but not be limited to:

- (1) A complete medical history;
- (2) An assessment of the patient's current psychological and mental status;
- (3) A physical examination, including examination for:
 1. Pulmonary, liver, or cardiac abnormalities;
 2. Infectious disease; and
 3. Dermatologic sequela of addiction;
- (4) Laboratory tests, including:
 1. Serological test for syphilis; and
 2. Urine screening for drugs;
- (5) An intradermal PPD (tuberculosis skin test) and review of tetanus immunization status; and
- (6) When indicated, an EKG, chest X-ray, pap smear, pregnancy test, sickle cell screening, complete blood count and white cell differential, multiphasic chemistry profile, routine and microscopic urinalysis, or other tests indicated by the patient's condition.

155.35(6) *Treatment plans.* Based upon the initial assessment, an individualized written treatment plan shall be developed and recorded in the patient's case record.

a. A treatment plan shall be developed and shall delineate the patient's immediate needs and the actions required to meet these needs.

b. The treatment plan shall be developed as soon after the patient's admission as is clinically feasible, but no later than 30 days following the patient's admission to an outpatient opioid maintenance treatment program.

c. Treatment plans shall be developed in partnership with the patient. Comprehensive treatment plans shall be reviewed by the primary counselor and the patient as often as necessary, but no less than every 90 days during the first year and semiannually each subsequent year for opioid treatment modalities. Treatment plans shall be reviewed by the program physician on an annual basis.

155.35(7) *Rehabilitative services.* The program shall have policies and procedures on the minimum attendance for rehabilitative services relative to the patient's progress and length of involvement in treatment. The minimum frequency of rehabilitative services shall occur at the same frequency as that of on-site dosing for patients receiving more than two take-home dosages a week in the first year. The minimum frequency for rehabilitative services for patients receiving two or fewer take-home dosages shall be weekly. The program shall provide rehabilitative services that are appropriate for the patient based on needs identified during the assessment process. A patient who does not comply with the program's rehabilitative service requirements shall be placed on a period of probation as defined by the program or shall be required to immediately increase the frequency of clinic attendance for medication and rehabilitative services. If, during a period of probation, the patient continues to be in noncompliance with rehabilitation services, the program shall continue to increase the attendance requirement until daily attendance is obtained or until the patient complies with rehabilitative services. This requirement shall not preclude the program's ability to determine that discharge of a patient is warranted for therapeutic reasons or program needs.

155.35(8) *Medication administration.*

a. The program physician shall determine the patient's initial and subsequent dose of medication and on-site dosing schedule and shall assume responsibility for the amount of the narcotic drug administered or dispensed and shall record, date, and sign in each patient's case record each change in the dosage schedule. The physician shall directly communicate orders to the pharmacy or registered or licensed personnel supervising medication administration. The program physician may communicate such orders verbally; however, orders shall be reduced to writing and countersigned within 72 hours by the program physician.

b. The initial dose of medication shall not exceed 30 milligrams, and the total dose for the first day shall not exceed 40 milligrams, unless the program physician documents in the patient's case record that 40

milligrams did not suppress opiate abstinence symptoms. A patient transferring into the program or on a guest-dosing status may receive an initial dosage of no more than the last daily dosage authorized by the former or primary program.

(1) Medication shall be administered by a professional authorized by law.

(2) No medication shall be administered until the patient has completed admission procedures unless the patient enters the program on a weekend and the central registry cannot be contacted. If, in the clinical judgment of the program physician, a patient is experiencing an emergency situation, the admission procedures may be completed on the following workday.

c. Administration.

(1) Take-home medication shall be labeled in accordance with state and federal law and have childproof caps.

(2) A medication administration log shall be kept in the dosing area and in the patient's case record. The amount of medication administered and the signature of the staff member authorized to administer the medication shall also be included in the patient's case record. No dose shall be administered until the patient has been positively identified and the dosage amount has been compared with the currently ordered and documented dosage level.

(3) Ingestion shall be observed and verified by the staff person authorized to administer the medication.

(4) The program physician shall record, date, and sign in each patient's case record each change in the dosage schedule. Daily dosages of medications in excess of 100 milligrams shall be dispensed only with the approval of the program physician and shall be documented and justified in the patient's case record.

155.35(9) *Take-home or unsupervised medication use.*

a. Take-home medication may be given to patients who demonstrate a need for a more flexible schedule in order to enhance and continue rehabilitative progress. For patients receiving take-home medication, the program shall document the following requirements:

(1) Absence of recent abuse of drugs (narcotic or nonnarcotic), including alcohol;

(2) Regular attendance at the clinic;

(3) Attendance at a licensed or approved treatment program for rehabilitative services (e.g., programs are considered approved when licensed or approved in accordance with Iowa Code chapter 125);

(4) Absence of recent criminal activity;

(5) Stable home environment and social relationships;

(6) Active employment or participation in school or similar responsible activities related to employment, education or vocation; and

(7) Assurance that medication can be safely transported and stored by the patient for the patient's own use.

b. Prior to granting take-home privileges, the program physician shall document in the patient's case record that all the above criteria have been considered and that, in the physician's professional judgment, the risk of diversion or abuse is outweighed by the rehabilitative benefits to be derived.

c. If the patient meets the above criteria, the patient may receive take-home medication according to the following guidelines:

(1) During the first 90 days of treatment, the take-home supply is limited to a single dose each week;

(2) During the second 90 days of treatment, the take-home supply is limited to two doses per week;

(3) During the third 90 days of treatment, the take-home supply is limited to three doses per week;

(4) In the remaining months of the first year, a patient may be given a maximum six-day supply of take-home medication;

(5) After one year of continuous treatment, a patient may be given a maximum two-week supply of take-home medication;

(6) After two years of continuous treatment, a patient may be given a maximum one-month supply of take-home medication; and

(7) Take-home medication shall not be dispensed to patients in interim maintenance treatment or detoxification.

d. If a patient is unable to conform to the applicable mandatory schedule, a revised schedule may be permitted provided that the program receives an exception to these rules from the division and SAMHSA, when applicable. A copy of the written exception shall be placed in the patient's case record. The division will consider exceptions only in unusual circumstances. When a program is applying for less frequent pickups for patients, approval will be based on considerations in addition to distance if another program exists within 25 miles of the patient's residence.

e. Should a patient receiving take-home medication provide a drug screen that is confirmed either positive for substances or negative for the prescribed medication, the program shall ensure that, when test results are used, presumptive laboratory results are distinguished from results that are definitive.

(1) The program physician shall place the patient on three months' probation, as defined by the program, or increase the patient's frequency of clinic dosing after considering the patient's overall progress and length of involvement in the program.

(2) Should the patient provide a drug screen that is positive for substances or negative for medication during a period of probation, the program physician shall increase the patient's frequency of clinic attendance for dosage pickup for at least three months. If after the three-month period the patient meets the eligibility criteria, the patient may return to the previous take-home schedule.

f. Take-home or unsupervised dosages of medication in excess of 100 milligrams may be dispensed by the program physician when the need for those dosages is carefully reviewed and considered and justified in the patient's case record based on the physician's clinical judgment.

155.35(10) Drug testing. Each program shall establish policies and procedures for the collection of drug-screening specimens and utilization of results.

a. The program shall ensure that an initial drug-screening test or analysis is completed for each prospective patient and that at least eight additional random tests or analyses are performed on each patient during the patient's first year in maintenance treatment and that at least quarterly random tests or analyses are performed on each patient in maintenance treatment for each subsequent year. When a sample is collected from each patient for such a test or analysis, it shall be done in a manner that minimizes opportunity for falsification. Each test or analysis shall be analyzed for opiates, methadone, amphetamines, cocaine, and barbiturates. In addition, if any other drug or drugs have been determined by a program to be abused in that program's locality, or as otherwise indicated, each test or analysis must be analyzed for any of those drugs as well. Any laboratory that performs the testing required under this rule shall be in compliance with all applicable federal proficiency testing and licensing standards and all applicable state standards.

b. The program shall ensure that test results are not used as the sole criterion to force a patient out of treatment but are used as a guide to change treatment approaches. The program shall also ensure that when test results are used, presumptive laboratory results are distinguished from results that are definitive.

155.35(11) Diversion prevention plan.

a. The program shall develop a diversion identification and prevention plan that:

(1) Outlines the methods by which the program shall detect possible diversion of take-home medication; and

(2) Describes the actions to be taken when diversion is identified or suspected.

b. The program shall establish and implement proactive procedures to reduce the likelihood or possibility of diversion.

155.35(12) Interim maintenance treatment.

a. An approved program may offer interim maintenance treatment when, due to capacity, the program cannot place the patient in a program offering comprehensive services within 14 days of the patient's application for admission.

b. An approved program may provide interim maintenance treatment only if the program also provides comprehensive maintenance treatment to which interim maintenance treatment patients may be transferred.

c. Interim maintenance treatment program approval.

(1) Before a public or nonprofit private narcotic treatment program may provide interim maintenance treatment:

1. The program must receive approval of both the U.S. Food and Drug Administration and the division of behavioral health; and

2. The program director must certify that the program seeking such authorization is unable to place patients in a public or private nonprofit program within a reasonable geographic area within 14 days of the patient's application for admission and that interim maintenance treatment will not reduce the capacity of the program's comprehensive maintenance treatment.

(2) Patients admitted to interim maintenance treatment shall be transferred to comprehensive maintenance treatment within 120 days of admission.

d. Minimum standards for interim maintenance treatment. The program may admit a patient who is eligible for comprehensive maintenance treatment to interim maintenance treatment if the patient cannot be placed in a public or private nonprofit comprehensive program within a reasonable geographic area and within 14 days of application for services. An initial drug screen and at least two other drug screens shall be taken from the patient during the maximum admission period of 120 days. A program shall establish and follow reasonable criteria for determining the transfer of patients to comprehensive maintenance treatment. These transfer criteria shall be in writing and available for inspection and shall include at a minimum a preference for the transfer of pregnant patients. Interim maintenance shall be conducted in accordance with all applicable federal regulations and state rules. The program shall notify the division when a patient begins interim treatment, when a patient leaves interim treatment, and when a patient transfers to comprehensive maintenance treatment. Such notifications shall be documented by the program in the patient's case record. All requirements for comprehensive maintenance treatment apply to interim maintenance treatment, with the following exceptions:

- (1) The medication is required to be administered daily under observation;
- (2) Take-home medication is not allowed;
- (3) Initial and comprehensive treatment plans are not required;
- (4) A primary counselor is not required to be assigned to the patient; and
- (5) Interim maintenance treatment cannot be provided for longer than 120 days in any 12-month period.

155.35(13) Accreditation. All opioid treatment programs shall obtain and retain accreditation by a recognized national accreditation organization. The national accreditation bodies currently recognized as meeting committee criteria are:

- a. The Joint Commission.
- b. The Council on Accreditation of Rehabilitation Facilities (CARF).
- c. The Council on Accreditation of Children and Family Services (COA).
- d. The American Osteopathic Association (AOA).

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

TUBERCULOSIS (TB) SCREENING: HEALTH CARE WORKERS AND RESIDENTS

641—155.36(125,135) Purpose. The purpose of these rules is to outline procedures for conducting tuberculosis (TB) screening for health care workers and residents at substance use disorder and problem gambling treatment program facilities. Facilities will need to conduct a risk assessment to determine the risk classification of the facility and to identify appropriate screening criteria. The screening criteria are consistent with those of the U.S. Centers for Disease Control and Prevention (CDC), TB Elimination Division, as outlined in the MMWR December 30, 2005/Vol. 54/No. RR-17, "Guidelines for Preventing the Transmission of *Mycobacterium tuberculosis* in Health-Care Settings, 2005."

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.37(125,135) Definitions. For the purpose of these rules, the following definitions shall apply:

"*Bacille Calmette-Guerin (BCG) vaccination*" means a vaccine for TB. BCG is used in many countries with a high prevalence of TB to prevent childhood tuberculosis meningitis and military disease. BCG is not generally recommended for use in the United States because of the low risk of infection with *Mycobacterium tuberculosis*, the variable effectiveness of the vaccine against adult pulmonary TB, and the vaccine's potential interference with tuberculin skin test reactivity.

“*Baseline TB screening*” means the screening of staff and residents for latent tuberculosis infection (LTBI) and TB disease at the beginning of employment or upon admission to a facility. Baseline TB screening includes a symptom screen for all staff and residents and tuberculin skin tests (TSTs) or interferon-gamma release assay (IGRA) for *Mycobacterium tuberculosis* for those staff and residents with previous negative test results for *M. tuberculosis* infection.

“*Baseline TST*” or “*baseline IGRA*” means the TST or IGRA, respectively, that is administered at the beginning of employment to newly hired staff or upon admission to residents of facilities.

“*Boosting*” means a phenomenon in which a person has a negative TST (i.e., false-negative) result years after infection with *M. tuberculosis* and then a positive subsequent TST result. The positive TST result is caused by a boosted immune response of previous sensitivity rather than by a new infection (false-positive TST conversion). Two-step testing reduces the likelihood of mistaking a boosted reaction for a new infection.

“*Extrapulmonary TB*” means TB disease in any part of the body other than the lungs (e.g., kidney, spine, or lymph nodes).

“*Interferon-gamma release assay*” or “*IGRA*” means a whole-blood test that can aid in diagnosing *Mycobacterium tuberculosis* infection.

“*Laryngeal TB*” means a form of TB disease that involves the larynx and may be highly infectious.

“*Latent TB infection*” or “*LTBI*” means infection with *M. tuberculosis* without symptoms or signs of disease having manifested.

“*Mantoux method*” means a skin test performed by intradermally injecting 0.1 mL of purified protein derivative (PPD) tuberculin solution into the volar or dorsal surface of the forearm.

“*Pulmonary TB*” means TB disease that occurs in the lung parenchyma, usually producing a cough that lasts three weeks or longer. Pulmonary TB is usually infectious.

“*Purified protein derivative (PPD) tuberculin*” means a material used in diagnostic tests for detecting infection with *M. tuberculosis*.

“*Risk classification*” means the category on which the infection control team, or designated other, determines the setting’s TB risk classification is based, as a result of the TB risk assessment.

“*Serial screening*” refers to TB screening performed at regular intervals following baseline TB screening. Serial TB screening, also called annual or ongoing TB testing, consists of two components: (1) assessing for current symptoms of active TB disease, and (2) testing for the presence of infection with *M. tuberculosis* by administering either a TST or single IGRA.

“*Symptom screen*” means a procedure used during a clinical evaluation in which patients are asked if they have experienced any departure from normal in function, appearance, or sensation related to TB disease (e.g., cough).

“*TB patient*” means a person who had undiagnosed infectious pulmonary or laryngeal TB while in the facility during the preceding year. “TB patient” does not include persons with LTBI (treated or untreated), extrapulmonary TB disease, pulmonary, or laryngeal TB who have met criteria for noninfectiousness.

“*TB risk assessment*” means an initial and ongoing evaluation of the risk for transmission of *M. tuberculosis* in a particular health care setting.

“*TB screening*” means an administrative control measure in which evaluation for LTBI and TB disease is performed through baseline and serial screening of staff and residents of facilities.

“*TB screening plan*” means a plan that facilities develop and implement that comprises four major components: (1) baseline testing for *M. tuberculosis* infection, (2) serial testing for *M. tuberculosis* infection, (3) serial screening for signs or symptoms of TB disease, and (4) TB training and education.

“*Treatment for LTBI*” means treatment that prevents the progression of *M. tuberculosis* infection into TB disease.

“*Tuberculin skin test*” or “*TST*” means a diagnostic aid for finding *M. tuberculosis* infection. The Mantoux method is the recommended method to be used for the TST.

“*Tuberculosis*” or “*TB*” means the namesake member organism of *M. tuberculosis* complex and the most common causative infectious agent of TB disease in humans. In certain instances, the species name refers to the entire *M. tuberculosis* complex, which includes *M. bovis* and *M. african*, *M. microti*, *M. canettii*, *M. caprae*, and *M. pinnipedii*.

“*Tuberculosis disease*” or “*TB disease*” means a condition caused by infection with a member of the *M. tuberculosis* complex that has progressed to causing clinical (manifesting symptoms or signs) or subclinical (early stage of disease in which signs or symptoms are not present, but other indications of disease activity are present) illness.

“*Two-step tuberculin skin test*” or “*two-step TST*” means the procedure used for the baseline skin testing of persons who will receive serial TSTs to reduce the likelihood of mistaking a boosted reaction for a new infection.

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

641—155.38(125,135) Tuberculosis screening of staff and residents.

155.38(1) *TB risk assessment.* Annually, each facility shall conduct a TB risk assessment to evaluate the risk for transmission of *M. tuberculosis*, regardless of whether a person with suspected or confirmed TB disease is expected to be encountered in the facility. The TB risk assessment shall be utilized to determine the types of administrative, environmental, and respiratory protection controls needed and serves as an ongoing evaluation tool of the quality of TB infection control and for the identification of needed improvements in infection control measures. The risk assessment shall include:

- a. The community rate of TB,
- b. The number of persons with infectious TB encountered in the facility, and
- c. The speed with which persons with infectious TB are suspected, isolated, and evaluated to determine if persons with infectious TB exposed staff or others in the facility. TB cases include persons who had undiagnosed infectious pulmonary or laryngeal TB while in the facility during the preceding year. This does not include persons with LTBI (treated or untreated), persons with extrapulmonary TB disease, or persons with pulmonary or laryngeal TB who have met criteria for noninfectiousness.

155.38(2) *Facility risk classification.* The infection control team or designated staff in a facility is responsible for determining the type of risk classification of the facility. The facility risk classification is used to determine the frequency of TB screening. The facility risk classification may change due to an increase or decrease in the number of TB cases during the preceding year.

a. *Types of risk classifications.*

(1) “Low risk” means that a facility is one in which persons with active TB disease are not expected to be encountered and in which exposure to TB is unlikely.

(2) “Medium risk” means that a facility is one in which health care workers will or might be exposed to persons with active TB disease or to clinical specimens that might contain *M. tuberculosis*.

(3) “Potential ongoing transmission” means that a facility is one in which there is evidence of person-to-person transmission of *M. tuberculosis*. This classification is a temporary classification. If it is determined that this classification applies to a facility, the facility shall consult with the department’s TB control program.

b. *Classification criteria—low risk.*

(1) Inpatient settings with 200 or more beds: If a facility has fewer than six TB patients for the preceding year, the facility shall be classified as low risk.

(2) Inpatient settings with fewer than 200 beds: If a facility has fewer than three TB patients for the preceding year, the facility shall be classified as low risk.

(3) Outpatient, outreach, and home-based health care settings: If a facility has fewer than three TB patients for the preceding year, the facility shall be classified as low risk.

c. *Classification criteria—medium risk.*

(1) Inpatient settings with 200 or more beds: If a facility has six or more TB patients for the preceding year, the facility shall be classified as medium risk.

(2) Inpatient settings with fewer than 200 beds: If a facility has three or more TB patients for the preceding year, the facility shall be classified as medium risk.

(3) Outpatient, outreach, and home-based health care settings: If a facility has three or more TB patients for the preceding year, the facility shall be classified as medium risk.

d. *Classification criteria—potential ongoing transmission.* If evidence of ongoing *M. tuberculosis* transmission exists at a facility, the facility shall be classified as potential ongoing transmission, regardless of the facility’s previous classification.

155.38(3) *Baseline TB screening procedures for facilities.*

a. All facility staff members shall receive baseline TB screening upon hire. Baseline TB screening consists of two components: (1) assessing for current symptoms of active TB disease and (2) using a two-step TST or a single IGRA to test for infection with *M. tuberculosis*.

b. A staff member may begin working with patients after a negative TB symptom screen (i.e., no symptoms of active TB disease) and a negative TST (i.e., first step) or a negative IGRA. The second TST may be performed after the staff member starts working with patients.

c. A staff member with a new positive test result for *M. tuberculosis* infection (i.e., TST or IGRA) shall receive one chest radiograph result to exclude TB disease. Repeat radiographs are not needed unless symptoms or signs of TB disease develop or unless recommended by a clinician. Treatment for LTBI should be considered in accordance with CDC guidelines.

d. A staff member with documentation of past positive test results (i.e., TST or IGRA) and documentation of the results of a chest radiograph indicating no active disease, dated after the date of the positive TST or IGRA test result, does not need another chest radiograph at the time of hire.

e. TB, TST or IGRA tests for *M. tuberculosis* infection do not need to be performed for staff with a documented history of TB disease, documented previously positive test result for *M. tuberculosis* infection, or documented completion of treatment for LTBI or TB disease. Documentation of a previously positive test result for *M. tuberculosis* infection can be substituted for a baseline test result if the documentation includes a recorded TST result in millimeters or IGRA result, including the concentration of cytokine measured (e.g., interferon-gamma (IFN-g)). All other staff should undergo baseline testing for *M. tuberculosis* infection to ensure that the test result on record in the setting has been performed and measured using the recommended diagnostic procedures.

f. A second TST is not needed if the staff member has a documented TST result from any time during the previous 12 months. If a newly employed staff member has had a documented negative TST result within the previous 12 months, a single TST can be administered in the new setting. This additional TST represents the second stage of two-step testing. The second test decreases the possibility that boosting on later testing will lead to incorrect suspicion of transmission of *M. tuberculosis* in the setting.

g. Previous BCG vaccination is not a contraindication to having an IGRA, a TST or two-step skin testing administered. Health care workers with previous BCG vaccination should receive baseline and serial testing in the same manner as those without BCG vaccination. Evaluation of TST reactions in persons vaccinated with BCG should be interpreted using the same criteria for those not BCG-vaccinated. A health care worker's history of BCG vaccination should be disregarded when administering and interpreting TST results. Previous BCG vaccination does not cause a false-positive IGRA test result.

155.38(4) *Serial TB screening procedures for facilities.*

a. *Facilities classified as low risk.* After baseline testing of staff for infection with *M. tuberculosis*, additional TB screening of staff is not necessary unless an exposure to *M. tuberculosis* occurs.

b. *Facilities classified as medium risk.*

(1) After undergoing baseline testing for infection with *M. tuberculosis*, staff should receive TB screening annually (i.e., symptom screen for all staff members and testing for infection with *M. tuberculosis* for staff members with baseline negative test results).

(2) Staff members with a baseline positive or new positive test result for *M. tuberculosis* infection or documentation of previous treatment for LTBI or TB disease shall receive one chest radiograph result to exclude TB disease. Instead of participating in serial testing, staff should receive a symptom screen annually. This screen should be accomplished by educating the staff about symptoms of TB disease and instructing the staff members to report any such symptoms immediately to the occupational health unit. Treatment for LTBI should be considered in accordance with CDC guidelines.

c. *Facilities classified as potential ongoing transmission.* Testing for infection with *M. tuberculosis* may need to be performed every eight to ten weeks until lapses in infection control have been corrected and no additional evidence of ongoing transmission is apparent. The potential ongoing transmission classification should be used only as a temporary classification. This classification warrants immediate investigation and corrective steps. After a determination that ongoing transmission has ceased, the setting shall be reclassified as medium risk for a minimum of one year.

155.38(5) *Screening of staff who transfer to other facilities.*

a. Staff transferring from a low-risk facility to another low-risk facility. After a baseline result for infection with *M. tuberculosis* is established and documented, serial testing for *M. tuberculosis* infection is not necessary for staff transferring from a low-risk facility to another low-risk facility.

b. Staff transferring from a low-risk facility to a medium-risk facility. After a baseline result for infection with *M. tuberculosis* is established and documented, annual TB screening, including a symptom screen and TST or IGRA for persons with previously negative test results, should be performed for staff transferring from a low-risk facility to a medium-risk facility.

155.38(6) *Baseline TB screening procedures for residents of residential, inpatient, and halfway house facilities.*

a. TB screening is a formal procedure to evaluate residents for LTBI and TB disease. Baseline TB screening consists of two components: (1) assessing for current symptoms of active TB disease and (2) using a two-step TST or a single IGRA to test for infection with *M. tuberculosis*.

b. All residents shall be assessed for current symptoms of active TB disease upon admission. Within 72 hours of a resident's admission, baseline TB testing for infection shall be initiated unless baseline TB testing occurred within three months prior to the resident's admission.

c. Residents with a new positive test result for *M. tuberculosis* infection (i.e., TST or IGRA) shall receive one chest radiograph result to exclude TB disease. Repeat radiographs are not needed unless symptoms or signs of TB disease develop or unless recommended by a clinician.

d. Residents with documentation of past positive test results (i.e., TST or IGRA) and documentation of the results of a chest radiograph indicating no active disease, dated after the date of the positive TST or IGRA test result, do not need another chest radiograph at the time of admission.

e. TB, TST or IGRA tests for *M. tuberculosis* infection do not need to be performed for residents with a documented history of TB disease, a documented previously positive test result for *M. tuberculosis* infection, or documented completion of treatment for LTBI or TB disease. Documentation of a previously positive test result for *M. tuberculosis* infection can be substituted for a baseline test result if the documentation includes a recorded TST result in millimeters or IGRA result, including the concentration of cytokine measured (e.g., IFN- γ). All other residents should undergo baseline testing for *M. tuberculosis* infection to ensure that the test result on record in the setting has been performed and measured using the recommended diagnostic procedures.

f. A second TST is not needed if the resident has a documented TST result from any time during the previous 12 months. If a new resident has had a documented negative TST result within the previous 12 months, a single TST can be administered in the new setting. This additional TST represents the second stage of two-step testing. The second test decreases the possibility that boosting on later testing will lead to incorrect suspicion of transmission of *M. tuberculosis* in the setting.

g. After baseline TB screening is accomplished, serial TB screening of the residents is not recommended.

155.38(7) *Serial TB screening procedures for residents of residential, inpatient, and halfway house facilities.*

a. If a resident is discharged and readmitted to a facility and less than 12 months have passed since the last TB screening, residents should receive a symptom screen upon readmittance. This screen should be accomplished by educating the resident about symptoms of TB disease and instructing the resident to report any such symptoms immediately to the infection control team or designated other staff. If symptoms or signs of TB disease are documented, then a medical evaluation to include a chest X-ray to rule out TB disease is required.

b. If a resident is discharged and readmitted to a facility and more than 12 months have passed since the last TB screening, baseline TB screening should be repeated as outlined in subrule 155.38(6).

[ARC 1926C, IAB 4/1/15, effective 5/6/15]

These rules are intended to implement Iowa Code sections 125.13, 125.21 and 135.150.

¹ Effective date of Ch 3 delayed by the Administrative Rules Review Committee 70 days from 8/2/78. Delay suspended by the Administrative Rules Review Committee at their meeting held on 9/11/78.

² Effective date of 643—3.35(125) delayed 70 days by the Administrative Rules Review Committee at its meeting held April 11, 1994; on June 15, 1994, the Committee voted to delay the rule until adjournment of the 1995 General Assembly.

CHAPTER 156 CONSUMABLE HEMP PRODUCTS

[Prior to 6/14/23, see Inspections and Appeals Department[481] Ch 32]

641—156.1(204) Definitions. For the purpose of these rules, the following terms have the meanings indicated in this chapter. The definitions set out in Iowa Code section 204.2 are incorporated verbatim herein.

“Accredited laboratory” means a laboratory accredited in accordance with the International Organization for Standardization/International Electrotechnical Commission (ISO/IEC) Standard 17025:2017 (July 17, 2024) by an International Laboratory Accreditation Cooperation (ILAC)-recognized accreditation body for the analyses performed on consumable hemp products.

“Adulterated” means the same as in 21 U.S.C. Section 342(a)(4) (as amended to July 17, 2024), except that a consumable hemp product is not deemed “adulterated” pursuant to this chapter solely because it contains a hemp product not generally recognized as safe (GRAS) by the federal Food and Drug Administration.

“Approved hemp source” means a manufacturer of a consumable hemp product that is engaged in the wholesale or retail sale of the product and that is:

1. Located in this state and manufactures the consumable hemp product in compliance with Iowa Code chapter 204 and these rules; or
2. Located in a state that has a state hemp plan approved by the United States Department of Agriculture under 7 U.S.C. Chapter 38, Subchapter VII (as amended to July 17, 2024).

“Batch” means a specific quantity of a consumable hemp product that contains a lot number; is uniform and intended to meet specifications for identity, strength, purity, and composition; and is manufactured, packaged, and labeled during a specified time period according to a single manufacturing, packaging, and labeling record.

“Cannabidiol” or *“CBD”* means the specific chemical compound with the Chemical Abstracts Service number 13956-29-1.

“Certificate of analysis” or *“COA”* means an official document released by an accredited laboratory following an analysis of a consumable hemp product. The certificate of analysis contains all of the concentrations of cannabinoids, pesticides, residual solvents, metals, harmful pathogens, toxicants, and synthetic or semisynthetic cannabinoids, including data on levels of total delta-9 tetrahydrocannabinol content concentration and whether a sample passed or failed any limits related to these analyses.

“Certificate of free sale” means a government certification that products such as food, drugs, medicine, or cosmetics are approved for unrestricted sale in the jurisdiction in which they originate.

“Consumable hemp establishment” means an individual or entity engaged in manufacturing, processing, packing, holding, preparing, distributing, or selling a consumable hemp product in Iowa or to purchasers located in Iowa. A consumable hemp establishment does not include an individual or entity manufacturing, processing, packing, holding, preparing, distributing, or selling a consumable hemp product containing only hemp seed or hemp seed-derived food ingredients GRAS under the conditions of use by the federal Food and Drug Administration.

“Consumable hemp manufacturer” means a consumable hemp establishment engaged in manufacturing, processing, packing, holding, preparing, distributing, or selling a consumable hemp product on a wholesale basis. A consumable hemp manufacturer includes individuals and entities outside of Iowa that distribute consumable hemp products in Iowa. A consumable hemp manufacturer does not include individuals or entities exclusively engaged in the harvesting, storage, or distribution of raw hemp.

“Consumable hemp retailer” means a consumable hemp establishment selling consumable hemp product to consumers on a retail basis. A consumable hemp retailer includes an establishment selling consumable hemp products online.

“Container” means the object that holds one or more servings of a consumable hemp product.

“Delta-9 tetrahydrocannabinol” or *“THC”* means the specific chemical compound with the Chemical Abstracts Service number 1972-08-3.

“Expiration date” means the month and year as determined by the manufacturer, packer, or distributor on the basis of tests showing that the product, until that date, under the conditions of handling, storage,

preparation, and use per label directions, will, when consumed, contain not less than the quantity of each ingredient as set forth on its label.

“Food” means the same as defined in Iowa Code section 137F.1. Food includes human dietary supplements and alcoholic beverages.

“Harvesting” applies to farms and farm mixed-type facilities and means activities that are traditionally performed on farms for the purpose of removing raw agricultural commodities from the place they were grown or raised and preparing them for use as food. Harvesting is limited to activities performed on raw agricultural commodities, or on processed foods created by drying/dehydrating a raw agricultural commodity without additional manufacturing/processing, on a farm. Harvesting does not include activities that transform a raw agricultural commodity into a processed food as defined in Section 201(gg) of the federal Food, Drug, and Cosmetic Act (as amended to July 17, 2024).

“Jurisdiction of origin” means the federal, state, or local regulatory jurisdiction that has the authority to conduct inspections of the facility in which a consumable hemp product was most recently subject to a manufacturing/processing activity.

“Lot number” means a specific quantity of raw hemp or processed hemp product that is uniform and intended to meet specifications for identity, strength, purity, and composition that contains the manufacturer’s, processor’s, or distributor’s number and a sequence to allow for inventory, traceability, and identification of the plant batches used in the production of consumable hemp products.

“Manufacturing/processing” means making food from one or more ingredients or synthesizing, preparing, treating, modifying or manipulating food, including food crops or ingredients. For farms and farm mixed-type facilities, manufacturing/processing does not include activities that are part of harvesting, packing, or holding.

“Misbranded” means a food that violates 21 U.S.C. Section 343 (as amended to July 17, 2024).

“QR code” means a quick response machine-readable code that can be read by a camera, consisting of an array of black and white squares used for storing information or directing or leading a user to product information regarding manufacturer data and accredited laboratory certificates of analysis.

“Raw agricultural commodity” means any food in its raw or natural state, including all fruits that are washed, colored, or otherwise treated in their unpeeled natural form prior to marketing.

“Raw hemp” means an unprocessed hemp plant, or any part of the hemp plant, in its raw or natural state. Raw hemp is a raw agricultural commodity.

“Serving” means the size or portion customarily consumed per eating occasion, expressed in a common household measure as established in table 2 of 21 CFR 101.12 (as amended to July 17, 2024). If a solid consumable hemp product is packaged in a manner that includes more than a single serving, each serving must be clearly identified and severable from the other servings in the container. If a liquid consumable hemp product is packaged in a manner that includes more than a single serving, the number of servings must be conspicuously labeled. Liquid consumable hemp products shall be packaged in a container that holds a minimum of 12 fluid ounces.

“Synthetic consumable hemp products” means products containing synthetic or semisynthetic cannabinoids. Synthetic and semisynthetic cannabinoids refer to a class of cannabinoids that are created through a chemical process and are structurally similar to naturally occurring cannabinoids or cannabinoids that may occur in very small amounts naturally. Examples of synthetic consumable hemp products include but may not be limited to delta-8 tetrahydrocannabinol, delta-10 tetrahydrocannabinol, hexahydrocannabinol (HHC), tetrahydrocannabiphorol (THC-P), and tetrahydrocannabinol-O-acetate (THC-O).

“Tetrahydrocannabinolic acid” or *“THCA”* means the specific chemical compound with the Chemical Abstracts Service number 23978-85-0.

“Total delta-9 tetrahydrocannabinol” or *“total THC”* means 87.7 percent of the amount of tetrahydrocannabinolic acid plus the amount of delta-9 tetrahydrocannabinol.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.2(204) Registration and posting. A consumable hemp establishment shall not engage in manufacturing, processing, packing, holding, preparing, distributing, or selling a consumable hemp product

in Iowa or to purchasers located in Iowa until it has submitted a consumable hemp registration that is approved by the department.

156.2(1) *Consumable hemp manufactures/distributors.* At least 30 days prior to manufacturing, processing, packing, holding, preparing, distributing, or selling any consumable hemp product in Iowa or to purchasers located in Iowa, a consumable hemp manufacturer shall:

- a. Complete the online registration form prescribed by the department;
- b. Remit the registration fee set by the department in accordance with Iowa Code section 204.7; and
- c. Submit a complete list of all consumable hemp products the consumable hemp manufacturer intends to manufacture, process, pack, hold, prepare, distribute, or sell, along with documentation of the jurisdiction of origin for each consumable hemp product.

156.2(2) *Consumable hemp retailers.* At least 30 days prior to selling any consumable hemp product in Iowa or to purchasers located in Iowa, a consumable hemp retailer shall register with the department by doing the following:

- a. Complete the online registration form prescribed by the department;
- b. Remit the registration fee set by the department in accordance with Iowa Code section 204.7; and
- c. Submit a complete list of all consumable hemp products the consumable hemp retailer intends to sell, along with documentation of the jurisdiction of origin for each consumable hemp product.

156.2(3) *Combined consumable hemp manufacturers and retailers.* A consumable hemp establishment engaged in activities of a consumable hemp manufacturer and a consumable hemp retailer shall register separately for each activity. A registered consumable hemp manufacturer that exclusively sells consumable hemp products it has manufactured to consumers on a retail basis is not mandated to register as a consumable hemp retailer.

156.2(4) *Physical location.* A consumable hemp establishment's registration is valid for one physical location. A consumable hemp establishment that manufactures, processes, packs, holds, prepares, distributes, or sells a consumable hemp product at more than one physical location shall separately register each physical location.

156.2(5) *Expiration and renewal.* A consumable hemp registration, unless sooner suspended or revoked, expires one year after the registration is approved by the department. A consumable hemp registration may be renewed annually through the department's online registration system, accompanied by the registration fee, at least 30 days prior to expiration. Consumable hemp registrations that are expired more than 60 days will be revoked without notice.

156.2(6) *Transferability.* A consumable hemp registration is not transferable to a new owner or new physical location.

156.2(7) *Posting of registrations.* A valid registration shall be posted on the premises of the consumable hemp establishment in a location that is visible to the public. An image of the valid registration must also be posted on any website or online point of sale in a location that is visible to the public prior to payment.

156.2(8) *Returned payments.* The department will attempt to redeem a payment submitted for a consumable hemp registration that is not honored by the bank on which it is drafted. The department will notify the applicant of the need to provide sufficient payment. An additional fee of \$25 shall be assessed for each dishonored payment. If the department does not receive payment, the establishment will be operating without a valid registration and is subject to penalties set forth in rule 641—156.7(204).

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.3(204) Testing requirements and documentation.

156.3(1) *Approved hemp source; certificate of analysis.* A consumable hemp product cannot be distributed or sold unless:

a. The consumable hemp product is from an approved hemp source and is accompanied by documentation that identifies the jurisdiction of origin. Documentation that identifies the jurisdiction of origin includes:

- (1) Certificate of free sale issued by the jurisdiction of origin;
- (2) Product label statements, provided the product label identifies the jurisdiction of origin; or
- (3) Other documentation that identifies the jurisdiction of origin and also identifies the following:

1. Brand name;
 2. Product name;
 3. Serving and container size in terms of net quantity of contents; and
 4. Lot number for the batch.
- b. The consumable hemp product has a certificate of analysis issued within the last year by an independent accredited laboratory that verifies and states:
- (1) The consumable hemp product is from a batch that has been tested by the independent accredited laboratory consistent with generally accepted industry standards for herbal and botanical substances;
 - (2) The presence and concentration of cannabinoids, including delta-9 tetrahydrocannabinol, tetrahydrocannabinolic acid, cannabidiol, and any other cannabinoids for which the product is being marketed;
 - (3) The consumable hemp product is from a batch that contained a total delta-9 tetrahydrocannabinol concentration that did not exceed 0.3 percent on a dry weight basis as calculated pursuant to an official postdecarboxylation analysis, as provided in Iowa Code section 204.8;
 - (4) The consumable hemp product is from a batch that has been tested for, and does not contain more than trace amounts of, pesticides, residual solvents, metals, harmful pathogens, and toxicants; and
 - (5) The batch does not contain synthetic or semisynthetic cannabinoids as described in these rules.
- 156.3(2) *Toxicant limits.*** If a testing sample is found to contain greater than trace amounts of any pesticide, residual solvent, metal, harmful pathogen, or toxicants, the product is considered adulterated and cannot enter commerce.
- 156.3(3) *Examination of records.*** All documentation mandated by this rule shall be maintained by the consumable hemp establishment and provided to the department or other regulatory authority immediately upon request.
- 156.3(4) *Independent accredited laboratory.*** A consumable hemp establishment cannot utilize an accredited laboratory in which it has an ownership interest unless the consumable hemp establishment holds less than a 10 percent ownership interest in the accredited laboratory if the accredited laboratory is a publicly traded company. All testing of consumable hemp products under this rule must be conducted by an independent accredited testing laboratory.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.4(204) Packaging and labeling.

156.4(1) *Contents.* Each consumable hemp product intended for individual retail sale is labeled such that a reasonable consumer would plainly identify the product as a consumable hemp product and contains the following information:

- a. Lot number for the batch;
- b. Expiration date;
- c. Brand name;
- d. Product name;
- e. List of ingredients;
- f. Name, telephone number, and email address of the product manufacturer. If the registered manufacturer uses a contracted third-party or white-label manufacturer, the name of that entity must also be included on the container or label and is not proprietary or confidential under Iowa Code section 22.7;
- g. If specific cannabinoids are contained within or marketed for the product, the number of milligrams of each cannabinoid per serving and serving size;
- h. A certificate of analysis that the batch contained a total THC concentration that did not exceed 0.3 percent on a dry weight basis as calculated pursuant to an official test as provided in Iowa Code section 204.8;
- i. A declaration of the net quantity of contents indicating the number of servings and total THC per serving and per container in compliance with Iowa Code section 204.2; and
- j. A warning label containing the following or substantially similar language, in addition to any other warning language necessitated by the specific product. This warning label may be divided into multiple sections on a label, provided that all the information is included in a prominent and conspicuous manner as compared to other words, statements, or designs on the container label:

- (1) A statement that the product has not been evaluated or approved by the United States Food and Drug Administration (unless such approval has been secured);
- (2) The potential for the product to cause the consumer to fail a drug test for THC;
- (3) A statement that products containing THC may cause impairment and impact a consumer's ability to operate a vehicle;
- (4) A statement that the product is not recommended for use by pregnant or breastfeeding women;
- (5) A statement that product use may result in health risks and medication interactions; and
- (6) A statement in capital letters to KEEP THIS PRODUCT OUT OF REACH OF CHILDREN.

The labeling must not contain any claim that the product may be used or is effective for the prevention, treatment, or cure of a disease or that it may be used to alter the structure or function of human or animal bodies unless the claim has been approved by the federal Food and Drug Administration.

156.4(2) Form. The labeling mandated in paragraphs 156.4(1) "f" and "h" may be in the form of:

- a. A uniform resource locator (URL) for the manufacturer's Internet website that provides or links to the information mandated by this rule; or
- b. A QR code or other bar code that may be scanned and that leads to the information required on the label.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.5(204) Applicability of other laws and regulations.

156.5(1) A consumable hemp establishment shall comply with all relevant Iowa laws and regulations applicable to the manufacturing, processing, storage, distribution, and sale of food, including but not limited to Iowa Code chapter 137F, Iowa Code chapter 137D, and regulations promulgated under those chapters.

156.5(2) An individual or entity subject to Iowa Code chapter 123 shall not introduce any consumable hemp product into the alcoholic beverage product for which the individual or entity is subject to Iowa Code chapter 123 unless the consumable hemp product is GRAS by the federal Food and Drug Administration and is thus not deemed adulterated.

156.5(3) An individual or entity subject to Iowa Code chapter 189A shall not introduce any consumable hemp product into the meat or poultry product for which the individual or entity is subject to Iowa Code chapter 189A unless the consumable hemp product is GRAS by the federal Food and Drug Administration and is thus not deemed adulterated. A consumable hemp retailer may introduce any consumable hemp product into meat or poultry sold to consumers on a retail basis in intrastate commerce.

156.5(4) An individual or entity subject to Iowa Code chapters 190 through 192 shall not introduce any consumable hemp product into the dairy product for which the individual or entity is subject to Iowa Code chapters 190 through 192 unless the consumable hemp product is GRAS by the federal Food and Drug Administration and is thus not deemed adulterated. A consumable hemp retailer may introduce any consumable hemp products into dairy products sold to consumers on a retail basis in intrastate commerce.

156.5(5) Consumable hemp products in interstate commerce are subject to federal law. Compliance with Iowa Code chapter 204 and this chapter does not represent compliance with federal law.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.6(204) Prohibitions.

156.6(1) A consumable hemp establishment cannot manufacture, process, pack, hold, prepare, distribute, or sell consumable hemp products:

- a. On the premises of a private residence, except a portion of a private residence that is distinctly separate from any living space, that is dedicated to the production or sale of food, and that meets all applicable state and local regulations;
- b. On the premises of a temporary location, including but not limited to a food stand, roadside stand, temporary booth, or any other temporary structure;
- c. Door to door;
- d. Through vending machines; or
- e. At private parties.

156.6(2) A consumable hemp product may be sold at a stand at a farmers market, provided:

- a. The farmers market is listed on the Iowa department of agriculture and land stewardship's farmers market directory;
- b. The individual selling the consumable hemp product maintains a valid consumable hemp retailer registration at any location where consumable hemp is stored;
- c. The consumable hemp establishment registration is posted in plain sight at the farmers market stand; and
- d. All consumable hemp products sold are listed and maintained up to date with the department.

156.6(3) A consumable hemp product label and any associated marketing materials shall not contain any claim that the product may be used or is effective for the prevention, treatment, or cure of a disease or that it may be used to alter the structure or function of human or animal bodies unless the claim has been approved by the federal Food and Drug Administration.

156.6(4) A consumable hemp retailer cannot manufacture, process, package, repack, relabel, mix, blend, or otherwise manipulate a consumable hemp product. This subrule does not apply to a food service establishment that utilizes a consumable hemp product from an approved hemp source as a food ingredient intended for immediate consumption by the consumer, provided that the food service establishment discloses all label information mandated by rule 641—156.4(204) to the consumer through the menu, menu board, placard, table tent, or other effective means.

156.6(5) A consumable hemp product that does not conform to this chapter is considered adulterated or misbranded and cannot enter commerce.

156.6(6) A consumable hemp retailer or manufacturer shall not sell or distribute consumable hemp products to person under 21 years of age, subject to verification. Proof of age may be established by a valid driver's license, identification card issued by Iowa or another state, or other form of government-issued identification and must include the photograph and date of birth of the person.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.7(204) Violations and enforcement.

156.7(1) Any consumable hemp product introduced into commerce by an individual or entity without a consumable hemp registration approved by the department in accordance with rule 641—156.2(204) is subject to immediate embargo.

156.7(2) A consumable hemp product that is adulterated or misbranded when introduced into commerce is subject to immediate embargo.

156.7(3) A consumable hemp product that the department reasonably believes may be injurious to public health or that has entered commerce and is not in conformance with this chapter is subject to immediate embargo.

156.7(4) The embargo of a consumable hemp product is effective until such a time as the violation is remedied or the product is disposed of in a reasonable manner as determined by the department. If the violation cannot be remedied and disposal is necessary, the cost of disposal is the responsibility of the consumable hemp establishment. Disposal shall be observed by a person approved by the department. The embargo of a consumable hemp product may be appealed in accordance with rule 641—156.8(204).

156.7(5) A consumable hemp manufacturer will conduct a recall of a consumable hemp product lot that has been tested and found to be adulterated. The cost of a recall or disposal of the product is the responsibility of the consumable hemp manufacturer.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.8(204) Denial, suspension, or revocation of registration. The department may deny, suspend, or revoke a registration in any case where the department finds there has been repeated failure on the part of the consumable hemp establishment to comply with the provisions of this chapter, or for any of the following reasons:

156.8(1) Failure to register. An individual or entity that introduces a consumable hemp product into commerce without a consumable hemp registration approved by the department in accordance with rule 641—156.2(204) may be denied a consumable hemp registration for a period of up to 30 days for a first violation, up to one year for a second violation, and up to five years for a third or any subsequent violation.

156.8(2) Nonconforming consumable hemp product. A registered consumable hemp establishment that introduces a consumable hemp product into commerce that is not in conformance with Iowa Code chapter 204 or this chapter is subject to the immediate revocation of its registration.

156.8(3) Qualifying criminal offense.

a. The conviction of any individual with an ownership interest in a consumable hemp establishment constituting a felony, serious misdemeanor, or aggravated misdemeanor and resulting from an activity constituting a criminal offense in the consumable hemp establishment may result in the denial, suspension, or revocation of the registration.

b. A conviction for committing a criminal offense involving a controlled substance as described in Iowa Code section 204.7 may result in the denial, suspension, or revocation of the registration.

c. A certified copy of the final order or judgment of conviction or plea of guilty shall be conclusive evidence of the conviction of the registration holder.

d. A deferred judgment, until discharged, is considered a conviction for purposes of this rule.

156.8(4) False or misleading information. Providing false or misleading information to the department under this chapter, including by submitting a false registration, may result in the denial, suspension, or revocation of the registration.

156.8(5) Failure to comply. Failing to comply with an order issued by the department under this chapter may result in the denial, suspension, or revocation of the registration.

156.8(6) Successive violations. A third violation of any provision of this chapter in a five-year period will result in the denial, suspension, or revocation of the registration. The department will disapprove any registration of the consumable hemp establishment for a five-year period following the date of the last violation.

156.8(7) Materially false information supplied. An individual or entity that materially falsifies any information contained in a consumable hemp registration is ineligible for registration.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.9(204) Inspection and access to records. The department may enter a consumable hemp establishment at any reasonable hour to assess compliance with Iowa Code chapter 204 and these rules. The manager or person in charge of the consumable hemp establishment will afford free access to every part of the premises, including access to records related to consumable hemp products, and render all aid and assistance necessary to enable the regulatory authority to make a thorough and complete assessment.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.10(204) Public examination of records.

156.10(1) *Public information.* Generally, information collected by the department and contractors is considered public information. Records are stored in computer files and are not matched with any other data system. Information is available for public review and will be provided when requested from the department.

156.10(2) *Confidential information.*

a. The following are examples of confidential records:

(1) Trade secrets and proprietary information including items such as formulations, processes, policies and procedures, and customer lists;

(2) Health information related to foodborne illness complaints and outbreaks;

(3) The name or any identifying information of a person who files a complaint with the department; and

(4) Other state or federal agencies' records.

b. A party claiming that information submitted to the department contains trade secrets or proprietary information should clearly mark those portions of the submission as confidential/trade secret.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

641—156.11(204) Appeals. All decisions of the department may be contested by an adversely affected party in accordance with 441—Chapter 7.

[ARC 8178C, IAB 8/7/24, effective 7/17/24]

These rules are intended to implement Iowa Code section 124.506 and Iowa Code chapter 204 as amended by 2024 Iowa Acts, House File 2605.

CHAPTER 157
STANDARDS FOR SUBSTANCE ABUSE TREATMENT AND
ASSESSMENT PROGRAMS AND THE OPERATING A MOTOR VEHICLE
WHILE INTOXICATED (OWI) LAW

[Prior to 3/29/06, see 643—Ch 8]

641—157.1(125) Definitions. Unless otherwise indicated, the following definitions shall apply to the specific terms used in these rules:

“Assessment” means the ongoing process of identifying a diagnosis, ruling out other diagnoses, and determining the level of care needed by the client.

“Course for drinking drivers” means an approved course designed to inform the offender about drinking and driving and to encourage the offender to assess the offender’s own drinking and driving behavior in order to select practical alternatives. Enrollment in the course is not limited to persons ordered to enroll, attend, and successfully complete the course required under Iowa Code sections 321J.1 and 321J.17. However, any person under the age of 18 who is required to attend the course for violation of Iowa Code section 321J.2 or 321J.17 must attend a course offered by a substance abuse treatment program licensed under Iowa Code chapter 125. Any instructional course for drinking drivers shall be approved by the department of education in consultation with the community colleges and substance abuse treatment programs licensed under Iowa Code chapter 125 and using the course of instruction detailed in 281—21.31(321J).

“Department” means the Iowa department of public health.

“Evaluation” means the process to evaluate the client’s strengths, weaknesses, problems, and needs for the purpose of defining a course of treatment. This includes use of a standardized placement screening and any additional patient/client profile information, and recommendation to an appropriate level of care.

“HIPAA” means the Health Insurance Portability and Accountability Act of 1996.

“Licensed” means issuance of a license by the department and the state board of health, which validates the licensee’s compliance with substance abuse program standards and authorizes the licensee to operate a substance abuse program in the state of Iowa.

“Posttreatment” means continuing care after primary treatment has been completed.

“Primary treatment” means substance abuse treatment modality including inpatient, primary residential treatment, extended residential treatment, medically monitored residential, extended outpatient, intensive outpatient, and partial hospitalization.

“Program” means any individual, partnership, corporation, association, governmental subdivision or public or private organization.

“Qualifying program” means a program which has a contract with the state of Iowa or the state’s contracted managed care entity to provide substance abuse treatment using a sliding fee scale.

“Satisfactory completion of the drinking drivers course” means receiving at the completion of the course a grade from the course instructor of “C” or “2.0,” or better.

“Screening” means the process by which a client/patient is determined at risk and in need of further evaluation. The focus is on the minimum criteria necessary for appropriateness/eligibility.

“Substance abuser” means a person who lacks self-control as to the use of chemical substances or uses chemical substances to the extent that the person’s health is substantially impaired or endangered or that the person’s social or economic function is substantially disrupted.

“Treatment” means the broad range of planned and continuing, inpatient, outpatient, residential care services, including diagnostic evaluation, counseling, medical, psychiatric, psychological, and social service care, which may be extended to substance abusers, concerned persons, concerned family members, or significant others, and which is geared toward influencing the behavior of such individuals to achieve a state of rehabilitation.

641—157.2(125) Screening, evaluation, treatment, and drinking drivers course. Persons who are charged with operating a motor vehicle while intoxicated (OWI), Iowa Code section 321J.2, and whose driver’s license or nonresident operating privileges are revoked under Iowa Code chapter 321J shall be

assigned to undergo a substance abuse evaluation and, if recommended, treatment from a provider licensed by the department under Iowa Code chapter 125.

157.2(1) *Screening.* The initial screening shall consist of a generally accepted standardized substance abuse screening instrument. The program shall utilize a recognized diagnostic test or tool to determine “substance abuse” or “dependence” as those terms are defined in the DSM IV (Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition). In addition, programs shall collect information on blood alcohol content at time of arrest; history of other alcohol or drug-related arrests; history of alcohol/drug treatment; history of mental health problems and treatment; any OWI arrest that included personal injury or additional charge(s); and family history of substance abuse.

157.2(2) *Evaluation.* If the initial screening shows a potential for chemical dependency, then a further evaluation will be completed. This evaluation shall consist of further development of the six assessment dimensions outlined in the American Society of Addiction Medicine, Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition-Revised.

157.2(3) *Treatment.* Treatment shall consist of a broad range of planned and continuing, inpatient, outpatient, and residential care services, including ongoing diagnostic evaluation, counseling, and medical, psychiatric, psychological, and social service care geared toward influencing the behavior of such individuals to achieve a state of rehabilitation. Individuals will be placed in the appropriate level of care at a substance abuse treatment program licensed by the department under Iowa Code chapter 125 in accordance with the American Society of Addiction Medicine, Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition-Revised.

157.2(4) *Drinking drivers course.* Substance abuse treatment programs licensed by the department under Iowa Code chapter 125 may provide the drinking drivers course if the course curriculum is approved by the department of education under Iowa Code section 321J.22 and 281—21.31(321J).

641—157.3(125) Screening, evaluation, treatment, and drinking drivers course completion. The program shall report substance abuse screening, assessment, evaluation and treatment completion to the department of transportation and to the district court in accordance with Iowa Code sections 125.37, 125.84 and 125.86; the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law. The program shall report satisfactory completion of the drinking drivers course to the department of education in accordance with Iowa Code section 321J.22 and 281—21.31(321J); the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law.

157.3(1) *Reporting form.* Programs shall report screening, evaluation, and treatment completion utilizing the form “Notice Iowa Code 321J—Confidential Medical Record.” Iowa substance abuse evaluation and treatment providers licensed by the department under Iowa Code chapter 125 shall submit this form online to the department of transportation using the department of transportation’s 321J Web site, <https://www.saeval.dot.state.ia.us>.

157.3(2) *Primary treatment.* Upon completion of primary treatment, programs shall report to the department of transportation and the courts that treatment has been completed in accordance with Iowa Code section 321J.22; the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law.

157.3(3) *Posttreatment results.* If the court orders a posttreatment program, the program shall report progress and attendance to the person’s probation officer or otherwise as ordered by the court in accordance with Iowa Code section 321J.22; the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law.

157.3(4) *Drinking drivers course.* Substance abuse treatment programs licensed by the department under Iowa Code chapter 125 may provide the drinking drivers course and shall report satisfactory completion of the drinking drivers course to the department of education in accordance with Iowa Code section 321J.22 and 281—21.31(321J).

641—157.4(125) Cost of evaluation and treatment.

157.4(1) *Screening and evaluation.* The program shall charge no more than \$125 for the cost of screening and evaluation. The individual or the individual's insurance provider shall be responsible for the costs of the screening and evaluation.

157.4(2) *Treatment.* Qualifying programs shall consider a person admitted to the program pursuant to Iowa Code section 321J.3 who does not possess sufficient income or estate to make payment of the costs of the treatment in whole or in part to be a state patient and eligible for state-funded treatment as provided in Iowa Code section 125.44. Qualifying programs shall utilize a sliding fee schedule approved by the department to determine cost of treatment. There is no prohibition on any individual from paying in whole the cost of treatment.

157.4(3) *Reimbursement.* Programs shall be able to seek reimbursement of the cost of screening, evaluation and treatment from an individual's insurance company, firm or corporation bound to pay, or from Medicaid for an individual who is eligible or enrolled in Medicaid.

641—157.5(125) Timeliness. The program shall conduct and complete substance abuse evaluations and treatment at the program's earliest convenience.

641—157.6(125) Confidentiality. Programs will abide by the federal regulations, "Confidentiality of Alcohol and Drug Abuse Patient Records," 42 CFR, Part 2; Iowa Code section 125.37; HIPAA; and other relevant provisions of federal and state law.

641—157.7(125) Records.

157.7(1) Programs shall maintain records for a minimum of seven years after discharge or completion of screening, evaluation, or treatment, and then destroy or maintain the records based on the program's written policy and procedure.

157.7(2) Upon receipt of a properly executed written release of information signed by the client/patient, the program shall release client/patient records in a timely manner.

a. A program shall not refuse to transfer or release client/patient records related to continuation of care solely because payment has not been received.

b. A program may refuse to release client/patient records which are unrelated to continuation of care if payment has not been received.

c. A program may refuse to file the reporting form required by subrule 157.3(1), "Notice Iowa Code 321J—Confidential Medical Record," reporting screening, evaluation, and treatment completion, if payment has not been received for such services.

[ARC 8796B, IAB 6/2/10, effective 7/7/10]

641—157.8(125) Reciprocity. For a resident of a state other than Iowa or an Iowa resident obtaining evaluation or treatment outside the state, screening, evaluation or treatment services shall be provided by programs licensed or approved by that state's substance abuse authority. Programs shall submit the results of the screening, evaluation and treatment to the Iowa department of public health, division of behavioral health and professional licensure, for review and reporting purposes to the Iowa department of transportation.

These rules are intended to implement Iowa Code section 125.13.

CHAPTER 158
REGIONS FOR SUBSTANCE ABUSE PREVENTION AND TREATMENT

[Prior to 3/29/06, see 643—Ch 9]

641—158.1(125) Service areas established. The department of public health has established regions for substance abuse prevention and treatment service areas. Substance abuse assessment, prevention and education, and outpatient and follow-up treatment and rehabilitation shall be available in each service area. Emergency treatment provided by a facility affiliated with or part of the medical service of a general hospital, inpatient treatment, residential treatment, and halfway house treatment shall be available within reasonable driving distance of the service area.

641—158.2(125) Request for a change in service areas. Any existing service provider may file an application with the director to change an existing service area.

641—158.3(125) Application. The application shall include the following:

1. The name, address, and description of the applicant;
2. A description of the proposed change;
3. The applicant's rationale in support of the change in service area;
4. The number of clients the applicant proposes to serve and the proposed increase in quality or quantity of services to these clients;
5. A description of community support for the change; and
6. The names and addresses of all affected parties, including existing service providers.

641—158.4(125) Notification of affected parties. Within ten calendar days of receipt of a completed application, the director shall provide written notification to any affected parties identified in the application and shall allow any affected parties so notified 30 calendar days to submit written information in support of, or in opposition to, the application.

641—158.5(125) Public hearing. The director may hold a public hearing at which the applicant and any affected parties may provide an oral presentation with respect to their positions. The director shall give notice to the applicant and all affected parties ten calendar days prior to holding the hearing. The hearing shall not be a contested case hearing as that term is defined in Iowa Code chapter 17A.

641—158.6(125) Proposed decision. The director shall issue a written proposed decision which includes findings of fact and either approves or rejects the application. In issuing this decision, the director shall consider the proposed application, other information received from the applicant, information received from affected parties, the terms of any relevant contract, city and county lines, population concentrations, and existing substance abuse treatment and prevention services.

641—158.7(125) Change during term of contract. The director shall not approve an application which would change a service area during the term of an existing contract or after the release of a request for proposal for a new contract. Applications submitted after issuance of a request for proposal will, if granted, not become effective until after the expiration of the contract awarded pursuant to said request for proposal.

641—158.8(125) State board of health review. The director's proposed decision shall be reviewed by the board at its next regularly scheduled meeting. The board shall review all of the materials considered by the director, as described in rule 158.6(125), and the proposed decision and vote to approve or reject the director's proposed decision.

641—158.9(125) State board of health decision. The board's decision shall be issued in writing and shall be final agency action for the purposes of Iowa Code chapter 17A.

These rules are intended to implement Iowa Code section 125.12.

CHAPTER 176
CRITERIA FOR AWARDS OR GRANTS
Rescinded **ARC 8125C**, IAB 7/10/24, effective 8/14/24

CHAPTER 177
HEALTH DATA

641—177.1(76GA,ch1212) Definitions. For purposes of this chapter, the following definitions shall apply:

“Confidential record” means a record that is not available as a matter of right for examination and copying by members of the public under applicable provisions of law. Confidential records include records or information contained in records that the agency is prohibited by law from making available for examination by members of the public, and records or information contained in records that are specified as confidential by Iowa Code section 22.7, or other provision of law, but that may be disclosed upon order of a court, the lawful custodian of the record, or by another person duly authorized to release the record. Mere inclusion in a record of information declared confidential by an applicable provision of law does not necessarily make that entire record a confidential record. Included in the definition are those data collected by the department, pursuant to 1996 Iowa Acts, chapter 1212, for preparation and dissemination as compilations.

“Record” means the whole or a part of a “public record” as defined in Iowa Code section 22.1 that is owned by or in the physical possession of this agency.

[ARC 8044C, IAB 5/29/24, effective 7/3/24]

641—177.2(76GA,ch1212) Description of data to be submitted.

177.2(1) The department shall collect information from other state agencies for the purpose of public dissemination of health data.

177.2(2) Hospitals shall submit data to the contractor selected through the request for proposal process, which shall serve as an intermediary for the department. The information shall include inpatient, outpatient and ambulatory information.

177.2(3) The contractor selected through the request for proposal process shall collect, maintain, and disseminate hospital inpatient, outpatient, and ambulatory information pursuant to a memorandum of understanding with the department. The contractor selected through the request for proposal process shall submit data to the department pursuant to the memorandum of understanding.

[ARC 8044C, IAB 5/29/24, effective 7/3/24]

641—177.3(76GA,ch1212) Fees. Fees charged for data provided by the department shall not exceed administrative costs. Such charges may include copying, postage, supervisory, computer programming, time, and medium fees. The department will work to provide requestors with an estimate of the charges to be assessed for copies and labor prior to producing copies of records.

[ARC 8044C, IAB 5/29/24, effective 7/3/24]

641—177.4(76GA,ch1212) Patient confidentiality. The department shall protect patient confidentiality. Confidential records or parts of such records collected as a part of this process shall be kept confidential. All health data shall be collected, maintained, and disseminated only in accordance with Iowa and federal law.

[ARC 8044C, IAB 5/29/24, effective 7/3/24]

These rules are intended to implement 1996 Iowa Acts, chapter 1212, section 5, and Iowa Code section 135.166.

CHAPTER 192
CHILD SUPPORT NONCOMPLIANCE

641—192.1(252J) Definitions. For the purpose of this chapter, the following definitions shall apply:

“*Applicant*” means an individual who is seeking the issuance of a license.

“*Certificate of noncompliance*” means a document provided by the child support recovery unit of the department of human services certifying that the named applicant or licensee has defaulted on an obligation owed to or collected by the child support recovery unit.

“*Department*” means the department of public health.

“*License*” means a license, certification, registration, permit, approval, renewal, or other similar authorization issued to a person by a licensing authority which evidences the granting of authority to engage in a profession, occupation, or business.

“*Licensing authority*” means a board, commission, or any other entity of the department which has authority within this state to suspend or revoke a license or deny the renewal or issuance of a license authorizing a person to engage in a business, occupation, or profession.

[ARC 8798B, IAB 6/2/10, effective 7/7/10]

641—192.2(252J) Issuance or renewal of a license—denial. The licensing authority shall deny the issuance or renewal of a license upon the receipt of a certificate of noncompliance from the child support recovery unit of the department of human services according to the procedures in Iowa Code chapter 252J. In addition to the procedures set forth in Iowa Code chapter 252J, the following shall apply.

192.2(1) The notice required by Iowa Code section 252J.8 shall be served upon the applicant or licensee by restricted certified mail, return receipt requested, or personal service in accordance with Iowa Rule of Civil Procedure 1.305. Alternatively, the applicant or licensee may accept service personally or through authorized counsel.

192.2(2) The effective date of the denial of the issuance or renewal of a license, as specified in the notice required by Iowa Code section 252J.8, shall be 60 days following service of the notice upon the applicant or licensee.

192.2(3) The licensing authority’s administrator is authorized to prepare and serve the notice required by Iowa Code section 252J.8, upon the applicant or licensee.

192.2(4) Applicants and licensees shall keep the licensing authority informed of all court actions, and all child support recovery unit actions taken under or in connection with Iowa Code chapter 252J, and shall provide the licensing authority copies, within 7 days of filing or issuance, of all applications filed with the district court pursuant to Iowa Code section 252J.9, all court orders entered in such actions, and withdrawals of certificates of noncompliance by the child support recovery unit.

192.2(5) All licensing authority fees required for application, license renewal, or license reinstatement must be paid by applicants or licensees before a license will be issued, renewed, or reinstated after the licensing authority has denied the issuance or renewal of a license pursuant to Iowa Code chapter 252J.

192.2(6) In the event an applicant or licensee timely files a district court action following service of a licensing authority notice pursuant to Iowa Code sections 252J.8 and 252J.9, the licensing authority shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the licensing authority to proceed. For purposes of determining the effective date of the denial of the issuance or renewal of a license, the licensing authority shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

192.2(7) The licensing authority shall notify the applicant or licensee in writing through regular first-class mail, or such other means as the licensing authority determines appropriate in the circumstances, within 10 days of the effective date of the denial of the issuance or renewal of a license and shall similarly notify the applicant or licensee if the license is issued or renewed following the licensing authority’s receipt of a withdrawal of the certificate of noncompliance.

[ARC 8798B, IAB 6/2/10, effective 7/7/10]

641—192.3(252J) Suspension or revocation of a license. The licensing authority shall suspend or revoke a license upon the receipt of a certificate of noncompliance from the child support recovery unit of the department of human services according to the procedures set forth in Iowa Code chapter 252J. In addition to the procedures set forth in Iowa Code chapter 252J, the following shall apply.

192.3(1) The notice required by Iowa Code section 252J.8 shall be served upon the licensee by restricted certified mail, return receipt requested, or personal service in accordance with Iowa Rule of Civil Procedure 1.305. Alternatively, the licensee may accept service personally or through authorized counsel.

192.3(2) The effective date of the suspension or revocation of a license, as specified in the notice required by Iowa Code section 252J.8, shall be 60 days following service of the notice upon the licensee.

192.3(3) The licensing authority's administrator is authorized to prepare and serve the notice required by Iowa Code section 252J.8 and is directed to notify the licensee that the license will be suspended unless the license is already suspended on other grounds. In the event that the license is on suspension, the administrator shall notify the licensee of the licensing authority's intention to revoke the license.

192.3(4) Licensees shall keep the licensing authority informed of all court actions, and all child support recovery unit action taken under or in connection with Iowa Code chapter 252J, and shall provide the licensing authority copies, within 7 days of filing or issuance, of all applications filed with the district court pursuant to Iowa Code section 252J.9, all court orders entered in such actions and withdrawals of certificates of noncompliance by the child support recovery unit.

192.3(5) All licensing authority fees required for license renewal or license reinstatement must be paid by licensees before a license will be reinstated after the licensing authority has suspended or revoked a license pursuant to Iowa Code chapter 252J.

192.3(6) In the event a licensee files a district court action following service of a licensing authority notice pursuant to Iowa Code sections 252J.8 and 252J.9, the licensing authority shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the licensing authority to proceed. For purposes of determining the effective date of the suspension or revocation, the licensing authority shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

192.3(7) The licensing authority shall notify the licensee in writing through regular first-class mail, or such other means as the licensing authority determines appropriate in the circumstances, within 10 days of the effective date of the suspension or revocation of a license and shall similarly notify the licensee if the license is reinstated following the licensing authority's receipt of a withdrawal of the certificate of noncompliance.

[ARC 8798B, IAB 6/2/10, effective 7/7/10]

641—192.4(17A,22,252J) Sharing of information. Notwithstanding any statutory confidentiality provision, the licensing authority may share information with the child support recovery unit of the department of human services through manual or automated means for the sole purpose of identifying applicants or licensees subject to enforcement under Iowa Code chapter 252J or Iowa Code chapter 598.

[ARC 8798B, IAB 6/2/10, effective 7/7/10]

These rules are intended to implement Iowa Code chapter 252J.

[Filed emergency 1/11/96 after Notice 12/6/95—published 1/31/96, effective 1/11/96]

[Filed ARC 8798B (Notice ARC 8631B, IAB 3/24/10), IAB 6/2/10, effective 7/7/10]

CHAPTER 193
MODEL RULES FOR LICENSEE REVIEW COMMITTEE
Transferred to 481—Chapter 505, IAC Supplement 7/10/24

CHAPTER 194
NONPAYMENT OF STATE DEBT

641—194.1(272D) Definitions. For the purpose of this chapter, the following definitions shall apply.

“*Applicant*” means an individual who is seeking the issuance of a license.

“*Centralized collection unit*” means the centralized collection unit of the Iowa department of revenue.

“*Certificate of noncompliance*” means the same as defined in Iowa Code section 272D.1.

“*Denial notice*” means a licensing authority notification denying an application for the issuance or renewal of a license as required by Iowa Code chapter 272D.

“*License*” means the same as defined in Iowa Code section 272D.1.

“*Licensing authority*” means a board, commission, or any other entity of the department that has authority within this state to suspend or revoke a license or deny the renewal or issuance of a license authorizing a person to engage in a business, occupation, or profession.

“*Revocation or suspension notice*” means a licensing authority notification suspending a license for an indefinite or specified period of time or a notification revoking a license as required by Iowa Code chapter 272D.

“*Withdrawal certificate*” means the same as defined in Iowa Code section 272D.1.

[ARC 8127C, IAB 7/10/24, effective 8/14/24]

641—194.2(272D) Denial of issuance or renewal of a license or suspension or revocation of a license.

The licensing authority shall deny the issuance or renewal of a license or suspend or revoke a license upon the receipt of a certificate of noncompliance from the centralized collection unit per the procedure set forth in Iowa Code chapter 272D. This rule shall apply in addition to the procedures set forth in Iowa Code chapter 272D.

194.2(1) *Service of denial, suspension or revocation notice.* Notice will be served upon the applicant or licensee by certified mail, return receipt requested; by personal service; or through authorized counsel.

194.2(2) *Licensees and applicants responsible to inform licensing authority.* Licensees and applicants shall keep the licensing authority informed of all court actions and all centralized collection unit actions taken under or in connection with Iowa Code chapter 272D. Licensees and applicants shall also provide the licensing authority copies, within seven days of filing or issuance, of all applications filed with the district court pursuant to Iowa Code chapter 272D, all court orders entered in such actions, and any withdrawals of certificates issued by the centralized collection unit.

194.2(3) *Reinstatement following license denial, suspension or revocation.* All licensing authority fees required for application, license renewal, or license reinstatement must be paid by applicants or licensees before a license will be issued, renewed, or reinstated after the licensing authority has denied the issuance or renewal of a license or suspended or revoked a license pursuant to Iowa Code chapter 272D.

194.2(4) *Effect of filing in district court.* In the event an applicant or a licensee files a timely district court action following service of a denial notice by a licensing authority or service of a revocation or suspension notice, the licensing authority will continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the licensing authority to proceed. For purposes of determining the effective date of the denial of the issuance or renewal of a license or of the suspension or revocation of a license, the licensing authority will count the number of days before the action was filed and the number of days after the action was disposed of by the court.

194.2(5) *Final notification.* The licensing authority will notify the applicant or licensee in writing through regular first-class mail, or by such other means as the licensing authority determines appropriate in the circumstances, and will similarly notify the applicant or licensee if the license is issued or renewed following the licensing authority’s receipt of a withdrawal certificate.

[ARC 8127C, IAB 7/10/24, effective 8/14/24]

641—194.3(272D) Sharing of information. The department may share applicant or licensee information with the centralized collection unit pursuant to Iowa Code chapter 272D.

[ARC 8127C, IAB 7/10/24, effective 8/14/24]

These rules are intended to implement Iowa Code chapter 272D.

[Filed ARC 7671B (Notice ARC 7540B, IAB 1/28/09), IAB 4/8/09, effective 5/13/09]
[Filed ARC 8127C (Notice ARC 7361C, IAB 1/24/24), IAB 7/10/24, effective 8/14/24]

CHAPTER 195

CHAPTER 196
EMERGENCY MEDICAL SERVICES—MILITARY SERVICE, VETERAN RECIPROCITY,
AND SPOUSES OF ACTIVE DUTY SERVICE MEMBERS

641—196.1(272C) Definitions.

“License” means the same as defined in Iowa Code section 272D.1.

“Licensing authority” means the same as defined in Iowa Code section 272D.1.

“Military service” means honorably serving on federal active duty, state active duty, or national guard duty, as defined in Iowa Code section 29A.1; in the military services of other states, as provided in 10 U.S.C. Section 101(c) (2021); or in the organized reserves of the United States, as provided in 10 U.S.C. Section 10101 (2006).

“Military service applicant” means an individual requesting credit toward licensure for military education, training, or service obtained or completed in military service.

“Spouse” means a spouse of an active duty member of the military forces of the United States.

“Veteran” means the same as defined in Iowa Code section 35.1.

[ARC 8128C, IAB 7/10/24, effective 8/14/24]

641—196.2(272C,147D) Military education, training, and service credit. A military service applicant may apply for credit for verified military education, training, or service toward any experience or educational requirement for licensure by submitting a military service application form to the licensing authority. No fee is required with submission of an application for military service credit.

196.2(1) The licensing authority shall grant credit requested in the application pursuant to the emergency medical services (EMS) personnel licensure interstate compact described in Iowa Code section 147D.1.

196.2(2) The licensing authority shall inform the military service applicant in writing of the credit, if any, given toward an experience or educational qualification for licensure or explain why no credit was granted. The applicant may request reconsideration upon submission of additional documentation or information.

196.2(3) A military service applicant who is aggrieved by the licensing authority’s decision may appeal pursuant to the provisions of 441—Chapter 7, except that no fees or costs shall be assessed against the military service applicant in connection with a contested case conducted pursuant to this subrule.

196.2(4) The licensing authority shall grant or deny the credit requested in the military service application prior to ruling on the application for licensure. The applicant shall not be required to submit any fees in connection with the licensure application unless the licensing authority grants the credit requested in the military service application. If the licensing authority does not grant the credit requested in the military service application, the applicant may withdraw the licensure application or request that the licensure application be placed in pending status for up to one year or as mutually agreed. The withdrawal of a licensure application shall not preclude subsequent applications supported by additional documentation or information.

[ARC 8128C, IAB 7/10/24, effective 8/14/24]

641—196.3(272C,147D) Veteran and active duty military spouse privilege to practice. A veteran or spouse with an unrestricted license in another EMS personnel licensure jurisdiction may practice in Iowa pursuant to the EMS personnel licensure interstate compact described in Iowa Code section 147D.1.

[ARC 8128C, IAB 7/10/24, effective 8/14/24]

These rules are intended to implement Iowa Code sections 272C.4 and 147D.1.
