213.1(7) *Number of employees.* Unless otherwise specified, the maximum number of employees going on or coming off shift within any single hour.

213.1(8) *Railroads.* Common carrier railroads.

213.1(9) *Sanitary.* Free from or effective in preventing or checking agencies injurious to health, especially filth and infection.

213.1(10) *Station.* A location where freight or passenger traffic is ordinarily received and delivered and at which an employee is regularly assigned for duty.

213.1(11) *Terminal.* A location where engine and train crews in yard and train service and switchmen, switch tenders and car clerks are regularly required to report for or relieved from duty.

213.1(12) *Toilets.* Fixtures such as flush toilets, chemical closets, incinerator-type toilets, or privies for the purpose of defecation unless otherwise specified.

213.1(13) *Usual place of employment.* The place where an employee works with a reasonable measure of continuity throughout the major part of company service.

213.1(14) *Yards.* Yards, section headquarters, and locomotive and car shops.

213.1(15) *Office work area.* A yard office; station; depot; terminal; or freight, baggage and express office that is a permanent or semipermanent stationary facility located on railroad property and a usual place of employment for the performance of clerical or work concerned with or identified with the office functions of the company.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

481—213.2(88) Water supply—requirements.

213.2(1) *General specifications.* Water supplied for domestic and drinking purposes under these regulations will meet the standards of the department of health and human services. Cross-connections between a potable and nonpotable water supply are prohibited.

213.2(2) *Drinking water.*

a. An adequate supply of cool, clean, sanitary water that is satisfactory for drinking purposes will be made available to all employees.

b. When necessary, this water will be provided in suitable, clean, sterilized and sanitary containers conveniently placed for the use of employees, but not in toilet rooms. Each container will be equipped with an approved type of fountain, approved faucet or other approved dispenser.

c. Either single-service containers or drinking fountains with a sanitary angle head will be used.

213.2(3) *Required locations.*

a. Drinking water that meets the specifications of subrules 213.2(1) and 213.2(2) will be provided on the following equipment when in use and at the following locations:

(1) All locomotives.
(2) Baggage and express cars (where employees are assigned for work en route).
(3) Cabooses.
(4) Camp cars.
(5) All terminals.
(6) All yard offices.
(7) All stations.
(8) All freight, baggage, and express offices (located on railroad property).
(9) All shops and engine houses.
(10) All bunk or section houses and section headquarters.
(11) All lunchrooms located on railroad property.
(12) All permanent watchmen shelters at public highway crossings.
(13) All maintenance-of-way camps.
(14) All office work areas.

b. Reserved.

213.2(4) *Washing facilities.*

a. General specifications—wash basins—lavatories.

(1) Wash basins or lavatories will be made of vitrified glazed earthenware, vitreous enameled metal, or other smooth-finished material, impervious to moisture.

(2) Twenty-four inches of trough or circular wash basin will be considered the equivalent of one wash basin. The trough or circular wash basins will not be equipped with a plug or stopper.

(3) Spring-closing, hand-operated faucets are prohibited in trough wash sinks or circular basins.

b. Wash basins—availability.

(1) An adequate number of wash basins or lavatories for maintaining personal cleanliness will be provided within reasonable access for all employees normally assigned to work at the following locations: all terminals; all yard offices; all stations; all freight, baggage and express offices (located on railroad property); all shops and engine houses; all lunchrooms located on railroad property; and at all bunk or section houses.

(2) One lavatory for every 10 employees or portion thereof, up to 100 persons; and over 100 persons, one lavatory for each additional 15 persons or portion thereof will be provided.

(3) At least one wash basin will be located in or adjacent to each toilet room.

c. Wash basins—supplies.

(1) Hot and cold running water will be supplied.
(2) Mechanical drying facilities or individual towels, either paper or cloth, will be provided.
(3) Waste receptacles will be provided for used paper towels.
(4) Soap or other suitable cleansing agent will be supplied at each wash basin.

213.2(5) *Showers, locker rooms, dressing rooms and lockers.*

a. Showers.

(1) Showers will be required when such facilities are necessary at specified locations to protect employees whose work involves exposure to poisonous, infectious or irritating material or to excessive dirt, heat fumes or vapors or other materials or substances injurious to health. Such shower facilities will be provided in conjunction with adequate and necessary locker or dressing room facilities.

(2) Showers will be connected to an ample supply and pressure of hot and cold water, preferably mixed.

(3) Each shower room or compartment will be constructed of material impervious to moisture.

(4) Each shower compartment will be not less than 36 inches in width and 36 inches in depth.

b. Lockers or dressing rooms.

(1) In all places of employment where, because of the nature of the work, it is necessary to change clothing, a locker room will be provided separated from toilet rooms by solid partitions and doors. Such locker rooms will have not less than 80 square feet of floor space per ten employees, or portion thereof, and for each additional employee, not less than 4 additional square feet will be added thereto. Necessary furniture, such as benches and tables, will be provided.

(2) Such locker or dressing rooms will be properly lighted, heated to a minimum of 65°F and adequately ventilated. Where practicable, cross-ventilation will be provided.

c. Lockers. In all places of employment where the nature of the employment requires a change of clothing, individual metal lockers will be provided. The dimensions of metal lockers will be not less than 12 inches wide, 18 inches deep and 72 inches high, exclusive of legs or other base. The lockers will be equipped with a shelf and with not less than one clothes hook for each side or equivalent hanger bar, and sufficient openings in the door for purposes of ventilation. Wooden lockers are prohibited.

d. Separate facilities for women.

(1) In instances where women or girls are employed in such activities, the showers, lockers and dressing rooms used by them will be separate and apart from those used by the men and boys.

(2) Such facilities will have separate entrances and exits and will be so marked.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

481—213.3(88) Toilets—requirements.

213.3(1) *General.*

a. Where running water and sewer or septic tank connections are reasonably available, flush-type toilets and urinals will be maintained.

b. Chemical toilets or privies may be used where it is impractical to install inside toilet or urinal facilities.

c. No privy, urinal, cesspool, septic tank or other receptacle for human excrement will be constructed, maintained or used, except those maintained on moving equipment, which directly or indirectly drains or discharges over, into or upon the surface of the grounds, or into the waters of the state, either directly or indirectly, unless the contents of such urinal, cesspool, septic tank or receptacle for human excrement are subjected to some recognized sterilization treatment approved by the department of health and human services.

213.3(2) *Water closets.*

a. Every flush toilet will have a rim flush bowl or be so constructed as to prevent the accumulation of fecal matter on the bowl. The bowl will be constructed of smooth-finished material impervious to moisture.

b. Every such bowl will be so installed that the surroundings and floor space can be easily cleaned.

c. No pan, plunger or wash-out water closets are permitted, except that pan or double-pan types are permitted for running facilities.

d. Every flush toilet will have a separate hinged seat made of a material, other than metal, that does not absorb moisture or that will be finished with substances resistant to moisture.

213.3(3) *Urinals.*

a. Every urinal will be made of smooth-finished material impervious to moisture.

b. Every urinal will be located within a toilet room.

c. Twenty-four inches of trough urinal will be equivalent to an individual urinal.

d. Wherever a slab urinal is installed, the floor, for a distance of not less than 24 inches in front of the urinal, will be sloped toward the urinal drain with adequate splash guards.

e. Every urinal will be flushed from a water-supplied tank or through valve, and flush valves will be installed with an approved backflow preventer. Every such tank will furnish an adequate quantity of water for each discharge for every fixture. In place of such discharge from a tank or flush valve, water may be allowed to run continuously over slab or trough urinals.

f. Clear floor space allowed for each urinal or its equivalent will be not less than two feet in width; adequate passage will be allowed.

213.3(4) *Chemical toilets.* All chemical toilets installed will be of a type approved by the division of labor services. Containers will be charged with chemical solution of proper strength, and their contents will be agitated daily with proper devices provided for that purpose. When containers are more than two-thirds full, the contents will be disposed of in an approved manner, such as by burial or into a public sewer system. The stacks connecting the seats with the containers will be cleaned as often as is necessary to keep them in a clean and sanitary condition.

213.3(5) *Incinerator toilets.*

a. All incinerator toilets used on railroad equipment must be of a type approved by the division of labor services.

b. The installation and method of venting must be approved by the division of labor services.

c. Clear and concise instructions must be provided by the railroad company to ensure that the units are operated correctly.

213.3(6) *Privies.*

a. All privies will be located so as to avoid contaminating any water of the state.

b. A suitable approach, such as concrete, gravel or cinder walk, will be provided.

c. Privies will be constructed and maintained insect- and rodent-proof.

d. Every privy will be provided with a door, and such door will be self-closing.

e. The lids over the seats will be so constructed as to fall into a closed position when the seat is not occupied.

f. The pit or vault will be ventilated to the outside air by means of a stack protected at its outlet and by screens.

g. Individual seats will be provided in accordance with the ratio hereinafter set forth.

213.3(7) *Toilet rooms—specifications for.*

a. Separation.

(1) No toilet room will have direct communication with any room in which unwrapped food products are prepared, stored, handled or sold unless separated from said room by a self-closing door maintained in operating condition.

(2) Separate toilet facilities will be provided for each sex.

(3) There will be no direct connection between toilet rooms for men and women. Each will have a separate entrance, and each door leading thereto will have an automatic closing device maintained in operating condition.

b. Compartments. Each water closet in toilet rooms containing more than one water closet, or water closets, together with one or more urinals, will be in an individual compartment.

c. Ventilation. Every toilet room will be adequately ventilated.

d. Lighting. All toilet facilities will be well-lit during working hours.

e. Heating. Except privies, every toilet room will be kept adequately heated.

f. Screens. All windows, ventilators and other openings will be screened to prevent the entrance of insects. Toilet rooms will be kept free of insects and vermin.

213.3(8) *Toilets—number required—general.*

a. Adequate toilet facilities will be provided for all employees. Such facilities will be conveniently located and accessible and will be maintained in a usable and sanitary condition.

b. The following table will be used as a guide in determining the adequacy of toilet facilities.

Number of Employees	Minimum Number of Facilities
1 to 10 persons	1 toilet
11 to 24 persons	2 toilets
25 to 49 persons	3 toilets
50 to 74 persons	4 toilets
75 to 100 persons	5 toilets
Over 100	1 toilet for each additional 30 persons

c. Whenever urinals are provided, one urinal may be substituted for one toilet, provided the number of toilets will not be reduced to less than two-thirds of the number shown in the foregoing table.

213.3(9) *Toilets—supplies.*

a. Toilet paper. An adequate supply of toilet paper with holder will be supplied by the employer for each toilet.

b. Sanitary napkins. In all toilet rooms used by women, the company will permit the installation of dispensing machines for sanitary napkins.

213.3(10) *Toilets—location of and type.*

a. Appropriate toilets will be provided on the following facilities:

(1) All locomotives, except when used in yard service or as unmanned auxiliary units.

(2) Baggage and express cars where employees are required to work en route.
(3) Cabooses.
(4) All terminals.
(5) All yard offices.
(6) All stations or depots.
(7) All freight, baggage and express offices (located on railroad property).
(8) All engine houses and shops.
(9) All bunk or section houses and section headquarters.
(10) Lunchrooms located on railroad property.
(11) All maintenance-of-way camps.
(12) Crossing watchman locations, where practicable, and where such facilities are not otherwise readily and conveniently located.
(13) All office work areas.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

481—213.4(88) Eating places and lunchrooms—requirements.

213.4(1) *Eating places.*

a. Whenever practicable and at all permanent and semipermanent installations, an acceptable place, maintained in clean and sanitary condition, with adequate space for eating meals will be provided for employees who bring their meals to their place of employment or eat their meals prepared at the camp facilities.

b. Eating places will be so constructed as to permit their being readily cleaned, and they will be kept clean, in good repair and free of rodents, insects and vermin.

c. Kitchen cars or other camp facilities will have adequate equipment for the sanitary preparation, cooking and refrigeration of food.

213.4(2) *Lunchrooms.*

a. Concessionaire facilities provided by the company in lieu of direct company operation will comply with these rules with respect to adequate space, adequate food handling facilities and cleanliness.

b. Adequate table and seating facilities will be provided for the maximum number of employees using the room at any one time.

213.4(3) *Lunchrooms and eating places—additional requirements.*

a. General. The minimum area of lunchrooms, or the amount of space to be added to that required for a locker room where a lunchroom is not provided, will be based upon the maximum number of employees using the room or added space at any one time, generally in accordance with the following table:

Number of Employees	Square Feet Per Employee
25 and less	13
26 to 74	12
75 to 149	11
150 and over	10

b. Ventilation. Every eating place and lunchroom will be adequately ventilated. Where practicable, cross-ventilation will be provided.

c. Lighting. All lunchrooms will be clearly lighted at all times during hours of use.

d. Heating. Every lunchroom will be kept reasonably heated at all times.

e. Screens. The windows, ventilators and doors opening to the outside of all lunchrooms will be properly screened during the season when insects are prevalent.

f. Waste disposal. One or more covered receptacles, as may be necessary, will be furnished in lunchroom and eating places for the disposal of waste food and other waste matter. Such containers will be emptied regularly and cleaned as often as is necessary. The area where the receptacles are kept will be maintained free of litter occurring from the possible overflow of such receptacles.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

481—213.5(88) Sleeping accommodations—requirements.

213.5(1) *Running facilities.* Camp cars, other than passenger coaches, furnished for sleeping purposes, will provide at least 50 square feet of floor space for each person with a ceiling height of not less than 7 feet. Where double bunks are used, at least 30 square feet of floor space will be provided for each person so accommodated. Where passenger coaches are furnished, the division of labor services may designate the number of persons to be housed in each coach.

a. Walls, floors and ceilings will be so constructed as to permit them to be readily cleaned.

b. Exterior windows and doors will be weather stripped during the cold weather.

c. Screens will be provided during the season when insects are prevalent for outer doors and windows.

d. Heating facilities and adequate fuel will be provided with which employees may maintain a comfortable temperature as weather conditions may require.

e. Lighting by windows or acceptable artificial illumination will be provided.

f. Ventilation will be provided by windows opening directly to the outside air.

g. Beds, bunks or cots with proper mattresses will be provided. Such beds, bunks or cots will be raised at least 12 inches above the floor and be located 2 feet or more from the side of any other bed, bunk or cot located in the same room and have at least 27 inches of clear space above it.

213.5(2) *Stationary facilities.*

a. Dormitories or bunk rooms will be of such area as to provide at least 50 square feet of floor area for each person. Where double bunks are used, at least 30 square feet of floor space will be provided for each person so accommodated. The headroom of dormitories or bunk rooms will be at least 7 feet.

b. Specifications for walls, floors and ceilings, lockers, drinking water, toilet accommodations, washing facilities, ventilation, lighting, heat, weather stripping, screening, beds, bunks or cots as described in running facilities of this rule will apply to stationary facilities.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

481—213.6(88) Cleanliness and maintenance—requirements.

213.6(1) *General specifications.*

a. The company will provide for the cleanliness and maintenance of the facilities, fixtures and appurtenances referred to in these regulations. Said fixtures will be maintained in proper working order when offered for use.

b. Toilet rooms and washrooms will not be used for storage.

213.6(2) *Floors.* Floors will be maintained in a clean and, so far as practicable, dry condition.

213.6(3) *Screens.* Screens required by these rules will be of 16 mesh or equal.

213.6(4) *Receptacles for waste.* Suitable receptacles will be provided and used for the storage of waste and refuse and will be maintained in a sanitary condition.

213.6(5) *Yard servicing areas.* Toilet waste will not be discharged onto the ground surface from railroad cars within servicing areas of yards. Such areas will be kept free of refuse, litter, debris, vermin and rodents.

213.6(6) *Yard repair areas.* Where work is performed in repair yards or on repair tracks in the open or in open sheds of pits, adequate drainage will be provided.

213.6(7) *Running facilities.*

a. Locomotives and yard diesels. During use, the cabs on locomotives will be heated to a minimum of 50°F at floor level.

(1) When required by the season of the year, doors and windows of all locomotives will be equipped with adequate protection to occupants from the elements by means of weather stripping or other device sufficient to provide equally adequate protection.

(2) Reserved.

b. Cabooses.

(1) Cabooses will be maintained in a clean and sanitary condition.

(2) When required by the season of the year, doors and windows of cabooses will be equipped with adequate weather stripping.

(3) Every caboose used in any train in this state, regardless of service, will be provided with a stove or other adequate means of heating. Cabooses will be heated to a minimum of 50°F at floor level.

c. Running facilities will be equipped with shatterproof glass.

213.6(8) *Stationary facilities.*

a. Bed linen. Where bed linen is furnished by the railroad, it will be changed and fresh clean linen supplied at least once a week or for each new occupant.

b. Crossing watchmen facilities. Adequate shelter will be furnished and maintained for crossing watchmen. Such shelter will be adequately heated, sealed and insulated against cold and inclement weather.

c. Office work areas.

(1) Office work areas will be maintained in clean condition.

(2) Office work areas will be clearly lighted at all times during hours of use.

(3) Office work areas will be heated at all times during hours of use at not less than 65°F.

(4) Office work areas will be provided with cross-ventilation when possible.

(5) Windows, ventilators and doors opening to the outside of office work areas will be properly screened during the seasons when insects are prevalent.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

481—213.7(88) Conflicts resolved. In the event the rules in this chapter conflict or contain provisions inconsistent with the rules in 481—Chapter 210 or 481—Chapter 211, the applicable provisions of 481—Chapter 210 or 481—Chapter 211 prevail.

[**ARC 8450C**, IAB 12/11/24, effective 1/15/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code section 88.5(11).

CHAPTER 220
COMMUNITY RIGHT TO KNOW HAZARDOUS CHEMICALS

[Prior to 9/24/86, Labor, Bureau of[530]]
[Prior to 10/21/98, see 347—Ch 130]
[Prior to 7/9/25, see Labor Services Division[875] Ch 130]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—220.1(89B) Employer's duty. Upon request, an employer has a duty to inform the public of the presence of hazardous chemicals in the community and the potential health and environmental hazards that the chemicals pose. Requests shall be made during normal office hours of the employer. The employer shall provide the information or reason for refusal within ten days. If the request is from a health professional, the information shall be provided immediately.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.2(89B) Records accessibility.

220.2(1) Accessible records include safety data sheets. The employer shall also provide information concerning the quantity of each hazardous chemical stored or used. Quantity information may include the manner of purchase, such as in gallon containers, barrels, tankers, etc. Additionally, the employer shall provide information specifying the quantity as less than 500 pounds, between 500 pounds and 1,000 pounds, between 1,000 pounds and 5,000 pounds, or in excess of 5,000 pounds.

220.2(2) An employer is not required to make a copy of a safety data sheet if the interested person is given an opportunity to review and make notes regarding the safety data sheet. If an employer provides a copy of a safety data sheet at the request of the interested person, a reasonable fee can be charged for the actual cost of copying.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.3(89B) Application for exemption. An employer shall make a written application to the commissioner setting forth the specific grounds for a claimed exemption. Upon receipt of an application, the commissioner will give the applicant notice and opportunity to be heard at a full evidentiary hearing before the commissioner.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.4(89B) Burden of proof and criteria.

220.4(1) *Trade secrets.* The employer-applicant has the burden of proof in showing that the information claimed as exempted qualifies as a trade secret. The commissioner may take official notice that similar information of the employer-applicant has been deemed a trade secret and may summarily grant the exemption based on the official notice.

220.4(2) *Relevance of public health and safety/damage to employer.* The employer-applicant has the burden of proof in showing that the information is not relevant to public health and safety or that the release of the information would damage the employer. Notification in writing by the employer is not, in and of itself, sufficient to allow the employer to obtain the exemption.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.5(89B) Formal ruling. The commissioner will issue a formal ruling upon application. The ruling will set forth findings of fact and conclusions of law and grant or deny the application. The ruling is the final agency action for purposes of Iowa Code chapter 17A.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.6(89B) Request for information. An interested person may request information from an employer. If the request is denied by the employer, the requesting party may then file an application for information with the division. The application will set forth the information being requested and that the information was refused by the employer or that the employer denies access or that the employer alleges that no records were kept. The applicant shall state the interest in the information requested to be received.

[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.7(89B) Filing with division. Upon receipt of application for information, the division will determine if the applicant has a legitimate interest, and if so, the division will make a written demand upon the employer to provide the requested information to the division. If the employer complies, the division will forward copies to the interested person. Requests for the information under rule 481—220.6(89B) will be kept confidential. The division shall not disclose the name of the interested person to any person.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.8(89B) Grounds for complaint against the employer. The commissioner may cite the employer on a formal written complaint on any of the following grounds:

220.8(1) The division has not received a reply within 30 days of the request for information pursuant to rule 481—220.7(89B); or

220.8(2) The division finds on an occupational safety and health inspection that the employer's records materially distort the information given to the public or an emergency response department so as to pose a serious hazard to community health, environment, or emergency response personnel.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.9(89B) Investigation or inspection upon complaint. Within 15 days of determining that there are grounds for a complaint, the commissioner shall either notify the employer in writing of the grounds for the complaint and request information or conduct an unannounced inspection of the employer's workplace at reasonable times and in a reasonable manner. Within 30 days of initiating an investigation or inspection, the division may find that the complaint is invalid and unfounded and so inform the interested person and the employer in writing.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—220.10(89B) Order to comply.

220.10(1) If, after conducting an investigation or inspection of the employer's workplace, the commissioner finds that the complaint is meritorious, the commissioner shall issue an order to comply to the employer that shall set forth with specificity the employer's noncompliance with Iowa Code chapter 89B or these rules. The commissioner shall give the employer a period of 30 days to take remedial steps for compliance. The commissioner may establish a shorter period of time if justification is provided in the order to comply.

220.10(2) An employer may request an administrative hearing on the order to comply at any time prior to the time set forth for compliance in the order to comply.

220.10(3) If the employer has not requested a hearing, the commissioner, after the time set forth for compliance with the order to comply, may reexamine records submitted by the employer or may reinspect the premises. If the employer has not taken the necessary remedial steps required by the order to comply, the commissioner, upon notice and administrative hearing, may issue a decision on the order to comply that is a final agency action pursuant to Iowa Code chapter 17A.

220.10(4) In the event that the employer fails to comply with a decision on the order to comply, the commissioner may commence an action in the Iowa district court for injunctive and other equitable relief that may be just and equitable.
[**ARC 8751C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code section 30.7 and chapter 89B.

CHAPTER 221
PUBLIC SAFETY/EMERGENCY RESPONSE RIGHT TO KNOW
[Prior to 9/24/86, Labor, Bureau of[530]]
[Prior to 10/21/98, see 347—Ch 140]
[Prior to 7/9/25, see Labor Services Division[875] Ch 140]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—221.1(89B) Employer waiver applications.

221.1(1) An employer may, in writing, apply to the commissioner for a waiver for less stringent sign posting requirements.

221.1(2) The employer has the burden of proof to show that compliance imposes an undue hardship and that the less stringent sign posting requirements as proposed by the employer offer substantially the same degree of notice and protection to emergency responders as if Iowa Code section 89B.14 were strictly applied.

[**ARC 8752C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—221.2(89B) Agreement between an employer and fire department.

221.2(1) In instances where the posting of a sign for each hazardous chemical would be ambiguous or repetitive or where space is limited by the physical characteristics of the structure, or in situations, such as in a building, structure, or location where a wide variety of materials may be stored having varying degrees of hazards, the identifying symbol shall indicate the most severe degree of hazard in each category except when a high hazard rating would be misleading because of the presence of an insignificant quantity of the material requiring the rating.

221.2(2) The employer and the local fire department may enter into a written agreement providing for the posting of signs for the most hazardous chemical in each principal category. The agreement is subject to the approval of the division pursuant to the procedure for a waiver. If the waiver is approved, the employer shall post in the same location as the required posted signs a sign stating: "Signs not posted for all hazardous chemicals" in block letters at least three inches in height.

[**ARC 8752C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—221.3(89B) Information submitted to local fire department. The employer shall submit to the local fire department a list of hazardous chemicals that the employer's facility consistently generates, uses, stores, or transports. The employer shall submit updated information as it becomes available to the employer.

221.3(1) This rule applies to any amount of a hazardous chemical that meets at least one of the following criteria:

a. Is a U.S. Department of Transportation Division 1.1, Division 1.2, or Division 1.3 explosive;

b. Is a U.S. Department of Transportation Division 2.3 toxic gas;

c. Is a U.S. Department of Transportation Division 6.1 toxic substance;

d. Is a U.S. Department of Transportation Division 4.3 material;

e. Is a U.S. Department of Transportation Radioactive Yellow III material;

f. Has a National Fire Protection Association (NFPA) 704-2022 health rating of greater than or equal to 3;

g. Has an NFPA 704-2022 flammability rating of 4; or

h. Has an NFPA 704-2022 reactivity rating of 4.

221.3(2) This rule applies to a hazardous chemical that is present in aggregate quantities of 25 gallons of liquid, 250 pounds of nonliquid, or 250 combined pounds of liquid and nonliquid and has:

a. An NFPA 704-2022 health rating of greater than or equal to 2;

b. An NFPA 704-2022 flammability rating of greater than or equal to 3; or

c. An NFPA 704-2022 reactivity rating of greater than or equal to 2.

221.3(3) In addition to a list of the hazardous chemicals, the employer shall provide the following:

a. The employer's name;

b. The name, phone number, and email address of the employer's contact person;

c. The employer's mailing address;

d. The address of the facility where hazardous chemicals are present;

e. The NFPA numerical hazard rating in health, flammability, and reactivity for each hazardous chemical;

f. Any information that constitutes a special hazard pursuant to NFPA 704-2022, Chapter 5, for each listed chemical; and

g. Any other special hazard information from the safety data sheets that may be relevant.

221.3(4) If requested by the fire department, the employer shall provide to the fire department the information listed in this subrule, unless the fire department tours the facility annually.

a. A diagram that shows the permanent location of each hazardous chemical within the employer's facility, as well as easily recognizable reference points such as doorways, stairs, and windows; and

b. A copy of the safety data sheets.

[**ARC 8752C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—221.4(89B) Procedure for noncompliance. If an employer fails to comply with the requirements of this chapter, the fire chief in the jurisdiction of the employer may file a written complaint with the commissioner.

[**ARC 8752C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—221.5(89B) Notice of noncompliance. The commissioner may rely on the information provided by the fire chief and immediately issue a notice of noncompliance to the employer.

221.5(1) Opportunity for hearing. The notice of noncompliance shall be sent by certified mail and set forth that the employer may have an opportunity to be heard upon demand by the employer. In the event the employer demands a hearing, the commissioner may conduct an investigation or an inspection.

221.5(2) In the event the employer does not demand a hearing within 30 days of the receipt of notice of noncompliance, the commissioner shall, without further notice, issue an order for compliance that is a final agency action pursuant to Iowa Code chapter 17A.

221.5(3) In the event the issue of noncompliance comes for hearing before the commissioner, the commissioner may, at the conclusion of the hearing, issue an order for compliance that is final agency action pursuant to Iowa Code chapter 17A or dismiss the complaint.

[**ARC 8752C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code section 30.7 and chapter 89B.

INVESTIGATIONS DIVISION: WAGE AND CHILD LABOR UNIT

CHAPTER 225
WAGE CLAIMS

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 35]
[Prior to 7/9/25, see Labor Services Division[875] Ch 35]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—225.1(91A) Definitions.

"Claimant" means an employee who has submitted a wage claim form to the labor director.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Employee" includes a former employee and does not include an independent contractor.

"Enforceable" means eligible for the enforcement actions of the director.

"Legal action" means filing in a court of competent jurisdiction and subsequent activity pursuant to that filing.

"Wage claim form" means a document of the director that requests information pertinent to unpaid wages that an employee submits to the director to commence investigation.

[**ARC 8746C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—225.2(91A) Right of private action. If a claimant wishes to pursue a private action after assigning a wage claim to the director, the claimant shall so notify the director in writing prior to commencing it.

[**ARC 8746C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—225.3(91A) Filing a claim.

225.3(1) *Wage claim form.* An aggrieved employee shall supply such information as required by the director to commence the investigation of a claim. The claimant shall certify by signature that such information is true to the best of the claimant's knowledge and belief. A claim for wages may be sent to the director by mail, facsimile, or email.

225.3(2) *Assignment of claim.* By submitting a wage claim form to the director, a claimant assigns the claim to the director contingent on the director's determination that the claim is enforceable. A claimant may terminate the assignment by so notifying the director in writing. The director may terminate the assignment upon a determination that the claim is not enforceable.

225.3(3) *Denial of claim.* The director may deny claims within 14 days of receipt. Reasons for denying a claim without further investigation include but are not limited to the following:

a. The claim is received by the director more than one year after the date the wages became due and payable.

b. The claim must be heard in another forum or jurisdiction.

c. The claimant has begun a legal proceeding on the claim or has legal representation to pursue the claim.

d. The claim has been discharged in bankruptcy.

[**ARC 8746C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—225.4(91A) Investigation.

225.4(1) *Receipt of wage claim form.* Upon receipt by the director of a completed and signed wage claim form, the director will review the claim. The director's review is not a contested case as defined in Iowa Code chapter 17A.

225.4(2) *Employer notification of wage claim.* The director will notify the employer in writing of the allegations of the claimant and request a response from the employer within 14 days from the date of the letter. This period may be extended by the director for good cause.

225.4(3) *Failure of employer to respond.* If the employer fails to answer the director's request for response within the 14-day period, or as extended by the director, the director may determine the claim to be enforceable.

225.4(4) *Additional information from claimant.* If the employer answers the director's request for response within the established time, the director may notify the claimant of the employer's response and afford the claimant an opportunity to present additional information.

225.4(5) *Additional information from employer.* Upon receipt of the requested additional information from the employee, the director may determine additional information is required from the employer.

225.4(6) *Determination of enforceability.* Upon receipt of sufficient information, the director may determine the claim for wages to be enforceable and notify the claimant and the employer of that determination.

225.4(7) *Determination of unenforceability.* The director may, at any time, determine a claim to be unenforceable. Should the director determine the claim is unenforceable, the director shall so notify the claimant. Reasons for the director to determine that a claim is unenforceable include but are not limited to the following:

a. Doubtful legal validity or complexity of the claim.

b. Doubtful ability to collect money from the employer.

c. The claim may require extensive discovery or involve protracted proceedings.

d. The potential value of the claim is such that the cost of the claimant's obtaining legal counsel for a private action would not be prohibitive.

e. The claimant is not responsive to the reasonable requests of the director, including but not limited to requests to provide information and to participate in a legal action.

f. The claimant fails to notify the director of an address change.

g. The inequity of the claim in the particular situation.

h. Another jurisdiction or forum is preferable for the claim.

i. A substantial probability that the claimant was not an employee.

j. The claim has been included in a bankruptcy estate.

225.4(8) *Settlement of claim.* The director may settle a claim at any time with the consent of the claimant. Such consent may be included on the wage claim form.

[**ARC 8746C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—225.5(91A) Legal action on wage claims.

225.5(1) *Settlement opportunity.* The director will, in writing, afford the employer an opportunity to tender settlement 14 days prior to commencing a legal action.

225.5(2) *Counterclaims.* The director will not represent claimants on counterclaims or other legal actions brought by employers against claimants.

225.5(3) *Claimant participation.* The director may require the claimant to attend hearings and otherwise assist in the legal action as a condition of enforcing the claim.

[**ARC 8746C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

CHAPTER 227
WAGE CIVIL PENALTIES
[Prior to 7/9/25, see Labor Services Division[875] Ch 34]

Chapter rescission date pursuant to Iowa Code section 17A.7: 1/29/30

481—227.1(91A) Civil penalties for Iowa Code chapter 91A violations. The director may, upon report of an affected employee or based on other credible information, seek to recover civil money penalties for violation(s) of Iowa Code chapter 91A.
[**ARC 8681C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—227.2(91A) Investigation.

227.2(1) Prior to initiating a contested case proceeding, the director will, in writing, request written information from the complaining employee(s). This request for written information may be omitted for good cause, including urgent circumstances or the possession of sufficient reliable evidence from another source(s).

227.2(2) Prior to initiating a contested case proceeding, the director will, in writing, inform the employer of the nature of the alleged violation(s) and request the employer to provide, within 14 days, a response with relevant information, including information necessary for the to assess penalties. This request for written information may be omitted for good cause, including urgent circumstances or the possession of sufficient reliable evidence from another source(s).

227.2(3) The director may secure evidence or witnesses by administrative subpoena.

227.2(4) The director may, in response to a written complaint, request a warrant to enter a place of employment to inspect records, ask questions, and investigate in relation to possible violations of Iowa Code chapter 91A.
[**ARC 8681C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—227.3(91A) Calculation of penalty.

227.3(1) The director will assess the penalty with due consideration for the size of the employer's business, the gravity of the violation(s), the good faith of the employer, and the history of previous violations by granting appropriate penalty reductions.

227.3(2) The gross penalty for each distinguishable violation will be $500. The following are examples of distinguishable violations:

a. If the act or omission occurs during five consecutive pay periods affecting a single employee, there are five distinguishable violations.

b. If the act or omission occurs during a single pay period affecting 50 employees, there are 50 distinguishable violations.

227.3(3) The size of the business will be considered as follows:

Number of Employees	Penalty Reduction
1-25	25%
26-100	15%
101-250	5%
251+	0%

227.3(4) Gravity will be considered by giving a 20 percent penalty reduction for a low-gravity violation or a 10 percent reduction for a medium-gravity violation. High-gravity violations will receive no gravity reduction. The gravity of a violation will be based primarily on its actual or potential harm to employees. Following are examples of gravity determinations:

a. A low-gravity violation includes any merely technical violation of Iowa Code chapter 91A that does not substantially prejudice any employee.

b. A high-gravity violation includes any violation causing financial injury to an employee.

227.3(5) Good faith will be considered by giving a 15 percent penalty reduction when there is sufficient evidence that the employer made earnest attempts to be well-informed about and in compliance

with Iowa Code chapter 91A. A good-faith reduction will not be given if the employer committed a violation(s) after having received a complaint(s) or warning(s) about a practice clearly in violation of Iowa Code chapter 91A.

227.3(6) History will be considered by giving a 10 percent penalty reduction if the violation(s) was isolated. Consideration will be given to prior civil penalty complaints and may include prior wage claims. A history reduction will not be given if the violation(s) for which the penalty is being calculated occurred over an extended period of time.

227.3(7) If the employer does not, upon request of the director, provide information relevant to the penalty assessment, the director may deny any penalty reduction for which the employer does not provide responsive information.

[**ARC 8681C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—227.4(91A) Settlement opportunity. Prior to initiating a contested case proceeding, the director will normally request, in writing, that the employer enter into settlement negotiations. This request may be omitted for good cause, including urgent circumstances or reasonable belief that the employer will not comply with the relevant section(s) of Iowa Code chapter 91A as part of a settlement. The director may, in consideration of the overall nature of the violations, the promptness of the employer's remedial action, and administrative efficiency, accept less than the full penalty from the employer at any time as a settlement.

[**ARC 8681C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—227.5(91A) Notice of penalty assessment; contested case proceedings.

227.5(1) To initiate an Iowa Code chapter 17A contested case proceeding, the director will serve a notice of penalty assessment in a manner consistent with service of original notice under the Iowa Rules of Civil Procedure. Such notice will include the following:

a. A statement that the notice concerns a civil penalty assessment for violation of wage laws.

b. A statement that, if a hearing is requested by the employer, the director will determine, after the hearing is held pursuant to Iowa Code sections 91A.12(2) and 91A.12(3), whether the penalty assessment will be upheld.

c. References to this chapter, Iowa Code section 91A.12, and any sections of Iowa Code chapter 91A that are alleged to have been violated.

d. The type of violation(s).

e. The number of violations.

f. The amount of the penalty.

g. A demand that the employer comply with the notice and recordkeeping requirements of Iowa Code section 91A.6(1).

h. A statement that the employer has the right to request a hearing within 30 days.

227.5(2) Employer nonresponse. If the employer does not respond to the notice of penalty assessment within 30 days of being served, the director will assess the full proposed penalty, and such assessment will be final.

227.5(3) Employer request for hearing. The employer may request a hearing within 30 days of being served by mailing such request to the director. Such request will include the address to which notice of hearing should be mailed. Upon such request, notice of the time and place of hearing will be mailed to the employer and a hearing pursuant to Iowa Code chapter 17A will be conducted before an administrative law judge.

227.5(4) Failure to request judicial review. If, after hearing, the employer does not request judicial review of an adverse decision within 30 days, the ruling is final.

[**ARC 8681C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—227.6(91A) Judicial review.

227.6(1) *Employer petition for Iowa Code chapter 17A judicial review.* The employer may request judicial review of an adverse ruling within 30 days. Such petition for review shall name the agency as respondent and shall contain a concise statement of the following:

a. The nature of the agency action for which review is requested.

b. The action for which review is requested.

c. The facts on which venue is based.

d. The grounds for the relief sought.

e. The relief sought.

227.6(2) *Jurisdiction.* Judicial review will be in the district court of a county in which at least one violation occurred.

227.6(3) *Transmittal of record.* Within 30 days of the petition for judicial review, or longer as allowed by the court, the director shall transmit the record of the case to the reviewing court.

227.6(4) *District court remedies.* The district court may require the employer to deposit the amount of the assessed penalty with the clerk of court pending the outcome of the judicial review, may uphold the penalty, and may order that the employer comply with the notice and recordkeeping requirements of Iowa Code section 91A.6(1).

[**ARC 8681C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

CHAPTER 230
MINIMUM WAGE SCOPE AND COVERAGE

[Prior to 10/21/98, see 347—Ch 215]
[Prior to 7/9/25, see Labor Services Division[875] Ch 215]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—230.1(91D) Initial employment wage rate.

230.1(1) The 90-calendar-day period set forth in Iowa Code section 91D.1(1)*"d"* is counted from the employee's initial day of work.

230.1(2) If the state minimum initial employment wage rate changes during the 90-calendar-day period, the employer shall pay the new effective rate.

230.1(3) If, after less than 90 calendar days from the initial day of work, the employee's employment is terminated and the employee is rehired by the same employer within three years of the initial hiring, the initial employment wage rate in effect at rehiring may be paid until the 90-calendar-day employment period is reached. If, after 90 calendar days from the initial day of work, the employee's employment is terminated and the employee is rehired in less than three years from the last date of employment, the employee shall not be employed at the initial employment wage rate.

[**ARC 8747C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—230.2(91D) Definitions. As used in 481—Chapters 231 through 234:

"Agriculture" includes farming in all its branches and among other things includes the cultivation and tillage of the soil; dairying; the production, cultivation, growing, and harvesting of any agricultural or horticultural commodities; the raising of livestock, bees, furbearing animals, or poultry; and any practices (including any forestry or lumbering operations) performed by a farmer or on a farm incident to or in conjunction with farming operations, including preparation for market, delivery to storage or to market or to carriers for transportation to market.

"Commerce" means trade, commerce, transportation, transmission, or communication among the several states or between any state and any place outside thereof.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Employee" means any individual employed by an employer. In the case of an individual employed by a public agency, the term means any individual employed by the state, political subdivision of the state, or an interstate governmental agency, other than the individual:

1. Who is not subject to the civil service laws of the state, political subdivision, or agency that employs the individual; and
2. Who:

- Holds a public elective office of that state, political subdivision, or agency,
- Is selected by the holder of the office to be a member of the holder's personal staff,
- Is appointed by the officeholder to serve on a policy-making level,
- Is an immediate adviser to the officeholder with respect to the constitutional or legal powers of the office, or
- Is an employee in the legislative branch or legislative body of that state, political subdivision, or agency and is not employed by the legislative library of the state, political subdivision, or agency.

"Employee" does not mean:

1. For purposes of the definition of "person-day," any individual employed by an employer engaged in agriculture if the individual is the parent, spouse, child, or other member of the employer's immediate family.
2. Any individual who volunteers to perform services for a public agency that is the state, a political subdivision of the state, or an interstate government agency, if:

- The individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered; and

- The services are not the same type of services that the individual is employed to perform for the public agency.

However, an employee of a public agency that is the state, a political subdivision of the state, or an interstate governmental agency may volunteer to perform services for any other state, political subdivision, or interstate governmental agency, including a state, political subdivision or agency with which the employing state, political subdivision, or agency has a mutual aid agreement.

"Employer" includes any person acting directly or indirectly in the interest of an employer in relation to an employee and includes a public agency but does not include any labor organization (other than when acting as an employer) or anyone acting in the capacity of officer or agent of the labor organization.

"Enterprise" means the related activities performed (either through unified operation or common control) by any person or persons for a common business purpose, and includes all activities whether performed in one or more establishments or by one or more corporate or other organizational units including departments of an establishment operated through leasing arrangements. Any establishment that has as its only regular employees the owner thereof or the parent, spouse, child, or other member of the immediate family of the owner is considered to be an enterprise engaged in commerce or in the production of goods for commerce or a part of an enterprise.

"Industry" means a trade, business, industry, or other activity, or branch or group thereof, in which individuals are gainfully employed.

"Person" means an individual, partnership, association, corporation, business trust, legal representative, or any organized group of persons.

"Person-day" means any day during which an employee performs any agricultural labor for not less than one hour.

"Produced" means produced, manufactured, mined, handled, or in any other manner worked on in any state; and an employee is engaged in the production of goods if the employee is employed in producing, manufacturing, mining, handling, transporting, or in any other manner working on the goods, or in any closely related process or occupation directly essential to the production thereof, in any state.

"Public agency" means the government of the state of Iowa, its various departments and agencies, and any political subdivision of the state.

"Resale" does not include the sale of goods to be used in residential or farm building construction, repair, or maintenance, provided that the sale is recognized as a bona fide retail sale in the industry.

"Sale" or *"sell"* includes any sale, exchange, contract to sell, consignment for sale, shipment for sale, or other disposition.

"Tipped employee" means any employee engaged in an occupation in which the employee customarily received more than $30 a month in tips.

"Wage" paid to any employee includes the reasonable cost, as determined by the director, to the employer of furnishing the employee with board, lodging, or other facilities. SOURCE: 29 U.S.C. 203.

[**ARC 8747C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—230.3(91D) Exceptions. The rules contained in 481—Chapters 231 through 234 do not apply with respect to:

230.3(1) Any employee employed by an establishment that is an amusement or recreational establishment, organized camp, or religious or nonprofit education conference center, if:

a. It does not operate for more than seven months in any calendar year, or

b. During the preceding calendar year, its average receipts for any six months of such year were not more than 33 1/3 percent of its average receipts for the other six months of the year, except that the exemption provided does not apply with respect to any employee of a private entity engaged in providing services or facilities (other than a private entity engaged in providing services and facilities directly related to skiing) in a national park or a national forest or on land in the National Wildlife Refuge System, under a contract with the Secretary of the Interior or the Secretary of Agriculture.

230.3(2) Any employee employed in agriculture:

a. If the employee is employed by an employer who did not, during any calendar quarter during the preceding calendar year, use more than 500 person-days of agricultural labor;

b. If the employee is the parent, spouse, child, or other member of the employer's immediate family;

c. If the employee:

(1) Is employed as a hand harvest laborer and is paid on a piece-rate basis in an operation that has been, and is customarily and generally recognized as having been, paid on a piece-rate basis in the region of employment,

(2) Commutes daily from the employee's permanent residence to the farm on which the employee is employed, and

(3) Has been employed in agriculture less than 13 weeks during the preceding calendar year;

d. If the employee (other than an employee described in paragraph 230.3(2)*"c"*):

(1) Is 16 years of age or under, is employed as a hand harvest laborer, is paid on a piece-rate basis in an operation that has been, and is customarily and generally recognized as having been, paid on a piece-rate basis in the region of employment,

(2) Is employed on the same farm as the employee's parent or person standing in the place of the employee's parent, and

(3) Is paid at the same piece rate as employees over age 16 are paid on the same farm; or

e. If the employee is principally engaged in the range production of livestock.

230.3(3) Any employee employed on a casual basis in domestic service employment to provide babysitting services or any employee employed in domestic service employment to provide companionship services for individuals who (because of age or infirmity) are unable to care for themselves.

230.3(4) Any employee to the extent that the employee is exempted by a certificate of the Secretary of Labor.

481—230.4(91D) Interpretative guidelines. The rules contained in 481—Chapters 231 through 234 are based on the federal rules indicated at the end of each rule. The federal rules contained illustrative examples of the application of the rule. The examples are not adopted, but the commissioner will be guided in enforcement by the examples provided in the rules. The Secretary of Labor has adopted statements of general policy and interpretations not directly related to regulations at 29 CFR Parts 776, 779, 780, and 785. The commissioner will follow these statements and interpretations in the application and enforcement of Iowa Code chapter 91D.

[**ARC 8747C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

CHAPTER 231
DOMESTIC SERVICE
[Prior to 11/4/98, see 347—Ch 219]
[Prior to 7/9/25, see Labor Services Division[875] Ch 219]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—231.1(91D) Purpose and scope.

231.1(1) Employees employed on a casual basis in domestic service employment to provide babysitting services and domestic service employees employed to provide companionship services for individuals who (because of age or infirmity) are unable to care for themselves are exempt from minimum wage.

231.1(2) The minimum wage protection applies to employees employed as domestic service employees under either of the following circumstances:

a. If the employee's compensation for services from the employer would constitute wages, that is, if the compensation during a calendar year totaled $100 or more, or

b. If the employee was employed in such domestic service work by one or more employers for more than eight hours in the aggregate in any workweek.

SOURCE: 29 CFR 552.2.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.2(91D) Domestic service employment. Domestic service employment refers to services of a household nature performed by an employee in or about a private home (permanent or temporary) of the person by whom the employee is employed.

SOURCE: 29 CFR 552.3.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.3(91D) Babysitting services. As an exemption, the term "babysitting services" means the custodial care and protection, during any part of the 24-hour day, of infants or children in or about the private home in which the infants or young children reside. The term "babysitting services" does not include services relating to the care and protection of infants or children that are performed by trained personnel, as registered, vocational, or practical nurses. While trained personnel do not qualify as babysitters, this fact does not remove them from the category of a covered domestic service employee when employed in or about a private household.

SOURCE: 29 CFR 552.4.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.4(91D) Casual basis. "Casual basis," when applied to babysitting services, means employment that is irregular or intermittent and that is not performed by an individual whose vocation is babysitting. Casual babysitting services may include the performance of some household work not related to caring for the children, provided that the work is incidental (i.e., does not exceed 20 percent of the total hours worked on the particular babysitting assignment).

SOURCE: 29 CFR 552.5.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.5(91D) Companionship services for the aged or infirm. "Companionship services" means those services that provide fellowship, care, and protection for persons who, because of advanced age or physical or mental infirmity, cannot care for their own needs. The services may include household work related to the care of the aged or infirm person such as meal preparation, bed making, washing of clothes, and other similar services. They may also include the performance of general household work, provided that such work is incidental (i.e., does not exceed 20 percent of the total weekly hours worked). The term "companionship services" does not include services relating to the care and protection of the aged or infirm that require and are performed by trained personnel, as a registered or practical nurse. While trained

personnel do not qualify as companions, this fact does not remove them from the category of covered domestic service employees when employed in or about a private household.

SOURCE: 29 CFR 552.6.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.6(91D) Application of minimum wage provisions.

231.6(1) Employers may take appropriate credit for the reasonable cost or fair value of food, lodging and other facilities customarily furnished to the employee by the employer such as drugs, cosmetics, dry cleaning, etc. Credit may be taken for the reasonable cost or fair value of these facilities only when the employee's acceptance of them is voluntary and uncoerced. Where uniforms are required by the employer, the cost of the uniforms and their care may not be included in the credit.

231.6(2) The department will accept meal credit taken by the employer consistent with 29 CFR §552.100(c) (2024).

231.6(3) The department will accept lodging credit taken by the employer consistent with 29 CFR §552.100(d) (2024).

SOURCE: 29 CFR 552.100.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.7(91D) Domestic service employment. In determining the total hours worked, the employer must include all time the employee is required to be on the premises or on duty and all time the employee is suffered or permitted to work.

SOURCE: 29 CFR 552.101.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.8(91D) Live-in domestic service employees. Domestic service employees who reside in the household where they are employed are entitled to the same minimum wage as domestic service employees who work by the day. In determining the number of hours worked by a live-in worker, the employee and the employer may exclude, by agreement between themselves, the amount of sleeping time, mealtime and other periods of complete freedom from all duties when the employee may either leave the premises or stay on the premises for purely personal pursuits. For periods of free time (other than those relating to meals and sleeping) to be excluded from hours worked, the periods must be of sufficient duration to enable the employee to make effective use of the time. If the sleeping time, meal periods or other periods of free time are interrupted by a call to duty, the interruption must be counted as hours worked.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.9(91D) Babysitting services in general. Babysitting is a form of domestic service, and babysitters other than those working on a casual basis are entitled to the same benefits as other domestic service employees.

SOURCE: 29 CFR 552.103.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.10(91D) Babysitting services performed on a casual basis.

231.10(1) Employees performing babysitting services on a casual basis are excluded from the minimum wage provisions.

231.10(2) Employment in babysitting services would usually be on a casual basis, whether performed for one or more employers, if the employment by all employers does not exceed 20 hours per week in the aggregate. Employment in excess of these hours may still be on a casual basis if the excessive hours of employment are without regularity or are for irregular or intermittent periods. Employment in babysitting services is on a casual basis (regardless of the number of weekly hours worked by the babysitter) in the case of individuals whose vocations are not domestic service who accompany families for a vacation period to take care of the children if the duration of employment does not exceed six weeks.

231.10(3) If the individual performing babysitting services on a casual basis devotes more than 20 percent of the individual's time to household work during a babysitting assignment, the exemption for "babysitting services on a casual basis" does not apply during that assignment and the individual must

be paid in accordance with the minimum wage requirement. This does not affect the application of the exemption for previous or subsequent babysitting assignments where the 20 percent tolerance is not exceeded.

231.10(4) Individuals who engage in babysitting as a full-time occupation are not employed on a casual basis.

SOURCE: 29 CFR 552.104.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.11(91D) Individuals performing babysitting services in their own homes.

231.11(1) The coverage of domestic service employees is limited to those persons who perform such services in or about the private household of the employer.

231.11(2) An individual in a local neighborhood who takes four or five children into the individual's home, which is operated as a day care home, and who does not have more than one employee or whose only employees are members of that individual's immediate family is not covered by Iowa Code chapter 91D.

SOURCE: 29 CFR 552.105.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.12(91D) Companionship services for the aged or infirm. Persons who provide care and protection for babies and young children, who are not physically or mentally infirm, are considered babysitters, not companions. The companion must perform the services with respect to the aged or infirm persons and not generally to other persons. The casual limitation does not apply to companion services.

SOURCE: 29 CFR 552.106.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.13(91D) Yard maintenance workers. Persons who mow lawns and perform other yard work in a neighborhood community generally provide their own equipment, set their own work schedule and occasionally hire other individuals. These persons will be recognized as independent contractors who are not covered by Iowa Code section 91D.1 as domestic service employees.

SOURCE: 29 CFR 552.107.

[**ARC 8754C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—231.14(91D) Third-party employment.

231.14(1) Employees who are engaged in providing companionship services and who are employed by an employer or agency other than the family or household using their services are exempt from the minimum wage requirement. Assigning an employee to more than one household or family in the same workweek would not defeat the exemption for that workweek, provided that the services rendered during each assignment come within the definition of companionship services.

231.14(2) Employees who are engaged in providing babysitting services and who are employed by an employer or agency other than the family or household using their services are not employed on a casual basis for purposes of the exemption. The employees are engaged in this occupation as a vocation.

CHAPTER 232
EMPLOYEES OF STATE AND LOCAL GOVERNMENTS

[Prior to 11/4/98, see 347—Ch 220]
[Prior to 7/9/25, see Labor Services Division[875] Ch 220]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—232.1(91D) Definition.

"Public agency" means the state of Iowa or political subdivision of the state.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.2(91D) Exclusion for elected officials and their appointees.

232.2(1) Elected officials are excluded from minimum wage. Also excluded under this provision are personal staff members and officials in policymaking positions who are selected or appointed by the elected public officials and certain advisers to such officials.

232.2(2) The statutory term "member of personal staff" generally includes only persons who are under the direct supervision of the selecting elected official and have regular contact with the official.

232.2(3) In order to qualify as personal staff members or officials in policymaking positions, the individuals in question must not be subject to the civil service laws of their employing agencies. The term "civil service laws" refers to a personnel system established by law that is designed to protect employees from arbitrary action, personal favoritism, and political coercion, and that uses a competitive or merit examination process for selection and placement. Continued tenure of employment of employees under civil service, except for cause, is provided. In addition, personal staff members must be appointed by, and serve solely at the pleasure or discretion of, the elected official.

232.2(4) The exclusion for "immediate adviser" to elected officials is limited to staff who serve as advisers on constitutional or legal matters, and who are not subject to the civil service rules of their employing agency.

SOURCE: 29 CFR 553.11.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.3(91D) Exclusion for employees of legislative branches.

232.3(1) Individuals who are not subject to the civil service laws of their employing agencies and are employed by legislative branches or bodies of the state and its political subdivisions are excluded from minimum wage.

232.3(2) Employees of the state or local legislative libraries do not come within this statutory exclusion. Also, employees of school boards, other than elected officials and their appointees, do not come within this exclusion.

SOURCE: 29 CFR 553.12.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.4(91D) Introduction. A public agency that is the state or a political subdivision of the state is authorized to provide compensatory time off in lieu of monetary overtime compensation.

SOURCE: 29 CFR 553.20.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.5(91D) Compensatory time and compensatory time off. The terms "compensatory time" and "compensatory time off" mean hours during which an employee is not working, which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation, and for which the employee is compensated at the employee's regular rate.

SOURCE: 29 CFR 553.21.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.6(91D) Payments for unused compensatory time.

232.6(1) Payments for accrued compensatory time may be made at any time and shall be paid at the regular rate earned by the employee at the time the employee receives such payment.

232.6(2) Upon termination of employment, an employee shall be paid for unused compensatory time at a rate of compensation not less than:

a. The average regular rate received by the employee during the last three years of the employee's employment, or

b. The final regular rate received by the employee, whichever is higher.

232.6(3) The phrase "last three years of employment" means the three-year period immediately prior to termination. Where an employee's last three years of employment are not continuous because of a break in service, the period of employment after the break in service will be treated as new employment. However, a break in service must have been intended to be permanent and any accrued compensatory time must have been cashed out at the time of initial separation. Where the final period of employment is less than three years, the average rate still must be calculated based on the rate(s) in effect during the period.

SOURCE: 29 CFR 553.27.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.7(91D) Other compensatory time.

232.7(1) Compensatory time that is earned and accrued by an employee for employment in excess of a nonstatutory requirement is considered "other" compensatory time. The term "other" compensatory time off means hours during which an employee is not working and that are not counted as hours worked during the period when used.

232.7(2) The rate at which "other" compensatory time is earned is not required to be at a rate of one and one-half hours for each hour of employment. The rate at which "other" compensatory time is earned may be some lesser or greater multiple of the rate or the straight-time rate itself.

SOURCE: 29 CFR 553.28.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

OTHER EXEMPTIONS

481—232.8(91D) Substitution.

232.8(1) Individuals employed in any occupation by the same public agency may agree, solely at their option and with the approval of the public agency, to substitute for one another during scheduled work hours in performance of work in the same capacity. Where one employee substitutes for another, each employee will be credited as if the employee had worked the normal work schedule for that shift.

232.8(2) An employee's decision to substitute will be considered to have been made at the employee's sole option when it has been made:

a. Without fear of reprisal or promise of reward by the employer, and

b. Exclusively for the employee's own convenience.

SOURCE: 29 CFR 553.31.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

RECORDKEEPING

481—232.9(91D) Records to be kept of compensatory time. For each employee subject to the compensatory time and compensatory time off provisions of the federal Fair Labor Standards Act, 29 U.S.C. 207(o) as amended to January 1, 2007, a public agency shall maintain and preserve the following records:

232.9(1) The number of hours of compensatory time earned each work period, by each employee at the rate of one and one-half hour for each overtime hour worked;

232.9(2) The number of hours of compensatory time used each workweek, or other applicable work period, by each employee;

232.9(3) The number of hours of compensatory time compensated in cash, the total amount paid and the date of payment; and

232.9(4) Any collective bargaining agreement or written understanding or agreement with respect to earning and using compensatory time off.

SOURCE: 29 CFR 553.50.

VOLUNTEERS

481—232.10(91D) General. Individuals performing volunteer services for units of the state and local governments will not be regarded as "employees."

SOURCE: 29 CFR 553.100.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.11(91D) Volunteer defined.

232.11(1) An individual who performs hours of service for a public agency for civic, charitable, or humanitarian reasons, without promise, expectation, or receipt of compensation for services rendered, is considered to be a volunteer.

232.11(2) Individuals are considered volunteers only where their services are offered freely and without pressure or coercion, direct or implied, from an employer.

232.11(3) An individual is not to be considered a volunteer if the individual is otherwise employed by the same public agency to perform the same type of services as those for which the individual proposes to volunteer.

SOURCE: 29 CFR 553.101.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.12(91D) Employment by the same public agency. An individual may not perform hours of volunteer service for a public agency when the hours involve the same type of services that the individual is employed to perform for the same public agency.

SOURCE: 29 CFR 553.102.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.13(91D) Same type of services defined. The duties and all the facts and circumstances in a particular case will be considered in determining whether the volunteer activities constitute the "same type of services" as the employment activities.

SOURCE: 29 CFR 553.103.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.14(91D) Private individuals who volunteer services to public agencies. Individuals who are not employed in any capacity by state or local government agencies are considered volunteers and not employees of such public agencies if the individual's hours of service are provided with no promise, expectation, or receipt of compensation for the services rendered.

SOURCE: 29 CFR 553.104.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.15(91D) Payment of expenses, benefits, or fees.

232.15(1) Individuals would not lose their volunteer status because they are reimbursed for the approximate out-of-pocket expenses incurred incidental to providing volunteer services; for example, payment for the cost of meals and transportation expenses.

232.15(2) Individuals do not lose their status as volunteers because they are reimbursed for tuition, transportation and meal costs involved in their attending classes intended to teach them to perform efficiently the services they provide or will provide as volunteers. Likewise, the volunteer status of individuals is not lost if they are provided books, supplies, or other materials essential to their volunteer training or reimbursement for the cost thereof.

232.15(3) Individuals do not lose their volunteer status if they are provided reasonable benefits by a public agency for whom they perform volunteer services. Benefits would be considered reasonable, for

example, when they involve inclusion of individual volunteers in group insurance plans (such as liability, health, life, disability, workers' compensation) or pension plans or length of service awards, commonly or traditionally provided to volunteers of government agencies.

232.15(4) Individuals do not lose their volunteer status if they receive a nominal fee from a public agency. A nominal fee is not a substitute for compensation and shall not be tied to productivity. However, this does not preclude the payment of a nominal amount on a "per call" or similar basis to volunteer firefighters. The following factors will be among those examined in determining whether a given amount is nominal:

a. The distance traveled and the time and effort expended by the volunteer;

b. Whether the volunteer has agreed to be available around the clock or only during certain specified time periods; and

c. Whether the volunteer provides services as needed or throughout the year. An individual who volunteers to provide periodic services on a year-round basis may receive a nominal monthly or annual stipend or fee without losing volunteer status.

232.15(5) Whether the furnishing of expenses, benefits, or fees would result in individuals losing their status as volunteers can only be determined by examining the total amount of payments made (expenses, benefits, fees) in the context of the economic realities of the particular situation.

FIRE PROTECTION AND LAW ENFORCEMENT
EMPLOYEES OF PUBLIC AGENCIES

481—232.16(91D) Compensable hours of work.

232.16(1) Compensable hours of work generally include all of the time during which an employee is on duty on the employer's premises or at a prescribed workplace, as well as all other time during which the employee is suffered or permitted to work for the employer. The time includes all preshift and postshift activities that are an integral part of the employee's principal activity or that are closely related to the performance of the principal activity, such as attending roll call, writing up and completing tickets or reports, and washing and reracking fire hoses.

232.16(2) Time spent away from the employer's premises under conditions that are so circumscribed that they restrict the employee from effectively using the time for personal pursuits also constitutes compensable hours of work.

232.16(3) Normal home-to-work travel is not compensable, even where the employee is expected to report to work at a location away from the location of the employer's premises.

232.16(4) A police officer, who has completed the tour of duty and who is given a patrol car to drive home and use on personal business, is not working during the travel time, even where the radio must be left on so that the officer can respond to emergency calls.

SOURCE: 29 CFR 553.221.

[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.17(91D) Sleep time.

232.17(1) Sleep time cannot be excluded from the compensable hours of work where:

a. The employee is on a tour of duty of less than 24 hours, and

b. Where the employee is on a tour of duty of exactly 24 hours.

232.17(2) Sleep time can be excluded from compensable hours of work in the case of police officers or firefighters who are on a tour of duty of more than 24 hours, but only if there is an expressed or implied agreement between the employer and the employees to exclude the time. In the absence of such an agreement, the sleep time is compensable. In no event shall the time excluded as sleep time exceed 8 hours in a 24-hour period. If the sleep time is interrupted by a call to duty, the interruption must be counted as hours worked. If the sleep period is interrupted to such an extent that the employee cannot get a reasonable night's sleep (which, for enforcement purposes means at least five hours), the entire time must be counted as hours of work.

SOURCE: 29 CFR 553.222.
[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.18(91D) Early relief. It is a common practice among employees engaged in fire protection activities to relieve employees on the previous shift prior to the scheduled starting time. This practice will not have the effect of increasing the number of compensable hours of work where it is voluntary on the part of the employees. If the practice is required by the employer, the time involved must be treated as compensable hours of work.
SOURCE: 29 CFR 553.225.
[**ARC 8755C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—232.19(91D) Training time.

232.19(1) While time spent in attending training required by an employer is normally considered compensable hours of work, the following are situations where time spent by employees of governments in required training is considered to be noncompensable.

a. Attendance outside of regular working hours at specialized or follow-up training, which is required by law for certification of public and private sector employees within a particular governmental jurisdiction (e.g., certification of public and private emergency rescue workers), does not constitute compensable hours of work for public employees within that jurisdiction and subordinate jurisdictions.

b. Attendance outside of regular working hours at specialized or follow-up training, which is required for certification of employees of a governmental jurisdiction by law of a higher level of government, does not constitute compensable hours of work.

232.19(2) Police officers or firefighters who are in attendance at a police or fire academy or other training facility are not considered to be on duty during those times when they are not in class or at a training session, if they are free to use such time for personal pursuits.

CHAPTER 233
WAGES

[Prior to 11/4/98, see 347—Ch 217]
[Prior to 7/9/25, see Labor Services Division[875] Ch 217]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—233.1(91D) Purpose and scope. This chapter addresses the definition of wages. Wages include the reasonable cost, as determined by the director, to an employer of furnishing any employee with board, lodging, or other facilities. Nothing in this chapter shall excuse any party from complying with any requirement imposed by any other federal, state, or local law, ordinance, regulation, or rule.
[**ARC 8749C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—233.2(91D) Reasonable cost.

233.2(1) Reasonable cost is determined to be not more than the actual cost to the employer of the board, lodging, or other facilities furnished by the employer to the employees.

233.2(2) The cost of furnishing facilities found by the director to be primarily for the benefit or convenience of the employer will not be recognized as reasonable and may not be included in computing wages.

233.2(3) The following is a list of facilities found by the director to be primarily for the benefit or convenience of the employer. The list is intended to be illustrative rather than exclusive:

a. Tools of the trade and other materials and services incidental to carrying on the employer's business.

b. The cost of any construction by and for the employer.

c. The cost of uniforms and of their laundering, where the nature of the business requires the employee to wear a uniform.

SOURCE: 29 CFR 531.3.
[**ARC 8749C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—233.3(91D) Free and clear payment; kickbacks. Whether in cash or in facilities, wages cannot be considered to have been paid by the employer and received by the employee unless they are paid finally and unconditionally or free and clear. The wage requirements will not be met where the employee kicks back directly or indirectly to the employer or to another person for the employer's benefit the whole or part of the wage delivered to the employee. This is true whether the kickback is made in cash or in other than cash.

SOURCE: 29 CFR 531.35.
[**ARC 8749C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—233.4(91D) General characteristics of tips. A tip is a sum presented by a customer as a gift or gratuity in recognition of some service performed for the customer. The payment is to be distinguished from payment of a charge, if any, made for the service. In the absence of an agreement to the contrary between the recipient and a third party, a tip becomes the property of the person in recognition of whose service it is presented by the customer. Only tips actually received by an employee as money belonging to that employee, which the employee may freely use absent of any control by the employer, may be counted in determining whether the employee is a tipped employee and in applying the provisions that govern wage credits for tips.

SOURCE: 29 CFR 531.52.
[**ARC 8749C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—233.5(91D) Payments that constitute tips. In addition to cash sums presented by customers that an employee keeps, tips received by an employee include amounts paid by bank check or other negotiable instrument payable at par and amounts transferred by the employer to the employee pursuant to directions from credit customers who designate amounts to be added to their bills as tips. Special gifts in forms other

than money or its equivalent as above described, such as theater tickets, passes, or merchandise, are not counted as tips received by the employee for purposes of this chapter.

SOURCE: 29 CFR 531.53.

[**ARC 8749C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—233.6(91D) Tip pooling. Where employees practice tip splitting, as where food servers give a portion of their tips to the bussers, both the amounts retained by the food servers and those given the bussers are considered tips of the individuals who retain them. Similarly, where an accounting is made to an employer for information only or in furtherance of a pooling arrangement whereby the employer redistributes the tips to the employees upon some basis to which they have mutually agreed among themselves, the amounts received and retained by each employee as the individual's own are counted as the employee's tips.

SOURCE: 29 CFR 531.54.

[**ARC 8749C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—233.7(91D) Dual jobs. When an employee is employed in two occupations, no tip credit can be taken for hours of employment in the occupation for which the employee does not meet the tip qualification.

SOURCE: 29 CFR 531.56.

CHAPTER 234
RECORDS TO BE KEPT BY EMPLOYERS

[Prior to 10/21/98, see 347—Ch 216]
[Prior to 7/9/25, see Labor Services Division[875] Ch 216]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—234.1(91D) Employees subject to minimum wage.

234.1(1) *Items required.* Every employer shall maintain and preserve payroll or other records containing the following information and data with respect to each employee to whom the Act applies:

a. Name in full, as used for social security recordkeeping purposes, and on the same record, the employee's identifying symbol or number if such is used in place of name on any time, work, or payroll records;

b. Home address, including ZIP code;

c. Basis of pay by indicating the monetary amount paid on a per hour, per day, per week, per piece, commission on sales, or other basis;

d. Hours worked each workday and total hours worked each workweek (for purposes of this rule, a "workday" is any fixed period of 24 consecutive hours and a "workweek" is any fixed and regularly recurring period of seven consecutive workdays);

e. Total additions to or deductions from wages paid each pay period including employee purchase orders or wage assignments. Also, in individual employee records, the dates, amounts, and nature of the items that make up the total additions and deductions;

f. Date of payment and the pay period covered by payment.

234.1(2) Reserved.

SOURCE: 29 CFR 516.2.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.2(91D) Exempt employees. With respect to each exempt employee, employers shall maintain and preserve records containing all the information and data required by subrule 234.1(1), except paragraphs 234.1(1)*"c"* and *"d,"* and, in addition, the basis on which wages are paid in sufficient detail to permit calculation for each pay period of the employee's total remuneration for employment, including fringe benefits and perquisites.

SOURCE:29 CFR 516.3.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.3(91D) Posting of notices. Every employer employing any employees subject to the minimum wage provisions of the Iowa minimum wage Act shall post and keep posted a notice explaining the Act, as prescribed by the director, in conspicuous places in every establishment where such employees are employed so as to permit them to readily observe a copy.

SOURCE: 29 CFR 516.4.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.4(91D) Records to be preserved three years. Each employer shall preserve payroll records for at least three years from the last date of entry, all payroll or other records containing the employee information and data required under any of the applicable rules.

SOURCE: 29 CFR 516.6.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.5(91D) Records to be preserved two years.

234.5(1) *Supplementary basic records.* Each employer required to maintain records under this chapter shall preserve for a period of at least two years basic employment and earnings records. From the date of last entry, all basic time and earning cards or sheets on which are entered the daily starting and stopping time of individual employees, or of separate work forces, or the amounts of work accomplished

by individual employees on a daily, weekly, or pay-period basis (for example, units produced) when those amounts determine, in whole or in part, the pay-period earnings or wages of those employees.

234.5(2) *Records.* Records of additions to or deductions from wages paid include those records relating to individual employees referred to in paragraph 234.1(1)*"e."*

SOURCE:29 CFR 516.6.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.6(91D) Tipped employees.

234.6(1) With respect to each tipped employee whose wages are determined pursuant to the definition of "wage" in Iowa Code section 91D.1(1)*"c,"* the employer shall maintain and preserve payroll or other records containing all the information and data otherwise required and the following:

a. Weekly or monthly amount reported by the employee, to the employer, of tips received (this may consist of reports made by the employees to the employer on IRS Form 4070);

b. Amount by which the wages of each tipped employee have been deemed to be increased by tips as determined by the employer (not in excess of 40 percent of the applicable statutory minimum wage);

c. Hours worked each workday in any occupation in which the employee does not receive tips, and total daily or weekly straight-time payment made by the employer for such hours; and

d. Hours worked each workday in occupations in which the employee receives tips, and total daily or weekly straight-time earnings for such hours.

SOURCE: 29 CFR 516.28.

234.6(2) Federal special minimum wage certificates will be honored at the applicable Iowa minimum wage rate as applied to the certificate.

SOURCE: 29 CFR 516.30.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.7(91D) Industrial homeworkers.

234.7(1) *Definitions.*

"Industrial homework," as used in this rule, means the production by any person in or about a home, apartment, tenement, or room in a residential establishment of goods for an employer who suffers or permits production, regardless of the source (whether obtained from an employer or elsewhere) of the materials used by the homeworker in production.

"Industrial homeworker" or *"homeworker,"* as used in this rule, means any employee employed or suffered or permitted to perform industrial homework for an employer.

234.7(2) *Items required.* Every employer shall maintain and preserve payroll or other records containing the following information and data with respect to every industrial homeworker employed:

a. Name in full, and on the same record, the employee's identifying symbol or number if used in place of name on any time, work, or payroll records. This shall be the same as that used for social security purposes.

b. House address, including ZIP code.

c. Date of birth, if under 19.

d. With respect to each lot of work:

(1) Piece rates paid,

(2) Hours worked on each lot of work turned in,

(3) Wages paid for each lot of work turned in, and

(4) Date of wage payment and pay period covered by payment.

e. With respect to each week:

(1) Hours worked each week,

(2) Wages earned for each week at regular piece rates,

(3) Extra pay due each week for overtime worked, and

(4) Total wages earned each week.

SOURCE: 29 CFR 516.31.

[**ARC 8748C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—234.8(91D) Employees in agriculture. No records need to be maintained by an employer who did not use more than 500 days of agricultural labor in any quarter of the preceding calendar year unless it can be reasonably anticipated that more than 500 days of agricultural labor will be used in at least one calendar quarter of the current calendar year. The 500-day test includes the work of agricultural workers supplied by crew leaders, or farm labor contractors, if the farmer is an employer of the workers, or a joint employer of the workers with the crew leader or farm labor contractor. However, members of the employer's immediate family are not included. A "day" is any day during which an employee does agricultural work for one hour or more.

[Filed ARC 8748C (Notice ARC 8268C, IAB 10/30/24), IAB 1/8/25, effective 2/12/25]
[Editorial change: IAC Supplement 7/9/25]

CHAPTER 235
Reserved

CHAPTER 236
WAGE DISCRIMINATION

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 36]
[Prior to 7/9/25, see Labor Services Division[875] Ch 36]

Chapter rescission date pursuant to Iowa Code section 17A.7: 1/29/30

481—236.1(91A) Definitions.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"The Act" means Iowa Code chapter 91A.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—236.2(91A) General requirements. An employer shall not discharge or in any manner discriminate against any employee because the employee has:

1. Filed any complaint under or related to the Act;
2. Assigned a wage claim to the director;
3. Instituted or caused to be instituted any proceeding under or related to the Act;
4. Cooperated in bringing any action against an employer under or related to the Act;
5. Exercised on the employee's behalf or on behalf of others any right afforded by the Act.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—236.3(91A) Unprotected activities distinguished.

236.3(1) Wage discrimination occurs when an employer engages in adverse action because the employee engaged in a protected activity. An employee's engagement in activities protected by the Act does not automatically render the employee immune from adverse action dictated by nonprohibited considerations.

236.3(2) A violation exists if the protected activity was a substantial reason for the action, or if the discharge or other adverse action would not have taken place "but for" engagement in the protected activity.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—236.4(91A) Complaint under or related to the Act. Discharge or discriminatory actions to an employee because the employee has filed a wage claim or asserted in good faith rights covered by the Act are prohibited.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—236.5(91A) Proceedings related to the Act. Discharge of or discrimination against any employee because the employee has cooperated in bringing any action against an employer related to the Act is prohibited. Protection under the Act would extend to any statements given in the course of judicial, quasi-judicial, and administrative proceedings, including inspections, investigations, or adjudicative functions.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—236.6(91A) Filing of complaint for discrimination or discharge.

236.6(1) Any employee who believes that discrimination in violation of Iowa Code section 91A.10(5) has occurred may, within 30 days after the violation occurs, lodge a complaint with the director alleging the violation. No particular form is required. If, as a result of the investigation, the director determines that Iowa Code section 91A.10(5) has been violated, civil action may be instituted in any appropriate district court to restrain the violations and to obtain other appropriate relief.

236.6(2) Complaints not filed within 30 days of an alleged violation will ordinarily be presumed to be untimely. However, there may be circumstances that would justify tolling of the 30-day period on recognized equitable principles or because of strongly extenuating circumstances.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

481—236.7(91A) Decision of the director.

236.7(1) Upon receipt of all requested information, the director may determine the employee's complaint alleging discharge or discrimination is enforceable and notify the employee of that determination.

236.7(2) Upon a determination that the employee's complaint alleging discharge or discrimination is enforceable, the director will notify the employer of that determination in writing and afford the employer an opportunity to tender settlement within 14 days of the writing prior to initiating judicial proceedings.

236.7(3) Upon a determination that the employee's complaint alleging discharge or discrimination is unenforceable, the director shall notify the employee of that decision in writing. The employee shall have 14 days from the date of the written notification to appeal the decision to the director. If the appeal is not made in writing within the 14-day period, then the employee loses the right to appeal the unenforceable decision.

[**ARC 8682C**, IAB 12/25/24, effective 1/29/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code section 91A.10(5).

CHAPTER 240
CHILD LABOR

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 32]
[Prior to 7/9/25, see Labor Services Division[875] Ch 32]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—240.1(92) Definitions.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Filing date" means the date a document is postmarked by the U.S. Postal Service, if the document is filed by mailing and the U.S. postmark is legible. For a document filed via facsimile transmission, "filing date" means the date the document is transmitted. For any other document, "filing date" means the date the document is received by the director.

"Operated by the child's parents," as used in Iowa Code section 92.17(2), means a business operated by the child's parent or licensed foster parent who has control of the day-to-day operation of the business.

"Serious injury or illness" means an illness or injury requiring medical attention beyond first aid.

"Week," as used in Iowa Code section 92.7, means Sunday through Saturday.

"Willfully volunteering" means performing service for a charitable or public purpose without promise, expectation, or receipt of compensation. A child is a volunteer only if services are offered freely and without direct or implied pressure or coercion from an employer. A child is not a volunteer if the child is otherwise employed by the same charitable or public organization to perform the same type of services as those for which the child proposes to volunteer. A child is a volunteer while working in commercial activities incidental to the stated purpose of a nonprofit organization.

"Working days," as used in rule 481—240.12(92), means Mondays through Fridays but does not include Saturdays, Sundays or federal or state holidays. In computing 15 working days, the day of receipt of any notice is not included and the last day of the 15 working days is included.

This rule is intended to implement Iowa Code chapter 92.

[**ARC 8745C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—240.2 to **240.4** Reserved.

481—240.5(92) Terms. The terms used in Iowa Code section 92.5 are defined and applied as specified in this rule.

240.5(1) *Cleaning products that require personal protective equipment.* Prior to allowing a 14- or 15-year-old to use cleaning products that require personal protective equipment, the employer shall submit to the director the following:

a. The safety data sheets of all such chemicals the minor will use.

b. What personal protective equipment the minor will be using with each chemical that requires it.

c. Proof of training the minor on the use of the required personal protective equipment.

240.5(2) *Definitions.*

"Car cleaning, washing, and polishing" as used in Iowa Code section 92.5(9) does not include using chemicals that recommend personal protective equipment.

"Laundering" as used in Iowa Code section 92.5(12) includes laundering with residential-style machines and includes laundromats. It includes industrial laundering on the following conditions:

1. A parent or guardian gives written permission, to be kept on file by the employer, for the minor to do industrial laundering.
2. The minor is not exposed to any chemicals that recommend personal protective equipment.
3. The employer provides nonslip shoes.
4. The employer provides training on bloodborne pathogens.
5. The minor lifts loads of no more than 30 pounds.

"Light tools" as used in Iowa Code section 92.5(11) includes the listed tools that are up to 30 pounds.

This rule is intended to implement Iowa Code section 92.5.
[**ARC 8745C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—240.6(92) Terms. The terms used in Iowa Code section 92.6A are defined and applied as specified in this rule.

240.6(1) *Definitions.*

"Light assembly work" means assembling with nonpower hand tools and does not include welding.

"Properly licensed" means a minor who holds a current license from the National Pool and Waterpark Lifeguard Training Program in one of the following programs:

1. National Pool and Waterpark Pool Lifeguard.
2. National Pool and Waterpark Lifeguard Training.
3. National Pool and Waterpark Deep Water Lifeguard.

If there is a question whether a specific training course meets the requirements of these rules, information about the course should be submitted to the director for evaluation.

240.6(2) *Waiver of weight limitation.* An employer may submit an application for waiver to allow a 15-year-old person to load, unload, or lift up to 50 pounds for work allowed under Iowa Code section 92.6A(1). The application shall:

a. Include information required by the director in an application form.

b. Be signed by the employer, the minor employee, and a parent or guardian.

c. Include documentation from a physician or physician's assistant that the minor is physically capable of this work activity.

240.6(3) *Waiver to unload lawn machines.* An employer may submit an application consistent with paragraphs 240.6(2)*"a"* through *"c"* for a waiver to allow a 15-year-old person to unload lawn machines under Iowa Code section 92.6A(3).

This rule is intended to implement Iowa Code section 92.6A.
[**ARC 8745C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—240.7 Reserved.

481—240.8(92) Terms. The terms used in Iowa Code section 92.8 are defined and applied as specified in this rule.

240.8(1) "Work activities in or about plants or establishments manufacturing or storing explosives or articles containing explosive components" means:

a. All activities in or about any plant or establishment (other than retail establishments or plants or establishments of the type described in paragraph 240.8(1)*"b"*) manufacturing or storing explosives or articles containing explosive components except where the activities are performed in a nonexplosive area.

b. The following activities in or about any plant or establishment manufacturing or storing small-arms ammunition not exceeding .60 caliber in size, shotgun shells, or blasting caps when manufactured or stored in conjunction with the manufacture of small-arms ammunition:

(1) All activities involved in the manufacturing, mixing, transporting, or handling of explosive compounds in the manufacture of small-arms ammunition and all other activities requiring the performance of any duties in the explosives area in which explosive compounds are manufactured or mixed.

(2) All activities involved in the manufacturing, transporting, or handling of primers and all other activities requiring the performance of any duties in the same building in which primers are manufactured.

(3) All activities involved in the priming of cartridges and all other activities requiring the performance of any duties in the same workroom in which rim-fire cartridges are primed.

(4) All activities involved in the plate loading of cartridges and in the operation of automatic loading machines.

(5) All activities involved in the loading, inspecting, packing, shipping and storage of blasting caps.

c. Definitions.

"Explosives" or *"articles containing explosive components"* means and includes ammunition, black powder, blasting caps, fireworks, high explosives, primers, smokeless powder, and all goods classified and defined as explosives by the Interstate Commerce Commission in regulations for the transportation

of explosives and other dangerous substances by common carriers (49 CFR Parts 71-78, in effect July 1, 1987).

"Nonexplosive area" means an area where none of the work performed in the area involves the handling or use of explosives; the area is separated from the explosives area by a distance not less than that prescribed in the American Table of Distances for the protection of inhabited buildings; the area is separated from the explosives area by a fence or is otherwise located so that it constitutes a definite designated area; and satisfactory controls have been established to prevent employees under 18 years of age within the area from entering any area in or about the plant that does not meet the criteria of this definition.

"Plant or establishment manufacturing or storing explosives or articles containing explosive components" means the land with all the buildings and other structures thereon used in connection with the manufacturing or processing or storing of explosives or articles containing explosive components.

d. Nothing in this subrule prohibits light assembly work that is away from machines, and nothing in this subrule prohibits selling or assisting in the sale of consumer fireworks in accordance with Iowa Code section 10A.519.

This subrule is intended to implement Iowa Code section 92.8(1).

240.8(2) "Logging and the operation of any sawmill, lath mill, shingle mill, or cooperage-stock mill" means all related activities with the following exceptions:

a. Exceptions applying to logging:

(1) Work in offices or in repair or maintenance shops.

(2) Work in the construction, operation, repair or maintenance of living and administrative quarters or logging camps.

(3) Work in timber cruising, surveying, or logging-engineering parties; work in the repair or maintenance of roads, railroads, or flumes; work in forest protection, such as clearing fire trails or roads, piling and burning slash, maintaining firefighting equipment, constructing and maintaining telephone lines, or acting as fire lookout or fire patrol person away from the actual logging operations. This exception does not apply to the felling or bucking of timber, the collecting or transporting of logs, the operation of power-driven machinery, the handling or use of explosives, and work on trestles.

(4) Peeling of fence posts, pulpwood, chemical wood, excelsior wood, cordwood, or similar products, when not done in conjunction with and at the same time and place as other logging activities prohibited by this subrule.

(5) Work in the feeding or care of animals.

b. Exceptions applying to the operation of any permanent sawmill or the operation of any lath mill, shingle mill, or cooperage-stock mill:

(1) Work in offices or in repair or maintenance shops.

(2) Straightening, marking, or tallying lumber on the dry chain or the dry drop sorter.

(3) Pulling lumber from the dry chain.

(4) Cleanup in the lumberyard.

(5) Piling, handling, or shipping of cooperage stock in yards or storage sheds, other than operating or assisting in the operation of power-driven equipment.

(6) Clerical work in yards or shipping sheds, such as done by order persons, tally persons, and shipping clerks.

(7) Cleanup work outside shake and shingle mills, except when the mill is in operation.

(8) Splitting shakes manually from precut and split blocks with a froe and mallet, except inside the mill building or cover.

(9) Packing shakes into bundles when done in conjunction with splitting shakes manually with a froe and mallet, except inside the mill building or cover.

(10) Manual loading of bundles of shingles or shakes into trucks or railroad cars, provided that the employer has on file a statement from a licensed doctor of medicine or osteopathy certifying the minor capable of performing this work without injury. The exceptions in subparagraphs 240.8(2)*"b"*(1) through *"b"*(10) do not apply to a portable sawmill if the lumberyard of the sawmill is used only for the temporary storage of green lumber and in connection with which no office or repair or maintenance shop is ordinarily maintained and work that entails entering the sawmill building.

Definitions.

"All activities in the operation of any sawmill, lath mill, shingle mill, or cooperage-stock mill" means all work performed in or about any mill in connection with storing of logs and bolts; converting logs or bolts into sawn lumber, laths, shingles, or cooperage stock; storing, drying, and shipping lumber, laths, shingles, cooperage stock, or other products of the mills and other work performed in connection with the operation of any sawmill, lath mill, shingle mill, or cooperage-stock mill. The term does not include work performed in the planing-mill department or other remanufacturing departments of any sawmill, or in any planing mill or remanufacturing plant not a part of a sawmill.

"Logging" means all work performed in connection with the felling of timbers; the bucking or converting of timber into logs, poles, piles, ties, bolts, pulpwood, chemical wood, excelsior wood, cordwood, fence posts, or similar products; the collecting, skidding, yarding, loading, transporting and unloading of these products in connection with logging; the constructing, repairing and maintaining of roads, railroads, flumes, or camps used in connection with logging; the moving, installing, rigging, and maintenance of machinery or equipment used in logging; and other work performed in connection with logging. The term does not apply to work performed in timber culture, to timber-stand improvement, or in emergency firefighting.

This subrule is intended to implement Iowa Code section 92.8(2).

240.8(3) "Operation of power-driven woodworking machines" means operating power-driven woodworking machines, including supervision or controlling the operation of the machines, feeding material into the machines, and helping the operator to feed material into the machines, but not including the placing of material on a moving chain or in a hopper or slide for automatic feeding. Also included are activities of setting up, adjusting, repairing, oiling or cleaning power-driven woodworking machines and the operations of off-bearing from circular saws and from guillotine-action veneer clippers.

Definitions.

"Off-bearing" means the removal of material or refuse directly from a saw table or from the point of operation. Operations not considered as off-bearing within the intent of this subrule include:

1. The removal of material or refuse from a circular saw or guillotine-action veneer clipper where the material or refuse has been conveyed away from the saw table or point of operation by a gravity chute or by some mechanical means such as a moving belt or expansion roller, and
2. The following operations when they do not involve the removal of material or refuse directly from a saw table or from the point of operation: the carrying, moving or transporting of materials from one machine to another or from one part of a plant to another; the piling, stacking, or arranging of materials for feeding into a machine by another person; and the sorting, tying, bundling or loading of materials.

"Power-driven woodworking machines" means all fixed or portable machines or tools driven by power and used or designed for cutting, shaping, forming, surfacing, nailing, stapling, wire stitching, fastening or otherwise assembling, pressing or printing wood or veneer.

This subrule is intended to implement Iowa Code section 92.8(3).

240.8(4) "Work activities involving exposure to radioactive substances and to ionizing radiations" means activity in any workroom in which radium is stored or used in the manufacture of self-luminous compound; self-luminous compound is made, processed or packaged; self-luminous compound is stored, used or worked upon; incandescent mantles are made from fabric and solutions containing thorium salts, or are processed or packaged; and other radioactive substances are present in the air in average concentrations exceeding 10 percent of the maximum permissible concentrations in the air recommended for occupational exposure by the National Committee on Radiation Protection, as set forth in the 40-hour week column of Table One of the National Bureau of Standards Handbook No. 69 entitled "Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and in Water for Occupational Exposure," June 5, 1959.

Also included is any other work that involves exposure to ionizing radiations in excess of 0.5 rem per year.

Definitions.

"Ionizing radiations" means alpha and beta particles, electrons, protons, neutrons, gamma and X-ray and all other radiations that produce ionizations directly or indirectly, but does not include electromagnetic radiations other than gamma and X-ray.

"Self-luminous compound" means any mixture of phosphorescent material and radium, mesothorium or other radioactive element.

"Workroom" means the entire area bounded by walls of solid material and extending from floor to ceiling.

This subrule is intended to implement Iowa Code section 92.8(4).

240.8(5) "Operation of elevators and other power-driven hoisting apparatus" means:

a. Work of operating an elevator, crane, derrick, hoist, or high-lift truck, except operating an unattended automatic operation passenger elevator or an electric or air-operated hoist not exceeding one-ton capacity.

b. Work that involves riding on a manlift or on a freight elevator, except a freight elevator operated by an assigned operator.

c. Work of assisting in the operation of a crane, derrick or hoist performed by crane hookers, crane chasers, hookers-on, riggers, rigger helpers, and like activities.

d. Exception. Iowa Code section 92.8(5) does not prohibit the operation of an automatic elevator and an automatic signal operation elevator provided that the exposed portion of the car interior (exclusive of vents and other necessary small openings), the car door and the hoistway doors are constructed of solid surfaces without any opening through which a part of the body may extend; all hoistway openings at floor level have doors that are interlocked with the car door so as to prevent the car from starting until all doors are closed and locked; the elevator (other than hydraulic elevators) is equipped with a device that will stop and hold the car in case of overspeed or if the cable slackens or breaks; and the elevator is equipped with upper and lower travel limit devices that will normally bring the car to rest at either terminal and a final limit switch that will prevent the movement in either direction and will open in case of excessive over-travel by the car.

Definitions.

"Automatic elevator" means any passenger elevator, a freight elevator or a combination passenger-freight elevator, the operation of which is controlled by push buttons in a manner that the starting, going to the landing selected, leveling and holding, and the opening and closing of the car and hoistway doors are entirely automatic.

"Automatic signal operation elevator" means an elevator that is started in response to the operation of a switch (such as a lever or push button) in the car that when operated by the operator actuates a starting device that automatically closes the car and hoistway doors—from this point on, the movement of the car to the landing selected, leveling and holding when it gets there, and the opening of the car and hoistway doors are entirely automatic.

"Crane" means any power-driven machine for lifting and lowering a load and moving it horizontally, in which the hoisting mechanism is an integral part of the machine. The term includes all types of cranes, such as cantilever gantry, crawler, gantry, hammerhead, ingot pouring, jib, locomotive, motor truck, overhead traveling, pillar jib, pintle, portal, semigantry, semiportal, storage bridge, tower, walking jib, and wall cranes.

"Derrick" means any power-driven apparatus consisting of a mast or equivalent members held at the top by guys or braces, with or without a boom, for use with a hoisting mechanism or operating ropes. The term includes all types of derricks, such as A-frame, breast, Chicago boom, gin-pole, guy and stiff-leg derrick.

"Elevator" means any power-driven hoisting or lowering mechanism equipped with a car or platform that moves in guides in a substantially vertical direction. The term includes both passenger and freight elevators (including portable elevators or tiering machines) but does not include dumbwaiters.

"High-lift truck" means any power-driven industrial type of truck used for lateral transportation that is equipped with a power-operated lifting device usually in the form of a fork or platform capable of tiering loaded pallets or skids one above the other. Instead of a fork or platform, the lifting device may consist of a ram, scoop, shovel, crane, revolving fork, or other attachments for handling specific loads. The term means

and includes high-lift trucks known as fork lifts, fork trucks, fork-lift trucks, tiering trucks, or stacking trucks, but does not mean low-lift trucks or low-lift platform trucks that are designed for the transportation of, but not the tiering of, material.

"Hoist" means any power-driven apparatus for raising or lowering a load by the application of a pulling force that does not include a car or platform running in guides. The term includes all types of hoists, such as base-mounted electric, clevis suspension, hook suspension, monorail, overhead electric, simple drum and trolley suspension hoists.

"Manlift" means any device intended for the conveyance of persons that consists of platforms or brackets mounted on, or attached to, an endless belt, cable, chain or similar method of suspension; the belt, cable or chain operating in a substantially vertical direction and being supported by and driven through pulleys, sheaves or sprockets at the top and bottom.

This subrule is intended to implement Iowa Code section 92.8(5).

240.8(6) "Operation of power-driven metal forming, punching and shearing machines" means being the operator of or helper on the following power-driven metal forming, punching, and shearing machines:

a. All rolling machines, such as beading, straightening, corrugating, flanging, or bending rolls; and hot or cold rolling mills.

b. All pressing or punching machines, such as punch presses, except those provided with full automatic feed and ejection and with a fixed barrier guard to prevent the hands or fingers of the operator from entering the area between the dies; power presses; and plate punches.

c. All bending machines, such as apron brakes and press brakes.

d. All hammering machines, such as drop hammers and power hammers.

e. All shearing machines, such as guillotine or squaring shears, alligator shears and rotary shears.

Also included are the occupations of setting up, adjusting, repairing, oiling, or cleaning these machines including those with automatic feed and ejection.

Definitions.

"Forming, punching and shearing machines" means power-driven metal-working machines, other than machine tools, that change the shape of or cut metal by means of tools, such as dies, rolls or knives that are mounted on rams, plungers or other moving parts. Types of forming, punching, and shearing machines enumerated in this subrule are the machines to which the designation is by custom applied.

"Helper" means a person who assists in the operation of a machine covered by this subrule by helping place materials into or remove them from the machine.

"Operator" means a person who operates a machine covered by this subrule by performing functions such as starting or stopping the machine, placing materials into or removing them from the machine, or any other functions directly involved in operation of the machine.

This subrule is intended to implement Iowa Code section 92.8(6).

240.8(7) "Mining" means all work performed underground in mines and quarries; in an underground working, open-pit, or surface part of any coal-mining plant that contribute to the extraction, grading, cleaning, or other handling of coal; on the surface at underground mines and underground quarries; in or about open-cut mines, open quarries, clay pits, and sand and gravel operations; at or about placer mining operations; at or about dredging operations for clay, sand or gravel; at or about bore-hole mining operations; in or about all metal mills, washer plants, or grinding mills reducing the bulk of the extracted minerals; and at or about any other crushing, grinding, screening, sizing, washing or cleaning operations performed upon the extracted minerals except where the operations are performed as a part of a manufacturing process.

The term "mining" does not include:

a. Work performed in subsequent manufacturing or processing operations, such as work performed in smelters; electro-metallurgical plants; refineries; reduction plants; cement mills; plants where quarried stone is cut, sanded and further processed; or plants manufacturing clay, glass or ceramic products.

b. Work performed in connection with petroleum production, in natural gas production, or in dredging operations that are not a part of mining operations, such as dredging for construction or navigation purposes.

c. Work in offices, in the warehouse or supply house, in the change house, in the laboratory, and in repair or maintenance shops not located underground.

d. Work in the operation and maintenance of living quarters.

e. Work outside the mine in surveying, in the repair and maintenance of roads, and in general cleanup about the mine property such as clearing brush and digging drainage ditches.

f. Work of track crews in the building and maintaining of sections of railroad track located in those areas of open-cut metal mines where mining and haulage activities are not being conducted at the time and place that the building and maintenance work is being done.

g. Work in or about surface placer mining operations other than placer dredging operations and hydraulic placer mining operations.

h. Work in metal mills other than in mercury-recovery mills or mills using the cyanide process involving the operation of jigs, sludge tables, flotation cells, or drier-filters; hand-sorting at picking table or picking belts; or general cleanup.

Nothing in this subrule permits any employment of minors in any other activity otherwise prohibited by Iowa Code chapter 92.

This subrule is intended to implement Iowa Code section 92.8(7).

240.8(8) "Work activities in or about slaughtering and meat packing establishments and rendering plants" means:

a. All activities on the killing floor, in curing cellars, and in hide cellars, except the work of messengers, runners, hand truckers and similar activities that require entering workrooms or workplaces infrequently and for short periods of time.

b. All activities involved in the recovery of lard and oils, except packaging and shipping of the products and the operation of lard-roll machines.

c. All activities involved in tankage or rendering of dead animals, animal offal, animal fats, scrap meats, blood, and bones into stock feeds, tallow, inedible greases, fertilizer ingredients, and similar products.

d. All activities involved in the operation or feeding of the following power-driven meat processing machines, including setting up, adjusting, repairing, oiling, or cleaning the machines regardless of the product being processed by these machines (including, for example, the slicing in a retail delicatessen of meat, poultry, seafood, bread, vegetables, or cheese):

(1) Meat patty forming machines, meat and bone cutting saws, knives (except bacon-slicing machines), head splitters, and guillotine cutters;

(2) Snout pullers and jaw pullers;

(3) Skinning machines;

(4) Horizontal rotary washing machines;

(5) Casing-cleaning machines such as crushing, stripping, and finishing machines;

(6) Grinding, mixing, chopping, and hashing machines; and

(7) Presses (except belly-rolling machines).

e. All boning activities.

f. All activities involving the pushing or dropping of any suspended carcass, half carcass, or quarter carcass.

g. All activities involving hand-lifting or hand-carrying any carcass or half carcass of beef, pork, or horse or any quarter carcass of beef or horse.

Definitions.

"Boning" means the removal of bones from meat cuts. It does not include cutting, scraping or trimming meat from cuts containing bones.

"Curing cellar" means the workroom or workplace that is primarily devoted to the preservation and flavoring of meat by curing materials. It does not include the workroom or workplace where meats are smoked.

"Hide cellar" means the workroom or workplace where hides are graded, trimmed, salted, and otherwise cured.

"Killing floor" means the workroom or workplace where cattle, calves, hogs, sheep, lambs, goats, or horses are immobilized, shackled, or killed and the carcasses are dressed prior to chilling.

"Rendering plants" means establishments engaged in the conversion of dead animals, animal offal, animal fats, scrap meats, blood, and bones into stock feeds, tallow, inedible greases, fertilizer ingredients and similar products.

"Slaughtering and meat packing establishments" means places in or about which cattle, calves, hogs, sheep, lambs, goats, or horses, poultry, rabbits or small game are killed, processed or butchered and establishments that manufacture or process meat products or sausage casings from these animals.

This subrule is intended to implement Iowa Code section 92.8(8).

240.8(9) "Operation of certain power-driven bakery machines" means operating, assisting to operate or setting up, adjusting, repairing, oiling, or cleaning any horizontal or vertical dough mixer; batter mixer; bread dividing, rounding, or molding machine; dough brake; dough sheeter; combination bread slicing and wrapping machines; or cake cutting band saw and setting up or adjusting a cookie or cracker machine. However, this definition does not apply to the operation of pizza dough rollers that are a type of dough sheeter that have been constructed with safeguards contained in the basic design so as to prevent fingers, hands, or clothing from being caught in the in-running point of the rollers, that have gears that are completely enclosed, and that have microswitches that disengage the machinery if the backs or sides of the rollers are removed, only when all the safeguards detailed in Iowa Code section 92.8(9) are present on the machinery, are operational, and have not been overridden.

This subrule is intended to implement Iowa Code section 92.8(9).

240.8(10) "Operation of paper-products machines" means operating or assisting to operate any of the following power-driven paper-products machines and includes:

a. An arm-type wire stitcher or stapler, circular or band saw, corner cutter or mitering machine, corrugating and single- or double-facing machine, envelope die-cutting press, guillotine paper cutter or shear, horizontal bar scorer, laminating or combining machine, sheeting machine, scrap-paper baler, or vertical slotter.

b. A platen die-cutting press, platen printing press, or punch press that involves hand feeding of the machine.

c. The activities of setting up, adjusting, repairing, oiling, or cleaning the machines in paragraphs 240.8(10)*"a"* and *"b,"* including those that do not involve hand feeding.

d. Loading material into paper/cardboard balers, except when the machine is powered off and the key is stored in a separate area from the machine.

Definitions.

"Operating or assisting to operate" means all work that involves starting or stopping a machine covered by this subrule, placing materials into or removing them from the machine, or any other work directly involved in operating the machine except loading material into balers when the machine is powered off and the key is stored in a separate area from the machine.

"Paper-products machine" means power-driven machines used in:

1. The remanufacture or conversion of paper or pulp into a finished product, including the preparation of materials for recycling.

2. The preparation of materials for disposal. The term applies to the machines whether they are used in establishments that manufacture converted paper or pulp products, or in any other type of manufacturing or nonmanufacturing establishments.

This subrule is intended to implement Iowa Code section 92.8(10).

240.8(11) "Manufacturing brick, tile and related products" means the manufacture of brick, tile and related products; includes the manufacture of clay construction products and of silica refractory products; and includes:

a. All work in or about establishments in which clay construction products are manufactured, except work in storage and shippings; work in offices, laboratories, and storerooms; and work in the drying departments of plants manufacturing sewer pipe.

b. All work in or about establishments in which silica brick or other silica refractories are manufactured, except work in offices.

Nothing in this subrule permits any employment of minors in any other activities otherwise prohibited by Iowa Code chapter 92.

Definitions.

"Clay construction products" means brick, hollow structural tile, sewer pipe and kindred products, refractories, and other clay products such as architectural terra cotta, glazed structural tile, roofing tile, stove lining, chimney pipes and tops, wall coping, and drain tile. It does not include nonstructural-bearing clay products such as ceramic floor and wall tile, mosaic tile, glazed and enameled tile, faience, and similar tile, nor nonclay construction products such as sand-lime brick, glass brick, or nonclay refractories.

"Silica brick or other silica refractories" means refractory products produced from raw materials containing free silica as its main constituent.

This subrule is intended to implement Iowa Code section 92.8(11).

240.8(12) "Operation of circular saws, band saws, and guillotine shears" means:

a. Operator of or helper on power-driven fixed or portable circular saws, band saws, and guillotine shears except machines equipped with full automatic feed and ejection.

b. Setting up, adjusting, repairing, oiling, or cleaning circular saws, band saws, or guillotine shears.

Definitions.

"Band saw" means a machine equipped with an endless steel band having a continuous series of notches or teeth, running over wheels or pulleys, and used for sawing materials.

"Circular saw" means a machine equipped with an endless steel disc and having a continuous series of notches or teeth on the periphery, mounted on shafting, and used for sawing materials.

"Guillotine shear" means a machine equipped with a movable blade operated vertically and used to shear materials. The term does not include other types of shearing machines using a different form of shearing action, such as alligator shears or circular shears.

"Helper" means a person who assists in the operation of a machine covered by this subrule by helping place materials into or remove materials from the machine.

"Machines equipped with full automatic feed and ejection" means machines covered by this subrule that are equipped with devices for full automatic feeding and ejection and with a fixed barrier guard to prevent completely the operator or helper from placing any body part in the point-of-operation area.

"Operator" means a person who operates a machine covered by this subrule by performing functions such as starting or stopping the machine, placing materials into or removing materials from the machine, or any other function directly involved in the operation of the machine.

This subrule is intended to implement Iowa Code section 92.8(12).

240.8(13) "Wrecking, demolition and shipbreaking operations" means all work, including cleanup and salvage work, performed at the site of the total or partial razing, demolishing, or dismantling of a building, bridge, steeple, tower, chimney, other structure, ship or other vessel.

This subrule is intended to implement Iowa Code section 92.8(13).

240.8(14) "Roofing operations" means all work performed in connection with the application of weatherproofing materials and substances (such as tar or pitch; asphalt prepared paper; tile; slate; metal; translucent materials; and shingles of asbestos, asphalt or wood) to roofs of buildings or other structures. The term also includes all work performed in connection with the installation of roofs, including related metal work such as flashing; and alterations, additions, maintenance and repair, including painting and coating, of existing roofs. The term does not include gutter and downspout work; the construction of the sheathing or base of roofs; or the installation of television antennas, air conditioners, exhaust and ventilating equipment or similar appliances attached to roofs.

This subrule is intended to implement Iowa Code section 92.8(14).

240.8(15) "Excavation" means all activities involved with:

a. Excavating, working in, or backfilling (refilling) trenches, except manually excavated or manually backfilling trenches that do not exceed four feet in depth at any point or working in trenches that do not exceed four feet in depth at any point.

b. Excavating for buildings or other structures or working in the excavations, except manually excavating to a depth not exceeding four feet below any ground surface adjoining the excavation, working

in an excavation not exceeding four feet in depth, or working in an excavation where the side walls are shored or sloped to the angle or repose.

c. Working within tunnels prior to the completion of all driving and shoring operations.

d. Working within shafts prior to the completion of all sinking and shoring operations.

This subrule is intended to implement Iowa Code section 92.8(15).

240.8(16) to **32.8(19)** Reserved.

240.8(20) Work activities prohibited by the director include the following:

a. Activities involved in the operation of power cutters on corn detasseling machines.

b. Activities involved in the driving of power-driven detasseling machines unless the driver has a valid driver's license or a certificate issued by the Federal Extension Service showing that the driver has completed a 4-H farm and machinery program.

This subrule is intended to implement Iowa Code section 92.8(21).

This rule is intended to implement Iowa Code section 92.8.

[**ARC 8745C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—240.9(92) Terms. The terms used in Iowa Code section 92.8A are defined and applied as specified in this rule.

"Incidental" means not a primary activity of the minor.

"Intermittent and for short periods of time" may vary depending on the degree and type of hazard. The frequency and duration of an activity shall make it clear the employee is a learner rather than a production worker. The burden is on the employer to justify more than one hour per day or 20 percent of a shift.

"Written permission" includes a description of the activity that would otherwise be unlawful under Iowa Code section 92.8, including the expected frequency and duration of that activity.

This rule is intended to implement Iowa Code section 92.8A.

[**ARC 8745C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—240.10 Reserved.

481—240.11(92) Civil penalty calculation. An employer who violates this chapter or Iowa Code chapter 92 is subject to a civil penalty of not more than $10,000 per violation as set forth in this rule.

240.11(1) *Counting the number of violations.*

a. Each day that a child works too many hours, works at a prohibited time, or works in a prohibited occupation is a separate violation.

b. The director may waive or reduce the penalty if this method of counting the violations would result in a penalty that is disproportionate to the harm done to the minor(s), the size of the employer, or both.

240.11(2) *Determining whether a violation is a repeat violation.* The higher penalty amounts outlined in subrules 240.11(4) and 240.11(5)for repeat instances may be assessed by the director if citations regarding the earlier instance or instances are final action and occurred less than five years before.

240.11(3) Reserved.

240.11(4) *Hours violations.* If a child is killed while working at a prohibited time or for excessive hours, the civil penalty is $10,000 for each instance. For other time or hour violations, the penalties set forth in this subrule are applied.

a. The civil penalties for working less than 15 minutes before or after an allowed time are as set forth in the following schedule:

Instance	Penalty
First	Warning letter
Second	$100 civil penalty
Third	$200 civil penalty
Fourth	$500 civil penalty
Fifth	$1,000 civil penalty
Each additional instance	$2,500 civil penalty

b. For any time or hours violation not described elsewhere in this subrule, the following civil penalty schedule applies:

Instance	Penalty
First	$100 civil penalty
Second	$250 civil penalty
Third	$500 civil penalty
Fourth	$1,000 civil penalty
Each additional instance	$2,500 civil penalty

240.11(5) *Occupation violations.*

a. If no serious illness or injury results from the work, the civil penalties for allowing or permitting a child to perform prohibited work are as set forth in the following schedule:

Instance	Penalty
First	$500 civil penalty
Second	$1,500 civil penalty
Third	$2,500 civil penalty
Fourth	5,000 civil penalty
Fifth	$7,500 civil penalty
Each additional instance	$10,000 civil penalty

b. If a nonfatal but serious illness or injury results from the work, the civil penalties for allowing or permitting a child to perform prohibited work are as set forth in the following schedule:

Instance	Penalty
First	$2,500 civil penalty
Second	$5,000 civil penalty
Each additional instance	$10,000 civil penalty

c. If a fatality results from the work, the civil penalty for allowing or permitting a child to perform prohibited work is $10,000 for each instance.

240.11(6) *Penalty reduction factors.* Except for violations related to the death of a child while working, the director shall reduce the penalty calculated pursuant to subrules 240.11(1), 240.11(2),240.11(4) and 240.11(5) by the appropriate penalty reduction percentages set forth in this subrule. However, if the director requests information relevant to the penalty assessment and the employer does not provide responsive information, the director will not reduce the penalty.

a. Penalty reduction for size of business. The director shall reduce a penalty as follows:

(1) Thirty-five percent if the employer has 25 or fewer employees.

(2) Fifteen percent if the employer has 26 to 100 employees.

(3) Five percent if the employer has 101 to 250 employees.

b. Penalty reduction for good faith. The director may reduce a penalty by 15 percent based upon evidence that the employer made a good faith attempt to comply with the requirements. If at any time the director warned an employer in writing about a prohibited practice and a civil penalty is being assessed against the same employer for repeating the practice, the director shall not reduce the penalty based on good faith.

c. Penalty reduction for history. The director shall reduce a penalty by 10 percent if the director has not assessed a civil penalty under this chapter within the past five years.

This rule is intended to implement Iowa Code section 92.22.

[**ARC 8745C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—240.12(92) Civil penalty procedures.

240.12(1) *Notice of civil penalty.* The director shall serve a notice of proposed civil penalty by certified mail or in a manner consistent with service of original notice under the Iowa Rules of Civil Procedure with a 15-day grace period before issuing the notice. The notice shall include the following:

a. A statement that the notice proposes a civil penalty assessment for violation of child labor laws.

b. Descriptions of the alleged violations including the provisions allegedly violated, the number of violations, and the proposed penalties.

c. A statement that the employer has the right to request a hearing by filing a notice of contest with the director within 15 working days from the receipt of the notice of proposed civil penalty and that if a notice of contest is not timely filed, the proposed civil penalty will become final agency action.

d. A reference to the applicable procedural provisions.

240.12(2) *Notice of contest.* The civil penalty proposed by the director is final agency action if the employer does not timely file a notice of contest. The filing date for a timely notice of contest is within 15 working days of the date the notice of proposed civil penalty was received by the employer. The notice of contest shall include the name, address, and telephone number of the employer's representative. If a notice of contest is filed by fax, the original shall be mailed to the director.

240.12(3) *Contested case procedures.* Contested case procedures are set forth in the director's rules and Iowa Code chapter 17A.

This rule is intended to implement Iowa Code section 92.22.

CHAPTER 245
EMPLOYER REQUIREMENTS FOR NON-ENGLISH SPEAKING EMPLOYEES

[Prior to 10/21/98, see 347—Ch 160]
[Prior to 7/9/25, see Labor Services Division[875] Ch 160]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—245.1(91E) Purpose and scope. These rules apply to employees employed on an hourly basis. These rules apply to employers whose total employment of employees paid on an hourly basis in this state exceeds 100.

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—245.2(91E) Definitions. The definitions in Iowa Code section 91E.1 are adopted with the following clarifications or additions:

"Act" means the non-English speaking employee services Act, Iowa Code chapter 91E.

"Applicant" means an employer, employee, or non-English speaking employee as those terms are defined in the Act.

"Business day" means those days an office is open and staffed with the person(s) capable of processing employees' requests for transportation provided in Iowa Code section 91E.3(2).

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Work site" means a single physical location where business is conducted or where services or industrial operations are performed (e.g., a factory, mill, store, hotel, restaurant, movie theatre, farm, ranch, bank, sales office, warehouse, or central administrative office).

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—245.3(91E) Knowledge of English. An employee who can understand the following in English is not covered by these rules:

245.3(1) The hours of work.

245.3(2) The hourly wage.

245.3(3) All mandatory and elective benefits.

245.3(4) The job duties.

245.3(5) The safety and health risks of the job and appropriate methods of protection.

245.3(6) Information and training on hazardous chemicals in the employee's work area.

245.3(7) Safety signs and symbols that warn of potential dangers and hazards at the work site.

245.3(8) The purpose of forms used by the employer including:

a. Orientation,

b. Insurance,

c. Accidents at the work site, and

d. Other forms the employee is required to complete or answer.

245.3(9) The employer's requirement to provide an interpreter if more than 10 percent of the employer's employees speak the same non-English language.

245.3(10) Communication with a nurse or other medical personnel at the work site.

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—245.4(91E) Community services referral agent requirements.

245.4(1) *Referral agent available.* The employer provides to employees at each work site the name of the person who is designated as having the primary responsibility as the referral agent. The information shall be provided in the language of the non-English speaking employees.

245.4(2) *Referral agent's responsibilities.* The primary responsibility of the person employed as the employer's referral agent is to develop and maintain a list of contact persons and agencies, telephone

numbers, and addresses of the community services provided in the work site's community. The referral agent assists non-English speaking employees in working with and through those services.

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—245.5(91E) Exemptions.

245.5(1) An applicant desiring an exemption may file a written application with the director that shall include:

a. The name, address and telephone number of the applicant;

b. The address or location of the work site affected;

c. A description of the operation or type of work site;

d. A listing of the section of the Act or rules to which the exemption would apply;

e. A representation of the impact of compliance on the part of the applicant;

f. A representation of why the exemption would be reasonable;

g. If the applicant is an employer, a description of how employees and non-English speaking employees have been informed of the application and their rights to petition the director for a hearing;

h. If the applicant is an employee or non-English speaking employee, a description of how the employer has been informed of the application and the employer's rights to petition the director for a hearing;

i. A request for a hearing if one is desired; and

j. Any other information the director may request.

245.5(2) At the time the application is received, the director shall promptly provide the applicant with a notice of receipt of application that shall be posted where notices are customarily posted for employees. If the applicant is an employee or non-English speaking employee, the employer shall post the notice when provided to the employer.

245.5(3) If the applicant is an employer, any affected employee or an affected non-English speaking employee may request a hearing. If the applicant is an employee or a non-English speaking employee, the affected employer may request a hearing. Any request for a hearing on the application is made by notifying the director within 14 calendar days of posting the notice.

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—245.6(91E) Inspections. This rule pertains to enforcement of the Act.

245.6(1) Inspections shall take place at the times and places directed by the commissioner.

245.6(2) Inspections may be conducted without prior notice.

245.6(3) The commissioner may interview persons at the work site and utilize other reasonable inspection techniques including but not limited to correspondence, telephone conversation, review of written materials, and physical inspection of the work site.

245.6(4) Unnecessary disruptions to the operations at the work site will be avoided.

245.6(5) In the event the commissioner is not permitted to fully conduct an inspection, an administrative warrant may be sought.

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—245.7(91E) Enforcement and penalties. If the director finds a violation subject to a civil penalty, the director will issue a notice of violation to the employer and propose a civil penalty that shall be sent to the employer by certified mail. The employer has 14 calendar days from receipt of the notice of violation or proposed civil penalty to inform the director by mail of the intent to contest the notification or proposed penalty. After receipt of the employer's notification, the director will afford the employer the opportunity for a hearing.

[**ARC 8753C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 91E.

IOWA ATHLETIC COMMISSION

CHAPTER 250
GENERAL REQUIREMENTS FOR ATHLETIC COMMISSION EVENTS
[Prior to 7/9/25, see Labor Services Division[875] Ch 169]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—250.1(90A) Scope and application. Unless otherwise noted, this chapter applies to each event covered by Iowa Code chapter 90A.
[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—250.2(92) Definitions. The following definitions apply to 481—Chapters 250 through 260:

"Commissioner" means the state commissioner of athletics, who is also the director of the department of inspections, appeals, and licensing, or the director's designee.

"Physician" includes a physician associate unless otherwise noted.

"Professional wrestling" is an exhibition in which the participants display their skills in a physical struggle against each other for entertainment and does not comprise a bona fide athletic contest or competition.
[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 6/10/26]

481—250.3(90A) Prohibited events. No promoter shall arrange or advertise:

250.3(1) A match between persons of the opposite sex;

250.3(2) A match between more than two contestants; or

250.3(3) A match with a contestant who is younger than 18 years of age.
[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—250.4(90A) Advance notice of event. A promoter shall submit advance notice of an event, other than a professional wrestling event, to the commissioner on the form provided by the commissioner at least 60 days prior to the event but not more than six months prior to the event. The advance notice includes:

250.4(1) The date, time, type, and location of the event;

250.4(2) The promoter's name and contact information;

250.4(3) One-half of the required event license fee;

250.4(4) Whether the event is indoors or outdoors; and

250.4(5) Other relevant information requested by the commissioner on the form.
[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—250.5(90A) Event license. A promoter may hold a mixed martial arts match, professional boxing match, or wrestling match only if the commissioner has issued an event license.

250.5(1) *Application.* The promoter shall submit a completed application for a license on the form provided by the commissioner.

a. For a professional wrestling event, the application shall be submitted at least seven days prior to the event and include each of the following:

(1) The promoter's name, address, telephone number and other contact information as requested by the commissioner;

(2) The event date, venue name, and venue address;

(3) A nonrefundable $100 event license fee;

(4) The promoter's signature; and

(5) A bond as described in subparagraph 250.5(1)*"b"*(10).

b. For any other covered event, the application shall be submitted at least 60 days prior to the event and include each of the following:

(1) The date, time, type, and location of the event;

(2) The promoter's name, address, and contact information;

(3) One-half of the required event license fee;

(4) A copy of the medical license of the ringside physician or physician associate;

(5) The date, time, and location for the weighing of the contestants;

(6) The emergency medical services company, and the security company;

(7) The name and contact information for the certified law enforcement officer who will attend the event;

(8) The date, time, and location of the ringside physician's or physician associate's examination of the contestants;

(9) Certificates of insurance;

(10) A bond in the sum of $5,000, payable to the State of Iowa, conditioned upon the payment of the tax and penalties imposed by Iowa Code chapter 90A, unless the promoter has a current valid bond on file with the department;

(11) The name and telephone number of the person designated to clean between rounds; and

(12) Other information requested by the commissioner.

250.5(2) *Event license fees.* The nonrefundable event license fee is $100 for a professional wrestling event and $450 for all other covered events. A professional wrestling promoter shall submit the event license fee with the event license application at least 7 days prior to the event. For all other covered events, the promoter shall submit one-half of the event license fee with the advance notice of the event at least 60 days prior to the event, and one-half of the event license fee with the event license application at least 7 days prior to the event.

250.5(3) *Issuance.* The decision to issue an event license is solely within the discretion of the commissioner. The following factors will be considered by the commissioner when deciding whether to issue an event license:

a. Date the promoter filed advance notice of event.

b. The promoter's prior compliance with Iowa Code chapter 90A and applicable rules.

c. Applications for conflicting events.

d. Ability of the commissioner to provide staff.

e. The promoter's history of canceling events.

f. Anticipated tax revenue.

g. Completeness of application package.

h. Whether the event is indoors or outdoors.

250.5(4) *Revocation.* When the commissioner finds that failure to provide adequate security to maintain public safety requires emergency action, the commissioner may immediately suspend the event license, pending license revocation procedures pursuant to Iowa Code chapter 17A.

[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 6/10/26]

481—250.6(90A) Promoter responsibilities. The promoter of a professional wrestling event is responsible for subrules 250.6(1) through 250.6(6). All other promoters are responsible for each of the following:

250.6(1) Ensure compliance with Iowa Code chapter 90A and applicable rules.

250.6(2) Ensure that the referees are familiar with and enforce the rules.

250.6(3) Be responsible for the conduct and attendance of all officials and participants.

250.6(4) Ensure that adequate public safety is maintained at all events. Adequate personnel provided by a private security company and at least one certified law enforcement officer shall be furnished by the promoter.

250.6(5) Ensure that a referee inspects the gloves, bandages, and body of each contestant for foreign substances that might be detrimental to an opponent.

250.6(6) Ensure that contestants have closely trimmed fingernails.

250.6(7) Provide officials and participants who are subject to approval by the commissioner.

250.6(8) Be available to the commissioner throughout an event or identify a designee who will be:

a. Available to the commissioner throughout an event; and

b. Authorized by the promoter to address issues that may arise.

250.6(9) Enter into a written contract with each contestant using the form furnished by the commissioner. Other adequate proof of acceptance of terms will be considered an agreement between a contestant, the contestant's manager and the promoter, pending the actual signing of the contract.

250.6(10) Provide appropriate gloves.

250.6(11) Provide and maintain a container with a solution able to clean bodily fluids from any part of the cage, cage enclosure, or floor.

250.6(12) Ensure that an ambulance and ambulance service authorized at the EMT-B, EMT-I, EMT-P or paramedic specialist level are present at the event. A promoter is fully responsible for all charges assessed by the ambulance service related to the event except:

a. Charges covered by insurance.

b. Charges for services provided to persons other than participants and officials.

250.6(13) Ensure that contestants are wearing appropriate attire, gloves, and other necessary equipment.

250.6(14) Provide a suitable, clean, and private space for contestants to change clothes.

250.6(15) Submit to the ringside physician or physician associate no later than at the time of the physicals test results showing that each contestant scheduled for the event tested negative for the human immunodeficiency, hepatitis B, and hepatitis C viruses within 12 months prior to the event. The contestant shall not participate and the physician or physician associate shall notify the promoter that the contestant is prohibited from participating for medical reasons if any of the following occurs:

a. The promoter does not produce timely proof of testing;

b. The test results are positive;

c. The laboratory is not properly certified;

d. The test was performed more than 12 months prior to the event; or

e. The test results are otherwise deficient.

250.6(16) Obtain from a company authorized to do business in the state of Iowa $10,000 of health insurance coverage on each contestant to provide for medical, surgical and hospital care for injuries sustained and illnesses contracted during the event. If there is a deductible, it shall not exceed $1,500. If the contestant pays for covered care, the insurance proceeds shall be paid to the contestant or the contestant's beneficiaries as reimbursement for payment. In the event of a claim, payment of the deductible is the sole responsibility of the promoter.

250.6(17) Obtain from a company authorized to do business in the state of Iowa no less than $10,000 of life insurance coverage on each contestant to cover death caused by injuries sustained or illnesses contracted during the event.

250.6(18) No later than the day of the event, ensure that each contestant makes available to the commissioner's representative suitable proof of age consisting of one of the following documents:

a. A certified birth certificate;

b. A passport;

c. A certified baptismal record;

d. A U.S. visa;

e. An identification card issued to the contestant by a governmental entity and that includes the contestant's photograph and birth date; or

f. A U.S. resident alien card.

250.6(19) Ensure that participants and officials behave in a professional manner at all times.

250.6(20) Ensure that participants and officials refrain from:

a. Fighting with anyone other than a scheduled opponent;

b. Fighting outside the ring;

c. Throwing objects; and

d. Making obscene gestures.

250.6(21) Establish through mixedmartialarts.com that no contestant on an amateur card has participated in a reported professional mixed martial arts match.

[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 6/10/26]

481—250.7(90A) Taxes. No later than 20 days after an event, a promoter shall file with the commissioner a report and pay all taxes due from the event. The report is submitted on the form provided by the commissioner and includes the promoter's business name, name of a contact for the promoter, date of the event, event license number, location of the event, each price for which tickets were offered or sold,

number of tickets sold at each price, total gate receipts, and signatures of the licensee and the person who completed the report. The promoter shall submit with the report:

250.7(1) Proof of the number of tickets sold and the price of each ticket, which includes appropriate documentation from a ticketing service, if applicable.

250.7(2) Payment to the Iowa department of inspections, appeals, and licensing for the amount calculated using the report.

[**ARC 8835C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 90A.

CHAPTER 251
PROFESSIONAL BOXING

[Prior to 9/24/86, Athletics Commissioner[110] Ch 2]
[Prior to 10/21/98, see 347—Ch 97]
[Prior to 8/16/06, see 875—Ch 97]
[Prior to 7/9/25, see Labor Services Division[875] Ch 173]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—251.1(90A) Limitation of rounds. Ten rounds is the maximum number of rounds for a boxing bout, except for a championship match that may not exceed 15 rounds. Three minutes of boxing will constitute a round, or, by special permission of the commissioner, two minutes. There will be a rest period of one minute between rounds.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.2(90A) Weight restrictions. Permission must be received from the commissioner before a contestant will be permitted to box an opponent 18 pounds heavier than the boxer in the welterweight or middleweight classes or 6 pounds heavier than the boxer in or under the lightweight class.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.3(90A) Injury. If a contestant claims to be injured during the bout, the referee shall stop the bout and request that the attending physician make an examination. If the physician decides that the contestant has been injured as the result of a foul, the physician shall advise the referee of the injury. If the physician is of the opinion that the injured contestant may be able to continue, the physician shall order a five-minute intermission, after which the physician shall make another examination and again advise the referee of the injured contestant's condition. It is the duty of the promoter to have an approved physician in attendance during the entire duration of all bouts.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.4(90A) Knockdown. If a contestant falls due to fatigue or is knocked down by the opponent, the contestant shall be allowed ten seconds in which to rise unassisted. When a contestant falls, the opponent shall go to the farthest neutral corner and remain there during the ten-second count. The referee shall stop counting should the opponent fail to go to a neutral corner.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.5(90A) Limitation on number of bouts. Any boxing contestant who has agreed to take part in a bout of five rounds or more is not permitted to participate in any other bout in Iowa or elsewhere five days prior to the date of the bout unless given permission by the commissioner.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.6(90A) Contestants' arrival. All main event contestants shall be in the city or locale at least 24 hours before the scheduled time of the bout or contest. The promoter shall advise the commissioner of the arrival time. Any exception to this rule shall be approved by the commissioner.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.7(90A) Persons allowed in the ring. No person other than the contestants and the referee may enter the ring during the bout, excepting the seconds between the rounds or the attending physician if asked by the referee to examine an injury to a contestant.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.8(90A) Protection of hands. Only one roll of cotton gauze surgical bandage, not to exceed 2 inches in width and 10 yards in length, shall be used for the protection of each hand. Only one winding of surgeons' adhesive tape not more than 1½ inches in width may be placed directly on the hand to protect

that part of the hand near the wrist. Said tape may cross the back of the hand twice, but not extend within 1 inch of the knuckles when the hand is clenched to make a fist.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.9(90A) Scoring. Twenty points will be the maximum number to be scored in any round. The contestant winning the round will receive ten points and the opponent proportionately less. If the round is even, each contestant will receive ten points.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.10(90A) Gloves. The gloves must not be twisted or manipulated in any way by the contestants or their handlers. If a glove breaks or a string becomes untied during the bout, the referee will instruct the timekeeper to take time out while the glove is being adjusted.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.11(90A) Proper attire. Contestants must wear proper athletic attire. Athletic attire of opposing contestants shall be of contrasting colors. Male contestants shall wear a foul proof protective cup. Female contestants shall wear foul proof pelvic area protection and breast protection.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.12(90A) Use of substances. Excessive use of cocoa butter, petroleum jelly, grease, ointments or strong-smelling liniment by a contestant in a bout will not be permitted.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.13(90A) "Down." A boxer will be deemed down when:

1. Any part of the boxer's body other than the boxer's feet is on the ring floor or while rising from a down position.
2. The boxer is hanging helplessly over the ring ropes, but then is not officially down until so pronounced by the referee, who may count the boxer out either on the ropes or on the floor.

[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.14(90A) Foul. The following activities will be deemed a foul:

1. Hitting below the belt or after the bell has ended the round.
2. Hitting an opponent who is down or who is getting up after being down.
3. Holding an opponent or deliberately maintaining a clinch.
4. Holding an opponent with one hand and hitting with the other hand.
5. Butting with head or shoulders or using the knee.
6. Hitting with inside or butt of the hand, the wrist or the elbow and all backhand blows.
7. Hitting or "flicking" with the open glove or thumbing.
8. Wrestling or roughing at the ropes.
9. Purposely going down without being hit.
10. Striking deliberately at that part of the body over the kidneys.
11. Use of the pivot blow or rabbit punch.
12. Use of abusive or profane language.
13. Failure to obey the referee, or any physical actions that may injure a contestant, except by fair sportsmanlike boxing.

[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.15(90A) Penalties. The referee will penalize a contestant who commits any foul by deducting points from the contestant's score for the round in which the foul is committed. If, in the referee's judgment, the foul is of a serious nature or intentionally inflicted, the referee may award the bout to the contestant who was fouled.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.16(90A) Weight classes. Scale of weights:

	[Pounds]
Flyweight	112
Bantamweight	118
Featherweight	126
Lightweight	135
Welterweight	147
Middleweight	160
Light heavyweight	175
Heavyweight	Over 175

[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.17(90A) Attendance of commissioner. At each boxing card, the commissioner or the commissioner's designee shall be in attendance.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.18(90A) Weighing of contestants. Contestants shall be weighed and examined on the day of the scheduled match by the attending ring physician, at a time and place as allowed by the commissioner. Preliminary boxers may be allowed to weigh in and be examined not later than one hour before the scheduled time of the first match on the card. All weigh-ins will be conducted with the boxer stripped.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.19(90A) General requirements. The commissioner will not approve bout permits for bouts on Christmas Day. "Battles royal" or bouts in which more than two boxing contestants are to appear in the ring at the same time will not be approved. In programs where both amateur and professional contestants appear on the same card, there shall be no more than four amateur bouts of three rounds each. The amateur contests will be under the complete control and supervision of the United States of America Amateur Boxing Federation authority. On each card containing amateur and professional contests, there shall be at least an equal or greater number of bouts of professional boxing. The amateur section of the card shall be held first with at least a 15-minute intermission between the amateur and professional events.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.20(90A) Excessive coaching. Excessive coaching and other detracting activities by seconds, managers or trainers while the bouts are in progress are prohibited. Offenders will be warned and if the violation continues, the offending contestant may be charged with a foul and a loss of points.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.21(90A) Abusive language. The use of foul or abusive language or mannerisms by any person associated with any bout will not be tolerated.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.22 to **251.24** Reserved.

481—251.25(90A) Ring requirements. The ring is not less than 16 nor more than 22 feet square within the ropes, elevated 3½ feet above the floor and has suitable access by steps.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.26(90A) Ring posts. The ring posts will be constructed of metal not more than 4 inches in diameter, extend from the floor of the building to the height of 58 inches above the ring floor and be fastened securely to the floor or to the other posts.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.27(90A) Ropes. The ropes will be a minimum of 3 in number, extending in a triple line 18 inches, 35 inches and 52 inches from the floor of the ring; at least 1 inch in diameter; and wrapped in soft

materials. The ropes may not be closer to the ring posts than 18 inches. If 4 ropes are used, they will be proportionately spaced.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.28(90A) Ring floor. The ring floor will extend beyond the lower rope for a distance of at least 18 inches. The entire floor will be padded to the thickness of at least 1 inch with felt, corrugated paper, matting or other soft materials to be approved by the commissioner. A canvas covering stretched tightly and laced to the ring platform will cover the padding.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.29(90A) Bell. A suitable bell or gong shall be provided and used.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.30(90A) Gloves. Gloves shall not weigh less than 8 ounces for professional bouts and must be new for all main events and bouts of ten rounds or greater. All gloves shall be furnished by the promoter.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.31(90A) Referee's duties. The referee is charged with the enforcement of all rules of the commissioner that apply to the performance and conduct of contestants and their seconds while in the ring.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.32(90A) Chief second. Before starting each bout the referee shall ascertain the name of the chief second in each corner and will hold the chief second responsible for all conduct in the corner.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.33(90A) Naming referee. The promoters will be permitted to name a referee subject to approval by the commissioner.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.34(90A) Reasons for stopping bout. The referee shall stop a bout when the referee deems it advisable because of the physical condition of one or both of the contestants, when one of the contestants is clearly outclassed by an opponent, when the referee decides that the best effort is not being made by a contestant, or for any other reason the referee deems sufficient.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.35(90A) Forfeit of purse. The referee has the power to declare forfeited all or any part of a contestant's purse whenever in the referee's judgment the contestant is not performing in good faith.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.36(90A) Shaking hands. The contestants in all boxing bouts will be instructed by the referee to shake hands after the referee's final instructions and not to do so again until the start of the last scheduled round.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.37(90A) Assessing fouls. The referee will instruct the judges to mark their scorecards accordingly when the referee has assessed a foul and deduct a point from one of the contestants.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.38(90A) Delaying prohibited. The referee shall ensure that a bout is not delayed except to handle damaging fouls. A contestant who employs delay and avoiding tactics will be penalized in the scoring.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.39(90A) Count. When a fallen contestant rises and falls again, without being hit again, the referee shall continue the original count rather than starting a new count.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.40(90A) Intentional foul. In assessing fouls, the referee will weigh the cause as well as the act. A contestant who intentionally receives a foul will be penalized as if they committed the foul.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.41(90A) Use of the ropes. The referee shall penalize a contestant who uses the ropes to gain advantage. The penalty is the deduction of points, and a warning to the contestant against continued use of the ropes to gain advantage.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.42(90A) Attending ring physician. When a boxer has been injured seriously, knocked out or technically knocked out, the referee shall immediately summon the attending ring physician to aid the stricken boxer. Managers, handlers and seconds shall not attend to the stricken boxer, except at the request of the physician.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.43(90A) Technical knockout. Except for championship fights of national recognition, the referee shall stop the fight after a fighter is knocked down three times in one round and declare the opponent a winner on a technical knockout (TKO).
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.44(90A) Timekeeper. The timekeeper shall provide a stopwatch and maintain an accurate time of all bouts. The timekeeper will keep an exact record of time taken out at the request of a referee for an examination of a contestant by the physician, replacing a glove or adjusting any equipment during a round. The timekeeper shall provide a whistle and sound the whistle ten seconds before the start of each round of boxing bouts. The timekeeper shall be impartial.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.45(90A) Seconds. Unless special permission is given by the commissioner, there will not be more than two seconds. Before the start of the bout, each corner shall notify the referee of the name of the chief second.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.46(90A) Requirements for seconds. Seconds shall not enter the ring until the timekeeper indicates the end of the round and they must leave at the sound of the timekeeper's whistle before the beginning of each round. If the chief second or anyone for whom the promoter is responsible, such as a manager, enters the ring before the bell ending the round has sounded, the fight shall be ended and the decision awarded to the opponent. Seconds shall not smoke in the ring or corners.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.47 to **251.49** Reserved.

481—251.50(90A) Use of water. Seconds shall not throw or splash water upon a contestant. A wet sponge may be used between rounds to refresh the contestant. Excess water on the floor of the ring shall be wiped up immediately by the seconds. Water discharged from the mouth of a contestant shall be caught in a bucket.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.51(90A) Stopping the fight. The throwing of a towel into the ring to indicate the defeat of a contestant will not be recognized by the referee. The fight will be stopped when the second or manager appears on the ring apron.
[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.52(90A) Removing objects from ring. Before leaving the ring at the start of each round the seconds shall remove all obstructions, buckets, stools, bottles, towels and robes from the ring floor and ropes.

[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.53(90A) Decision. Each judge shall reach a decision without conferring in any manner with any other official or person. Each judge will make out a scorecard in accordance with the rules governing boxing. At the end of the bout, the decision shall be written on the scorecard and the card shall be given to the commissioner or designee for verification who will then hand the cards to the referee who will then announce the decision. The winner is determined by the majority vote of the three judges, and each judge selects a choice based on the highest number of points.

[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—251.54(90A) Boxer registration. The commissioner participates in the Association of Boxing Commissions (ABC) national boxer registration system that allows authorities from different states to share information concerning boxers. The issuance of a registration card to a boxer does not guarantee the right to participate in a match.

251.54(1) *Application.* A boxer applies for registration in the state where the boxer resides, unless the state where the boxer resides does not participate in the ABC registration system. A person applying for a new or renewal boxer registration completes, signs, and submits to the commission the ABC Boxer's Federal Identification Card Application.

251.54(2) *Attachments.* With the application, the applicant submits a $25 fee, two 1″ × 1.5″ color photographs of the applicant's head, and a copy of a photo identification issued to the applicant by a governmental entity and containing the applicant's photograph and social security number or similar foreign identification number. The applicant must be recognizable in the photographs.

251.54(3) *Expiration.* The registration expires two years from the date of issuance.

251.54(4) *Changes.* The boxer shall notify the commission at the time any of the information on the form changes.

251.54(5) *Denials.* The commissioner may refuse to issue or renew a boxer registration for failure to complete an application package properly.

[**ARC 8839C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 90A.

CHAPTER 252
ELIMINATION TOURNAMENTS

[Prior to 9/24/86, Athletics Commissioner[110] Ch 3]
[Prior to 10/21/98, see 347—Ch 98]
[Prior to 8/16/06, see 875—Ch 98]
[Prior to 7/9/25, see Labor Services Division[875] Ch 174]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—252.1(90A) Purpose and scope. These rules apply to elimination tournaments, which are boxing matches where contestants box one another, two at a time, with one contestant eliminated from the tournament. The elimination continues with winners from the various bouts competing until only one contestant remains undefeated in the weight division. Elimination tournaments are governed by the rules in 481—Chapter 251 and this chapter. Any conflicts between 481—Chapter 251 and this chapter will be resolved in favor of this chapter.

[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.2(90A) Bouts, rounds and rest periods.

252.2(1) Each bout consists of no more than three rounds. Each round is two minutes in length. A rest period of 90 seconds shall be provided between rounds. No contestant shall be permitted to compete in more than three bouts in any 20-hour period.

252.2(2) In national elimination tournaments, when the ability and conditioning of the contestants are assured, the athletics commissioner may authorize two contestants to participate in a fourth bout that determines the championship, provided all bouts are comprised of three 90-second rounds. Under no circumstances will any participant be permitted to compete more minutes in any one 20-hour period than is authorized under the rule allowing three bouts consisting of three two-minute rounds as set forth in this rule.

[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.3(90A) Required protective equipment.

252.3(1) *Hand protection.* Practice wraps (training hand wraps) may be used in lieu of compliance with 481—Chapter 251. Gloves weighing 16 ounces shall be worn by both contestants.

252.3(2) *Body protection.* All male contestants shall wear a foul proof protective cup. All female contestants shall wear foul proof pelvic area protection and breast protection.

252.3(3) *Head protection.* The promoter shall provide and the contestants shall wear protective headgear unless the contestant signs a waiver from it.

252.3(4) *Mouth protection.* A mouthpiece shall be worn by all contestants throughout the bout. If the mouthpiece is knocked from a contestant's mouth, it shall be replaced with no penalty. Any contestant who deliberately spits out a mouthpiece shall be cautioned the first time, the referee shall deduct one point from each judge's scorecard the second time and the contestant will be disqualified the third time. Before being replaced, the mouthpiece will be washed.

252.3(5) *Hair protection.* Where necessary, hair will be secured in a manner that it will not interfere with the vision or safety of either contestant.

[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.4(90A) Weight restrictions. Permission must be received from the commissioner before any contestant will be permitted to box an opponent with a weight differential greater than the following:

Contestants	Weight Differential
Under 135 pounds	6 pounds
135-160 pounds	12 pounds
160-190 pounds	18 pounds
Over 190 pounds	No restriction

[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.5(90A) Down. In determining a technical knockout (TKO) under 481—Chapter 251, a down includes a standing eight count where a contestant is still standing but is in a semiconscious state and cannot, in the opinion of the referee, continue the bout.
[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.6(90A) Suspension. A contestant who suffers a knockout or where the referee stops a fight on a technical knockout (TKO) shall not be permitted to box in the state for a period of 30 days. Before being permitted to fight again, the contestant shall be examined by a physician or physician associate approved by the commissioner.
[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 6/10/26]

481—252.7(90A) Training requirements. Each contestant will have been involved in conditioning for at least 30 days prior to competing in any elimination tournament. Conditioning means a combination of roadwork or jogging and usual training center conditioning exercises. The promoter shall obtain from each contestant prior to the physical examination a written declaration from the contestant, witnessed by at least one other person, that the contestant has met these training requirements.
[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.8(90A) Judges. Three judges, each located on different sides of the ring, will separately score bouts. The referee will not be permitted to act as a judge in scoring a bout.
[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.9(90A) Impartiality of timekeeper. The use of lights on each ring post to indicate the final seconds of a round shall not be considered as signals to interested parties. Corner lights may be used only if consistently activated throughout the elimination tournament and all contestants and officials are informed prior to the start of the tournament about the information conveyed by the round lights.
[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—252.10(90A) Ringside. No person may sit or stand at ringside unless authorized by the commissioner.
[**ARC 8840C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code sections 90A.2 and 90A.5.

CHAPTER 254
MIXED MARTIAL ARTS

[Prior to 10/21/98, see 347—Ch 101]
[Prior to 8/16/06, see 875—Ch 101]
[Prior to 7/9/25, see Labor Services Division[875] Ch 177]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—254.1(90A) Definitions. The definitions contained in Iowa Code chapter 90A and the definitions in this rule apply to this chapter.

"Complimentary tickets," as used in Iowa Code section 90A.9, means tickets that are sold for less than 50 percent of the minimum price available to the general public and tickets for which no fee is charged.

"Contestant" means a person who fights or is scheduled to fight in a match.

"Event" means a program or card of one or more matches covered by Iowa Code chapter 90A.

"Match" means a mixed martial arts match.

"Mixed martial arts" means a style of athletic contest that includes a combination of combative skills from different disciplines of the martial arts, including, without limitation, grappling, kicking and striking.

"MMA" means mixed martial arts.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.2(90A) Equipment specifications.

254.2(1) *Ring requirements.*

a. Size. The cage will not be less than 16 nor more than 36 feet square.

b. Enclosure. The ring will be equipped with an enclosure to limit persons from being tossed from the ring. The enclosure will be at least 6 feet high. The enclosure will consist of supports and enclosing material. The supports will be constructed of rigid material not more than 4 inches in diameter. The supports will be fastened securely to the floor or to the other supports. The supports will be protected by padding to avoid injury to any contestants striking the supports. The enclosing material will have openings not to exceed 4 inches in any direction. The enclosing material will not be rigid and will deflect at least ½ inch when ten pounds of pressure are exerted upon any point. All sharp objects or protrusions will be protected with padding.

c. Height. The ring will not be elevated more than 3½ feet above the floor. Suitable steps for the use of contestants will be provided.

d. Ring floor. The ring floor will be padded to the thickness of at least 1 inch with insulite or other soft materials to be approved by the commissioner. A canvas covering stretched tightly and laced to the ring platform will cover the padding.

e. Ring approval. The promoter shall make the ring and ring enclosure system available in the state of Iowa for inspection by the commissioner at least ten days prior to any event. The specifications in this rule are general, and so actual inspection will be necessary to verify adequate contestant safety prior to the event. If the commissioner has previously inspected the ring used by the promoter, the commissioner may waive the ten-day advance inspection.

254.2(2) *Bell.* A suitable bell or gong shall be provided and used.

254.2(3) *Time keeping.* The timekeeper shall be provided with a stopwatch and whistle.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.3(90A) Event requirements.

254.3(1) *Officials.* Officials consist of three judges, two referees, the physician, and the timekeeper.

254.3(2) *Referee.* The referee is charged with the enforcement of all rules of the commissioner that apply to the performance and conduct of contestants and their seconds while in the ring. The referee shall wear latex gloves at all times while in the ring.

254.3(3) *Timekeeper.* The timekeeper will keep an exact record of time taken out at the request of a referee for an examination of a contestant by the physician, replacing a glove or adjusting any equipment

during a round. The timekeeper will notify contestants at the beginning and end of each round. The timekeeper shall be impartial.

254.3(4) *Participants.* The contestants, seconds and managers are subject to approval by the commissioner.

254.3(5) *Scoring.* Three judges will score each match by evaluating striking, grappling, control of the cage, aggressiveness, and defense. The significance and number of legal strikes shall receive the greatest weight. The number of legal takedowns and reversals shall receive the second greatest weight. Control of the cage shall receive the third greatest weight. Aggression shall receive the fourth greatest weight. Defense shall receive the least weight. The winner of a round shall always receive a score of 10. The score for each round shall be one of the following:

a. If the contestants were evenly matched and neither dominated the round, the score shall be 10-10.

b. If a contestant won a round by a close margin, the score shall be 10-9.

c. If a contestant overwhelmingly dominated a round, the score shall be 10-8.

d. If a contestant totally dominated a round, the score shall be 10-7.

254.3(6) *Length of match.* Each match shall consist of no more than three rounds with no more than five minutes per round. However, the commissioner may authorize experienced contestants to compete in up to five rounds of up to five minutes each. There shall be a one-minute rest period between rounds. An overtime round shall not be allowed.

254.3(7) *Persons allowed in the cage.* No person other than the two contestants and the referee shall enter the cage during the match. However, the physician may enter the cage to examine a contestant upon the request of the referee.

254.3(8) *Seconds.*

a. Unless special permission is granted by the commissioner, there shall be no more than two seconds. Before the start of the match, each corner shall notify the referee of the name of the chief second.

b. Seconds shall not enter the cage except as authorized by this paragraph. The chief second may enter the cage after the timekeeper indicates the end of the round, and the chief second must leave before the beginning of a round.

c. Before leaving the ring at the start of the round, the seconds shall remove all obstructions, buckets, stools, bottles, towels and robes from the ring floor and ring enclosure.

d. Seconds shall not smoke in the ring or corners.

e. Seconds shall wear latex gloves at all times while attending any contestant.

f. Seconds shall not throw or splash water upon a contestant. Excess water on the floor of the cage shall be wiped up immediately. Water discharged from the mouth of a contestant shall be caught in a bucket.

254.3(9) *Decorum of officials and participants.*

a. Except as allowed in this subrule, a promoter, official, or participant shall not:

(1) Intentionally or recklessly strike or injure a person;

(2) Speak or act in a threatening manner toward a person; or

(3) Damage, destroy, or attempt to damage or destroy property.

b. The commissioner may immediately suspend the promoter's license if the promoter does not comply with paragraph 254.3(9)*"a"* or if the promoter does not take appropriate action to curtail activities in violation of paragraph 254.3(9)*"a"* by an official or a participant.

c. The commissioner may immediately suspend the authorization to participate in the event of an official or a participant who does not comply with paragraph 254.3(9)*"a."*

d. A contestant is exempt from subparagraphs 177.3(9)*"a"*(1) and 177.3(9)*"a"*(2) while interacting with the contestant's opponent during a round. However, if the round is stopped by the physician or referee for a time out, subparagraphs 177.4(9)*"a"*(1) and 177.4(9)*"a"*(2) shall apply to a contestant.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.4(90A) Contestants.

254.4(1) *Time between matches.* No contestant shall be permitted to compete if the contestant participated in a boxing, wrestling, kickboxing, judo, or mixed martial arts event within the previous five-day period.

254.4(2) *Age restrictions.* No contestant under the age of 18 years shall be permitted to participate in any event except by special permission of the commissioner.

254.4(3) *Proper attire.* Contestants must wear proper athletic attire. Athletic attire of opposing contestants shall be of contrasting colors.

254.4(4) *Body protection.* All male contestants shall wear a foul proof protective cup. All female contestants shall wear foul proof pelvic area protection and breast protection.

254.4(5) *Mouth protection.* Each contestant shall wear a mouthpiece throughout each match. If the mouthpiece is knocked from a contestant's mouth, it shall be washed and then replaced.

254.4(6) *Gloves.* Gloves shall be approved martial arts gloves. All gloves shall be approved by the commissioner.

254.4(7) *Hand protection.* Only one roll of cotton gauze surgical bandage, not to exceed 2 inches in width and 10 yards in length, shall be used for the protection of each hand. Only one winding of surgeons' adhesive tape, not more than 1½ inches in width, may be placed directly on the hand to protect that part of the hand near the wrist. The tape may cross the back of the hand twice, but shall not extend within 1 inch of the knuckles when the hand is clenched to make a fist. Practice wraps (training hand wraps) may be used in lieu of gauze and tape.

254.4(8) *Hair protection.* Where necessary, hair shall be secured in a manner that it will not interfere with the vision or safety of either contestant.

254.4(9) *Weighing contestants.*

a. The promoter shall arrange for each contestant to be weighed in Iowa during the 24-hour period prior to the event.

b. Accurate scales shall be furnished by the promoter.

c. An official who has been approved by the commissioner shall weigh each contestant and accurately record the contestant's name and weight and the date and time. The weight records shall be submitted to the commissioner on the date of the event.

d. All contestants scheduled for an event shall be weighed on the same date.

e. Contestants shall be weighed in the presence of their opponents and without shoes, clothes or equipment.

f. Unless both contestants weigh more than 205 pounds, there shall not be a weight difference of more than 20 pounds between opponents without the commissioner's consent.

g. No less than two weeks before the event, the promoter shall notify the commissioner when and where contestants will be weighed.

254.4(10) *Examination of contestants.* On the day of the event, at a time and place to be approved by the commissioner, the ringside physician shall conduct a rigorous physical examination to determine the contestant's fitness to participate in an MMA match. A contestant deemed not fit by the physician shall not participate in the event.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.5(90A) Procedural rules.

254.5(1) *Prohibited materials in ring.* Contestants shall not take anything not permitted or prohibited by these rules into the ring or pick up anything thrown into the ring and use the material or object in any way to gain an advantage over an opponent.

254.5(2) *Fouls.* As set forth in this subrule, the referee may penalize a contestant for fouls by disqualifying the contestant or by deducting points. The referee shall immediately determine if each foul is flagrant or accidental. "Flagrant" means the foul was intentional or reckless. "Accidental" means the foul was unintentional or incidental.

a. Disqualification. If the referee determines that the foul was flagrant and the contestant who was fouled is unable to continue due to an injury resulting from the foul, the contestant who committed the foul shall be disqualified.

b. Deduction of points. In determining the number of points to be deducted, the referee shall consider the nature and severity of the foul and its effect upon the opponent. As soon as practical after the foul, the referee shall notify the judges, contestants, and the commissioner of the number of points, if any, to

be deducted from the score of the offender and whether the foul was flagrant or accidental. Points shall be deducted in the round in which the foul occurred.

c. Continuation of match. This paragraph governs how a match shall be continued if a foul that does not result in disqualification occurs.

(1) If a foul occurred but did not cause a serious injury, the referee may order the match to continue after a five-minute delay for recuperation. If subsequent fair blows aggravate the injury inflicted by a foul and the referee orders the contest stopped because of the injury, the outcome will be determined by scoring the completed rounds and the round during which the referee stopped the match.

(2) If an accidental foul results in a concussive impact to the head, if a contestant's chance of winning has been seriously jeopardized as a result of an accidental foul, or if a contestant is not able to continue the match due to an injury caused by an accidental foul, "no contest" will be declared or the winner will be determined based on points as set forth below.

1. "No contest" will be declared if:

- The foul occurs during the first two rounds of a match scheduled for three rounds or fewer.
- The foul occurs during the first three rounds of a match scheduled for four or five rounds.

2. The winner will be determined by scoring the completed rounds and the round during which the referee stopped the match if:

- The foul occurs during the third round of a match scheduled for three rounds.
- The foul occurs during the fourth or fifth round of a match scheduled for four or five rounds.

d. Prohibited acts. Each of the following actions is a foul:

(1) Butting with the head.
(2) Eye gouging of any kind.
(3) Biting.
(4) Hair pulling.
(5) Fishhooking.
(6) Groin attacks of any kind.
(7) Putting a finger into any orifice, cut, or laceration on an opponent.
(8) Small joint manipulation.
(9) Striking to the spine or behind the ears.
(10) Throat strikes of any kind, including, without limitation, grabbing the trachea.
(11) Clawing, pinching or twisting the flesh.
(12) Grabbing the clavicle.
(13) Kicking the head of a grounded opponent.
(14) Kneeing the head of a grounded opponent.
(15) Stomping a grounded opponent.
(16) Striking the kidney.
(17) Dropping or slamming an opponent on an opponent's head or neck.
(18) Throwing an opponent out of the cage or fenced area.
(19) Holding the shorts or gloves of an opponent.
(20) Spitting at an opponent.
(21) Engaging in any unsportsmanlike conduct that causes an injury to an opponent.
(22) Holding the ropes or the fence.
(23) Using abusive language in the cage or fenced area.
(24) Attacking an opponent during a break.
(25) Attacking an opponent who is under the care of the referee.
(26) Attacking an opponent after the bell has ended the round.
(27) Flagrantly disregarding the instructions of the referee.
(28) Timidity, including, without limitation, avoiding contact with an opponent, intentionally or consistently dropping the mouthpiece or faking an injury.
(29) Interference by a second.
(30) Throwing in the towel during competition.
(31) Threatening or intentionally striking or injuring any person other than the contestant's opponent.

254.5(3) *Mouth protection ejected.* If the mouth protection is knocked from a contestant's mouth, it shall be replaced with no penalty.

254.5(4) *Spitting mouth protection.* The referee shall caution a contestant who deliberately spits out a mouthpiece the first time and disqualify the contestant the second time.

254.5(5) *Gloves.* The gloves shall not be damaged or manipulated in any way by the contestants or their handlers. If a glove breaks or becomes undone during a match, the referee will instruct the timekeeper to take time out while the glove is being adjusted or replaced.

254.5(6) *Injury.* If a contestant claims to be injured or when a contestant has been injured seriously or knocked out, the referee shall immediately stop the fight and summon the attending ring physician to make an examination of the stricken fighter. If the physician decides that the contestant has been injured, the physician shall advise the referee of the severity of the injury. If the physician is of the opinion the injured contestant may be able to continue, the physician shall order a five-minute intermission, after which the physician shall make another examination and again advise the referee of the injured contestant's condition. Managers, handlers and seconds shall not attend to the stricken fighter, except at the request of the physician.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.6(90A) Decision. A professional match ends when:

254.6(1) A contestant submits.

254.6(2) The timekeeper indicates that time has expired in the final round of the match. The win will be awarded based on the judges' scores.

254.6(3) The referee stops the match.

254.6(4) The referee disqualifies a contestant for committing a foul pursuant to rule 481—254.5(90A).

254.6(5) A second or manager throws a towel into the cage to indicate the defeat of a contestant. The referee shall stop the match and award the win to the opponent.

254.6(6) A second or manager is in the cage when prohibited. The referee shall stop the match and award the win to the opponent.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.7(90A) Forfeit of purse. The commissioner, in consultation with the referee, has the power to declare forfeited all or any part of a contestant's purse whenever in the commissioner's judgment the contestant was not performing in good faith.

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—254.8(90A) Professional fighter registration. Each professional MMA fighter residing in Iowa shall register with the commissioner consistent with 875—subrules 481—subrules 251.54(2) through 251.54(4).

[**ARC 8843C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code sections 90A.2 and 90A.5.

CHAPTER 255
PROFESSIONAL KICKBOXING

[Prior to 10/21/98, see 347—Ch 100]
[Prior to 8/16/06, see 875—Ch 100]
[Prior to 7/9/25, see Labor Services Division[875] Ch 176]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—255.1(90A) Scope and purpose. Professional kickboxing is a contest within the scope of Iowa Code chapter 90A. The commissioner shall have final decision-making authority concerning the enforcement, implementation, and interpretation of the rules in this chapter.
[**ARC 8842C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—255.2(90A) GLORY rules adopted by reference. The commissioner adopts by reference the kickboxing rules and regulations of GLORY Kickboxing as of January 1, 2023. The GLORY Kickboxing rules shall be used for all GLORY Kickboxing matches and events.
[**ARC 8842C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—255.3(90A) Professional boxing rules followed. Professional kickboxing will conform to the rules in 481—Chapter 251 on:

1. Limitations on number of bouts;
2. Contestants' arrival; and
3. Attendance of commissioner.

[**ARC 8842C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—255.4(90A) Additional provisions.

255.4(1) Officials. The designation of officials, referees, physicians, physician associates, timekeepers, judges, kick counters, scorekeepers, contestants, seconds, and managers is subject to the approval of the commissioner or designee.

255.4(2) "Battles royal" or bouts in which more than two kickboxing contestants are to appear in the ring at the same time shall not be approved.

[**ARC 8842C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 6/10/26]

These rules are intended to implement Iowa Code chapter 90A.

CHAPTER 256
Reserved

CHAPTER 257
PROFESSIONAL WRESTLING

[Prior to 9/24/86, Athletics Commissioner[110] Ch 1]
[Prior to 10/21/98, see 347—Ch 96]
[Prior to 8/16/06, see 875—Ch 96]
[Prior to 7/9/25, see Labor Services Division[875] Ch 172]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—257.1(90A) General requirements. Applications for event licenses and promoter responsibilities for professional wrestling are in 481—Chapter 250.
[**ARC 8838C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—257.2(90A) Separation of boxing and wrestling. No boxing bouts shall be permitted in any professional wrestling show, nor shall any wrestling bouts be permitted in any boxing show.
[**ARC 8838C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—257.3(90A) Safety.

257.3(1) The promoter shall ensure that no one is permitted to wrestle who has any illness or disability that interferes with or prevents the participant from giving a full, complete and satisfactory exhibition of ability and skill, or endangers the wrestler's health or the health of the participant's opponent.

257.3(2) A promoter shall not permit participants to intentionally cut their own skin or the skin of another during the exhibition.

257.3(3) A promoter shall ensure that all areas in which wrestling takes place are matted, equipped, separated from spectators, and otherwise maintained in such a manner as necessary to assure a reasonable degree of safety to the participants and spectators.

257.3(4) In no event shall a participant be permitted to engage in any conduct endangering the health, safety, or well-being of any spectator.

257.3(5) A wrestler may not possess inherently dangerous accessories.
[**ARC 8838C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 90A.

CHAPTER 260
GRANT APPLICATIONS AND AWARDS

[Prior to 10/21/98, see 347—Ch 95]
[Prior to 8/16/06, see 875—Ch 95]
[Prior to 7/9/25, see Labor Services Division[875] Ch 171]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—260.1(90A) Scope. This chapter establishes rules of the commissioner of athletics (commissioner) for the distribution of revenues collected from a professional boxing event pursuant to Iowa Code section 90A.9.

[**ARC 8837C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—260.2(90A) Application process.

260.2(1) The commissioner shall announce the opening of the application process by public notice.

260.2(2) All amateur boxing organizations seeking grant funds must submit an application to the commissioner on forms provided by the commissioner.

260.2(3) Contents. Each application shall contain:

a. A plan of action that details how the awarded funds will be spent and what results and benefits are expected. The action plan includes:

(1) Grant goals, objectives, timeliness, responsible individuals, and evaluation.

(2) Establishing an end result that is beneficial to the sport of amateur boxing.

(3) Number of projected amateur boxing matches to be promoted by the applicant.

b. A budget detailing how the grant funds will be expended.

c. Assurances the applicant will comply with the conditions and procedures for grant administration.

d. A plan for evaluation.

e. Assurances the funds will not be used to retire preexisting financial obligations.

f. Assurances the applicant will comply with the conditions for financial management.

[**ARC 8837C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—260.3(90A) Grant process.

260.3(1) The commissioner shall notify successful applicants and provide to each of them a contract for signature. This contract shall be signed by an official with authority to bind the applicant and be returned to the commissioner prior to the award of any funds under this program.

260.3(2) If the applicant and the commissioner are unable to successfully negotiate a contract, the commissioner may withdraw the award offer.

260.3(3) Applications shall be received by May 1 of each calendar year for an award the following fiscal year. Payment will be processed within 60 days of a grant award by the commissioner.

260.3(4) Grants are awarded for a 12-month period and may be renewed for a second year.

[**ARC 8837C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—260.4(90A) Evaluation. The grantee shall cooperate with the commissioner and periodically provide requested information to determine how the goals and objectives of the project are being met.

[**ARC 8837C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code section 90A.7.

HEALTH AND SAFETY DIVISION: FIRE SAFETY BUREAU

CHAPTER 261
FIRE SAFE CIGARETTE CERTIFICATION PROGRAM

[Prior to 11/26/25, see Public Safety Department[661] Ch 61]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—261.1(101B) Definitions. For purposes of these rules, the following definitions apply:

"Certified fire safe cigarette" means a unique cigarette brand style that meets the following criteria:

1. The unique cigarette brand style has been tested in accordance with the test method prescribed in Iowa Code section 101B.4 or has been approved pursuant to Iowa Code section 101B.4.
2. The unique cigarette brand style meets the performance standard specified in Iowa Code section 101B.4 or has been approved pursuant to Iowa Code section 101B.4.
3. A written certification for the unique cigarette brand style has been filed by the manufacturer with the department and in accordance with rule 481—261.4(101B).
4. Packaging for the unique cigarette brand style has been marked in accordance with rule 481—261.5(101B).

"Cigarette" means a cigarette as defined in Iowa Code section 453A.1, but does not mean a tobacco product as defined in Iowa Code section 453A.1.

"Department" means the same as defined in Iowa Code section 101B.2(3).

"Fire safe cigarette" means a cigarette certified pursuant to this chapter.

"Manufacturer" means the same as defined in Iowa Code section 101B.2(4).

"Sale" means the same as defined in Iowa Code section 101B.2(8).

"Unique cigarette brand style" means a cigarette with a unique combination of the following:

1. Brand or trade name.
2. Style, such as light or ultra light.
3. Length.
4. Circumference.
5. Flavor, such as menthol or chocolate, if applicable.
6. Presence or absence of a filter.
7. Type of package, such as soft pack or box.

"Wholesaler" means the same as defined in Iowa Code section 101B.2(10).

[**ARC 7870C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—261.2(101B) Certification and fee. A certification application and fee shall be submitted to the department online pursuant to Iowa Code section 101B.5. An application is incomplete unless all required information is submitted, including required attachments and fees. Applications will not be processed until complete.

[**ARC 7870C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—261.3(101B) Test method, performance standard, test report. Unless otherwise excepted therein, each unique cigarette brand style submitted for certification under this chapter shall meet all of the criteria in Iowa Code section 101B.4.

261.3(1) *Alternate test method.* A manufacturer proposing an alternate test method and performance standard pursuant to this rule will submit such proposal to the department on a form provided by the department.

a. The department will approve or deny the proposed alternate test method and performance standard within 60 days of receipt of such proposal and will send notification of such approval or denial by certified mail, return receipt requested, to the address provided by the manufacturer.

b. The department may approve an alternate test method and performance standard if it is determined to be equivalent to the test method and performance standard prescribed in Iowa Code section 101B.4. If an alternate test method and performance standard is approved pursuant to this rule, the manufacturer may

employ the alternate test method and performance standard to certify the cigarette in accordance with Iowa Code section 101B.4.

261.3(2) *Acceptance of alternate test method approved by another state.* A manufacturer proposing an alternate test method and performance standard approved by another state will use the procedure specified in subrule 261.3(1) and provide documentation verifying that the alternate test method and performance standard have been approved by another state as provided in Iowa Code section 101B.4(9).

261.3(3) *Retention of reports of testing.* A manufacturer shall maintain copies of all test reports pursuant to Iowa Code section 101B.4(10).

261.3(4) *Testing performed or sponsored by the department.* Testing performed or sponsored by the department will be conducted in accordance with Iowa Code section 101B.4.

261.3(5) *Changes to the manufacture of a certified fire safe cigarette.* If a manufacturer with any cigarette certified under this chapter makes any changes to the cigarette thereafter, retesting of the cigarette may be required in accordance with Iowa Code section 101B.5(6).

[**ARC 7870C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—261.4(101B) Notification of certification. A manufacturer or wholesaler shall provide copies of certifications pursuant to Iowa Code section 101B.6.

[**ARC 7870C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—261.5(101B) Marking fire safe cigarette packaging. Cigarettes that have been certified in accordance with Iowa Code section 101B.5 shall be marked as provided in Iowa Code section 101B.7. The recommended marking is the letters "FSC" displayed in accordance with any of the methods described in Iowa Code section 101B.7.

[**ARC 7870C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—261.6(17A) Violations and penalties. A person who violates any provision of Iowa Code chapter 101B or of this chapter is subject to a civil penalty of an amount no greater than specified by Iowa Code section 101B.8. Notice of a civil penalty will be provided by mail or by personal service. A person subject to a civil penalty may appeal the imposition of the penalty by requesting a contested case hearing, in writing, within 20 days. An appeal of a civil penalty is subject to the provisions of 7—Chapter 2506 and 481—Chapter 10 governing contested cases.

[**ARC 7870C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapter 101B.

CHAPTER 264
CONSUMER FIREWORKS RETAIL SELLER LICENSING AND WHOLESALER REGISTRATION

[Prior to 11/26/25, see Public Safety Department[661] Ch 265]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—264.1(10A) Definitions. The following definitions apply:

"APA 87-1" means the same as defined in Iowa Code section 10A.519(1)*"a."*

"Commercial fireworks" means large firework devices that are explosive materials intended for use in firework displays and designed to produce visible or audible effects by combustion, deflagration, or detonation, as set forth in 27 CFR 555 and 49 CFR 172 in effect on January 1, 2001, and APA Standard 87-1, Standard for the Construction and Approval for Transportation of Fireworks, Novelties, and Theatrical Pyrotechnics.

"Community group" means the same as defined in Iowa Code section 10A.519(1)*"b."*

"Consumer fireworks" means the same as defined in Iowa Code section 10A.520(1)*"a."*

"Display fireworks" means the same as defined in Iowa Code section 727.2(1)*"b."*

"First-class consumer fireworks" means the same as defined in Iowa Code section 10A.519(1)*"c."*

"NFPA 1124" means the National Fire Protection Association (NFPA) Standard 1124, published in the Code for the Manufacture, Transportation, Storage, and Retail Sales of Fireworks and Pyrotechnic Articles, 2006 edition.

"Retailer" means the same as defined in Iowa Code section 10A.519(1)*"d."*

"Second-class consumer fireworks" means the same as defined in Iowa Code section 10A.519(1)*"e."*

"Serious violation" means any of the following activities occurring at a licensed retail location selling consumer fireworks:

1. Commission of a criminal offense, punishable by one year or more incarceration.
2. Selling consumer fireworks to a minor.
3. Selling commercial fireworks.

"Wholesaler" means the same as defined in Iowa Code section 10A.520(1)*"b."*

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.2(10A) Sale of consumer fireworks—safety standards. Any retailer or community group offering for sale at retail any first-class or second-class consumer fireworks, as described in American Pyrotechnics Association (APA) Standard 87-1, as published in December 2001, shall do so in accordance with the National Fire Protection Association (NFPA) Standard 1124, published in the Code for the Manufacture, Transportation, Storage, and Retail Sales of Fireworks and Pyrotechnic Articles, 2006 edition (hereinafter referred to as "APA 87-1" and "NFPA 1124," respectively).

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.3(10A) Sales allowed. A retailer or community group that is issued a license pursuant to this chapter is authorized to sell consumer fireworks as defined in this chapter. However, sales are permitted only as follows.

264.3(1) *Prohibited sale or transfer to persons under 18 years of age.*

a. A retailer or community group shall not transfer consumer fireworks, as described in APA 87-1, chapter 3, to a person who is under 18 years of age.

b. A person, firm, partnership or corporation shall not sell consumer fireworks to a person who is less than 18 years of age.

264.3(2) *Exceptions for persons under 18 years of age.*

a. A retailer selling or offering for sale consumer fireworks as described in APA 87-1, chapter 3, shall supervise any employees who are less than 18 years of age who are involved in the sale, handling, or transport of consumer fireworks in the course of their employment for the retailer.

b. A community group selling or offering for sale consumer fireworks as described in APA 87-1, chapter 3, shall ensure that any persons who are less than 18 years of age who are involved in the sale,

handling, or transport of consumer fireworks by the community group, whether the persons less than 18 years of age are paid or unpaid, shall do so under the direct supervision of an adult member of the community group.

264.3(3) *Dates of sale.* A retailer or community group may sell consumer fireworks in accordance with Iowa Code section 10A.519(4)*"c."*

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.4(10A) License fees—consumer fireworks seller licenses.

264.4(1) *Fee schedule.* The fee schedule for consumer fireworks seller licenses is as provided in Iowa Code section 10A.519(3). License fees shall be paid before issuance of a license.

264.4(2) *Administrative license fee.* A nonrefundable administrative fee of $100 is required with every application for a consumer fireworks retail sales license. The $100 fee will be applied to the license fee if the license is issued.

264.4(3) *Changing license class or amount.* If a retailer or consumer group is issued a license for the retail sale of one class or amount of consumer fireworks, and changes to a class or amount that requires a higher license fee, the retailer or consumer group shall pay only the difference in the two fees. The license for the lower class will be invalid after the issuance of the new license.

264.4(4) *No refund after issuance.* Payment is final when the license is issued, and the fee will not be refunded.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.5(10A) Application and issuance of license.

264.5(1) *Application form and instructions.* The application for a license for retail sales of consumer fireworks shall be made to the department as described on the department's website. A license is required for each location where the retail sales of consumer fireworks are conducted.

264.5(2) *Application requirements.* Applications and the accompanying plans must include all required information and must be prepared in accordance with the application instructions. An application will not be processed until all required information is received in the form required by the instructions.

264.5(3) *Proof of insurance.* Applicants must provide proof of and maintain commercial general liability insurance with minimum per occurrence coverage of at least one million dollars and aggregate coverage of at least two million dollars.

264.5(4) *Issuance and display of license.* If all of the requirements are met and the correct license fee is paid, the department will issue the license. The license must be clearly displayed at the location where the retail sales of consumer fireworks for which the license was issued are conducted.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.6(10A) Fireworks site plan review, approval, and inspection.

264.6(1) *Plan approval.* The retailer or community group shall submit to the department the proposed plan(s), including any required site plan(s) for the location(s) and for any building(s) or structure(s), whether permanent or temporary, that will be used for the sale and storage of fireworks. Requirements and exceptions for site plan submittal and approval are outlined on the department's website.

NOTE: Regarding the incorporation of the reference to NFPA 102, 1995 edition, Standard for Grandstands, Folding and Telescopic Seating, Tents, and Membrane Structures into NFPA 1124 concerning tents and membrane structures, Sections 7.3.5 and 7.4.8.1.2 of NFPA 1124 should be read together with Section A.7.4.8.1.2 in the Explanatory Material in Annex A to NFPA 1124 and used for the purposes of (1) determining the requirements for the means of egress in tents and membrane structures except as modified by Section 7.3.14 of NFPA 1124 for special requirements for the retail sales of consumer fireworks, and (2) to prohibit the use, discharge, or ignition of fireworks within the tent or membrane structure. The other provisions of NFPA 1124, including the sections relating to the retail sales of consumer fireworks in tents or membrane structures, remain applicable.

264.6(2) *Plans not required.* In the discretion of the department, plans may not be required in the following circumstances:

a. For permanent buildings or temporary structures in which only exempt amounts of first-class or second-class consumer fireworks are offered for sale, pursuant to section 7.3.1, NFPA 1124. The licensee shall make current product inventory information available to the department upon request.

b. For permanent buildings that were licensed in the previous year and for which there have been no changes to the site, building or floor plan. If any changes have been made, a new or updated plan shall be submitted.

c. For permanent buildings that are currently classified as a retail occupancy and in which second-class consumer fireworks are the only fireworks that are offered for sale.

264.6(3) *Inspections.*

a. Every location and any building or structure where the retail sales of consumer fireworks are conducted or where consumer fireworks are stored is subject to an inspection at any time while engaged in the retail sale of consumer fireworks.

b. Prior to the sale of consumer fireworks, each retail location shall satisfy one of the following requirements:

(1) A site inspection of the retail location by the department or the department's designee.

(2) Attestation at the time of the application by the person submitting the application that the retail location will comply with NFPA 1124 and these rules.

c. If a retail location license is revoked, the location shall be inspected in accordance with subparagraph 264.6(3)*"b"*(1) prior to engaging in the sale of consumer fireworks the following year.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.7(10A) Unauthorized use of license. Only the retailer or the community group that is issued the license may use that license for the retail sales of consumer fireworks. Each license will be issued for a specific location. The license may not be transferred to or used at any other location.

264.7(1) If the retailer or community group to which the license is issued changes the location where the retail sale of consumer fireworks will be sold, the retailer or community group shall submit a new application and all required information for the new site and pay the applicable license fee. The application must be reviewed and approved in order for a new license to be issued.

264.7(2) The licensed retailer or community group or the authorized representative of the licensed retailer or community group must be personally present at all times when consumer fireworks are being sold.

264.7(3) No unlicensed retailer, community group, person, group of people, business, or other for-profit or nonprofit entity may use the license issued to another retailer or community group for the retail sales of consumer fireworks, unless the licensed retailer or community group or the authorized representative of the licensed retailer or community group is personally present at all times when consumer fireworks are being sold.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.8(10A) Revocation of license. If the department or department's designee determines during a physical site inspection that a serious violation has occurred, the license for that retail location may be immediately revoked. Vendors will be given the opportunity to remedy violations that are not deemed serious violations.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.9(10A) Consumer fireworks wholesalers—registration—safety—insurance.

264.9(1) *Annual registration.* Each wholesaler shall register with the department annually by completing and submitting the annual registration form and paying the fee as required by Iowa Code section 10A.520(3).

264.9(2) *Safety regulations—storage and transfer.* Each wholesaler shall comply with all of the requirements of NFPA 1124 for the storage and transfer of consumer fireworks.

264.9(3) *Insurance required.* While operating as a wholesaler, each wholesaler shall maintain commercial general liability insurance with minimum per-occurrence coverage of at least $1 million and aggregate coverage of at least $2 million.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.10(10A) Consumer fireworks fee fund. All fees received from the licenses issued for the retail sale of consumer fireworks and the annual registration fees received from wholesalers of consumer fireworks will be deposited into the consumer fireworks fee fund pursuant to Iowa Code section 10A.519. The department will use the fees deposited into this fund to fulfill the responsibilities of the department for the administration and enforcement of Iowa Code sections 10A.519 and 10A.520.
[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—264.11(10A) Local fire protection and emergency medical service providers grant program. The local fire protection and emergency medical service providers grant program is established by Iowa Code section 10A.519(7). The grant program is funded with only those moneys from the consumer fireworks fee fund that are not needed by the department to fulfill the responsibilities of the department for the administration and enforcement of Iowa Code sections 10A.519 and 10A.520.

264.11(1) *Definitions.* The following definitions apply.

"Emergency medical services" means the same as defined in Iowa Code section 147A.1(5).

"Fire protection service" means volunteer or paid fire departments.

264.11(2) *Authorized applicants.* Any local fire protection service provider or local emergency medical service provider in the state of Iowa may apply for grant funds from the local fire protection and emergency medical service providers grant program.

264.11(3) *Authorized purposes of grant funds.* The grant funds in the local fire protection and emergency medical service providers grant program may be used for the following in order of priority:

a. To establish or provide fireworks safety education programming to members of the public.

b. To purchase necessary enforcement, protection, or emergency response equipment related to the sale and use of consumer fireworks in this state.

c. To purchase necessary enforcement, protection, or emergency response equipment.

264.11(4) *Application.* An application for grant funds should be made to the department. The application form may be found on the department's website. Applications must be received on or before June 30 of each year. The application will include all of the following:

a. The application shall be signed by a person who is an official, owner, or another person who has authorization to sign on behalf of the fire protection service or the emergency medical service provider entity.

b. The specifics of the proposed use of the grant funds.

(1) If the application is for equipment, the applicant should include a detailed description of the equipment, the company or entity from which the purchase will be made, the cost, and a justification as to how this equipment purchase fits the purposes of the grant program.

(2) If the application is for safety education programming, the application should include a detailed description of the programming, the specific people who will be providing the programming, and a description of the materials to be purchased and used.

c. The amount of grant funds requested.

264.11(5) *Approval of application.* The director of the department will review the application and determine whether to make the award of grant funds. The director of the department has the sole discretion in determining whether or not to award funds from the grant program to the applicant and the amount of funds awarded to each applicant. Factors to be considered in making an award of grant funds include, but are not limited to:

a. The amount of grant funds available.

b. The number of applicants for grant funds.

c. The proposed use of the grant funds and whether the use is consistent with the approved program purposes.

d. Whether the applicant has previously been approved for grant funds from this program.

e. The applicant's use of any previous grant funds received from the program.

264.11(6) *Award of tangible property.* Should the department determine that the purpose of the grant program is better served by awarding tangible property, such as equipment, rather than funds, the department has the authority to award tangible property purchased with grant funds rather than disperse grant funds to the applicants.

264.11(7) *Report required.* All grant recipients shall file a report with the department that lists the amount of grant funds received and the purpose(s) for which the grant funds were spent. The department may conduct an inspection or audit to determine compliance with the rules and purposes of the grant program, in addition to any other authorized audits.

[**ARC 7872C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

CHAPTER 265
LICENSING OF FIRE PROTECTION SYSTEM CONTRACTORS

[Prior to 11/26/25, see Public Safety Department[661] Ch 275]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—265.1(100C) Establishment of program. The fire protection system contractor license is established pursuant to Iowa Code chapter 100C.

265.1(1) *Licensure required.* No person shall act as a fire extinguishing system contractor without being currently licensed as a fire protection system contractor by the department.

265.1(2) *Endorsement.* The licensure of each contractor will carry an endorsement for one or more of the following:

a. Automatic sprinkler system installation.

b. Special hazards systems installation.

c. Preengineered dry chemical or wet agent fire suppression systems installation.

d. Preengineered water-based fire suppression systems in one- and two-family dwellings installation.

e. Automatic sprinkler system maintenance inspection.

f. Special hazards system maintenance inspection.

g. Preengineered dry chemical or wet agent fire suppression systems maintenance inspection.

h. Preengineered water-based fire suppression systems in one- and two-family dwellings maintenance inspection.

Any person acting as a fire extinguishing system contractor shall do so only in relation to systems covered by the endorsements on the contractor's license.

265.1(3) *Length of licensure.* A license is normally for one year and expires on March 31 each year. A license which is effective on a date other than April 1 is effective on the date on which the license is issued and expires on March 31 of the following year.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—265.2(100C) Definitions. The following definitions apply:

"Aerosol fire extinguishing system" means a system that uses a combination of microparticles and gaseous matter to flood the protected area. The particles are in a vapor state until discharged from the device. On release, a chain reaction produces solid particles and gaseous matter to suppress the fire.

"Automatic dry-chemical extinguishing system" means the same as defined in Iowa Code section 100C.1(4).

"Automatic fire extinguishing system" means the same as defined in Iowa Code section 100C.1(5).

"Automatic sprinkler system" means the same as defined in Iowa Code section 100C.1(6).

"Carbon dioxide extinguishing system" means the same as defined in Iowa Code section 100C.1(7).

"Clean agent" means an electrically nonconducting, volatile, or gaseous fire extinguishant that does not leave a residue upon evaporation.

"Deluge system" means the same as defined in Iowa Code section 100C.1(8).

"Dry chemical" means a powder composed of very small particles, usually sodium bicarbonate-, potassium bicarbonate-, or ammonium phosphate-based, with added particulate material supplemented by special treatment to provide resistance to packing, resistance to moisture absorption (caking), and the proper flow capabilities.

"Dry pipe sprinkler system" means an extinguishing system employing automatic sprinklers that are attached to a piping system containing air or nitrogen under pressure, the release of which (as from the opening of a sprinkler) permits the water pressure to open a valve known as a dry pipe valve, which allows the water to flow into the piping system and out the opened sprinklers.

"Fire extinguishing system contractor," "fire protection system contractor," or *"contractor"* means the same as defined in Iowa Code section 100C.1(10).

"Foam extinguishing system" means the same as defined in Iowa Code section 100C.1(11).

"Halogenated extinguishing system" means the same as defined in Iowa Code section 100C.1(12).

"Hybrid-inert water mist system" means a system that combines the benefits of inert gas systems and water mist systems to extinguish fires. These systems provide both extinguishment and cooling to prevent reignition utilizing nontoxic, non-ozone-depleting hybrid media.

"Layout" means drawings, calculations and component specifications to achieve the specified system design installation. "Layout" does not include design.

"Listed" means equipment, materials, or services included in a list published by a nationally recognized independent testing organization concerned with evaluation of products or services that maintains periodic inspection of production of listed equipment or materials or periodic evaluation of services and whose listing states that either the equipment, material, or service meets appropriate designated standards or has been tested and found suitable for a specified purpose.

"Maintenance inspection" means the same as defined in Iowa Code section 100C.1(13).

"Preengineered dry chemical or wet agent fire suppression system" means any system having predetermined flow rates, nozzle pressures and limited quantities of either agent. These systems have specific pipe sizes, maximum and minimum pipe lengths, flexible hose specifications, number of fittings and number and types of nozzles prescribed by a nationally recognized testing laboratory. The hazards against which these systems protect are specifically limited by the testing laboratory as to the type and size based upon actual fire tests. Limitations on hazards that can be protected against by these systems are contained in the manufacturer's installation manual, which is referenced as part of the listing.

"Preengineered water-based system" means a packaged, water-based sprinkler system including all components connected to a water supply and designed to be installed according to pretested limitations.

"Responsible managing employee" means the same as defined in Iowa Code section 100C.1(14).

"Special hazards system" means a fire extinguishing system utilizing fire detection and control methods to release an extinguishing agent, other than water connected to a dedicated fire protection water supply.

"Wet agent" or *"wet chemical"* means an aqueous solution of organic or inorganic salts or a combination thereof that forms an extinguishing agent.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—265.3(100C) Responsible managing employee. Each fire extinguishing system contractor shall designate a responsible managing employee and may designate one or more alternate responsible managing employees. A contractor may designate more than one responsible managing employee in order to satisfy the requirements for more than one endorsement as provided in subrule 265.1(2). If more than one responsible managing employee is designated, the contractor will indicate for which responsible managing employee each designated alternate managing employee serves as an alternate.

265.3(1) The responsible managing employee or employees shall be designated in the application for licensure, and, if a responsible managing employee is no longer acting in that role, the contractor shall so notify the department, in writing, within 30 calendar days.

265.3(2) If a responsible managing employee is no longer acting in that role and the contractor has designated an alternate responsible managing employee, the alternate responsible managing employee will become the responsible managing employee and the contractor shall so notify the department, in writing, within 30 calendar days of the date on which the preceding responsible managing employee ceased to act in that role. If the contractor has designated more than one alternate responsible managing employee, the notice to the department will indicate which alternate responsible managing employee has assumed the position of responsible managing employee.

265.3(3) If a responsible managing employee designated by a fire extinguishing system contractor is no longer acting in the role of responsible managing employee and the contractor has not designated an alternate responsible managing employee, the contractor shall designate a new responsible managing employee and shall notify the department, in writing, of the designation within six months of the date on which the former responsible managing employee ceased to act in that capacity. If the department has not been notified of the appointment of a new responsible managing employee within six months of the date on which a responsible managing employee ceased serving in that capacity, the department shall suspend the license of the fire protection system contractor.

265.3(4) Training requirements. A responsible managing employee or an alternate responsible managing employee shall meet one of the requirements for the following endorsements:

a. Automatic sprinkler system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in fire extinguishing system design, or

(2) Current certification by the National Institute for Certification in Engineering Technologies (NICET) at level III or above in water-based systems layout.

b. Special hazards system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in fire extinguishing system design, or

(2) Current certification by the NICET at level III or above in special hazard systems.

c. Preengineered dry chemical or wet agent fire suppression system installation:

(1) Current certification by the NICET at level II or above in special hazard systems, or

(2) Current certification by the National Association of Fire Equipment Distributors (NAFED) in preengineered kitchen fire suppression systems, preengineered industrial fire suppression systems, or both, or

(3) Satisfactory completion of any training required by the manufacturer for the installation of any system the contractor installs.

d. Preengineered water-based fire suppression system in one- and two-family dwellings installation:

(1) Current certification by the NICET at level II or above in special hazard systems, or

(2) Satisfactory completion of any training required by the manufacturer for the installation of any system the contractor installs.

e. Automatic sprinkler system maintenance inspection:

(1) Current certification from the NICET at level II in water-based system layout, or

(2) Current certification by the NICET at level II or above in inspection and testing of water-based systems.

f. Special hazards system maintenance inspection:

(1) Current certification by the NICET at level II or above in special hazard systems.

(2) Reserved.

g. Preengineered dry chemical or wet agent fire suppression system maintenance inspection:

(1) Current certification by the NICET at level I or above in special hazard systems, or

(2) Current certification by the NAFED in preengineered kitchen fire suppression systems, preengineered industrial fire suppression systems, or both, or

(3) Satisfactory completion of any training required by the manufacturer for the maintenance and inspection of any system the contractor inspects.

h. Preengineered water-based fire suppression system maintenance inspection:

(1) Current certification by the NICET at level I or above in special hazard systems, or

(2) Satisfactory completion of any training required by the manufacturer for the maintenance and inspection of any system the contractor inspects.

265.3(5) Training or testing approval. Satisfactory completion of an applicable training or testing program that has been approved by the department may replace any of the endorsement requirements of subrule 265.3(4). In any case in which training or testing that is offered to satisfy the requirements of this rule is required to be approved by the department, such approval is required prior to acceptance of the training or testing to meet licensure requirements. Approval by the department of any training or testing to meet these requirements may be sought by the individual, firm, or organization providing the testing or training or initiated by the department. Any individual, firm or organization seeking to obtain such approval will apply to the department no later than July 1 every odd-numbered year. Program information and any other documentation requested by the department for consideration shall be submitted to the department. Training and testing approved by the department is listed on the department's licensing website.

265.3(6) License applicability. Work performed by a contractor subject to these rules shall be limited to areas of competence indicated by the specific certification or other training requirements met by the responsible managing employee. Work performed in the state shall not begin prior to:

a. Receipt of new or renewed license issued by the department to the applicant, or

b. Receipt of written approval to perform work prior to issuance of a new or renewed license from the department to the applicant.

265.3(7) Portable fire extinguisher requirements. Nothing in this rule shall be interpreted to conflict with or diminish any requirement for training or certification for anyone installing or servicing a fire extinguishing system or portable fire extinguisher set forth in any rule of the department or local fire ordinance or standard adopted by reference therein.

265.3(8) Licensure of persons licensed in other jurisdictions. A fire protection system contractor license may be issued without examination to a person licensed in other jurisdictions if the conditions of Iowa Code section 272C.12 are met.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—265.4(100C) License requirements. A fire extinguishing system contractor shall meet all of the following requirements in order to receive licensure from the department and continue to meet all requirements throughout the period of licensure. The contractor shall notify the department, in writing, within 30 calendar days if the contractor fails to meet any requirement for licensure.

265.4(1) The contractor shall designate one or more responsible managing employees as provided in rule 481—265.3(100C).

265.4(2) The contractor shall maintain general and complete operations liability insurance for the layout, installation, repair, alteration, addition, maintenance, and inspection of automatic fire extinguishing systems in the following amounts: $500,000 per person, $1,000,000 per occurrence, and $1,000,000 property damage.

a. The carrier of any insurance coverage maintained to meet this requirement shall notify the department 30 days prior to the effective date of cancellation or reduction of the coverage.

b. The contractor shall cease operation immediately if the insurance coverage required by this subrule is no longer in force and other insurance coverage meeting the requirements of this subrule is not in force. A contractor shall not initiate any installation of a fire extinguishing system that cannot reasonably be expected to be completed prior to the effective date of the cancellation of the insurance coverage required by this subrule and of which the contractor has received notice, unless new insurance coverage meeting the requirements of this subrule has been obtained and will be in force upon cancellation of the prior coverage.

265.4(3) The contractor shall maintain current registration as a contractor with the labor services division of the Iowa workforce development department in compliance with Iowa Code chapter 91C and 481—Chapter 465. The contractor shall provide a copy of the contractor's current registration from the Iowa workforce development department with the contractor's application for licensure.

EXCEPTION: A contractor will not be required to maintain registration with the labor services division of the Iowa workforce development department if the contractor does not meet the definition of "contractor" for purposes of Iowa Code chapter 91C and 481—Chapter 465. Written documentation of such exemption must be provided to the department at the time of application for licensure as a fire protection system contractor.

265.4(4) The contractor shall maintain compliance with all other applicable provisions of law related to operation in the state of Iowa and of any political subdivision in which the contractor is performing work.

265.4(5) A license may be renewed only if the licensee has completed recertification of the applicable requirements relative to the endorsements for which the licensee is renewing.

265.4(6) Any individual while serving honorably on federal active duty, state active duty, or national guard duty, as defined in Iowa Code section 29A.1, applying for licensure as a fire protection system contractor shall apply for licensure following 481—Chapter 7.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—265.5(100C) Application and fees.

265.5(1) *Application.* Any contractor seeking licensure as a fire protection system contractor shall submit a completed application form to the department. The application shall be filed no later than 30

days prior to the date of beginning work in this state or the date on which an existing license expires. An application form may be obtained from the department or the department's website. The application form shall be submitted with all required attachments and the required application fee. An application will not be considered complete unless all required information is submitted, including required attachments and fees, and will not be processed until it is complete.

265.5(2) *License fee.*

a. The license fee is $500 for one year.

b. If an application for licensure provides for more than one responsible managing employee pursuant to rule 481—265.3(100C), there will be an additional fee of $50 for each responsible managing employee beyond the first. If an application for licensure provides for more than one endorsement as provided in subrule 265.1(2), there will be an additional fee of $50 for each endorsement beyond the first.

c. The department will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

265.5(3) *Payment.* The license fee may be submitted electronically or delivered by draft, check, or money order in the applicable amount payable to the department. Cash payments are not accepted.

265.5(4) *Amended license.*

a. The fee for issuance of an amended license is the difference between the original license fee paid and changes in endorsement(s) or responsible managing employee(s), if applicable. The fee shall be submitted with the request for an amended license.

b. A contractor will request and the department will issue an amended license for any of the following reasons, and a fee does not apply:

(1) A change in the designation of a responsible managing employee;

(2) A change in insurance coverage; or

(3) A change in any other material information included in or with the initial or renewal application. A change in the address of the business is a material change.

c. Other changes in the information required in the application form, including renewal of insurance coverage with a new expiration date, shall be reported to the department but will not require issuance of an amended license or payment of the amended license fee.

265.5(5) *Attachments.* Required attachments to the application for licensure are outlined on the department's website.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—265.6(100C) Complaints. Complaints regarding the performance of any licensed contractor, failure of a licensed contractor to meet any of the requirements established in Iowa Code chapter 100C or this chapter or any other provision of law, or operation as a fire extinguishing system contractor without licensure may be filed with the department. Complaints should be as specific as possible and clearly identify the contractor against whom the complaint is filed. Complaints should be submitted in writing to the department as indicated on the department's website. A complaint may be submitted anonymously, but if the name and contact information of the complainant are provided, the complainant will be notified of the disposition of the complaint.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—265.7(100C) Denial, suspension, or revocation of licensure; civil penalties; and appeals. The department may deny, suspend, or revoke the license of a contractor, or assess a civil penalty to the contractor, if any provision of these rules or any other provision of law related to operation as a fire extinguishing system contractor is violated.

265.7(1) *Denial.* The department may deny an application for licensure for reasons including, but not limited to:

a. If the applicant makes a false statement on the application form or in any other submission of information required for license. "False statement" means providing false information or failing to include material information, such as a previous criminal conviction or action taken by another jurisdiction, when requested on the application form or otherwise in the application process.

b. If the applicant fails to meet all of the requirements for licensure established in this chapter.

c. If the applicant is currently barred for cause from acting as a fire extinguishing system contractor in another jurisdiction.

d. If an applicant has previously been barred for cause from operating in another jurisdiction as a fire extinguishing system contractor and if the basis of that action reflects upon the integrity of the applicant in operating as a fire extinguishing system contractor. If an applicant is found to have been previously barred for cause from operating as a fire extinguishing system contractor in another jurisdiction and is no longer barred from doing so, the department will evaluate the record of that action with regard to the likelihood that the applicant would operate with integrity as a licensed contractor. If an applicant is denied under this provision, the applicant will be notified of the specific reasons for the denial.

e. Conviction of a felony offense, if the offense directly relates to the profession or occupation of the licensee, in the courts of this state or another state, territory or country. "Conviction" as used in this subrule includes a conviction of an offense that if committed in this state would be a felony without regard to its designation elsewhere, and includes a finding or verdict of guilt made or returned in a criminal proceeding even if the adjudication of guilt is withheld or not entered. A certified copy of the final order or judgment of conviction or plea of guilty in this state or in another state constitutes conclusive evidence of the conviction. If an applicant is denied under this provision, the applicant will be notified of the specific reasons for the denial.

f. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the licensee's profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

g. Willful or repeated violations of the provisions of this chapter.

265.7(2) *Suspension.* A suspension of a license may be imposed by the department for any violation of these rules or Iowa Code chapter 100C or for a failure to meet any legal requirement to operate as a fire extinguishing system contractor in this state. Failure to provide any notice to the department as provided in these rules will be grounds for suspension. An order of suspension will specify the length of the suspension and will specify that correction of all conditions that were a basis for the suspension is a condition of reinstatement of the license even after the period of the suspension.

265.7(3) *Revocation.*

a. A revocation is a termination of a license. A license may be revoked by the department for repeated violations or for a violation that creates an imminent danger to the safety or health of individuals protected by a fire extinguishing system incorrectly installed by a licensed contractor or when information comes to the attention of the department which, if known to the department when the application was being considered, would have resulted in denial of the license.

b. A new application for licensure from a contractor whose license had previously been revoked will not be considered for a period of one year after the effective date of the revocation and, in any event, until every condition that was a basis for the revocation has been corrected. The department may specify in the revocation order a longer period than one year before a new application for licensure may be considered. When a new application for licensure from a contractor whose license was previously revoked is being considered, the applicant may be denied licensure based upon the same information that was the basis for revocation even after any such period established by the department has expired.

265.7(4) *Disqualifications for criminal convictions limited.* A person's conviction of a crime may be grounds for the denial, revocation, or suspension of a license in circumstances authorized by Iowa Code section 272C.15.

265.7(5) *Civil penalties.* The department may impose a civil penalty of up to $500 per day during which a violation has occurred and for every day until the violation is corrected. A civil penalty may be imposed in lieu of or in addition to a suspension or may be imposed in addition to a revocation. A civil penalty will not be imposed in lieu of a revocation.

265.7(6) *Appeals.* Any denial, suspension, or revocation of a license, or any civil penalty imposed upon a licensed contractor under this rule may be appealed by the contractor within 14 days of receipt of the notice by submitting a written request for a contested case appeal to the department. An appeal is subject to the provisions of 7—Chapter 2506 and 481—Chapter 10 governing contested cases.

[**ARC 7873C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapter 100C.

CHAPTER 266
LICENSING OF FIRE PROTECTION SYSTEM TECHNICIANS
[Prior to 11/26/25, see Public Safety Department[661] Ch 276]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—266.1(100D) Establishment of program. The fire protection system technician license is established pursuant to Iowa Code chapter 100D.

266.1(1) *Licensing required.* A person shall not act as a fire protection system installer and maintenance worker without being currently licensed as a fire protection system technician by the department, except as provided in Iowa Code sections 100D.2(1) and 100D.11.

a. For purposes of Iowa Code section 100D.2(1)*"a,"* "direct supervision" means that the person supervising the person performing the work shall be on the job site while the work being supervised is performed.

b. For purposes of Iowa Code section 100D.2(1)*"d,"* the work performed that is subject to the provisions of this chapter must be within the scope of the endorsement(s) of the licensed contractor employing the responsible managing employee.

266.1(2) *Endorsement.* Any person acting as a fire protection system installer and maintenance worker shall do so only in relation to systems and work covered by the endorsements on the person's license. The license of each technician shall carry an endorsement for one or more of the following:

a. Automatic sprinkler system installation.

b. Special hazards system installation.

c. Preengineered dry chemical or wet agent fire protection systems installation.

d. Preengineered water-based fire protection systems in one- and two-family dwellings installation.

e. Automatic sprinkler system maintenance inspection.

f. Special hazards system maintenance inspection.

g. Preengineered dry chemical or wet agent fire protection systems maintenance inspection.

h. Preengineered water-based fire protection systems in one- and two-family dwellings maintenance inspection, or

i. Fire protection technician trainee.

266.1(3) *Length of licensure.* Licensure shall normally be for two years and will expire on March 31 of the second year after the license has been issued. A license that is effective on a date other than April 1 will be effective on the date on which the license is issued and will expire the next March, after one year has passed from the date on which the license was issued. A technician trainee license may be renewed once and a person may work as a technician trainee for a maximum of four years.

[**ARC 7874C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—266.2(100D) Definitions. The following definitions apply:

"Aerosol fire extinguishing system" means a system that uses a combination of microparticles and gaseous matter to flood the protected area. The particles are in a vapor state until discharged from the device. On release, a chain reaction produces solid particles and gaseous matter to suppress the fire.

"Apprentice fire protection system installer and maintenance worker" means the same as defined in Iowa Code section 100D.1(1).

"Automatic fire extinguishing system" means the same as defined in Iowa Code section 100C.1(5).

"Automatic sprinkler system" means the same as defined in Iowa Code section 100C.1(6).

"Carbon dioxide extinguishing system" means the same as defined in Iowa Code section 100C.1(7).

"Clean agent" means an electrically nonconducting, volatile, or gaseous fire extinguishant that does not leave a residue upon evaporation.

"Deluge system" means the same as defined in Iowa Code section 100C.1(8).

"Department" means the same as defined in Iowa Code section 100D.1(2).

"Dry chemical" means a powder composed of very small particles, usually sodium bicarbonate-, potassium bicarbonate-, or ammonium phosphate-based, with added particulate material supplemented by

special treatment to provide resistance to packing, resistance to moisture absorption (caking), and the proper flow capabilities.

"Dry pipe sprinkler system" means an extinguishing system employing automatic sprinklers that are attached to a piping system containing air or nitrogen under pressure, the release of which (as from the opening of a sprinkler) permits the water pressure to open a valve known as a dry pipe valve, which allows the water to flow into the piping system and out the opened sprinklers.

"Fire extinguishing system contractor," "fire protection system contractor," or *"contractor"* means the same as defined in Iowa Code section 100D.1(4).

"Fire protection system" means the same as defined in Iowa Code section 100D.1(5).

"Fire protection system installation" means the same as defined in Iowa Code section 100D.1(6).

"Fire protection system installer and maintenance worker" or *"fire protection system technician"* means the same as defined in Iowa Code section 100D.1(8). A fire protection system technician shall be an employee of a fire protection system contractor or, if employed by anyone other than a fire protection system contractor, shall perform work requiring licensing as a fire protection system technician only on property owned or occupied by such employer and may obtain a license if the employer is not a licensed contractor.

"Fire protection system maintenance" means the same as defined in Iowa Code section 100D.1(7).

"Foam extinguishing system" means the same as defined in Iowa Code section 100C.1(11).

"Halogenated extinguishing system" means the same as defined in Iowa Code section 100C.1(12).

"Hybrid-inert water mist system" means a system that combines the benefits of inert gas systems and water mist systems to extinguish fires. These systems provide both extinguishment and cooling to prevent reignition utilizing nontoxic, non-ozone-depleting hybrid media.

"Layout" means drawings, calculations and component specifications to achieve the specified system design installation. "Layout" does not include design.

"Listed" means equipment, materials, or services included in a list published by a nationally recognized independent testing organization concerned with evaluation of products or services that maintains periodic inspection of the production of listed equipment or materials or periodic evaluation of services and whose listing states that either the equipment, material, or service meets appropriate designated standards or has been tested and found suitable for a specified purpose.

"Preengineered dry chemical or wet agent fire suppression system" means any system having predetermined flow rates, nozzle pressures and limited quantities of either agent. These systems have specific pipe sizes, maximum and minimum pipe lengths, flexible hose specifications, number of fittings and number and types of nozzles prescribed by a nationally recognized testing laboratory. The hazards against which these systems protect are specifically limited by the testing laboratory as to the type and size based upon actual fire tests. Limitations on hazards that can be protected against by these systems are contained in the manufacturer's installation manual, which is referenced as part of the listing.

"Preengineered fire protection system" means the same as defined in Iowa Code section 100D.1(9).

"Preengineered water-based fire protection system" means a packaged, water-based sprinkler system including all components connected to a water supply and designed to be installed according to pretested limitations.

"Responsible managing employee" means the same as defined in Iowa Code section 100D.1(10).

"Routine maintenance" means the same as defined in Iowa Code section 100D.1(11).

"Special hazards system" means a fire extinguishing system utilizing fire detection and control methods to release an extinguishing agent, other than water connected to a dedicated fire protection water supply.

"Wet agent" or *"wet chemical"* means an aqueous solution of organic or inorganic salts or a combination thereof that forms an extinguishing agent.

[**ARC 7874C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—266.3(100D) Licensing requirements. A fire protection system installer and maintenance worker shall meet all of the following requirements in order to receive a license from the department and shall continue to meet all requirements throughout the period of licensure. A licensee shall notify the department, in writing, within 30 calendar days if the licensee fails to meet any requirement for licensure.

266.3(1) *Compliance.* Each licensee shall maintain compliance with all other applicable provisions of law related to operation in the state of Iowa and in any political subdivision in which the licensee is performing work.

266.3(2) *Training requirements.* An applicant for a license shall meet one of the requirements for the following endorsements:

a. Automatic sprinkler system installation:

(1) Current certification by the National Inspection Testing and Certification Corporation (NITC) in the STAR Fire Sprinkler Fitting Mastery Examination, or

(2) Current certification by the National Institute for Certification in Engineering Technologies (NICET) at level I or above in water-based system layout, or

(3) Current certification by the NICET at level I or above in inspection and testing of water-based systems.

b. Special hazards system installation:

(1) Current certification by the NICET at level I or above in special hazards systems.

(2) Reserved.

c. Preengineered dry chemical or wet agent fire protection system installation:

(1) Current certification by the NICET at level I or above in special hazard systems, or

(2) Current certification by the National Association of Fire Equipment Distributors (NAFED) in preengineered kitchen fire extinguishing systems, preengineered industrial fire extinguishing systems, or both, or

(3) Satisfactory completion of any training required by the manufacturer for the installation of any system the technician installs, or

(4) Current certification by the Fire Protection Certification LTD (FPC) in commercial kitchen fire suppression system service, preengineered fire suppression maintenance, or both.

d. Preengineered water-based fire protection systems in one- and two-family dwellings installation:

(1) Current certification by the NICET at level I or above in special hazard systems, or

(2) Satisfactory completion of any training required by the manufacturer for the installation of any system the technician installs.

e. Automatic sprinkler system maintenance inspection:

(1) Current certification by the NITC in the STAR Fire Sprinkler Fitting Mastery Examination, or

(2) Current certification by the NICET at level I or above in water-based systems layout, or

(3) Current certification by the NICET at level I or above in inspection and testing of water-based systems.

f. Special hazards system maintenance inspection:

(1) Current certification by the NICET at level I or above in special hazard systems.

(2) Reserved.

g. Preengineered dry chemical or wet agent fire protection system maintenance inspection:

(1) Current certification by the NICET at level I or above in special hazard systems, or

(2) Current certification by the NAFED in preengineered kitchen fire extinguishing systems, preengineered industrial fire extinguishing systems, or both, or

(3) Satisfactory completion of any training required by the manufacturer for maintenance and inspection of any system the technician inspects, or

(4) Current certification by the FPC in commercial kitchen fire suppression system service, preengineered fire suppression maintenance, or both.

h. Preengineered water-based fire protection systems in one- and two-family dwellings installation:

(1) Current certification by the NICET at level I or above in special hazard systems, or

(2) Satisfactory completion of any training required by the manufacturer for maintenance and inspection of any system the technician inspects.

i. Fire protection system technician trainee: Submission of a completed application no later than the first day of employment. A fire protection system technician trainee may perform work that requires licensure under this chapter only under the direct supervision of a licensed fire protection system technician or responsible managing employee whose license contains one or more endorsements as provided in

subrule 265.1(2) or 266.1(2), and that work must be within the scope of work authorized by the endorsements held by the supervising fire protection system technician or responsible managing employee. At least one licensed fire protection system technician or responsible managing employee must be present for every three apprentice fire protection system installers and maintenance workers or fire protection system technician trainees performing work related to fire protection systems.

266.3(3) *Continuing education.* A license may be renewed only if the licensee has completed recertification of the applicable certification requirements relative to the endorsement(s) for which the license is being renewed.

266.3(4) *Training or testing approval.* Satisfactory completion of an applicable training or testing program approved by the department may replace any of the endorsement requirements of subrule 266.3(2). In any case in which training or testing that is offered to satisfy the requirements of this rule is required to be approved by the department, such approval is required prior to acceptance of the training or testing to meet licensure requirements. Approval by the department of any training or testing to meet these requirements may be sought by the individual, firm, or organization providing the testing or training or initiated by the department. Any individual, firm, or organization seeking to obtain such approval may apply to the department no later than July 1 every odd-numbered year. Program information and any other documentation requested by the department for consideration shall be submitted to the department. Training and testing approved by the department will be listed on the department's licensing website.

266.3(5) *License applicability.* Work performed by a technician or trainee subject to these rules shall be limited to areas of competence indicated by the specific endorsement(s) identified on the license. Work performed in the state shall not begin prior to:

a. Receipt of a new or renewed license issued by the department to the applicant, or

b. Receipt of written approval to perform work prior to issuance of a new or renewed license from the department to the applicant.

266.3(6) *Portable fire extinguisher requirements.* Nothing in this rule shall be interpreted to conflict with or diminish any requirement for training or certification for anyone installing or servicing a fire extinguishing system or portable fire extinguisher set forth in any rule of the department or local fire ordinance or standard adopted by reference therein.

266.3(7) *Licensure of persons licensed in other jurisdictions.* A fire protection system technician license may be issued without examination to a person licensed in other jurisdictions if the conditions of Iowa Code section 272C.12 are met.

266.3(8) *Veterans and active duty military.* Any individual serving honorably on federal active duty, state active duty, or national guard duty, as defined in Iowa Code section 29A.1, should apply for licensure following 481—Chapter 7.

[**ARC 7874C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—266.4(100D) Application and fees.

266.4(1) *Application.* Any person seeking licensure as a fire protection system technician shall submit a completed application form to the department. The application shall be filed no later than 30 days prior to the date of beginning work in this state or the date on which an existing license expires. An application form may be obtained from the department or from the department's website. The application form shall be submitted with all required attachments and license fee. An application is not complete unless all required information is submitted, including required attachments and fees, and will not be processed until it is complete.

266.4(2) *License fee.*

a. The fee for a permanent or provisional license, except for a trainee license, is $200. If an application for a license provides for more than one endorsement as provided in subrule 266.1(2), there will be an additional fee of $25 for each endorsement beyond the first.

b. The fee for a fire protection system technician trainee license is $100.

c. The department will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

266.4(3) *Payment.* The license fee shall be submitted electronically, or mailed or hand-delivered by draft, check, or money order in the applicable amount payable to the Iowa Department of Inspections, Appeals, and Licensing. Cash payments are not accepted.

266.4(4) *Amended license.*

a. The fee for issuance of an amended license is the difference between the original license fee paid and changes in endorsement(s), if applicable. The fee shall be submitted with a request for an amended license.

b. A licensee will request and the department will issue an amended license for any of the following reasons, and a fee does not apply:

(1) A change in employer. A licensee may only transfer the licensee's technician license to another employer if the licensee paid the license fee at the time of original application. If the licensee's previous employer paid the license fee, the licensee must reapply for a new license under the licensee's new employer and pay the license fee.

(2) A change in any other material information included in or with the initial or renewal application. A change of address is a material change.

c. Other changes in the information required in the application form, including renewal of insurance coverage with a new expiration date, shall be reported to the department but will not require issuance of an amended license or payment of the amended license fee.

266.4(5) *Attachments.* Required attachments to the application for a license are outlined on the department's website.

[**ARC 7874C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—266.5(100D) Complaints. Complaints regarding the performance of any licensed fire protection system technician, failure of a licensee to meet any of the requirements established in Iowa Code chapter 100D or this chapter or any other provision of law, or persons operating as fire protection system installers and maintenance workers without licensure may be submitted to the department. Complaints should be as specific as possible and clearly identify the licensee or other person against whom the complaint is filed. A complaint may be submitted anonymously, but if the name and contact information of the complainant are provided, the complainant will be notified of the disposition of the complaint.

[**ARC 7874C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—266.6(100D) Denial, suspension, or revocation of licensure; civil penalties; appeals. If a licensee or person who performs work requiring a license violates any provision of these rules or any other provision of law related to work requiring licensure pursuant to this chapter, the department may deny, suspend or revoke a license or assess a civil penalty to a licensee or to a person who performs work requiring licensure pursuant to this chapter and who is not licensed.

266.6(1) *Denial.* The department may deny an application for licensure:

a. If the applicant makes a false statement on the application form or in any other submission of information required for licensure. "False statement" means providing false information or failing to include material information, such as a previous criminal conviction or action taken by another jurisdiction, when requested on the application form or otherwise in the application process.

b. If the applicant fails to meet all of the requirements for licensure established in this chapter.

c. If the applicant is currently barred for cause from licensure equivalent to that provided for in this chapter in another jurisdiction.

d. If an applicant has previously been barred for cause from operating in another jurisdiction as a fire protection system installer and maintenance worker and if the basis of that action reflects upon the integrity of the applicant in operating as a fire protection system installer and maintenance worker. If an applicant is found to have been previously barred for cause from operating as a fire protection system installer and maintenance worker in another jurisdiction and is no longer barred from doing so, the department will evaluate the record of that action with regard to the likelihood that the applicant would operate with integrity as a licensee. If an applicant is denied licensure under this paragraph, the applicant will be notified of the specific reasons for the denial.

e. Conviction of a felony offense, if the offense directly relates to the profession or occupation of the licensee, in the courts of this state or another state, territory or country. "Conviction" as used in this subrule includes a conviction of an offense that if committed in this state would be a felony without regard to its designation elsewhere, and includes a finding or verdict of guilt made or returned in a criminal proceeding even if the adjudication of guilt is withheld or not entered. A certified copy of the final order or judgment of conviction or plea of guilty in this state or in another state constitutes conclusive evidence of the conviction. If an applicant is denied licensure under this paragraph, the applicant will be notified of the specific reasons for the denial.

f. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the licensee's profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

g. Willful or repeated violations of the provisions of this chapter.

266.6(2) *Suspension.* A suspension of a license may be imposed by the department for any violation of these rules or Iowa Code chapter 100D or for a failure to meet any legal requirement to operate as a fire protection system installer and maintenance worker in this state. Failure to provide any notice to the department as required by these rules may be grounds for suspension. An order of suspension will specify the length of the suspension and will specify that correction of all conditions that were a basis for the suspension is a condition of reinstatement of the license even after the period of the suspension.

266.6(3) *Revocation.*

a. A revocation is a termination of a license. A license may be revoked by the department for repeated violations or for a violation which creates an imminent danger to the safety or health of individuals protected by a fire protection system incorrectly installed by a licensee or when information comes to the attention of the department which, if known to the department when the application was being considered, would have resulted in denial of the license.

b. A new application for a license from an applicant whose license has previously been revoked will not be considered for a period of one year after the effective date of the revocation and, in any event, until every condition that was a basis for the revocation has been corrected. The department may specify in the revocation order a period longer than one year before a new application for a license may be considered. When a new application for a license from a person whose license was previously revoked is being considered, the applicant may be denied a license based upon the same information that was the basis for revocation even after any such period established by the department has expired.

266.6(4) *Disqualifications for criminal convictions limited.* A person's conviction of a crime may be grounds for the denial, revocation, or suspension of a license in circumstances authorized by Iowa Code section 272C.15.

266.6(5) *Civil penalties.* The department may impose a civil penalty of up to $500 per day during which a violation has occurred and for every day until the violation is corrected. A civil penalty may be imposed in lieu of or in addition to a suspension or may be imposed in addition to a revocation. A civil penalty will not be imposed in lieu of a revocation.

266.6(6) *Appeals.* Any denial, suspension, or revocation of a license, or any civil penalty imposed upon a licensee or other person under this rule may be appealed within 14 days of receipt of the notice by submitting a written request for a contested case appeal to the department. An appeal is subject to the provisions of 7—Chapter 2506 and 481—Chapter 10 governing contested cases.

[**ARC 7874C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapter 100D.

CHAPTER 267
LICENSING OF ALARM SYSTEM CONTRACTORS AND TECHNICIANS
[Prior to 11/26/25, see Public Safety Department[661] Ch 277]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—267.1(100C) Establishment of program. The alarm system contractor and alarm system technician license are established pursuant to Iowa Code chapter 100C.

267.1(1) *Licensure required.* No person shall act as an alarm system contractor without being currently licensed as an alarm system contractor by the department. No person shall act as an alarm system technician without being currently licensed by the department as an alarm system contractor or alarm system technician unless the person is engaged in the installation of alarm system components, is currently licensed pursuant to Iowa Code chapter 103, and is exempt from requirements for licensure by the department as an alarm system technician pursuant to Iowa Code chapter 103.

EXCEPTION: A person may pull cable for an alarm system under the direct supervision of a licensed contractor, licensed technician, or person licensed pursuant to Iowa Code chapter 103 who is working as a technician without licensing pursuant to Iowa Code chapter 103.

267.1(2) *Endorsement.*

a. The licensure of each contractor, technician, or technician trainee shall carry an endorsement for one or more of the following:

(1) Alarm system contractor.
1. Fire alarm system installation.
2. Nurse call system installation.
3. Security alarm system installation.
4. Alarm system maintenance inspection.
5. Dwelling unit alarm system installation.

(2) Alarm system technician.
1. Fire alarm system installation.
2. Nurse call system installation.
3. Security alarm system installation.
4. Alarm system component installation.
5. Alarm system maintenance inspection.
6. Dwelling unit alarm system installation.

(3) Alarm system technician trainee.

b. Any person acting as an alarm system contractor or technician, other than a person who is not required to be licensed for such work by the department, shall do so only in relation to systems covered by the endorsements on the contractor's or technician's license.

267.1(3) *Length of licensure.* Licensure is normally for three years and will expire on September 30 of the third year after the license has been issued. A license that is effective on a date other than October 1 will be effective on the date on which the license is issued and will expire on the next September 30, after two years have passed from the date on which the license was issued.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.2(100C) Definitions. The following definitions apply:

"Alarm system" means the same as defined in Iowa Code section 100C.1(1).

"Alarm system components" means the portion of an alarm system installation limited to mounting alarm system raceways, boxes or system devices, and pulling of system cable, not including final termination at an alarm panel or final connection of the alarm system or alarm system testing.

"Alarm system contractor" or *"contractor"* means the same as defined in Iowa Code section 100C.1(2).

"Alarm system technician" or *"technician"* means a person who is engaged in the layout, installation, repair, alteration, addition, testing, or maintenance of alarm systems and who is licensed under the provisions of this chapter to perform work authorized by that license and any endorsement pertaining

thereto. An alarm system technician shall be an employee of an alarm system contractor or, if employed by anyone other than an alarm system contractor, shall perform work requiring licensing as an alarm system technician only on property owned or occupied by such employer and may obtain a license if the employer is not a licensed contractor.

"Alarm system technician trainee" means a person who is engaged in the layout, installation, repair, alteration, addition, or maintenance of alarm systems under the direct supervision of a responsible managing employee or licensed alarm system technician.

"Alarm system maintenance inspection technician" means an employee of an alarm system contractor who is engaged in maintenance inspection of fire alarm, nurse call, or security alarm systems.

"Dwelling alarm system" means a system or portion of a combination system that consists of components and circuits hardwired or wireless arranged to monitor and annunciate the status of a fire alarm, nurse call or security alarm or supervisory signal-initiating devices and to initiate the appropriate response to those signals, installed in a single-family dwelling or a single dwelling unit of a multifamily residential building and not interconnected with another dwelling alarm system. A dwelling alarm system does not mean single-station or multiple-station alarms installed in dwelling units.

"Fire alarm system" means a system or portion of a combination system that consists of components and circuits hardwired or wireless arranged to monitor and annunciate the status of a fire alarm or supervisory signal-initiating devices and to initiate the appropriate response to those signals that serves the general fire alarm needs of a building or buildings and that provides fire department or occupant notification or both. A fire alarm system does not mean single-station or multiple-station alarms installed in dwelling units.

"Installation" means hanging electrical conduits, raceways or boxes; mounting system devices; pulling system cable; activating system-initiating devices and system control units or verifying system operations to meet specifications; and performing system acceptance testing.

"Layout" means drawings, calculations and component specifications to achieve the specified system design installation. "Layout" does not include design.

"Maintenance inspection" means the same as defined in Iowa Code section 100C.1(13).

"Nurse call system" means a nurse call system or portion of a combination system that consists of components and circuits hardwired or wireless arranged to monitor and annunciate the status of a nurse call system or supervisory signal-initiating devices and to initiate the appropriate response to those signals, installed in a facility required to be licensed or certified by the state pursuant to Iowa Code chapter 125, 135B, 135C, 135G, 135H, 135J, 231C, or 231D, or installed in a facility operating pursuant to Iowa Code chapter 218, 219, 223, 225, 233A, or 233B, to initiate response of on-site medical care providers.

"Responsible managing employee" means the same as defined in Iowa Code section 100C.1(14).

"Security alarm system" means a system or portion of a combination system that consists of components and circuits hardwired or wireless arranged to monitor and annunciate the status of a security alarm or supervisory signal-initiating devices and to initiate the appropriate response to those signals, installed in a building or facility to detect unauthorized entry into a building or portion of a building and to notify security personnel or building occupants or both.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.3(100C) Responsible managing employee. Each alarm system contractor shall designate a responsible managing employee and may designate one or more alternate responsible managing employees. A contractor may designate more than one responsible managing employee in order to satisfy the requirements for more than one endorsement as provided in subrule 267.1(2). If more than one responsible managing employee is designated, the contractor will indicate for which responsible managing employee each designated alternate managing employee serves as an alternate.

267.3(1) The responsible managing employee or employees shall be designated in the application for licensure; and, if a responsible managing employee is no longer acting in that role, the contractor shall so notify the department, in writing, within 30 calendar days.

267.3(2) If a responsible managing employee is no longer acting in the role of responsible managing employee and the contractor has designated an alternate responsible managing employee, the alternate responsible managing employee will become the responsible managing employee and the contractor shall

so notify the department, in writing, within 30 calendar days of the date on which the preceding responsible managing employee ceased to act in that role. If the contractor has designated more than one alternate responsible managing employee, the notice to the department will indicate which alternate responsible managing employee has assumed the position of responsible managing employee.

267.3(3) If a responsible managing employee designated by an alarm system contractor is no longer acting in the role of responsible managing employee and the contractor has not designated an alternate responsible managing employee, the contractor will designate a new responsible managing employee and shall notify the department, in writing, of the designation within six months of the date on which the former responsible managing employee ceased to act in that capacity. If the department has not been notified of the appointment of a new responsible managing employee within six months of the date on which a responsible managing employee ceased serving in that capacity, the department shall suspend the license of the alarm system contractor.

267.3(4) A responsible managing employee or an alternate responsible managing employee shall meet one of the requirements for the following endorsements:

a. Fire alarm system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the National Institute for Certification in Engineering Technologies (NICET) at level III or above in fire alarm systems, or

(3) Current certification by the Electronic Security Association (ESA) at level III in certified fire alarm designer (CFAD).

b. Nurse call system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by a nurse call system manufacturer, or

(3) Current certification by the NICET at level II or above in fire alarm systems, or

(4) Current certification by the ESA at level II in certified alarm technician (CAT).

c. Security alarm system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level II or above in fire alarm systems, or

(3) Current certification by the ESA at level II in CAT.

d. Alarm system maintenance inspection:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level II or above in fire alarm systems, or

(3) Current certification by the ESA at level II in CAT, or

(4) Current certification by the NICET level II or above in inspection and testing of fire alarm systems.

e. Dwelling unit alarm system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level I or above in fire alarm systems, or

(3) Current certification by the ESA at level I in CAT.

267.3(5) Training or testing approval. Satisfactory completion of an applicable training or testing program that has been approved by the department may replace any of the endorsement requirements of subrule 267.3(4). In any case in which training or testing that is offered to satisfy the requirements of this rule is required to be approved by the department, such approval is required prior to acceptance of the training or testing to meet licensing requirements. Approval by the department of any training or testing to meet these requirements may be sought by the individual, firm, or organization providing the testing or training or initiated by the department. Any individual, firm, or organization seeking to obtain such approval may apply to the department no later than July 1 every odd-numbered year. Program information

and any other documentation requested by the department for consideration shall be submitted to the department. Training and testing approved by the department will be listed on the department's licensing website.

267.3(6) License applicability. Work performed by a contractor subject to these rules shall be limited to areas of competence indicated by the specific certification or certifications or other training requirements met by the responsible managing employee. Work performed in the state shall not begin prior to:

a. Receipt of a new or renewed license issued by the department to the applicant, or

b. Receipt of written approval to perform work prior to issuance of a new or renewed license from the department to the applicant.

267.3(7) Nothing in this rule shall be interpreted to conflict with or diminish any requirement for training or certification for anyone installing or servicing an alarm system set forth in any rule of the department or local fire ordinance or standard adopted by reference therein.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.4(100C) Contractor licensing.

267.4(1) An alarm system contractor shall meet all of the following requirements in order to receive licensure from the department and will continue to meet all requirements throughout the period of licensure. The contractor shall notify the department, in writing, within 30 calendar days if the contractor fails to meet any requirement for licensure.

a. The contractor designates one or more responsible managing employees as provided in rule 481—267.3(100C).

b. The contractor maintains general and complete operations liability insurance for the layout, installation, repair, alteration, addition, maintenance, and inspection of automatic alarm systems in the following amounts: $500,000 per person, $1,000,000 per occurrence, and $1,000,000 property damage.

(1) The carrier of any insurance coverage maintained to meet this requirement shall notify the department 30 days prior to the effective date of cancellation or reduction of the coverage.

(2) The contractor shall cease operation immediately if the insurance coverage required by this subrule is no longer in force and other insurance coverage meeting the requirements of this subrule is not in force. A contractor shall not initiate any installation of an alarm system that cannot reasonably be expected to be completed prior to the effective date of the cancellation of the insurance coverage required by this subrule and of which the contractor has received notice, unless new insurance coverage meeting the requirements of this subrule has been obtained and will be in force upon cancellation of the prior coverage.

c. The contractor maintains its current registration as a contractor in accordance with Iowa Code chapter 91C and any rules promulgated thereunder, and provides a copy of the current registration certificate issued pursuant to Iowa Code chapter 91C to the department with the application.

EXCEPTION: If the contractor does not meet the definition of "contractor" for purposes of Iowa Code chapter 91C, such registration is not required. Written documentation of such exemption must be provided to the department upon application for licensure as an alarm system contractor.

d. The contractor maintains compliance with all other applicable provisions of law related to operation in the state of Iowa and of any political subdivision in which the contractor is performing work.

267.4(2) A license may be renewed only if the licensee has completed recertification of the applicable requirements relative to the endorsement for which the licensee is renewing.

267.4(3) An alarm system contractor license may be issued without examination to a person licensed in other jurisdictions if the conditions of Iowa Code section 272C.12 are met.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.5(100C) Contractor application and fees.

267.5(1) *Application.* Any contractor seeking licensure as an alarm system contractor shall submit a completed application form to the department. The application shall be filed no later than 30 days prior to the date of beginning work in this state or the date on which an existing license expires. An application form may be obtained from the department or the department's website. The application form shall be submitted with all required attachments and the required application fee. An application will not be

considered complete unless all required information is submitted, including required attachments and fees, and will not be processed until it is complete.

267.5(2) *Licensure fee.* The license fee for alarm system contractors will be $300 for two years. If an application for licensure provides for more than one responsible managing employee pursuant to rule 481—267.3(100C), there will be an additional fee of $50 for each responsible managing employee beyond the first. If an application for licensure provides for more than one endorsement as provided in subrule 267.1(2), there will be an additional fee of $50 for each endorsement beyond the first. The department will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

267.5(3) *Payment.* The license fee may be submitted electronically or delivered by draft, check, or money order in the applicable amount payable to the department. Cash payments are not accepted.

267.5(4) *Amended license.*

a. The fee for issuance of an amended license is the difference between the original license fee paid and changes in endorsement(s) or responsible managing employee(s), if applicable. The fee shall be submitted with the request for an amended licensure.

b. A contractor will request and the department will issue an amended license for any of the following reasons, and a fee does not apply:

(1) A change in the designation of a responsible managing employee;

(2) A change in insurance coverage; or

(3) A change in any other material information included in or with the initial or renewal application. A change in the location of a business is a material change; however, no fee will be charged for the issuance of an amended license if the sole reason for amending the license is to reflect a change in location that was necessitated by disaster emergency conditions and the business was located in an area subject to a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6.

c. Other changes in the information required in the application form, including renewal of insurance coverage with a new expiration date, shall be reported to the department but will not require issuance of an amended license or payment of the amended license fee.

267.5(5) *Attachments.* Required attachments to the application for licensure are outlined on the department's website.

267.5(6) *National criminal history check.* Each applicant for licensure as a contractor shall submit fingerprints and the applicable fee for a national criminal history check conducted by the Federal Bureau of Investigation at the time of application for a new or renewal license.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.6(100C) Technician licensure requirements. An applicant for alarm system technician licensure shall meet all of the following requirements that are applicable to the endorsements for which the applicant is applying in order to receive licensure from the department, and continue to meet all such requirements throughout the period of licensure. The technician will notify the department, in writing, within 30 calendar days if the technician fails to meet any applicable requirement for licensure.

267.6(1) The alarm system technician shall meet one of the following criteria for the following endorsements:

a. Fire alarm system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the National Institute for Certification in Engineering Technologies (NICET) at level II or above in fire alarm systems, or

(3) Current certification by the Electronic Security Association (ESA) at level II in certified alarm technician (CAT), or

(4) Current certification by the Elite Continuing Education University (CEU) in fire alarm installation techniques (FAIT).

b. Nurse call system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by a nurse call system manufacturer, or

(3) Current certification by the NICET at level I or above in fire alarm systems, or

(4) Current certification by the ESA at level I in CAT, or

(5) Current licensure as a master electrician or journeyman electrician by the electrical examining board pursuant to Iowa Code chapter 103.

c. Security alarm system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level I or above in fire alarm systems, or

(3) Current certification by the ESA at level I in CAT, or

(4) Current certification by the CEU in advanced electronic intrusion technician (AEIT), or

(5) Current certification by the Complete Electrical Academy at level I in Electronic Security Technician.

d. Alarm system component installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level I or above in fire alarm systems, or

(3) Current certification by the ESA at level I in CAT, or

(4) Current licensure as a master electrician or journeyman electrician by the electrical examining board pursuant to Iowa Code chapter 103.

e. Alarm system maintenance inspection:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level I or above in fire alarm systems, or

(3) Current certification by the ESA at level I in CAT, or

(4) Current certification by the NICET at level I or above in inspection and testing of fire alarm systems, or

(5) Current certification by the Complete Electrical Academy at level I in electronic security technician.

f. Dwelling unit alarm system installation:

(1) Current licensure as a professional engineer by the Iowa engineering and land surveying examining board, with competence in alarm system design, or

(2) Current certification by the NICET at level I or above in fire alarm systems, or

(3) Current certification by the ESA at level I in CAT, or

(4) Current certification by the CEU in alarm level I, or

(5) Current certification by the Complete Electrical Academy at level I in electronic security technician.

g. Alarm system technician trainee: Submission of a completed application no later than the first day of employment. An alarm system technician trainee may perform work that requires licensure under this chapter only under the direct supervision of a licensed alarm system technician or responsible managing employee whose license contains one or more endorsements as provided in rules 481—267.3(100C) and 481—267.6(100C), respectively, and that work must be within the scope of work authorized by the endorsements held by the supervising alarm system technician or responsible managing employee.

267.6(2) The technician shall maintain compliance with all other applicable provisions of law related to operation in the state of Iowa and of any political subdivision in which the technician is performing work.

267.6(3) Satisfactory completion of an applicable training or testing program that has been approved by the department may replace any of the endorsement requirements of subrule 267.6(1). In any case in which training or testing that is offered to satisfy the requirements of this rule is required to be approved by the department, such approval is required prior to acceptance of the training or testing

to meet licensure requirements. Approval by the department of any training or testing to meet these requirements may be sought by the individual, firm, or organization providing the testing or training or initiated by the department. Any individual, firm, or organization seeking to obtain such approval may apply to the department no later than July 1 every odd-numbered year. Program information and any other documentation requested by the department for consideration shall be submitted to the department. Training and testing approved by the department will be listed on the department's licensing website.

267.6(4) Work performed by a technician or trainee subject to these rules shall be limited to areas of competence indicated by the specific certification or certifications or other training requirements met by the technician and will be limited to areas of competence indicated by the specific certification or certifications or other training requirements met by the responsible managing employee of the technician's employer, unless the employer is not a licensed contractor as allowed by Iowa Code chapter 100C. Work performed in the state shall not begin prior to one of the following:

a. Receipt of a new or renewed license issued by the department to the applicant, or

b. Receipt of written approval to perform work prior to issuance of a new or renewed license from the department to the applicant.

267.6(5) Nothing in this rule shall be interpreted to conflict with or diminish any requirement for training or certification for anyone installing or servicing an alarm system set forth in any rule of the department or local fire ordinance or standard adopted by reference therein.

267.6(6) A license may be renewed only if the licensee has completed recertification of the applicable requirements relative to the endorsements for which the licensee is renewing.

267.6(7) An alarm system technician license may be issued without examination to a person licensed in other jurisdictions if the conditions of Iowa Code section 272C.12 are met.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.7(100C) Technician application and fees.

267.7(1) *Application.* Any technician seeking licensure as an alarm system technician shall submit a completed application form to the department. The application shall be filed no later than 30 days prior to the date on which work begins in the state or on which an existing license expires, except that an application for endorsement as an alarm system technician trainee may be submitted no later than the first day of employment as an alarm system technician trainee. An application form may be obtained from the department or from the department's website. The application form shall be submitted with all required attachments and the application fee established in this rule. An application will not be considered complete unless all necessary information is submitted, including attachments and fees, and will not be processed until it is complete.

267.7(2) *Licensure fee.*

a. The license fee for an alarm system technician will be $150 for two years, except that the license fee for endorsement as an alarm system technician trainee will be $50 for one year. There will be an additional fee of $25 for each endorsement beyond the first.

b. The department will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

267.7(3) *Payment.* The certification fee may be submitted electronically or delivered by draft, check, or money order in the applicable amount payable to the department. Cash payments are not accepted.

267.7(4) *Amended license.*

a. The fee for issuance of an amended license is the difference between the original license fee paid and changes in endorsement(s), if applicable. The fee shall be submitted with the request for an amended license.

b. A technician will request and the department will issue an amended license for a change in any material information included in or with the initial or renewal application. A licensee will request and the department will issue an amended license for any of the following reasons and a fee does not apply:

(1) A change in employer. A licensee may only transfer the licensee's technician license to another employer if the licensee paid the license fee at the time of original application. If the licensee's previous

employer paid the license fee, the licensee must reapply for a new license under the new employer and pay the license fee.

(2) A change in any other material information included in or with the initial or renewal application. A change of address is a material change.

c. Other changes in the information required in the application form shall be reported to the department but will not require issuance of an amended license or payment of the amended license fee.

267.7(5) *Attachments.* Required attachments to the application for license are outlined on the department's website.

267.7(6) *National criminal history check.* Each applicant for licensure as a technician shall submit fingerprints and the applicable fee for a national criminal history check conducted by the Federal Bureau of Investigation at the time of application for a new or renewal license.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.8(100C) Complaints. Complaints regarding the performance of any licensed contractor or technician, failure of a licensed contractor or technician to meet any of the requirements established in Iowa Code chapter 100C or this chapter or any other provision of law, or operation as an alarm system contractor or technician without licensure may be filed with the department. Complaints should be as specific as possible and clearly identify the contractor or technician against whom the complaint is filed. Complaints should be submitted in writing to the department. A complaint may be submitted anonymously, but if the name and contact information of the complainant are provided, the complainant may be notified of the disposition of the complaint.

[**ARC 7875C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 11/26/25]

481—267.9(100C) Denial, suspension, or revocation of licensure; civil penalties; and appeals. The department may deny, suspend, or revoke the license of a contractor or technician or may assess a civil penalty to the contractor, if any provision of these rules or any other provision of law related to operation as an alarm system contractor or technician is violated.

267.9(1) *Denial.* The department may deny an application for licensure:

a. If the applicant makes a false statement on the application form or in any other submission of information required for licensure. "False statement" means providing false information or failing to include material information, such as a previous criminal conviction or action taken by another jurisdiction, when requested on the application form or otherwise in the application process.

b. If the applicant fails to meet all of the requirements for licensure established in this chapter.

c. If the applicant is currently barred for cause from acting as an alarm system contractor or technician in another jurisdiction.

d. If an applicant has previously been barred for cause from operating in another jurisdiction as an alarm system contractor or technician and if the basis of that action reflects upon the integrity of the applicant in operating as an alarm system contractor or technician. If an applicant is found to have been previously barred for cause from operating as an alarm system contractor or technician in another jurisdiction and is no longer barred from doing so, the department will evaluate the record of that action with regard to the likelihood that the applicant would operate with integrity as a licensed contractor or technician. If an applicant is denied under this provision, the applicant will be notified of the specific reasons for the denial.

e. Conviction of a felony offense, if the offense directly relates to the profession or occupation of the licensee, in the courts of this state or another state, territory or country. "Conviction" as used in this subrule includes a conviction of an offense that if committed in this state would be a felony without regard to its designation elsewhere, and includes a finding or verdict of guilt made or returned in a criminal proceeding even if the adjudication of guilt is withheld or not entered. A certified copy of the final order or judgment of conviction or plea of guilty in this state or in another state constitutes conclusive evidence of the conviction. If an applicant is denied under this provision, the applicant will be notified of the specific reasons for the denial.

f. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the licensee's profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

g. Willful or repeated violations of the provisions of this chapter.

267.9(2) *Suspension.* A suspension of a license may be imposed by the department for any violation of these rules or Iowa Code chapter 100C or for a failure to meet any legal requirement to operate as an alarm system contractor or technician in this state. Failure to provide any notice to the department as provided in these rules will be grounds for suspension. An order of suspension will specify the length of the suspension and will specify that correction of all conditions that were a basis for the suspension is a condition of reinstatement of the license even after the period of the suspension.

267.9(3) *Revocation.* A revocation is a termination of a license. A license may be revoked by the department for repeated violations or for a violation that creates an imminent danger to the safety or health of individuals protected by an alarm system incorrectly installed by a certified contractor or technician or when information comes to the attention of the department which, if known to the department when the application was being considered, would have resulted in denial of the license. A new application for licensure from a contractor or technician whose license had previously been revoked will not be considered for a period of one year after the effective date of the revocation and, in any event, until every condition that was a basis for the revocation has been corrected. The department may specify in the revocation order a longer period than one year before a new application for licensure may be considered. When a new application for licensure from a contractor or technician whose license was previously revoked is being considered, the applicant may be denied licensure based upon the same information that was the basis for revocation even after any such period established by the department has expired.

267.9(4) *Disqualifications for criminal convictions limited.* A person's conviction of a crime may be grounds for the denial, revocation, or suspension of a license in circumstances authorized by Iowa Code section 272C.15.

267.9(5) *Civil penalties.* The department may impose a civil penalty of up to $500 per day during which a violation has occurred and for every day until the violation is corrected. A civil penalty may be imposed in lieu of or in addition to a suspension or may be imposed in addition to a revocation. A civil penalty will not be imposed in lieu of a revocation.

267.9(6) *Appeals.* Any person subject to denial, suspension, or revocation of a license, or any civil penalty imposed upon a licensed contractor or technician under this rule, may appeal by requesting a contested case hearing, in writing, within 14 days. An appeal of a civil penalty is subject to the provisions of 7—Chapter 2506 and 481—Chapter 10 governing contested cases.

CHAPTER 268
MANUFACTURING, STORAGE, HANDLING, USE OF EXPLOSIVE MATERIALS, AND LICENSING FOR COMMERCIAL EXPLOSIVE CONTRACTORS AND BLASTERS

[Prior to 7/9/25, see Public Safety Department[661] Ch 231]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

NOTE: Any person who purchases, possesses, transports, stores, or uses explosive materials must comply with all applicable federal laws and regulations as well as with Iowa Code chapter 101A and this chapter.

481—268.1(101A) Explosive materials. NFPA 495, "Explosive Materials Code," 2023 edition, is hereby adopted by reference as the rules governing the manufacture, transportation, storage, and use of explosive materials in the state of Iowa, with the following amendments:

Delete the phrase "authority having jurisdiction" wherever it occurs and insert in lieu thereof the word "director."

Delete the phrases "issuing authority" and "permit-issuing authority" wherever they occur and insert in lieu thereof the word "director."

Amend Section 1.5 to read as follows:

1.5 Equivalency.

Nothing in this code is intended to prevent the use of systems, methods, or devices of equivalent or superior quality, strength, fire resistance, effectiveness, durability, and safety over those prescribed by this code. Any request for approval to use systems, methods, or devices other than those specified in this chapter shall be submitted to the director as a request for a waiver of a rule.

Delete Sections 4.7 through 4.7.4.

Amend Sections 4.2, 4.2.1, 4.2.2, 4.2.3, 4.3 through 4.3.2, 4.4 through 4.4.5, 4.5, 4.5.1, 4.5.2, 4.5.3, 4.6 through 4.6.3, 4.8.1, 4.8.3, and 4.8.4, by deleting the words "permit" and "permits" wherever they occur and inserting in lieu thereof, respectively, the word "license."

Add the following new section:

9.4.6.3 A fire department that has received information pursuant to this section may re-disseminate the information to the state fire marshal, another fire department that is responding to a fire or other incident at the location at which the explosives are stored, or to a law enforcement agency. Information received by a fire department pursuant to this section shall not be redisseminated except as provided in this section.

Amend Section 9.6.3.7 Type 3 magazines containing explosive materials shall be within line-of-sight vision of a blaster or, if not within line-of-sight vision of a blaster, shall be secured if in a vehicle or in a secure building, facility, or area.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.2(101A) Definitions. Definitions set forth in Iowa Code section 101A.1 are incorporated herein by reference. For purposes of these rules, the following definitions also apply:

"Actual possession" means when a person is in immediate possession or control of explosive materials (e.g., an employee who physically handles explosive materials as part of the production process; or an employee, such as a blaster, who actually uses explosive materials).

"Applicant" means an individual employed by a commercial explosive contractor or person associated with a commercial explosive contractor who meets the definition of "employee possessor" or "responsible person" as defined in this chapter.

"Commercial explosive blaster" or *"blaster"* means any individual who conducts blasting or is in charge of or responsible for loading or detonation of any explosive material.

"Commercial explosive contractor" or *"contractor"* means any business whose employees are engaged in the manufacture, importation, distribution, sale, or commercial use of explosives in the course of their employment.

"Constructive possession" means when an employee lacks direct physical control over explosive materials but exercises dominion and control over the explosive materials, either directly or indirectly

through others (e.g., an employee at a construction site who keeps keys for magazines in which explosive materials are stored, or who directs the use of explosive materials by other employees; or an employee transporting explosive materials from a licensee to a purchaser).

"Employee possessor" means an individual who has actual or constructive possession of explosive materials during the course of the individual's employment.

"Offense directly relates" refers to either of the following:

1. The actions taken in furtherance of an offense are actions customarily performed within the scope of practice of a licensed profession.

2. The circumstances under which an offense was committed are circumstances customary to a licensed profession.

"Responsible person" means an individual who has the power to direct the management and policies of the commercial explosive contractor pertaining to explosive materials. For example, responsible persons generally include sole proprietors and explosives facility site managers. In the case of a corporation, association, or similar organization, responsible persons generally include corporate directors and officers, as well as stockholders who have the power to direct management and policies.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.3(101A) Licenses required. Except as specifically exempted by another provision of state or federal law, any business whose employees are engaged in the manufacture, importation, distribution, sale, or commercial use of explosives in the course of their employment shall be required to hold a current commercial explosive contractor license issued pursuant to this chapter. Any individual, except as specifically exempted by another provision of law, who conducts blasting or is in charge of or responsible for loading or detonation of any explosive material shall be required to hold a current commercial explosive blaster license issued pursuant to this chapter. A commercial explosive blaster license is not required to authorize a person solely to transport explosives from one location to another, to assist a licensed blaster, to train under a licensed blaster, or to engage in the manufacture of explosives.

NOTE: Iowa Code section 101A.1 excludes "fireworks" from the definition of "explosive." Consequently, working with fireworks does not necessitate a blaster license, nor does the manufacture, importation, distribution, sale, or commercial use of fireworks necessitate a commercial explosive license.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.4(101A,272C) License application process.

268.4(1) *Application for commercial explosive contractor or commercial explosive blaster license.* Applications for a commercial explosive contractor license or a commercial explosive blaster license are available on the department's website. The application shall be filed no later than 30 days prior to the date of beginning work in this state or on which an existing license expires.

268.4(2) *Submission of application and required information.* A completed application for a license shall be submitted to the department at the address specified on the department's website. An application will not be considered complete unless all required information is submitted, including required attachments and fees, and will not be processed until it is complete.

268.4(3) *License fee.* Each license application shall be accompanied by a license fee as set forth in Iowa Code section 101A.2(2). The department will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

268.4(4) *License duration.* Licensure will normally be for three years and expire on December 31 of the third year after it is issued, except that a license issued in December of any year expires on December 31 after two years have passed from the date on which the license was issued.

268.4(5) *Criminal history.* An applicant is subject to a national criminal history check pursuant to Iowa Code section 101A.2(3).

268.4(6) *Veterans and military service members.* Any individual while serving honorably on federal active duty, state active duty, or national guard duty, as defined in Iowa Code section 29A.1, applying for licensure as a commercial explosive contractor or blaster should apply for licensure in accordance with 481—Chapter 7.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.5(101A) Issuance of commercial explosive contractor license. A commercial explosive contractor license will be issued if all of the following conditions have been satisfied:

268.5(1) All items required on the application have been completed, and any items the department deems necessary to verify have been appropriately verified.

268.5(2) No applicant for whom commercial explosive licensure is sought nor any person who will have, at any time, possession of explosives in the course of employment with the prospective contractor licensee may:

a. Have been convicted of any offense involving explosives or firearms;

b. Have been previously disqualified from being licensed to handle explosives in this or any other state. The department may grant a license to a person previously disqualified if the department is satisfied that the condition or conditions that led to the disqualification have been corrected;

c. Be an unlawful user of or be addicted to controlled substances;

d. Have been adjudged mentally incompetent at any time by any court, been committed by any court to any mental institution, received inpatient treatment for any mental illness in the past three years, or received treatment by a health care professional for a serious mental illness or disorder that impairs a person's capacity to function normally and safely, both toward themselves and others.

268.5(3) The applicant has at least one responsible person or employee licensed as a commercial explosive blaster.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.6(101A) Issuance of a commercial explosive blaster license. A commercial explosive blaster license will be issued if all of the following conditions have been satisfied:

268.6(1) The applicant is an employee of a licensed commercial explosive contractor.

a. If, after a commercial explosive blaster license is issued, such employment ceases, the employing contractor and the commercial explosive blaster shall each notify the department within three business days of the final day of employment that the employment has ceased, and the commercial explosive blaster license shall be suspended until the commercial explosive blaster is again employed with a licensed commercial explosive contractor.

b. Upon reemployment, the employer shall notify the department that the commercial explosive blaster is again employed with a licensed commercial explosive contractor, and the department will reinstate the commercial explosive blaster license as soon as practical, provided that the commercial explosive blaster is not disqualified from holding a license pursuant to any provision of this chapter.

c. If the department finds that a commercial explosive blaster is disqualified from holding a license, the department shall revoke the license.

268.6(2) All items required on the application have been completed and any items the department deems necessary to verify have been verified and found to be true.

268.6(3) The applicant is not or has not been:

a. Convicted of any offense involving explosives or firearms;

b. Previously disqualified from being licensed to handle explosives in this or any other state. The department may grant a license to a person previously disqualified if the department is satisfied that the condition or conditions that led to the disqualification have been corrected;

c. An unlawful user of or addicted to controlled substances;

d. Adjudged mentally incompetent at any time by any court or committed by any court to any mental institution; or

e. A recipient of inpatient treatment for any mental illness in the past three years or a recipient of treatment by a health care professional for a serious mental illness or disorder that impairs a person's capacity to function normally and safely toward themselves or others.

268.6(4) The applicant has satisfactorily completed training approved by the department for the handling and use of explosives as described on the department's website. The training may be provided by the employer or by a reputable third party knowledgeable about the storage, handling, and use of explosives. The department may accept related job experience of 640 hours or more in lieu of training if the

experience is documented by a sworn affidavit provided by the employing commercial explosive contractor licensee.

EXCEPTION: The department may issue a commercial explosive blaster license to a person licensed or certified as a blaster in another state, provided that the department finds that the requirements for licensing or certification in the other state are comparable to those provided for in this rule.

268.6(5) An applicant for a renewal license has completed continuing education from a nationally recognized institution in professional explosives storage, handling, and use.

268.6(6) The applicant is 21 years of age or older.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.7(272C) Licensure of persons licensed in other jurisdictions.

268.7(1) For the purposes of this rule, "issuing jurisdiction" means the duly constituted authority in another state that has issued a professional license, certificate, or registration to a person.

268.7(2) Notwithstanding any other provision of law, a commercial explosive contractor license or commercial blaster license will be issued without an examination to a person who establishes residency in this state or to a person who is married to an active duty member of the military forces of the United States and who is accompanying the member on an official permanent change of station to a military installation located in this state if all of the following conditions are met:

a. The person is currently licensed by at least one other issuing jurisdiction as a commercial explosive contractor or commercial blaster with a substantially similar scope of practice and the license is in good standing in all issuing jurisdictions in which the person holds a license.

b. The person has been licensed by another issuing jurisdiction for at least one year.

c. When the person was licensed by the issuing jurisdiction, the issuing jurisdiction imposed minimum educational requirements and, if applicable, work experience, and the issuing jurisdiction verifies that the person met those requirements in order to be licensed in that issuing jurisdiction.

d. The person previously passed an examination required by the other issuing jurisdiction for licensure, if applicable.

e. The person has not had a license revoked and has not voluntarily surrendered a license in any other issuing jurisdiction or country while under investigation for unprofessional conduct.

f. The person has not had discipline imposed by any other regulating entity in this state or another issuing jurisdiction or country. If another jurisdiction has taken disciplinary action against the person, the department shall determine if the cause for the action was corrected and the matter resolved. If the department determines that the matter has not been resolved by the jurisdiction imposing discipline, the department shall not issue or deny a license to the person until the matter is resolved.

g. The person does not have a complaint, allegation, or investigation pending before any regulating entity in another issuing jurisdiction or country that relates to unprofessional conduct. If the person has any complaints, allegations, or investigations pending, the department shall not issue or deny a license to the person until the complaint, allegation, or investigation is resolved.

h. The person pays all applicable fees.

i. The person does not have a criminal history that would prevent the person from holding the commercial explosive contractor license or commercial blaster license applied for in this state.

268.7(3) A person licensed pursuant to this rule is subject to the laws regulating the person's practice in this state and is subject to the jurisdiction of the department marshal.

268.7(4) This rule does not apply to any of the following:

a. The ability of the department to require the submission of fingerprints or completion of a criminal history check.

b. The ability of the department to require a person to take and pass an examination specific to the laws of this state prior to issuing a license. If the department requires an applicant to take and pass an examination specific to the laws of this state, the department will issue an applicant a temporary license that is valid for a period of three months and may be renewed once for an additional period of three months.

268.7(5) Except as provided in subrule 268.7(2), a person applying for a license in this state who relocates to this state from another state that did not require a license to practice as a commercial

explosive contractor or commercial blaster may be considered to have met any education, training, or work experience requirements imposed by the department in this state if the person has three or more years of related work experience with a substantially similar scope of practice within the four years preceding the date of application as determined by the department.

268.7(6) A person applying for a license in this state under the requirements of this subrule shall submit the request in writing to the department providing proof of residency in this state and documentation to verify all conditions are met under this subrule.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.8(101A) Inventory and records. Each licensed commercial explosive business shall maintain records as referenced in National Fire Protection Association (NFPA) Chapter 495, "Explosive Materials Code," as adopted by reference in rule 481—268.1(101A).

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.9(101A) Complaints. Complaints regarding the performance of any licensed contractor or blaster, failure of a licensed contractor or blaster to meet any of the requirements established in Iowa Code chapter 101A or this chapter or any other provision of law, or operation as a commercial explosive contractor or commercial blaster without licensure may be filed with the department. Complaints should be as specific as possible and clearly identify the contractor or blaster against whom the complaint is filed. Complaints should be submitted in writing to the department as indicated on the department's website. A complaint may be submitted anonymously, but if the name and contact information of the complainant are provided, the complainant may be notified of the disposition of the complaint.

[**ARC 8912C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—268.10(101A,252J) Grounds for suspension, revocation, or denial of commercial explosive licenses; appeals.

268.10(1) The department may refuse to issue a contractor or blaster license sought pursuant to Iowa Code section 101A.2 or may suspend or revoke such a license for any of the following reasons:

a. Finding that the applicant or licensee is disqualified by any provision of federal or Iowa law from possessing explosives, firearms, or offensive weapons.

b. Finding that the applicant or licensee lacks sufficient knowledge of the use, handling, and storage of explosive materials to protect the public safety.

c. Finding that the applicant or licensee falsified information in the current or any previous license application.

d. Finding that the applicant or licensee has been adjudged mentally incompetent at any time by any court, been committed by any court to any mental institution, received inpatient treatment for any mental illness in the past three years, or received treatment by a health care professional for a serious mental illness or disorder that impairs a person's capacity to function normally and safely, both toward themselves and others.

e. Proof that the licensee or applicant has violated any provision of Iowa Code chapter 101A or this chapter.

f. Receipt of a certificate of noncompliance from the child support recovery unit of the Iowa department of health and human services pursuant to the procedures set forth in Iowa Code chapter 252J.

g. Receipt of a certificate of noncompliance from the centralized collection unit of the department of revenue pursuant to Iowa Code chapter 272D.

h. Conviction of a felony offense, if the offense directly relates to the profession or occupation of the applicant, in the courts of this state or another state, territory or country. Conviction as used in this subrule includes a conviction of an offense that if committed in this state would be a felony without regard to its designation elsewhere and includes a finding or verdict of guilt made or returned in a criminal proceeding even if the adjudication of guilt is withheld or not entered. A certified copy of the final order or judgment of conviction or plea of guilty in this state or in another state constitutes conclusive evidence of the conviction. If an applicant is denied under this provision, the applicant shall be notified of the specific reasons for the denial.

i. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the applicant's profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

j. Willful or repeated violations of the provisions of this chapter.

k. Disqualifications pursuant to Iowa Code section 272C.15.

268.10(2) An applicant or licensee whose application is denied or a licensee whose license is suspended or revoked for a reason other than receipt of a certificate of noncompliance from the child support recovery unit or a certificate of noncompliance from the department of revenue may appeal that action by requesting a contested case hearing, in writing, within 20 days of the department's determination. An appeal is subject to the provisions of 7—Chapter 2506 and 481—Chapter 10 governing contested cases. Applicants or licensees whose licenses are denied, suspended, or revoked because of receipt by the department of a certificate of noncompliance issued by the child support recovery unit or the department of revenue are subject to the procedures set forth in 481—Chapter 8.

268.10(3) The department will notify the employing commercial explosive contractor licensee of the denial, suspension, or revocation of a commercial explosive blaster license.

CHAPTER 280
FIRE CONTROL ADMINISTRATION
[Prior to 11/26/25, see Public Safety Department[661] Ch 201]

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/10/30

481—280.1(10A) Fire control administration description and contact information. Fire control is administered within the health and safety division of the department and may be contacted as provided in 481—Chapter 1 and on the department's website: dial.iowa.gov. The general email address for the fire safety bureau is fire.inspections@dia.iowa.gov. The department will collaborate with the state fire marshal division of the department of public safety in accordance with Iowa Code chapter 10A and as necessary.
[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.2(10A) Definitions. The definitions set forth in Iowa Code section 10A.101 are incorporated herein by reference. The following definitions also apply:

"Ambulatory surgical center" means a facility or portion thereof as defined in Iowa Code section 135R.1.

"Fire alarm system" means a system or a portion of a combination system consisting of components and circuits arranged to monitor and annunciate the status of fire alarm or supervisory signal-initiating devices and to initiate the appropriate response to those signals.

"Hospice" means a facility licensed or seeking licensure pursuant to Iowa Code section 135J.2.

"Hospital" means a facility licensed or seeking licensure pursuant to Iowa Code chapter 135B.

"Intermediate care facility" means a facility licensed or seeking licensure pursuant to Iowa Code section 135C.6 as an intermediate care facility for persons with an intellectual disability or intermediate care facility for persons with mental illness as both are defined in Iowa Code section 135C.1.

"Multiple-station smoke alarm" means two or more single-station smoke alarm devices that are capable of interconnection such that actuation of one causes the appropriate alarm signal to operate in all interconnected alarms. Interconnection may occur wirelessly for residential smoke alarms.

"NFPA" means the National Fire Protection Association, available at: www.nfpa.org. References to the form "NFPA xx," where "xx" is a number, refer to the NFPA standard or pamphlet of the corresponding number.

"Nursing facility" means the same as defined in Iowa Code section 135C.1.

"Single-station smoke alarm" means an assembly incorporating the detector, the control equipment and the alarm-sounding device in one unit, operated from a power supply either in the unit or obtained at the point of installation or both.

"Smoke alarm" means a single- or multiple-station alarm responsive to smoke. See also "single-station smoke alarm" and "multiple-station smoke alarm."

"Smoke detector" means a device that senses visible or invisible particles of combustion. Smoke detectors are typically listed under Underwriters Laboratories (UL) 268.
[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.3(10A) Building plan submission.

280.3(1) Plans for initial construction or alterations, changes, additions, renovations, or remodeling of buildings requiring the approval of the director shall be submitted to the building code bureau pursuant to rule 481—300.4(103A), except that plans related to the following entities may be submitted to a local fire or building department for approval upon a determination of compliance with the rules of the department or a local fire ordinance recognized in rule 481—280.11(10A):

a. Any educational building or facility serving kindergarten through twelfth grade,
b. Any college or university building or facility,
c. Any child care facility intended to serve seven or more children at one time,
d. Any correctional facility, or
e. Any gaming facility.

280.3(2) When approval of building construction projects is required by this chapter or requested by the submitter for other building construction projects covered by this chapter, one complete set of the final working plans and specifications shall be submitted to the building code bureau in accordance with Iowa Code chapters 542B and 544A and with rule 481—300.4(103A) (Note: 481—subrule 300.4(2) establishes fees for plan reviews that are paid to the building code bureau. These fees are not collected by the fire control bureau). Submittals will be examined, and the submitter will be notified of the findings. If the working plans and specifications comply with this chapter, an approval letter will be sent to the submitter.

280.3(3) Shop drawings, equipment specifications, and supporting documentation for fire alarm and sprinkler systems shall be submitted for review and approval and signed by a responsible managing employee licensed in accordance with Iowa Code chapter 100C. If the system is being installed as part of a project that has been designed by an engineer or architect, the submittal shall be approved by the responsible architect or engineer prior to submittal to the department. Submittals will be examined, and the submitter will be notified of the findings. Only one copy of shop drawings, equipment specifications, and supporting documentation should be submitted. The building code bureau will send a letter of approval to the submitter in lieu of returning approved shop drawings.

280.3(4) No changes shall be made to the approved final working plans and specifications or shop drawings unless the changes are submitted to and approved by the building code bureau.

280.3(5) If the blueprints and specifications are not acceptable, the building code bureau will notify the submitter of the deficiencies and request that the submitter either forward changes or request a review of the blueprints and specifications with the building code bureau. If after such review the submitter disputes the findings of the plan reviewer, the submitter may request that the disputed questions be reviewed by the chief for the building code bureau and the chief of the fire prevention bureau. If the submitter disputes the findings of the chief for the building code bureau and the chief of the fire prevention bureau, the submitter may appeal by submitting a request for a contested case hearing to the department, in writing, within 30 days of receipt or service of the order in accordance with Iowa Code section 10A.515 and chapter 17A. Contested cases are governed by 7—Chapter 2506 (contested cases) and 481—Chapter 10 (rules of practice and procedure before the administrative hearings division).

280.3(6) The responsible design professional for a project will schedule a preliminary meeting with the building code bureau to discuss code compliance issues early in the design development phase in accordance with 481—subrule 300.4(3). Approval to bid the project will not be given unless all applicable issues identified on the checklist have been addressed to the satisfaction of the building code bureau.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

481—280.4(10A,101,101A) Inspections and inspection fees. The director, any employee of the department, or any designated subordinate or local fire department authorized by the director may enter to inspect any building or premises and the contents thereof at any reasonable time, without notice, in accordance with Iowa Code sections 10A.512 and 10A.514.

280.4(1) An inspection may be of a particular system in the building, facility, or installation, or the inspection may include the entire building, facility, or installation.

280.4(2) An inspection to evaluate compliance with the rules of the department may be conducted by the department or by a consultant as requested by the director. A consultant will have the necessary degree of training, education, or experience to examine a system within a building required to comply with the rules of the department and determine if such system or systems comply with requirements. If a consultant is engaged to conduct an inspection, the consultant may be accompanied by an employee of the department or of a local fire department while conducting the inspection.

280.4(3) Inspections will be conducted without announcement and occur on a random basis, upon request, in response to a complaint, or to investigate a suspected fire hazard.

280.4(4) An owner or person in control of the building, facility, or installation will be advised of an inspection upon the inspector’s arrival, if available, but the inspection will commence in any event. The owner or a representative may accompany an inspector throughout the inspection, provided that the inspection is not delayed.

280.4(5) Upon completion of an inspection, the inspector may complete a written inspection order if any violations or deficiencies are discovered. The order will be signed by the employee and, if prepared by a consultant, will also be signed by the consultant.

280.4(6) Upon completion of the inspection, if the building, facility, or installation does not comply with applicable laws or rules, the inspector will identify specific provisions with which the building, facility, or installation does not comply and will notify the owner. The owner may be ordered to correct or repair the deficiency. The owner may order the building, facility, or installation removed or demolished in lieu of correcting the deficiency.

a. The employee or consultant signing the notice of deficiency or order will retain a copy and distribute a copy to the department or fire department having jurisdiction as necessary.

b. The time allowed to comply with the order will be determined by the employee or consultant, who will consider the likelihood that a fire may occur; the possibility of personal injury or property loss; the cost and availability of materials and labor to correct, repair, remove, or demolish; and other relevant information.

c. If the owner of the building, facility, or installation does not agree with the deficiency findings and order, the owner may appeal the order by submitting a request for a contested case hearing to the department in the same manner as set forth in subrule 280.3(5).

280.4(7) Inspection fees are payable through the department's website or by check or money order made payable to the department. If a certificate of occupancy is required for use of the building, facility, or installation, the certificate will not be issued until the inspection fee has been paid. When an initial inspection requiring a fee pursuant to this subrule results in a finding of a deficiency requiring reinspection, the initial reinspection will be performed without an additional fee. If the original deficiency or deficiencies have not been corrected at the time of the initial reinspection, then a fee of $125 for each additional reinspection after the initial reinspection is required until any original deficiency has been corrected. Inspection fees apply for entities licensed or seeking licensure as follows:

a. Hospital (Iowa Code chapter 135B) or health care facility (Iowa Code chapter 135C): $2.50 per bed.

b. Elder group home (Iowa Code chapter 231B) or assisted living program (Iowa Code chapter 231C): $10 per bed.

c. Adult day services (Iowa Code chapter 231D): $75 per facility.

d. Child care facility (Iowa Code chapter 237A): $25 per facility.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.5(10A) Certificates for licensure. The department will issue a certificate approving a building, facility, or installation for occupancy upon request from an owner or owner's agency if the building, facility, or installation comply with applicable rules and all fees have been paid. Denial of such a certificate is subject to appeal in the same manner as set forth in subrule 280.3(5).

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.6(10A) Fire drills. Public and private schools shall conduct fire drills in all school buildings as specified in Iowa Code section 10A.522 when school is in session.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.7(10A) Inspection based on complaint.

280.7(1) *Request for inspection.* A person alleging a building, facility, or installation presents a significant fire hazard may submit a complaint to the department and should provide the following information, if known:

a. The address of the building, facility, or installation and name and address of its owner;

b. The complainant's name, address, and telephone number; and

c. A general description of the alleged deficiencies.

280.7(2) *Initial determination.* The department will determine whether allegations warrant an inspection. The complainant or owner of the building, facility, or installation may be advised of the determination. Inspection is likely to occur for any building, facility, or installation that:

a. By want of proper repair, or by reason of age and dilapidated condition, is especially liable to fire and is so situated as to endanger other buildings, facilities, installations, property, or persons, or

b. Contains combustibles, explosives, or flammable materials dangerous to the safety of any buildings, premises, or persons.

280.7(3) *Final decision.* Upon completion of the inspection:

a. If the building, facility, or installation complies with applicable laws or rules and no deficiencies are found, the department will accordingly notify the owner and the complainant.

b. If any deficiencies are found and the building, facility, or installation is within the corporate limits of a city, the department will notify the mayor and clerk of said city of the deficiencies and the need for repairs.

c. If any deficiencies are found and the building, facility, or installation is outside the corporate limits of any city, the department will specifically identify such deficiencies and prepare an order to correct or repair the deficiencies in accordance with Iowa Code section 10A.515. The order will be mailed to or served upon the owner of the building, facility, or installation in accordance with Iowa Code chapter 17A and may be provided, as appropriate, to any occupants, lienholders, or lessees. The order is effective upon receipt or issuance and will give the owner a reasonable time to comply with its mandate(s). The department will determine what constitutes a reasonable time by considering the likelihood of fires; possibility of personal injury or property loss; cost; availability of materials and labor to correct, repair, remove or demolish the building, facility, or installation; and any other reasonable and relevant information. The order will also notify the owner that the owner may appeal the order in accordance with Iowa Code section 10A.515 and the process described in subrule 280.3(5).

d. Emergency orders may be issued in accordance with Iowa Code section 10A.515.

280.7(4) *Reinspection.* If the owner of the building, facility, or installation elects not to challenge the department's order, the department will, at the end of the period during which compliance was required, conduct another inspection of the building, facility, or installation.

280.7(5) *Failure to comply.* At the request of the department, the county attorney shall institute legal proceedings to obtain compliance or enforce penalty provisions in accordance with Iowa Code section 10A.516.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.8(10A) General provisions. The following publications or indicated portions thereof are hereby adopted by reference as general fire safety requirements and apply to all occupancies other than those to which provisions specific to an occupancy explicitly exclude these provisions or any individual provision contained therein.

280.8(1) International Fire Code, 2024 edition, published by the International Code Council, available at www.iccsafe.org, with the following amendments:

a. Delete section 103 and sections contained therein, section 104 and sections contained therein except section 104.2.3, section 105 and sections contained therein, section 106 and sections contained therein, section 107 and sections contained therein, section 108 and sections contained therein, section 109 and sections contained therein, section 110 and sections contained therein, section 111 and sections contained therein, section 112, section 113 and sections contained therein, section 114 and sections contained therein, and section 115 and sections contained therein.

b. Delete section 301.2.

c. Delete section 307.2.

d. Add the following new section 308.1.11:

308.1.11 Open Flame Cooking Devices. Charcoal burners and ash- or coal-producing devices shall not be operated on combustible balconies or within 10 feet of combustible construction.

Exceptions:

1. One- and two-family dwellings.
2. LP-gas burners connected to one (1) 20-pound LP-gas container.
3. Where buildings, balconies and decks are protected by an automatic sprinkler system.

e. Delete section 315.3.3 and insert in lieu thereof the following new section:

315.3.3 Equipment Rooms. Combustible material shall not be stored in boiler rooms, mechanical rooms, or electrical equipment rooms or in fire command centers as specified in Section 508.1.5.

Exception: In sprinklered equipment rooms that have sufficient space to allow a minimum of 10 feet between all combustible storage and the heating, mechanical or electrical equipment in the room.

f. Delete section 405.3 and table 405.3 and insert in lieu thereof the following new section and new table:

405.3 Frequency. Required emergency evacuation drills will be held at the intervals specified in Table 405.3 or more frequently where necessary to familiarize all occupants with the drill procedure.

TABLE 405.3

FIRE AND EVACUATION DRILL FREQUENCY AND PARTICIPATION

GROUP OR OCCUPANCY	FREQUENCY	PARTICIPATION
Group A	Quarterly	Employees
Group B[(c)]	Annually	Employees
Group E	See [(a)] below	All occupants
Group I	Quarterly on each shift	Employees
Group I-1[(b)] and Group R-4	Quarterly	All occupants
Group R-1	Quarterly on each shift	Employees
Group R-2[(d)]	Four annually	All occupants
High-rise	Annually	Employees

[(a)] Fire and severe weather drills shall be conducted in accordance with Iowa Code section 10A.522. In severe climates, the fire code official has the authority to modify the emergency evacuation drill frequency.

[(b)] Fire and evacuation drills in assisted living facilities include complete evacuation of the premises in accordance with Section 405.2. Drills shall be conducted not less than six times per year on a bimonthly basis, with not less than two drills conducted during the night when residents could reasonably be expected to be sleeping. The drills may be announced in advance to the residents. Where occupants receive habilitation or rehabilitation training, fire prevention and fire safety practices shall be included as part of the training program.

[(c)] Group B buildings that have an occupant load of 500 or more persons or more than 100 persons above or below the lowest level of exit discharge.

[(d)] Applicable to Group R-2 college and university buildings in accordance with Section 408.3.

g. Delete section 807.5.2.1 and insert in lieu thereof the following new section:

807.5.2.1 Storage in corridors and lobbies. Clothing and personal effects will not be stored in corridors and lobbies.

Exceptions:

1. Corridors protected by an approved automatic sprinkler system installed in accordance with Section 903.3.1.1.
2. Storage in metal lockers, provided the minimum required egress width is maintained.

h. Delete section 903.2.8 and insert in lieu thereof the following new section:

903.2.8 Group R. An automatic sprinkler system installed in accordance with Section 903.3 shall be provided throughout all buildings with a Group R fire area.

Exception: Cabin buildings that are located in remote areas without a sufficient municipal water supply for design of a fire sprinkler system and that meet all of the following:

1. Not more than one story.
2. Not more than 750 square feet in floor area.
3. Fuel-fired heating equipment and other fuel-fired appliances are separated from sleeping areas by a one-hour fire-rated assembly.
4. Provided with fire alarm and smoke alarm systems as required by Section 907 for R-1 occupancies.
5. Basements are not allowed.
6. Maintain a fire separation of 20 feet from any other building or structure.
7. Comply with all applicable requirements of this Code.

i. Delete section 907.2.3 and insert in lieu thereof the following new section:

907.2.3 Group E. In the absence of a complete automatic sprinkler system, a complete automatic detection system utilizing an emergency voice/alarm communication system shall be installed throughout the entire Group E occupancy. A Group E occupancy with a complete automatic sprinkler system will be provided with a fire alarm system utilizing an emergency voice/alarm communication system in compliance with Section 907.5.2.2 and installed in accordance with Section 907.6. As a minimum, smoke detection will be provided in corridors at a maximum spacing of 30 feet on center, and heat or smoke detection will be provided in any hazardous or nonoccupied areas in all new or existing Group E occupancies.

Exceptions:

1. Group E occupancies with an occupant load of less than 50.
2. Manual fire alarm boxes are not required in Group E occupancies where all of the following apply:

2.1. Interior corridors are protected by smoke detectors with alarm verification.

2.2. Auditoriums, cafeterias, gymnasiums and the like are protected by heat detectors or other approved detection devices.

2.3. Shops and laboratories involving dusts or vapors are protected by heat detectors or other approved detection devices.

2.4. Off-premises monitoring is provided.

2.5. The capability to activate the evacuation signal from a central point is provided.

2.6. In buildings where normally occupied spaces are provided with a two-way communication system between such spaces and a constantly attended receiving station from which a general evacuation alarm can be sounded, except in locations specifically designated by the fire code official.

3. Manual fire alarm boxes are not required in Group E occupancies where the building is equipped throughout with an approved automatic sprinkler system, the notification appliances will activate on sprinkler water flow, and manual activation is provided from a normally occupied location.
4. Emergency voice/alarm communication systems meeting the requirements of Section 907.5.2.2 and installed in accordance with Section 907.6 are not required in Group E occupancies with occupant loads of 100 or less, provided that activation of the fire alarm system initiates an approved occupant notification signal in accordance with Section 907.5.

j. Add the following new section 1003.8:

1003.8 Frost protection. Exterior landings at doors will be provided with frost protection.

k. Add the following new section 1028.6:

1028.6 Exit discharge pathways. Exit discharge pathways will be paved from all required exits of a building to a public way or parking lot.

l. Delete section 1030.1.1 and insert in lieu thereof the following new section:

1030.1.1 Bleachers, grandstands, and folding and telescopic seating that are not building elements will comply with ICC-300, Standard for Bleachers, Folding and Telescopic Seating, and Grandstands, 2023 edition, with the following amendments to ICC-300:

(1) Delete section 105.2 and insert in lieu thereof the following new section:

105.2 Yearly inspection required. All bleachers and folding and telescopic seating installed on or after December 1, 2011, shall be inspected at least once a year in order to verify that the structure is maintained in compliance with the provisions of this standard. All folding and telescopic seating will also be inspected to evaluate compliance with the manufacturer's installation and operational instructions during the opening and closing of such seating. Any inspection conducted in compliance with this section may be conducted by any knowledgeable person including, but not limited to, a person who has been instructed by the manufacturer or installer as to procedures and standards for inspections of the structure being inspected and including, but not limited to, the owner of the structure or an employee of the owner of the structure. There are no further limitations on the identity or employment of the person conducting the inspection unless otherwise provided by law. The owner shall maintain documentation of the required annual inspections, showing the date and name of the person conducting the inspection and initialed by the person conducting the inspection.

(2) Reserved.

m. Delete section 1103.5.1 Group A-2. Notwithstanding this deletion, a Group A-2 occupancy shall be equipped with an automatic sprinkler system if it was so required by another applicable section of a fire code adopted at the time of the Group A-2 occupancy's construction. Alternative means of compliance may be submitted for consideration per section 104.2.3 of the 2024 international fire code. Alternative means must be submitted to the department's fire safety bureau by a fire protection engineer for consideration of approval.

n. Delete section 1103.7.1 and insert in lieu thereof the following new section:

1103.7.1 Existing Group E occupancies shall be provided with a fire alarm system utilizing an emergency voice/alarm communication system in compliance with Section 907.5.2.2 and installed in accordance with Section 907.6. As a minimum, smoke detection will be provided in corridors at a maximum spacing of 30 feet on center, and heat or smoke detection will be provided in any hazardous or nonoccupied areas.

Exceptions:

1. A building with a maximum area of 1,000 square feet that contains a single classroom and is located no closer than 50 feet from another building.
2. Group E occupancy with an occupant load of less than 50.
3. Emergency voice/alarm communication systems meeting the requirements of Section 907.5.2.2 and installed in accordance with Section 907.6 are not required in Group E occupancies with occupant loads of 100 or less, provided that the activation of the fire alarm system initiates an approved occupant notification signal in accordance with Section 907.5.

o. Delete section 1103.8 and insert in lieu thereof the following new section:

1103.8 Single- and multiple-station smoke alarms. Single- and multiple-station smoke alarms shall be installed in existing Group I-1 and R occupancies in accordance with Sections 1103.8.1 through 1103.8.4.

p. Add the following new section 1103.8.4:

1103.8.4 Smoke alarm service life. Single-station battery-operated smoke alarms will be replaced in accordance with the manufacturer's instructions.

280.8(2) The following chapters and sections of the International Building Code, 2024 edition, published by the International Code Council, as amended by rule 481—301.3(10A):

a. Chapter 2.
b. Chapter 3.
c. Chapter 4.
d. Chapter 5.
e. Chapter 6.
f. Chapter 7.
g. Sections 804 and 805.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25; **ARC 0246D**, IAB 4/29/26, effective 6/3/26]

481—280.9(10A) Electrical installations. The provisions of the state electrical code in 481—Chapter 404 are hereby adopted by reference as the requirements for electrical installations. In addition to compliance with 481—Chapter 404, any installation of wiring and equipment will comply with requirements established by the manufacturer of the equipment serviced by the wiring.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.10(10A) Existing buildings or structures. Additions to any building or structure shall comply with the requirements for new construction. Additions shall comply with the height and area provisions of Chapter 5 of the International Building Code in rule 481—301.3(103A). Alterations to any building or structure shall comply with the requirements of the International Existing Building Code in rule 481—301.7(103A) for new construction. Only portions of the structure altered or affected by the alteration are required to comply with the requirements for new construction.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.11(10A) Recognition of local fire ordinances and enforcement.

280.11(1) With the exception of a health care facility subject to the requirements of rule 481—280.14(10A), a building, structure, or facility is deemed to comply if all of the following conditions are met:

a. The building, structure, or facility is in a local jurisdiction that has adopted a local fire ordinance that adopts by reference any edition of the International Fire Code, published by the International Code Council; any edition of NFPA 1, Uniform Fire Code, published by the NFPA; or the Uniform Fire Code, 1997 edition, published by the Western Fire Chiefs Association.

b. The local fire ordinance is enforced through a process of review and approval of construction plans for compliance with the local fire ordinance and a process of regular inspections for compliance with the local fire ordinance.

c. The building, structure, or facility is subject to regular fire safety inspections.

d. The local jurisdiction has verified, during its most recent inspection, including any follow-up inspections, that the building, structure, or facility complies with the local fire ordinance.

280.11(2) Notwithstanding any conflicting provisions contained in any code adopted by reference in this chapter or by any local fire ordinance, compliance with the provisions of 481—Chapter 282 is required at any location or facility in which flammable or combustible liquids are stored, handled, or used, other than incidental use.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

REQUIREMENTS FOR SPECIFIC OCCUPANCIES

481—280.12(10A) Scope of rules related to specific occupancies. The provisions of this chapter related to a specific occupancy apply solely to buildings, structures, and facilities currently being used and those proposed to be used in the specific ways described in the rule governing that specific occupancy. All other buildings, structures, and facilities in which people congregate are subject to the provisions of rules 481—280.8(10A) through 481—280.11(10A) or rule 481—280.14(10A).

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.13(10A,135C) Residential care facilities with a three- to five-bed specialized license and facilities in which foster care is provided by agencies to fewer than six children pursuant to Iowa Code chapter 237. This rule applies to residential care facilities with a three- to five-bed specialized license pursuant to Iowa Code section 135C.2(5) and 481—Chapter 63 and facilities in which foster care is provided by agencies to fewer than six children pursuant to Iowa Code chapter 237. The following is required:

280.13(1) *Exits.*

a. A minimum of two approved exits from the main level of the home and from each level with resident sleeping rooms.

b. Interior and exterior stairways with a minimum clear width of not less than 30 inches.

280.13(2) *Windows.* For every resident sleeping room, an outside window or outside door arranged and located to permit the venting of products of combustion and access to fresh air in the event of an emergency.

a. In new construction, windows with a minimum net clear openable area of 5.7 square feet, minimum net clear openable height of 24 inches, minimum net clear openable width of 20 inches, and finished sill height not more than 44 inches above the floor.

b. In existing construction, the finished sill height not more than 44 inches above the floor or the finished sill accessible from a platform not more than 44 inches below the window sill.

280.13(3) *Interior finish.* Interior finish in an exit shall be in accordance with the IFC edition adopted in subrule 280.8(1).

280.13(4) *Doors.* A minimum of 1⅜-inch solid core wood or equivalent doors to resident sleeping rooms.

280.13(5) *Vertical separations.* Basement stairs enclosed with one-hour rated partitions and 1¾-inch solid core wood doors equipped with self-closers. These doors must be kept closed unless held open by an

approved electromagnetic holder, actuated by an approved smoke detection device located at the top of the stairwell and interconnected with the alarm system.

280.13(6) *Fire detection, fire alarms, and sprinklers.*

a. Smoke detection installed on each occupied floor, including basements, in accordance with NFPA 72, as set forth in the IFC edition adopted in subrule 280.8(1). Smoke detectors shall be interconnected so that activation of any detector will sound an audible alarm throughout. The system must be tested by a competent person at least semiannually with date of test and name noted.

b. For homes in which exiting is restricted by special door-locking arrangements that prevent residents from free egress, sprinkler systems meeting the requirements of NFPA 13D, as set forth in the IFC edition adopted in subrule 280.8(1).

280.13(7) *Fire extinguishers.* Approved fire extinguishers provided on each floor, located so that a person will not have to travel more than 75 feet from any point to reach the nearest extinguisher and an additional extinguisher provided in, or adjacent to, each kitchen or basement storage room. The type and number of portable fire extinguishers will be determined by the department.

280.13(8) *Mechanical, electrical, and building service equipment.*

a. Air conditioning, ventilating, heating, cooking, and other service equipment will be installed in accordance with the manufacturer's specifications and any pertinent state regulations, including national standards adopted therein, governing the same. All hazardous areas normally found in one- and two-family dwellings, such as laundry, kitchen, heating units and closets, need not be separated with walls if all equipment is installed in accordance with the manufacturer's specifications.

b. Portable comfort heating devices are not permitted.

280.13(9) *Attendants; evacuation plan.*

a. Every facility in which residents are present shall have at least one staff person who is at least 18 years of age and capable of performing the required duties of evacuation on the premises at all times.

b. Every facility will formulate a plan for the protection of all persons in the event of fire and for their evacuation to areas of refuge and from the building when necessary. All employees will be instructed and kept informed with respect to their duties under the plan. The plan will be posted where all employees may readily study it. Fire drills will be held at least once a month, with records retained for inspection.

280.13(10) *Smoking.*

a. There will be no smoking in resident sleeping areas, and smoking policies will be strictly enforced.

b. Any ashtrays will be constructed of noncombustible material with self-closing tops and provided in areas where smoking is permitted.

280.13(11) *Exit illumination.* Approved rechargeable battery-powered emergency lighting installed to provide automatic exit illumination in the event of failure of the normal lighting system.

280.13(12) *Accessibility.* Nonambulatory residents shall be housed only on accessible floors that have direct access to grade where the use of stairs or elevators is not required.

280.13(13) *Maintenance.*

a. All fire and life safety equipment or devices are regularly and properly maintained in an operable condition at all times in accordance with nationally recognized standards adopted herein. Such equipment and devices include fire extinguishing equipment, alarm systems, doors and their appurtenances, cords and switches, heating and ventilating equipment, sprinkler systems, and exit facilities.

b. Storerooms are maintained in a neat and proper manner at all times.

c. Excessive storage of combustible materials such as papers, cartons, magazines, paints, sprays, old clothing, furniture, and similar materials is prohibited at all times.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

FIRE SAFETY REQUIREMENTS FOR HOSPITALS AND HEALTH CARE FACILITIES

481—280.14(10A) Fire safety requirements for ambulatory surgical centers, hospitals, and health care facilities.

280.14(1) *Definitions.* The following definitions apply to this rule:

"Existing" means that a facility (1) has been in continuous operation under its current classification of occupancy since before July 5, 2016, and has not undergone renovation or remodeling, including an

addition, on or after July 5, 2016, or (2) received plan approval for initial construction or for its most recent renovation or remodeling project, including an addition, if any, from the building code bureau of the fire marshal division prior to July 5, 2016.

"New" means that a facility (1) commenced continuous operation under its current classification of occupancy on or after July 5, 2016, (2) has undergone renovation or remodeling, including an addition, on or after July 5, 2016, or (3) received plan approval from the building code bureau of the fire marshal division for the initial construction of the facility or the most recent renovation of or addition to the facility on or after July 5, 2016.

280.14(2) *New hospitals.* NFPA 101, Life Safety Code, 2012 edition, Chapter 18, is adopted by reference as the fire safety rules for new hospitals.

280.14(3) *Existing hospitals.* NFPA 101, Life Safety Code, 2012 edition, Chapter 19, is adopted by reference as the fire safety rules for existing hospitals.

280.14(4) *New nursing facilities and hospices.* NFPA 101, Life Safety Code, 2012 edition, Chapter 18, is adopted by reference as the fire safety rules for new nursing facilities and hospices that provide inpatient care directly.

280.14(5) *Existing nursing facilities and hospices.* NFPA 101, Life Safety Code, 2012 edition, Chapter 19, is adopted by reference as the fire safety rules for existing nursing facilities and hospices that provide inpatient care directly.

280.14(6) *New intermediate care facilities.* New intermediate care facilities shall comply with the provisions of one of the following:

a. NFPA 101, Life Safety Code, 2012 edition, Chapter 18.

b. NFPA 101, Life Safety Code, 2012 edition, Chapter 32.

280.14(7) *Existing intermediate care facilities.* Existing intermediate care facilities shall comply with the provisions of one of the following:

a. NFPA 101, Life Safety Code, 2012 edition, Chapter 19.

b. NFPA 101, Life Safety Code, 2012 edition, Chapter 33.

280.14(8) *New ambulatory surgical centers.* NFPA 101, Life Safety Code, 2012 edition, Chapter 20, is adopted by reference as the fire safety rules for new ambulatory surgical centers.

280.14(9) *Existing ambulatory surgical centers.* NFPA 101, Life Safety Code, 2012 edition, Chapter 21, is adopted by reference as the fire safety rules for existing ambulatory surgical centers.

280.14(10) *New religious nonmedical health care institutions.* NFPA 101, Life Safety Code, 2012 edition, Chapter 18, is adopted by reference as the fire safety rules for new religious nonmedical health care institutions as defined by 42 CFR Part 403 (effective as of September 1, 2024).

280.14(11) *Existing religious nonmedical health care institutions.* NFPA 101, Life Safety Code, 2012 edition, Chapter 19, is adopted by reference as the fire safety rules for existing religious nonmedical health care institutions as defined by 42 CFR Part 403 (effective as of September 1, 2024).

280.14(12) *Evacuation capability.* Any requirement contained in NFPA 101, Life Safety Code, 2012 edition, Chapters 32 or 33, that is determined on a rating of evacuation capability shall be "impractical."

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

SMOKE ALARMS/DETECTORS

481—280.15(10A) Scope, definitions, and requirements for smoke alarms and smoke detectors.

280.15(1) This rule applies to single-family and two-family residences, townhouses, and all other residential occupancies in commercial buildings unless otherwise provided herein or by another provision of law. This rule does not apply to nonresidential occupancies.

280.15(2) For purposes of this rule, the following definition applies:

"Approved" means that the equipment has been approved by the department or listed for a specific use by an independent testing laboratory or organization of national reputation.

280.15(3) Residential smoke alarms are required to be listed under UL 217 edition 8 or 9. Approved single-station smoke alarms are acceptable in all areas covered by this chapter unless other fire warning equipment or materials are required by any provision of rules 481—280.8(10A) through 481—280.10(10A), rules 481—280.12(10A) and 481—280.13(10A,135C), or rule 481—280.14(10A) or

if a fire alarm system with smoke detection listed under UL 268 edition 8-2023 has been installed. Any single-station smoke alarm or multiple-station smoke alarm installed on or after April 1, 2010, in compliance with this subrule, including a replacement of an existing smoke alarm, shall be listed under UL 217 edition 8 or 9.

280.15(4) All devices, combinations of devices, and equipment to be installed in conformity with this chapter shall be approved and used for the purposes for which they are intended and installed in accordance with the manufacturer's recommendations. Any devices, combinations of devices, and equipment installed on or after April 1, 2010, in compliance with this chapter, including a replacement of an existing smoke alarm, will be listed in accordance with UL 217 edition 8 or 9. Existing dual sensor smoke alarms may be maintained until replacement is recommended by the manufacturer or upon failure.

280.15(5) A combination system, such as a household fire warning system whose components may be used in whole or in part, in common with a non-fire emergency signaling system, such as a burglar alarm system or an intercom system, is not permitted or approved, except for one- or two-family dwellings.

280.15(6) Single-station battery-operated or battery backup smoke alarms shall be replaced in accordance with the manufacturer's instructions.

280.15(7) Power supplies shall be sufficient to operate the smoke detector alarm for at least four continuous minutes. Additionally:

a. In new buildings and additions constructed after July 1, 1991, required smoke alarms will receive their primary power from the building wiring when such wiring is served from a commercial source. Wiring will be permanent and without a disconnecting switch other than that required for overcurrent protection. Smoke alarms may be solely battery-powered when installed in existing buildings; in buildings without commercial power; or in buildings presently undergoing alterations, repairs, or additions subject to 481—Chapter 404.

b. New and replacement smoke alarms installed after May 1, 1993, that receive their primary power from the building wiring will be equipped with a battery backup.

c. New and replacement smoke alarms installed after July 1, 2016, that receive their primary power from the building wiring where more than one smoke alarm is required to be installed will be interconnected in such a manner that the activation of one alarm will activate all of the alarms.

d. After June 30, 2021, a battery-powered smoke alarm listed in accordance with UL 217 edition 8 that is newly installed or replaces an existing battery-powered smoke alarm must be powered by a nonremovable, nonreplaceable battery that powers the alarm for at least ten years. The battery requirements of this subrule do not apply to a fire alarm, smoke detector, smoke alarm, or ancillary component that is electronically connected as a part of a centrally monitored or supervised alarm system or that uses a low-power, radio frequency wireless communication signal.

280.15(8) The failure of any nonreliable or short-life component that renders the alarm inoperative shall be readily apparent to the occupant of the sleeping unit without the need for a test. Each smoke alarm shall detect abnormal quantities of smoke and properly operate under normal environmental conditions.

280.15(9) Installed fire warning equipment shall be mounted so as to be supported independently of its attachment to wires.

280.15(10) All apparatus shall be restored to normal immediately after each alarm or test.

280.15(11) Smoke alarms shall be located on the ceiling or wall outside of each separate sleeping area in the immediate vicinity of bedrooms; in each room used for sleeping purposes; and in each story within a dwelling unit, including basements but not including crawl spaces and uninhabitable attics. In dwellings or dwelling units with split levels and without an intervening door between the adjacent levels, a smoke alarm installed on the upper level suffices for the adjacent lower level, provided that the lower level is less than one full story below the upper level.

280.15(12) A person who files for a homestead tax credit pursuant to Iowa Code chapter 425 shall certify that the single-family dwelling unit for which the credit is filed has a smoke alarm(s) installed in accordance with subrules 280.15(6) and 280.15(11) or that such smoke alarm(s) will be installed within 30 days of the date of filing for credit.

280.15(13) All multiple-unit residential buildings and single-family dwellings that are constructed after July 1, 1991, shall include the installation of smoke alarms meeting the requirements of this rule. All

existing single-family units and multiple-unit residential buildings shall be equipped with smoke alarms or detectors as required in subrule 280.15(11).

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

CARBON MONOXIDE ALARMS

481—280.16(10A) Scope and definitions. The provisions of this part (rules 481—280.16(10A) and 481—280.17(10A)) apply to new and existing single-family residences, single-family rental units, and multiple-unit residential buildings. The provisions of this part do not apply to nonresidential occupancies, including but not limited to Group I and Group E occupancies. The following definitions apply to this part:

"Building" means a combination of materials, whether portable or fixed, to form a structure affording facilities or shelter for persons, animals, or property. "Building" includes any part of a building or an addition to a building.

"Carbon monoxide alarm" means one or more devices, including but not limited to combination carbon monoxide alarm/smoke alarms, that detect carbon monoxide gas for the purpose of alerting occupants by a distinct audible signal; that incorporate a sensor, control components, and an alarm notification appliance in a single unit operated from a power source either in the unit or obtained at the point of installation; and that meet the standards established by the UL.

"Carbon monoxide detection system" means a system or portion of a combination system that consists of a control unit, components, and circuits arranged to monitor and annunciate the status of carbon monoxide alarm initiating devices and to initiate the appropriate response to those signals and that meets the standards established by the UL.

"Communicating opening" means a door, window, or any other opening that allows air to be exchanged between a fuel-burning appliance or garage and a sleeping unit or dwelling unit.

"Dwelling unit" means a room or suite of rooms used for human habitation that provides complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking, and sanitation.

"Existing" means buildings, facilities, or conditions that are already in existence, constructed or officially authorized prior to July 1, 2018.

"Fuel" means coal, kerosene, oil, fuel gases, or other petroleum products or hydrocarbon products such as wood that emit carbon monoxide as a byproduct of combustion.

"Fuel-burning" or *"fuel-fired"* means an appliance, heater, furnace, or fireplace that uses and combusts fuel as part of its designed use.

"Garage" or *"attached garage"* means a building or portion of a building in which motor vehicles are stored or kept.

"Listed" means equipment, materials, products, or services included in a list published by an organization acceptable to the department or local fire code official and concerned with evaluation of products or services that maintains periodic inspection of production of listed equipment or materials or periodic evaluation of services and whose listing states either that the equipment, material, product or service meets identified standards or has been tested and found suitable for a specified purpose.

"Multiple-unit residential building" means a building that contains more than two dwelling units or sleeping units. "Multiple-unit residential building" includes but is not limited to condominiums, townhouses, co-ops, apartment houses or portions of a building or an apartment house, hotels, motels, dormitories, or rooming houses.

"Open-ended corridor" means an interior corridor that is open on each end and connects to an exterior stairway or ramp at each end with no intervening doors or separation from the corridor.

"Single-family rental unit" means a building that contains not more than two dwelling units or sleeping units that are rented or leased for living purposes.

"Single-family residence" or *"single-family dwelling"* means a building that contains not more than two dwelling units that are used, or intended or designed to be used, for living purposes.

"Sleeping unit" means a room or space in a building in which people sleep, which can also include permanent provisions for living, eating, and either sanitation or kitchen facilities but not both. Such rooms and spaces that are also part of a dwelling unit are not sleeping units.

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—280.17(10A) Requirements for carbon monoxide alarms and detection systems.

280.17(1) *Standards for carbon monoxide alarms and carbon monoxide detection systems.* All carbon monoxide alarms installed prior to July 1, 2025, shall meet the requirements of the NFPA Standard 720, 2012 edition, and be UL listed in accordance with UL 2034 edition 5 as revised August 7, 2024. All carbon monoxide alarms installed after July 1, 2025, shall meet the requirements of the NFPA Standard 72, 2022 edition. All carbon monoxide detection systems installed prior to July 1, 2025, shall meet the requirements for the NFPA Standard 720, 2012 edition; display a label or other identification issued by an approved testing agency; and be UL listed in accordance with UL 2075 edition 2 as revised August 4, 2023. All carbon monoxide detection systems installed after July 1, 2025, shall meet the requirements of the NFPA Standard 72, 2022 edition. All carbon monoxide alarms, combination carbon monoxide alarm/smoke alarms, and carbon monoxide detection systems installed under these rules must be listed with the UL.

280.17(2) *Carbon monoxide alarms required.* Carbon monoxide alarms are required in the following buildings if the building is served by a fuel-burning heater, fuel-burning furnace, fuel-burning appliance, or fuel-burning fireplace or has an attached garage.

a. Multiple-unit residential buildings and single-family residences for which construction began on or after July 1, 2018.

b. Existing single-family rental units, single-family residences, and multiple-unit residential buildings.

280.17(3) *Location.* A carbon monoxide alarm shall be installed in the following building locations:

a. In the immediate vicinity of every room used for sleeping purposes in each dwelling unit.

b. In each bedroom where a fuel-burning heater or furnace, fuel-burning appliance, or fireplace is located within the bedroom or its attached bathroom.

c. In each sleeping unit, if the sleeping unit or its attached bathroom contains a fuel-burning appliance, fuel-burning heater or furnace, or fireplace.

d. In the immediate vicinity of each sleeping unit where the sleeping unit or its attached bathroom does not contain a fuel-burning appliance, fuel-burning heater, or fireplace and is not served by a forced-air furnace.

280.17(4) *Location exceptions.* A carbon monoxide alarm is not required in the locations specified by subrule 280.17(3) when:

a. There are no communicating openings between the fuel-burning heater or furnace, fuel-burning appliance, fireplace, or attached garage and a dwelling unit or sleeping unit.

b. There are no communicating openings between the fuel-burning heater or furnace, fuel-burning appliance or fireplace and a dwelling unit or sleeping unit and when a dwelling unit or sleeping unit is located more than one story above or below an attached garage.

c. There are no communicating openings between the fuel-burning heater or furnace, fuel-burning appliance, or fireplace and a sleeping unit or dwelling unit and the attached garage connects to the building through an open-ended corridor.

d. A carbon monoxide alarm is located on the ceiling of the room containing the fuel-burning heater, fuel-burning appliance or fireplace, or in the first room or area between the fuel-burning heater, fuel-burning appliance or fireplace and the dwelling unit or sleeping unit.

280.17(5) *Forced-air furnace—exception.* A carbon monoxide alarm is not required in a dwelling unit or sleeping unit that is served by a fuel-burning forced-air furnace when a carbon monoxide alarm is located on the ceiling of the room containing the forced-air furnace or in the first room or area served by each main duct leaving the forced-air furnace and the carbon monoxide alarm signals are automatically transmitted to the occupants of each dwelling unit or sleeping unit served by the forced-air furnace.

280.17(6) *Carbon monoxide detection systems.* Commercially installed carbon monoxide detection systems that have the capability of notifying all occupants of dwelling units or sleeping units within a building are an acceptable alternative to the installation of carbon monoxide alarms and are deemed compliant with this chapter.

280.17(7) *Combination alarms.* The carbon monoxide alarm may be combined with smoke detecting devices provided that the combined unit complies with pertinent provisions of this chapter regarding smoke detectors in addition to carbon monoxide alarm standards. A combined carbon monoxide alarm/smoke alarm shall emit different alarm signals for carbon monoxide and for smoke. Combination carbon monoxide alarm/smoke alarms are an acceptable alternative to carbon monoxide alarms.

280.17(8) *New construction—power source.* In buildings for which construction is begun on or after July 1, 2018, carbon monoxide alarms will receive their primary power from the building wiring when such wiring is served from a commercial source. Wiring will be permanent and without a disconnecting switch other than that required for overcurrent protection and will be equipped with a battery backup.

280.17(9) *Existing buildings—power source.* New and replacement carbon monoxide alarms installed in existing buildings may be solely battery operated or may plug into an electrical socket and have a battery backup.

280.17(10) *Responsibility for installation and maintenance of carbon monoxide alarms.* It is the responsibility of the owner, owner's agent, or manager of a multiple-unit residential building, single-family residence, or single-family rental unit to install carbon monoxide alarms in accordance with this chapter. However, if a dwelling unit in a multiple-unit residential building qualifies for a homestead credit pursuant to Iowa Code chapter 425, only the owner-occupant of the dwelling unit has the responsibility to install and maintain carbon monoxide alarms in accordance with this chapter.

280.17(11) *Maintenance of carbon monoxide alarms.*

a. It is the responsibility of the owner of a multiple-unit residential building, single-family rental unit, or dwelling unit to supply and install all required carbon monoxide alarms and to ensure that the batteries are in operating condition at the time the lessee, tenant, guest, or roomer takes possession of the dwelling unit or sleeping unit. The owner is responsible for providing written information regarding carbon monoxide alarm testing and maintenance to one lessee, tenant, guest, or roomer per dwelling unit or sleeping unit.

b. An owner or manager may require a lessee, tenant, guest, or roomer who has a residency longer than 30 days to be responsible for general maintenance, including but not limited to replacement of any required batteries of the carbon monoxide alarms and testing the carbon monoxide alarms in the lessee's, tenant's, guest's, or roomer's dwelling unit or sleeping unit. The lessee, tenant, guest, or roomer is responsible for notifying the owner or manager in writing of any deficiencies that the lessee, tenant, guest, or roomer cannot correct and providing the owner or manager access to the dwelling unit or sleeping unit so that deficiencies can be corrected.

280.17(12) *Deaf or hard-of-hearing tenant.* Upon request of a tenant who is deaf or hard of hearing, an owner of a multiple-unit residential building or a single-family rental unit that has a fuel-fired heater or appliance, a fireplace, or an attached garage, or the owner's agent, shall install light-emitting carbon monoxide alarms.

280.17(13) *Certification of installation required.* A person who files for a homestead credit pursuant to Iowa Code chapter 425 will certify that the dwelling unit that has a fuel-fired heater or furnace, a fuel-fired appliance, a fireplace, or an attached garage has carbon monoxide alarms installed in compliance with this chapter or that such alarms will be installed within 30 days of the date the filing for the credit is made.

280.17(14) *Inspections authorized.* Inspections may be conducted by the director; the director's subordinates; chiefs of local fire departments; state or local building inspectors; or other fire, building, or safety officials authorized by the director. Any inspections authorized under this rule are limited to the placement, repair, and operability of carbon monoxide alarms and carbon monoxide detection systems.

280.17(15) *Inoperable carbon monoxide alarms and corrective action.* Upon receiving written notification by a lessee, tenant, guest, or roomer or by the director; director's subordinates; state fire marshal; fire marshal's subordinates; a chief of a local fire department; a building inspector; or other fire, building or safety official that a carbon monoxide alarm is inoperable, the owner or manager of the multiple-unit residential building or single-family rental unit shall repair or replace the carbon monoxide alarm within 30 days. If the owner or manager fails to correct the situation within the 30 days after receipt of written notice, the tenant, guest, or roomer may cause the carbon monoxide alarm to be repaired or

may purchase and install a carbon monoxide alarm required under this chapter and may deduct the repair cost or purchase price from the next rental payment or payments made by the tenant, guest, or roomer in accordance with Iowa Code section 10A.518(7).

[**ARC 9472C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

These rules are intended to implement Iowa Code sections 10A.511 through 10A.525 and chapters 135B, 135C, 135J, 231C, and 237.

CHAPTER 281
Reserved

CHAPTER 282
FLAMMABLE OR COMBUSTIBLE LIQUIDS
[Prior to 7/9/25, see Public Safety Department[661] Ch 221]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/4/30

481—282.1(101) Scope and definitions.

282.1(1) This chapter provides the rules of the department for safe transportation, storage, handling, and use of flammable or combustible liquids. The flammable or combustible liquids program is part of the aboveground flammable or combustible liquid storage tanks program and may be contacted as provided in 481—Chapter 1 and on the department's website: dial.iowa.gov.

282.1(2) The definitions set forth in Iowa Code chapter 101 are incorporated by reference herein. The following definitions also apply to this chapter. These definitions are adopted in addition to those that appear in the International Fire Code, 2024 edition; NFPA 30, Flammable and Combustible Liquids Code, 2024 edition; and NFPA 30A, Code for Motor Fuel Dispensing and Repair Garages, 2024 edition. If a definition adopted in this rule conflicts with a definition included in a code or standard adopted by reference in this chapter, the definition found in this rule will apply.

"Approved by the department" means a laboratory has requested and received recognition by the department to test equipment whose use or installation is required by rules of the department. A laboratory that seeks approval of the department will contact the department and provide information required by the department. Approval or disapproval will be granted only by a letter from the department to the laboratory making the request, although advance notice of the decision of the department regarding whether approval is to be granted may be provided by electronic mail.

"Department" means the department of inspections, appeals, and licensing.

"Diesel fuel" means a liquid, other than gasoline, that is suitable for use as a fuel in a diesel fuel-powered engine and that meets the applicable standards established in Iowa Code section 214A.2. A blend of "diesel fuel" that meets these standards and contains 6 percent biodiesel or more is "biodiesel fuel." Diesel fuel blends that meet these standards and contain less than 6 percent biodiesel are diesel fuel and not biodiesel fuel.

"ICC" means the International Code Council, 200 Massachusetts Avenue, NW, Suite 250, Washington, D.C., 20001; website iccsafe.org.

"IFC" means the International Fire Code, published by the ICC. "IFC" will be followed by a year (e.g., IFC, 2006), which indicates the specific edition of the IFC to which reference is made.

"Independent testing laboratory" means a laboratory recognized by the federal Occupational Safety and Health Administration as a nationally recognized testing laboratory or a laboratory approved by the department.

"Listed" means listed or approved by an independent testing laboratory for a specific use. A product is considered to be listed if it is of a model that has been listed for the use to which it is being put, whether it was manufactured prior to or after the date on which the listing became effective.

"Mobile air-conditioning system" means mechanical vapor compression equipment that is used to cool the driver or passenger compartment of any motor vehicle.

"NFPA" means the National Fire Protection Association, 1 Batterymarch Park, Quincy, MA 02169-7471; website nfpa.org. References to the form "NFPA xx," where "xx" is a number, refer to the NFPA standard or pamphlet of the corresponding number.

"SPCC plan" means a spill prevention, control, and countermeasure plan, as defined in 40 CFR 112, published July 22, 2024.

"Under-dispenser containment" or *"UDC"* means containment underneath a dispenser that will prevent leaks from the dispenser from reaching soil or groundwater.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.2 Reserved.

481—282.3(101) Compliance. Any tank subject to the provisions of this chapter shall comply with this chapter and Iowa Code chapter 101 at all times.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.4(101) Flammable or combustible liquids. The IFC, 2024 edition, published by the ICC, Chapter 34 and references contained therein, and NFPA 30, Flammable and Combustible Liquids Code, 2024 edition, and references contained therein, subject to amendments that follow, are adopted by reference as the rules for transportation, storage, handling, and use of flammable or combustible liquids. In any case in which a provision of the IFC conflicts with a provision of NFPA 30, the NFPA provision controls. Any refinery shall comply with the provisions of this rule.

282.4(1) Amendments to the IFC, 2024 edition, are as follows:

a. The category of combustible liquids does not include compressed gases or cryogenic fluids.

b. Delete the definition of refinery and insert in lieu thereof the following:

REFINERY. A plant in which flammable or combustible liquids are produced on a commercial scale from crude petroleum, natural gasoline or other sources.

c. Add the following new sections:

5703.6.12 Each connection to an aboveground tank through which liquid can normally flow shall be provided with an external control valve that is located as close as practical to the shell of the tank as well as an emergency internal check valve at each pipe connection to any tank opening below normal liquid level effectively located inside the tank shell and operable both manually and by an effective heat-activated device that, in case of fire, will automatically close the valve to prevent the flow of liquid from the tank even though the pipelines from the tank are broken.

5703.6.13 Any device dispensing Class I or Class II flammable liquids shall not be constructed or installed less than 100 feet from any existing dwelling unit.

d. Delete section 5704.2.9.2.2.1, introductory paragraph, and insert in lieu thereof the following:

5704.2.9.2.2.1 Foam fire protection shall:

a. If required, be provided in accordance with NFPA 11, 2024 edition, and be of a type or types and amount appropriate to suppress fires involving types and amounts of flammable or combustible liquids found on the premises.

b. Where the flammable or combustible liquid contains more than 10 percent alcohol, be alcohol-resistant and stored separately from any area in which flammable or combustible liquids are stored and, in an area, or areas that will be readily accessible to fire fighters responding to a fire at the facility.

e. Amend the exception to section 5704.2.9.2.2.1 by adding the following new numbered paragraphs:

6. The premises are not a refinery.

7. The premises do not include bulk storage of flammable or combustible liquids.

8. The premises do not contain total storage capacity to store one million gallons or more of flammable or combustible liquids.

f. Delete section 5704.3.1.1 and insert in lieu thereof the following:

5704.3.1.1 Approved containers. Only approved containers and portable tanks shall be used, and no flammable or combustible liquid be placed into, stored in, or carried in any container other than one which is metal or hard plastic or be placed into, stored in, or carried in any temporary or disposable container.

282.4(2) Amend NFPA 30, section 22.11.4, by adding the following new paragraphs:

(11) Each secondary containment tank shall have top-only openings and be either a steel double-walled tank or a steel inner tank with an outer containment tank wall constructed in accordance with nationally accepted industry standards, such as those codified by the American Petroleum Institute, the Steel Tank Institute and the American Concrete Institute. Each tank will be listed by an independent testing laboratory.

(12) Each fill opening in a secondary containment tank shall be provided with a spill container that will hold at least 5 gallons.

(13) For any secondary containment tank, interstitial tank space shall be monitored by an approved, continuous, automatic detection system that is capable of detecting liquids, including water. An automatic detection system may be either electronically or mechanically operated.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.5(101) Motor fuel dispensing facilities and repair garages. The IFC, 2024 edition, published by the ICC, and references contained therein, and NFPA 30A, Code for Motor Fuel Dispensing Facilities and Repair Garages, 2024 edition and references contained therein, are adopted by reference as the rules for motor fuel dispensing facilities and repair garages. If any provision of the IFC adopted herein is in conflict with any provision of NFPA 30A, the IFC provision will apply. The IFC, 2024 edition, Chapter 23, is adopted with the following amendments:

282.5(1) Amend Table 2306.2.3 so that:

Each tank with a capacity of not more than 6,000 gallons for motor vehicle fuel dispensing systems and storing a Class I liquid, or with a capacity of not more than 12,000 gallons and storing a Class II or Class III liquid, that is located at a commercial, industrial, governmental, or manufacturing establishment, and that is intended for fueling vehicles used in connection with the establishment, is required to be located at least:

a. 40 feet away from the nearest important building on the same property;

Exception: Tanks may be located closer than 40 feet to a building of noncombustible construction.

b. 40 feet away from any property that is or may be built upon, including the opposite side of a public way;

Exception: No minimum separation will be required for any tank that complies with NFPA 30A, section 4.3.2.6.

c. 100 feet away from any residence or place of assembly.

282.5(2) Add the following new sections:

2206.7.1.1 Dispensing of blended biofuels.

2206.7.1.1.1 Definitions.

"B-blend" means biodiesel blended fuel as defined in Iowa Code section 214A.1 with the blend including between 6 and 20 percent biodiesel, as defined in Iowa Code section 214A.1.

Note: For purposes of the rules contained in this chapter and other chapters of rules of the department, diesel fuel may contain biodiesel provided that the concentration of biodiesel is less than 6 percent in accordance with rule 21—85.20(214A,208A), which adopts by reference standards for the content of motor fuels established by ASTM International (formerly known as the American Society for Testing and Materials).

"E-10" means a blend of petroleum and ethanol including no more than 16 percent ethanol intended for use as a motor vehicle fuel.

"E-blend" means a blend of petroleum and ethanol including more than 16 percent ethanol intended for use as a motor vehicle fuel.

"Existing E-blend dispenser" means a dispenser installed on or before October 24, 2010, for use in dispensing E-blend.

2206.7.1.1.2 E-blend may be dispensed only if the dispenser is listed by an independent testing laboratory for use with E-blend or E-85.

2206.7.1.1.3 B-blend may be dispensed only if (1) and either (2), (3), (4), or (5) apply:

(1) Only a dispenser listed by an independent testing laboratory as compatible with diesel fuel shall be used to dispense B-blend.

(2) The owner or operator shall visually inspect the dispenser and the dispenser sump daily for leaks and equipment failure and maintain a record of such inspection for at least one year after the inspection and located on the premises of the owner or operator and made available to the department of natural resources or the department upon request. If a leak is detected, the department of natural resources will be notified pursuant to Iowa Code section 455B.386.

(3) The dispenser's manufacturer has submitted the dispenser to an independent testing laboratory to be listed as compatible for use with B-blend, and the owner or operator has installed an under-dispenser containment system with electronic monitoring.

(4) Information published or provided by the manufacturer of the dispenser is available stating that the dispenser is compatible with B-blend.

(5) The owner or operator of the dispenser has in force insurance for environmental liability in a minimum amount of $500,000, which would cover damage resulting from the operation of the dispenser

and the owner or operator is able to produce documentation of the insurance coverage upon request from the department or the department of natural resources.

Note: If option (2), (4), or (5) is used, under-dispenser containment will be provided if otherwise required by the rules in this chapter, rules of the department of natural resources, or any other applicable provision of law.

This subrule is intended to implement Iowa Code sections 101.1 and 455G.31.

282.5(3) Add the following new section:

2206.7.10 Under-dispenser containment (UDC). When installing a new motor fuel dispenser or replacing a motor fuel dispenser, UDC shall be installed whenever any of the following occurs:

(1) UDC is required by a rule adopted by the environmental protection commission.

Note: See 567—subrule 135.3(9);

(2) A motor fuel dispenser is installed at a location where there previously was no dispenser; or

(3) An existing motor fuel dispenser is removed and replaced with another dispenser. UDC is not required when only the emergency shutoff, shear valves or check valves are replaced.

UDC shall:

- Be intact and liquid tight on its sides and bottom and at any penetrations;
- Be compatible with the substance conveyed by the piping; and
- Allow for visual inspection and monitoring and access to the components in the containment system.

Exception: UDC will not be required for a dispenser which sits directly upon a solid concrete apron.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.6(101) Temporary storage in disaster emergencies. Notwithstanding any provision to the contrary found in this chapter or the IFC or NFPA 30A as adopted by reference herein, aboveground flammable or combustible liquid storage tanks may be used to store flammable or combustible liquids in motor fuel dispensing operations, provided that all of the following apply:

282.6(1) The facility is in an area covered by a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6 or, if not in such an area, the facility has applied to the department and has been approved for storage of flammable or combustible liquids in compliance with this subrule.

282.6(2) The facility has suffered damage that has rendered the storage tanks normally used by the facility for flammable or combustible liquids inoperable. Storage of flammable or combustible liquids in compliance with this subrule may continue only for as long as the normal storage tanks are inoperable and for more than 90 days.

Exception: In extraordinary circumstances, storage of flammable or combustible liquids in compliance with this subrule may continue for more than 90 days if the facility has sought and received specific written approval from the department for such storage.

282.6(3) The facility has written confirmation from the facility's insurance provider that insurance coverage will apply while storage of flammable or combustible liquids in compliance with this subrule is occurring.

282.6(4) Any aboveground flammable or combustible liquid storage tank used pursuant to this subrule shall be rated or listed by an independent testing laboratory for aboveground storage of flammable or combustible liquids.

282.6(5) Any aboveground flammable or combustible liquid storage tank used pursuant to this subrule shall be of no more than 1,000 gallons capacity.

Exception: A storage tank larger than 1,000 gallons capacity may be used pursuant to this subrule if the facility has received specific written approval from the department for its use. In reviewing such a request, the department will consider but is not limited to considering the following factors:

a. Volume of throughput of the facility.

b. Ability to meet setback requirements appropriate to the size of the tanks used.

282.6(6) All electrical service proximate to the storage area will comply with applicable provisions of NFPA 70, National Electrical Code, as adopted in 481—Chapter 404. An emergency shutoff control or

electrical disconnect shall be installed no less than 20 feet nor more than 100 feet from any fuel-dispensing device at the facility and be clearly marked "Emergency Shutoff."

282.6(7) A 20-pound fire extinguisher with a minimum B:C rating of 40 shall be located no more than 50 feet from the location of any storage tank being used in compliance with this subrule.

282.6(8) Precautions shall be taken to prevent the ignition of flammable or combustible liquids, including the conspicuous posting of warning signs saying, "NO SMOKING" and "NO OPEN FLAME."

282.6(9) Aboveground flammable or combustible liquid storage tanks used pursuant to this subrule will be plumbed into existing dispensers, if practical. If this is impractical, all fueling at the facility shall be by attendant only; no self-service dispensing will be allowed at the facility.

282.6(10) Any aboveground flammable or combustible liquid storage tank used in compliance with this subrule shall be located so as to be protected from prospective damage from vehicle collisions and located with due regard to vehicular traffic patterns and the location of property lines and significant buildings, particularly those that are frequently occupied by humans.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.7(101) Aircraft fueling. The IFC, 2024 edition, published by the ICC, sections 2006 through 2006.21.1 and references contained therein, and NFPA 407, Standard for Aircraft Fuel Servicing, 2022 edition and references contained therein, are adopted by reference as the rules for aircraft fueling facilities. If any provision of the IFC adopted herein conflicts with any provision of NFPA 407, 2022 edition, the NFPA provision controls.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.8(101) Helicopter fueling. The IFC, 2024 edition, published by the ICC, sections 2007 through 2007.8 and references contained therein, is adopted by reference as the rules for helicopter fueling facilities.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.9(101) Fuel-fired appliances. The IFC, 2024 edition, published by the ICC, sections 605 through 605.8 and references contained therein, is adopted by reference as the rules for fuel-fired appliances, except for LP-gas fired appliances, which are subject to the provisions of 481—Chapter 286.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.10(101) Stationary combustion engines and gas turbines. The IFC, 2024 edition, Chapter 6 and references contained therein, and NFPA 37, "Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines," 2024 edition, are adopted by reference as the rules governing the installation and use of stationary combustion engines and gas turbines. If any provision of the IFC, 2024 edition, Chapter 6, adopted herein is in conflict with any provision of NFPA 37, 2024 edition, the IFC provision controls.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.11(101) Plans and plan review fees.

282.11(1) The owner of any premises on which flammable or combustible liquids are or will be stored or used is required to submit construction plans to the department, online or by mail, prior to commencing initial construction of the facility or prior to commencing any construction at an existing facility that includes the addition or replacement of an aboveground flammable or combustible liquid storage tank. The construction plans will be sealed by a licensed professional engineer if the facility at which the construction will occur is or will be a refinery or if preparation of the plans by a licensed professional engineer is required by another provision of Iowa law. Construction for which plans are required to be submitted for review will not commence until approval of the plan has been received from the department.

Exception 1: Submission of construction plans is not required if the total flammable or combustible liquid storage capacity on the premises is or will be 1,100 gallons or less.

Exception 2: If an SPCC plan has been prepared pursuant to 40 CFR 112 for a facility other than a refinery, a copy of the SPCC plan may be submitted to the department in lieu of submission of separate construction plans, provided that the SPCC plan includes all of the elements required to be included in

construction plans for the specific facility in this subrule. If the department agrees, copies of portions of the SPCC plan may be submitted in lieu of a copy of the complete plan provided that all elements of construction plans that are required by this subrule for the specific facility are included. If an SPCC plan or portions thereof are submitted to the department, the person making the submission will provide any additional information required by the department to evaluate compliance with the provisions of this chapter and Iowa Code chapter 101. The copy of the SPCC plan or portions thereof submitted to the department will clearly identify the licensed professional engineer who prepared the plan or will be accompanied by a letter making this identification.

282.11(2) Minimum requirements for plans submitted for review shall include the following:

a. Drawings showing the name of the person, firm, or corporation proposing the installation, the location, and the adjacent streets or highways.

b. In the case of refineries or bulk plants, drawings showing, in addition to any applicable features required under paragraphs 282.11(2)*"d"* and *"e,"* the plot of ground to be utilized and its immediate surroundings on all sides and a complete layout of buildings, tanks, loading and unloading docks, and heating devices, if any.

c. In the case of service stations, drawings showing, in addition to any applicable features required under paragraphs 282.11(2)*"d," "e,"* and *"f,"* the plot of ground to be utilized; the complete layout of buildings, drives, dispensing equipment, and greasing or washing stalls; and the type and location of any heating device.

d. In the case of aboveground storage, drawings showing the location and capacity of each tank; dimensions of each tank whose capacity exceeds 50,000 gallons, the class of liquid to be stored in each tank, the type of tank supports, the clearances, the type of venting and pressure relief relied upon and the combined capacity of all venting and pressure relief valves on each tank, and the tank control valves and the location of pumps and other facilities by which liquid is filled into or withdrawn from the tanks.

e. In the case of underground storage, drawings showing the location and capacity of each tank; the class of liquids to be stored; and the location of fill, gauge, vent pipes, openings, and clearances.

f. In the case of an installation for storage, handling, or use of flammable or combustible liquids within buildings or enclosures at any establishment or occupancy covered in this chapter, a drawing in detail sufficient to show whether applicable requirements are to be met.

282.11(3) Fees for plan reviews apply as follows:

a. $100 plus $25 for each new or replacement tank included in the plan, for any site or facility at which flammable or combustible liquids are or will be stored, except for new construction of a refinery.

b. $500 for review of the initial construction plans of a refinery if the projected construction costs are $100,000,000 or less and $1,000 for the initial construction plans for a refinery if the projected construction costs are greater than $100,000,000.

282.11(4) The owner will submit payment of plan review fees electronically or in the form of a check, money order, or warrant payable to the department. Payment will not be made in cash.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.12(101) Approval of plans. A registration tag for a new aboveground storage tank will not be issued prior to approval by the department of plans for the installation of the tank and payment of the required plan review and registration fee. The department may require inspection of the tank and payment of an inspection fee prior to use of the tank.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.13(101) Inspections. Any facility at which flammable or combustible liquids are stored is subject to inspection by an employee of the department during the regular business hours of the facility or within four hours of notifying the owner of intent to inspect the facility. Inspections may be initiated by the department or designee at random or on any other basis; may be conducted at the request of the owner, operator, or manager of a facility; or may be conducted to investigate allegations made in a complaint. Complaints should be in writing and submitted to the department and specify the location and nature of the alleged violations.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.14(101) Registration of existing and new tanks—fees. All existing, new, replacement, and out-of-service aboveground tanks of 1,101-gallon capacity or greater shall be registered with the department as follows: aboveground tanks used to store flammable or combustible liquids, as defined in Iowa Code section 455B.471, including but not limited to crude oil, heating oil offered for resale, motor fuels and oils such as gasoline, diesel fuels and motor oil; and tanks and are used, or planned for use, to store blended fuels, which include either gasoline or diesel.

282.14(1) *Registration form.* Registration forms for aboveground storage tanks may be obtained from the department. A completed registration form shall be submitted to the department, online or by mail by the date on which it is due, and accompanied by the applicable fee, including any applicable late charges.

282.14(2) *Fees.* Registration fees and late fees are set forth in Iowa Code section 101.22.

282.14(3) *Registration deadline.* Each tank shall be registered annually by October 1 of each year.

Exception: A tank may be registered for the first time on any date without penalty, provided that it has not previously been in use to store flammable or combustible liquids. A tank that is registered for the first time shall not be used to store flammable or combustible liquid until the registration has been completed and the registration tag has been attached to the tank.

282.14(4) *Payment.* The registration fee, and any applicable late fee, may be submitted electronically or by draft, check, or money order payable to the department. Payment cannot be made in cash.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.15(101) Inspections and orders.

282.15(1) *Inspections.* Any tank is subject to inspection at any time by the department, an employee of the department, a local fire chief, or any member of the local fire department designated by the local fire chief. Any of the persons listed who seeks to inspect a tank pursuant to this rule shall, upon request, be allowed access to any facility in which a tank or tanks are located as follows:

a. At any time such a facility is attended, immediate access to the facility to the person who requests access to the facility in order to conduct an inspection;

b. If a facility is unattended, the person who seeks to conduct the inspection will notify the owner or operator of the facility. During regular business hours, or between 8 a.m. and 4 p.m. Monday through Friday, access shall be allowed within one hour of notification. If access is sought other than during regular business hours, access will be provided at 8 a.m. on the next weekday other than a holiday;

c. If the person who seeks access to the facility indicates that access is being sought to investigate an emergency or potential emergency, the owner of the facility will provide access within one hour of receiving the request, regardless of the time of day or day of the week when the request is received.

282.15(2) *Orders.* If the person who conducts an inspection pursuant to this chapter finds that a tank is in violation of any applicable provision of this chapter or Iowa Code chapter 101, the person may issue an order for correction. The order will specify the violation or violations, corrective actions to be taken, and the time allowed for completion of the corrective actions.

282.15(3) *Suspension of use.* If any corrective action ordered pursuant to subrule 282.15(2) is not completed in the time specified therein, the department may order that the tank be placed out of service until the corrective action or actions have been completed. If a tank is ordered to be placed out of service pursuant to this subrule, the tank will have a sticker prominently affixed to it that states that the tank is out of service by order of the department and that it is a violation of law to transfer any flammable or combustible liquid into the tank.

282.15(4) *Emergency order.* If the department finds that a violation identified during an inspection conducted pursuant to subrule 282.15(1) creates an imminent threat to public safety or public health, or if the department finds, after consultation with the department of natural resources, that such a violation creates an imminent threat of environmental damage, the department will order that the tank be placed out of service immediately and may order that the tank be evacuated of liquid and purged of vapors. If a tank is ordered to be placed out of service pursuant to this subrule, the tank will have a sticker prominently affixed to it that states that the tank is out of service by order of the department and that it is a violation of law to transfer any flammable or combustible liquid into the tank.

282.15(5) *Notice.* Notice of any order issued pursuant to this rule will be given to the owner or operator of a tank subject to the order. Notice of an emergency order issued pursuant to subrule 282.15(4)

will be given by personal service. Notice of any other order issued pursuant to this rule may be given by regular mail, electronic mail, or personal service.

Exception: If the owner of a tank subject to an order issued pursuant to this rule is unknown or cannot be located, notice will be considered to have been given if the notice is served personally to any person at the location of the tank or, if no person is present, by affixing the notice to the tank. Alternatively, notice may be given by mailing the notice to the address at which the tank is located, with a return receipt requested. Notification from the United States Postal Service that delivery was attempted unsuccessfully or that delivery was refused will serve as proof that notice was given.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.16(101) Leaks, spills, or damage. Any leak from, spill from, or damage to a storage tank shall:

282.16(1) Be reported to the local fire department and, if required by law, to the department of natural resources.

282.16(2) Be placed out of service until the leak or damage has been repaired.

282.16(3) Have a sign placed prominently on the tank stating that the tank is out of service and that no flammable or combustible liquid shall be placed into the tank until required repairs have been completed.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.17(101) Civil penalty. The department may impose a civil penalty in accordance with Iowa Code section 101.26 upon the owner of a storage tank for any of the following:

282.17(1) Failure to register a storage tank currently being used to store a flammable or combustible liquid if the registration is more than 30 days late.

282.17(2) Allowing any flammable or combustible liquid to be placed into a tank that has been ordered to be placed out of service and for which the order has not been rescinded or allowing any flammable or combustible liquid to be placed into any tank that has been damaged or is leaking, if the damage or leak has not been repaired.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25]

481—282.18(17A,101) Appeals. Any order or civil penalty issued pursuant to this chapter may be appealed by submitting a request for a contested case hearing to the department, in writing, within 30 days of receipt or service of the order or civil penalty. Contested cases are governed by 7—Chapter 2506 (contested cases) and 481—Chapter 10 (rules of practice and procedure before the administrative hearings division). Any order or civil penalty appealed pursuant to this rule will be stayed until the issuance of a final agency decision.

Exception: An emergency order issued pursuant to subrule 282.15(4) will not be stayed and will take effect immediately upon notification of the order to the owner of the tank.

[**ARC 9181C**, IAB 4/30/25, effective 6/4/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapter 101.

CHAPTER 286
LIQUEFIED PETROLEUM GAS

[Prior to 5/23/07, see rules 661—51.100(101) to 661—51.102(101)]
[Prior to 7/9/25, see Public Safety Department[661] Ch 226]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—286.1(101) General requirements. The provisions of the National Fire Protection Association, NFPA 54, ANSI Z223.1-2024 National Fuel Gas Code, 2024 edition, and NFPA 58, Liquefied Petroleum Gas Code, 2024 edition, published by the National Fire Protection Association and available at www.nfpa.org, and all references contained therein, are hereby adopted by reference as the general requirements for transportation, storage, handling, and use of liquefied petroleum gas, with the following amendments and interpretive guidelines:

1. Where a stationary installation utilizes a storage container of more than 2,000 gallons (7,750 L) of individual water capacity, or the aggregate water capacity of storage containers in a grouping is more than 4,000 gallons (15,140 L) in water capacity, the installer shall submit plans for such installation to the department for review and approval. Installation shall not commence until written approval from the department has been received. Any reporting fire department where the tank(s) is located will be advised of each installation.

2. Underground gas piping that is outside a building shall not be in physical contact with any concrete.

3. Cylinders installed permanently on roofs of buildings are prohibited.

4. All training programs shall be instructor-led by a competent trainer and include a closed book test and a skills assessment.

5. Prior to acceptance and initial operation, all piping systems (including hose) shall be visually inspected and pressure-tested by the installer to determine that the materials, design, fabrication, and installation practices comply with the requirements of this chapter.

a. Pressure testing of piping systems is required as follows:

i. Piping systems with operating pressures greater than 20 psi shall have a test pressure no less than 50 psi and shall not exceed 75 psi.

(1) The test medium used for pressure testing shall be air, nitrogen, carbon dioxide, or an inert gas.

(2) Propane vapor may be used; propane liquid shall not be used.

ii. Piping systems having operating pressures of 20 psi or less, and piping to which NFPA 54, National Fuel Gas Code, is applicable shall be pressure tested in accordance with that code.

(1) The test medium used for pressure testing shall be air, nitrogen, carbon dioxide, or an inert gas.

6. On or after January 1, 2012, the use of railroad tank cars in stationary service will be prohibited.

a. Existing installations with prior approval of the department (documented in writing) will be permitted to remain in service.

7. To the extent that NFPA standards are inconsistent with International Fire Code standards, the NFPA standards shall rule.

This rule is intended to implement Iowa Code chapter 101.

BUILDING AND CONSTRUCTION DIVISION: BUILDING CODE BUREAU

CHAPTER 300
STATE BUILDING CODE—ADMINISTRATION

[Prior to 12/21/05, see rules 661—16.1(103A) to 661—16.500(103A)]
[Prior to 11/26/25, see Public Safety Department[661] Ch 300]

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/10/30

481—300.1(103A) State building code promulgated; definitions. The definitions set forth in Iowa Code section 103A.3 are incorporated herein by reference. Iowa Code section 103A.7 empowers and directs the commissioner to adopt and promulgate the state building code, with the approval of the council, except that adoption of the state historic building code requires the approval of the state historical society board, rather than the council, pursuant to Iowa Code section 103A.41. The state building code includes 481—Chapters 300, 301, 321, 322, and 323.
[**ARC 9473C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—300.2(103A) Building code commissioner. The commissioner appointed pursuant to Iowa Code section 103A.4 will adopt, and amend as needed, the state building code with the approval of the council and the state historic building code with the approval of the state historical society board; appoint the board of review from among the council membership; consider any request for the use of alternate materials or methods of construction submitted to the building code bureau pursuant to Iowa Code section 103A.13; and either disapprove each such request or recommend approval of the request to the council.
[**ARC 9473C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—300.3(103A) Building code advisory council. The council appointed pursuant to Iowa Code section 103A.14 will consider amendments to the state building code proposed by the commissioner, other than amendments to the state historic building code; approve or disapprove any changes to the state building code proposed by the commissioner; and consider and approve or disapprove any requests for use of alternate materials or methods of construction, the approval of which has been recommended to the council by the commissioner.
[**ARC 9473C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—300.4(103A) Plan reviews.

300.4(1) *Plans and specifications review—approvals.*

a. Submissions to the commissioner of architectural technical documents, engineering documents, and plans and specifications are the responsibility of the owner of a building or facility. The submission may be completed by an authorized agent of the owner or the responsible design professional.

b. "Responsible design professional" means a registered architect or licensed professional engineer who signs the documents submitted.

c. Plans, specifications, and other supporting information have to be sufficiently clear and complete to show in detail that the proposed work will comply with the requirements of the applicable provisions of the state building code.

d. In Sections 107.1 and 107.2.6 of the International Building Code, 2024 edition, the word "permit" is replaced by the words "plan review."

e. Submittals to the commissioner have to be certified or stamped and signed according to Iowa Code chapters 542B and 544A unless the applicant has certified on the submittal a specific exception under Iowa Code section 544A.18 and the submittal does not constitute the practice of professional engineering as defined by Iowa Code section 542B.2.

f. Plans and specifications for projects subject to plan review by the commissioner have to be submitted in a format specified on the plan review submittal form.

g. Architectural technical submissions; engineering documents; and plans and specifications for construction, renovation, or remodeling of all state-owned buildings or facilities, including additions to existing buildings, have to be submitted to the commissioner for review and comment. A written response

by the design professional indicating corrective measures taken to address the commissioner's plan review comments has to be submitted to and approved by the commissioner prior to the issuance of construction documents for bidding. Bidding may commence on a project after the preliminary meeting provided for in subrule 300.4(3) if all items on the preliminary meeting checklist have been resolved to the satisfaction of the commissioner.

h. Architectural technical submissions; engineering documents; and plans and specifications for the initial construction of any building or facility that will not be wholly owned by the state or an agency of the state have to be submitted to the commissioner for review and comment, if the construction is financed in whole or in part with funds appropriated by the state and there is no local building code in effect in the local jurisdiction in which the construction is planned or, if there is such a local building code in effect, it is not enforced through a system that includes both plan reviews and inspections. A written response by the design professional indicating corrective measures taken to address the commissioner's plan review comments has to be submitted to and approved by the commissioner prior to the issuance of construction documents for bidding. Bidding may commence on a project after the preliminary meeting provided for in subrule 300.4(3) if all items on the preliminary meeting checklist have been resolved to the satisfaction of the commissioner.

i. Architectural technical submissions; engineering documents; and plans and specifications for construction, renovation, or remodeling of all buildings or facilities, including additions to existing buildings, to which the state building code applies, other than those subject to paragraph 300.4(1)*"g"* or *"h,"* have to be submitted to the commissioner for review and comment unless applicability of the state building code is based upon a local ordinance enacted pursuant to Iowa Code section 103A.12. A written response by the design professional indicating corrective measures taken to address the commissioner's plan review comments has to be submitted to and approved by the commissioner prior to the issuance of construction documents for bidding. Bidding may commence on a project after the preliminary meeting provided for in subrule 300.4(3) if all items on the preliminary meeting checklist have been resolved to the satisfaction of the commissioner.

j. If the state building code applies to a construction project based upon a local ordinance adopting the state building code, the submission has to be made to the local jurisdiction, provided that the local jurisdiction has established a building department, unless the local jurisdiction requires submission to the commissioner. Review and approval of such documents by the commissioner are at the discretion of the commissioner based upon available resources.

k. A life cycle cost analysis will be needed for new public projects and additions over 20,000 square feet or a renovation that exceeds 50 percent of the value of the building pursuant to Iowa Code chapter 470 and will be submitted to the commissioner before construction commences. The department has developed life cycle cost analysis guidelines to assist architects and engineers in completing this analysis, and these guidelines are available on the department's website or upon request.

l. Any necessary energy code review pursuant to 481—Chapter 301, Part 3, will be completed prior to approval.

300.4(2) *Copies and fees.* 481—Chapters 321 and 322 describe fees pertaining to factory-built structures.

a. Codes and standards adopted by reference in the state building code that are published by other organizations, including but not limited to the American National Standards Institute, the International Code Council, the International Association of Plumbing and Mechanical Officials, and the National Fire Protection Association, may be purchased from the publishing organization. A copy of each code or standard adopted by reference in the state building code has been deposited in the Iowa state law library.

b. The fees for plan reviews completed by the building code bureau are calculated as follows:

Estimated Construction Costs	**Calculation of Plan Review Fee**
Up to and including $1 million	$.58 per thousand dollars or fraction thereof (minimum fee $200)
More than $1 million	$580 for the first $1 million plus $.32 for each additional thousand dollars or fraction thereof

The plan review fees for fire suppression systems and fire alarm systems are separate fees and are calculated as follows:	
Fire Protection System Costs	**Plan Review Fee**
Fire suppression systems whose construction cost for materials and installation is calculated to be up to and including $5,000	$100
Fire suppression systems whose construction cost for materials and installation is calculated to be more than $5,000 and up to and including $20,000	$200
Fire suppression systems whose construction cost for materials and installation is estimated to be more than $20,000	$400
Fire alarm systems whose construction cost for materials and installation is calculated to be up to and including $5,000	$100
Fire alarm systems whose construction cost for materials and installation is calculated to be more than $5,000 and up to and including $20,000	$200
Fire alarm systems whose construction cost for materials and installation is estimated to be more than $20,000	$400

Payment of the assigned fee has to accompany each plan when submitted for review. Payment may be made by money order, check, or draft made payable to the Treasurer, State of Iowa.

NOTE: Plan review fees for assisted living projects are contained in Iowa Code section 231C.18(2)*"c."* Elder group home plan review fees are contained in Iowa Code section 231B.17. Adult day services plan review fees are contained in Iowa Code section 231D.4.

c. A person who has submitted a plan for review for which a fee has been assessed pursuant to paragraph 300.4(2)*"b"* is eligible to receive a refund of the fee if the plan has not been approved or rejected within 60 calendar days of its receipt by the building code bureau. A person who believes that a refund is due may notify the commissioner, who will provide a form to request a refund. If the request for refund is approved, the commissioner will cause a check for the amount of the refund to be issued to the individual or organization that originally paid the fee. If the original submission of the plan is incomplete, the fee will be refunded only if the plan has not been approved or rejected within 60 days of a full and complete submission of the plan. "Approved or rejected within 60 days" means that a letter approving or rejecting the plan has been presented or mailed to the submitter within 60 days of the date of receipt by the building code bureau, within the meaning of "time" as defined in Iowa Code section 4.1.

300.4(3) *Preliminary meeting.* The responsible design professional for a project shall contact the building code bureau to schedule a preliminary meeting to discuss code compliance issues early in the design development phase. There is no separate fee for a preliminary meeting. If the responsible design professional plans to request approval to bid the project as part of the preliminary meeting, that person has to request a copy of the document "Preliminary Meeting Checklist" at the time the meeting is scheduled and be prepared to address all applicable issues identified on the checklist at the preliminary meeting. Approval to bid the project will not be given unless all applicable issues identified on the checklist have been addressed to the satisfaction of the commissioner.

300.4(4) *Requests for staged approvals.*

a. Requests for approval to begin foundation work shall be submitted to the building code bureau in writing and may be transmitted by mail, email, or fax or in person. Foundation approval may be granted by the bureau in writing, following a preliminary meeting, if the construction plans and specifications are in compliance with the requisite code provisions.

b. Requests for approval to continue construction beyond the foundation, up to and including the shell of the building, shall be submitted to the bureau in writing and may be transmitted by mail, email, or fax or in person. These requests will be evaluated on a case-by-case basis, and approval or denial of the requests will be transmitted to the submitter in a written form.

300.4(5) *Fast-track projects.* While fast-track projects are not encouraged and will only be approved on the basis of good cause shown, fast-track projects may be considered by the commissioner on a

case-by-case basis. If a fast-track project is initially approved, a written plan of submittal, review and approval will be developed for each project. A full set of construction documents are needed for a full review and approval in a timely manner.

[**ARC 9473C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—300.5(103A) Inspections.

300.5(1) Any building or facility for which construction is subject to a plan review by the commissioner, except construction involving any building or facility owned by the board of regents or by any institution subject to the authority of the board of regents, is subject to inspection by the commissioner or staff of the bureau or division at the direction of the commissioner or by a third party with whom the commissioner contracts to conduct inspections of buildings and facilities subject to the state building code.

EXCEPTION: Construction that is limited to building renovations or repairs is not subject to inspection by the commissioner.

300.5(2) Any construction involving any building or facility owned by the board of regents or by an institution subject to the authority of the board of regents is subject to inspection by the commissioner or staff of the bureau or division at the direction of the commissioner.

EXCEPTION: Construction that is limited to building renovations or repairs is not subject to inspection by the commissioner.

300.5(3) Buildings subject to inspection by the commissioner, except construction involving any building or facility owned by the board of regents or by any institution subject to the authority of the board of regents, shall pay an inspection fee based upon the construction cost of the project. The inspection fee is calculated as follows:

Construction Cost	Base Inspection Fee
Up to $100,000	$598
$100,001 to $1,000,000	$645
$1,000,001 to $10,000,000	$722
$10,000,001 and above	$783
Follow-up inspection	$214

The base inspection fee covers three inspections—a foundation, rough-in, and final. The base inspection fee is due and payable at the time completed construction documents are submitted for review. The plan review will not be conducted until the proper base inspection fee is paid. Checks should be made payable to the Treasurer, State of Iowa, and delivered to the bureau office. This fee is separate and distinct from the plan review fee established in subrule 300.4(2).

Additional inspections may occur for any of the following reasons:

a. During one of the three base inspections, code violations are identified that require that a follow-up inspection be conducted to verify that the violations have been corrected.

b. The inspector finds that the project is not ready for the type of inspection requested.

c. By special request of the project designer, contractor, or owner.

d. Upon order of the building code commissioner (no additional charge).

The fee for each additional inspection is calculated as follows:

One hour on site = $206

One to two hours on site = $240

Two to three hours on site = $273

Three to four hours on site = $307

Four to five hours on site = $341

Five to six hours on site = $374

Additional inspection fees will be billed to the responsible architect or building contractor on a monthly basis. The building may receive only temporary approval for occupancy if unpaid inspection fees remain at the time of final inspection.

Inspection fees and standard operating procedures for construction involving any building or facility owned by the board of regents or by any institution subject to the authority of the board of regents will be established through a written agreement between the commissioner and the board of regents.

300.5(4) Any person who performs a building code inspection on behalf of the building code commissioner will have and maintain one of the following: (1) current certification as a commercial building inspector by the International Code Council, or (2) other equivalent certification approved by the building code commissioner. An employee of the department who performs an inspection on behalf of the building code commissioner will, in addition, meet any requirements for the job class in which the employee is classified as established by the department of administrative services, pursuant to Iowa Code chapter 8A, subchapter IV, part 2.

EXCEPTION: An employee of the department who performs inspections on behalf of the building code commissioner may perform such inspections for no more than six months prior to obtaining certification.

[**ARC 9473C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—300.6(103A) Local code enforcement. Provisions of the state building code applicable statewide or applicable in a local jurisdiction that has adopted the state building code by local ordinance may be enforced by the local jurisdiction.

Any local jurisdiction that adopts the state building code by local ordinance may further adopt provisions for the administration and enforcement of the building code by the local jurisdiction. These provisions may include administrative provisions contained in the codes adopted by reference as part of the state building code and may include other provisions at the discretion of the local jurisdiction.

300.6(1) *Creation of department.* There may be established within the governmental subdivision a "building department" that is under the jurisdiction of the building official designated by the appointing authority. Within the state building code, including publications adopted by reference within the state building code, the terms "administrative authority," "authority having jurisdiction," and "authorized representative" mean the building official. The local governmental subdivision must inform the state building code bureau, in writing transmitted by mail, email, or fax, when it establishes or dissolves a building department.

300.6(2) *Powers and duties of building official.* The building official in those governmental subdivisions establishing a building department will enforce all the provisions of any applicable building code as prescribed by local law or ordinance and as outlined by Iowa Code section 103A.19.

300.6(3) *Permits only.* Any governmental subdivision that has not established a building department but requires a permit to construct or an occupancy permit or both is known as the "issuing authority."

300.6(4) *Statement of compliance with energy conservation requirements.* Any application for a building permit, except for applications to renovate or remodel residential buildings of one or two units, shall include a statement that the construction will comply with all applicable energy conservation requirements.

CHAPTER 301
STATE BUILDING CODE

[Prior to 12/21/05, see rules 661—16.1(103A) to 661—16.500(103A)]
[Prior to 11/26/25, see Public Safety Department[661] Ch 301]

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/10/30

PART 1
GENERAL PROVISIONS

481—301.1(103A) Scope and applicability. The provisions of this chapter apply to buildings and facilities subject to the state building code pursuant to Iowa Code chapter 103A, including sections 103A.10 and 103A.12, and provisions of state or federal law other than Iowa Code chapter 103A.
[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.2(103A) Definitions. The definitions set forth in Iowa Code section 103A.3 are incorporated herein by reference. Additionally:

"Appropriated by the state of Iowa" means funds that are included in a bill enacted by the Iowa general assembly and signed by the governor or that are appropriated in a provision of the Iowa Code.

"Board of appeals" means the local board of appeals as created by local ordinance.

"Building component" means any part, subsystem, subassembly, or other system designed for use in, or as a part of, a structure, including but not limited to the following: structural, electrical, mechanical, fire protection, or plumbing systems, and including such variations thereof as are specifically permitted by regulation, and which variations are submitted as part of the building system or amendment thereof.

"Building department" means an agency of any governmental subdivision charged with the administration, supervision, or enforcement of building regulations, prescribed or required by state or local building regulations.

"Building system" means plans, specifications and documentation for a system of manufactured factory-built structures or buildings or for a type or a system of building components, including but not limited to the following: structural, electrical, mechanical, fire protection, or plumbing systems, and including such variations thereof as are specifically permitted by regulation, and which variations are submitted as part of the building system or amendment thereof.

"Bureau" means the building code bureau of the department of inspections, appeals, and licensing.

"Construction cost" means the total cost of the work to the owner of all elements of the project designed or specified by the design professional including the cost at current market rates of labor and materials furnished by the owner and equipment designed, specified or specifically provided by the design professional. Construction costs include the costs of management or supervision of construction or installation provided by a separate construction manager or contractor, plus a reasonable allowance for each construction manager's or contractor's overhead and profit.

"Enforcement authority" means any state agency or political subdivision of the state that has the authority to enforce the state building code.

"Label" means an approved device affixed to a factory-built structure or building, or building component, by an approved agency, evidencing code compliance.

"Listing agency" means an agency approved by the commissioner that is in the business of listing or labeling, that maintains a periodic inspection program on current production of listed models, and that makes available timely reports of such listing including specific information verifying that the product has been tested to approved standards and found acceptable for use in a specified manner.

"Responsible design professional" means a registered architect or licensed professional engineer who stamps and signs the documents submitted, pursuant to Iowa Code chapters 542B and 544A.

"State fire code" means administrative rules adopted by the director of the department of inspections, appeals, and licensing in consultation with the state fire marshal, pursuant to Iowa Code section 10A.511.

"State mechanical code" means the state mechanical code adopted by the state plumbing and mechanical systems board, pursuant to Iowa Code chapter 105.

"State plumbing code" means the state plumbing code adopted by the state plumbing and mechanical systems board, pursuant to Iowa Code chapter 105.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.3(103A) General provisions. The provisions of the International Building Code, 2024 edition, published by the International Code Council, www.iccsafe.org, are hereby adopted by reference as the general requirements for building construction, with the following amendments:

301.3(1) Delete section 101.1.

301.3(2) Delete section 101.2 and insert in lieu thereof the following new section:

101.2 Scope. The provisions of this code apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.

Exception: Detached one- and two-family dwellings and multiple single-family dwellings (townhouses) not more than three stories above grade plane in height with a separate means of egress and their accessory structures shall comply with the International Residential Code, as amended by rule 481—301.8(103A).

301.3(3) Delete sections 101.4.1 through 101.4.6.

301.3(4) Delete section 102.6 and insert in lieu thereof the following new section:

102.6 Existing Structures. The legal occupancy of any structure existing on the date of adoption of this code is permitted to continue without change, except as specifically covered in this code or the state fire code, or as deemed necessary by the building code commissioner for the general safety and welfare of the occupants and the public.

301.3(5) Delete sections 103, 104, 105 and sections therein.

301.3(6) Delete section 106.2.

301.3(7) Delete section 107.1 and insert in lieu thereof the following new section:

107.1 General. Submittal documents consisting of construction documents, statement of special inspections, a geotechnical report and other data shall be submitted in one or more sets with each plan review application. The construction documents shall be prepared by a responsible design professional where required by the statutes of the jurisdiction in which the project is to be constructed. Where special conditions exist, the commissioner is authorized to require additional construction documents to be prepared by a responsible design professional.

Exception: The commissioner may waive the submission of construction documents and other data if it is found that the nature of the work applied for is such that review of construction documents is not necessary to obtain compliance with this code.

301.3(8) Delete sections 107.3, 107.4, and 107.5 and sections therein.

301.3(9) Delete sections 109, 110, 111, 112, 113, 114, 115, and 116 and sections therein.

301.3(10) Add the following to section 202, Definitions:

"Cabin Building." A residential building or structure the use of which is transient in nature and which is used for sleeping purposes when not classified as an Institutional Group I or when not regulated by the International Residential Code.

301.3(11) Add the following to section 310.2:

Cabin buildings.

301.3(12) Add the following new section 408.9.1:

408.9.1 Windowed Buildings. Plans and specifications for windowed buildings or portions of windowed buildings shall include a rational analysis demonstrating a tenable environment for exiting from the smoke compartment in the area of fire origin.

301.3(13) Delete section 423 in its entirety and insert in lieu thereof the following new section:

423 Storm Shelters.

423.1 General. Any storm shelter or weather safe room as defined by rule 481—301.38(103A) shall comply with ICC 500-2014.

423.1.1 Scope. In accordance with 481—Chapter 301, Part 6, this section applies to storm shelters and weather safe rooms constructed on or after January 1, 2011. This section does not require the construction

of a weather safe room or rooms for any construction project but does establish standards for design and construction of storm shelters and weather safe rooms when their construction is required by another statute, federal statute or regulation, or is incorporated voluntarily in a construction project.

301.3(14) Delete section 903.2.8, except for subsections 903.2.8.1 through 903.2.8.3, and insert in lieu thereof the following new section:

903.2.8 Group R. An automatic sprinkler system installed in accordance with section 903.3 shall be provided throughout all buildings with a Group R fire area.

Exception: Cabin buildings that are located in remote areas without a sufficient municipal water supply for design of a fire sprinkler system and that meet all of the following:

1. Not more than one story.
2. Not more than 750 square feet in floor area.
3. Fuel-fired heating equipment and other fuel-fired appliances are separated from sleeping areas by a one-hour fire-rated assembly.
4. Provided with fire alarm and smoke alarm systems in accord with 907 for R-1 occupancies.
5. No basements.
6. Maintain a fire separation of 20 feet from any other building or structure.
7. Comply with all applicable requirements of the state building code.

301.3(15) Delete section 907.2.3 and insert in lieu thereof the following new section:

907.2.3 Group E. In the absence of a complete automatic sprinkler system, a complete automatic detection system utilizing an emergency voice/alarm communication system shall be installed throughout the entire Group E occupancy. A Group E occupancy with a complete automatic sprinkler system shall be provided with a fire alarm system utilizing an emergency voice/alarm communication system in compliance with section 907.5.2.2 and installed in accordance with section 907.6. Smoke detection shall be provided in corridors at a maximum spacing of 30 feet on center, and heat or smoke detection provided in any hazardous or nonoccupied areas.

Exceptions:

1. Group E occupancies with an occupant load of less than 50.
2. Manual fire alarm boxes are not necessary in Group E occupancies where all of the following apply:

2.1. Interior corridors are protected by smoke detectors with alarm verification.

2.2. Auditoriums, cafeterias, gymnasiums and the like are protected by heat detectors or other approved detection devices.

2.3. Shops and laboratories involving dusts or vapors are protected by heat detectors or other approved detection devices.

2.4. Off-premises monitoring is provided.

2.5. The capability to activate the evacuation signal from a central point is provided.

2.6. In buildings where normally occupied spaces are provided with a two-way communication system between such spaces and a constantly attended receiving station from which a general evacuation alarm can be sounded, except in locations specifically designated by the fire code official.

3. Manual fire alarm boxes are not necessary in Group E occupancies where the building is equipped throughout with an approved automatic sprinkler system, the notification appliances will activate on sprinkler water flow, and manual activation is provided from a normally occupied location.

4. Emergency voice/alarm communication systems meeting the requirements of section 907.5.2.2 and installed in accordance with section 907.6 are not necessary in Group E occupancies with occupant loads of 100 or less, provided that activation of the fire alarm system initiates an approved occupant notification signal in accordance with section 907.5.

301.3(16) Add the following new section 1003.8:

1003.8 Frost Protection. Exterior landings at doors shall be provided with frost protection.

301.3(17) Add the following new section 1027.5.1:

1027.5.1 Exit Discharge Pathways. Exit discharge pathways shall be paved from all exits of the building to the public way.

301.3(18) Delete section 1030.1.1 and insert in lieu thereof the following new section:

1030.1.1 Bleachers, grandstands, and folding and telescopic seating that are not building elements shall comply with ICC-300, Standard for Bleachers, Folding and Telescopic Seating, and Grandstands, 2012 edition, with the following amendments to ICC-300:

a. Delete section 105.2 and insert in lieu thereof the following new section:

105.2 Yearly inspection. All bleachers and folding and telescopic seating installed on or after December 1, 2011, shall be inspected at least once a year in order to verify that the structure is maintained in compliance with the provisions of this standard. All folding and telescopic seating shall also be inspected to evaluate compliance with the manufacturer's installation and operational instructions during the opening and closing of such seating. Any inspection conducted in compliance with this section may be conducted by any knowledgeable person including, but not limited to, a person who has been instructed by the manufacturer or installer as to procedures and standards for inspections of the structure being inspected and including, but not limited to, the owner of the structure or an employee of the owner of the structure. There are no further restrictions on the identity or employment of the person conducting the inspection unless otherwise provided by law. The owner shall maintain documentation of the required annual inspections, showing the date and name of the person conducting the inspection and initialed by the person conducting the inspection.

b. Delete section 501.2 and insert in lieu thereof the following new section:

501.2 Inspections. All tiered seating that was installed prior to December 1, 2011, shall be inspected at least once a year. The inspection may be conducted by any knowledgeable person including, but not limited to, a person who has been instructed by the manufacturer or installer as to procedures and standards for inspections of the structure being inspected and including, but not limited to, the owner of the structure or an employee of the owner of the structure. There are no further restrictions on the person conducting the inspection unless otherwise provided by law. All folding and telescopic seating shall be inspected to evaluate compliance with the manufacturer's installation and operational instructions and be inspected during the opening and closing of such seating. The owner shall maintain documentation of the inspections, which show the date and name of the person conducting the inspection and are initialed by the person conducting the inspection.

301.3(19) Add the following new section 1100:

1100. Any building or facility in compliance with the applicable requirements of 481—Chapter 301, Part 2, is in compliance with any applicable requirements contained in the International Building Code concerning accessibility for persons with disabilities.

301.3(20) Delete chapter 29.

301.3(21) Amend section 3001.3 by adding the following new unnumbered paragraph after the introductory paragraph:

Notwithstanding the references in Chapter 35 to editions of national standards adopted in this section, any editions of these standards adopted by the elevator safety board in 481—Chapter 372 are hereby adopted by reference. If a standard is adopted by reference in this section and there is no adoption by reference of the same standard in 481—Chapter 372, the adoption by reference in this section is of the edition identified in Chapter 35.

301.3(22) Delete appendices A, B, D, E, F, G, H, I, J, K, L, M, N, O, and P.

301.3(23) Retain Appendix C, Group U Agricultural Buildings.

301.3(24) Delete all references to the "International Plumbing Code" and insert in lieu thereof "state plumbing code".

301.3(25) Delete all references to the "International Fuel Gas Code" and insert in lieu thereof "rule 481—301.9(103A)".

301.3(26) Delete all references to the "International Mechanical Code" and insert in lieu thereof "state mechanical code".

301.3(27) Delete all references to the "International Residential Code" and insert in lieu thereof "rule 481—301.8(103A)".

301.3(28) Delete all references to the "International Energy Conservation Code" and insert in lieu thereof "481—Chapter 301, Part 3".

301.3(29) *Hospitals and health care facilities.*

a. A hospital, as defined in rule 481—280.2(10A), that is required to meet the provisions of the state building code is in compliance with the fire safety requirements of the state building code if the hospital is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code, adopted in 481—subrule 280.14(2), is inconsistent with an applicable requirement of the state building code, the hospital is in compliance with the state building code requirement if the Life Safety Code requirement is met.

b. A nursing facility or hospice, as defined in rule 481—280.2(10A), that is required to meet the provisions of the state building code is in compliance with the fire safety requirements of the state building code if the nursing facility or hospice is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code, adopted in 481—subrule 280.14(2), is inconsistent with an applicable requirement of the state building code, the nursing facility or hospice is in compliance with the state building code requirement if the Life Safety Code requirement is met.

c. An intermediate care facility, as defined in rule 481—280.2(10A), that is required to meet the provisions of the state building code is in compliance with the fire safety requirements of the state building code if the intermediate care facility is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code, as adopted in 481—subrule 280.14(2), is inconsistent with an applicable requirement of the state building code, the intermediate care facility is in compliance with the state building code requirement if the Life Safety Code requirement is met.

d. An ambulatory surgical center, as defined in rule 481—280.2(10A), that is required to meet the provisions of the state building code is in compliance with the fire safety requirements of the state building code if the ambulatory surgical center is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code, as adopted in 481—subrule 280.14(2), is inconsistent with an applicable requirement of the state building code, the ambulatory surgical center is in compliance with the state building code requirement if the Life Safety Code requirement is met.

e. A religious nonmedical health care institution that is required to meet the provisions of the state building code is in compliance with the provisions of the state building code if the institution is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code, as adopted in 481—subrule 280.14(2), is inconsistent with an applicable requirement of the state building code, the religious nonmedical health care institution is in compliance with the state building code requirement if the Life Safety Code requirement is met.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.4(103A) Mechanical requirements. The provisions of the state mechanical code, 481—Chapter 426, as adopted and amended by the state plumbing and mechanical systems board pursuant to Iowa Code chapter 105 are hereby adopted by reference as the requirements for mechanical installations.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.5(103A) Electrical requirements. The provisions of the state electrical code, as adopted and amended in 481—Chapter 404, are hereby adopted by reference as the requirements for electrical installations.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.6(103A) Plumbing requirements.

301.6(1) Provisions of the state plumbing code, 481—Chapter 425, adopted by the state plumbing and mechanical systems board pursuant to Iowa Code chapter 105, apply to plumbing installations in this state.

301.6(2) Factory-built structures, as referenced by Iowa Code section 103A.10(3), that contain plumbing installations are allowed to comply with either the state plumbing code or with the International Plumbing Code, 2024 edition, published by the International Code Council, located at www.iccsafe.org. The manufacturer's data plate must indicate which plumbing code was utilized for compliance with this rule, as set forth in 481—paragraph 321.610(15)*"e."*

301.6(3) Private sewage disposal systems shall comply with 567—Chapter 69.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.7(103A) Existing buildings. The provisions of the International Existing Building Code, 2024 edition, published by the International Code Council, located at www.iccsafe.org, are hereby adopted by reference as the requirements for repair, alteration, change of occupancy, addition, and relocation of existing buildings, with the following amendments:

301.7(1) Delete section 101.1.

301.7(2) Delete section 101.4.2 and insert in lieu thereof the following new section:

101.4.2 Buildings Previously Occupied. The legal occupancy of any structure existing on the date of adoption of this code shall be permitted to continue without change, except as specifically covered in this code or the state fire code, or as deemed necessary by the commissioner for the general safety and welfare of the occupants and the public.

301.7(3) Delete sections 101.5 and 101.6.

301.7(4) Delete sections 103, 104, and 105.

301.7(5) Delete sections 106.1, 106.3, 106.4, 106.5, and 106.6.

301.7(6) Delete sections 108, 109, 110, 112, 113, 114, 115, 116 and 117.

301.7(7) Delete section 306.

301.7(8) Delete all references to the "International Plumbing Code" and insert in lieu thereof "state plumbing code".

301.7(9) Delete all references to the "International Fuel Gas Code" and insert in lieu thereof "rule 481—301.9(103A)".

301.7(10) Delete all references to the "International Mechanical Code" and insert in lieu thereof "state mechanical code".

301.7(11) Delete all references to the "International Building Code" and insert in lieu thereof "rule 481—301.3(103A)".

301.7(12) Delete all references to the "International Residential Code" and insert in lieu thereof "rule 481—301.8(103A)".

301.7(13) Delete all references to the "International Fire Code" and insert in lieu thereof "state fire code".

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.8(103A) Residential construction requirements. The provisions of the International Residential Code, 2024 edition, published by the International Code Council, located at www.iccsafe.org, are hereby adopted by reference as the requirements for construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, removal, and demolition of detached one- and two-family dwellings and multiple single-family dwellings (townhouses) not more than three stories in height with a separate means of egress and their accessory structures, with the following amendments:

301.8(1) Delete section R101.1.

301.8(2) Delete sections R103 through R114 and sections therein.

301.8(3) NOTE: The values for Table R301.2 are determined by the location of the project and referenced footnotes from Table R301.2.

301.8(4) Amend section R306.1.7 by striking the words "Chapter 3 of the International Private Sewage Disposal Code" and inserting in lieu thereof "567—Chapter 69".

301.8(5) Delete section R309.1.

NOTE: Deletion of section R309.1, which would have required the installation of sprinklers in newly constructed townhouses, is consistent with 2010 Iowa Acts, Senate Joint Resolution 2009.

301.8(6) Delete section R309.2.

NOTE: Deletion of section R309.2, which would have required the installation of sprinklers in newly constructed one- and two-family residences, is consistent with 2010 Iowa Acts, Senate Joint Resolution 2009.

301.8(7) Delete section R319.1 and insert in lieu thereof the following new section:

R319.1 Emergency escape and rescue required as follows: Basements, habitable attics and every sleeping room have at least one operable emergency and rescue opening that opens directly into a public street, public alley, yard or court. Where basements contain one or more sleeping rooms, emergency egress and rescue openings are in each sleeping room, but are not necessary in adjoining areas of the basement. Where emergency escape and rescue openings are provided, they have a sill height of not more than 44 inches (1118 mm) above an adjacent permanent interior standing surface that is no less than 36 inches wide and 18 inches deep and no more than 24 inches high. Where a door opening having a threshold below the adjacent ground elevation serves as an emergency escape and rescue opening and is provided with a bulkhead enclosure, the bulkhead enclosure complies with section R319.3. The net clear opening dimensions are obtained by the normal operation of the emergency escape and rescue opening from the inside. Emergency escape and rescue openings with a finished sill height below the adjacent ground elevation are provided with a window well in accordance with section R319.2. Emergency escape and rescue openings open directly into a public way, or to a yard or court that opens to a public way.

Exceptions:

- Basements used only to house mechanical equipment and not exceeding total floor area of 200 square feet (18.58 m^2).
- Storm shelters constructed in accordance with 481—Chapter 301, Part 2.
- Where the dwelling unit or townhouse unit is equipped with an automatic sprinkler system installed in accordance with section P2904, sleeping rooms in basements are not required to have emergency escape and rescue openings provided that the basement has either (1) one means of egress complying with section R318 and one emergency escape and rescue opening or (2) two means of egress complying with section R318.
- A yard is not required to open directly into a public way where the yard opens to an unobstructed path from the yard to the public way if the path has a width of not less than 36 inches (914 mm).

301.8(8) Delete chapter 11 and insert in lieu thereof rule 481—301.24(103A).

301.8(9) Delete chapter 24 and sections therein and insert in lieu thereof the following new section:

All fuel gas piping installations shall comply with rule 481—301.9(103A).

301.8(10) Delete chapters 25 through 33 and sections therein, except for section P2904, and insert in lieu thereof the following new section:

All plumbing installations shall comply with the state plumbing code as adopted by the state plumbing and mechanical systems board pursuant to Iowa Code chapter 105.

Exception: Factory-built structures, as referenced by Iowa Code section 103A.10(3), that contain plumbing installations are allowed to comply with either the state plumbing code or with the International Plumbing Code, 2024 edition, published by the International Code Council, located at www.iccsafe.org. The manufacturer's data plate must indicate which plumbing code was utilized for compliance with this rule, as set forth in 481—paragraph 321.610(15)*"e."*

301.8(11) Delete chapters 34 to 43 and sections therein and insert in lieu thereof the following new section:

The provisions of the state electrical code, as adopted and amended in 481—Chapter 404, are hereby adopted by reference as the requirements for electrical installations.

301.8(12) Delete appendices AA through CH.

301.8(13) Delete all references to the "International Plumbing Code" and insert in lieu thereof "state plumbing code".

301.8(14) Delete all references to the "International Mechanical Code" and insert in lieu thereof "state mechanical code".

301.8(15) Delete all references to the "International Fuel Gas Code" and insert in lieu thereof "rule 481—301.9(103A)".

301.8(16) Delete all references to the "International Building Code" and insert in lieu thereof "rule 481—301.3(103A)".

301.8(17) Delete all references to the "International Fire Code" and insert in lieu thereof "state fire code".

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.9(103A) Fuel gas piping requirements. Fuel gas piping shall comply with the requirements of rule 481—425.3(105). Liquefied petroleum gas facilities and appliances shall comply with rule 481—286.1(101).

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.10(103A) Transition period. A construction project subject to the provisions of any rule in Part 1 or Part 3 and commenced within 12 months after the effective date of revised standards may comply with either the newly adopted standards or the previous standards. "Commenced" means that the submitter has obtained preliminary approval from the commissioner or a local building department pursuant to rule 481—300.6(103A).

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.11 to **301.15** Reserved.

PART 2
ACCESSIBILITY OF BUILDINGS AND FACILITIES AVAILABLE TO THE PUBLIC

481—301.16(103A,104A) Purpose and scope. Part 2 is intended to ensure that buildings and facilities used by the public, other than places of worship, are accessible to, and functional for, persons with disabilities. Rule 481—301.18(103A,104A) applies statewide to new construction of buildings and facilities available to the public and to renovation and rehabilitation projects on existing buildings and facilities when local or state building codes require compliance with standards for new construction. Rule 481—301.19(103A,104A) applies statewide to construction of multiunit residential buildings.

301.16(1) NOTE A. Although rule 481—301.18(103A,104A) is based upon the federal 2010 ADA Standards for Accessible Design and adopts the language of the 2010 ADA Standards for Accessible Design by reference, and rule 481—301.19(103A,104A) is based upon the requirements of the federal Fair Housing Act, determinations of state and local building officials charged with enforcement of these rules are not binding on other state or federal jurisdictions and do not prevent the federal government or another state from making a different determination under applicable law.

301.16(2) NOTE B. Other federal and state laws address requirements for accessibility for persons with disabilities and may be applicable to buildings and facilities subject to Part 2. Nothing in these rules should be interpreted as limiting the applicability of other provisions of state or federal law. These provisions include but are not limited to the following:

a. Iowa Code chapter 216, the Iowa civil rights Act of 1965.

b. Iowa Code chapter 216C, which enumerates the rights of persons who are blind or partially blind and persons with physical disabilities.

c. Iowa Code chapter 321L and 661—Chapter 18, which relate to requirements for parking for persons with disabilities.

d. The federal Architectural Barriers Act of 1968 (Public Law 90-480).

e. The federal Rehabilitation Act of 1973 (Public Law 93-112).

f. The federal Fair Housing Act of 1968 (Public Law 90-284); the federal Fair Housing Amendments Act of 1988 (Public Law 100-430); and related regulations, including 24 CFR 100, Subpart D.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.17(103A,104A) Definitions. The following definitions apply to Part 2:

"ADA" means the federal Americans with Disabilities Act (Public Law 101-336).

"ADAAG" means Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities, 28 CFR Part 36, Appendix A, as revised through July 1, 1994.

"ADASAD 2010" means 2010 ADA Standards for Accessible Design, published by the U.S. Department of Justice, September 15, 2010. Included in the publication are accessibility standards for state and local government facilities and accessibility standards for public accommodations and commercial facilities.

NOTE: Copies of ADASAD 2010 and additional explanatory material may be downloaded from www.ada.gov/law-and-regs.

"IBC" means the International Building Code, adopted in rule 481—301.3(103A).

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.18(103A,104A) Accessibility of buildings and facilities available to the public. Buildings and facilities that are available to the public, other than places of worship, shall comply with one of the following:

301.18(1) Applicable provisions of ADASAD 2010.

301.18(2) IBC, Chapter 11 and applicable accessibility provisions contained in IBC.

NOTE: Approval of construction plans based upon compliance with the applicable provisions of the IBC, as provided, does not relieve the designer, builder, building owner, or building operator from responsibility under federal law to comply with all applicable provisions of the 2010 ADA Standards for Accessible Design.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.19(103A,104A) Making apartments accessible and functional for persons with disabilities.

301.19(1) Multiple dwelling unit buildings. This rule applies to all multiple dwelling unit buildings that consist of four or more dwelling units if such buildings have one or more elevators. In such buildings without an elevator, all ground floor units must be accessible. The requirements of this rule apply to the individual dwelling units and the common use spaces that are accessible to persons with disabilities in multiple dwelling unit buildings.

EXCEPTION 1: A multiple dwelling unit building is deemed to be in compliance with this rule if it is located in a local jurisdiction that has enacted accessibility rules that have been recognized by the U.S. Department of Housing and Urban Development as providing a safe harbor for compliance with the accessibility requirements established in the federal Fair Housing Act and if the building has been found to be in compliance with those requirements unless the building is required to comply with the requirements of the Uniform Federal Accessibility Standards or other applicable standards that may be more restrictive than the provisions of this rule.

EXCEPTION 2: Certain multiple dwelling unit buildings are required to comply with the Uniform Federal Accessibility Standards, published by the U.S. Access Board, 1988. Compliance with the provisions of this rule does not substitute for compliance with any applicable provision of the Uniform Federal Accessibility Standards or any other applicable standards that may be more restrictive than the provisions of this rule.

NOTE: Compliance with the Uniform Federal Accessibility Standards is generally necessary for buildings and facilities constructed with federal financial assistance.

"Dwelling unit" means a single unit of residence for a household of one or more persons. Examples of a dwelling unit covered by these rules include a condominium, an apartment unit within an apartment building, and another type of dwelling in which sleeping accommodations are provided but toilet or cooking facilities are shared by occupants of more than one room or portion of the dwelling. Examples of the latter include dormitory rooms and sleeping accommodations in shelters intended for occupancy as a residence for homeless persons.

"Ground floor" means a floor of a building with a building entrance on an accessible route. A building may have one or more ground floors.

a. The individual dwelling units shall contain an accessible route into and through the unit, as well as meet the following:

(1) All doors intended for use as passage through the dwelling unit have a clear opening of at least 32″ nominal width with the door open 90 degrees, measured between the face of the door and the stop. Openings more than 24″ in depth are not considered doorways.

NOTE: A 34″ door, hung in the standard manner, provides an acceptable 32″ opening.

(2) Except at doorways, the minimum clear width of the accessible route is at least 36″ wide.

(3) In single-story units, special features such as lofts or sunken or raised areas may be on an accessible route provided the areas do not interrupt the accessible route through the remainder of the dwelling unit.

(4) In multistory dwelling units in buildings with elevators, the story of the unit that is served by the building elevator is the primary entry to the unit and such entry/accessible floor complies with the requirements of subparagraphs (1), (2) and (3) above. The entry/accessible floor contains a bathroom or powder room that complies with paragraph *"c"* below.

(5) Exterior deck, patio, or balcony surfaces are no more than ½″ below the floor level of the interior of the dwelling unit unless they are constructed of impervious material such as concrete, brick or flagstone. In such case, the surface is no more than 4″ below the floor level of the interior or lower if required by local building code.

(6) Thresholds at exterior doors, including sliding tracks, are no higher than ¾″. Thresholds and changes in elevations as in subparagraph (5) above are beveled with a slope no greater than 1:2.

b. Kitchens shall meet or be adaptable to meet the following:

(1) A clear floor space at least 30″ × 48″ that allows a parallel approach by a person in a wheelchair is provided at the range or cooktop and the sink. Either a parallel or forward approach is provided at the oven, dishwasher, refrigerator/freezer or trash compactor.

(2) Clearance between counters and all opposing base cabinets, countertops, appliances or walls are at least 40″. In U-shaped kitchens with a sink or cooktop at the base of the "U," the base cabinets are removable at that location or a 60″ turning radius is provided.

c. All bathrooms of covered multifamily dwelling units shall comply with provisions of subparagraph (1) of this paragraph or at least one bathroom in the dwelling unit shall comply with provisions of subparagraph (2) of this paragraph and all other bathrooms and powder rooms within the dwelling unit must be on an accessible route with usable entry doors in accordance with paragraph "a" above. "Powder room" means a room with a toilet and sink.

In multistory dwelling units, only those bathrooms on the accessible level are subject to these requirements. Where the powder room is the only facility provided on the accessible level of a multistory dwelling unit, the powder room must comply with the provisions of subparagraph (1) or (2) of this paragraph.

(1) Sufficient maneuvering space is provided within the bathroom for a person using a wheelchair or other mobility aid to enter and close the door, use the fixtures, reopen the door and exit. Doors may swing into the clear floor space provided at any fixture if the maneuvering space is provided. Maneuvering space may include any knee space or toe space available below the bathroom fixtures.

Clear floor space at fixtures may overlap.

If the shower stall is the only bathing facility provided in the covered dwelling unit, the shower stall measures at least 36″ × 36″.

NOTE: Cabinets under lavatories are acceptable provided the bathroom has space to allow a parallel approach by a person in a wheelchair; if parallel approach is not possible within the space, any cabinets provided would have to be removable to afford the necessary knee clearance for forward approach.

(2) Where the door swings into the bathroom, there is a clear space (2′6″ × 4′0″) within the room to position a wheelchair or other mobility aid clear of the path of the door as it is closed and to permit the use of the fixtures. This clear space can include any knee space and toe space available below the bathroom fixtures.

Where the door swings out, a clear space is provided within the bathroom for a person using a wheelchair or other mobility aid to position the wheelchair such that the person is allowed use of the fixtures. There is a clear space to allow persons using wheelchairs to reopen the door to exit.

When both tub and shower fixtures are provided in the bathroom, at least one fixture is made accessible. When two or more lavatories are provided in a bathroom, at least one is made accessible.

Toilets are located within bathrooms in a manner that permits a grab bar to be installed on one side of the fixture. In locations where toilets are adjacent to walls or bathtubs, the centerline of the fixture is a minimum of 1′6″ from the obstacle. The nongrab bar side of the toilet fixture is a minimum of 1′3″ from the finished surface of the adjoining walls, vanities, or the edge of a lavatory.

Vanities and lavatories are installed with the center line of the fixture a minimum of 1′3″ horizontally from an adjoining wall or fixture. The top of the fixture rim is a maximum height of 2′10″ above the

finished floor. If knee space is provided below the vanity, the bottom of the apron is at least 2′3″ above the floor. If provided, full knee space (for front approach) is at least 1′5″ deep.

Bathtubs and tub/showers located in the bathroom provide a clear access aisle adjacent to the lavatory that is at least 2′6″ wide and extends for a length of 4′0″ measured from the head of the bathtub.

Stall showers in the bathroom may be of any size or configuration. A minimum clear floor space 2′6″ wide × 4′0″ deep should be available outside the stall. If the shower stall is the only bathing facility provided in the covered dwelling unit, or on the accessible level of a covered multistory unit, and measures a nominal 36″ × 36″, the shower stall has reinforcing to allow for installation of an optional wall-hung bench seat.

d. Walls in bathrooms that are to be adaptable will be reinforced to allow later installation of grab bars around toilet, tub, shower stall and shower seat where provided.

Where the toilet is not placed adjacent to a side wall, provision shall be made for floor-mounted foldaway or similar alternative grab bars. Where the powder room is the only toilet facility located on an accessible level of a multistory dwelling unit, it must comply with this requirement for reinforced walls for grab bars.

NOTE: A tub may have shelves or benches at either end, or a tub may be installed without surrounding walls, if there is provision for alternative mounting of grab bars. For example, a sunken tub placed away from walls could have reinforced areas for installation of floor-mounted grab bars. The same principle applies to shower stalls, e.g., glass-walled stalls could be planned to allow floor-mounted grab bars to be installed later.

Reinforcement for grab bars may be provided in a variety of ways (for example, by plywood or wood blocking) so long as the necessary reinforcement is placed so as to permit later installation of appropriate grab bars.

e. Public and common use areas shall be readily accessible to and usable by persons with disabilities.

f. Light switches, electrical outlets, thermostats and other environmental controls shall be located no higher than 48″, and no lower than 15″, above the floor. If the reach is over an obstruction between 20″ and 25″ in depth, the maximum height is reduced to 44″ for forward approach; or 46″ for side approach, provided the obstruction is no more than 24″ in depth. Obstructions should not extend more than 25″ from the wall beneath a control. (See ADAAG Figure 5.)

NOTE: Controls or outlets that do not satisfy these specifications are acceptable provided that comparable controls or outlets (i.e., that perform the same functions) are provided within the same area and are accessible.

301.19(2) Elevators. An elevator meeting the requirements established for accessible elevators in Section 4.10 of the ADAAG is required in any apartment building of four or more stories.

NOTE: Elevators are not necessary in apartment buildings of three or fewer stories; however, the Uniform Federal Accessibility Standards, or any other applicable standard, may require the installation of an elevator. If an elevator is not required to be installed by this rule, then the elevator is not subject to the requirements of Section 4.10 of the ADAAG.

301.19(3) Any covered units within a multiple unit dwelling which comply with a code or standard which has been certified as a safe harbor for compliance with the accessibility requirements of the federal Fair Housing Act by the U.S. Department of Housing and Urban Development are in compliance with these rules unless the covered units are required to comply with the Uniform Federal Accessibility Standards or any other applicable requirements which may be more restrictive than the provisions of this rule.

481—301.20 to **301.22** Reserved.

PART 3
REQUIREMENTS FOR ENERGY CONSERVATION IN CONSTRUCTION

481—301.23(103A) Scope and applicability of energy conservation requirements.

301.23(1) *Scope.* Part 3 establishes thermal energy efficiency standards for the design of new buildings and structures or portions thereof, additions to existing buildings, and renovation and remodeling of existing buildings, except for residential buildings of one or two dwelling units, that are intended for human occupancy and that are heated or cooled by regulating their exterior envelopes and selection of their heating, ventilation, and air-conditioning systems, service water heating systems and equipment for the efficient use of energy, and lighting efficiency standards for buildings intended for human occupancy that are lighted.

301.23(2) *Applicability.* Part 3 applies to design and construction of buildings that are intended for human occupancy throughout the state of Iowa. Any construction of buildings or facilities that are intended for human occupancy and that are heated or cooled is covered, with the exception of renovation and remodeling of residential buildings of one or two dwelling units, which are not covered. Rule 481—301.24(103A) establishes standards for design and construction of residential buildings of three or fewer stories. Rule 481—301.25(103A) establishes standards for design and construction of commercial buildings and residential buildings of four or more stories. The occupancy of any building covered by this chapter shall be determined based upon the occupancy definitions in chapter 3 of the International Building Code, as adopted in rule 481—301.3(103A).

301.23(3) *Review by architect or engineer.* Plan review shall meet the following criteria:

a. The plans and specifications for all buildings to be constructed that exceed a total volume of 100,000 cubic feet of enclosed space that is heated or cooled are reviewed by a registered architect or licensed professional engineer for compliance with applicable energy efficiency standards. Buildings with less than 100,000 cubic feet can be reviewed by the owner or designated representative.

b. A statement that a review has been accomplished and that the design complies with the energy efficiency standards is signed and sealed by the responsible registered architect or licensed professional engineer. This statement is filed with the commissioner or a local building official on a form approved by the commissioner prior to construction or before obtaining any local permits. The statement is filed with the commissioner for any project that is subject to plan review by the building code bureau.

c. If the plans and specifications relating to energy efficiency for a specific structure have been approved, additional buildings may be constructed from those same plans and specifications without need of further approval if construction begins within five years of the date of approval. Alterations of a structure that has been previously approved do not require a review because of these changes, provided the basic structure remains unchanged and no additional energy is necessary for heating, cooling or lighting.

d. Prior to the completion of construction, no changes are made to any approved plan or specifications that increase the amount of energy used for heating, cooling, or lighting unless the changes are approved by the responsible registered architect or licensed professional engineer in writing and notice has been filed with the commissioner or a local building official. The commissioner or a local building official is notified of any change that is anticipated to decrease the amount of energy used. The commissioner is notified pursuant to this paragraph for any project that is subject to plan review by the bureau.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.24(103A) Residential energy code. The International Energy Conservation Code – Residential Provisions, 2012 edition, published by the International Code Council, located at www.iccsafe.org, is adopted by reference as the residential energy code of the state of Iowa building code, applicable to residential construction limited to three or fewer stories throughout the state of Iowa, with the following amendments:

301.24(1) Delete section R101.1.

301.24(2) Delete section R101.2 and insert in lieu thereof the following new section:

R101.2 Scope. This code applies to residential buildings and the building sites and associated systems and equipment as defined pursuant to 481—subrule 301.23(2). The remodeling or renovation of one- and two-family dwelling units is not within the scope of this code.

301.24(3) Delete section R103.3.1.

301.24(4) Delete section R103.3.2.

301.24(5) Delete section R103.3.3.

301.24(6) Delete section R104.1 and insert in lieu thereof the following new section:

R104.1 General. Construction or other work that is required to be inspected by state law or local ordinance shall be in accordance with sections R104.2 through R104.8. The commissioner has authority to perform audits to ensure compliance with this code. When local governments conduct compliance audits, the information may be provided to the Department of Energy or to the commissioner in a timely way. Local governments may contract with the commissioner to conduct audits.

301.24(7) Delete sections R108 and R109 and all sections contained therein.

301.24(8) Delete section R402.1.1 and insert in lieu thereof the following new section:

R402.1.1 Insulation and fenestration criteria. The building thermal envelope shall meet the requirements of Table R402.1.1 based on the climate zone specified in chapter 3.

Table R402.1.1

Table R402.1.1 Insulation and Fenestration Requirements by Component[a]

Climate Zone	Fenestration U-Factor[b]	Skylight U-Factor[b]	Glazed Fenestration SHGC[b,e]	Ceiling R-Value	Wood Frame Wall R-Value	Mass Wall R-Value[i]	Floor R-Value	Basement Wall R-Value[c]	Slab R-Value & Depth[d]	Crawl Space[c] Wall R-Value
1	NR	.75	.25	30	13	3/4	13	0	0	0
2	.40	.65	.25	38	13	4/6	13	0	0	0
3	.35	.55	.25	38	20 or 13+5[h]	8/13	19	5/13[f]	0	5/13
4	.35	.55	.40	49	20 or 13+5[h]	8/13	19	10/13	10, 2ft	10/13
5	.32	.55	NR	49	20 or 13+5[h]	13/17	30[g]	15/19	10, 2ft	15/19
6	.32	.55	NR	49	20 or 13+5[h]	15/20	30[g]	15/19	10, 4ft	15/19
7 & 8	.32	.55	NR	49	20+5 or 13+10[h]	19/21	38[g]	15/19	10, 4ft	15/19

[a] R-values are minimums. U-factors and SHGC are maximums. When insulation is installed in a cavity that is less than the label or design thickness of the insulation, the installed R-value of the insulation shall not be less than the R-value specified in the table.

[b] The fenestration U-factor column excludes skylights. The SHGC column applies to all glazed fenestration. Exception: Skylights may be excluded from glazed fenestration SHGC requirements in Climate Zones 1 through 3 where the SHGC for such skylights does not exceed .30.

[c] "15/19" means R-15 continuous insulation on the interior or exterior of the home or R-19 cavity insulation at the interior of the basement wall. "15/19" shall be permitted to be met with R-13 cavity insulation on the interior of the basement wall plus R-5 continuous insulation on the interior or exterior of the home. "10/13" means R-10 continuous insulation on the interior or exterior of the home or R-13 cavity insulation at the interior of the basement wall.

[d] R-5 shall be added to the slab edge R-values for heated slabs. Insulation depth shall be the depth of the footing or 2 feet, whichever is less in Climate Zones 1 through 3 for heated slabs.

[e] There are no SHGC requirements in the Marine Zone.

[f] Basement wall insulation is not necessary in warm-humid locations as defined by Figure R301.1 and Table R301.1.

[g] Or insulation sufficient to fill the framing cavity, R-19 minimum.

[h] First value is cavity insulation; second value is continuous insulation or insulated siding. Therefore, "13+5" means R-13 cavity insulation plus R-5 continuous insulation or insulated siding. If structural sheathing covers 40 percent or less of the exterior, continuous insulation R-value shall be permitted to be reduced by no more than R-3 in the locations where structural sheathing is used – to maintain a consistent total sheathing thickness.

[i] The second R-value applies when more than half the insulation is on the interior of the mass wall.

301.24(9) Delete section R402.4.1.2 and insert in lieu thereof the following new section:

R402.4.1.2 Testing shall meet the following requirements: The building or dwelling unit is tested and verified as having an air leakage rate not exceeding 5 air changes per hour in Climate Zones 1 and 2, and 4 air changes per hour in Climate Zones 3 through 8. Testing is conducted with a blower door at a pressure of 0.2 inches w.g. (50 pascals). Where required by the code official, testing is conducted by an approved third party and a written report of the results is signed by the party conducting the test and provided to the code official. Testing is performed at any time after creation of all penetrations of the building thermal envelope.

During testing:

1. Exterior windows and doors, fireplace and stove doors are closed, but not sealed beyond the intended weatherstripping or other infiltration control measures;
2. Dampers including exhaust, intake, makeup air, backdraft and flue dampers are closed, but not sealed beyond intended infiltration control measures;
3. Interior doors, if installed at the time of the test, are open;
4. Exterior doors for continuous ventilation systems and heat recovery ventilators are closed and sealed;
5. Heating and cooling systems, if installed at the time of the test, are turned off; and
6. Supply and return registers, if installed at the time of the test, are fully open.

301.24(10) Delete section R403.2.2 and insert in lieu thereof the following new section:

R403.2.2 Sealing is mandatory and shall meet the following requirements: Ducts, air handlers, and filter boxes are sealed. Joints and seams comply with either the International Mechanical Code or International Residential Code, as applicable.

Exceptions:

1. Air-impermeable spray foam products may be applied without additional joint seals.
2. Where a duct connection is made that is partially inaccessible, three screws or rivets are equally spaced on the exposed portion of the joint so as to prevent a hinge effect.
3. Continuously welded and locking-type longitudinal joints and seams in ducts operating at static pressures less than 2 inches of water column (500 Pa) pressure classification do not require additional closure systems.

Duct tightness is verified by either of the following:

1. Postconstruction test: Leakage to outdoors is less than or equal to 4 cfm (113.3 L/min) per 100 square feet (9.29 m^2) of conditioned floor area or total leakage is less than or equal to 6 cfm (170 L/min) per 100 square feet (9.29 m^2) of conditioned floor area when tested at a pressure differential of 0.1 inches w.g. (25 Pa) across the entire system, including the manufacturer's air handler enclosure. All register boots are taped or otherwise sealed during the test.
2. Rough-in test: Total leakage is less than or equal to 6 cfm (170 L/min) per 100 square feet (9.29 m^2) of conditioned floor area when tested at a pressure differential of 0.1 inches w.g. (25 Pa) across the system, including the manufacturer's air handler enclosure. All registers are taped or otherwise sealed during the test. If the air handler is not installed at the time of the test, total leakage is less than or equal to 3 cfm (85 L/min) per 100 square feet (9.29 m^2) of conditioned floor area.

Testing is conducted by an approved third party and a written report of the results is signed by the party conducting the test and provided to the code official.

Exception: The duct leakage test is not needed for ducts and air handlers located entirely within the building thermal envelope unless cavities are used for returns.

301.24(11) Delete section R403.2.3 and insert in lieu thereof the following new section:

R403.2.3 Building cavities (mandatory). Building framing cavities cannot be used as supply ducts. Building framing cavities may be used as return ducts if both of the following conditions exist:

1. Ducts must be tested for duct leakage in accordance with section R403.2.2.
2. Exterior wall cavities cannot be used for return ducts.

301.24(12) Delete the first clause of the Standard Reference Design for Building Component "Air exchange rate" in Table R405.5.2(1) and insert in lieu thereof the following new clause: "Air leakage of 5 air changes per hour in Climate Zones 1 and 2, and 4 air changes per hour in Climate Zones 3 through 8 at a pressure of 0.2 inches w.g. (50 Pa)."

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25; **ARC 0412D**, IAB 7/8/26, effective 8/12/26]

481—301.25(103A) Adoption of nonresidential energy code. The International Energy Conservation Code – Commercial Provisions, 2012 edition, published by the International Code Council, located at www.iccsafe.org, is hereby adopted by reference as the nonresidential energy code of the state building code, applicable to commercial construction or residential construction of four or more stories within the state of Iowa, with the following amendments:

301.25(1) Delete section C101.1.

301.25(2) Delete section C101.2 and insert in lieu thereof the following new section:

C101.2 Scope. This code applies to commercial buildings and the buildings' sites and associated systems and equipment as defined pursuant to 481—subrule 301.23(2).

301.25(3) Delete section C103.3.1.

301.25(4) Delete section C104.1 and insert in lieu thereof the following new section:

C104.1 General. Construction or other work that is to be inspected by state law or local ordinance shall be in accordance with sections C104.2 through C104.8.

301.25(5) Delete sections C108 and C109 and all sections contained therein.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.26 and **301.27** Reserved.

PART 4
LIFE CYCLE COST ANALYSIS OF PUBLIC FACILITIES

481—301.28(470) Life cycle cost analysis.

301.28(1) *Submission.* Any public agency as defined by Iowa Code section 470.1 will prepare a life cycle cost analysis in compliance with Iowa Code chapter 470 and submit the analysis to the commissioner before construction commences.

301.28(2) *Notification by state agency.* Any public agency that is a state agency as defined in Iowa Code section 7D.34 will, within 60 days of final selection of a design architect or engineer, notify the commissioner and the Iowa energy office in the economic development authority of the methodology to be used to perform the life cycle cost analysis. Notice will be given on the forms provided by the Iowa office of energy for this purpose. A life cycle cost analysis prepared by a state agency will be submitted in sufficient time ahead of the release of plans for bids to allow for revisions or additions that may be made to the plans. Public funds will not be used for the construction or renovation of a facility unless the design for the work is prepared in accordance with Iowa Code chapter 470 and the actual construction or renovation is consistent with the design.

301.28(3) *Exemptions from implementation.*

a. A public agency responsible for construction or renovation of a public facility may apply to the commissioner for exemption from any recommendation of the life cycle cost analysis.

b. The public agency will implement all recommendations of the life cycle cost analysis except those that have been approved for exemption by the commissioner and the director of the office of energy independence.

EXCEPTION: The public agency is not required to implement any recommendation that would result in a violation of any other provision of law. If the public agency determines that compliance with any recommendation of the life cycle cost analysis would result in a violation of law, the public agency will so notify the commissioner.

c. The commissioner and the director of the economic development authority will evaluate each request for an exemption on a case-by-case basis, considering the following factors:

(1) The purpose of the facility or renovation;
(2) Preservation of historic architectural features;
(3) Site considerations;
(4) Health and safety concerns;
(5) Compliance with any other provisions of law; and

(6) The technical feasibility of implementing the recommendation. "Technical feasibility" means that a recommendation may be implemented without altering major structural features of an existing facility.
[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.29 Reserved.

PART 5
SUSTAINABLE DESIGN STANDARDS

481—301.30(103A) Scope and purpose.

301.30(1) *Scope.* The standards established in Part 5 apply to building construction projects in Iowa and are based upon state or federal statutory requirements; administrative rules adopted by state agencies that own, manage, regulate, or finance building construction projects; or federal regulations.

301.30(2) *Purpose.* The purpose of the standards in Part 5 is to promote sustainable design in building construction, which is defined as construction that meets current needs while not compromising the needs of future generations. Sustainable design standards are intended to minimize the adverse environmental impacts of construction and the built environment.
[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.31(103A) Definitions. The following definitions apply to Part 5:

"Commercial" means a building construction project that is not residential.

"Residential" means a building construction project that involves a building or buildings, each of which is a detached one- or two-family dwelling or which consists of townhouses not more than three stories above grade in height with a separate means of egress to the exterior of the building for each dwelling unit and consisting entirely of dwelling units and their accessory structures.
[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.32(103A) Submission of projects.

301.32(1) *Approval of building code commissioner.* Approval of a construction project as sustainably designed pursuant to these rules may be granted only by the commissioner. All requests for approval of a project as sustainably designed must be submitted to the bureau at 6200 Park Avenue, Suite 100, Des Moines, Iowa 50321.

301.32(2) *Building code approval.* No building construction project will be approved as a sustainably designed project pursuant to these rules unless construction plans for the project have been approved by the commissioner as meeting the state building code or by a local building department as meeting the applicable local building code.

301.32(3) *Projects subject to state building code.* If approval as a sustainably designed project is requested for a project that is otherwise subject to the state building code, approval may be requested by including a statement in the materials submitted pursuant to 481—Chapter 300 that approval for the project as sustainably designed is being requested.

301.32(4) *Projects subject to local building codes.* If approval from the commissioner is sought for a project that is subject to a local building code and code enforcement, approval may be sought by submitting construction plans to the bureau as provided in 481—Chapter 300, with a cover letter stating that approval of the project as a sustainably designed project is being requested and that the project has been submitted for review to the local building department. The commissioner will not issue approval of the project as a sustainably designed project until evidence of approval of the construction plans by the local building department are submitted to the bureau.

301.32(5) *Projects not otherwise subject to state or local building codes.* If approval as a sustainably designed project is sought for a building construction project that is otherwise not subject to the state building code or a local building code, approval may be sought by submitting construction plans for the project to the bureau as provided in 481—Chapter 300, with a cover letter stating that approval as a sustainably designed project is being requested and that the project is not subject to a local building code

enforced by a local jurisdiction. The project will be subject to the state building code and to procedures and fees for review of construction plans and inspections as provided in 481—Chapter 300.

301.32(6) *Application form.* A completed application form prescribed by the commissioner shall be included with the submission of the construction plans for review of any project for which approval as a sustainably designed project is requested.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.33(103A) Sustainable design criteria for residential projects. A residential building construction project will be approved as sustainably designed if it meets any of the following requirements:

301.33(1) Satisfaction of all of the mandatory criteria of the economic development authority's Iowa green streets criteria; or

301.33(2) Compliance with ICC 700 National Green Building Standard®, (ICC 700-2008 NGBS) published by the International Code Council, at the bronze level; or

301.33(3) Certification from the United States Green Building Council at the certified level or better in the Leadership in Energy and Environmental Design (LEED) green building rating system for residential projects; or

301.33(4) Satisfaction of any alternative set of criteria submitted in advance to and approved by the commissioner as equivalent to the requirements of 481—subrules 300.33(1) through 300.33(3).

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.34(103A) Sustainable design criteria for commercial projects. A commercial building construction project will be approved as sustainably designed if it meets the following applicable requirements:

301.34(1) If approval as a sustainably designed project is being sought in order to qualify for a tax credit or tax refund, the project will be approved as sustainably designed if the building receives certification from the United States Green Building Council at the Certified level or better in the Leadership in Energy and Environmental Design (LEED) green building rating system and if the building complies with the requirements of ASHRAE 90.1 2007, Energy Standard for Buildings Except Low-Rise Residential Buildings, published by the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).

301.34(2) If the project includes only the following commercial structures, satisfaction of all of the mandatory criteria of the Iowa green streets criteria:

a. Day care centers.

b. Vocational rehabilitation centers.

c. Community centers.

d. Senior centers.

EXCEPTION: Application may be made to the commissioner to accept satisfaction of all of the mandatory criteria of the Iowa green streets criteria as the basis for approval of other commercial projects as sustainably designed. Such submission should be limited to smaller commercial projects, and approval as a sustainably designed project is at the discretion of the commissioner, who will award such approval only if the commissioner is convinced that the Iowa green streets criteria are applicable to the project. Written approval for use of the Iowa green streets criteria pursuant to this exception shall be sought and obtained prior to submission of an application for approval as a sustainably designed project.

301.34(3) If a project involves the construction of a building or a portion of a building intended to host a data center or operations of a web portal business, it will be approved as sustainably designed if the project receives certification at the certified level from the United States Green Building Council in the LEED green building rating system and complies with the requirements of ASHRAE 90.1 2007, Energy Standard for Buildings Except Low-Rise Residential Buildings, published by the ASHRAE.

301.34(4) Satisfaction of any alternative set of criteria submitted in advance to and approved by the commissioner as equivalent to the requirements set forth in subrule 301.34(1).

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.35(103A) Fees.

301.35(1) *Projects subject to the state building code.* For any project for which approval as a sustainably designed project is requested from the commissioner and which is otherwise subject to the state building code, the additional fee for review for compliance with sustainable design standards is $100, due prior to review of the application.

301.35(2) *Projects subject to local building codes and code enforcement.* For any project approved by a local building department as compliant with the local building code and for which approval as a sustainably designed project is requested, a fee of $250 is due prior to the commissioner's review of the application for approval as a sustainably designed project.

301.35(3) *Projects not otherwise subject to a building code.* For any project for which approval as a sustainably designed project is requested and which is not otherwise subject to a building code, the plan review fee is the same as the plan review fee for the project established in 481—subrule 300.4(2). An additional fee of $100 for review for compliance with the requirements set forth in Part 5 applies and is due prior to review of the plan.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.36 Reserved.

PART 6
WEATHER SAFE ROOMS

481—301.37(103A) Scope. The standards adopted in Part 6 apply to the design and construction of weather safe rooms. This chapter does not require the construction of a weather safe room or rooms for any construction project but does establish standards for design and construction of weather safe rooms when their construction is necessary under another provision of law or is incorporated voluntarily in a construction project.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.38(103A) Definition. The following definition applies to Part 6:

"Weather safe room" means a building, structure, or portion of a building or structure designated for use during a severe windstorm event.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.39(103A) Standards. Any weather safe room shall be designed and constructed in compliance with the provisions of ICC 500-2014, ICC/NSSA Standard for the Design and Construction of Storm Shelters, published by the International Code Council, located at www.iccsafe.org. Any provision that would apply to a hurricane safe structure but not to a tornado safe structure does not apply. For any provision for which a distinction is made between a tornado safe structure and a hurricane safe structure, the requirement for a tornado safe structure applies.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.40 Reserved.

PART 7
STATE HISTORIC BUILDING CODE

481—301.41(103A) Scope and definition. Part 7 applies to historic buildings and is an alternative to the state building code or local building codes for the buildings to which it applies.

"Historic building" means any building or structure that is listed in the state or National Register of Historic Places, that is designated as a historic property under local or state designation law or survey, that is certified as a contributing resource within a National Register-listed or locally designated historic district, or that has an opinion or certification that the property is eligible to be listed on the state or National Register of Historic Places either individually or as a contributing building to a historic district by the state

historic preservation officer pursuant to Iowa Code section 103A.42 or the Keeper of the National Register of Historic Places.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—301.42(103A) Adoption. The provisions of the International Existing Building Code, 2024 edition, published by the International Code Council, located at www.iccsafe.org, are adopted as the alternative requirements for rehabilitation, preservation, restoration, repair, alteration, change of occupancy and relocation of and addition to historic buildings, with the following amendments:

301.42(1) Delete the definition of "historic building".

301.42(2) Delete section 101.1.

301.42(3) Delete section 101.4.2 and insert in lieu thereof the following new section: 101.4.2 Buildings previously occupied. The legal occupancy of any structure existing on the date of adoption of this code is permitted to continue without change, except as specifically covered in this code or the state fire code, or as deemed necessary by the commissioner for the general safety and welfare of the occupants and the public.

301.42(4) Delete sections 101.5 and 101.6.

301.42(5) Delete sections 103, 104, and 105.

301.42(6) Delete sections 106.1, 106.3, 106.4, 106.5, and 106.6.

301.42(7) Delete sections 108, 109, 110, 112, 113, 114, 115, 116 and 117.

301.42(8) Delete section 306.

301.42(9) Delete appendix B and insert in lieu thereof:

"Any building or facility subject to Part 7 shall comply with the provisions of 481—Chapter 301, Part 2."

301.42(10) Delete all references to the "International Fuel Gas Code" and insert in lieu thereof "rule 481—301.9(103A)".

301.42(11) Delete all references to the "International Plumbing Code" and insert in lieu thereof "state plumbing code".

301.42(12) Delete all references to the "International Mechanical Code" and insert in lieu thereof "state mechanical code".

301.42(13) Delete all references to the "International Building Code" and insert in lieu thereof "rule 481—301.3(103A)".

301.42(14) Delete all references to the "International Residential Code" and insert in lieu thereof "rule 481—301.8(103A)".

301.42(15) Delete all references to the "International Fire Code" and insert in lieu thereof "state fire code".

NOTE 1: International Existing Building Code, as adopted by rule 481—301.7(103A), Resource A, provides guidelines for evaluating fire ratings of archaic materials and assemblies that may be used by designers and code officials when evaluating compliance with provisions of this chapter.

NOTE 2: Except for elevators excluded from the jurisdiction of the department by the provisions of Iowa Code section 89A.2, each elevator is to comply with any applicable requirements established by the department and is subject to enforcement of any applicable regulation.

NOTE 3: Except for boilers and pressure vessels excluded from the jurisdiction of the department by the provisions of Iowa Code section 89.4, each boiler or pressure vessel is to comply with any applicable requirements established by the department and is subject to enforcement of any applicable regulations.

Any boiler that is subject to requirements established by the department of natural resources is to comply with any such requirements and is subject to enforcement of any applicable regulations by the department of natural resources.

[**ARC 9474C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

These rules are intended to implement Iowa Code chapters 103A, 104A, and 470.

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/10/30

481—321.1 to **321.609** Reserved.

PART 1—MODULAR FACTORY-BUILT STRUCTURES

481—321.610(103A) "Modular factory-built structures." Part 1 of this chapter contains the rules and regulations applicable to all factory-built structures that are not specifically included in Part 2.

321.610(1) *Authority to promulgate rules.* Provisions contained within all of Part 1 are authorized under Iowa Code section 103A.9.

321.610(2) *Scope and applicability.* The provisions contained within Part 1 apply to the following:

a. Plan evaluation, manufacture, inspection, and installation of "modular factory-built structures," of closed-type construction and of open-type construction for those manufacturers who have by option chosen to have their building component, assembly or system considered to be closed construction.

b. Approval by the commissioner or the commissioner's designated representative of an organization or person referred to as a third-party agent, or independent inspection agency.

c. All "modular factory-built structures" manufactured for installation in Iowa after February 1, 1973.

321.610(3) *Definitions.* The definitions set forth in Iowa Code sections 103A.3 and 103A.51 and rule 481—301.2(103A) are incorporated herein by reference. The following definitions also apply:

"Certificate of compliance." A certification that is filed with the commissioner that indicates that the third-party agency has approved specific models or model groups of factory-built structures as meeting the state building code. (More information contained in paragraph 321.610(14)*"d"* and subrule 321.610(17).)

"Closed construction." Any structure, building, component, assembly or system manufactured in such a manner that all portions cannot be readily inspected at the installation site without disassembly, damage to, or destruction thereof.

"Code compliance certificate." The certificate prepared by an approved manufacturer and submitted by the manufacturer for each unit that is to be installed in Iowa and includes an Installation Certificate. (More information contained in subrules 321.610(19) and 321.610(20).)

"Commercial modular." A modular factory-built structure that is not a modular home.

"Component." Any part, material or appliance that is built in as an integral part of the factory-built structure during the manufacturing process, or any factory-built system, subsystem or assembly not approved as part of a unit, section, or module.

"Evaluation or inspection agency." An approved person or organization, private or public, determined by the commissioner to be qualified by reason of facilities, personnel, experience and demonstrated reliability and independence of judgment, to investigate, evaluate and approve factory-built structures or buildings, building components, building systems, and compliance assurance programs.

"Factory-built structure." Any structure, building, component, assembly or system that is of closed construction and that is made or assembled in manufacturing facilities, on or off the building site, for installation or assembly and installation, on the building site. Factory-built structures may also mean, at the option of the manufacturer, any structure or building of open construction, made or assembled in manufacturing facilities away from the building site, for installation, or assembly and installation, on the building site. Factory-built structure also means "factory-built unit."

"Independence of judgment" means not being affiliated with or influenced by or controlled by building manufacturers or producers, suppliers, or vendors of products or equipment used in factory-built structures or buildings and building components in any manner that is likely to affect their capacity to tender reports and findings objectively and without bias.

"Manufacturer's bill of sale." Any document, certificate, sales receipt, etc., signed by the manufacturer or importer that the modular factory-built structure described has been transferred to the person or dealer named. The document shall have attached a copy of the 3A section of the Code Compliance Certificate or shall contain at least the make, model year, manufacturer's serial number, Iowa model approval number and the code compliance seal number of the unit.

"Model or model groups." One or more manufacturer-designed modular homes that can constitute one model group.

"Modular." A general term to describe factory-built structures that are not manufactured homes or manufactured home add-on units. Modular includes but is not limited to panelized units, components, sections and modules.

"Module." A unit or a section that is assembled in its final form and transported in such a manner.

"Open construction." Any structure, building, component, assembly or system manufactured in such a manner that all portions can be readily inspected at the installation site without disassembly, damage to, or destruction thereof.

"Residential modular" or *"modular home."* Modular factory-built structure used as a one- or two-family dwelling.

"Seal" or *"insignia."* A device or insignia issued to the manufacturer by the commissioner for affixing to a factory-built structure or system evidencing compliance with the code.

"Section." A division of a factory-built structure that must be combined with other sections to form a complete structure.

"Temporary field construction office." A factory-built structure used at a construction site as an office facility by the personnel engaged in the construction of another structure or project. The intent of this structure is to remain on the job site only as long as necessary during the construction and then be removed before construction is completed.

"Testing agency." An organization approved by the commissioner that:

1. Is qualified and equipped for the testing, observation, evaluation, or approval of building components, construction, materials, equipment, or systems as regulated by approved standards;
2. Is not under the jurisdiction, affiliation, influence, or control of any manufacturer or supplier of any industry;
3. Makes available a published report in which specific information is included certifying that the equipment and installations listed or labeled have been tested and found acceptable according to approved standards.

"Third-party agency." An approved person or organization, private or public, determined by the state building code commissioner to be qualified to act as an evaluation, inspection, testing, or listing agency, as defined in this section.

"Unit." A single factory-built structure approved by the state building code commissioner. Units may be combined to form a larger complex structure or may be a combination of sections.

321.610(4) *Administration.* This section covers the basic requirements for constructing modular structures and all of the administrative procedures under which the modular program functions including methods of certification approval and manufacturing requirements, inspection and installation.

321.610(5) *Modular construction requirements.* All modular factory-built structures shall be constructed in accordance with the following provisions in 481—Chapter 301, as applicable: rules 481—301.3(103A), 481—301.4(103A), 481—301.5(103A), 481—301.6(103A), and 481—301.8(103A); Part 2; and Part 3.

321.610(6) *Modular installation requirements.* All modular factory-built structures shall be installed according to the manufacturer's approved installation drawings and any additional state-approved requirements. All approvals shall be part of the third-party certification agency approval for their respective manufacturer. All installations shall comply with local building codes for items not included as part of the state approval and local zoning requirements whenever applicable.

Modular installation seals shall be obtained and attached upon completion and the installation certificate completed and filed pursuant to subrule 321.610(20).

321.610(7) *Procedures for approval.* Approval procedures shall meet the following criteria:

The manufacturer contracts with third-party agencies for third-party approvals and notifies the commissioner of the intent to manufacture units to be installed in Iowa and the name of the third party or parties to be used.

The third-party agency notifies the commissioner that it has entered into a contract to perform services with the manufacturer.

Third-party approvals are required for plan and design approval, plant facilities approval and a continuing inspection of units during manufacture.

The manufacturers submit plans to the third-party agency or agencies for review and approval. After the plans, the plant facilities, and an inspection procedure have been approved by the third-party agency, the manufacturer submits a compliance certificate on the form supplied by the commissioner for each model or model group. The commissioner will assign an Iowa approval number for those models included in the approval.

At the time of production of units for installation in Iowa the manufacturer obtains from the commissioner Iowa insignia seals for manufacture and installation, to be attached to the units at the time of manufacture and installation, as well as code compliance and installation certificates.

321.610(8) *Requirements and procedures for obtaining third-party agency approval.*

a. The commissioner or the commissioner's designated representative will be responsible for approving any person, state or organization who applies to the commissioner for approval and whose application is accompanied by written material evidencing that said agency is:

(1) Capable of discharging without bias the responsibilities assigned by these regulations.

(2) Not under the jurisdiction or control of any manufacturer or supplier of any industry.

(3) Professionally competent with independence of judgment to perform the function for which commissioned.

(4) Qualified to submit all findings regarding code compliance in a detailed report to the commissioner.

(5) Willing to be inspected and reviewed by the commissioner for all phases of work.

b. The commissioner may limit the agencies' approval to particular types of factory-built structures, buildings, building systems, components, assemblies or systems.

c. Other states wishing to exercise application with this state in order to act in the capacity of an approved third-party agency, may do so provided that:

(1) The state laws for issuing seals or insignia for code compliance are substantially similar to those specified in this code.

(2) The conditions in subparagraph 321.610(8)*"c"*(1) are enforced in their state.

(3) Other states agree to monitoring of this reciprocal agreement by representatives of this state assigned by the commissioner.

(4) Violations of any condition as part of the reciprocal agreement may be deemed just cause for revocation or suspension of this agreement by the commissioner.

321.610(9) *Third-party agency responsibilities.* Third-party approval agencies shall satisfy the following criteria:

a. Evidence of approval by the state are on file at each manufacturing facility.

b. Notification to the commissioner when they have contracted with a manufacturer to serve as their third-party agency.

c. Manufacturer plans and specifications are approved by the third-party agency.

d. File of all plans and documents are maintained at each manufacturing facility and in the third-party agency office.

e. Send a report to the commissioner stating that the plans and specifications comply with the Iowa state building code.

(1) Plans and specifications are not necessary for submittal with this report.

(2) A list of approved models for each manufacturing facility.

(3) Verify that all engineering documents have been signed by a registered engineer or architect.

(4) Update the report as necessary.

(5) Indicate approval of installation procedures for all of these structures as well as the personnel who will be doing the installation. Installation of factory-built structures comply, in addition to provisions of this code, with any local ordinances that apply. (That is, those construction processes that are not included as part of the state approval.)

f. Notify the manufacturer of plans and specifications approval including model numbers for use in preparing certificates of compliance.

g. Inspect manufacturing facilities and review or establish a quality control program and test procedure.

h. Notify the manufacturer of facilities approval for use in preparing certificates of compliance.

i. Prepare an inspection manual to be used by the third-party inspectors and the commissioner, maintained on file at each manufacturing facility.

j. Report to the state outlining in-plant procedures and include a typical inspection checkoff sheet.

k. Notify the manufacturer when in-plant inspection program is in force for use in preparing certificates of compliance.

l. Report each quarter to the state for each manufacturer and submit information as follows:

(1) Account for all Iowa seals used by each manufacturer during the quarter.

(2) Manufacturer's serial number and model number.

(3) Third-party seal number.

(4) Iowa seal number.

(5) The portion of the unit that was actually inspected during an in-plant inspection.

321.610(10) *Third-party agency documentation and plan verification.* The third-party agency is responsible for the investigation, evaluation, review of test results, of plans and documents, and each revision thereto submitted to the agency by the manufacturer with which it has a contract for compliance with applicable requirements set forth in this code. Such a review shall include but not be limited to:

a. All documentations and plans indicate the manufacturer's name, office address, and manufacturing facility address.

b. Manufacturer's plans show all elements relating to specific systems on drawings properly identifiable.

c. Each plan that contains material requiring engineering evaluation bears the signature and seal of a registered architect or engineer.

d. The plans indicate the method of evaluation and inspection for all required on-site testing of each system.

e. Plans designate all work to be performed on site, including all system connections, equipment and appliances and all work performed within the plant.

f. Space is provided on all sheets of plans near the title box for the approved stamp.

g. Individual system design or any structural design or method of construction and data complies with the Iowa state building code. Plumbing, electrical, heating and mechanical systems constitute individual system designs.

h. Grade, quality, and identification of all materials are specified.

i. Design calculations and test reports are submitted when specified or required.

j. Plans are drawn to scale.

k. Plans indicate the location of the approved seal and data plate locations.

l. Copies of approved plans showing third-party agency approval are on file at each manufacturing facility or made readily available.

m. Review and approval of all installation procedures conforms to the following:

(1) Crews performing installation that are under the jurisdiction of the unit manufacturer or the manufacturer's designee are approved as competent by the authorized third-party agency.

(2) Copies of the installation manual are available during installation for use by the commissioner or the commissioner's representative or by the local building official.

321.610(11) *Third-party agency plant investigation for quality control.* All manufacturing facilities shall be inspected to the performance objectives as stated in the Iowa state building code. These include as follows:

a. Review of the manufacturer's quality control manuals or establishing a quality control procedure to ensure code compliance.

b. Implementation of inspection and test procedures that will control the quality of fabrication and workmanship.

c. Making a complete report to the commissioner that includes certification of all manufacturing procedures.

321.610(12) *Third-party agency in-plant inspections.* To ensure compliance with the approved specifications and plans and the Iowa state building code and in conjunction with monitoring each manufacturer's quality control program, every approved third-party agency shall:

a. Maintain a record of inspections, with such records including the seal report and reported to the commissioner every quarter.

b. Witness and verify all required testing in accordance with the quality control manual.

c. Certify that all seals are being attached as required and only after each unit meets the code requirements.

d. Prepare a detailed inspection manual that specifies the third-party agency procedures in making the required inspections, which will be available for use by the commissioner or the commissioner's representative when periodic monitoring is performed.

e. Inspect some part of every unit, although 100 percent inspection is not necessary. A complete inspection of a typical structural, plumbing, heating and electrical system shall be made each visit to the manufacturing facility.

321.610(13) *Reapproval of third-party agencies.* Any agency approved by the commissioner or the commissioner's designated representative must file for reapproval annually. Such application for reapproval may be filed at any time from the forty-fifth day prior to the scheduled annual expiration date of the current approval. The applying third-party agency seeking reapproval shall completely and accurately update all information previously submitted to the commissioner or the commissioner's representative as part of its original application for approval and all subsequent applications for reapproval. The application for reapproval will become a permanent record of the department administering the provisions of the code. Should there be no change in the status of the applying agency from its original application, an affidavit to that effect will suffice for consideration of approval.

321.610(14) *Requirements and procedures for modular manufacturers.* Every modular manufacturer shall perform or meet the following:

a. Be responsible for all corrective actions required. The contractual agreement that each has with the approved third-party agency does not diminish this responsibility.

b. Notify the commissioner that the manufacturer's facility desires to construct units that are to be installed in the state of Iowa.

c. Contract with an approved third-party agency to perform all duties listed in subrules 321.610(9), 321.610(10), 321.610(11), and 321.610(12). The commissioner will furnish a list of approved third-party agencies upon request.

d. File certificates of compliance with the commissioner for each model or model group after all third-party reviews are completed; whenever additional models or changes are proposed, file additional certificates of compliance or request that additions be made to existing model lists.

e. Purchase Iowa seals from the office of the commissioner in accordance with requirements of subrule 321.610(22).

f. All units or sections have seals if manufactured after February 1, 1973, and if they are to be installed in Iowa. Regardless of manufactured date, all units being installed in Iowa for the first time have a seal attached.

g. Complete and furnish compliance certificates and installation certificates in accordance with the requirements of subrules 321.610(19) and 321.610(20).

321.610(15) *Manufacturer's data plate for modular units.* The following information shall be placed directly or by reference on one or more permanent manufacturer's data plates in the vicinity of the electrical distribution panel box or in some other designated location that is readily accessible for inspection.

a. Manufacturer's name and address.

b. Serial number of the structure or unit.

c. Model designation and name of each of the manufacturers of major factory-installed appliances.

d. Wherever applicable, identification of permissible type of gas for appliance and direction for water and drain connections.

e. Name and date of the standards complied with in construction of this structure or unit.

f. The seal serial number.

g. Design loads and special conditions or limitations.

h. Date of manufacture.

i. Electrical ratings. Instructions and warnings on voltage, phase size and connections of units and grounding requirements.

321.610(16) *Changes and alterations to factory-built structures.*

a. Changes to approved plans, drawings or installation instructions proposed by the manufacturer or third-party agency are to be requested in writing and submitted to the commissioner. All work being performed in the manufacturing plant that is affected by these changes will not proceed until written approval is received from the commissioner. Where these changes do not affect code compliance, then approval is permitted when changes are authorized through the third-party agency and said changes are then incorporated into the design documents.

b. The commissioner will notify the manufacturer and the third-party agency of all amendments, deletions or additions to the code provisions and the commissioner will allow the manufacturer a reasonable time frame in which to submit a request for a change in plan approval, if required, in order to conform to the code change.

c. Basic changes in manufacturing facility locations, company name or address changes, and changes resulting in companies changing ownership or dissolving their business are all to be reported promptly to the commissioner and the third-party agency, in writing, generally within a two-week period after said change was made.

d. Alterations to factory-built structures pursuant to the construction, plumbing, heat producing, electrical equipment or installation or fire safety in a unit after an Iowa seal has been affixed are all considered to be subject to the same requirements that exist for any structure within the local jurisdiction.

e. The following do not constitute an alteration to a factory-built structure.

(1) Any repairs to approved component parts.

(2) Conversion of listed fuel-burning appliances in accordance with the terms of their listing.

(3) Adjustment and maintenance of equipment installed in the factory-built structure.

(4) Replacement of equipment in kind.

321.610(17) *Certificate of compliance.* The manufacturer shall provide the commissioner with a certificate of compliance for each model or model group of the approved modular design that includes the following:

a. Model or model group number that will appear on the data plate and compliance certificate.

b. The signature of an authorized representative of the manufacturer.

c. The name of the third-party agency certifying compliance with the code, for each of the three certifications.

d. Evidence of code compliance certified by the third-party agencies, for the specific model or model group being submitted.

321.610(18) *Limitations.* For all types of structures other than modular homes, there shall be, with the certificate of compliance, an attached statement that sets out the limitations of the structure based on site conditions, type of construction, area, and height limitations. A statement to the effect that the structure should not be used except where it meets these conditions will not be acceptable.

321.610(19) *Code compliance and installation certificates.* Code compliance and installation certificates approved for use are available at the website of the building code bureau when seals are purchased pursuant to subrule 321.610(22). The manufacturer shall complete the certificate and distribute it as follows:

a. A copy returned to:

State Building Code Bureau
Department of Inspections, Appeals, and Licensing
6200 Park Avenue
Des Moines, Iowa 50321

b. A copy retained for plant records and to be used to make additional copies if necessary, including an additional copy to accompany other shipping documents carried by the transporter and to be available for inspection by any authorized official or department.

c. A copy of the compliance certificate forwarded to the dealer, distributor, or any other person who is required to obtain a local building permit or to oversee installation.

321.610(20) *Installation certificates.* The installation certificate portion of the supplied combination certificate (subrule 321.610(19)) shall be partially completed by the manufacturer at the same time the code compliance certificate is prepared and made part of the documents shipped with the unit and completed by the local building official or the installer.

a. When a building permit is required, a copy of the code compliance certificate shall be presented to the local building official at the time application for a permit is made. The building official shall sign the certificate and send a copy to the commissioner at the address designated in this rule.

b. When a building permit is not required, the code compliance certificate shall be signed by the installer and forwarded to the commissioner at the address designated in this rule.

321.610(21) *Certification seals.* There shall be two seals attached to every factory-built structure that is installed in Iowa as follows:

a. Every module, unit, section, or component has a state compliance seal securely affixed at the manufacturing facility to show that the manufactured unit complies with the code. When components and systems are included within a module, section or unit and have been approved by the third-party agency to be part of that module, section or unit, only one seal is necessary for the module, section, or unit. A series of panels that make up the final unit when assembled at the site, and where approved in that manner, need only one seal.

b. Every completed unit when installed at the final site has an installation seal attached to show that the installation complies with the requirements of this code.

321.610(22) *Compliance seals.*

a. Compliance seal issuance. The state compliance seal will be issued by the commissioner upon application and after approval of the plans and manufacturing procedures has been certified by the third-party agency evidencing compliance with this code. Applications for compliance seals shall be made to the commissioner on the supplied form and include the following:

(1) Number of seals requested.

(2) Iowa model or system approval numbers.

(3) Reference to approval of manufacturing procedures and third-party agency or agencies involved.

(4) A statement by the applicant that consent is given for inspection and investigation at all reasonable hours.

(5) Applicable compliance seal fees.

b. Compliance seal reporting. Manufacturers shall notify the commissioner monthly of the use of seals by the manufacturers' facilities, on a form approved by the commissioner and containing adequate information to determine the following:

(1) Compliance seal number.

(2) Serial number of the unit on which the seal was placed.

(3) Make and model of the unit on which the seal was placed.

(4) Number of sections that comprise the finished unit.

(5) Location to which the unit was shipped.

321.610(23) *Number of compliance seals required.* Each modular building shall have a compliance seal attached to every section or unit of the building.

321.610(24) *Compliance seal placement on modular units.* Every compliance seal shall be assigned and securely affixed to a specific section or unit in a readily visible location. Assigned seals are not transferable and are void when not affixed as assigned. All seals not properly affixed shall be returned to or

may be confiscated by the commissioner. The seal remains the property of the commissioner in the event of violation of the conditions of approval.

321.610(25) *Denial and repossession of seals.* Should investigation or inspection reveal that a manufacturer is not constructing modular units in accordance with the plans approved by the third-party agency, and such manufacturer, after having been served with a notice setting forth in what respect the provisions of these rules and the code have been violated, continues to manufacture units in violation of these rules and the code, applications for new seals will be denied and the seals previously issued will be confiscated. Upon satisfactory proof of compliance, such manufacturer may resubmit an application for seals.

321.610(26) *Seal removal.* In the event that any unit bearing the seal is found to be in violation of the code, the commissioner may remove the seal after furnishing the owner or the owner's agent with a written statement of such violations. No new seals will be issued until proof of corrections has been submitted to the commissioner.

321.610(27) *Lost or damaged seals.* When or if a seal has been lost or damaged, the commissioner shall be notified immediately in writing by the manufacturer, including identification of the unit serial number, and when possible, the seal number.

a. All seals that are damaged shall be promptly returned to the commissioner.

b. Lost and damaged seals will be replaced by the commissioner with a new seal upon payment of the seal fee as provided in this section.

321.610(28) *Return of seals.* When a manufacturer discontinues production of a unit carrying plan approval, the manufacturer shall within ten days advise the commissioner of the date of such discontinuance and either return all seals allocated for such discontinued unit or assign said seals to other approved units.

321.610(29) *Fees.*

a. Form of remittance. All remittances are to be:

(1) In the form of checks or money orders;

(2) Made payable to Iowa Department of Inspections, Appeals, and Licensing; and

(3) Addressed to:

State Building Code Bureau
Department of Inspections, Appeals, and Licensing
6200 Park Avenue
Des Moines, Iowa 50321

b. Seal fees.

Modular code compliance seals	$30 per seal
Modular installation seals	$15 per seal

c. Other fees. A fee equal to the direct expense will be charged for all other services furnished by the commissioner that are not direct administrative duties of the commissioner's office, including but not limited to obtaining consultants for review and evaluation of applications or obtaining reviews from the national code writing organizations.

321.610(30) *Local issuance of building permits and local zoning.*

a. The issuance of building permits and occupancy permits will be in accordance with local ordinances and Iowa Code sections 103A.19 and 103A.20.

b. Local building codes and regulations apply to all parts of any project that are not included in the state approval of either the manufactured structure or the installation procedure.

c. Nothing in these rules or the state building code exempts any factory-built structure from the requirements of local zoning or site condition requirements.

d. A modular factory-built structure moved or relocated after the first installation in Iowa shall comply with the applicable codes and zoning restrictions of the jurisdiction into which it is being moved or relocated.

321.610(31) *Noncompliance to code provisions.* Any noncompliance or unauthorized deviation with the provisions of this code from the approved plans or production procedures will be just cause for the revocation of the plan approval and the return of the seals.

[**ARC 9471C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—321.611 to **321.619** Reserved.

PART 2—MANUFACTURED HOUSING

481—321.620(103A) Manufactured home construction. (Previously called mobile home.)

321.620(1) *Authority to promulgate rules.* Pursuant to Public Law 93-383, Section 604, of the National Manufactured Home Construction and Safety Act of 1974, specified in 42 U.S.C. 5403 and signed into law on August 22, 1974, the authority to promulgate rules and regulations in order to establish federal manufactured home construction standards and procedures of enforcement were established by Congress and subsequent provisions for their implementation were so granted to the United States Department of Housing and Urban Development (HUD). Title VI of this Act authorizes the secretary of HUD to promulgate the federal standards and to issue the rules and regulations to ensure adequate administration and enforcement of such standards.

321.620(2) *Scope and applicability.* Provisions contained within Part 2 shall apply to all factory-built structures defined as a "manufactured home" in subrule 321.620(4). These regulations shall govern manufactured homes that enter the first stage of production on or after June 15, 1976, and manufactured homes that entered the first stage of production prior to June 15, 1976, to which HUD labels were affixed. These provisions supersede all local, state, or other governmental regulations for manufactured home standards and are applicable for every manufactured home unit newly manufactured and offered for sale in the United States and its governing territories. These provisions do not apply to the following:

a. Factory-built structures that comply with the requirements of Part 1.

b. Manufactured homes manufactured for installation in the state of Iowa on or after February 1, 1973, and prior to June 15, 1976.

321.620(3) *Manufacture of units prior to June 15, 1976.* Manufactured home units and add-on units that were manufactured for installation in Iowa prior to June 15, 1976, which established the effective date of the HUD standard, shall have been constructed to the standards of manufactured homes of the Iowa state building code that was in effect at the time of manufacture.

321.620(4) *Definitions and terms.* Terms and definitions for purposes of clarification when used in Part 2. (More information contained in subrule 321.610(3).)

"Anchoring equipment." Straps, cables, turnbuckles, clamps, clips, and other fasteners including tensioning devices, which are used with ties to secure a manufactured home to ground anchors.

"Anchoring system." A combination of ties, anchoring equipment, and ground anchors that will, when properly designed and installed, resist overturning and lateral movement of the manufactured home from wind forces.

"Approved installer." Approval by the commissioner or the commissioner's designated representative of a person, dealer, agency or organization, qualified to inspect, or install ground anchoring and support systems for manufactured homes or other manufactured structures, who installs units, for others, at a site of occupancy by attaching support and anchoring systems, and is familiar with and has agreed to comply with these installation procedures.

"Certificate, installation." The certificate provided by the installer to both the commissioner and the owner that warrants that the installation system complies with these rules. When an installer installs only the support system or anchorage system, an installation certificate shall also be completed and copies distributed accordingly for each installation and with the applicable information completed on the certificate pertinent to that type of installation (more information contained in subrule 321.623(5)).

"DAPIA." A design inspection agency approved by HUD to perform in-plant design reviews on all drawings and specifications in order to provide compliance to the HUD standard for manufactured home construction.

"Diagonal tie (frame tie)." A tie intended primarily to resist horizontal or shear forces and that may secondarily resist vertical, uplift, and overturning forces.

"Ground anchor." Any device at the manufactured home site designed to transfer manufactured home anchoring loads to the ground.

"IPIA." A production inspection agency approved by HUD to perform the in-plant quality assurance inspection programs within manufactured home manufacturing facilities.

"Label or certification label." The approved form of certification by the manufacturer that is affixed to each transportable section of each manufactured home manufactured for sale to a purchaser in the United States or its governing territories.

"Main frame (chassis)." The structural component on which is mounted the body of the manufactured home.

"Manufactured home." (Previously called mobile home.) A structure transportable in one or more sections that when erected on site measures 8 body feet or more in width and 40 body feet or more in length or when erected on site is 320 or more square feet in area, and that is built on a permanent chassis and designed to be used as a dwelling unit with or without a permanent foundation when connected to the required utilities and includes the plumbing, heating, air conditioning and electrical systems contained therein.

"Manufactured home add-on." A structure that is designed and produced and to be made an integral part of a manufactured home and will be considered part of the manufactured home, when attached thereto.

"Manufacturer's statement of origin" means a certification signed by the manufacturer or importer that the manufactured home described has been transferred to the person or dealer named and that the transfer is the first transfer of the manufactured home in ordinary trade and commerce. The label number required by 24 CFR Chapter XX, Section 3282.362(c)(2), shall be included. (This number is commonly known as the HUD number.) The terms "manufacturer's certificate," "importer's certificate," "MSO" and "MCO" shall be synonymous with the term "manufacturer's statement of origin."

"Pier." That portion of the support system between the pier foundation and the manufactured home exclusive of caps and shims.

"Pier foundation (footing)." That portion of the support system that transmits loads directly to the soil, and shall be sized to support the loads shown herein.

"SAA." A state administrative agency approved by the Department of Housing and Urban Development to participate in the enforcement of all provisions to which a manufactured home is regulated under the HUD standard.

"Seal, installation." Is an insignia issued by the commissioner that is attached to a manufactured home by the installer to certify that the installation is in compliance with the requirements of the state building code.

"Stabilizing system (tie-down system)." A combination of the anchoring system and the support system when properly installed. Therefore, components of the anchoring and support systems such as piers, pier foundations, ties, anchoring equipment, anchors, or any other equipment that supports or secures the manufactured home to the ground, shall be defined as stabilizing devices. For the purposes of this code the definition of a stabilizing system and the definition of a tie-down system shall be one and the same.

"Support system." A combination of pier foundations, piers, caps, and shims that will, when properly installed, support the manufactured home.

"Tie." Strap, cable or securing device used to connect the manufactured home to ground anchors.

"Tie-down system (stabilizing system)." Means a ground support system and a ground anchoring system used in concert to provide anchoring and support for a manufactured home.

"Vertical tie (over-the-top)." A tie intended to resist the uplifting and overturning forces. This tie may continue over-the-top but if properly attached may only extend partway up each side.

321.620(5) *Administration.* This section covers the basic requirements for constructing manufactured homes and all of the administrative procedures under which the manufactured home program functions including information pursuant to certification, approval and manufacturing requirements. This section also applies to those structures defined in subrule 321.620(4) of Part 2 as manufactured home add-on units, temporary field construction offices and multifamily homes. There are also included within Part 2

(rule 481—321.621(103A)) sections dealing with installation procedures and information pursuant to the handling of consumer complaints (subrule 321.620(15)) consistent with the duties of the state of Iowa to be performed as a State Administrative Agency (SAA) in conjunction with the manufactured home program.

321.620(6) *Manufactured home construction requirements.* All factory-built structures that are defined as a manufactured home under subrule 321.620(4) of Part 2, shall be constructed to the standards as promulgated by the United States Department of Housing and Urban Development hereafter referred to as HUD. These standards were published as final rules in the December 18, 1975, issue of the Federal Register, Volume 40, No. 244, and will be amended from time to time. These standards are herein adopted and apply to all manufactured homes manufactured after June 15, 1976. All provisions for manufactured home procedural and enforcement regulations are covered within the May 13, 1976, Federal Register, Volume 41, No. 94. All factory-built structures defined as a manufactured home by the federal standard shall be manufactured and so regulated by these documents.

321.620(7) *Procedures of approval for manufactured homes.* Every manufactured home unit or structure approval will follow the method of third-party certification approval with all approvals obtained through the HUD secretary. All manufactured home plans, specifications, documentation, plant facilities and in-plant inspections must be submitted to and approved by a third-party certification agency so designated by the HUD secretary. Rules and regulations pursuant to these procedures are outlined in the manufactured home procedural and enforcement regulations, Parts 3282.201 through 3282.204, which set out requirements to be met by states or private organizations that wish to qualify as primary inspection agencies (more information contained in subrule 321.620(4) about Part 2 definitions for IPIA and DAPIA).

321.620(8) *Compliance certification.* Every manufactured home unit or structure must conform to the certification requirements within section 3282.205 of the manufactured home procedural enforcement regulatory document.

321.620(9) *Certification seals (labels) and other seal requirements.* Every manufactured home unit or structure must conform to the requirements within the manufactured home procedural and enforcement regulatory document section 3282.362(c)(2) in lieu of Iowa insignias. Other types of units manufactured under the requirements of Part 2 will be labeled as prescribed in subrule 321.620(10).

321.620(10) *Manufactured home add-on units.* Every factory-built structure manufactured as a manufactured home add-on unit as defined in subrule 321.620(4) shall be constructed to the standards set forth in subrule 321.620(6), except that these units will bear an Iowa seal in accordance with the provisions of Part 1. Manufacturers of manufactured home add-on units with the exception of constructing to the HUD standard, which has been herein adopted for these units, must comply with all other provisions of Part 1.

321.620(11) *Seal types for manufactured home add-on units.*

a. When ordering seals for manufactured home add-on units, each manufacturer will indicate the number of each type of seal requested and the letter prefix required. Examples of seals issued are as follows: (A00-0000MH), (B00-0000MH), C, D, and E, etc. Single units are without prefix letters (00-0000MH). More details are contained in subrule 321.610(21).

b. It is noted that manufactured home type seals shall be attached to all of these type units. All other procedures for seal issuance, removal, damage, repossession and return are to conform with provisions of this code as outlined in Part 1.

321.620(12) *Noncompliance.* Failure to conform to the provisions of Part 2 as they apply to the federal standard for the construction of manufactured homes is subject to the penalties where applicable as set forth within Part 1. The state of Iowa having adopted the federal standard and the enforcement regulations shall participate in the federal program as an agent of HUD, thereby providing assurances to ensure code compliance when these units are offered for sale for subsequent installation within the state of Iowa.

321.620(13) *Consumer complaints.* The state building code bureau serving as an approved State Administrative Agency (SAA) for the Federal Department of Housing and Urban Development shall receive complaints and process them in accordance with the requirements of the federal regulations as outlined in subpart I, paragraph 3282.401, titled, “Consumer Complaint Handling and Remedial Actions of the Manufactured Home Procedural and Enforcement Document.” These specific complaints are

categorized as possible imminent safety hazards or possible failures to conform to the federal standard. Imminent safety hazards shall be those items that could result in an unreasonable risk of injury or death to the occupants of the manufactured homes. Failures to conform to the federal standard are those items that do not result in an unreasonable risk of injury or death to the occupants of manufactured homes, but nevertheless do not meet the provisions of the federal standard in some specific manner.
[**ARC 9471C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—321.621(103A) Installation of manufactured homes.

321.621(1) *Authority.* These rules and regulations are to establish minimum requirements for the installation of manufactured homes as authorized by Iowa Code sections 103A.7(2)*"c"* and 103A.9.

321.621(2) *Application.*

a. These rules apply to the initial installation of manufactured homes manufactured on or after February 1, 1973, and to factory-built structures manufactured homes before February 1, 1973, which have never been installed in Iowa, and are approved by the commissioner.

b. These rules apply to all manufactured homes, new or used, that are sold in Iowa or sold to be installed in Iowa after September 1, 1977, for new manufactured homes and January 1, 1978, for used manufactured homes. The seller shall provide an approved tie-down system and the purchaser shall install or have the system installed within 150 days (more information contained in subrule 321.620(4) about the definition of a tie-down system). The 150-day period is designated for time to complete the installation when climatic conditions may restrict the completion of the tie-down system.

c. These rules apply to the installation of manufactured home add-on units, temporary field construction offices and manufactured multifamily homes.

d. These rules shall apply to any person doing any work on any part of the tie-down system (both support or anchorage systems) whether the unit is being sold or not.

321.621(3) *Enforcement.* The commissioner shall administer and enforce these provisions. Any person, agent, or organization approved and authorized by the commissioner may inspect any installation system and equipment to ensure compliance with these regulations. Evidence of compliance shall be supported by the submission to the commissioner of a certificate of installation. One copy of such certificate will remain in possession of the owner of the installed structure.

321.621(4) *Manufactured home installation instructions.* Every manufactured home manufacturer that manufactures manufactured homes for installation in Iowa shall provide the commissioner with a reproducible copy of printed instructions of installation for each specific make and model of manufactured home that is to be installed in Iowa. These instructions shall include copies of the materials that have been certified by a registered professional engineer for compliance with the federal manufactured home construction standards and 3280.306(a)(2), 3280.306(b), and 3280.303(c) of the regulatory standards. The manufacturer's installation instructions shall also be available at the installation site.

321.621(5) *Approvals and procedures.* Requirements for approval of installers, support and anchorage systems, seals and certificates are described in the remaining sections of this part.
[**ARC 9471C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—321.622 Reserved.

481—321.623(103A) Installation seal and certificate procedures for manufactured homes.

321.623(1) *Application for seals.* Any installer who has met the applicable requirements of 481—Chapter 325 may apply for installation seals as needed. Such seals may be obtained from the commissioner or local building officials or building department who is a participant in the state's installation program.

321.623(2) *Manufactured home installation certificates.* The installer of manufactured homes shall supply the building code commissioner and the owner of the unit with the signed and completed installation certificate that has been issued by the Iowa building code commissioner, within 30 days of affixing the Iowa installation seal.

321.623(3) *Obtaining installation certificates.* Any person who installs a tie-down system or any portion thereof shall be supplied with the installation certificate forms when ordering installation seals and

the payment of the appropriate fee. Installers who are not listed as an installer shall be supplied the proper form to be attached to the copy of the installation certificate to be filed with the commissioner, which will record compliance with the approved system.

321.623(4) *Placement of installation seal.*

a. The installation seal shall be placed in a readily visible location on the rear of the unit. Those units manufactured after June 15, 1976, shall have the installation seal placed adjacent to the federal (HUD) label. Those units manufactured before June 15, 1976, shall have the installation seal placed at the left rear corner above any skirting.

b. Multiple width units require only one seal for the completed installation. Additions that are added after the initial installation shall have an installation seal on that portion.

321.623(5) *Denial and repossession of installation seals.* Should investigation or inspection reveal that an approved installer has not installed an anchoring system, support system, or the complete tie-down system according to these rules and the code, the commissioner may deny such installer's application for new installation seals and any installation seals previously issued shall be confiscated. Upon satisfactory proof of modification of such installation bringing them into compliance, such dealer or installer may resubmit an application for installation seals.

321.623(6) *Seal removal, installation.* Should a violation of the rules regarding installation be found, the commissioner may remove the installation seal after furnishing the owner or a designated agent with a written statement of such violation. The commissioner shall not issue a new installation seal until corrections have been made and the owner or a designated agent has requested an inspection pursuant to subrule 321.625(1).

321.623(7) *Lost or damaged seals, installation.* When an installation seal is lost or damaged, the commissioner shall be notified in writing. Damaged or lost installation seals shall be replaced by the commissioner upon payment of the replacement installation seal fee as provided in rule 481—322.20(103A).

321.623(8) *Return of seals, installation.* When a dealer or installer discontinues the installation of manufactured homes, the dealer or installer shall notify the commissioner within ten days of the date of such discontinuance and return all unused installation seals that have been issued to the dealer or installer. Installation seals may not be transferred by any dealer or installer after being issued to that dealer or installer.

321.623(9) *Seals for existing manufactured homes.* Seals may be obtained for existing manufactured homes that are tied down in accordance with the requirements of rule 481—321.627(103A).

[**ARC 9471C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—321.624 to **321.626** Reserved.

481—321.627(103A) Approval of existing manufactured home tie-down systems. This rule is to provide a method by which manufactured homes that have been installed prior to August 12, 1983, can be sold without requiring a new tie-down system to be installed and to allow existing manufactured homes that are properly supported and anchored to be sold without installing new support and anchorage systems.

321.627(1) *Sale of a certified unit.*

a. The commissioner shall be notified in writing by the seller of the change of ownership when any manufactured home sold after August 12, 1983, remains in the same location. The installation seal shall remain in place and a copy of the installation certificate shall be supplied to the new owner. Replacement seals and certificates may be obtained if necessary (subrule 321.623(9)).

b. A certified manufactured home sold after August 12, 1983, that is moved to a new location must obtain a new certificate and seal. The existing support and anchorage system may be used if the installer verifies the conditions of use and the installation procedures of the existing systems are met at the new location.

321.627(2) *Sale or acceptance of installed existing units as an owner's option.* Application may be made to the commissioner for approval of an existing manufactured home support and anchor system on one of the following conditions:

a. If the support and anchorage systems were installed by an approved installer and are approved systems.

b. If the existing support and anchorage system has been inspected by an approved installer and the installer attests by signing the installation certificate that to the best of the installer's knowledge, the existing systems are equal to or better than the minimum requirements of this code.

c. If the existing support and anchorage systems are inspected and approved by a registered engineer or architect, and attested to in writing.

d. If the existing support and anchorage systems are inspected by a field inspector with the Iowa state building code and the existing systems are found to be equal to or better than the minimum requirements of this code.

If compliance is met by one of the above procedures and payment of the required fee has been paid, an Iowa installation seal and certificate may then be issued.

[**ARC 9471C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—321.628(103A) Procedure for governmental subdivisions for installation of factory-built structures.

321.628(1) Any governmental subdivision that has adopted the state building code or any other building code is required to enforce the state building code requirements for the installation of factory-built structures (Iowa Code section 103A.9(1)*"d"*(1)).

321.628(2) Governmental subdivisions that are issuing building permits and are inspecting construction for compliance with the local building regulations shall verify the installation of factory-built structures within their jurisdiction and shall sign the installation certificate and forward the appropriate copy to the commissioner.

a. The local official shall obtain the installation certificate and the installation seal from the person making application for a building permit that includes a factory-built structure.

b. Upon completion and review of the installation the local official shall attach the installation seal to the unit.

c. Governmental subdivisions are permitted to assess fees as may be required by local ordinances.

d. Nothing in this rule is intended to reduce the authority of the governmental subdivision from establishing zoning regulations as outlined in Iowa Code sections 414.28 and 335.30.

[**ARC 9471C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—321.629(103A) Support and anchoring systems submission.

321.629(1) *Submission by manufacturer.* The manufacturer of each manufactured home installed in Iowa shall submit to the building code commissioner a copy of the installation instructions by mail in printed form and in an electronic form acceptable to the commissioner.

321.629(2) *Submission by licensed professional engineer.* A licensed professional engineer who designs a support and anchoring system for use in the installation of a manufactured home in Iowa shall submit to the building code commissioner a copy of the specifications and instructions for the system by mail in printed form and in an electronic form acceptable to the building code commissioner. A support and anchoring system designed by a licensed professional engineer shall not be utilized unless it has been submitted to the building code commissioner in compliance with this subrule.

TABLE 6A

MINIMUM NUMBER OF TIEDOWNS

REQUIRED FOR SINGLEWIDE MOBILE HOMES

MOBILE HOME BOX LENGTH NOT EXCEEDING	MINIMUM NUMBER OF TIEDOWNS PER SIDE	
	DIAGONAL TIES	VERTICAL TIES*
40′-0″	3	2
54′-0″	3	2
73′-0″	4	2
84′-0″	5	2

*If more than minimum number of vertical or diagonal ties have been supplied, they shall all be used.

NOTES:

1. Doublewide mobile homes shall comply with Table 6A except that no vertical ties are required.
2. Wherever a vertical tie and a diagonal tie lie in a plane that is vertical and transverse to the main longitudinal beam, both ties may be connected to the same ground anchor, providing that particular anchor withstands both loadings.
3. This table shall be used only if there are no manufacturers approved installation requirements.

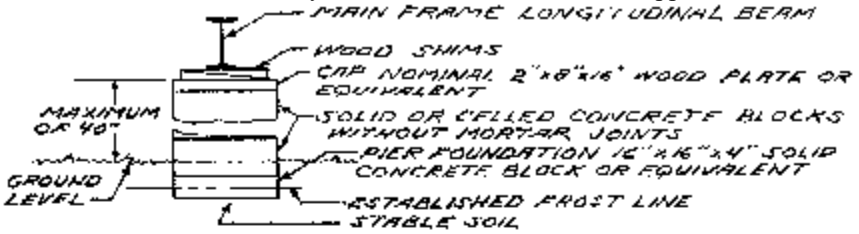

FIGURE 1. PIERS UP TO 40" IN HEIGHT (SINGLE BLOCK CONSTRUCTION)

NOTE: CORNER PIERS MORE THAN THREE (3) BLOCKS HIGH SHALL BE DOUBLE BLOCK CONSTRUCTION AS SHOWN IN FIGURES 2 & 3

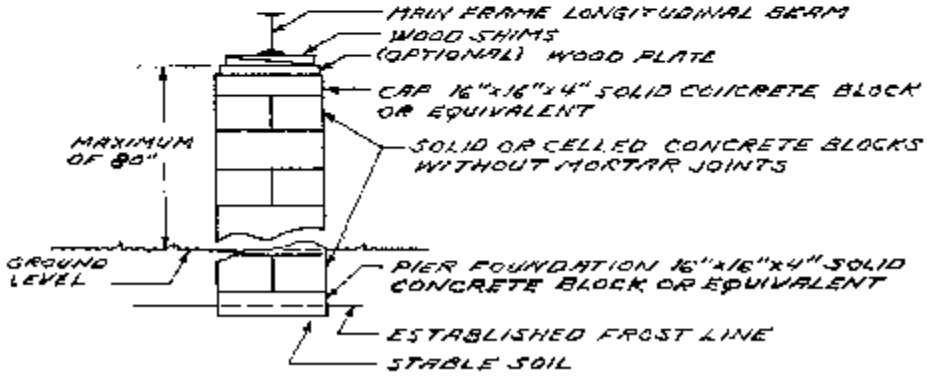

FIGURE 2 - PIERS OVER 40" IN HEIGHT AND NOT EXCEEDING 80" IN HEIGHT (DOUBLE BLOCK CONSTRUCTION)

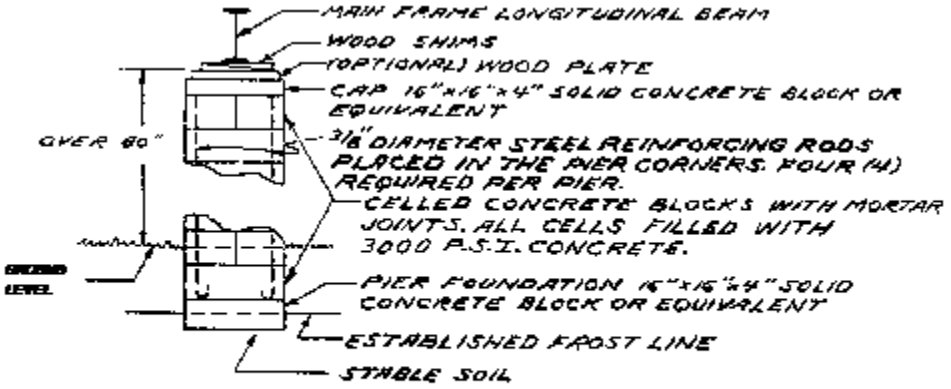

FIGURE 3 - PIERS OVER 80" IN HEIGHT (DOUBLE BLOCK CONSTRUCTION, STEEL REINFORCED)

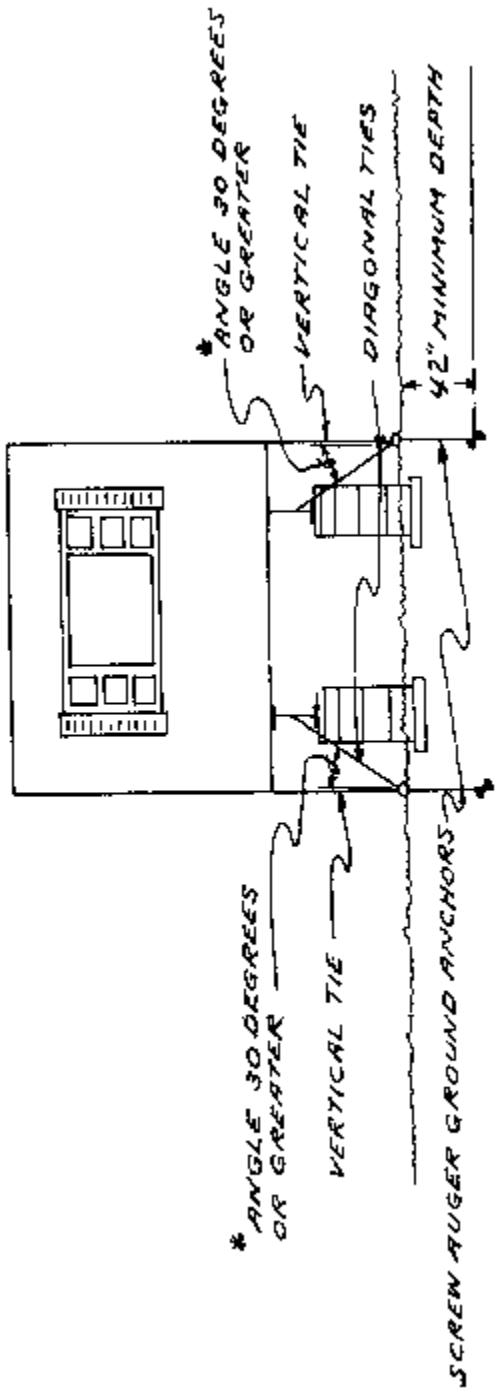
FIGURE 4

MOBILE HOME TIEDOWN



*DIAGONAL TIE SHALL DEVIATE FROM A VERTICAL DIRECTION 30 DEGREES OR MORE.

FIGURE 5

DOUBLE WIDE MOBILE HOME TIEDOWN

*DIAGONAL TIE SHALL DEVIATE FROM A VERTICAL DIRECTION 30 DEGREES OR MORE.

1 Inadvertently dropped out from 1/7/81 IAC Supplement replacement pages.

2 Effective date of IAB amendments to [O.P.P. 5.600 to 5.629] Division VI (16.600 to 16.629) delayed 70 days by the Administrative Rules Review Committee.

3 Effective date (1/1/89) of 16.120(2)[3802 “h” only] delayed until adjournment of the 1988 Session of the General Assembly by the Administrative Rules Review Committee at its December 13, 1988, meeting.

CHAPTER 322
STATE BUILDING CODE—MANUFACTURED HOUSING SUPPORT AND ANCHORAGE SYSTEMS

[Prior to 7/2/08, see rules 661—16.625(103A) and 661—16.626(103A)]
[Prior to 11/26/25, see Public Safety Department[661] Ch 322]

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/10/30

481—322.1 Reserved.

481—322.2(103A) Definitions. The definitions in 481—subrule 321.620(4) apply to this chapter.
[**ARC 9475C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—322.3 to **322.10** Reserved.

481—322.11(103A) Support and anchorage of manufactured homes.

322.11(1) *First time installation.* Manufactured homes shall be installed according to one of the following:

a. Homes manufactured prior to October 20, 2008, which are being installed for the first time will be installed with support and anchorage as recommended by the manufacturer and in accordance with federal manufactured home construction and safety standards, 24 CFR Section 3280.306(b), as published April 1, 2004; or

b. Homes manufactured on or after October 20, 2008, which are being installed for the first time shall be installed with support and anchorage as recommended by the manufacturer and in accordance with 24 CFR Part 3285, Model Manufactured Home Installation Standards, as published April 1, 2008; or

c. With a support and anchorage system that is designed by an Iowa-licensed professional engineer and that meets or exceeds the requirements of 24 CFR Part 3285 as published April 1, 2008; or

d. Homes installed in areas subject to a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6 may be installed in compliance with subrule 322.11(5).

322.11(2) *Reinstallation of homes.*

a. The provisions of this subrule apply only to homes that have been previously installed in the United States and are being reinstalled at either the same location or a different location.

b. The following definitions apply to this subrule.

"Frost-protected footing" or *"frost-free footing."* Foundation material installed to depth of 42 inches below finished grade.

"Ground anchor." A specific anchoring assembly device designed to transfer home anchoring loads to the ground.

"Pier." That portion of the support system between the footing and the manufactured home, exclusive of shims. Types of piers include but are not limited to manufactured steel stands, pressure-treated wood, manufactured concrete stands, concrete blocks, and portions of foundation walls.

"Pier footing." That portion of a support system that supports the piers or blocking, is sized to adequately support the weight of the home at that load point, and is capable of transferring all design loads to the ground.

"Support system." Pilings, columns, footings, piers, foundation walls, shims, and any combination thereof that, when properly installed, support the manufactured home.

c. Homes reinstalled pursuant to subrule 322.11(2) must meet the following mandatory minimum requirements:

(1) Above ground support systems must meet the manufacturer's specifications or the requirements of subrule 322.11(3).

(2) Ground anchors must meet the manufacturer's specifications or subrule 322.11(4). Engineered ground anchoring systems that do not extend to the frost line may be used only if they are approved by the commissioner.

NOTE 1: Pier footings may be placed below the frost line for reinstallation of homes.

NOTE 2: If the home is still under a manufacturer's warranty, the manufacturer's installation instructions should be followed or the warranty may be void.

d. Pursuant to 481—subrule 321.623(2), prior to the reinstallation of a manufactured home, the installer reinstalling the home or the installer hired to inspect the home that is being reinstalled by the owner shall complete the portion of the installation certificate relating to the installation of frost-protected footings. This portion of the certificate must state that the home is not being installed with frost-protected footings and be signed and witnessed by the installer and the owner. Upon completion of the reinstallation, the installer shall complete and submit the certificate to the commissioner as prescribed by 481—subrule 321.623(2).

NOTE: Iowa Code sections 335.30 and 414.28 have requirements that may affect the reinstallation of homes.

322.11(3) *Requirements for support system installations.*

a. Piers placed on foundations shall be installed and centered directly under the main frame longitudinal beams. The piers should not be farther apart than 10 feet on centers for manufactured homes 12 feet wide or less and not more than 8 feet on centers for manufactured homes over 12 feet wide to less than 16 feet wide and no more than 6 feet on centers for manufactured homes 16 feet wide or more. The main frame, front or back, should not extend farther than two feet beyond the centerline of the end piers.

NOTE: When making excavations for footings and piers on private property, installers shall take precautions to ensure that no telephone, electrical, plumbing or water lines are contacted. Utility line locations shall be verified with the property owner or property owner's representative.

b. Pier foundations shall be placed on level, undisturbed soil or on controlled fill that is free of grass and organic materials. A small amount of sand may be of use to provide a level surface. All pier foundations shall be set level and piers installed plumb. The pier foundation shall be at least a 16″ × 16″ × 4″ solid concrete pad, precast or poured in place, or other approved material. Two nominal 4″ × 8″ × 16″ solid concrete blocks may be used provided that the joint between the blocks is parallel to the main frame longitudinal beam. Concrete used in foundations shall have a 28-day compressive strength of not less than 3,000 pounds per square inch (3,000 psi).

c. Unless otherwise directed by the owner of the site, the soil-bearing capacity of the site may be assumed to be 2,000 pounds per square foot. The acceptable construction under this subrule is based upon a soil-bearing capacity of 2,000 pounds per square foot. Sites with less soil-bearing capacity will require increased-size footings.

Explanation: The permissible footing sizes and pier spacing are based upon a combined live and dead load of 65 pounds per square foot of unit. This assumes that the full snow and internal live load will not be present at the same time.

d. Piers may be constructed of concrete or undamaged nominal 8″ × 8″ × 16″ concrete blocks, open-celled or solid, placed on the pier foundation. All open-celled concrete block shall be installed with the cells of the block in a vertical position. Nominal 2″ × 8″ × 16″ or nominal 4″ × 8″ × 16″ solid concrete blocks may be utilized as needed to achieve the necessary heights of the piers for a particular installation. A nominal 2″ × 8″ × 16″ wood plate, or equivalent, shall be placed on top of each pier, unless there is at least 4 inches of solid block, with shims fitted and driven between the wood plate or solid block and the main frame longitudinal beam. The wood blocking shall not occupy more than a nominal two inches of vertical space, and shims shall not occupy more than one inch of vertical space. Shims that have a thickness of more than 3/8″ shall be hardwood.

(1) Piers up to 40 inches in height, except corner piers over three blocks high (a nominal 24″), may be of single-block construction and shall be installed transverse (right angle) to the main frame longitudinal beam.

(2) Piers over 40 inches in height but not exceeding 80 inches in height and corner piers over three blocks high shall be of double-block construction with every other course either parallel or transverse (right angle) to the main frame longitudinal beam and be capped with a nominal 16″ × 16″ × 4″ solid concrete block or equivalent. Wood blocking and hardwood shims shall be installed accordingly.

(3) Piers over 80 inches in height shall be of reinforced concrete or of double-block construction and installed exactly according to the procedure given in subparagraph (2) above. Only celled concrete blocks

shall be used (with open cells vertical) with 3/8″ diameter or larger steel reinforcing rods placed in the pier corners and all cells filled with 3,000 psi concrete. Wood blocking and shims shall be installed accordingly.

322.11(4) *Requirements for anchorage systems.* When instructions are not provided by the manufacturer, ties shall be attached vertically and diagonally to a system of ground anchors in a manner as illustrated in Figures 4 and 5. The minimum number of ties are listed in Table 6–A. There shall be a diagonal tie between the ground anchors and the unit at each vertical tie. Additional diagonal ties may be required between vertical ties. The ties shall be as evenly spaced as practicable along the length of the unit with not over eight feet open on each end.

a. Ties may be either steel cable, steel strapping, or other materials that meet the requirements of paragraph 322.11(4)*"f."* Ties are to be fastened to ground anchors and drawn tight with galvanized turnbuckles or yoke-type fasteners and tensioning devices. Turnbuckles shall be ended with jaws of forged or welded eyes (hook ends are not approved).

b. When continuous straps (over-the-top tie-downs) are provided as vertical ties, they should be positioned at rafters and studs to prevent structural damage. Where a vertical tie and diagonal tie are located at the same place, both ties may be connected to a single double-head ground anchor provided that the anchor used is capable of carrying the combined loads and is included on a list of approved products maintained by the commissioner.

c. Cable used for ties shall be either galvanized steel or stainless steel and have a breaking strength of at least 4,725 pounds. Cable should be either 7/32″ diameter or greater (7 × 7) steel cable or ¼″ diameter or greater (7 × 19) aircraft cable. All cable ends should be secured with at least two I-bolt-type cable clamps or other nationally approved fastening devices.

d. When flat steel straps are used as ties, they shall conform with 24 CFR Section 3285.402(c)(2). Steel strap ties shall terminate with D-rings, bolts, or other nationally approved fastening devices that will not cause distortion or reduce the breaking strength of the ties.

e. The direction of pull of the diagonal ties should be at a right angle to the main frame longitudinal beam. Connection of the diagonal tie to the main frame longitudinal beam should be in accordance with anchor system instructions for those fastening devices. When steel strap ties are used, care should be exercised that the minimum bending radius is adhered to so the breaking strength is not reduced.

f. Anchors and anchorage materials shall meet the following requirements:

(1) The anchorage materials shall be capable of resisting an allowable minimum working load of 3,150 pounds (pullout in a vertical direction) with no more than 2 percent elongation and withstanding a 50 percent overload. All anchorage materials shall be resistant to weathering deterioration at least equivalent to that provided by a coating of zinc on steel strapping of not less than 0.30 ounces per square foot surface coated. Anchors to reinforced concrete slab or to rock shall be of comparable strength as provided within this paragraph.

(2) Each ground anchor, when installed, shall be capable of resisting an allowable working load at least equal to 3,150 pounds in the direction of the ties plus a 50 percent overload (4,750 pounds total) without failure. Failure is considered to have occurred when the point of connection between the tie and anchor moves more than two inches at 4,750 pounds in the direction of the vertical tie when anchoring equipment is installed in accordance with the anchorage manufacturer's instructions. Those ground anchors that are designed to be installed so that the loads on the anchor are other than direct withdrawal shall be designed and installed to resist an applied design load of 3,150 pounds at 45° from horizontal without displacing the anchor more than four inches horizontally at the point where the tie attaches to the anchor.

(3) Anchors designed for connection of multiple ties shall be capable of resisting the combined working load and overload consistent with the intent expressed in this paragraph.

(4) Ground anchors shall be installed so that the load-carrying portion of the anchor in its final working position is below the frost depth (42 inches), and the anchor head shall be at ground level. Total anchor length shall be more than 42 inches as necessary.

NOTE: When installing ground anchors on private property, installers shall take precautions to ensure that no telephone, electrical, plumbing or water lines are contacted. Utility line locations shall be verified with the property owner or property owner's representative.

TABLE 6–A

MINIMUM NUMBER OF TIEDOWNS
REQUIRED FOR SINGLEWIDE MOBILE HOMES

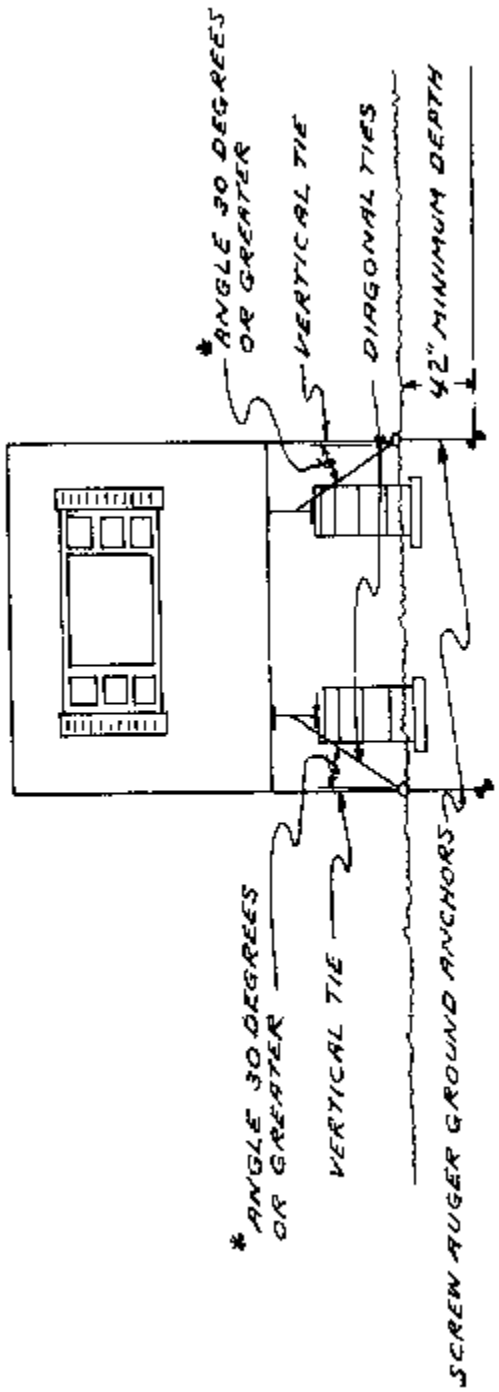
MOBILE HOME BOX LENGTH NOT EXCEEDING	MINIMUM NUMBER OF TIEDOWNS PER SIDE	
	DIAGONAL TIES	VERTICAL TIES*
40′–0″	3	2
54′–0″	3	2
73′–0″	4	2
84′–0″	5	2

*If more than the minimum number of vertical or diagonal ties have been supplied, they shall all be used.

1. Doublewide mobile homes shall comply with Table 6–A except that no vertical ties are required.
2. Wherever a vertical tie and a diagonal tie lie in a plane that is vertical and transverse to the main longitudinal beam, both ties may be connected to the same ground anchor, providing that the particular anchor withstands both loadings.
3. This table shall be used only if there are no manufacturer’s approved installation requirements.

FIGURE 4

MOBILE HOME TIEDOWN

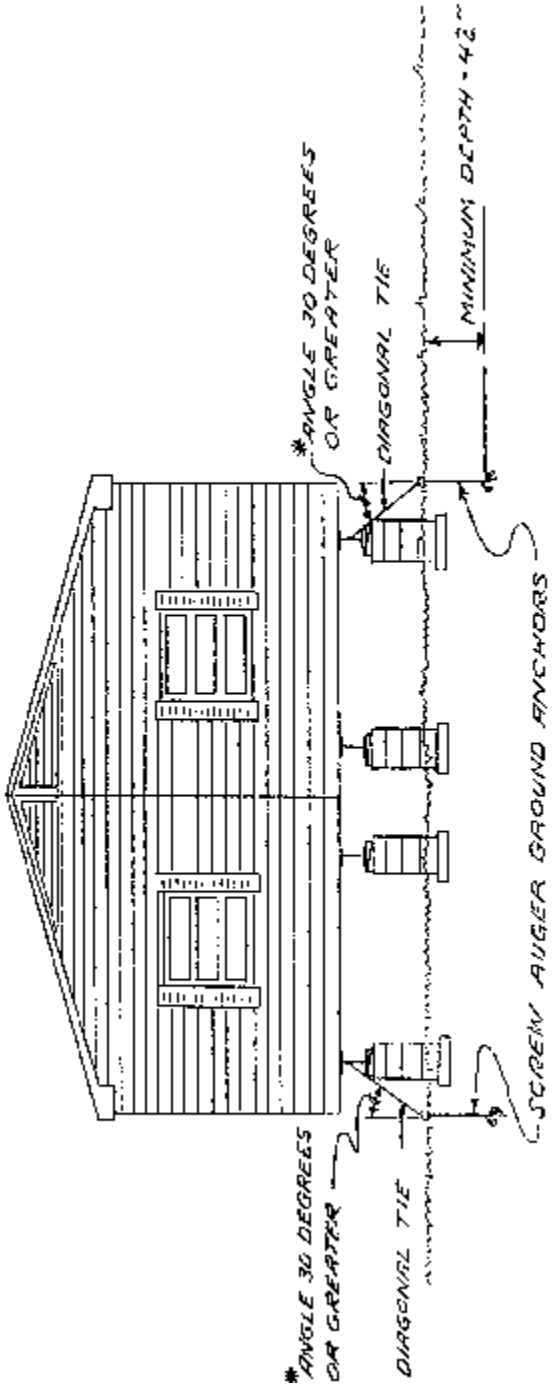


*DIAGONAL TIE SHALL DEVIATE FROM A VERTICAL DIRECTION 30 DEGREES OR MORE.

FIGURE 5

DOUBLE WIDE MOBILE HOME TIEDOWN

*DIAGONAL TIE SHALL DEVIATE FROM A VERTICAL DIRECTION 30 DEGREES OR MORE.



322.11(5) *Installations in disaster emergency areas.* In an area subject to a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6, a manufactured home may be installed without a permanent support system provided that all of the following apply:

a. The installation complies with anchorage and aboveground support requirements specified by the manufacturer or subrule 322.11(4) as applicable;

b. A government agency or a third-party contractor is contractually obligated to regularly inspect the home while it is occupied and to loosen the ties or straps used in the anchoring system as needed between November 15 of each year and April 15 of the following year, in order to prevent frost heave from affecting

the home, and to retighten the ties or straps on or after April 15 and prior to May 15 of the following year; and

c. The home shall be vacated within 18 months after installation without a support system that is fully compliant with subrules 322.11(1), 322.11(2), 322.11(3) and 322.11(4). A home installed in compliance with this subrule may continue to be occupied if it has been reinstalled in compliance with the provisions of this rule that would apply in the absence of a proclaimed disaster emergency.

[**ARC 9475C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—322.12(103A) Suspension of installation requirements in proclaimed disaster emergencies. The commissioner may suspend any requirement established in this chapter or 481—Chapter 321 for the installation of manufactured homes, provided that all of the following apply:

322.12(1) The installation is within an area that is currently subject to a disaster emergency proclamation issued by the governor.

322.12(2) The commissioner finds that suspension of the requirement or requirements presents no imminent threat to the health or safety of any individual and specifically of any person who may occupy a manufactured home installed while the suspension is in effect.

322.12(3) Any manufactured home whose installation is subject to a suspension of any requirement shall be occupied only for the duration of the disaster emergency proclamation and for no more than 180 days after the expiration of the proclamation, or for a shorter time specified by the commissioner, unless the home has been installed or reinstalled in compliance with all requirements of this chapter and 481—Chapter 321 prior to the expiration of the period specified for suspension of the requirements.

[**ARC 9475C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

481—322.13 to **322.19** Reserved.

481—322.20(103A) Fees.

322.20(1) All remittances of fees shall be made by check or money order payable to Iowa Department of Inspections, Appeals, and Licensing—Building Code Bureau and remitted to the Building Code Bureau, Iowa Department of Inspections, Appeals, and Licensing, 6200 Park Avenue, Des Moines, Iowa 50321.

322.20(2) The following table sets out the fee schedule for the manufactured home program.

Installation Seal	$25
Installation Seal Replacement	$10
Verification Inspections Requested by Installer or Owner	No Charge
Ground Support and Anchoring System Approval	$100

[**ARC 9475C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

These rules are intended to implement Iowa Code sections 103A.7 and 103A.9.

CHAPTER 323
TEMPORARY EMERGENCY USE OF FACTORY-BUILT STRUCTURES—COMMERCIAL USE

[Prior to 11/26/25, see Public Safety Department[661] Ch 323]

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/10/30

481—323.1(103A) Temporary factory-built structures for commercial use. A factory-built structure, as defined in Iowa Code section 103A.3, may be installed and used as a temporary location for a business or commercial operation, provided that all of the following apply:

323.1(1) The installation is in an area currently subject to a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6.

EXCEPTION: If outside any area covered by a current disaster emergency proclamation, the installation is approved in writing by the building code commissioner provided that all of the other requirements of this rule are met.

323.1(2) The structure was manufactured to be installed without a permanent foundation.

323.1(3) The installation fully complies with all applicable installation requirements established by the manufacturer.

EXCEPTION: If specifications provided by the manufacturer provide for the use of both a support system and an anchoring system, a structure may be installed without a permanent support system, provided that an anchoring system is installed in compliance with specifications provided by the manufacturer and the owner or occupant ensures that straps or ties are loosened to prevent the structure from suffering damage from frost heave as needed between November 15 of any year during which it is in use and April 15 of the following year and retightened on or after April 15 and no later than May 15 of the following year.

323.1(4) The owner ensures full compliance with all maintenance requirements established by the manufacturer.

323.1(5) The structure complies with other applicable codes for the use of the structure, except that a structure installed in compliance with this rule is not required to display an Iowa seal as otherwise required by 481—subrules 321.610(21), 321.610(22), and 321.610(24).

323.1(6) The structure is not used as a private residence. More information on manufactured homes is available in 481—subrule 322.11(5).

323.1(7) The structure is vacated within 18 months of installation.

323.1(8) No portion of the structure is used as an educational occupancy unless written permission for such use has been issued by the fire control bureau and the building code commissioner.

323.1(9) No portion of the structure is used as a health care facility unless written permission for such use has been issued by the fire control bureau and the building code commissioner.

This rule is intended to implement Iowa Code sections 103A.7 and 103A.9.

[**ARC 9476C**, IAB 8/6/25, effective 9/10/25; Editorial change: IAC Supplement 11/26/25]

[Editorial change: IAC Supplement 11/26/25]

CHAPTER 324
MANUFACTURED OR MOBILE HOME RETAILERS, MANUFACTURERS, AND DISTRIBUTORS

[Prior to 11/26/25, see Public Safety Department[661] Ch 372]

Chapter rescission date pursuant to Iowa Code section 17A.7: 1/1/28

481—324.1(103A) Definitions. The definitions in 2006 Iowa Acts, Senate File 2394, section 1, are made part of this chapter. In addition, the following words and phrases when used in this chapter shall have these meanings respectively ascribed to them, except when the context otherwise requires.

"Bureau" means the Building Code Bureau, Fire Marshal Division, Iowa Department of Public Safety, State Public Safety Headquarters Building, 215 East 7th Street, Des Moines, Iowa 50319.

"Certificate of title" means a document issued by the appropriate official which contains a statement of the owner's title, the name and address of the owner, a description of the vehicle, a statement of all security interests and additional information required under the laws or rules of the jurisdiction in which the document was issued, and which is recognized as a matter of law as a document evidencing ownership of the vehicle described. The terms "title certificate," "title only," and "title" are synonymous with the term "certificate of title."

"Commissioner" means the building code commissioner.

"Department" means the Iowa department of public safety.

"Manufacturer's certificate of origin" means a certification signed by the manufacturer or importer that the manufactured or mobile home described has been transferred to the person or retailer named and that the transfer is the first transfer of the manufactured or mobile home in ordinary trade and commerce. The description shall include the make, model year, vehicle identification number, and other information which may be required by statute or rule. The terms "manufacturer's statement," "importer's statement or certificate," "MSO" and "MCO" are synonymous with the term "manufacturer's certificate of origin."

"Model year" means the year of original manufacture or the year certified by the manufacturer.

[Editorial change: IAC Supplement 6/17/09; Editorial change: IAC Supplement 11/26/25]

481—324.2(103A) Criteria for obtaining a manufactured or mobile home retailer's license.

324.2(1) *Licensing information.* Information concerning license requirements may be obtained from the Building Code Bureau, Fire Marshal Division, Iowa Department of Public Safety, State Public Safety Headquarters Building, 215 East 7th Street, Des Moines, Iowa 50319.

324.2(2) *Application.* A manufactured or mobile home retailer shall file a completed application form at least 30 days prior to the expiration of a current license or, if the application is for an initial license, 30 days prior to the date on which the retailer anticipates doing business. A retailer may not operate without a current license.

324.2(3) *Expiration.* Each license expires on January 1 of the calendar year following the year in which the license is issued, except that a license issued in December of any year shall cover the following calendar year.

324.2(4) *Fees.* The license fee established by statute is $100 annually or for any portion of a year, except that a license issued in December of any year is valid for the following calendar year and any retailer with a license valid for a particular calendar year may continue to operate under that license until the end of January of the following calendar year.

324.2(5) *Surety bond.* The applicant shall obtain a surety bond in the amount of $50,000. The original bond shall be filed with the department. The bond shall provide for a 30-day notice to the bureau, prior to cancellation. The bureau shall notify the bonding company of any violations of Iowa Code chapter 103A or these rules by the license holder. The bureau shall notify the retailer by mail or personal service that the retailer's license shall be revoked the same date the bond is canceled unless the bond is reinstated or a new bond is filed.

324.2(6) *Place of business.* The applicant shall maintain a place of business at a designated location. A manufactured or mobile home may be used as an office if the home's taxes are current. The place of business shall include telephone service and an office area in which are kept the business

records, manufacturer's certificates of origin, certificates of title or other evidence of ownership of each manufactured or mobile home offered for sale.

324.2(7) *Separate place of business.* A separate retailer's license shall be obtained for each county in which the applicant maintains a place of business.

[Editorial change: IAC Supplement 6/17/09; Editorial change: IAC Supplement 11/26/25]

481—324.3(103A) Operation under distinct name. A manufactured or mobile home retailer shall not represent or advertise the business under any name other than the name that appears on the retailer's license.

[Editorial change: IAC Supplement 11/26/25]

481—324.4(103A) Supplemental statements. A manufactured or mobile home retailer shall file with the commissioner a written statement upon change of name or change of location of the retailer's place of business. The written statement shall be filed within ten days of the change with a fee of $100 in payment for a new license reflecting the change.

[Editorial change: IAC Supplement 11/26/25]

481—324.5(103A) Denial, suspension, or revocation—civil penalties.

324.5(1) The commissioner may deny the issuance or renewal of a license if the applicant has committed any violation of any provision of law applicable to the operation of a business required to be licensed pursuant to this chapter.

324.5(2) The commissioner may suspend or revoke a license for any violation of this chapter or of any other provision of law applicable to the operation of a business required to be licensed pursuant to this chapter.

324.5(3) The commissioner may impose a civil penalty for any violation of this chapter or of Iowa Code chapter 103A relating to the manufacture of a manufactured or mobile home. A civil penalty may be imposed in addition to a denial of the issuance or renewal of a license, a suspension of a license, or a revocation of a license. A civil penalty shall not be imposed in lieu of a denial of the issuance or renewal of a license or of a revocation of a license. A civil penalty shall not exceed $1,000 for each offense. Each violation involving a separate manufactured or mobile home, or a separate failure or refusal to allow an act to be performed or to perform an act as required by this chapter or Iowa Code chapter 103A, constitutes a separate offense. However, the maximum amount of civil penalties which may be assessed for any series of violations occurring within one year from the date of the first violation shall not exceed $1 million.

324.5(4) Suspension or revocation for nonpayment of child support. The following procedures shall apply to actions taken by the building code commissioner on a certificate of noncompliance received from the Iowa department of human services pursuant to Iowa Code chapter 252J:

a. The notice required by Iowa Code section 252J.8 shall be served upon the licensee by restricted certified mail, return receipt requested, or personal service in accordance with Iowa Rule of Civil Procedure 1.305. Alternatively, the licensee may accept service personally or through authorized counsel.

b. The effective date of revocation or suspension of certification of a licensee, as specified in the notice required by Iowa Code section 252J.8, shall be 60 days following service upon the licensee.

c. Licensees shall keep the building code commissioner informed of all court actions and all child support recovery unit actions taken under or in connection with Iowa Code chapter 252J and shall provide the building code commissioner with copies, within 7 days of filing or issuance, of all applications filed with the district court pursuant to Iowa Code section 252J.9, all court orders entered in such actions, and withdrawals of certificates of noncompliance by the child support recovery unit.

d. All applicable fees for an application or reinstatement must be paid by the licensee before a license will be issued, renewed, or reinstated after the building code commissioner has denied the issuance or renewal of a license or has suspended or revoked a license pursuant to Iowa Code chapter 252J.

e. In the event a licensee files a timely district court action following service of a notice pursuant to Iowa Code sections 252J.8 and 252J.9, the building code commissioner shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the department to proceed. For the purpose of determining the effective date of

revocation or suspension of the certification, the building code commissioner shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

f. Suspensions or revocations imposed pursuant to this subrule may not be appealed administratively within the department of public safety.

NOTE: The procedures established in subrule 324.5(4) implement the requirements of Iowa Code chapter 252J. The provisions of Iowa Code chapter 252J establish mandatory requirements for an agency which administers a licensure program, such as the one established in this chapter, and provide that actions brought under these provisions are not subject to contested case procedures established in Iowa Code chapter 17A, but must be appealed directly to district court.

324.5(5) Appeals. Any denial, suspension, or revocation of a certification, or any civil penalty imposed upon a licensee under this rule, other than one imposed pursuant to subrule 372.5(4), may be appealed by the licensee within 14 days of receipt of the notice. Appeals of actions taken by the building code commissioner under this rule shall be to the commissioner of public safety and shall be treated as contested cases, following the procedures established in 7—Chapter 2506.

[Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

481—324.6(103A,321) Sale or transfer of manufactured or mobile homes. The following criteria apply to the sale or transfer of manufactured or mobile homes.

324.6(1) *Retailer sales.*

a. A manufactured home, which was manufactured on or after June 15, 1976, and which is owned by a retailer, shall not be offered for sale unless the retailer has a properly assigned manufacturer's certificate of origin or a certificate of title, a seal from the United States Department of Housing and Urban Development properly attached, a data plate attached by the manufacturer, and a manufacturer's installation manual for the home, if the manual is available to the retailer. A retailer shall not sell a manufactured or mobile home owned by the retailer without delivering to the transferee a manufacturer's certificate of origin or a certificate of title duly assigned to the transferee.

b. A used manufactured or mobile home with an Iowa title assigned to the retailer shall not be reassigned by the retailer. After acquiring the used home, the retailer shall obtain a new certificate of title as required by law.

324.6(2) *Transfers.* A manufactured or mobile home not owned by a retailer may be offered for sale and sold by a retailer under the following conditions:

a. The manufactured or mobile home owner and retailer shall enter into a written listing agreement, signed by the owner or by one owner of a manufactured or mobile home owned jointly by more than one person, and signed by the retailer, which shall be dated and include the following provisions:

(1) The make, model year, and vehicle identification number.

(2) The period of time that the agreement shall remain in force.

(3) The commission or other remuneration that the retailer is entitled to receive.

(4) The price for which the manufactured or mobile home shall be sold.

(5) The name and address of the secured party, if the manufactured or mobile home is subject to a security interest.

(6) Any additional terms to which the owner(s) and retailer agree.

b. If current taxes have not been paid, the taxes and penalties shall be paid from the proceeds of the sale.

c. The retailer shall inform a prospective purchaser of a manufactured or mobile home that the home is not owned by the retailer and, if requested by a prospective purchaser, provide the name and address of the owner(s).

d. An offer to purchase a manufactured or mobile home shall be in writing.

e. The retailer shall make a written disclosure to the purchaser of the description of the manufactured or mobile home; the name and address of the owner; if the home is subject to a security interest, the name and address of the secured party; and, if the current taxes have not been paid, the amount of taxes and penalties due. The disclosure statement shall be signed and dated by the transferee. The disclosure statement shall be in duplicate. The original shall be given to the transferee and the duplicate retained by the retailer, at the retailer's principal place of business, for a period of three years.

f. The documents required pursuant to this subrule shall be made available to the commissioner or any designee of the commissioner for inspection upon request.
[Editorial change: IAC Supplement 11/26/25]

481—324.7(103A) Right of inspection. The commissioner or any designee of the commissioner shall have the authority to inspect manufactured or mobile homes, business records, manufacturer's certificates of origin, certificates of title or other evidence of ownership of each manufactured or mobile home offered for sale.
[Editorial change: IAC Supplement 11/26/25]

481—324.8(103A) Criteria for obtaining a manufactured or mobile home manufacturer's or distributor's license. Information concerning license requirements may be obtained from the Building Code Bureau, Building and Construction Division, Iowa Department of Inspections, Appeals, and Licensing, 6200 Park Avenue, Suite 100, Des Moines, Iowa 50321.

324.8(1) *Application.* A manufactured or mobile home manufacturer or distributor shall file a completed application form at least 30 days prior to the expiration of a current license, or if the application is for an initial license, 30 days prior to the date on which the manufacturer or distributor anticipates doing business. A manufacturer or distributor may not operate without a current license.

324.8(2) *Expiration.* Each license expires on January 1 of the calendar year following the year in which it is issued, except that a license issued in December of any year shall cover the following calendar year.

324.8(3) *Fees.* The license fee established by statute is $100 annually or for any portion of a year, except that a license issued in December of any year is valid for the following calendar year and any manufacturer or distributor with a license valid for a particular calendar year may continue to operate under that license until the end of January of the following calendar year.

324.8(4) *Notification.* Manufactured or mobile home manufacturers and distributors shall, within ten days of the fact, notify the bureau in writing of:

a. Any change in the name, method of doing business or location of the place of business as shown on the license and shall include a fee of $100 in payment of a new license reflecting the change. However, a change in the location of the place of business when the original location is in an area subject to a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6 and when the relocation results from flooding, storm damage, or other conditions which form a basis for issuance of the disaster emergency proclamation shall not require the issuance of a new license. In these circumstances, an amended license shall be furnished to the licensee at no charge to the licensee.

b. Issuance of a contract with a person in this state to sell new manufactured or mobile homes at retail.

c. Any change in the trade names of manufactured or mobile homes being manufactured for delivery in this state.

324.8(5) *Required acts.* Manufactured or mobile home manufacturers and distributors shall furnish sample manufacturer's certificates of origin to the commissioner for each make of manufactured or mobile home assembled by the manufacturer for delivery in this state.
[Editorial change: IAC Supplement 6/17/09; Editorial change: IAC Supplement 11/26/25]

481—324.9(17A,103A) Waivers. Applications for waivers of the provisions of the rules in this chapter may be submitted and shall be considered under the procedures and criteria established in 481—Chapter 6, except for the following:

1. Petitions for waivers shall be addressed to:
Building Code Commissioner
Building Code Bureau
Building and Construction Division
Iowa Department of Inspections, Appeals, and Licensing
6200 Park Avenue, Suite 100
Des Moines, Iowa 50321

2. Consideration of and determinations regarding requests for waivers of any provision of this chapter shall be the responsibility of the building code commissioner. Any reference to "department" in 7—Chapter 2504 shall be replaced, for purposes of this rule, with "building code commissioner."

[Editorial change: IAC Supplement 6/17/09; Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapter 103A as amended by 2006 Iowa Acts, Senate File 2394.

CHAPTER 325
MANUFACTURED HOUSING INSTALLER CERTIFICATION

[Prior to 7/2/08, see rule 661—16.622(103A)]
[Prior to 11/26/25, see Public Safety Department[661] Ch 374]

Chapter rescission date pursuant to Iowa Code section 17A.7: 1/1/28

481—325.1(103A) Certification program. There is established in the building code bureau of the fire marshal division a manufactured housing installer certification program. The program may be contacted by email at buildingcode@dia.iowa.gov, by telephone at 515.725.6145, or by mail at the following address:

Manufactured Housing Installer Certification Program
Building Code Bureau
Building and Construction Division
Iowa Department of Inspections, Appeals, and Licensing
6200 Park Avenue, Suite 100
Des Moines, Iowa 50321

[Editorial change: IAC Supplement 11/26/25]

481—325.2(103A) Certified installer required. There shall be at least one person certified as a manufactured housing installer present at the installation of any manufactured home in Iowa. The installation of a manufactured home shall be under the direct supervision of a certified manufactured housing installer, who shall be present at all times at the installation site while any installation work is proceeding.

EXCEPTION: Installation of a manufactured home may be completed by the owner of the home, if the home is the primary residence of the person completing the work, whether or not the person is certified as a manufactured housing installer, provided that the work is inspected as required and that a state-certified installer certifies compliance with appropriate provisions of this chapter, 481—Chapter 321, and 481—Chapter 322.

[Editorial change: IAC Supplement 11/26/25]

481—325.3(103A) Requirements for installer certification. An applicant for certification must meet all of the following requirements:

325.3(1) The applicant must be at least 18 years old.

325.3(2) The applicant must have a minimum of one year of experience in the installation, construction or inspection of manufactured homes. Proof of experience shall be submitted on a notarized affidavit submitted with the application to the commissioner.

325.3(3) The applicant must successfully complete a minimum of eight hours of training approved by the commissioner. Training shall be based on the manufactured housing installation standards published by the U.S. Department of Housing and Urban Development and material approved by the commissioner.

325.3(4) The applicant must have received a passing grade on an examination approved by the commissioner.

[Editorial change: IAC Supplement 11/26/25]

481—325.4(103A) Certification fee. The certification fee shall be $300, payable at the time of application, and shall cover certification for three years. Fees shall be remitted in the form of a check or money order, payable to the Iowa Department of Public Safety – Building Code Bureau. The following should be written in the memo portion of the check: "Manufactured Housing Installer Certification." Applications and fees received after July 1 of any year will cover the remainder of the fiscal year in which they are received and the following two state fiscal years. Applications and fees received prior to July 1 of any year shall cover the period through June 30 of the third year following.

Exception:

If as of June 1, 2009, statutory language regarding fees collected for certification and recertification of manufactured housing installers does not clearly provide that any such fees collected are exempt from

reversion to the state treasury pursuant to Iowa Code section 8.33, then all current certificate holders who paid the $300 fee shall have $200 of the fee refunded.
[Editorial change: IAC Supplement 11/26/25]

481—325.5(103A) Certification period. Installer certifications and recertifications shall be issued for three years and shall expire on June 30 of the third year of the certification period. Certifications and recertifications issued after July 1 shall cover the remainder of the fiscal year in which they are issued and the following two state fiscal years.
Exception:
If as of June 1, 2009, statutory language regarding fees collected for certification and recertification of manufactured housing installers does not clearly provide that any such fees collected are exempt from reversion to the state treasury pursuant to Iowa Code section 8.33, then all current certificates shall be modified to expire after one year rather than three years from their effective dates.
[Editorial change: IAC Supplement 11/26/25]

481—325.6(103A) Review of application for certification. Upon receipt of an application for certification or recertification, staff of the building code bureau shall review the application and recommend approval or denial to the building code commissioner. If an application is approved, the certificate shall be issued to the applicant. If an application is denied, the applicant shall be notified and given an explanation of the reason or reasons for denial. Denials of applications by the building code commissioner may be appealed according to the contested case provisions of 7—Chapter 2506. An appeal may be filed as a request for contested case proceeding as provided in rule 7—2506.4(17A). An appeal must be filed within 30 days of the date of the denial.
[Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

481—325.7(103A) Certification renewal and continuing education.

325.7(1) A certification may be renewed if the installer applying for recertification has completed 12 hours of continuing education, approved by the commissioner, during the three-year certification period. Such training shall be submitted to the commissioner for review and approval prior to the date the training is received. Requests for approval shall be submitted on a form supplied by the commissioner, with supporting documentation.

325.7(2) Any installer who has not been recertified by the expiration date of the installer's certification shall not be allowed to work as an installer until a valid certification is obtained.

325.7(3) Failure to renew a certification within 60 days of its expiration shall require successful completion of an approved examination.

325.7(4) The recertification fee shall be $300, payable at the time of application. Fees shall be remitted in the form of a check or money order, payable to the Iowa Department of Public Safety – Building Code Bureau. The following shall be written in the memo portion of the check: "Manufactured Housing Installer Certification." Applications and fees received after July 1 shall cover the remainder of the fiscal year in which they are received and the following two years.
[Editorial change: IAC Supplement 11/26/25]

481—325.8(103A) Suspension or revocation of certification. An installer certification may be suspended or revoked for cause pursuant to a recommendation by the staff of the building code bureau to the building code commissioner. Suspension or revocation of an installer certification may be appealed subject to the provisions of 7—Chapter 2506 for contested case proceedings. An appeal may be filed as a request for contested case proceeding as provided in rule 7—2506.4(17A). An appeal must be filed within 30 days of the date of the suspension or revocation.
[Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

481—325.9(103A) Civil penalties. In addition to possible suspension or revocation of a certification, a person who violates the rules governing manufactured housing installation may be subject to civil penalties. Civil penalties may be assessed by the building code commissioner based on recommendation from staff of the building code bureau. Assessments of civil penalties may be appealed subject to the

provisions of 7—Chapter 2506 for contested case proceedings. An appeal may be filed as a request for contested case proceeding as provided in rule 7—2506.4(17A). An appeal must be filed within 30 days of the date of the assessment of the civil penalty.
[Editorial change: IAC Supplement 11/26/25; Editorial change: IAC Supplement 8/5/26]

481—325.10(103A) Inspections.

325.10(1) The installation of any manufactured home as defined in Iowa Code section 103A.51 shall be subject to inspection by a representative of the building code bureau.

325.10(2) Any person planning to install a manufactured home shall notify the building code bureau of the person's intent to install a home at least three business days prior to the date of installation.

325.10(3) A manufactured home shall not be occupied until approval has been given by the building code bureau. If the inspection of the home is not completed within the three-business-day notification period, approval may be given by the building code bureau to proceed with the installation.
[Editorial change: IAC Supplement 11/26/25]

481—325.11(103A) Temporary certification during proclaimed disaster emergencies. The commissioner may issue a temporary certification which shall be valid for a period of 90 days only, for use only in areas which are currently subject to a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6. The fee for a temporary emergency certification shall be $50. The following conditions must be met in order for a certification to be issued.

325.11(1) The applicant must be at least 18 years old.

325.11(2) The applicant must have general and complete operations liability insurance in the amount of at least $1 million for all work performed that requires certification pursuant to this chapter.

a. The carrier of any insurance coverage maintained by a certificate holder to meet this requirement shall notify the board 30 days prior to the effective date of cancellation or reduction of the coverage.

b. The certificate holder shall cease operation immediately if the insurance coverage required by this subrule is no longer in force and other insurance coverage meeting the requirements of this subrule is not in force. A certificate holder shall not initiate any installation work which cannot reasonably be expected to be completed prior to the effective date of the cancellation of the insurance coverage required by this subrule and of which the certificate holder has received notice, unless new insurance coverage meeting the requirements of this subrule has been obtained and will be in force upon cancellation of the prior coverage.

325.11(3) The applicant shall submit a completed application form to the certification program as specified in rule 481—325.1(103A), accompanied by a cover letter stating that the applicant is seeking temporary emergency certification and the applicant is certified or licensed to install manufactured homes in another state or states, and proof of insurance as required by subrule 325.11(2). The other state or states in which the applicant is certified or licensed shall be specified in the letter.

325.11(4) The application shall be accompanied by a check or money order for $50 to cover the certification fee. This fee is nonrefundable. The check or money order shall be made out to "Iowa Department of Public Safety," and the memo portion of the check or money order shall say "Manufactured Housing Installer Certification."

325.11(5) The application shall be accompanied by a copy of each license or certificate from other states cited in the letter required by subrule 325.11(1). The copy shall clearly display the name of the applicant and any unique identifying number assigned to the certificate or license.

325.11(6) A temporary emergency certificate may be renewed once, and the renewal certification shall be valid for 90 days beyond the expiration of the original temporary emergency certificate. The renewal application shall comply with subrules 325.11(1), 325.11(2), and 325.11(3). If a renewal application is received for a holder of a temporary emergency certificate which has previously been renewed once, the application shall be denied.

325.11(7) A holder of a temporary emergency certificate may apply at any time for a regular certificate issued pursuant to rules 481—325.2(103A) through 481—325.4(103A) by complying with all of the provisions of those rules.

325.11(8) A temporary emergency certificate may be suspended or revoked pursuant to rule 481—325.8(103A) or if the certificate holder fails to maintain compliance with any provision of this rule.

325.11(9) A decision to deny, suspend, or revoke a temporary emergency certificate may be appealed as provided in rule 481—325.8(103A).

[Editorial change: IAC Supplement 11/26/25]

These rules are intended to implement Iowa Code section 103A.59.

CHAPTERS 326 to 364
Reserved

ELEVATOR SAFETY BOARD

CHAPTER 365
ELEVATOR SAFETY BOARD ADMINISTRATIVE AND REGULATORY AUTHORITY

[Prior to 7/9/25, see Labor Services Division[875] Ch 65]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—365.1(89A) Definitions. The definitions contained in this rule apply to 481—Chapters 365 through 373.

"Board" means the elevator safety board.

"Board office" means the offices of the department of inspections, appeals, and licensing.

"Conveyance" means an elevator, construction personnel hoist, dumbwaiter, escalator, moving walk, lift or inclined or vertical wheelchair lift subject to regulation under Iowa Code chapter 89A and includes hoistways, rails, guides, and all other related mechanical and electrical equipment.

"Department" means the department of inspections, appeals, and licensing.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

[**ARC 8771C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—365.2(89A) Authority of the board. The authority and responsibilities of the board include but are not limited to:

365.2(1) Adopting rules necessary to protect public health, safety and welfare and to administer the duties of the board.

365.2(2) Hearing and deciding appeals concerning inspection reports that relate to the installation, alteration, operation, and maintenance of conveyances in the state.

365.2(3) Hearing and deciding appeals concerning actions by the director to deny, suspend or revoke operating permits.

365.2(4) Establishing fees.

365.2(5) Establishing committees of the board.

[**ARC 8771C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—365.3(21,89A) Board officers. The board shall elect a chairperson, vice chairperson, and secretary from its membership at the first meeting after July 1 of each year. Neither the director nor the director's designee may serve as chairperson. The chairperson presides at meetings, appoints members and chairpersons of committees, and performs all duties and exercises all powers of the chairperson. The vice chairperson, in the absence or incapacity of the chairperson, performs all duties and exercises all powers of the chairperson.

[**ARC 8771C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—365.4(21,89A) Public meetings.

365.4(1) The board shall hold at least one meeting each calendar quarter.

365.4(2) Board meetings are governed in accordance with Iowa Code chapter 21 and conducted in accordance with Robert's Rules of Order.

365.4(3) The chairperson or the chairperson's designee prepares the agenda listing all matters to be discussed at the meeting.

365.4(4) A majority of the members of the board constitutes a quorum, and all final motions and actions must receive a majority of a quorum vote.

365.4(5) Members of the public may be present during board meetings unless the board votes to hold a closed session in accordance with Iowa Code chapter 21. The dates and locations of board meetings may be obtained from the board's website or the board office.

365.4(6) At every regularly scheduled board meeting, time will be designated for public comment. During the public comment period, any person may speak for up to two minutes. Requests to speak for two

minutes per person when a particular topic comes before the board may be granted at the discretion of the chairperson. The chairperson may limit total public comment time to ten minutes.

365.4(7) The person presiding at a meeting of the board may exclude a person from an open meeting for behavior that obstructs the meeting.

365.4(8) Cameras and recording devices may be used at open meetings provided the cameras and recording devices do not obstruct the meeting. If the user of a camera or recording device obstructs the meeting by the use of such device, the person presiding at the meeting may request the user to discontinue use of the camera or device.

[**ARC 8771C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—365.5(17A,89A) Procedures for waivers in addition to 7—Chapter 2504.

365.5(1) *Filing petition.* A petition is deemed filed when it is received in the board's office. The petition shall include the state identification number of the conveyance and the age of the conveyance. A petition should be sent to the Elevator Safety Board, Department of Inspections, Appeals, and Licensing, 6200 Park Avenue, Suite 100, Des Moines, Iowa 50321. The petitioner shall submit the petition and all related materials for consideration at least three weeks prior to a scheduled board meeting for board review of the petition at the meeting.

365.5(2) *Waiver form.* Waiver applicants shall use the board's petition for waiver form. The board may request additional information from the petitioner.

365.5(3) *Posting of orders granting waivers.* The order or a copy of the order granting a waiver shall be conspicuously and permanently posted in the machine room corresponding to the conveyance. The order or a copy of the order granting a waiver that relates to a conveyance that does not have a machine room shall be posted in a protective sleeve attached to the inside of the controller cabinet door corresponding to the conveyance.

365.5(4) *Violations.* Violation of a condition in a waiver order will be treated as a violation of the particular rule for which the waiver was granted. As a result, the recipient of a waiver under this rule who violates a condition of the waiver may be subject to the same remedies or penalties as a person who violates the rule at issue.

[**ARC 0372D**, IAB 6/24/26, effective 5/29/26]

481—365.6(17A,89A) Procedures for contested cases in addition to 7—Chapter 2506.

365.6(1) *Reconsideration of inspection report.* The owner or operator of a piece of equipment subject to a written inspection report may petition the director for reconsideration of the report within 30 days of the issuance of the report. Failure to seek timely reconsideration of the inspection report is a waiver of all appeal rights. The burden of demonstrating compliance with all applicable statutory provisions, administrative rules, and codes adopted by reference rests upon the petitioning owner or operator.

a. A petition for reconsideration shall be in writing and must be signed by the requesting party or a representative of that party. The required form for a petition for reconsideration is available on the board's website. A petition for reconsideration specifies:

(1) The party seeking reconsideration, including mailing address and telephone number;
(2) The location of the equipment subject to the challenged inspection report;
(3) The inspection date;
(4) The inspector who issued the challenged inspection report;
(5) The specific findings or conclusions to which exception is taken;
(6) The relief sought.

b. A copy of the challenged inspection report shall be attached to the petition for reconsideration. The petitioning party shall also include all relevant documents that the petitioning party desires the director to consider when evaluating the petition.

c. The director or a designee of the director is authorized to seek additional information relating to a petition for reconsideration from the petitioning party or any other entity possessing information the director deems relevant to the petition. This subrule, however, does not impose any responsibility or duty on the director to discover documents or other information that was not submitted with the petition for reconsideration.

d. Any petition for reconsideration that is not received by the office of the director within 30 days of the issuance of the challenged inspection report is untimely and will not be considered by the director.

e. The director will not consider any request for waiver of an administrative rule made as part of a petition for reconsideration. Requests for waivers of administrative rules may only be made to the board pursuant to the provisions of 481—Chapter 365.

f. In ruling on a petition for reconsideration, the director may:

(1) Affirm the inspection report as issued;

(2) Issue an amended inspection report;

(3) Rescind the inspection report;

(4) Deny the petition as untimely.

g. Any petition for reconsideration that is not ruled upon by the director within 20 days of receipt by the office of the director shall be deemed denied and the challenged inspection report affirmed as issued.

365.6(2) *Appeal to the board.* The director's ruling on a petition for reconsideration or the director's deemed denial of a petition for reconsideration may be appealed to the board. An appeal must be filed in writing with the board within 30 calendar days of the earlier of either the issuance of the director's written ruling on a petition for reconsideration or the director's deemed denial of a petition for reconsideration. At a minimum, an appeal includes a short and concise statement of the basis for the appeal. The required form for an appeal is available on the board's website. Consideration of an appeal of a ruling on a petition for reconsideration is a contested case proceeding subject to the provisions of Iowa Code chapter 17A. The director has an automatic right of intervention in any appeal of the ruling on petition for reconsideration and may defend the ruling in a contested case proceeding.

365.6(3) *Informal review.*

a. In order to preserve the ability of board members to participate in decision-making, a party who elects an informal review under this rule waives the party's right to seek disqualification of a board member as a presiding officer in a later contested case proceeding based on the board member's participation in the informal review. Parties would not be waiving their right to seek disqualification on any other ground.

b. The board may propose a preliminary order at the time of informal review. If a party does not consent to the preliminary order, the party must submit a request to proceed with formal contested case proceedings, including hearing, within ten days of the informal review.

c. File transmitted to the board. Upon receipt of a notice of hearing issued by the board, the director shall within 30 days forward to the board and all parties of record to the appeal copies of the challenged inspection report, the appellant's petition for reconsideration and all supporting documents, all other documents collected by the director in ruling on the petition for reconsideration, and the director's ruling on the petition for reconsideration.

365.6(4) *Presiding officer.*

a. The presiding officer in all contested cases is the board, a panel of board members, or an administrative law judge assigned by the department of inspections, appeals, and licensing. When board members act as presiding officer, the board members shall conduct the hearing and issue either a final decision or, if a quorum of the board is not present, a proposed decision. The board may be assisted by an administrative law judge when the board acts as presiding officer.

b. The board or a panel of board members when acting as presiding officer may request that an administrative law judge perform certain functions as an aid to the board or board panel, such as ruling on prehearing motions, conducting the prehearing conference, ruling on evidentiary objections at hearing, assisting in deliberations, or drafting the written decision for review by the board or board panel.

c. All rulings by an administrative law judge who acts either as presiding officer or assistant to the board are subject to appeal to the board. A party must timely seek intra-agency appeal of prehearing rulings or proposed decisions in order to exhaust adequate administrative remedies. While a party may seek immediate board or board panel review of rulings made by an administrative law judge when sitting with and acting as an aid to the board or board panel during a hearing, such immediate review is not required to preserve error for judicial review.

d. Unless otherwise provided by law, when reviewing a proposed decision of a panel of the board or an administrative law judge, board members have the powers of and shall comply with the provisions of this chapter that apply to presiding officers.

365.6(5) *Subpoenas in a contested case.*

a. A request for a subpoena shall include the following information, as applicable:

(1) The name, address, and telephone number of the person requesting the subpoena;

(2) The name and address of the person to whom the subpoena will be directed;

(3) The date, time, and location at which the person shall be commanded to attend and give testimony;

(4) Whether the testimony is requested in connection with a deposition or hearing;

(5) A description of the books, papers, records, or other evidence requested;

(6) The date, time, and location for production or inspection and copying.

b. Each subpoena shall contain, as applicable:

(1) The caption of the case;

(2) The name, address, and telephone number of the person who requested the subpoena;

(3) The name and address of the person to whom the subpoena is directed;

(4) The date, time, and location at which the person is commanded to appear;

(5) Whether the testimony is commanded in connection with a deposition or hearing;

(6) A description of the books, papers, records, or other evidence the person is commanded to produce;

(7) The date, time, and location for production or inspection and copying;

(8) The time within which a motion to quash or modify the subpoena must be filed;

(9) The signature, address, and telephone number of the presiding officer;

(10) The date of issuance;

(11) A return of service attached to the subpoena.

c. Any person who is aggrieved or adversely affected by compliance with the subpoena or any party to the contested case who desires to challenge the subpoena must, within 14 days after service of the subpoena, or before the time specified for compliance if such time is less than 14 days, file with the board a motion to quash or modify the subpoena. The motion shall describe the legal reasons why the subpoena should be quashed or modified and may be accompanied by legal briefs or factual affidavits.

d. Upon receipt of a timely motion to quash or modify a subpoena, the board chairperson shall request an administrative law judge to hold a hearing and issue a decision. Oral argument may be scheduled at the discretion of the board or the administrative law judge. The administrative law judge may quash or modify the subpoena or deny the motion.

e. A person aggrieved by a ruling of an administrative law judge who desires to challenge that ruling must appeal the ruling to the board by serving on the board, either in person or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge. If the decision of the administrative law judge to quash or modify the subpoena or to deny the motion to quash or modify the subpoena is appealed to the board, the board may uphold or overturn the decision of the administrative law judge.

f. If the person contesting the subpoena is not the party whose appeal is the subject of the contested case, the board's decision is final for purposes of judicial review. If the person contesting the subpoena is the party whose appeal is the subject of the contested case, the board's decision is not final for purposes of judicial review until there is a final decision in the contested case.

365.6(6) *Decisions.*

a. Proposed decision. Decisions issued by a panel of less than a quorum of the board or by an administrative law judge are proposed decisions. A proposed decision issued by a panel of the board or an administrative law judge becomes a final decision if not timely appealed by any party or reviewed by the board.

b. Final decision. When a quorum of the board presides over the reception of evidence at the hearing, the decision is a final decision. A copy of the final decision and order shall immediately be sent by certified mail to the appellant's last-known post office address or may be served as in the manner of original notices. Copies shall be mailed by interoffice mail or first-class mail to the counsel of record.

CHAPTER 366
WAIVERS FROM ADMINISTRATIVE RULES BY THE ELEVATOR SAFETY BOARD

[Prior to 7/9/25, see Labor Services Division[875] Ch 66]

Rescinded by 2026 Iowa Acts, Senate File 2463, section 4, effective July 1, 2026. See Uniform Rules on Agency Procedure at 7—Chapters 2500 through 2506 and any corresponding rules adopted by this agency.

CHAPTER 367
CONTESTED CASES BEFORE THE ELEVATOR SAFETY BOARD

[Prior to 7/9/25, see Labor Services Division[875] Ch 69]

Rescinded by 2026 Iowa Acts, Senate File 2463, section 4, effective July 1, 2026. See Uniform Rules on Agency Procedure at 7—Chapters 2500 through 2506 and any corresponding rules adopted by this agency.

CHAPTERS 368 to 370
Reserved

CHAPTER 371
ADMINISTRATION OF THE CONVEYANCE SAFETY PROGRAM
[Prior to 7/9/25, see Labor Services Division[875] Ch 71]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—371.1(89A) Definitions. The definitions contained in this rule apply to 481—Chapters 371, 372, and 373.

"Acceptance checklist" means a checklist available on the website of the department that includes a list of major systems and components of conveyances.

"AECO" means an elevator/escalator certification organization accredited pursuant to ASME A17.7.

"Approved" means approved by the department.

"CCD" means code compliance documentation as described in ASME A17.7, Section 2.10.

"CEI" means a person who is a certified elevator inspector or certified elevator inspector supervisor and who received the certification from a certifying organization that holds a valid document of accreditation issued by an accreditation body in accordance with ANSI/ISO/IEC 17024.

"Center of the elevator path" means a vertical line through the center point of an elevator car top beginning two feet below the lower landing and ending ten feet above the highest landing of an elevator.

"Control" means the system governing the starting, stopping, direction of motion, acceleration, speed and deceleration of the moving member.

"Conveyance" means any elevator, escalator, material lift elevator installed on or after August 10, 2016, dumbwaiter, wind tower lift, CPH, or other equipment governed by Iowa Code chapter 89A.

"CPH" means a construction personnel hoist.

"CPH jump" means the addition or removal of mast or tower allowing a change in the hoist service elevation of a CPH.

"Department" means the department of inspections, appeals, and licensing.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Elevator" means a hoisting and lowering mechanism equipped with a car or platform that moves in guides in a substantially vertical direction and that serves two or more floors of a building or structure. "Elevator" does not include a CPH.

"Elevator mechanic" means a person who meets the standard for "elevator personnel" found in ASME A17.1.

"Hoistway-unit system" means a series of hoistway-door interlocks, hoistway-door electric contacts or hoistway-door combination mechanical locks and electric contacts, or a combination thereof, the function of which is to prevent operation of the driving machine by the normal operating device unless all hoistway doors are in the closed position and, if required, locked.

"Imminent danger" means one or more conditions or practices exist that are reasonably expected to cause death or serious physical harm immediately.

"Seal off" means to place a conveyance controller in the off position and attach a wire seal with a tag warning that the conveyance must be rendered dormant or not used pending repairs.

"Serious danger" means one or more conditions or practices exist that create a substantial probability that death or serious physical harm could result.

"Waiver" means a waiver pursuant to Iowa Code section 17A.9A or an exception or variance pursuant to Iowa Code section 89A.11.

"Wind tower lift" means a conveyance designed and utilized solely for movement of trained and authorized people and small loads in wind towers built for the production of electricity.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.2(89A) Registration of conveyances. The owner or authorized agent of each operable conveyance not previously registered shall register the conveyance. An application to install a new conveyance constitutes registration. All registrations are submitted to the director on forms available from the department and include all information requested by the director.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.3(89A) State identification number. The director will assign an identification number to each conveyance that shall be stamped on a metal tag permanently attached to the controller, to the electrical disconnecting switch, or in a wind tower lift cage.
[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.4(89A) Responsibility for obtaining permits. The procuring of all permits and the payment of all fees required by this chapter are the responsibility of the owner. Failure to obtain the appropriate permit prior to installation, alteration or operation may, at the discretion of the director, result in a referral to the attorney general for prosecution of criminal penalties.
[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.5(89A) Installation permit requirements.

371.5(1) Installation will not begin until an installation permit has been issued by the department. A separate installation permit will be issued for each conveyance, except that a single installation permit will cover all identical wind tower lifts installed as the result of one construction contract in identical wind towers in a single wind farm.

371.5(2) Application for an installation permit shall be accompanied by the fee, in the format required by the director, and include the following, as applicable:

a. Sectional plan of car and hoistway.

b. Sectional plan of machine room.

c. Sectional elevation of hoistway and machine room including the pit, bottom and top clearance of car and counterweights.

d. Size and weight of rails and guide rail bracket spacing.

e. The estimated maximum vertical forces on the guide rails on application of the safety device.

f. In the case of freight elevators for class B or class C loading, the horizontal forces on the guide rail faces during loading and unloading and the estimated maximum horizontal forces in a post-wise direction on the guide rail faces on the application of the safety device.

g. The size and weight per foot of any rail reinforcements where rail reinforcements are provided.

h. Job specifications.

i. For a conveyance covered by ASME A17.7, a complete copy of the CCD with attachments and a complete copy of the Certificate of Conformance with attachments as described by ASME A17.7, Appendix I, Section 4.5.

j. For a CPH, the number of CPH jumps planned, the planned dates for each CPH jump, and the change in the number of floors anticipated with each CPH jump.

371.5(3) A CPH installation permit issued in response to an application submitted in full compliance with this subrule permits each planned CPH jump. Each CPH jump will be considered an alteration. The fee for a CPH installation permit is the total of the CPH installation permit fee and the CPH alteration permit fee.

371.5(4) Issuance of an installation permit is not a waiver of any requirement of law.

371.5(5) The installation permit or a copy of the installation permit shall be conspicuously posted at the worksite. All the wind towers covered by a single installation permit are a single worksite, and posting one copy of the installation permit at the construction project office is sufficient compliance with this subrule.

371.5(6) Except as described here, the installation permit expires upon the earlier of the completion of the installation as described in the permit application or one year after issuance.

a. For a CPH, the installation permit expires upon completion of the last CPH jump.

b. For any conveyance, during the tenth month after issuance, and upon submission to the director of sufficient justification, the fee established by this chapter, and other required information, an extension may be granted at the discretion of the director.
[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.6(89A) Construction permits—requirements. A construction permit authorizes the temporary, limited use of an elevator for purposes relating to construction or demolition.

371.6(1) Use of the elevator will not begin until a construction permit has been issued by the department.

371.6(2) Application for a construction permit will be in the format required by the director and must include all the information requested by the director and the fee specified by this chapter.

371.6(3) Upon submission of the completed application and fee, a state inspector will be scheduled to inspect the elevator. Construction permits will be issued only if the following criteria are met:

a. The elevator has been successfully tested pursuant to the requirements of ASME A17.1, Section 8.11.5.13; and

b. The applicable requirements of ASME A17.1, Section 5.10, are met.

371.6(4) The construction permit or a copy of the construction permit will be posted conspicuously in a protective sleeve in the elevator car.

371.6(5) The construction permit will expire 120 days after issuance. However, between 90 and 110 days after issuance and upon submission to the director of sufficient justification, the fee established by this chapter, and other required information, an extension of up to 90 days may be granted at the discretion of the director.

371.6(6) Elevators with a construction permit but without an operating permit will not be accessible to the general public.

371.6(7) Failure to comply with these provisions may result in the revocation of the construction permit.

371.6(8) An operating permit will not be issued before construction and an acceptance inspection are complete.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.7(89A) Operating permits—requirements.

371.7(1) Operation of equipment covered by this chapter without a current operating permit is prohibited, except for construction permits, controller upgrade permits, and temporary removals from service, all defined in this chapter. If operation of a conveyance is prohibited under this rule, the director may post notice on the conveyance that it is not to be used. The conveyance may be returned to service only after an operating permit for the conveyance has been issued or reissued.

371.7(2) Operating permits will not be issued prior to successful completion of an inspection and payment of all permit and inspection fees owed to the department.

371.7(3) Current operating permits or copies of current operating permits will be conspicuously displayed as follows:

a. The operating permit for an elevator or CPH will be posted in the car.

b. The operating permit for an escalator, dumbwaiter, wind tower lift, moving walk, or wheelchair lift will be posted on or near the subject conveyance.

371.7(4) An operating permit expires 60 days after the first permit renewal inspection following the issuance of the operating permit, unless an earlier date is dictated by this rule.

371.7(5) An operating permit is automatically suspended when an alteration begins. The operating permit automatically resumes when the elevator passes an inspection.

371.7(6) An operating permit is automatically terminated when an imminent danger notice is posted on the conveyance.

371.7(7) Notwithstanding other provisions of this rule, at the discretion of the director, a temporary operating permit may be issued for up to 30 days provided the inspection has been completed and no code violations were identified. Issuance of a temporary operating permit does not extend the expiration date of the conveyance's operating permit.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.8(89A) Controller upgrade permits—requirements. A controller upgrade permit may be issued to allow operation of an elevator while work to upgrade controls requires deactivation of the Phase I recall initiated by smoke sensing devices. Each elevator to be altered requires a separate controller upgrade

permit. The duration of a controller upgrade permit will not exceed 90 days. Each elevator in the group will pass inspection prior to being placed back into service.

371.8(1) A controller upgrade permit will not be issued unless each of the following conditions is met:

a. Two or more elevators share a lobby at the level of the recall floor.

b. The project includes the installation of new elevator controllers in all of the elevators in the group.

c. Phase I fire recall initiated by a key-operated switch and all other controls will be properly functioning for each elevator available for use.

d. There is a current alteration permit for the project.

e. A complete application for the controller upgrade permit and the fee established by this chapter have been submitted and accepted.

371.8(2) A controller upgrade permit does not waive or excuse compliance with the requirements of any other governmental entity, including the department of public safety.

371.8(3) Upon the submission to the director of sufficient justification, the fee established by this chapter, and other required information, an extension of the permit for up to 60 days may be granted.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.9(89A) Alteration permits—requirements.

371.9(1) Alteration will not begin until an alteration permit has been issued by the department.

371.9(2) Application for an alteration permit will be in the format required by the director and will include scope of work, drawings and specifications of all planned changes and the fee.

371.9(3) Issuance of an alteration permit is not a waiver of any requirement of law.

371.9(4) The alteration permit or a copy of the alteration permit will be conspicuously posted at the worksite.

371.9(5) If a complete installation permit application was submitted for a CPH pursuant to subrule 371.5(3), at least seven days' advance notice of each CPH jump will be provided to the director.

371.9(6) The alteration permit expires upon the earlier of the completion of the alteration as described in the permit application or one year after issuance. However, during the tenth month after issuance and upon submission to the director of the fee set forth in this chapter, sufficient justification, and other required information, the director may grant an extension of the alteration permit.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.10(89A) Alteration requirements.

371.10(1) Alterations or changes will comply with applicable rules.

371.10(2) A conveyance that is relocated will be brought into compliance with all codes that are applicable at the time of relocation.

371.10(3) Alterations of conveyances other than escalators and elevators require that the entire conveyance be brought into compliance with the current code.

371.10(4) Work required by ASME A17.3 (2011) qualifies as normal maintenance and does not require an alteration permit except for work performed to comply with ASME A17.3 (2011) 2.3.3, 3.4.4.1(a), 3.4.4.2, 3.5.3, 3.5.5(a) and (b), 3.5.7, 3.6.1, 3.6.2, 3.8.1(a), 3.8.3(a), 3.10.1, 3.10.4(b) through (g), 3.10.4(i) through (k), 3.10.4(m), 3.10.4(r), 3.10.4(w), 3.10.7, 3.10.9, 3.10.10, 4.4.2, 4.4.3, and 4.7.3.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.11(89A) Inspection requirements. Pursuant to Iowa Code section 89A.12, inspections by the director will be permitted at reasonable times with or without prior notice.

371.11(1) *Scope of inspections.*

a. Comprehensive. Periodic inspections will be comprehensive. Elevators being transferred from construction permits to operating permits, previously dormant conveyances being returned to service, relocated conveyances, and new conveyances will be inspected in their entirety prior to operation.

b. Limited. An alteration inspection is normally limited to the altered components. If the inspector notices a safety hazard in plain view during an inspection after alteration, or if the periodic inspection is due, the entire conveyance will be inspected.

371.11(2) *When inspections will occur.* When the timing of two different types of inspection on a single conveyance coincide, a state inspector may perform both inspections in one visit.

a. Periodic inspections.

(1) Each construction elevator and CPH will be inspected at intervals not to exceed three months. All other periodic conveyance inspections by state inspectors are conducted annually unless the director determines resources do not allow annual inspections. If the director determines quarterly inspections of construction elevators and CPHs and annual inspections of other state-inspected conveyances are not feasible due to insufficient resources, the director will determine the inspection schedule.

(2) Conveyance inspections by special inspectors will be conducted at least annually.

(3) The inspector will arrange to perform the periodic inspection of a broadcast tower elevator when the maintenance company is on site to perform the periodic tests. If the inspection is to be performed by employees of the director, the inspection will occur during the department's normal business hours, unless otherwise agreed to by the director.

b. Acceptance inspections. A CPH will be inspected pursuant to the schedule in ANSI A10.4 – 2007, Chapter 26. For all other conveyances, an acceptance inspection will occur:

(1) After each relocation,

(2) After each alteration,

(3) For a new installation, not less than two business days after a completed acceptance checklist is submitted by the conveyance installation company,

(4) Before an elevator subject to a construction permit receives an operating permit, and

(5) Before a previously dormant conveyance is returned to service.

c. Other inspections. Inspections may be made when the director reasonably believes that a conveyance is not in compliance with the rules. Accidents, complaints, or requests for consultative inspections may result in inspections by the director.

371.11(3) *Who may perform inspections.*

a. The director will inspect altered conveyances, construction elevators, CPHs, previously dormant conveyances being returned to service, relocated conveyances, and new conveyances.

b. Except as noted in 71.11(3)*"c,"* annual inspections may be performed by state inspectors or special inspectors authorized by the director.

c. An inspection report by a special inspector will not be accepted as the required, annual inspection if the conveyance is under contract for maintenance, installation or alteration by the special inspector or the special inspector's employer, or if the property is owned or leased by the special inspector or the special inspector's employer.

371.11(4) *Inspection standards.* Inspections will be performed in accordance with applicable safety codes or documents such as:

a. CCD;

b. ASME A17.1, Sections 8.10 and 8.11, except Section 8.11.1.1;

c. ANSI A10.4-2007; or

d. ASME A18.1.

371.11(5) *Inspection reports.*

a. All inspectors will file inspection reports on forms approved by the director within 30 days from the date of inspection and will provide owners of conveyances with copies of completed inspection reports. The inspection report must separately list each unsafe condition and the applicable, specific code citation. Up to 30 days will be allowed for correction of the unsafe conditions.

b. The owner may file a petition for reconsideration of an inspection report. The timely and proper filing of a petition for reconsideration extends the deadline for correction of the hazards that are subject to the petition for reconsideration.

371.11(6) *Extension of time.* The owner may petition the director for up to 60 additional days to make the necessary corrections. The time frames may be adjusted by the director as necessary to accommodate an extension of time.

371.11(7) *Correction of unsafe conditions.* In the absence of a determination on reconsideration or appeal that correction of hazards is not required, all unsafe conditions identified in the inspection

report will be corrected. The director will verify correction of all unsafe conditions identified in the inspection report by sending a state inspector to reinspect the conveyance for the applicable fee, or by reviewing appropriate documentation such as a photograph, invoice, other verifiable document, or subsequent inspection report. The time frames set forth in this subrule may be accelerated at the request of the owner.

a. Promptly upon receipt of an inspection report listing unsafe conditions, the director will send to the owner and the special inspector, if any, an abatement order. A copy of the inspection report will be attached to the abatement order. Unless a special inspector conducted the inspection, the order may specify a period that ends no more than 45 days after the inspection during which the owner may submit written evidence that the unsafe conditions have been corrected. The abatement order will:

(1) Identify the equipment.

(2) Demand that the unsafe conditions be corrected within the period set forth in the inspection report.

(3) Set forth the consequences of failure to comply.

b. After the period specified on the inspection report has passed, the director may cause a state inspector to verify correction of all unsafe conditions. If reinspection reveals no significant progress toward correcting the unsafe conditions, or the remaining unsafe conditions create significant safety concerns, the director may serve a notice of intent to suspend, deny or revoke the operating permit.

If there is a serious danger, the director may seal off the conveyance and post notice on the conveyance that it is not to be used pending repairs. Use of a conveyance prior to completion of the required repairs may result in additional legal proceedings. The conveyance may be returned to service only after the serious danger has been corrected and the conveyance has passed a comprehensive inspection.

c. The director may issue an operating permit after receipt of the appropriate fee and verification that each unsafe condition identified in the inspection report has been corrected.

d. If written proof of correction was requested in the abatement order, but adequate proof was not received by the deadline set forth in the abatement order, the director may send a second abatement order or cause a state inspector to inspect the conveyance. If the director elects to send a second abatement order, it will notify the owner that, if written proof of abatement is not received within 20 days, a state inspector may be sent to the site. Copies of the abatement order and the inspection report will be attached to the second abatement order.

e. If a special inspector conducted the inspection, more than 45 days have passed since the deadline for correction of hazards, and an inspection report indicating the hazards are corrected has not been filed, the director may:

(1) Contact the special inspector,

(2) Send a second abatement order to the owner with copies of the inspection report and first abatement order, or

(3) Send a state inspector to inspect the conveyance. If there is a serious danger, the director may seal off the conveyance and post notice on the conveyance that it is not to be used pending repairs. Use of a conveyance prior to completion of the required repairs may result in additional legal proceedings. The conveyance may be returned to service only after the serious danger has been corrected and the conveyance has passed a comprehensive inspection.

f. If an inspection as described in paragraph 71.11(7)*"d"* or *"e"* reveals no significant progress toward correcting the unsafe conditions, and the remaining unsafe conditions create no significant safety concerns, the director may extend the time for abatement of the unsafe conditions an additional ten days or may serve a notice of intent to suspend, deny or revoke the operating permit. The director may also post a notice prohibiting use of the conveyance pending abatement of the unsafe conditions listed in the inspection report.

g. If an abatement order was provided and a conveyance is not in use and the owner does not intend to use the conveyance, repair the conveyance, or make the conveyance dormant, the director may seal off the conveyance.

371.11(8) *Imminent danger.* If the director determines that continued operation of a conveyance pending correction of unsafe conditions creates an imminent danger, the director may seal off the conveyance and post notice on the conveyance that it is not to be used pending repairs. Use of a

conveyance contrary to posted notice by the director may result in additional legal proceedings pursuant to Iowa Code section 89A.10(3) or 89A.18. The conveyance may be returned to service only after the imminent danger has been corrected and the conveyance has passed a comprehensive inspection.

371.11(9) *Interference prohibited.* No person shall interfere with, delay or impede an inspector employed by the state during an inspection.

371.11(10) *Escalator inspections.* The owner will arrange for an escalator mechanic to be on site to assist with the inspection. The inspector will work with the owner to arrange an inspection time.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.12(89A,252J,272D) Special inspector commissions.

371.12(1) *Definition.* As used in this rule, "certificate of noncompliance" means:

a. A certificate of noncompliance issued by the child support recovery unit, department of human services, pursuant to Iowa Code chapter 252J; or

b. A certificate of noncompliance issued by the centralized collection unit of the department of revenue pursuant to Iowa Code chapter 272D.

371.12(2) *Qualifications.*

a. Each applicant will possess a high school diploma or general equivalency degree.

b. Each applicant will have at least three years of full-time work experience in the construction, installation, repair or inspection of conveyances.

c. Each applicant will be a CEI.

d. Each applicant will satisfactorily pass the department's examination on Iowa procedures, Iowa policies, and all safety standards adopted by reference.

e. Each applicant will submit proof of insurance coverage insuring the applicant against liability for injury or death for any act or omission on the part of the applicant. The insurance policy will be in an amount of not less than $1,000,000 for bodily injury to or death of one person in any one accident, and in an amount of not less than $5,000,000 for bodily injury to or death of two or more persons in any one accident, and in an amount of not less than $100,000 for damage to or destruction of property in any one accident. The insurance coverage of the special inspector's employer complies with this requirement if the coverage provides equivalent coverage for each special inspector.

371.12(3) *Application.* An applicant for a commission will complete, sign, and submit to the department the form provided by the department with the required fee. The applicant will include with the application proof that the applicant is a CEI.

371.12(4) *Expiration.* The commission expires when the commission is suspended or revoked by the director or one year from issuance, whichever occurs earlier.

371.12(5) *Changes.* The special inspector shall notify the department at the time any of the information on the form or attachments changes.

371.12(6) *Denials.* The director may refuse to issue or renew a special inspector's commission for failure of the applicant to complete an application package, if the applicant is not a CEI, or for any reason listed in subrules 371.12(8) through 371.12(10).

371.12(7) *Investigations.* The director may investigate for any reasonable cause related to special inspectors or special inspector applicants. The director may conduct interviews and utilize other reasonable investigatory techniques. Investigations may be conducted without prior notice at the times and in the places the director directs. The director may notify the organization that certified the special inspector as a CEI of the findings of an investigation.

371.12(8) *Reasons for probation.* The director may issue a notice of commission probation when an investigation reasonably reveals that the special inspector filed inaccurate reports.

371.12(9) *Reasons for suspension.* The director may issue a notice of commission suspension when an investigation reasonably reveals any of the following:

a. The special inspector failed to submit and report inspections on a timely basis;

b. The special inspector abused the special inspector's authority;

c. The special inspector misrepresented self as a state inspector or a state employee;

d. The special inspector used commission authority for inappropriate personal gain;

e. The special inspector failed to follow the department's rules for inspection of object repairs, alterations, construction, installation, or in-service inspection;

f. The special inspector committed numerous violations;

g. The special inspector used fraud or deception to obtain or retain, or to attempt to obtain or retain, a special inspector commission whether for one's self or another;

h. The special inspector is no longer a CEI;

i. The department received a certificate of noncompliance; or

j. The special inspector failed to take appropriate disciplinary actions against a subordinate special inspector who has committed repeated acts or omissions listed herein.

371.12(10) *Reasons for revocation.* The director may issue a notice of revocation of a special inspector's commission when an investigation reveals any of the following:

a. The special inspector filed a misleading, false or fraudulent report;

b. The special inspector failed to perform a required inspection;

c. The special inspector failed to file a report or filed a report that was not in accordance with the provisions of applicable standards;

d. The special inspector committed repeated violations;

e. The special inspector used fraud or deception to obtain or retain, or to attempt to obtain or retain, a special inspector commission whether for one's self or another;

f. The special inspector instructed, ordered, or otherwise encouraged a subordinate special inspector to perform acts or omissions listed herein;

g. The special inspector is no longer a CEI; or

h. The department received a certificate of noncompliance.

371.12(11) *Procedures.* The following procedures shall apply except in the event of revocation or suspension due to receipt of a certificate of noncompliance. In instances involving receipt of a certificate of noncompliance, the applicable procedures of Iowa Code chapter 252J or 272D shall apply.

a. Notice of actions. The director will serve a notice on the special inspector by certified mail to an address listed on the commission application form or by other service as permitted by Iowa Code chapter 17A.

b. Emergency suspension. If the director finds that the public health, safety or welfare imperatively requires emergency action because a special inspector failed to comply with applicable laws or rules, the special inspector's commission may be summarily suspended.

c. Probation period. A special inspector may be placed on probation for a period not to exceed one year for each incident causing probation.

d. Suspension period. A special inspector's commission may be suspended up to five years for each incident causing a suspension.

e. Revocation period. A special inspector's commission that has been revoked will not be reinstated for five years.

f. Concurrent actions. Multiple actions may proceed at the same time against any special inspector.

g. Revoked or suspended commissions. Within five business days of final agency action revoking or suspending a special inspector commission, the special inspector shall surrender the special inspector's commission card to the director. The director may notify the special inspector's employer and the organization that certified the special inspector as a CEI of a revocation or suspension.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.13(89A) Safety tests. Only safety test reports submitted on approved forms from elevator mechanics who are employed by authorized companies meet the requirements of this rule. The alternative test methods set forth at ASME A17.1, Rule 8.6.11.10, are not allowed as a substitute for a full-load safety test.

371.13(1) *When safety tests will be performed.*

a. Safety tests are performed on new and altered installations before they are placed in service.

b. Category 1 safety tests of wind turbine tower elevators are conducted after two years of operation, and category 5 safety tests of wind turbine tower elevators are performed after ten years of

operation. Safety tests shall be made on all other conveyances pursuant to the schedules and procedures set forth in:

(1) The maintenance control plan for wind tower lifts exempted from ASME A17.1;

(2) The CCD for conveyances covered by ASME A17.7-2007/CSA B44-07;

(3) The columns pertaining to "periodic tests" in Table N-1 in the edition of ASME A17.1 currently adopted for new conveyances;

(4) ASME A18.1(2003), Part 10; or

(5) ANSI A10.4-2007, Section 26.4.

371.13(2) *How safety tests will be reported.* Within 30 days after completion of a safety test, the elevator mechanic shall file with the director a report on an approved form and provide a copy of the form to the owner and to the witness, if applicable.

371.13(3) *How safety tests will be recorded.* The elevator mechanic shall attach a tag showing the date of the test, the elevator mechanic's name, and the type of test performed.

a. On electric traction elevators, the elevator mechanic attaches the tag to the safety-releasing carrier.

b. On hydraulic elevators, the elevator mechanic attaches the tag to the disconnecting switch or the controller.

c. On wheelchair lifts, the elevator mechanic attaches the tag to the disconnecting switch.

d. On other conveyances covered by these rules, the director witnessing the acceptance safety test will indicate the proper location of the tag. Subsequent test tags are attached in the same location.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.14(89A) Authorized companies—requirements.

371.14(1) Each year, authorized companies will train their elevator mechanics who perform safety tests on safety test procedures.

371.14(2) For each conveyance owned by an authorized company, the owner will obtain the services of a CEI who is not employed by the authorized company or an inspector employed by the state to witness the safety test.

371.14(3) To become authorized to perform safety tests, a company will submit a copy of its procedures for performing safety tests. The director will review the procedures for adequacy and will request modifications to the procedures or grant or deny the authorization.

371.14(4) Every five years or within six months after the board adopts a new edition of ASME, whichever is earlier, authorized companies will submit revised safety test procedures for renewal of authorization. The director will review the procedures for adequacy and will request modifications to the procedures or grant or deny the authorization.

371.14(5) Investigations. Investigations will take place at the times and in the places the director directs. The director may investigate for any reasonable cause. The director may conduct interviews and utilize other reasonable investigatory techniques. Investigations may be conducted without prior notice.

371.14(6) Suspension. If the director determines that a falsified safety test report was submitted by an elevator mechanic, the director will suspend the authorization of the elevator mechanic's employer for six months. During the suspension, all safety tests performed by any employee of the authorized company will be witnessed by a state inspector or a CEI who is not employed by the suspended authorized company.

371.14(7) Suspension procedures.

a. The director will notify an authorized company of its suspension by certified mail or by other service as permitted by Iowa Code chapter 17A.

b. The authorized company will have 20 days to file a written notice of contest with the director. If the authorized company does not file a written notice of contest in a timely manner, the suspension will automatically be effective. If the authorized company does file a written notice of contest in a timely manner, department hearing procedures govern.

c. If the director finds, pursuant to Iowa Code section 17A.18A, that public health, safety or welfare imperatively requires emergency action, the authorization may be summarily suspended.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.15(89A) Fees. Except as noted in this rule, all fees are nonrefundable and due in advance.

371.15(1) *Operating permits.* The annual operating permit fee is $75 per conveyance.

371.15(2) *Periodic inspections.* Fees shall be remitted to the department within 30 days of the date of inspection. The fees for periodic inspections are as follows:

a. Construction elevator: $200.
b. Wind tower lift: $225.
c. Hand-powered elevator: $90.
d. Television tower elevator: $500.
e. Handicapped restricted use elevator: $100.
f. Other hydraulic elevator: $100.
g. Other traction elevator: $150.
h. Escalator: $150.
i. Dumbwaiter: $90.
j. Wheelchair lift: $90.
k. CPH:
(1) Annual: $500.
(2) Quarterly: $200.
l. Moving walk: $150.

371.15(3) *Installation permits.* The fees in this subrule cover the initial print review, installation permit, initial inspection and first-year operating permit. Each print revision submitted to the department is subject to an additional fee of $100. The fees for new installations are as follows:

a. Wind tower lift: $500.
b. Material lift elevators: $500.
c. Other hydraulic elevators: $750.
d. Other traction elevators: $1,000.
e. Escalator: $1,000.
f. Dumbwaiter: $500.
g. Wheelchair lift: $500.
h. CPH: $500.
i. Moving walk: $500.

371.15(4) *Alteration permits.*

a. Except as set forth below, the fee for any elevator alteration permit is $500 and covers the initial print review, alteration permit, and initial inspection.

b. The fee for each CPH extension is $150. The total fee required for all planned CPH extensions shall be submitted with the installation permit application.

c. The fee for an alteration permit is $500 if the only alteration is the addition or replacement of an escalator skirt brush.

d. The fee for an initial print review, elevator alteration permit, and initial inspection is $250 if both of the following conditions are met:

(1) The only changes covered by the elevator alteration permit application are required by ASME A17.3 (2011) as adopted in 481—Chapters 372 and 373; and

(2) The elevator alteration permit application is submitted before or no later than 120 days after the issuance of an inspection report describing ASME A17.3 requirements.

e. For all other conveyances, the fees for new installations shall apply to alterations.

371.15(5) *Construction permits.* The construction permit fee is $200 per conveyance. This fee includes the fee for initial inspection.

371.15(6) *Controller upgrade permits.* The controller upgrade permit fee is $250. This fee includes one inspection.

371.15(7) *Consultative inspections* Consultative inspections may be performed at the discretion of the director for $125 per hour, including travel time, with a minimum charge of $250.

371.15(8) *Special inspector commission.* The special inspector commission fee is $60 annually.

371.15(9) *Witness of safety tests.* The fee for department employees to witness safety tests is $125 per hour, including travel time, with a minimum charge of $250.

371.15(10) *Permit extensions.* The fee to extend an installation permit, alteration permit, or construction permit is $100.

371.15(11) *Inspections outside of normal business hours.* Inspections outside the normal business hours may be performed at the discretion of the director. If the owner or contractor requests an inspection outside of normal business hours and the director agrees to the schedule, an additional fee will be charged. The additional fee will be calculated at a rate of $200 per hour, including travel time, with a minimum charge of $400.

371.15(12) *Reinspections.* The fees for reinspections are $400 for television tower elevators and CPHs, $200 for wind tower lifts, and $300 for all other conveyances.

371.15(13) *Inspection for temporary removal from service.* The inspection fee for temporary removal from service is $125 per hour, including travel time, with a minimum charge of $250.

371.15(14) *Fee waiver.*

a. When a state inspector combines in one visit two different types of inspection on a single conveyance, the director may waive the lesser of the fees.

b. The fee for an alteration permit will be waived by the director if the only alterations covered by the permit application are required by 481—Chapter 372 or 373. The fee waiver set forth in this paragraph does not eliminate the requirement to pay for an acceptance inspection or for an operating permit.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.16(89A) Publications available for review. Standards, codes, and publications adopted by reference in these rules are available for review in the department office.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.17(89A) Accidents and injuries—requirements.

371.17(1) This rule applies to a conveyance in the event one of the following occurs:

a. A personal injury accident that requires the service of a physician;

b. A personal injury accident that causes disability exceeding one day; or

c. Damage that will require more than one hour of mechanic's time (excluding travel) to repair.

371.17(2) The owner will promptly notify the director if one of the events listed in subrule 371.19(1) occurs. Notification will be in writing and will include the state identification number, owner, and description of accident.

371.17(3) The removal of any part of the damaged conveyance or operating mechanism from the premises is forbidden until permission is granted by the director.

371.17(4) When an accident or injury involves the failure or destruction of any part of the conveyance or its operating mechanism, the use of the conveyance is forbidden until it has been inspected and approved by the director.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.18(89A) Temporary removal from service. The requirements for an annual inspection, annual inspection fee, safety test, operating permit, and operating permit fee will be temporarily suspended for up to three years for an elevator in an unoccupied building if the requirements of this rule are met.

371.18(1) All elevator doors in unoccupied buildings shall be closed and locked. Hydraulic elevators are parked at the bottom of the hoistway. Traction elevators are parked at the top of the hoistway.

371.18(2) Upon request by the owner of an elevator in an unoccupied building, the director will send an inspector who is a state employee to confirm that the building is unoccupied and that the car and doors of the elevator have been properly secured. If the conditions set forth in subrule "1" are met, the inspector shall apply to the elevator a seal and a red tag marked with the words "Do Not Operate."

371.18(3) One year after the inspection, the owner must file with the director written confirmation that the status of the elevator and building have not changed, and the owner must file again two years after the inspection. Failure to comply with this requirement will result in termination of the temporary suspension of the requirements for safety tests, inspections, and operating permits.

371.18(4) Prior to returning the elevator to service, and upon request of the owner, the director may allow the elevator to be operated for 30 days for the sole purpose of performing safety tests and maintenance.

371.18(5) The owner must notify the director at least two weeks before placing an elevator back into service and must arrange for an inspector who is a state employee to witness a safety test.

371.18(6) If at the end of three years the building is still unoccupied, suspension of the requirements for safety tests, inspections, and operating permits end without possibility of renewal.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—371.19(89A) Other regulations affecting elevators. No rule in 481—Chapters 371 through 373 shall be interpreted as creating a waiver from any otherwise applicable regulation or statute.

[**ARC 8773C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapters 89A, 252J, and 272D.

[Editorial change: IAC Supplement 7/9/25]

CHAPTER 372
CONVEYANCES INSTALLED ON OR AFTER JANUARY 1, 1975

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 72]
[Prior to 7/9/25, see Labor Services Division[875] Ch 72]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—372.1(89A) Purpose and scope. This chapter contains safety standards covering the design, construction, installation, operation, inspection, testing, maintenance, alteration, and repair of conveyances installed on or after January 1, 1975. The rules of this chapter also apply to previously dormant conveyances that are being reactivated and to reinstalled or moved conveyances. As used in this rule, the word "installation" refers to the date on which a conveyance contractor enters into a contractual agreement pertaining to a conveyance.

372.1(1) For installations between January 1, 1975, and December 31, 1982, ANSI A17.1 means ANSI A17.1 (1971).

372.1(2) For installations between January 1, 1983, and December 31, 1992:

a. ANSI A17.1 means ANSI A17.1 (1981); and

b. ANSI A117.1 means ANSI A117.1 (1980).

372.1(3) For installations between January 1, 1993, and December 31, 2000:

a. ASME A17.1 means ASME A17.1 (1990) and in addition means the following:

(1) ASME A17.1b (1992), Rule 110.11h, for electric elevators installed between July 1, 1993, and December 31, 2000, and

(2) ASME A17.1b (1992), Rule 110.11h that is referenced by Rule 300.11, for hydraulic elevators installed between July 1, 1993, and December 31, 2000.

b. ANSI/NFPA 70 means ANSI/NFPA 70 (1990); and

c. ANSI A117.1 means ANSI A117.1 (1980).

372.1(4) For installations between January 1, 2001, and December 31, 2003:

a. ASME A17.1 means ASME A17.1 (1996 through the 1999 addenda);

b. ASME A18.1 means ASME A18.1 (1999), except Chapters 4, 5, 6, and 7;

c. ANSI A117.1 means ANSI A117.1 (1998); and

d. ANSI/NFPA 70 means ANSI/NFPA 70 (1999).

372.1(5) For installations between January 1, 2004, and April 4, 2006:

a. ASME A17.1 means ASME A17.1 (2000 through the 2003 addenda);

b. ASME A18.1 means ASME A18.1 (1999 through the 2001 addenda), except Chapters 4, 5, 6, and 7;

c. ANSI A117.1 means ANSI A117.1 (1998); and

d. ANSI/NFPA 70 means ANSI/NFPA 70 (2002).

372.1(6) For installations between April 5, 2006, and July 22, 2008:

a. ASME A17.1 means ASME A17.1-2004, A17.1a-2005 and A17.1S-2005;

b. ASME A18.1 means ASME A18.1 (2003), except Chapters 4, 5, 6, and 7;

c. ANSI A117.1 means ANSI A117.1 (2003), except for Rule 407.4.6.2.2; and

d. ANSI/NFPA 70 means ANSI/NFPA 70 (2005).

372.1(7) For installations between July 23, 2008, and July 18, 2012:

a. ASME A17.1 means ASME A17.1-2007/CSA B44-07;

b. ASME A17.7 means ASME A17.7-2007/CSA B44-07;

c. ASME A18.1 means ASME A18.1 (2003), except Chapters 4, 5, 6, and 7;

d. ANSI A117.1 means ANSI A117.1 (2003), except for Rule 407.4.6.2.2; and

e. ANSI/NFPA 70 means ANSI/NFPA 70 (2005).

372.1(8) For installations between July 19, 2012, and January 30, 2014:

a. ASME A17.1 means ASME A17.1-2010/CSA B44-10, except for Rule 2.27.1.1.6;

b. ASME A17.7 means ASME A17.7-2007/CSA B44-07;

c. ASME A18.1 means ASME A18.1 (2003), except Chapters 4, 5, 6, and 7;
d. ANSI A117.1 means ANSI A117.1 (2003), except for Rule 407.4.6.2.2; and
e. ANSI/NFPA 70 means ANSI/NFPA 70 (2008).

372.1(9) For installations between January 31, 2014, and January 14, 2015:
a. ASME A17.1 means ASME A17.1-2010/CSA B44-10, except for Rule 2.27.1.1.6;
b. ASME A17.7 means ASME A17.7-2007/CSA B44-07;
c. ASME A18.1 means ASME A18.1 (2011), except Chapters 4, 5, 6, and 7;
d. ANSI A117.1 means ANSI A117.1 (2003), except for Rule 407.4.6.2.2; and
e. ANSI/NFPA 70 means ANSI/NFPA 70 (2008).

372.1(10) For installations between January 15, 2015, and May 16, 2018:
a. ASME A17.1 means ASME A17.1-2013/CSA B44-13;
b. ASME A17.7 means ASME A17.7-2007/CSA B44-07;
c. ASME A18.1 means ASME A18.1 (2011), except Chapters 4, 5, 6, and 7;
d. ANSI A117.1 means ANSI A117.1 (2003), except for Rule 407.4.6.2.2; and
e. ANSI/NFPA 70 means ANSI/NFPA 70 (2011).

372.1(11) For installations between May 17, 2018, and May 31, 2021:
a. ASME A17.1 means ASME A17.1-2016/CSA B44-16;
b. ASME A17.7 means ASME A17.7-2012/CSA B44.7-12;
c. ASME A17.8 means ASME A17.8-2016/CSA B44.8-16;
d. ASME A18.1 means ASME A18.1 (2014), except Chapters 4, 5, 6, and 7;
e. ANSI A117.1 means ANSI A117.1 (2017), except for requirement 407.4.7.1.2; and
f. ANSI/NFPA 70 means ANSI/NFPA 70 (2017).

372.1(12) For installations on or after June 1, 2021:
a. ASME A17.1 means ASME A17.1-2019/CSA B44-19, except that,
(1) Approaching object detection as described in 2.13.5 is optional; and
(2) ASME A17.1-2016/CSA B44-16, requirement 2.13.5, applies if approaching object detection is not installed;
b. ASME A17.7 means ASME A17.7-2012/CSA B44.7-12;
c. ASME A17.8 means ASME A17.8-2016/CSA B44.8-16;
d. ASME A18.1 means ASME A18.1 (2014), except Chapters 4, 5, 6, and 7;
e. ANSI A117.1 means ANSI A117.1 (2017), except for requirement 407.4.7.1.2; and
f. ANSI/NFPA 70 means ANSI/NFPA 70 (2017).

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.2(89A) Definitions. The definitions contained in ASME A17.1, ASME A18.1, and ANSI A117.1 and any other standard adopted herein by reference are applicable as used in this chapter to the extent that the definitions do not conflict with the definitions contained in Iowa Code chapter 89A and these rules. However, the definition of "building code" in ASME A17.1 is modified to exclude the Building Construction and Safety Code (NFPA 5000) and the National Building Code of Canada (NBCC) for any installation after March 1, 2008.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.3(89A) Accommodating the physically disabled. All passenger elevators installed between January 1, 1975, and December 31, 1982, that are available and intended for public use shall be usable by the physically disabled. All passenger elevators will have control buttons with identifying features for the benefit of the blind and will allow for wheelchair traffic. All passenger elevators and wheelchair lifts installed on or after January 1, 1983, that are accessible to the general public shall comply with Accessible and Usable Buildings and Facilities ANSI A117.1, sections 407 and 408.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.4(89A) Electric elevators. The provisions contained in ASME A17.1, Part 2, are adopted by reference.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.5(89A) Hydraulic elevators. The provisions contained in ASME A17.1, Part 3, are adopted by reference.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.6(89A) Power sidewalk elevators. The provisions contained in ASME A17.1, section 5.5, are adopted by reference.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.7(89A) Performance-based safety code. Conveyances may comply with ASME A17.7, in whole or in part, as an alternative to ASME A17.1.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.8(89A) Hand and power dumbwaiters. The provisions contained in ASME A17.1, sections 7.1, 7.2, 7.3, and 7.8, are adopted by reference.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.9(89A) Escalators and moving walks. The provisions contained in ASME A17.1, Part 6, are adopted by reference, except for those portions that allow an operating or safety device to reset automatically.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.10(89A) General requirements.

372.10(1) The provisions contained in ASME A17.1, Part 8, are adopted by reference unless specifically excluded herein.

372.10(2) Except as noted in this rule, the American Society of Mechanical Engineers Safety Code for Existing Elevators and Escalators, A17.3 (2011), is adopted by reference with an enforcement date of May 1, 2021.

a. If a code provision that is more restrictive than A17.3 (2011) applied to a conveyance when the conveyance was installed, the more restrictive provision remains in effect.

b. A17.3 (2011) Part X applies to handicapped restricted use elevators without regard to the scope provisions set forth in A17.3 (2011) Part X.

c. Provisions of A17.3 (2011) that require installation of a new controller to implement Phase 1 and Phase 2 fire service or car top operation are not adopted by reference and are not be enforced in Iowa.

d. A17.3 (2011), Rule 2.3.2, is intended to prevent the accumulation of sewer gas in an elevator pit and does not require the addition of a drain pipe in an existing pit. An air gap in an existing drain pipe is adequate compliance.

e. An elevator that was legally installed with guide rails made of materials other than steel will not be required to replace the guide rails due to the adoption of A17.3 (2011).

372.10(3) Permanent lighting shall be installed in the hoistway of an elevator contracted after March 1, 2019. Three-way switches to control the hoistway lighting shall be installed at the pit access door and the top landing access door. The lighting shall be sufficient to provide 10 foot-candles of light to the center of the elevator path measured when the car top lights are off. Engineering calculations that prove 10 foot-candles of light are provided to the center of the elevator path may be substituted for light meter measurements under circumstances such as a glass back car where use of a light meter is not practical.

372.10(4) For conveyances contracted after March 1, 2019, all electrical wiring in a machine room, control space, control room, machinery space, and hoistway shall comply with ANSI/NFPA 70 and be enclosed in metal conduit, flexible conduit, or metal raceways. However, this subrule does not apply in applications such as traveling cables and car top work lights where movement is required for proper function or to operating devices and control equipment where adjustment may be needed.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.11(89A) Wind tower lifts. Wind tower lifts authorized by this rule shall not be installed in grain elevators, high-rise buildings, water towers, television towers or any facility other than a wind tower built for the production of electricity. This rule applies to all wind tower lifts, whether installed before or after

May 28, 2008; however, this exception does not apply to a wind tower lift if the contract for its installation is executed after an AECO is accredited.

372.11(1) Wind tower lifts that meet the requirements of subrules 372.11(2) through 372.11(9) are exempt from the requirements of ASME A17.1. This temporary exemption terminates for a wind tower lift upon the occurrence of at least one of the following events:

a. Three weeks have passed since the accreditation of at least one AECO, and the manufacturer of the wind tower lift has not filed with the director an affidavit attesting that a request for Certificate of Conformance as described by ASME A17.7 (2007) was submitted to an AECO.

b. The AECO has reviewed a request pursuant to ASME A17.7 and refused to issue a Certificate of Conformance for the model or series of lifts.

c. The AECO has determined that modifications to the wind tower lift are necessary, and the modifications have not been made with reasonable diligence.

d. The AECO has determined that modifications to the wind tower lift are necessary, and the director determines the wind tower lift is not safe to operate prior to completion of the modifications.

e. The AECO has reviewed an application pursuant to ASME A17.7 and issued a Certificate of Conformance for the model or series of lifts.

372.11(2) A wind tower lift placed in operation on or before May 28, 2008, shall be registered by the owner with the director no later than July 1, 2008, and shall pass an installation inspection by inspectors employed by the director according to the schedule set by the director. The wind tower lift shall receive a periodic inspection by the director annually thereafter.

372.11(3) The owner of a wind tower lift installed after May 28, 2008, shall register the wind tower lift with the director prior to its installation. A wind tower lift installed after May 28, 2008, shall pass an installation inspection by the director prior to its being placed into operation. The wind tower lift will receive a periodic inspection annually thereafter.

372.11(4) Registration pursuant to this rule requires submission of the following information to the director:

a. The unique identifier of the wind tower.

b. The name of the wind tower owner and contact information for the owner's representative.

c. The name of the wind tower lift manufacturer and contact information for the manufacturer's representative.

d. The location of the wind farm.

e. Three copies of the prints and design documents that are certified by a professional engineer duly licensed in the state of Iowa and that bear the professional engineer's P.E. stamp for the lifts.

f. The manufacturer's complete test procedures, inspection checklists, operating manual, service manual, and related documents as determined necessary by the director.

372.11(5) The owner shall notify the director within 30 days of any change in the information provided pursuant to paragraphs 372.11(4)*"b"* and *"c."*

372.11(6) The manufacturer of a lift must notify the director in writing within one week if one of its wind tower lifts anywhere in the world is involved in a personal injury accident requiring the service of a physician, a personal injury accident causing disability exceeding one day or death, or an incident causing property damage exceeding $2,000. The notification shall specifically identify the model number, serial number, and owner of the lift, and a description of the incident or accident. The director shall determine and require necessary inspections, tests, changes or enhancements to prevent a similar incident or accident in this state.

372.11(7) The manufacturer shall notify the director within seven days of notification to the manufacturer that an AECO has:

a. Issued a Certificate of Conformance for the model or series of wind tower lifts,

b. Refused to issue a Certificate of Conformance for the model or series of wind tower lifts, or

c. Determined that modifications to the wind tower lifts are necessary.

372.11(8) Wind tower lifts shall pass an inspection covering the following criteria:

a. Ascending speed, descending speed, and emergency descending speed will not exceed the manufacturer's recommendations.

b. Stop switch, interior lighting, cage entry door, door contact, operating controls, and remote operating controls will operate according to manufacturer's recommendations.

c. Interior floor and cage framework will appear to be structurally sound.

d. Enclosure signage recommended by the manufacturer will be in place.

e. Manufacturer's data plate will be visible.

f. Hoisting mechanism will appear to be structurally sound and intact from inside and outside the car.

g. Guide shoes will appear to be structurally sound and undamaged.

h. Suspended power cords and strain relief devices will reveal no visible damage.

i. Upper and lower normal and final limits will operate according to the manufacturer's recommendations.

j. Overspeed device will successfully pass a full-load test.

k. Overload device will successfully pass an overload test according to the manufacturer's recommendations.

l. Wire rope, safety rope, and guide rope will show no evidence of wear.

m. Guide rope attachments, suspension attachment beam, beam tower attachments, suspension rope attachment, suspension rope secondary attachment (if present), and guide wire rope attachments will show no evidence of wear or fatigue.

n. The wind tower lift will not drift when subjected to a static full load.

o. Maintenance logs, tags, and other necessary documentation will be available in sufficient detail to establish that maintenance is occurring pursuant to the manufacturer's schedule.

p. Guide rope tension device, safety rope tension device, and suspension rope tension device will pass a visual test for proper tension.

q. Power cord catch basket will pass a visual inspection.

r. Safety set distance, overspeed trip speed, overload limit setting, and maximum overload allowed will not exceed manufacturer's recommendations.

s. A communication device, if installed in the car, will be operable.

t. Any other items on the manufacturer's recommended inspection checklist will pass inspection.

372.11(9) The owner or owner's representative shall provide weights as needed to perform necessary tests during inspections.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.12(89A) Alterations, repairs, replacements and maintenance.

372.12(1) *General.* Except as set forth in this rule, all maintenance, repairs, replacements, and alterations comply with the edition of ASME A17.1 currently adopted for new conveyances or ASME A17.7-2007/CSA B44-07, as applicable. "Alterations" in 481—Chapter 371 describes alterations that require that the entire conveyance be brought into compliance with the most current codes.

372.12(2) *Exemption for button renumbering.* All maintenance, repairs and alterations to devices covered by ANSI A117.1 comply with ANSI A117.1 (2017), except for requirement 407.4.7.1.2.

372.12(3) *Sump pump exemption.* The provisions of ASME A17.1 that require a pit sump or drain do not apply to an elevator alteration when all of the following criteria are met:

a. No other code or rule requires that the pit be excavated or lowered.

b. The alteration plans do not include the excavation or lowering of the pit floor for any other reason.

c. There is evidence that groundwater has not entered the pit previously.

d. The location and geology of the building indicate a likelihood that groundwater would enter the pit if the foundation or pit floor were breached to install the pit sump or drain.

e. A description of alternative means to maintain the pit in a dry condition is provided to the director with the alteration permit application.

f. The director approves the alternative means to maintain the pit in a dry condition.

g. The alternative means to maintain the pit in a dry condition are installed or implemented as described in the alteration permit application.

372.12(4) *Pit excavation exemption.* For elevators altered before August 1, 2018, the full length of the platform guard set forth in ASME A17.1, Rule 2.15.9.2(a), will not be required if all of the following criteria are met:

a. No other code or rule requires that the pit be excavated or lowered.

b. The alteration plans do not include the excavation or lowering of the pit floor for any other reason.

c. A full-length platform guard would strike the pit floor when the elevator is on its fully compressed buffer.

d. The clearance between the bottom of the platform guard and the pit floor is 2.5 centimeters (1 inch) when the elevator is on its fully compressed buffer.

372.12(5) *Sprinkler retrofits and shunt trip breakers.* When a sprinkler is added to a hoistway or machine room, the conveyance shall comply with the following:

a. The installation complies with the applicable version of ASME A17.1, Rule 2.8.3.3.

b. The elevator controls comply with the phase I fire recall provisions of the applicable version of ASME A17.1, Rule 2.27.3.

c. The applicable version of ASME A17.1 is determined by reference to rule 481—372.1(89A). For purposes of this subrule, the relevant subrule of rule 481—372.1(89A) applies based on the date the sprinkler is installed instead of the date the conveyance was installed.

372.12(6) *Alterations of handicapped restricted use elevators.* A component of a handicapped restricted use elevator being altered will comply with the portions of ASME A17.1, section 5.3, applicable to the component. The edition of ASME A17.1 adopted by reference in rule 481—372.1(89A) will be applied.

372.12(7) *Hoistway lighting.* If the controller for an elevator is being replaced, permanent lighting shall be installed in the hoistway of the elevator. Three-way switches to control the hoistway lighting shall be installed at the pit access door and the top landing access door. The lighting will be sufficient to provide 10 foot-candles of light to the center of the elevator path measured when the car top lights are off. Engineering calculations that prove 10 foot-candles of light are provided to the center of the elevator path may be substituted for light meter measurements under circumstances such as a glass back car where use of a light meter is not practical.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.13(89A) Power-operated special purpose elevators. The provisions contained in ASME A17.1, section 5.7, are adopted by reference.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.14(89A) Inclined and vertical wheelchair lifts. The provisions contained in ASME Safety Standard for Platform Lifts and Stairway Chairlifts A18.1, sections 1, 2, 3, 8, 9, and 10, are adopted by reference for all inclined and vertical wheelchair lifts.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.15(89A) Hand-powered elevators. Hand-powered elevators shall not be installed after January 1, 1983.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.16(89A) Limited-use/limited-application elevators. The provisions contained in ASME A17.1, section 5.2, are adopted by reference.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.17(89A) Rack and pinion, screw-column elevators. The provisions contained in ASME A17.1, sections 4.1 and 4.2, are adopted by reference.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.18(89A) Inclined elevators. The provisions contained in ASME A17.1, section 5.1, are adopted by reference.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.19(89A) Material lift elevators. The provisions contained in ASME A17.1, Sections 7.4 through 7.7 and 7.9 through 7.11, are adopted by reference for material lift elevators installed on or after August 10, 2016.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.20(89A) Elevators used for construction. The provisions contained in ASME A17.1, section 5.10, are adopted by reference only as they pertain to elevators utilizing permanent equipment in a permanent location.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.21(89A) Construction personnel hoists. The provisions of ANSI A10.4-2007 are adopted by reference for construction personnel hoists as defined by ANSI A10.4-2007. Notwithstanding the ANSI definition, these conveyances may be used only temporarily during construction.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.22(89A) Alarm bell. An automatic passenger elevator shall be provided with an alarm bell that is activated by a switch marked "ALARM" located in or adjacent to the car operating panel. The alarm bell shall be audible inside the car and outside the hoistway.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.23(89A) Child entrapment safeguards. This rule applies to a passenger elevator unless it has a car door consisting of a solid panel.

372.23(1) For purposes of this rule, "distance with deflection between the doors or gates" means the distance between the closed car door or gate and the closed hoistway door or gate measured at the greatest perpendicular distance with deflection.

372.23(2) For purposes of this rule, measurements of door or gate deflection are made in the manner described by ASME A17.1, section 2.14.4.6.

372.23(3) Door or gate deflection shall not exceed .75 inch.

372.23(4) If the distance with deflection between the doors or gates exceeds 5 inches, a means shall be provided to disable the elevator if a person is in the space between the closed doors or gates.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.24(89A) Handicapped restricted use elevators. All handicapped restricted use elevators must meet ANSI A17.1 (1981), Part V. Additionally, the elevators shall comply with the following limitations:

1. The elevator will be used only by a maximum of one disabled person and one attendant at a time. Where a disabled person cannot operate the elevator in a manner that will ensure access to all operating controls and safety features, an attendant will accompany the disabled person.
2. The elevator will be key-operated and will not be capable of being called by buttons or switches but may be called by a key operator.
3. Keys to operate the elevator will be in the control of the disabled person, the attendant or persons in positions of responsibility at the location.
4. A list will be maintained at the location indicating the persons holding keys for the operation of the elevator.
5. Each landing and the elevator car will be posted to indicate that the elevator is only for the use of disabled persons.
6. The travel distance of the elevator will not exceed 50 feet.

[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—372.25(89A) Elevators in broadcast towers. This rule applies to special purpose elevators located in broadcast towers.

372.25(1) *Anchorages.* Anchorages shall be attached inside the car and on the car top.

372.25(2) *Emergency stop switch.* An emergency stop switch compliant with ASME A17.1, sections 2.26.2.8 and 5.7.19, shall be installed on the car top.
[**ARC 8774C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 89A.

CHAPTER 373
CONVEYANCES INSTALLED PRIOR TO JANUARY 1, 1975

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 73]
[Prior to 7/9/25, see Labor Services Division[875] Ch 73]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/12/30

481—373.1(89A) Scope, definitions, and schedule.

373.1(1) This chapter establishes minimum safety standards for all conveyances installed prior to January 1, 1975, except material lift elevators. Conveyances installed on or after January 1, 1975, shall conform with the requirements set forth in 481—Chapter 372. Material lift elevators installed prior to January 1, 1975, are not subject to regulation pursuant to Iowa Code section 89A.2.

373.1(2) The definitions contained in American National Standard Safety Code for Elevators, Dumbwaiters, Escalators, and Moving Walks, A17.1 (1971), are applicable as used in this chapter to the extent that they do not conflict with the definitions contained in Iowa Code chapter 89A or 481—Chapter 371.

373.1(3) Except as noted in this rule, the American Society of Mechanical Engineers Safety Code for Existing Elevators and Escalators, A17.3 (2011), is adopted by reference with an enforcement date of May 1, 2021.

a. If a code provision that is more restrictive than A17.3 (2011) applied to a conveyance when the conveyance was installed, the more restrictive provision remains in effect.

b. A17.3 (2011) Part X applies to handicapped restricted use elevators without regard to the scope of provisions set forth in A17.3 (2011) Part X.

c. Provisions of A17.3 (2011) that require installation of a new controller to implement Phase 1 and Phase 2 fire service or car top operation are not adopted by reference and will not be enforced in Iowa.

d. A17.3 (2011), Rule 2.3.2, is intended to prevent the accumulation of sewer gas in an elevator pit and does not require the addition of a drain pipe in an existing pit. An air gap in an existing drain pipe is adequate compliance.

e. The following substitutes for the final sentence of A17.3 (2011), Rule 2.1.5(b): “Previously installed 60-inch chains are deemed to be in compliance.”

f. An elevator that was legally installed with guide rails made of materials other than steel is not required to replace the guide rails due to the adoption of A17.3 (2011).

g. Electrical protective devices required by A17.3, requirement 3.10.4, shall cause the electric power to be removed from the elevator driving-machine motor and brake.

h. Control panels that are designed with a door or cover and lock shall be locked when service is not being performed if equipment unrelated to the elevator is in the machine room. Group 1 security as set forth in A17.1, section 8.1, shall be utilized.

i. A car top emergency exit pursuant to A17.3 (2011), requirement 3.4.4.1(a), is not required for a hydraulic elevator if the elevator has manual lowering and it is not equipped with a plunger gripper or safety as described in ASME A17.1 (2013), requirement 8.6.5.8.

373.1(4) The American Society of Mechanical Engineers Safety Code for Elevators and Escalators, A17.1-2013/CSA B44-13 (2013), Rule 2.14.7.1.4, concerning car top lighting and car top electrical outlets, is adopted by reference with an effective date of May 1, 2021. However, if a car top already has a single outlet, installation of a duplex outlet will not be required.

[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.2(89A) Electrical protective devices. All electrical equipment pertaining to the elevator shall conform to ANSI C1-1975 (NFPA 70-1975).

[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.3(89A) Maintenance, repair and alteration requirements.

373.3(1) *General.* Except as set forth in this rule, all maintenance, repairs and alterations comply with the edition of ASME A17.1, Part 8, currently adopted for new conveyances or ASME A17.7-2007/CSA B44-07, as applicable. Alterations that require that the entire conveyance be brought into compliance with the most current code are described in 481—Chapter 371.

373.3(2) *Exemption for button numbering.* All maintenance, repairs and alterations to devices covered by ANSI A117.1 comply with ANSI A117.1 (2017), except for requirement 407.4.7.1.2.

373.3(3) *Sump pump exemption.* The provisions of ASME A17.1 that require a pit sump or drain do not apply to an elevator alteration when all of the following criteria are met:

a. No other code or rule requires that the pit be excavated or lowered.

b. The alteration plans do not include the excavation or lowering of the pit floor for any other reason.

c. There is evidence that groundwater has not entered the pit previously.

d. The location and geology of the building indicate a likelihood that groundwater would enter the pit if the foundation or pit floor were breached to install the pit sump or drain.

e. A description of alternative means to maintain the pit in a dry condition is provided to the director with the alteration permit application.

f. The director approves the alternative means to maintain the pit in a dry condition.

g. The alternative means to maintain the pit in a dry condition are installed or implemented as described in the alteration permit application.

373.3(4) *Pit excavation exemption.* The full length of the platform guard set forth in ASME A17.1, Rule 2.15.9.2(a), is not required if all of the following criteria are met:

a. No other code or rule requires that the pit be excavated or lowered.

b. The alteration plans do not include the excavation or lowering of the pit floor for any other reason.

c. A full-length platform guard would strike the pit floor when the elevator is on its fully compressed buffer.

d. The clearance between the bottom of the platform guard and the pit floor is 2.5 centimeters (1 inch) when the elevator is on its fully compressed buffer.

373.3(5) *Sprinkler retrofits and shunt trip breakers.* When a sprinkler is added to a hoistway or machine room, the conveyance shall comply with the following:

a. For installations, the applicable version of ASME A17.1, Rule 2.8.3.3.

b. For elevator controls, the phase I fire recall provisions of the applicable version of ASME A17.1, Rule 2.27.3.

c. The applicable version of ASME A17.1 is determined by reference to rule 481—372.1(89A). For purposes of this subrule, the relevant subrule of rule 481—372.1(89A) applies based on the date the sprinkler is installed instead of the date the conveyance was installed.

373.3(6) *Safety bulkheads.* Documentation from the manufacturer establishing that a safety bulkhead was installed shall establish compliance with ASME A17.1, Rule 8.6.5.8.

373.3(7) *Alterations of handicapped restricted use elevators.* A component of a handicapped restricted use elevator being altered complies with the portions of ASME A17.1, section 5.3, applicable to the component. The edition of ASME A17.1 adopted by reference in rule 481—372.1(89A) is applied.

373.3(8) *Hoistway lighting.* If the controller for an elevator is being replaced, permanent lighting is installed in the hoistway of the elevator. Three-way switches to control the hoistway lighting are installed at the pit access door and the top landing access door. The lighting shall be sufficient to provide 10 foot-candles of light to the center of the elevator path measured when the car top lights are off. Engineering calculations that prove 10 foot-candles of light are provided to the center of the elevator path may be substituted for light meter measurements under circumstances such as a glass back car where use of a light meter is not practical.

[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.4(89A) Existing hand elevators. A sign reading "Danger—Elevator Hoistway—Keep Closed" shall be mounted on each hoistway door with letters at least 2 inches high.

[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.5(89A) Dumbwaiters. All dumbwaiters whether electric or hand powered conform to ANSI A17.1 (1971), section 700. Exceptions: Required rules for hoistway construction as set forth in ANSI A17.1 (1971), do not apply to existing installations.
[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.6(89A) Child entrapment safeguard requirements. This rule applies to a passenger elevator unless it has a car door consisting of a solid panel.

373.6(1) For purposes of this rule, "distance with deflection between the doors or gates" means the distance between the closed car door or gate and the closed hoistway door or gate measured at the greatest perpendicular distance with deflection.

373.6(2) For purposes of this rule, measurements of door or gate deflection are made in the manner described by ASME A17.1, section 2.14.4.6.

373.6(3) Door or gate deflection do not exceed .75 inch.

373.6(4) If the distance with deflection between the doors or gates exceeds 5 inches, a means will be provided to disable the elevator if a person is in the space between the closed doors or gates.
[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.7(89A) Elevators in broadcast towers. This rule applies to special purpose elevators located in broadcast towers.

373.7(1) *Anchorages.* Anchorages shall be attached inside the car and on the car top.

373.7(2) *Emergency stop switch.* An emergency stop switch compliant with ASME A17.1, sections 2.26.2.8 and 5.7.19, shall be installed on the car top.
[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

481—373.8(89A) Handicapped restricted use elevator requirements. All handicapped restricted use elevators must meet ANSI A17.1 (1981), Part V. Additionally, the elevators will comply with the following limitations:

1. The elevator is used only by a maximum of one disabled person and one attendant at a time. Where a disabled individual cannot operate the elevator in a manner that will ensure access to all operating controls and safety features, an attendant accompanies the disabled individual.
2. The elevator is key-operated and not capable of being called by buttons or switches but may be called by a key operator.
3. Keys to operate the elevator are in the control of the disabled person, the attendant or persons in positions of responsibility at the location.
4. A list is maintained at the location indicating the persons holding keys for the operation of the elevator.
5. Each landing and the elevator car will be posted to indicate that the elevator is only for the use of disabled persons.
6. The travel distance of the elevator will not exceed 50 feet.

[**ARC 8777C**, IAB 1/8/25, effective 2/12/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 89A.

CHAPTERS 374 to 379
Reserved

BOILER AND PRESSURE VESSEL BOARD

CHAPTER 380
BOILER AND PRESSURE VESSEL BOARD
ADMINISTRATIVE AND REGULATORY AUTHORITY

[Prior to 7/9/25, see Labor Services Division[875] Ch 80]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—380.1(89) Definitions. The definitions contained in this rule apply to 481—Chapters 380 through 395.

"Board" means the boiler and pressure vessel board.

"Board office" means the offices of the department of inspections, appeals, and licensing.

"Department" means the department of inspections, appeals, and licensing.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

[**ARC 8882C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—380.2(89) Authority of the board. The authority and responsibilities of the board include but are not limited to the following:

380.2(1) Adopting rules necessary to protect public safety and health and to administer the duties of the board.

380.2(2) Hearing and deciding appeals concerning boiler and pressure vessel inspection reports.

380.2(3) Establishing fees.

380.2(4) Establishing committees of the board.

[**ARC 8882C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—380.3(89) Organization of board officers. The board shall elect a chairperson, vice chairperson, and secretary from its membership at the first meeting after July 1 of each year. Neither the commissioner nor the commissioner's designee may serve as chairperson. The chairperson presides at meetings, appoints committees, and performs all duties and exercises all powers of the chairperson. The vice chairperson, in the absence or incapacity of the chairperson, performs all duties and exercises all powers of the chairperson.

[**ARC 8882C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—380.4(21,89) Public meetings.

380.4(1) The board shall hold at least one meeting each calendar quarter.

380.4(2) Board meetings are governed in accordance with Iowa Code chapter 21, and the board's proceedings are conducted in accordance with Robert's Rules of Order.

380.4(3) The chairperson or the chairperson's designee will prepare an agenda listing all matters to be discussed at the meeting.

380.4(4) A majority of the members of the board constitute a quorum, and all final motions and actions must receive a majority of a quorum vote.

380.4(5) Members of the public may be present during board meetings unless the board votes to hold a closed session in accordance with Iowa Code chapter 21. The dates and locations of board meetings may be obtained from the board's website or the board office.

380.4(6) At every regularly scheduled board meeting, time will be designated for public comment. During the public comment period, any person may speak for up to two minutes. Requests to speak for two minutes per person when a particular topic comes before the board may be granted at the discretion of the chairperson. The chairperson may limit total public comment time to ten minutes.

380.4(7) The person presiding at a meeting of the board may exclude a person from an open meeting for behavior that obstructs the meeting.

[**ARC 8882C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—380.5(17A,89) Procedures for waivers in addition to 7—Chapter 2504.

380.5(1) *Filing petition.* A petition is deemed filed when it is received in the board's office. A petition and related materials for consideration should be sent to the Boiler and Pressure Vessel Board, Department of Inspections, Appeals, and Licensing, 6200 Park Avenue, Suite 100, Des Moines, Iowa 50321.

380.5(2) *Content of petition.* A petition for waiver shall include the state boiler identification number of the relevant object. The required form for a petition for waiver is available on the department's website.

380.5(3) *Posting of orders granting waivers.* The order or a copy of the order granting a waiver shall be conspicuously and permanently posted in the room where the object is installed.

380.5(4) *Violations.* Violation of a condition in a waiver order is a violation of the particular rule for which the waiver was granted. The recipient of a waiver under this rule who violates a condition of the waiver may be subject to the same remedies or penalties as a person who violates the rule at issue.

[**ARC 0255D**, IAB 5/13/26, effective 4/23/26]

481—380.6(17A,89) Procedures for contested cases in addition to 7—Chapter 2506.

380.6(1) *Reconsideration of inspection report.* The owner or operator of a piece of equipment subject to a written inspection report may petition the director for reconsideration of the report within 30 days of the issuance of the report. Failure to seek timely reconsideration of the inspection report from the director is a waiver of all appeal rights under Iowa Code section 89.14(6). The burden of demonstrating compliance with all applicable statutory provisions, administrative rules, and ASME Code sections rests upon the petitioning owner or operator.

a. A petition for reconsideration must be signed by the requesting party or a representative of that party. The required form for a petition for reconsideration is available on the board's website. A petition for reconsideration shall specify:

(1) The party seeking reconsideration, including mailing address and telephone number;
(2) The location of the equipment subject to the challenged inspection report;
(3) The inspection date;
(4) The inspector who issued the challenged inspection report;
(5) The specific findings or conclusions to which exception is taken;
(6) The relief sought.

b. A copy of the challenged inspection report shall be attached to the petition for reconsideration along with all relevant documents that the petitioning party desires the director to consider when evaluating the petition.

c. The director or a designee of the director is authorized to seek additional information relating to a petition for reconsideration from the petitioning party or any other entity possessing information the director deems relevant to the petition. This subrule, however, does not impose any responsibility or duty on the director to discover documents or other information that was not submitted with the petition for reconsideration.

d. Any petition for reconsideration that is not received by the office of the director within 30 days of the issuance of the challenged inspection report is untimely and will not be considered by the director.

e. Requests for waivers of administrative rules may only be made to the board pursuant to the provisions of rule 481—380.5(17A,89).

f. In ruling on a petition for reconsideration, the director may:

(1) Affirm the inspection report as issued;
(2) Issue an amended inspection report;
(3) Rescind the inspection report;
(4) Deny the petition as untimely.

g. Any petition for reconsideration that is not ruled upon by the director within 20 days of receipt by the office of the director is denied by the director, and the challenged inspection report will be considered affirmed as issued.

380.6(2) *Appeal to the board.* The director's ruling on a petition for reconsideration or the director's deemed denial of a petition for reconsideration may be appealed to the board. An appeal must be filed in writing with the board within 30 calendar days of the earlier of either the issuance of the director's written ruling on a petition for reconsideration or the director's deemed denial of a petition for reconsideration. At

a minimum, an appeal includes a short and concise statement of the basis for the appeal. The required form for an appeal is available on the board's website. Consideration of an appeal of a ruling on a petition for reconsideration is a contested case proceeding subject to the provisions of Iowa Code chapter 17A. The director has an automatic right of intervention in any appeal of the ruling on petition for reconsideration and may defend the ruling in a contested case proceeding.

380.6(3) *Informal review.*

a. In order to preserve the ability of board members to participate in decision making, parties who desire participation in an informal review must therefore waive their right to seek disqualification of a board member based solely on the board member's participation in the informal review. Parties would not be waiving their right to seek disqualification on any other ground. By electing to participate in informal review, a party accordingly agrees that a participating board member is not disqualified from acting as a presiding officer in a later contested case proceeding.

b. The board may propose a preliminary order at the time of informal review. If a party does not consent to the preliminary order, the party must submit a request to proceed with formal contested case proceedings, including hearing, within ten days of the informal review.

c. File transmitted to the board. Upon receipt of a notice of hearing issued by the board, the director shall within 30 days forward to the board and all parties of record to the appeal copies of the challenged inspection report, the appellant's petition for reconsideration and all supporting documents, all other documents collected by the director in ruling on the petition for reconsideration, and the director's ruling on the petition for reconsideration.

380.6(4) *Presiding officer.*

a. The presiding officer in all contested cases is the board, a panel of board members, or an administrative law judge assigned by the department of inspections, appeals, and licensing. When board members act as presiding officer, they conduct the hearing and issue either a final decision or, if a quorum of the board is not present, a proposed decision. The board may be assisted by an administrative law judge when the board acts as presiding officer.

b. The board or a panel of board members when acting as presiding officer may request that an administrative law judge perform certain functions as an aid to the board or board panel, such as ruling on prehearing motions, conducting the prehearing conference, ruling on evidentiary objections at hearing, assisting in deliberations, or drafting the written decision for review by the board or board panel.

c. All rulings by an administrative law judge who acts either as presiding officer or assistant to the board are subject to appeal to the board. A party must timely seek intra-agency appeal of prehearing rulings or proposed decisions to exhaust adequate administrative remedies. While a party may seek immediate board or board panel review of rulings made by an administrative law judge when sitting with and acting as an aid to the board or board panel during a hearing, such immediate review is not required to preserve error for judicial review.

d. Unless otherwise provided by law, when reviewing a proposed decision of a panel of the board or an administrative law judge, board members have the powers of and shall comply with the provisions of this chapter that apply to presiding officers.

380.6(5) *Subpoenas in a contested case.*

a. A request for a subpoena shall include the following information, as applicable:

(1) The name, address and telephone number of the person requesting the subpoena;
(2) The name and address of the person to whom the subpoena is directed;
(3) The date, time and location at which the person is commanded to attend and give testimony;
(4) Whether the testimony is requested in connection with a deposition or hearing;
(5) A description of the books, papers, records or other evidence requested;
(6) The date, time and location for production, or inspection and copying.

b. Each subpoena shall contain, as applicable:

(1) The caption of the case;
(2) The name, address and telephone number of the person who requested the subpoena;
(3) The name and address of the person to whom the subpoena is directed;
(4) The date, time and location at which the person is commanded to appear;

(5) Whether the testimony is commanded in connection with a deposition or hearing;
(6) A description of the books, papers, records or other evidence the person is commanded to produce;
(7) The date, time and location for production, or inspection and copying;
(8) The time within which a motion to quash or modify the subpoena must be filed;
(9) The signature, address and telephone number of the presiding officer;
(10) The date of issuance;
(11) A return of service attached to the subpoena.

c. Any person who is aggrieved or adversely affected by compliance with the subpoena or any party to the contested case who desires to challenge the subpoena must, within 14 days after service of the subpoena or before the time specified for compliance if such time is less than 14 days, file with the board a motion to quash or modify the subpoena. The motion shall describe the legal reasons why the subpoena should be quashed or modified, and may be accompanied by legal briefs or factual affidavits.

d. Upon receipt of a timely motion to quash or modify a subpoena, the board chairperson shall request an administrative law judge to hold a hearing and issue a decision. Oral argument may be scheduled at the discretion of the board or the administrative law judge. The administrative law judge may quash or modify the subpoena or deny the motion.

e. A person who is aggrieved by a ruling of an administrative law judge and who desires to challenge that ruling must appeal the ruling to the board by serving to the board, either in person or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge. If the decision of the administrative law judge to quash or modify the subpoena or to deny the motion to quash or modify the subpoena is appealed to the board, the board may uphold or overturn the decision of the administrative law judge.

f. If the person contesting the subpoena is not the party whose appeal is the subject of the contested case, the board's decision is final for purposes of judicial review. If the person contesting the subpoena is the party whose appeal is the subject of the contested case, the board's decision is not final for purposes of judicial review until there is a final decision in the contested case.

380.6(6) *Decisions.*

a. Proposed decision. Decisions issued by a panel of less than a quorum of the board or by an administrative law judge are proposed decisions. A proposed decision issued by a panel of the board or an administrative law judge becomes a final decision if not timely appealed by any party or reviewed by the board.

b. Final decision. When a quorum of the board presides over the reception of evidence at the hearing, the decision is a final decision. A copy of the final decision and order shall immediately be sent by certified mail to the appellant's last-known post office address or may be served as in the manner of original notices. Copies shall be mailed by interoffice mail or first-class mail to the counsel of record.

CHAPTER 381
BOILER AND PRESSURE VESSEL BOARD WAIVERS

[Prior to 7/9/25, see Labor Services Division[875] Ch 81]

Rescinded by 2026 Iowa Acts, Senate File 2463, section 4, effective July 1, 2026. See Uniform Rules on Agency Procedure at 7—Chapters 2500 through 2506 and any corresponding rules adopted by this agency.

CHAPTER 382
CONTESTED CASES BEFORE THE BOILER AND PRESSURE VESSEL BOARD

[Prior to 7/9/25, see Labor Services Division[875] Ch 84]

Rescinded by 2026 Iowa Acts, Senate File 2463, section 4, effective July 1, 2026. See Uniform Rules on Agency Procedure at 7—Chapters 2500 through 2506 and any corresponding rules adopted by this agency.

CHAPTERS 383 to 389

Reserved

CHAPTER 390
ADMINISTRATION OF THE BOILER AND PRESSURE VESSEL PROGRAM

[Prior to 1/14/98, see 347—Chs 41 to 49]
[Prior to 8/16/06, see 875—Chs 200, 202]
[Prior to 7/9/25, see Labor Services Division[875] Ch 90]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—390.1(89) Purpose and scope. These rules institute administrative and operational procedures for implementation of Iowa Code chapter 89. An object is not considered "under pressure" and is not within the scope of Iowa Code chapter 89 when there is clear evidence that the manufacturer did not intend it to be operated at more than 3 psi and the object is operating at 3 pounds per square inch (psi) or less. Jurisdiction is limited to objects, appurtenances, controls, safety devices, and equipment rooms as required by Iowa rules.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.2(89,252J,272D) Definitions. To the extent they do not conflict with the definitions contained in Iowa Code chapter 89, the definitions in this rule are applicable to the rules contained in 481—Chapters 390 through 395.

"Alteration" means a change in the object described on the original manufacturer's data report that affects the pressure-retaining capability of the pressure-retaining object. A nonphysical change such as an increase in the maximum allowable working pressure (internal or external), an increase in design temperature, or a reduction in minimum temperature of a pressure-retaining item is considered an alteration.

"ANSI/ASME CSD-1" means Control and Safety Devices for Automatically Fired Boilers.

"Appurtenance" means any item or equipment that is attached to the object and is part of the boiler external piping.

"ASME" means the American Society of Mechanical Engineers.

"Boiler" means a vessel in which water or other liquids are heated, steam or other vapors are generated, steam or other vapors are superheated, or any combination thereof, under pressure or vacuum by the direct application of heat. "Boiler" includes all temporary boilers.

"Boiler external piping" means all boiler piping and components as set forth in the scope of the edition of ASME B31.1 currently adopted by reference in 481—Chapter 391.

"Certificate of noncompliance" means:

1. A certificate of noncompliance issued by the child support recovery unit, department of health and human services, pursuant to Iowa Code chapter 252J; or
2. A certificate of noncompliance issued by the centralized collection unit of the department of revenue pursuant to Iowa Code chapter 272D.

"CFR" means Code of Federal Regulations.

"Construction or installation code" means the applicable standard for construction or installation in effect at the time of installation.

"CSD-1 report" means Manufacturer's/Installing Contractor's Report for ASME CSD-1.

"Department" means the department of inspections, appeals, and licensing.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Electric boiler" means a power boiler, heating boiler, high or low temperature water boiler in which the source of heat is electricity.

"Exit" means a doorway, hallway, or similar passage that will allow free, normally upright unencumbered egress from an area.

"External inspection" means a complete examination made of the external surfaces and safety devices while the object is in operation, unless the object is required to be shut down pursuant to Iowa Code section 89.3.

"High temperature water boiler" means a water boiler intended for operations at pressures in excess of 160 psig or temperatures in excess of 250 degrees F.

"Hot water heating boiler" means a boiler in which no steam is generated, from which hot water is circulated for heating purposes and then returned to the boiler, and that operates at a pressure not exceeding 160 psig or a temperature of 250 degrees F at the boiler outlet.

"Hot water supply boiler" means a boiler that:

1. Operates at a pressure not exceeding 160 psig;
2. Furnishes hot water to be used externally to itself; and, either:

- Bears a National Board "H" stamp and has a temperature less than or equal to 250 degrees F at or near the boiler outlet, or,
- Bears a National Board "HLW" stamp and has a temperature less than or equal to 210 degrees F at or near the boiler outlet.

"Installation" means the process by which an object is connected to a system for operation. This applies to all objects whether they are new, used, or being brought back to service after being removed.

"Institution of health and custodial care" means any of the following:

1. A health care facility as defined by Iowa Code section 135C.1;
2. An assisted living program as defined by Iowa Code section 231C.2;
3. A boarding home as defined by Iowa Code section 135O.1;
4. A hospice that offers inpatient services in an institutional setting;
5. Any institution or facility in which persons are housed to receive medical, health, or other care or treatment; or
6. Any other institution or facility in which persons are housed to receive assistance with meeting personal needs or activities of daily living.

A facility or office that provides care and services only on an outpatient basis is not an "institution of health and custodial care."

"Internal inspection" means as complete an examination as can be reasonably made of the internal surfaces of an object while it is shut down and access for examination is attained through the removal of any manhole plates, handhole plates, blind flanges, piping spools or fittings attached to the object. A determination that an examination cannot be reasonably made is not based on a failure of the owner or user to provide clearance or on failure of the owner or user to provide for the inspector's safety and health.

"ISO" means International Standards Organization.

"Lap seam crack" means a crack found in lap seams, extending parallel to the longitudinal joint and located either between or adjacent to rivet holes.

"Miniature boiler" means a boiler that does not exceed a 16-inch inside shell diameter, 20 square feet of heating surface (not applicable to electric boilers), 5 cubic feet of gross volume (exclusive of casing and insulation), and 100 psig maximum allowable working pressure.

"National Board" means the National Board of Boiler and Pressure Vessel Inspectors, whose membership is composed of the chief inspectors of jurisdictions who are charged with the enforcement of the provisions of boiler codes.

"National Board Inspection Code" or *"NBIC"* means the Manual for Boiler and Pressure Vessel Inspectors (ANSI/NB 23) published by the National Board. Copies of the code may be obtained from the National Board.

"Object" means a boiler or pressure vessel.

"OEM" means original equipment manufacturer.

"Owner or user" means any person, firm, or corporation legally responsible for the installation, operation, and maintenance of any object within the jurisdiction.

"Power boiler" means a boiler in which steam or other vapor is generated at a pressure of more than 15 pounds per square inch or a water boiler intended for operation at pressures in excess of 160 pounds per square inch or temperatures in excess of 250 degrees F.

"Process steam generator" means a vessel or system of vessels comprised of one or more drums and one or more heat exchange surfaces as used in waste heat or heat recovery type steam boilers.

"Psig" means pounds per square inch gage.

"Relief valve" means an automatic pressure-relieving device actuated by a static pressure upstream of the valve that opens further with the increase in pressure over the opening pressure and that is used primarily for liquid service.

"Repair" means work necessary to return a boiler or pressure vessel to a safe operating condition.

"Rupture disk device" means a nonreclosing pressure-relief device actuated by inlet static pressure and designed to function by the bursting of a pressure-containing disk.

"Safe point of discharge" means the same as in the National Board Inspection Code: a location that will not cause property damage, cause equipment damage, or create a health or safety threat to personnel in the event of discharge.

"Safety appliance" includes, but not be limited to:

1. Rupture disk device;
2. Safety relief valve;
3. Safety valve;
4. Temperature limit control;
5. Pressure limit control;
6. Gas switch;
7. Air switch; or
8. Any major gas train control.

"Safety relief valve" means an automatic, pressure-actuated relieving device suitable for use as a safety or relief valve, depending on application.

"Safety valve" means an automatic, pressure-relieving device actuated by the static pressure upstream of the valve and characterized by full opening pop action. The safety valve is used for gas or vapor service.

"Special inspection" means an inspection that is not required by Iowa Code chapter 89.

"Temperature and pressure relief valve" means a valve set to relieve at a designated temperature and pressure.

"Temporary object" means a boiler, unfired steam pressure vessel, or combination thereof that is not a permanent fixture or part of normal operation of the facility.

"Unfired steam boiler" means a vessel or system of vessels intended for operation at a pressure in excess of 15 psig for the purpose of producing and controlling an output of thermal energy.

"Unfired steam pressure vessel" means a vessel or container used for the containment of steam pressure either internal or external in which the pressure is obtained from an external source. "Unfired steam pressure vessel" may include items such as expansion tanks, flash tanks, and condensate return tanks.

"U.S. customary units" means feet, pounds, inches and degrees Fahrenheit.

"Water heater supply boiler" means a closed vessel in which water is heated by combustion of fuels, electricity or any other source and withdrawn for use external to the system at pressure not exceeding 160 psig and includes all controls and devices necessary to prevent water temperatures from exceeding 210 degrees F.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.3(89) Iowa identification numbers. All objects shall be identified by an Iowa identification number. State inspectors and special inspectors shall assign identification numbers as directed by the department to all jurisdictional objects that lack numbers. Identification numbers shall be attached in plain view to the object using one of the following methods:

1. A yellow sticker 2 inches by 3 inches affixed to the object and bearing the number.
2. A metal tag 1 inch by 2½ inches affixed to the object and bearing the number.
3. Numbers at least 5/16 of an inch high and stamped directly on the object.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.4(89) Preinspection owner or user preparation.

390.4(1) *Preparation of objects.* Each owner or user shall ensure that each object covered by Iowa Code chapter 89 is prepared for inspection pursuant to this rule.

390.4(2) *Confined space and lockout, tagout procedures.*

a. If an object is a non-permit-required confined space or a permit-required confined space, the owner or user must prepare the object for inspection accordingly. Otherwise the inspector will not enter the space.

b. It is the duty of the owner or user to inform any inspector of the owner's or user's confined space entry and lockout, tagout procedures and supply to the inspector all information necessary to assess whether the confined space is safe for entry. It is the right of an inspector to verify any of the information supplied.

c. The owner or user shall have all objects locked and tagged, as applicable, prior to the inspector's entry for inspection or testing.

d. For entry into a permit-required confined space, the owner or user shall provide the necessary equipment such as air monitors and a qualified attendant who has received all the information relevant to the entry.

390.4(3) *Hydrostatic tests.* The owner or user shall prepare for and apply a hydrostatic test, whenever necessary, on the date specified by the inspector, which date will be not less than seven days after the date of notification.

390.4(4) *Boilers.* A boiler shall be prepared for internal inspection in the following manner:

a. Fluid will be drawn off and the boiler washed thoroughly.

b. Manhole and handhole plates, washout plugs and inspection plugs in water columns will be removed as required by the inspector. The furnace and combustion chambers will be thoroughly cooled and cleaned.

c. All grates of internally fired boilers will be removed.

d. Brickwork will be removed as required by the inspector in order to determine the condition of the boiler, header, furnace, supports or other parts.

e. Low-water fuel cutoff controls will be opened or removed to allow for visual inspection.

390.4(5) *Pressure vessels.* The extent of inspection preparation for a pressure vessel will vary. If the inspection is to be external only, advance preparation is not required other than to afford reasonable access to the vessel. For combined internal and external inspections of small vessels of simple construction handling air, steam, nontoxic or nonexplosive gases or vapors, minor preparation is required, including affording reasonable means of access and removing manhole plates and inspection openings. In other cases, preparation includes removing the internal fittings and appurtenances to permit satisfactory inspection of the interior of the vessel if required by the inspector.

390.4(6) *Removal of covering or brickwork to permit inspection.* If the object is jacketed so that the longitudinal seams of shells, drums, or domes cannot be seen, sufficient jacketing, setting wall, or other form of casing or housing shall be removed to permit reasonable inspection of the seams and so that the size of rivets, pitch of the rivets, and other data necessary to determine the safety of the object may be obtained, providing the information cannot be determined by other means. Brickwork shall be removed as required by the inspector in order to determine the condition of the boiler, header, furnace, supports or other parts.

390.4(7) *Improper preparation for inspection.* If an object has not been properly prepared for an internal inspection, or if the owner or user fails to comply with the requirements for hydrostatic tests as set forth in this chapter, the inspector may decline to make the inspection or test, and the inspection certificate will be withheld until the owner or user complies with the requirements.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.5(89) Inspections.

390.5(1) *General.* All boilers and unfired steam pressure vessels covered by Iowa Code chapter 89 are inspected according to the requirements of the National Board Inspection Code (2021), which is hereby adopted by reference. A department inspector or special inspector must perform the inspections.

390.5(2) *Schedule.*

a. All required inspections must be performed according to the schedule set forth in Iowa Code section 89.3, unless an exception is set forth in this rule.

b. Except for inspections of unfired steam pressure vessels operating in excess of 15 pounds per square inch and low pressure steam boilers, each certificate inspection must be performed within a 60-day

period prior to the expiration date of the operating certificate. Modification of this 60-day period will be permitted only upon written application showing just cause for waiver of the 60-day period.

c. Special inspections may be conducted when deemed necessary by the department and the object's owner or user.

390.5(3) *Inspections conducted by special inspectors.* Special inspectors shall provide copies of the completed report to the insured and to the department within 14 days of completing the inspection. The reports list all noteworthy conditions that are within the scope of Iowa Code chapter 89, all recommendations, and all requirements. If the special inspector has not provided the results of the inspection within the time frame identified, the department may conduct the inspection.

390.5(4) *Type of inspection.* The inspection will be an internal inspection when required; otherwise, it shall be as complete an external inspection as possible. Conditions including but not limited to the following may also be the basis for an internal inspection:

a. Visible metal or insulation discoloration due to excessive heat.

b. Visible distortion of any part of the pressure vessel.

c. Visible leakage from any pressure-containing boundary.

d. Any operating records or verbal reports of a vessel being subjected to pressure above the nameplate rating or to a temperature above or below the nameplate design temperature.

e. A suspected or known history of internal corrosion or erosion.

f. Evidence or knowledge of a vessel having been subjected to external heat from a fire.

g. A welded repair not documented as required.

h. Evidence of an accident, incident or malfunction that could affect or may have resulted from a problem with the object's integrity.

390.5(5) *Internal inspections for unfired steam pressure vessels operating at more than 15 pounds per square inch.* The director may require an internal inspection of an unfired steam pressure vessel operating in excess of 15 psi when an inspector observes any deviation from these rules, Iowa Code chapter 89, the construction code, the installation code, or the National Board Inspection Code.

390.5(6) *Inspection of inaccessible parts.* When, in the opinion of the inspector, as a result of conditions disclosed at the time of inspection, it is advisable to remove the interior or exterior lining, covering, or brickwork to expose certain parts of the vessel not normally visible, the owner or user shall remove such material to permit proper inspection and thickness measurement of any part of the vessel. Nondestructive examination is acceptable.

390.5(7) *Imminent danger.*

a. If the director determines that continued operation of an object constitutes an imminent danger that could seriously injure or cause death to any person, notice to immediately cease operation of that object shall be made to the owner or user through contact information available in the department's records or by posting a notice at the location of the object.

b. Upon such notice, the owner or user shall immediately take the necessary steps to cease operation of the object. All forms of energy to and from the object must be isolated and physically locked in the closed position.

c. A department inspector will verify that the object is no longer in operation and all forms of energy to and from the object have been isolated and are locked in the closed position.

d. The object shall not be used until all necessary repairs have been completed, the object has passed inspection, all repair documentation is complete, and the department reviews and approves the documentation.

390.5(8) *Internal inspections on a four-year cycle based on process safety management compliance.* The owner demonstrates compliance with the requirements set forth in Iowa Code section 89.3(5)*"a"*(4)*"b"* by annually submitting to the director a notarized affidavit. The affidavit shall be in a format approved by the director and signed by the owner or an officer of the company.

390.5(9) *Internal inspection on a four-year cycle for utility objects.* An object that meets the criteria of this subrule will be inspected internally at least once every four years and externally every year. If at any time the object or the owner no longer meets the criteria of this subrule, internal inspections will be performed on a two-year cycle.

a. The object is owned and operated by an electric public utility subject to rate regulation under Iowa Code chapter 476.

b. The object and the owner meet all the requirements for a two-year internal inspection interval.

c. If the object is shut down for a period sufficient to allow safe entry, and more than two years have passed since the last internal inspection, the owner shall notify the director of the outage and will schedule an internal inspection.

d. If the director determines that an earlier inspection is necessary, the owner shall prepare the object for inspection.

390.5(10) *Request for extended inspection interval.*

a. Owners of objects covered under Iowa Code section 89.3(4)*"a"* may apply for an extended internal inspection interval of up to seven years.

b. The application for an extended internal inspection interval includes the following information submitted to the director:

(1) The name and contact information of the requestor.

(2) The state identification number of the object.

(3) The interval requested with supporting reasons.

(4) An affidavit affirming the following:

1. Compliance with the process safety management standard contained in 29 CFR §1910.119.

2. The object is included as process safety management process equipment in the owner's process safety management program.

3. The object meets the requirements contained in the National Board Inspection Code.

4. The object is fit for service based on the year of fabrication and the estimated service life of the object as determined by Part 2 of the National Board Inspection Code.

5. Practices have been implemented for managing consumable items and ancillary equipment of the object.

(5) The following supporting records:

1. Inspection records of the boiler and ancillary equipment for the prior five years.

2. The most recent Report of Fitness for Service Assessment.

3. Every Form R-1 Report of Repair and Form R-2 Report of Alterations for the prior five years.

(6) A request for an informal conference, if desired.

c. The director will consider, among other things, whether the object meets the requirements contained in the National Board Inspection Code, whether the object is fit for service based on the year of fabrication, the estimated service life of the object as determined by Part 2 of the National Board Inspection Code, and whether the owner has implemented practices for managing consumable items and ancillary equipment of the object.

d. The director may grant an extended inspection interval.

(1) An extended inspection interval lasts until the next inspection, at which time the owner of the object may again apply for an extension.

(2) The owner shall promptly report to the department's boiler and pressure vessel unit any unscheduled shutdowns, significant incidents, near misses, and any other occurrences that might reasonably require reinspection before the extended date. Should the occurrence reasonably require it, or if any such event is not reported within ten days of occurrence, the director may revoke the extended inspection interval.

e. If the director does not intend to grant the extension, the director will give the applicant a Notice of Intent to Deny Extended Inspection Interval, granting ten days for the applicant to provide additional reasons and evidence why the interval should be extended.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.6(89) Fees.

390.6(1) *Special inspector commission fee.* A $55 fee shall be paid annually to the director to obtain a special inspector commission pursuant to Iowa Code section 89.7.

390.6(2) *Certificate fee.* A $40 fee shall be paid for each one-year certificate, an $80 fee shall be paid for each two-year certificate, and a $160 fee shall be paid for each four-year certificate.

390.6(3) *Fees for inspection.* An inspection fee for each object inspected by a department inspector shall be paid by the appropriate party as follows:

a. A $55 fee for each water heater supply boiler.

b. A $95 fee for each boiler, other than a water heater supply boiler, having a working pressure up to and including 450 pounds per square inch or generating between 20,000 and 100,000 pounds of steam per hour.

c. A $215 fee for each boiler, other than a water heater supply boiler, having a working pressure in excess of 450 pounds per square inch and generating in excess of 100,000 pounds of steam per hour.

d. A $55 fee for each pressure vessel, such as steam stills, tanks, jacket kettles, sterilizers and all other reservoirs having a working pressure of 15 pounds or more per square inch.

e. An additional fee will be charged if, upon the request of an owner or user, the director agrees to any non-routine schedule for an inspection outside of normal business hours, a special inspection, or a site visit. The additional fee will be calculated at a rate of $200 per hour, including travel time, with a minimum charge of $400.

f. If a boiler or pressure vessel has to be reinspected, there shall be another inspection fee as specified above.

390.6(4) *Fees for attempted inspections.* A $35 fee is charged for each attempt by a department inspector to conduct an inspection that is not completed through no fault of the department.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.7(89) Certificate. No boiler or pressure vessel shall be operated without a current, valid certificate to operate. A certificate to operate will not be issued until the boiler or pressure vessel is in compliance with the applicable rules and all fees have been paid. The current certificate to operate or a copy of the current certificate to operate shall be conspicuously posted in the room where the object is installed.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.8(89,252J,272D) Special inspector commissions.

390.8(1) *Definition of "reputable insurance company."* As used in this rule, "reputable insurance company" means a company recognized by the Iowa insurance division as a licensed insurer, a risk retention group, an alien surplus lines insurer, or a surplus lines insurer.

390.8(2) *Application.*

a. A person applying for a new or renewed commission shall complete, sign, and submit to the department with the required fee the form entitled "Application for Boiler and Pressure Vessel Special Inspector Commission" provided by the department. Additionally, the applicant shall submit a copy of the applicant's current National Board commission/endorsement with each application.

b. An applicant for a new Iowa special inspector commission shall schedule a meeting with the chief boiler inspector to discuss Iowa law and the responsibilities, expectations, and requirements for a special inspector.

390.8(3) *Expiration.* The commission is for no more than one year and ceases when the special inspector leaves employment with the insurance company, or when the commission is suspended or revoked by the director. Each commission expires no later than December 31 of each year.

390.8(4) *Changes.* The special inspector shall notify the department at the time any of the information on the form or attachments changes.

390.8(5) *Denials.* The director may refuse to issue or renew a special inspector's commission for failure to complete an application package, if the applicant or inspector does not hold a National Board commission, or for any reason listed in subrules 390.8(7) through 390.8(9).

390.8(6) *Investigations.* Investigations will take place at the time and in the places the department directs. The director may investigate for any reasonable cause. The director may conduct interviews and utilize other reasonable investigatory techniques. Investigations may be conducted without prior notice.

390.8(7) *Reasons for probation.* The director may issue a notice of commission probation when an investigation reasonably reveals that the special inspector does not represent a reputable insurance company or the special inspector filed inaccurate reports.

390.8(8) *Reasons for suspension.* The director may issue a notice of commission suspension when an investigation reasonably reveals the following:

a. The special inspector failed to submit and report inspections on a timely basis;

b. The special inspector abused the special inspector's authority;

c. The special inspector misrepresented self as a state inspector or a state employee;

d. The special inspector used commission authority for inappropriate personal gain;

e. The special inspector failed to follow the department's rules for inspection of object repairs, alterations, construction, installation, or in-service inspection;

f. The special inspector committed numerous violations as described in subrule 390.8(7);

g. The special inspector used fraud or deception to obtain or retain, or to attempt to obtain or retain, a special inspector commission whether for one's self or another;

h. The National Board revoked or suspended the special inspector's work card;

i. The department received a certificate of noncompliance;

j. The special inspector failed to take appropriate disciplinary actions against a subordinate special inspector who has committed repeated acts or omissions listed in paragraphs 390.8(8)*"a"* through *"h"*; or

k. The special inspector does not represent a reputable insurance company.

390.8(9) *Reasons for revocation.* The director may issue a notice of revocation of a special inspector's commission when an investigation reveals any of the following:

a. The special inspector filed a misleading, false or fraudulent report;

b. The special inspector failed to perform a required inspection;

c. The special inspector failed to file a report or filed a report that was not in accordance with the provisions of applicable standards;

d. The special inspector failed to notify the department in writing of any accident involving an object;

e. The special inspector committed repeated violations as described in subrule 390.8(8);

f. The special inspector used fraud or deception to obtain or retain, or to attempt to obtain or retain, a special inspector commission whether for one's self or another;

g. The special inspector instructed, ordered, or otherwise encouraged a subordinate special inspector to perform the acts or omissions listed in paragraphs 390.8(9)*"a"* to *"f"*;

h. The National Board revoked or suspended the special inspector's commission card;

i. The department received a certificate of noncompliance; or

j. The special inspector does not represent a reputable insurance company.

390.8(10) *Procedures.* The following procedures apply except in the event of revocation or suspension due to receipt of a certificate of noncompliance. In instances involving receipt of a certificate of noncompliance, the applicable procedures of Iowa Code chapter 252J or 272D apply.

a. Notice of actions. The director shall serve a notice on the special inspector by certified mail to an address listed on the commission application form or by other service as permitted by Iowa Code chapter 17A. A copy will be sent to the insurance company employing the special inspector.

b. Contested cases. The special inspector has 20 days to file a written notice of contest with the director. If the special inspector does not file a written contest within 20 days of receipt of the notice, the action stated in the notice will automatically be effective.

c. Emergency suspension. Pursuant to Iowa Code section 17A.18A, if the director finds that public health, safety or welfare imperatively requires emergency action because a special inspector failed to comply with applicable laws or rules, the special inspector's commission may be summarily suspended.

d. Probation period. A special inspector may be placed on probation for a period not to exceed one year for each incident causing probation.

e. Suspension period. A special inspector's commission may be suspended up to five years for each incident causing a suspension.

f. Revocation period. A special inspector's commission that has been revoked shall not be reinstated for five years.

g. Concurrent actions. Multiple actions may proceed at the same time against any special inspector.

h. Revoked or suspended commissions. Within five business days of final agency action revoking or suspending a special inspector commission, the special inspector shall forfeit the special inspector's commission card to the director.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.9(89) Quality reviews, surveys and audits.

390.9(1) An entity that manufactures or repairs boilers, pressure vessels or related equipment may request quality reviews, surveys or audits from certifying organizations such as the ASME or the National Board. The department is authorized to conduct the quality reviews, surveys or audits. If the department performs the service, the manufacturer or repairer shall pay all applicable expenses.

390.9(2) Quality reviews, surveys and audits for certification to the National Board or ASME standards shall be conducted only by a person or organization designated by the director. Any person or organization seeking this designation on behalf of the department shall provide documented evidence of training, examination, experience, and certification for the type of reviews, surveys and audits to be performed. The director has final authority to determine qualifications and designations.

a. Assessing quality programs. The department recognizes the ASME and the National Board as qualified designees for conducting quality reviews, surveys and audits that lead to ASME or National Board program certification.

b. ISO 9000 assessments. The department recognizes the ASME and the National Board:

(1) To be acceptable ISO 9000 registrars of quality systems for boilers and pressure vessels and the related pressure-technology equipment industry;

(2) To certify auditors and lead auditors to the requirements of ISO 10011-2 1991(E), Annex A; and

(3) To conduct ISO 9000 assessments for the boiler, pressure vessel, and related pressure-technology equipment industry.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.10(89) Reporting requirements.

390.10(1) *Control and safety device reports.* Documentation required by this subrule shall be kept on site and be available for inspection by the department or special inspectors. The owner or user shall mail a copy of the documentation required by this subrule to the department.

a. The requirements of this subrule do not apply to:

(1) An object within the scope of 481—Chapter 395;

(2) A hot water supply boiler covered by ASME Section IV, Part HLW; or

(3) A boiler with a fuel input rating greater than or equal to 12,500,000 Btu per hour, falling within the scope of NFPA 85, Boiler and Combustion Systems Hazards Code.

b. The installer shall complete a CSD-1 report for each installed object. For all objects that do not fall under CSD-1, an I-1 report in accordance with NBIC shall be completed.

c. A person who installs a new burner, new gas train, or new controller on an object shall complete a CSD-1 report.

d. A person who replaces a part or component of an object shall complete the relevant portions of the CSD-1 report unless the replacement satisfies the design specifications. A copy of an invoice containing the same information as the relevant portions of the CSD-1 report is an acceptable alternative.

390.10(2) *Reporting repairs and alterations.* If the National Board Inspection Code requires that a report of repair, alteration or other such documentation is required, a copy of that documentation must be simultaneously filed with the director.

390.10(3) *Reporting explosions and other incidents.*

a. The following definitions apply to this subrule.

"Incident" means the explosion of a covered object or other failure of a component of a covered object causing injury or acute illness.

"Injury" means a personal injury requiring professional medical care or causing disability exceeding one day.

b. The owner or user of a covered object shall notify the director of an incident. A special inspector investigating an incident shall notify the owner or user of this reporting requirement.

c. Incident reports are made by calling 515.669.8945 or 515.725.2050. If the incident occurs during normal department operating hours, notification shall occur before close of business on that day. If the incident occurs when the department office is closed, the notification shall occur no later than close of business on the next department business day. Department hours are 8 a.m. to 4:30 p.m., Monday through Friday, except state holidays.

d. At the request of the director, a person who submits a report pursuant to this subrule shall also submit a written report that includes the state identification number of the object, name of the owner of the object, and description of the incident.

e. The removal of any part of the damaged object from the premises is forbidden until permission to do so is granted by the state inspector or special inspector who investigated the incident.

f. When an incident involves the failure or destruction of any part of the object, the use of the object is forbidden until it has been made safe and it has passed an inspection by the state inspector or special inspector who investigated the incident.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.11(89) Publications available for review. Pursuant to Iowa Code section 89.5(3), the standards, codes, and publications adopted by reference in these rules are available for review in the office of the department, 6200 Park Avenue, Suite 100, Des Moines, Iowa.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.12(89) Notice prior to installation. Written notice of intent to install objects subject to the jurisdiction of Iowa Code chapter 89 shall be provided to the director at least ten days before installation. Written notice is accomplished by completing and submitting to the director either:

1. The form designated by the director, or
2. The National Board's Boiler Installation Report, I-1.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.13(89) Temporary objects.

390.13(1) *Certificate to operate.* A certificate to operate a temporary object expires one year from the date of issuance or when the temporary object is disconnected.

390.13(2) *Inspections.*

a. An internal inspection and hydrostatic test pursuant to the National Board Inspection Code shall be performed on site at a new location before a temporary object is started up. Once a temporary object has been placed into normal operation, an external operating inspection shall be performed.

b. An inspection on a temporary object that remains at the same location and is in continuous service longer than one year shall be performed according to the inspection schedule of Iowa Code section 89.3.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.14(89) Conversion of a power boiler to a low-pressure boiler. The following requirements apply to the conversion of a power boiler to a low-pressure boiler. The owner shall comply with the requirements of subrule 390.15(1) for each conversion. In addition, the owner shall comply with the requirements of subrule 390.15(2) if the converted object will be located outside of a place of public assembly or with the requirements of subrule 390.15(3) if the converted object will be located in a place of public assembly.

390.14(1) *General requirements.*

a. The owner shall provide to the director written notice of intent to convert a power boiler to a low-pressure boiler prior to conversion. The required form for a notice of conversion is available on the department's website. At a minimum, the notice shall contain the following:

(1) Address, uses, and owner of the building where the boiler is located.

(2) The Iowa identification number assigned to the boiler.

(3) Name and contact information for the person completing the notice.

(4) Name and contact information for the contractor or other person planning to perform the conversion.

b. Pressure controls shall not exceed 15 psi.

c. All boiler controls shall comply with ASME CSD-1.

d. Safety valves and safety relief valves shall be manufactured in accordance with a national or international standard.

e. One or more spring-pop safety valves meeting the following requirements shall be installed on each steam boiler:

(1) The valve shall be adjusted and sealed to discharge at a pressure not to exceed 15 psig.

(2) The valve capacity shall be certified by the National Board.

f. The converted boiler shall be subject to post-conversion external inspection to ensure that the requirements of this rule are met.

390.14(2) *Boilers located outside places of public assembly.* A power boiler that was converted to a low-pressure boiler and that is located outside of a place of public assembly shall not be converted back to a power boiler unless the following requirements are met:

a. The owner shall notify the director at least ten days prior to converting the boiler.

b. The owner shall comply with the editions of ASME Section I and CSD-1 in effect at the time of the second conversion.

c. The owner shall comply with the version of 481—Chapter 392 in effect at the time of the second conversion.

390.14(3) *Boilers located in places of public assembly.* A power boiler converted to a low-pressure boiler that is located in a place of public assembly complies with 481—Chapter 394.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—390.15(89) Definitions regarding objects. The following definitions govern classification and status of objects in Iowa. To the extent they do not conflict with the definitions contained in Iowa Code chapter 89, the definitions in this rule are applicable to the rules contained in 481—Chapters 390 through 395.

"Active status" means an object is physically attached to the system and any forms of potential energy. The object may or may not be in operation.

"Exempt status" means an object that is not required to be inspected pursuant to Iowa Code chapter 89.

"Inactive status" means the object is no longer in operation and all forms of potential energy have been disconnected in a manner that creates an air gap.

"Modular boiler" means a steam or hot water heating assembly consisting of a group of individual boilers called modules intended to be installed as a unit with no intervening stop valves. Modules may be under one jacket or individually jacketed. The individual modules shall be limited to a maximum input of 400,000 Btu/hour (117kW) (gas), 3 gph (11.4 L/h) (oil), or 115kW (electric).

"Scrapped status" means the object has been permanently destroyed and is no longer physically at the location.

[**ARC 8887C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapters 17A, 89, 252J, and 272D.

CHAPTER 391
GENERAL REQUIREMENTS FOR ALL OBJECTS

[Prior to 1/14/98, see 347—Chs 41 to 49]
[Prior to 8/16/06, see 875—Ch 203]
[Prior to 7/9/25, see Labor Services Division[875] Ch 91]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—391.1(89) Codes and code cases adopted by reference.

391.1(1) *ASME boiler and pressure vessel codes adopted by reference.* The ASME Boiler and Pressure Vessel Code (2021), including Code Cases, is adopted by reference. Regulated objects shall be designed and constructed in accordance with the ASME Boiler and Pressure Vessel Code (2021) except for objects that meet one of the following criteria:

a. An object with an ASME stamp and National Board Registration that establish compliance with an earlier version of the ASME Boiler and Pressure Vessel Code;

b. A miniature boiler installed before March 31, 1967;

c. A power boiler or unfired steam pressure vessel installed before July 4, 1951; or

d. A steam heating boiler, hot water heating boiler, or hot water supply boiler installed before July 1, 1960.

391.1(2) *Inspection code adopted by reference.* The National Board Inspection Code (2021) is adopted by reference, and installations, alterations, and repairs after February 16, 2022, shall comply with it.

391.1(3) *Electric code adopted by reference.* The National Electrical Code, NFPA 70 (2020), is adopted by reference, and installations after April 15, 2020, shall comply with it.

391.1(4) *Piping codes adopted by reference.* The Power Piping Code, ASME B31.1 (2020), and the Building Services Piping Code, ASME B31.9 (2020), are adopted by reference, and installations after February 16, 2022, shall comply with them up to and including the first valve.

391.1(5) *Control and safety device code adopted by reference.* Controls and Safety Devices for Automatically Fired Boilers (CSD-1) (2021) is adopted by reference, and installations after December 1, 2022, shall comply with it. Reporting requirements concerning CSD-1 are set forth at rule 481—390.11(89).

391.1(6) *Mechanical code adopted by reference.* Excluding Section 701.1, Chapters 2 and 7 of the International Mechanical Code (IMC) (2021) are adopted by reference, and installations after February 16, 2022, shall comply with them.

391.1(7) *Oil burning equipment code adopted by reference.* National Fire Protection Association Standard for the Installation of Oil Burning Equipment, NFPA 31 (2020), is adopted by reference, and installations after February 16, 2022, shall comply with it.

391.1(8) *Fuel gas code adopted by reference.* National Fire Protection Association National Fuel Gas Code, NFPA 54 (2021), is adopted by reference, and installations after February 16, 2022, shall comply with it.

391.1(9) *Liquefied petroleum gas code adopted by reference.* National Fire Protection Association Liquefied Petroleum Gas Code, NFPA 58 (2020), is adopted by reference, and installations after April 15, 2020, shall comply with it.

391.1(10) *Boiler and combustion systems hazards code adopted by reference.* National Fire Protection Association Boiler and Combustion Systems Hazards Code, NFPA 85 (2019), is adopted by reference, and installations after April 15, 2020, shall comply with it.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.2(89) Safety appliance.

391.2(1) No person shall remove, disable or tamper with a required safety appliance except for the purpose of repair or inspection.

391.2(2) An object shall not be operated unless all required and installed safety appliances are properly functional and operational.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.3(89) Blowoff equipment. The blowdown from an object that enters a sanitary sewer system or blowdown that is considered a hazard to life or property shall pass through blowoff equipment that will reduce pressure and temperature. The temperature of the water leaving the blowoff equipment shall not exceed 150 degrees F. If the local jurisdiction has a temperature limit of less than 150 degrees F, the temperature of the water leaving the blowoff equipment shall comply with the limit set by the local jurisdiction. The pressure of the water leaving the blowoff equipment shall not exceed 5 psig. The blowoff piping and fittings between the object and the blowoff tank shall comply with the construction or installation code. All materials used in the fabrication of object blowoff equipment shall comply with the construction or installation code. All blowoff equipment shall be equipped with openings to facilitate cleaning and inspection.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.4(89) Location of discharge piping outlets. The discharge from safety valves, safety relief valves, blowoff pipes and other outlets shall comply with the following:

391.4(1) The discharge piping terminates at a safe point of discharge.

391.4(2) When the safety valve or temperature and pressure relief valve discharge is piped away from the object to a safe point of discharge, provision is made for properly draining the piping.

391.4(3) The size of the discharge piping is not reduced from the size of the relief valve.

391.4(4) All discharge piping is comprised of appropriate metallic material identified in ASME Section II.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.5(89) Pipe, valve, and fitting requirements. Pipes, valves, and fittings subject to the effects of galvanic action shall not be used on objects covered by these rules. Dielectric fittings shall be used where dissimilar metals are joined.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.6(89) Repairs and alterations to unfired steam pressure vessels. No single repair of an unfired steam pressure vessel shall involve replacement of more than 50 percent of the OEM's pressure-retaining boundary.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.7(89) Plugging boiler tubes. This rule does not apply to tubes in headers of economizers, evaporators, superheaters, or reheaters.

391.7(1) *General requirements.*

a. Leaky tubes are replaced or plugged.

b. Tube plugs are made of a material that is compatible with the material of the boiler tube being plugged and shall be welded into place or manufactured to be expanded into the tube sheet or drum.

c. The maximum number of tubes that may be plugged shall be the lesser number specified by the OEM or an engineer experienced in boiler design.

d. Documentation of the maximum number of tubes that may be plugged are kept on site, and a copy is supplied to the department by either mail or email.

391.7(2) *Fire tube boilers.*

a. A tube that is adjacent to a plugged tube shall not be plugged.

b. All plugged boiler tubes shall be replaced prior to the next required certificate inspection.

391.7(3) *Water tube boilers, unfired boilers, or process steam generators.* Water wall tubes that form a separation wall between products of combustion and the outside atmosphere or a separation of the gas passes in a multiple gas pass boiler shall not be plugged.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.8(89) Equipment room. This rule applies to existing and new installations except as noted in subrule 391.10(1).

391.8(1) *Clearance requirements.*

a. This paragraph applies to objects installed after December 1, 2022. Minimum clearance on all sides of objects will be 36 inches, or the manufacturer's recommended service clearances if they allow sufficient room for inspection. Where a manufacturer identifies in the installation manual or other document that the unit requires more than 36 inches of service clearance, those dimensions will be followed. Manholes will have five feet of clearance between the manhole opening and any wall, ceiling or piping that would hinder entrance or egress from the object.

b. This paragraph applies to all objects installed after December 1, 2021, and before December 1, 2022. All objects will be installed with the clearances identified in NBIC Part 1.

c. This paragraph applies to objects installed after September 20, 2006, and before December 1, 2021. Minimum clearance on all sides of objects will be 24 inches, or the manufacturer's recommended service clearances if they allow sufficient room for inspection. Where a manufacturer identifies in the installation manual or other document that the unit requires more than 24 inches of service clearance, those dimensions will be followed. Manholes will have five feet of clearance between the manhole opening and any wall, ceiling or piping that would hinder entrance or egress from the object.

d. All objects installed prior to September 20, 2006, will be so located that adequate space is provided for the proper operation, inspection, and necessary maintenance and repair of the object and its appurtenances.

391.8(2) *Conditions required.*

a. The roof, walls and floor of the equipment room will be free from leaks and structurally sound.

b. The equipment room will have drainage adequate to remove standing water from the floor.

c. The equipment room will be free from materials that obstruct access to the objects, their setting, or operation.

d. Storage of flammable material or gasoline-powered equipment in the equipment room is prohibited.

391.8(3) *Exit from equipment room.* This subrule applies to an equipment room exceeding 500 square feet of floor area, containing at least one object, and containing fuel-burning equipment with at least a combined capacity of 1,000,000 Btu per hour or the equivalent electrical heat input. Two means of exit located remotely from one another shall be provided on each elevation for covered equipment rooms. A platform at the top of a single object or other equipment is not considered an elevation.

391.8(4) *Carbon monoxide detector or alarm.* The owner or user shall install and maintain a carbon monoxide detector or alarm in an equipment room where one or more fuel-fired objects are located in accordance with the detector or alarm manufacturer's recommendations.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.9(89) Fall protection. The owner or user shall provide safe access to object parts over four feet high consistent with applicable federal safety regulations.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.10(89) Air and ventilation requirements.

391.10(1) *Notice concerning other rules.* The division and the Iowa department of public safety both enforce requirements concerning air and ventilation. Objects that are covered by both sets of rules must comply with both sets of rules.

391.10(2) *Documentation.* Documentation of compliance with any requirement of this rule will be maintained in the boiler room. However, it is not necessary to maintain documentation of the louvered area.

391.10(3) *National combustion air standards.*

a. Installations. Installations will comply with the edition of NFPA 31, NFPA 54, NFPA 58, NFPA 85, or IMC currently adopted at rule 481—391.1(89) or with the Iowa combustion air standard in subrule 391.13(4). However, compliance with one of the listed NFPA codes constitutes compliance with this rule only if the object burns the fuel covered by the NFPA.

b. Existing objects. An adequate supply of combustion air will be maintained for all objects while in operation. Compliance with the current edition of NFPA 31, NFPA 54, NFPA 58, NFPA 85, or IMC as adopted at rule 481—391.1(89) or with subrule 391.13(4) constitutes compliance with this rule.

Compliance with an earlier edition of NFPA 31, NFPA 54, NFPA 58, NFPA 85, or IMC constitutes compliance with this rule. However, compliance with one of the listed NFPA codes constitutes compliance with this rule only if the object burns the fuel covered by the NFPA. Compliance with an earlier version of Iowa's combustion air rule constitutes compliance with this rule. Earlier versions of Iowa's combustion air rule are available from the board's staff upon request.

391.10(4) *Iowa combustion air standard.* A permanent source of outside air will be provided for each room to permit satisfactory combustion of fuel and ventilation if necessary under normal operations. The minimum ventilation for coal, gas, or oil burners in rooms containing objects is based on the Btu per hour, required air, and louvered area. The minimum net louvered area will not be less than 1 square foot. The following table will be used to determine the net louvered area in square feet:

INPUT (Btu per hour)	MINIMUM AIR REQUIRED (cubic feet per minute)	MINIMUM LOUVERED AREA (net square feet)
500,000	125	1.0
1,000,000	250	1.0
2,000,000	500	1.6
3,000,000	750	2.5
4,000,000	1,000	3.3
5,000,000	1,200	4.1
6,000,000	1,500	5.0
7,000,000	1,750	5.8
8,000,000	2,000	6.6
9,000,000	2,250	7.5
10,000,000	2,500	8.3

When mechanical ventilation is used, the supply of combustion and ventilation air to the objects and the firing device will be interlocked with the fan so the firing device will not operate with the fan off. The velocity of the air through the ventilating fan will not exceed 500 feet per minute, and the total air delivered will be equal to or greater than shown above.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.11(89) Condensate return tank. Condensate return tanks shall be equipped with at least two vents or a vent and overflow pipe to protect against a loose float plugging a single connection.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.12(89) Conditions not covered. Any condition not governed by these rules is governed by the construction or installation code.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.13(89) English language and U.S. customary units required. All documentation supplied for the unit including but not limited to the manufacturers' data report, drawings, parts lists, installation manuals, and operating manuals shall be in English, and all measurements in U.S. customary units. All pressure gages, thermometers and other controls and safety devices shall also be in U.S. customary units.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.14(89) National Board registration. Except for cast iron boilers and cast aluminum boilers, all objects shall be registered with the National Board.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—391.15(89) ASME stamp. All objects shall bear the appropriate ASME stamp. Objects shall not be utilized in a manner inconsistent with the stamp.

[**ARC 8894C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 89.

CHAPTER 392
POWER BOILERS

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 1/14/98, see Labor Services[347] Ch 43, 44]
[Prior to 8/16/06, see 875—Chs 204, 205]
[Prior to 7/9/25, see Labor Services Division[875] Ch 92]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—392.1(89) Scope. This chapter applies to all power boilers, and it applies to miniature power boilers installed on and after September 20, 2006. 481—Chapter 393 applies to miniature power boilers installed prior to September 20, 2006.
[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.2(89) Codes adopted by reference. The codes listed in 481—Chapter 391 apply to objects covered by this chapter.
[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 7/9/25]

481—392.3(89) Maximum allowable working pressure for steel boilers. This rule applies to power boilers installed prior to July 1, 1983. A boiler constructed with fusion-welded seams and not radiographed and stress relieved during construction shall not be operated at a pressure in excess of 15 pounds per square inch. Boilers with fusion-welded seams that are radiographed and stress relieved and constructed to ASME Code requirements in effect when the boiler was constructed may be operated at a pressure as established in subrules 92.4(1) 392.4(1) and 392.4(2).

392.3(1) *Calculation.* The maximum allowable working pressure on the shell of a boiler is to be determined by the strength of the weakest course computed from the thickness of the plate, the tensile strength of the plate, the efficiency of the longitudinal joint, the inside diameter of the course, and the factor of safety allowed by these rules. The formula for determining the maximum allowable working pressure is:

$$\frac{TStE}{RFS} = \text{Maximum allowable working pressure, psig.}$$

Where:

TS = Ultimate tensile strength of shell plate(s), psig. When the tensile strength of a steel plate(s) is unknown, it shall be taken as 55,000 psig for temperatures not exceeding 650 degrees F.

t = Minimum thickness of shell plates of the weakest course, in inches.

E = Efficiency of longitudinal joint calculated pursuant to construction or installation code.

R = Inside radius of the weakest course of the shell or drum, in inches.

FS = Factor of safety specified in subrule 392.4(2).

392.3(2) *Factor of safety requirements.*

a. The lowest factor of safety on boilers is four, except for horizontal tubular boilers having continuous lap seams more than 12 feet in length where the factor of safety is eight.

b. Boilers that are reinstalled and have lap riveted construction or seams of butt and double strap riveted construction use ASME Code, Section I (1971).
[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.4(89) Maximum allowable working pressure and temperature for cast iron headers and mud drums. This rule applies to power boilers installed prior to July 1, 1983.

392.4(1) *Tube boiler.* The maximum allowable working pressure on a watertube boiler, the tubes of which are secured in cast iron or malleable iron headers or that have cast iron mud drums, will not exceed 160 psig or a temperature of 250 degrees F.

392.4(2) *Maximum steam pressure.* The maximum steam pressure on any boiler constructed of cast iron in which steam is generated is 15 psig.
[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.5(89) Rivets. This rule applies to power boilers installed prior to July 1, 1983. When the diameter of the rivet holes in the longitudinal joints of a boiler is not known, the diameter and cross-sectional area of rivets, after driving, shall be selected from ASME Code, Section I (1971).
[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.6(89) Safety valve requirements. This rule applies to power boilers installed prior to July 1, 1983.

392.6(1) The use of weighted-lever safety valves or safety valves having either the seat or disk of cast iron is prohibited. All power boilers will have direct, springloaded, pop-type safety valves that conform to the construction or installation code.

392.6(2) Each boiler will have at least one safety valve. All boilers with more than 500 square feet of water heating surface or an electric power input of more than 1100 kilowatts will have two or more safety valves.

392.6(3) The safety valve or valves will be connected to the boiler independent of any other steam connection and attached as close as possible to the boiler without unnecessary intervening pipe or fittings.

392.6(4) No valves of any type will be placed between the safety valve and the boiler. If an escape pipe is used, no valve will be placed between the safety valve and the atmosphere. When an escape pipe is used, it will be at least full size of the safety valve discharge and fitted with an open drain to prevent water lodging in the upper part of the safety valve or escape pipe. Any elbow on an escape pipe will be located close to the safety valve outlet or the escape pipe and will be anchored and supported securely. All safety valve discharges will be so located or piped as to be carried away from walkways or platforms. When the safety valve is vented to the outside atmosphere, the second escape pipe will be arranged as shown in Figure 1.

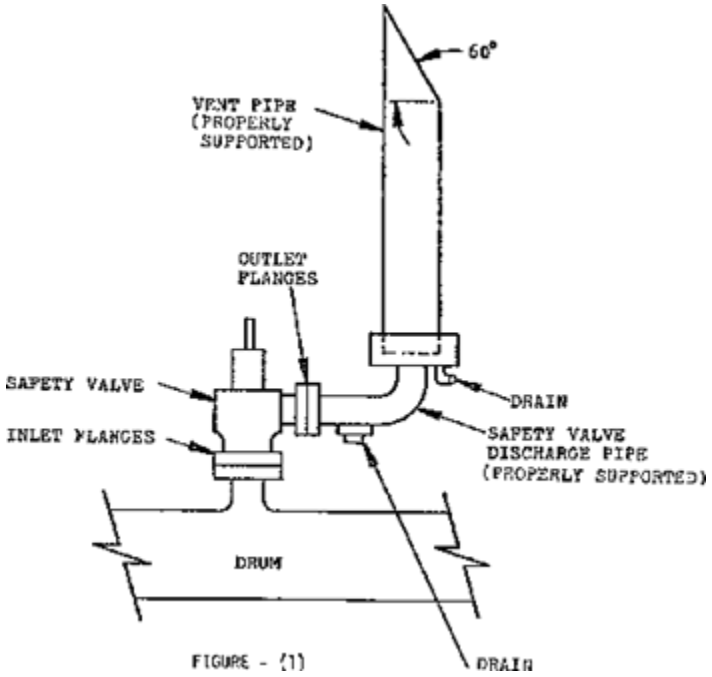

FIGURE - (1)

392.6(5) The safety valve capacity of each boiler will be such that the safety valve or valves will discharge all the steam that can be generated by the boiler without allowing the pressure to rise more than 5 percent above the highest pressure to which any valve is set and in no case to more than 6 percent above maximum allowable working pressure.

392.6(6) One or more safety valves on every boiler will be set at or below the maximum allowable working pressure. The remaining valves may be set within a range of 3 percent above the maximum allowable working pressure, but the range setting of all the safety valves on a boiler will not exceed 10 percent of the highest pressure at which any valve is set.

392.6(7) When two or more boilers operating at different pressures and safety valve settings are interconnected, the lowest pressure boilers or interconnected piping will be equipped with safety valves of sufficient capacity to prevent overpressure, considering the maximum generating capacity of all boilers.

392.6(8) In those cases where the boiler is supplied with feedwater directly from water mains without the use of feeding apparatus (not including return traps), safety valves will not be set at a pressure greater than 94 percent of the lowest pressure maintained in the supply main feeding the boiler.

392.6(9) The minimum safety valve relieving capacity will be determined on the basis of the pounds of steam generated per hour per square foot of boiler heating surface and waterwall heating surface as given in the following table. This method will not be used on electric boilers, waste heat boilers and forced-flow steam generators without a fixed steam and water line.

Minimum Pounds of Steam Per Hour Per Square Foot of Heating Surface

Boiler Heating Surface:	Firetube Boilers	Watertube Boilers
Hand Fired	5	6
Stoker Fired	5	8
Oil, Gas, or Pulverized Fuel Fires	8	10
Waterwall Heating Surface:		
Hand Fired	8	8
Stoker Fired	10	12
Oil, Gas, or Pulverized Fuel Fires	14	16

392.6(10) Safety valve sizing.

a. When a boiler is fired only by a gas having a heat value not in excess of 200 Btu per cubic foot, the minimum safety valve relieving capacity may be based on the value given for hand-fired boilers above.

b. The minimum safety valve relieving capacity for electric boilers will be 3½ pounds per hour per kilowatt input.

c. Maximum steaming capacity for safety valves will be the value stated on design documents or will be calculated by multiplying horsepower by 34.5.

[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.7(89) Boiler feeding requirements. This rule applies to power boilers installed prior to July 1, 1983.

392.7(1) Each boiler will have a feed supply that will permit it to be fed at any time while under pressure. A boiler having more than 500 square feet of water-heating surface will have at least two means of feeding, one of which will be an approved feed pump, injector, or inspirator. One source of feed is directly from the water main. Boilers fired by gaseous, liquid, or solid fuel in suspension may be equipped with a single means of feeding water provided means are furnished for the immediate shutoff of heat input prior to the water level reaching the lowest permissible level. The feedwater will be introduced into the boiler in such a manner that it will not be discharged close to riveted joints of shell or furnace sheets, directly against surfaces exposed to products of combustion, or directed to surfaces subject to radiation from the fire. The feed piping to the boiler will be provided with a check valve near the boiler and a stop valve between the check valve and the boiler.

392.7(2) When two or more boilers are fed from a common source, there will also be a valve on the branch to each boiler between the check valve and source of supply. Whenever a globe valve is used on feed piping, the inlet will be under the disk of the valve. In all cases where returns are fed back to the boiler by gravity, there will be a check valve and stop valve in each return line. The stop valve will be placed between the boiler and the check valve, and both will be located as close to the boiler as is practicable.

[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.8(89) Water level indicator requirements. This rule applies to power boilers installed prior to July 1, 1983. Outlet connections that allow the escape of an appreciable amount of steam or water will not

be placed on the piping. However, this rule does not prohibit the installation of damper regulators, feed water regulators, low-water fuel cutouts, drains, or steam gages. The water column will be provided with a drain of at least ¾-inch piping size. The drain must have a valve and be piped to a safe location. Each boiler will have three or more gage cocks located within the visible length of the water glass, except when the boiler has two water glasses located at the same horizontal lines. Only two gage cocks are required on boilers not over 36 inches in diameter with a heating surface not exceeding 100 square feet. Gage cocks are not required on electric boilers.

[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.9(89) Pressure gage requirements. This rule applies to power boilers installed prior to July 1, 1983. Each boiler will have a pressure gage so located that the gage is readable. The pressure gage will be installed so that it will at all times indicate the pressure in the boiler. Each steam boiler will have the pressure gage connected to the steam space or to the water column or its steam connection. A valve or cock will be placed in the gage connection adjacent to the gage. An additional valve or cock may be located near the boiler providing it is locked or sealed in the open position. No other shutoff valves will be located between the gage and the boiler. The pipe connection will be of ample size and arranged so that it may be cleared by blowing out. For a steam boiler the gage or connection will contain a siphon or equivalent device that will develop and maintain a water seal that will prevent steam from entering the gage tube. Pressure gage connections will be suitable for the maximum allowable working pressure and temperature, but if the temperature exceeds 406 degrees F, brass or copper pipe or tubing will not be used. The connections to the boiler, except the siphon, if used, will not be less than ¼-inch standard pipe size, but where steel or wrought-iron pipe or tubing is used, they will not be less than ½-inch inside diameter. The minimum size of a siphon, if used, will be ¼-inch inside diameter. The dial of the pressure gage will be graduated to approximately double the pressure at which the safety valve is set, but in no case to less than 1½ times this pressure.

[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.10(89) Steam stop valve requirements. This rule applies to power boilers installed prior to July 1, 1983. Each steam outlet from a boiler, except safety valve and water-column connections, will be fitted with a stop valve located as close as practicable to the boiler. When a stop valve is so located that water can accumulate, ample drains will be provided. The drainage will be piped to a safe location and will not be discharged on the top of the boiler or its setting. When boilers provided with manholes are connected to a common steam main, the steam connection from each boiler will be fitted with two stop valves having an ample free-blowing drain between them. The discharge of the drain will be piped clear of the boiler setting. The stop valves will consist of one automatic nonreturn valve next to the boiler and a second valve of the outside screw and yoke type.

[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—392.11(89) Blowoff connection requirements. This rule applies to power boilers installed prior to July 1, 1983. Each boiler will have a blowoff pipe fitted with valve or cock, in direct connection with the lowest water space practicable.

392.11(1) When the maximum allowable working pressure exceeds 125 psig, the blowoff pipe will be at least schedule 80 from the boiler to the valve or valves and will run full size without reducers or bushings. Galvanized materials will not be used.

392.11(2) All fittings between the boiler and valve will be steel or at least schedule 80 fittings of bronze, brass, malleable iron, or cast iron, all of which will be suitable for the pressure and temperature. In case of replacement of pipe or fittings in the blowoff lines, as specified in this paragraph, they will be installed in accordance with the rules of new installations.

392.11(3) When the maximum allowable working pressure exceeds 125 psig, each bottom blowoff pipe will be fitted with at least a 250-pound standard valve or cock. Two valves, or a valve and a cock, should be used on each blowoff.

392.11(4) When exposed to direct furnace heat, a bottom blowoff pipe will be protected by firebrick or other heat resisting material so arranged that the pipe may be inspected.

392.11(5) An opening in the boiler setting for a blowoff pipe will be arranged to provide for free expansion and contraction.

[**ARC 8888C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 89.

CHAPTER 393
MINIATURE POWER BOILERS INSTALLED PRIOR TO SEPTEMBER 20, 2006

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 1/14/98, see Labor Services[347] Ch 45]
[Prior to 8/16/06, see 875—Ch 206]
[Prior to 7/9/25, see Labor Services Division[875] Ch 93]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—393.1(89) Scope.

393.1(1) This chapter sets forth requirements in addition to those contained in 481—Chapter 392 for boilers that:

a. Have a heating surface of 20 square feet or less;
b. Have a gross volume of 5 cubic feet or less, excluding casing and insulation;
c. Have an inside shell diameter of 16 inches or less;
d. Have 100 psig maximum allowable working pressure; and
e. Were installed prior to September 20, 2006.

393.1(2) For objects covered by this chapter, if there is a conflict between this chapter and 481—Chapter 392, this chapter shall govern the issue.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.2(89) Code adopted by reference. The current edition of the National Board Inspection Code adopted by reference in rule 481—391.1(89) applies to objects covered by this chapter.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.3(89) Maximum working pressure. The maximum allowed working pressure is to be determined by rule 481—392.3(89).

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.4(89) Safety valve requirements. Boilers covered by this chapter will be equipped with a sealed spring-loaded pop safety valve of not less than ½-inch pipe size. The minimum relieving capacity of the safety valve will be determined in accordance with rule 481—392.6(89). In addition to these requirements, the safety valve will have sufficient capacity to discharge all the steam that can be generated by the boiler without allowing the pressure to rise more than 6 percent above maximum allowable working pressure.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.5(89) Steam stop valves. Each steam line from a miniature power boiler shall be provided with a stop valve located as close to the boiler shell or drum as is practicable except when the boiler and steam receiver are operated as a closed system.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.6(89) Water gage requirements.

393.6(1) Miniature power boilers for operation with a definite water level will be equipped with a glass water gage for determining the water level. The lowest permissible water level for vertical boilers will be at a point one-third of the height of the shell above the bottom head or tube sheet. When the boiler is equipped with an internal furnace, the water level will not be less than one-third of the length of the tubes above the top of the furnace tube sheet. In the case of small boilers operated in a closed system where there is insufficient space for the usual glass water gage, water level indicators of the glass bull's eye type may be used.

393.6(2) Miniature power boilers will have the lowest visible part of the water gage glass located at least 1 inch above the lowest permissible water level specified by the manufacturer.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.7(89) Feedwater supply requirements.

393.7(1) Except for miniature power boilers operating without the extraction of steam, miniature power boilers will be provided with at least one feed pump or other feeding device unless the boiler feed line is connected to a water main carrying sufficient pressure to feed the boiler. In the latter case, in lieu of a feeding device, a suitable connection or opening will be provided to fill the boiler when cold. Such connection will be no less than ½-inch pipe size for iron or steel pipe and ¼-inch for brass or copper pipe.

393.7(2) The feed pipe will be provided with a check valve and a stop valve of a size not less than that of the pipe. The feed water may be delivered through the blowoff opening if desired.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.8(89) Blowoff. Miniature power boilers shall be equipped with a blowoff connection, not less than ½-inch pipe size, located to drain from the lowest water space practicable. The blowoff shall be equipped with a valve or cock not less than ½-inch pipe size.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.9(89) Washout opening requirements.

393.9(1) Miniature power boilers exceeding 12 inches internal diameter or having more than 10 square feet of heating surface will be fitted with not less than three brass washout plugs of 1-inch pipe size that will be screwed into openings in the shell near the bottom. In miniature power boilers of the closed type system heated by removable internal electric heating elements, the openings for these elements when suitable for cleaning purposes may be substituted for washout openings. Boilers not exceeding 12 inches internal diameter and having less than ten square feet of heating surface need not have more than two 1-inch openings for cleanouts, one of which may be used for the attachment of the blowoff valve; these openings will be opposite each other where possible. All threaded openings will be opposite each other where possible. All threaded openings in the boiler will be provided with a riveted or welded reinforcement to give four full threads therein.

393.9(2) Electric boilers of a design employing a removable top cover flange for inspection and cleaning need not be fitted with washout openings.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—393.10(89) Fixtures and fittings. All valves, pipe fittings, and appliances connected to a miniature power boiler shall be equal to at least the minimal requirements of the construction or installation code and shall be rated for not less than the maximum allowable working pressure of the miniature power boiler. In no case shall the rating be for less than 125 pounds.

[**ARC 8889C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 89.

CHAPTER 394
STEAM HEATING BOILERS, HOT WATER HEATING BOILERS AND HOT WATER SUPPLY BOILERS

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 1/14/98, see Labor Services[347] Ch 46]
[Prior to 8/16/06, see 875—Ch 207]
[Prior to 7/9/25, see Labor Services Division[875] Ch 94]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—394.1(89) Scope. This chapter applies to:

394.1(1) Steam boilers for operation at pressures not exceeding 15 psig;

394.1(2) Hot water heating boilers for operation at pressures not exceeding 160 psig or temperatures not exceeding 250 degrees F at or near the boiler outlet;

394.1(3) Hot water supply boilers.

[**ARC 8890C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—394.2(89) Codes adopted by reference. The codes listed in 481—Chapter 391 apply to objects covered by this chapter.

[**ARC 8890C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—394.3(89) General requirements. This rule applies to all objects covered by this chapter and installed prior to September 20, 2006.

394.3(1) *Instruments, fittings and controls mounted inside boiler jackets.* Any or all instruments, fittings and controls required by this chapter may be installed inside of boiler jackets provided the water gage and pressure gage on a steam boiler or the thermometer and pressure gage on a water boiler are visible through an opening or openings at all times.

394.3(2) *Electrical code compliance.*

a. Wiring. All wiring for controls, heat-generating apparatus and other appurtenances necessary for the operation of the boiler or boilers will be in accordance with the National Electric Code (1992). All boilers supplied with factory-mounted and factory-wired controls, heat-generating apparatus and other appurtenances necessary for the operation of the boilers will be installed in accordance with the provisions of nationally recognized standards.

b. Circuitry. The control circuitry will be grounded and will operate at 150 volts or less. One of the two following systems may be employed to provide the control circuit:

(1) Two-wire, nominal 120-volt system with separate equipment ground conductor as follows:

1. This system will consist of the line, neutral and equipment ground conductors. The control panel frame and associated control circuitry metallic enclosures will be electrically continuous and be bonded to the equipment ground conductor.

2. The equipment ground conductor and the neutral conductor will be bonded together at their origin in the electrical system for objects installed prior to September 20, 2006.

3. The line side of the control circuit will be provided with a time delay fuse sized as small as practicable.

(2) Two-wire, nominal 120-volt system obtained by using an isolation transformer as follows:

1. The two-wire control circuit will be obtained from the secondary side of an isolation transformer, will be electrically continuous and will be bonded to a convenient cold water pipe. All metallic enclosures of control components will be securely bonded to this ground control circuit wire. The primary side of the isolation transformer will normally be a two-wire source with a potential 230, 208 or 440 volts.

2. Both sides of the two-wire primary circuit will be fused. The hot leg on the load side of the isolation transformer will be fused as small as practicable, and will not be fused above the rating of the isolation transformer.

394.3(3) *Safety and safety relief valve discharge piping.* When a discharge pipe is used, its internal cross-sectional areas will not be less than the full area of the valve outlet or of the total of the valve outlets

discharging therein and will be as short and straight as possible and so arranged as to avoid undue stress on the valve or valves. When an elbow is placed on a safety valve or safety relief valve discharge pipe, the elbow will be located close to the valve outlet.

394.3(4) *Expansion and contraction.* Provisions will be made for the expansion and contraction of steam and hot water mains connected to boilers.

394.3(5) *Return pipe connections.* The return pipe connections of each boiler supplying a gravity-return steam heating system will be so arranged as to form a loop so that the water in each boiler cannot be forced out below the safe water level.

394.3(6) *Feed water connections.*

a. Feed water, makeup water or water treatment will be introduced into a boiler through the return piping system. Alternatively, makeup water or water treatment may be introduced through an independent connection. The water flow from the independent feed water connection will not discharge against parts of the boiler exposed to direct radiant heat from the fire. Makeup water or water treatment will not be introduced through openings or connections provided for inspection, cleaning, safety valves, safety-relief valves, blowoffs, water columns, water gage glasses, pressure gages or temperature gages.

b. The makeup water pipe will be provided with a check valve near the boiler and a stop valve or cock between the check valve and the boiler or between the check valve and the return pipe system.

394.3(7) *Oil heaters.*

a. A heater for oil or other liquid harmful to boiler operation will not be installed directly in the steam or water space within a boiler.

b. Where an external-type heater for such service is used, means will be provided to prevent the introduction into the boiler of oil or other liquid harmful to boiler operation.

394.3(8) *Bottom blowoff or drain valve.*

a. Each boiler will have a bottom blowoff or drain pipe connection fitted with a valve or cock connected with the lowest water space practicable, with the minimum size of blowoff piping and valves as specified below:

Minimum Required Safety or Safety-Relief Valve Capacity (Pounds of Steam Per Hour)	Size of Blowoff Valves (Inches)
Up to 500	¾
501 to 1250	1
1251 to 2500	1¼
2501 to 6000	1½
6001 and larger	2

NOTE: Multiply 1,000 by the relieving capacity in pounds of steam per hour to determine the Btu of safety relief valve discharge capacity.

b. Any discharge piping connected to bottom blowoff or bottom drain connections will be full size to the point of discharge.

394.3(9) *Low-water fuel cutoff.*

a. Each automatically fired hot water heating boiler will have an automatic low-water fuel cutoff that has been designed for hot water service, and it will be so located as to automatically cut off the fuel supply when the surface of the water falls to the level established.

b. As there is no normal waterline to be maintained in a hot water heating boiler, any location of the low-water fuel cutoff above the lowest safe permissible water level established by the boiler manufacturer is satisfactory.

c. A coil-type boiler or a watertube boiler requiring forced circulation to prevent overheating of the coils or tubes will have a flow-sensing device installed in the outlet piping in lieu of the low-water fuel cutoff to automatically cut off the fuel supply when the circulating flow is interrupted.

[**ARC 8890C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—394.4(89) Steam heating boilers installed before July 1, 1960—requirements. All steam heating boilers installed before July 1, 1960, shall be constructed and installed in accordance with this rule.

394.4(1) Safety valves.

a. Each steam boiler will have one or more safety valves bearing the National Board "HV" stamp of the spring-pop type adjusted and sealed to discharge at a pressure not to exceed 15 psig. Seals will be attached in a manner to prevent the valve from being taken apart without breaking the seal. The safety valves will be arranged so that they cannot be set to relieve at a higher pressure than the maximum allowable working pressure of the boiler. For iron and steel bodied valves exceeding 2-inch pipe size, the drain hole or holes will be tapped not less than 3/8-inch pipe size.

b. The safety valves will be located in the top or side of the boiler. They will be connected directly to a tapped or flanged opening in the boiler, to a fitting connected to the boiler by a short nipple, to a Y-base, or to a valveless header connecting steam or water outlets on the same boiler. Coil or header type boilers will have the safety valve located on the steam outlet end. Safety valves will be installed with their spindles vertical. The opening or connection between the boiler and any safety valve will have at least the area of the valve inlet.

c. Safety valves ½-inch or more in diameter that are installed on a steam boiler will have a hand-lifted device that will positively lift the disk from its seat at least 1/16 inch when there is no pressure in the boiler. The seats and disks will be of noncorrosive material.

d. Safety valves for a steam boiler will be at least ½ inch unless the boiler and radiating surfaces consist of a self-contained unit. Safety valves will not be larger than 4½ inches. The inlet opening will have an inside diameter equal to or greater than the seat diameter.

e. The minimum relieving capacity of the valve or valves will be governed by the capacity marking on the boiler.

f. The minimum valve capacity in pounds per hour will be equal to the steam generation as specified in 481—subrules 392.6(9) and 392.6(10).

g. The safety valve capacity for each steam boiler will be such that with the fuel burning equipment operated at maximum capacity the pressure will not rise more than 5 percent above the maximum allowable working pressure.

h. When operating conditions are changed or additional boiler heating surface is installed, the valve capacity will meet the new conditions.

394.4(2) Steam gages.

a. Each steam boiler will have a steam gage or a compound steam gage connected to its steam space, its water column, or to its steam connection. The gage or connection will contain a siphon or equivalent device that will develop and maintain a water seal that will prevent steam from entering the gage tube. The connection will be so arranged that the gage cannot be shut off from the boiler except by a cock placed in the pipe at the gage and provided with a tee or lever-handle arranged to be parallel to the pipe in which it is located when the cock is open. The connections to the boiler will be not less than ¼-inch standard pipe size, but where steel or wrought-iron pipe or tubing is used, it will be not less than ½-inch standard pipe size. The minimum size of a siphon, if used, will be ¼-inch inside diameter. Ferrous and nonferrous tubing having inside diameters at least equal to that of standard pipe size listed above may be substituted for pipe.

b. The scale on the dial of a steam boiler gage will be graduated to not less than 30 psig nor more than 60 psig. The travel of the pointer from zero to 30 psig pressure will be at least 3 inches on a compound gage, and effective stops will be set at the limits of the gage readings on both the pressure and vacuum sides of the gage.

394.4(3) Water gage glasses.

a. Each steam boiler will have one or more water gage glasses attached to the water column or boiler by means of valved fittings not less than ½-inch pipe size with the lower fittings provided with a drain valve having an unrestricted drain opening not less than ¼-inch diameter to facilitate cleaning. Gage glass replacement will be possible under pressure. Water gage glass fittings may be attached directly to a boiler.

b. The lowest visible part of the water gage glass will be at least 1 inch above the lowest permissible water level recommended by the boiler manufacturer. With the boiler operating at this lowest permissible water level, there will be no danger of overheating any part of the boiler.

c. Transparent material other than glass may be used for the water gage provided that the material will remain transparent and has proved suitable for the pressure, temperature and corrosive conditions expected in service.

394.4(4) Water column and water level control pipes.

a. The minimum size of ferrous or nonferrous pipes connecting a water column to a steam boiler will be 1 inch. No outlet connections, except for damper regulator, feedwater regulator, steam gages or apparatus that does not permit the escape of any steam or water, except for manually operated blowdowns, will be attached to a water column or the piping connecting a water column to a boiler. If the water column, gage glass, low-water fuel cutoff or other water level control device is connected to the boiler by pipe and fittings, no shutoff valves of any type will be placed in such pipe, and a cross or equivalent fitting to which a drain valve and piping may be attached will be placed in the water piping connection at every right angle to facilitate cleaning. The water column drainpipe and valve will be not less than ¾-inch pipe size.

b. The steam connections to the water column of a horizontal firetube wrought boiler will be taken from the top of the shell or the upper part of the head, and the water connection will be taken from a point not above the center line of the shell. For a cast iron boiler, the steam connection to the water column will be taken from the top of an end section or the top of the steam header, and the water connections will be made on an end section not less than 6 inches below the bottom connection to the water gauge glass.

394.4(5) Pressure control.

a. In addition to the operating control for normal boiler operation, each individual, automatically fired steam heating boiler will have a high-limit, pressure-actuated combustion control that will cut off the fuel supply to prevent the pressure from rising over 15 psig. The separate controls may have a common connection to the boiler. Upon replacement of the high-limit, pressure-actuated combustion control, controls with manual reset will be installed.

b. In a multiple boiler installation where the operating pressure control may be installed in a header or other point common to all boilers and could be isolated from any or all of the boilers, there will be at least one high-limit, pressure-actuated combustion control mounted on each boiler.

c. No shutoff valve of any type will be placed in the connection to the high-limit, pressure-actuated control. The control or connections will contain a siphon or equivalent device that will develop and maintain a water seal that will prevent steam from entering the control. The connections to the boiler will not be less than ¼-inch standard pipe size, but where steel or wrought-iron pipe or tubing is used, the fittings will be not less than ½-inch standard pipe size. The minimum size of a siphon, if used, will be ¼-inch inside diameter. Ferrous and nonferrous tubing having inside diameters at least equal to that of standard pipe size listed above may be substituted for pipe where a manifold is used for a multiple control. The connection to the boiler will not be less than ¼-inch standard pipe size.

394.4(6) Automatic low-water fuel cutoff or water-feeding device.

a. Each automatically fired steam or vapor system boiler will have an automatic low-water fuel cutoff so located as to automatically cut off the fuel supply when the surface of the water falls to the lowest visible part of the water gage glass. If a water-feeding device is installed, it will be so constructed that the water inlet valve cannot feed water into the boiler through the float chamber and so located as to supply requisite feedwater.

b. A fuel cutoff or water-feeding device may be attached directly to a boiler or in the tapped openings available for attaching a water glass directly to a boiler. Connections in the tapped openings will be made to the boiler with nonferrous tees or "Ys" not less than ½-inch pipe size between the boiler and the water glass so that the water glass is attached directly and as closely as possible to the boiler. The run of the tee or "Y" will take the water glass fittings, and the side outlet or branch of the tee or "Y" will take the fuel cutoff or water-feeding device. The ends of all nipples will be reamed to full-size diameter.

c. Fuel cutoffs and water-feeding devices embodying a separate chamber will have a vertical straightway drainpipe and a blowoff valve not less than ¾-inch pipe size located at the lowest point in the water equalizing pipe connections so that the chamber and the equalizing pipe can be flushed and the device tested.

394.4(7) Stop valves for single steam heating boilers. When a stop valve is used in the supply pipe connection of a single steam boiler, there will be one used in the return pipe connection.

394.4(8) Stop valves for multiple steam heating boilers. A stop valve will be used in each supply and return pipe connection of two or more boilers connected to a common system.

[**ARC 8890C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—394.5(89) Hot water heating boilers installed before July 1, 1960—requirements. Hot water heating boilers installed before July 1, 1960, shall be constructed and installed in accordance with this rule.

394.5(1) Safety relief valves.

a. Each hot water heating boiler will have at least one safety relief valve bearing the National Board "HV" stamp of the automatic-resetting type set to relieve at or below the maximum allowable working pressure of the boiler. The safety relief valve will have pop action when tested by steam. When more than one safety relief valve is used on a hot water heating boiler, the additional valve or valves must bear the National Board "HV" stamp and may be set within a range not to exceed 6 psig above the maximum allowable working pressure of the boiler up to and including 60 psig and 5 percent for those having a maximum allowable working pressure exceeding 60 psig. Safety relief valves will be so arranged that they cannot be reset to relieve at a higher pressure.

b. No safety relief valve will be smaller than ¾-inch nor larger than 4½-inch standard pipe size, except those boilers having a heat input not greater than 15,000 Btu per hour may be equipped with a safety relief valve of ½-inch standard pipe size bearing the National Board "HV" stamp. The inlet opening will have an inside diameter equal to or greater than the seat diameter. In no case will the minimum opening through any part of the valve be less than ½-inch diameter.

394.5(2) Temperature and pressure gage.

a. Each hot water boiler will have a temperature and pressure gage properly calibrated to the altitude connected to it or to its flow connection in such a manner that it cannot be shut off from the boiler except by a cock with tee or lever handle placed on the pipe near the gage. The handle of the cock will be parallel to the pipe in which it is located when the cock is open.

b. The scale on the dial of the temperature and pressure gage will be graduated approximately to not less than one and one-half nor more than three times the pressure at which the safety relief valve is set. The gage will be provided with effective stops for the indicating pointer at the zero point and at the maximum pressure point.

c. The temperature gage will be so located and connected that it will be easily readable. The thermometer will be so located that it will at all times indicate the temperature in degrees Fahrenheit of the water in the boiler at or near the outlet.

d. Piping or tubing for temperature and pressure gage connections will be of nonferrous metal when smaller than 1-inch pipe size.

394.5(3) Temperature control.

a. In addition to the operating control used for normal boiler operation, each individual, automatically fired hot water boiler will have a separate high-limit, temperature-actuated combustion control that will cut off the fuel supply to prevent the temperature of the water from rising over 250 degrees F. Separate controls may have a common connection to the boiler.

b. In a multiple boiler installation where the operating temperature actuated control may be installed in a header or other point common to all boilers and can be isolated from any or all of the boilers, there will be at least one high-limit, temperature-actuated combustion control mounted on each boiler.

394.5(4) Stop valves.

a. On single hot water heating boilers, stop valves will be located at an accessible point in the supply and return pipe connections as near the boiler nozzle as is convenient and practicable to permit draining the boiler without emptying the system.

b. Where two or more boilers are connected in a common system, a stop valve will be used in each boiler's supply and return pipe connection.

394.5(5) Provisions for thermal expansion in hot water heating system.

a. All hot water heating systems incorporating hot water tanks or fluid relief columns will be so installed as to prevent freezing under normal operating conditions.

b. Systems with open expansion tanks require an indoor overflow from the upper portion of the expansion tank in addition to an open vent. The indoor overflow is to be carried within the building to a suitable plumbing fixture or to the basement.

c. An expansion tank adequate for the volume and capacity of the system will be installed. If the system is designed for a working pressure of 30 psi or less, the tank will be suitably designed for a minimum hydrostatic test pressure of 75 psi. Expansion tanks for systems designed to operate above 30 psi will be constructed in accordance with ASME Code, Section VIII, Division I, in effect when installed. Provisions will be made for draining the tank without emptying the system, except for prepressurized tanks.

d. The expansion tank capacities for gravity hot water heating systems will be as follows:

Sq. Ft. of Installed Equivalent Direct Radiation	Tank Capacity, Gallons
Up to 350	18
Up to 450	21
Up to 650	24
Up to 900	30
Up to 1,100	35
Up to 1,400	40
Up to 1,600	2-30
Up to 1,800	2-30
Up to 2,000	2-35
Up to 2,400	2-40
2,400 and up	1 additional gallon per 33 square feet of additional equivalent direction radiation

e. The expansion tank capacities for forced hot water heating systems will be based on an average operating water temperature of 195 degrees F, a fill pressure of 12 psig, and a maximum operating pressure of 30 psig as follows:

System Volume, Gallons	Tank Capacity, Gallons
100	15
200	30
300	45
400	60
500	75
1,000	150
2,000	300

In calculating, include the volume of water in boiler, radiation and piping but not the expansion tank.

[**ARC 8890C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—394.6(89) Hot water supply boilers installed before July 1, 1960—requirements.

394.6(1) *Scope.* This rule establishes minimum requirements for installation, operation, and inspection of hot water supply boilers installed before July 1, 1960, when any of the following limitations are exceeded:

a. Heat input of 200,000 Btu per hour.

b. Water temperature of 210 degrees F.

c. A water containing capacity of 120 gallons.

394.6(2) *Safety relief valves.* Each hot water supply boiler must have at least one pressure and temperature relief valve bearing the National Board "HV" stamp installed on the hot water outlet line.

394.6(3) *Safety valves and safety relief valves for tanks and heat exchangers.*

a. When a hot water supply vessel is heated indirectly by steam in a coil or pipe, the pressure of the steam used will not exceed the safe working pressure of the tank. A safety relief valve at least 1 inch in diameter will be installed on the tank and will be set to relieve at or below the maximum allowable working pressure of the tank.

b. When water over 160 degrees F is circulated through the coils or tubes of a heat exchanger to warm the water for space heating or hot water supply, the heat exchanger will be equipped with one or more safety relief valves bearing the National Board "HV" stamp of sufficient rated capacity to prevent the heat exchanger pressure from rising more than 10 percent above the maximum allowable working pressure of the vessel. The valves will be set to relieve at or below the maximum allowable working pressure of the heat exchanger.

c. When water over 160 degrees F is circulated through the coils or tubes of a heat exchanger to generate low-pressure steam, the heat exchanger will be equipped with one or more safety valves bearing the National Board "HV" stamp of sufficient rated capacity to prevent the heat exchanger pressure from rising more than 5 psig above the maximum allowable working pressure of the vessel. The valves will be set to relieve at a pressure not to exceed 15 psig.

394.6(4) *Gages.* Temperature and pressure gages will be installed in accordance with 94.5(2).

394.6(5) *Temperature controls.* Temperature controls will be installed in accordance with 94.5(3).

394.6(6) *Stop valves.*

a. Stop valves will be placed in the supply and return pipe connections of a single hot water supply boiler installation to permit draining the boiler without emptying the system.

b. Where two or more boilers are connected in a common system, a stop valve will be used in each boiler's supply and return pipe connection.

394.6(7) *Thermal expansion.* If a system is equipped with a check valve or pressure-reducing valve in the cold water inlet line, an airtight expansion tank or other suitable air cushion will be installed. When an expansion tank is provided, it will be constructed in accordance with the ASME Code, Section VIII, Division 1, in effect when installed, for a maximum allowable working pressure equal to or greater than the water heater. Except for prepressurized tanks, provisions will be made for draining the tank without emptying the system.

[**ARC 8890C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 89.

CHAPTER 395
UNFIRED STEAM PRESSURE VESSELS

[Prior to 9/24/86, Labor, Bureau of[530] Ch 209]
[Prior to 1/14/98, see Labor Services[347] Ch 48]
[Prior to 8/16/06, see 875—Ch 209]
[Prior to 7/9/25, see Labor Services Division[875] Ch 96]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—395.1(89) Codes adopted by reference. The codes listed in 481—Chapter 391 apply to objects covered by this chapter.
[**ARC 8891C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 7/9/25]

481—395.2(89) Objects installed prior to July 1, 1983—requirements.

395.2(1) *Maximum allowable working pressure.*

a. The maximum allowable working pressure for code-stamped unfired steam pressure vessels will be determined in accordance with the applicable provisions of the ASME Code or American Petroleum Institute Code under which they were constructed and stamped.

b. The maximum allowable working pressure on the shell of unfired steam pressure vessels without a code stamp will be determined by the following equation:

$$\frac{TStE}{RFS} = \text{Maximum allowable working pressure, psig.}$$

Where:

TS = Ultimate tensile strength of shell plate(s), psig. When the tensile strength of a steel plate(s) is unknown, it shall be taken as 55,000 psig for temperatures not exceeding 650 degrees F.

t = Minimum thickness of shell plates of the weakest course, in inches.

E = Efficiency of longitudinal joint. For riveted joints, use ASME Code, Section 1 (1971). For fusion-welded and brazed joints, use the following table:

Single lap welded	40
Double lap welded	60
Single butt welded	60
Double butt welded	75
Forge welded	70
Brazed steel	80

R = Inside radius of the weakest course of shell or drum in inches, provided the thickness does not exceed 10 percent of the radius. If the thickness is over 10 percent of the radius, the outer radius shall be used.

FS = Factor of safety shall be four.

c. The maximum allowable working pressure for unfired steam pressure vessels without an ASME stamp subjected to external or collapsing pressure will be determined by the ASME Code, Section VIII.

395.2(2) *End closures.* The maximum allowable working pressure permitted for formed heads under pressure will be determined by using the formulas in ASME Code, Section VIII.

395.2(3) *Safety appliances.* Each unfired steam pressure vessel will be protected by such safety and relief valves and indicating and controlling devices as will ensure its safe operation. Valves will not readily be rendered inoperative. The relieving capacity of safety valves will be such as to prevent a rise of pressure in the vessel of more than 10 percent above maximum allowable working pressure, taking into account the effect of static head. Safety valve discharges will be carried to a safe place.

ELECTRICAL EXAMINING BOARD

CHAPTER 400
ELECTRICIAN AND ELECTRICAL CONTRACTOR LICENSING PROGRAM—ORGANIZATION AND ADMINISTRATION

[Prior to 7/9/25, see Public Safety Department[661] Ch 500]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—400.1(103) Establishment of program. The electrician and electrical contractor licensing program is established in the department of inspections, appeals, and licensing. The program is under the direction of the electrical examining board. Contact information of the board office can be found on the department's website.

[**ARC 7877C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—400.2(103) Definitions. The following definitions apply to all rules adopted by the electrical examining board.

"Approved by the board" means the approval of any item, test or procedure by the electrical examining board by adoption of a resolution at a meeting of the board, provided that the approval has not been withdrawn by a later resolution of the board. A list of any such items, tests, or procedures that have been approved by the board is available from the board office or from the board website.

"Complete criminal record" means the complaint and judgment of conviction for each offense of which the applicant has been convicted, regardless of whether the offense is classified as a felony or a misdemeanor, and regardless of the jurisdiction in which the offense occurred.

"Conviction" means a finding, plea, or verdict of guilt made or returned in a criminal proceeding, even if the adjudication of guilt is deferred, withheld, or not entered. "Conviction" includes Alford pleas and pleas of nolo contendere.

"Department" means the department of inspections, appeals, and licensing.

"Directly relates" or *"directly related"* means either that the actions taken in furtherance of an offense are actions customarily performed within the scope of practice of the profession; or that the circumstances under which an offense was committed are customary to the profession.

"Disqualifying conviction" or *"disqualifying offense"* means a conviction directly related to the practice of the profession.

"Division" means the building and construction bureau of the department of inspections, appeals, and licensing.

"Documented experience" means experience which an applicant for licensing has completed and which has been documented by the applicant's completion and submission of a sworn affidavit or other evidence requested by the board.

"Eligibility determination" means the process by which a person who has not yet submitted a completed license application may request that the board determine whether one or more of the person's convictions are disqualifying offenses that would prevent the individual from receiving a license or certification.

"Emergency installation" means an electrical installation necessary to restore power to a building or facility when existing equipment has been damaged due to a natural or man-made disaster or other weather-related cause. Emergency installations may be performed by persons properly licensed to perform the work, and may be performed prior to submission of a request for permit or request for inspection. A request for permit and request for inspection, if required by rule 481—404.5(103), should be made as soon as practicable and, in any event, no more than 72 hours after the installation is completed.

"Final agency action" means the issuance, denial, suspension, or revocation of a license. If an action is subject to appeal, "final agency action" has occurred when the administrative appeal process provided for in 481—Chapter 402 has been exhausted or when the deadline for filing an appeal has expired.

"Full-time" means a minimum of 1,700 hours of work in a one-year period.

"Issuing jurisdiction" means the duly constituted authority in another state that has issued a professional license, certificate, or registration to a person.

"Registered apprenticeship program" means an electrical apprenticeship program registered with the Bureau of Apprenticeship and Training of the United States Department of Labor or an electrical apprenticeship program registered with a state agency whose registration program is accepted by the Bureau of Apprenticeship and Training in lieu of direct registration with the Bureau of Apprenticeship and Training.

"Residential electrical work" means electrical work in a residence in which there are no more than four living units within the same building and includes work to connect and work within accessory structures, which are structures no greater than 3,000 square feet in floor area, not more than two stories in height, the use of which is incidental to the use of the dwelling unit or units, and located on the same lot as the dwelling unit or units.

"Transferring jurisdiction" means the specific issuing jurisdiction on which an applicant relies to seek licensure in Iowa by verification under this chapter.

[**ARC 7877C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapters 17A, 103 and 272C.

CHAPTER 401
ELECTRICIAN AND ELECTRICAL CONTRACTOR LICENSING PROGRAM—LICENSING REQUIREMENTS, PROCEDURES, AND FEES

[Prior to 7/9/25, see Public Safety Department[661] Ch 502]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—401.1(103) License categories and authority.

401.1(1) The following license categories are established:

a. Electrical contractor.
b. Residential electrical contractor.
c. Master electrician, class A.
d. Master electrician, class B.
e. Residential master electrician.
f. Journeyman electrician, class A.
g. Journeyman electrician, class B.
h. Residential electrician.
i. Apprentice electrician.
j. Special electrician.
k. Unclassified person.
l. Inactive master electrician.

401.1(2) A person who holds any class of license issued by the board, other than a class B license, a residential electrical contractor license, a residential master electrician license, or a residential electrician license, may perform the work authorized by that license anywhere within the state of Iowa. A class B license can be subject to limitations imposed by a political subdivision through a local ordinance pursuant to Iowa Code section 103.29(4). A person who holds a residential electrical contractor license, a residential master electrician license, or a residential electrician license may perform the work authorized by that license anywhere within the state of Iowa except within a political subdivision which has, by local ordinance, limited the use of such a license.

401.1(3) Except as otherwise provided by Iowa Code chapter 103, a person who does not have a current valid license cannot perform work as an electrician or as an unclassified person. A person cannot perform work which requires licensing and which is not specifically authorized under the license issued.

401.1(4) An apprentice electrician or an unclassified person, while performing electrical work, shall be directly supervised at all times by a master electrician or a journeyman electrician or, while performing residential electrical work only, by a residential master electrician, a residential electrician, or a special residential electrician. A master electrician, a journeyman electrician, a residential master electrician, or a residential electrician is not permitted to directly supervise more than three apprentice electricians or unclassified persons, or both, at once.

401.1(5) A journeyman electrician or a residential electrician may only work under the general direction of a master electrician or, while performing residential electrical work only, under the general direction of a residential master electrician.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.2(103) License requirements.

401.2(1) An electrical contractor license may be issued to a person who submits an application with the applicable fee, who holds or employs a person who holds an active master electrician license, who is registered as a contractor with the department. An electrical contractor license issued to a person who holds a class B master electrician license is subject to the same restriction of use as is the class B master electrician license.

401.2(2) A residential electrical contractor license may be issued to a person who is licensed as a class A master electrician, a class B master electrician, or a residential master electrician and who is registered with the state of Iowa as a contractor pursuant to Iowa Code chapter 91C.

401.2(3) A class A master electrician license may be issued to a person who submits to the board a completed application with the applicable fee and who meets one of the following:

a. Has completed one year of experience as a licensed journeyman electrician, and has passed a supervised written examination for master electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application; or

b. As of December 31, 2007, held a current valid license as a master electrician issued by a political subdivision in Iowa, the issuance of which required passing a supervised written examination approved by the board, and one year of experience as a journeyman electrician; or

c. Holds a current class B master electrician license and has passed a supervised written examination for master electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application.

401.2(4) A class B master electrician license may be issued to a person who submits to the board a completed application with the applicable fee; who presents credible evidence of having worked for a total of 16,000 hours of cumulative experience as a master electrician, of which at least 8,000 hours were worked since January 1, 1998; and whose experience as a master electrician began on or before January 1, 1998.

401.2(5) A residential master electrician license may be issued to a person who submits to the board a completed application with the applicable fee, holds a current residential electrician or journeyman electrician license, has 2,000 hours of verified experience as a residential electrician or a journeyman electrician, and has passed a residential master electrician examination approved by the board with a score of 70 or higher within 24 months of submission of a new application.

401.2(6) A class A journeyman electrician license may be issued to a person who submits to the board a completed application with the applicable fee and who meets one of the following:

a. Has successfully completed a registered apprenticeship program, has passed a supervised written examination for journeyman electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application, and has completed four years of experience as an apprentice electrician.

b. Holds a current class B journeyman electrician license and has passed a supervised written examination for journeyman electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application.

c. Holds a current electrician license in another state, has passed a supervised written examination for journeyman electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application, and has satisfied the sponsorship requirements for testing for a journeyman class A license by providing evidence of all of the following:

(1) Current licensure as a journeyman or master electrician from another state which required passing a test sponsored by that state.

(2) Completion of 18 hours of continuing education units approved by the board.

(3) Completion of 1,000 hours of work in Iowa as an unclassified person.

d. Holds a current license issued by the board; has passed a supervised written examination for journeyman electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application; has completed 54 hours of continuing education approved by the board; and has completed 16,000 hours of electrical work while licensed by the board, except as a special electrician, as verified by a master electrician licensed by the board. The 16,000 hours is to include at least the following minimum number of hours of work on commercial or industrial installations in the categories indicated: 500 hours of preliminary work, 2,000 hours of rough-in work, 2,000 hours of finish work, 2,000 hours of lighting and service work, 500 hours of troubleshooting, and 500 hours of motor control work. At least 4,000 hours of the 16,000 hours is to be completed by the applicant within the five years immediately preceding the submission date of the application.

e. Holds a current license issued by the board as a residential electrician or residential master electrician, has passed a supervised written examination for journeyman electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application, and has completed 4,000 hours of work on commercial or industrial electrical installations while licensed by the board, as verified

by a master electrician licensed by the board. The 4,000 hours is to include at least the following minimum numbers of hours in the categories indicated: 100 hours of preliminary work, 500 hours of rough-in work, 500 hours of finish work, 500 hours of lighting and service work, 100 hours of troubleshooting, and 100 hours of motor control work.

f. Holds a current license issued by the board, has satisfactorily completed an approved postsecondary electrical education program, has passed a supervised written examination for journeyman electrician approved by the board with a score of 70 or higher within 24 months of submission of a new application, and, subsequent to beginning the postsecondary electrical education program, has completed at least 6,000 hours of electrical work while licensed by the board, as verified by a master electrician licensed by the board.

401.2(7) A class B journeyman electrician license may be issued to a person who submits to the board a completed application with the applicable fee; who presents credible evidence of having worked for a total of 16,000 hours of cumulative experience as a journeyman electrician or master electrician, of which at least 8,000 hours were worked since January 1, 1998; and whose experience as a journeyman electrician or master electrician began on or before January 1, 1998.

401.2(8) A residential electrician license may be issued to a person who submits to the board a completed application with the applicable fee and who meets one of the following:

a. Has completed 6,000 hours of experience as an apprentice electrician and has passed a residential electrician examination approved by the board. An applicant may take the examination after completing 5,000 hours of experience as an apprentice electrician, although the license will not be issued until the applicant has completed 6,000 hours of such experience; or

b. Has completed 4,000 hours of experience working under the direct supervision of a residential master electrician, a residential electrician, a master electrician, or a journeyman electrician; has successfully completed a minimum of one academic year of an electrical trade school approved by the board; and has passed a residential electrician examination approved by the board; or

c. Has completed 8,000 hours of verified experience as a licensed unclassified person including at least 2,000 hours of verified work experience in residential wiring and has passed a residential electrician examination approved by the board; or

d. Has successfully completed a registered residential electrician apprenticeship program and passed a supervised written residential electrician examination approved by the board with a score of 70 or higher within 24 months of submission of a new application.

401.2(9) A special electrician license may be issued to a person who submits to the board a completed application with the applicable fee and who meets the qualifications for any endorsement entered on the license. Each special electrician license is eligible to carry one or more of the following endorsements:

a. Endorsement 1, "Irrigation System Wiring," may be included if requested and the applicant has passed a supervised examination approved by the board or has completed two years, or 4,000 hours, of documented experience in the wiring of irrigation systems.

b. Endorsement 2, "Disconnecting and Reconnecting Existing Air Conditioning and Refrigeration Systems," may be included if requested and the applicant has passed a supervised examination approved by the board or has completed two years of documented experience in the disconnecting and reconnecting of existing air conditioning and refrigeration systems.

c. Endorsement 3, "Sign Installation," may be included if requested. This endorsement does not authorize the holder to connect power to a sign that has a voltage greater than 220V and an ampere rating greater than 20 amps. Initial installation or upgrading of the branch circuits supplying power to the sign may only be completed by a licensed master electrician or by a licensed journeyman electrician under the supervision of a master electrician.

401.2(10) An apprentice electrician license may be issued to a person who submits a completed application to the board with the applicable fee and who is participating in a registered apprenticeship program. A person may hold an apprentice electrician license for no more than six years from the original date of licensing unless an extension is granted by the board based upon a documented hardship.

401.2(11) A license as an unclassified person may be issued to a person who submits a completed application to the board with the applicable fee and who is employed by a licensed electrical contractor.

Any person who holds a current license issued by the board, excluding special electrician licenses, may work as an unclassified person without holding an unclassified person license.

401.2(12) In lieu of renewal of the active master electrician license, an inactive master electrician license may be issued to a holder of a master electrician license whose license is due for renewal and who requests placement in inactive status. It is the responsibility of the holder of an inactive license to maintain all requirements which would apply for an active master electrician license, except for payment of the fee for an active license, during the term of the inactive license. If the license holder fails to meet any such requirement during the term of the inactive license, the license holder will not be entitled to reinstatement of an active license. If the license holder continues to meet all such requirements while holding an inactive license, the license holder may obtain an active master electrician license by surrendering the inactive master electrician license, filing an application for reinstatement, and paying the applicable license fee. The holder of an inactive license who seeks reinstatement of an active license will not receive any refund of the fee paid for the inactive license. A person who holds an inactive license cannot perform work which requires the person to be a holder of that license but may perform work authorized by any active license issued by the board which the person holds.

401.2(13) Retaking an examination. If passage of an examination is a requirement for issuance of a license:

a. An applicant who has taken the examination for a license twice and has failed the examination twice cannot retake the examination until after waiting six months and completing 12 hours of continuing education approved by the board on subjects related to the standards specified in rule 481—404.3(103). After satisfying the requirements of this paragraph, the applicant may take the examination two additional times, or a maximum of four times.

b. An applicant who has satisfied the conditions of paragraph *"a"* and who has taken the examination two additional times, or a total of four times, and has failed the examination four times cannot retake the examination until after waiting an additional six months and completing an additional 12 hours of continuing education approved by the board on subjects related to the standards specified in rule 481—404.3(103). After satisfying the requirements of this paragraph, the applicant may take the examination two additional times, or a maximum of six times.

c. An applicant who has satisfied the conditions of paragraph *"b"* and who has taken the examination two additional times, or a total of six times, and has failed the examination six times cannot retake the examination any additional times unless approved to do so by the board. An applicant who wishes to take an examination after failing it six times may petition the board to allow the applicant to take the examination again after waiting an additional six months. The board may request that an applicant appear personally before the board when considering the petition.

401.2(14) Reciprocal journeyman licensing. A journeyman class A license may be issued, without examination, to a person who holds a license from another state provided that:

a. The board has entered into an agreement with the other state providing for reciprocal issuance of licenses and the agreement recognizes the equivalency of the examination required for the license issued by the other state and the examination required for the Iowa license to be issued; and

b. The applicant has successfully completed a supervised written examination approved by the other state with a score of 70 or higher in order to obtain the license from the other state; and

c. The applicant holds an applicable license from the other state at the time the application for an Iowa license is filed and has held the applicable license from the other state continuously for one year at the time the application for an Iowa license is filed; and

d. The applicant has submitted:

(1) A completed application for the Iowa license;

(2) A copy of the applicable license from the other state, clearly showing the license number and any other identifying information;

(3) The applicable fee;

(4) The sworn affidavit required under subparagraph 401.2(14)*"e"*(2), if applicable; and

(5) Any other information requested by the board; and

e. The applicant has either:

(1) Completed an approved apprenticeship program; or

(2) Completed 16,000 hours of electrical work as an electrician licensed by the other state, as documented by submission of a sworn affidavit signed by the applicant.

401.2(15) Reciprocal master licensing. A master class A license may be issued, without examination, to a person who holds an equivalent license from another state provided that:

a. The board has entered into an agreement with the other state providing for reciprocal issuance of licenses and that the agreement recognizes the equivalency of the examination required for the license issued by the other state and the examination required for the Iowa license to be issued; and

b. The applicant has successfully completed a supervised written examination approved by the other state, with a score of 70 or higher, in order to obtain the license from the other state; and

c. The applicant holds an applicable license from the other state at the time the application for an Iowa license is filed and has held the applicable license from the other state continuously for one year at the time the application for an Iowa license is filed; and

d. The applicant has submitted:

(1) A completed application for the Iowa license;

(2) A copy of the applicable license from the other state, clearly showing the license number and any other identifying information;

(3) The applicable fee;

(4) Any other information requested by the board, which may include, but is not limited to, additional evidence that the person's license from the other state is currently valid; and

e. The applicant has either:

(1) Completed an approved apprenticeship program; or

(2) Completed 16,000 hours of electrical work as an electrician licensed by the other state, documented by a sworn affidavit signed by the applicant.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 12/10/25]

481—401.3(103) License terms and fees. The following table sets out the length of term of each license and the fee for the license.

License Type	Term	Fee
Electrical Contractor	3 years	$375
Residential Electrical Contractor	3 years	$375
Master Electrician, Class A	3 years	$375
Master Electrician, Class B	3 years	$375
Residential Master Electrician	3 years	$375
Journeyman Electrician, Class A	3 years	$75
Journeyman Electrician, Class B	3 years	$75
Residential Electrician	3 years	$75
Special Electrician	3 years	$75
Apprentice Electrician	1 year	$20
Unclassified Person	1 year	$20
Inactive Master Electrician	3 years	$75

401.3(1) If a license is issued for less than the period of time specified in the table above, the fee will be prorated according to the number of months for which the license is issued.

401.3(2) A licensee who is on active military deployment for 91 or more consecutive calendar days during the term of a license may have the license period tolled as follows. "Tolled" means that the expiration date of the license will be delayed for that period of time.

a. A licensee who is on active military deployment for 91 or more consecutive calendar days during a licensing period may have the license terms tolled for one year.

b. A licensee who is on active military deployment for 366 or more consecutive calendar days during a licensing period may have the license terms tolled for two years.

c. A licensee who is on active military deployment for 91 or more consecutive calendar days but fewer than 366 consecutive calendar days may petition the board to have the license tolled for two years upon a showing of a special hardship which would not be alleviated by tolling the license term for only one year.

d. A licensee who requests that the term of a license be tolled pursuant to this subrule will provide a copy of military orders showing the beginning and ending dates of the deployment or deployments which are the basis for the request.

401.3(3) A licensee may obtain a replacement license for a license that has been lost. To order a replacement license, the licensee will notify the board office in writing that the license has been lost and will provide any information needed by the board office, which may include, but is not limited to, the license number, the name of the licensee, and a description of the circumstances of the loss, if known. The fee for issuance of a replacement license is $15.

Exception:

If a licensee who is located in an area covered by a disaster emergency proclamation issued by the governor pursuant to Iowa Code section 29C.6 which is currently in force or has been in force within the previous 90 days certifies to the board that the license was lost as a direct result of conditions which relate to the issuance of the disaster emergency proclamation, the fee for replacement of the license can be waived.

401.3(4) Refunds of license fees can be made under the following circumstances:

a. If an error on the part of the staff or the applicant or licensee has resulted in an overpayment of fees, the refund can be in the amount of overpayment and can be made if the overpayment is discovered by staff of the board or if the overpayment is discovered by the applicant or licensee and the applicant or licensee requests a refund.

b. If an applicant for an initial license or a renewal license dies prior to the effective date of a license for which the applicant has applied and paid the applicable fee, the license fee can be refunded to the estate of the applicant upon receipt of a request from the estate of the applicant, accompanied by a certified copy of the death certificate.

401.3(5) The fee for submitting a petition for eligibility determination as defined in subrule 401.8(2) is $25.

401.3(6) The board will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.4(103) Disqualifications for licensure. An application for a license can be denied if any of the following apply:

401.4(1) The applicant fails to meet the requirements for the license for which the applicant has applied or the applicant fails to provide adequate documentation of any requirement.

401.4(2) The applicant has previously had a license revoked or suspended by the board, and the circumstances which formed the basis of the revocation or suspension have not been corrected. If a license was revoked or suspended and conditions were imposed for the restoration of the license, licensure will be denied unless those conditions have been met.

401.4(3) The applicant has been denied, for cause, a license to work, or a license as an electrician has been revoked, for cause, in any other state or political subdivision and the applicant has not subsequently received a license from the state or political subdivision which denied or revoked the license. An applicant who has been denied a license pursuant to this provision may apply to the board for a license and, upon a showing of evidence satisfactory to the board that the condition or conditions which led to the denial or revocation no longer apply, the board may grant the license to the applicant.

401.4(4) The applicant falsifies or fails to provide any information requested in connection with the application or falsifies any other information provided to the board in support of the application.

401.4(5) The applicant has been convicted of a disqualifying offense in the courts of this state or another state, territory, or country. A file-stamped copy of the final order or judgment of conviction or plea of guilty in this state or another state constitutes conclusive evidence of the conviction.

401.4(6) The applicant has unpaid fees due to the board which are 120 days or more past due. The license for which the applicant applied may be issued after the fees are paid if the applicant is not otherwise disqualified from obtaining the license.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.5(103) License application.

401.5(1) Any person seeking a license from the board is to submit a completed application to the board accompanied by the applicable fee payable by check, money order, or warrant to the Iowa Department of Inspections, Appeals, and Licensing. The memo area of the check should read "Electrician Licensing Fees." The application is to be submitted on the form prescribed by the board, which may be obtained from the board office.

401.5(2) Upon receipt of a completed application, the board executive secretary or designee has discretion to:

a. Authorize the issuance of a license, certification, or examination application.

b. Refer the application to a committee of the board for review and consideration when the board executive secretary determines that matters raised in or revealed by the application, including but not limited to prior criminal history, chemical dependence, competency, physical or psychological illness, professional liability claims or settlements, professional disciplinary history, education or experience, are relevant in determining the applicant's qualifications for a license, certification, or examination. Matters that may justify referral to a committee of the board include, but are not limited to:

(1) Prior criminal history, which is reviewed and considered in accordance with Iowa Code chapter 272C and rule 481—401.8(272C).

(2) Chemical dependence.

(3) Competency.

(4) Physical or psychological illness or disability.

(5) Judgments entered on, or settlements of, claims, lawsuits, or other legal actions related to the profession.

(6) Professional disciplinary history.

(7) Education or experience.

401.5(3) Following review and consideration of an application referred by the board executive secretary, the committee may at its discretion:

a. Authorize the issuance of the license, certification, or examination application.

b. Recommend to the board denial of the license, certification, or examination application.

c. Recommend to the board issuance of the license or certification under certain terms and conditions or with certain limitations.

d. Refer the license, certification, or examination application to the board for review and consideration without recommendation.

401.5(4) Following review and consideration of a license, certification, or examination application referred by the committee, the board can:

a. Authorize the issuance of the license, certification, or examination application;

b. Deny the issuance of the license, certification, or examination application; or

c. Authorize the issuance of the license or certification under certain terms and conditions or with certain limitations.

401.5(5) The committee or board can request an applicant to appear for an interview before the committee or the full board as part of the application process.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.6(103) Restriction of use of class B licenses by political subdivisions. A political subdivision may disallow or limit the use of a class B license to perform electrical work within the geographic limits of that subdivision through adoption of a local ordinance. A copy of any such ordinance is to be filed with

the board office prior to the effective date of the ordinance. If a class B license holder held a license issued or recognized by a political subdivision on December 31, 2007, that political subdivision cannot restrict the license holder from performing work which would have been permitted under the terms of the license issued or recognized by the political subdivision.

Exception:

An ordinance restricting or disallowing electrical work by holders of class B licenses will not apply to work which is not subject to the issuance of permits by the political subdivision.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.7(103) Financial responsibility. Any holder of an electrical contractor license or any holder of an electrician license who is not employed by a licensed electrical contractor and who contracts to provide electrical work which requires a license issued pursuant to 481—Chapters 400 through 402 is to, at all times, maintain insurance coverage as provided in this rule.

401.7(1) The licensee is to maintain general and complete operations liability insurance in the amount of at least $1 million for all work performed which requires licensing pursuant to 481—Chapters 400 through 402.

a. The carrier of any insurance coverage maintained by the licensee to meet this requirement will notify the board 30 days prior to the effective date of cancellation or reduction of the coverage.

b. The licensee will cease operation immediately if the insurance coverage required by this rule is no longer in force and other insurance coverage meeting the requirements of this rule is not in force. A licensee will not initiate any electrical work which cannot reasonably be expected to be completed prior to the effective date of the cancellation of the insurance coverage required by this rule and of which the licensee has received notice, unless new insurance coverage meeting the requirements of this rule has been obtained and will be in force upon cancellation of the prior coverage.

401.7(2) Reserved.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.8(272C) Use of criminal convictions in eligibility determinations and initial licensing decisions.

401.8(1) *License application.* Unless an applicant for licensure petitions the board for an eligibility determination, the applicant's convictions will be reviewed when the board receives a completed license application.

a. Full disclosure. An applicant is to disclose all convictions on a license application. Failure to disclose all convictions is grounds for license denial or disciplinary action following license issuance.

b. Documentation and personal statement. An applicant with one or more convictions is to submit the complete criminal record for each conviction and a personal statement regarding whether each conviction directly relates to the practice of the profession in order for the license application to be considered complete.

c. Rehabilitation. An applicant will, as part of the license application, submit all evidence of rehabilitation that the applicant wishes to be considered by the board. The board may deny a license if the applicant has a disqualifying offense, unless the applicant demonstrates by clear and convincing evidence that the applicant is rehabilitated pursuant to Iowa Code section 272C.15. An applicant with one or more disqualifying offenses who has been found rehabilitated still needs to satisfy all other requirements for licensure.

d. Nonrefundable fees. Any application fees will not be refunded if the license is denied.

401.8(2) *Eligibility determination.* An individual who has not yet submitted a completed license application may petition the board for an eligibility determination. An individual with criminal convictions is not required to petition the board for an eligibility determination before applying for a license. To petition the board for an eligibility determination, a petitioner is to submit all of the following:

a. A completed eligibility determination form, which is available on the board's website;

b. The complete criminal record for each of the petitioner's convictions;

c. A personal statement regarding whether each conviction directly relates to the practice of the profession and why the board should find the petitioner rehabilitated;

d. All evidence of rehabilitation that the petitioner wants the board to consider; and

e. Payment of a nonrefundable fee in the amount of $25.

401.8(3) *Appeal.* A petitioner found ineligible or an applicant denied a license because of a disqualifying offense may appeal the decision in the manner and time frame set forth in the board's written decision. A timely appeal will initiate a nondisciplinary contested case proceeding. The department's rules governing contested case proceedings apply unless otherwise specified in this rule. If the petitioner or applicant fails to file a timely appeal, the board's written decision will become a final order.

a. Presiding officer. The presiding officer will be the board. However, any party to an appeal of a license denial or ineligibility determination may file a written request, in accordance with rule 661—10.306(17A), requesting that the presiding officer be an administrative law judge. Additionally, the board may, on its own motion, request that an administrative law judge be assigned to act as presiding officer. When an administrative law judge serves as the presiding officer, the decision rendered will be a proposed decision.

b. Burden. The office of the attorney general represents the board's initial ineligibility determination or license denial and has the burden of proof to establish that the petitioner's or applicant's convictions include at least one disqualifying offense. If the office of the attorney general satisfies this burden by a preponderance of the evidence, the burden of proof shifts to the petitioner or applicant to establish rehabilitation by clear and convincing evidence.

c. Judicial review. A petitioner or applicant must appeal an ineligibility determination or a license denial in order to exhaust administrative remedies. A petitioner or applicant may only seek judicial review of an ineligibility determination or license denial after the issuance of a final order following a contested case proceeding. Judicial review of the final order following a contested case proceeding is to be made in accordance with Iowa Code chapter 17A.

401.8(4) *Future petitions or applications.* If a final order determines a petitioner is ineligible, the petitioner cannot submit a subsequent petition for eligibility determination or a license application prior to the date specified in the final order. If a final order denies a license application, the applicant cannot submit a subsequent license application or a petition for eligibility determination prior to the date specified in the final order.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.9(272C) Licensure by verification. Licensure by verification is available under the following circumstances.

401.9(1) *Eligibility.* A person may seek licensure by verification if all of the following criteria are satisfied:

a. The person is licensed, certified, or registered in at least one other issuing jurisdiction;

b. The person has been licensed, certified, or registered by another issuing jurisdiction for at least one year;

c. The scope of practice in the transferring jurisdiction is substantially similar to the scope of practice in Iowa;

d. The person's license, certification, or registration is in good standing in all issuing jurisdictions in which the person holds a license, certificate, or registration; and

e. The person either:

(1) Establishes residency in the state of Iowa pursuant to rule 701—300.17(422); or

(2) Is married to an active duty member of the military forces of the United States and is accompanying the member on an official permanent change of station.

401.9(2) *Board application.* The applicant is to submit all of the following:

a. A completed application for licensure by verification.

b. Payment of the appropriate fee or fees.

c. A verification form completed by the transferring jurisdiction, verifying that the applicant's license, certificate, or registration in that jurisdiction complies with the requirements of Iowa Code section 272C.12. The completed verification form will be sent directly from the transferring jurisdiction to the board.

d. Proof of current Iowa residency, or proof of the military member's official permanent change of station. To demonstrate Iowa residency, the applicant will submit proof that:

(1) The applicant currently maintains a residence or place of abode in Iowa, whether owned, rented, or occupied, even if the individual is in Iowa less than 183 days of the calendar year; and

(2) One or more of the following:

1. The applicant claims a homestead credit or military tax exemption on a home in Iowa, or
2. The applicant is registered to vote in Iowa, or
3. The applicant maintains an Iowa driver's license, or
4. The applicant does not reside in an abode in any other state for more days of the calendar year than the individual resides in Iowa.

e. Documentation of the applicant's complete criminal record, including the applicant's personal statement regarding whether each offense directly relates to the practice of the profession.

f. A copy of any relevant disciplinary documents, if another issuing jurisdiction has taken disciplinary action against the applicant.

401.9(3) *Applicants with prior discipline.* If another issuing jurisdiction has taken disciplinary action against an applicant, the board will determine whether the cause for the disciplinary action has been corrected and the matter has been resolved. If the board determines the disciplinary matter has not been resolved, the board will neither issue a license nor deny the application for licensure until the matter is resolved. A person whose license was revoked, or a person who voluntarily surrendered a license, in another issuing jurisdiction is ineligible for licensure by verification.

401.9(4) *Applicants with pending licensing complaints or investigations.* If an Iowa applicant is concurrently subject to a complaint, allegation, or investigation relating to unprofessional conduct pending before any regulating entity in another issuing jurisdiction, the board will neither issue a license nor deny the application for licensure until the complaint, allegation, or investigation is resolved.

[**ARC 7879C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—401.10(272C) Licensure by work experience in jurisdictions without licensure requirements.

401.10(1) *Work experience.*

a. An applicant for initial licensure who has relocated to Iowa from another jurisdiction that did not require a license to practice the profession may be considered to have met the applicable educational and training requirements if the person has at least three years of full-time work experience within the four years preceding the date of application for initial licensure. For each application submitted under this rule, the board will determine whether the applicant's prior work experience was substantially similar in nature and scope to a training or education program typically applicable for the license sought.

b. The applicant will need to satisfy all other license requirements, including passing any required examinations, to receive a license.

401.10(2) *Documentation.* An applicant seeking to substitute work experience in lieu of satisfying applicable education or training requirements bears the burden of providing all of the following by submitting relevant documents as part of a completed license application:

a. Proof of current residency in the state of Iowa pursuant to rule 701—300.17(422), or proof of the military member's official permanent change of station. To demonstrate Iowa residency, the applicant is to submit proof that:

(1) The applicant currently maintains a residence or place of abode in Iowa, whether owned, rented, or occupied, even if the individual is in Iowa less than 183 days of the calendar year; and

(2) One or more of the following:

1. The applicant claims a homestead credit or military tax exemption on a home in Iowa, or
2. The applicant is registered to vote in Iowa, or
3. The applicant maintains an Iowa driver's license, or
4. The applicant does not reside in an abode in any other state for more days of the calendar year than the individual resides in Iowa.

b. Proof of three or more years of full-time work experience within the four years preceding the application for Iowa licensure, which demonstrates that the work experience was substantially similar in

nature and scope to a training or education program typically applicable for the license sought. Proof of work experience may include, but is not limited to:

(1) A letter from the applicant's prior employer or employers documenting the applicant's dates of employment and scope of practice;

(2) Paychecks or pay stubs; or

(3) If the applicant was self-employed, business documents filed with the secretary of state or other applicable business registry or regulatory agency in the other jurisdiction.

c. Proof that the applicant's work experience involved a substantially similar scope of practice to the practice in Iowa, which is to include:

(1) A written statement by the applicant detailing the scope of practice and stating how the work experience correlates to an applicable apprenticeship program approved by the United States Department of Labor; and

(2) Business or marketing materials detailing the services provided.

d. Proof that the other jurisdiction did not require a license to practice the profession, which may include:

(1) Copies of applicable laws;

(2) Materials from a website operated by a governmental entity in that jurisdiction; or

(3) Materials from a nationally recognized professional association applicable to the profession.

CHAPTER 402
ELECTRICIAN AND ELECTRICAL CONTRACTOR LICENSING PROGRAM—COMPLAINTS AND DISCIPLINE

[Prior to 7/9/25, see Public Safety Department[661] Ch 503]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—402.1(103) Complaints. Any person may file a complaint regarding work performed by any licensee or licensee applicant, or by an unlicensed person who should possess a license issued by the board. Complaints can be filed either in writing or electronically.

[**ARC 7880C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—402.2(103) Discipline. If a complaint alleging an act or acts in violation of Iowa Code chapter 103, rules adopted by the board, or any other provision of law deemed relevant by the board to the use of a license issued by the board is substantiated, the board may suspend the license for a specific period of time, or indefinitely, may revoke the license, or may reprimand the licensee. The holder of a license which is suspended or revoked will be notified of the suspension or revocation in writing by registered mail, return receipt requested, or by personal service. The notice will include a statement that the licensee has the right to appeal the reprimand, suspension or revocation to the board within 30 days of receiving the notice, and that the reprimand, revocation or suspension will not take effect until the time to file an appeal has expired. If an appeal is filed, the reprimand, suspension or revocation is stayed until the appeal has been acted upon. The suspension of revocation becomes final 30 days after delivery of the notice if a timely request for an appeal is not received by the board.

Exception:

If the board finds that a violation which is the basis of the suspension or revocation is such that allowing the licensee to continue to engage in work covered by the license would present an imminent threat to the safety of the public, the board may provide that the suspension or revocation take effect immediately upon notice being delivered to the licensee.

[**ARC 7880C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—402.3(103) Action against an unlicensed person. If a person who is not licensed by the board has engaged in or is engaging in work requiring licensure by the board, the board may assess a civil penalty against the person, may seek an injunction to prevent the person from continuing to engage in such work, or both. A person who is accused of engaging in work where licensure is needed by law without having such a license will be notified of the specific allegations and intended remedial action by registered mail, return receipt requested, or by personal service. A person who is notified by the board of an intended remedial action under this rule may appeal the action as provided in rule 481—402.4(103). The intended remediable action becomes final 30 days after delivery of the notice if a timely request for an appeal is not received by the board.

[**ARC 7880C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—402.4(103) Appeals. A licensee whose license is disciplined, an applicant whose application for a license is denied, or a person who is not licensed by the board and who is assessed a civil penalty for engaging in an activity requiring a license may appeal the suspension, revocation, denial, or civil penalty to the board by notifying the board office of the appeal in writing within 30 calendar days after receiving notice of the suspension, revocation, denial, or civil penalty. Upon receipt of a timely appeal, the board will conduct a contested case hearing under 481—Chapter 10.

[**ARC 7880C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 103.

CHAPTER 403
ELECTRICIAN AND ELECTRICAL CONTRACTOR LICENSING PROGRAM—EDUCATION

[Prior to 7/9/25, see Public Safety Department[661] Ch 505]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

DIVISION I
POSTSECONDARY ELECTRICAL EDUCATION PROGRAMS

481—403.1 to **403.100** Reserved.

481—403.101(103) Program approval.

403.101(1) Pursuant to Iowa Code sections 103.12 and 103.12A, an educational institution that plans to offer a postsecondary electrical education program to prepare students to be licensed by the board needs to first obtain approval from the board for the program before students participate in the program. Separate approval is needed for a journeyman electrician program and for a residential electrician program.

403.101(2) The educational institution seeking approval is to apply to the board office on a form specified by the board. The application is to include a certification that the educational institution is currently accredited by a recognized regional or national educational accrediting organization.

403.101(3) Applications seeking initial approval of a journeyman electrician program or a residential electrician program are to be submitted to the board at least 60 days prior to student participation in the program.

403.101(4) The board may set times for periodic review of approved programs and can develop policies that address the following:

a. Requirements for the submission of applications.

b. Standards required for program approval.

c. Standards for withdrawal of approval or discontinuation of an approved program.

d. Standards for educational content and class attendance, qualifications for instructors, documentation and reporting needed to establish compliance with program requirements, and specification of degrees or diplomas awarded.

403.101(5) Information regarding approved postsecondary electrical education programs may be obtained by contacting the board office. A list of approved postsecondary electrical education programs and other information about postsecondary electrical education programs will be posted on the board's website.

[**ARC 7881C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—403.102(103) Standards for postsecondary electrical education programs. The board will develop policies establishing the following minimum standards for an approved postsecondary electrical education program:

403.102(1) All necessary subject matter areas as published by the board and available on request from the board office and from the board website. Instruction is to include at least four hours of instruction on the Iowa electrical statute, Iowa Code chapter 103, with a minimum of one hour on Iowa electrical licensing requirements.

403.102(2) Minimum number of contact hours and necessary program attendance policies. Each approved program is to include 30 to 40 percent of contact hours that involve lecture, with all remaining hours consisting of laboratory or shop hours. A student cannot take the licensing examination until all contact hours and the specified number of hours of on-the-job training are completed.

a. A postsecondary electrical education program for a journeyman electrician license is to include at least 2,000 hours of instruction, with the student completing at least 6,000 hours of on-the-job training before the student will be eligible to take the journeyman electrician examination.

b. A postsecondary electrical education program for a residential electrician license is to include at least 1,000 hours of instruction, with the student completing at least 4,000 hours of on-the-job training before the student will be eligible to take the residential electrician examination.

403.102(3) Minimum qualifications for instructors which include:

a. Current licensing as an electrician, as set out in the board's policy; and

b. Compliance with standards set by the Iowa department of education for an instructor at a community college.

[**ARC 7881C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

DIVISION II
CONTINUING EDUCATION

481—403.103 to **403.200** Reserved.

481—403.201(103) Continuing education requirements. Each holder of a three-year license is to complete 18 hours of continuing education approved by the board between the time of issuance of the license and prior to issuance of a renewal license.

Exception:

A holder of a license in a category which may be issued for a three-year period whose license is issued for less than a three-year period only needs to complete six hours of continuing education prior to renewal of the license for each year or portion of a year for which the license has been issued.

[**ARC 7881C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—403.202(103) Course approval.

403.202(1) Any person or institution that plans to offer continuing education courses to meet the requirements of rule 481—403.201(103) is to apply for approval to the board office on a form specified by the board.

403.202(2) Approval by the board should be obtained prior to a course's being offered to a licensee in order to meet the requirements of rule 481—403.201(103).

403.202(3) Applications for initial approval of a continuing education course are to be submitted to the board not less than 45 days prior to student participation in the course.

403.202(4) Approval of a continuing education course is normally for the duration of the three-year licensing period during which approval is received, although approval may be withdrawn for cause prior to the expiration of the licensing period.

403.202(5) Applications for renewal of approval of continuing education courses are to be submitted to the board at least 45 days prior to the expiration of the three-year licensing period. For purposes of this subrule, "renewal" may include the updating of course material in a course previously approved for delivery by the same instructor.

403.202(6) Information regarding approved continuing education courses may be obtained by contacting the board office. A list of approved continuing education courses will be posted on the board website.

[**ARC 7881C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

481—403.203(103) Requirements for continuing education programs. A continuing education program can be approved by the board only if the following requirements are met:

403.203(1) The instructor or institution applying for approval of a continuing education course provides at least three letters from educational institutions or government agencies attesting to the instructor's knowledge of and qualifications to teach the subject matter of the course for which approval is sought.

403.203(2) Each instructor is responsible for:

a. Obtaining and verifying course approval prior to delivery of the course.

b. Facilitating auditing of the course by any board member or member of the staff of the board. No board or staff member may receive continuing education credit for an audited course.

c. Issuing a certificate of completion to each student who completes the course.

d. Submitting a class roster, indicating which students completed the course, to the board office within 30 days of completion of the course.

[**ARC 7881C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 103.

CHAPTER 404
ELECTRICAL INSPECTION PROGRAM
[Prior to 7/9/25, see Public Safety Department[661] Ch 550]

Chapter rescission date pursuant to Iowa Code section 17A.7: 7/1/30

481—404.1(103) Electrical inspection program. The electrical inspection program is created within the department of inspections, appeals, and licensing and may be contacted as provided in 481—Chapter 1 and on the department's website: dial.iowa.gov. The program is under the supervision of the director, is headed by a chief electrical inspector, and enforces requirements for electrical installations adopted by the electrical examining board.
[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.2(103) Definitions. The definitions set forth in Iowa Code sections 103.1 and 103.1A are incorporated herein by reference. The following definitions also apply:

"Emergency installation" means an electrical installation necessary to restore power to a building or facility when existing equipment has been damaged due to a natural or manmade disaster or other weather-related cause. Emergency installations may be performed by persons properly licensed to perform the work and may be performed prior to submission of a request for permit or request for inspection.

"Residential electrical work" means electrical work in a residence in which there are no more than four living units within the same building and includes work to connect and work within accessory structures, which are structures no greater than 3,000 square feet in floor area, not more than two stories in height, the use of which is incidental to the use of the dwelling unit or units, and located on the same lot as the dwelling unit or units.

"Volunteer emergency service provider" means a volunteer fire fighter as defined in Iowa Code section 85.61, a volunteer emergency rescue technician as defined in Iowa Code section 147A.1 or a reserve peace officer as defined in Iowa Code section 85.61.
[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.3(103) Installation requirements. The provisions of the National Electrical Code, 2023 edition, published by the National Fire Protection Association, are incorporated herein by reference as the requirements for electrical installations performed by persons subject to licensing and inspection pursuant to Iowa Code chapter 103 and rules promulgated thereunder, with the following amendments:

404.3(1) Delete article 210.8(A), "Dwelling Units," and insert in lieu thereof the following new section:
"210.8(A) Dwelling Units.
All 125-volt, 15- and 20-ampere receptacles installed in the following locations and supplied by single-phase branch circuits rated 150 volts or less to ground shall have ground-fault circuit-interrupter protection for personnel:

(1) Bathrooms

(2) Garages and also accessory buildings that have a floor located at or below grade level not intended as habitable rooms and limited to storage areas, work areas, and areas of similar use

(3) Outdoors

(4) Crawl spaces – at or below grade level

(5) Basements

(6) Kitchens

(7) Areas with sinks and permanent provisions for food preparation, beverage preparation, or cooking

(8) Sinks – where receptacles are installed within 1.8 m (6 ft) from the top inside edge of the bowl of the sink

(9) Boathouses

(10) Bathtubs or shower stalls – where receptacles are installed within 1.8 m (6 ft) of the outside edge of the bathtub or shower stall

(11) Laundry areas

(12) Indoor damp and wet locations."

404.3(2) Delete article 210.8(D), "Specific Appliances," and insert in lieu thereof the following new section:

"210.8(D) Specific Appliances.

GFCI protection shall be provided for the branch circuit or outlet supplying the following appliances rated 150 volts or less to ground and 60 amperes or less, single- or 3-phase:

(1) Automotive vacuum machines
(2) Drinking water coolers and bottle fill stations
(3) High-pressure spray washing machines
(4) Tire inflation machines
(5) Vending machines
(6) Sump pumps
(7) Dishwashers
(8) Microwave ovens."

404.3(3) Delete article 210.8(F), "Outdoor Outlets."

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.4(103) Qualifications of inspectors.

404.4(1) *State inspectors.* Electrical inspectors will be certified as commercial and residential electrical inspectors no later than one year after starting employment in any of these positions. Certification will be obtained from the International Association of Electrical Inspectors as both a certified residential electrical inspector and as a certified master electrical inspector; from the National Fire Protection Association as a certified electrical inspector; or from the International Code Council as both a residential electrical inspector (E1) and a commercial electrical inspector (E2), or as an electrical inspector (E5).

404.4(2) *Political subdivision inspectors.* A political subdivision that performs its own inspections as provided in Iowa Code section 103.24 must require certification of its inspectors. A person employed or appointed as an electrical inspector must obtain certification within one year of the appointment date. The board may act to enforce statutory compliance by the individual or by the political subdivision if a person employed or appointed as an inspector fails to obtain certification within one year of employment or appointment or fails to maintain the required certification while employed as an inspector. Certification of electrical inspectors for political subdivisions shall be obtained as set forth in subrule 404.4(1), except that a political subdivision has the authority to limit an inspector's duties to only residential inspections or only commercial inspections provided the inspector assigned to those duties obtains and maintains the proper certification to conduct the inspections assigned.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.5(103) Required permits and inspections. Permits and inspections are required for electrical installations as set forth in Iowa Code section 103.23, with the following exceptions:

404.5(1) Exception 1: Installations in political subdivisions that perform electrical inspections and that are inspected by the political subdivision are not required to be inspected by the state electrical inspection program. Any installation that is subject to inspection and is on property owned by the state or an agency of the state shall be inspected by the state electrical inspection program. An electrical installation on a farm that is located outside the corporate limits of any municipal corporation (city) shall not be inspected by a political subdivision.

404.5(2) Exception 2: Neither a permit nor an inspection is required for an electrical installation that meets all of the following criteria:

a. The installation is legally performed by a master electrician, journeyman electrician, or apprentice electrician working under the direct supervision of a master or journeyman electrician.

b. The installation to be performed does not in any way involve work within an existing or new switchboard or panel board.

c. The installation to be performed does not involve over-current protection of more than 30 amperes.

d. The installation to be performed does not involve any electrical-line-to-ground circuit of more than 277 volts, single phase.

404.5(3) Exception 3: Neither a permit nor an inspection is required for any electrical installation on a farm or a farm building if the farm building is not regularly open to the public as a place of business for the retail sale of goods, wares, services, or merchandise. This exception does not apply to a residential installation located on a farm.

NOTE: Iowa Code sections 103.22 and 103.30(1) provide separately for the inapplicability of Iowa Code chapter 103 to particular persons and circumstances.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.6(103) Requests for permit and inspection.

404.6(1) Prior to commencement of any electrical installation requiring an inspection, the licensee or property owner making such installation shall notify the electrical inspection program of the installation by applying for a permit unless the installation is an emergency installation. For emergency installations that would otherwise require a request for permit and inspection under rule 481—404.6(103), the request shall be made as soon as practicable and no later than 72 hours after the installation is completed. A permit may be obtained as follows:

a. By completing and electronically submitting the online application and inspection fees through the department's website.

b. By completing the Electrical Permit Manual Application and mailing it and the inspection fees to the department at least seven days prior to the commencement of the installation. The Electrical Permit Manual Application may be obtained through the department's website or upon request to the department.

404.6(2) Upon completion of the electrical installation, the licensee or property owner shall notify the electrical inspection program to schedule an inspection in the same manner as described in paragraph 404.6(1)*"a"* or *"b."*

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.7(103) Fees.

404.7(1) Fees are adopted in the amounts set forth in Iowa Code section 103.32.

404.7(2) Inspection fees will normally be paid at the time a permit is obtained. However, additional fees may apply if a permit is modified by an inspector, based upon inspection of the electrical installation. The person who obtained the original permit will be notified immediately by the inspector of the modification and of the amount of any additional fees due. Any additional fees will be due at the time the person responsible for payment receives notification of modification of the permit.

a. If an additional fee or portion of the fee is more than 60 days past due, the board or its delegee will notify the person responsible for payment of the fee of the necessity of promptly making the payment.

b. If an additional fee or portion of the fee is more than 120 days past due, the board or its delegee may suspend the ability of the person responsible for the payment to obtain inspection permits. The person's ability to obtain permits will be restored when payment of the past due amount has been received. Suspension of a person's ability to obtain permits may be appealed to the board as provided in rule 481—402.4(103).

c. If payment of a fee or portion of a fee is more than 180 days past due, the board may refer the debt for collection pursuant to Iowa Code chapter 272D.

404.7(3) When an installation has been commenced without completing the online application or Electrical Permit Manual Application as described in subrule 404.6(1), twice the fees that would have been applicable if a timely request had been filed shall be paid.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.8(103) Scheduling of inspections. Pursuant to Iowa Code section 103.31, electrical inspections will be scheduled within three business days of the receipt of the request. If an inspection for which a timely request has been made is not completed within three business days of the completion of the installation, a licensee who completed the installation may energize any new circuits included in the installation, although the installation remains subject to condemnation and disconnection if found to be out of compliance with any applicable provision of rule 481—404.3(103) when inspected.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.9(103) Report of inspection. After the completion of an inspection, the inspector will issue an inspection report indicating the results of the inspection and provide any necessary notice to the utility providing electrical service pursuant to Iowa Code section 103.28. The results of the inspection may be any of the following:

404.9(1) *Approval.* If the inspector finds that the installation is in compliance with applicable requirements, the inspector will issue a report indicating that the installation is approved.

404.9(2) *Order of correction.* If the inspector finds that the installation is not in compliance with applicable requirements but does not present an imminent threat to the health or safety of any person, the inspector will issue an order of correction, prescribing a time frame during which corrective action shall be taken by the licensee responsible for the installation to bring the installation fully into compliance.

404.9(3) *Order of disconnection.* If the inspector finds that the installation is not in compliance with applicable requirements and presents an imminent threat to the health or safety of any person, the inspector will issue an order of disconnection, requiring that the installation be disconnected until corrective action has brought the installation into full compliance with applicable requirements. The installation shall not be reconnected until the corrected installation has been approved by an inspector as in compliance with all applicable requirements. The inspector issuing an order of disconnection will notify the utility providing electrical service to the location of the order and will notify the utility when the order of disconnection is no longer effective.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.10(103) Appeals. An order of correction or an order of disconnection may be appealed. However, an order of disconnection shall be complied with immediately and the installation not reconnected pending the outcome of the appeal.

404.10(1) A person who has received an order of correction or disconnection may request an informal appeal to the chief electrical inspector within 14 days of receiving the order by contacting the electrical inspection section by telephone, email or mail. The informal appeal may be heard in any manner agreed to by the person filing the appeal and the chief electrical inspector. If the order is upheld by the chief electrical inspector, the person receiving the order may file a formal appeal pursuant to 481—subrule 404.10(2).

404.10(2) A person who has received an order of correction or disconnection may file a request for a formal appeal to the board within 30 days of receiving the order or, if the person has filed a request for an informal appeal, within 30 days of having been notified that the chief electrical inspector has upheld the order. Formal appeals will be processed as provided in 481—Chapter 506, except that "electrical examining board" is substituted therein as appropriate.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.11(103) Civil penalty. Any person who commences an electrical installation subject to inspection pursuant to Iowa Code chapter 103 and who fails to file a Request for Permit and Inspection form within 14 days of notification as prescribed by Iowa Code section 103.25 may be subject to a civil penalty. The amount of the civil penalty will not exceed $750 as determined by the board. Notice will be provided by certified mail to any person on whom a civil penalty is imposed.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

481—404.12(103) Civil penalty—appeal. Any person on whom a civil penalty has been imposed may appeal the imposition of the civil penalty to the board within 14 days of the date on which notice of the civil penalty was mailed by notifying the board in writing that the person wishes to appeal the civil penalty. An appeal of a civil penalty is to be subject to the provisions of 481—Chapter 506, which apply to contested cases, except that "electrical examining board" is substituted therein as appropriate.

[**ARC 9033C**, IAB 3/19/25, effective 7/1/25; Editorial change: IAC Supplement 7/9/25]

CHAPTER 425
STATE PLUMBING CODE

[Prior to 7/29/87, see Health Department[470] Ch 25]
[Prior to 4/2/25, see Public Health Department[641] Ch 25]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—425.1(105) Adoption. Sections 101 and 102, Chapters 2 to 17 and Appendices A and M of the Uniform Plumbing Code (UPC), 2024 Edition, as published by the International Association of Plumbing and Mechanical Officials, 4755 E. Philadelphia Street, Ontario, California 91761-2816, are hereby adopted by reference with amendments as the state plumbing code authorized by Iowa Code section 105.4. Portions of this chapter reproduce excerpts from the 2024 International Plumbing Code; Copyright 2023; Washington, D.C.: International Code Council www.ICCSAFE.org. Such excerpts are reproduced with permission, all rights reserved.
[**ARC 8913C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—425.2(105) Applicability. The provisions of the UPC, as adopted and amended by this chapter, are applicable to the plumbing in buildings or on premises in Iowa. Local jurisdictions may not adopt other plumbing codes. Local jurisdictions may adopt additional amendments provided they are stricter than the UPC as amended by this chapter and copies of any local amendments are provided to the board.
[**ARC 8913C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—425.3(105) Fuel gas piping. Fuel gas piping shall comply with the requirements of Chapter 12 of the UPC, 2024 Edition, unless the provisions conflict with 661—Chapter 226, in which case 661—Chapter 226 governs.
[**ARC 8913C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—425.4(105) Amendments to Uniform Plumbing Code. The UPC, as adopted by reference in rule 481—425.1(105), is amended as follows:

425.4(1) The following amendment apply to UPC Chapter 1: Section 101.2 Scope. Modify the section by adding the following sentence to the end of the section: "Local jurisdictions may administer the permit, inspection, testing, and enforcement provisions contained in this code. Permit, inspection, testing, and enforcement provisions contained in this code are not administered by the Plumbing and Mechanical Systems Board or the state."

425.4(2) The following amendments shall apply to UPC Chapter 3:

a. Section 301.5 Alternative Engineered Design. Modify the section by adding the following sentence to the end of the section: "No engineered single-stack drainage system shall be installed."

b. Section 309.6 Dead Legs. Modify the section by adding the following sentence to the end of the section: "The authority having jurisdiction can determine the method of flushing."

c. Subsection 314.4.1 Installation of Thermoplastic Pipe and Fittings. Trench width for thermoplastic pipe shall be limited to six times the outside diameter of the piping at the base and thermoplastic piping be bedded in not less than 4 inches (102 mm) of aggregate bedding material supporting the pipe. Initial backfill shall encompass the pipe, and aggregate material shall be three-eighths (3/8) inch p-gravel or 1-inch clean class one bedding.

425.4(3) The following amendments shall apply to UPC Chapter 4:

a. Section 402.5 Setting. Modify the section by adding the following sentence to the end of the section that begins "Exception:": The installation of paper dispensers, sanitary napkin disposal unit or accessibility grab bars shall not be considered obstructions.

b. Section 407.3 Limitation of Hot Water Temperature for Public Lavatories. Modify the section by adding the following sentence to the end of the section: "These devices shall be installed at or as close as possible to the point of use."

c. Section 408.12 Showers. Create a new Section 408.12 stating: "Limitation of Hot Water Temperature of Pet Grooming Stations. The maximum hot water temperature discharging from pet grooming stations shall be limited to 120ºF (49ºC) and the maximum temperature regulated by one of the following means, which shall be installed at or as close as possible to the point of use:

"(1) A limiting device conforming to ASSE1070, ASMEA112.1070, CSAB125.70, or CSAB125.3.

"(2) A water heater conforming to ASSE 1084."

d. Section 409.4 Limitation of Hot Water in Bathtubs and Whirlpool Bathtubs. Modify the section by adding the following sentence to the end of the section: "These devices shall be installed at or as close as possible to the point of use."

e. Section 410.3 Limitation of Water Temperature in Bidets. Modify the section by adding the following sentence to the end of the section: "These devices shall be installed at or as close as possible to the point of use."

f. Section 416.5 Drain. Modify the section by deleting the last sentence, which states: "Where a drain is provided, the discharge shall be in accordance with Section 811.0."

g. Section 418.3 Location of Floor Drains. Modify the section by adding the following to the end of the section: "(5) Rooms equipped with a water heater."

h. Section 422.1 Fixture Count.

Modify the section by deleting the first paragraph and inserting the following in lieu thereof: "Plumbing fixtures shall be provided in each building for the type of building occupancy and in the minimum number shown in Table 403.1 of the International Plumbing Code, reprinted here as Table 422.1. The design occupant load and occupancy classification shall be determined in accordance with the state building code or the authority having jurisdiction. Required public facilities shall be designated by a legible sign for each sex and signs be readily visible and located near the entrance to each toilet facility."

i. Table 422.1 Minimum Plumbing Facilities. Delete the table and insert the following table in lieu thereof.

TABLE 422.1 MINIMUM NUMBER OF REQUIRED PLUMBING FIXTURES[a]

8	Storage	Structures for the storage of goods, warehouses, storehouse and freight depots. Low and Moderate Hazard.	1 per 100		1 per 100		—	1 per 1,000	1 service sink

[a] The fixtures shown are based on one fixture being the minimum required for the number of persons indicated or any fraction of the number of persons indicated. The number of occupants shall be determined by the International Building Code.

[b] Toilet facilities for employees shall be separate from facilities for inmates or care recipients.

[c] A single-occupant toilet room with one water closet and one lavatory serving not more than two adjacent patient sleeping units shall be permitted provided that each patient sleeping unit has direct access to the toilet room and provision for privacy for the toilet room user is provided.

[d] The occupant load for seasonal outdoor seating and entertainment areas shall be included when determining the minimum number of facilities required.

[e] For business and mercantile classifications with an occupant load of 15 or fewer, service sinks will not be required.

*Excerpted (with modifications) from Table 403.1 of the 2018 International Plumbing Code; Copyright 2017; Washington, D.C.: ICC. Reproduced with permission. All rights reserved. www.ICCSAFE.org

j. Insert the following text at the end of Chapter 4:

"422.8 Substitution for Water Closets. In each bathroom or toilet room, urinals shall not be substituted for more than 67 percent of the required water closets in assembly and educational occupancies and not be substituted for more than 50 percent of the required water closets in all other occupancies. (Reprinted from the 2021 International Plumbing Code section 424.2)"

425.4(4) The following amendments shall apply to UPC Chapter 6:

a. Section 603.4.8 Drain Lines. Modify the section by adding the following language to the end of the last sentence in the section: "or in accordance with the manufacturer's drain-sizing chart for installation."

b. Section 609.1 Installation. Insert the following: "Building supply yard piping shall be not less than 60 inches below earth cover."

c. Section 609.12 Pipe Insulation. Delete Sections 609.12 through 609.12.2 and insert the following in lieu thereof:

"Section 609.12 Pipe Insulation. Insulation of domestic hot water piping shall be in accordance with the state applicable energy conservation code."

d. Section 611.4 Sizing of Residential Softeners. Modify the section by adding the following to the end of the last sentence in the section: "or as specified in the manufacturer's installation instructions."

e. Section 612 Residential Fire Sprinkler Systems. Delete sections 612.0 through 612.7.2.

425.4(5) The following amendments shall apply to UPC Chapter 7:

a. Section 702.1 Trap Size. Table 702.1 Note 9. Modify this note by deleting "a maximum shower size of 36 inches (914 mm) in width and 60 inches (1524 mm) in length" and inserting the following in lieu thereof: "showers having only one shower head rated at a maximum of 2.5 gpm."

b. Section 710.1 Backflow Protection. Modify the section by adding the following sentences to the end of the section: "The requirement for the installation of a backwater valve shall apply only when determined necessary by the Authority Having Jurisdiction based on local conditions. When a valve is required by the Authority Having Jurisdiction, it will be a manually operated gate valve or fullway ball valve. An automatic backwater valve may also be installed but is not required."

425.4(6) The following amendments shall apply to UPC Chapter 8:

a. Section 807.3 Domestic Dishwashing Machine. Modify the section by deleting the section and inserting the following language in lieu thereof: "No domestic dishwashing machine shall be directly connected to a drainage system or food waste disposer without the use of an approved dishwasher air gap fitting on the discharge side of the dishwashing machine, or by looping the discharge line of the dishwasher as high as possible near the flood level of the kitchen sink where the waste disposer is connected. Listed air gap fittings shall be installed with the flood level (FL) marking at or above the flood level of the sink or drainboard, whichever is higher."

b. Section 814.5 Point of Discharge. Delete Section 814.5 and insert the following in lieu thereof:

"Section 814.5 Point of Discharge. Air-conditioning condensate waste pipes shall connect indirectly to a properly trapped fixture, floor drain, or open sight drain, or where permitted in Section 814.6, to the drainage system through an air gap or air break to trapped and vented receptors, dry wells, leach pits,

sump pump, the tailpiece of plumbing fixtures or indirectly to the building storm sewer through a roof drain. A condensate drain shall be trapped in accordance with appliance manufacturer's instructions or as approved."

425.4(7) The following amendments shall apply to UPC Chapter 9:

a. Section 901.1 Applicability. Modify the section by adding the following sentence to the end of the section: "No engineered single-stack drainage systems shall be installed."

b. Section 906.1 Roof Termination. Modify the section by deleting the last sentence.

c. Section 908.2.2 Size. Delete the second sentence in this section and insert the following new sentence in lieu thereof: "The wet vent shall be not less than 2 inches (50 mm) in diameter for 6 drainage fixture units (dfu) or less, and not less than 3 inches (80 mm) in diameter for 7 dfu or more."

425.4(8) The following amendments shall apply to UPC Chapter 10:

a. Table 1002.2 Horizontal Lengths of Trap Arms. Delete the table and insert the following table in lieu thereof:

TABLE 1002.2
Horizontal Lengths of Trap Arms
(Except for Water Closets and Similar Features)[1,2]

Trap Arm Diameter (inches)	Distance Trap to Vent Minimum (inches)	Length Maximum (feet)
1¼	2½	5
1½	3	6
2	4	8
3	6	12
4	8	12
Exceeding 4	2 × Diameter	12

For SI units: 1 inch = 25.4 mm

Notes:

[1]Maintain ¼ inch per foot slope (20.8 mm/m).

[2]The developed length between the trap of a water closet or similar fixture (measured from the top of the closet flange to the inner edge of the vent) and its vent shall not exceed 6 feet (1829 mm).

b. Section 1014.1.3 Food Waste Disposers and Dishwashers. Modify the section by deleting the second sentence and inserting the following in lieu thereof: "Commercial food waste disposers shall discharge into the building's drainage system in accordance with the requirements of the Authority Having Jurisdiction."

425.4(9) The following amendments shall apply to UPC Chapter 12:

a. Sections 1205.0 through 1205.2 Authority to Render Gas Service. Delete the sections.

b. Sections 1207.0 and 1207.1 Temporary Use of Gas. Delete the sections.

c. Subsection 1208.5.3.5 Corrugated Stainless Steel Tubing. Delete subsection 1208.5.3.5 and insert the following in lieu thereof:

Subsection 1208.5.3.5 Corrugated Stainless Steel Tubing. Only CSST with an arc-resistant jacket or covering system listed in accordance with ANSI LC-1 (Optional Section 5.16)/CSA 6.26-2016 shall be installed, in accordance with the terms of its approval, the conditions of listing, the manufacturer's instructions and this code, including electrical bonding requirements in Section 1211.2. CSST shall not be used for through-wall penetrations from the point of delivery of the gas supply to the inside of the structure and not be installed in locations where subject to physical damage unless protected in an approved manner.

d. Section 1211.3 Arc-Resistant Jacketed CSST. Delete the section.

425.4(10) The following amendment shall apply to UPC Chapter 13:

Section 1306.3 Report Items. Modify the section by deleting "Authority Having Jurisdiction" and inserting "responsible facility authority" in lieu thereof.

[**ARC 8913C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—425.5(105) Backflow prevention with containment. Cities with populations of 15,000 or greater as determined by the 2010 census or any subsequent regular or special census shall have a backflow prevention program with containment. The minimum requirements for a program are given in subrules 425.5(1) through 425.5(5). These requirements are in addition to the applicable requirements of Section 603 of the Uniform Plumbing Code, 2024 Edition.

425.5(1) *Definitions.* The following definitions are added to those in Chapter 2 and Section 603 of the Uniform Plumbing Code, 2024 Edition, or are modified from those definitions for the purposes of rule 481—425.5(105) only.

a. Administrative authority. The administrative authority for this rule is the city council and its designees or, with respect to private water utilities, the Iowa utilities board.

b. Approved backflow prevention assembly for containment. Approved backflow prevention assembly for containment means a backflow prevention assembly that is approved by the University of Southern California Foundation for Cross-Connection Control and Hydraulic Research. The approval listing shall include the limitations of use based on the degree of hazard. The backflow prevention assembly shall also be listed by the International Association of Plumbing and Mechanical Officials (IAPMO) or by the American Society of Sanitary Engineering (ASSE) as having met the requirements of one of the standards listed below.

Standard	Product Covered
ANSI[¤]/ASSE* 1013-2009	Reduced Pressure Principle Backflow Preventers
ANSI[¤]/ASSE* 1015-2009	Double Check Backflow Prevention Assembly
ANSI[¤]/ASSE* 1047-2009	Reduced Pressure Detector Backflow Preventer
ANSI[¤]/ASSE* 1048-2009	Double Check Detector Assembly Backflow Preventer
ANSI[¤]/AWWA[†] C510-07	Double Check Valve Backflow Prevention Assembly
ANSI[¤]/AWWA[†] C511-07	Reduced-Pressure Principle Backflow Prevention Assembly

[¤]American National Standards Institute, 1899 L Street NW, 11th Floor, Washington, DC 20036
*American Society of Sanitary Engineering, 18927 Hickory Creek Drive #220, Mokena, IL 60448
[†]American Water Works Association, 6666 West Quincy Avenue, Denver, CO 80235

c. Approved backflow prevention assembly for containment in a fire protection system. Approved backflow prevention assembly for containment in a fire protection system means a backflow prevention assembly to be used in a fire protection system that meets the requirements of Factory Mutual Research Corporation (FM) and Underwriters Laboratory (UL) in addition to the requirements of 25.5(1)*"b."*

d. Containment. Containment is a method of backflow prevention that requires a backflow prevention assembly on certain water services. Containment requires that the backflow prevention assembly be installed on the water service as close to the public water supply main as is practical.

e. Customer. Customer means the owner, operator or occupant of a building or property that has a water service from a public water system, or the owner or operator of a private water system that has a water service from a public water system.

f. Degree of hazard. Degree of hazard means the rating of a cross connection or a water service that indicates whether it has the potential to cause contamination (high hazard) or pollution (low hazard).

g. Water service. Depending on the context, water service is the physical connection between a public water system and a customer's building, property or private water system, or the act of providing potable water from a public water system to a customer.

425.5(2) *Proposed water service.*

a. No person shall install, or cause to have installed, a water service to a building, property or private water system before the administrative authority has evaluated the proposed water service for degree of hazard.

b. The administrative authority will require the submission of plans, specifications and other information deemed necessary for a building, property or private water system to which a water service

is proposed. The administrative authority will review the information submitted to determine if cross connections will exist and the degree of hazard.

c. The owner of a building, property or private water system shall install, or cause to have installed, an approved backflow prevention assembly for containment as directed by the administrative authority before water service is initiated.

d. Reconstruction of an existing water service shall be treated as a proposed water service for the purposes of rule 481—425.5(105).

425.5(3) *Existing water services.*

a. Each customer shall survey the activities and processes that receive water from the water service and report to the administrative authority if cross connections exist and the degree of hazard.

b. The administrative authority may inspect the plumbing of any building, property and private water system that has a water service to determine if cross connections exist and the degree of hazard.

c. If, based on information provided through paragraphs 425.5(3)*"a"* and *"b,"* the administrative authority determines that a water service may contaminate the public water supply, the administrative authority will require that the customer install the appropriate backflow prevention assembly for containment.

d. If a customer refuses to install a backflow prevention assembly for containment when it is required by the administrative authority, the administrative authority may order that water service to the customer be discontinued until an appropriate backflow prevention assembly is installed.

425.5(4) *Backflow prevention assemblies for containment.* The following standards shall apply:

a. Backflow prevention assemblies for containment will be installed immediately following the water meter or as close to that location as deemed practical by the administrative authority.

b. A water service determined to present a high hazard will be protected by an air gap or an approved reduced-pressure principle backflow prevention assembly.

c. A water service determined to present a low hazard will be protected by an approved double check valve assembly or as in paragraph 425.5(4)*"b."*

d. A water service to a fire protection system will be protected from backflow in accordance with the recommendations of American Water Works Association Manual M14, fourth edition. Where backflow prevention is required for a fire protection system, an approved backflow prevention assembly for containment in a fire protection system will be used.

425.5(5) *Backflow incidents.*

a. The customer shall immediately notify the agency providing water service when the customer becomes aware that backflow has occurred in the building, property or private water system receiving water service.

b. The administrative authority may order that a water service be temporarily shut off when a backflow occurs in a customer's building, property or private water system.

CHAPTER 426
STATE MECHANICAL CODE
[Prior to 4/2/25, see Public Health Department[641] Ch 61]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—426.1(105) Definitions. The following definitions apply to this chapter:

"Ambulatory surgical center" means a facility or portion thereof defined in Iowa Code section 135R.1.

"Hospice" means a facility licensed or seeking licensure pursuant to Iowa Code section 135J.2.

"Hospital" means a facility licensed or seeking licensure pursuant to Iowa Code chapter 135B.

"Intermediate care facility" means a facility licensed or seeking licensure pursuant to Iowa Code section 135C.6.

"Life Safety Code" means the 2012 edition of the Life Safety Code of the National Fire Protection Association, available at www.nfpa.org.

"Nursing facility" means the same as defined in Iowa Code section 135C.1.

[**ARC 8914C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—426.2(105) Adoption by reference. Sections 101 and 102 and Chapters 2 through 15 of the International Mechanical Code, 2024 edition, published by the International Code Council, www.iccsafe.org, are hereby adopted by reference as the requirements for the design, installation, maintenance, alteration, and inspection of mechanical systems that are permanently installed and utilized to provide control of environmental conditions and related processes within buildings and premises in Iowa.

[**ARC 8914C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—426.3(105) Amendments to International Mechanical Code. The International Mechanical Code (IMC), as adopted by reference in rule 481—426.2(105), is amended as follows:

426.3(1) In Section 101.2, delete the phrase "International Fuel Gas Code" and insert in lieu thereof "NFPA 54, National Fuel Gas Code, current edition; NFPA 58, Liquefied Petroleum Gas Code, current edition; the provisions of 661—Chapter 226; and the state plumbing code".

426.3(2) Amend Section 102 by adopting new Section 102.12 as follows:

102.12 Local authority.

(a) Local jurisdictions may administer the permit, inspection, testing, and enforcement provisions contained in the state mechanical code adopted and amended by this chapter. Permit, inspection, testing, and enforcement provisions contained in this code are not administered by the Plumbing and Mechanical Systems Board or the state unless otherwise provided by law.

(b) Local jurisdictions may not adopt mechanical codes other than the state mechanical code adopted and amended by this chapter. Local jurisdictions may adopt additional amendments to the state mechanical code if the additional amendments are stricter than the state mechanical code as set forth in this chapter. Local jurisdictions that adopt additional amendments will provide copies of any local amendments to the board.

426.3(3) Amend Section 304.11 by deleting the last sentence and inserting in lieu thereof the following new exception:

Exception: Guards are not required where permanent fall arrest/restraint anchorage connector devices that comply with ANSI/ASSE Z 359.1 are affixed for use during the entire lifetime of the roof covering. The devices shall be evaluated for possible replacement when the entire roof covering is replaced and be placed not more than 10 feet (3048 mm) on center along hip and ridge lines and placed not less than 10 feet (3048 mm) from roof edges and the open sides of walking surfaces.

426.3(4) Amend Section 306.1 by deleting the last sentence and inserting in lieu thereof: "An unobstructed level working space at least 30 inches deep and 30 inches wide shall be provided on any side of equipment where service access is required. The authority having jurisdiction may approve service reductions prior to equipment installation, provided that the manufacturer's instructions are met."

426.3(5) Delete Section 306.2 and insert in lieu thereof the following new section:

306.2 Appliances in rooms and closets. Rooms and closets containing appliances shall be provided with a door and an unobstructed passageway measuring not less than 36 inches wide and 80 inches high and a level service space not less than 30 inches deep and 30 inches wide at the front service side of the appliance with the door open.

426.3(6) Amend Section 306.5 by:

a. Adding the following to the end of the section: "If the tenants of a multiple tenant building have, or are allowed to have, mechanical facilities on the roof or which penetrate the roof, then roof access ladders must be provided for use by all such tenants and their agents and contractors in a manner that does not require accessing space under the control of another tenant."

b. Deleting the following: "Exception: This section shall not apply to Group R-3 occupancies."

c. Adopting new Section 306.5.3 as follows:

306.5.3 Visual screening of rooftop equipment. Equipment screening shall not be installed to the rooftop unit or the curb of the rooftop unit unless specified in the mechanical equipment manufacturer's installation instructions.

426.3(7) Delete Section 401.1 and insert in lieu thereof the following new section:

401.1 Scope. This chapter shall govern the ventilation of spaces within a building intended to be occupied, and the buildings meet either the requirements of ASHRAE Standard 62.1, "Ventilation for Acceptable Indoor Air Quality," 2019 edition, published by the American Society of Heating, Refrigeration, and Air-Conditioning Engineers, 1791 Tullie Circle N.E., Atlanta, GA 30329, or the requirements contained in this chapter. Mechanical exhaust systems, including exhaust systems serving clothes dryers and cooking appliances; hazardous exhaust systems; dust, stock, and refuse conveyor systems; subslab soil exhaust systems; smoke control systems; energy recovery ventilation systems; and other systems specified in Section 502 shall comply with Chapter 5.

426.3(8) Add the following footnote "i" related to the gym, stadium, arena (play area) category of the sports and amusement occupancy classification in Table 403.3.1.1, Minimum Ventilation Rates:

i. When combustion equipment is intended to be used on the playing surface, additional dilution ventilation and/or source control shall be provided.

426.3(9) Add the following footnote "j" to Table 403.3.1.1 anywhere the term "smoking lounges" appears:

j. For ventilation purposes, "smoking" includes both combustible tobacco products and accessories and electronic smoking devices and accessories.

426.3(10) Delete Section 504.9.2 and insert in lieu thereof the following new section:

504.9.2 Duct installation. Exhaust ducts shall:

a. Be supported at 4-foot (1,219 mm) intervals and secured in place;

b. The insert end of the duct will extend into the adjoining duct or fitting in the direction of airflow;

c. Not be joined by screws or similar fasteners that protrude into the inside of the duct.

426.3(11) Delete Subsection 506.3.13.3 and insert in lieu thereof the following new subsection:

506.3.13.3 Termination location. Exhaust outlets shall be located not less than 10 feet (3048 mm) horizontally from parts of the same or contiguous buildings, adjacent buildings and adjacent property lines; not less than 10 feet (3,048 mm) above the adjoining grade level; and not less than 20 feet horizontally/vertically from or not less than 5 feet above air intake openings and operable doors and windows into any building.

426.3(12) The first sentence of Section 507.3 is amended to read: "Type II hoods shall be installed above dishwashers capable of heating water beyond 140 degrees Fahrenheit and appliances that produce heat or moisture and do not produce grease or smoke as a result of the cooking process, except where the heat and moisture loads from such appliances are incorporated into the HVAC system design or into the design of a separate removal system."

426.3(13) Delete Section 508.1.1 and insert in lieu thereof the following new section:

508.1.1 Makeup air temperature. All kitchen makeup air systems shall be verified by a certified TAB (testing and balance) contractor to heat makeup air to within 10 degrees of room temperature set point and the TAB contractor certified by NEBB, TABB, or other certifying organization as approved by the Authority Having Jurisdiction.

426.3(14) Amend Section 601.5 by adopting new paragraph "9" as follows:

9. Return air openings shall be located at least 18 inches from supply air openings and air throw directed away from return air openings to reduce short cycling of air. Exception: Factory-made concentric duct terminations.

426.3(15) Amend Section 601.5 by adopting new paragraph "10" as follows:

10. One return air opening per floor is required on a central duct return system per ACCA Manual D, Appendix 8, and return air transfer openings are required on all bedrooms when dedicated return air openings are not used.

426.3(16) Amend Section 603 by adopting new Section 603.1.1 as follows:

603.1.1 Duct location. Air plenums and ducts located in floor and wall cavities shall be separated from unconditioned space by construction with insulation to meet energy code requirements. These areas include but are not limited to exterior walls, cantilevered floors, and floors above garages.

426.3(17) Delete Section 604.3 and insert in lieu thereof the following new section:

604.3 Coverings and linings. Duct coverings and linings, including adhesives where used, shall have a flame spread index of not more than 25 and a smoke-development index of not more than 50, when tested in accordance with ASTM E84 or UL 723, using the specimen preparation and mounting procedures of ASTM E2231 and not flame, glow, smolder or smoke when tested in accordance with ASTM C411 at the temperature to which they are exposed in service. The testing temperature shall not fall below 250ºF (121ºC) and coverings and linings be listed and labeled. The use of an air gap to meet R-value requirements for duct insulation is prohibited.

426.3(18) Amend Subsection 607.6.2.1 by adopting new Subsections 607.6.2.1.3 and 607.6.2.1.4 as follows:

607.6.2.1.3 Access ceiling radiation dampers shall be provided with an approved means of access that is large enough to permit inspection and maintenance of the damper and its operating parts and dampers equipped with fusible links and internal operators be provided for both with either an access door that is not less than 12 inches (305 mm) square, or a removable duct section.

607.6.2.1.4 Identification ceiling radiation damper locations and access points shall be permanently identified on the exterior by a label or marking acceptable to the authority having jurisdiction.

426.3(19) Delete all references to the "International Plumbing Code" and insert in lieu thereof "state plumbing code".

[**ARC 8914C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—426.4(105) Hospitals and health care facilities.

426.4(1) A hospital that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the hospital is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the hospital shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

426.4(2) A nursing facility or hospice that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the nursing facility or hospice is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the nursing facility or hospice shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

426.4(3) An intermediate care facility that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical code if the intermediate care facility is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the intermediate care facility shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

426.4(4) An ambulatory surgical center that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the fire safety requirements of the state mechanical

code if the ambulatory surgical center is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the ambulatory surgical center shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

426.4(5) A religious nonmedical health care institution that is required to meet the provisions of the state mechanical code shall be deemed to be in compliance with the provisions of the state mechanical code if the institution is in compliance with the provisions of rule 481—280.14(10A). In any other case in which an applicable requirement of the Life Safety Code is inconsistent with an applicable requirement of the state mechanical code, the religious nonmedical health care institution shall be deemed to be in compliance with the state mechanical code requirement if the Life Safety Code requirement is met.

[**ARC 8914C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

481—426.5(105) Enforcement. Any state or local jurisdiction retaining authority to perform inspections of mechanical installations in the state of Iowa will retain initial interpretive authority over the state mechanical code and may implement an appeals process with respect to such interpretation. Ultimate appeal of any initial interpretation may be made to the plumbing and mechanical systems board by the filing of a petition for declaratory order pursuant to Iowa Code chapter 17A and 7—Chapter 2503 or the filing of a petition for waiver pursuant to Iowa Code chapter 17A and 7—Chapter 2504.

[**ARC 8914C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code section 105.4.

CHAPTER 427
PLUMBING AND MECHANICAL SYSTEMS BOARD—ADMINISTRATIVE AND REGULATORY AUTHORITY

[Prior to 4/2/25, see Public Health Department[641] Ch 27]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—427.1(17A,105) Definitions. The definitions set forth in Iowa Code section 105.2 are incorporated herein by reference. For purposes of this chapter, the following definitions also apply:

"Board office" means the office of the administrative staff.

"Disciplinary proceeding" means any proceeding under the authority of the board pursuant to which licensee discipline may be imposed.

"License" means a license to operate as a contractor or work in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic disciplines or work as a certified medical gas system installer or work in the specialty license disciplines developed by the board.

"Licensee" means a person or entity licensed to operate as a contractor or work in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic disciplines or work as a certified medical gas system installer or work in the specialty license disciplines developed by the board.

[**ARC 7993C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—427.2(17A,105) Purpose of board. The purpose of the board is to administer and enforce the provisions of Iowa Code chapters 17A and 105 with regard to the licensing and regulation of plumbers, mechanical professionals, and contractors. The mission of the board is to protect the public health, safety and welfare by licensing qualified individuals who provide services to consumers and by fair and consistent enforcement of the statutes and regulations of the licensure board. Responsibilities include, but are not limited to:

427.2(1) Licensing of qualified applicants to operate as a contractor or work in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic disciplines or work as a certified medical gas system installer or work in the specialty license disciplines developed by the board by examination, renewal, endorsement, and reciprocity.

427.2(2) Developing and administering a program of continuing education to ensure the continued competency of individuals licensed by the board.

427.2(3) Imposing discipline on licensees as provided by statute or rule.

[**ARC 7993C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—427.3(17A,105) Organization of board and proceedings.

427.3(1) Membership of the board is as provided in Iowa Code section 105.3.

427.3(2) The board will elect a chairperson, vice chairperson, and secretary from its membership at the first meeting after April 30 of each year.

427.3(3) The board will hold at least four meetings annually.

427.3(4) A majority of the members of the board shall constitute a quorum.

427.3(5) Board meetings shall be governed in accordance with Iowa Code chapter 21, and the board's proceedings will be conducted in accordance with Robert's Rules of Order, Revised.

427.3(6) The department will furnish the board with the necessary facilities and employees to perform the duties mandated by this chapter but shall be reimbursed for all costs incurred from funds appropriated to the board and subsequent fees from licensing activities.

427.3(7) The board has the authority to:

a. Develop and implement a program of continuing education to ensure the continued competency of individuals licensed by the board.

b. Establish fees.

c. Establish committees of the board, the members of which are appointed by the board chairperson and do not constitute a quorum of the board. The board chairperson appoints committee chairpersons.

d. Hold a closed session pursuant to Iowa Code section 21.5.

e. Investigate alleged violations of statutes or rules that relate to operation as a contractor; work in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic disciplines; work as a certified medical gas system installer; or work in the specialty license disciplines developed by the board upon receipt of a complaint or upon the board's own initiation. The investigation will be based on information or evidence received by the board.

f. Initiate and impose licensee discipline.

g. Monitor licensees that are limited by a board order.

h. Perform any other functions authorized by a provision of law.

[**ARC 7993C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—427.4(17A,105) Official communications.

427.4(1) All official communications, including submissions and requests, should be addressed to the Plumbing and Mechanical Systems Board at its current address.

427.4(2) Notice of change of name or address. Each licensee and licensed entity shall notify the board in writing of a change of name or change of current mailing address within 30 days after the occurrence.

[**ARC 7993C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—427.5(21) Public meetings. Members of the public may be present during board meetings unless the board votes to hold a closed session. Dates and location of board meetings may be obtained through the board's website or directly from the board office.

427.5(1) At every regularly scheduled board meeting, time will be designated for public comment. During the public comment period, any person may speak for up to two minutes. Any additional time allowances will be at the discretion of the chairperson or acting chairperson.

427.5(2) Persons who have not asked to address the board during the public comment period may raise their hands to be recognized by the chairperson. Acknowledgment and an opportunity to speak will be at the discretion of the chairperson.

427.5(3) The person presiding at a meeting of the board may exclude a person from an open meeting for behavior that obstructs the meeting.

427.5(4) Cameras and recording devices may be used at open meetings, provided the cameras or recording devices do not obstruct the meeting. If the user of a camera or recording device obstructs the meeting by the use of such device, the person presiding at the meeting may request the user to discontinue use of the camera or device.

[**ARC 7993C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—427.6(17A) Contested cases. Contested cases are governed by 481—Chapter 506.

[**ARC 0405D**, IAB 7/8/26, effective 6/30/26]

481—427.7(17A) Decisions.

427.7(1) *Final decisions.* When a quorum of the board presides over the reception of evidence at a hearing, its decision is a final decision. A majority of the members constitutes a quorum. Final decisions will be served on the parties in accordance with 481—subrule 506.13(2). Final decisions of the board, including consent agreements and consent orders, are public documents pursuant to Iowa Code chapter 22.

427.7(2) *Proposed panel decisions.*

a. Panel of specialists. When a panel of three specialists presides over the hearing, the panel will issue a proposed decision that will include findings of fact but will not include conclusions of law or any recommendation for or against the discipline for a licensee. A proposed decision of a panel of specialists, together with a transcript of the proceedings and the exhibits presented, will be reviewed by the board within 30 days of the date the proposed decision was issued.

b. Panel of board members. When a panel of three or more board members presides over the hearing, the panel will issue a proposed decision that will include proposed findings of fact, conclusions of law, and the order. A proposed panel decision will be reviewed by the board within 30 days of the date the proposed panel decision was issued. A proposed panel decision becomes a final decision without further proceedings unless appealed in accordance with paragraph 427.7(2)*"c."*

c. Appeal of proposed panel decisions. A proposed panel decision pursuant to paragraph 427.7(2)*"a"* or *"b"* may be appealed to the full board by either party by serving on the executive officer, either in person or by certified mail, a notice of appeal within 30 days after service of the proposed decision on the appealing party. The notice of appeal shall specify the party initiating the appeal, the proposed decision or order appealed, the specific findings or conclusions to which exception is taken and any other exceptions to the decision or order, the relief sought, and the grounds for relief.

(1) Following receipt of a notice of appeal, the board will enter an order establishing a schedule for submission of briefs and oral argument. The parties shall serve their briefs on the board and shall furnish an additional copy to each party by first-class mail. Briefs will cite any applicable legal authority and specify relevant portions of the record in that proceeding.

(2) Oral argument will be heard by the board unless waived by both parties. The time granted each party for oral argument will be established by the board.

(3) The record on appeal will be the entire record made before the hearing panel or administrative law judge.

d. Confidentiality. At no time prior to the release of the final decision by the board shall a proposed decision be made public or distributed to any person other than the parties.

e. Requests to present additional evidence. A party may request the taking of additional evidence after the issuance of a proposed decision only by establishing that:

(1) The evidence is material; and

(2) The evidence arose after the completion of the original hearing; or

(3) Good cause exists for failure to present the evidence at the original hearing; and

(4) The party has not waived the right to present additional evidence.

A written request to present additional evidence must be filed with the notice of appeal or by a nonappealing party within 14 days of service of the notice of appeal. The board may remand a case to the hearing panel for further hearing or may itself preside at the taking of additional evidence.

[**ARC 0405D**, IAB 7/8/26, effective 6/30/26]

481—427.8(17A) Client notification. Within 15 days (or such other time period specifically ordered by the board) of the licensee's receipt of the board's final decision, whether entered by consent or following hearing, which suspends or revokes a license or accepts a voluntary surrender of a license to resolve a disciplinary case, the licensee shall notify in writing all current clients of the fact that the license has been suspended, revoked or voluntarily surrendered. Such notice shall advise clients to obtain alternative professional services. Within 30 days of receipt of the board's final order, the licensee shall file with the board copies of the notices sent. Compliance with this requirement is a condition for an application for reinstatement.

[**ARC 0405D**, IAB 7/8/26, effective 6/30/26]

These rules are intended to implement Iowa Code chapters 17A, 21, and 105.

CHAPTER 428
PLUMBING AND MECHANICAL SYSTEMS BOARD—LICENSURE FEES
[Prior to 4/2/25, see Public Health Department[641] Ch 28]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—428.1(105) Fees. All fees are nonrefundable.

428.1(1) Fees for three-year initial licenses are as follows:

a. An apprentice license as defined in 481—subrule 429.2(1) is $50.

b. A journey license as defined in 481—subrule 429.2(2) is $180.

c. A master license as defined in 481—subrule 429.2(3) is $240.

d. A medical gas pipe certificate as defined in rule 481—429.3(105) is $75.

e. An inactive license as defined in 481—subrules 429.2(5) and 429.2(6) is $50.

f. A contractor license as defined in 481—subrule 429.2(4) is $250.

g. A special restricted license as defined in 481—subrules 429.2(8), 429.2(9) and 429.2(10) is $50.

h. Fees for all initial licenses issued for a period of less than three years will be prorated using a one-sixth deduction for each six-month period.

428.1(2) Fees for three-year reciprocal licenses or three-year licenses obtained by verification in accordance with 481—Chapter 430 are as follows:

a. An apprentice license as defined in 481—subrule 429.2(1) is $50.

b. A journey license as defined in 481—subrule 429.2(2) is $180.

c. A master license as defined in 481—subrule 429.2(3) is $240.

d. Fees for all reciprocal licenses or three-year licenses obtained by verification in accordance with 481—Chapter 430 issued for a period of less than three years will be prorated using a one-sixth deduction for each six-month period.

428.1(3) Fees for renewal of licenses are as follows:

a. An apprentice license as defined in 481—subrule 429.2(1) is $50.

b. A journey license as defined in 481—subrule 429.2(2) is $180.

c. A master license as defined in 481—subrule 429.2(3) is $240.

d. A medical gas pipe certificate as defined in rule 481—429.3(105) is $75.

e. An inactive license as defined in 481—subrules 429.2(5) and 429.2(6) is $50. However, no fee is necessary for an inactive specialty license as defined in 481—subrule 431.8(3) so long as the person possessing the inactive specialty license remains actively licensed as an apprentice.

f. A contractor license as defined in 481—subrule 429.2(4) is $250.

g. A special restricted license as defined in 481—subrules 429.2(8), 429.2(9), and 429.2(10) is $50. However, no fee is necessary for an inactive specialty license as defined in 481—subrule 431.8(3) so long as the person possessing the inactive specialty license remains actively licensed as an apprentice.

428.1(4) The examination application fee is $35.

428.1(5) A late fee for failure to renew before expiration is determined as follows:

a. A licensee who does not timely renew but renews a license on or before the following July 31 may reinstate and renew the license upon payment of the appropriate renewal fee and without payment of a late fee.

b. A licensee who does not timely renew but renews a license between the following August 1 and August 31 may reinstate and renew the license without examination upon payment of a $60 late fee and the appropriate renewal of license fee.

c. A licensee who does not timely renew but renews a license after the following August 31 and on or before the following June 30 may reinstate and renew the license without examination upon payment of a $100 late fee and the appropriate renewal of license fee.

428.1(6) Reserved.

428.1(7) The fee for written verification of licensee status is $20.

428.1(8) The returned check fee is $25.

428.1(9) The disciplinary hearing fee is a maximum of $75.

428.1(10) The paper application fee is $25 plus the appropriate license fee.

428.1(11) Combined license.

a. For purposes of this subrule, "combined license" means more than one active master, contractor, or journeyperson license in one or multiple disciplines held by the same individual.

b. A license fee for a combined license is the sum total of each of the separate license fees as set forth in subrules 428.1(1) through 428.1(3) reduced by 30 percent.

c. Only individual licenses purchased in a single transaction are eligible for the combined licensee fee reduction.

428.1(12) The fee for combining an HVAC-refrigeration or hydronics license to a mechanical license is $50. This fee does not apply at the time of reissue.

428.1(13) The fee for submitting a petition for eligibility determination as defined in 481—subrule 429.13(2) is $25.

[**ARC 7994C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—428.2(105) Annual review of fee schedule. Within 60 days following the end of each fiscal year, the board will submit a report to the general assembly in accordance with Iowa Code section 105.9(5)*"a."*

[**ARC 7994C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—428.3(105) Waiver of fees. Fee waivers are available under the following circumstances:

428.3(1) The board will waive any fee charged to an applicant for a license if the applicant's household income does not exceed 200 percent of the federal poverty income guidelines and the applicant is applying for the license for the first time in this state.

428.3(2) For an applicant who has been honorably or generally discharged from federal active duty or national guard duty, the board will waive an initial application fee and one renewal fee if those fees would otherwise be charged within five years of the discharge.

[**ARC 7994C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

These rules are intended to implement Iowa Code section 105.9.

CHAPTER 429
PLUMBING AND MECHANICAL SYSTEMS BOARD—APPLICATION, LICENSURE, AND EXAMINATION

[Prior to 4/2/25, see Public Health Department[641] Ch 29]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—429.1(105) Definitions. The definitions set forth in Iowa Code section 105.2 are incorporated herein by reference. For purposes of these rules, the following definitions also apply:

"Complete criminal record" means the complaint and judgment of conviction for each offense of which the applicant has been convicted, regardless of whether the offense is classified as a felony or a misdemeanor, and regardless of the jurisdiction in which the offense occurred.

"Conviction" means a finding, plea, or verdict of guilt made or returned in a criminal proceeding, even if the adjudication of guilt is deferred, withheld, or not entered. "Conviction" includes Alford pleas and pleas of nolo contendere.

"Corresponding" means the same discipline.

"Directly relates" or *"directly related"* means the same as Iowa Code section 272C.1(8)*"a"* and *"b."*

"Disconnect/reconnect plumbing technician specialty license" means a sublicense under a plumbing license to perform work from the appliance shutoff valve or fixture shutoff valve to the appliance or fixture and any part or component of the appliance or fixture, including the disconnection and reconnection of the existing appliance or fixture to the water or sewer piping and the installation of a shutoff valve no more than three feet from the appliance or fixture.

"Disqualifying conviction" or *"disqualifying offense"* means a conviction directly related to the practice of the profession.

"Eligibility determination" means the process by which a person who has not yet submitted a completed license application may request that the board determine whether one or more of the person's convictions are disqualifying offenses that would prevent the individual from receiving a license or certification.

"Emergency repairs" means the repair of water pipes to prevent imminent damage to property.

"Hearth systems specialty license" means a sublicense under an HVAC-refrigeration or mechanical license to perform work in the installation of gas burning and solid fuel appliances that offer a decorative view of the flames, from the connector pipe to the shutoff valve located within three feet of the appliance. This sublicense is further allowed to perform work in the venting systems, log lighters, gas log sets, fireplace inserts, and freestanding stoves.

"Inactive license" means a license that is available for a plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic professional who is not actively engaged in running a business or working in the business in the corresponding discipline at that license level. An inactive license must be renewed prior to its expiration date. An inactive license is not valid for practice until the license is reactivated by the board.

"Lapsed license" means a license that expired prior to June 30, 2017, and was not renewed within 60 days following its expiration date or a license that expired on or after June 30, 2017, and was not renewed by the following August 31. A lapsed license is no longer valid for practice.

"Licensee" means any person licensed to practice pursuant to Iowa Code chapter 105.

"Reactivated license" means a license that is changed from inactive status to active status pursuant to rule 481—429.8(105).

"Reissued license" means a refrigeration or HVAC license that was changed to an HVAC-refrigeration license pursuant to rule 481—429.8(105). "Reissued license" also means an HVAC or refrigeration license and a hydronic license that was changed to a mechanical license pursuant to rule 481—429.8(105).

"Service technician HVAC specialty license" means a sublicense under an HVAC-refrigeration or mechanical license to perform work from the appliance shutoff valve to the appliance and any part and component of the appliance, including the disconnection and reconnection of the existing appliance to the gas piping and the installation of a shutoff valve no more than three feet away from the appliance.

"Surety bond" means a performance bond written by an entity licensed to do business in this state that guarantees that a contractor will fully perform the contract and which guarantees against breach of that contract.

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.2(105) Available licenses and general requirements. All licenses issued by the board will be for a three-year period, except where a shorter or longer period is required or allowed by statute. Subject to the general requirements set forth herein and the minimum qualifications for licensure set forth in rule 481—429.4(105), the following licenses are available:

429.2(1) *Apprentice license.* An applicant for an apprentice license will submit an application that provides evidence of meeting the qualifications specified in Iowa Code section 105.18. If the applicant currently holds an active specialty license, the specialty license will be placed on inactive status as specified in 481—subrule 431.8(3).

429.2(2) *Journeyperson license.* An applicant for a journeyperson license will submit an application that provides evidence of meeting the qualifications specified in Iowa Code section 105.18, including an applicant who possesses a master-level license and who seeks a journeyperson license in the same discipline.

429.2(3) *Master license.* An applicant for a master license will submit an application that provides evidence of meeting the qualifications specified in Iowa Code section 105.18. Applicants previously licensed as a journeyperson will provide evidence of at least two years of journeyperson experience in the applicable discipline.

429.2(4) *Contractor license.* An applicant for a contractor license will submit an application that provides evidence of meeting the qualifications specified in Iowa Code section 105.18, and the insurance and surety bond requirements specified in Iowa Code section 105.19.

429.2(5) *Active journeyperson license/inactive master license combination.* An applicant for an active journeyperson license and an inactive master license in the same discipline will submit an application approved by the department, and pay the fees for both an active journeyperson license and an inactive master license in accordance with subrule 429.2(3) and rule 481—429.5(105).

429.2(6) *Inactive license.* An applicant for an inactive license that does not fall within subrule 429.2(5) will submit an application approved by the department and pay the fee for an inactive license in accordance with rule 481—429.5(105).

429.2(7) *Service technician HVAC specialty license.* An applicant for a service technician HVAC specialty license will submit an application approved by the department and pay the fee for a specialty license in accordance with rule 481—429.5(105). It will also provide the board with evidence that:

a. The applicant possesses a valid certification from North American Technician Excellence, Inc. or an equivalent authority approved by the board, or

b. The applicant completed a Service Technician Associate degree or equivalent educational or similar training approved by the board.

429.2(8) *Disconnect/reconnect plumbing technician specialty license.* An applicant for a disconnect/reconnect plumbing technician specialty license will submit an application approved by the department and pay the fee for a specialty license in accordance with rule 481—429.5(105). It will also provide the board with evidence that:

a. The applicant is receiving or has previously received industry training to perform work covered under this specialty license, or

b. The applicant completed a Service Technician Associate degree or equivalent educational or similar training approved by the board.

429.2(9) *Private school or college routine maintenance specialty license.* An applicant for a private school or college routine maintenance specialty license will submit an application approved by the department and pay the fee for a specialty license in accordance with rule 481—429.5(105) and:

a. Provide the board with evidence that the applicant is currently employed by a private school or college.

b. Provide the board with evidence that the applicant is performing routine maintenance within the scope of employment with the private school or college.

429.2(10) *Hearth systems specialty license.* An applicant for a hearth systems specialty license will submit an application approved by the department and pay the fee for a specialty license in accordance with rule 481—429.5(105) and provide the board with evidence that the applicant possesses a valid certification issued by the National Fireplace Institute or equivalent authority approved by the board.
[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.3(105) Medical gas piping certification. The following certification is required for a person who performs work as a medical gas system installer. An applicant for a medical gas certificate will submit an application approved by the department and pay the fee for a medical gas piping certification in accordance with rule 481—429.5(105) and possess valid certification from the National Inspection Testing Certification (NITC) Corporation, or an equivalent authority approved by the board. Documentation must be submitted on a form provided by the board.
[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.4(105) Minimum qualifications for licensure. An applicant for any type of license must be at least 18 years old. All apprentice applicants must have completed a high school education or attained GED equivalent.
[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.5(105) General requirements for application for licensure. The following criteria apply to application for licensure:

429.5(1) *Application.* An applicant will complete an application online or on a paper application approved by the board.

429.5(2) *Fees.* An application must be accompanied by the appropriate fees. All fees are nonrefundable. Fees for online applications are by credit card only. A check or money order may accompany a paper application.

429.5(3) *Applicant responsibilities.* An applicant for an initial license or license renewal bears full responsibility for each of the following:

a. Paying all fees charged by regulatory authorities, state or national testing or credentialing organizations, and educational institutions providing the information necessary to complete a license, certification, or renewal application;

b. Providing accurate, up-to-date, and truthful information on the application including, but not limited to, prior professional experience, education, training, criminal history, and disciplinary history; and

c. Submitting complete application materials. An application for a license or certification or renewal of a license or certification will be considered active for 90 days from the date the application is received. For purposes of establishing timely filing, the postmark on a paper submittal or the date of the electronic time stamp for online renewals will be used. If the applicant does not submit all materials within this time period or if the applicant does not meet the requirements for the license or certification, the application will be considered incomplete and will be destroyed.

429.5(4) *Verifiable documentation.* No application will be considered by the board without the appropriate verifiable documentation, including:

a. A passing score for a discipline-appropriate examination provided by the testing vendor under contract with the board, when testing is required for a license.

b. Verification that the applicant has met the minimum requirements as defined in rule 481—429.4(105) and the established employment experience criteria for each type of license.

c. Documentation of the applicant's complete criminal record, including the applicant's personal statement regarding whether each offense directly relates to the practice of the profession. No application will be considered complete unless and until the applicant responds to board requests for additional information regarding the applicant's complete criminal record.
[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.6(105) Examination.

429.6(1) *General.* An applicant for licensure as a plumbing or mechanical system professional must successfully pass the licensing examination for the discipline. The examination will be specific to each license type, approved by the board, and administered by the board-approved vendor.

429.6(2) *Examination.*

a. The examination will be written and proctored by a testing agency selected by the board and conducted either in person or online.

b. The examination will be offered periodically during the year. The time and location will rotate between multiple sites in the state of Iowa, as determined by the department, with approval of the board.

c. The examination will not be subject to review by applicants. Upon request from an applicant, the testing vendor will provide information about the sections that the applicant failed, but shall not provide an applicant access to actual examination questions or answers. Any fees associated with the review process will be assessed by and payable to the testing vendor. The applicant is responsible for paying all associated examination fees.

d. A score of 75 percent or better is considered passing.

429.6(3) *Examination application.*

a. An applicant will complete and submit a board-approved examination application either online or on a paper application a minimum of 15 business days prior to taking an examination.

b. An application must be accompanied by the appropriate fees. All fees are nonrefundable. Fees for online applications are by credit card only. A check or money order may accompany a paper application.

c. No application will be considered by the board without the appropriate verifiable documentation.

d. The applicant will be notified and issued an examination entrance letter upon approval of the examination application.

e. If the applicant is notified that the application is incomplete, the applicant must contact the board office within 90 days. Incomplete applications will be considered invalid and after 90 days will be destroyed.

f. Examination fees are payable directly to the board-approved testing vendor. All transactions are the responsibility of the applicant and testing vendor. The board is not responsible for refunds from the testing vendor.

g. An applicant shall present current photo identification in order to sit for the examination.

h. An applicant for licensure by examination who does not pass the examination within one year from the original application date has to submit a new application.

i. A master examination applicant will not receive permission to sit for a master examination unless the applicant establishes that the applicant:

(1) Has previously been licensed as a master in the applicable discipline; or

(2) Has previously been licensed as a journeyperson in the applicable discipline and has at least two years of journeyperson experience in the applicable discipline.

j. A journeyperson examination applicant may apply to sit for the examination up to 12 months prior to completion of the 48 months of required apprentice credit, which include the granting of advanced standing or credit for previously acquired experience, training, or skills.

429.6(4) *Expiration of passing examination score.* An applicant who successfully passes an examination must apply for licensure in the applicable discipline at the applicable discipline level within two years of notification that the applicant successfully passed the examination. A passing examination score will expire if the applicant fails to apply for licensure within the two-year period as set forth herein, and the applicant will be required to successfully retake said examination to become licensed.

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.7(105) License renewal.

429.7(1) *Renewal period.* The period of licensure to operate as a contractor or work as a master, journeyperson or apprentice in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic disciplines or work as a certified medical gas system installer or work in the specialty license disciplines developed by the board is a period of three years. All licenses issued will expire on June 30 every three years, beginning with June 30, 2026. Fees for new licenses issued after the July 1 beginning of each

three-year renewal cycle will be prorated using a one-sixth deduction for each six-month period of the renewal cycle.

429.7(2) *Renewal notification.* The licensee is responsible for renewing the license prior to its expiration.

429.7(3) *Specific renewal requirements.*

a. Active and inactive apprentice, specialty, journeyperson, and master licenses. An apprentice, specialty, journeyperson, or master licensee seeking renewal shall:

(1) Submit an application for renewal online or on the forms provided by the board office.

(2) Meet the continuing education requirements as set forth in rule 481—432.2(105), unless no continuing education is necessary as specified in 481—subrule 431.8(3), 432.2(2), or 432.6(1).

(3) Include the appropriate fee as specified in 481—Chapter 428. A penalty will be assessed by the board for late renewal, as specified in 481—Chapter 428.

b. Medical gas piping certification holders. A medical gas piping certification holder seeking renewal shall:

(1) Submit an application for renewal either electronically or on the forms provided by the board office.

(2) Provide evidence that the person has maintained valid certification issued from the National Inspection Testing Certification (NITC) Corporation or an equivalent authority approved by the board.

(3) Include the appropriate fee as specified in 481—Chapter 428.

c. Contractor licenses. Renewal of the contractor license constitutes registration as a contractor under Iowa Code chapter 91C. A contractor licensee seeking renewal shall:

(1) Submit an application for renewal on the forms provided by the board office. Licensees may renew their licenses online or via paper application.

(2) Include evidence of professional liability insurance and a surety bond mandated by subrule 429.2(4).

(3) As specified in 875—Chapter 150, include proof of workers' compensation insurance coverage, proof of unemployment insurance compliance and, for out-of-state contractors, a bond as described in Iowa Code chapter 91C.

(4) Include the appropriate license fee as specified in 481—Chapter 428. A penalty will be assessed by the board for late renewal, as specified in 481—Chapter 428.

(5) Include the fee for a three-year contractor registration as specified in 875—Chapter 150.

429.7(4) *Complete and timely filed application.* Renewal applications are due 30 days prior to expiration per Iowa Code section 105.20(2). No renewal application is considered timely and sufficient until received by the board office and accompanied by all material necessary for renewal, including applicable renewal and late fees. Incomplete applications will not be accepted. For purposes of establishing timely filing, the postmark on a paper submittal or the date of the electronic time stamp for online renewals will be used.

429.7(5) *Late renewal.* A licensee has a one-month grace period after the expiration date of the license to renew without payment of a late fee.

a. A licensee who seeks to renew more than one month but less than two months after the license expiration date may renew upon payment of the late fee in the amount specified in 481—Chapter 428 in addition to the renewal fee.

b. A license remains valid for practice for up to two months past the expiration date of the license. After two months, the license lapses and becomes invalid for practice until the license is reinstated.

429.7(6) *Reinstatement.* A person seeking reinstatement of a lapsed license must submit an application for reinstatement electronically or on the forms provided by the board office and include all mandated documentation and fees.

a. A licensee who allows a license to lapse for more than two months but not more than 365 days may reinstate and renew the license upon payment of the late penalty fee in the amount specified in 481—Chapter 428 in addition to the renewal fee. A specialty, journeyperson or master licensee must also meet the continuing education requirements as set forth in rule 481—432.2(105), unless no continuing education is mandated as specified in 481—subrule 431.8(3), 432.2(2), or 432.6(1).

b. A person holding a specialty, journeyperson or master license who allows the license to lapse for more than one year may reinstate and renew the license by providing evidence of one of the following:

(1) For a journeyperson or master licensee, retaking and successfully passing the applicable licensing examination; or

(2) Retaking and successfully completing all continuing education requirements as set forth in rule 481—432.2(105) for each renewal period in which the license was not timely renewed.

c. A contractor licensee seeking reinstatement of a license that has been lapsed for more than one year may reinstate and renew the license by submitting evidence of meeting the requirements specified in subrule 429.7(3) and payment of any mandated fees.

d. A licensee who reinstates and renews a lapsed license is not entitled to a prorated renewal fee.

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.8(105) Waiver from examination for military service. The written examination requirements and prior experience requirements set forth in Iowa Code sections 105.18(2)*"b"*(1) and 105.18(2)*"c"* are waived for a journeyperson license or master license if the applicant meets the requirements set forth in Iowa Code section 105.18(4).

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.9(105) Reactivation of an inactive license.

429.9(1) An inactive license is not valid for practice but must be renewed in accordance with rule 481—429.7(105). If an inactive license has not been timely renewed and becomes lapsed, the requirements for reinstatement of the license will have to be met. A person with an inactive license that is not lapsed who is seeking to reactivate the license shall:

a. Submit a written request to the board office for active license status; and

b. Pay the fee for an active license in the amount specified in 481—Chapter 428.

429.9(2) A licensee whose license was reactivated during the current renewal compliance period may use continuing education credit earned during the compliance period for the first renewal period following reactivation.

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.10(105) Review of applications.

429.10(1) Upon receipt of a completed application, the board executive officer or designee has discretion to:

a. Authorize the issuance of the license, certification, or examination application.

b. Refer the application to a committee of the board for review and consideration when the board executive officer determines that matters raised in or revealed by the application are relevant in determining the applicant's qualifications for a license, certification, or examination. Matters that may justify referral to a committee of the board include, but are not limited to:

(1) Prior criminal history, which is reviewed and considered in accordance with Iowa Code chapter 272C and rule 481—429.13(105).

(2) Chemical dependence.

(3) Competency.

(4) Physical or psychological illness or disability.

(5) Judgments entered on, or settlements of, claims, lawsuits, or other legal actions related to the profession.

(6) Professional disciplinary history.

(7) Education or experience.

429.10(2) Following review and consideration of an application referred by the board executive officer, the committee may at its discretion:

a. Authorize the issuance of the license, certification, or examination application.

b. Recommend to the board denial of the license, certification, or examination application.

c. Recommend to the board issuance of the license or certification under certain terms and conditions or with certain limitations.

d. Refer the license, certification, or examination application to the board for review and consideration without recommendation.

429.10(3) Following review and consideration of a license, certification, or examination application referred by the committee, the board will:

a. Authorize the issuance of the license, certification, or examination application;

b. Deny the issuance of the license, certification, or examination application; or

c. Authorize the issuance of the license or certification under certain terms and conditions or with certain limitations.

429.10(4) The committee or board may require an applicant to appear for an interview before the committee or the full board as part of the application process.

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.11(105) Grounds for denial of an application. The board may deny an application for license, certification, or examination for any of the following reasons:

1. Failure to meet the requirements for license, certification, or examination as specified in these rules.
2. Failure to provide accurate and truthful information, or the omission of material information.
3. Pursuant to Iowa Code section 105.22, upon any of the grounds for which licensure may be revoked or suspended.

[**ARC 7995C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—429.12(105) Use of criminal convictions in eligibility determinations and initial licensing decisions.

429.12(1) *License application.* Unless an applicant for licensure petitions the board for an eligibility determination, the applicant's convictions will be reviewed when the board receives a completed license application.

a. Full disclosure. An applicant must disclose all convictions on a license application. Failure to disclose all convictions is grounds for license denial or disciplinary action following license issuance.

b. Documentation and personal statement. An applicant with one or more convictions must submit the complete criminal record for each conviction and a personal statement regarding whether each conviction directly relates to the practice of the profession in order for the license application to be considered complete.

c. Rehabilitation. As part of the license application, an applicant will submit all evidence of rehabilitation that the applicant wishes to be considered by the board. The board may deny a license if the applicant has a disqualifying offense, unless the applicant demonstrates by clear and convincing evidence that the applicant is rehabilitated pursuant to Iowa Code section 272C.15. An applicant with one or more disqualifying offenses who has been found rehabilitated must still satisfy all other requirements for licensure.

d. Nonrefundable fees. Any application fees will not be refunded if the license is denied.

429.12(2) *Eligibility determination.* An individual who has not yet submitted a completed license application may petition the board for an eligibility determination. An individual with a conviction does not have to petition the board for an eligibility determination before applying for a license. To petition the board for an eligibility determination, a petitioner must submit all of the following:

a. A completed eligibility determination form, which is available on the board's website;

b. The complete criminal record for each of the petitioner's convictions;

c. A personal statement regarding whether each conviction directly relates to the practice of the profession and why the board should find the petitioner is rehabilitated;

d. All evidence of rehabilitation that the petitioner wants the board to consider; and

e. Payment of a nonrefundable fee in the amount of $25.

429.12(3) *Appeal.* A petitioner found ineligible or an applicant denied a license because of a disqualifying offense may appeal the decision in the manner and time frame set forth in the board's written decision. A timely appeal will initiate a nondisciplinary contested case proceeding. The board's

rules governing nondisciplinary contested case proceedings apply unless otherwise specified in this rule. If the petitioner fails to timely appeal, the board's written decision will become a final order.

a. Presiding officer. The presiding officer will be the board. However, any party to an appeal of a license denial or ineligibility determination may file a written request, in accordance with rule 481—506.9(17A), that the presiding officer be an administrative law judge. Additionally, the board may, on its own motion, request that an administrative law judge be assigned to act as presiding officer. When an administrative law judge serves as the presiding officer, the decision rendered will be a proposed decision.

b. Burden. The office of the attorney general will represent the board's initial ineligibility determination or license denial and has the burden of proof to establish that the petitioner's or applicant's convictions include at least one disqualifying offense. Upon satisfaction of this burden by a preponderance of the evidence by the office of the attorney general, the burden of proof shifts to the petitioner or applicant to establish rehabilitation by clear and convincing evidence.

c. Judicial review. A petitioner or applicant must appeal an ineligibility determination or a license denial in order to exhaust administrative remedies. A petitioner or applicant may only seek judicial review of an ineligibility determination or license denial after the issuance of a final order following a contested case proceeding. Judicial review of the final order following a contested case proceeding is in accordance with Iowa Code chapter 17A.

429.12(4) *Future petitions or applications.* If a final order determines a petitioner is ineligible, the petitioner cannot submit a subsequent petition for eligibility determination or a license application prior to the date specified in the final order. If a final order denies a license application, the applicant cannot submit a subsequent license application or a petition for eligibility determination prior to the date specified in the final order.

CHAPTER 430
PLUMBING AND MECHANICAL SYSTEMS BOARD—ALTERNATIVE LICENSURE PATHWAYS

[Prior to 4/2/25, see Public Health Department[641] Ch 35]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—430.1(105) Definitions. For purposes of this chapter, the following definitions apply:

"Board" means the same as defined in Iowa Code section 105.2(2).

"Full time" means a minimum of 1,700 hours of work in a one-year period.

"Issuing jurisdiction" means the same as defined in Iowa Code section 272C.12(5).

"Transferring jurisdiction" means the specific issuing jurisdiction on which an applicant relies to seek licensure in Iowa by verification under this chapter.

[**ARC 8001C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—430.2(105) Reciprocity agreements. The board may enter into licensing reciprocity agreements with other states in accordance with Iowa Code section 105.21.

[**ARC 8001C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—430.3(105) Licensure by reciprocity. A nonresident of Iowa seeking a reciprocal license under Iowa Code chapter 105 applies on forms provided by the board.

430.3(1) *Reciprocity criteria.* The board may issue a reciprocal license if the following criteria are met:

a. The applicant is a nonresident of Iowa;

b. The applicant possesses a valid plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic license from an issuing jurisdiction with which the board has entered into a reciprocity agreement;

c. The applicant has paid the appropriate fee or fees set forth in 481—Chapter 428;

d. The applicant meets the minimum qualifications for licensure set forth in rule 481—429.4(105); and

e. The applicant agrees to comply with all provisions of Iowa law and applicable administrative rules.

430.3(2) *Denial of reciprocal license.* The board may refuse to issue a reciprocal license to an applicant otherwise qualified based upon a suspension, revocation, or other disciplinary action taken against the applicant by a licensing authority in this or another jurisdiction. For purposes of this subrule, a "disciplinary action" includes the voluntary surrender of a license to resolve a pending disciplinary investigation or proceeding.

[**ARC 8001C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—430.4(105) Licensure by verification. Licensure by verification is available under the following circumstances.

430.4(1) *Eligibility.* A person may seek licensure by verification if the criteria in Iowa Code section 272C.12(1) are satisfied.

430.4(2) *Board application.* The applicant submits all of the following:

a. A completed application for licensure by verification.

b. Payment of the appropriate fee or fees set forth in 481—Chapter 428.

c. A verification form completed by the transferring jurisdiction and sent directly from the transferring jurisdiction to the board, verifying that the applicant's license, certificate, or registration in that jurisdiction complies with the conditions set forth in Iowa Code section 272C.12.

d. Proof of residency in the state of Iowa or proof of military member's official permanent change of station. Proof of residency may include:

(1) A residential mortgage, lease, or rental agreement;

(2) A utility bill;

(3) A bank statement;

(4) A paycheck or pay stub;
(5) A property tax statement;
(6) A document issued by the federal or state government; or
(7) Any other board-approved document that reliably confirms Iowa residency.

e. Proof of passing the applicable Iowa licensing examination.

f. Documentation of the applicant's complete criminal record in accordance with 481—paragraph 429.5(4)*"c,"* including the applicant's personal statement regarding whether each offense directly relates to the practice of the profession.

g. Copies of any relevant disciplinary documents, if another issuing jurisdiction has taken disciplinary action against the applicant.

430.4(3) *Applicants with prior discipline.* If another issuing jurisdiction has taken disciplinary action against an applicant or if the applicant has a complaint, allegation, or investigation relating to unprofessional conduct pending before any regulating entity in another jurisdiction, the board will proceed according to Iowa Code section 272C.12(1)*"f"* and *"g."* A person whose license was revoked, or a person who voluntarily surrendered a license, in another issuing jurisdiction is ineligible for licensure by verification.

430.4(4) *Temporary licenses.* Applicants who satisfy all conditions for a license by verification under this rule, except for passing the applicable Iowa licensing examination, may be issued a temporary license in accordance with Iowa Code section 272C.12(3)*"c."* If the temporary license expires, the applicant may not practice until the applicant submits proof of passing the applicable Iowa licensing examination.

[**ARC 8001C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—430.5(105) Licensure by work experience in jurisdictions without licensure requirements.

430.5(1) *Work experience.*

a. An applicant for initial licensure who has relocated to Iowa from another jurisdiction that did not require a license to practice the profession may be eligible for an Iowa license if the applicant meets the conditions set forth in Iowa Code section 272C.13 and all other licensing criteria, including passing any necessary examinations. For each application submitted under this rule, the board will determine whether the applicant's prior work experience was substantially similar to the applicable apprenticeship training that is required for individuals licensed under 481—Chapter 429.

b. If the board determines an applicant's prior work experience was not substantially similar to the scope of practice in Iowa, the applicant may submit a subsequent application for licensure by work experience if all of the following criteria are satisfied:

(1) The applicant enrolls in an apprenticeship program approved by the United States Department of Labor;
(2) The applicant obtains a board-issued apprentice license; and
(3) The applicant successfully completes one year in the apprenticeship program.

430.5(2) *Necessary documentation.* An applicant seeking to substitute work experience in lieu of satisfying applicable education or training criteria bears the burden of providing all of the following by submitting relevant documents as part of a completed license application:

a. Proof of Iowa residency, which may include:
(1) A residential mortgage, lease, or rental agreement;
(2) A utility bill;
(3) A bank statement;
(4) A paycheck or pay stub;
(5) A property tax statement;
(6) A document issued by the federal or state government; or
(7) Any other board-approved document that reliably confirms Iowa residency.

b. Proof of three or more years of full-time work experience within the four years preceding the application for Iowa licensure, which demonstrates that the work experience was substantially similar to an applicable apprenticeship program approved by the United States Department of Labor. Proof of work experience may include, but is not limited to:

(1) A letter from the applicant's prior employer or employers documenting the applicant's dates of employment and scope of practice;

(2) A paycheck or pay stub; or

(3) If the applicant was self-employed, business documents filed with the secretary of state or other applicable business registry or regulatory agency in the other jurisdiction.

c. Proof that the applicant's work experience involved a substantially similar scope of practice to the practice in Iowa, which includes:

(1) A written statement by the applicant detailing the scope of practice and stating how the work experience correlates to an applicable apprenticeship program approved by the United States Department of Labor; and

(2) Business or marketing materials detailing the services provided.

d. Proof that the other jurisdiction did not require a license to practice the profession, which may include:

(1) Copies of applicable laws;

(2) Materials from a website operated by a governmental entity in that jurisdiction; or

(3) Materials from a nationally recognized professional association applicable to the profession.

[**ARC 8001C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

These rules are intended to implement Iowa Code sections 105.21 and 272C.12.

CHAPTER 431
PLUMBING AND MECHANICAL SYSTEMS BOARD—LICENSEE PRACTICE
[Prior to 4/2/25, see Public Health Department[641] Ch 23]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—431.1(105) Definitions. The definitions set forth in Iowa Code section 105.2 are incorporated herein by reference. For purposes of these rules, the following additional definitions apply:

"Inactive license" means a license that is available for a plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic professional who is not actively engaged in running a business or working in the business in the corresponding discipline at that license level. An inactive license must be renewed prior to its expiration date. An inactive license is not valid for practice until the license is reactivated by the board.

"Lapsed license" means a license that has expired. A lapsed license is no longer valid for practice.

"Licensee" means a person holding a license issued by the board, including an apprentice, journeyperson, or master license in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronics trades; a combined license; a special, restricted sublicense; or a medical gas certificate.

"Master of record" means an individual possessing an active master license under Iowa Code chapter 105 who shall be responsible for the proper designing, installing, and repairing of plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic systems and who is actively in charge of the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic work of a contractor.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.2(105) Duties of all licensees, specialty licensees, and certificate holders.

431.2(1) While conducting business or performing work covered under Iowa Code chapter 105, each licensee will keep a copy of the licensee's board-issued license on the licensee's person or in an easily retrievable area at the work site.

431.2(2) Each licensee will maintain a residential or business address on record with the board. In the event the licensee's residential or business address changes, the licensee will so notify the board.

431.2(3) Each licensee will apply for and obtain all applicable permits prior to performing any work covered under Iowa Code chapter 105 as may be mandated by any law, ordinance, or regulation of this state, or a political subdivision therein.

431.2(4) A licensee will present upon request a copy of the licensee's board-issued license issued under Iowa Code section 105.12(2).

431.2(5) A licensee possessing a lapsed license cannot operate as a contractor or work in the plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic disciplines or work as a medical gas system installer or work in a specialty license discipline until the license is reinstated and renewed.

431.2(6) Each licensee will perform all Iowa Code chapter 105-covered work in conformity with the applicable professional code.

431.2(7) A licensee will not perform any Iowa Code chapter 105-covered work for which the licensee does not possess the requisite license.

431.2(8) A licensee will conform to the minimum standard of acceptable and prevailing practice and will exercise the degree of workmanlike care that is ordinarily exercised by the average licensee in the applicable trade acting in the same or similar circumstances.

431.2(9) A licensee who utilizes the services of an unlicensed person as a helper will be responsible for the work performed by the helper and shall ensure that such work conforms to the minimum standard of acceptable and prevailing practice.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.3(105) Contractor license. A contractor licensed under Iowa Code chapter 105 will adhere to the following, the violation of which may give rise to disciplinary action:

431.3(1) *Master license.* A contractor will not engage in the business of designing, installing, or repairing plumbing, mechanical, HVAC-refrigeration, or hydronic systems unless at all times the contractor holds or employs at least one person holding an active master license issued by the board for each

discipline in which the contractor conducts business. Without prior board approval, a contractor will not knowingly utilize a master licensee to meet this requirement if the master licensee is simultaneously associated with another contractor in that discipline.

a. Notwithstanding subrule 431.3(1), in the event a licensed master of record's employment with the contractor is terminated, or the master of record otherwise discontinues the master of record's relationship with the contractor, or the master of record's master license is lapsed, suspended, revoked, expired, or otherwise invalidated, the contractor may continue to provide plumbing, mechanical, HVAC-refrigeration, or hydronic systems services for a period of up to six months without identifying a new master of record.

b. To utilize the six-month grace period set forth in paragraph 431.3(1)*"a,"* a contractor will notify the board of the contractor's loss of the master of record within 30 days from the date the master of record is no longer associated with the contractor, absent exigent circumstances.

431.3(2) *Display of license.* A person holding a contractor license will keep the current license certificate publicly displayed in the primary place in which the person practices.

431.3(3) *Surety bond.* A person or entity holding a contractor license must maintain during the licensing period a surety bond issued by an entity licensed to do business in Iowa in a minimum amount of $5,000. If a person operates the contractor business as a sole proprietorship, the person must personally obtain and maintain the surety bond. If a person operates the contractor business as an employee or owner of a legal entity, the legal entity must obtain and maintain the surety bond, and the surety bond must cover all plumbing or mechanical work performed by the legal entity. The surety bond mandated under this subrule must contain a provision that requires the issuing entity to provide the board ten days' written notice before the surety bond can be canceled.

431.3(4) *Public liability insurance.* A person or entity holding a contractor license must maintain during the licensing period public liability insurance issued by an entity licensed to do business in Iowa in a minimum amount of $500,000. If a person operates the contractor business as a sole proprietorship, the person must personally obtain and maintain the public liability insurance. If a person operates the contractor business as an employee or owner of a legal entity, the legal entity must obtain and maintain the public liability insurance, and the public liability insurance must cover all plumbing and mechanical work performed by the legal entity. The public liability insurance mandated under this subrule must contain a provision that requires the issuing entity to provide the board ten days' written notice before the public liability insurance can be canceled.

431.3(5) *Contractor registration with the department.* A contractor will maintain registration as a contractor with the director pursuant to Iowa Code chapter 91C by providing the board with the necessary information.

431.3(6) *Permanent place of business.* A contractor will maintain a permanent place of business, the address of which will be provided to the board. If a contractor changes the permanent place of business, the contractor will provide the board the new address within 30 days of the change.

431.3(7) *Licensure.* A contractor will not knowingly allow an employee to perform work covered under Iowa Code chapter 105 without the applicable license.

431.3(8) *Supervision.* A contractor will not knowingly allow an apprentice employed by the contractor to perform work covered under Iowa Code chapter 105 without supervision of the apprentice by a master or journeyperson who is also employed by the contractor and who is licensed in the discipline in which the apprentice is performing such work.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.4(105) Master license. A master licensed under Iowa Code chapter 105 will adhere to the following, the violation of which may give rise to disciplinary action:

431.4(1) *Contractor relationship.* A master may only be a master of record for one contractor in any particular discipline at any one time, except that a contractor or a master may seek prior board approval to serve as the master of record for more than one contractor in a particular discipline. An individual who possesses master licenses in multiple disciplines may be a master of record for multiple contractors so long as the individual is only a master of record for one contractor in any particular discipline at one time.

431.4(2) *Contractor.* A master will not knowingly perform work covered under Iowa Code chapter 105 for an unlicensed contractor.

431.4(3) *Supervision.* A master who superintends the design, installation, or repair of plumbing, mechanical, HVAC-refrigeration, or hydronic systems will be available to supervise journeypersons or apprentices as needed and may only provide such supervision in the discipline or disciplines in which the master is licensed. A master will not knowingly supervise unlicensed persons who perform work covered under Iowa Code chapter 105 for which a board-issued license is required.

431.4(4) *Master of record.* A master who serves as a master of record for a contractor and who disassociates from the contractor will notify the board and the contractor of the disassociation, if notice was not previously provided, within 30 days from the date of disassociation, absent exigent circumstances.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.5(105) Journeyperson license. A journeyperson licensed under Iowa Code chapter 105 will adhere to the following, the violation of which may give rise to disciplinary action:

431.5(1) *Working under supervision.* A journeyperson will work under the supervision of a master licensed in the discipline of the work being performed in the design, installation, and repair of plumbing, mechanical, HVAC-refrigeration, or hydronic systems.

431.5(2) *Contractor.* A journeyperson will not knowingly perform work covered under Iowa Code chapter 105 for an unlicensed contractor.

431.5(3) *Supervision.* A journeyperson who superintends one or more apprentices may only provide such supervision in the discipline(s) in which the journeyperson is licensed and only while performing work for the same contractor licensed under Iowa Code chapter 105. A journeyperson shall not knowingly supervise unlicensed persons who perform work covered under Iowa Code chapter 105 for which a board-issued license is required.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.6(105) Apprentice license. An apprentice licensed under Iowa Code chapter 105 will adhere to the following mandates, the violation of which may give rise to disciplinary action:

431.6(1) *Working under supervision.* An apprentice may only perform work covered under Iowa Code chapter 105 under the supervision of a master or journeyperson.

431.6(2) *Contractor.* An apprentice will not knowingly perform work covered under Iowa Code chapter 105 for an unlicensed contractor.

431.6(3) *Dual licensure as an apprentice barred.* A licensee cannot simultaneously possess both an active apprentice license and an active specialty license.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.7(105) Specialty licenses and certifications.

431.7(1) *Medical gas certification.*

a. A person who possesses a medical gas certification and who performs medical gas brazing will maintain the person's brazing continuity.

b. A person who possesses a medical gas certification will maintain the person's valid certification issued from the National Inspection Testing Certification Corporation (NITC) or an equivalent authority approved by the board.

431.7(2) *Hearth systems specialty license.*

a. A person who possesses a hearth systems specialty license will maintain the person's valid certification issued from the National Fireplace Institute or equivalent authority approved by the board.

b. A hearth systems specialty license allows a licensee to perform work in the installation of gas burning and solid fuel appliances that offer a decorative view of the flames, from the connector pipe to the shutoff valve located within three feet of the appliance. A hearth systems specialty license further allows for work in the venting systems associated with a hearth appliance, log lighters, gas log sets, fireplace inserts, and freestanding stoves. A hearth systems specialty license does not allow a licensee to install a shutoff valve or perform any other mechanical or HVAC-refrigeration work.

c. A person possessing a hearth systems specialty license will not perform Iowa Code chapter 105-covered work beyond the limited scope of the person's specialty license, and will not perform work

within the limited scope of the person's specialty license unless the person can conform to the minimum standard of acceptable and prevailing practice of a licensee performing such work.

431.7(3) *Service technician HVAC specialty license.*

a. A licensee who holds a service technician HVAC specialty license by demonstrating the licensee possesses a valid certification from North American Technician Excellence, Inc. or an equivalent authority approved by the board will maintain valid certification from North American Technician Excellence, Inc. or an equivalent authority approved by the board.

b. A service technician HVAC specialty license allows a licensee to perform work from the appliance shutoff valve to the appliance and any part and component of the appliance, including the disconnection and reconnection of the existing appliance to the gas piping and the installation of a shutoff valve no more than three feet from the appliance. A service technician HVAC specialty license does not allow a licensee to perform any other mechanical or HVAC-refrigeration work.

c. A person possessing a service technician HVAC specialty license will not perform Iowa Code chapter 105-covered work beyond the limited scope of the person's specialty license, and will not perform work within the limited scope of the person's specialty license unless the person can conform to the minimum standard of acceptable and prevailing practice of a licensee performing such work.

431.7(4) *Disconnect/reconnect plumbing technician specialty license.*

a. A disconnect/reconnect plumbing technician specialty license allows a licensee to perform work from the appliance shutoff valve or the fixture shutoff valve to the appliance or fixture and any part or component of the appliance or fixture, including the disconnection and reconnection of the existing appliance or fixture to the water or sewer piping and the installation of a shutoff valve no more than three feet from the appliance or fixture. A disconnect/reconnect plumbing technician specialty license does not allow a licensee to perform any other plumbing work.

b. A person possessing a disconnect/reconnect plumbing technician specialty license will not perform Iowa Code chapter 105-covered work beyond the limited scope of the person's specialty license, and will not perform work within the limited scope of the person's specialty license unless the person can conform to the minimum standard of acceptable and prevailing practice of a licensee performing such work.

431.7(5) *Private school or college routine maintenance specialty license.*

a. A private school or college routine maintenance specialty license allows a licensee to perform routine maintenance within the scope of the licensee's employment with a private school or college. For purposes of this subrule, "routine maintenance" means the maintenance, repair, or replacement of existing fixtures or parts of plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic systems in which no changes in original design are made. Fixtures or parts do not include smoke and fire dampers or water, gas, or steam piping permanent repairs except for traps and strainers. Routine maintenance includes emergency repairs. Routine maintenance does not include the replacement of furnaces, boilers, cooling appliances, or water heaters more than 100 gallons in size.

b. A person possessing a private school or college routine maintenance specialty license will not perform Iowa Code chapter 105-covered work beyond the limited scope of the person's specialty license, and will not perform work within the limited scope of the person's specialty license unless the person can conform to the minimum standard of acceptable and prevailing practice of a licensee performing such work.

431.7(6) *Dual licensure as an apprentice prohibited.* A licensee cannot simultaneously possess both an active apprentice license and an active specialty license.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—431.8(105) Inactive license.

431.8(1) A person possessing an inactive license under 481—subrule 429.2(6) will not perform any plumbing, mechanical, HVAC-refrigeration, sheet metal, or hydronic work for which licensure is mandated so long as the person's license is held in inactive status.

431.8(2) A person possessing an active journeyperson/inactive master license under 481—subrule 429.2(5) will not perform any plumbing, mechanical, HVAC-refrigeration, or hydronic work for which a master license is mandated so long as the person's master license is held in inactive status.

431.8(3) Inactive specialty license.

a. A person possessing an active specialty license under rule 481—431.7(105) will submit a written request to place the specialty license on inactive status in order to obtain an active apprentice license. The licensee will acknowledge that the licensee is unable to perform any work covered under Iowa Code chapter 105 outside of the apprenticeship program.

b. Notwithstanding 481—subrule 428.1(3), a person possessing both an inactive specialty license and an active apprentice license need not pay a renewal fee for the inactive specialty license so long as the person remains actively licensed as an apprentice.

c. Notwithstanding 481—subrule 432.2(2), a person possessing an inactive specialty license and an active apprentice license need not obtain any continuing education hours for renewal so long as the person remains actively licensed as an apprentice.

d. A person possessing both an inactive specialty license and an active apprentice license may surrender the apprentice license and reactivate the specialty license upon written request and payment of the fee for an active specialty license in the amount specified in 481—Chapter 428.

[**ARC 7992C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

These rules are intended to implement Iowa Code chapter 105.

CHAPTER 432
CONTINUING EDUCATION FOR PLUMBING AND MECHANICAL SYSTEMS PROFESSIONALS
[Prior to 4/2/25, see Public Health Department[641] Ch 30]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—432.1(105) Definitions. The definitions set forth in Iowa Code section 105.2 are incorporated herein by reference. For the purpose of these rules, the following definitions apply:

"Approved program/activity" means a continuing education program/activity meeting the standards set forth in these rules.

"Compliance review" means the selection by the board of licensees for verification of satisfactory completion of continuing education requirements during a specified continuing education compliance period.

"Continuing education" means planned, organized learning acts acquired during licensure designed to maintain, improve, or expand a licensee's knowledge and skills relevant to the enhancement of practice, education, or theory development to improve the safety and welfare of the public.

"Continuing education compliance period" means the period between renewals during which a licensee must obtain the requisite amount of continuing education in order to renew the licensee's license.

"Hour of continuing education" means at least 50 minutes spent in one sitting by a licensee in actual attendance at and in completion of an approved continuing education activity.

"Iowa mechanical code" means the most current version of the International Mechanical Code, as adopted and amended by the board.

"Iowa plumbing code" means the most current version of the Uniform Plumbing Code, as adopted and amended by the board.

"License" means a license to practice pursuant to Iowa Code chapter 105.

"Licensee" means any person licensed to work in a specific discipline covered under Iowa Code chapter 105.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.2(105) Continuing education requirements.

432.2(1) The continuing education compliance period begins on the license issue date and ends on the license expiration date.

432.2(2) During each continuing education compliance period, each active or inactive master and journeyperson licensee shall obtain the following continuing education:

a. Safety education. Two hours of continuing education in the content area of the Iowa occupational safety and health Act if holding a single license and four hours if holding multiple licenses.

b. Code education.

(1) Two hours of continuing education in the content area of the Iowa mechanical code if holding one or more licenses or sublicenses in a mechanical discipline.

(2) Two hours of continuing education in the content area of the Iowa plumbing code if holding a plumbing license or sublicense.

c. Discipline education.

(1) Four hours of continuing education in the discipline in which the licensee holds a license if the licensee holds a single plumbing license or sublicense, or a single license or sublicense in a mechanical discipline.

(2) Eight hours of continuing education in the relevant disciplines if holding multiple licenses or sublicenses.

d. Private school or college maintenance specialty license. For the purposes of this subrule, a private school or college routine maintenance specialty license is considered to be a sublicense of whatever discipline(s) in which the licensee actually practices.

e. An individual possessing one or more inactive special restricted licenses under 481—subrule 431.8(3) does not have to complete any continuing education hours for the special restricted license so long as the person remains actively licensed as an apprentice.

432.2(3) For up to one-half of board-approved continuing education mandated by subrule 432.2(2), each continuing education compliance period may be obtained through completion of computer-based, including online, continuing education programs/activities approved by the board.

432.2(4) It is each licensee's responsibility to maintain a record of all continuing education courses attended and retain proof of compliance with the continuing education requirements. Licensees may attend a continuing education course more than once during a continuing education compliance period. However, licensees who attend a course more than once cannot count the approved hours for that course toward the applicable continuing education requirement more than once during the continuing education compliance period.

432.2(5) It is the responsibility of each licensee to finance the cost of continuing education.

432.2(6) A licensee who is a presenter of a board-approved continuing education program may receive credit once per continuing education compliance period for the presentation of the program. The licensee may receive the same number of hours granted the attendees.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.3(105) Continuing education programs/activities.

432.3(1) *Standards for continuing education programs/activities.* A program/activity is appropriate for continuing education credit if the program/activity meets all of the following criteria:

a. Is board-approved;

b. Constitutes an organized program of learning that contributes directly to the professional competency of the licensee;

c. Pertains to subject matters that integrally relate to the practice of the discipline;

d. Is conducted by individuals who have obtained board approval as set forth in subrule 432.4(1). This criterion is not needed for computer-based continuing education programs/activities conducted pursuant to subrule 432.2(3);

e. Fulfills stated program goals, objectives, or both; and

f. Covers product knowledge, methods, and systems of one or more of the following:

(1) The theory and technique for a specific discipline;

(2) The current Iowa plumbing code, Iowa mechanical code, or both;

(3) The standards comprising the current Iowa occupational safety and health Act.

432.3(2) *Board approval.* Board approval for specific programs/activities under paragraph 432.3(1) *"a"* will be valid for three years.

432.3(3) *Procedure and standards for board approval of continuing education programs/activities.*

a. For non-computer-based continuing education programs/activities, an individual or entity seeking board approval shall:

(1) File an application in the form prescribed by the board without alteration at least 60 days prior to the first scheduled course date;

(2) Attach a copy of the course or activity outline or syllabus that, at a minimum, specifically identifies the course content and a breakdown of the student contact hours; and

(3) Attach a schedule of courses, if known, indicating the course's or activity's proposed scheduled locations, dates, and times.

b. For computer-based continuing education programs/activities, an individual or entity seeking board approval shall:

(1) File an application in the form prescribed by the board without alteration;

(2) Attach a copy of the course or activity outline or syllabus that, at a minimum, specifically identifies the course content and a breakdown of the student contact hours;

(3) Attach a schedule of courses, if known, indicating the course's or activity's proposed scheduled locations, dates, and times;

(4) Provide a brief summary of the training product;

(5) Provide a copy of the visual aids, or other materials included with the course or activity; and

(6) Provide the names, contact information, and qualifications or résumés of the training designers.

432.3(4) *Board member attendance.* With board approval, board members may attend any board-approved continuing education program/activity for purposes of determining whether the continuing education program/activity complies with these rules. In the event a board member attends a board-approved continuing education program/activity with the purpose of determining whether the continuing education program/activity complies with these rules, the board member cannot receive any continuing education credit for those hours in attendance.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.4(105) Course instructor(s).

432.4(1) *Procedure and standards for board approval of instructors.* An individual seeking board approval to instruct continuing education programs/activities will:

a. File an application in the form prescribed by the board without alteration;

b. Attach copies of documents, licenses, degrees, and other materials demonstrating compliance with the requirements for the type of continuing education program/activity as set forth below.

(1) If seeking approval to instruct in the content area of the Iowa occupational safety and health Act, an individual must either possess and maintain a current Iowa occupational safety and health Act 500, 501, 502, or 503 card or completion certificate, or both, or possess a current train-the-trainer or instructor card or other certification or safety-related degree or diploma issued by the American Heart Association, American Red Cross, Health and Safety Institute, National Safety Council, Board of Certified Safety Professionals, or board-approved equivalent.

(2) If seeking approval to instruct in the content area of the Iowa plumbing code or Iowa mechanical code, or both, an individual must:

1. Possess a current license issued by the board at the journey or master level in the applicable discipline under that code,
2. Possess a current license as a professional engineer under Iowa Code chapter 542B,
3. Present evidence of having taught at least eight contact hours in the applicable code within the last three years,
4. Possess a current inspector or plans examiner certificate issued by a code body in the discipline, or
5. Demonstrate equivalent specialized education or training.

(3) If seeking approval to instruct in the content area of a practice discipline, an individual must:

1. Possess a current license issued by the board at the journey or master level in the applicable discipline,
2. Possess a current license as a professional engineer under Iowa Code chapter 542B,
3. Provide evidence of employment as a product representative with manufacturer training,
4. Present evidence of having taught at least eight contact hours in the applicable discipline within the last year, or
5. Demonstrate equivalent specialized education or training.

432.4(2) *Board approval.* Board approval for an instructor under subrule 432.4(1) will be valid for three years.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.5(105) Compliance review of continuing education requirements. The board may conduct a review of a licensee's license renewal application to determine compliance with continuing education requirements.

432.5(1) Upon board request, the licensee must submit to the board an individual certificate of completion issued to the licensee or evidence of successful completion of the course from the course sponsor or course instructor containing the course title, date(s), contact hours, sponsor's name, and licensee's name. In some instances, licensees will be requested to provide to the board additional information including, but not limited to, program content, objectives, presenters, location, and schedule. An inclusive brochure may be acceptable.

432.5(2) A licensee must submit all information set forth in subrule 432.5(1) within 30 calendar days following the board's request. The board may grant extensions on an individual basis.

432.5(3) If the submitted materials are incomplete or unsatisfactory and the board determines that the deficiency was the result of good faith conduct on the part of the licensee, the licensee may be given the opportunity to submit make-up credit to cover the deficit found through the audit. A licensee must complete the continuing education hours and submit documentation establishing completion of the required make-up continuing education hours to the board within 120 calendar days from the date of the board's finding of good-faith conduct.

432.5(4) A licensee's failure to provide the board with an accurate mailing address is not an excuse for noncompliance with this rule.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.6(105) Continuing education exemptions.

432.6(1) *Automatic exemptions.* A licensee will be exempt from the continuing education requirement during the continuing education compliance period when that person:

a. Served honorably on active duty in the military service;

b. Resided in another state or district having continuing education requirements for the discipline and met all mandates of that state or district for practice therein;

c. Was a government employee working in the licensee's specialty and assigned to duty outside the United States;

d. Was absent from the state but engaged in active practice under circumstances that are approved by the board;

e. Obtained a journeyperson license by examination provided that the licensee maintains the same renewal date as the licensee's apprentice license. This automatic exemption only applies to the licensee's first renewal of the journeyperson license;

f. Obtained a specialty, journeyperson, or master license with less than one year remaining in the continuing education compliance period. This exemption applies only to the licensee's first renewal of that license and only to each license that was issued with less than one year remaining in the continuing education compliance period; or

g. Possesses an inactive specialty license under 481—subrule 431.8(3) and is also actively licensed as an apprentice.

432.6(2) *Permissive exemptions.* The board may, in cases involving exceptional hardship or extenuating circumstances, grant an exemption from some or all of the continuing education requirements.

a. A licensee seeking a permissive exemption will apply to the board, in such form as the board may prescribe.

b. A licensee seeking a permissive exemption will provide all such documentary evidence as the board may request to establish the exceptional hardship or extenuating circumstances.

c. In the event a licensee claims a physical or mental disability or illness, the board may request information from a licensed health care professional who can attest to the existence of any such disability or illness.

d. A licensee who applies for a permissive exemption will be notified in writing of the board's decision.

e. In granting an exemption, the board may impose any such additional conditions on the exemption including but not limited to the requirement that the licensee make up a portion of the continuing education requirements.

f. In lieu of granting a full or partial exemption, the board may grant the licensee an extension of time in which to complete the continuing education requirements.

g. The granting of an exemption will not keep a licensee from seeking, or the board from granting, an exemption in a subsequent biennial continuing education compliance period(s).

h. Permissive exemptions will only be granted in the most exceptional and extraordinary of circumstances.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.7(105) Continuing education extensions. The board may, in individual cases involving hardship or extenuating circumstances, grant an extension of time within which to fulfill the minimum

continuing education requirements if the request for extension is made prior to the license expiration date. Hardship or extenuating circumstances include documented circumstances beyond the control of the licensee that prevent attendance at necessary activities.

[**ARC 7996C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—432.8(105) Continuing education reporting requirements.

432.8(1) *Non-computer-based continuing education programs/activities.* For non-computer-based continuing education programs/activities, at the conclusion of each continuing education course, the course instructor will:

a. Inform each attending licensee that a survey of the course and instructor may be completed and submitted by the licensee to the board through either a board-approved written or online evaluation form.

b. Provide a certificate of completion to each licensee who attends the course. The certificate of completion will include the following information:

(1) The licensee's full name and board-issued license number;
(2) The course name or title;
(3) The board-approved course identification number;
(4) The date of the course;
(5) The number of program contact hours;
(6) The instructor's full name and board-approved identification number; and
(7) The instructor's signature.

c. Submit to the board a typed or electronic course completion roster within 30 days following the completion of the course. The course completion roster will contain the following information:

(1) The full name and board-issued license number of each attending licensee;
(2) The course name or title;
(3) The board-approved course identification number;
(4) The date of the course;
(5) The location of the course;
(6) The number of program contact hours;
(7) The instructor's full name and board-approved identification number; and
(8) The instructor's signature.

432.8(2) *Computer-based continuing education programs/activities.* For computer-based continuing education programs/activities under subrule 432.2(3), at the conclusion of each computer-based continuing education course, the person authorized to monitor and verify attendance/course completion will:

a. Provide a certificate of completion to each licensee who completes the course. The certificate of completion will include the following information:

(1) The licensee's full name and board-issued license number;
(2) The course name or title;
(3) The board-approved course identification number;
(4) The date the course was completed; and
(5) The number of program contact hours.

b. Submit to the board a typed or electronic course completion roster within 30 days following a licensee's completion of a computer-based continuing education course. The course completion roster will contain the following information:

(1) The full name and board-issued license number of each attending licensee;
(2) The course name or title;
(3) The board-approved course identification number;
(4) The date of the course;
(5) The location of the course; and
(6) The number of program contact hours.

CHAPTER 433
PLUMBING AND MECHANICAL SYSTEMS BOARD—COMPLAINTS AND INVESTIGATIONS

[Prior to 4/2/25, see Public Health Department[641] Ch 34]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—433.1(272C) Complaints.

433.1(1) Complaints can be submitted online, in writing, or verbally and should include the name and contact information of the complainant, the name of the licensee, and a concise statement of the allegations against the licensee. A complaint may also be initiated by the board.

433.1(2) A person is not civilly liable for filing a complaint in good faith with the board, or for cooperating with a board investigation per Iowa Code section 272C.8.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—433.2(272C) Report of malpractice claims or actions or disciplinary actions. The licensee will submit any judgment or settlement in a malpractice claim or any disciplinary action taken by another licensing authority in another state or jurisdiction to the board within 30 days of the date of occurrence.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—433.3(272C) Report of acts or omissions. A licensee having knowledge of rules violations committed by another licensee will file a report to the board. The report will include the name and contact information of the licensee and the date, time, and place of the incident.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—433.4(272C) Investigation of complaints or reports. Board staff may request additional information, solicit a response from the licensee, subpoena records, conduct interviews, gather evidence, and perform other investigatory duties as necessary to inform the board.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—433.5(17A,272C) Issuance of investigatory subpoenas.

433.5(1) The board executive officer or designee may, upon the written request of a board investigator or on the executive officer's own initiative, subpoena books, papers, records, and other real evidence that are necessary for the board to decide whether to initiate a contested case proceeding. In the case of a subpoena for mental health records, each of the following conditions shall be satisfied prior to the issuance of the subpoena:

a. The nature of the complaint reasonably justifies the issuance of a subpoena;

b. Adequate safeguards have been established to prevent unauthorized disclosure;

c. An express statutory mandate, articulated public policy, or other recognizable public interest favors access; and

d. An attempt was made to notify the patient and to secure an authorization from the patient for release of the records at issue.

433.5(2) Each subpoena will contain:

a. The name and address of the person to whom the subpoena is directed;

b. A description of the books, papers, records or other real evidence requested;

c. The date, time and location for production or inspection and copying;

d. The deadline for filing a motion to quash or modify the subpoena;

e. The signature, address and telephone number of the board executive officer or designee;

f. The date of issuance;

g. A return of service.

433.5(3) A person can challenge the subpoena by filing a motion to quash describing the legal justification for the motion within 14 days after service of the subpoena, or before the time specified for compliance if such time is less than 14 days.

433.5(4) Upon receipt of a timely motion to quash or modify a subpoena, an administrative law judge will issue a decision. The administrative law judge may quash or modify the subpoena, deny the motion, or issue an appropriate protective order.

433.5(5) A person who is aggrieved by a ruling of an administrative law judge and who desires to challenge that ruling must appeal the ruling to the board by serving the board executive officer, either in person, by email, or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge.

433.5(6) If the person contesting the subpoena is not the person under investigation, the board's decision is final for purposes of judicial review. If the person contesting the subpoena is the person under investigation, the board's decision is not final for purposes of judicial review until either (1) the person is notified the investigation has been concluded with no formal action, or (2) there is a final decision in the contested case.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—433.6(272C) Peer review.

433.6(1) A complaint may be assigned to a peer reviewer for review and report to the board.

433.6(2) The board determines what complaints or other matters are referred to a peer reviewer.

433.6(3) Peer reviewers are not liable for acts, omissions, or decisions made in connection with service made in good faith.

433.6(4) The peer reviewer shall maintain confidentiality pursuant to Iowa Code section 272C.6.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—433.7(17A) Appearance. The board may request that a licensee appear before a committee of the board to discuss a pending investigation. By electing to participate in the committee appearance, the licensee waives any objection to a board member both participating in the appearance and later participating as a decision maker in a contested case proceeding. By electing to participate in the committee appearance, the licensee further waives any objection to the board executive officer assisting the board in the contested case proceeding.

[**ARC 8000C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

These rules are intended to implement Iowa Code chapters 17A, 105, and 272C.

[Filed Emergency After Notice ARC 8532B (Notice ARC 8364B, IAB 12/2/09), IAB 2/24/10, effective 1/26/10]

[Filed ARC 8000C (Notice ARC 7320C, IAB 1/10/24), IAB 5/15/24, effective 6/19/24]

[Editorial change: IAC Supplement 4/2/25]

CHAPTER 434
PLUMBING AND MECHANICAL SYSTEMS BOARD—LICENSEE DISCIPLINE
[Prior to 4/2/25, see Public Health Department[641] Ch 32]

Chapter rescission date pursuant to Iowa Code section 17A.7: 6/19/29

481—434.1(105,272C) Definitions. The definitions set forth in Iowa Code section 105.2 are incorporated herein by reference. For purposes of this chapter, the following definitions also apply:

"Conviction" means the same as defined in 481—Chapter 429.

"Directly relates" or *"directly related"* means the same as Iowa Code section 272C.1(8)*"a"* and *"b."*

"Discipline" means any sanction the board may impose upon licensees.

"Disqualifying conviction" or *"disqualifying offense"* means the same as in 481—Chapter 429.

"Lapsed license" means a license that has expired. A lapsed license is no longer valid for practice.

"Licensee" means any person licensed to practice pursuant to Iowa Code chapter 105.

[**ARC 7998C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—434.2(105,272C) Grounds for discipline. The board may impose any of the disciplinary sanctions provided in rule 481—434.3(105,272C) when the board determines that the licensee is guilty of any of the following acts or offenses:

434.2(1) Fraud in procuring a license. Fraud in procuring a license includes but is not limited to an intentional perversion of the truth in making application for a license to practice in this state, which includes the following:

a. False representations of a material fact, whether by word or by conduct, by false or misleading allegations, or by concealment of that which should have been disclosed when making application for a license in this state, or

b. Attempting to file or filing with the board or the department of inspections, appeals, and licensing any false or forged diploma, certificate, affidavit, identification or qualification in making an application for a license in this state.

434.2(2) Professional incompetence. Professional incompetence includes but is not limited to:

a. A substantial lack of knowledge or ability to discharge professional obligations within the scope of the applicable licensed trade.

b. A substantial deviation from the standards of learning or skill ordinarily possessed and applied by others licensed in the applicable trade in the state of Iowa acting in the same or similar circumstances.

c. A failure to exercise the degree of care that is ordinarily exercised by the average licensee in the applicable trade acting in the same or similar circumstances.

d. Failure to conform to the minimal standard of acceptable and prevailing practice of a licensee in the applicable trade in this state.

e. Inability to practice in the trade with reasonable skill and safety by reason of illness, drunkenness, excessive use of drugs, narcotics, chemicals, or other type of material or as a result of a mental or physical condition.

f. Being adjudged mentally incompetent by a court of competent jurisdiction.

434.2(3) Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

434.2(4) Habitual intoxication or addiction to the use of drugs.

434.2(5) Conviction of a disqualifying offense in the courts of this state or another state, territory, or country. A file-stamped copy of the final order or judgment or conviction or plea of guilty in this state or another state, territory, or country constitutes conclusive evidence of the conviction.

434.2(6) Fraud in representations as to skill or ability.

434.2(7) Use of untruthful or improbable statements in advertisements.

434.2(8) Willful or repeated violations of Iowa Code chapter 105 or 272C.

434.2(9) Violation of a board rule.

434.2(10) Nonpayment of a state debt as evidenced by a certificate of noncompliance issued pursuant to Iowa Code chapter 272D and 481—Chapter 8.

434.2(11) Permitting another person to use the licensee's wall certificate, wallet card, or license number for any purpose.

434.2(12) Failure to timely submit the requested materials in response to a compliance review conducted pursuant to rule 481—432.5(105).

434.2(13) Failure to meet the continuing education requirements for licensure.

434.2(14) Submission of a false report of continuing education.

434.2(15) Failure to pay any outstanding fees or costs owed to the board.

434.2(16) Acceptance of any fee by fraud or misrepresentation.

434.2(17) Negligence by the licensee in the practice of the trade. Negligence by the licensee in the practice of the trade includes a failure to exercise due care, including negligent delegation of duties or supervision of employees or other individuals, whether or not injury results; or any conduct, practice, or conditions that impair the ability to safely and skillfully practice the trade.

434.2(18) Violation of a law, ordinance, or regulation of this state, or a political subdivision therein, another state, or the United States, which relates to the practice of the profession.

434.2(19) Revocation, suspension, or other disciplinary action taken by a licensing authority of this state, another state, territory, or country; or failure by the licensee to report in writing to the board revocation, suspension, or other disciplinary action taken by a licensing authority within 30 days of the final action. A stay by an appellate court does not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report will be expunged from the records of the board.

434.2(20) Failure of a licensee or an applicant for licensure in this state to report any voluntary agreements restricting the practice in the trade in another state, district, territory, or country.

434.2(21) Failure to notify the board of a criminal conviction within 30 days of the action, regardless of the jurisdiction where it occurred.

434.2(22) Failure to notify the board within 30 days after the occurrence of any judgment entered on or settlement of a claim or action related to the profession.

434.2(23) Engaging in any conduct that subverts or attempts to subvert a board investigation.

434.2(24) Failure to comply with a subpoena issued by the board or otherwise fail to cooperate with an investigation of the board.

434.2(25) Failure to comply with the terms of a board order or the terms of a settlement agreement or consent order.

434.2(26) Failure to report another licensee to the board for any violations listed in these rules, pursuant to Iowa Code section 272C.9.

434.2(27) Knowingly aiding, assisting, procuring, or advising a person to unlawfully practice a trade included in Iowa Code chapter 105.

434.2(28) Failure to report a change in name or address within 30 days after it occurs.

434.2(29) Representing oneself as a licensed tradesperson when one's license has been suspended or revoked or when the license is on inactive status.

434.2(30) Permitting another person to use the licensee's license for any purpose.

434.2(31) Permitting an unlicensed employee or person under the licensee's control to perform activities necessitating a license.

434.2(32) Failure to apply and obtain a permit prior to performing work, if mandated by the state or a political subdivision therein.

434.2(33) Failure to pay all inspection fees, if required by the state or a political subdivision therein.

434.2(34) Failure to pay a permit fee, if required by the state or a political subdivision therein.

434.2(35) Practice outside the scope of the license, which includes but is not limited to:

a. Practicing as a journeyperson without the supervision of a master.

b. Practicing in a trade for which the licensee does not hold a board-issued license.

c. Contracting for plumbing or mechanical work in the state of Iowa without a board-issued contractor license.

434.2(36) Practicing on a lapsed license.

434.2(37) Practicing as a contractor without valid bonding or insurance, as mandated by Iowa Code section 105.19.

[**ARC 7998C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—434.3(105,272C) Method of discipline. The board has the authority to impose the following disciplinary sanctions:

1. Revocation of license.
2. Suspension of license until further order of the board or for a specific period.
3. Prohibit permanently, until further order of the board or for a specific period, the licensee's engaging in specified procedures, methods, or acts.
4. Probation.
5. Mandate additional education or training.
6. Mandate a reexamination.
7. Order a physical or mental evaluation, or order alcohol and drug screening within a time specified by the board.
8. Impose civil penalties not to exceed $5,000.
9. Issue a citation and warning.
10. Such other sanctions allowed by law as may be appropriate.

[**ARC 7998C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—434.4(272C) Discretion of board. The following factors may be considered by the board in determining the nature and severity of the disciplinary sanction to be imposed:

1. The relative serious nature of the violation as it relates to ensuring a high standard of professional care to the citizens of this state;
2. The facts of the particular violation;
3. Any extenuating facts or other countervailing considerations;
4. The number of prior violations or complaints;
5. The seriousness of prior violations or complaints;
6. Whether remedial action has been taken; and
7. Such other factors as may reflect upon the competency, ethical standards, and professional conduct of the licensee.

[**ARC 7998C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25]

481—434.5(105) Civil penalties—unlicensed penalties. The board may impose civil penalties by order against a person who is not licensed by the board based on the unlawful practices specified in Iowa Code section 105.27(1). In addition to the procedures set forth in Iowa Code chapters 105 and 272C, this chapter applies.

434.5(1) *Unlawful practices.* Practices by an unlicensed person which are subject to civil penalties include, but are not limited to:

a. Acts or practices by unlicensed persons which necessitate licensure to install or repair plumbing, mechanical, HVAC, refrigeration, sheet metal, or hydronic systems under Iowa Code chapter 105.

b. Acts or practices by unlicensed persons which necessitate certification to install or repair medical gas piping systems under Iowa Code chapter 105.

c. Engaging in the business of designing, installing, or repairing plumbing, mechanical, HVAC, refrigeration, sheet metal, or hydronic systems without employing a licensed master.

d. Providing plumbing, mechanical, HVAC, refrigeration, sheet metal, or hydronic systems services on a contractual basis.

e. Use or attempted use of a licensee's certificate or wallet card or use or attempted use of an expired, suspended, revoked, or nonexistent certificate.

f. Falsely impersonating a person licensed under Iowa Code chapter 105.

g. Providing false or forged evidence of any kind to the board in obtaining or attempting to obtain a license.

h. Other violations of Iowa Code chapter 105.

i. Knowingly aiding or abetting an unlicensed person or establishment in any activity identified in this rule.

434.5(2) *Investigations.* The board is authorized by Iowa Code section 17A.13(1) and chapters 105 and 272C to conduct such investigations as are needed to determine whether grounds exist to impose civil penalties against a nonlicensee. Complaint and investigatory files concerning nonlicensees are not confidential except as may be provided in Iowa Code chapter 22.

434.5(3) *Subpoenas.* Pursuant to Iowa Code section 17A.13(1) and chapter 105, the board is authorized in connection with an investigation of an unlicensed person to issue subpoenas to compel persons to testify and to compel persons to produce books, papers, records and any other real evidence, whether or not privileged or confidential under law, which the board deems necessary as evidence in connection with the civil penalty proceeding or relevant to the decision of whether to initiate a civil penalty proceeding. Board procedures concerning investigative subpoenas are set forth in rule 481—503.5(17A,272C).

434.5(4) *Notice of intent to impose civil penalties.* Notice of the board's intent to order compliance with Iowa Code chapter 105 and impose a civil penalty will be served upon the nonlicensee by restricted certified mail, return receipt requested, or by personal service in accordance with Iowa Rule of Civil Procedure 1.305. Alternatively, the nonlicensee may accept service personally or through authorized counsel. The notice will include the following:

a. A statement of the legal authority and jurisdiction under which the proposed civil penalty would be imposed.

b. Reference to the particular sections of the statutes and rules involved.

c. A short, plain statement of the alleged unlawful practices.

d. The dollar amount of the proposed civil penalty and the nature of the intended order.

e. Notice of the nonlicensee's right to a hearing and the time frame in which the hearing must be requested.

f. The address to which written request for hearing must be made.

434.5(5) *Requests for hearings.*

a. Nonlicensees must request a hearing within 30 days of the date the notice is received if served through restricted certified mail, or within 30 days of the date of service if service is accepted or made in accordance with Iowa Rule of Civil Procedure 1.305. A request for hearing must be in writing and is deemed made on the date of the nonmetered United States Postal Service postmark or the date of personal service.

b. If a request for hearing is not timely made, or if the nonlicensee waives in writing the right to hearing and agrees to pay the penalty, the board chairperson, the chairperson's designee, or the board executive may issue an order imposing the civil penalty and requiring compliance with Iowa Code chapter 105, as described in the notice. The order may be mailed by regular first-class mail or served in the same manner as the notice of intent to impose a civil penalty.

c. If a request for hearing is timely made, the board will issue a notice of hearing and conduct a hearing in the same manner as applicable to disciplinary cases against licensees.

d. Subsequent to the issuance of a notice of hearing under this subrule, the settlement agreement provisions of rule 481—506.35(17A,272C) apply.

e. The notice of intent to issue an order and the order are public records pursuant to Iowa Code chapter 22. Copies may be published. Hearings are open to the public.

434.5(6) *Factors for board consideration.* The board may consider the following when determining the amount of civil penalty to impose, if any:

a. Whether the amount imposed will be a substantial economic deterrent to the violation.

b. The circumstances leading to or resulting in the violation.

c. The severity of the violation and the risk of harm to the public.

d. The economic benefits gained by the violator as a result of noncompliance.

e. The welfare or best interest of the public.

434.5(7) *Enforcement options.* In addition, or as an alternative, to the administrative process described in these rules, the board may seek an injunction in district court, refer the matter for criminal prosecution, or enter into a consent agreement.

434.5(8) *Judicial review.*

a. A person aggrieved by the imposition of a civil penalty under this rule may seek a judicial review in accordance with Iowa Code section 17A.19.

b. The board will notify the attorney general of the failure to pay a civil penalty within 30 days after entry of an order or within 10 days following final judgment in favor of the board if an order has been stayed pending appeal.

c. The attorney general may commence an action to recover the amount of the penalty, including reasonable attorney fees and costs.

d. An action to enforce an order under this rule may be joined with an action for an injunction pursuant to Iowa Code section 105.27(4).

[**ARC 7998C**, IAB 5/15/24, effective 6/19/24; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

481—434.6(105,272C) Collection of delinquent civil penalties and discipline-related debts.

434.6(1) The board may participate in an income setoff program administered by the department of revenue in accordance with Iowa Code section 421.65 and rules promulgated thereunder.

434.6(2) Definitions. For purposes of this rule, the following definitions apply:

"Debtor" means any person who owes a debt to the board as a result of a proceeding in which notice and opportunity to be heard was afforded.

"Income offset program" means the program established in Iowa Code section 421.65 and any rules promulgated thereunder through which the department of revenue coordinates with state agencies to satisfy liabilities owed to those state agencies.

434.6(3) The board office may provide the department of administrative services a liability file containing pertinent information for the identification of the debtor and liability, including if the status of a debt changes due to payment of the debt, invalidation of the liability, alternate payment arrangements with the debtor, bankruptcy, or other factors.

434.6(4) Due diligence.

a. Before submitting debtor information to the outstanding liability file, the board office will make a good faith attempt to collect from the debtor. Such attempt will include at least all of the following:

(1) A telephone call requesting payment.

(2) An initial letter to the debtor's last discernible address requesting payment within 15 days.

(3) A second letter to the debtor's last discernible address requesting payment within ten days.

b. The board office will document due diligence and retain such documentation.

434.6(5) Notification of offset. Within ten calendar days of receiving notification from the department of revenue that the debtor is entitled to a payment subject to the setoff program, the board office will:

a. Send a preoffset notice to the debtor. The preoffset notice will inform the debtor of the amount the department intends to claim, including all of the following information:

(1) The board's right to the payment in question.

(2) The board's right to recover the payment through the setoff procedure.

(3) The basis of the board's case in regard to the debt.

(4) The right of the debtor to request, in accordance with subrule 434.6(6) and within 15 days of the mailing of the preoffset notice, a split of the payment between parties when the payment in question is jointly owned or otherwise owned by two or more persons.

(5) The debtor's right to appeal the offset, in accordance with subrule 434.6(7) and within 15 days of the mailing of the preoffset notice, and the procedure to follow in that appeal.

(6) The board office's contact information in case of questions.

b. Notify the department of revenue that the preoffset notice has been sent to the debtor, and supply a copy of the preoffset notice to the department of revenue.

434.6(6) Request to divide a jointly or commonly owned right to payment.

a. A debtor who receives a preoffset notice may request release of a joint or common owner's share, if the request is received by the board within 15 days of the date the preoffset notice is mailed.

b. In conjunction with such a request, the debtor shall provide to the board the full name and social security number of any joint or common owner.

c. Upon receipt of such a request, the board office will notify the department of revenue of the request.

434.6(7) Appeal process. A debtor who receives a preoffset notice may request an appeal of the underlying debt within 15 days of the date the preoffset notice is mailed. A contested case appeal will be conducted pursuant to 481—Chapter 506. The board will notify the department of revenue within 45 days of the notification of setoff. The board will hold a payment in abeyance until the final disposition of the contested liability or setoff.

434.6(8) Once any setoff has been completed, the board office will notify the debtor of the action taken and what balance, if any, remains owing to the board.

AMUSEMENT RIDE REQUIREMENTS AND INSPECTIONS

CHAPTER 461
AMUSEMENT RIDE INSPECTIONS

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 61]
[Prior to 7/9/25, see Labor Services Division[875] Ch 61]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—461.1(88A) Scope. 481—Chapters 461 through 463 do not apply to the following:

461.1(1) A water park or water park attraction, including but not limited to a water slide, wave action pool, and lazy river. This subrule does not apply to an amusement ride that propels patrons using a power source other than gravity even though water is present.

461.1(2) A live-animal ride.

461.1(3) A vessel inspected pursuant to Iowa Code chapter 462A.

461.1(4) An amusement structure in which the patrons navigate on their own power and the patrons do not ride, climb, or walk on a mechanical component.

461.1(5) A device that meets all of the following criteria:

a. Was designed and built to be operated by a coin, card, or token;

b. Was designed and built to be operated by the patron rather than an attendant;

c. Operates on self-contained wiring that was installed by the manufacturer;

d. Operates on less than 120 volts of electrical power; and

e. Is within or is part of a structure subject to a state or local building code.

461.1(6) Playground equipment owned, maintained, and operated by any political subdivision of this state.

461.1(7) A concession booth, amusement device, or amusement ride that meets all of the following:

a. Is owned and operated by a nonprofit organization or school; and

b. Is located in a building subject to inspection by the state fire marshal or a local government.

461.1(8) Nonmechanized physical fitness and playground equipment unless a fee is charged to use the equipment.

461.1(9) Physical fitness equipment that does not meet the definition of "amusement device."

461.1(10) A tramway used as a ski lift.

461.1(11) A scenic railway operating on standard-gauge rails.

461.1(12) A zip line or climbing wall located at a camp or retreat owned or operated by a nonprofit religious, educational or charitable institution or association.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—461.2(88A) Definitions. The definitions in this rule apply to 481—Chapters 461 through 463.

"Air-supported structure" means an amusement device that employs a high-strength fabric or film that achieves its strength, shape and stability from internal air pressure provided by a mechanical device such as an air blower or fan.

"Amusement device" means a climbing wall utilizing an auto belay system; a bungee jump as defined in 481—Chapter 463; a device allowing a patron to jump on a trampoline while attached to one or more bungee cords; a dry slide; a mechanical bull; a zip line that does not allow the rider to touch the ground at all times; and an air-supported structure.

"ANSI" means the American National Standards Institute.

"ASTM" means the ASTM Standards on Amusement Rides and Devices published by ASTM International.

"Attendant" means a paid or volunteer person who controls patron restraints or the operation, starting, stopping, or speed of covered equipment.

"Carnival" means an enterprise offering amusement or entertainment to the public in, upon, or by means of amusement devices or rides or concession booths.

"Certificate of noncompliance" means:

1. A certificate of noncompliance issued by the child support recovery unit, department of health and human services, pursuant to Iowa Code chapter 252J; or

2. A certificate of noncompliance issued by the centralized collection unit, department of revenue, pursuant to Iowa Code chapter 272D.

"Concession booth" means a structure that is powered by electricity and offers amusements to the public at more than one fair or carnival, or at one fair or carnival for more than seven consecutive days. A structure or enclosure offering only goods, food or beverages, rather than amusements, is not a "concession booth."

"Covered equipment" means an amusement ride, amusement device, concession booth or related electrical equipment that is covered by Iowa Code chapter 88A.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"Fair" means an enterprise principally devoted to the exhibition of products of agriculture or industry in connection with the operation of covered equipment.

"Inspector" means an authorized Iowa Code chapter 88A inspector of the department of inspections, appeals, and licensing.

"Major breakdown" means stoppage of operation from any cause that results in damage, failure, or breakage in a stress-bearing part of covered equipment.

"Major modification" means any change to the structure of or to an operational characteristic, capacity, classification, or mechanism of covered equipment. "Major modification" includes but is not limited to changing the mode of transportation from non-wheeled to a truck or flat-bed mount or changing the mode of assembly or other operational functions from manual to mechanical or hydraulic.

"NFPA" means the National Fire Protection Association.

"Operator" means a person, or the agent of a person, who owns or controls or has the duty to control the operation of covered equipment at a carnival or fair. "Operator" includes an agency of the state or any of its political subdivisions. "Operator" includes a person who leases covered equipment and controls or has the duty to control its operation at a carnival or fair.

"Related electrical equipment" means a portable generator, blower, or other equipment necessary to the operation of an amusement ride, amusement device, or concession booth.

"Reportable incident" means an event described by one or more of the following:

1. Damage, failure or breakage of a stress-bearing part of an amusement ride or amusement device;
2. Cessation of covered equipment for more than 20 minutes with at least one rider aboard;
3. An occurrence that nearly resulted in personal injury; or
4. An occurrence that caused the operator to cease operations unexpectedly to avoid an injury or illness.

"Rope lay" means the length along the rope in which one strand makes a complete revolution around the rope.

"Special operation" means an unusual condition, interruption in operation, injury, emergency, or evacuation.

"Walkway" means a public passage through a carnival, fair, or park.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—461.3(88A) Owner and operator requirements. No person may operate covered equipment at a carnival or fair unless the person holds a current application certificate and the covered equipment has passed an Iowa inspection. The director reserves the right to deny inspection for any application submitted less than 60 days prior to operation at the first event.

461.3(1) *Application certificate.* No later than 60 days before operation begins each calendar year, the operator of covered equipment will apply to the director for an application certificate. Applications may be submitted in November for continuous operations. Applications are made on a form provided by the director. Each of the following are submitted with the completed application certificate:

a. The application fee;

b. A certificate of insurance issued by an insurance company authorized to do business in Iowa. The certificate of insurance will:

(1) Certify a policy in the minimum amount of $1 million for bodily injury, death, or property damage in any one occurrence;

(2) List the specific pieces of equipment that are covered and, if applicable, those that are not covered; and

(3) Include "Department of Inspections, Appeals, and Licensing—Amusements" as a certificate holder;

c. The operator's itinerary identifying the covered equipment to be operated and the dates and locations where each will be operated;

d. Certification of compliance with applicable training and maintenance requirements;

e. Separately for each bungee jump:

(1) A site operating manual;

(2) A report that is prepared and sealed by a professional engineer who is licensed in Iowa and that certifies that the design and construction of the equipment and structure are suitable for the intended use and conform to Iowa law, recognized engineering practices, procedures, standards and specifications;

(3) Site plan drawings depicting the preparation area, the jump space, the landing area, the recovery area and other features to be included in the approved operating site;

(4) Specifications of equipment and structures; and

(5) Depictions of the location, specifications, dimensions, and type of air bag, pool or body of water where the jumper will land.

461.3(2) *Changes to information submitted with application.* The operator will immediately notify the director of any changes to the operator's itinerary or information provided with the application.

461.3(3) *Personal injuries and deaths.*

a. The operator will immediately report by telephone any accident that results in death or medical care beyond first aid.

b. Within 48 hours after an operator is notified of a claim or report to the operator's insurance provider, the operator will submit a duplicate copy of the report or claim to the director.

c. The director may require that the scene of an accident be secured and not disturbed to any greater extent than necessary for removal of the deceased or injured person. If covered equipment is removed from service by the director, the covered equipment may be returned to service only upon the director's authorization.

461.3(4) *Major breakdown report.* The operator will report a major breakdown of covered equipment to the director immediately and provide a detailed report in writing within 48 hours. The director may order the covered equipment to be withheld from operation, and in such case, the director will conduct an immediate investigation. The covered equipment may be released for repair and operation only after the director's investigation is complete.

461.3(5) *Advance notice of major modification.* The operator will notify the director in writing at least ten days prior to a major modification and, if requested by the director, provide plans, diagrams, and ride analysis documentation consistent with ASTM F2291-15.

461.3(6) *Technical data.* If requested by the director, the operator will provide an English language version of the following:

a. Data concerning constant, reversible, or eccentric forces generated by acceleration, deceleration, wind, centrifugal action, or inertia.

b. Stress analysis and other data pertinent to the structural materials, design, structure, factors of safety or performance characteristics.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—461.4(88A) Inspection requirements. Pursuant to Iowa Code chapter 88A, covered equipment must pass an inspection at least annually. Inspections shall be performed according to the rules set forth and standards adopted in 481—Chapters 461 through 463.

461.4(1) *Inspection types.* In addition to the inspections listed below, an inspection may be conducted by the director at any time. No person will operate covered equipment at a fair or carnival unless the covered equipment has passed an inspection in the current calendar year.

a. Annual inspection by owner. At the discretion of the director, the owner of an air-supported structure may be designated by the director to perform the annual inspection of the owner's air-supported structure, blower, and related electrical equipment. An owner designated pursuant to this paragraph will perform the inspection according to applicable standards. The owner will submit in the format required by the director an affidavit attesting to the performance of the inspection, correction of code violations, and other required information. A designation pursuant to this paragraph terminates on December 31 of the year of issuance.

b. Annual inspection by an inspector. Unless an inspection is waived pursuant to Iowa Code section 88A.13, or the inspection is performed by the owner pursuant to paragraph 461.4(1)*"a,"* the director will inspect covered equipment prior to operation.

c. Major modification inspection. After covered equipment has undergone a major modification, the covered equipment must pass an inspection by the director before it is put back into use.

461.4(2) *Safety order.* If the inspector finds a code violation, the inspector will issue a safety order requiring that the condition be corrected. The deadline for correction of the code violation will be set forth in the safety order.

461.4(3) *Cessation order.* If the inspector identifies covered equipment that is hazardous or unsafe, the inspector will issue a cessation order that will be in effect until the director verifies it is corrected.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—461.5(88A) Amusement inspection sticker requirements. Covered equipment shall not be operated without a current sticker.

461.5(1) After covered equipment has passed an annual inspection by the inspector, the inspector will affix an amusement inspection sticker to the equipment where it is readily accessible.

461.5(2) After the director receives satisfactory proof of inspection from an owner designated by the director pursuant to paragraph 461.4(1)*"a,"* the director will issue a certificate of compliance.

461.5(3) After covered equipment passes a major-modification inspection, a new amusement inspection sticker will be issued.

461.5(4) Before covered equipment is sold, the seller will remove the amusement inspection sticker. If a current amusement inspection sticker is no longer legible, the operator may request a replacement sticker.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—461.6(88A,252J,272D) Termination, denial, suspension, or revocation of an operating permit.

461.6(1) All active application certificates terminate automatically on December 31 of the year of issuance.

461.6(2) The director may suspend or revoke an application certificate for any of the following reasons:

a. Negligence in the operation of covered equipment;

b. Repeated failure to perform or document proper daily inspections;

c. Misrepresentation of material information required as a part of the application certificate;

d. Failure to comply with a safety order or cessation order issued by the director;

e. Operation of covered equipment in disregard of public health, safety and welfare;

f. Termination of the required insurance coverage;

g. Failure to pay a liquidated debt owed to the director;

h. Receipt by the director of a certificate of noncompliance;

i. Failure of an operator to comply with the proper procedures;

j. Failure of an operator to provide an adequate number of properly trained and qualified attendants; or

k. Submission of a false affidavit of annual inspection by the owner of an air-supported structure.

461.6(3) The director may deny an application if the application packet is inadequate or for any reason set forth as grounds for suspension or revocation of an application certificate.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—461.7(17A,88A,252J,272D) Procedures for revocation, suspension, or denial of an application certificate or amusement inspection sticker. The procedures set forth in this rule govern the revocation, suspension or denial of an application certificate or amusement inspection sticker.

461.7(1) In the event that immediate action is required due to imminent danger to the public health, safety or welfare, the following procedures shall apply:

a. The director will prepare a safety order describing the hazardous condition and give the operator, or the operator's representative on site, a copy of the safety order.

b. The director will remove the amusement inspection sticker or stickers from covered equipment.

c. The director will proceed as quickly as feasible to give the operator an opportunity for a hearing as set forth in subrule 462.7(2).

461.7(2) In all other cases, the following procedures shall apply:

a. The director will serve a notice by restricted certified mail to the address listed on the application or by other service as permitted by Iowa Code chapter 17A.

b. The operator will have 20 days to file a written notice of contest with the director. If the operator does not file a written notice of contest within 20 days of receipt of the notice, the action stated in the notice is automatically effective.

c. Hearing procedures of the department of inspections, appeals, and licensing will govern.

d. Within five business days of final agency action revoking or suspending an application certificate, the operator shall forfeit the application certificate to the director.

[**ARC 8827C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapters 17A, 88A, 252J, and 272D.

[1] April 6, 2016, effective date of the rescission of former Chapter 61 and the adoption of new Chapter 61 herein [ARC 2428C] delayed 70 days by the Administrative Rules Review Committee at its meeting held March 4, 2016; delay lifted at the meeting held April 8, 2016.

CHAPTER 462
SAFETY RULES FOR AMUSEMENT RIDES, AMUSEMENT DEVICES, AND CONCESSION BOOTHS

[Prior to 9/24/86, Labor, Bureau of [530]]
[Prior to 10/21/98, see 347—Ch 62]
[Prior to 7/9/25, see Labor Services Division[875] Ch 62]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—462.1(88A) Scope. Rule 481—462.2(88A) applies to all covered equipment. The remaining rules of this chapter apply to all covered equipment, except a bungee jump covered by 481—Chapter 463.
[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—462.2(88A) Other codes.

462.2(1) Nothing in 481—Chapters 461 through 463 provides an exemption, waiver, or variance from any otherwise applicable regulation or statute.

462.2(2) State fire marshal rules set forth in 481—Chapter 280 are adopted by reference.
[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 8/5/26]

481—462.3(88A) Site requirements.

462.3(1) *Design.* The grounds of a fair or carnival shall be designed according to the following criteria:

a. Clearance around covered equipment will meet or exceed the manufacturer's recommendations.

b. Clearance between covered equipment and a facility for cooking will be at least 10 feet.

c. Walkways will be wide, unobstructed, and open at each end.

d. Walkways through concession booth backyards and over water lines and electrical lines will be avoided.

e. Intermingling of water lines and electrical lines will be avoided.

f. Guy wires, braces and ropes used for support:

(1) Will not be placed in walkways or in the entrances or exits for covered equipment; and

(2) Will be clearly marked with streamers or other devices when located adjacent to walkways.

g. Stakes will be covered.

462.3(2) *Housekeeping.* Adequate containers for refuse will be provided. Accumulations of trash will be removed promptly.

462.3(3) *Lighting.* Entrances and exits for covered equipment will be provided with at least 5 foot-candles of light measured at grade level. No less than 10 foot-candles of light will be provided at all work levels for assembly and disassembly of covered equipment.

462.3(4) *Internal combustion engines.* Internal combustion engines will be a minimum of 5 feet from an air-supported structure and will be guarded or fenced to prevent patron exposure or access. An internal combustion engine operated in an enclosed area will be provided with fresh-air intake and an exhaust discharge flue.

462.3(5) *Flammable waste and materials.* An operator will provide identified covered and labeled metal containers for flammable waste. The containers will be available to staff and attendants but will not be accessible to patrons.

462.3(6) *Storage of hazardous or flammable materials.* Storage of more than 50 gallons of fuel, other flammable material, or hazardous gas is not permitted in any area accessible to the public.

462.3(7) *Walking surfaces.* Entrances and exits for covered equipment will be adequate, unobstructed, and in accordance with the manufacturer's instructions. Hazards, such as protruding nails, splinters, holes, loose boards, debris, obstructions, and projections, are prohibited. Stairways, ramps and railings will be provided where patrons enter or exit covered equipment above or below grade.

462.3(8) *Fences.* Fences or other barriers will be maintained to prevent movement. Placement of fences will be consistent with the recommendations of the manufacturer. If the manufacturer's recommendation regarding fences is not available, fences will meet ASTM standards.

462.3(9) *Queue line.* Lines will be designed to meet or exceed manufacture specifications.

462.3(10) *Setup.* Operators will follow the manufacturer's instructions to ensure that covered equipment is level and stable. If the manufacturer's instructions are not available, the setup will meet ASTM standards.

[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—462.4(88A) Design and manufacture of covered equipment. This rule sets forth requirements for the design and manufacture of all covered equipment, except a bungee jump covered by 481—Chapter 463.

462.4(1) *Codes adopted by reference.* ASTM F2374-10 applies to all air-supported structures notwithstanding the definition and use of the phrase "inflatable amusement device" in ASTM F2374-10.

a. All covered equipment. Equipment will comply with National Electric Code, NFPA 70-2014.

b. Tramways. All tramways subject to the rules of this chapter will be designed and tested in accordance with the ANSI B77.1 standard in effect at the time of installation.

c. New covered equipment. New covered equipment and covered equipment undergoing a major modification will be designed and tested in accordance with ANSI B77.1-2011 and ANSI B77.1A-2012 and ASTM F1159-15a, F1193-14, F1957-99(2011), F2007-12, F2137-15, F2291-15, F2374-10, F2375-09, F2376-13, F2460-11, F2959-14, and F2960-15, as applicable.

d. Existing covered equipment. Covered equipment manufactured before July 1, 2016, must comply with the applicable design criteria of subrule 462.4(2) through July 1, 2021. After July 1, 2021, covered equipment, except tramways, will meet the criteria for service-proven equipment set forth in ASTM F2291-15.

462.4(2) *Design criteria.* Structural materials and construction of covered equipment will conform to recognized engineering practices, procedures, standards and specifications. The design, materials and construction features will incorporate a safety factor of 5 or alternative safety factors recommended by the original manufacturer or by a professional engineer with credentials and experience acceptable to the director.

462.4(3) *Front openings and awnings.* Front openings and awnings will be stabilized with safety latches, safety pins, or other devices.

462.4(4) *Shooting galleries.* A shooting gallery will use only equipment, shells, pellets, and bullets designed for shooting galleries. Means will be provided to prevent turning the weapon away from the intended target.

462.4(5) *Flying objects.* Where flying objects, such as darts, balls, pellets, shot, and bullets, are a potential hazard:

a. Ricocheting will be prevented by absorbent wings or panels; and

b. Absorbing walls, sandbags, or other mechanisms will be installed along the bottom, back, and sides of the booth to protect passersby.

[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—462.5(88A) Maintenance of covered equipment—requirements. An operator will conduct periodic inspections, repairs, tests, and maintenance as set forth in this rule and the manufacturer's recommendations, as applicable. An operator will make a written record of all inspections, maintenance, tests, and repairs of covered equipment, and the records will be available to the director.

462.5(1) *Nondestructive testing.* The operator will ensure that appropriate nondestructive testing (NDT) is conducted and that documentation is available for review. NDT will be performed at the following times:

a. At intervals recommended by the manufacturer;

b. When required by the director due to a welded repair;

c. When required by the director due to a visual indication of a potentially hazardous condition; and

d. When recommended by a bulletin prepared according to ASTM F1193-14.

462.5(2) *Wood components.* The operator will remove a sufficient amount of soil around piling or wood members embedded in dirt to check for deterioration. When a wood piling requires replacement, the operator will install a concrete pier. The top of the pier will be installed so that the attached wood member is not exposed to dirt or water accumulation.

[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—462.6(88A) Operations—requirements. Operations conform to ANSI B77.1 and ANSI B77.1A-2012 and ASTM F770-15, F1957-99(2011), F2007-12, F2137-15, F2374-10, F2375-09, F2376-13, F2460-11, and F2959-14, as applicable. ASTM F2374-10 applies to all air-supported structures, notwithstanding the definition and use of the phrase "inflatable amusement device" in ASTM F2374-10. The director will enforce the minimum age requirements set forth below, rather than any minimum age requirement set forth in a code adopted by reference in this rule.

462.6(1) *Attendants.* The operator will provide a sufficient number of attendants in accordance with manufacturer specifications who will be recognizable by their uniforms. Covered equipment shall have continuous, direct supervision while in use by a patron.

a. Each attendant of a concession booth, except a shooting gallery or dart game, will be at least 14 years of age. All other attendants will be at least 16 years of age.

b. Each attendant will be trained according to ANSI B77.1 and ANSI B77.1A-2012 and ASTM F770-15, F2007-12, F2460-11, and F2959-14, as applicable. Training documentation will be available to the director.

c. When the covered equipment is shut down, provision will be made to prevent unauthorized operation.

462.6(2) *Signal systems.* When an attendant does not have a clear view of the point where passengers are loaded or unloaded, signal systems will be provided and utilized for controlling, starting and stopping covered equipment.

462.6(3) *Overspeeding and overloading.* An attendant will not load covered equipment beyond its rated capacity nor operate the covered equipment at a speed other than that prescribed by the design engineer or manufacturer.

462.6(4) *Refueling.* Fuel tanks for internal combustion engines should be large enough to run without interruption during normal operating hours. Where it is impossible to provide tanks of proper capacity for a complete day's operation, the covered equipment will be shut down and evacuated during refueling.

462.6(5) *Safety stop device.* After actuation of a safety stop device, the cause of the actuation will be determined and corrected before operation of covered equipment is resumed. No person will operate covered equipment if a safety stop device has been bypassed.

[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—462.7(88A) Patrons.

462.7(1) *Emergency procedure.* Will meet or exceed manufacturer specifications. If manufacturer specifications are not available, the emergency procedure will meet ASTM standards.

462.7(2) *Medical and first aid.* The operator shall make available to patrons the same medical and first-aid provisions the operator is legally obligated to provide to employees.

462.7(3) *Evacuation plan.* Evacuation plans shall meet or exceed manufacturer specifications. If manufacturer specifications are not available, evacuation plans shall meet ASTM standards.

[**ARC 8828C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 88A.

[Editorial change: IAC Supplement 8/5/26]

[1] April 6, 2016, effective date of the rescission of former Chapter 62 and the adoption of new Chapter 62 herein [ARC 2428C] delayed 70 days by the Administrative Rules Review Committee at its meeting held March 4, 2016; delay lifted at the meeting held April 8, 2016.

CHAPTER 463
SAFETY RULES FOR BUNGEE JUMPS
[Prior to 7/9/25, see Labor Services Division[875] Ch 63]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—463.1(88A) Definitions.

"Air bag" means a device that cradles the body by using an air release breather system to dissipate the energy due to a fall, thereby allowing the jumper to land without an abrupt stop or bounce.

"Approved operating site" means the area, including the preparation area, the jump space, the landing area and the recovery area, reflected on the site plan drawings submitted to the director by the operator.

"Bungee catapulting" means the action by which a jumper is held on the ground while the bungee cord is stretched causing the jumper to fly up when the jumper is released.

"Bungee cord" means the elastic rope to which the jumper is attached.

"Bungee jump" means the covered amusement device. "Bungee jump" does not mean a device allowing a patron to jump on a trampoline while attached to one or more bungee cords.

"Bungee jumping" means the action by which a jumper free falls from a height and the jumper's descent is limited by attachment to the bungee cord.

"Bungee jump operation" means a site at which bungee jumping is conducted.

"Carabiner" means a shaped metal or alloy device used to connect sections of the jump rigging, equipment or safety gear.

"Cord" means a bungee cord.

"Dynamic load" means the load placed on the rigging and attachments by the initial free fall of the jumper and the bouncing movements of the jumper.

"Equipment" means each component that is utilized in a bungee jump operation, including devices used to raise, lower, and hold loads.

"Fence" means a structure designed and constructed to restrict people, animals and objects from entering the jump area.

"G-force" means acceleration felt as weight.

"Jump area" means the ground level area of the jump space.

"Jump direction" means the direction a jumper jumps when leaving the platform from the jump point. Jump direction is not affected by whether the jumper faces forward, backward or sideways.

"Jumper" means the person who, while attached to a bungee cord, falls or jumps from a platform or structure.

"Jump harness" means an assembly worn by a jumper and attached to a bungee cord.

"Jump height" means the distance from the jump point to the position on the ground where an object dropped from the jump point would impact in the absence of an air bag or other impediment.

"Jump master" means the person who is responsible for the bungee jump operation and who takes a jumper through the final stages to the actual jump or release.

"Jump point" means the location on the platform from which the jumper leaves the platform.

"Jump space" means the cylinder-shaped space with a center line extending downward from the jump point along the line of the jump height. The top of the jump space cylinder is at least 10 feet above the jump point. For jumps over land, the bottom of the jump space cylinder is the air bag. For jumps over water, the bottom of the jump space cylinder is the water surface. The distance from the jump point to the bottom of the jump space must be the maximum system length plus at least 30 feet. The radius of the cylinder must be at least 70 percent of the jump height.

"Landing area" means the surface where the jumper lands. If a lifting device moves the jumper so that landing occurs away from the jump area, the area covered by the movement of the lifting device is considered part of the landing area.

"Loaded length" means the length of the bungee cord when the cord is extended to its fullest designed length.

"Lowering system" means manual or mechanical equipment capable of lowering a jumper to the designated landing area.

"Maximum system length" means the maximum extended length of a bungee cord system including all attachments.

"Mechanically powered lowering system" means a system that utilizes a machine, rather than a human or other power source, to lower the jumper to the landing area.

"Platform" means the apparatus that is attached to a structure and from which a jumper falls or jumps.

"Preparation area" means the area where the jumper is registered, weighed, notified of potential risks, and otherwise prepared for the jump.

"Recovery area" means the area next to the landing area where the jumper may recover from the jump before exiting the bungee jump operation site.

"Rigging system" means the bungee cord plus any combination of components that connect the jumper through the bungee cord to an attachment point on the structure, lifting device or platform.

"Rigging system attachment point" means a device on the structure, lifting device or platform to which the rigging system is connected.

"Safety line" means a line used to connect a safety harness or belt to an anchor point.

"Sandbagging" means the practice of loading excess weight to a jumper in order to gain extra momentum on the rebound.

"Site operating manual" means the document containing the procedures and forms for the operation of bungee jumping activities and equipment.

"Structure" means a tower or similar structure used for bungee jumping.

"Tandem jumping" means the practice of having two or more people harnessed together while they jump or fall simultaneously from the same jump platform.

[**ARC 8829C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—463.2(88A) Prohibited activities. The following activities are prohibited:

1. Bungee catapulting where an overhead obstruction exists;
2. Sandbagging;
3. Tandem jumping; and
4. Jumping from a bridge, television tower, crane, grain bin, hot air balloon or any height not designed for the purpose of bungee jumping.

[**ARC 8829C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—463.3(88A) Site requirements.

463.3(1) *Storage.* Adequate storage will be provided to protect equipment from physical, chemical and ultraviolet-ray damage. The storage area will be secured against unauthorized entry.

463.3(2) *Communications.* There will be:

a. A public address system in operation during the hours of business.

b. A radio communication link between the platform and the staff responsible for jumper registration, landing, and recovery.

c. A means on site to communicate with local emergency responders.

d. A clearly visible sign at the entrance to the operating site setting forth medical restrictions for jumpers, the minimum-age requirement of 18 years of age, and instructions for jumpers.

463.3(3) *Wind meter.* An anemometer will be installed in accordance with the manufacturer's recommendations and in a location easily visible to the staff.

463.3(4) *Lighting.* Adequate lighting will be provided at a site that operates at any time during the period of one-half hour prior to sunset until one-half hour after sunrise. At a minimum, the lighting system will be capable of lighting the jump platform, the jump space and the landing area.

463.3(5) *Fences.* The operator will use fences in compliance with ASTM 2291-14, Part 14, to limit access to the site.

[**ARC 8829C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—463.4(88A) Design requirements.

463.4(1) *Platform.* A platform shall:

a. Be capable of supporting at least five times the rated capacity or maximum intended load of the platform. If the jump equipment is attached to the platform as distinct from the structure, the dynamic load factor is added to the rated capacity or maximum intended load;

b. Be attached with devices and to a part of the structure that is able to support at least five times the weight of the platform plus the rated capacity or maximum intended load;

c. Have a slip-resistant floor surface;

d. Have safety harness anchor points that are designed and located to facilitate ease of movement on the platform;

e. Have a permanent enclosure, separate from the jump point, to contain the jumper during preparations such as fitting the jumper with a jump harness;

f. Be equipped with a gate across the jump point. The gate will open to the inside of the platform and will have a safety lock or restraining device to prevent accidental opening;

g. Be permanently marked with the maximum capacity of the platform and the rated capacity or maximum intended load; and

h. Be configured to ensure that a jumper will not come into contact with the supporting structure or tower during the jump.

463.4(2) *Lowering system.*

a. The system for lowering the jumper to the landing area will be capable of supporting at least five times the rated capacity or maximum intended load of the system. The lowering system will be mechanically powered and will not be capable of free fall.

b. There will be, under the control of site personnel and described in the site emergency plan, an alternative method for jumper recovery.

463.4(3) *Bungee cord specifications.*

a. The bungee cords will be designed and tested to perform within the prescribed limits of stretch and load as stated in this subrule. The cord will be made from natural or synthetic rubber or rubber blend. The extended length of the cord will be consistent each time the same load is applied.

b. The G-force on a jumper using a waist and chest harness will not exceed 4.5. The G-force on a jumper using an ankle harness will not exceed 3.5.

c. The cord configuration's minimum breaking strength divided by the maximum dynamic load possible for a jumper will be equal to or greater than 5.

d. The design, manufacturing and testing of the bungee cords will meet the following specifications:

(1) In a single-cord system, the binding will hold the cord threads in the designed positions. The binding will have the same characteristics as the cord itself. In a multiple-cord system, the cords will be bound together in a manner that prevents potential entanglement of the jumper. The binding will not damage or affect the performance of the cords.

(2) A load-versus-elongation curve will be used to calculate the maximum G-force and factor of safety of the lot of bungee cords tested. These test results will be readily available to the director upon request.

(3) The end connections will have a minimum safety factor of five times the maximum dynamic load for the bungee cord configuration. End connections will be of a size and shape to allow easy attachment to the jumper harnesses and to the rigging. On multiple-cord systems, each cord will meet its own independent end connection. On multiple-cord systems, end attachment points will be bound together in a protective sheath that allows the individual ends to move with respect to each other.

(4) The operator will ensure that the manufacturer of a bungee cord performs conclusive minimum break strength testing on a representative sample of all manufactured bungee cords. Construction of bungee cord samples will be consistent with the manufacturer's standard methods, including bungee cord loop end connections that meet the specifications in this rule. The tests will be performed or supervised by an independent certified testing authority or an independent licensed professional engineer. The testing authority will determine the ultimate tensile strength of each test specimen and use the lowest failure value recorded as the ultimate tensile strength value for the corresponding lot of bungee cords. The ultimate

tensile strength is reached when the applied load reaches a maximum before failure. Test results will be readily available to the director upon request.

463.4(4) *Jump harness and hardware.*

a. The harnesses, webbing, bindings, ropes and hardware will be capable of supporting at least five times the rated capacity or maximum intended load.

b. A jumper will be secured to the bungee cord at two separate points on the jumper's body. The jump harness system will be one of the following:

(1) A full body harness with two different and separate attachment points.

(2) A waist harness used with a shoulder harness.

(3) An ankle harness system with a safety line to a waist harness or a full body harness.

c. Harnesses will be available to fit the range of patron sizes accepted for jumping.

d. Harnesses will be specifically designed and manufactured for mountaineering or bungee jumping.

e. The load-supporting slings or webbing will be flat or tubular mountaineering webbing or its equivalent. Minimum breaking strength will be 6,000 pounds. Slings or webbings will be formed by sewing or will be tied properly with a water knot with taped ends.

f. Carabiners will be the steel screw, gate type with a minimum breaking strength of 6,000 pounds. The carabiners will be designed and constructed using the standards for mountaineering gear.

g. The ropes, pulleys and shackles used to raise, lower or hold the jumper will have a minimum breaking strength of 6,000 pounds. The pulleys will be compatible with the rope.

h. The rigging system will be attached to at least two rigging system attachment points. Each rigging system attachment point will meet or exceed the following:

(1) Each rigging system attachment point will have a safety factor of 5 and will be capable of bearing a weight of at least 8,000 pounds.

(2) If a rigging system attachment point is made of wire rope, it will have swaged ends with thimble eyes.

(3) If a rigging system attachment point is made of webbing, it will be manufactured by a company that manufactures the devices for crane and rigging companies.

463.4(5) *Landing area, recovery area and jump area.*

a. A jump over land requires the use of an air bag certified by the manufacturer to be capable of protecting a body falling from the height of the jump point.

(1) The minimum impact surface area of the air bag will be as follows:

Jump Height	Minimum Impact Surface Area
0 - 99 feet	20 feet by 25 feet
100 - 149 feet	23 feet by 35 feet
150 - 200 feet	25 feet by 40 feet

(2) The air bag will be in position before jumper preparation begins on the platform.

(3) Upon completion of a jump, the jumper will be lowered into the landing area.

(4) The landing area will be free of spectators at all times.

(5) The jump space will be free of equipment and people when a jumper is being prepared on the jump platform and until the jumper lands in the landing area.

(6) A place for the jumper to sit and recover will be provided close to but outside the landing area.

b. The following requirements apply where a body of water is used instead of an air bag:

(1) The size of the body of water will meet the requirements for the minimum impact surface area set forth in this subrule for air bags.

(2) The minimum water depth of the minimum impact surface area will be 10 feet.

(3) A vessel with at least two staff members will be positioned nearby to recover jumpers. The recovery vessel's crew will wear U.S. Coast Guard-approved life jackets. The recovery vessel will be equipped with U.S. Coast Guard-approved life jackets for jumpers and with rescue equipment.

(4) The jump area will be free of other vessels, floating or submerged objects, the public, and spectators. When the landing area is in open waters, it will be defined by the deployment of buoys. Signs of appropriate size stating "BUNGEE JUMPING—KEEP CLEAR" will be displayed.

c. The following requirements apply where a pool of water is used instead of an air bag:

(1) The pool size will meet the requirements for the minimum impact surface area set forth in this subrule for air bags.

(2) The minimum water depth will be 10 feet.

(3) Rescue equipment will be available.

(4) Only the operators and participants of the bungee jump will be within the landing area.

(5) The landing area will be enclosed by a fence of adequate height and design to prevent persons other than operators and jumpers from entering.

(6) The pool will conform to any applicable requirements enforced by the department of public health.

[**ARC 8829C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—463.5(88A) Maintenance requirements. The operator will follow the inspection and testing recommendations of the equipment manufacturers. When those recommendations conflict with the testing and inspection provisions of this rule, the provisions affording the higher degree of safety will be followed. Inspections, findings and corrective action will be recorded in the site log.

463.5(1) *Tests and inspections by the operator.*

a. The jump rigging, harness, lowering system and safety gear will be regularly inspected and tested as set forth in the site operating manual.

b. In accordance with the site operating manual, the ropes, webbing and bindings will be inspected visually and by feel for signs of wear, fraying or damage.

c. The cord ends will be inspected as often as the manufacturer specifies or no less than daily for wear, slippage or other abnormalities.

463.5(2) *Replacement of rigging and equipment.*

a. Hardware that displays surface damage will be replaced immediately.

b. Hardware that has been subjected to an abnormal loading or impact against hard surfaces will be replaced immediately.

c. Substandard equipment, rigging or personal protective equipment will be replaced immediately.

d. Bungee cords will be replaced when they have been subjected to the maximum number of jumps recommended by the manufacturer, when they exhibit deterioration or damage, or when they do not react according to specifications. Retired bungee cords will be cut into lengths of not more than 75 inches. The attachment points will be retired when the cord is retired.

463.5(3) *Replacement equipment.* Replacement equipment will be stored in a secure area to prevent tampering or vandalism. Replacement equipment for the following will always be available on the approved operating site:

a. Bungee cords;

b. Rigging ropes;

c. Binding and ankle straps for jumpers;

d. Jump harnesses; and

e. Lifelines and clips.

463.5(4) *Identification of equipment.*

a. Each bungee cord will have its own permanent identification number.

b. The form of identification may not damage or detract from the integrity of the material.

c. The identification will be clearly visible to the operators during daily operations.

d. The identification of each piece of equipment will be recorded in the site operating manual.

[**ARC 8829C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—463.6(88A) Operations requirements.

463.6(1) *Site operating manual.* The operator will ensure that the site has an operating manual that includes the following elements:

a. A site plan showing the fencing, the site furniture, the preparation area, the jump space, the jump area, the jump direction, the landing area and the recovery area.

b. A site plan showing a profile of the site and defining the jump platform and its supporting structure, the maximum system length of the bungee cord, the jump space and the jump area.

c. A complete description of each of the following:

(1) The system of operation;

(2) The components in the rigging system, including the manufacturer's specification or a laboratory test certificate of each component;

(3) All safety and rescue equipment;

(4) A job description for the personnel employed on the site and the minimum qualifications for each person;

(5) Emergency procedures for all foreseeable scenarios;

(6) Standard operating procedures for every person employed in processing the jumper;

(7) The procedure for reporting accidents and reportable incidents to the director;

(8) Equipment inspection procedures, including inspection recordkeeping;

(9) Maintenance procedures; and

(10) The method of verifying and recording each jump master's qualifications.

463.6(2) *Emergency provisions and procedures.*

a. Each approved operating site will have a written emergency plan. The plan will be made available to any local emergency service responsible for providing emergency rescue service.

b. At least one member of a bungee jump operation staff will have current first-aid and cardiopulmonary resuscitation certification and will complete an annual refresher course that includes evaluation of hands-on skills from the American Red Cross or equivalent.

c. For a jump over water, the jump master and at least one landing assistant will have current lifeguarding certification from the American Red Cross or equivalent.

d. Emergency lighting will be available in case of power failure at a site that operates at any time during the period of one-half hour prior to sunset until one-half hour after sunrise. The emergency lighting system will be capable of lighting the jump platform, the jump space and the landing area. The emergency lighting system will have its own power source.

e. A backup means of communication will be available in case of a power failure.

f. The jump master or operator will cease jumping operations if wind speed exceeds 25 miles per hour or thunder is audible.

463.6(3) *Minimum staff.*

a. Prior to the opening of a bungee jump operation, the operator will train site personnel to be familiar with the boundaries of the jump space, the jump area, the site operating manual and the emergency plan.

b. A bungee jump operation will have at least one jump master, one jump assistant, one landing assistant, and one registration assistant present at all times during which jumping is being conducted.

c. The staff will be easily identifiable by their clothing.

d. Staff will be briefed for each day's operations. This briefing will include assignment of the designated jump master.

e. Each jump will be directly controlled by a jump master.

463.6(4) *Jump master.*

a. A jump master will be at least 18 years of age, will have assisted at least 25 jumpers, and will have received a minimum of 30 hours of jump training.

b. A jump master will have a thorough knowledge of the bungee jump site, its equipment, operating manual, procedures, emergency plan and staff duties.

c. A jump master will:

(1) With the jump assistant, escort the jumper from the preparation area to the jump point;

(2) Select the appropriate bungee cord and adjust the rigging for each jump;

(3) Brief each jumper on the procedures for jumping, landing, lowering and recovery;

(4) Take the jumper through the final stages before the jump;

(5) Securely attach to the platform rigging bar or to the rigging the top end of the bungee cords before preparing the jumper;

(6) Be present at the jump point during each jump;

(7) Close the platform gate while no jumper is present;

(8) Direct the operation of the lowering system;

(9) Train other bungee jump operation staff; and

(10) Ensure that the procedures set out in the site operating manual are followed.

463.6(5) *Jump assistant.* The operator or jump master will designate at least one individual to act as a jump assistant. The jump assistant will:

a. With the jump master, escort the jumper from the preparation area to the jump point;

b. Assist the jump master in preparing the jumper;

c. Assist in attaching the jumper to the harness and rigging;

d. Perform check procedures;

e. Operate the lowering system; and

f. Assist in controlling the public.

463.6(6) *Landing assistant.* The operator or jump master will designate at least one individual to act as a landing assistant. The landing assistant's duties include the following:

a. Assisting the jumper to the landing pad;

b. Assisting the jumper to the recovery area;

c. Overseeing the recovery of the jumper; and

d. Assisting in controlling the public.

463.6(7) *Registration assistant.* The operator or jump master will designate at least one individual to act as a registration assistant at each bungee jump operation site. The registration assistant will:

a. Register the jumper;

b. Inform each jumper that there are medical conditions that could be adversely affected by bungee jumping and that prior to jumping, the jumper should consult with a physician for more specific information regarding the medical risks;

c. Weigh the jumper and mark the jumper's weight on the jumper;

d. Control the movement of the jumper to the jump platform; and

e. Assist in controlling the public.

463.6(8) *Jumper restrictions.*

a. The minimum age for jumping is 18 years of age.

b. A person who is visibly intoxicated or who is otherwise impaired will not be allowed to jump.

463.6(9) *Jumper registration.* The operator will ensure that a jumper provides the following information on the operator's registration form:

a. The jumper's contact information, including name, address, and telephone number.

b. The jumper's age and weight.

463.6(10) *Equipment replacement.*

a. Jumping will cease immediately when substandard equipment is identified.

b. The operator will obtain from the bungee cord manufacturer a written verification of the maximum number of jumps for which a particular cord may be used. The written verification will be kept on site and will be available to the director.

c. The operator will keep a current, written record of each bungee cord used at the site. The bungee cord records will be organized by permanent, unique identification number and will include the number of jumps for each cord by date. The bungee cord records will be available to the director.

463.6(11) *Jump space and jump area.*

a. Persons other than a jumper and objects other than the jumper's equipment will not be in the jump space at any time during jump operations.

b. Persons other than site personnel and objects other than air bags and similar safety devices will not be in the jump area at any time during jump operations.

c. The jump space and jump area will be identical to the jump space and jump area that the director approved.

d. The preparation area will be separate from the jump area.

[**ARC 8829C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

These rules are intended to implement Iowa Code chapter 88A.

[1] April 6, 2016, effective date of Chapter 63 [ARC 2428C] delayed 70 days by the Administrative Rules Review Committee at its meeting held March 4, 2016; delay lifted at the meeting held April 8, 2016.

CHAPTER 464
Reserved

BUILDING AND CONSTRUCTION DIVISION: ENVIRONMENTAL HEALTH AND CONTRACTOR BUREAU

CHAPTER 465
CONSTRUCTION CONTRACTOR REGISTRATION

[Prior to 10/21/98, see 347—Ch 150]
[Prior to 7/9/25, see Labor Services Division[875] Ch 150]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—465.1(91C) Scope. This chapter implements Iowa Code chapter 91C. The rules in this chapter apply to all construction contractors, except for a person who earns less than $2,000 annually or who performs work or has work performed on the person's own property.
[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.2(91C) Definitions.

"Construction" means new work, additions, alterations, reconstruction, installations, repairs and demolitions. Construction activities are generally administered or managed from a relatively fixed place of business, but the actual construction work is performed at one or more different sites that may be dispersed geographically. Examples of construction activities, adopted by reference, are in rule 871—23.82(96) for purposes of the Iowa employment security law.

"Contractor" means a person who engages in the business of construction as the term is defined in rule 871—23.82(96), for purposes of the Iowa employment security law, including subcontractors and special trade contractors.

"Department" means the department of inspections, appeals, and licensing.

"Director" means the director of the department of inspections, appeals, and licensing or the director's designee.

"File" means deliver to the department.

"Out-of-state contractor" means a contractor whose principal place of business is in another state, and who contracts to perform construction in this state.

"Principal place of business" means the state in which a substantial part of the contractor's business is transacted and from which the centralized supervision is exercised. Factors to be reviewed include:

1. State designated as home office on documents filed with governmental agencies.
2. State where payroll is prepared.
3. State where business transactions are performed.
4. State where officers, owners, or partners reside and work.
5. State in which bank accounts are located.
6. State in which fixed business property is located.
7. State where management decisions are made.

"Same phase of construction" means in the same type of construction operations or trade, such as but not limited to electrical work; masonry, stonework, tile setting and plastering; roofing; sheet metal work; excavation work; concrete work; glasswork; painting, paper hanging and decorating; plumbing, heating and air conditioning work; carpentry work; and miscellaneous special trade contractors.

"Working days" means Mondays through Fridays but not Saturdays, Sundays or federal or state holidays. In computing 15 working days, the day of receipt of any notice is not to be included, and the last day of the 15 working days is included.
[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.3(91C) Registration required. Before performing any construction work in this state, a contractor shall be registered with the department. A joint venture is an independent entity and is registered independently.
[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.4(91C) Application. A contractor that is covered by the license requirements of Iowa Code chapter 105 applies for a contractor registration number by using the application system of the Iowa

plumbing and mechanical systems board. All other contractors file an application with the department on forms provided by the department. The application contains the applicable information and documents specified in this rule.

465.4(1) *Name.* The name of the contractor.

465.4(2) *Place of business.* The complete mailing address of the principal place of business of the contractor.

465.4(3) *Telephone number.* The business telephone number of the contractor.

465.4(4) *Business classification.* The type of business entity of the contractor (e.g., corporation, partnership, sole proprietorship, trust, etc.).

465.4(5) *Ownership information.*

a. If the contractor is a corporation, the name, address, telephone number, and position of each officer of the corporation.

b. If the contractor is other than a corporation, the name, address, and telephone number of each owner.

465.4(6) *Workers' compensation coverage information.*

a. A certificate of insurance from the insurer showing proof of workers' compensation insurance, the effective dates of coverage, and listing the department of inspections, appeals, and licensing as a certificate holder;

b. Employer's release from the insurance requirements under workers' compensation law form provided to self-insured employers by the commissioner of insurance under Iowa Code section 87.11; or

c. A statement that the contractor is not required to carry workers' compensation coverage.

465.4(7) *Account number.* The employer account number issued by the unemployment insurance services division of the workforce development department before the contractor applies for a contractor registration number.

465.4(8) *Business description.* A description of the business to include:

a. The employer's North American Industry Classification System (NAICS) code; or

b. The principal products and services provided.

465.4(9) *Fee or fee exemption.* A contractor who is eligible to register without paying a fee shall submit a completed fee exemption form. All other contractors must submit the nonrefundable fee as set forth below.

a. The standard fee is $50 per year or $150 for a three-year registration.

b. Contractors who apply for a contractor registration number through the Iowa plumbing and mechanical systems board must pay a fee that is prorated in accordance with the length of the registration period.

465.4(10) *Social security number.* The contractor, if a natural person, shall include the contractor's social security number.

465.4(11) *Out-of-state contractor bond.* An out-of-state contractor shall:

a. File a $25,000 surety bond that is prepared using the bond form provided by the department, or

b. Provide a copy of a letter from the department of transportation stating that the contractor is prequalified to bid on projects for the department of transportation pursuant to Iowa Code section 314.1.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.5(91C) Amendments to application.

465.5(1) A contractor shall report to the director any change in the information originally reported on or with the application within 15 working days of the change, except that the contractor shall notify the director of changes to workers' compensation coverage within ten days prior to any change in coverage.

465.5(2) After the time specified in subrule 465.5(1), with good cause shown, the director may determine that an amendment may be made to correct an application.

465.5(3) Amendments to applications are not permitted where a change occurs in the business classification, such as but not limited to a change from a sole proprietorship to a corporation.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.6(91C) Fee.

465.6(1) *New applications.* A new application deposited in the U.S. mail must include the fee effective on the date the application is postmarked. A new application delivered in any other manner must include the fee effective on the date the application is received by the department.

465.6(2) *Renewal applications.* A timely renewal application shall include the fee effective on the expiration date of the contractor's expiring registration. An application for renewal deposited in the U.S. mail after the expiration date of the contractor's expiring registration shall include the fee effective on the date the application is postmarked. An application for renewal delivered to the department in a manner other than U.S. mail and after the expiration date of the contractor's expiring registration shall include the fee effective on the date the application is received by the department.

465.6(3) *Amendments to applications.* A fee is not required for a permissible amendment to an application.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.7(91C) Registration number issuance. Within 30 days of receipt of a completed application, the director will issue to the contractor a registration number. The registration number will consist of the letter "C" followed by six unique digits.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.8(91C) Workers' compensation insurance cancellation notifications.

465.8(1) *Insurance company coverage.* The department shall be notified by the insurance company carrying the contractor's workers' compensation insurance at the time of cancellation. The notice shall contain:

a. The name of the insurance carrier;

b. The name of the insured contractor; and

c. The date the workers' compensation coverage cancellation is effective.

465.8(2) *Self-insured contractors.* The contractor shall notify the department ten days prior to any cessation in self-insurance.

465.8(3) *Noninsured contractors.* The contractor shall notify the department whenever the required notice is not posted or in any change in insurance status.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.9(91C) Investigations and complaints.

465.9(1) *Investigations.* The conduct of the investigation will be such as to preclude unreasonable disruption of the operations of the work site. Investigations may be conducted without prior notice by correspondence, telephone conversations, or review of materials submitted to the department. At the initiation of an investigation at the contractor's establishment, the investigator shall present credentials, explain the nature and purpose of the investigation, and seek the consent of the owner, operator or agent in charge of the establishment. In the event the investigator is not permitted to fully conduct an investigation, the director may seek an administrative warrant.

465.9(2) *Complaints.* A complainant's name and other identifying information shall not be released if the complaint was included as a part of another complaint where the complainant's identity would be protected under other statutes or rules (e.g., a complaint filed under both Iowa Code chapters 88 and 91C).

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.10(91C) Citations/penalties and appeal hearings.

465.10(1) *Citations.* The director will issue a citation to a contractor where an investigation reveals the contractor has violated:

a. The requirement that the contractor be registered;

b. The requirement that the contractor's registration information be substantially complete and accurate; or

c. The requirement that an out-of-state contractor file a bond with the department.

465.10(2) *Penalties.* If a citation is issued, the director shall notify the contractor by certified mail of the proposed administrative penalty, if any. The administrative penalties shall be not more than $500 in the

case of the first violation and not more than $5,000 per violation in the case of a second or subsequent violation. In proposing a penalty, due consideration will be given to knowledge of the alleged violation, knowledge of requirements of the law, and nature and extent of the alleged violation.

465.10(3) *Appeal.* The contractor has 15 working days within which to file a notice of contest of the citation or proposed penalty. The notice of contest is filed with the director who will forward it to the employment appeal board.

465.10(4) *Appeal procedures.* The rules of procedure of the employment appeal board shall apply to administrative hearings on citations and penalties.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.11(91C) Revocation of registrations and appeal hearings.

465.11(1) *Reason for revocation.* The director shall seek revocation of a contractor's registration where an investigation reveals the contractor failed to meet the conditions of registration at the time of issuance or no longer meets the conditions.

465.11(2) *Notice of revocation.* The director shall serve a notice of intent to revoke on the contractor by personal service or by restricted certified mail to the address listed in the application or by other service as permitted in the Iowa Rules of Civil Procedure. The notice shall set the time for a fact-finding interview.

465.11(3) *Fact-finding interview.* The purpose of the fact-finding interview is to ensure the contractor is not in compliance before the registration is revoked. The contractor may notify the fact finder of a telephone number to use at least 24 hours before the fact-finding interview is scheduled to begin. Otherwise, the fact finder will call the number on file for the contractor. The fact-finding interview may be conducted via videoconference or in person if the fact finder and the contractor make arrangements in advance.

465.11(4) *Decision.* The director serves the decision of the fact-finding interview on the contractor by certified mail to the address listed on the application or to another address provided by the contractor. If the certified mail is returned unclaimed or undelivered, the director will serve the decision by other service as permitted in the Iowa Rules of Civil Procedure.

465.11(5) *Effective date of revocation.* Revocations are effective 21 days after certified mailing of the decision.

465.11(6) *Notice of contest.* The contractor has 15 working days from receipt of the decision to file a notice of contest. The notice of contest shall be filed with the director, who will forward it to the employment appeal board.

465.11(7) *Notice of contest procedures.* The rules of procedure of the employment appeal board apply to notices of contest.

465.11(8) *Effect of revocation.* A contractor whose registration is revoked may reapply for a new registration number if all requirements for registration eligibility are met.

465.11(9) *Relinquishing registration certificate.* A contractor shall return the original registration certificate to the department when a revocation or suspension becomes final.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.12(91C) Concurrent actions. Actions under rules 481—465.10(91C) and 481—465.11(91C) may proceed at the same time against a contractor.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—465.13(91C) Bond release.

465.13(1) *Notifications.* Prior to releasing a bond, the director will notify the department of revenue, the unemployment insurance services division of the workforce development department, and applicable state subdivisions of the intent to release the bond. The director shall provide ten days for the filing of objections to the release of the bond. The director may deem any failure to respond to the notice within the time provided as an approval of the release.

465.13(2) *Conditions for release.* A bond shall not be released until the contractor has made payment of all taxes, including contributions due under the unemployment compensation insurance system, penalties, interest, and fees, that may accrue to the state of Iowa or its subdivisions on account of the

execution and performance of the contract or approval for the release is obtained from the appropriate agencies.

[**ARC 8833C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

CHAPTER 469
RENOVATION, REMODELING, AND REPAINTING—LEAD HAZARD NOTIFICATION PROCESS

[Prior to 4/2/25, see Public Health Department[641] Ch 69]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—469.1(10A) Applicability. This chapter applies to all persons who perform renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.2(10A) Definitions.

"Arithmetic mean" means the algebraic sum of data values divided by the number of data values. For example, the sum of the concentration of lead in several soil samples divided by the number of samples is the arithmetic mean.

"Certificate of mailing" means certified mail with return receipt or its equivalent.

"Chewable surface" means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew.

"Child-occupied facility" means the same as defined in Iowa Code section 10A.903. "Child-occupied facility" also includes any building where lead-based paint activities are conducted immediately prior to or during the conversion of the building to a child-occupied facility.

"Common area" means a portion of the building that is generally accessible to all occupants. This includes but is not limited to hallways, stairways, laundry and recreational rooms, playgrounds, community centers, garages, and boundary fences.

"Compensation" means payment or reimbursement for services performed. Compensation is not limited to monetary considerations and includes payment of rent for rental units, receipt of a salary from the owner or manager of target housing, and receipt of a salary from the owner or operator of a child-occupied facility.

"Components" means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include but are not limited to interior components such as ceilings, crown moldings, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim (including sashes, window heads, jambs, sills or stools and troughs), built-in cabinets, columns, beams, bathroom vanities, countertops, and air conditioners; and exterior components such as painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, facias, rake boards, corner boards, bulkheads, doors and door trim, fences, floors, joists, latticework, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, windowsills or stools and troughs, casing, sashes and wells, and air conditioners.

"Department" means the department of inspections, appeals, and licensing.

"Dripline" means the area within three feet surrounding the perimeter of a building.

"Dust-lead hazard" means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead equal to or exceeding 5 micrograms per square foot on floors, 40 micrograms per square foot on interior windowsills, and 100 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is equal to or greater than 5 micrograms per square foot on floors, 40 micrograms per square foot on interior windowsills, and 100 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior

windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property.

"Dwelling unit" means a single, unified combination of rooms designed for use as a dwelling by one family.

"Emergency renovation, remodeling, or repainting" means renovation, remodeling, or repainting activities necessitated by nonroutine failures of equipment or a structure that were not planned but resulted from a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard or threatens equipment or property with significant damage.

"Friction surface" means an interior or exterior surface that is subject to abrasion or friction including but not limited to certain window, floor, and stair surfaces.

"Hazardous lead-based paint" means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is equal to or greater than the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

"Housing for the elderly" means retirement communities or similar types of housing reserved for households composed of one or more persons 62 years of age or older or an age recognized as elderly by a specific federal housing assistance program.

"Impact surface" means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of door frames.

"Lead-based paint" means paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or more than 0.5 percent by weight.

"Lead-based paint hazard" means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

"Living area" means any area of a residential dwelling used by at least one child six years of age or less including but not limited to living rooms, kitchen areas, dens, playrooms, and children's bedrooms.

"Mid-yard" means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

"Multifamily dwelling" means a structure that contains more than one separate residential dwelling unit, which is used or occupied, or is intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.

"Person" means individual, corporation, limited liability company, government or governmental subdivision or agency, business trust, estate, trust, partnership, or association, or any other legal entity.

"Play area" means an area of frequent soil contact by children of less than six years of age as indicated by but not limited to factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children's possessions, observations of play patterns, or information provided by parents, residents, caregivers, or property owners.

"Regulated entity" means any individual or company that is regulated by the department by virtue of these rules, the Iowa Code, or other official regulatory promulgation.

"Renovation, remodeling, repainting" means modifying any existing structure or portion of a structure where painted surfaces are disturbed, unless the activity fits the criteria of lead abatement as defined in rule 481—470.2(10A) and is performed by a certified lead abatement contractor as defined in rule 481—470.2(10A). This includes, but is not limited to, removing walls, ceilings, and other painted building components; window replacement; floor refinishing; and sanding, scraping, stripping, water blasting, or otherwise removing paint.

"Residential dwelling" means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including but not limited to garages, farm buildings, and fences, or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

"Soil-lead hazard" means bare soil on residential real property or on the property of a child-occupied facility that contains total lead in excess of 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is equal to or greater than 400 parts per million.

"Target housing" means the same as defined in Iowa Code section 10A.903.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; **ARC 0594D**, IAB 9/16/26, effective 10/21/26]

481—469.3(10A) Notification required in target housing. A person who performs renovation, remodeling, or repainting of target housing for compensation, except for emergency renovation, remodeling, or repainting of target housing, and except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, shall do the following prior to commencing the work:

469.3(1) Provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the owner and adult occupant of each dwelling unit where renovation, remodeling, or repainting will be performed. The pamphlet shall be provided no more than 60 days prior to commencing the work.

469.3(2) Obtain a signed, dated acknowledgment from the owner and known adult occupant of each dwelling unit where renovation, remodeling, or repainting will be performed affirming receipt of the pamphlet prior to the start of renovation, remodeling, or repainting and are aware of the potential health hazards from remodeling, renovating, or repainting housing containing lead-based paint. The acknowledgment shall be obtained no more than 60 days prior to commencing the work, be completed prior to commencing the work, be clearly and legibly written, and include the following:

a. The owner's and occupant's names and the address of the residential dwelling undergoing renovation, remodeling, or repainting.

b. The following language:

> I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting housing containing lead-based paint or lead-based paint hazards.

c. The signature, and date of signature, of the owner and occupant below the statement from paragraph 469.3(2)*"b."* If a signature cannot be obtained from an adult occupant, the person must certify in writing that the pamphlet was delivered to the dwelling and that a written acknowledgment could not be obtained from an adult occupant. Such certification must include the address of the unit to be remodeled, renovated, or repainted; the date and method of delivery of the pamphlet; the name of the person delivering the pamphlet; the reason for lack of acknowledgment (e.g., occupant refuses to sign, no adult occupant available); and a dated signature of the person conducting the renovation, remodeling, or repainting.

469.3(3) The acknowledgment from subrule 469.3(2) may be included as a separate sheet or as a part of any written contract or service agreement. If the parties use a written contract or agreement written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

469.3(4) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment at least seven days prior to beginning the work.

469.3(5) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting shall provide further notification to the owners and occupants providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.4(10A) Notification required in multifamily housing. A person who performs renovation, remodeling, or repainting of common areas for compensation, except for emergency renovation,

remodeling, or repainting of target housing, and except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, shall do the following prior to commencing the work:

469.4(1) Provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the owner of the multifamily target housing where renovation, remodeling, or repainting will be performed. The pamphlet shall be provided no more than 60 days prior to commencing the work.

469.4(2) Obtain a signed, dated acknowledgment from the owner of the multifamily target housing where renovation, remodeling, or repainting will be performed affirming that the owner has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting housing containing lead-based paint. The acknowledgment shall be obtained no more than 60 days prior to commencing the work, be completed prior to commencing the work, be clearly and legibly written, and include the following:

a. The owner's name and the address of the multifamily dwelling undergoing renovation, remodeling, or repainting.

b. The following language:

> I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting housing containing lead-based paint or lead-based paint hazards.

c. The signature of the owner, along with the date of signature.

469.4(3) Include the acknowledgment from subrule 469.4(2) as a separate sheet or as a part of any written contract or service agreement. If the parties use a written contract or agreement written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

469.4(4) Notify each occupant of the multifamily housing, in writing, of the intended remodeling, repainting, or renovation, and make a pamphlet as described in subrule 469.3(2) available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each occupant of the target housing that describes:

a. The general nature and location of the planned renovation, remodeling, or repainting activity.

b. The expected starting and ending dates of the planned renovation, remodeling, or repainting activity.

c. A statement of how the owners and occupants can obtain a pamphlet as described in subrule 469.3(2) at no charge from the person conducting the renovation, remodeling, or repainting activity.

469.4(5) These activities may be conducted by the owner on behalf of the person planning to perform the renovation, remodeling, or repainting.

469.4(6) Prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation, remodeling, or repainting, and to provide a pamphlet as described in subrule 469.3(2) at no charge upon request. Regardless of who performs the notification activities in this rule, the person planning to conduct the renovation, remodeling, or repainting is responsible for ensuring compliance will be liable for any failure to comply with the notification requirements of this rule.

469.4(7) Subrules 469.3(4) and 469.3(5) are applicable as if set forth herein.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.5(10A) Emergency renovation, remodeling, or repainting in target housing. A person who performs emergency renovation, remodeling, or repainting of target housing for compensation, except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, will do the following as soon as reasonably possible:

469.5(1) Provide a pamphlet as described in subrule 469.3(2) to the owner of the target housing where renovation, remodeling, or repainting is performed.

469.5(2) Notify each owner and occupant of the target housing, in writing, of the remodeling, repainting, or renovation, and make a pamphlet as described in subrule 469.3(2) available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each owner and occupant of the target housing that describes:

a. The general nature and location of the renovation, remodeling, or repainting activity.

b. The starting and ending dates of the renovation, remodeling, or repainting activity.

c. A statement of how the owners and occupants can obtain a pamphlet as described in subrule 469.3(2) at no charge from the person conducting the renovation, remodeling, or repainting activity.

469.5(3) These activities may be conducted by the owner on behalf of the person performing the renovation, remodeling, or repainting. The person planning to perform the renovation, remodeling, or repainting must prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation, remodeling, or repainting and, upon request, provide a pamphlet as described in subrule 469.3(2) at no charge. Regardless of who performs the notification activities in this rule, the person conducting the renovation, remodeling, or repainting is responsible for ensuring compliance with this rule and will be liable for any failure to comply with the notification requirements of this rule.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.6(10A) Certification of attempted delivery in target housing. When an adult occupant is unavailable for signature or refuses to sign the acknowledgment of receipt of the pamphlet, the person conducting the renovation, remodeling, or repainting is permitted by subrule 469.3(2) to certify delivery for each instance. In addition to subrule 469.3(2):

469.6(1) If an adult occupant is unavailable for signature, the certification shall contain the printed name and dated signature of the person conducting the renovation, remodeling, or repainting, the address of the unit, and the attempted delivery dates and times under the following language:

> I certify that I have made a good-faith effort to deliver the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the unit listed below at the dates and times indicated, and that an adult occupant was unavailable to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the unit with the occupant.

469.6(2) If the occupant refuses to sign the acknowledgment, the certification shall contain the printed name and dated signature of the person conducting the renovation, remodeling, or repainting, the address of the unit, the attempted delivery dates and times, and the location where the pamphlet was left at the unit (e.g., taped to the door, slipped under the door) under the following language:

> I certify that I have made a good-faith effort to deliver the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the unit listed below at the dates and times indicated, and that the occupant refused to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the unit.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.7(10A) Notification required in child-occupied facilities. A person who performs renovation, remodeling, or repainting of child-occupied facilities for compensation, except for emergency renovation, remodeling, or repainting of child-occupied facilities, and except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, will do the following prior to commencing the work:

469.7(1) Provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the owner of the building where renovation, remodeling, or repainting will be performed. The pamphlet will be provided no more than 60 days prior to commencing the work.

469.7(2) Obtain a signed, dated acknowledgment from the owner of the building where renovation, remodeling, or repainting will be performed affirming that the owner has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting buildings containing lead-based paint. The acknowledgment will be obtained no more than 60 days prior to commencing the work.

a. The acknowledgment will include the owner’s name and the address of the child-occupied facility undergoing renovation, remodeling, or repainting.

b. The acknowledgment will include the following language:

> I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or

repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting buildings containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment will require the signature of the owner along with the date of signature.

d. If a signature cannot be obtained from the owner, the person will certify in writing that the pamphlet has been delivered to the building and that a written acknowledgment could not be obtained from an owner. Such certification will include the address of the building to be remodeled, renovated, or repainted, the date and method of delivery of the pamphlet, the name of the person delivering the pamphlet, the reason for lack of acknowledgment (e.g., owner refuses to sign, owner not available), the signature of the person conducting the renovation, remodeling, or repainting, and the date of signature.

e. The type will be clear and legible.

f. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment will be completed prior to commencing the work.

g. If the parties use a written contract or agreement that is written in a language other than English, the acknowledgment text will be written in the same language as the text of the contract or agreement.

469.7(3) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment to the owner at least seven days prior to beginning the work.

469.7(4) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting will provide further notification to the owners providing revised information on the ongoing or planned activities. This subsequent notification will be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

469.7(5) If the operator of the child-occupied facility is not the owner of the building, provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the operator of the child-occupied facility where renovation, remodeling, or repainting will be performed. The pamphlet will be provided no more than 60 days prior to commencing the work.

469.7(6) If the operator of the child-occupied facility is not the owner of the building, obtain a signed, dated acknowledgment from the operator of the child-occupied facility where renovation, remodeling, or repainting will be performed affirming that the operator has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting buildings containing lead-based paint. The acknowledgment will be obtained no more than 60 days prior to commencing the work.

a. The acknowledgment will include the name of the operator of the child-occupied facility and the address of the child-occupied facility undergoing renovation, remodeling, or repainting.

b. The acknowledgment will include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting buildings containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment will require the signature of the operator of the child-occupied facility along with the date of signature.

d. If a signature cannot be obtained from the operator of the child-occupied facility, the person will certify in writing that the pamphlet has been delivered to the building and that a written acknowledgment could not be obtained from the operator of the child-occupied facility. Such certification will include the address of the building to be remodeled, renovated, or repainted, the date and method of delivery of the pamphlet, the name of the person delivering the pamphlet, the reason for lack of acknowledgment (e.g., operator of the child-occupied facility refuses to sign, operator of the child-occupied facility not available), the signature of the person conducting the renovation, remodeling, or repainting, and the date of signature.

e. The type will be clear and legible.

f. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment will be completed prior to commencing the work.

g. If the parties use a written contract or agreement that is written in a language other than English, the acknowledgment text will be written in the same language as the text of the contract or agreement.

469.7(7) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovation, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment to the operator of the child-occupied facility at least 7 days prior to beginning the work.

469.7(8) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting will provide further notification to the operator of the child-occupied facility providing revised information on the ongoing or planned activities. This subsequent notification will be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

469.7(9) Provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, and information regarding the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date to the parents and guardians of children using the child-occupied facility where renovation, remodeling, or repainting will be performed. The pamphlet and information will be provided no more than 60 days prior to commencing the work. The person conducting the renovation, remodeling, or repainting will provide this information using one of the following methods:

a. Mail or hand-deliver the pamphlet and information to each parent or guardian of each child using the child-occupied facility (the pamphlet and information may not be sent home with the child); or

b. While the renovation, remodeling, or repainting is ongoing, post informational signs describing the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date. These signs will be posted in areas where they can be seen by the parents of the children frequenting the child-occupied facility. The signs will be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians can review a copy of the pamphlet or obtain a copy from the person conducting the renovation, remodeling, or repainting at no cost to the parents or guardians.

469.7(10) The activities in subrule 469.7(9) will be conducted by the person planning to perform the renovation, remodeling, or repainting or by the owner or operator of the child-occupied facility on behalf of this person. Regardless of who performs the notification activities required in subrule 469.7(9), the person conducting the renovation, remodeling, or repainting will be responsible for ensuring compliance with this rule and will be liable for any failures to comply with the notification requirements in this rule.

469.7(11) The person conducting the renovation, remodeling, or repainting will prepare, sign, and date a statement describing the steps performed to notify all parents and guardians of the intended renovation, remodeling, or repainting and to provide the pamphlet to them.

469.7(12) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, or repainting change after the initial notification has been conducted, the person conducting the renovation, remodeling, or repainting will provide revised information on the ongoing or planned activities to the parents and guardians of children frequenting the child-occupied facility providing revised information on the ongoing or planned activities. This subsequent notification will be provided before the person conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.8(10A) Emergency renovation, remodeling, or repainting in child-occupied facilities. A person who performs emergency renovation, remodeling, or repainting of child-occupied facilities for compensation, except for minor repair and maintenance activities that disrupt less than 1.0 square feet of painted surface, will do the following as soon as reasonably possible:

469.8(1) Provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the owner of the building where renovation, remodeling, or repainting is performed.

469.8(2) Notify each owner and, if different, the operator of the child-occupied facility, in writing, of the remodeling, repainting, or renovation, and make the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Renovate Right, available upon request. At a minimum, this notification will be accomplished by distributing written notice to each owner and, if different, operator of the child-occupied facility. The notice will describe:

a. The general nature and location of the renovation, remodeling, or repainting activity.

b. The starting and ending dates of the renovation, remodeling, or repainting activity.

c. A statement of how each owner and, if different, the operator of the child-occupied facility can obtain the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, at no charge from the person conducting the renovation, remodeling, or repainting activity.

469.8(3) Provide the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, and information regarding the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date to the parents and guardians of children using the child-occupied facility where renovation, remodeling, or repainting will be performed. The person conducting the renovation, remodeling, or repainting will provide this information using one of the following methods:

a. Mail or hand-deliver the pamphlet and information to each parent or guardian of each child using the child-occupied facility (the pamphlet and information may not be sent home with the child); or

b. While the renovation, remodeling, or repainting is ongoing, post informational signs describing the general nature and locations of the renovation, remodeling, or repainting and the anticipated completion date. These signs will be posted in areas where they can be seen by the parents or guardians of the children frequenting the child-occupied facility. The signs will be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians can review a copy of the pamphlet or obtain a copy from the person conducting the renovation, remodeling, or repainting at no cost to the parents or guardians.

469.8(4) The activities in subrule 469.8(3) will be conducted by the person planning to perform the renovation, remodeling, or repainting or by the owner or operator of the child-occupied facility on behalf of this person. Regardless of who performs the notification activities required in subrule 469.8(3), the person conducting the renovation, remodeling, or repainting will be responsible for ensuring compliance with this rule and will be liable for any failures to comply with the notification requirements in this rule.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.9(10A) Certification of attempted delivery for child-occupied facilities. When the owner and, if different, operator of a child-occupied facility are unavailable for signature or refuse to sign the acknowledgment of receipt of the pamphlet, the person conducting the renovation, remodeling, or repainting is permitted by subrule 469.3(2) to certify delivery for each instance. The certification will include the address of the child-occupied facility undergoing renovation, remodeling, or repainting, the date and method of delivery of the pamphlet, name of the person delivering the pamphlet, reason for lack of acknowledgment (e.g., owner and, if different, operator refuse to sign), the signature of the individual conducting the renovation, remodeling, or repainting, and the date of signature.

469.9(1) *Unavailable for signature.*

a. If the owner and, if different, operator of the child-occupied facility are unavailable for signature, the certification will contain the following language:

> I certify that I have made a good-faith effort to deliver the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the child-occupied facility listed below at the dates and times indicated, and that the owner and, if different, operator of the child-occupied facility was unavailable to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the child-occupied facility with the owner and, if different, operator.

b. Below the statement, the certification will require the printed name and signature of the person conducting the renovation, remodeling, or repainting, the address of the child-occupied facility, the attempted delivery dates and times, and the date of signature.

469.9(2) *Refused to sign.*

a. If the owner and, if different, operator refuse to sign the acknowledgment, the certification will contain the following language:

> I certify that I have made a good-faith effort to deliver the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Renovate Right, to the child-occupied facility listed below at the dates and times indicated, and that the owner and, if different, operator refused to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the child-occupied facility.

b. Below the statement, the certification will require the printed name and signature of the person conducting the renovation, remodeling, or repainting, the address of the child-occupied facility, the attempted delivery dates and times, the location where the pamphlet was left at the child-occupied facility (e.g., taped to the door, slipped under the door), and the date of signature.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.10(10A) Subcontracts. In cases where renovation, remodeling, or repainting activities involve subcontracts, it is the responsibility of the person receiving the compensation from the property owner, or other party on behalf of the property owner, to provide the notification(s) described in rules 481—469.3(10A), 481—469.4(10A), 481—469.5(10A), and 481—469.6(10A).

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.11(10A) Exemption. Renovation, remodeling, or repainting in target housing or a child-occupied facility in which a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified pursuant to 481—Chapter 470 has made a written determination that the components affected by the renovation are free of lead-based paint and where the person conducting the renovation, remodeling, or repainting has obtained a copy of the written determination is exempt from the provisions of this chapter.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.12(10A) Recordkeeping requirements. A person who conducts renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility shall retain records necessary to demonstrate compliance with this chapter for a minimum of three years following completion of the renovation, remodeling, or repainting, including:

469.12(1) The address or location of the target housing or child-occupied facility where remodeling, renovation, or repainting was conducted.

469.12(2) A list of all known occupants of the dwelling units where renovation, remodeling, or repainting was conducted at the commencement of the work.

469.12(3) Copies of signed, dated acknowledgments, notifications, and notification materials required by subrules 469.3(2) and 469.4(2) and rule 481—469.7(10A).

469.12(4) Reports showing that a lead inspector/risk assessor or elevated blood level (EBL) inspector/risk assessor certified pursuant to 481—Chapter 470 has made a written determination that the components affected by the renovation are free of lead-based paint.

469.12(5) Certifications of attempted delivery as described in rule 481—469.6(10A).

469.12(6) Certificates of mailing as described in subrules 469.3(3) and 469.4(3).

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.13(10A) Compliance inspections. The department may enter the place of business of a person who conducts renovation, remodeling, or repainting for the purpose of enforcing the notification required by this chapter.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—469.14(10A) Enforcement.

469.14(1) The department may impose a civil penalty pursuant to Iowa Code section 10A.903(2) when it finds that a person has committed any of the following acts:

a. Failed or refused to comply with any requirements of this chapter.

b. Failed or refused to establish, maintain, provide, copy, or permit access to records or reports as required by this chapter.

c. Failed or refused to permit entry or inspection as described in subrule 469.14(1).

d. Falsified reports and records required by this chapter.

e. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

f. Failed to respond within 20 days of receipt of communication sent by the department by registered or certified mail.

g. Engaged in any conduct that subverts or attempts to subvert a department investigation.

h. Failed to comply with a subpoena issued by the department or failed to cooperate with a department investigation.

i. Failed to pay costs assessed in any disciplinary action.

469.14(2) Complaints may be submitted to the department using contact information as set forth in 481—Chapter 1. The complainant should provide the name of the person who performs renovation, remodeling, or repainting for compensation in target housing or a child-occupied facility and specific details of the person's noncompliance.

469.14(3) Civil penalties.

a. Before instituting any proceeding to impose a civil penalty under Iowa Code section 10A.903, the department will serve a written notice of violation upon the person charged. The notice of violation will specify the date or dates, facts, and the nature of the alleged act or omission with which the person is charged and will identify specifically the particular provision or provisions of the law, rule, regulation, or cease and desist order involved in the alleged violation and will state the amount of each proposed penalty. The notice of violation will also advise the person charged that the civil penalty may be paid in the amount specified therein, or the proposed imposition of the civil penalty may be protested in its entirety or in part, by a written answer, either denying the violation or showing extenuating circumstances. The notice of violation will advise the person charged that upon failure to pay a civil penalty subsequently determined by the department, if any, unless compromised, remitted, or mitigated, the fee may be collected by civil action.

b. Within 20 days of the date of a notice of violation or other time specified in the notice, the person charged may either pay the penalty in the amount proposed, answer the notice of violation, or request a contested case hearing. The answer to the notice of violation shall state any facts, explanations, and arguments denying the charges of violation or demonstrating any extenuating circumstances, error in the notice of violation, or other reason why the penalty should not be imposed and may request remission or mitigation of the penalty. If the person charged with a violation fails to answer within the time specified in paragraph 469.14(3)*"b,"* an order may be issued imposing the civil penalty in the amount set forth in the notice of violation described in paragraph 469.14(3)*"a."* If the person charged with a violation files an answer to the notice of violation, the department, upon consideration of the answer, will issue an order dismissing the proceeding or imposing, mitigating, or remitting the civil penalty. The person charged may, within 20 days of the date of the order or other time specified in the order, request a contested case hearing. If the person charged with a violation timely requests a contested case hearing, it will be initiated and held in accordance with 7—Chapter 2506 and 481—Chapter 10.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 6/11/25; Editorial change: IAC Supplement 8/5/26]

481—469.15(10A) Waivers. Rules in this chapter are not subject to waiver pursuant to 7—Chapter 2504 or any other provision of law.

[**ARC 8907C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code section 10A.903.

BOARD OF SPEECH PATHOLOGY AND AUDIOLOGY

CHAPTER 470
LEAD-BASED PAINT ACTIVITIES

[Prior to 4/2/25, see Public Health Department[641] Ch 70]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—470.1(10A) Applicability. This chapter applies to all persons who are lead professionals in Iowa, all firms that perform lead professional activities in Iowa, and training providers that offer training for lead professionals. This chapter addresses certification of lead professionals and establishes specific requirements for how lead-based paint activities will be performed if a property owner, manager, or occupant chooses to undertake them. Nothing in this chapter mandates a property owner, manager, or occupant to undertake any particular lead-based paint activity. This chapter also provides for the approval of courses that provide training for lead professionals.

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—470.2(10A) Definitions.

"Adequate quality control" means a plan or design that ensures the authenticity, integrity, and accuracy of samples, including dust, soil, and paint chip or paint film samples. Adequate quality control also includes provisions for representative sampling.

"Approved course" means a course that has been approved by the department for the training of lead professionals.

"Approved lead-safe work practices training program" means a lead-safe work practices training program that has been approved by the department.

"Arithmetic mean" means the algebraic sum of data values divided by the number of data values.

"Certified elevated blood lead (EBL) inspector/risk assessor" means a person who has met the requirements of rule 481—470.5(10A) for certification or interim certification and who has been certified by the department.

"Certified firm" means a firm that employs certified lead professionals and has met the requirements of rule 481—470.7(10A) for certification and has been certified by the department.

"Certified lead abatement contractor" means a person who has met the requirements of rule 481—470.5(10A) for certification or interim certification and who has been certified by the department.

"Certified lead abatement worker" means a person who has met the requirements of rule 481—470.5(10A) and who has been certified by the department.

"Certified lead inspector/risk assessor" means a person who has met the requirements of rule 481—470.5(10A) for certification or interim certification and who has been certified by the department.

"Certified lead professional" means a person who has been certified by the department as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, lead abatement worker, project designer, sampling technician, or lead-safe renovator.

"Certified lead-safe renovator" means a person who has met the requirements of rule 481—470.5(10A) for certification and who has been certified by the department.

"Certified project designer" means a person who has met the requirements of rule 481—470.5(10A) for certification or interim certification and who has been certified by the department.

"Certified sampling technician" means a person who has met the requirements of rule 481—470.5(10A) and who has been certified by the department.

"Chewable surface" means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew. Surfaces can be considered chewable even if there is no evidence of teeth marks.

"Child-occupied facility" means the same as defined in Iowa Code section 10A.903. "Child-occupied facility" also includes any building where lead-based paint activities are conducted immediately prior to or during the conversion of the building to a child-occupied facility.

"Cleaning verification card" means a card developed and distributed, or otherwise approved, by the U.S. Environmental Protection Agency (EPA) for the purpose of determining, through comparison of

wet and dry disposable cleaning cloths with the card, whether postrenovation cleaning has been properly completed.

"Clearance level" means the value at which the amount of lead in dust on a surface following completion of interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, rehabilitation, or renovation is a dust-lead hazard and fails clearance testing. The clearance level for a single-surface dust sample from a floor is greater than or equal to 5 micrograms per square foot. The clearance level for a single-surface dust sample from an interior windowsill is greater than or equal to 40 micrograms per square foot. The clearance level for a single-surface dust sample from a window trough is greater than or equal to 100 micrograms per square foot.

"Clearance testing" means an activity conducted following interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, rehabilitation, or renovation to determine that the hazard reduction activities are complete. Clearance testing includes a visual assessment, the collection and analysis of environmental samples, the interpretation of sampling results, and the preparation of a report.

"Common area" means a portion of the building that is generally accessible to all occupants. This includes, but is not limited to, hallways, stairways, laundry and recreational rooms, porches, exteriors, playgrounds, community centers, garages, and boundary fences.

"Common area group" means a group of common areas that are similar in design, construction, and function. Common area groups include but are not limited to hallways, stairwells, and laundry rooms.

"Complete criminal record" includes the complaint and judgment of conviction for each offense of which the applicant has been convicted, regardless of whether the offense is classified as a felony or a misdemeanor, and regardless of the jurisdiction in which the offense occurred.

"Component" or *"building component"* means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include but are not limited to interior components such as ceilings, crown moldings, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim (including sashes, window heads, jambs, sills or stools and troughs), built-in cabinets, columns, beams, bathroom vanities, countertops, and air conditioners; and exterior components such as painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, fascias, rake boards, cornerboards, bulkheads, doors and door trim, fences, floors, joists, latticework, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, windowsills or stools and troughs, casings, sashes and wells, and air conditioners. Each side of a door is considered a component within its respective room.

"Component type" means a group of like components constructed of the same substrate in the same multifamily housing.

"Composite sample" means the collection of more than one sample of the same medium (e.g., dust, soil, or paint) from the same type of surface (e.g., floor, interior windowsill, or window trough) such that multiple samples can be analyzed as a single sample.

"Concentration" means the relative content of a specific substance contained within a larger mass, such as the amount of lead (in micrograms per grams or parts per million of weight) in a sample of soil or dust.

"Containment" means a system of temporary barriers to protect workers, residents, and the environment by controlling exposures to the dust-lead hazards and debris created during renovation or lead abatement.

"Conviction" means a finding, plea, or verdict of guilt made or returned in a criminal proceeding, even if the adjudication of guilt is deferred, withheld, or not entered. "Conviction" includes Alford pleas and pleas of nolo contendere.

"Course agenda" means an outline of the key topics to be covered during a training course, including the time allotted to teach each topic.

"Course test" means an evaluation of the overall effectiveness of the training, which shall test the trainees' knowledge and retention of the topics covered during the course.

"Course test blueprint" means written documentation identifying the proportion of course test questions devoted to each major topic in the course curriculum.

"Department" means the Iowa department of inspections, appeals, and licensing.

"Deteriorated paint" means any interior or exterior paint or other coating that is cracking, flaking, chipping, peeling, or chalking, or any paint or coating located on an interior or exterior surface that is otherwise damaged or separated from the substrate of a building component.

"Discipline" means one of the specific types or categories of lead-based paint activities identified in this chapter for which individuals may receive training from approved courses and become certified by the department.

"Disqualifying offense" means a conviction directly related to the duties and responsibilities of the profession. A conviction is directly related to the duties and responsibilities of the profession if either (1) the actions taken in furtherance of an offense are actions customarily performed within the scope of practice of a certified profession, or (2) the circumstances under which an offense was committed are circumstances customary to a certified profession.

"Distinct painting history" means the application history, as indicated by its visual appearance or a record of application, over time, of paint or other surface coatings to a component or room.

"Documented methodologies" means methods or protocols used to sample for the presence of lead in paint, dust, and soil.

"Dripline" means the area within three feet surrounding the perimeter of a building.

"Dry disposable cleaning cloth" means a commercially available dry, electrostatically charged, white disposable cloth designed to be used for cleaning hard surfaces such as uncarpeted floors or countertops.

"Dry sanding" means sanding a surface that is partially coated with paint or other surface coating without moisture and includes hand and mechanical methods of sanding.

"Dry scraping" means scraping a surface that is partially coated with paint or other surface coating without moisture and includes hand and mechanical methods of scraping.

"Dust-lead hazard" means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead greater than or equal to 5 micrograms per square foot on floors, 40 micrograms per square foot on interior windowsills, and 100 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is greater than or equal to 5 micrograms per square foot on floors, 40 micrograms per square foot on interior windowsills, and 100 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property.

"Elevated blood lead (EBL) child" means any child who has had one venous blood lead level greater than or equal to 20 micrograms per deciliter or at least two venous blood lead levels of 15 to 19 micrograms per deciliter.

"Elevated blood lead (EBL) inspection" means an inspection to determine the sources of lead exposure for an elevated blood lead (EBL) child and the provision within ten working days of a written report explaining the results of the investigation to the property owner and occupant of the residential dwelling or child-occupied facility being inspected and to the parents of the elevated blood lead (EBL) child. A certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of an elevated blood lead (EBL) inspection.

"Emergency renovation" means renovation, remodeling, or repainting activities necessitated by nonroutine failures of equipment or of a structure that were not planned but resulted from a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard or threatens equipment or property with significant damage. "Emergency renovation" includes interim controls,

renovation, remodeling, or repainting activities that are conducted in response to an elevated blood lead (EBL) inspection.

"Encapsulant" means a substance that forms a barrier between lead-based paint and the environment using a liquid-applied coating (with or without reinforcement materials) or an adhesively bonded coating material.

"Encapsulation" means the application of an encapsulant.

"Enclosure" means the use of rigid, durable construction materials that are mechanically fastened to the substrate in order to act as a barrier between lead-based paint and the environment.

"Firm" means a company, partnership, corporation, sole proprietorship, individual doing business, association, or other business entity; a federal, state, tribal, or local government agency; or a nonprofit organization that performs or offers to perform lead-based paint activities.

"Friction surface" means an interior or exterior surface that is subject to abrasion or friction including but not limited to certain window, floor, and stair surfaces.

"Guest instructor" means an individual designated by the training program manager or principal instructor to provide instruction specific to the lecture, hands-on work activities, or work practice components of a course.

"Hands-on skills assessment" means an evaluation that tests the trainees' ability to satisfactorily perform the work practices and procedures identified in rule 481—470.6(10A), as well as any other skill taught in a training course.

"Hazardous lead-based paint" means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is greater than or equal to the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

"Hazardous waste" means any waste as defined in 40 CFR 261.3.

"HEPA exhaust control" means a HEPA vacuum attached to the machine in such a manner that it captures the air, dust, and debris disturbed by the machine.

"HEPA vacuum" means a vacuum cleaner that has been designed, operated, and maintained with a high-efficiency particulate air (HEPA) filter as the last filtration stage. A HEPA filter is a filter that is capable of capturing particles of 0.3 microns with 99.97 percent efficiency. The vacuum cleaner must be designed, operated, and maintained so that all of the air drawn into the machine is expelled through the HEPA filter with none of the air leaking past it. HEPA vacuums must be operated and maintained in accordance with the manufacturer's instructions.

"Housing for the elderly" means retirement communities or similar types of housing reserved for households composed of one or more persons 62 years of age or older or an age recognized as elderly by a specific federal housing assistance program.

"Immediate family" means spouse, parents and grandparents, children and grandchildren, brothers and sisters, mother-in-law and father-in-law, brothers-in-law and sisters-in-law, daughters-in-law and sons-in-law, and adopted and step family members.

"Impact surface" means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of door frames.

"Inconclusive classification" means any XRF reading falling within the inconclusive range on the performance characteristic sheet, including the boundary values defining the range.

"Interim controls" means a set of measures designed to temporarily reduce human exposure or likely exposure to lead-based paint hazards, including repairing deteriorated lead-based paint, specialized cleaning, maintenance, painting, temporary containment, ongoing monitoring of lead-based paint hazards or potential hazards, and the establishment and operation of management and resident education programs.

"Interior windowsill" means the portion of the horizontal window ledge that protrudes into the interior of the room.

"Lead abatement" means any measure or set of measures designed to permanently eliminate lead-based paint hazards in a residential dwelling or child-occupied facility. Lead abatement includes, but is

not limited to, (1) the removal of lead-based paint and dust-lead hazards, the permanent enclosure or encapsulation of lead-based paint, the replacement of lead-painted surfaces or fixtures, and the removal or covering of soil-lead hazards and (2) all preparation, cleanup, disposal, repainting or refinishing, and postabatement clearance testing activities associated with such measures. "Lead abatement" specifically includes projects for which there is a written contract or other documentation, which provides that an individual will be conducting lead abatement in or around a residential dwelling or child-occupied facility.

"Lead abatement" also includes but is not limited to (1) projects for which there is a written contract or other document, which provides that an individual will be conducting activities in or to a residential dwelling or child-occupied facility that shall result in or are designed to permanently eliminate lead-based paint hazards, (2) projects resulting in the permanent elimination of lead-based paint hazards that are conducted by firms or individuals certified under rule 481—470.5(10A), (3) projects resulting in the permanent elimination of lead-based paint hazards that are conducted by firms or individuals who, through their company name or promotional literature, represent, advertise, or hold themselves out to be in the business of performing lead abatement, and (4) projects resulting in the permanent elimination of lead-based paint that are conducted in response to a lead abatement order. However, in the case of items (1) through (4) of this definition, "lead abatement" does not include renovation, remodeling, landscaping, or other activities, when such activities are not designed to permanently eliminate lead-based paint hazards, but, instead, are designed to repair, restore, or remodel a given structure or dwelling, even though these activities may incidentally result in a reduction or elimination of lead-based paint hazards. Furthermore, "lead abatement" does not include interim controls, operations and maintenance activities, renovation, or other measures and activities designed to temporarily, but not permanently, reduce lead-based paint hazards.

"Lead-based paint" means paint or other surface coatings that contain lead greater than or equal to 1.0 milligram per square centimeter or greater than 0.5 percent by weight. Lead-based paint is present on any surface that is tested and found to contain lead greater than or equal to 1.0 milligram per square centimeter or greater than 0.5 percent by weight and on any surface like a surface tested in the same room equivalent that has a similar painting history and that is found to be lead-based paint.

"Lead-based paint activities" means, in the case of target housing and child-occupied facilities, lead-free inspection, lead inspection, elevated blood lead (EBL) inspection, lead hazard screen, risk assessment, lead abatement, visual risk assessment, clearance testing conducted after lead abatement, clearance testing conducted after renovation, clearance testing conducted after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, and renovation.

"Lead-based paint hazard" means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

"Lead-based paint hazard reduction activity" means an activity that permanently or temporarily reduces or eliminates lead-based paint hazards. "Lead-based paint hazard reduction activity" includes lead abatement, renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35.

"Lead-free inspection" means an inspection to determine whether a single dwelling unit or multifamily housing is free of lead-based paint and qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint and the provision of a written report explaining the results of the lead-free inspection and options for reducing lead-based paint hazards to the property owner and to the person requesting the lead inspection.

"Lead hazard screen" means a limited risk assessment activity that involves limited paint and dust sampling and the provision of a written report explaining the results of the lead hazard screen to the property owner and to the person requesting the lead hazard screen.

"Lead inspection" means a surface-by-surface investigation to determine the presence of lead-based paint and a determination of the existence, nature, severity, and location of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead-based paint hazards to the property owner and to the person requesting the lead inspection. A certified lead inspector/risk assessor or certified elevated blood

lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of a lead inspection.

"Lead professional" means a person who conducts lead abatement, renovation, lead inspections, elevated blood lead (EBL) inspections, lead hazard screens, risk assessments, visual risk assessments, clearance testing after lead abatement, clearance testing after renovation, paint testing, or clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35.

"Lead-safe renovator training program" means an eight-hour training program that provides training on how to work safely with lead-based paint.

"Lead-safe work practices" means methods that are used to minimize hazards when conducting renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35.

"Living area" means any area of a residential dwelling used by at least one child under the age of six years, including but not limited to living rooms, kitchen areas, dens, playrooms, and children's bedrooms.

"Loading" means the quantity of a specific substance present per unit of surface area, such as the amount of lead in micrograms contained in the dust collected from a certain surface area divided by the surface area in square feet or square meters.

"Mid-yard" means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

"Minor repair and maintenance activities" means activities, including minor heating, ventilation or air-conditioning work, electrical work, and plumbing, that disrupt less than the minimum areas of a painted surface established in this definition where none of the work practices prohibited or restricted by this chapter are used and where the work does not involve window replacement or demolition of painted surface areas. When painted components or portions of painted components are removed, the entire surface area removed is the amount of painted surface disturbed. Projects, other than emergency renovation, performed in the same room within the same 30 days will be considered the same project for the purpose of determining whether the project is a minor repair and maintenance activity. Renovations performed in response to an elevated blood lead (EBL) inspection are not considered minor repair and maintenance activities. The minimum area for minor repair and maintenance activities is:

1. Less than 1.0 square foot of an interior painted or finished wood surface per renovation;
2. Less than 6.0 square feet of a painted or finished drywall or plaster surface per room; or
3. Less than 20.0 square feet of an exterior painted or finished surface per renovation.

Projects performed pursuant to 24 CFR Part 35 shall comply with the de minimis levels in 24 CFR 35.1350 if these de minimis levels are more restrictive than the minimum areas of a painted surface established in this definition.

"Multifamily dwelling" means a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.

"Multifamily housing" means one or more multifamily dwellings that are under the same ownership or management.

"Negative classification" means any value defined by the performance characteristics sheet as indicating that lead-based paint is not present.

"NIST 1.02 standard film" means the National Institute of Standards and Technology 1.02 milligrams of lead per square centimeter standard reference material. If the specific 1.02 milligrams of lead per square centimeter standard is not available from NIST, then the lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the closest available standard from NIST (1.0X).

"Occupant protection plan" means a plan developed by a certified lead abatement contractor prior to the commencement of lead abatement in a residential dwelling or child-occupied facility that describes the measures and management procedures that will be taken during lead abatement to protect the building occupants from exposure to any lead-based paint hazards.

"Ongoing lead-based paint maintenance" means the maintenance of housing pursuant to 24 CFR Part 35.

"Painted component" means a component or building component that is at least partially covered with paint or other surface coating.

"Paint-lead hazard" means the presence of hazardous lead-based paint in a residential dwelling or a child-occupied facility.

"Paint sample" means a sample collected in a representative location using ASTM E1729, "Standard Practice for Field Collection of Dried Paint Samples for Lead Determination by Atomic Spectrometry Techniques," as effective on March 26, 2025, or equivalent method.

"Paint stabilization" means repairing any physical defect in the substrate of a painted surface that is causing paint deterioration, removing loose paint and other material from the surface to be treated, and applying a new protective coating or paint pursuant to 24 CFR Part 35.

"Paint testing" means the process of determining the presence or the absence of lead-based paint on a specific component or surface. Paint testing shall only be conducted by certified lead inspector/risk assessors or certified elevated blood lead (EBL) inspector/risk assessors using approved methods for testing. Approved methods for paint testing are XRF analysis and laboratory analysis.

"Performance characteristics sheet (PCS)" means an information sheet developed by the U.S. Environmental Protection Agency and U.S. Department of Housing and Urban Development that defines acceptable operating specifications and procedures for a specific model of X-ray fluorescence analyzer (XRF). The PCS contains information about XRF readings taken on specific substrates, calibration check tolerances, interpretation of XRF readings, and other aspects of the model's performance.

"Permanently covered soil" means soil that has been separated from human contact by the placement of a barrier consisting of solid, relatively impermeable materials, such as pavement or concrete. Grass, mulch, and other landscaping materials are not considered permanent covering.

"Play area" means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children's possessions, observations of play patterns, or information provided by parents, residents, caregivers, or property owners.

"Positive classification" means any value defined by the performance characteristics sheet as indicating the presence of lead-based paint.

"Postrenovation cleaning verification" means the use of a wet or dry disposable cleaning cloth to wipe the interior windowsill, window trough, uncarpeted floor, and countertops of the renovation work area and the comparison of the cloth to a cleaning verification card to determine if the work area has been adequately cleaned.

"Principal instructor" means the individual who has the primary responsibility for organizing and teaching a particular course.

"Public housing agency" or *"PHA"* means a state, county, municipality, or other governmental entity or public body that is authorized to engage in or assist in the development or operation of low-income housing. A PHA must be approved by the U.S. Department of Housing and Urban Development (HUD).

"Random selection" means a method of choosing residential dwellings from multifamily housing consisting of similarly constructed and maintained residential dwellings such that each residential dwelling has an equal chance of being selected.

"Recognized laboratory" means an environmental laboratory recognized by the U.S. Environmental Protection Agency pursuant to Section 405(b) of the federal Toxic Substance Control Act as capable of performing an analysis for lead compounds in paint, soil, and dust.

"Recognized test kit" means a commercially available kit recognized by the EPA under 40 CFR 745.88 as being capable of allowing a user to determine the presence of lead at levels equal to or in excess of 1.0 milligrams per square centimeter, or more than 0.5 percent by weight, in a paint chip, paint, powder, or painted surface.

"Reduction" means measures designed to reduce or eliminate human exposure to lead-based paint hazards through methods including interim controls and lead abatement.

"Reevaluation" means a visual assessment of painted surfaces and limited dust and soil sampling conducted periodically following a lead-based paint hazard reduction activity where lead-based paint is still present and the provision of a written report explaining the results of the reevaluation.

"Refresher training course" means a course taken by a certified lead professional to maintain certification in a particular discipline.

"Regulated entity" means any lead professional or firm that is regulated by the department by virtue of these rules, the Iowa Code, certification documents, approval documents, lead abatement notices, or other official regulatory promulgation.

"Rehabilitation" means the improvement of an existing structure through alterations, incidental additions, or enhancements. Rehabilitation includes repairs necessary to correct the results of deferred maintenance, the replacement of principal fixtures and components, improvements to increase the efficient use of energy, and installation of security devices.

"Renovation" means the modification of any existing structure, or portion thereof, that results in the disturbance of painted surfaces, unless that activity is performed as part of lead abatement as defined by this chapter. The term "renovation" includes, but is not limited to, the removal, modification, or repair of painted surfaces or painted components such as modification of painted doors, surface restoration, and window repair; surface preparation activity such as sanding, scraping, or other such activities that may generate paint dust; the partial or complete removal of building components such as walls, ceilings, and windows; weatherization projects such as cutting holes in painted surfaces to install blown-in insulation or to gain access to attics and planning thresholds to install weatherstripping; and interim controls that disturb painted surfaces. "Renovation" does not include minor repair and maintenance activities.

"Residential building" means a building containing one or more residential dwellings.

"Residential dwelling" means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including but not limited to garages, farm buildings, and fences, or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, that is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

"Risk assessment" means an investigation to determine the existence, nature, severity, and location of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead-based paint hazards to the property owner and to the person requesting the risk assessment.

"Room" means a separate part of the inside of a building, such as a bedroom, living room, dining room, kitchen, bathroom, laundry room, or utility room. To be considered a separate room, the room must be separated from adjoining rooms by built-in walls or archways that extend at least six inches from an intersecting wall. Half walls or bookcases count as room separators if built-in. Movable or collapsible partitions or partitions consisting solely of shelves or cabinets are not considered built-in walls. A screened-in porch that is used as a living area is a room. Each exterior side of the house is considered a separate room.

"Soil-lead hazard" means bare soil on residential real property or on the property of a child-occupied facility that contains total lead greater than or equal to 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is greater than or equal to 400 parts per million.

"Soil sample" means a sample collected in a representative location using ASTM E1727, "Standard Practice for Field Collection of Soil Samples by Atomic Spectrometry Techniques," as effective on March 26, 2025, or equivalent method.

"Standard treatments" means a series of hazard reduction measures designed to reduce all lead-based paint hazards in a residential dwelling without the benefit of a risk assessment or other evaluation pursuant to 24 CFR Part 35. Standard treatments consist of the stabilization of all deteriorated interior and exterior paint, the provision of smooth and cleanable horizontal hard surfaces, the correction of dust-generating conditions (i.e., conditions causing rubbing, binding, or crushing of surfaces known to or presumed to be coated with lead-based paint), and the treatment of bare soil to control known or presumed soil-lead hazards.

"State certification examination" means a discipline-specific examination approved by the department to test the knowledge of a person who has completed an approved training course and is applying for certification in a particular discipline. The state certification examination may not be administered by the provider of an approved course.

"Substrate" means the material underneath the paint or finish on a surface. Substrates are classified as brick, concrete, drywall, metal, plaster, or wood.

"Substrate correction" means adjustments that must be made to readings obtained from some X-ray fluorescence analyzers to correct for systematic biases due to interference from the substrate beneath the paint.

"Substrate correction value" means the value that is used to adjust readings obtained from some X-ray fluorescence analyzers to correct for systematic biases due to interference from the substrate beneath the paint.

"Targeted selection" means selecting residential dwellings from multifamily housing for risk assessments or lead hazard screens using information supplied by the property owner.

"Target housing" means housing constructed prior to 1978 with the exception of housing for the elderly or for persons with disabilities and housing that does not contain a bedroom, unless at least one child under the age of six years resides or is expected to reside in the housing for the elderly or persons with disabilities or housing that does not contain a bedroom. Target housing also includes any nonresidential building where lead-based paint activities are conducted prior to or during the conversion of the nonresidential building to target housing.

"Testing combination" means the unique combination of the room, component, substrate, and distinct painting history.

"Training hour" means at least 50 minutes of actual learning, including but not limited to time devoted to lecture, learning activities, small group activities, demonstrations, evaluations, or hands-on experience.

"Training manager" means the individual responsible for administering an approved course and monitoring the performance of principal instructors and guest instructors.

"Training program" means a person or organization sponsoring a lead professional training course(s).

"Visual inspection for clearance testing" means the visual examination of a residential dwelling or a child-occupied facility following lead abatement or following interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR 35.1340 to determine whether or not the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation has been successfully completed.

"Visual risk assessment" means a visual assessment to determine the presence of deteriorated paint or other potential sources of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the assessment to the property owner and to the person requesting the visual risk assessment. For the purpose of compliance with this chapter, housing quality standards inspections conducted in housing owned by a public housing authority and housing that is receiving tenant-based rental assistance from a public housing authority are not considered visual risk assessments.

"Weighted arithmetic mean" means the arithmetic mean of sample results weighted by the number of subsamples in each sample. Its purpose is to give influence to a sample relative to the surface area it represents. A single surface dust sample is comprised of a single dust subsample. A composite dust sample may contain from two to four dust subsamples of the same area as each other and of each single surface dust sample in the composite. The weighted arithmetic mean is obtained by summing, for all dust samples, the product of the dust sample's result multiplied by the number of dust subsamples in the dust sample, and dividing the sum by the total number of dust subsamples contained in all dust samples.

"Wet disposable cleaning cloth" means a commercially available, premoistened white disposable cloth designed to be used for cleaning hard surfaces such as uncarpeted floors or countertops.

"Wet mopping system" means a device with the following characteristics: a long handle, a mop head designed to be used with disposable absorbent cleaning pads, a reservoir for cleaning solution, and a built-in mechanism for distributing or spraying the cleaning solution onto a floor, or a method of equivalent efficiency.

"Wet sanding" means a process of removing loose paint in which a surface that is partially coated with paint or other surface coating is kept wet or moist during sanding to minimize the dispersal of paint chips and airborne dust.

"Wet scraping" means a process of removing loose paint in which a surface that is partially coated with paint or other surface coating is kept wet or moist during scraping to minimize the dispersal of paint chips and airborne dust.

"Windowsill" means the portion of the horizontal window ledge that protrudes into the interior of the room when the window is closed.

"Window trough" means, for a typical double-hung window, the portion of the exterior windowsill between the interior windowsill (or stool) and the frame of the storm window. If there is no storm window, the window trough is the area that receives both the upper and lower window sashes when they are both lowered. The window trough is sometimes referred to as the window well.

"Wipe sample" means a sample collected by wiping a representative surface of known area, as determined by ASTM E1728, "Standard Practice for Field Collection of Settled Dust Samples Using Wipe Sampling Methods for Lead Determination by Atomic Spectrometry Techniques," as effective on March 26, 2025, or equivalent method, with an acceptable wipe material as defined in ASTM E1792, "Standard Specification for Wipe Sampling Materials for Lead in Surface Dust," as effective on March 26, 2025. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches.

"Worksite" or *"work area"* means an interior or exterior area where lead-based paint hazard reduction activity or renovation takes place. There may be more than one worksite in a dwelling unit or at a residential property.

"Worst case selection" means conducting a walk-through survey of all residential dwellings in the multifamily housing to select the highest-risk residential dwellings for risk assessments or lead hazard screens.

"X-ray fluorescence analyzer" or *"XRF analyzer"* means an instrument that determines lead concentrations in milligrams per square centimeter (mg/cm^2) using the principle of X-ray fluorescence.

"XRF reading" means the number obtained when a surface is tested with an X-ray fluorescence analyzer.

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; **ARC 0595D**, IAB 9/16/26, effective 10/21/26]

481—470.3(10A) Lead professional certification.

470.3(1) A person or a firm that conducts lead abatement, renovation, clearance testing after lead abatement, lead-free inspections, lead inspections, elevated blood lead (EBL) inspections, lead hazard screens, risk assessments, visual risk assessments, clearance testing after renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 has to be certified by the department in the appropriate discipline. However, persons who perform these activities within residential dwellings that they, or an immediate family member, own and currently reside in, are not required to be certified.

470.3(2) Persons who perform renovation under the supervision of a certified lead-safe renovator, certified lead abatement contractor, or certified lead abatement worker and who have completed on-the-job training are not required to be certified. However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR Part 35.

470.3(3) Elevated blood lead (EBL) inspections are conducted only by certified elevated blood lead (EBL) inspector/risk assessors employed by or under contract with the department, a local board of health, or a public housing agency.

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—470.4(10A) Course approval and standards. All lead professional training courses for initial certification and refresher training must be approved by the department. Training programs shall not

state that they have been approved by the state of Iowa unless they have met the requirements of 641—70.4(10A) and been approved by the department.

470.4(1) Training courses shall meet the following requirements:

a. The training program offering the course will employ a training manager who has the following qualifications:

(1) A bachelor's or graduate degree in building construction technology, engineering, industrial hygiene, safety, public health, or a related field; or two years of experience in managing a training program specializing in environmental hazards.

(2) Demonstrated experience, education, or training in lead professional activities, including lead inspection, lead abatement, lead-safe work practices, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.

b. The training manager will designate a qualified principal instructor for each course who has the following qualifications:

(1) Demonstrated experience, education, or training in teaching workers or adults.

(2) Certification as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, or lead abatement contractor. In the case of a course for training lead-safe renovators, the principal instructor may be certified as a sampling technician.

(3) Demonstrated experience, education, or training in lead professional activities, including lead inspection, lead abatement, lead-safe work practices, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.

c. The principal instructor will be responsible for the organization of the course and oversight of the teaching of all course material. The training manager may designate guest instructors as needed to provide instruction specific to the lecture, hands-on activities, or work practice components of a course.

d. The training program shall ensure the availability of, and provide adequate facilities for, the delivery of the lecture, course test, hands-on training, and assessment activities. This includes providing training equipment that reflects current work practices and maintaining or updating the equipment as needed.

e. The training manager shall maintain the validity and integrity of the hands-on skills assessment to ensure that it accurately evaluates the trainees' performance of the work practices and procedures associated with the course topics contained in subrules 470.4(3) through 470.4(17).

f. The training manager shall maintain the validity and integrity of the course test to ensure that it accurately evaluates the trainees' knowledge and retention of the course topics.

g. The course test shall be developed in accordance with the test blueprint submitted with the course approval application.

h. The training program will issue unique course completion certificates to each student who passes the course. The course completion certificate shall be issued in color. The course completion certificate will include:

(1) The first name, last name and middle initial of the student.

(2) The address of the student.

(3) A photograph of the student, and a unique identification number.

(4) The name of the particular course that the student completed and the course length in hours.

(5) Dates of course completion and test passage.

(6) The name, address, and telephone number of the training program.

(7) The signature of the training manager.

i. The training manager will develop and implement a quality control plan. The plan shall be used to maintain and improve the quality of the training program over time. This plan shall contain at least the following elements:

(1) Procedures for periodic revision of training materials and the course test to reflect changes in regulations and recommended practices.

(2) Procedures for the training manager to conduct an annual review of the competency of the principal instructor and all other instructors.

j. The training program will offer courses that teach the work practice standards for conducting lead-based paint activities contained in rule 481—470.6(10A) and other standards developed by the department. These standards will be taught in the appropriate courses to provide trainees with the knowledge needed to perform the lead-based paint activities they are responsible for conducting.

k. The training manager will ensure that each course meets the requirements in this rule for the number of training hours and hours of hands-on training. The training manager will ensure that any student who misses more than 20 minutes of class time makes up the time before taking the course test.

l. The training manager will ensure that the training program complies at all times with all requirements in this rule.

m. The content of the lead training courses will be in accordance with the subjects described specifically in each lead discipline contained in rule 481—470.4(10A).

n. The hands-on activities, denoted by an asterisk (*), shall include subjects that are also denoted with an asterisk (*) and listed in the related lead discipline contained in rule 481—470.4(10A).

o. Each lead training course will conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course. The student may take the course test no more than three times within six months of completing the course. If an individual does not pass the course test within six months of completing the course, the individual must retake the appropriate approved course.

p. The instructor will provide an introduction of the online certification system used by the department. The instructor will advise each student on the procedures needed to apply to the department for certification and provide information to each student on the procedures needed for taking the state certification examination. The instructor will also provide each student with a current copy of this chapter and 481—Chapter 469.

q. All of the course materials must be provided to each student. The materials may be provided electronically unless an individual student requests that the materials be provided on paper.

r. The training manager shall allow the department to audit the training program to verify the contents of the application for approval and for reapproval.

s. The training program shall maintain, and make available to the department, upon request, the following records:

(1) All documents specified in paragraph 470.4(2)*"f."*

(2) Current curriculum/course materials and documents reflecting any changes made to these materials.

(3) The course test blueprint and the course test.

(4) Information regarding how the hands-on assessment is conducted including but not limited to who conducts the assessment, how the skills are graded, what facilities are used, and the pass/fail rate.

(5) The quality control plan as described in paragraph 470.4(1)*"i."*

(6) A file for each student who has completed a course. Each student file shall contain the following:

1. The student's name, address, and telephone number.
2. The student's test and answer sheet.
3. A copy of the student's course completion certificate.
4. A copy of the student's hands-on skill assessment, if applicable.
5. A photograph of the student as taken by the training program.

(7) A file for each individual course that has been offered. Each file shall include the following:

1. The dates of the course.
2. The location of the course.
3. The instructors who taught the course.
4. A paper or electronic copy of the curriculum used for the course.
5. A copy of the test used for the course.
6. Documentation of the times that each student was present at the course, including documentation of how a student made up missed time.
7. The course evaluations.

(8) Any other materials that have been submitted to the department as part of the program's application for approval.

t. The training program shall retain all required records at the address specified on the training program approval application for a minimum of six years.

u. The training program shall notify the department within 30 days of changing the address specified on its training program approval application or transferring the records from that address.

v. A training program shall notify the department at least seven days in advance of offering an approved course. The notification shall include the date(s), time(s), and location(s) where the approved course will be held. A training program shall notify the department at least 24 hours in advance of canceling an approved course.

w. The training program will take a digital photograph of each student. The digital photograph shall be the same photograph that appears on the training certificate and is submitted to the department. The photograph shall meet the following specifications:

(1) The individual will be facing the camera.

(2) The individual's head will not be tilted.

(3) The individual's head will cover approximately half of the photo area.

(4) The individual will be in front of a neutral or light-colored background.

(5) The individual will not wear any items that detract from the face, such as hats or sunglasses. Only head coverings worn for religious reasons may be worn. Religious head coverings may not cover the face of the individual.

(6) Photographs will be 24-bit color depth.

x. A training program shall roster each student who has taken the approved course into a database specified by the department. All students shall be rostered into the department database within 20 days of conclusion of an approved course. Rostering shall include:

(1) Name and address.

(2) Course completion certificate number.

(3) Test score.

(4) The photograph of each student as taken by the training program in a format specified by the department.

470.4(2) If a training program desires approval of a course by the department, the training program will apply to the department for approval at least 90 days before the initial offering of the course. The department may allow courses to be offered sooner if the department completes the approval in less than 90 days. The application shall include:

a. Training program name, contact person, address, email address, and telephone number.

b. Course for which approval is sought.

c. Course locations, including a description of the facilities and equipment to be used for lecture and hands-on training.

d. Course agenda, including approximate times allotted to each training segment.

e. A copy of each reference material, text, student manual, instructor manual, and audiovisual material used in the course.

f. The name(s) and qualifications of the training manager, principal instructor(s), and guest instructor(s). The following documents shall be submitted as evidence that training managers and principal instructors have the education, work experience, training requirements, or demonstrated experience required by subrule 470.4(1):

(1) Official transcripts or diplomas as evidence of meeting the education requirements.

(2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.

(3) Certificates from lead-specific training courses, as evidence of meeting the training requirements.

g. A copy of the course test blueprint.

h. A description of the activities and procedures that will be used for conducting the assessment of hands-on skills for each course.

i. Maximum class size.

j. A copy of the quality control plan for the course.

k. A nonrefundable fee of $200.

470.4(3) To be approved for the training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors, a course must be at least 40 training hours with a minimum of 12 hours devoted to hands-on training activities (*). Lead inspector/risk assessor and elevated blood lead (EBL) inspector/risk assessor training courses will cover at least the following subjects:

a. Role and responsibilities of an inspector/risk assessor.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Lead-based paint inspection methods, including selection of rooms and components for sampling or testing to determine if a property is free of lead-based paint as specified in the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing ((2012), U.S. Department of Housing and Urban Development), and methods to determine if lead-based paint hazards are present in a property.*

e. Paint, dust, and soil sampling methodologies.*

f. Clearance standards and testing, including random sampling.*

g. Collection of background information to perform a risk assessment.

h. Sources of environmental lead contamination such as paint, surface dust and soil, and water.

i. Visual inspection to identify lead-based paint hazards.*

j. Lead hazard screen protocol.

k. Visual risk assessment protocol.

l. Reevaluation protocol.

m. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint.*

n. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

o. Sampling for other sources of lead exposure.*

p. Interpretation of lead-based paint and other lead sampling results, including all applicable federal, state, and local guidance or regulations pertaining to lead-based paint hazards.*

q. Development of lead hazard control options.

r. The role of interim controls, operation and maintenance activities, and renovation in reducing lead-based paint hazards.

s. Approved methods for conducting lead-based paint abatement, interim controls, operation and maintenance activities, and renovation.

t. Prohibited methods for conducting lead-based paint abatement, interim controls, operation and maintenance activities, and renovation.

u. Interior dust abatement and cleanup.

v. Soil and exterior dust abatement and cleanup.

w. Preparation of the final reports for lead inspections, lead-free inspections, risk assessments, visual assessments, lead hazard screens, clearance testing after lead abatement, clearance testing after renovation, reevaluation, and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35.

x. Recordkeeping.

470.4(4) To be approved for the training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors who have already completed an approved sampling technician course, a course must be at least 20 training hours with a minimum of 8 hours devoted to hands-on training activities (*). The training course shall cover at least the following subjects:

a. Role and responsibilities of a lead inspector/risk assessor and elevated blood lead (EBL) inspector/risk assessor.

b. Lead-based paint inspection methods, including selection of rooms and components for sampling or testing to determine if a property is free of lead-based paint as specified in the work practice standards in rule 481—470.6(10A), and methods to determine if lead-based paint hazards are present in a property.*

c. Collection of background information to perform a risk assessment.

d. Lead hazard screen protocol.

e. Reevaluation protocol.

f. Sampling for other sources of lead exposure.*

g. Interpretation of lead-based paint and other lead sampling results, including all applicable federal, state, and local guidance or regulations pertaining to lead-based paint hazards.*

h. Development of lead hazard control options, including lead abatement.*

i. The role of interim controls, operation and maintenance activities, and renovation in reducing lead-based paint hazards.

j. Approved methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

k. Prohibited methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

l. Preparation of the final reports for lead inspections, lead-free inspections, risk assessments, lead hazard screens, reevaluation, and clearance testing after lead abatement.

m. Recordkeeping.

470.4(5) To be approved for the training of elevated blood lead (EBL) inspector/risk assessor, a course must be at least a four-hour training course and shall cover at least the following subjects:

a. Role and responsibility of an elevated blood lead (EBL) inspector/risk assessor.

b. Background information on childhood lead poisoning prevention programs in Iowa.

c. EBL lead inspection protocol described in this chapter and the EBL inspection protocol recommended by HUD.

d. Environmental and medical case management of lead-poisoned children.

e. Health effects of lead poisoning including an in-depth review of the scientific studies demonstrating the health effects of lead poisoning.

f. Chelation therapy including at what levels it is recommended and when it might not be needed.

g. Risk of childhood lead exposure from adult occupations or hobbies.

h. Case scenarios.*

470.4(6) To be approved for the training of lead abatement contractors, a course must be at least 40 training hours with a minimum of 12 hours devoted to hands-on activities (*) and shall cover at least the following subjects:

a. Role and responsibilities of a lead abatement contractor.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Liability and insurance issues relating to lead abatement, interim controls, and renovation.

e. Identification of lead-based paint and lead-based paint hazards.*

f. Interpretation of lead inspection reports.*

g. Development and implementation of an occupant protection plan, lead abatement report, and renovation report.

h. Respiratory protection and protective clothing.*

i. Employee information and training.

j. Approved methods for conducting lead abatement, interim controls, and renovation.*

k. Prohibited methods for conducting lead abatement, interim controls, and renovation.

l. Interior dust abatement and cleanup.*

m. Soil and exterior dust abatement and cleanup.*

n. Clearance standards and testing, including random sampling.

o. Cleanup, waste handling, and waste disposal.

p. In the case of renovation, interior and exterior containment and cleanup methods.*

q. In the case of renovation, providing on-the-job training to other workers.*

r. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

s. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

t. In the case of renovation, record preparation and recordkeeping.

u. Recordkeeping for lead abatement.

470.4(7) To be approved for the training of lead abatement contractors who have already completed an approved lead abatement worker course, a course must be at least 16 training hours with a minimum of 4 hours devoted to hands-on activities (*) and shall cover at least the following subjects:

a. Role and responsibilities of a lead abatement contractor.

b. Liability and insurance issues relating to lead abatement.

c. Interpretation of lead inspection reports.*

d. Development and implementation of an occupant protection plan and abatement report.

e. Employee information and training.

f. Clearance standards and testing, including random sampling.

g. Recordkeeping for lead abatement.

470.4(8) To be approved for the training of lead abatement workers, a course must be at least 24 training hours with a minimum of 8 hours devoted to hands-on activities (*) and shall cover at least the following subjects:

a. Role and responsibilities of a lead abatement worker.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Identification of lead-based paint and lead-based paint hazards.*

e. Approved methods for conducting lead abatement, interim controls, and renovation.*

f. Prohibited methods for conducting lead abatement, interim controls, and renovation.

g. Interior dust abatement and cleanup.*

h. Soil and exterior dust abatement and cleanup.*

i. Cleanup, waste handling, and waste disposal.

j. Respiratory protection and protective clothing.*

k. Personal hygiene.

l. In the case of renovation, interior and exterior containment and cleanup methods.*

m. In the case of renovation, providing on-the-job training to other workers.*

n. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

o. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

p. In the case of renovation, record preparation and recordkeeping.

470.4(9) To be approved for the training of sampling technicians, a course must be at least 20 training hours with a minimum of 4 hours devoted to hands-on training activities (*). The training course shall cover at least the following subjects:

a. Role and responsibilities of a sampling technician.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Methods of conducting visual risk assessments.*

e. Paint, dust, and soil sampling methodologies.*

f. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint.*

g. Clearance standards and testing.*

h. Identification of lead-based paint hazards.*

i. Sources of environmental lead contamination such as paint, surface dust and soil, and water.

j. Visual inspection to identify lead-based paint hazards.*

k. Approved methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

l. Prohibited methods for conducting lead abatement, interim controls, operation and maintenance activities, and renovation.

m. Methods of interim controls and lead abatement for interior dust and cleanup.

n. Methods of interim controls and lead abatement for exterior dust and soil and cleanup.

o. Preparation of the final visual assessment report.

p. Preparation of clearance testing reports for clearance testing after renovation and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35.

q. Recordkeeping.

470.4(10) To be approved for the training of project designers, a course must be at least 48 instructional training hours with a minimum of 12 hours devoted to hands-on activities (*) and shall cover at least the following subjects:

a. Role and responsibilities of a lead abatement contractor.

b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.

d. Liability and insurance issues relating to project design.

e. Identification of lead-based paint and lead hazards.*

f. Interpretation of lead inspection reports.*

g. Development and implementation of an occupant protection plan, lead abatement report, and renovation report.

h. Respiratory protection and protective clothing.*

i. Employee information and training.

j. Approved methods for conducting lead abatement, interim controls, and renovation.*

k. Prohibited methods for conducting lead abatement, interim controls, and renovation.

l. Interior dust abatement and cleanup.*

m. Soil and exterior dust abatement and cleanup.*

n. Clearance standards and testing, including random sampling.

o. Cleanup, waste handling, and waste disposal.

p. In the case of renovation, providing on-the-job training to other workers.*

q. In the case of renovation, procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

r. In the case of renovation, methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

s. In the case of renovation, record preparation and recordkeeping.

t. Recordkeeping for lead abatement.

u. Role and responsibilities of a project designer.

v. Development and implementation of an occupant protection plan for large-scale lead abatement projects.

w. Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.

x. Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.

y. Clearance standards and testing for large-scale lead abatement projects.

z. Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.

470.4(11) To be approved for the training of project designers who have already completed an approved lead abatement contractor course, a course must be at least eight instructional training hours and shall cover at least the following subjects:

a. Role and responsibilities of a project designer.

b. Development and implementation of an occupant protection plan for large-scale abatement projects.

c. Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.

d. Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.

e. Clearance standards and testing for large-scale lead abatement projects.

f. Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.

470.4(12) To be approved for the training of project designers who have already completed an approved lead abatement worker course, a course must be at least 24 instructional training hours with a minimum of 4 hours devoted to hands-on activities (*) and shall cover at least the following subjects:

a. Role and responsibilities of a lead abatement contractor.

b. Liability and insurance issues relating to lead abatement.

c. Interpretation of lead inspection reports.*

d. Development and implementation of an occupant protection plan and lead abatement report.

e. Employee information and training.

f. Clearance standards and testing, including random sampling.

g. Recordkeeping.

h. Role and responsibilities of a project designer.

i. Development and implementation of an occupant protection plan for large-scale lead abatement projects.

j. Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.

k. Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.

l. Clearance standards and testing for large-scale lead abatement projects.

m. Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.

470.4(13) To be approved for the training of lead-safe renovators, a course must be at least eight instructional training hours with a minimum of two hours devoted to hands-on activities (*) and shall cover at least the following subjects:

a. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

b. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint, lead-based paint activities, and renovation activities.

c. Procedures for using recognized test kits to determine whether paint is lead-based paint, including preparation of the required report.*

d. Renovation methods to minimize the creation of dust and lead-based paint hazards.*

e. Prohibited methods of renovation.

f. Interior and exterior containment and cleanup methods.*

g. Methods to ensure that the renovation has been properly completed, including postrenovation cleaning verification and clearance testing.*

h. Waste handling and disposal.

i. Providing on-the-job training to other workers.*

j. Record preparation and recordkeeping.

470.4(14) A refresher training course for sampling technicians, lead abatement contractors, lead abatement workers, and project designers must be at least eight hours of training. Pursuant to the recertification requirements of subrule 470.5(6), a refresher training course for lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors who completed an approved 24-hour training course must be at least 8 hours of training. Pursuant to the recertification requirements of subrule 470.5(6), a refresher training course for lead inspector/risk assessors and EBL inspector/risk assessors must be at least 16 hours of training. A refresher training course for lead-safe renovators must be at least four hours of training. All refresher training courses shall cover at least the following topics:

a. A review of the curriculum topics of the initial certification course for the appropriate discipline as listed in subrules 470.4(3) through 470.4(13).

b. An overview of current safety practices relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.

c. Current laws and regulations relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.

d. Current technologies relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.

470.4(15) Approvals of training courses shall expire three years after the date of issuance. The training manager will submit the following at least 30 days prior to the expiration date for a course to be reapproved:

a. Sponsoring organization name, contact person, address, and telephone number.

b. A list of the courses for which reapproval is sought.

c. A description of any changes to the training staff, facility, equipment, or course materials since the approval of the training program.

d. A statement signed by the training manager stating that the training program complies at all times with rule 481—470.4(10A).

e. A nonrefundable fee of $200.

470.4(16) The department shall consider a request for approval of a training course that has been approved by a state or tribe authorized by the U.S. Environmental Protection Agency.

a. The course shall be approved if it meets the requirements of rule 481—470.4(10A).

b. If the course does not meet all of the requirements of 481—470.4(10A), the department shall inform the training provider of additional topics and training hours that are needed to meet the requirements of rule 481—470.4(10A).

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; **ARC 0595D**, IAB 9/16/26, effective 10/21/26]

481—470.5(10A) Certification, interim certification, and recertification. The department issues certifications and recertifications for a three-year time period. Applications for certification or recertification may be made electronically in a format specified by the department or using a paper application supplied by the department.

470.5(1) To become a certified lead professional, provide the following information:

a. A completed application form.

b. A certificate of completion of an approved course for the discipline in which the applicant intends to become certified.

c. If intending to become a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor, documentation of successful completion of the manufacturer's training course or equivalent for the XRF analyzer that the inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use to conduct lead inspections.

d. If intending to become a certified elevated blood lead (EBL) inspector/risk assessor, documentation of successful completion of a four-hour elevated blood lead (EBL) inspector/risk assessor course.

e. Documentation that the applicant meets the additional experience and education requirements in subrule 470.5(2) for the discipline in which the applicant intends to become certified. The following

documents will be submitted as evidence that the applicant has the education and work experience required by subrule 470.5(2):

(1) Official transcripts or diplomas as evidence of meeting the education requirements.

(2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.

f. To become certified as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, or project designer, a certificate showing that the applicant has passed the state certification examination in the discipline in which the applicant intends to become certified.

g. A $180 nonrefundable fee.

h. A person may receive interim certification from the department as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, or project designer by submitting the items required by paragraphs 470.5(1)*"a"* through *"e"* and *"g"* to the department. Interim certification expires six months from the date of completion of an approved course. An applicant may upgrade an interim certification to a certification by submitting a certificate to the department showing that the applicant has passed the state certification examination as required by paragraph 470.5(1)*"f."* Interim certification is equivalent to certification.

470.5(2) To become certified as a lead professional, an applicant must meet the education and experience requirements for the appropriate discipline:

a. Lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors must meet one of the following requirements:

(1) Bachelor's degree and one year of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(2) Associate's degree and two years of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(3) High school diploma and three years of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(4) Certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian, registered environmental health specialist, or registered nurse.

b. Lead abatement contractors must meet one of the following requirements:

(1) One year of experience as a certified lead abatement worker.

(2) Two years of related experience or education (e.g., lead, housing inspection, building trades, property management and maintenance).

c. No additional education or experience is mandated for lead abatement workers.

d. Sampling technicians must meet one of the following requirements:

(1) Associate's degree.

(2) High school diploma and one year of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(3) Certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian, registered environmental health specialist, or registered nurse.

e. Project designers must meet one of the following requirements:

(1) Bachelor's degree in engineering, architecture, or a related profession, and one year of experience in building construction and design or a related field.

(2) Four years of experience in building construction and design or a related field.

f. No additional education or experience is mandated for lead-safe renovators.

470.5(3) Review of convictions.

a. Unless an applicant for licensure petitions the department for an eligibility determination pursuant to paragraph 470.5(3)*"b,"* the applicant's convictions will be reviewed when the department receives a completed certification application.

(1) An applicant must disclose all convictions on a certification application. Failure to disclose all convictions is grounds for certification denial or disciplinary action following certification issuance.

(2) An applicant with one or more convictions shall submit the complete criminal record for each conviction and a personal statement regarding whether each conviction directly relates to the practice of the profession in order for the certification application to be considered complete.

(3) An applicant should submit any evidence of rehabilitation that the applicant wishes to be considered by the department.

(4) The department may deny a certification if the applicant has a disqualifying offense unless the applicant demonstrates by clear and convincing evidence that the applicant is rehabilitated pursuant to Iowa Code section 272C.15.

(5) An applicant with disqualifying offenses who has been found rehabilitated must still satisfy all other requirements for certification.

(6) Application fees paid will not be refunded if the certification is denied.

b. An individual who has not yet submitted a completed certification application may petition the department for a determination of whether one or more of the individual's convictions are disqualifying offenses that would render the individual ineligible for certification. To do so, a petitioner shall submit all of the following:

(1) A completed petition for eligibility determination form;

(2) The complete criminal record for each of the petitioner's convictions;

(3) A personal statement regarding whether each conviction directly relates to the duties and responsibilities of the profession and why the department should find the petitioner rehabilitated;

(4) All evidence of rehabilitation that the petitioner wishes to be considered by the department; and

(5) Payment of a nonrefundable fee of $25.

c. A petitioner deemed ineligible or an applicant denied a certification because of a disqualifying offense may appeal the decision, in writing, within 20 days of the date of the department's written decision or in another manner and timeframe set forth in the department's written decision. A timely appeal will initiate a nondisciplinary contested case proceeding. The department's rules governing contested case proceedings at 7—Chapter 2506 and 481—Chapter 10 apply unless otherwise specified in this rule. If the petitioner or applicant fails to timely appeal, the department's written decision becomes a final order.

d. If a final order determines a petitioner is ineligible, the petitioner may not submit a subsequent petition for eligibility determination or a certification application prior to the date specified in the final order. If a final order denies a certification application, the applicant may not submit a subsequent certification application or a petition for eligibility determination prior to the date specified in the final order.

470.5(4) Individuals applying for renewal as lead professionals must submit the following:

a. A completed application form.

b. A $180 nonrefundable fee.

c. A certificate showing that the applicant has successfully completed an approved refresher training course for the appropriate discipline. The refresher training course has to be completed no more than three years prior to the date of the application for recertification.

470.5(5) The department will approve the state certification examinations for the disciplines of lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, and project designer. The state certification examination shall be administered by selected community college testing centers in Iowa. A community college testing center will set the fee for administering the state certification examination to each applicant and collect the fee from each applicant.

a. An individual must achieve a score of at least 80 percent on the examination. An individual may take the state certification examination no more than three times within six months of receiving a certificate of completion from an approved course.

b. If an individual does not pass the state certification examination within six months of receiving a certificate of completion from an approved course, the individual must retake the appropriate approved course before reapplying for certification.

470.5(6) Each applicant for certification who is certified in any of the disciplines specified in this rule in another state may request reciprocal certification. The department will evaluate the requirements for certification to determine that the requirements for certification in such other state are as protective of

health and the environment as the requirements for certification in Iowa. For all disciplines except lead-safe renovator and lead abatement worker, if the department determines that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa, the applicant may be certified after passing a proctored test covering Iowa-specific lead information with a score of at least 80 percent. For a lead-safe renovator and lead abatement worker, if the department determines that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa, the applicant may be certified after signing a statement indicating that the applicant has read and understands Iowa-specific lead information provided by the department. Each applicant for certification pursuant to this subrule will submit the appropriate application accompanied by the fee for each discipline as specified in rule 481—470.5(10A).

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

481—470.6(10A) Work practice standards for lead professionals conducting lead-based paint activities in target housing and child-occupied facilities. All lead-based paint activities shall be performed according to the work practice standards herein. A certified individual shall perform that activity in compliance with the standards herein.

470.6(1) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will conduct a lead-free inspection according to the following standards. A lead-free inspection will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting a lead-free inspection in a residential dwelling, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test paint in each room, including each exterior side.

(2) Except for components known to have been replaced after December 31, 1977, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test each testing combination in each room. On windows, the window frame, interior windowsill, window sash, and window trough will each be considered a separate testing combination. Except for walls, one sample will be taken for each testing combination in a room. Each wall in a room will be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will require one of the following two types of evidence to determine that components were replaced after 1977:

1. Detailed specifications showing which components were to be replaced, restored, enclosed, or encapsulated and evidence that the work was actually completed such as receipts for building materials, city building records showing a date of remodeling, or a final inspection by the city or another inspector showing that the work was actually completed.

2. A certification under penalty of perjury per Iowa Code section 622.1 from the contractor who did the work or from the person(s) who owned the property at the time outlining all of the components that were removed and replaced.

If one of these two types of evidence is not available, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test the component.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will note any components where lead-based paint has been enclosed or encapsulated. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not make a determination that the residential dwelling is lead-free where components that are painted with lead-based paint have been enclosed or encapsulated.

(4) Paint will be tested using adequate quality control by X-ray fluorescence (XRF) or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use standards provided by the manufacturer and the NIST 1.02 standard film for calibration of the X-ray fluorescence analyzer.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will take calibration readings consisting of an average of three readings at the beginning of the inspection, every four hours, and at the end of the inspection.

4. Prior to taking the final set of calibration readings and if recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will place the NIST 1.02 standard film over the surface and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean for these six readings and will subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If instructed by the property owner or the person requesting the report, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that inconclusive readings are positive, but will not assume that inconclusive readings are negative.

7. As described by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct retesting of ten surfaces, calculate the retest tolerance limit, and determine whether the inspection meets the retest tolerance limit. If the retest tolerance limit is not met, then this procedure will be repeated with ten additional surfaces. If the retest tolerance limit is not met with the 20 retested surfaces, then all results of the inspection will be considered invalid.

(5) If each testing combination in the residential dwelling is found to be free of lead-based paint, then the residential dwelling is free of lead-based paint. If any surface in the residential dwelling is found to be painted with lead-based paint, then the residential dwelling is not free of lead-based paint.

(6) If lead-based paint is identified through a lead-free inspection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct a visual inspection to determine

the presence of lead-based paint hazards and any other potential lead hazards including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

(7) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility where a lead-free inspection is completed. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the lead-free inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of each written report for no less than three years. The report will include, at least:

1. A statement that the inspection was conducted to determine whether the residential dwelling is free of lead-based paint;
2. Date of inspection;
3. Address of building;
4. Date of construction;
5. Apartment numbers (if applicable);
6. The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
7. Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;
8. Name and certification number of the certified firm(s) conducting the inspection;
9. Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
10. Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) device;
11. XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated at each required calibration;
12. Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;
13. The results of retesting of ten surfaces, calculations to determine the retest tolerance limit, and the determination of whether the inspection meets the retest tolerance limit;
14. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that the residential dwelling is free of lead-based paint, the report will contain the following statement:

"The results of this inspection indicate that no lead in amounts greater than or equal to 1.0 mg/cm^2 in paint was found on any building components, using the inspection protocol in Chapter 7 of the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing ((2012), U.S. Department of Housing and Urban Development). Therefore, this residential dwelling qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint, as defined in the rule. However, some painted surfaces may contain levels of lead below 1.0 mg/cm^2, which could create lead dust or lead-contaminated soil hazards if the paint is turned into dust by abrasion, scraping, or sanding. This report should be kept by the owner and all future owners for the life of the residential dwelling. Per the disclosure requirements of 24 CFR Part 35 and 40 CFR Part 745, prospective buyers are entitled to all available inspection reports should the property be resold.";

15. If any lead-based paint is identified, a description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;
16. A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure

is recommended, the report will recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

17. Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

18. Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation, remodeling and repainting found in 481—Chapter 470; and

19. The report will contain the following statement:

"The Iowa Department of Inspections, Appeals, and Licensing may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 481—470.3(10A) and 470.5(10A)."

b. When conducting a lead-free inspection in multifamily housing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following procedures:

(1) A certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may randomly select residential dwellings for testing when conducting a lead-free inspection in multifamily housing. If built before 1960 or if the date of construction is unknown, the multifamily housing will contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing will contain at least ten similarly constructed and maintained residential dwellings in order to use random selection. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not randomly select the residential dwellings for testing or if there are not enough residential dwellings to randomly select them for sampling, all residential dwellings will be tested. If random selection is used, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor conducting the lead-free inspection will randomly select the residential dwellings to be tested. The property owner, manager, or another interested party will not specify which residential dwellings are to be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the number of residential dwellings to randomly select for testing.

Table 1

Minimum Number of Residential Dwellings to be Randomly Selected in Multifamily Housing for Lead-Free Inspection, Risk Assessment, Lead Hazard Screen, or Clearance Testing

Number of Similar Residential Dwellings, Similar Common Areas, or Similar Exteriors in Multifamily Housing	Lead-Free Inspection, Risk Assessment, or Lead Hazard Screen		Clearance Testing
	Number of Pre-1960 Residential Dwellings or Residential Dwellings of Unknown Date of Construction to Randomly Select for Testing	Number of 1960-1977 Residential Dwellings to Randomly Select for Testing	Number of Residential Dwellings to Randomly Select for Clearance Testing

(2) A certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may randomly select each type of common area in the multifamily housing, including but not limited to hallways, exterior sides of a building, and laundry rooms, for testing. Each type of common area will be counted separately. If built before 1960, the multifamily housing will contain at least 20 of a type of common area in order to use random selection. If built from 1960 to 1977, the multifamily housing will contain at least ten of a type of common area in order to use random selection. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not randomly select the common areas for testing or if there are not enough common areas to randomly select them for testing, all common areas will be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the number of each type of common area to randomly select for testing.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test paint in each room of each residential dwelling selected for testing and in each common area selected for testing.

(4) Except for components known to have been replaced after December 31, 1977, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test each testing combination in each room of a residential dwelling chosen for testing and in each common area chosen for testing. On windows, the window frame, interior windowsill, window sash, and window trough will each be considered a separate testing combination. Each wall in a room or a common area will be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will require one of the following two types of evidence to determine that components were replaced after 1977:

1. Detailed specifications showing which components were to be replaced, restored, enclosed, or encapsulated and evidence that the work was actually completed such as receipts for building materials, city building records showing a date of remodeling, or evidence of a final inspection by the city or another inspector showing that the work was actually completed.

2. A certification under penalty of perjury per Iowa Code section 622.1 from the contractor who did the work or from the person(s) who owned the property at the time outlining all of the components that were removed and replaced.

If one of these two types of evidence is not available, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test the component.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will note any components where lead-based paint has been enclosed or encapsulated. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not make a determination that a component or the multifamily housing is lead-free where components that are painted with lead-based paint have been enclosed or encapsulated.

(6) Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not use an X-ray fluorescence analyzer using a software version or a mode of operation that could result in inconclusive readings or that recommends substrate correction.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use standards provided by the manufacturer and the NIST 1.02 standard film for calibration of the X-ray fluorescence analyzer.

4. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will take calibration readings consisting of an average of three readings at the beginning of the inspection, every four hours, and at the end of the inspection.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will classify each XRF reading as positive or negative according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will count the number of XRF readings taken for each component type. If fewer than 40 of any component type were tested, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will randomly choose additional testing combinations for the component type to reach a total of 40 XRF readings. If fewer than 40 testing combinations are available for testing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test each testing combination.

(7) For each component type where at least 40 testing combinations have been tested, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will determine the number and percentage of each component type that is classified as positive or negative. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will classify each component type as follows:

1. Lead-based paint is not present on a component type if all readings are classified as negative.

2. Lead-based paint is present on a component type if at least 15 percent of the readings are classified as positive.

3. Lead-based paint is present on a component type if greater than or equal to 5 percent but less than 15 percent of the XRF readings are classified as positive, unless the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor collects paint samples and obtains laboratory analyses for all positive XRF readings. If the laboratory analyses show that lead-based paint is not present on any components, then the component type is negative. If the laboratory analyses show that lead-based paint is present on any component, then the component type is positive.

4. Lead-based paint is present on a component type if greater than 0 but less than 5 percent of the XRF readings are classified as positive, unless the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor collects paint samples and obtains laboratory analyses for all positive XRF readings or randomly selects a second set of residential dwellings for testing. If the laboratory analyses show that lead-based paint is not present on any components, then the component type is negative. If the laboratory analyses show that lead-based paint is present on any component, then the component type is positive. If a second set of randomly selected residential dwellings is sampled and greater than 0 but less than 2.5 percent of the combined set of results is positive, the component type may be considered as not having lead-based paint development-wide but rather, having lead-based paint in isolated locations, with a reasonable degree of confidence. Individual components that are classified as positive should be considered lead-based painted and managed or abated appropriately.

5. If a particular component type in the sampled residential dwellings is classified as positive, that same component type in the unsampled residential dwellings is also classified as positive.

(8) If fewer than 40 of a component type are available for testing, each testing combination will be classified individually as positive or negative.

(9) If any component type or individual component is classified as positive, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not state that the multifamily housing is free of lead-based paint.

(10) As specified by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct retesting of ten surfaces selected from two residential dwellings, calculate the retest tolerance limit, and determine whether the inspection meets the retest tolerance limit. If the retest tolerance limit is not met, then this procedure will be repeated with ten additional surfaces selected from the two residential dwellings. If the retest tolerance limit is not met with the 20 retested surfaces, then all results of the inspection will be considered invalid.

(11) If lead-based paint is identified on any component or component type, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

(12) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility inspected. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of each written report for no less than three years. The inspection report will include, at least:

1. Date of each inspection;
2. Address of each building in the multifamily housing;
3. Date of construction for each building in the multifamily housing;
4. A list of the apartments and common areas in each building in the multifamily housing;
5. The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
6. A statement that the inspection was conducted to determine that lead-based paint is not present;
7. The name of the Iowa-certified inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor who randomly selected the residential dwellings and common areas for testing;
8. The number of residential dwellings and common areas that were selected for testing, how these numbers were determined, and a list of the residential dwellings and common areas that were selected for testing;
9. Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;
10. Name and certification number of the certified firm(s) conducting the inspection;
11. Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
12. Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any XRF analyzer;
13. XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated at each required calibration;
14. Specific locations by room of each painted component tested for the presence of lead-based paint and by residential dwelling or common area and the results for each component expressed in terms appropriate to the sampling method used;
15. Component aggregations and the determination of whether lead-based paint is present by component type;
16. The results of retesting of ten surfaces, calculations to determine the retest tolerance limit, and the determination of whether the inspection meets the retest tolerance limit;
17. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that the multifamily housing is free of lead-based paint, the report will contain the following statement:

"The results of this inspection indicate that no lead in amounts greater than or equal to 1.0 mg/cm^2 in paint was found on any building components, using the inspection protocol in Chapter 7 of the Guidelines

for the Evaluation and Control of Lead-Based Paint Hazards in Housing ((2012), U.S. Department of Housing and Urban Development). Therefore, this multifamily housing qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint, as defined in the rule. However, some painted surfaces may contain levels of lead below 1.0 mg/cm^2, which could create lead dust or lead-contaminated soil hazards if the paint is turned into dust by abrasion, scraping, or sanding. This report should be kept by the owner and all future owners for the life of the multifamily housing. Per the disclosure requirements of 24 CFR Part 35 and 40 CFR Part 745, prospective buyers are entitled to all available inspection reports should the property be resold.";

18. If any lead-based paint is identified, a description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

19. A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report will recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

20. Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

21. Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469 and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

22. The report will contain the statement set forth in numbered paragraph 470.6(1)*"a"*(7)"19."

470.6(2) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will conduct lead inspections according to the following standards. Lead inspections will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting a lead inspection in a residential dwelling or child-occupied facility, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test paint in each room, including each exterior side.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test each testing combination in each room. On windows, the window frame, interior windowsill, window sash, and window trough will each be considered a separate testing combination. One sample will be taken for each testing combination in a room, including the walls. If a testing combination is painted and not tested, it will be assumed to be painted with lead-based paint.

b. Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean for these six readings and will subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that all of the readings are positive and will not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that the inconclusive readings are positive.

c. If lead-based paint is identified through an inspection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

d. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility inspected. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a

certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of each written report for no less than three years. The inspection report will include, at least:

(1) A statement that the inspection was conducted to identify lead-based paint and lead-based paint hazards in the residential dwelling;

(2) Date of each inspection;

(3) Address of building;

(4) Date of construction;

(5) Apartment numbers (if applicable);

(6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(7) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;

(8) The name and certification number of the certified firm(s) conducting the inspection;

(9) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any XRF analyzer;

(11) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

(13) A statement that all painted or finished components that were not tested will be assumed to contain lead-based paint;

(14) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(15) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report will recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(16) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(17) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

(18) The report will contain the statement as set forth in numbered paragraph 470.6(1)*"a"*(7)"19."

470.6(3) A certified elevated blood lead (EBL) inspector/risk assessor will conduct elevated blood lead (EBL) inspections according to the following standards. Elevated blood lead (EBL) inspections will be conducted only by a certified elevated blood lead (EBL) inspector/risk assessor. This protocol may be used for children who do not meet the definition of an EBL child as defined in this chapter as long as the inspection is authorized by the department, a local board of health, or a public housing agency.

a. When conducting an elevated blood lead (EBL) inspection, the certified elevated blood lead (EBL) inspector/risk assessor will use the following procedures:

(1) The certified elevated blood lead (EBL) inspector/risk assessor will test paint in each room, including each exterior side.

(2) The certified elevated blood lead (EBL) inspector/risk assessor will test each testing combination in each room. One sample will be taken for each testing combination in a room, including walls. On windows, the window frame, interior windowsill, window sash, and window trough will each be considered

a separate testing combination. If a testing combination is painted and not tested, it will be assumed to be painted with lead-based paint.

b. Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

(1) The certified elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified elevated blood lead (EBL) inspector/risk assessor will use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified elevated blood lead (EBL) inspector/risk assessor will not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified elevated blood lead (EBL) inspector/risk assessor will take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified elevated blood lead (EBL) inspector/risk assessor will conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified elevated blood lead (EBL) inspector/risk assessor will completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified elevated blood lead (EBL) inspector/risk assessor will remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified elevated blood lead (EBL) inspector/risk assessor will place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean for these six readings and will subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified elevated blood lead (EBL) inspector/risk assessor will then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. If the certified elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified elevated blood lead (EBL) inspector/risk assessor will assume that all of the readings are positive and will not state that a surface is free of lead-based paint.

(5) The certified elevated blood lead (EBL) inspector/risk assessor will classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified elevated blood lead (EBL) inspector/risk assessor will resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings, then the certified elevated blood lead (EBL) inspector/risk assessor will assume that the inconclusive readings are positive.

c. If lead-based paint is identified through an elevated blood lead (EBL) inspection, the certified elevated blood lead (EBL) inspector/risk assessor will conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

d. No later than two weeks after the receipt of laboratory results, a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied

facility where an elevated blood lead (EBL) inspection has been conducted and will provide a copy of this report to the property owner and the occupant of the dwelling. The report will include, at least:

(1) A statement that the elevated blood lead (EBL) inspection was conducted to identify lead-based paint and lead-based paint hazards in the residential dwelling;

(2) Date of each elevated blood lead (EBL) inspection;

(3) Address of building;

(4) Date of construction;

(5) Apartment numbers (if applicable);

(6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(7) Name, signature, and certification number of each certified elevated blood lead (EBL) inspector/risk assessor conducting the inspection;

(8) Name and certification number of the certified firm(s) conducting the inspection;

(9) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any XRF analyzer;

(11) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

(13) A statement that all painted or finished components that were not tested will be assumed to contain lead-based paint;

(14) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(15) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report will recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(16) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(17) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

(18) The report will contain the statement set forth in numbered paragraph 470.6(1)*"a"*(7)"19."

e. A certified elevated blood lead (EBL) inspector/risk assessor will maintain for no fewer than ten years a written record for each residential dwelling or child-occupied facility where an elevated blood lead (EBL) inspection has been conducted. The record will include, at least:

(1) A copy of the written report required by paragraph 470.6(3)*"d."*

(2) Blood lead test results for the elevated blood lead (EBL) child.

(3) A record of conversations held with the owners and occupants of each residential dwelling or child-occupied facility prior to, during, and after the EBL inspection.

(4) Records of follow-up visits made to each residential dwelling or child-occupied facility where lead-based paint hazards are identified and, when issued, a copy of the clearance report.

470.6(4) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will conduct lead hazard screens according to the following standards. Lead hazard screens will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years will be collected.

b. A visual inspection of the residential dwelling or child-occupied facility will be conducted to determine if any deteriorated paint is present and to locate at least two dust sampling locations.

c. If deteriorated paint is present, each surface with deteriorated paint that is determined to have a distinct painting history will be tested for the presence of lead. In addition, friction surfaces where there is evidence of abrasion and impact surfaces that are damaged or otherwise deteriorated from impact and that have a distinct painting history will be tested for the presence of lead.

d. In residential dwellings, a minimum of two composite or single-surface dust samples will be collected. One sample will be collected from the floors and the other from the interior windowsills in rooms, hallways, or stairwells where at least one child under the age of six years is most likely to come in contact with dust.

e. In multifamily dwellings and child-occupied facilities, single-surface or composite dust samples will also be collected from common areas where at least one child under the age of six years is likely to come in contact with dust.

f. Dust samples will be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample will be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample will be 0.25 square feet or 36 square inches. Dust samples will be analyzed by a recognized laboratory to determine the level of lead.

g. Soil samples will be collected and analyzed for lead content in exterior play areas and dripline areas where bare soil is present. In addition, soil samples will be collected and analyzed for lead content from any other areas of the yard where bare soil is present. Soil and paint samples will be collected using the documented methodologies specified in guidance documents issued by the department and will be analyzed by a recognized laboratory to determine the level of lead.

h. Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the National Institute of Standards and Technology 1.02 milligrams of lead per square centimeter standard reference material or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk

assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean for these six readings and will subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that all the readings are positive and will not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that the inconclusive readings are positive.

i. The following standards will be used to determine whether a residential dwelling or child-occupied facility fails a lead hazard screen:

(1) A residential dwelling or child-occupied facility will fail a lead hazard screen if any deteriorated paint or paint on friction or impact surfaces is found to be lead-based paint.

(2) A residential dwelling will fail a lead hazard screen if any floor dust lead level in a single- surface or composite-surface dust sample is greater than or equal to 25 micrograms per square foot.

(3) A residential dwelling will fail a lead hazard screen if any interior windowsill dust level in a single-surface or composite-surface dust sample is greater than or equal to 125 micrograms per square foot.

(4) A residential dwelling or child-occupied facility will fail a lead hazard screen if any bare soil is found to be a soil-lead hazard.

j. When conducting a lead hazard screen in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing will contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing will contain at least ten similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 2 to determine the number of residential dwellings to test. If the multifamily

housing has fewer than five similar dwellings, all residential dwellings will be tested. Residential dwellings chosen by targeted selection will meet as many of the following criteria as possible:

1. The residential dwelling has been cited with a housing or building code violation within the past year.
2. The property owner believes that the residential dwelling is in poor condition.
3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will give preference to residential dwellings that house the largest number of children.
4. The residential dwelling serves as a day care facility.
5. The residential dwelling has been prepared for reoccupancy within the past three months. If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will select them randomly. If too many residential dwellings meet the criteria, residential dwellings will be eliminated randomly.

Table 2

Minimum Number of Residential Dwellings in Multifamily Housing for Risk Assessment or Lead Hazard Screen Through Targeted Selection

Number of Similar Residential Dwellings	Number of Residential Dwellings to Sample*
1-4	All
5-20	4 residential dwellings or 50% (whichever is greater)**
21-75	10 residential dwellings or 20% (whichever is greater)**
76-125	17
126-175	19
176-225	20
226-300	21
301-400	22
401-500	23
501+	24 + 1 residential dwelling for each additional increment of 100 residential dwellings or less

*Does not include residential dwellings housing children with elevated blood lead levels.
**For percentages, round up to determine number of residential dwellings to be sampled.

k. If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings will be tested.

l. The following standards will be used to determine whether multifamily housing fails a lead hazard screen:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean of the dust lead levels for carpeted floors, uncarpeted floors, and interior windowsills. If the arithmetic mean for carpeted floors or uncarpeted floors is greater than or equal to 25 micrograms per square foot, the multifamily housing will fail the lead hazard screen. If the arithmetic mean for interior windowsills is greater than or equal to 125 micrograms per square foot, the multifamily housing will fail the lead hazard screen. If the arithmetic mean for carpeted floors or uncarpeted floors is less than 25 micrograms per square foot, but some of the samples have dust lead levels that are greater than or equal to 25 micrograms per square foot, then the residential dwellings where these samples were taken and all other similar residential dwellings in the multifamily housing will fail the lead hazard screen. If the arithmetic mean for interior windowsills is less than 125 micrograms per square foot, but some of the samples have dust lead levels that are greater than or equal to 125 micrograms per square foot, then the residential dwellings where these samples were taken and all other similar residential dwellings in the multifamily housing will fail the lead hazard screen.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined to not be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that the component is a lead-based paint hazard in all similar residential dwellings. If a component in a residential dwelling is determined or assumed to be lead-based paint, then the entire group of similar residential dwellings in the multifamily housing will fail the lead hazard screen.

(3) Multifamily housing will fail a lead hazard screen if any bare soil is found to be a soil-lead hazard.

m. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility where a lead hazard screen is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the lead hazard screen, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of each written report for no less than three years. The report will include, at least:

(1) Date of each lead hazard screen.

(2) Address of building.

(3) Date of construction.

(4) Apartment numbers (if applicable).

(5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility.

(6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the lead hazard screen.

(7) Name and certification number of the certified firm(s) conducting the lead hazard screen.

(8) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).

(9) Results of the visual inspection.

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any XRF analyzer.

(11) If used, XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated.

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component tested expressed in terms appropriate to the sampling method used.

(13) All results of laboratory analysis of collected paint, dust, and soil samples. The results of dust sampling will be reported in micrograms of lead per square foot, and the results of soil sampling will be reported in parts per million of lead. Results will not be reported as “not detectable.”

(14) Any other sampling results.

(15) A statement that all painted or finished components that were not tested will be assumed to contain lead-based paint.

(16) Background information collected regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years.

(17) Whether the residential dwelling or child-occupied facility passed or failed the lead hazard screen and recommendations, if warranted, for a follow-up lead inspection or risk assessment, and, as appropriate, any further actions.

(18) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

(19) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470.

(20) The report will contain the statement set forth in numbered paragraph 470.6(1)*"a"*(7)"19."

470.6(5) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will conduct risk assessments according to the following standards. Risk assessments will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years will be collected.

b. A visual inspection for risk assessment will be undertaken to locate the existence of deteriorated paint and other potential lead hazards and to assess the extent and causes of the paint deterioration.

c. If deteriorated paint is present, each surface with deteriorated paint that is determined to have a distinct painting history will be tested for the presence of lead.

d. Friction surfaces where there is evidence of abrasion and impact surfaces that are damaged or otherwise deteriorated from impact and that have a distinct painting history will be tested for the presence of lead.

e. In residential dwellings, dust samples will be collected from the interior windowsill, window trough, and floor in all living areas where at least one child is most likely to come in contact with dust. Dust samples will be analyzed for lead concentration and may be either composite or single-surface samples.

f. In multifamily dwellings, dust samples will also be collected from interior windowsills, window troughs, and floors in common areas adjacent to the sampled residential dwellings or child-occupied facility and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust. Dust samples will be analyzed for lead concentration and may be either composite or single-surface samples.

g. In child-occupied facilities, dust samples will be collected from the interior windowsill, window trough, and floor in each room, hallway, or stairwell utilized by one or more children under the age of six years and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust. Dust samples will be analyzed for lead concentration and may be either composite or single-surface samples.

h. Soil samples will be collected and analyzed for lead content in exterior play areas and dripline areas where bare soil is present. In addition, soil samples will be collected and analyzed for lead content from any other areas of the yard where bare soil is present.

i. Dust samples will be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample will be 0.50 square feet. The minimum area for a windowsill wipe sample and for a window trough wipe sample will be 0.25 square feet. Soil and paint samples will be collected using the documented methodologies specified in guidance documents issued by the department. Dust and soil samples will be analyzed by a recognized laboratory to determine the level of lead. The results of dust sampling will be reported in micrograms of lead per square foot, and the results of soil sampling will be reported in parts per million of lead. The results will not be reported as "not detectable."

j. Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department.

(1) If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the NIST 1.02 standard film material or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(2) Subparagraphs 470.6(4)*"h"*(3) through 470.6(4)*"h"*(6) are restated as if fully set forth herein.

k. When conducting a risk assessment in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing will contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing will contain at least ten similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings will be tested. Residential dwellings chosen by targeted selection will meet as many of the following criteria as possible. If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will select them randomly. If too many residential dwellings meet the criteria, residential dwellings will be eliminated randomly. Targeted selection criteria are as follows:

1. The residential dwelling has been cited with a housing or building code violation within the past year.

2. The property owner believes that the residential dwelling is in poor condition.

3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will give preference to residential dwellings that house the largest number of children.

4. The residential dwelling serves as a day care facility.

5. The residential dwelling has been prepared for reoccupancy within the past three months.

(3) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings will be tested.

(4) The following standards will be used to determine the extent of lead-based paint hazards throughout multifamily housing that is sampled by random selection, targeted selection, or worst case selection:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean of the dust lead levels for carpeted floors, uncarpeted floors, interior windowsills, and window troughs. If the arithmetic mean is greater than or equal to the level defined as a dust lead hazard for the component, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will determine that a dust lead hazard has been identified on the component throughout the multifamily housing. If the arithmetic mean is less than the level defined as a dust lead

hazard for the component, but some of the individual components have dust lead levels that are greater than or equal to the level defined as a dust lead hazard, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will determine that a dust lead hazard has been identified on the individual components and on all other similar components throughout the multifamily housing.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined to not be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that the component is a lead-based paint hazard in all similar residential dwellings.

l. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility where a risk assessment is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the risk assessment, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of the report for no less than three years. The report will include, at least:

(1) Date of each risk assessment;

(2) Address of building;

(3) Date of construction;

(4) Apartment numbers (if applicable);

(5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the risk assessment;

(7) Name and certification number of the certified firm(s) conducting the risk assessment;

(8) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b));

(9) Results of the visual inspection;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any XRF analyzer;

(11) If used, XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component tested expressed in terms appropriate to the sampling method used;

(13) All results of laboratory analysis of collected paint, dust, and soil samples;

(14) Any other sampling results;

(15) A statement that all painted or finished components that were not tested will be assumed to contain lead-based paint;

(16) Background information collected regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years;

(17) To the extent that they are used as part of the lead-based paint hazard determination, the results of any previous inspections or analyses for the presence of lead-based paint, or other assessments of lead-based paint hazards;

(18) A description of the location, type, and severity of identified lead-based paint hazards, and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(19) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report will recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(20) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(21) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

(22) The report will contain the statement set forth in numbered paragraph 470.6(1)*"a"*(7)"19."

470.6(6) A certified lead abatement contractor or certified lead abatement worker will conduct lead abatement according to the following standards. Lead abatement will be conducted only by a certified lead abatement contractor or a certified lead abatement worker.

a. A certified lead abatement contractor will be on site during all work site preparation and during the postabatement cleanup of work areas. At all other times when lead abatement is being conducted, the certified lead abatement contractor will be on site or available by telephone or answering service, and be able to be present at the work site in no more than two hours.

b. A certified lead abatement contractor will ensure that lead abatement is conducted according to all federal, state, and local requirements.

c. A certified lead abatement contractor will notify the department in writing at least seven days prior to the commencement of lead abatement in a residential dwelling or child-occupied facility. The notification will include the following information:

(1) The address, including apartment numbers, where lead abatement will be conducted.

(2) The dates when lead abatement will be conducted.

(3) The name, address, telephone number, Iowa certification number, and signature of the contact for the certified firm that will conduct the work.

(4) The name, address, telephone number, Iowa certification number, and signature of the certified lead abatement contractor who will serve as the contact person for the project.

(5) The name, address, and telephone number of the property owner.

(6) Whether the dwelling is owner-occupied or a rental dwelling.

(7) If the dwelling is an occupied rental, the names of the occupants.

(8) The approximate year that the dwelling was built.

(9) A brief description of the lead abatement work to be done.

d. A certified lead abatement contractor will submit a revised notification to the department if any information in the original notification changes.

e. A certified lead abatement contractor will ensure that the worksite(s) is accessed only by certified lead professionals according to rules 481—470.3(10A) and 481—470.5(10A). Noncertified individuals will not be allowed access to a worksite. A worksite will remain inaccessible to noncertified individuals until it passes clearance testing.

f. A certified lead abatement contractor or a certified project designer will develop a written occupant protection plan for all lead abatement projects prior to starting lead abatement and will implement the occupant protection plan during the lead abatement project. The occupant protection plan will be unique to each residential dwelling or child-occupied facility. If the occupants will be living at the property where lead abatement is taking place, then the written occupant plan will be given to the occupants prior to the start date of the lead abatement project and will contain at least the following information:

(1) A description of the type and location of the physical barriers that will keep occupants out of the designated worksite(s).

(2) An explanation of how the contractor will ensure that the worksite(s) is not entered by the occupants.

(3) An explanation of how the contractor will ensure that the occupants have access to a kitchen, bathroom, and living area that are not in the worksite(s).

g. Approved methods will be used to conduct lead abatement, and prohibited work practices will not be used to conduct lead abatement.

(1) Signs will be posted and readable. All signs will be posted before lead abatement begins and will remain in place until dust-lead clearance has been passed.

1. To the extent practicable, all signage will be posted in the occupants' primary language.
2. The signs will clearly define the work area.
3. The signs will warn occupants and other persons not involved with the lead abatement to remain outside the work area.
4. The signs will be posted at the entrance(s) to all work areas.

(2) The work area will be effectively contained before the lead abatement begins. To be effective, containment will:

1. Isolate the work area so that no dust or debris leaves the work area while the lead abatement is being performed.
2. Be monitored and maintained so that any plastic or other impermeable materials are not torn or displaced.
3. Be installed in such a manner that it does not interfere with occupant and worker egress in an emergency.

(3) For interior lead abatement, containment will include:

1. The removal or covering of all objects from the work area, including but not limited to furniture, rugs, and window coverings. Objects that are not removed from the work area will be covered with plastic sheeting or other impermeable material with all seams and edges taped or otherwise sealed.
2. Closing and covering all duct openings in the work area. Ducts will be covered with plastic sheeting or other impermeable material that is taped down.
3. Closing windows and doors in the work area. Doors will be covered with plastic sheeting or other impermeable material. Doors used as an entrance to the work area will be covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.
4. Covering the floor surface, including installed carpet, with taped-down plastic sheeting or other impermeable material in the work area six feet beyond the perimeter of the surfaces undergoing lead abatement or a sufficient distance to contain the dust, whichever is greater.
5. Ensuring that all personnel, tools, and other items, including the exteriors of containers of waste, are free of dust and debris before leaving or being removed from the work area.

(4) For exterior lead abatement, containment will include:

1. Closing all doors and windows within 20 feet of the lead abatement. On multistory buildings, all doors and windows within 20 feet of the lead abatement on the same story as the lead abatement will be closed, and all doors and windows on all stories below the lead abatement that are the same horizontal distance from the lead abatement will be closed.
2. Ensuring that doors within the work areas that will be used while the lead abatement is being performed are covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.
3. Covering the ground with plastic sheeting or other disposable impermeable material extending ten feet beyond the perimeter of surfaces undergoing lead abatement or a sufficient distance to collect falling paint debris, whichever is greater, unless the property line prevents ten feet of such ground cover. Exterior ground cover will include anchors or weights to ensure that the covering remains effective even during weather conditions such as high wind.
4. Vertical containment. In certain situations, such as where other buildings are in close proximity to the work area, when conditions are windy, or where the work area abuts a property line, the certified lead abatement contractor or certified lead abatement worker will erect a system of vertical containment

designed to prevent dust and debris from migrating to adjacent property or contaminating the ground, other buildings, or any object beyond the work area.

(5) The following are prohibited work practices:

1. Open-flame burning or torching of lead-based paint.

2. Machine sanding or grinding or abrasive blasting or sandblasting of lead-based paint unless used with high-efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.

3. Uncontained water blasting of lead-based paint.

4. Dry scraping or dry sanding of lead-based paint except in conjunction with the use of a heat gun or around electrical outlets.

5. Operating a heat gun at a temperature at or above 1,100 degrees Fahrenheit.

(6) All waste generated during lead abatement will be contained to prevent the release of dust and debris before the waste is removed from the work area for storage or disposal. Any chutes used to remove waste from the work area will be covered.

1. At the conclusion of each workday and at the conclusion of the lead abatement, waste that has been collected from lead abatement activities will be stored under containment, in an enclosure, or behind a barrier that prevents release of dust and debris out of the work area and prevents access to dust and debris.

2. All waste from lead abatement will be contained during transportation so that no dust or debris is released.

(7) The work area will be cleaned so that no dust, debris, or residue remains after lead abatement. Cleaning will include:

1. The collection of all paint chips and debris and, without dispersing the paint chips and debris, the sealing of the materials in heavy-duty bags.

2. The removal of the protective sheeting used as required in this subrule. The sheeting will be misted, then the sheeting will be folded dirty side inward. All sheeting will be taped shut or otherwise sealed inside heavy-duty bags. Sheeting used to separate work areas from non-work areas will remain in place until after the cleaning and removal of other sheeting. All sheeting will be disposed of as waste.

3. For interior lead abatement, all objects and surfaces in the work area and within two feet of the work area will be cleaned from high to low in the following manner:

- Walls will either be vacuumed with a HEPA vacuum or wiped with a wet cloth, beginning at the ceiling and working toward the floor.
- All remaining surfaces including objects and fixtures will be thoroughly vacuumed with a HEPA vacuum. For carpeted floors and rugs, the HEPA vacuum must be equipped with a beater bar.
- All remaining surfaces, except for carpeted or upholstered surfaces, will also be wiped with a damp cloth. Uncarpeted floors will be thoroughly mopped using a method that keeps the wash water separate from the rinse water, such as the two-bucket mopping method, or using a wet mopping system.

h. Soil abatement will be conducted using one of the following methods:

(1) If soil is removed, soil that is a soil-lead hazard will be replaced by soil with a lead concentration as close to the local background as practicable, but less than 400 parts per million. The soil that is removed will not be used as topsoil at another residential property or child-occupied facility.

(2) If soil is not removed, the soil that is a soil-lead hazard will be remediated to meet the definition of "permanently covered soil."

i. If lead-based paint is removed from a surface, the surface will be repainted or refinished prior to postabatement clearance dust sampling. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will visually verify that lead-based paint was removed from a surface prior to repainting or refinishing.

j. If components painted with lead-based paint are removed, the replacement components will be installed prior to postabatement clearance testing.

k. Postabatement clearance procedures will be conducted by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor. If the abatement is conducted in response to an elevated blood lead (EBL) inspection, clearance will be conducted by a certified elevated blood lead (EBL) inspector/risk assessor. Postabatement clearance testing will be performed by persons or entities

independent of those performing lead abatement, unless the designated party uses qualified in-house employees to conduct postabatement clearance testing. An in-house employee will not conduct both lead abatement and the postabatement clearance testing for this work. Postabatement clearance testing will be conducted using the following procedures:

(1) Following a lead abatement, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will review the report of the lead inspection, risk assessment, or visual assessment done prior to the lead abatement project and the lead abatement specifications to determine the lead-based paint hazards that were to be abated by the lead abatement project. The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will perform a visual inspection to determine if all lead-based paint hazards that were to be abated have been abated and to determine if deteriorated paint surfaces or visible amounts of dust, debris, or residue are still present in the rooms where lead abatement was conducted. If lead-based paint hazards that were to be abated by the project or deteriorated paint surfaces or visible amounts of dust, debris, or residue are present in the rooms where lead abatement was conducted, these conditions must be eliminated prior to the continuation of the clearance procedures. However, elimination of deteriorated paint is not required if it has been determined through paint testing or a lead-based paint inspection that the deteriorated paint is not lead-based paint. Following an exterior lead abatement, a visual inspection will be conducted to determine if all lead-based paint hazards that were to be abated have been abated and to determine if any visible dust or debris remains on any horizontal surfaces in the outdoor living areas close to the abated surface. In addition, a visual inspection will be conducted to determine the presence of paint chips on the dripline or next to the foundation below any exterior surface that was abated. If lead-based paint hazards that were to be abated by the project are still present, these conditions must be eliminated prior to the continuation of the clearance procedures. If visible dust, debris, or paint chips are present, they must be removed from the site and properly disposed of according to all applicable federal, state, and local standards.

(2) Following the visual inspection and any required postabatement cleanup, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will conduct clearance sampling for lead in dust. Clearance sampling may be conducted by employing single-surface sampling or composite dust sampling. Interior dust-lead testing will be performed for all projects that include window replacement.

(3) Dust samples will be collected a minimum of one hour after the completion of final postabatement cleanup activities.

(4) Dust samples will be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample will be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample will be 0.25 square feet or 36 square inches. Dust samples will be analyzed by a recognized laboratory to determine the level of lead.

(5) The following postabatement clearance activities will be conducted as appropriate based upon the extent or manner of lead abatement activities conducted in the residential dwelling or child-occupied facility:

1. After conducting a lead abatement with containment between abated and unabated areas, three dust samples will be taken from each of no fewer than four rooms, hallways, or stairwells within the containment area. Dust samples will be taken from one interior windowsill and from one window trough (if available), and one dust sample will be taken from the floor of each of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample will be taken from the floor outside of each individual containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, and stairwells will be sampled.

2. After conducting a lead abatement with no containment between abated and unabated areas, three dust samples will be taken from each of no fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility. Dust samples will be taken from one interior windowsill and from one window trough (if available), and one dust sample will be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility, then all rooms, hallways, and stairwells will be sampled.

3. The certified lead abatement contractors and certified lead abatement workers who abate or clean the dwellings will not have any knowledge of which rooms or surfaces will be selected for the dust samples.

(6) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will compare the residual lead level as determined by the laboratory analysis from each single-surface dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs. If the residual lead level in a single-surface dust sample is greater than or equal to the applicable clearance level for a floor, interior windowsill, or window trough, then the failed component in each room with a failed single-surface dust sample and that type of component in each room that was not tested will be recleaned. Additional clearance samples will be taken from the failed component in each room where it failed and from enough additional rooms that were not previously tested so that four rooms are sampled. If four rooms are not available, then each available room will be retested. The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will evaluate the results of this testing to determine if the recleaned components meet the clearance level. The components will be recleaned and retested until the clearance level is met.

(7) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will compare the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. If the residual lead level in a composite dust sample is greater than or equal to the applicable clearance level divided by half the number of subsamples in the composite sample, then all the components represented by the failed composite dust sample will be recleaned and retested until clearance levels are met.

l. In multifamily housing consisting of at least 20 similarly constructed and maintained residential dwellings, random selection for the purpose of clearance testing may be conducted if the following conditions are met:

(1) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will randomly select the residential dwellings that will be sampled. The certified lead abatement contractors and certified lead abatement workers who abate or clean the dwellings do not know which residential dwellings will be selected for the random selection or which rooms or surfaces will be selected for the dust samples.

(2) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the minimum number of residential dwellings selected for dust sampling. This will provide a 95 percent level of confidence that no more than 5 percent or 50 of the residential dwellings (whichever is smaller) in the randomly sampled population are greater than or equal to the appropriate clearance levels.

(3) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will sample the randomly selected residential dwellings and evaluate them for clearance according to the procedures found in paragraphs 470.6(6)*"i"* through *"k."*

m. No later than three weeks after the property passes clearance, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a report to the lead abatement contractor that contains the items required by subparagraphs 470.6(6)*"n"*(7) through 470.6(6)*"n"*(9).

n. The certified lead abatement contractor or a certified project designer will prepare a lead abatement report containing the following information:

(1) A copy of the original and any revised lead abatement notifications.

(2) Starting and completion dates of the lead abatement project.

(3) The name, address, and telephone number of the property owner(s).

(4) The name, address, and signature of the certified lead abatement contractor and of the certified firm contact for the firm conducting the lead abatement.

(5) Whether or not containment was used and, if containment was used, the locations of the containment.

(6) The occupant protection plan required by paragraph 470.6(6)*"f."*

(7) The name, address, and signature of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting clearance sampling, the date on which the clearance testing was conducted, the results of the visual inspection for the presence of lead hazards that were not abated as specified, deteriorated paint and visible dust, debris, residue, or paint chips in the interior rooms and exterior areas where lead abatement was conducted, and the results of all postabatement clearance testing and all soil analyses, if applicable. The results of dust sampling will be reported in micrograms of lead per square foot by location of sample, and the results of soil sampling will be reported in parts per million of lead. The results will not be reported as "not detectable." If random selection was used to select the residential dwellings that were sampled, the report will state that random selection was used, the number of residential dwellings that were sampled, and how this number was determined.

(8) A statement that the lead abatement was or was not done as specified and that the rooms and exterior areas where lead abatement was conducted did or did not pass the visual clearance and the clearance dust testing. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the clearance testing cannot verify that all lead-based paint hazards have been abated, the report will contain the following statement:

"The purpose of this clearance report is to verify that the lead abatement project was done according to the project specifications. This residential dwelling may still contain hazardous lead-based paint, soil-lead hazards, or dust-lead hazards in the rooms or exterior areas that were not included in the lead abatement project."

(9) The name, address, and telephone number of each recognized laboratory conducting an analysis of clearance samples and soil samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).

(10) A detailed written description of the lead abatement project, including lead abatement methods used, locations of rooms and components where lead abatement occurred, reasons for selecting particular lead abatement methods, and any suggested monitoring of encapsulants or enclosures.

(11) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

(12) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470.

(13) If applicable, a copy of the written consent or waiver required by subrule 470.6(12).

o. The lead abatement report will be completed no later than 30 days after the lead abatement project passes clearance testing.

p. The certified lead abatement contractor will maintain all reports and plans required in this subrule for a minimum of three years.

q. The certified lead abatement contractor will provide a copy of all reports required by this subrule to the building owner and to the person who contracted for the lead abatement, if different.

470.6(7) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will conduct visual risk assessments according to the following standards. Provided that all of the following standards are met, a certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician may remotely conduct a visual risk assessment using technology that allows for adequate visual evaluation of the painted surfaces. Visual risk assessments will be conducted only by a certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years will be collected.

b. A visual inspection for risk assessment will be undertaken to locate the existence of deteriorated paint and other potential lead-based paint hazards and to assess the extent and causes of the paint deterioration. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will assess each component in each room, including each exterior side. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk

assessor, or a certified sampling technician will identify the following conditions as potential lead-based paint hazards:

(1) All interior and exterior surfaces with deteriorated paint.

(2) Horizontal hard surfaces, including but not limited to floors and windowsills, that are not smooth or cleanable.

(3) Dust-generating conditions, including but not limited to conditions causing rubbing, binding, or crushing of surfaces known or presumed to be coated with lead-based paint.

(4) Bare soil in the play area and dripline of the home.

c. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will prepare a written report for each residential dwelling or child-occupied facility where a visual risk assessment is conducted. No later than three weeks after completing the visual risk assessment, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician will send a copy of the report to the property owner and to the person requesting the visual risk assessment, if different. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will maintain a copy of the report for no less than three years. The report will include, at least:

(1) Date of each visual risk assessment;

(2) Address of building;

(3) Date of construction;

(4) Apartment numbers (if applicable);

(5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(6) Name, signature, and certification number of each certified sampling technician, certified lead inspector/risk assessor, or certified elevated blood lead (EBL) inspector/risk assessor conducting the visual risk assessment;

(7) Name and certification number of the certified firm(s) conducting the visual risk assessment;

(8) A statement that all painted or finished components will be assumed to contain lead-based paint;

(9) Specific locations of painted or finished components identified as likely to contain lead-based paint and likely to be lead-based paint hazards;

(10) Specific locations of bare soil in the play area and the dripline of a home;

(11) If a remote visual risk assessment is conducted, a description of the methodologies used;

(12) Information for the owner and occupants on how to reduce lead hazards in the residential dwelling or child-occupied facility;

(13) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(14) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469, and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

(15) The following statement:

"The Iowa Department of Inspections, Appeals, and Licensing may review this report for compliance purposes. It is a violation of law for anyone other than the certified lead professional signing it to alter this report. This report may be supplemented with additional information, so long as any addendum is signed by a sampling technician, lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor certified according to Iowa Administrative Code 481—470.3(10A) and 470.5(10A)."

470.6(8) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will conduct clearance testing according to the following standards. Clearance testing following lead abatement will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor. Clearance testing after renovation and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35 will be conducted only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead (EBL) inspector/risk assessors. If the abatement, renovation, or interim controls, paint stabilization,

standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 is conducted in response to an elevated blood lead (EBL) inspection, clearance will be conducted by a certified elevated blood lead (EBL) inspector/risk assessor.

a. Clearance testing following lead abatement will be conducted according to paragraphs 470.6(6)*"i"* through *"m."*

b. Clearance testing after renovation and clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 will be conducted according to the following standards:

(1) A certified sampling technician will perform clearance testing only for a single-family property or for individual residential dwellings and associated common areas in multifamily housing. A certified sampling technician will not perform clearance testing using random selection of residential dwellings or common areas in multifamily housing.

(2) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will review the report of the lead inspection, risk assessment, or visual assessment done prior to interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 and the project specifications to determine the lead-based paint hazards that were to be controlled by the project. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will perform a visual inspection to determine if all lead-based paint hazards that were to be controlled by the project have been controlled and to determine if deteriorated paint surfaces or visible amounts of dust, debris, or residue are still present in the rooms where interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation were conducted pursuant to 24 CFR Part 35. If lead-based paint hazards that were to be controlled by the project, deteriorated paint surfaces or visible amounts of dust, debris, or residue are present in these rooms, these conditions must be eliminated prior to the continuation of the clearance testing. However, elimination of deteriorated paint is not required if it has been determined through a lead-based paint inspection that the deteriorated paint is not lead-based paint. If exterior painted surfaces have been disturbed by the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35, the visual inspection will include an assessment to determine if all exterior lead-based paint hazards that were to be controlled by the project have been controlled and to determine if any visible dust or debris remains on any horizontal surfaces in the outdoor living areas close to the affected exterior painted surfaces. In addition, a visual inspection will be conducted to determine if paint chips are present on the dripline or next to the foundation below any exterior painted surface that was treated. If lead-based paint hazards that were to be controlled by the project are still present, these conditions must be eliminated prior to the continuation of the clearance procedures. If visible dust, debris, or paint chips are present, they must be removed from the site and properly disposed of according to all applicable federal, state, and local standards.

(3) Following the visual inspection and any required cleanup, clearance sampling for lead in dust will be conducted. Clearance sampling may be conducted by employing single-surface sampling or composite dust sampling.

(4) Dust samples will be collected a minimum of one hour after the completion of final cleanup activities.

(5) Dust samples will be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample will be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample will be 0.25 square feet or 36 square inches. Dust samples will be analyzed by a recognized laboratory to determine the level of lead.

(6) The following clearance activities will be conducted as appropriate based upon the extent or manner of renovation or of interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 in the residential dwelling or child-occupied facility:

1. After conducting renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, with containment between treated and untreated areas, three dust samples will be taken from each of no fewer than four rooms, hallways, or stairwells within the containment area. Dust samples will be taken from one interior windowsill and from one window trough (if available), and one dust sample will be taken from the floor of each of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample will be taken from the floor outside of each individual containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, and stairwells will be sampled. Interior dust-lead testing will be performed for all projects that include window replacement.

2. After conducting renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, with no containment between treated and untreated areas, three dust samples will be taken from each of no fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility. Dust samples will be taken from one interior windowsill and window trough (if available), and one dust sample will be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility, then all rooms, hallways, and stairwells will be sampled. Interior dust-lead testing will be performed for all projects that include window replacement.

(7) The contractors conducting the work or cleaning the dwellings will not know which rooms or surfaces will be selected for the dust samples.

(8) The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician will compare the residual lead level as determined by the laboratory analysis from each single-surface dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs. If the residual lead level in a single-surface dust sample is greater than or equal to the applicable clearance level for a floor, interior windowsill, or window trough, then the failed component in each room with a failed single-surface dust sample and that type of component in each room that was not tested will be recleaned. Additional clearance samples will be taken from the failed component in each room where it failed and from enough additional rooms that were not previously tested so that four rooms are sampled. If four rooms are not available, then each available room will be retested. The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician will evaluate the results of this testing to determine if the recleaned components meet the clearance level. The components will be recleaned and retested until the clearance level is met.

(9) The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician will compare the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. If the residual lead level in a composite dust sample is greater than or equal to the applicable clearance level divided by half the number of subsamples in the composite sample, then all the components represented by the failed composite dust sample will be recleaned and retested until clearance levels are met.

c. In multifamily housing consisting of at least 20 similarly constructed and maintained residential dwellings, random selection for the purpose of clearance testing may be conducted if the following conditions are met:

(1) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will randomly select the dwellings that will be sampled. The contractors and the workers who conducted the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation do not know which residential dwellings will be selected for the random selection.

(2) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the minimum number of dwellings selected for dust sampling. This will provide a 95 percent level of confidence that no more than 5 percent or 50 of the residential dwellings

(whichever is smaller) in the randomly sampled population are greater than or equal to the appropriate clearance levels.

(3) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will sample the randomly selected residential dwellings and evaluate them for clearance according to the procedures found in paragraphs 470.6(6)*"h"* through *"j."*

(4) The clearance testing is conducted by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

d. A clearance report will be prepared that provides documentation of the lead abatement, renovation, or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 as well as the clearance testing. When lead abatement is performed, the report will be a lead abatement report in accordance with paragraph 470.6(6)*"n."* When renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 is performed, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician will prepare a written report for each residential dwelling or child-occupied facility where clearance testing is conducted. No later than 30 days after the property passes clearance, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician will send a copy of the report to the property owner and to the person requesting the clearance testing, if different. The clearance report will include the following information:

(1) The address of the residential property and, if only part of a multifamily property is affected, the specific dwelling units and common areas affected.

(2) The following information regarding the clearance testing:

1. The date(s) of the clearance testing.

2. The name, address, and signature of each certified lead professional performing the clearance examination, including the certification number.

3. The name and certification number of the certified firm(s) conducting the clearance testing.

4. Whether or not containment was used and, if containment was used, the locations of the containment.

5. If random selection was used to select the residential dwellings that were sampled, the report will state that random selection was used, the number of residential dwellings that were sampled, and how this number was determined.

6. The results of the visual inspection for the presence of deteriorated paint and visible dust, debris, residue, or paint chips in the rooms where renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation was conducted pursuant to 24 CFR Part 35.

7. All of the results of the analysis of dust samples, in micrograms per square foot, by location of sample. The results will not be reported as "not detectable."

8. A statement that the renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 was or was not done as specified and that the rooms and exterior areas where these activities were conducted did or did not pass the visual clearance and the clearance dust testing. If the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician conducting the clearance testing cannot verify that all lead-based paint hazards have been controlled, the report will contain the following statement:

"The purpose of this clearance report is to verify that this lead hazard control project was done according to the project specifications. This residential dwelling may still contain hazardous lead-based paint, soil-lead hazards, or dust-lead hazards in the rooms or exterior areas that were not included in the lead hazard control project."

9. The name, address, and telephone number of each recognized laboratory conducting an analysis of the dust samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).

(3) The following information on the renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 for which clearance testing was performed:

1. The start and completion dates of the renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation.

2. The name and address of each firm or organization conducting the renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation and the name of each supervisor assigned.

3. A detailed written description of the renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation, including the methods used, locations of exterior surfaces, interior rooms, common areas, and components where the hazard reduction activity occurred.

4. If interim control of soil hazards was conducted, a detailed description of the location(s) of the interim controls and the method(s) used.

5. Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

6. Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470.

7. The report will contain the statement set forth in subparagraph 470.6(7)*"c"*(15).

e. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor or a certified sampling technician will maintain a copy of the clearance testing information included in the lead abatement report specified in paragraph 470.6(6)*"m"* for no fewer than three years. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician will maintain a copy of the clearance testing report specified in paragraph 470.6(8)*"d"* for no fewer than three years.

f. Clearance testing will be performed by persons or entities independent of those performing lead abatement, renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation, unless the designated party uses qualified in-house employees to conduct clearance testing. An in-house employee will not conduct both lead abatement, renovation, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation and the clearance examination for this work.

470.6(9) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will conduct paint testing pursuant to 24 CFR Part 35 according to the following standards. Paint testing pursuant to 24 CFR Part 35 will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting paint testing in a residential dwelling or child-occupied facility, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will test paint on each deteriorated paint surface and on each painted surface that will be disturbed or replaced. On windows, the window frame, interior windowsill, window sash, and window trough will each be tested.

(2) Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use an X-ray fluorescence analyzer that has a performance characteristics sheet and will use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will take calibration readings consisting of an average of three readings at the beginning of the inspection.

4. If recommended by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean for these six readings and will subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where recommended by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that all of the readings are positive and will not state that a surface is free of lead-based paint.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that the inconclusive readings are positive.

b. If lead-based paint is identified through paint testing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

c. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility where paint testing is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of each written report for no less than three years. The report will include, at least:

(1) A statement that the inspection was conducted to determine whether lead-based paint is present on deteriorated paint surfaces and on painted surfaces that will be disturbed or replaced;

(2) Date of the testing;

(3) Address of building;

(4) Date of construction;

(5) Apartment numbers (if applicable);

(6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(7) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the paint testing;

(8) Name and certification number of the certified firm(s) conducting the paint testing;

(9) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

(10) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any XRF analyzer;

(11) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;

(12) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

(13) A statement that all painted or finished components that were not tested will be assumed to contain lead-based paint;

(14) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(15) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report will recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(16) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(17) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

(18) The report will contain the statement set forth in numbered paragraph 470.6(1)*"a"*(7)"19."

470.6(10) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor will conduct reevaluations according to the following standards. Reevaluations will be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. All available information regarding lead-based paint for the property being reevaluated will be reviewed, including but not limited to reports of any lead-based paint activities conducted in a residential dwelling, multifamily dwelling, or child-occupied facility.

b. A visual inspection of the property will be undertaken to locate the existence of deteriorated paint; bare soil; recommended lead abatement, interim controls, or standard treatments that were not implemented; and failed interim controls, standard treatments, encapsulation, or enclosure.

c. Deteriorated paint for which the lead content is unknown will be tested for the presence of lead.

d. Soil samples will be collected and analyzed from bare soil for which the lead content is unknown. Soil samples will be collected using the documented methodologies specified in guidance documents issued by the department and will be analyzed by a recognized laboratory to determine the level of lead.

e. If any lead-based paint hazards, recommended lead abatement, interim controls, or standard treatments that were not implemented, or failed interim controls, standard treatments, encapsulation, or enclosure is identified, then the reevaluation is failed. These conditions will be controlled through lead abatement or interim controls before the reevaluation can continue. Clearance testing will be conducted following control of the conditions through lead abatement or interim controls.

f. If there are no lead-based paint hazards present and all of the recommended lead abatement or interim controls were implemented and have not failed, then single-surface or composite dust samples will be collected. The reevaluation is passed if all of the dust samples taken are below the clearance level.

g. In residential dwellings, single-surface or composite dust samples will be collected from floors and interior windowsills in at least four rooms, hallways, or stairwells where at least one child under the age of six years is most likely to come in contact with dust.

h. In multifamily dwellings, single-surface or composite dust samples will also be collected from common areas where at least one child under the age of six years is likely to come in contact with dust.

i. In child-occupied facilities, single-surface or composite dust samples will be collected from the floor and interior windowsill in at least four rooms, hallways, or stairwells utilized by one or more children under the age of six years and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust.

j. Dust samples will be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample will be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample will be 0.25 square feet or 36 square inches. Dust samples will be analyzed by a recognized laboratory to determine the level of lead.

k. Paint will be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If tested by laboratory analysis, the paint will be sampled using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use the following methodologies: numbered paragraphs 470.6(9)*"a"*(2)"1" through "6" are restated as if fully set forth herein.

l. When conducting reevaluation in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing will contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing will contain at least ten similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than 5 similar dwellings, all residential dwellings will be tested. Residential dwellings chosen by targeted selection will meet as many of the following criteria as possible. If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk

assessor or elevated blood lead (EBL) inspector/risk assessor will select them randomly. If too many residential dwellings meet the criteria, residential dwellings will be eliminated randomly. Targeted selection criteria are as follows:

1. The residential dwelling has been cited with a housing or building code violation within the past year.
2. The property owner believes that the residential dwelling is in poor condition.
3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will give preference to residential dwellings that house the largest number of children.
4. The residential dwelling serves as a child-occupied facility.
5. The residential dwelling has been prepared for reoccupancy within the past three months.

(3) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings will be tested.

(4) The following standards will be used to determine the extent of lead-based paint hazards throughout multifamily housing that is sampled by random selection, targeted selection, or worst case selection:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will calculate the arithmetic mean of the dust-lead levels for carpeted floors, uncarpeted floors, interior windowsills, and window troughs. If the arithmetic mean is greater than or equal to the level defined as a dust-lead hazard for the component, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will determine that a dust-lead hazard has been identified on the component throughout the multifamily housing. If the arithmetic mean is less than the level defined as a dust-lead hazard for the component, but some of the individual components have dust-lead levels that are greater than or equal to the level defined as a dust-lead hazard, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will determine that a dust-lead hazard has been identified on the individual components and on all other similar components throughout the multifamily housing.
2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined not to be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will assume that the component is a lead-based paint hazard in all similar residential dwellings.

m. If reevaluation is conducted, the first reevaluation will be conducted no later than two years from completion of lead abatement, interim controls, or standard treatments. Subsequent reevaluation will be conducted at intervals of two years, plus or minus 60 days. To be exempt from additional reevaluation, a residential dwelling or child-occupied facility will have at least two consecutive passing reevaluations conducted at such two-year intervals. If, however, a reevaluation fails, at least two more consecutive reevaluations conducted at such two-year intervals will be conducted.

n. A certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will prepare a written report for each residential dwelling or child-occupied facility where a reevaluation is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will send a copy of the report to the property owner and to the person requesting the reevaluation, if different. A certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will maintain a copy of the report for no less than three years. The report will include, at least:

(1) Date of each reevaluation;

(2) Address of building;

(3) Date of construction;

(4) Apartment numbers (if applicable);

(5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the reevaluation;

(7) Name and certification number of the certified firm(s) conducting the reevaluation;

(8) All of the information gathered for the review as outlined in 470.6(10)*"a"*;

(9) Results of the visual inspection including details of any newly identified lead-based paint hazards, the status of past lead hazard control measures, and repair options for any lead-based paint hazards identified during the reevaluation;

(10) An indication of whether or not the property passed or failed the reevaluation;

(11) An indication of when the next reevaluation, if any, should occur;

(12) The results of any environmental samples taken, including all XRF readings, all laboratory analyses and clearance testing results, if necessary;

(13) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b));

(14) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745;

(15) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation found in 481—Chapter 470; and

(16) The report will contain the statement set forth in subparagraph 470.6(7)*"c"*(15).

470.6(11) All renovations performed in target housing and child-occupied facilities, except for emergency renovations and minor repair and maintenance activities, will be performed according to the work practice standards in this subrule. Renovation activities conducted in housing or on surfaces determined to be free of lead-based paint by a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor will be exempt from all work practice standards except recordkeeping. All renovations will be performed by a certified firm under the supervision of a certified lead abatement contractor or a certified lead abatement worker or will be performed by a certified lead-safe renovator in accordance with the requirements below.

a. A firm will assign at least one certified lead abatement contractor, a certified lead abatement worker, or a certified lead-safe renovator to each individual renovation project. The certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator assigned to each individual renovation project will ensure the following:

(1) A certified lead abatement contractor, a certified lead abatement worker, or a certified lead-safe renovator will be on site during all worksite preparation and during the cleanup of work areas. At all other times when renovation is being conducted, a certified lead abatement contractor, a certified lead abatement worker, or a certified lead-safe renovator will be on site or available by telephone or answering service and be able to be present at the worksite in no more than two hours.

(2) Signs are posted and readable. All signs will be posted before the renovation begins and will remain in place until the postrenovation cleaning verification has been completed.

1. To the extent practicable, all signage will be posted in the occupants' primary language.

2. The signs will clearly define the work area.

3. The signs will warn occupants and other persons not involved with the renovation activity to remain outside the work area.

4. The signs will be posted at the entrance(s) to all work areas.

(3) The work area will be effectively contained before the renovation is begun. To be effective, containment will:

1. Isolate the work area so that no dust or debris leaves the work area while the renovation is being performed.

2. Be monitored and maintained so that any plastic or other impermeable materials are not torn or displaced.

3. Be installed in such a manner that it does not interfere with occupant and worker egress in an emergency.

(4) For interior renovations, containment will include:

1. The removal or covering of all objects from the work area. Objects that are not removed from the work area will be covered with plastic sheeting or other impermeable material with all seams and edges taped or otherwise sealed.

2. Closing and covering all duct openings in the work area. Ducts will be covered with plastic sheeting or other impermeable material that is taped down.

3. Closing windows and doors in the work area. Doors will be covered with plastic sheeting or other impermeable material. Doors used as an entrance to the work area will be covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.

4. Covering the floor surface, including installed carpet, with taped-down plastic sheeting or other impermeable material in the work area six feet beyond the perimeter of the surfaces undergoing renovation or a sufficient distance to contain the dust, whichever is greater.

5. Ensuring that all personnel, tools, and other items, including the exteriors of containers of waste, are free of dust and debris before leaving or being removed from the work area.

(5) For exterior renovations, containment will include:

1. Closing all doors and windows within 20 feet of the renovation. On multistory buildings, all doors and windows within 20 feet of the renovation on the same story as the renovation will be closed, and all doors and windows on all stories below the renovation that are the same horizontal distance from the renovation will be closed.

2. Ensuring that doors within the work areas that will be used while the renovation is being performed are covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.

3. Covering the ground with plastic sheeting or other disposable impermeable material extending ten feet beyond the perimeter of surfaces undergoing renovation or a sufficient distance to collect falling paint debris, whichever is greater, unless the property line prevents ten feet of such ground cover. Exterior ground cover will include anchors or weights to ensure the covering remains effective even during weather conditions such as high wind.

4. Vertical containment. In certain situations, such as where other buildings are in close proximity to the work area, when conditions are windy, or where the work area abuts a property line, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will erect a system of vertical containment designed to prevent dust and debris from migrating to adjacent property or contaminating the ground, other buildings, or any object beyond the work area.

(6) Prohibited practices are not used during the renovation. Prohibited practices include:

1. Open-flame burning or torching of paint.

2. Machine sanding or grinding or abrasive blasting or sandblasting of paint unless used with high-efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.

3. Uncontained water blasting of paint.

4. Dry scraping or dry sanding of paint except in conjunction with the use of a heat gun or around electrical outlets.

5. Operating a heat gun at a temperature at or above 1,100 degrees Fahrenheit.

(7) All workers who are not certified lead abatement contractors, certified lead abatement workers, or certified lead-safe renovators must have on-the-job training as required by paragraph 470.6(11)*"d."* However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR 35.1340.

(8) If desired, perform all testing with recognized test kits in accordance with paragraph 470.6(11)*"e."*

(9) Perform the postrenovation cleaning verification as outlined in paragraph 470.6(11)*"b."*

(10) All waste generated during renovation activities is contained to prevent the release of dust and debris before the waste is removed from the work area for storage or disposal. Any chutes used to remove waste from the work area will be covered.

1. At the conclusion of each workday and at the conclusion of the renovation, waste that has been collected from renovation activities will be stored under containment, in an enclosure, or behind a barrier that prevents release of dust and debris out of the work area and prevents access to dust and debris.

2. All waste from renovation activities will be contained during transportation so that no dust or debris is released.

(11) The work area will be cleaned so that no dust, debris, or residue remains after the renovation. Cleaning will include:

1. The collection of all paint chips and debris and, without dispersing the paint chips and debris, the sealing of the materials in heavy-duty bags.

2. The removal of the protective sheeting used as required in this subrule. The sheeting will be misted, then the sheeting will be folded dirty side inward. All sheeting will be taped shut or otherwise sealed inside heavy-duty bags. Sheeting used to separate work areas from non-work areas will remain in place until after the cleaning and removal of other sheeting. All sheeting will be disposed of as waste.

3. For interior renovations, all objects and surfaces in the work area and within two feet of the work area will be cleaned from high to low in the following manner:

- Walls will either be vacuumed with a HEPA vacuum or wiped with a wet cloth, beginning at the ceiling and working toward the floor.
- All remaining surfaces including objects and fixtures will be thoroughly vacuumed with a HEPA vacuum. For carpeted floors and rugs, the HEPA vacuum must be equipped with a beater bar.
- All remaining surfaces, except for carpeted or upholstered surfaces, will also be wiped with a damp cloth. Uncarpeted floors will be thoroughly mopped using a method that keeps the wash water separate from the rinse water, such as the two-bucket mopping method, or using a wet mopping system.

b. Postrenovation cleaning verification. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will use the following procedure for conducting postrenovation cleaning verification. In lieu of postrenovation cleaning verification, clearance testing as outlined in subrule 470.6(8) can be performed. If the work is done in response to an elevated blood lead (EBL) inspection, clearance testing will be performed by a certified elevated blood lead (EBL) inspector/risk assessor in lieu of postrenovation cleaning verification. Warning signs may be removed after all of the work areas in a renovation project have been adequately cleaned and verified or passed clearance testing.

(1) For interior renovations, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will perform a visual inspection to determine whether dust, debris, or residue is still present. If dust, debris, or residue is still present, these conditions will be removed by recleaning, and another visual inspection will be performed. Following a successful visual inspection, a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will:

1. Verify that each windowsill and window trough in the work area has been adequately cleaned, using the following procedure:

- Wipe the windowsill and window trough with a wet disposable cleaning cloth that is damp to the touch. If the cloth matches or is lighter than the cleaning verification card, the windowsill has been adequately cleaned.
- If the cloth does not match and is darker than the cleaning verification card, reclean the windowsill or window trough as directed in subparagraph 470.6(11)*"a"*(11). Then wipe the windowsill or window trough again, using a new cloth or the same cloth folded in such a way that an unused surface is exposed. If the cloth matches or is lighter than the cleaning verification card, that windowsill has been adequately cleaned.
- If the cloth does not match and is darker than the cleaning verification card, wait for one hour or until the surface has dried completely, whichever is longer.

● After waiting for the windowsill or window trough to dry, wipe the windowsill or window trough with a dry disposable cleaning cloth. After this wipe, that windowsill or window trough has been adequately cleaned.

2. Verify that uncarpeted floors and countertops in the work area have been adequately cleaned, using the following procedure. If the surface within the work area is greater than 40 square feet, the surface within the work area will be divided into roughly equal sections that are each less than 40 square feet.

● Wipe uncarpeted floors and countertops within the work area with a wet disposable cleaning cloth. Floors will be wiped using an application device with a long handle and a head to which the cloth is attached. The cloth will remain damp at all times while it is being used to wipe the surface for postrenovation cleaning verification. Wipe each such section separately with a new wet disposable cleaning cloth. If the cloth used to wipe each section of the surface within the work area matches or is lighter than the cleaning verification card, the surface has been adequately cleaned.

● If the cloth does not match and is darker than the cleaning verification card, reclean the surface as in subparagraph 470.6(11)*"a"*(11). Then wipe the floor or countertop again, using a new cloth. If the cloth matches or is lighter than the cleaning verification card, that surface has been adequately cleaned.

● If the cloth does not match and is darker than the cleaning verification card, wait for one hour or until the surface has dried completely, whichever is longer.

● After waiting for the surface to dry, wipe each section of the surface that has not yet achieved the postrenovation cleaning verification with a dry disposable cleaning cloth. After this wipe, that surface has been adequately cleaned.

(2) For exterior renovations, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will perform a visual inspection to determine whether dust, debris, or residue is still present on surfaces in and below the work area, including windowsills and the ground. If dust, debris, or residue is present, these conditions must be eliminated and another visual inspection will be performed. When the area passes the visual inspection, the exterior has been adequately cleaned.

(3) A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will only use cleaning verification cards that are approved by the U.S. EPA and have not expired.

c. Clearance testing. Postrenovation cleaning verification is not required if the contract between the renovation firm and the person contracting for the renovation or another federal, state, territorial, tribal, or local law or regulation requires the renovation firm to perform clearance testing at the conclusion of a renovation covered by this chapter.

(1) The dust samples will be collected by a certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician. If the work is done in response to an elevated blood lead (EBL) inspection, the dust samples will be collected by a certified elevated blood lead (EBL) inspector/risk assessor.

(2) The firm conducting the renovation is required to reclean the work area until the dust clearance sample results are below the clearance standards in subrule 470.6(8).

d. On-the-job training. The certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator assigned to the renovation project will ensure that each noncertified individual conducting renovation activities has been or is currently being trained on how to safely conduct renovation activities. However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR Part 35.

(1) All on-the-job training will be conducted by a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator.

(2) Each noncertified individual will be trained by a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator who is employed by the same certified firm. On-the-job training does not meet the requirement for work conducted pursuant to 24 CFR Part 35.

(3) On-the-job training will be specific for the type of work the noncertified individual is performing and must include at least the following topics:

1. An overview of the requirements described in this chapter.
2. An overview of the health effects of lead poisoning.
3. Methods to prevent taking lead dust home from the worksite.

4. How and why to properly set up a work area for lead-safe renovations.
5. How and where to properly post signage.
6. Personal protection.
7. How and why to properly set up containment.
8. How and why to minimize dust and debris.
9. Proper cleaning techniques and timelines for cleaning in renovation activities.
10. How to properly handle and control waste generated from renovation activities.
11. An overview of the postrenovation cleaning verification and clearance testing.
12. An overview of the prerenovation notification requirements found in 481—Chapter 469.
13. Prohibited work practices.

e. Recognized test kits. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator may use recognized test kits to determine whether surfaces to be affected by renovation activities are painted with lead-based paint. The result from each individual test performed applies only to the individual surface tested. Surfaces that are determined by proper use of a recognized test kit to be free of lead-based paint are exempt from the requirements of paragraphs 470.6(11)*"a"* through *"d."* Results obtained from recognized test kits are only valid if the testing was performed according to the manufacturer's directions. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will not discard a valid result from a recognized test kit.

f. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will complete a written report when conducting a renovation. The report will include the results of any testing performed with a recognized test kit, information regarding the work practices used in the renovation and, if applicable, a copy of the clearance testing report. When the final invoice for the renovation is delivered or within 30 days after the renovation activity is complete, whichever is earlier, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will send a copy of the report to the owner of the building. If the renovation took place within a residential dwelling, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will send a copy of the report to an adult occupant of the residential dwelling and to the person requesting the renovation, if different from the owner. If the renovation took place within a child-occupied facility, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will send a copy of the report to an adult representative of the child-occupied facility and to the person requesting the renovation, if different from the owner. If the renovation took place within common areas of multifamily target housing, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will post in areas where it is likely to be seen by the occupants of all of the affected units the report required by this paragraph or instructions on how interested occupants can obtain a copy of this report at no charge. If the renovation took place within a child-occupied facility, the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will post in areas where it is likely to be seen by the parents or guardians of children frequenting the child-occupied facility the report required by this paragraph or instructions on how interested parents or guardians of children frequenting the child-occupied facility can obtain a copy of this report at no charge. A certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator will maintain a copy of the report for no less than three years. The report will include, at least:

(1) The date(s) of the renovation.

(2) Address of the building, including apartment numbers, if applicable.

(3) The name, address, and telephone number of the owner(s) of the address(es) where the renovation took place.

(4) The name, address, signature, certification number, and telephone number of the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator who performed the renovation.

(5) The name and certification number of the certified firm performing the renovation.

(6) If testing was performed with a recognized test kit, the location of each test. The location will be specific to the room and component.

(7) The results of testing. The results will be classified as either positive for lead-based paint or negative for lead-based paint.

(8) The name and manufacturer of the recognized test kit(s) used, the expiration date, and the EPA approval number.

(9) The work practices used in the renovation, including the location(s) where each work practice was used. The location will be specific to the room and component.

(10) If applicable, a copy of the clearance report.

(11) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

(12) Information regarding Iowa's prerenovation notification requirements found in 481—Chapter 469; and information regarding Iowa's regulations for renovation, remodeling and repainting found in 481—Chapter 470.

g. Recordkeeping. Records will be kept for each renovation project that involves target housing or child-occupied facilities. The records for each renovation will include:

(1) The name and certification number of the certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator responsible for the renovation.

(2) The name and certification number of the certified firm that performed the renovation.

(3) The address(es) of the property where the renovation activity was performed.

(4) The name, address, and telephone number of the property owner where the renovation activity was performed.

(5) Renovations considered emergency pursuant to rule 481—470.2(10A) will contain a description of the circumstances explaining why the renovations were immediately required and which work practice standards were not followed as a result.

(6) Any reports or documentation completed by a certified lead professional concerning the renovation project, including documentation from certified lead inspector/risk assessors or certified elevated blood lead (EBL) lead inspector/risk assessors regarding housing, components, or surfaces that have been determined to be free of lead-based paint and clearance reports from clearance testing performed in lieu of postrenovation cleaning verification.

(7) Documentation that each noncertified individual working on the renovation project had, or was receiving, the appropriate on-the-job training outlined in paragraph 470.6(11)*"d."* The documentation will include the names of all of the noncertified individuals who worked on the renovation. However, on-the-job training does not meet the training requirement for work conducted pursuant to 24 CFR 35.1340.

(8) Documentation that the certified lead-safe renovator followed the work practices for renovation activities outlined in this subrule. This will include documentation that the following work practices were followed:

1. Signs were posted at the entrance to the work area.
2. The work area was contained.
3. All objects in the work area were covered or removed.
4. All HVAC ducts in the work area were closed and covered.
5. All windows in the work area were closed, and all windows within 20 feet of exterior work areas were closed.
6. All doors not used to enter the work area were closed and sealed, and all doors within 20 feet of exterior work areas were closed and sealed.
7. All doors used as an entrance to the work area had containment in place to prevent the spread of dust and debris.
8. All floors in the work area were covered for a sufficient distance to contain the dust and debris from the renovation.
9. Adequate ground cover was in place to contain the dust and debris for exterior renovations.
10. Adequate vertical containment was in place to contain the dust and debris for exterior renovations.
11. All waste generated during the renovations was contained throughout the renovation and the transportation to disposal.

(9) Documentation that the renovation work area was cleaned and passed the postrenovation cleaning verification procedures outlined in paragraph 470.6(11)*"b,"* including the expiration date of the cleaning verification cards used.

(10) Documentation regarding the use of any recognized test kits outlined in paragraph 470.6(11)*"e."* The documentation will include a copy of the written report required by paragraph 470.6(11)*"f."*

h. Emergency renovations.

(1) Renovation activities that are deemed to be an emergency are exempt from the certification requirements and all of the work practice standards, except for the cleaning requirements, postrenovation cleaning verification, and the written report required by paragraph 470.6(11)*"f."* All postrenovation cleaning will take place under the direction of a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator. The postrenovation cleaning verification after an emergency renovation will be performed by a certified lead abatement contractor, certified lead abatement worker, or certified lead-safe renovator.

(2) Emergency renovations that are required as a result of an elevated blood lead (EBL) inspection are initially exempt from the certification requirements. The work practice standards found in paragraph 470.6(11)*"a"* will apply. All individuals who perform emergency renovations in response to an elevated blood lead (EBL) inspection are required to obtain certification as a lead-safe renovator, lead abatement contractor, or lead abatement worker within six months from the date the elevated blood lead (EBL) inspection report was issued. Renovations and interim controls performed in response to an elevated blood lead (EBL) inspection are required to pass clearance testing that is performed by a certified elevated blood lead (EBL) inspector/risk assessor.

470.6(12) A person may be certified as a lead inspector/risk assessor, sampling technician, or elevated blood lead (EBL) inspector/risk assessor and as a lead abatement contractor or lead abatement worker. Except as specified by paragraphs 470.6(6)*"k"* and 470.6(8)*"f,"* a person who is certified both as a lead inspector/risk assessor, sampling technician, or elevated blood lead (EBL) inspector/risk assessor and as a lead abatement contractor or lead abatement worker will not provide both lead inspection or visual risk assessment and lead abatement services at the same site unless a written consent or waiver, following full disclosure by the person, is obtained from the owner or manager of the site.

470.6(13) Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in subrules 470.6(1) through 470.6(6) and 470.6(9) will be collected by persons certified as a lead inspector/risk assessor or an elevated blood lead (EBL) inspector/risk assessor. Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in subrule 470.6(8) for clearance testing following lead abatement will be collected by persons certified as a lead inspector/risk assessor or an elevated blood lead (EBL) inspector/risk assessor. Any dust or soil samples collected pursuant to the work practice standards contained in subrule 470.6(8) for clearance testing after renovation or interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR Part 35 will be collected only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead (EBL) inspector/risk assessors. Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in rule 481—470.6(10A) will be analyzed by a recognized laboratory.

470.6(14) Composite dust sampling will be conducted only in the situations specified in subrules 470.6(4) through 470.6(6) and 470.6(8). If composite sampling is conducted, it will meet the following requirements:

a. Composite dust samples will consist of at least two subsamples.

b. Every component that is being tested will be included in the sampling.

c. Composite dust samples will not consist of subsamples from more than one type of component.

d. The results of composite dust samples will be evaluated by comparing the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface dust-lead hazard or clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample.

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—470.7(10A) Firms. All firms that perform or offer to perform lead-based paint activities must be certified by the department. Firms will employ only appropriately certified employees to conduct lead-based paint activities, and the firm and its employees will follow the work practice standards in rule 481—470.6(10A) for conducting lead-based paint activities. A firm must employ at least one certified individual in order to receive or maintain firm certification.

470.7(1) A firm wishing to be certified will apply to the department electronically in a format specified by the department or may apply using a paper application supplied by the department. The firm will submit:

a. A completed application.

b. Documentation that the firm will employ only appropriately certified lead professionals to perform lead-based paint activities. In addition, the firm will document that the agency and its employees or contractors will follow the work practice standards in rule 481—470.6(10A) for conducting lead-based paint activities.

c. The certified firm will maintain all records required by rule 481—470.6(10A), with the exception of elevated blood lead (EBL) inspection reports, for three years. Certified firms that are also certified as elevated blood lead (EBL) inspection agencies will maintain elevated blood lead (EBL) inspection reports for at least ten years.

470.7(2) Firms must be recertified every three years. To be recertified, the firm will submit the following:

a. A completed application.

b. Documentation that the firm will employ only appropriately certified lead professionals to perform lead-based paint activities. In addition, the firm will document that the firm and its employees or contractors will follow the work practice standards in rule 481—470.6(10A) for conducting lead-based paint activities.

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—470.8 Reserved.

481—470.9(10A) Compliance inspections.

470.9(1) The department may enter premises or facilities where violations of the provisions regarding lead-based paint activities may occur for the purpose of conducting compliance inspections.

470.9(2) The department may enter premises or facilities where training programs conduct business.

470.9(3) The department may take samples and review records as part of the lead-based paint activities compliance inspection process.

470.9(4) The department may review all reports involving lead-based paint activities.

470.9(5) The department may issue subpoenas pursuant to Iowa Code chapter 10A for the purposes of determining compliance.

[**ARC 8908C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—470.10(10A) Denial, suspension, or revocation of certification; denial, suspension, revocation, or modification of course approval; and imposition of penalties.

470.10(1) When the department finds that the applicant, certified lead professional, or certified firm has committed any of the following acts, the department may deny an application for certification, may suspend or revoke a certification, may prohibit specific work practices, may require a project conducted by persons or firms that are not certified or a project where prohibited work practices are being used to be halted, may require the cleanup of lead hazards created by the use of prohibited work practices, may impose a civil penalty, may place on probation, may require additional education, may require reexamination of the state certification examination, may issue a warning, or may impose other sanctions allowed by law as may be appropriate.

a. Failure or refusal to comply with any requirements of this chapter.

b. Failure or refusal to establish, maintain, provide, copy, or permit access to records or reports as required by rules 481—470.3(10A) through 481—470.7(10A).

c. Failure or refusal to permit entry or inspection as described in subrules 470.9(1) through 470.9(3).

d. Obtaining or attempting to obtain certification through fraudulent representation.

e. Failure to obtain certification from the department and performing work requiring certification.

f. Fraudulently obtaining certification and engaging in any lead-based paint activities requiring certification.

g. Conducting any part of a lead-based paint activity that requires certification without being certified or with a certification that has lapsed.

h. Obtained documentation of training through fraudulent means.

i. Gained admission to an accredited training program through misrepresentation of admission requirements.

j. Obtained certification through misrepresentation of certification requirements or related documents pertaining to education, training, professional registration, or experience.

k. Performed work requiring certification at a job site without having proof of current certification.

l. Permitted the duplication or use of the individual's or firm's own certificate by another.

m. Failed to follow the standards of conduct required by rule 481—470.6(10A).

n. Failed to comply with federal, state, or local lead-based paint statutes and regulations, including the requirements of this chapter.

o. Knowingly made misleading, deceptive, untrue, or fraudulent representations in the practice of lead professional activities or engaged in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

p. Used untruthful or improbable statements in advertisements. This includes, but is not limited to, an action by a lead professional making information or intention known to the public that is false, deceptive, misleading, or promoted through fraud or misrepresentation.

q. Falsified reports and records required by this chapter.

r. Accepted any fee by fraud or misrepresentation.

s. Negligence by the firm or individual in the practice of lead professional activities. This includes a failure to exercise due care, including negligent delegation of duties or supervision of employees or other individuals, whether or not injury results; or any conduct, practice, or conditions that impair the ability of the firm or individual to safely and skillfully practice the profession.

t. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority. A stay by an appellate court will not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report will be expunged from the records of the board.

u. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

v. Representation by a firm or individual that the firm or individual is certified when the certification has been suspended or revoked or has not been renewed.

w. Failed to respond within 20 days of receipt of communication from the department that was sent by registered or certified mail.

x. Engaged in any conduct that subverts or attempts to subvert a department investigation.

y. Failed to comply with a subpoena issued by the department or failure to cooperate with a department investigation.

z. Failed to pay costs assessed in any disciplinary action.

aa. Been convicted of a felony or misdemeanor related to lead professional activities or the conviction of any felony or misdemeanor that would affect the ability of the firm or individual to perform lead professional activities. A copy of the record of conviction or plea of guilty is conclusive evidence.

ab. Unethical conduct. This includes, but is not limited to, the following:

(1) Verbally or physically abusing a client or coworker.

(2) Improper sexual conduct with or making suggestive, lewd, lascivious, or improper remarks or advances to a client or coworker.

(3) Engaging in a professional conflict of interest.

(4) Mental or physical inability reasonably related to and adversely affecting the ability of the firm or individual to practice in a safe and competent manner.

(5) Being adjudged mentally incompetent by a court of competent jurisdiction.

(6) Habitual intoxication or addiction to drugs.

1. The inability of a lead professional to practice with reasonable skill and safety by reason of the excessive use of alcohol on a continuing basis.

2. The excessive use of drugs that may impair a lead professional's ability to practice with reasonable skill or safety.

3. Obtaining, possessing, attempting to obtain or possess, or administering controlled substances without lawful authority.

(7) Registration on a state sex offender registry.

470.10(2) The department may deny, suspend, revoke, or modify the approval for a course, or may place on probation, or impose other sanctions allowed by law as may be appropriate, or may impose a civil penalty or impose other sanctions allowed by law as may be appropriate when it finds that the training program, training manager, or other person with supervisory authority over the course has committed any of the following acts:

a. Misrepresented the contents of a training course to the department or to the student population.

b. Failed to submit required information or notifications in a timely manner.

c. Failed to maintain required records.

d. Falsified approval records, instructor qualifications, or other information or documentation related to course approval.

e. Failed to comply with the training standards and requirements in rule 481—470.4(10A).

f. Made false or misleading statements to the department in its application for approval or reapproval that the department relied upon in approving the application.

g. Failed to comply with federal, state, or local lead-based paint statutes and regulations, including the requirements of this chapter.

h. Knowingly made misleading, deceptive, untrue, or fraudulent representations in the practice of conducting a training program or engaged in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

i. Used untruthful or improbable statements in advertisements. This includes, but is not limited to, an action by a training program making information or intention known to the public that is false, deceptive, misleading, or promoted through fraud or misrepresentation.

j. Falsified reports and records required by this chapter.

k. Accepted any fee by fraud or misrepresentation.

l. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority. A stay by an appellate court will not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report will be expunged from the records of the board.

m. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

n. Failed to respond within 20 days of receipt of communication from the department that was sent by registered or certified mail.

o. Engaged in any conduct that subverts or attempts to subvert a department investigation.

p. Failed to comply with a subpoena issued by the department or failure to cooperate with a department investigation.

q. Failed to pay costs assessed in any disciplinary action.

470.10(3) Reinstatement.

a. Any individual, training program, or firm that has been revoked, denied, or suspended may apply to the department in accordance with the terms and conditions of the order of revocation or suspension, unless the order of revocation provides that the certification is permanently revoked.

b. If the order of revocation or suspension did not establish terms and conditions upon which reinstatement might occur, or if the certification was voluntarily surrendered, an initial application for reinstatement may not be made until one year has elapsed from the date of the order or the date of the voluntary surrender.

470.10(4) Complaints and other requests for action under this rule. Complaints regarding a certified lead professional, a certified elevated blood lead (EBL) inspection agency, a certified firm, or an approved course may be submitted to the department. The complainant should provide:

a. The name of the certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm and the specific details of the action(s) by the certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm that did not comply with the rules; or

b. The name of the lead professional or firm that conducted lead professional activities without the appropriate certification or approval as required by the rules; or

c. The name of the sponsoring person or organization of an approved course and the specific way(s) that an approved course did not comply with the rules; or

d. The name of the sponsoring person or organization that provided a course without the approval required by these rules.

470.10(5) Civil penalties.

a. Before instituting any proceeding to impose a civil penalty under Iowa Code section 10A.902, the department will serve a written notice of violation upon the person charged. The notice of violation will specify the date or dates, facts, and the nature of the alleged act or omission with which the person is charged and will identify specifically the particular provision or provisions of the law, rule, regulation, certification, approval, or cease and desist order involved in the alleged violation and will state the amount of each proposed penalty. The notice of violation will also advise the person charged that the civil penalty may be paid in the amount specified therein, or the proposed imposition of the civil penalty may be protested in its entirety or in part, by a written answer, either denying the violation or showing extenuating circumstances. The notice of violation will advise the person charged that upon failure to pay a civil penalty subsequently determined by the department, if any, unless compromised, remitted, or mitigated, the fee may be collected by civil action.

b. Within 20 days of the date of a notice of violation or other time specified in the notice, the person charged may either pay the penalty in the amount proposed or answer the notice of violation or request a contested case hearing. The answer to the notice of violation shall state any facts, explanations, and arguments denying the charges of violation, or demonstrating any extenuating circumstances, error in the notice of violation, or other reason why the penalty should not be imposed and may request remission or mitigation of the penalty.

c. If the person charged with violation fails to answer within the time specified in paragraph 470.10(5)*"b,"* an order may be issued imposing the civil penalty in the amount set forth in the notice of violation described in paragraph 470.10(5)*"a."* If the person charged with violation files an answer to the notice of violation, the department, upon consideration of the answer, will issue an order dismissing the proceeding or imposing, mitigating, or remitting the civil penalty. The person charged may, within 20 days of the date of the order or other time specified in the order, request a contested case hearing. If the person charged with violation timely requests a contested case hearing, it will be initiated and held in accordance with 7—Chapter 2506 and 481—Chapter 10.

470.10(6) Public notification.

a. The public will be notified of the suspension, revocation, modification, or reinstatement of course approval through appropriate mechanisms.

b. The department will maintain a list of courses for which the approval has been suspended, revoked, modified, or reinstated.

c. The public will be notified of the suspension or revocation of the certification of a lead professional or firm.

d. The department will maintain a list of lead professionals and firms for which certification has been suspended or revoked.

CHAPTER 475
ASBESTOS REMOVAL AND ENCAPSULATION

[Prior to 10/18/00, see 875—Chs 81 and 82]
[Prior to 7/9/25, see Labor Services Division[875] Ch 155]

Chapter rescission date pursuant to Iowa Code section 17A.7: 2/26/30

481—475.1(88B) Definitions.

"Business entity" means a partnership, firm, association, corporation, sole proprietorship, or other business concern. A business entity that uses its own employees in removing or encapsulating asbestos for the purpose of renovating, maintaining or repairing its own facilities is not included.

"Contractor/supervisor" means a person who supervises workers on asbestos projects or a person who enters into contracts to perform asbestos projects and personally completes the work.

"Department" means the department of inspections, appeals, and licensing.

"Director" means the director of the department or the director's designee.

"Friable asbestos material" means any material containing more than 1 percent asbestos by weight and that can be crumbled, pulverized, or reduced to powder by hand pressure when dry.

"Inspector" means a person who inspects for asbestos-containing building materials in a school or a public or commercial building.

"License" means an authorization issued by the department permitting an individual to be employed as a worker, contractor/supervisor, inspector, management planner, or project designer.

"Management planner" means a person who prepares asbestos management plans for a school building.

"Permit" means an authorization issued by the department permitting a business entity to remove or encapsulate asbestos.

"Project designer" means a person who designs asbestos response or maintenance projects for a school or a public or commercial building.

"Worker" means a person who performs response or maintenance activities on one or more asbestos projects.

"Working days" means Monday through Friday including holidays that fall on Monday through Friday. The first working day shall be the date of actual delivery or the postmark date, whichever is earlier. However, documents with Saturday or Sunday postmark dates will be treated as though postmarked on the following Monday.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.2(88B) Permit application procedures.

475.2(1) *Application.* To apply for or to renew a permit, a business entity shall complete and submit the form provided by the department. All requested applicable information and attachments must be provided. A $500 nonrefundable application fee shall accompany each permit application.

475.2(2) *Action on application.* A new permit is valid for one year from the date of issuance. A renewal permit is valid for one year from the expiration date of the applicant's prior permit. A permit may be denied for the reasons set forth in rule 481—475.8(17A,88B,252J,272D) or if the application package is incomplete. Within 60 days of receiving a completed application package for a new permit, the department will issue a permit or deny the application. Within 30 days of receiving a completed application package for a permit renewal, the department will issue a permit or deny the application. Applications received after expiration of a prior permit will be considered applications for new permits rather than renewals.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.3(88B) Other asbestos regulations. Regulation of encapsulation, removal and abatement procedures are found in 481—Chapters 210 and 211 and 567—Chapter 23. Nothing in this chapter provides an exemption, waiver, or variance from any otherwise applicable regulation or statute.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.4(88B) Asbestos project records. The permittee shall keep a record of each asbestos project it performs and make the record available to the department at any reasonable time. Records required by this rule shall be kept for at least six years. These records include:

475.4(1) The name, address, and license number of the individual who supervised the asbestos project and of each employee or agent who worked on the project.

475.4(2) The location and a description of the project and the amount of asbestos material that was removed.

475.4(3) The start and completion dates of each instance of removal or encapsulation.

475.4(4) A summary of the procedures that were used to comply with all applicable standards.

475.4(5) The name and address of each asbestos disposal site where the asbestos-containing waste was deposited.

475.4(6) A receipt from the asbestos disposal site indicating the amount of asbestos and disposal date.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.5(88B) Ten-day notices.

475.5(1) *General.* Permittees shall notify the department at least ten working days before an asbestos project begins. A project begins when site preparations for asbestos abatement, encapsulation, or removal begin; when asbestos abatement, encapsulation, or removal begins; or when any demolition begins, whichever is soonest. Legible electronic transmissions of ten-day notices in the proper format will be accepted. If work on the asbestos-removal project does not commence within 30 calendar days of the original start date identified in the ten-day notice given by permittees to the department, a revised ten-day notice shall be submitted to the department.

475.5(2) *Emergency.* When there is an immediate danger to life, health or property, the permittee may file the notice within five days after beginning the project. An explanation of the emergency must be included.

475.5(3) *Format.* The notice shall be submitted online or be on an 8½″ by 11″ sheet of paper and contain the following information:

a. The name, address, and telephone number of a contact person for the permittee performing the project.

b. The name, address, and telephone number of the project.

c. A description of the structure and work to be performed, including type and quantity of asbestos-containing material.

d. The scheduled dates of the project's start and end.

e. Designation of the asbestos disposal site.

f. The signature and printed name of the person who completed the form.

g. The shift or work schedule on which the project will be performed.

475.5(4) *Disaster emergency proclamations.* For structures that are both located in an area that is subject to a disaster emergency proclamation pursuant to Iowa Code section 29C.6 and damaged by circumstances related to those that caused the disaster emergency proclamation, the permittee shall file the notice described by this rule as early as possible, but not later than the working day following the initiation of the project. A description of the disaster and the disaster emergency proclamation shall be included in the notice.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.6(88B) License application procedures.

475.6(1) *Application form.* Except as noted in this subrule, the applicant must complete and submit the entire form provided by the department with the necessary attachments. Respirator fit tests and medical examinations must have occurred within the past 12 months. Only worker and contractor/supervisor license applicants must submit the respiratory protection and physician's or physician associate's certification forms.

475.6(2) *Training.* A certificate of appropriate training as established by the U.S. Environmental Protection Agency must accompany all applications. Applicants for a license must be trained by training providers other than themselves. Applicants who completed initial training under a prior set of applicable

rules will not be required to take another initial training course if they complete all annual refresher courses.

475.6(3) *Photograph.* A photograph clearly showing the applicant's face shall accompany all license applications.

475.6(4) *Worker licenses.* All persons seeking a license as an asbestos abatement worker shall complete an initial four-day training course and thereafter complete an annual one-day asbestos abatement worker refresher training course. A nonrefundable fee of $20 shall accompany the application.

475.6(5) *Contractor/supervisor licenses.* All persons seeking a license as an asbestos abatement contractor/supervisor shall complete an initial five-day training course and thereafter complete an annual one-day asbestos abatement contractor/supervisor refresher training course. A nonrefundable fee of $50 shall accompany the application.

475.6(6) *Inspector licenses.* All persons seeking a license as an asbestos inspector shall complete an initial three-day training course and thereafter complete an annual one-half-day asbestos inspector refresher training course. A nonrefundable fee of $20 shall accompany the application.

475.6(7) *Management planner licenses.* All persons seeking a license as an asbestos management planner shall complete an initial three-day inspector training course and an initial two-day management planning training course. Thereafter, an annual one-half-day asbestos inspector refresher training course plus an additional one-half-day course on management planning are required. A nonrefundable fee of $20 shall accompany the application.

475.6(8) *Abatement project designer licenses.* All persons seeking a license as an asbestos abatement project designer shall complete an initial three-day abatement project designer training course. Thereafter, an annual one-day asbestos abatement project designer refresher training course is required. A nonrefundable fee of $50 shall accompany the application.

475.6(9) *Action on application.* Within 30 days of receiving a completed application, the department will issue a license or deny the application. If a license is issued, it will expire one year from the date the training was completed. An application may be denied for the reasons set forth in rule 481—475.8(17A,88B,252J,272D) or if the application package is incomplete.

475.6(10) *License on job site.* While conducting asbestos work that requires a license, the license or a legible copy of the license shall be in the licensee's possession at the work site. However, if the department's website reflects that a license has been issued to a particular person, that person may perform work consistent with the type of license issued without the license or a copy of the license for up to 14 days from the issuance date.

475.6(11) *Disaster emergency proclamations.* For work on structures that are both located in an area that is subject to a disaster emergency proclamation pursuant to Iowa Code section 29C.6 and damaged by circumstances related to those that caused the disaster emergency proclamation, the director deems an individual to be licensed and authorized for asbestos abatement if all of the criteria in either paragraph 475.6(11)*"a"* or *"b"* are met:

a. The individual contractor, supervisor, or worker makes the following immediately available on the work site:

(1) A copy of a certificate for training that was provided within the past 12 months as established by the U.S. Environmental Protection Agency and that pertains to the work being performed;

(2) A copy of a physician's or physician associate's statement indicating that a licensed physician or physician associate has examined the individual within the past 12 months and approved the individual to work while wearing a respirator;

(3) For a worker wearing or intending to wear a tight-fitting respirator, documentation of a respirator fit test within the past 12 months;

(4) A valid, current asbestos license issued by another state that pertains to the type of work being performed; and

(5) A photo identification card; or

b. The individual working as a project designer, inspector, or management planner makes the following immediately available on the work site:

(1) A copy of a certificate for training as established by the U.S. Environmental Protection Agency and that pertains to the work being performed;

(2) A valid, current asbestos license issued by another state that pertains to the type of work being performed; and

(3) A photo identification card.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 6/10/26]

481—475.7(88B) Duplicate permits and licenses. Duplicate original permits and licenses are available from the department for a $10 fee.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.8(17A,88B,252J,272D) Denial, suspension and revocation.

475.8(1) *Grounds.* In addition to the grounds in Iowa Code section 88B.8, the department may deny an application or suspend or revoke a permit or license when an investigation reasonably determines any of the following:

a. The department received a certificate of noncompliance from the centralized collection unit of the department of revenue or the child support recovery unit of the department of health and human services.

b. Penalties or other debts are owed by the applicant to the department and are 30 days or more in arrears.

475.8(2) *Relinquishing license or permit.* A licensee or permittee must return the original license or permit to the department when a revocation or suspension becomes final.

475.8(3) *Suspension period.* Unless ordered otherwise, a suspension lasts for 12 months.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25]

481—475.9(17A,88B) Contested cases.

475.9(1) *Scope.* This rule applies to civil penalty assessments and to denials, revocations and suspensions of asbestos licenses and permits.

475.9(2) *Procedures.* The director shall serve a notice of intended action by restricted certified mail, return receipt requested, or by other service as permitted by Iowa Code section 17A.18. A notice of contest must be received by the director within 20 days after service of the notice of intended action. If a notice of contest is not timely filed, the action stated in the notice of intended action shall automatically be effective. Hearing procedures for asbestos contested cases are set forth in 7—Chapter 2506. However, if a contested case is based on receipt by the department of a certificate of noncompliance, procedures outlined in Iowa Code chapter 252J or 272D apply.

[**ARC 8834C**, IAB 1/22/25, effective 2/26/25; Editorial change: IAC Supplement 7/9/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapters 17A, 88B, 252J, and 272D.

CHAPTER 476
BACKFLOW PREVENTION ASSEMBLY TESTER REGISTRATION
[Prior to 4/2/25, see Public Health Department[641] Ch 26]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—476.1(135K) Definitions.

"ABPA" means the American Backflow Prevention Association.

"Administrative authority" means an individual, board, department, or agency employed by a city, county or other political subdivision of the state and authorized by local ordinance to administer and enforce the provisions of the plumbing code.

"Approved continuing education course" means a department-approved course designed to supplement or refresh the knowledge of a registered tester and to meet the requirements of subparagraph 476.5(2)*"a"*(2).

"Approved training course" means a department-approved course designed to train individuals to test and repair backflow prevention assemblies.

"ASSE" means ASSE International.

"AWWA" means the American Water Works Association.

"Backflow prevention assembly," for the purposes of this chapter, means a device or means to prevent backflow into a potable water system for which a method of testing the device in-line has been published by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California or by ASSE.

NOTE: The following assemblies are included under this definition. This is not intended to be an exclusive list. If new devices and test methods are introduced that meet the definition, they are included under the rules.

Backflow Prevention Assembly	Product Standards
Double Check Valve Assembly	ASSE 1015-2021, AWWA C510-07
Double Check Detector Assembly	ASSE 1048-2021
Pressure Vacuum Breaker	ASSE 1020-2021
Reduced Pressure Principle Backflow Preventer	ASSE 1013-2021, AWWA 511-07
Reduced Pressure Detector Assembly	ASSE 1047-2021
Spill Resistant Pressure Vacuum Breaker	ASSE 1056-2013-R2021

"Certified" means certified as a backflow prevention assembly tester under the requirements of ABPA, ASSE, or another third-party certification agency.

"Department" means the same as defined in Iowa Code section 135K.1(3).

"Proctor" means an individual designated by a third-party certification agency to conduct certification examinations of backflow prevention assembly testers.

"Registered backflow prevention assembly tester" or *"registered tester"* means the same as defined in Iowa Code section 135K.1(4).

"Third-party certification agency" means ABPA, ASSE or another agency approved by the department to certify the knowledge and skills of backflow prevention assembly testers.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.2(135K) Registration. No person shall test or repair a backflow prevention assembly unless the person is a registered backflow prevention assembly tester.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.3(135K) Returned checks. Any person who submits a check to the department that is returned for insufficient funds will incur a $15 fee.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.4(135K) Backflow prevention assembly tester training.

476.4(1) *Tester training.*

a. A person or organization that plans to conduct or sponsor a backflow prevention assembly tester training course in Iowa shall apply to the department for approval of the course at least 15 days before the first time the course is held, using an application form provided by the department and submitting a $200 nonrefundable fee.

b. The department will review the application and respond to the applicant within ten business days after receipt.

c. The person or organization responsible for the course content shall submit to the department any changes in the information set forth in paragraph 476.4(1)*"a"* every five years, no later than 30 calendar days before the end of the fifth year.

d. The course sponsor shall notify the department at least 15 days before an approved training course begins. The notification will include:

(1) Sponsoring organization name and website, contact person, mailing address, email address, and telephone number.

(2) Course dates and times.

(3) Course location, including street address.

(4) A $50 nonrefundable fee.

e. A training course shall:

(1) Be at least 32 instructional hours and cover the following minimum subjects:

1. Backflow definitions, causes and examples.

2. Description of backflow prevention assemblies, their proper application and installation, and their operational characteristics.

3. Description and operational characteristics of test equipment.

4. Techniques for testing backflow prevention assemblies.

5. Troubleshooting of backflow prevention assemblies.

6. Recordkeeping and the responsibilities of regulatory agencies and the registered tester.

(2) Conclude with a written examination of at least 100 questions and a practical examination of testing techniques on all types of testable backflow prevention assemblies. The time for testing is in addition to the instructional hours. A score of at least 70 percent on the written examination and demonstration of proficiency in testing and troubleshooting procedures constitutes successful completion of the course. Approved third-party certification agency testing may be substituted for the course test.

f. The lead course instructor shall have documentation of successfully completing an approved training course or be certified, and have at least three years of experience in cross connection control.

g. The testing laboratory for a training course shall be equipped with the following:

(1) Examples of each of the backflow prevention assemblies from at least three different manufacturers. If fewer than three manufacturers make a type of backflow prevention assembly, at least one example of that type of backflow prevention assembly.

(2) At least one double check valve assembly and one reduced pressure principle assembly larger than two inches.

(3) At least one test station per three students.

476.4(2) *Continuing education training.*

a. A person or organization that plans to conduct or sponsor a continuing education course for registered testers in Iowa shall apply to the department for approval of the course at least 15 days before the course is scheduled to begin, using an application form provided by the department and submitted with a $50 nonrefundable fee.

b. The department will review the application and respond to the applicant within ten business days after receipt.

c. A continuing education course will address cross connection control theory and practice; backflow prevention devices and methods; backflow prevention assembly installation, testing, troubleshooting and repair; codes and rules affecting cross connection control; safety issues related to installation and testing of backflow prevention assemblies; or related subjects approved by the department.

476.4(3) *Third-party certification agencies.*

a. Third-party certification agencies seeking approval in Iowa shall submit a written request to the department, on agency letterhead and signed by an authorized representative of the agency, that includes at least the following:

(1) Agency name and website, contact person, mailing address, email address, and telephone number.

(2) A description of the written examination, whether it is open- or closed-book, and information about the arrangements for administration of the examination.

(3) A copy of the testing procedures that are the basis for the practical examination.

(4) A description of the procedures for the practical examination and the criteria for evaluating performance.

(5) Proctor qualifications and training.

(6) Procedures and criteria for renewing the certification. The renewal of certification will be completed at least every five years and include knowledge and skills testing.

(7) A history of the development and implementation of the program, as applicable.

(8) A list of other jurisdictions where the certification is allowed and regulatory contacts in those jurisdictions.

(9) A nonrefundable fee of $200.

b. A third-party certification agency will not certify an individual who was trained by the agency. An individual proctor will not certify individuals who have taken a course at which the proctor was an instructor.

c. A third-party certification agency shall submit to the department any changes to the information set forth in paragraph 476.4(3)*"a"* every five years, no later than 30 days before the end of the fifth year.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.5(135K) Registration.

476.5(1) *Initial registration.*

a. A person who has successfully completed an approved training course may register with the department within one year of course completion. A person who is certified may register with the department. The applicant must submit:

(1) A completed application form provided by the department.

(2) Documentation of successful completion of an approved training course or certification.

(3) A nonrefundable fee of $72.

b. A person who has completed a course of training in another state may be registered in Iowa. The person will submit:

(1) A completed Iowa application form provided by the department.

(2) Documentation that:

1. The person has successfully completed a training course meeting the hour and subject requirements for an approved training course (if the person completed the training course more than 12 months before the date of the application, provide documentation that the person has attended an average of at least 2.5 hours of continuing education training per year since completing the course), or

2. The person is certified, or

3. The person is registered as a backflow prevention assembly tester in a jurisdiction that has similar or greater requirements for training and continuing education than Iowa.

(3) A nonrefundable fee of $72.

c. Registration expires two years after it is issued.

476.5(2) *Renewal registration.*

a. Registered testers may renew 60 days prior to registration expiration and include:

(1) A completed registration renewal application form provided by the department.

(2) Documentation that the registered tester has completed at least five hours of approved continuing education courses during the registration period or documentation that the registered tester is certified.

(3) A nonrefundable fee of $72.

Registration renewal applications received after expiration will incur a $10 penalty per month, to a maximum $50 penalty.

b. If a registration has lapsed greater than 24 months, the person applying for renewal shall demonstrate that one of the following is true:

(1) The person has successfully completed an approved training course within the 12 months before applying for registration renewal, or

(2) The person is certified, or

(3) The person is registered as a backflow prevention assembly tester in a jurisdiction that has similar or greater requirements for training and continuing education than does the state of Iowa.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.6(135K) Standards of conduct.

476.6(1) A registered tester shall comply with these rules and any ordinances, rules and policies of the administrative authority in jurisdictions where the registered tester tests or repairs a backflow prevention assembly.

476.6(2) A registered tester shall maintain a record for each backflow prevention assembly tested for at least five years after the date on which the assembly was tested. Registered testers will complete an administrative authority's test report form if required by ordinance. Records may be reviewed during normal business hours by an authorized representative of the department or administrative authority of the jurisdiction in which the assembly is located. The assembly record will include at least:

a. The name, address and telephone number of the assembly owner.

b. The location of the facility in which the assembly is located.

c. The location of the assembly within the facility.

d. The type, brand, model, size, and serial number of the assembly.

e. The date and time of the test.

f. Results of the test.

g. Any assembly repairs or maintenance.

476.6(3) To field test a backflow prevention assembly, a registered tester shall use a differential pressure gauge, the accuracy of which is verified no less than every 13 months with results traceable to the National Institute of Standards and Technology (NIST). Any differential pressure gauge with an error of more than plus or minus 0.2 psi cannot be used to test a backflow prevention assembly. Methods of testing that use other types of equipment, including dual pressure gauges, water columns, or single pressure gauges, are not acceptable. For every test report record retained in accordance with subrule 476.6(2), the prior most recent accuracy verification for the differential pressure gauge shall be retained and made available to an authorized representative of the department or administrative authority of the jurisdiction in which the assembly is located.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.7(135K) Penalty. In addition to other sanctions provided herein, a person who violates a provision of this chapter is guilty of a simple misdemeanor pursuant to Iowa Code section 135K.5.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—476.8(135K) Denial, probation, suspension or revocation.

476.8(1) *Denial, probation, suspension or revocation of registration.* The department may deny an application for registration or renewal, place a registration on probation, suspend or revoke a registration, or order a registered tester not to test or repair backflow prevention assemblies when the department finds that the applicant or registered tester has committed any of the following acts:

a. Negligence or incompetence in the testing of a backflow prevention assembly, including failure to report improper application or installation of a backflow prevention assembly to the facility owner and the administrative authority.

b. Knowingly submitting a false report of a test of a backflow prevention assembly to the owner of the facility, the local administrative authority, or the department.

c. Fraud in obtaining registration or renewal including, but not limited to:

(1) Intentionally submitting false information on an application for registration or renewal;

(2) Submitting a false or forged certificate or other record of training or certification.

d. Falsification of the assembly records set forth in subrule 476.6(2).

e. Failure to comply with these rules or the ordinances of an administrative authority in whose jurisdiction the registered tester tests a backflow prevention assembly.

f. Failure to pay registration, renewal or late fees.

g. Habitual intoxication or addiction to drugs.

h. Violating a statute of this state or another jurisdiction relating to backflow prevention assembly testing, including but not limited to crimes involving dishonesty, fraud, theft, controlled substances, substance abuse, assault, sexual abuse, sexual misconduct, or homicide. A copy of the record of conviction or plea of guilty is conclusive evidence of the violation.

i. Suspension, revocation, or other disciplinary action pertaining to backflow prevention assembly testing in another jurisdiction. A copy of the record or order of suspension, revocation or disciplinary action is conclusive evidence.

j. Knowingly making misleading, deceptive, untrue, or fraudulent representations regarding the testing of backflow prevention assemblies, or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established. Acts that may constitute unethical conduct include:

(1) Verbally or physically abusing a client or coworker.

(2) Improper sexual contact with, sexual harassment of, or improper sexual advances upon a client or coworker. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature.

k. Failing to cooperate with an investigation or engaging in conduct attempting to subvert an investigation.

l. Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.

m. Knowingly aiding, assisting or advising a person to unlawfully practice as a backflow prevention assembly tester.

n. Representing oneself as a registered backflow prevention assembly tester when one's registration has been suspended, revoked, lapsed, or placed on inactive status.

o. Acceptance of any fee by fraud or misrepresentation.

p. Failure to appropriately respond to written communication from the department sent by registered or certified mail.

476.8(2) *Denial or revocation of training course approval.* The department may deny or revoke the approval for a training course or a continuing education course when it finds:

a. The lead instructor for a training course is not qualified in accordance with paragraph 476.4(1)*"f."*

b. The training course did not comply with paragraph 476.4(1)*"e."*

c. The training course testing laboratory did not comply with paragraph 476.4(1)*"g."*

d. The organization or person applying for approval of a training or continuing education course intentionally submitted false information to the department in support of such approval.

e. The organization or person conducting or sponsoring training has falsified training or continuing education records, including issuance of a certificate or other record of training to a person who did not successfully complete a training course or who did not attend continuing education training.

f. The organization or person responsible for a training or continuing education course has permitted physical or verbal abuse or sexual harassment of a student or instructor. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature.

g. The organization or person responsible for training courses and continuing education courses consistently fails to notify the department of such courses in a timely fashion as set forth in paragraphs 476.4(1)*"d"* and 476.4(2)*"a,"* or fails to pay its fees.

h. Failure to comply with these rules.

476.8(3) *Denial or revocation of approval as a third-party certification agency.* The department may deny or revoke the approval for a third-party certification agency when it finds:

a. The application for approval contains material misinformation regarding the conduct and standards of the certification program or its acceptance in other jurisdictions.

b. Failure to adhere to the standards and procedures stated in the application for approval in the process of certifying or renewing the certification of testers.

c. Violations of paragraph 476.4(3)*"b"* or other failure to comply with these rules.

476.8(4) *Complaints.* Complaints regarding a registered tester, an approved training course, or a third-party certification agency may be sent to the department. The complainant should provide as much pertinent and specific information as to a potential violation as they are able to.

476.8(5) *Appeals.* Notice of denial, probation, suspension or revocation of registration; denial, probation or revocation of course approval; or denial, probation or revocation of third-party certification agency approval will be sent to the affected individual or organization by certified mail, return receipt requested, or by personal service. The affected individual or organization may appeal the denial, probation, suspension or revocation by requesting a contested case hearing within 20 days of receipt of the department's order. The notice of denial, probation, suspension or revocation is deemed to be suspended during the appeal. Prior to or at the contested case hearing, the department may rescind the notice upon satisfaction that the reason for the denial, probation, suspension or revocation has been or will be removed. 7—Chapter 2506 and 481—Chapter 10 are applicable to contested case appeals.

[**ARC 7833C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

CHAPTER 481
GENERAL RULES FOR MIGRATORY LABOR CAMPS
[Prior to 7/29/87, Health Department[470] Ch 81]
[Prior to 4/2/25, see Public Health Department[641] Ch 81]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/26/30

481—481.1(138) Shelters.

481.1(1) *Heating season.* The season requiring artificial heating as provided in Iowa Code section 138.13 is designated as the period between September 15 and June 1.

481.1(2) *Minimum floor space requirements.* The following floor space requirements shall be provided:

a. At least 50 square feet per occupant for sleeping purposes only in family units and dormitory accommodations.

b. At least 40 square feet per occupant for sleeping purposes only in accommodations using double bunk beds.

481.1(3) *Inspection.* The migrant shelter facilities shall be made available for inspection by the department at any reasonable time.

481.1(4) *Register.* A register of all occupants shall be maintained and provided to the department upon request.

481.1(5) *Separate rooms.* Housing used for families with one or more children six years of age or older shall have a separate room or partition made of rigid materials and installed to provide a reasonably private sleeping area for the husband and wife.

481.1(6) *Storage.* Arrangements for hanging clothing and storing personal effects for each person or family will be provided.

[**ARC 8909C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—481.2(138) Water supply.

481.2(1) *General.* The following standards apply to the water supply:

a. The water supply will be of a safe bacterial and chemical quality.

b. Where a public water supply is available, such water will be used in the camp. If a private water source under pressure is provided, the water system will be capable of delivering at least 35 gallons per person per day to the camp site.

c. Cistern supplies consisting of roof or other surface runoff water will not be used for drinking or culinary purposes.

d. The adequacy of a well as a source of water for drinking or culinary purposes will be determined by inspection and bacteriological examination. Defects found by inspection or contaminated samples will be sufficient grounds for requiring repair, chlorination or condemnation of the well.

e. Water containing 45 or more parts per million of nitrates will not be used for drinking or preparation of formula for infants under one year of age. When the supply contains nitrates in the quantity above, water for infant feeding will be obtained from another source that has been tested and found to be bacterially satisfactory and contains less than 45 parts per million of nitrates. A water supply containing 45 or more parts per million of nitrates will be placarded or posted stating the water will not be used for infant feeding.

f. Hand-pump bases will be of the solid one-piece type bolted, including suitable gaskets, secured to the well casing by thread or weld connection. Handpumps secured to the platform by bolts cast in the concrete will be provided with a rubber or neoprene gasket between the pump base and the platform to ensure a watertight joint.

g. The pump head will be of a type designed to prevent external water or other contaminating material from entering the water chamber.

h. The pump spout will be of the closed, downward-directed type.

481.2(2) *Existing pump pits.* Existing pump pits may be approved if the construction conforms to the following minimum standards:

a. Walls, floor and top of pit are of watertight concrete or masonry construction or equivalent. The well casing extends at least 6 inches above the pit floor.

b. A positive seal is provided for the annular opening between the casing wall and the drop pipe.

c. A positive drain is provided by either a watertight sump and automatic sump pump discharging with at least a 6-inch free fall above the ground surface or an independent drain line discharging to the ground surface above any possible flood level. Pit drains discharging to any other drain or sewer are prohibited.

481.2(3) *Water supply systems.* The water supply system shall be installed so as to prevent backflow of contaminated water from appliances, fixtures, drains and sewers and have no cross-connections with any nonpotable supply or any other water supply that does not comply with these rules.

481.2(4) *Water tanks.* All water to be hauled for a camp will be obtained from an approved source. All equipment used for hauling or storage of potable water will be thoroughly cleaned and disinfected with a solution containing at least 200 parts per million of chlorine immediately before use. No equipment, tanks or reservoirs used for hauling or storing potable water can be used for any other purpose.

[**ARC 8909C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—481.3(138) Waste disposal.

481.3(1) *Solid waste disposal.* Solid waste shall be disposed of in a sanitary disposal project pursuant to Iowa Code chapter 455B, or, if disposed of on the premises, buried so as to create no health hazard or nuisance.

481.3(2) *Liquid waste.* Liquid waste shall be disposed of as follows:

a. Existing wastewater disposal systems located and constructed so as not to create a nuisance or condition of pollution.

b. Water-carriage toilets discharged to a septic tank and solid absorption system or other type of disposal system located, designed and constructed in accordance with the specifications set forth in 567—Chapter 69.

c. A leaching pit or other type disposal system provided to receive the wastes from sinks, laundries, showers and tubs when no septic tank and absorption system is available located and constructed in accordance with the specifications set forth in 567—Chapter 69.

[**ARC 8909C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—481.4(138) Bathing facilities.

481.4(1) Showers shall be supplied with hot and cold water under pressure and be sufficiently enclosed to provide privacy for the user. An adjacent, enclosed dry area will be provided for dressing. No duckboards, mats or other such accessories will be permitted.

481.4(2) Automatic water-heating equipment, or storage tanks with hand-fired heating coils, shall be equipped with combination pressure and temperature relief valves or separate pressure and temperature relief valves, located in the top one-eighth or not more than three inches above the top of the tank served. Pressure relief valves may be located adjacent to the tank. Gas-fired or other combustion-type water heaters shall be vented to the outside atmosphere.

[**ARC 8909C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—481.5(138) Central dining facilities. When central dining facilities are provided by a concessionaire, operator or the manager of a camp, the size of the kitchen and dining hall will be commensurate with the capacity of the housing and separate from the sleeping quarters.

[**ARC 8909C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

481—481.6(138) Safety and fire.

481.6(1) *Fire exits.* Fire exits shall consist of:

a. Shelters of one-story construction housing less than ten persons: two means of escape, one of which may be a readily accessible window with an openable space of at least 24 by 24 inches.

b. Sleeping quarters designed for ten or more persons, central dining facilities and common assembly rooms: at least two doors remotely separated so as to provide alternate means of escape.

c. Floors, above the first floor, used for sleeping quarters or common assembly rooms: a stairway and a permanent affixed exterior ladder or a second stairway.

481.6(2) *Shelter spacing.* There shall be at least ten feet of space in all directions between shelters.

[**ARC 8909C**, IAB 2/19/25, effective 3/26/25; Editorial change: IAC Supplement 4/2/25]

These rules are intended to implement Iowa Code section 138.18.

CHAPTER 485
SWIMMING POOLS, SPAS, AND SPRAY PADS
[Prior to 2/4/26, see Public Health Department[641] Ch 15]

Chapter rescission date pursuant to Iowa Code section 17A.7: 9/24/30

481—485.1(135I) Applicability.

485.1(1) These rules apply to spray pads, swimming pools, and spas as provided by Iowa Code section 135I.2. Spray pads, swimming pools, and spas must also comply with other applicable federal, state or local laws, rules, or ordinances.

485.1(2) A homeowners' association or housing cooperative shall notify the department in writing if its bylaws are amended as provided in Iowa Code section 135I.2. The inspector designated by the association or cooperative shall be a certified operator as defined in subrule 485.3(1). A report of the inspection shall be filed with the association or cooperative secretary and be available to the department or any association or cooperative member on request.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.2 Reserved.

481—485.3(135I) Definitions.

485.3(1) *Definitions.* The definitions set forth in Iowa Code section 135I.1 are incorporated herein by reference. Additionally:

"Air break" is a piping arrangement in which a drain from a fixture, appliance or device discharges indirectly into a receptacle at a point below the flood-level rim of the receptacle.

"Air gap" means the unobstructed vertical distance through the free atmosphere between the lowest opening from an inlet pipe and the flood-level rim of a receptacle.

"Board of health" means a county, city, or district board of health.

"Body feed" means the continuous addition of controlled amounts of filtering aid during the operation of a diatomaceous earth filter to maintain a permeable filter cake.

"Certified operator" means a person who has:

1. Successfully completed the Certified Pool/Spa Operator® course sanctioned by PHTA, the Aquatic Facility Operator course sanctioned by NRPA, the Professional Pool & Spa Operator course sanctioned by the PHTA, or the Licensed Aquatic Facility Technician course sanctioned by the American Swimming Pool and Spa Association; and
2. Been recertified as required by the sanctioning organization; and
3. Obtained the continuing education required by subrule 485.11(2).

"Combined chlorine" means nitrogen-chlorine compounds formed by the reaction of a chlorine disinfectant chemical with ammonia and organic nitrogen compounds as measured with a DPD test kit.

"Construction" means the installation of a new swimming pool facility or modifications to an existing facility that change the total recirculated water volume or the total water surface area by 20 percent or more.

"Deck" means a walkway immediately adjacent to a swimming pool.

"Decorative fountain" means a basin with water sprays or jets that does not serve primarily as a wading or swimming pool and whose drain is not directly connected to any type of suction device for removing or recirculating the water.

"Deep water" means water that is more than 5 ft deep.

"Engineering plans" means plans and specifications certified in accordance with the rules of the examining board by an engineer or architect licensed to practice in the state of Iowa.

"Equalizer" means an arrangement including a pipe from an opening below the water level in a swimming pool or spa to the body of a skimmer and a normally closed valve at the skimmer body.

"Facility" means a building, fenced enclosure, or lot where there is at least one spray pad, swimming pool, or spa subject to regulation under Iowa Code chapter 135I and these rules.

"Field fabricated," when applied to a sump or a cover/grate for a fully submerged outlet, means constructed on site with conventional building materials or of a size and shape different from readily available commercial sumps or cover/grates.

"Fill and drain wading pool" means a wading pool having no recirculation system.

"Filter" means a mechanical device for removing suspended particles from the swimming pool water and refers to the complete mechanism including all component parts.

"Flow rating," when applied to the cover/grate for a fully submerged outlet, means the maximum flow rate in gpm through the cover/grate that will not cause body or hair entrapment as determined by the test methods in the ASME/ANSI standard.

"Fountain" means a water fountain that is not established primarily for swimming or wading, but where swimming or wading is allowed, and that has a drain that is connected to a mechanical suction device for removing or recirculating the water.

"Free chlorine" means the concentration of hypochlorous acid and hypochlorite ion in the swimming pool water as measured with a DPD test kit or as measured by another method approved by the department.

"Fully submerged outlet" means an outlet that is completely under water when the water is at the normal operating level.

"Gravity outlet" means an outlet that directly connects to a tank or other structure that is at atmospheric pressure.

"Hose bib" means a water outlet that is threaded to permit the attachment of a hose.

"Hydrostatic relief valve" means a relief valve installed in the bottom of the swimming pool and designed to operate automatically when the swimming pool is empty, relieving the groundwater pressure around the structure by allowing the groundwater into the swimming pool tank.

"Inlet" means a fitting or opening through which recirculation water enters the swimming pool or spa.

"Inspection agency" means the department or a city, county or district board of health that has executed with the department pursuant to the authority of Iowa Code chapters 28E and 135I an agreement to inspect swimming pool/spa facilities and enforce these rules. Within its geographic area, the city, county or district board of health is the "local inspection agency."

"Leisure river" means a closed-path channel with a river-like flow of water. A leisure river may include water features and play devices.

"Lifeguard" means an individual who holds current lifeguard certification by one of the following organizations and current certification in first aid and infant, child and adult CPR, including compressions, rescue breathing, and two-person CPR:

1. American Red Cross.
2. YMCA.
3. Boy Scouts of America.
4. Ellis & Associates.
5. Starfish Aquatics Institute.
6. National Aquatic Safety Company (NASCO).

"Main drain" means the outlet(s) at the deepest part of a swimming pool or spa.

"Multisection water recreation pool" means a swimming pool with three or more distinct use areas.

"Outlet" means an opening through which water leaves the swimming pool or spa.

"Outlet system" means an arrangement of components associated with one or more connected fully submerged outlets including the cover/grate(s), the sump(s), the piping, and the pump(s) if one or more pumps are directly connected to the outlet(s).

"Perimeter overflow gutter" means a weir and trough around the perimeter of a swimming pool that is used to skim the surface of the water and return the water to the treatment system.

"Plunge pool" means a pool designed to serve as a landing area for a water slide.

"Recirculation system" means the pump(s), piping, inlets, outlets, filtration system, chemical feed systems and accessories provided to convey and treat the spray pad, swimming pool, or spa water to meet the water quality standards in these rules.

"Reconstruction" means the replacement or modification of a spray pad, swimming pool, or spa shell or deck, a spray pad, swimming pool, or spa recirculation system, a perimeter overflow gutter or skimmer,

or a bathhouse associated with a public spray pad, swimming pool, or spa. "Reconstruction" does not include the replacement of equipment or piping previously approved by the department, provided that the type and size of the equipment are not revised, nor does it include normal maintenance or repair.

"Residential swimming pool" means any swimming pool that is used, or intended to be used, in connection with a single-family residence and that is available only to the family of the householder and the householder's private guests. A residential swimming pool used for private swimming lessons for over 207 hours in a calendar month, or the number of hours prescribed by local ordinance applicable to such use of a residential swimming pool, whichever is greater, is considered a public swimming pool and is subject to all the requirements of this chapter. A residential swimming pool used for any other commercial purposes for more than 60 hours in a calendar month is considered a public swimming pool and is subject to all the requirements of this chapter.

"Shallow water" means those areas of a swimming pool where the water is 5 ft deep or less.

"Skimmer" means a manufactured device designed to be directly connected to the recirculation pump suction and used to skim the swimming pool over a self-adjusting weir.

"Spa" means a structure, chamber, or tank, with a bench and a means of agitation, that is designed for recreational or therapeutic use and is not drained, cleaned, and refilled after each individual use. A swimming pool with a bench equipped with agitation is not considered a spa provided that the water temperature is maintained at 90°F or less.

"Speed slide" means a water slide that is designed to enter users into a plunge pool or other deceleration arrangement at a speed of 30 ft per second or more.

"Suction outlet" means an outlet that is directly connected to the inlet side of a circulation pump.

"Superchlorination" means the addition of a chlorine disinfectant compound to a spray pad, swimming pool, or spa to a concentration at least 10 ppm chlorine concentration.

"Swimming pool slide" means any device used to enter a swimming pool by sliding down an inclined plane or through a tube similar to a playground slide that has a slide path of 20 ft or less in length and a water flow down the slide of 20 gpm or less. A slide exceeding either of these criteria is a water slide.

"Total bromine" means the concentration of hypobromous acid, hypobromite ion and nitrogen-bromine compounds in the swimming pool water as measured with a DPD test kit.

"Tri-chlor" means trichloro-s-triazinetrione. Tri-chlor is a form of chlorine that includes cyanuric acid in its formulation.

"Unblockable," when applied to a cover/grate for a fully submerged outlet, means a size and shape that cannot be fully covered by an 18-inch by 23-inch mat with 4-inch-diameter rounded corners and the differential pressure generated by the flow through the uncovered open area is not enough to cause body entrapment.

"Wading pool" means a swimming pool that is no more than 24 inches deep at any point.

"Water slide" means a recreational ride that is a sloped trough-like or tubular structure using water as a lubricant and as a method of regulating rider velocity and that terminates in a plunge pool, swimming pool, or in a specially designed deceleration structure.

"Wave pool" means a swimming pool of special shape and design that is provided with wave-generating equipment.

"Zero-depth pool" means a swimming pool in which the pool floor intersects the water surface along at least one side of the pool.

485.3(2) *Abbreviations.*

"AFO" means aquatic facility operator.

"AGA" means American Gas Association.

"ANSI" means American National Standards Institute.

"ASME" means American Society of Mechanical Engineers.

"ASME/ANSI standard" means ASME/ANSI A112.19.8a-2008, "Suction Fittings for Use in Swimming Pools, Wading Pools, Spas, and Hot Tubs."

"ASTM" means ASTM International (formerly American Society of Testing and Materials).

"AWWA" means American Water Works Association.

"BTU" means British thermal unit.

"CO_2" means carbon dioxide.
"CPO®" means certified swimming pool/spa operator.
"CPR" means cardiopulmonary resuscitation.
"DPD" means diethyl-p-phenylene diamine.
"feet" means feet of water (feet × 0.43 = psi) when used in discussing pump requirements.
"ft" means foot or feet (distance).
"ft^2" means square foot or square feet.
"gal" means gallon(s).
"GFCI" means ground fault circuit interrupter.
"gpm" means gal per minute.
"in Hg" means inches of mercury (in Hg × 0.49 = psi).
"in^2" means square inch(es).
"LAFT" means licensed aquatic facility technician.
"mg/L" means milligram(s) per liter.
"mV" means millivolts.
"NRPA" means National Recreation and Park Association.
"NSF" means NSF International (formerly National Sanitation Foundation).
"ORP" means oxidation-reduction potential.
"PHTA" means the Pool & Hot Tub Alliance.
"ppm" means parts per million; mg/L and ppm are equivalent terms.
"PPSO" means professional pool and spa operator.
"psi" means pounds per square inch.
"SDS" means safety data sheets.
"sec" means second (time).
"Standard 50" means NSF/ANSI Standard 50-2016a (2017), "Circulation System Components for Swimming Pools, Spas, or Hot Tubs."
"TDH" means total dynamic head.
"UL" means Underwriters Laboratories.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

SWIMMING POOLS

481—485.4(135I) Swimming pool operations. Swimming pools shall be operated in a safe, sanitary manner and shall meet the following operational standards.

485.4(1) *Filtration and recirculation.*

a. Filtration. A swimming pool shall have a filtration system in good working condition that provides water clarity in compliance with the water quality standards of subrule 485.4(2).

b. Recirculation. The recirculation system of a swimming pool shall meet the following requirements:

(1) During the operating season, pumps, filters, disinfectant feeders, flow indicators, gauges, and all related components of the swimming pool water recirculation system shall be operated continuously except for backwashing or servicing.

(2) The recirculation system has an operating pressure gauge located in front of the filter if it is a pressure filter system. A vacuum filter system has a vacuum gauge located between the filter and the pump.

(3) The recirculation system has inlets adequate in design, number, location, and spacing to ensure effective distribution of treated water and maintenance of uniform disinfectant residual throughout the swimming pool.

(4) Swimming pools have a means for skimming the pool water surface.

1. Each skimmer has an easily removable basket or screen upstream from any valve. Self-adjusting weirs shall be in place to provide skimming action.

2. Gutter or skimmer drainage is sufficient to minimize flooding and prevent backflow of skimmed water into the swimming pool.

c. Wastewater. Backwash water from a swimming pool shall be discharged through an air break or an air gap.

d. Water supply. The water supplied to a swimming pool shall be from a water supply meeting the requirements of the department of natural resources for drinking water and meet the following criteria:

(1) Water supplied to a swimming pool is discharged to the pool system through an air gap or a reduced-pressure principle backflow device meeting AWWA C-511-97, "Reduced-Pressure Principle Backflow-Prevention Assembly."

(2) Each hose bib at a facility is equipped with an atmospheric vacuum breaker or a hose connection backflow preventer.

e. Water heaters. Swimming pool water heaters shall meet the following criteria:

(1) Electric water heaters bear the seal of UL.

(2) Gas-fired water heaters are equipped with a pressure relief valve.

(3) Fuel-burning water heaters are vented to the outside in accordance with the state plumbing code.

(4) Each indoor swimming pool equipment room with fuel-burning water heating equipment has one or more openings to the outside of the room for the provision of combustion air.

485.4(2) *Water quality and testing.*

a. Disinfection.

(1) Swimming pool water shall have a free chlorine residual of at least 1.0 ppm and no greater than 8.0 ppm, or a total bromine residual of at least 2.0 ppm and no greater than 18 ppm when the swimming pool is open for use.

(2) The swimming pool shall be closed if the free chlorine is measured to be less than 0.6 ppm or the total bromine is measured to be less than 1.0 ppm or if a free chlorine measurement exceeds 8.0 ppm or if the total bromine measurement exceeds 18 ppm.

(3) The swimming pool water shall have an ORP of at least 700 mV, but no greater than 880 mV, and be closed if the ORP is less than 650 mV or greater than 880 mV.

(4) The swimming pool shall be closed if the cyanuric acid concentration in the swimming pool water exceeds 80 ppm. The swimming pool may be reopened when the cyanuric acid concentration is 40 ppm or less.

(5) No cyanuric acid in any form shall be added to an indoor swimming pool.

b. pH level. The pH of swimming pool water shall be 7.2 to 7.8. An inspection agency may require that a swimming pool be closed if the pH is less than 6.8 or greater than 8.2.

c. Water clarity. A swimming pool shall be closed if the swimming pool is less than 8 ft deep and the grate openings on the main drain are not clearly visible from the deck or the swimming pool is 8 ft deep or deeper and the main drain is not clearly visible from the deck.

d. Bacteria detection.

(1) If coliform bacteria are detected in a sample taken in accordance with subparagraph 485.4(2)*"e"* (5), the swimming pool shall be superchlorinated and a check sample taken when the disinfectant residual is within the requirements of paragraph 485.4(2)*"a."* If coliform bacteria are detected in the check sample, the swimming pool shall be closed. The swimming pool may reopen when no coliform bacteria are detected in a swimming pool water sample taken when the pool water meets the requirements of paragraphs 485.4(2)*"a," "b"* and *"c."*

(2) The facility management shall notify the local inspection agency of the positive bacteriological result within one business day after the facility management has become aware of the result.

e. Test frequency. The results of the tests required below shall be recorded in the swimming pool records.

(1) The disinfectant residual in the swimming pool water shall be tested or the ORP of the swimming pool water checked each day within one-half hour of the swimming pool opening time and at intervals not to exceed four hours thereafter until the swimming pool closing time. For swimming pools at condominiums, apartments, housing cooperatives, or homeowners associations with 25 or fewer living units, testing must be performed at least once each day that the swimming pool is available for use.

The operator may make visual readings of ORP on site from an automatic controller in lieu of manual testing, but the swimming pool water shall be tested manually for disinfectant residual at least twice per

day. Both ORP and disinfectant residual shall be recorded when manual testing is done. The operator shall specify in the swimming pool records which results are from the manual tests.

(2) The pH of the swimming pool water shall be tested each day within one-half hour of the swimming pool opening time and at intervals not to exceed four hours thereafter until the swimming pool closing time. For swimming pools at condominiums, apartments, housing cooperatives, or homeowners associations with 25 or fewer living units, testing for pH must be performed at least once each day that the swimming pool is available for use.

The operator may make visual readings of pH on site from an automatic controller in lieu of manual testing, but the swimming pool water shall be tested manually for pH at least twice per day. The operator shall specify in the swimming pool records which results are from the manual tests.

(3) If a chlorine chemical is used for disinfection, the swimming pool water shall be tested for combined chlorine at least once in each week that the swimming pool is open for use.

(4) If cyanuric acid or a stabilized chlorine is used at a swimming pool, the swimming pool water shall be tested for cyanuric acid at least once in each week that the swimming pool is open for use.

(5) At least once in each month that a swimming pool is open for use, the facility management shall have a sample of the swimming pool water analyzed for total coliform by submitting the sample to a laboratory certified by the department of natural resources for the determination of coliform bacteria in drinking water.

f. Test equipment. Each facility shall have functional water testing equipment for free chlorine and combined chlorine, or total bromine; pH; total alkalinity; calcium hardness; and cyanuric acid (if cyanuric acid or a stabilized chlorine is used at the facility) that meets the following criteria:

(1) The test equipment provides for the direct measurement of free chlorine and combined chlorine from 0 to 10 ppm in increments of 0.2 ppm or less over the full range, or total bromine from 0 to 20 ppm in increments of 0.5 ppm or less over the full range.

(2) The test equipment provides for the measurement of swimming pool water pH from 7.0 to 8.0 with at least five increments in that range.

(3) A controller used in lieu of manual disinfectant residual testing has a numerical analog or digital display with an ORP scale with a range of at least 600 to 900 mV with increments of 20 mV or less.

(4) A controller used in lieu of manual pH testing has a numerical analog or digital display with a pH range at least equal to the range required in subparagraph 485.4(2)*"f"*(2) with increments of 0.2 or less over the full range.

g. Operator availability. A person knowledgeable in testing water and in operating the water treatment equipment shall be available whenever a swimming pool is open for use.

485.4(3) *Chemical feed equipment and cleaning.*

a. Chemical feed equipment.

(1) Equipment for continuous feed of chlorine, a chlorine compound or a bromine compound to the swimming pool water shall be provided and be operational. The equipment shall be adjustable in at least five increments over its feed capacity and, where applicable, the chemical feeder listed by NSF or another listing agency for compliance with Standard 50.

(2) Equipment for the continuous feed of a chemical for pH adjustment of the swimming pool water shall be provided and be operational for each swimming pool and, where applicable, the chemical feeder listed by NSF or another listing agency for compliance with Standard 50.

b. Cleaning.

(1) The inspection agency may require that a swimming pool be drained and scrubbed with a disinfecting agent prior to further usage.

(2) A vacuum system shall be provided to remove dirt from the bottom of the swimming pool.

485.4(4) *Safety.*

a. Chemical safety. Swimming pool chemical safety shall meet the following criteria:

(1) When chemical additions are made from the deck, the swimming pool is closed from use for at least one-half hour. The operator tests the swimming pool water as appropriate before allowing use of the swimming pool. The chemical addition and the test results are recorded in the swimming pool records.

(2) Swimming pool treatment chemicals shall be stored and handled in accordance with the manufacturer's recommendations.

(3) SDS for the chemicals used at the pool are at the facility in a location known and readily accessible to the facility staff.

(4) Chemical storage containers are clearly labeled.

(5) A chemical hazard warning sign is placed at the entrance of a room where chemicals are used or stored or where bulk containers are located.

b. Stairs, ladders, recessed steps, and ramps. Swimming pool stairs, ladders, recessed steps, and ramps shall meet the following criteria:

(1) Ladders or recessed steps are provided in the deep portion of a swimming pool. Stairs, ladders, recessed steps, or ramps are provided in the shallow portion if the vertical distance from the bottom of the swimming pool to the deck is more than 2 ft.

(2) Ladders, ladder rungs and ramps are securely anchored.

(3) The distance between the swimming pool wall to the vertical rail of a ladder is no greater than 6 inches and no less than 3 inches. The lower end of each ladder rail is securely covered with a smooth nonmetallic cap and within 1 inch of the swimming pool wall.

(4) Stairs, ladder rungs, ramps and recessed steps are slip-resistant.

(5) If a swimming pool is over 30 ft wide, recessed steps, ladders, ramps, or stairs are installed on each side. If a stairway centered on the shallow end wall of the swimming pool is within 30 ft of each side of the swimming pool, that end of the swimming pool is considered in compliance with this subparagraph.

(6) Each set of recessed steps are equipped with a securely anchored grab rail on each side of the recessed steps.

(7) Each set of stairs and each ramp are equipped with a securely anchored handrail(s).

(8) When stairs are provided for entry into a swimming pool, a slip-resistant stripe at least 1 inch wide of a color contrasting with the step surface and with the swimming pool floor is marked at the top front edge of each tread.

c. Diving areas. Swimming pool diving areas shall meet the following criteria:

(1) No diving is permitted in areas where the water is 5 ft deep or less except for purposes of competition or training. The diving is supervised by a lifeguard, swim instructor or swim coach.

(2) Starting blocks are only used for competition or training purposes under the supervision of a lifeguard, swim instructor, or swim coach. Starting blocks and starting block installation meet the requirements of the competition governing body (National Collegiate Athletic Association, USA Swimming, or National Federation of State High School Associations). When the swimming pool is open for general use, the starting blocks are secured from use by removal, covering, or signage and active supervision.

(3) Diving boards are permitted only if the diving area dimensions conform to the minimum requirements indicated below in Figure 1 and Tables 1 and 2.

(4) There is a completely unobstructed clear distance of 13 ft above the diving board, measured from the center of the front end of the board, and extending at least 8 ft behind, 8 ft to each side, and 16 ft ahead of the measuring point.

(5) Diving boards and platforms over 3 meters in height are prohibited, except where used only for competition or training purposes under the supervision of a diving coach and diving area dimensions conform to minimum requirements of World Aquatics (FINA).

(6) Diving boards and platforms have a slip-resistant surface.

(7) Where the top of a diving board or platform is more than 18 inches above the deck, stairs or a ladder are provided for access to the diving board or platform.

(8) Handrails are provided at all steps and ladders leading to diving boards that are more than 32 inches above the deck.

(9) A platform or diving board that is 32 inches or more above the swimming pool deck has a guardrail on both sides. The guardrails are at least 36 inches high and extend to the edge of the deck.

(10) Supports, platforms, and steps for diving boards are of substantial construction and of sufficient structural strength to safely carry the maximum anticipated load.

NOTE: The information contained in Figure 1 and Tables 1 and 2 is for swimming pools constructed prior to March 14, 1990. Swimming pools constructed after March 14, 1990, shall comply with paragraph 485.5(13)*"a."*

When determining distances set out in Tables 1 and 2, measurements shall be taken from the top center of the front edge of the diving board. The reference water level shall be the midpoint of the skimmer opening for a skimmer pool or a stainless steel gutter system with surge weirs. The reference water level for a gutter pool shall be the top of the gutter weir.

Figure 1

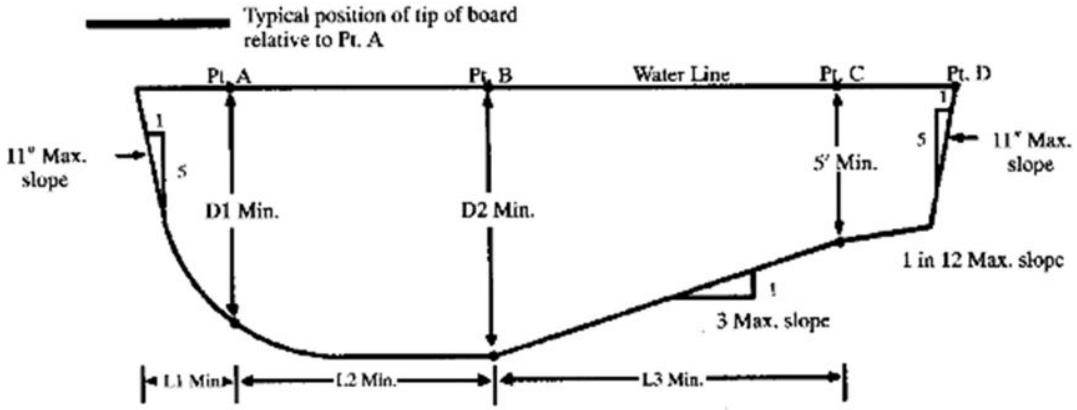

Table 1

		Minimum Dimensions				
Diving Board Height Above Water	Maximum Diving Board Length	D1	D2	L1	L2	L3
Deck level to 2/3 meter	10 ft	7 ft	8.5 ft	2.5 ft	8 ft	10.5 ft
Greater than 2/3 meter to 3/4 meter	12 ft	7.5 ft	9 ft	3 ft	9 ft	12 ft
Greater than 3/4 meter to 1 meter	16 ft	8.5 ft	10 ft	4 ft	10 ft	15 ft
Greater than 1 meter to 3 meters	16 ft	11 ft	12 ft	6 ft	10.5 ft	21 ft

Table 2

	Minimum Distance		
Diving Board Height Above Water	To Pool Side	To 1-Meter Diving Board	To 3-Meter Diving Board
Deck level to 1 meter	9 ft	8 ft	10 ft
Greater than 1 meter	11 ft	10 ft	10 ft

d. Lifeguards.

(1) Except for wading pools and spray pads, lifeguards are required at municipal and school swimming pools of any size and other swimming pools having a water surface area of 1,500 ft^2 or larger. Swimming pools operated by apartments, condominiums, country clubs, neighborhoods, manufactured home communities, or mobile home parks are exempt from lifeguard requirements.

(2) For open recreation swimming, there shall be at least one lifeguard guarding the pool at all times for up to 30 swimmers in the water; at least two lifeguards on duty for over 30 swimmers in the water and up to 125 swimmers in the water; and an additional lifeguard for each additional 125 swimmers in the water or fraction thereof.

NOTE: This is the minimum lifeguard coverage. It is the responsibility of the management of each facility to evaluate the facility configuration, the features of the facility, the patrons, and the type of use and to determine the facility-specific requirements for supervision by lifeguards.

(3) For a structured swimming program, such as lap swim, competitive swimming, water exercise classes, swim lessons and physical education classes, a lifeguard is not required provided the program is supervised by an instructor, teacher, or coach who is a lifeguard or who has current certification from the American Red Cross in basic water rescue, first aid, and infant, child and adult CPR, or equivalent training approved by the department. An instructor, teacher or coach may be responsible for a maximum of 30 persons within a structured activity. If more than 30 persons are involved in a structured activity, a second qualified supervisor must be present.

(4) Each water slide shall have one slide attendant trained in the operation of the slide stationed at the top of the slide and one lifeguard at the bottom of the slide.

If two or three water slides start at the same platform and the distance between the centerlines of any two start structures is 10 ft or less, one attendant may supervise the top of the slides. If two or three water slides terminate within the same landing area, one lifeguard may supervise the landing area.

e. Lifeguard chairs. For outdoor swimming pools where lifeguards are required by rule, elevated lifeguard chairs shall be provided as follows: at least one chair for a swimming pool with a water surface area of 2,000 to 4,000 ft^2 inclusive; at least two chairs if the area is 4,001 to 6,000 ft^2; and at least three chairs if the area is 6,001 ft^2 or more. Swimming pools are not required to have more than three lifeguard chairs. This requirement does not apply to wave pools, leisure rivers, spray pads, or wading pools.

f. Emergency equipment and facilities. Emergency equipment and facilities at swimming pools shall meet the following criteria:

(1) Except for wading pools, a minimum of 1 unit of lifesaving equipment is provided for each 1,500 ft^2 of water surface area or fraction thereof. The area of a swimming pool where the water is 2 ft deep or less may be subtracted from the total area for this requirement. A swimming pool is not required to have more than 10 units of lifesaving equipment.

(2) A unit of lifesaving equipment consists of one of the following:

1. A U.S. Coast Guard-recognized ring buoy fitted with a ¼-inch diameter line with a length of at least one-half the width of the pool, but no more than 60 ft; or
2. A life pole, or a "shepherd's crook" of at least 8 ft in length and having blunted ends; or
3. A rescue buoy made of lightweight, hard, buoyant plastic with molded handgrips along each side and provided with a 4- to 6-ft tow rope and shoulder strap, or
4. A rescue tube made of a soft, strong foam material 3 inches by 6 inches by 40 inches with a molded strap providing a ring at one end and a hook at the other. Attached to the end with the ring shall be a 6-ft-long towline with a shoulder strap.

NOTE: Rescue equipment identified in numbered paragraphs 485.4(4)*"f"*(2)"3" and "4" above shall be used only at swimming pools where lifeguards are employed. If a facility employs lifeguards, the lifeguards shall be provided with the minimum equipment required by their training including but not limited to rescue tubes and personal CPR masks.

(3) Lifesaving equipment is mounted in conspicuous places around the swimming pool deck during normal operations.

(4) A swimming pool facility has a first-aid kit which contains, at a minimum, the following:

1. Band-Aids.
2. Sterile 4″ × 4″ bandage compress.
3. Self-adhering gauze bandage.
4. Disposable gloves.
5. Chemical cold compress.

Where lifeguards are not provided, the first-aid kit is prominently mounted in the swimming pool enclosure or a sign stating its location is posted near the swimming pool. The first-aid kit is accessible when the swimming pool is open.

(5) A standard spine board with straps and a head immobilizer is provided at each swimming pool where lifeguards are required by rule.

(6) Except for wading pools and spray pads, each swimming pool where lifeguards are not provided has a designated emergency telephone or equivalent emergency communication system available to users of swimming pools when the swimming pool is open. When the telephone is not within the confines of the swimming pool enclosure, the location of the emergency telephone is posted in at least one conspicuous place within the swimming pool enclosure. Instructions for emergency use of the telephone are posted near the telephone.

At each swimming pool where lifeguards are employed, a telephone is available to the swimming pool staff for emergency purposes.

g. Water level. Water level in swimming pools shall be maintained at the skimming level.

h. Fully submerged outlets. Swimming pools and fully submerged outlets shall meet the following criteria:

(1) Each outlet, including the main drain(s), is designed to prevent user entrapment. A swimming pool is closed if the cover/grate of a fully submerged outlet is missing or broken.

(2) Each fully submerged outlet shall have a cover/grate that has been tested for compliance with the requirements of the ASME/ANSI standard by a testing agency that is certified for compliance by an engineer licensed in Iowa.

1. The cover/grate for an outlet system with a single fully submerged outlet has a flow rating of at least 100 percent of the maximum system flow rate. The combined flow rating for the cover/grates for an outlet system with more than one fully submerged outlet is at least 200 percent of the maximum system flow rate.

The maximum system flow rate for a main drain system is at least the design filter flow rate but may include play feature and water slide flow. The maximum system flow rate for other fully submerged outlets is the design flow rate of the pump(s) directly connected to the outlet system.

2. Fully submerged outlet cover/grates are not removable without the use of tools.

3. Purchase records and product information that demonstrate compliance are maintained by the facility for at least five years from the time the cover/grate is purchased. If a field fabricated cover/grate is certified for compliance to the ASME/ANSI standard by an engineer licensed in Iowa, a copy of the certification letter is kept at the facility for at least five years from the certification date.

(3) A swimming pool with a single fully submerged outlet that is not unblockable and that is directly connected to a pump is closed if the outlet does not have a cover/grate that complies with the ASME/ANSI standard.

If a swimming pool has two or more fully submerged outlets on a single surface that are all less than 3 ft apart on center, are not unblockable, and are directly connected to a pump, the swimming pool is considered to have a single fully submerged outlet.

(4) A swimming pool with a single fully submerged outlet that is not unblockable and that is directly connected to a pump is closed if the outlet system is not equipped with a safety vacuum release system that is listed for compliance with ASME/ANSI A112.19.17-2002 or ASTM F2387-04 (2012).

1. Purchase records and product information that demonstrate compliance are maintained by the facility for at least five years from the time the SVRS is purchased or another approved system is installed.

2. An SVRS is installed in accordance with the manufacturer's instructions.

3. An SVRS is tested for proper function at the frequency recommended by the manufacturer but at least once in each month the swimming pool is operated. The date and result of each test is recorded.

(5) In lieu of compliance with subparagraphs 485.4(4)*"h"*(2), (3) and (4) above, a fully submerged outlet in a swimming pool may be disabled with the approval of the department, except that an equalizer in a skimmer may be plugged without department approval if the management of the swimming pool submits to the department information, including but not necessarily limited to:

1. The area and volume of the pool;

2. The functional areas of the pool and the depths in those areas;

3. Detailed information about the inlet system, including the location of the inlets, the depth of the inlets, and the type of inlet fitting;

4. Detailed information about the overflow system, gutter or skimmer, number of skimmers, and pipe sizes;

5. Pump information and flow rates for the outlet system;

6. Filter type, number of filters, the size of the filter(s), and whether multiple filters are backwashed together or separately.

If the department approves the application to disable the outlet, the outlet valve is closed and the valve secured by removing the handle, by locking the handle closed, or by another method approved by the department. The outlet may be physically disconnected from the pump system.

i. Surface finish and float lines. Surface finish and float lines shall meet the following criteria:

(1) The bottom and sides of a swimming pool are white or a light color. This does not prohibit painting or marking racing lines, stairs or turn targets with contrasting colors.

(2) The swimming pool walls and floor have a smooth surface to facilitate cleaning.

(3) The boundary between shallow and deep water (5 ft) is marked by a float line with floats spaced no more than 5 ft apart. The float line is installed on the shallow side of the boundary within 12 inches of the boundary. When the slope of the floor of a swimming pool exceeds 1 ft vertical to 12 ft horizontal at a depth of less than 5 ft, the float line is placed on the shallow side of the slope change within 12 inches of the slope change in lieu of a float line at the 5 ft depth.

(4) A wave pool is equipped with a float line with floats spaced no more than 5 ft apart. The float line shall be located at least 6 ft from the deep-end wall. Users are not permitted between the float line and the deep-end wall.

(5) The landing area for a swimming pool slide or a water slide that terminates in a swimming pool is delineated by a float line.

A float line is not required when the landing area is in deep water provided the distance between the slide and any diving board(s) meets the requirements for diving board spacing. The distance between the side of the slide at the slide's terminus and the swimming pool wall is in accordance with the manufacturer's recommendations, but shall be at least 8 ft.

A float line is not required for a slide that is designed for toddlers and young children and that terminates in water that is 2 ft deep or less. The landing area is designated by a brightly colored pad securely fastened to the floor of the swimming pool or by painting the floor at the end of the slide.

j. Depth marking. Depth marking shall meet the following criteria:

(1) Depth markers are painted or otherwise marked on the deck within 3 ft of the edge of the swimming pool. The depth of a wave pool is also marked on the side walls of the wave pool, above the maximum static water level, where the depth is 3 ft or more, and on the deep-end wall of the wave pool. Depth markers are not required at the zero-depth end of a wading pool, wave pool, or a zero-depth swimming pool. Depth markers are not required at a plunge pool on the flume discharge end or on the exit end if stairs are used for exit.

(2) Depth markers are located at 1-ft depth intervals but not more than 25 ft apart measured between the centers of the depth markers around the area of a swimming pool that has a water depth of 5 ft or less.

(3) Depth markers are located not more than 25 ft apart measured between the centers of the depth markers around the deep end of the swimming pool. The words "Deep Water" may be used in place of numerals.

(4) In lieu of subparagraph 485.4(4)*"j"*(2) above, the maximum depth of a wading pool may be posted at each entrance to a wading pool enclosure and at one conspicuous location inside the wading pool enclosure in letters or numbers at least 3 inches high.

(5) The depth of a leisure river is posted at the entrance(s) to the leisure river in characters at least 3 inches high. The depth of the leisure river is marked on the side wall of the leisure river above the static water level at intervals not to exceed 50 ft on center. The depth of the leisure river is marked on the deck in the areas where users are permitted. The depth markers are within 3 ft of the edge of the leisure river at intervals not to exceed 25 ft on center. The depth markers at a leisure river constructed before May 4, 2005, are not required to be changed until the deck or channel structure is replaced or repaired.

(6) "No Diving" or equivalent wording or graphics are marked on the swimming pool deck within 3 ft of the edge of the swimming pool where the water is shallow and at other pool areas determined by management. The markers are 25 ft apart or less, center to center, around the perimeter of the area. This marking is not required for wading pools or at the zero-depth end of a wave pool or of a zero-depth

swimming pool. "No Diving" or equivalent wording or graphics are marked on the deck of a leisure river in areas where users are permitted. The "No Diving" markers are within 3 ft of the edge of the leisure river at intervals not to exceed 25 ft on center. The "No Diving" markers at a leisure river constructed before May 4, 2005, are not required to be changed until the deck or channel structure is replaced or repaired.

(7) Letters, numbers, and graphics marked on the deck are slip-resistant, of a color contrasting with the deck and at least 4 inches in height.

k. Deck safety. Deck safety shall meet the following criteria:

(1) Decks are maintained slip-resistant, and free of litter, obstructions and tripping hazards.

(2) Glass objects, other than eyeglasses and safety glass doors and partitions, are not permitted on the deck.

l. Enclosure. Swimming pool enclosure shall meet the following criteria:

(1) Except for a circulated wading pool that is drained when not in use, or a spray pad, a swimming pool is enclosed by a fence, wall, building, or combination thereof not less than 4 ft high. The enclosure is constructed of durable materials.

(2) A fence, wall, or other means of enclosure has no openings that would allow the passage of a 4-inch sphere and are not easily climbable by toddlers. The distance between the ground and the top of the lowest horizontal support accessible from outside the facility, or between the two lowest horizontal supports accessible from outside the facility, is at least 45 inches. A horizontal support is considered accessible if it is on the exterior of the fence relative to the swimming pool, or if the gap between the vertical members of the fence is greater than 1¾ inches.

(3) At least one gate or door with an opening of at least 36 inches in width is provided for emergency purposes. When closed, gates and doors comply with the requirements of subparagraph 485.4(4)*"l"*(2). Gates and doors are lockable. Except where lifeguard or structured program supervision is provided whenever the swimming pool is open, gates and doors are self-closing and self-latching.

(4) If a wading pool is within 50 ft of a swimming pool, the wading pool has a barrier at least 36 inches high separating it from the swimming pool. A barrier installed after May 4, 2005, has no openings that would allow the passage of a 4-inch sphere and is not easily climbable by toddlers. The barrier has at least one 36-inch-wide gate or door. Gates and doors are lockable. Except where lifeguard supervision is provided, gates and doors are self-closing and self-latching.

The department may approve alternate management of the area between the wading pool and swimming pool at a facility where lifeguards are provided whenever the pools are open. The alternate management plan will be in writing and shall be at the facility when the pools are open.

(5) An indoor swimming pool is enclosed by a barrier at least 3 ft high if there are sleeping rooms, hallways, apartments, condominiums, or permanent recreation areas that are used by children and that open directly into the swimming pool area. No opening in the barrier permits the passage of a 4-inch sphere. The barrier is not easily climbable by toddlers. There is at least one 36-inch-wide gate or door through the barrier. Gates and doors are lockable. Except where lifeguard supervision is provided whenever the pool is open, gates and doors are self-closing and self-latching.

(6) A wave pool has a continuous barrier along the full length of each side of the wave pool. The barrier is at least 42 inches high and is installed no more than 3 ft from the side of the wave pool. Wave pool users are not permitted in this area.

m. Electrical. Electrical systems and components shall meet the following criteria:

(1) Each electrical outlet in the deck, shower room, and pool water treatment equipment areas is equipped with a properly installed GFCI at the outlet or at the breaker serving the outlet. Electrical outlets energized through an ORP/pH controller are not required to have a separate GFCI if the controller is equipped with a GFCI or is energized through a GFCI breaker. GFCI receptacles and breakers are tested at least once in each month that the swimming pool is in operation. Testing dates and results are recorded in the pool records.

(2) Lighting.

1. Artificial lighting is provided at a swimming pool that is to be used at night or that does not have adequate natural lighting so that all portions of the swimming pool, including the bottom and main drain, may be clearly seen.

2. Underwater lights and fixtures are designed for their intended use. When the underwater lights operate at more than 15 volts, the underwater light circuit is equipped with a GFCI. When an underwater light needs to be repaired, the electricity is shut off until repairs are completed.

3. For outdoor swimming pools, no electrical wiring, except for overhead illumination, extends over a swimming pool.

n. Chlorine gas and carbon dioxide. Swimming pool facilities shall meet the following criteria:

(1) Chlorine gas feed equipment and full and empty chlorine cylinders are housed in a room or building used exclusively for that purpose during the pool operation season. Chlorine gas installations constructed prior to March 14, 1990, that are housed within chain-link fence or similar enclosure may be used provided that the chlorine cylinders are protected from direct sunlight and the applicable requirements below are met.

1. A chlorine gas room or building has an airtight exhaust system that takes its suction near the floor and discharges out of doors in a direction to minimize the exposure to swimming pool patrons. The system provides one air change every four minutes.

2. An air intake is provided near the ceiling.

3. The exhaust fan is operated from a switch in a nearby location outside the chlorine room or building. The switch is clearly labeled "Chlorine Exhaust Fan."

4. The discharge from the exhaust system is outside the pool enclosure.

5. Artificial lighting is provided in the chlorine room or building.

6. The door of a chlorine room or building is secured in an open position whenever the room is occupied.

7. A plastic bottle of commercial strength ammonia solution for leak detection is provided.

8. Rooms or buildings where chlorine is stored or used are placarded in accordance with 481—Chapter 221.

(2) CO_2 cylinders.

1. Chlorine gas and CO_2 cylinders are individually anchored with safety chains or straps.

2. Storage space is provided so that chlorine cylinders are not subject to direct sunlight.

3. The chlorinator is designed to prevent the backflow of water or moisture into the chlorine gas cylinder.

4. An automatic shutoff is provided to shut off the gas chlorinator and the pH control chemical pump when the recirculation pump stops.

o. Water slides. Water slides shall meet the following criteria:

(1) Water slide support structures are free of obvious structural defects.

(2) The internal surface of a flume is smooth and continuous for its entire length.

(3) The flume has no sharp edges within reach of a user while the user is in the proper sliding position.

p. Projections or obstructions. There shall be no underwater or overhead projections or obstructions that would endanger swimmer safety or interfere with proper swimming pool operation.

485.4(5) *Showers, dressing rooms, and sanitary facilities.* Swimming pool users shall have access to showers, dressing rooms, and sanitary facilities that are clean and free of debris. If a bathhouse is provided, the following shall be met:

a. Floors have a slip-resistant surface.

b. Floors provide adequate drainage to prevent standing water.

c. Olefin or other approved carpeting may be used in locker room or dressing room areas provided there is an adequate drip area between the carpeting and the shower room, toilet facilities, swimming pool, or other area where water can accumulate.

d. All lavatories, showers, and sanitary facilities are functional.

e. Soap is available at each lavatory and at each indoor shower fixture.

485.4(6) *Management, notifications, and records.*

a. Certified operator required. Each facility shall employ a certified operator. One certified operator may be responsible for a maximum of three facilities. Condominium associations, apartments, housing cooperatives, and homeowners associations with 25 or fewer living units are exempt from this requirement.

b. Pool rules sign. A legible pool rules sign shall be posted conspicuously at a minimum of two locations within the swimming pool enclosure. The sign shall include the following stipulations:

(1) No diving in the shallow end of the swimming pool and in other areas marked "No Diving."

(2) No rough play in or around the swimming pool.

(3) No running on the deck.

c. Other rules. Management may adopt and post such other rules as it deems necessary to provide for user safety and the proper operation of the facility.

d. "No Lifeguard" signs. Where lifeguards are not provided whenever the pool is open, a sign shall be posted at each entry to a swimming pool, stating that lifeguards are not on duty and children under the age of 12 must be accompanied by an adult, or at each entry to a wading pool, stating that lifeguards are not on duty and children must be accompanied by an adult.

e. Water slide rules. Rules and restrictions for the use of a water slide shall be posted near the slide and address the following as applicable:

(1) Use limits.

(2) Attire.

(3) Riding restrictions.

(4) Water depth at exit.

(5) Special rules to accommodate unique aspects of the attraction.

(6) Special warnings about the relative degree of difficulty.

f. Operational records. The operator of a swimming pool shall have the swimming pool operational records for the previous 12 months at the facility and make these records available when requested by a swimming pool inspector. These records shall contain a day-by-day account of swimming pool operation, including:

(1) ORP and pH readings, results of pH, free chlorine or total bromine residual, cyanuric acid, combined chlorine, and any other chemical test results.

(2) Results of microbiological analyses.

(3) Reports of complaints, accidents, injuries, and illness.

(4) Dates and quantities of chemical additions, including resupply of chemical feed systems.

(5) Dates when filters were backwashed or cleaned or when a filter cartridge was changed.

(6) Monthly ground fault circuit interrupter test results.

(7) Dates of review of material safety data sheets.

(8) If applicable, dates and results of tests of each SVRS installed at a facility.

g. Submission of records. An inspection agency may require a facility operator to submit to the inspection agency on a monthly basis a copy of the records of the ORP and pH readings, chemical test results and microbiological analyses. The inspection agency will notify the facility management of this requirement in writing at least 15 days before the reports are to be submitted for the first time. The facility management shall submit the required reports to the inspection agency within ten days after the end of each month of operation.

h. Certificates. Copies of certified operator certificates and copies of lifeguard, first-aid, basic water rescue, and CPR certificates for the facility staff shall be kept at the facility.

i. Operations manual. A permanent manual for the operation of the swimming pool shall be kept at the facility and include instructions for routine operations at the swimming pool including but not necessarily limited to:

(1) Water testing procedures, including the required frequency of testing.

(2) Maintaining the chemical supply for the chemical feed systems.

(3) Filter backwash or cleaning.

(4) Vacuuming and cleaning the swimming pool.

(5) Superchlorination.

(6) Controller sensor maintenance, where applicable.

j. Schematic drawing. A schematic drawing of the pool recirculation system shall be posted in the swimming pool filter room or in the operations manual. Clear labeling of the swimming pool piping

with flow direction and water status (unfiltered, treated, backwash) may be substituted for the schematic drawing.

k. Safety data sheets. Copies of SDS of the chemicals used at the swimming pool shall be kept at the facility in a location known and readily accessible to facility staff with chemical-handling responsibilities. Each member of the facility staff with chemical-handling responsibilities shall review the SDS at least annually. The facility management shall retain records of the SDS reviews at the facility and make the records available upon request by a swimming pool inspector.

l. Emergency plan. The facility management shall develop a written emergency plan. The plan shall include but not be limited to actions to be taken in cases of drowning, serious illness or injury, chemical-handling accidents, weather emergencies, and other serious incidents. The emergency plan shall be reviewed with the facility staff at least once a year, and the dates of review or training shall be recorded in the pool records. The written emergency plan shall be kept at the facility and be available to a swimming pool inspector upon request.

m. Lifeguard staffing plan. The lifeguard/program staffing plan for the facility shall be available to the swimming pool inspector at the facility and include staffing assignments for all programs conducted at the pool.

485.4(7) *Reports.* Swimming pool and spa operators shall report to the local inspection agency, within one business day of occurrence, all deaths; near drowning incidents; head, neck, and spinal cord injuries; and any injury that renders a person unconscious or requires immediate medical attention.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.5(135I) Construction and reconstruction. A swimming pool that is constructed or reconstructed shall comply with the following standards. Nothing in these rules exempts swimming pools and associated structures from any applicable federal, state or local laws, rules, or ordinances.

485.5(1) *Construction permit.*

a. Permit required. No swimming pool with a water surface area greater than 500 ft^2 shall be constructed or reconstructed without the owner or a designated representative of the owner first receiving a permit from the department. Construction shall be completed within 24 months from the date the construction permit is issued unless an extension is granted in writing by the department.

NOTE: While plan review and permitting are voluntary for swimming pools with a water surface area of 500 ft^2 or less under this rule, such swimming pools must still comply with all other requirements of this chapter, including but not limited to all other construction and reconstruction requirements under this rule (including notification of completion pursuant to paragraph 485.5(1)*"e"*) and all operational requirements under rule 481—485.4(135I).

b. Permit application. The owner of a proposed or existing facility or a designated representative of the owner shall apply for a construction permit on forms provided by the department.

c. Plan submission and fee. Three sets of plans and specifications shall be submitted with the application, as well as a nonrefundable plan review fee for each swimming pool, leisure river, water slide, wave pool, wading pool, spray pad, zero-depth swimming pool, and multisection water recreation pool as required in subrule 485.12(3).

d. Exception. After receiving a construction permit application, the department may authorize construction on a project to start before issuance of a permit. The authorization will be in writing to the owner or the owner's authorized representative.

e. Notification of completion. The owner of a newly constructed or reconstructed swimming pool, or the owner's designated representative, shall notify the department in writing at least 15 business days prior to opening the swimming pool.

485.5(2) *Plans and specifications.*

a. Plan certification. Plans and specifications shall be sealed and certified in accordance with the rules of the engineering and land surveying examining board or the architectural examining board by an engineer or architect licensed to practice in Iowa. This requirement may be waived by the department if the project is the addition or replacement of a chemical feed system, including a disinfection system, or a simple replacement of a filter or pump or both, or combination thereof.

If the requirement for engineering plans is waived, the owner of the facility assumes full responsibility for ensuring that the reconstruction complies with these rules and with any other applicable federal, state and local laws, rules and ordinances.

b. Content of plans. Plans and specifications submitted shall contain sufficient information to demonstrate to the department that the proposed swimming pool will meet the requirements of this chapter, including but not limited to:

(1) The name and address of the owner and the name, address, and telephone number of the architect or engineer responsible for the plans and specifications. If a swimming pool contractor applies for a construction permit, the name, address, and telephone number of the swimming pool contractor shall be included.

(2) The location of the project by street address or other legal description.

(3) A site plan showing the pool in relation to buildings, streets, water and sewer service, gas service, and electrical service.

(4) Detailed scale drawings of the swimming pool and its appurtenances, including a plan view and cross sections, showing the location of inlets, overflow system components, main drains, the deck and deck drainage, the location and size of pool piping, the swimming pool ladders, stairs and deck equipment, including diving stands and boards, and fencing.

(5) A drawing(s) showing the location, plan, and elevation of filters, pumps, chemical feeders, ventilation devices, heaters, and surge tanks; and additional drawings or schematics showing operating levels, backflow preventers, valves, piping, flow meters, pressure gauges, thermometers, the make-up water connection, and the drainage system for the disposal of filter backwash water.

(6) Plan and elevation drawings of bathhouse facilities including dressing rooms; lockers; showers, toilets and other plumbing fixtures; water supply; drain and vent systems; gas service; water heating equipment; electrical fixtures; and ventilation systems, if provided.

(7) Complete technical specifications for the construction of the swimming pool, for the swimming pool equipment and for the swimming pool appurtenances.

c. Deviation from plans. No deviation from the plans and specifications or conditions of approval may be made without prior written approval of the department.

485.5(3) *General design.*

a. Construction of fill and drain wading pools is prohibited.

b. Materials. Swimming pools shall be constructed of materials that are inert, stable, nontoxic, watertight, and durable.

c. Structural loading.

(1) Swimming pools shall be designed and constructed to withstand the anticipated structural loading for both full and empty conditions.

(2) Except for aboveground swimming pools, a hydrostatic relief valve or a suitable underdrain system shall be provided.

d. The water supplied to a swimming pool shall comply with paragraph 485.4(1)*"d."*

e. No part of a swimming pool recirculation system may be directly connected to a sanitary sewer. An air break or an air gap shall be provided.

485.5(4) *Decks.*

a. Deck width. A swimming pool shall be surrounded by a deck. The deck shall be at least 6 ft wide for a swimming pool with a water surface area of 1,500 ft^2 or greater, and 4 ft wide for a smaller swimming pool, and extend at least 4 ft beyond the diving stands, lifeguard chairs, swimming pool slides, or any other deck equipment.

b. Materials. Decks shall be constructed of stable, nontoxic, durable, and impervious materials and shall be provided with a slip-resistant surface.

c. Deck coverings. Porous, nonfibrous deck coverings may be used, subject to department approval, provided that:

(1) The covering allows drainage so that the covering and the deck underneath it do not remain wet or retain moisture.

(2) The covering is inert and will not support bacterial growth.

(3) The covering provides a slip-resistant surface.

(4) The covering is durable and cleanable.

d. Deck drainage. The deck of a swimming pool shall not drain to the pool or to the pool recirculation system, except as provided in paragraphs 485.5(15)*"c"* and 485.5(16)*"b."* For deck-level swimming pools ("rim flow" or "rollout" gutter), a maximum of 5 ft of deck may slope to the gutter.

e. Deck slope. The deck slope shall be at least 1/8 inch/ft and no more than 1/2 inch/ft to drain. The deck shall be designed and constructed so that there is no standing water on the deck during normal operation of the facility.

f. Surface runoff. For outdoor swimming pools, the drainage for areas outside the facility and for nondeck areas within the facility shall be designed and constructed to keep the drainage water off the deck and out of the swimming pool.

g. Carpeting. The installation of a floor covering of synthetic material may be used only in separate sunbathing, patio, or refreshment areas, except as permitted by paragraph 485.5(4)*"c."*

h. Hose bibs. At least one hose bib shall be provided for flushing the deck.

i. Rinse showers. If users are permitted free access between the deck and an adjacent sand play area without having to pass through a bathhouse, a rinse shower area shall be installed between the deck and the sand play area, with fences, barriers and other structures installed so that users must pass through the rinse shower area when going from the sand play area to the deck, and meet the following criteria:

(1) Tempered water is provided for the rinse shower(s).

(2) The rinse shower area has sufficient drainage so that there is no standing water.

(3) Foot surfaces in the rinse shower area are impervious and slip-resistant.

485.5(5) *Recirculation.*

a. Combined recirculation. Two or more swimming pools may share the same recirculation system, but a wading pool cannot share a recirculation system with any other wading pool or swimming pool. Combined recirculation shall meet the following criteria:

(1) The recirculation flow rate for each swimming pool is calculated in accordance with 15.5(5)*"b."* The recirculation flow rate for the system is at least the arithmetic sum of the recirculation flow rates of the swimming pools.

(2) The flow to each pool is adjustable. A flow meter is provided for each pool.

b. Recirculation flow rate. The recirculation flow rate shall provide for the treatment of one pool volume within:

(1) Four hours for a swimming pool with a volume of 30,000 gal or less.

(2) Six hours for a swimming pool with a volume of more than 30,000 gal.

(3) Two hours for a wave pool.

(4) Four hours for a zero-depth pool.

(5) One hour for a wading pool.

(6) One hour for a water slide plunge pool.

(7) Four hours for a leisure river.

(8) Thirty minutes for a spray pad with its own filter system.

(9) For swimming pools with skimmers, the recirculation flow rate shall be at least 30 gpm per skimmer or the recirculation flow rate defined above, whichever is greater.

The recirculation flow rate for pools not specified in subparagraphs 485.5(5)*"b"*(1) through *"b"*(9) will be determined by the department.

c. Recirculation pump. The recirculation pump(s) shall be listed by NSF or by another listing agency as complying with the requirements of Standard 50 and shall comply with the following requirements:

(1) The pump(s) supply the recirculation flow rate required by paragraph 485.5(5)*"b"* at a TDH of at least that given in "1," "2," or "3" below unless a lower TDH is shown by the designer to be appropriate. A valve for regulating the rate of flow is provided in the recirculation pump discharge piping.

1. 40 feet for vacuum filters; or
2. 60 feet for pressure sand filters; or
3. 70 feet for pressure diatomaceous earth filters or cartridge filters.

(2) For sand filter systems, the pump and filter system are designed so that each filter can be backwashed at a rate of at least 15 gpm/ft^2 of filter area.

(3) If a pump is located at an elevation higher than the pool water surface, it is self-priming or the piping is arranged to prevent the loss of pump prime when the pump is stopped.

(4) Where a vacuum filter is used, a vacuum limit control is provided on the pump suction line. The vacuum limit switch is set for a maximum vacuum of 18 in Hg.

(5) A compound vacuum-pressure gauge is installed on the pump suction line as close to the pump as practical. A vacuum gauge may be used for pumps with suction lift. A pressure gauge is installed on the pump discharge line as close to the pump as practical. Gauges are of such a size and located so that they may be easily read by the facility staff.

(6) On pressure filter systems, a hair and lint strainer is installed on the suction side of each recirculation pump. The hair and lint strainer basket is readily accessible for cleaning, changing, or inspection. A spare strainer basket shall be provided, except where the strainer basket has a volume of 15 gallons or more. This requirement may be waived for systems using vertical turbine pumps or pumps designed for solids handling.

d. Water heaters. Swimming pool water heaters shall meet the following criteria:

(1) A heating coil, pipe or steam hose cannot be installed in a swimming pool.

(2) Gas-fired pool water heaters comply with the requirements of ANSI/AGA Z21.56-2001, ANSI/AGA Z21.56a-2004, and ANSI/AGA Z21.26b-2004.

(3) Electric pool water heaters comply with the requirements of UL 1261 (2017) and bear the UL mark.

(4) A swimming pool water heater with an input of greater than 400,000 BTU/hour (117 kilowatts) has a water heating vessel constructed in accordance with ASME Boiler Code, Section 8 (2007). The data plate of the heater bears the ASME mark.

(5) A thermometer is installed in the piping to measure the temperature of the water returning to the pool. The thermometer is located so that it may be easily read by the facility staff.

(6) Combustion air is provided for fuel-burning water heaters as required by the state plumbing code, 481—Chapter 425, or as required by local ordinance.

(7) Fuel-burning water heaters are vented as required by the state plumbing code, 481—Chapter 425, or as required by local ordinance.

(8) Each fuel-burning water heater is equipped with a pressure relief valve sized for the energy capacity of the water heater.

e. Flow meters. Swimming pool flow meters shall meet the following criteria:

(1) Each swimming pool recirculation system is provided with a permanently installed flow meter to measure the recirculation flow rate.

(2) In a multiple pool system, a flow meter is provided for each pool.

(3) A flow meter is accurate within 5 percent of the actual flow rate between ± 20 percent of the recirculation flow rate specified in paragraph 485.5(5)*"b"* or the nominal recirculation flow rate specified by the designer.

(4) A flow meter is installed on a straight length of pipe with sufficient clearance from valves, elbows or other sources of turbulence to attain the accuracy required by subparagraph 485.5(5)*"e"*(3). The flow meter is installed so that it may be easily read by facility staff, or a remote readout of the flow rate is installed where it may be easily read by the facility staff. The designer may be required to provide documentation that the installation meets the requirements of subparagraph 485.5(5)*"e"*(3).

f. Vacuum cleaning system.

(1) A swimming pool vacuum cleaning system capable of reaching all parts of the pool bottom shall be provided.

(2) A vacuum system may be provided that utilizes the attachment of a vacuum hose to the suction piping through a skimmer.

(3) Automatic vacuum systems may be used provided they are capable of removing debris from all parts of the swimming pool bottom.

485.5(6) *Filtration.* A filter shall be listed by NSF or by another listing agency as complying with the requirements of Standard 50 and comply with the following requirements:

a. Each pressure filter has a pressure gauge on the inlet side. Gauges are of such a size and located so that they may be read easily by the facility staff. A differential pressure gauge that gives the difference between the inlet and outlet pressure of the filter may be used in place of a pressure gauge.

b. An air relief valve is provided for each pressure filter.

c. Backwash water from a pressure filter discharges through an observable free fall, or a sight glass is installed in the backwash discharge line.

d. Backwash water is discharged indirectly to a sanitary sewer.

e. Rapid sand filter.

(1) The filtration rate does not exceed 3 gpm/ft^2 of filter area.

(2) The backwash rate is at least 15 gpm/ft^2 of filter area.

f. High-rate sand filter.

(1) The filtration rate does not exceed 15 gpm/ft^2 of filter area.

(2) The backwash rate is at least 15 gpm/ft^2 of filter area.

(3) If more than one filter tank is served by a pump, the designer demonstrates that the backwash flow rate to each filter tank meets the requirements of subparagraph 485.5(6)*"f"*(2), or an isolation valve is installed at each filter tank to permit each filter to be backwashed individually.

g. Vacuum sand filter.

(1) The filtration rate does not exceed 15 gpm/ft^2 of filter area.

(2) The backwash rate is at least 15 gpm/ft^2 of filter area.

(3) An equalization screen is provided to evenly distribute the filter influent over the surface of the filter sand.

(4) Each filter system has an automatic air-purging cycle.

h. Sand filter media complies with the filter manufacturer's specifications.

i. Diatomaceous earth filter.

(1) The filtration rate does not exceed 1.5 gpm/ft^2 of effective filter area, except that a maximum filtration rate of 2.0 gpm/ft^2 may be allowed where continuous body feed is provided.

(2) Diatomaceous earth filter systems have piping to allow recycling of the filter effluent during precoat.

(3) Waste diatomaceous earth is discharged to a sanitary sewer. The discharge may be subject to the requirements of the local wastewater utility.

j. Cartridge filter.

(1) The filtration rate does not exceed 0.38 gpm/ft^2 of filter area.

(2) A duplicate set of cartridges is provided.

485.5(7) *Piping.*

a. Piping standards. Swimming pool piping shall conform to applicable nationally recognized standards and be specified for use within the limitations of the manufacturer's specifications. Swimming pool piping shall comply with the applicable requirements of NSF/ANSI Standard 61 (2020), "Drinking Water System Components—Health Effects." Plastic swimming pool pipe shall comply with the requirements of NSF/ANSI Standard 14 (2016b), "Plastic Piping Components and Related Materials," for potable water pipe.

b. Pipe sizing. Swimming pool recirculation piping shall be sized so water velocities do not exceed 6 ft/sec for suction flow and 10 ft/sec for pressure flow. Gravity piping shall be sized in accordance with recognized engineering principles.

c. Overflow system piping. The piping for an overflow perimeter gutter system shall be designed to convey at least 125 percent of the recirculation flow rate. The piping for a skimmer system shall be designed to convey at least 100 percent of the recirculation flow rate.

d. Main drain piping. If the main drains are connected to the recirculation system, the main drains and main drain piping shall be designed to convey at least 100 percent of the recirculation flow rate.

e. Play feature circulation. Where there are features that circulate water to the swimming pool and through the main drain and overflow systems, the main drain and overflow systems and the associated

piping shall be designed to accommodate the combined flow of the recirculation system and the features within the requirements of paragraph 485.5(7)*"b"* and the applicable requirements of subrules 485.5(9) and 485.5(10).

485.5(8) *Inlets.*

a. Inlets required. Wall inlets or floor inlets, or both, shall be provided for a swimming pool. The inlets shall be adequate to ensure effective distribution of treated water and the maintenance of a uniform disinfectant residual throughout the swimming pool. The designer may be required to provide documentation of adequate distribution, such as dye testing of a pool.

b. Wall inlet spacing. Where wall inlets are used, they shall be no more than 20 ft apart around the perimeter of the area with an inlet within 5 ft of each corner of the swimming pool and meet the following criteria:

(1) There is at least one inlet at each stairway or ramp leading into a swimming pool.

(2) Except for wading pools, wall inlets are located at least 6 inches below the design water surface.

(3) Wall inlets in pools with skimmers are directional flow-type inlets.

(4) Each inlet has a directional flow inlet fitting with an opening of 1-inch diameter or less, or a fixed fitting with openings ½-inch wide or less.

c. Floor inlets. Floor inlets shall be provided for the areas of a zero-depth swimming pool or wave pool where the water is less than 2 ft deep and may be used throughout a swimming pool in lieu of or in combination with wall inlets. Floor inlets shall be flush with the pool floor, as well as no more than 20 ft apart and within 15 ft of each wall of the swimming pool in the area where they are used.

485.5(9) *Overflow system.*

a. Skimmers. Swimming pool skimmers shall meet the following criteria:

(1) Recessed automatic surface skimmers are listed by NSF or by another listing agency as complying with the requirements of Standard 50, except that an equalizer is not required for a skimmer installed in a swimming pool equipped with an automatic water level maintenance device.

(2) Skimmers may be used for swimming pools that are no more than 30 ft wide.

(3) A swimming pool has at least one skimmer for each 500 ft^2 of surface area or fraction thereof.

(4) Each skimmer is designed for a flow-through rate of at least 30 gpm or 3.8 gpm per lineal inch of weir, whichever is greater. The combined flow capacity of the skimmers in a swimming pool cannot be less than the total recirculation rate.

(5) Each skimmer has a weir that adjusts automatically to variations in water level of at least 4 inches.

(6) Each skimmer is equipped with a device to control flow through the skimmer.

(7) If a swimming pool is not equipped with an automatic water level maintenance device, each skimmer that is a suction outlet has an operational equalizer. The equalizer opening in the swimming pool is covered with a fitting listed by a listing agency as meeting the requirements of the ASME/ANSI standard.

(8) A skimmer pool has a handhold around the perimeter of the pool. The handhold is 9 inches or less above the minimum skimmer operation level.

b. Perimeter overflow gutters. Swimming pool perimeter overflow gutters shall meet the following criteria:

(1) A swimming pool greater than 30 ft in width, except for a wave pool or a wading pool, has a perimeter overflow gutter system.

(2) The overflow weir extends completely around the swimming pool, except at stairs, ramps, or water slide flumes.

(3) The gutter is designed to provide a handhold and to prevent entrapment.

(4) Drop boxes, converters, return piping, or flumes used to convey water from the gutter are designed to convey 125 percent of the recirculation flow rate. The flow capacity of the gutter and the associated plumbing are sufficient to prevent backflow of skimmed water into the swimming pool.

(5) Gutter overflow systems are designed with an effective surge capacity within the gutter system and surge tank of not less than 1 gal/ft^2 of swimming pool surface area. In-pool surge may be permitted for prefabricated gutter systems, subject to the approval of the department.

c. Alternative overflow systems. Overflow systems not meeting all of the requirements in paragraphs 485.5(9)*"a"* or *"b"* may be used if the designer can provide documentation that the alternative overflow system will skim the pool water surface at least as effectively as a skimmer system.

485.5(10) *Main drain system.* Swimming pool main drain systems shall meet the following criteria:

a. Main drains. Each swimming pool has a convenient means of draining the water from the pool for winterization and service.

b. Main drains for recirculation. If the main drain system is connected to the recirculation system, there are two or more main drains or a single main drain that is unblockable.

(1) Two main drains are at least 3 ft apart on center. If three or more main drains are installed, the distance between the drains farthest apart is at least 3 ft on center.

(2) Each main drain and its associated piping in a swimming pool are designed for the same flow rate. Multiple drains are plumbed in parallel, and the piping system is designed to equalize flow among the main drains.

(3) If one or two main drains are installed, each main drain cover/grate, sump and the associated piping is designed for at least 100 percent of the recirculation flow rate specified by paragraph 485.5(5) *"b."* If three or more main drains are installed, the combined flow rating of the cover/grates, the sumps and the associated piping is at least 200 percent of the recirculation flow rate. If water for water slides, fountains and play features is circulated through the main drain and overflow systems, the main drains are designed for the combined feature and recirculation flow.

(4) Manufactured main drain sumps are listed by a listing agency for compliance with the ASME/ANSI standard. Field fabricated sumps are designed in accordance with the ASME/ANSI standard and certified by an engineer licensed in Iowa.

(5) There is a control valve to adjust the flow between the main drain and the overflow system.

(6) Main drain covers. Each main drain is covered with a cover/grate that complies with the ASME/ANSI standard.

1. The flow rating for each cover/grate complies with subparagraph 485.5(10)*"b"*(3).

2. The mark of a listing agency is permanently marked on the top surface of each manufactured cover/grate.

3. Field fabricated cover/grates are certified for compliance to the ASME/ANSI standard by a professional engineer licensed in Iowa. A certificate of compliance is provided to the swimming pool owner and to the department.

4. The main drain cover/grate is designed to be securely fastened to the pool so that the cover/grate is not removable without tools.

c. Feature outlets. Where fully submerged outlets for play or decorative features or water slides are in the swimming pool, the outlets shall be designed in accordance with paragraph 485.5(10)*"b."*

485.5(11) *Disinfection.* Swimming pool disinfection shall meet the following criteria:

a. Each swimming pool recirculation system is equipped with an automatic controller for maintenance of the disinfectant level in the swimming pool water. The control output of the controller to the disinfectant feed system is based on the continuous measurement of the ORP of the water in the swimming pool recirculation system.

b. No disinfection system designed to use di-chlor or tri-chlor is installed for an indoor swimming pool.

c. A continuous feed disinfectant system is provided. The disinfectant feed system has the capacity to deliver at least 10 mg/L chlorine or bromine equivalent based on the recirculation flow rate required in paragraph 485.5(5)*"b"* for an outdoor swimming pool and 4 mg/L chlorine or bromine equivalent based on the recirculation flow rate required in paragraph 485.5(5)*"b"* for an indoor swimming pool.

d. A disinfectant feeder (except chlorine gas feed equipment) is listed by NSF or by another listing agency as complying with the requirements of Standard 50.

e. The disinfectant system is installed so that chemical feed is automatically and positively stopped when the recirculation flow is interrupted.

f. Gas chlorinator facilities comply with applicable federal, state and local laws, rules and ordinances and the requirements below.

(1) The chlorine supply and gas feeding equipment is housed in a separate room or building.

1. No entrance or openable window to the chlorine room goes to the inside of a building used other than for the storage of chlorine.

2. The chlorine room is provided with an exhaust system that takes its suction not more than 8 inches from the floor and discharges out of doors in a direction to minimize the exposure of swimming pool patrons to chlorine gas. The exhaust system is capable of producing 15 air changes per hour in the chlorine room.

3. An automatic chlorine leak detector and alarm system is provided in the chlorine room. The alarm system provides visual and audible alarm signals outside the chlorine room.

4. An air intake is provided near the ceiling of the chlorine room. The air intake and the exhaust system outlet are at least 4 ft apart.

5. The room has a window at least 12 inches square. The window glass is shatterproof.

6. The door of the chlorine enclosure opens outward. The inside of the door is provided with panic hardware.

7. The chlorine room has adequate lighting.

8. Electrical switches for the exhaust system and for the lighting are outside the chlorine room and adjacent to the door, or in an adjoining room.

9. An anchoring system is provided so that full and empty chlorine cylinders can be individually secured.

10. Scales are provided for weighing the cylinders that are in use.

(2) A chlorine enclosure that is 30 inches deep or less and 72 inches wide or less and that is installed out of doors complies with the above requirements except:

1. An automatic chlorine leak detector is not required.

2. The enclosure has a window of at least 48 in^2.

3. The light and exhaust fan may be activated by opening the door rather than by a separate switch.

(3) The chlorinator is designed to prevent the backflow of water into the chlorine cylinder.

g. Where a metering pump is used to feed a solution of disinfectant, the disinfectant solution container has a capacity of at least one day's supply at the rate specified in paragraph 485.5(11)*"c,"* except that when the system is designed to feed directly from a 55-gal shipping container, a larger solution container is not required.

Secondary containment is provided when a tank larger than 55 gallons is installed for the storage of sodium hypochlorite.

h. The storage capacity of an erosion feeder is at least one day's supply of disinfectant at the rate specified in paragraph 485.5(11)*"c."*

485.5(12) *pH control.* Swimming pool pH control shall meet the following criteria:

a. pH controller required. Each swimming pool recirculation system approved for construction after May 4, 2005, is equipped with a controller that senses the pH of the swimming pool water and that automatically controls the operation of a metering pump for the addition of a pH control chemical or the operation of a CO_2 gas feed system.

b. pH chemical feed required. Each swimming pool has a metering pump for the addition of a pH control chemical to the pool recirculation system, or a CO_2 gas feed system.

c. Metering pump listing. A metering pump is listed by NSF or by another listing agency as meeting the requirements of Standard 50.

d. CO_2 cylinder anchors. Where CO_2 is used as a method of pH control, an anchoring system is provided to individually secure full and empty CO_2 cylinders.

e. Chemical feed stop. The pH control system is installed so that chemical feed is automatically and positively stopped when the recirculation flow is interrupted.

485.5(13) *Safety.*

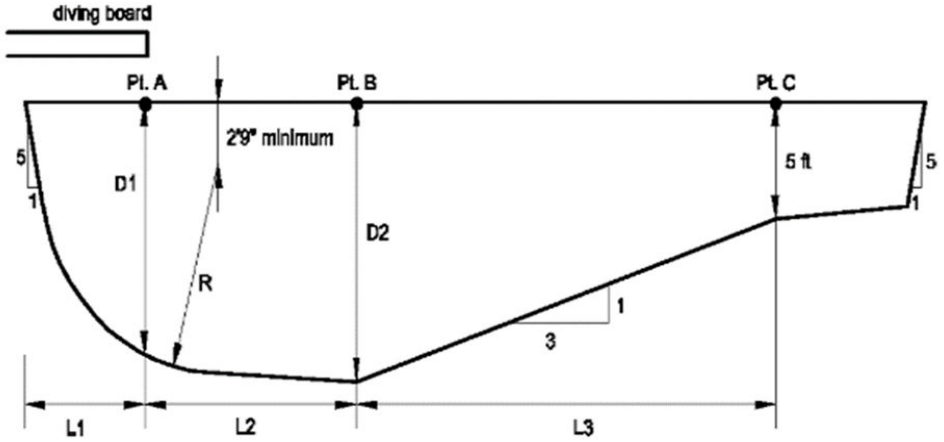
a. Diving areas shall meet the following criteria:

(1) Diving boards are permitted only if the diving area dimensions conform to the minimum requirements shown in Figure 2 and Tables 3 and 4. The distances specified in Tables 3 and 4 are measured from the top center of the leading edge of the diving board. The reference water level is the midpoint of

the skimmer opening for a skimmer pool or a stainless steel gutter system with surge weirs. The reference water level for a gutter pool is the top of the gutter weir.

(2) Where diving boards are specified that have been advertised or promoted to be "competition" diving boards, the diving area complies with the standards of the National Collegiate Athletic Association (NCAA) or the National Federation of State High School Associations (NFSHSA).

Figure 2



R minimum = Pool depth minus Vertical wall depth from the water line minus 3 inches.

Table 3

		Minimum Dimensions					Minimum Width of Pool		
Diving Board Height Above Water	Maximum Board Length	D1	D2	L1	L2	L3	Pt A	Pt B	Pt C
Deck level to 2/3 meter	10 ft	7 ft	8.5 ft	2.5 ft	8 ft	10.5 ft	16 ft	18 ft	18 ft
Greater than 2/3 meter to 3/4 meter	12 ft	7.5 ft	9 ft	3 ft	9 ft	12 ft	18 ft	20 ft	20 ft
Greater than 3/4 meter to 1 meter	16 ft	8.5 ft	10 ft	4 ft	10 ft	15 ft	20 ft	22 ft	22 ft
Greater than 1 meter to 3 meters	16 ft	11 ft	12 ft	6 ft	10.5 ft	21 ft	22 ft	24 ft	24 ft

Table 4

Diving Board Height Above Water	To Pool Side	To 1-Meter Board	To 3-Meter Board
Deck level to 1 meter	10 ft	8 ft	10 ft
Greater than 1 meter	11 ft	10 ft	10 ft

(3) There is a completely unobstructed clear distance of 13 ft above the diving board measured from the center of the front end of the board. This area extends at least 8 ft behind, 8 ft to each side, and 16 ft beyond the end of the diving board.

(4) Diving boards and platforms have slip-resistant surfaces.

(5) Diving board supports, ladders, and guardrails.

1. Supports, platforms, and steps for diving boards are of substantial construction and of sufficient structural strength to safely carry the maximum anticipated loads.

2. Ladders, steps, supports, handrails, and guardrails are of corrosion-resistant materials or are provided with a corrosion-resistant coating and are designed to have no exposed sharp edges. Ladder steps have slip-resistant surfaces.

3. Handrails are provided at steps leading to diving boards and diving platforms. Guardrails are provided for diving boards and platforms that are more than 1 meter above the water. Guardrails for diving boards and platforms are at least 36 inches high and extend to the edge of the water.

b. Starting blocks and starting block installation shall meet the requirements of the competition governing body (National Collegiate Athletic Association, USA Swimming, or National Federation of State High School Associations).

c. Stairs, ladders, and recessed steps shall meet the following criteria:

(1) Ladders or recessed steps are provided in the deep portion of a swimming pool and in the shallow portion if the vertical distance from the bottom of the swimming pool to the deck is more than 2 ft. Stairs or ramps may be used instead of ladders or recessed steps at the shallow end of the swimming pool.

(2) If a swimming pool is over 30 ft wide, recessed steps, ladders, ramps, or stairs are installed on each side. If a stairway centered on the shallow end wall of the swimming pool is within 30 ft of each side of the swimming pool, that end of the swimming pool is considered in compliance with this subrule.

(3) The foot contact surfaces of stairs, ramps, ladder rungs, and recessed steps are slip-resistant.

(4) Ladders.

1. Ladders have a handrail on each side that extends from below the water surface to the top surface of the deck.

2. Ladders, treads, or supports are of a color contrasting with the swimming pool walls; however, stainless steel ladders may be used with stainless steel wall pools.

3. A ladder has a tread width of at least 16 inches and a uniform rise of 12 inches or less.

4. The distance between the swimming pool wall and the vertical rail of a ladder is no greater than 6 inches and no less than 3 inches. The lower end of each ladder rail is securely covered with a smooth nonmetallic cap and within 1 inch of the swimming pool wall.

(5) Recessed steps.

1. Recessed steps have a tread depth of at least 5 inches, a tread width of at least 12 inches, and a uniform rise of no more than 12 inches.

2. Each set of recessed steps is equipped with a securely anchored deck-level grab rail on each side.

3. Recessed steps drain to the pool.

(6) Stairs.

1. Stairs have a uniform tread depth of at least 12 inches and a uniform rise of no more than 10 inches. The area of each tread shall be at least 240 in^2.

2. Stairs are provided with at least one handrail for each 12 ft in width. Handrails are between 34 inches and 38 inches high, measured vertically from the line defined by the front edge of the steps.

3. A slip-resistant stripe at least 1 inch wide of a color contrasting with the step surface and with the swimming pool floor is marked at the top front edge of each tread.

(7) Handrails and grab rails.

1. Ladders, handrails, and grab rails are designed to be securely anchored so that tools are required for their removal.

2. Ladders, handrails, and grab rails are constructed of corrosion-resistant materials or provided with corrosion-resistant coatings and have no exposed sharp edges.

d. Swimming pool floor slope shall meet the following criteria:

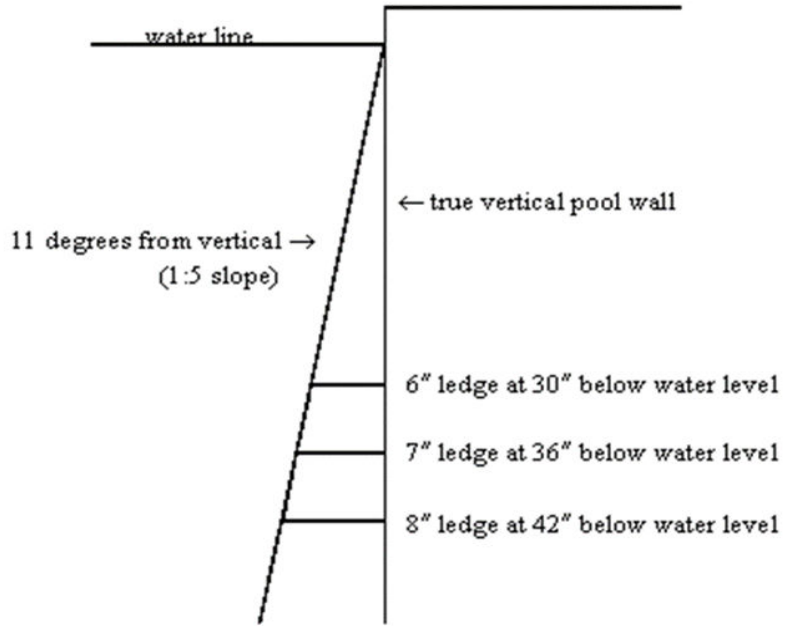
(1) The bottom of the swimming pool slopes toward the main drain(s). The slope of the swimming pool bottom where the water is less than 5 ft deep does not exceed 1 ft vertical in 12 ft horizontal.

(2) Subject to the written approval of the department, a swimming pool may be designed to have the change in slope (from 1:12 or less to a steeper slope) at a point where the water depth is less than 5 ft. The marking requirements of subparagraphs 485.5(13)*"f"*(3) and *"f"*(4) shall apply and, if possible, depth markers that are clearly visible to persons in the pool shall be provided.

e. Swimming pool walls shall meet the following criteria:

(1) Walls in the deep section of a swimming pool are vertical to a water depth of at least 2.8 ft. If a transition radius is provided, it complies with Figure 2.

Figure 3



(2) The term "vertical" is interpreted to permit slopes not greater than 1 ft horizontal for each 5 ft of depth of side wall (11° from vertical).

(3) Ledges, when provided, fall within an 11° line from vertical, starting at the water surface (Figure 3). A ledge is no less than 4 inches wide and no more than 8 inches wide. A ledge has a slip-resistant surface.

f. Surface finish and markings shall meet the following criteria:

(1) The swimming pool floor has a slip-resistant finish.

(2) The bottom and sides of the swimming pool are white or a light color. This does not prohibit painting or marking racing lines or turn targets.

(3) Where the slope of a swimming pool bottom in a shallow area changes from 1:12 or less to a slope greater than 1:12, or at the 5-ft depth area, the pool bottom and sides are marked with a stripe at least 4 inches wide in a color contrasting with the pool bottom and sides. The stripe is on the shallow side of the slope change or 5-ft depth area within 6 inches of the slope change or 5-ft depth area. Depending on the pool configuration, more than one stripe may be required.

(4) A float line with floats no more than 5 ft apart are installed on the shallow side of the stripe required in subparagraph 485.5(13)*"f"*(3) within 12 inches of the stripe.

(5) The landing area for a swimming pool slide or a water slide that does not terminate in a separate plunge pool is delineated by a float line or as approved by the department.

(6) Depth markers.

1. Depth markers are painted or otherwise marked on the deck within 3 ft of the edge of a swimming pool. The depth of a wave pool is also marked on the side walls of the wave pool above the maximum static water level where the static water depth is 3 ft or more and on the deep-end wall of the wave pool.

2. Depth markers are located 25 ft apart or less, center to center, around the full perimeter of a swimming pool.

EXCEPTIONS: Depth markers are not required at the zero-depth end of a wading pool, wave pool, or a zero-depth swimming pool. Depth markers are not required on the deck of a plunge pool on the flume discharge end or on the exit end if stairs are used for exit.

3. The maximum depth of a swimming pool is marked on both sides of a swimming pool at the main drain.

4. The water depth of a swimming pool is marked at both ends of a float line required by subparagraph 485.5(13)*"f"*(4).

5. In shallow water, the depth is marked at 1-ft depth intervals starting at one of the points specified in "3" and "4" above, if the 1-ft depth interval is less than 25 ft. The zero depth is used as the starting point for a zero-depth swimming pool.

6. In deep water, the words "Deep Water" may be used in place of numerals except as required in "3" above.

7. "No Diving" or equivalent wording or graphics are marked on the swimming pool deck within 3 ft of the edge of the swimming pool where the water is shallow and at other pool areas determined by management. The markers are 25 ft apart or less, center to center, around the perimeter of the area. This marking is not required at the zero-depth end of a wave pool or of a zero-depth swimming pool. "No Diving" or equivalent wording or graphics are marked on the deck of a leisure river in the areas where users will be permitted. The "No Diving" markers are within 3 ft of the edge of the leisure river at intervals not to exceed 25 ft on center.

8. Letter, number and graphic markers are slip-resistant, of a contrasting color from the deck and at least 4 inches in height.

9. In lieu of the requirements of "1" through "8" above, the maximum depth of a wading pool may be posted in lettering a minimum of 3 inches high at each entrance to the wading pool area and at least at one conspicuous location inside the wading pool enclosure. "No Diving" markers are not required at a wading pool.

10. The depth of a leisure river is posted at the entrance(s) to the leisure river in characters at least 3 inches high. The depth of the leisure river is marked on the side wall of the leisure river above the static water level at intervals not to exceed 50 ft on center. The depth of the leisure river is marked on the deck in the areas where users will be permitted. The depth markers are within 3 ft of the edge of the leisure river at intervals not to exceed 25 ft on center.

g. Elevated lifeguard chairs or stations shall be provided as follows: one chair or station for a swimming pool with a water surface area of 2,000 to 4,000 ft^2 inclusive; two chairs or stations if the area is 4,001 to 6,000 ft^2; three chairs or stations if the area is 6,001 ft^2 or more. A swimming pool is not required to have more than three lifeguard chairs or stations. This requirement does not apply to wave pools, leisure rivers or wading pools.

h. Emergency equipment and facilities shall meet the following criteria:

(1) If a swimming pool facility employs lifeguards, whether required by rule or not, the lifeguards are provided with the minimum equipment required by their training, including but not necessarily limited to rescue tubes and personal CPR masks.

(2) A minimum of one unit of lifesaving equipment is provided for each 1,500 ft^2 of water surface area or fraction thereof. The area of a swimming pool where the water is 2 ft deep or less may be subtracted from the total area for this requirement. A swimming pool is not required to have more than ten units of lifesaving equipment.

(3) A unit of lifesaving equipment consists of at least one of the following:

1. A U.S. Coast Guard-recognized ring buoy fitted with a ¼-inch diameter line with a length at least one-half the width of the pool, but no more than 60 ft; or

2. A life pole with a "shepherd's crook," having blunted ends with a minimum length of 8 ft; or

3. A rescue buoy which is made of a hard, buoyant plastic and is provided with molded handgrips along each side, a shoulder strap, and a towing rope between 4 and 6 ft long; or

4. A rescue tube made of a soft, strong foam material 3 inches by 6 inches by 40 inches with a molded strap providing a ring at one end and a hook at the other. Attached to the ring end is a 6-ft-long towline with a shoulder strap.

Rescue equipment identified in numbered paragraphs 485.5(13)*"h"*(3)"3" and "4" above is used only at swimming pools where lifeguards are employed.

(4) Whenever lifeguard chairs are provided, each chair is equipped with at least one unit of lifesaving equipment.

(5) A standard spine board with straps and head immobilizer is provided at each swimming pool where lifeguards are required by rule.

i. Pool enclosures shall meet the following criteria:

(1) Except for a circulated wading pool that is drained when not in use, or a spray pad, a swimming pool is enclosed by a fence, wall, building, or combination thereof not less than 4 ft high. The enclosure is constructed of durable materials.

(2) A fence, wall, or other means of enclosure has no openings that would allow the passage of a 4-inch sphere and is not easily climbable by toddlers. The distance between the ground and the top of the lowest horizontal support accessible from outside the facility, or between the two lowest horizontal supports accessible from outside the facility, is at least 45 inches. A horizontal support is accessible if it is on the exterior of the fence relative to the swimming pool or if the space between the vertical members of a fence is greater than 1¾ inches.

(3) Gates and doors are installed in the enclosure for general access, maintenance, and emergency access. At least one 36-inch-wide gate or door is installed for emergency access. When closed, gates and doors comply with the requirements of subparagraphs 485.5(13)*"i"*(1) and (2). Gates and doors are lockable. Except where lifeguard or structured program supervision is provided whenever the swimming pool is open, gates and doors are self-closing and self-latching.

(4) If a wading pool is within 50 ft of a swimming pool, the wading pool has a barrier at least 36 inches high separating it from the swimming pool. The barrier has no openings that would allow the passage of a 4-inch sphere and is not easily climbable by toddlers. The barrier has at least one 36-inch-wide gate or door. Gates and doors are lockable. Except where lifeguard supervision is provided, gates and doors are self-closing and self-latching.

The department may approve alternate management of the area between the wading pool and swimming pool at facilities where lifeguards are provided whenever the pools are open. The alternate management plan will be in writing and shall be at the facility when the pools are open.

(5) An indoor swimming pool is enclosed by a barrier at least 3 ft high if there are sleeping rooms, hallways, apartments, condominiums, or permanent recreation areas that are used by children and that open directly into the swimming pool area. No opening in the barrier permits the passage of a 4-inch sphere. The barrier is not easily climbable by toddlers. There is at least one 36-inch-wide gate or door through the barrier. Gates and doors are lockable. Except where lifeguard supervision is provided whenever the pool is open, gates and doors are self-closing and self-latching.

j. Construction or reconstruction shall comply with the state electrical code, 481—Chapter 404, including Article 680 of the adopted National Electrical Code, and the following requirements:

(1) Each electrical outlet in the deck, shower and dressing rooms and the pool water treatment equipment areas is equipped with a properly installed GFCI at the outlet or at the breaker serving the outlet. Electrical outlets energized through an ORP/pH controller are not required to have a separate GFCI if the controller is equipped with a GFCI or is energized through a GFCI breaker.

(2) An underwater light circuit is equipped with a GFCI unless the underwater light(s) operates at 15 volts or less.

k. Artificial lighting shall be provided at indoor swimming pools and at outdoor swimming pools which are to be used after sunset in accordance with the following:

(1) Underwater lighting of at least 8 lamp lumens/ft^2 or 0.5 watts/ft^2 of water surface area, located to provide illumination of the entire swimming pool bottom, and area lighting of at least 10 footcandles (fc) or 0.6 watts/ft^2 of deck area.

(2) If underwater lights are not provided, overhead lighting of at least 30 fc or 2.0 watts/ft^2 of swimming pool water surface area are provided.

l. Swimming pool slides shall be installed in accordance with the manufacturer's recommendations.

485.5(14) *Wading pools.* Wading pools shall comply with the applicable provisions of subrules 485.5(1) through 485.5(13) and 485.5(21), except as modified below.

a. A wading pool shall have at least 4 ft of deck.

b. Overflow system.

(1) Intermittent fixed weir overflow structures, including gutters, overflow fixtures, and drains at zero depth may be used. They shall have a hydraulic capacity of at least 125 percent of the recirculation flow rate.

(2) If skimmers are used, there shall be at least one skimmer for every 500 ft^2 of water surface area or fraction thereof.

1. The recirculation flow rate shall be at least 3.8 gpm per lineal inch of skimmer weir or as required in paragraph 485.5(5)*"b,"* whichever is greater.

2. The skimmer(s) suction line may be connected to the main drain line in lieu of an equalizer.

3. A skimmer(s) may be used in combination with overflow drains in a zero-depth wading pool.

c. Inlets shall be designed to uniformly distribute treated water throughout the wading pool. Wall and floor inlets or other means may be used, alone or in combination.

485.5(15) *Wave pools.* Wave pools shall comply with the applicable provisions of subrules 485.5(1) through 485.5(13) and 485.5(21), except as modified below.

a. Perimeter overflow gutters and skimmers are not required on the deep-end wall where the wave generation equipment is located.

b. There shall be an overflow drain or weir across the full width of the zero-depth end of the wave pool.

The drain shall be covered with a grate designed to prevent entrapment. The grate shall be designed so that it is securely fastened to the pool floor and cannot be removed without a tool or tools.

c. The deck above the overflow drain at the zero-depth end of the pool may slope to the overflow drain for a distance no greater than 15 ft. The deck slope shall be no greater than 1 ft vertical in 12 ft horizontal.

d. There shall be a perimeter overflow gutter or overflow fittings along both sides of the wave pool where the water is 3 ft deep or more.

(1) If a perimeter overflow gutter is used, it shall be designed to prevent entrapment during wave action. Overflow grates shall be securely fastened so they will not be dislodged by wave action.

(2) Overflow fittings need not be continuous, but they shall be spaced no more than 10 ft apart.

e. The combined hydraulic capacity of the overflow drain at zero depth and the gutter or overflow outlets shall be at least 125 percent of the recirculation flow rate.

f. The main drain system shall comply with the requirements of subrule 485.5(10).

g. Openings or connections between the wave pool and the wave generation equipment shall be designed to prevent entrapment of users.

h. There shall be a continuous barrier along the full length of each side of a wave pool. The barrier shall be at least 42 inches high and installed no more than 3 ft from the side of the wave pool.

i. Emergency switches that will stop the wave action shall be provided in at least four locations on the deck of the wave pool. Switch locations shall be marked by signs or contrasting bright colors.

j. A wave pool shall be equipped with a float line with floats spaced no more than 5 ft apart. The float line shall be located at least 6 ft from the deep-end wall. Users shall not be permitted between the float line and the deep-end wall.

485.5(16) *Zero-depth swimming pools.* Zero-depth swimming pools shall comply with the applicable provisions of subrules 485.5(1) through 485.5(13) and 485.5(21), except as modified below.

a. There shall be an overflow drain or weir across the full width of the zero-depth end of the swimming pool.

(1) The drain shall be covered with a grate designed to prevent entrapment. The grate shall be designed so that it is not removable without a tool.

(2) The drain and its associated piping shall be designed to convey at least 50 percent of the recirculation flow rate.

b. The deck above the overflow drain at the zero-depth end of the pool may slope to the overflow drain for a distance no greater than 15 ft. The deck slope shall be no greater than 1 ft vertical in 12 ft horizontal.

c. If a perimeter overflow gutter is provided, the gutter may be interrupted in the area where the water is less than 2 ft deep, provided that:

(1) The length of the perimeter overflow gutter and overflow drain shall be at least 60 percent of the total pool perimeter.

(2) The hydraulic capacity of the perimeter overflow gutter system combined with the overflow drain shall be at least 125 percent of the recirculation flow rate.

d. Recessed automatic surface skimmers may be used with the overflow drain at zero depth in accordance with paragraph 485.5(9)*"a."* The hydraulic capacity of the skimmer/drain system shall be at least 125 percent of the recirculation flow rate.

485.5(17) *Water slides.* Water slides shall comply with the applicable provisions of subrules 485.5(1) through 485.5(13) and 485.5(21) and the following:

a. A water slide flume shall comply with the following:

(1) The flume is perpendicular to the plunge or swimming pool wall for at least 10 ft from the flume end.

(2) The flume is sloped no more than 1 ft vertical in 10 ft horizontal for at least 10 ft before the end of the flume.

(3) The flume terminates between 6 inches below and 2 inches above the design water level in the plunge pool or swimming pool.

(4) There is at least 5 ft between the side of the plunge pool or swimming pool and the side of the flume. Adjacent flumes are at least 10 ft apart on center.

(5) The inside surface of a flume is smooth and continuous.

(6) The flume is designed to ensure that users cannot be thrown out of the flume and to minimize user collisions with the sides of the flume.

(7) The flume has no sharp edges within reach of a user while the user is in the proper riding position.

(8) The flume path is designed to prevent users from becoming airborne while in the ride.

b. The landing area for a water slide flume shall comply with the following:

(1) The water depth is at least 3 ft and no more than 4 ft at the end of the flume and for at least 15 ft beyond the end of the flume.

(2) The landing area floor may slope up to a minimum of 2 ft water depth subject to subparagraph 485.5(1)*"b"*(1). The slope is no greater than 1 ft vertical in 12 ft horizontal.

(3) There is at least 20 ft between the end of the flume and any barrier or steps.

(4) If the water slide flume ends in a swimming pool, the landing area is divided from the rest of the swimming pool by a float line.

c. A speed slide shall provide for the safe deceleration of the user. A run-out system or a special plunge pool entry system shall control the body position of the user relative to the slide to provide for a safe exit from the ride.

d. The deck around a water slide plunge pool shall be at least 4 ft wide, except on the side where the flume enters the pool. A walkway that is at least 4 ft wide and meets the requirements of a deck shall be provided between the plunge pool and the slide steps.

e. Alternate overflow systems. Intermittent fixed weir overflow structures may be used for a separate plunge pool if:

(1) Floor inlets are provided according to the requirements of paragraph 485.5(8)*"c."*

(2) The hydraulic capacity of the combined overflow structures and the appurtenant piping is at least 125 percent of the recirculation flow rate. The department may require more hydraulic capacity based on the specific design of the plunge pool system.

f. If a pump reservoir or surge tank is provided, it shall have a capacity of at least one minute of the combined recirculation and flume flow. Openings between the plunge pool and the pump reservoir or surge tank shall be designed and constructed in accordance with paragraphs 485.5(10)*"a"* and *"b."*

g. If the water slide flume ends in a swimming pool, the water level shall not be lowered more than 1 inch when the flume pump(s) is operating.

h. If a fully submerged suction outlet is in a plunge pool or in a swimming pool, it shall be located away from normal water slide user traffic areas. The suction outlet system shall be designed in accordance with paragraph 485.5(10)*"b."*

i. The support structure for a water slide and for any access stairs or ramps shall be designed and constructed to withstand the anticipated structural loading, both static and dynamic forces.

j. A stairway providing access to the top of a water slide shall be at least 2 ft wide. Stair surfaces shall be slip-resistant and easily cleanable. The stairway shall comply with the applicable requirements of state and local building codes and Occupational Safety and Health Administration requirements.

485.5(18) *Multisection water recreation pools.* A multisection water recreation pool shall comply with the applicable provisions of subrules 485.5(1) through 485.5(13) and 485.5(21) and the following:

a. The minimum recirculation flow rate for a multisection water recreation pool is determined by computing the recirculation flow rate for each section of the pool in accordance with paragraph 485.5(5) *"b"* and adding the flow rates together.

b. The treated water distribution system is designed to return treated water to the sections of the pool in proportion to the flow rates determined in paragraph 485.5(18)*"a."*

c. Each section of a multisection water recreation pool is separated from the other sections by a float line meeting the requirements of subparagraph 485.5(13)*"f"*(4).

485.5(19) *Spray pads.* A spray pad shall comply with the applicable provisions of subrules 485.5(1) through 485.5(13) and 485.5(21) and the following:

a. The surface of a spray pad is impervious and durable. Padding specifically designed for spray pads may be used with play features. The padding is water resistant or permits full drainage without retaining water in its structure. Walking surfaces are slip-resistant.

b. The spray pad surface slopes to drain at least 1/8 inch per ft but no more than ½-inch per ft. Deck or other areas outside the spray pad do not drain into the spray pad.

c. A spray pad is exempt from the following requirements: fencing (paragraph 485.5(13)*"i"*), "No Lifeguard" sign (paragraph 485.4(6)*"d"*), safety equipment (paragraph 485.4(4)*"f"*), and depth marking (paragraph 485.4(4)*"j"*). Unless the spray pad is supervised by facility staff, a sign is posted near the spray pad that addresses:

(1) No running on or around the spray pad.

(2) No rough play.

(3) No facility supervision. Parents are responsible for supervising their children.

Facility management may adopt and post other rules deemed necessary for user safety and the proper operation of the spray pad.

d. Spray pad drains are gravity outlets. At least two drains are provided, or a single drain that is unblockable is provided.

(1) The drain system and associated piping are designed for 125 percent of the flow into the spray pad (play feature and recirculation, as applicable).

(2) Each drain cover/grate is flush with the spray pad surface and has no opening wider than ½-inch.

(3) Each drain cover/grate is designed to be securely fastened to the spray pad so that the drain cover/grate is not removable without tools.

(4) Drain cover/grates that are exposed to foot traffic:

1. Have a slip-resistant surface; and

2. Support a 300-pound concentrated load, structural strength verified by documentation of test results from a testing agency or by certification by an engineer licensed in Iowa; and

3. If the drain cover is exposed to sunlight, be resistant to ultraviolet light (UV), with UV resistance verified by documentation of test results from a testing agency or by certification by an engineer licensed in Iowa.

e. Spray pads with independent treatment systems.

(1) The minimum volume of water for a spray pad is two minutes of the flow of the play features and the recirculation system combined.

(2) The water storage tank has a volume of at least 125 percent of the volume specified in subparagraph 485.5(19)*"e"*(1). The tank is accessible for cleaning and inspection.

(3) The recirculation (treatment) system and the play feature pump and piping system are separate.

(4) The recirculation system inlet(s) and outlet(s) within the water storage tank are designed to ensure a uniform disinfectant concentration and pH level throughout the water volume of the spray pad.

(5) The play feature pump system is designed so that it will not operate if the recirculation system is not operating.

(6) There is a readily accessible sample tap in the equipment area that allows sampling of the water in the play feature piping.

f. Spray pads using water from an adjacent swimming pool or wading pool.

(1) If there is a suction outlet in the swimming pool or wading pool for the play feature pump(s), the outlet is designed as a main drain as specified in subrule 485.5(10). Water velocity through the outlet cover is 1½ ft per second or less.

(2) If the adjacent pool has a volume of 10,000 gallons or less, or if the spray pad water is circulated directly from the swimming pool surge tank, the spray pad pump system is equipped for automatic supplemental disinfection in accordance with subrule 485.5(11), except that the disinfection capacity is at least one-half of the capacity specified in paragraph 485.5(11)*"c"*; with filtration in accordance with subrule 485.5(6); or both.

g. Play features and sprays are designed and installed so that they do not create a safety hazard.

(1) Surface sprays are flush with the spray pad surface. Spray openings have a diameter of ½ inch or less. Noncircular spray openings have a width of ½ inch or less.

(2) Aboveground features do not present a tripping hazard. Features have no sharp edges or points and no rough surfaces. Aboveground features are constructed of corrosion-resistant materials or provided with a corrosion-resistant coating. Accessible spray openings have a diameter of ½ inch or less. Noncircular accessible spray openings have a width of ½ inch or less.

485.5(20) *Leisure rivers.* A leisure river shall comply with the applicable requirements of subrules 485.5(1) through 485.5(13) and 485.5(21) and the following:

a. The leisure river propulsion system and recirculation system are separate.

b. Intermittent fixed weir structures may be used for the overflow system. At least two separate fixed weir structures are used. The hydraulic capacity of the overflow system using fixed weir structures are at least 125 percent of the recirculation flow rate. Fixed weir structures are designed to prevent entrapment of leisure river users.

c. A deck as specified in subrule 485.5(4) is not required in areas where users are not permitted. A leisure river and the area on the inside and outside perimeter of the leisure river is designed to ensure that lifeguard staff and emergency personnel can access any part of the leisure river quickly and to provide a sufficient hard surface area for emergency functions.

d. The depth of a leisure river is posted conspicuously at the entrance(s) to the leisure river in characters at least 3 inches high. The depth of the leisure river is marked on the side wall of the leisure river above the static water level at intervals not to exceed 50 ft on center. The depth of the leisure river is marked on the deck in the areas where users are permitted. The depth markers are within 3 ft of the edge of the leisure river at intervals not to exceed 25 ft on center.

e. "No Diving" characters or graphics are marked every 25 ft on center on the deck in deck areas where users are permitted.

f. At least one user egress point is provided for each 500 ft of leisure river length (measured at the centerline) or fraction thereof.

g. Outlets for the leisure river propulsion system are designed in accordance with paragraph 485.5(10)*"b."*

485.5(21) *Showers, dressing rooms, and sanitary facilities.* Swimming pool and spray pad showers, dressing rooms, and sanitary facilities shall meet the following criteria:

a. Facilities required. Bather preparation facilities are provided at each swimming pool or spray pad facility, except where the facility is intended to serve living units.

b. Swimming pool patron load. If a bathhouse is provided, the patron load for determining the minimum number of cleansing showers is:

(1) One individual per 15 ft^2 of water surface in shallow areas.

(2) One individual per 20 ft^2 of water surface in deep areas with the exclusion of 300 ft^2 of water surface for each diving board.

(3) For each swimming pool slide, 200 ft^2 is excluded, and for each water slide that terminates in the swimming pool, 300 ft^2 is excluded in determining the patron load.

c. Bathhouses.

(1) A bathhouse is designed and constructed to meet the requirements of the local building ordinance. If no local ordinance is in effect, the bathhouse is designed to meet the requirements of the state building code.

(2) Bathhouse floors have a slip-resistant finish and slope at least 1/8 inch/ft to drain. Except as provided in subparagraph 485.5(19)*"c"*(3), floor coverings comply with the requirements of paragraph 485.5(4)*"c."*

(3) Olefin, or other approved carpeting, may be permitted in locker room or dressing room areas provided:

1. There is an adequate drip area between the carpeting and the shower room, toilet facilities, swimming pool, or other areas where water can accumulate.

2. Drip areas are constructed of materials as described in paragraphs 485.5(4)*"b"* and *"c."*

(4) Bathhouse fixtures are provided in accordance with the state plumbing code, 481—Chapter 425, based on the Iowa building code occupancy type and design occupant load. In addition, cleansing showers are provided at a ratio of at least 1:50 based on the pool patron load as calculated by paragraph 485.5(21)*"b."*

(5) All indoor swimming pool areas, bathhouses, dressing rooms, shower rooms, and toilets are ventilated to control condensation and odors.

d. Showers and lavatories.

(1) Showers are supplied with water at a temperature of at least 90°F and no more than 110°F.

(2) Soap dispensers or bar soap trays are provided at each lavatory and in the showers. Glass soap dispensers are prohibited.

e. Hose bibs. At least one hose bib is installed within the bathhouse.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

ADMINISTRATION

481—485.6(135I) Enforcement.

485.6(1) The department may inspect spray pads, swimming pools, and spas regulated by these rules and enforce these rules. A city, county or district board of health may inspect spray pads, swimming pools, and spas regulated by these rules and enforce these rules in accordance with agreements executed with the department pursuant to the authority of Iowa Code chapters 28E and 135I.

485.6(2) The inspection agency will take the following steps when enforcement of these rules is necessary.

a. Owner notification. As soon as possible after the violations are noted, the inspection agency will provide written notification to the owner of the facility that:

(1) Cites each section of the Iowa Code or Iowa Administrative Code violated.

(2) Specifies the manner in which the owner or operator failed to comply.

(3) Specifies the steps required for correcting the violation.

(4) Requests a corrective action plan, including a time schedule for completion of the plan.

(5) Sets a reasonable time limit, not to exceed 30 days from the receipt of the notice, within which the owner of the facility must respond.

b. Corrective action plan review. The inspection agency will review the corrective action plan and approve it or require that it be modified.

c. Failure to comply. When the owner of a spray pad, swimming pool, or spa fails to comply with conditions of the written notice, the inspection agency may take enforcement action in accordance with Iowa Code chapters 137 and 135I, or in accordance with local ordinances.

d. Adverse actions. The department may enforce Iowa Code chapter 135I and these rules pursuant to Iowa Code section 135I.6.

(1) A local inspection agency may request that the department withhold or revoke the registration of a spray pad, swimming pool, or spa, or issue an order to close a spray pad, swimming pool, or spa. The request shall be in writing, list the violations of Iowa Code chapter 135I and these rules, and provide a full accounting of the actions taken by the local inspection agency to enforce Iowa Code chapter 135I and these rules.

(2) Notice of the decision to withhold or revoke the registration for a spray pad, swimming pool, or spa or an order to close a spray pad, swimming pool, or spa will be delivered by restricted certified mail, return receipt requested, or by personal service. The notice will inform the owner of the right to appeal the decision and the appeal procedures. The local inspection agency and the county attorney in the county where the spray pad, swimming pool, or spa is located will be notified in writing of the decision or order.

485.6(3) An appeal of a decision to withhold or revoke a registration or of an order to close shall be requested, in writing, within 30 days of receipt or service of the department's notice. The request shall be sent to the department at the contact information provided in 481—Chapter 1 or as set forth in the department's notice. If such a request is timely made within the 30-day time period, a contested case proceeding will be initiated and held in accordance with Iowa Code chapter 17A and 7—Chapter 2506 and 481—Chapter 10.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26; Editorial change: IAC Supplement 8/5/26]

481—485.7(135I) Waivers. A waiver from these rules may be granted only by the department pursuant to 7—Chapter 2504. A request for waiver shall be in writing and sent to the local inspection agency for comment. The local inspection agency shall send the request for waiver to the department within 15 business days of its receipt.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26; Editorial change: IAC Supplement 8/5/26]

481—485.8(135I) Penalties. Penalties are provided pursuant to the authority of Iowa Code section 135I.5.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.9(135I) Registration.

485.9(1) *Registration.* No spray pad, swimming pool, spa, or swimming pool or spa water heater shall be operated in the state without being registered with the department. The owner of a spray pad, swimming pool, or spa or the owner's designated representative shall register the spray pad, swimming pool, spa, or swimming pool or spa water heater before the spray pad, swimming pool, or spa is first used and renew the registration annually on or before April 30. The initial registration and registration renewal shall be submitted on forms supplied by the department. The registration for a spray pad, swimming pool, or spa is valid from May 1 through the following April 30.

485.9(2) *Change in ownership.* Within 30 days of the change in ownership of a spray pad, swimming pool, or spa, the new owner shall furnish the department with the following information:

a. Name and registration number of the spray pad, swimming pool, or spa.

b. Name, address, and telephone number of new owner.

c. Date the change in ownership took place.

d. A nonrefundable fee of $20 per spray pad, swimming pool, or spa.

485.9(3) *Withholding registration.* The department may withhold or revoke the registration of a swimming pool or spa pursuant to paragraph 485.6(2)*"d"* if an owner or the owner's designated representative has violated a provision of Iowa Code chapter 135I or this chapter.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.10(135I) Training courses.

485.10(1) A training course designed to fulfill the requirements of rule 481—485.11(135I) will be reviewed by the department.

485.10(2) At least 15 days prior to the course date, the course director shall submit at a minimum the following to the department:

a. A course outline with a list of instructors and guest speakers and their qualifications.

b. Date or dates the course is to be held.

c. Place the course is to be held.

d. Number of hours of instruction.

e. Course agenda.

485.10(3) The department will approve or disapprove the course of instruction in writing within ten business days of receipt of the information required in subrule 485.10(2).

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.11(135I) Swimming pool/spa operator qualifications.

485.11(1) A person designated as a certified operator of a facility for compliance with paragraphs 485.4(6)*"a"* and 485.51(5)*"a"* shall have successfully completed a CPO® certification course, an AFO certification course, a PPSO certification course, or an LAFT certification course. A copy of a current, valid certificate for the certified operator shall be maintained in the pool or spa records.

485.11(2) A certified operator shall attend at least two hours of continuing education per year. Proof of continuing education shall be kept with certification records at the facility.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.12(135I) Fees.

485.12(1) *Registration fees.* For each spray pad, swimming pool, or spa, the registration fee is $35. Registration fees are delinquent if not received by the department by April 30 or the first business day thereafter. The owner shall pay a $25 penalty for each month or fraction thereof that the fee is late for each swimming pool or spa that is required to be registered.

485.12(2) *Registration change fees.* For each spray pad, swimming pool, or spa, the fee for a change of ownership, change of facility name, or other change in registration is $20.

485.12(3) *Inspection fees.* The inspection agency will bill the owner of a facility upon completion of an inspection. Inspection fees are due upon receipt of a notice of payment due.

When the facility is located within the jurisdiction of a local inspection agency, the local inspection agency may establish fees needed to defray the costs of inspection and enforcement under this chapter. Inspection fees billed by a local inspection agency shall be paid to the local inspection agency or its designee.

a. Inspection fee schedule.

Table 5

Swimming Pools, Spray Pads, and Spas

Pool Type	Inspection Fee
Swimming pool, spray pad, or leisure river, surface area less than 1500 ft^2	$170
Swimming pool, spray pad, or leisure river, surface area 1500 ft^2 or greater	$270
Wave pool	$270
Water slide and plunge pool	$270
Spa	$170
Wading pool less than or equal to 500 ft^2	$50
Wading pool greater than 500 ft^2	$90
Residential swimming pool used for commercial purposes	$50

Table 6

Water Slides

	Inspection Fee
Each additional water slide into a plunge pool	$75
Water slide into a swimming pool	$175
Each additional water slide into a swimming pool	$75

b. Multipool facilities. If more than one pool (swimming pool, water slide, wave pool, wading pool, or spa) is located within a fenced compound or a building, the inspection fee for the pools in the fenced compound or building will be reduced by 10 percent. This reduction does not apply to the fees specified in Table 6.

c. Special inspection fee. When an inspection agency determines that a special inspection is required, the inspection agency may charge a special inspection fee that will be based on the actual cost of providing the inspection.

d. Penalty. Unpaid inspection fees will be considered delinquent 45 days after the date of the bill. A penalty of $30 per month or fraction thereof that the payment is delinquent will be assessed to the owner for each pool inspected.

485.12(4) *Plan review fees.*

a. New construction. A plan review fee as specified in Tables 7, 8, and 9 shall be submitted with a construction permit application for each body of water in a proposed facility. If two or more pools share a common recirculation system as specified in paragraph 485.5(5)*"a,"* the plan review fee shall be 25 percent less than the total plan review fee required by Tables 7, 8, and 9.

Table 7

Swimming Pools and Spray Pads

Swimming Pool or Spray Pad Area (ft^2)	Plan Review Fee
500 or less	$165
greater than 500 to less than 1000	$275
1000 to less than 2000	$385
2000 to less than 4000	$550*
4000 and greater	$825*

*This may include one water slide.

Table 8

Water Slides

Description	Plan Review Fee
Water slide and dedicated plunge pool	$550
Each additional water slide into a plunge pool or swimming pool	$165

Table 9

Spas

Spa Volume (gal)	Plan Review Fee
less than 500	$165
500 to 999	$275
1000 +	$385

b. Reconstruction. The plan review fee for reconstruction is $250 for each swimming pool, spray pad, spa, or bathhouse altered in the reconstruction.

c. Penalty for construction without a permit. Whenever any work for which a permit is required has been started before a permit is issued, the plan review fee will be 150 percent of the fee specified in paragraphs 485.12(3)*"a"* or *"b."* The department may require that construction not done in accordance with the rules be corrected before a facility is used.

EXCEPTION: After receiving a construction permit application, the department may authorize construction on a project to start before issuance of a permit. The authorization will be in writing to the owner or the owner's authorized representative.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.13(135I) Inspection and enforcement agreements. The department and local boards of health may enter into agreements to implement the inspection and enforcement provisions of Iowa Code chapter 135I and these rules pursuant to Iowa Code section 135I.4(6). For purposes of such agreements, a person who is a registered sanitarian (R.S.) or a registered environmental health specialist (R.E.H.S.) with the National Environmental Health Association is considered to have met the educational requirements of subrule 485.11(2).

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.14(135I) Application denial or partial denial—appeal.

485.14(1) Denial or partial denial of an application will be done in accordance with the requirements of Iowa Code chapter 17A. Notice to the applicant of denial or partial denial will be served by restricted certified mail, return receipt requested, or by personal service.

485.14(2) Any request for appeal concerning denial or partial denial shall be submitted by the aggrieved party, in writing, to the department by certified mail, return receipt requested, within 30 days of the receipt of the department's notice. The address is Iowa Department of Inspections, Appeals and Licensing, Swimming Pool Program, 6200 Park Avenue, Suite 100, Des Moines, Iowa 50321. Prior to or at the hearing, the department may rescind the denial or partial denial. If no request for appeal is received within the 30-day time period, the department's notice of denial or partial denial becomes the department's final agency action.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.15 to **485.50** Reserved.

SPAS

481—485.51(135I) Spa operations. A spa shall be operated in a safe, sanitary manner and meet the following operational standards.

485.51(1) *Filtration and recirculation.*

a. A spa shall have a filtration system in good working condition that provides water clarity in compliance with the water quality standards of subrule 485.51(2) and meets the following criteria:

(1) Each filter cartridge is replaced with a new, unused, or cleaned and disinfected filter cartridge in accordance with the manufacturer's recommendations for pressure rise at the inlet of the filter, but at least once a month. If a functioning pressure gauge is not present at the filter inlet, the filter cartridge is replaced whenever the spa is drained and at least every two weeks. Filter cartridge replacements are recorded in the spa records.

(2) Each sand filter serving a spa is opened at least annually and the sand media examined for grease buildup, channeling and other deficiencies. The sand is cleaned and disinfected before the filter is put back into service. The annual inspection is recorded in the spa records.

(3) Each diatomaceous earth filter serving a spa is dismantled, and the filter socks and the interior of the filter are cleaned and disinfected at least annually. The annual cleaning is recorded in the spa records.

(4) The recirculation system has an operating pressure gauge located in front of the filter if it is a pressure filter system. A vacuum filter system has a vacuum gauge located between the filter and the pump.

b. The recirculation system for a spa shall treat one spa volume of water in 30 minutes or less.

c. Pumps, filters, disinfectant feeders, flow indicators, gauges, and all related components of the spa water recirculation system shall be operated continuously whenever the spa contains water, except for cleaning or servicing.

d. The recirculation system shall have inlets adequate in design, number, location, and spacing to ensure effective distribution of treated water and maintenance of uniform disinfectant residual throughout the spa.

e. A spa shall have at least one skimmer and meet the following criteria:

(1) Each skimmer has a self-adjusting weir in place and operational.

(2) Each skimmer has an easily removable basket or screen upstream from any valve.

f. Wastewater and backwash water from a spa shall be discharged through an air break or an air gap.

g. The water supplied to a spa shall be from a water supply meeting the requirements of the department of natural resources for drinking water and meet the following criteria:

(1) Water supplied to a spa is discharged to the spa system through an air gap or a reduced-pressure principle backflow device meeting AWWA C-511-97, "Reduced-Pressure Principle Backflow-Prevention Assembly."

(2) Each hose bib at a facility is equipped with an atmospheric vacuum breaker or a hose connection backflow preventer.

h. Spa water heaters shall meet the following criteria:

(1) Electric water heaters bear the seal of UL.

(2) Gas-fired water heaters are equipped with a pressure relief valve.

(3) Fuel-burning water heaters are vented to the outside, in accordance with the state plumbing code.

(4) Each indoor swimming pool equipment room with fuel-burning water heating equipment has one or more openings to the outside of the room for the provision of combustion air.

485.51(2) *Water quality and testing.*

a. Disinfection.

(1) Spa water shall have a free chlorine residual of at least 2.0 ppm and no greater than 8.0 ppm or a total bromine residual of at least 4.0 ppm and no greater than 18 ppm when the spa is open for use.

(2) A spa shall be closed if the free chlorine is measured to be less than 1.0 ppm or the total bromine is measured to be less than 2.0 ppm.

(3) The spa shall be closed if a free chlorine measurement exceeds 8.0 ppm or if the total bromine measurement exceeds 18 ppm.

(4) The spa water shall have an ORP of at least 700 mV, but no greater than 880 mV, and be closed if the ORP is less than 650 mV or greater than 880 mV.

(5) The spa shall be closed if the cyanuric acid concentration in the spa water exceeds 80 ppm. The spa may be reopened when the cyanuric acid concentration is 40 ppm or less.

(6) No cyanuric acid in any form shall be added to an indoor spa.

b. pH level. The pH of spa water shall be 7.2 to 7.8.

c. Water clarity. A spa shall be closed if the grate openings on drain fittings at or near the bottom of the spa are not clearly visible when the agitation system is off.

d. Bacteria detection.

(1) If coliform or *Pseudomonas aeruginosa* bacteria are detected in a sample taken in accordance with subparagraph 485.51(2)*"e"*(8), the spa shall be drained, cleaned, and disinfected. The spa may reopen and a check sample shall be taken when the spa water meets the requirements of paragraphs 485.51(2)*"a," "b"* and *"c."* If coliform or *Pseudomonas aeruginosa* bacteria are detected in the check sample, the spa shall be closed, drained, physically cleaned, and disinfected and the filter(s) cleaned and disinfected.

1. For cartridge filters, the cartridge shall be replaced with a new, unused cartridge or a cleaned, disinfected cartridge and the filter housing physically cleaned, then disinfected.

2. For sand and diatomaceous earth filters, the filter shall be opened and the media and components cleaned and disinfected.

The spa may reopen when no coliform or *Pseudomonas aeruginosa* bacteria are detected in a spa water sample taken when the spa water meets the requirements of paragraphs 485.51(2)*"a," "b"* and *"c."*

(2) The facility management shall notify the local inspection agency of the positive bacteriological result within one business day after the facility management has become aware of the result.

e. Test frequency. The results of the tests required below shall be recorded in the spa records.

(1) The disinfectant residual in the spa water shall be tested or the ORP of the spa water checked each day before the spa is opened for use and at intervals not to exceed two hours thereafter until the spa closing time. For a spa at a condominium complex, an apartment building, a housing cooperative, or a homeowners association with 25 or fewer living units, the disinfectant level in the spa water shall be tested or the ORP of the spa water checked at least twice each day the spa is available for use.

The operator may make visual readings of ORP in lieu of manual testing, but the spa water shall be tested manually for disinfectant residual at least twice per day. Both ORP and disinfectant residual shall be recorded when manual testing is done. The operator shall specify in the spa records which results are from the manual tests.

(2) The pH of the spa water shall be tested each day before the spa is opened for use and at intervals not to exceed two hours thereafter until the spa closing time. For a spa at a condominium complex, an apartment building, a housing cooperative, or a homeowners association with 25 or fewer living units, the pH of the spa water shall be tested at least twice each day the spa is available for use.

If the spa is equipped with an automatic controller with a readout or local printout of pH complying with the requirements of subparagraph 485.51(2)*"f"*(5), the operator may make visual readings of pH in

lieu of manual testing, but the spa water shall be tested manually for pH at least twice per day. The operator shall specify in the spa records which results are from the manual tests.

(3) The spa water temperature shall be measured whenever a manual test of the spa water is performed.

(4) If a chlorine compound is used for disinfection, the spa water shall be tested for combined chlorine at least once a day.

(5) If cyanuric acid or a stabilized chlorine is used in a spa, the spa water shall be tested for cyanuric acid at least once a day.

(6) At least once in each month that a spa is open for use, a sample of the spa water shall be submitted to a laboratory certified by the department of natural resources for the determination of coliform bacteria in drinking water and the sample analyzed for total coliform and *Pseudomonas aeruginosa*.

f. Test equipment. Each facility shall have functional water testing equipment for free chlorine and combined chlorine or total bromine, pH, total alkalinity, calcium hardness, and cyanuric acid (if cyanuric acid or a stabilized chlorine is used at the facility) that meets the following criteria:

(1) The test equipment provides for the direct measurement of free chlorine and combined chlorine from 0 to 10 ppm in increments of 0.2 ppm or less over the full range, or total bromine from 0 to 20 ppm in increments of 0.5 ppm or less over the full range.

(2) The test equipment provides for the measurement of spa water pH from 7.0 to 8.0 with at least five increments in that range.

(3) A controller readout used in lieu of manual disinfectant residual testing shall be a numerical analog or digital display with an ORP scale with a range of at least 600 to 900 mV with increments of 20 mV or less.

(4) A controller readout used in lieu of manual pH testing shall be a numerical analog or digital display with a range at least as required in subparagraph 485.51(2)*"f"*(2) with increments of 0.2 or less over the full range.

g. Operator availability. A person knowledgeable in testing water and in operating the water treatment equipment shall be available whenever a spa is open for use.

485.51(3) *Disinfection systems and cleaning.*

a. Disinfectant system.

(1) Equipment for continuous feed of a chlorine or bromine compound to the spa water shall be provided and be operational. The equipment shall be adjustable in at least five increments over its feed capacity. Where applicable, the chemical feeder shall be listed by NSF or another listing agency for compliance with Standard 50.

(2) The disinfectant equipment shall be capable of providing at least 10 ppm of chlorine or bromine to the spa water based on the recirculation flow rate.

(3) Equipment and piping used to apply any chemicals to the water shall be of such size, design, and material that they may be cleaned. All material used for such equipment and piping shall be resistant to the action of chemicals to be used.

(4) The use of chlorine gas is prohibited.

b. Cleaning and superchlorination.

(1) A spa shall be clean.

(2) A spa containing 500 gal of water or less shall be drained, cleaned and refilled a minimum of once a week. A spa containing over 500 gal to 2,000 gal of water shall be drained, cleaned and refilled a minimum of one time every two weeks. A spa with a water volume greater than 2,000 gal shall be drained, cleaned and refilled a minimum of one time every three weeks.

(3) The inspection agency may require that a spa be drained, cleaned, and superchlorinated prior to further usage.

485.51(4) *Safety.*

a. Chemical safety. Spa chemical safety shall meet the following criteria:

(1) If chemicals are added to the spa over the top, the spa is not occupied for a period of at least 30 minutes. The operator tests the spa water as appropriate before allowing use of the spa. The chemical addition and the test results are recorded in the spa records.

(2) Spa chemicals are stored and handled in accordance with the manufacturer's recommendations.

(3) SDS for the chemicals used in the spa are at the facility in a location known and readily accessible to the facility staff.

(4) Chemical containers are clearly labeled.

(5) A chemical hazard warning sign is placed at the entrance of a room where chemicals are used or stored or where bulk containers are located.

b. Stairs, ladders, recessed steps, and ramps. Spa stairs, ladders, recessed steps, and ramps shall meet the following criteria:

(1) When the top rim of a spa is more than 24 inches above the surrounding floor area, stairs or a ramp are provided to the top of the spa.

(2) Stairs, ladders, ladder rungs, and ramps are slip-resistant.

(3) Where stairs and ramps are provided, they are equipped with a handrail.

(4) Ladders and handrails are constructed of corrosion-resistant materials or provided with corrosion-resistant coatings. They have no exposed sharp edges.

(5) Ladders, handrails and grabrails are securely anchored.

c. Water temperature. The spa shall be closed if the water temperature exceeds 104°F.

(1) A thermometer shall be available to measure temperatures in the range of 80° to 120°F.

(2) Water temperature controls shall be accessible only to the spa operator.

d. Emergency telephone. Each facility where lifeguards are not provided shall have a designated emergency telephone or equivalent communication system that can be operated without coins. The communication system shall be available to users of the spa whenever the spa is open. If the emergency communication system is not located within the spa enclosure, management shall post a sign(s) indicating the location of the emergency telephone. Instructions for emergency use of the telephone shall be posted near the telephone.

e. Water level. Water level shall be maintained at the skimming level.

f. Fully submerged outlets. Spas and fully submerged outlets shall meet the following criteria:

(1) Each fully submerged outlet is designed to prevent user entrapment. A spa is closed if the cover/grate of a fully submerged outlet is missing or broken.

(2) For a spa constructed prior to May 13, 1998, each pump that draws water directly from a fully submerged outlet is connected to two or more outlets or a single outlet with an area of at least 144 in^2.

(3) Each fully submerged outlet has a cover/grate that has been tested for compliance with the requirements of the ASME/ANSI standard by a testing agency or that is certified for compliance by an engineer licensed in Iowa.

1. The cover/grate for an outlet system with a single fully submerged outlet has a flow rating of at least 100 percent of the maximum system flow rate. The combined flow rating for the cover/grates for an outlet system with more than one fully submerged outlet is at least 200 percent of the maximum system flow rate.

The maximum system flow rate is the design flow rate for the pump(s) directly connected to the outlet(s) in an outlet system. In the absence of better information, the maximum system flow rate is the capacity of the pump(s) at 50 feet TDH, based on the manufacturer's published pump curves.

2. Fully submerged outlet cover/grates are not removable without the use of tools.

3. Purchase records and product information that demonstrate compliance are maintained by the facility for the life of the cover/grate. If a field fabricated cover/grate is certified for compliance to the ASME/ANSI standard by an engineer licensed in Iowa, a copy of the certification letter is kept at the facility for the life of the cover/grate.

(4) A spa with a single fully submerged outlet that is not unblockable and that is directly connected to a pump is closed if the outlet does not have a cover/grate that complies with the ASME/ANSI standard.

If a spa has two or more fully submerged outlets on a single surface that are all less than 3 ft apart on center, are not unblockable, and are directly connected to a pump, the spa is considered to have a single fully submerged outlet.

(5) A spa with a single fully submerged outlet that is not unblockable and that is directly connected to a pump is closed if the outlet system is not equipped with a safety vacuum release system that is listed for compliance with ASME/ANSI A112.19.17-2002 or ASTM F2387-04 (2012) by a listing agency.

1. Purchase records and product information that demonstrate compliance are maintained by the facility for at least five years from the time the SVRS is purchased or another approved system is installed.

2. An SVRS is installed in accordance with the manufacturer's instructions.

3. An SVRS is tested for proper function at the frequency recommended by the manufacturer, but at least once in each month the spa is operated. The date and result of each test are recorded.

(6) In lieu of compliance with subparagraphs 485.51(4)*"f"*(3), (4) and (5) above, a fully submerged outlet in a spa may be disabled with the approval of the department, except that an equalizer in a skimmer may be plugged without department approval if the management of the spa submits to the department information including but not necessarily limited to:

1. The area and volume of the spa;

2. Detailed information about the inlet system, including the location of the inlets and the type of inlet fitting;

3. The number of skimmers and pipe sizes;

4. Pump information and flow rates for the outlet system; and

5. Filter type, number of filters, the size of the filter(s), and whether multiple filters are backwashed together or separately.

If the department approves the application to disable the outlet, the outlet valve is closed and the valve secured by removing the handle, by locking the handle closed, or by another method approved by the department. The outlet may be physically disconnected from the pump system.

g. Spa walls and floor. Spa walls and floor shall be smooth and easily cleanable.

h. Decks. Spa decks shall meet the following criteria:

(1) The deck has a slip-resistant surface.

(2) The deck is clean and free of debris.

(3) A hose bib is provided for flushing or cleaning of the deck.

(4) Glass objects, other than eyeglasses and safety glass doors and partitions, are not permitted on the deck.

i. Projections or obstructions. There shall be no underwater or overhead projections or obstructions that would endanger user safety or interfere with proper spa operation.

j. Electrical. Spa electrical systems and components shall meet the following criteria:

(1) Each electrical outlet in the deck, shower room, and pool water treatment equipment areas is equipped with a properly installed GFCI at the outlet or at the breaker serving the outlet. Electrical outlets energized through an ORP/pH controller are not required to have a separate GFCI if the controller is equipped with a GFCI or is energized through a GFCI breaker. Ground fault circuit interrupter receptacles and breakers are tested at least once in each month the spa is operating. Test dates and results are recorded in the spa records.

(2) There are no outlets located on, or within 5 ft of, the inside wall of a spa.

(3) An air switch within reach of persons in the spa and its connecting tube are constructed of materials that do not conduct electricity.

(4) Lighting.

1. Artificial lighting is provided at all spas that are to be used at night or that do not have adequate natural lighting so all portions of the spa, including the bottom and main drain, may be readily seen.

2. Underwater lights and fixtures are designed for their intended use. When the underwater lights operate at more than 15 volts, the underwater light circuit is equipped with a GFCI. When underwater lights need to be repaired, the electricity is shut off until repairs are completed.

3. No electrical wiring extends over an outdoor spa.

k. Enclosure. Spa enclosure shall meet the following criteria:

(1) A spa is enclosed by a fence, wall, building, or combination thereof not less than 4 ft high. The spa enclosure is constructed of durable materials. A spa may be in the same room or enclosure as another spa or a swimming pool.

(2) A fence, wall, or other means of enclosure has no openings that would allow the passage of a 4-inch sphere and is not easily climbable by toddlers. The distance between the ground and the top of the lowest horizontal support accessible from outside the facility, or between the two lowest horizontal supports accessible from outside the facility, is at least 45 inches. A horizontal support is considered accessible if it is on the exterior of the fence relative to the spa or if the gap between the vertical members of the fence is greater than 1¾ inches.

(3) At least one gate or door with an opening of at least 36 inches in width is provided for emergency purposes. When closed, gates and doors comply with the requirements of subparagraph 485.51(4)*"k"*(2) above. Gates and doors are lockable. Except where lifeguard supervision is provided whenever the spa is open, gates and doors are self-closing and self-latching.

(4) If there are sleeping rooms, apartments, condominiums, or permanent recreation areas that are used by children and that open directly into the spa area, the spa is enclosed by a barrier at least 3 ft high. No opening in the barrier permits the passage of a 4-inch sphere. The barrier is not easily climbable by toddlers. There is at least one 36-inch-wide gate or door through the barrier. Gates and doors are lockable. Except where lifeguard supervision is provided whenever the spa is open, gates and doors provided are self-closing and self-latching.

l. Agitation system control. The agitation system control shall be installed out of the reach of persons in the spa. The "on" cycle for the agitation system shall be no more than ten minutes.

485.51(5) *Management, notification, and records.*

a. Certified operator required. Each spa facility shall employ a certified operator. One certified operator may be responsible for a maximum of three facilities.

b. Spa rules sign. A "Spa Rules" sign shall be posted near the spa. The sign shall include the following stipulations:

(1) Persons with a medical condition, including pregnancy, should not use the spa without first consulting with a physician.

(2) Anyone having a contagious disease shall not use the spa.

(3) Persons shall not use the spa immediately following exercise or while under the influence of alcohol, narcotics, or other drugs.

(4) Persons shall not use the spa alone or without supervision.

(5) Children shall be accompanied by an adult.

(6) Persons shall not use the spa longer than ten minutes.

(7) No one shall dive or jump into the spa.

(8) The maximum patron load of the spa. (The maximum patron load of a spa is one individual per 2 lineal ft of inner edge of seat or bench.)

c. Spa depth. The maximum depth of a spa shall be posted at a conspicuous location near the spa in numerals or letters at least 3 inches high.

d. Glass prohibited. Glass objects other than eyeglasses, safety glass doors, and partitions shall not be permitted in a spa enclosure.

e. Operational records. The operator of a spa shall have the spa operational records for the previous 12 months at the facility and shall make these records available when requested by a swimming pool/spa inspector. These records shall contain a day-by-day account of spa operation, including:

(1) ORP and pH readings; results of pH, free chlorine or total bromine residual, cyanuric acid (if used), combined chlorine, total alkalinity, and calcium hardness tests; and any other chemical test results.

(2) Results of microbiological analyses.

(3) Water temperature measurements.

(4) Reports of complaints, accidents, injuries, or illnesses.

(5) Dates and quantities of chemical additions, including resupply of chemical feed systems.

(6) Dates when filters were backwashed or cleaned or a filter cartridge(s) was changed.

(7) Draining and cleaning of spa.

(8) Dates when ground fault circuit interrupter receptacles or circuit breakers were tested.

(9) Dates of review of material safety data sheets.

(10) If applicable, dates and results of tests of each SVRS installed at a facility.

f. Submission of records. An inspection agency may require facility management to submit copies of readings of ORP and pH, chemical test results and microbiological analyses to the inspection agency on a monthly basis. The inspection agency shall notify the facility management of this requirement in writing at least 15 days before the reports are to be submitted for the first time. The facility management shall submit the required reports to the inspection agency within ten days after the end of each month of operation.

g. Operations manual. A permanent manual for operation of a spa shall be at the facility and include instructions for routine operations at the spa, including but not necessarily limited to:

(1) Maintaining the chemical supply for the chemical feed systems.

(2) Filter backwash or cleaning.

(3) Water testing procedures, including the required frequency of testing.

(4) Procedures for draining, cleaning and refilling the spa, including chemical adjustments and controller adjustments.

(5) Controller sensor maintenance, where applicable.

(6) Superchlorination.

h. Schematic drawing. A schematic drawing of the spa recirculation system shall be posted in the swimming pool filter room or in the operations manual. Clear labeling of the spa piping with flow direction and water status (unfiltered, treated, backwash) may be substituted for the schematic drawing.

i. Safety data sheets. Copies of material SDS for the chemicals used at the spa shall be kept at the facility in a location known and readily accessible to facility staff with chemical-handling responsibilities. Each member of the facility staff with chemical-handling responsibilities shall review the SDS at least annually. The facility management shall retain records of the SDS reviews at the facility and shall make the records available upon request by a swimming pool inspector.

j. Emergency plans. A written emergency plan shall be provided. The plan shall include but not be limited to actions to be taken in cases of drowning, hyperthermia, serious illness or injury, chemical-handling accidents, weather emergencies, and other serious incidents. The emergency plan shall be reviewed with the facility staff at least once a year, and the dates of review or training shall be recorded. The written emergency plan shall be kept at the facility and shall be available to a swimming pool inspector upon request.

485.51(6) *Reports.* Spa operators shall report to the local inspection agency, within one working day of occurrence, all deaths; near drowning incidents; head, neck, and spinal cord injuries; and any injury that renders a person unconscious or requires immediate medical attention.

[**ARC 9498C**, IAB 8/20/25, effective 9/24/25; Editorial change: IAC Supplement 2/4/26]

481—485.52(135I) Construction and reconstruction. A spa that is constructed or reconstructed shall comply with the following standards. Nothing in these rules is intended to exempt spas and associated structures from any applicable federal, state or local laws, rules or ordinances. Applicable requirements include but are not limited to handicapped access and energy requirements, fire and life safety requirements, the rules of the department of workforce development, and the rules of the department of natural resources.

485.52(1) *Construction permits.*

a. Permit required. No spa shall be constructed or reconstructed without the owner or a designated representative of the owner first receiving a permit from the department. Construction shall be completed within 24 months from the date the construction permit is issued unless a written extension is granted by the department.

b. Permit application. The owner of a proposed or existing spa or a designated representative of the owner shall apply for a construction permit on forms provided by the department.

c. Plan submission. Three sets of plans and specifications shall be submitted with the application. A nonrefundable plan review fee shall be remitted with the application for each spa as required in subrule 485.12(4).

d. Exception. After receiving a construction permit application, the department may authorize construction on a project to start before issuance of a permit. The authorization will be in writing to the owner or the owner’s authorized representative.

e. Notification of completion. The owner of a newly constructed or reconstructed facility or the owner's designated representative shall notify the department in writing at least 15 business days prior to opening the spa.

485.52(2) *Plans and specifications.*

a. Plan certification. Plans and specifications shall be sealed and certified in accordance with the rules of the engineering and land surveying examining board or the architectural examining board by an engineer or architect licensed to practice in Iowa.

(1) This requirement may be waived by the department if the project is the addition or replacement of a chemical feed system, including a disinfection system, or a simple replacement of a filter or pump or both.

(2) If the requirement for engineering plans is waived, the owner of the spa assumes full responsibility for ensuring that the construction or reconstruction complies with these rules and with any other applicable federal, state and local laws, rules, and ordinances.

b. Content of plans. Plans and specifications shall contain sufficient information to demonstrate to the department that the proposed spa will meet the requirements of this chapter. The information shall include but not be limited to:

(1) The name and address of the owner and the name, address, and telephone number of the architect or engineer responsible for the plans and specifications. If a contractor applies for a construction permit, the name, address and telephone number of the contractor shall be included.

(2) The location of the project by street address or other legal description.

(3) A site plan showing the spa in relation to buildings, streets, any swimming pool within the same general area, water and sewer service, gas service, and electrical service.

(4) Detailed scale drawings of the spa and its appurtenances, including a plan view and cross sections. The location of inlets, overflow system components, main drains, deck and deck drainage, the location and size of spa piping, and the spa steps and handrails shall be shown.

(5) A drawing(s) showing the location, plan, and elevation of filters, pumps, chemical feeders, ventilation devices, and heaters, and additional drawings or schematics showing operating levels, backflow preventers, valves, piping, flow meters, pressure gauges, thermometers, the make-up water connection, and the drainage system for the disposal of filter backwash water.

(6) Plan and elevation drawings of bathhouse facilities including dressing rooms; lockers; showers, toilets and other plumbing fixtures; water supply and drain and vent systems; gas service; water heating equipment; electrical fixtures; and ventilation systems, if provided.

(7) Complete technical specifications for the construction of the spa, for the spa equipment and for the spa appurtenances.

c. Deviation from plans. No deviation from the plans and specifications or conditions of approval shall be made without prior approval of the department.

485.52(3) *General design.*

a. A spa shall be constructed of materials that are inert, stable, nontoxic, watertight, and durable.

b. The maximum water depth for a general-use spa shall not exceed 4 ft measured from the overflow level of the spa. The maximum depth of any seat or sitting bench shall not exceed 2 ft measured from the overflow level. A special-use spa may be deeper than 4 ft with written approval from the department.

c. A spa shall be designed and constructed to withstand anticipated structural loading for both full and empty conditions.

d. A spa may be immediately adjacent to a swimming pool or maintain the minimum required deck width for a swimming pool. The distance shall be measured from the outside edge of a ladder support or handrail on the deck, a lifeguard stand, a swimming pool slide, or a similar obstruction.

e. The water supplied to a spa shall comply with paragraph 485.51(1)*"g."*

f. No part of a spa recirculation system may be directly connected to a sanitary sewer. An air break or an air gap shall be provided.

485.52(4) *Decks.* A spa shall have a deck around at least 50 percent of the spa perimeter. The deck shall be at least 4 ft wide and meet the following criteria:

a. Deck materials. The deck is constructed of stable, nontoxic, and durable materials.

b. Deck drainage. The deck drains away from the spa at a slope of at least 1/8 inch/ft, but no more than ½ inch/ft to deck drains or to the surrounding ground surface. The deck is constructed to eliminate standing water.

c. Deck surface. The deck is provided with a slip-resistant, durable, and cleanable surface.

d. Deck covering. A deck covering may be used provided that:

(1) The covering allows drainage so that the covering and the deck do not remain wet or retain moisture.

(2) The covering is inert and will not support bacterial growth.

(3) The covering provides a slip-resistant surface.

(4) The covering is durable and cleanable.

e. Steps or ramp required. When the top rim of a spa is more than 24 inches above the surrounding floor area, stairs or a ramp shall be provided to the top of the spa. Stairs or a ramp shall be designed in accordance with the state building code or the building code adopted by the jurisdiction in which the spa is located.

485.52(5) *Recirculation.*

a. Separate recirculation required. A spa shall have a recirculation system separate from another spa or any swimming pool.

b. Recirculation flow rate. The recirculation system shall be capable of processing one spa volume of water within 30 minutes. For spas with skimmers, the recirculation flow rate shall be at least 3.8 gpm per lineal inch of skimmer weir or the flow rate required above, whichever is greater.

c. Recirculation pump. The recirculation pump(s) shall be listed by NSF or by another listing agency as complying with the requirements of Standard 50 and shall comply with the following requirements:

(1) The pump(s) supply the recirculation flow rate required by paragraph 485.52(5)*"b"* at a TDH of at least that given in "1," "2" or "3" below unless a lower TDH is shown by the designer to be hydraulically appropriate. A valve for regulating the rate of flow is provided in the recirculation pump discharge piping.

1. 40 feet for vacuum filters; or
2. 60 feet for pressure sand filters; or
3. 70 feet for pressure diatomaceous earth filters or cartridge filters.

(2) A separate pump or pumps is provided for the spa agitation system.

(3) For sand filter systems, the pump and filter system are designed so that each filter can be backwashed at a rate of at least 15 gpm/ft^2 of filter area.

(4) If a pump is located at an elevation higher than the spa water surface, it is self-priming or the piping is arranged to prevent the loss of pump prime when the pump is stopped.

(5) Where a vacuum filter is used, a vacuum limit control is provided on the pump suction line. The vacuum limit switch is set for a maximum vacuum of 18 in Hg.

(6) A compound vacuum-pressure gauge is installed on the pump suction line as close to the pump as practical. A vacuum gauge may be used for pumps with suction lift. A pressure gauge is installed on the pump discharge line as close to the pump as practical. Gauges are of such a size and located so that they may be easily read by the operator.

(7) On pressure filter systems, a hair and lint strainer is installed on the suction side of the recirculation pump. The hair and lint strainer basket is readily accessible for cleaning, changing, or inspection. A spare strainer basket is provided. This requirement may be waived for systems using vertical turbine pumps or pumps designed for solids handling.

d. Water heaters. Spa water heaters shall meet the following criteria:

(1) A heating coil, pipe, or steam hose is not installed in a spa.

(2) Gas-fired spa water heaters comply with the requirements of ANSI/AGA Z21.56-2001, ANSI/AGA Z21.56a-2004, and ANSI/AGA Z21.26b-2004.

(3) Electric spa water heaters comply with the requirements of UL 1261 (2017) and bear the UL mark.

(4) A spa water heater with an input of greater than 400,000 BTU/hour (117 kilowatts) has a water heating vessel constructed in accordance with ASME Boiler Code, Section 8 (2007). The data plate of the heater bears the ASME mark.

(5) A thermometer is installed in the piping to measure the temperature of the water returning to the spa. The thermometer is located so that it may be read easily by an operator.

(6) Combustion air is provided for fuel-burning water heaters as required by the state plumbing code, 481—Chapter 425, or as required by local ordinance.

(7) Fuel-burning water heaters are vented as required by the state plumbing code, 481—Chapter 425, or as required by local ordinance.

(8) Fuel-burning water heaters are equipped with a pressure relief valve sized for the energy capacity of the heater.

e. Flow meters. Spa flow meters shall meet the following criteria:

(1) Each spa recirculation system is provided with a permanently installed flow meter to measure the recirculation flow rate.

(2) A flow meter is accurate within 5 percent of the actual flow rate between ±20 percent of the recirculation flow rate specified in paragraph 485.52(5)*"b"* or the nominal recirculation flow rate specified by the designer.

(3) A flow meter is installed on a straight length of pipe with sufficient clearance from valves, elbows or other sources of turbulence to attain the accuracy required by subparagraph 485.52(5)*"e"*(2). The flow meter is installed so that it may be easily read by the facility staff, or a remote readout of the flow rate is installed where it may be easily read by the staff.

485.52(6) *Filtration.* A filter shall be listed by NSF or by another listing agency as complying with the requirements of Standard 50 and comply with the following requirements:

a. Each pressure filter has a pressure gauge on the inlet side. Gauges are of such a size and located so that they may be read easily by the operator. A differential pressure gauge that gives the difference in pressure between the inlet and outlet of the filter may be used in place of a pressure gauge.

b. An air relief valve is provided for each pressure filter.

c. Backwash water from a pressure filter discharges through an observable free fall, or a sight glass is installed in the backwash discharge line.

d. Backwash water is discharged indirectly to a sanitary sewer.

e. Rapid sand filter.

(1) The filtration rate does not exceed 3 gpm/ft^2 of filter area.

(2) The backwash rate is at least 15 gpm/ft^2 of filter area.

f. High-rate sand filter.

(1) The filtration rate does not exceed 15 gpm/ft^2 of filter area.

(2) The backwash rate is at least 15 gpm/ft^2 of filter area.

(3) If more than one filter tank is served by a pump, the designer demonstrates that backwash flow rate to each filter tank meets the requirements of subparagraph 485.52(6)*"f"*(2), or an isolation valve is installed at each filter tank to permit each filter to be backwashed individually.

g. Vacuum sand filter.

(1) The filtration rate does not exceed 15 gpm/ft^2 of filter area.

(2) The backwash rate is at least 15 gpm/ft^2 of filter area.

(3) An equalization screen is provided to evenly distribute the filter influent over the surface of the filter sand.

(4) Each filter system has an automatic air-purging cycle.

h. Sand filter media complies with the filter manufacturer's specifications.

i. Diatomaceous earth filters.

(1) The filtration rate is not greater than 1.5 gpm/ft^2 of effective filter area except that a maximum filtration rate of 2.0 gpm/ft^2 may be allowed where continuous body feed is provided.

(2) Diatomaceous earth filter systems have piping to allow recycling of the filter effluent during precoat.

(3) Waste diatomaceous earth is discharged to a sanitary sewer. The discharge may be subject to the requirements of the local waste water utility.

j. Cartridge filters.

(1) The filtration rate does not exceed 0.38 gpm/ft^2.

(2) A duplicate set of cartridges is provided.

485.52(7) *Piping.*

a. Piping standards. Spa piping shall conform to applicable nationally recognized standards and be specified for use within the limitations of the manufacturer's specifications. Spa piping shall comply with the applicable requirements of NSF/ANSI Standard 61 (2020), "Drinking Water System Components —Health Effects." Plastic pipe shall comply with the requirements of NSF/ANSI Standard 14 (2016b), "Plastic Piping Components and Related Materials," for potable water pipe.

b. Pipe sizing. Spa recirculation piping shall be sized so that water velocities do not exceed 6 ft/sec for suction flow and 10 ft/sec for pressure flow.

c. Skimmer pipe capacity. The piping for the skimmer system shall be designed to convey 100 percent of the recirculation flow rate.

d. Main drain pipe capacity. The main drain piping shall be designed to convey 100 percent of the recirculation flow rate. If the spa agitation system uses the same suction piping as the recirculation system, the piping shall be designed for the combined flow within the requirements of 15.52(7)*"b."*

e. Separate piping required. The piping from the spa agitation system pump to the spa shall be separate from the recirculation system piping.

485.52(8) *Inlets.* Spa inlets shall meet the following criteria:

a. Wall inlets are provided for a spa.

b. The inlets are adequate to ensure effective distribution of treated water and the maintenance of a uniform disinfectant residual throughout the spa. At least two recirculation inlets shall be provided.

(1) Inlets are located at least 6 inches below the design water surface.

(2) Inlets are directional flow-type inlets. Each inlet has a fitting with an opening of 1 inch diameter or less.

c. Each agitation system opening has a fitting with an opening of 1 inch diameter or less.

485.52(9) *Skimmers.* A recessed automatic surface skimmer shall be listed by NSF or by another listing agency as complying with the requirements of Standard 50, except that an equalizer is not required for a skimmer installed in a spa equipped with an automatic water level maintenance device. Spa skimmers shall meet the following criteria:

a. A spa has at least one skimmer for each 100 ft^2 of surface area or fraction thereof.

b. Each skimmer is designed for a flow-through rate of at least 3.8 gpm per lineal inch of weir. The combined capacity of all skimmers in a spa is not less than the total recirculation rate.

c. Skimmers have weirs that adjust automatically to variations in water level of at least 4 inches.

d. Skimmers are equipped with a device to control flow through the skimmer.

e. If a spa is not equipped with an automatic water level maintenance device, each skimmer has an operational equalizer. The equalizer opening in the spa is covered with a fitting listed by a listing agency as meeting the requirements of the ASME/ANSI standard.

f. The skimmer(s) is or are not connected to the agitation system.

485.52(10) *Main drain system.* Each spa shall have a convenient means of draining the water from the spa for service. Spa main drains may be on the sidewall of a spa near the spa bottom.

a. If a spa pump is directly connected to a main drain or another fully submerged outlet, the pump shall be connected to two or more fully submerged outlets or to a single fully submerged outlet that is unblockable. The recirculation system and the agitation system may use the same fully submerged outlet(s).

(1) Two fully submerged outlets that are directly connected to one or more pumps in the same outlet system shall be at least 3 ft apart on center or on different spa surfaces. If three or more fully submerged outlets that are all directly connected to one or more pumps in the same outlet system are installed, the distance between the outlets farthest apart shall be at least 3 ft on center or the outlets shall be installed on different spa surfaces.

(2) If there is only one fully submerged outlet in an outlet system, the flow rating of the outlet cover/grate, sump and the associated piping shall be at least 100 percent of the maximum system flow rate. If two or more fully submerged outlets are installed in an outlet system, the combined flow rating of the cover/grates, the sumps and the associated piping shall be at least 200 percent of the maximum system flow rate. Multiple outlets in an outlet system shall be plumbed in parallel.

The maximum system flow rate for the recirculation system is the flow rate specified in paragraph 485.52(5)*"b"* or the design flow rate, whichever is greater. The maximum system flow rate for the agitation system is the specified design flow rate. If a flow rate is not specified, the maximum system flow rate shall be the flow capacity of the pump(s) at 50 feet TDH, based on the manufacturer's published pump curves.

b. If a main drain is connected to the recirculation system, there shall be a control valve to adjust the flow between the main drain and the overflow system.

c. Each main drain or other fully submerged outlet shall be covered with a cover/grate that is listed as complying with the requirements of the ASME/ANSI standard by a listing agency. A listed cover/grate shall be used in accordance with its listing.

(1) The flow rating for the cover/grate(s) shall comply with subparagraph 485.52(10)*"a"*(2).

(2) The mark of a listing agency shall be permanently marked on the top surface of each manufactured cover/grate.

(3) Field fabricated cover/grates shall be certified for compliance to the ASME/ANSI standard by a professional engineer licensed in Iowa. A certificate of compliance shall be provided to the spa owner and to the department.

(4) The fully submerged outlet cover/grate shall be designed to be securely fastened to the spa so that the cover/grate is not removable without tools.

d. For outlet systems with manufactured sumps, the sumps shall be listed by a listing agency for compliance with the ASME/ANSI standard. Field fabricated sumps shall be designed in accordance with the ASME/ANSI standard and be certified by an engineer licensed in Iowa.

485.52(11) *Disinfection and pH control.*

a. A spa recirculation system shall be equipped with an automatic controller for maintenance of the disinfectant level and pH in the spa water. The control output of the controller to the chemical feed systems shall be based on the continuous measurement of the ORP and the pH of the water in the spa recirculation system.

b. No disinfection system designed to use di-chlor or tri-chlor shall be installed for an indoor spa.

c. A continuous feed disinfectant system shall be provided. The disinfectant feed system shall have the capacity to supply at least 10 mg/L chlorine or bromine based on the recirculation flow rate required in paragraph 485.52(5)*"b."*

d. A disinfectant feeder shall be listed by NSF or by another listing agency as complying with the requirements of Standard 50.

e. Gas chlorine shall not be used as a disinfectant for a spa.

f. Where a metering pump is used to feed a solution of disinfectant, the disinfectant solution container shall have a capacity of at least one day's supply at the rate specified in paragraph 485.52(11)*"c."*

g. The storage capacity of an erosion feeder shall be at least one day's supply of disinfectant at the rate specified in paragraph 485.52(11)*"c."*

h. Each spa shall have a metering pump for the addition of a pH control chemical to the spa recirculation system or a CO_2 gas feed system. A metering pump shall be listed by NSF or another listing agency as complying with the requirements of Standard 50.

i. The chemical feed systems shall be designed so that chemical feed is automatically and positively stopped when the recirculation flow is interrupted.

485.52(12) *Safety.*

a. Spa entry. A spa shall have at least one stairway, ramp, ladder, or set of recessed steps designating a point of entry and exit for every 50 ft of perimeter or fraction thereof.

(1) Stair steps leading into a spa shall be at least 12 inches wide, the tread depth shall be no less than 10 inches, and the riser height shall be no more than 12 inches. If a bench or seat is used as a part of the stair, the first riser height from the bottom of the spa to the seat or bench shall be no more than 14 inches. Except for the first riser, the riser height shall be uniform.

1. Stair steps shall be provided with a slip-resistant surface.
2. The stair steps shall be provided with two handrails or grab rails, one on each side of the steps.

(2) Ladders.

1. Ladders shall be provided with a handrail that extends from below the water surface to the top surface of the deck on each side of the ladder.

2. Ladders shall be of a color contrasting with the spa walls.

(3) Recessed steps.

1. Recessed steps shall have a tread depth of at least 5 inches, a tread width of at least 12 inches, and a uniform rise of no more than 12 inches.

2. Recessed steps shall be provided with a handrail or with deck-level grab rails on each side of the recessed steps.

3. Recessed steps shall drain to the spa.

(4) Ladders, handrails and grab rails.

1. Ladders, handrails, and grab rails shall be designed to be securely anchored and so that tools are required for their removal.

2. Ladders, handrails, and grab rails shall be of corrosion-resistant materials or provided with corrosion-resistant coatings. They shall have no exposed sharp edges.

b. Agitation system control. The agitation system start control shall be installed out of the reach of persons in the spa. The "on" cycle for the agitation system shall be no more than ten minutes.

c. Electrical. New construction or reconstruction shall meet the requirements of the state electrical code, 481—Chapter 404, including Article 680 of the adopted National Electrical Code.

d. Lighting. Artificial lighting shall be provided at indoor spas and at outdoor spas that are to be used after sunset, in accordance with the following:

(1) Underwater lighting of at least 60 lamp lumens/ft^2 or 0.5 watts/ft^2 of water surface area and area lighting of at least 10 lumens/ft^2 or 0.6 watts/ft^2 of deck area.

(2) If underwater lights are not provided, overhead lighting of at least 30 lumens/ft^2 or 2.0 watts/ft^2 of spa water surface area shall be provided.

e. Spa enclosure. Spa enclosure shall meet the following criteria:

(1) A spa is enclosed by a fence, wall, building, or combination thereof not less than 4 ft high. The spa enclosure is constructed of durable materials. A spa may be in the same room or enclosure as another spa or a swimming pool.

(2) A fence, wall, or other means of enclosure has no openings that would allow the passage of a 4-inch sphere and is not easily climbable by toddlers. The distance between the ground and the top of the lowest horizontal support accessible from the outside of the facility, or between the two lowest horizontal supports accessible from outside the facility, is at least 45 inches. A horizontal support is considered accessible if it is on the exterior of the fence relative to the spa, or if the gap between the vertical members of the fence is greater than 1¾ inches.

(3) At least one gate or door with an opening of at least 36 inches in width is provided for emergency purposes. When closed, gates and doors comply with the requirements of subparagraph 485.52(12)*"e"*(2). Gates and doors are lockable. Except where lifeguard or structured program supervision is provided whenever the spa is open, gates and doors are self-closing and self-latching.

(4) For indoor spas, if there are sleeping rooms, apartments, condominiums, or permanent recreation areas used by children that open directly into the spa area, the spa is enclosed by a barrier at least 3 ft high. No opening in the barrier permits the passage of a 4-inch sphere. There is at least one 36-inch-wide gate or door through the barrier. Gates and doors are lockable. Except where lifeguard supervision is provided whenever the spa is open, gates or doors are self-closing and self-latching.

CHAPTER 492
PRACTICE OF TATTOOING
[Prior to 4/2/25, see Public Health Department[641] Ch 22]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—492.1 Reserved.

481—492.2(10A) Definitions. For the purpose of these rules, the following definitions apply:

"Aftercare" means written instructions given to a client, specific to the procedures rendered, on care for the tattoo and surrounding area and guidance on when to seek medical treatment.

"Department" means the same as defined in Iowa Code section 10A.101.

"Director" means the same as defined in Iowa Code section 10A.101.

"Disinfectant" means a U.S. Environmental Protection Agency (EPA)-registered antimicrobial product that is applied to surfaces to destroy microorganisms that are living on the surface but not necessarily bacterial spores.

"Imminent health threat" means a condition or conditions that exist in a tattoo establishment and need immediate action to prevent endangering the health of people.

"Impervious" means nonporous, impenetrable, smooth, and washable.

"Inspection agency" means the department or a city, county or district board of health that has executed an agreement with the department to inspect tattoo establishments and enforce these rules. The authority of a city, county or district board of health is limited to the geographic area defined in the agreement executed with the department. Within the defined geographic area, the city, county or district board of health is the "local inspection agency."

"Mobile tattoo unit" means a mobile establishment or unit that is self-propelled or otherwise movable from place to place; is self-sufficient for utilities such as gas, water, electricity and liquid waste disposal; and operates at a fixed location where a permitted artist performs tattooing procedures for no more than 14 days in conjunction with a single event.

"Residential dwelling" is a place or structure intended to be occupied as a residence.

"Single use" means intended for one-time use and disposed of after use on a client. Single-use products or items include cotton swabs or balls, tissues or paper products, paper or plastic cups, gauze and sanitary coverings, disposable razors, tattoo needles, scalpel blades, stencils, ink cups, and protective gloves. Cloth towels and linens are not "single use" and are barred.

"Sterilization" means a process resulting in the destruction of all forms of microbial life, including highly resistant bacterial spores that demonstrate tuberculocidal activity.

"Tattoo artist" means any person, including a permanent color technologist, engaged in the practice of tattooing.

"Tattoo establishment" means the building or portion of the building designated by the owner where tattooing is practiced.

"Tattooing" means to puncture the skin of a person with a needle and insert indelible permanent colors through the puncture to leave permanent marks or designs. "Tattooing" includes permanent color technology that is the process by which the skin is marked or colored by insertion of nontoxic dyes or pigments into the dermis portion of the skin so as to form indelible marks for cosmetic purposes. "Tattooing" does not include applying a tattoo for radiological purposes.

"Temporary establishment permit" means a permit issued by the department to perform tattoo procedures at a temporary event.

"Temporary event" means any place or premises operating at a fixed location where a tattoo artist performs tattooing procedures for no more than 14 days consecutively in conjunction with a single event or celebration to which the general public is invited.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.3(10A) General provisions.

492.3(1) Tattoo artists and tattoo establishments that fail to meet the criteria of Iowa Code section 10A.531 or these rules are guilty of a serious misdemeanor.

492.3(2) Compliance with Iowa Code section 10A.531 and these rules does not exempt tattoo artists and tattoo establishments from other applicable state or local laws.

492.3(3) Tattooing may only be practiced in facilities that have applied for and received a tattoo establishment permit pursuant to Iowa Code section 10A.531. Tattooing performed in the practice of medicine by a physician, surgeon, osteopathic physician or surgeon, or other qualified licensed or certified nonphysician persons to whom a physician, surgeon, osteopathic physician or surgeon has appropriately delegated pursuant to 653—Chapter 13 does not require a permit pursuant to Iowa Code section 10A.531.

492.3(4) Notwithstanding local zoning codes, where zoning codes exist, tattooing shall not be practiced in a residential dwelling, inclusive of an attached garage. New tattoo establishments must be in commercial buildings where zoning ordinances exist. A waiver will be granted to any tattoo establishment in a residential dwelling if it has been operating continuously since being granted a permit prior to January 1, 2010.

492.3(5) Tattoo establishments are inspected annually.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.4(10A) Sanitation and infection control. Tattoo establishments shall comply with the following:

492.4(1) Tables, chairs, and other general-use equipment in the tattoo area are constructed of impervious and easily cleanable material.

492.4(2) A sink for hand washing supplied with potable hot and cold running water under pressure to a mixing-type faucet is easily accessible in the tattooing area. Hand-washing facilities are supplied with liquid soap and single-use towels or hand dryer.

492.4(3) Easily accessible toilet facilities with a sink for hand washing are available for employee use and patron use.

492.4(4) The tattoo establishment has an area of at least 300 square feet and is adequately lighted and ventilated.

492.4(5) Floors in the tattoo area are finished with an impervious, washable surface.

492.4(6) The entire premises and all facilities used in connection therewith are maintained in a clean, sanitary, vermin-free condition and in good repair.

492.4(7) All refuse is stored in rigid containers with plastic liners that are emptied at least once each business day.

492.4(8) Closed cabinets or containers are exclusively used for the storage of instruments, dyes, pigments, stencils, tattoo machines, and other equipment.

492.4(9) Smoking is not allowed pursuant to Iowa Code chapter 142D.

492.4(10) Consumption of food or drink is not allowed in the tattoo area.

492.4(11) Intoxicating beverages or controlled substances will not be used, consumed, served, possessed, or distributed on the establishment's premises.

492.4(12) Tattoo artists not currently permitted in the state of Iowa will not tattoo in the establishment.

492.4(13) No animals, except service animals, are permitted in a tattoo establishment. Aquariums containing fish are allowed in waiting rooms and non-tattoo areas.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.5(10A) Equipment. Tattoo establishments shall maintain equipment in a clean and sanitary condition and comply with the following:

492.5(1) Cups to hold ink or dye are for single-patron use. Any ink or dye, once dispensed into an ink cup, is disposed of immediately following use.

492.5(2) Any dye or ink in which needles were dipped is not used on another person.

492.5(3) All tubes, tips and grips used for the tattoo procedure that are not sterile, not for single-patron use, and not disposable are physically cleaned with a detergent according to manufacturers' recommendations and then steam-sterilized or dry-heat sterilized before use on another person. Steam

sterilization is at 250 degrees Fahrenheit (121 degrees Celsius) for 15 minutes at a minimum pressure of 15 pounds per square inch. Dry-heat sterilization is at 350 degrees Fahrenheit (170 degrees Celsius) for one hour. Steam sterilization is preferred.

492.5(4) All instruments needing sterilization are sterilized on site. All instruments to be sterilized are placed in closed pouches after sterilization is complete. The pouches are dated effective for 30 days, after which the instruments are resterilized and the pouches redated.

492.5(5) Sterilizers are monitored monthly for spores of Bacillus subtilis, and records of results are maintained for three years. Written procedures to follow in the event of positive spore tests are maintained and implemented, including:

a. In the event of a positive spore test, materials processed in that sterilizer, dating from the sterilization cycle having the positive biological indicator to the next cycle showing satisfactory biologic indicator challenge results, are considered nonsterile and are reprocessed before being used.

b. A sterilizer that has received a positive spore test is immediately removed from service.

c. Prior to putting a sterilizer that has received a positive spore test back into service, the owner ensures that there is evidence of one negative spore test.

d. The owner notifies the inspection agency of a positive spore test within 24 hours of receiving the test result.

492.5(6) Establishments are equipped with a puncture-resistant, leakproof container designated for disposal of used needles and other sharps. The container is red and labeled with the "biohazard" symbol and is closeable for handling, storage, transportation, and disposal. A written plan for disposal is maintained in the establishment.

492.5(7) Any bottles of solution are labeled as to contents and used according to manufacturers' directions.

492.5(8) Single-use razors for removal of unwanted hair are disposed of after use on one patron. Electric razors used to remove unwanted hair of a patron are cleaned with a brush and fungicidal/tuberculocidal disinfectant spray.

492.5(9) Topical ointments are prepared for single-patron use.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.6(10A) Procedures. Tattoo establishments shall comply with the following:

492.6(1) Tattoo establishments will establish a written standard operating procedure (SOP) that includes the process for setup and tear down of tattoo procedures. The SOP focuses on procedures of hygiene and cross-contamination control.

492.6(2) For privacy purposes and at the patron's request, establishments have in place or readily available a nontransparent panel or other barrier of sufficient height and width to effectively separate the patron from any unwanted observers or waiting patrons.

492.6(3) Tattoo artists scrub their hands thoroughly before beginning the tattoo procedure. Tattoo artists dry their hands with individual single-use towels or hand dryer.

492.6(4) Tattoo artists wear clean garments and disposable latex, nitrile, chloroprene, or vinyl gloves during the tattoo procedure. Gloves are changed after each tattoo. Tattoo artists wash their hands before and after each tattoo procedure.

492.6(5) All items with which the gloved hands of the tattoo artist would normally come into contact during the tattooing procedure have appropriate barrier films covering them, including clip cords, squeeze bottles, seat adjustment controls, power control dials or buttons, and work lamps.

492.6(6) The skin area to be tattooed is first cleansed with soap and water. Single-use towels or sponges (gauze) are used during the cleansing procedure.

492.6(7) Before placing the tattoo design on the patron's skin, the tattoo artist prepares the skin with 70 percent ethyl or isopropyl alcohol solution or an equally effective antiseptic or antimicrobial.

492.6(8) Tattooing is not performed on any area where there is evidence of skin infection, irritation, or abnormalities.

492.6(9) After the tattooing is completed, the tattoo artist:

a. Applies an adequate dressing or bandage to the tattoo area.

b. Provides to the persons tattooed printed aftercare instructions regarding tattoo care during the healing process.

c. Thoroughly cleans the machine head with an acceptable disinfectant and sprays an acceptable surface disinfectant over the work area during the clean-up procedures before the area is set up for the next tattoo procedure.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.7(10A) Permit issuance and renewal. The following apply to applications for a permit to practice as a tattoo artist or as a tattoo establishment.

492.7(1) An applicant will complete either an online application or a paper application according to the instructions contained in the application. Paper applications are available to download at the department's website. Each application must be accompanied by the appropriate fee as set forth in subrule 492.8(2) to be processed. A paper application is accompanied by the appropriate fee payable by check or money order to the department. Online application fees are paid by credit card only. An application that includes insufficient or incorrect fees is considered incomplete. If the applicant is notified that the application is incomplete, the applicant should contact the department within 90 days. Incomplete applications are considered invalid and destroyed after 90 days.

492.7(2) Documentation of medical conditions and criminal convictions related to the practice of the profession shall include a full explanation from the applicant. No application is considered complete until the applicant responds to any program requests for additional information regarding the applicant's medical condition or criminal conviction.

492.7(3) All permits expire on December 31 for the year issued. An applicant will submit a completed application, supporting documentation, and renewal fee annually by December 1 for renewal. The permit holder has a current permit in possession before performing tattooing. An applicant who submits a renewal application after December 1 will be obligated to pay an additional $25 for each month delinquent.

492.7(4) The permit holder is responsible for renewing the permit prior to its expiration.

492.7(5) A permit that has not been renewed within 90 days of the permit expiration date will automatically be deactivated. There will be a $25 reinstatement fee charged for reactivating a permit in addition to the renewal fee.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.8(10A) Fees.

492.8(1) All fees are nonrefundable.

492.8(2) Fees for all initial and renewal applications are as follows:

a. Tattoo artist: $75.

b. Tattoo establishment: $100.

c. Temporary tattoo establishment:

(1) 0 to 10 participating artists: $100.

(2) 11 to 100 participating artists: $200.

(3) 101 or more participating artists: $300.

d. Mobile tattoo unit: $100.

e. Mobile tattoo event: $25 per event.

f. Tattoo establishment change of ownership: $25.

g. Tattoo establishment change of location: $25.

h. Mobile tattoo unit change of location: $25.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.9(10A) Tattoo establishment permit criteria.

492.9(1) No tattoo establishment may operate in the state without having a permit to operate issued by the department. Permits shall be posted in a conspicuous location in the tattoo establishment.

492.9(2) A person applying for a tattoo establishment permit will submit a floor plan of the establishment with the application.

492.9(3) A permit to operate is issued to a new establishment when the department or its representative has successfully completed an on-site inspection.

492.9(4) Tattoo establishment permits are nontransferable.

492.9(5) A tattoo establishment shall retain a record of all persons who have had tattoo procedures performed at the establishment. Records include the client's name and date of birth, copy of client's identification, date of the procedure, name of the tattoo artist who performed the procedure(s), and signature of client. Records shall be retained in a confidential manner for a minimum of three years and made available to the department or inspection agency upon request.

492.9(6) Change in ownership. Within 30 days of a change in ownership of a tattoo establishment, the new owner shall submit a change in ownership application and fee for a new permit. An on-site inspection will be completed before a permit to operate will be issued.

492.9(7) Within 30 days of a change of location of a tattoo establishment, the owner shall submit a change of location application and a fee for a new permit. An on-site inspection will be completed by the inspection agency before a permit to operate will be issued.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.10(10A) Tattoo artist permit criteria.

492.10(1) No person may perform tattooing without a current permit to operate issued by the department.

492.10(2) Each permit issued is in effect solely for the tattoo artist named thereon and remains with the tattoo artist upon any change of employment. Tattoo artist permits are nontransferable.

492.10(3) An applicant for a tattoo artist permit must be at least 18 years of age and submit government-issued documentation to show proof of attaining the age of 18 years.

492.10(4) A tattoo artist must provide proof of current certification by the American Red Cross for blood-borne pathogens and standard first aid or other equivalent, nationally recognized certification.

492.10(5) Permits shall be posted in a conspicuous place in the tattoo establishment.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.11(10A) Temporary establishment permit criteria.

492.11(1) A person must submit a temporary tattoo establishment application form, a floor plan of the facility, promotional documentation for the event, and the appropriate fee at least 30 days prior to the event to obtain a temporary establishment permit. Fees are based on the number of participating tattoo artists. The application will specify the following:

a. The purpose for which the permit is requested.

b. The period of time during which the permit is needed (not to exceed 14 calendar days per event).

c. The fulfillment of tattoo artist criteria as specified in rule 481—492.10(10A). A list of participating tattoo artists shall be sent to the tattoo program no later than one week prior to the event.

d. The location at which the temporary event will be held.

492.11(2) The temporary event must be inside a permanent building and comply with the following:

a. Conveniently located hand-washing facilities with liquid soap, single-use towels or hand dryers and potable hot and cold water under pressure to a mixing-type faucet are provided. Drainage in accordance with local plumbing codes is provided.

b. A minimum of 80 square feet of floor space is provided for each booth.

c. There is sufficient lighting where the tattoo procedure is being performed.

d. All tubes, tips and grips used for the tattoo procedure that are not single use are properly sterilized and dated 30 days or less prior to the date of the event. Evidence of a spore test performed on the sterilization equipment is dated 30 days or less prior to the date of the event. Single-use, prepackaged, sterilized equipment obtained from reputable suppliers or manufacturers is allowed.

e. Tattoo artists properly clean and sanitize the area used for tattoo procedures.

f. Floors of the tattooing area(s) are smooth and impervious or covered with an impermeable barrier.

492.11(3) The facility where the temporary event will be held must be inspected by the designated inspection agency and issued a permit prior to the performance of any tattoo procedures. A $50 inspection fee for each booth shall be made payable to the inspection agency.

492.11(4) No animals, except service animals, are allowed in the temporary establishment at any time.

492.11(5) Temporary establishment permits issued under the provisions of these rules may be suspended by the department for failure of the holder to comply with these rules.

492.11(6) Temporary establishment permits and tattoo artist permits shall be posted in a conspicuous place in the temporary establishment.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.12(10A) Mobile tattoo unit permit criteria. No new mobile tattoo units will be permitted. Mobile tattoo units granted a permit prior to September 7, 2016, may continue to operate with a current permit provided they remain compliant with the rules of this chapter. Mobile tattoo units and tattoo artists working from mobile tattoo units shall comply with the following:

492.12(1) No mobile tattoo unit is operated in the state without having a permit to operate issued by the department.

492.12(2) All tattoo artists working in a mobile tattoo unit have a permit and comply with these rules. Artist permits are posted in a conspicuous location in the mobile tattoo unit.

492.12(3) Mobile tattoo unit permits are posted in a conspicuous place in the mobile tattoo unit.

492.12(4) Mobile tattoo unit permits are nontransferable.

492.12(5) Within 30 days of a change of address of where the mobile tattoo unit is housed, the owner submits a new application and a fee for a new permit.

492.12(6) Inspections will be conducted by the local jurisdiction in which the mobile tattoo unit is housed. Any out-of-state mobile tattoo units maintaining an Iowa mobile tattoo unit permit must be inspected annually.

492.12(7) Mobile tattoo units are permitted for use only at temporary events lasting 14 calendar days or less. Permits are obtained at least 14 days prior to the event, and no tattoo procedures are performed before a permit is issued. Promotional documentation of the event is included with the application. Permit holders are responsible for compliance with all other local regulations including but not limited to zoning and business license criteria.

492.12(8) The mobile tattoo unit is maintained in a clean and sanitary condition at all times. Doors are tight-fitting. Openable windows have tight-fitting screens.

492.12(9) Mobile tattoo units meet the sterilization criteria in accordance with rule 481—492.5(10A).

492.12(10) Mobile tattoo units are used only for the purpose of performing tattoo procedures. No habitation or food preparation is permitted inside the vehicle unless the tattoo work station is separated from such areas by an impervious floor-to-ceiling barrier.

492.12(11) Mobile tattoo units are equipped with a hand sink for use of the tattoo artist for hand washing and preparing the client for the tattoo procedures. The hand sink is supplied with hot and cold running water under pressure to a mixing-type faucet, as well as liquid soap and single-use towels in dispensers or hand dryer. An adequate supply of potable water is maintained for the mobile tattoo unit at all times during operation. The source of the water and storage of the tank(s) is also identified.

492.12(12) All liquid wastes are stored in an adequate storage tank with a capacity at least 15 percent greater than the capacity of the on-board potable water supply. Liquid wastes are disposed of at a publicly owned treatment works site approved by the department of natural resources (DNR).

492.12(13) Restroom facilities are available at the temporary event or within the mobile tattoo unit. A hand sink is available within a reasonably acceptable distance from the restroom. The hand sink is supplied with hot and cold running water under pressure to a mixing-type faucet, as well as liquid soap and single-use towels or hand dryer.

492.12(14) All tattoo artists working in a mobile tattoo unit have a permit and comply with these rules. Permits are posted in a conspicuous location in the mobile tattoo unit.

492.12(15) No animals, except service animals, are allowed in the mobile tattoo unit at any time.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.13(10A) Inspections.

492.13(1) An inspection fee of $250 is due upon receipt of a notice of payment due, which will be billed by the inspection agency upon completion of an inspection.

492.13(2) Tattoo establishments are inspected annually and the reports of inspections maintained by the inspection agency for three years.

492.13(3) When the tattoo establishment is located within the jurisdiction of a local inspection agency, the local inspection agency may establish fees needed to defray the costs of inspection and enforcement under this chapter. Inspection fees billed by a local inspection agency are paid to the local inspection agency or its designee.

492.13(4) If an inspection agency determines that an additional physical inspection is necessary, including to review corrected deficiencies or in response to a complaint of a potential imminent health threat, the inspection agency may charge an inspection fee based on the actual cost of providing the inspection, including the inspector's time and mileage expenses. Any such fee charged shall not exceed the fee identified in subrule 492.13(1).

492.13(5) Unpaid inspection fees are delinquent 30 days after the date of the bill. A late fee of $30 per month will be assessed to the establishment owner after a 30-day notice. If inspection fees remain unpaid after 60 days, an order to cease and desist operations will be issued by the department.

492.13(6) Failure to allow an inspection is grounds for denial or suspension of a tattoo establishment's permit.

492.13(7) If an imminent health threat exists, the inspection agency or the department may order the establishment to cease operation immediately pursuant to Iowa Code section 17A.18A. Operation shall not be resumed until authorized by the inspection agency or the department.

492.13(8) Safety data sheets (SDS) for the chemicals used at the tattoo establishment shall be maintained at the establishment and made available upon request.

492.13(9) The most recent routine inspection report, along with any reinspection reports, shall be posted in a location at the establishment that is readily visible to the public.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.14(10A) Tattoo inspector qualifications. Tattoo inspectors shall have successfully completed a blood-borne pathogen certification course from the American Red Cross or an equivalent nationally recognized organization, documentation of which is maintained by the local inspection agency.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.15(10A) Enforcement. The inspection agency may take the following steps when enforcement of these rules is necessary.

492.15(1) *Owner notification.* The inspection agency will provide written notification to the owner of the establishment that:

a. Cites each section of the Iowa Code or rule of the Iowa Administrative Code violated.

b. Specifies the manner in which the owner or operator failed to comply.

c. Specifies the steps needed for correcting the violation.

d. Requests a corrective action plan, including a time schedule for completion of the plan.

e. Sets a reasonable time limit, not to exceed 30 days from the receipt of the notice, within which the owner of the establishment must respond.

492.15(2) *Corrective action plan review.* The inspection agency will review the corrective action plan and approve it or direct modifications.

492.15(3) *Failure to comply.* If the owner of a tattoo establishment, mobile tattoo unit, or temporary establishment fails to comply with conditions of the written notice, the inspection agency may take enforcement action in accordance with Iowa Code chapter 10A or local ordinances.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—492.16(10A) Adverse actions and appeals.

492.16(1) Failure to abide by Iowa Code section 10A.531 or this chapter may result in adverse action, including the denial or revocation of a permit, or an order to cease operations until necessary corrective action has been taken. If the establishment continues to be operated in violation of the order of the

department, the department may refer the matter to the county attorney or attorney general for injunction, criminal penalties, or other appropriate action.

492.16(2) The following are particular instances that may result in adverse action as set forth in subrule 492.16(1):

a. Any material misstatement in the application, renewal, or any supplementary statement.

b. Failure to pay fees in accordance with this chapter.

c. Operation without a current permit.

d. Falsification of records, qualifications, or other information related to permitting approval.

e. Failure to correct any violation identified during an inspection that jeopardizes public safety.

f. Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established. Acts that may constitute unethical conduct include:

(1) Verbally or physically abusing a patron.

(2) Improper sexual contact with, sexual harassment of, or improper sexual advances upon a patron. Sexual harassment includes sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature.

(3) Betrayal of a professional confidence.

(4) Engaging in a professional conflict of interest.

g. Failing to cooperate with an investigation or engaging in conduct attempting to subvert an investigation.

h. Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.

i. Knowingly aiding, assisting or advising a person to unlawfully practice tattooing.

j. Representing oneself as a tattoo artist when one's permit has been denied, suspended, revoked, lapsed, or placed on inactive status.

k. Mental or physical inability reasonably related to and adversely affecting the tattoo artist's ability to practice in a safe and competent manner.

l. Habitual intoxication or addiction to drugs, including habitual or excessive use of drugs or alcohol that impair a tattoo artist's ability to practice with reasonable skill or safety.

m. Obtaining, possessing, attempting to obtain or possess, or administering controlled substances without lawful authority.

n. Violating a statute of this state or another jurisdiction relating to the provision of tattooing, including but not limited to crimes involving dishonesty, fraud, theft, embezzlement, controlled substances, substance abuse, assault, sexual abuse, sexual misconduct, or homicide. A copy of the record of conviction or plea of guilty is conclusive evidence of the violation.

o. Having a certification or permit to practice tattooing suspended or revoked, or other disciplinary action taken by a licensing, certifying, or permitting authority in any jurisdiction. A copy of the record or order of suspension, revocation or disciplinary action is conclusive or prima facie evidence.

p. Failure to comply with standard precautions for preventing transmission of infectious diseases as issued by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services.

q. Failure to appropriately respond to written communication from the department sent by registered or certified mail.

492.16(3) Notice of issuance of a denial, revocation, or order to cease operations will be served by certified mail, return receipt requested, or by personal service.

492.16(4) An aggrieved party may request a contested case appeal in writing to the department within 20 days from the date of the aggrieved party's receipt of the department's order. 7—Chapter 2506 and 481—Chapter 10 are applicable to contested case appeals.

[**ARC 7832C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code section 10A.531.

CHAPTER 496
MINIMUM REQUIREMENTS FOR TANNING FACILITIES
[Prior to 4/2/25, see Public Health Department[641] Ch 46]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/22/29

481—496.1(136D) Purpose and scope. This chapter provides for the permitting and regulation of tanning facilities and devices used for the purpose of tanning human skin through the application of ultraviolet radiation. This includes but is not limited to public and private businesses, hotels, motels, apartments, condominiums, and health and country clubs. Tanning facilities that follow these rules are not relieved from the requirements of any other federal and state regulations or local ordinances.
[**ARC 7834C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—496.2(136D) Definitions. The definitions set forth in Iowa Code section 136D.2 are incorporated herein by reference.

"Board of health" means a county, city, or district board of health that has a 28E agreement with the department to perform inspections under this chapter.

"Cleansing" means to remove soil, dirt, oils or other residues from the surface of the tanning unit which may come into contact with the skin.

"Cleansing agent" means a substance capable of producing the effect of "cleansing." These agents shall not adversely affect the equipment or the health of the consumer and be acceptable to the department or board of health.

"Consumer" means any member of the public who is provided access to a tanning facility in exchange for a fee or other compensation, or any individual who, in exchange for a fee or other compensation, is afforded use of a tanning facility as a condition or benefit of membership or access.

"Exposure position" means any position, distance, orientation, or location relative to the radiation surfaces of a tanning device at which the user is intended to be exposed to ultraviolet radiation from the product, as recommended by the manufacturer.

"Formal training" means a course of instruction approved by the department for operators of tanning facilities.

"Health care professional" means an individual, licensed by the state of Iowa, who has received formal medical training in the use of phototherapy.

"Inspection" means an official examination or observation to determine compliance with statutes, rules, orders, or other applicable conditions.

"Manufacturer's recommendations" means written guidelines established by a manufacturer and approved by the U.S. Food and Drug Administration for the installation and operation of the manufacturer's equipment.

"Operator" means an individual designated to control operation of the tanning facility and to instruct and assist the consumer in the proper operation of the tanning devices.

"Permit" or *"permit to operate"* means a document issued by the department that authorizes a person to operate a tanning facility in Iowa.

"Person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this state, any other state, or political subdivision or agency thereof, and any legal successor, representative, agent, or agency of the foregoing, but does not include federal government agencies.

"Ultraviolet radiation" means electromagnetic radiation with wavelengths in air between 200 and 400 nanometers.
[**ARC 7834C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—496.3(136D) Exemptions. The department may, upon application or its own initiative, grant exemptions from these rules as long as it will not result in undue hazard to public health and safety. The following categories of devices are exempt from the provisions of this chapter:

496.3(1) Devices intended for purposes other than the deliberate exposure of human skin to ultraviolet radiation that produce or emit ultraviolet radiation incidental to their proper operation.

496.3(2) Tanning devices that are limited exclusively to personal use by an individual and the individual's immediate family. Multiple ownership of the device by persons for personal use only does not qualify it for the "personal use only" exemption.

496.3(3) Phototherapy devices used by a properly trained health care professional in the treatment of disease.

[**ARC 7834C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—496.4(136D) Permits and fees.

496.4(1) *Permit to operate.* No tanning facility may operate without a permit issued by the department.

496.4(2) *Application requirements for permit.* Prior to operating a tanning facility, an individual shall:

a. Apply for a permit on forms provided by the department or board of health, along with a nonrefundable application fee of $5. A $15 returned check fee will be charged for each check returned for insufficient funds.

b. Notify the department in writing within 30 days of any changes, additions, or deletions to the initial or renewal application as appropriate. This does not include changes involving replacement of components in tanning equipment.

496.4(3) *Expiration of permit.* Except as provided in paragraph 496.4(4)*"b,"* each permit expires at the end of the specified day stated therein.

496.4(4) *Renewal of permit.*

a. Permits will be renewed annually upon the department's receipt of a completed renewal application and the $5 fee.

b. If the completed renewal is submitted prior to expiration of the existing permit, the existing permit does not expire until the application has been finally determined by the department.

c. In addition to any annual fee not paid, tanning facilities incur a $25 per month fee for failure to pay annual permit fees starting the month of expiration of the facility's permit.

496.4(5) *Transfer or termination of permit.* Permits are nontransferable and must be returned to the department or board of health upon cessation of operation or change of ownership.

496.4(6) *Denial, revocation, or termination of permit.*

a. The department may deny, suspend, or revoke a permit for any of the following reasons:

(1) Submission of false information to the department, including in a permit application;

(2) Operation of the tanning facility in a manner that causes or threatens hazard to the public health or safety;

(3) Failure to allow authorized representatives of the department or board of health to enter the tanning facility at reasonable times for the purpose of determining compliance with the provisions of this chapter, conditions of the permit, or an order of the department or board of health;

(4) Failure to pay fees in accordance with rule 481—496.4(136D); and

(5) Violation of any of the provisions of this chapter or Iowa Code chapter 136D.

b. Except in cases where public health and safety require otherwise, prior to the institution of proceedings for suspension or revocation of a permit, the department or board of health will notify the permit holder, in writing, of the facts or conduct warranting such action and provide an opportunity for the permit holder to demonstrate or achieve compliance.

c. Any person aggrieved by a decision by the department to deny, suspend, or revoke a permit may request a contested case hearing pursuant to 7—Chapter 2506.

d. After suspension or revocation, a permit may be reinstated upon payment of a $50 fee and completion of all other requirements. This fee is in addition to any other applicable fee.

496.4(7) *Inspections.*

a. Inspections will be conducted annually at the cost of the permit holder. The cost of an inspection is $33 per tanning device, up to $330 per facility maximum. Inspection costs are due upon receipt of notice by the facility. Facilities located within a contracted area of a board of health will be paid to the contracted

board of health or its designee. Inspection costs not received within 45 days of the date of billing will be assessed a $25 per month penalty for each month or fraction thereof that payment is delinquent.

b. A penalty fee of $25 per facility may be assessed for:

(1) Failure to respond to a notice of violation within 30 days of the date of the inspection.

(2) Failure to correct violations cited during the inspection.

c. Inspections include but are not limited to reviewing proper operation and maintenance of devices, necessary records and training documentation, and operator understanding and competency.

[**ARC 7834C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

481—496.5(136D) Construction and operation of tanning facilities. The following are minimum standards for the construction, operation, and maintenance of tanning facilities:

496.5(1) *Warning signs.* A tanning facility shall provide and post warning signs and statements as follows:

a. The warning sign must use minimum 0.5-inch (12.7-millimeter) letters for the statement "DANGER, ULTRAVIOLET RADIATION" and 0.25-inch (6.4-millimeter) letters for other lettering; use red lettering against a white background; be at least 9.0 inches by 12.0 inches (22.9 centimeters × 30.5 centimeters); and have the following wording:

DANGER
ULTRAVIOLET RADIATION
— Overexposure can cause
- Eye and skin injury
- Allergic reaction

— Repeated exposure may cause
- Premature aging of the skin
- Skin cancer

— Failure to wear protective eyewear may result in
- Severe burns to eyes
- Long-term injury to eyes

— Medication or cosmetics may increase your sensitivity

---

b. A warning sign as set forth in paragraph 496.5(1)*"a"* will be posted in a conspicuous location readily visible to consumers entering the facility and in a conspicuous location within one meter of the tanning device readily visible to a person preparing to use the device.

c. A tanning facility shall require each consumer to read the information in Appendices 1, 2, and 3 prior to the consumer's initial exposure and annually thereafter. The consumer must sign a statement that the information has been read and understood. The information in Appendices 1, 2, and 3 must also be posted in each tanning room.

496.5(2) *Federal certification.* Only tanning devices manufactured and certified under the provisions of 21 CFR section 1040.20 may be used in tanning facilities. Compliance is based on the standard in effect at the time of manufacture as shown on the device identification label required by 21 CFR sections 1010.2 and 1010.3. Labeling shall be in accordance with 21 CFR section 1040.20(d).

496.5(3) *Tanning device timers.* Each tanning device shall have a timer that complies with 21 CFR section 1040.20(c). Each tanning device must have a method of remote timing so consumers cannot control their own exposure time. Tokens for token timers shall not be issued to any consumer in quantities greater than the device manufacturer's maximum recommended exposure time for the consumer.

496.5(4) *Temperature limits.* The operator shall ensure that the facility's interior temperature does not exceed 100 degrees F or 38 degrees C.

496.5(5) *Condition of tanning devices.* The tanning devices shall be maintained in good repair and comply with all state and local electrical code requirements, and include physical barriers to protect consumers from injury induced by falling against or breaking the lamps.

496.5(6) *Stand-up booths.* Additionally, stand-up booths shall be constructed:

a. Utilizing physical barriers (e.g., handrails) or other means (floor markings) to indicate the proper exposure distance between ultraviolet lamps and the consumer's skin.

b. To withstand the stress of use and the impact of a falling person.

c. Utilizing rigid construction, with doors that open outwardly, and with handrails and nonslip floors.

496.5(7) *Protective eyewear.*

a. Eyewear shall not be reused by another consumer.

b. Protective eyewear shall meet the criteria of 21 CFR section 1040.20(c)(4).

c. Protective eyewear shall not be altered in any manner that would change its use as intended by the manufacturer (e.g., removal of straps).

d. A tanning facility operator shall verify that a consumer has protective eyewear in accordance with this subrule and not allow a consumer to use a tanning device if that consumer does not use the protective eyewear. The operator should:

(1) Ask to see the eyewear before the consumer enters the tanning room; or

(2) Provide disposable eyewear in the tanning room at all times and post a sign stating that the disposable eyewear is available and has to be worn.

e. A tanning facility operator shall instruct the consumer in the proper utilization of the protective eyewear.

496.5(8) *Operation.*

a. A trained operator must be present when a tanning device is operated and within hearing distance to allow the consumer to easily summon help if necessary. If the operator is not in the immediate vicinity during use, the consumer must be able to summon help through use of an audible device such as an intercom or buzzer and the operator or emergency personnel must be able to reach the consumer within a reasonable amount of time after being summoned.

b. The facility's permit will be displayed pursuant to Iowa Code section 136D.6.

c. A record of each consumer's total number of tanning visits and tanning times, exposure lengths in minutes, times and dates of the exposure, and any injuries or illness resulting from the use of a tanning device must be maintained.

d. Any tanning injury not requiring a physician's care and any resulting changes in tanning sessions shall be noted in the consumer's file. A written report of any tanning injury requiring a physician's care shall be provided to the department within five working days of its occurrence or operator's notice thereof. The report will include:

(1) The name of the affected individual;

(2) The name and location of the tanning facility involved;

(3) The nature of the injury;

(4) The name and address of the health care provider treating the affected individual, if any; and

(5) Any other information considered relevant to the situation.

e. Defective or burned-out lamps or filters shall be replaced with a type intended for use in that device as specified on the product label on the tanning device or with lamps or filters that are "equivalent" under 21 CFR Section 1040.20, and policies applicable at the time of lamp manufacture.

f. Ultraviolet lamps and bulbs that are not otherwise defective or damaged will be replaced at such frequency or after such duration of use as is recommended by the manufacturer.

g. Contact surfaces of tanning devices shall be:

(1) Cleansed by the operator with a cleansing agent between each use;

(2) Covered by a nonreusable protective material during each use; or

(3) Cleansed by the consumer after use, provided the following conditions are met:

1. The operator instructs the consumer annually on how to properly cleanse the unit;

2. The consumer annually signs a statement that the consumer agrees to cleanse the unit after each use;

3. Signs are posted in each tanning room reminding the consumer to cleanse the tanning unit after each use and instructing the proper way to cleanse the unit; and

4. The operator cleanses the tanning unit at least once a day.

h. Records or documentation required by this chapter must be maintained in the tanning facility for a minimum of two years. If maintained electronically, such records must be retrievable as a printed copy.

i. The operator shall limit a consumer's exposure to the maximum exposure frequency and session duration recommended by the manufacturer.

j. When a tanning device is being used, no other person can be allowed in the tanning device area.

k. "Unlimited" tanning packages cannot be advertised or promoted unless tanning frequency limits set by the manufacturer are included therein.

496.5(9) *Training of operators.*

a. All operators must satisfactorily complete a training program approved by the department prior to operating a tanning device that includes:

(1) Education on this chapter;

(2) Procedures for correct operation of the tanning facility and tanning devices;

(3) The determination of skin type of consumers and appropriate duration of exposure to tanning devices;

(4) Recognition of reaction or overexposure;

(5) Manufacturer's procedures for operation and maintenance of tanning devices; and

(6) Competency testing.

b. Owners and managers must complete formal training approved by the department. All owners and managers must satisfactorily pass a certification examination approved by the department before operating a tanning facility or training employees.

c. Owners and managers are responsible to train operators in the above topics and to provide review as necessary. Operators will be questioned during inspections as to the level of their understanding and competency in operating the tanning device.

d. Proof of training for owner/managers and employees must be maintained in the tanning facility and available for inspection. The employee record should be the original test signed by the employee, the date, and a statement signifying that all answers have been completed by the employee and without prior knowledge of the scoring key.

e. Operators shall be at least 16 years of age.

f. Training and testing will be completed every five years.

496.5(10) *Promotional materials.* A tanning facility shall not claim, or distribute materials claiming, that tanning devices are safe, that tanning devices are free from risk, or that use of the device will result in medical or health benefits. The only claim that may be made is that the device is for cosmetic use only.

496.5(11) *Electronically controlled facilities.* Electronically controlled facilities are facilities that rely on electronic means to monitor consumers.

a. Entry into the facility is allowed by card only. Only one individual may enter under each card. The card is specifically activated for tanning use if the facility offers other activities and tanning will not activate if the card is not programmed for tanning. The card will not activate if two individuals are in the tanning room.

b. Police and all emergency services will have access to the facility through a key box located outside the entrance of the facility.

c. The consumer must sign a tanning agreement stating the number of minutes per session, that the consumer agrees to wear protective eyewear, that the consumer will cleanse the unit after tanning, and that the consumer is aware of the emergency access in each room.

d. The card will be programmed for the number of minutes the consumer is allowed to tan and may be reprogrammed for an increase in minutes per session only after the consumer has reviewed and re-signed the tanning agreement. The card will be deactivated after 30 consecutive days without consumer access such that the consumer will then reapply to access the tanning unit.

e. The operator will demonstrate to each consumer how to properly cleanse the unit after tanning, including the top, bottom, and handles. A sign will be placed in each room explaining the cleansing process. The operator will cleanse the units at least once per day when they are in use.

f. Free disposable eyewear will be placed in each room along with a sign stating that the disposable eyewear is available and must be worn.

g. An emergency call button or device that calls the operator or emergency personnel will be placed in each tanning room conveniently located within reach of the tanning bed.

h. During annual inspections, the inspector may ask any consumer about any of the above processes.

[**ARC 7834C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25]

481—496.6(136D) Inspections, violations and injunctions.

496.6(1) *Access.* The director or an authorized agent has access to any tanning facility as authorized by Iowa Code section 136D.8.

496.6(2) *Civil penalty and enforcement.* The department may take legal action as provided in Iowa Code sections 136D.8(3) and 136D.9.

a. The department will take the following steps or use county ordinances or any other applicable ordinances, resolutions, rules or regulations when enforcement of these rules is necessary.

(1) Cite each section of the Iowa Code or rules violated and any civil penalty imposed.

(2) Specify the manner in which the owner or operator failed to comply.

(3) Specify the steps required for correcting the violation.

(4) Request a corrective action plan, including a time schedule for completion of the plan.

(5) Set a reasonable time limit, not to exceed 30 days from the receipt of the notice, within which the permit holder must respond with the corrective action plan and, if applicable, any reasons why the civil penalty should not be imposed or to request a contested case hearing pursuant to 7—Chapter 2506.

b. The department will review the corrective action plan and approve it or require that it be modified.

[**ARC 7834C**, IAB 4/17/24, effective 5/22/24; Editorial change: IAC Supplement 4/2/25; Editorial change: IAC Supplement 8/5/26]

These rules are intended to implement Iowa Code chapter 136D.

Appendix 1
POTENTIAL PHOTOSENSITIZING AGENTS

1. Not all individuals who use or take these agents will experience a photosensitive reaction or the same degree of photosensitive reaction. An individual who experiences a reaction on one occasion will not necessarily experience it again or every time.

2. Names of agents should be considered only as examples. They do not represent all the names under which a product may be sold. A more complete list is available from the facility operator.

3. If you are using an agent in any of these classes, you should reduce UV exposure even if your particular medication is not listed.

Acne treatment (Retinoic acid, Retin-A) Psoralens (5-Methoxypsoralen, 8-Methoxypsoralen, 4,5,8-trimethyl-psoralen)

Antibacterials (deodorant bar soaps, antiseptics, cosmetics, halogenated carbanilides, halogenated phenols, halogenated salicylanilides, bithionol, chlorhexidine, hexachlorophene)

Antibiotics, anti-infectives (Tetracyclines)

Anticonvulsants (carbamazepine, trimethadione, promethazine)

Antidepressants (amitriptyline, Desipramine, Imipramine, Nortiptyline, Protiptyline), Tranquilizers, anti-emetics (Phenothiazines)

Antidiabetics (glucose-lowering agents) (sulfonylureas, oral antidiabetics, hypoglycemics)

Antihistamines (diphenhydramine, promethazine, triprolidine, chlorpheniramine)

Anti-inflammatory (Piroxicam), Non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen, Piroxicam)

Antimicrobials (griseofulvin), Sulfonamides (“Sulfa drugs,” antimicrobials, anti-infectives)

Atropine-like drugs (anticholinergics, antiparkinsonism drugs, antispasmodics, synthetic muscle relaxants)

Coal tar and derivatives (Denorex, Tegrin, petroleum products used for psoriasis and chronic eczema and in shampoos)

Contraceptives, oral and estrogens (birth control pills, estrogens, progesterones)

Dyes (used in cosmetic ingredients, acridine, anthracene, cosin (lipstick), erythrosine, fluorescein, methyl violet, methylene blue, rose bengal)

Perfumes and toilet articles (musk ambrette, oil of bergamot, oil of cedar, oil of citron, oil of lavender, oil of lemon, oil of lime, oil of rosemary, oil of sandalwood)

Thiazide diuretics (“water pills”)

Appendix 2

SUN-REACTIVE SKIN TYPES USED IN CLINICAL PRACTICE

SKIN TYPE	SKIN REACTIONS TO SOLAR RADIATION [a] EXAMPLES	EXAMPLES
I	Always burns easily and severely (painful burn). Tans little or none and peels.	People most often with fair skin, blue eyes, freckles. Unexposed skin is white.
II	Usually burns easily and severely (painful burn). Tans minimally or lightly, also peels.	People most often with fair skin; red or blonde hair; blue, hazel or even brown eyes. Unexposed skin is white.
III	Burns moderately and tans about average.	Normal average Caucasoid. Unexposed skin is white.
IV	Burns minimally, tans easily, and above average with each exposure. Exhibits IPD (immediate pigment darkening) reaction.	People with white or light brown skin, dark skin, dark brown hair, dark eyes. Unexposed skin is brown.
V	Rarely burns, tans easily and substantially. Always exhibits IPD reaction.	Unexposed skin is brown.
VI	Never burns and tans profusely; exhibits IPD reaction.	Unexposed skin is black.

(a) Based in the first 45-60 minutes (= 2-3 minimum erythema dose) exposure of the summer sun (early June) at sea level

Appendix 3

POTENTIAL NEGATIVE HEALTH EFFECTS
RELATED TO ULTRAVIOLET EXPOSURE

1. Increased risk of skin cancer later in life.
2. Increased risk of skin thickening, age spots, irregular pigmentation, and premature aging.
3. Possibility of burning or rash, especially if using any of the potential photosensitizing drugs and agents. The consumer should consult a physician before using a tanning device if using medications, if there is a history of skin problems or if the consumer is especially sensitive to sunlight.
4. Increased risk of eye damage unless proper eyewear is worn. Iowa law requires the use of proper eyewear during tanning sessions.

TANNING SYSTEMS

1. Low-pressure tanning systems use a higher percentage of UVB rays that penetrate only the upper layer of skin and can cause burning more easily than high-pressure tanning systems. Low-pressure systems require more frequent sessions to maintain a tan.

High-intensity tanning systems use more lamps and shorter tanning sessions than low-intensity tanning systems. These are still classified as low-pressure systems.

2. High-pressure tanning systems use a higher percentage of UVA rays that penetrate more deeply and can permanently damage the lower layers of skin and increase the incidences of skin cancers. High-pressure systems require fewer and less frequent sessions to maintain a tan.
3. The exposure schedule for each specific unit is shown on the labeling on the tanning unit. Iowa law requires the operator to limit the exposure of each consumer to the exposure schedule shown on the unit in which the consumer is tanning.

These rules are intended to implement Iowa Code chapter 136D.

MODEL RULES GOVERNING PROFESSIONAL LICENSING DIVISION PROGRAMS

CHAPTER 500
MODEL RULES FOR BOARD ADMINISTRATIVE PROCESSES

[Prior to 9/18/24, see Professional Licensure Division[645] Ch 4]

Chapter rescission date pursuant to Iowa Code section 17A.7: 7/31/29

481—500.1(17A) Definitions.

"License" means a license to practice the specific practice governed by one of the boards defined in this chapter.

"Licensee" means a person licensed to practice the specific practice governed by one of the boards defined in this chapter.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.2(17A) Purpose of board. The purpose of each professional licensing board is to administer and enforce the provisions of Iowa Code chapters 17A, 21, 147, and 272C and the practice-specific provisions in Iowa Code chapters 148A, 148B, 148C, 149, 151, 152A, 152B, 152C, 152D, 154, 154A, 154B, 154C, 154D, 154E, 155, 156, and 157 applicable to each board. The mission of each professional licensing board is to protect the public health, safety and welfare by licensing qualified individuals who provide services to consumers and by fair and consistent enforcement of the statutes and rules of each board. Responsibilities of each professional licensing board include, but are not limited to:

500.2(1) Licensing qualified applicants by examination, renewal, endorsement, and reciprocity.

500.2(2) Developing and administering a program of continuing education to ensure the continued competency of individuals licensed by the board.

500.2(3) Imposing discipline on licensees as provided by statute or rule.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.3(17A,147,272C) Organization of board and proceedings.

500.3(1) Each professional licensing board is composed of members appointed by the governor and confirmed by the senate as defined in Iowa Code chapter 147.

500.3(2) Each board elects a chairperson and vice chairperson from its membership at the first meeting after April 30 of each year.

500.3(3) A majority of the members of each board constitutes a quorum.

500.3(4) Board meetings are governed in accordance with Iowa Code chapter 21.

500.3(5) Each professional licensing board has the authority to:

a. Develop and implement continuing education rules to ensure the continued competency of individuals licensed by the board.

b. Establish fees.

c. Establish committees of the board.

d. Hold a closed session if the board votes to do so in a public roll-call vote with an affirmative vote of at least two-thirds if the total board is present or a unanimous vote if fewer are present. The board shall keep minutes of all discussion, persons present, and action occurring at a closed session. The records shall be stored securely in the board office.

e. Investigate alleged violations of statutes or rules that relate to the practice of licensees upon receipt of a complaint or upon the board's own initiation.

f. Initiate and impose licensee discipline.

g. Monitor licenses that are restricted by a board order.

h. Establish and register peer reviewers.

i. Refer complaints to one or more registered peer reviewers for investigation and review. The peer reviewers will review cases and recommend appropriate action.

j. Perform any other functions authorized by a provision of law.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.4(17A) Name and address changes.

500.4(1) Notice of change of address. Each licensee shall notify the board of a change of the licensee's current mailing address within 30 days after the change of address occurs.

500.4(2) Notice of change of name. Each licensee shall notify the board in writing of a change of name within 30 days after changing the name.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.5(147) Duplicate certificate. A duplicate certificate is required if the current certificate is lost, stolen or destroyed. Duplicate certificates may be purchased online.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.6(17A,147,272C) License denial.

500.6(1) When the board denies an applicant licensure, the board shall notify the applicant of the denial in writing and cite the reasons for which the application was denied.

500.6(2) An applicant who has been denied licensure by the board may appeal the denial and request a hearing by submitting a request in writing within 30 days following the date of mailing of the notification of licensure denial to the applicant. The request for hearing shall specifically describe the facts to be contested and determined at the hearing. The hearing and subsequent procedures will be held pursuant to the process outlined in Iowa Code chapters 17A and 272C and 481—Chapter 506.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.7(272C) Audit of continuing education. The board may select licensees for audit following license renewal.

500.7(1) If selected for audit, the licensee will provide certificates of completion of continuing education within 30 days of notice. The documents will contain the course date, title, contact hours, sponsor and licensee's name. An extension of time may be granted on an individual basis.

500.7(2) All licensees must retain continuing education certificates for two years after the renewal.

500.7(3) If the submitted certificates are incomplete or unsatisfactory, the licensee may submit make-up credit to cover the deficit. The deadline for make-up credit is 90 days from the date of the notice of deficit.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.8(272C,83GA,SF2325) Automatic exemption. A licensee is exempt from the continuing education requirement during the license biennium when the licensee:

1. Served on active duty in the military service; or
2. Resided in another state or district having continuing education requirements; or
3. Was a government employee working in the licensee's specialty and assigned to duty outside the United States.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.9(272C) Continuing education exemption for disability or illness. A licensee who has had a physical or mental disability or illness during the license period may apply for an exemption providing an extension of time or exemption from some or all of the continuing education requirements. An applicant shall submit a completed application form approved by the board for an exemption. If the application is from a licensee who is the primary caregiver for a relative who is ill or disabled and needs care from that primary caregiver, the physician shall verify the licensee's status as the primary caregiver. A licensee who applies for an exemption shall be notified of the decision regarding the application.

500.9(1) The board may grant an extension of time to fulfill the continuing education requirement.

500.9(2) The board may grant an exemption from the continuing education requirement for any period of time not to exceed two calendar years. If the physical or mental disability or illness for which an extension or exemption was granted continues beyond the period initially approved by the board, the licensee must reapply for a continuance of the extension or exemption.

500.9(3) The board may, as a condition of any extension or exemption granted, require the licensee to make up a portion of the continuing education requirement in the manner determined by the board.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.10(147,272C) Order for physical, mental, substance abuse or clinical competency examination. If the board has probable cause, a licensee may be required to submit to a physical, mental, substance abuse or clinical competency examination at the licensee's expense.

500.10(1) *Content of order.* A board order for a physical, mental, substance abuse or clinical competency examination shall include the following items:

a. A description of the type of examination.

b. The amount of time the licensee has to complete the examination.

c. A statement indicating that the licensee is to sign necessary releases for the board to communicate with the examiner of the evaluation or treatment facility.

d. A statement that the licensee is to communicate with the board regarding the status of the examination.

e. A statement that the licensee will have the examiner provide the examination results directly to the board within a specified period of time.

500.10(2) *Alternatives.* Following issuance of the examination order, the licensee may request additional time to schedule or complete the examination or may request that the board approve an alternative examiner or treatment facility. The board in its discretion shall determine whether to grant the request.

500.10(3) *Objection to order.* A licensee who is the subject of a board order and who objects to the order may file a request for hearing. The request for hearing must be filed within 30 days of the date of the examination order, and the request for hearing shall specifically identify the factual and legal issues upon which the licensee bases the objection. A licensee who fails to timely file a request for hearing to object to an examination order waives any future objection to the examination order in the event formal disciplinary charges are filed for failure to comply with the examination order or on any other grounds. The hearing shall be considered a contested case proceeding and shall be governed by the provisions of 481—Chapter 506. On judicial review of a board decision in a contested case involving an objection to an examination order, the case will be captioned to maintain the licensee's confidentiality.

500.10(4) *Closed hearing.* Any hearing on an objection to the examination order shall be closed pursuant to Iowa Code section 272C.6(1).

500.10(5) *Order and reports confidential.* An examination order and any subsequent examination reports issued in the course of a board investigation are confidential investigative information pursuant to Iowa Code section 272C.6(4). However, all investigative information regarding the examination order shall be provided to the licensee in the event the licensee files an objection, under subrule 500.15(3), in order to allow the licensee an opportunity to prepare for hearing.

500.10(6) *Admissibility.* In the event the licensee submits to evaluation and subsequent proceedings are held before the board, all objections shall be waived as to the admissibility of the examining physicians' or health care providers' testimony or examination reports on the grounds that they constitute privileged communication. The medical testimony or examination reports shall not be used against the licensee in any proceeding other than one relating to licensee discipline by the board.

500.10(7) *Failure to submit.* Failure of a licensee to submit to a board-ordered physical, mental, substance abuse or clinical competency examination constitutes a violation of the rules of the board and is grounds for disciplinary action.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—500.11(252J,272D) Noncompliance rules regarding child support and nonpayment of state debt. The board hereby adopts by reference 481—Chapter 8.

[**ARC 8077C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

These rules are intended to implement Iowa Code chapters 17A, 21, 147, 252J, 272C and 272D.

CHAPTER 501
MODEL RULES FOR LICENSURE BY VERIFICATION OR WORK EXPERIENCE
[Prior to 9/18/24, see Professional Licensure Division[645] Ch 19]

Chapter rescission date pursuant to Iowa Code section 17A.7: 7/31/29

481—501.1(272C) Licensure by verification. Licensure by verification is available in accordance with the following:

501.1(1) *Eligibility.* A person may seek licensure by verification if the person is licensed in at least one other jurisdiction that has a scope of practice substantially similar to that of Iowa.

501.1(2) *Board application.* The applicant must submit the following:

a. A completed application.

b. Payment of the application fee.

c. Completed fingerprint cards and a signed waiver form to facilitate a national criminal history background check, if required for initial licensure by the board.

d. An attestation that the applicant's license in that jurisdiction complies with the requirements of Iowa Code section 272C.12.

e. A copy of the complete criminal record if the applicant has a criminal history.

f. A copy of the relevant disciplinary documents if another jurisdiction has taken disciplinary action against the applicant.

g. A written statement from the applicant detailing the scope of practice in the other state.

h. Copies of relevant laws setting forth the scope of practice in the other state.

501.1(3) *Applicants with prior discipline.* If another jurisdiction has taken disciplinary action against an applicant, the board will determine whether the cause for the disciplinary action has been corrected and the matter has been resolved. If the board determines the disciplinary matter has not been resolved, the board will neither issue a license nor deny the application for licensure until the matter is resolved. A person who has had a license revoked, or who has voluntarily surrendered a license, in another jurisdiction is ineligible for licensure by verification.

501.1(4) *Applicants with pending licensing complaints or investigations.* If an applicant is currently the subject of a complaint, allegation, or investigation relating to unprofessional conduct pending before any regulating entity in another jurisdiction, the board will neither issue a license nor deny the application for licensure until the complaint, allegation, or investigation is resolved.

501.1(5) *Compact privileges.* A person who has a privilege to practice in Iowa by virtue of an interstate licensure compact is ineligible for licensure by verification. Licenses issued pursuant to this rule do not grant privileges to practice in any other jurisdiction pursuant to any interstate licensure compact.

[**ARC 8083C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—501.2(272C) Applicants with work experience in jurisdictions without licensure requirements.

501.2(1) *Work experience.* An applicant for initial licensure who has relocated to Iowa from another jurisdiction that did not require a professional license to practice in the profession may be considered to have met any educational and training requirements if the person has at least three years of work experience with a scope of practice substantially similar to that of the profession for which a license in Iowa is sought. The three years of work experience must be within the four years preceding the date of application for initial licensure. The applicant must satisfy all other requirements, including passing any required examinations, to receive a license.

501.2(2) *Required documentation.* An applicant who wishes to substitute work experience in lieu of satisfying applicable education or training requirements shall carry the burden of proving all of the following by submitting relevant documents as part of a completed license application:

a. Proof of Iowa residency.

b. Proof of three or more years of work experience within the four years preceding the application for licensure.

c. Proof that the work experience was in a practice with a scope of practice substantially similar to that for which the license is sought in Iowa.

[**ARC 8083C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

These rules are intended to implement Iowa Code chapter 272C.

[Filed ARC 5751C (Notice ARC 5367C, IAB 12/30/20), IAB 7/14/21, effective 8/18/21]
[Filed ARC 7013C (Notice ARC 6943C, IAB 3/8/23), IAB 5/17/23, effective 6/21/23]
[Filed ARC 8083C (Notice ARC 7310C, IAB 1/24/24), IAB 6/26/24, effective 7/31/24]
[Editorial change: IAC Supplement 9/18/24]

CHAPTER 502
MODEL RULES FOR USE OF CRIMINAL CONVICTIONS IN ELIGIBILITY DETERMINATIONS AND INITIAL LICENSING DECISIONS

[Prior to 9/18/24, see Professional Licensure Division[645] Ch 14]

Chapter rescission date pursuant to Iowa Code section 17A.7: 7/31/29

481—502.1(272C) Definitions.

"Complete criminal record" includes the complaint and judgment of conviction for each offense of which the applicant has been convicted, regardless of whether the offense is classified as a felony or a misdemeanor, and regardless of the jurisdiction in which the offense occurred.

"Conviction" means a finding, plea, or verdict of guilt made or returned in a criminal proceeding, even if the adjudication of guilt is deferred, withheld, or not entered. "Conviction" includes Alford pleas and pleas of nolo contendere.

"Disqualifying offense" means a conviction directly related to the duties and responsibilities of the profession pursuant to Iowa Code section 272C.1(8).

"License" means any license, registration, or permit issued by the board.

[**ARC 8082C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—502.2(272C) License application. Unless an applicant for licensure petitions the board for an eligibility determination pursuant to rule 481—502.3(272C), the applicant's convictions will be reviewed when the board receives a completed license application.

502.2(1) An applicant must disclose all convictions on a license application. Failure to disclose all convictions is grounds for license denial or disciplinary action following license issuance.

502.2(2) An applicant with one or more convictions shall submit the complete criminal record for each conviction and a personal statement regarding whether each conviction directly relates to the practice of the profession in order for the license application to be considered complete.

502.2(3) An applicant must submit all evidence of rehabilitation that the applicant wishes to be considered by the board.

502.2(4) The board may deny a license if the applicant has a disqualifying offense unless the applicant demonstrates by clear and convincing evidence that the applicant is rehabilitated pursuant to Iowa Code section 272C.15.

502.2(5) An applicant with one or more disqualifying offenses who has been found rehabilitated must still satisfy all other requirements for licensure.

502.2(6) Any application fees paid will not be refunded if the license is denied.

[**ARC 8082C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—502.3(272C) Eligibility determination.

502.3(1) An individual who has not yet submitted a completed license application may petition the board for a determination of whether one or more of the individual's convictions are disqualifying offenses that would render the individual ineligible for licensure.

502.3(2) To petition the board for an eligibility determination of whether one or more of the petitioner's convictions are disqualifying offenses, a petitioner shall submit all of the following:

a. A completed petition for eligibility determination form;

b. The complete criminal record for each of the petitioner's convictions;

c. A personal statement regarding whether each conviction directly relates to the duties and responsibilities of the profession and why the board should find the petitioner rehabilitated;

d. All evidence of rehabilitation that the petitioner wishes to be considered by the board; and

e. Payment of a nonrefundable fee of $25.

[**ARC 8082C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—502.4(272C) Appeal. A petitioner deemed ineligible or an applicant denied a license due to a disqualifying offense may appeal the decision in the manner and time frame set forth in the board's written decision. A timely appeal will initiate a nondisciplinary contested case proceeding. The board's rules governing contested case proceedings will apply unless otherwise specified in this rule. If the petitioner or applicant fails to timely appeal, the board's written decision will become a final order.

502.4(1) An administrative law judge will serve as the presiding officer of the nondisciplinary contested case proceeding, unless the board elects to serve as the presiding officer. When an administrative law judge serves as the presiding officer, the decision rendered shall be a proposed decision.

502.4(2) The contested case hearing shall be closed to the public, and the board's review of a proposed decision shall occur in closed session.

502.4(3) The office of the attorney general shall represent the board's initial ineligibility determination or license denial and shall have the burden of proof to establish that the petitioner or applicant's convictions include at least one disqualifying offense. Upon satisfaction of this burden by a preponderance of the evidence by the office of the attorney general, the burden of proof shall shift to the petitioner or applicant to establish rehabilitation by clear and convincing evidence.

502.4(4) A petitioner or applicant must appeal an ineligibility determination or license denial in order to exhaust administrative remedies. A petitioner or applicant may only seek judicial review of an ineligibility determination or license denial after the issuance of a final order following a contested case proceeding. Judicial review of the final order following a contested case proceeding shall be in accordance with Iowa Code chapter 17A.

[**ARC 8082C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—502.5(272C) Future petitions or applications. If a final order determines a petitioner is ineligible, the petitioner may not submit a subsequent petition for eligibility determination or a license application prior to the date specified in the final order. If a final order denies a license application, the applicant may not submit a subsequent license application or a petition for eligibility determination prior to the date specified in the final order.

[**ARC 8082C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

These rules are intended to implement Iowa Code chapter 272C.

[Filed ARC 5751C (Notice ARC 5367C, IAB 12/30/20), IAB 7/14/21, effective 8/18/21]
[Filed ARC 8082C (Notice ARC 7311C, IAB 1/24/24), IAB 6/26/24, effective 7/31/24]
[Editorial change: IAC Supplement 9/18/24]

CHAPTER 503
MODEL RULES FOR COMPLAINTS AND INVESTIGATIONS
[Prior to 9/18/24, see Professional Licensure Division[645] Ch 9]

Chapter rescission date pursuant to Iowa Code section 17A.7: 7/31/29

481—503.1(272C) Complaints.

503.1(1) Complaints can be submitted online, in writing, or verbally and are to include the name and contact information of the complainant, the name of the licensee, and a concise statement of the allegations against the licensee. A complaint may also be initiated by the board.

503.1(2) A person is not civilly liable for filing a complaint in good faith or for cooperating with a board investigation.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—503.2(272C) Report of malpractice claims or actions or disciplinary actions. The licensee will submit any judgment or settlement in a malpractice claim or any disciplinary action taken by another licensing authority in another state or jurisdiction to the board within 30 days of the date of occurrence.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—503.3(272C) Report of acts or omissions. A licensee who has knowledge of rule violations committed by another licensee will file a report to the board. The report will include the name and contact information of the licensee and the date, time, and place of the incident.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—503.4(272C) Investigation of complaints or reports. Board staff may request additional information, solicit a response from the licensee, subpoena records, conduct interviews, gather evidence, and perform other investigatory duties to sufficiently inform the board.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—503.5(17A,272C) Issuance of investigatory subpoenas.

503.5(1) The board administrator or designee may, upon the written request of a board investigator or on the administrator's own initiative, subpoena books, papers, records, and other real evidence that is necessary for the board to decide whether to institute a contested case proceeding. In the case of a subpoena for mental health records, each of the following conditions shall be satisfied prior to the issuance of the subpoena:

a. The nature of the complaint reasonably justifies the issuance of a subpoena;

b. Adequate safeguards have been established to prevent unauthorized disclosure;

c. An express statutory mandate, articulated public policy, or other recognizable public interest favors access; and

d. An attempt was made to notify the patient and to secure an authorization from the patient for release of the records at issue.

503.5(2) Each subpoena will contain:

a. The name and address of the person to whom the subpoena is directed;

b. A description of the books, papers, records or other real evidence requested;

c. The date, time and location for production, or inspection and copying;

d. The deadline for a motion to quash or modify the subpoena to be filed;

e. The signature, address and telephone number of the board administrator or designee;

f. The date of issuance;

g. A return of service.

503.5(3) A person can challenge the subpoena by filing a motion to quash describing the legal justification for the motion accompanied by a legal brief or factual affidavits, within 14 days after service of the subpoena.

503.5(4) Upon receipt of a timely motion to quash or modify a subpoena, an administrative law judge will issue a decision. The administrative law judge may quash or modify the subpoena, deny the motion, or issue an appropriate protective order.

503.5(5) A person aggrieved by a ruling of an administrative law judge who desires to challenge that ruling must appeal the ruling to the board by serving on the board administrator, either in person, via email, or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge.

503.5(6) If the person contesting the subpoena is not the person under investigation, the board's decision is final for purposes of judicial review. If the person contesting the subpoena is the person under investigation, the board's decision is not final for purposes of judicial review until either (1) the person is notified the investigation has been concluded with no formal action, or (2) there is a final decision in the contested case.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—503.6(272C) Peer review.

503.6(1) A complaint may be assigned to a peer reviewer for review and report to the board.

503.6(2) The board determines what complaints or other matters are referred to a peer reviewer.

503.6(3) Peer reviewers are not to be liable for acts, omissions, or decisions made in connection with service made in good faith.

503.6(4) The peer reviewer will observe the requirements of confidentiality imposed by Iowa Code section 272C.6.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—503.7(17A) Appearance. The board may request that a licensee appear before a committee of the board to discuss a pending investigation. By electing to participate in the committee appearance, the licensee waives any objection to a board member both participating in the appearance and later participating as a decision maker in a contested case proceeding. By electing to participate in the committee appearance, the licensee further waives any objection to the board administrator assisting the board in the contested case proceeding.

[**ARC 8079C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

These rules are intended to implement Iowa Code chapters 17A and 272C.

[Filed 5/14/99, Notice 3/24/99—published 6/2/99, effective 7/7/99]
[Filed ARC 8079C (Notice ARC 7303C, IAB 1/24/24), IAB 6/26/24, effective 7/31/24]
[Editorial change: IAC Supplement 9/18/24]

CHAPTER 504
MODEL RULES FOR DISCIPLINE
[Prior to 9/18/24, see Professional Licensure Division[645] Ch 13]

Chapter rescission date pursuant to Iowa Code section 17A.7: 7/31/29

481—504.1(272C) Definitions.

"Board" means a professional licensing board established pursuant to Iowa Code chapter 147.

"Licensee" means a person licensed under Iowa Code chapter 147.

"Licensee discipline" means the same as defined in Iowa Code section 272C.1.

[**ARC 8081C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—504.2(147,272C) Grounds for discipline. A board may impose any of the disciplinary sanctions provided in Iowa Code section 272C.3 when the board determines that the licensee is guilty of any of the following acts or offenses or those listed in Iowa Code section 147.55:

504.2(1) Fraud in procuring a license. Fraud in procuring a license includes but is not limited to an intentional perversion of the truth in making application for a license to practice in this state, which includes the following:

a. False representations of a material fact, whether by word or by conduct, by false or misleading allegations, or by concealment of that which should have been disclosed when making application for a license in this state; or

b. Attempting to file or filing with the board or the department of inspections, appeals, and licensing any false or forged diploma, certificate, affidavit, identification or qualification in making an application for a license in this state.

504.2(2) Professional incompetence. Professional incompetence includes but is not limited to:

a. A substantial lack of knowledge or ability to perform professional obligations within the scope of practice.

b. A substantial deviation from the standards of learning or skill ordinarily possessed and applied by other licensees in the state of Iowa acting in the same or similar circumstances.

c. A failure to exercise the degree of care that is ordinarily exercised by the average licensee acting in the same or similar circumstances.

d. Failure to conform to the minimal standard of acceptable and prevailing practice of a licensee in this state.

e. Mental or physical inability reasonably related to and adversely affecting the licensee's ability to practice in a safe and competent manner.

f. Being adjudged mentally incompetent by a court of competent jurisdiction.

504.2(3) Practice outside the scope of the profession.

504.2(4) Habitual intoxication or addiction to the use of drugs, including:

a. The inability of a licensee to practice with reasonable skill and safety by reason of the excessive use of alcohol on a continuing basis.

b. The excessive use of drugs that may impair a licensee's ability to practice with reasonable skill or safety.

504.2(5) Obtaining, possessing, attempting to obtain or possess, or administering controlled substances without lawful authority.

504.2(6) Falsification, alteration or destruction of client or patient records with the intent to deceive.

504.2(7) Acceptance of any fee by fraud or misrepresentation.

504.2(8) Negligence by the licensee in the practice of the profession, which includes a failure to exercise due care, including negligent delegation of duties or supervision of employees or other individuals, whether or not injury results; or any conduct, practice or conditions that impair the ability to safely and skillfully practice the profession.

504.2(9) Being convicted of an offense that directly relates to the duties and responsibilities of the profession. A conviction includes a guilty plea, including Alford and nolo contendere pleas, or a finding or verdict of guilt, even if the adjudication of guilt is deferred, withheld, or not entered. A copy of the guilty

plea or order of conviction constitutes conclusive evidence of conviction. An offense directly relates to the duties and responsibilities of the profession if the actions taken in furtherance of the offense are actions customarily performed within the scope of practice of the profession or the circumstances under which the offense was committed are circumstances customary to the profession.

504.2(10) Violation of a regulation, rule, or law of this state, another state, or the United States that relates to the practice of the profession.

504.2(11) Revocation, suspension, or other disciplinary action taken by a licensing authority of this state or another state, territory or country; or failure of the licensee to report such action within 30 days of the final action by such licensing authority. A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, such report shall be expunged from the records of the board.

504.2(12) Failure of a licensee or an applicant for licensure in this state to report any voluntary agreements restricting the individual's practice in another state, district, territory or country.

504.2(13) Failure to notify the board of a criminal conviction within 30 days of the action, regardless of the jurisdiction where it occurred.

504.2(14) Failure to notify the board within 30 days after occurrence of any judgment or settlement of a malpractice claim or action.

504.2(15) Engaging in any conduct that subverts or attempts to subvert a board investigation.

504.2(16) Failure to comply with a subpoena issued by the board or failure to cooperate with an investigation of the board.

504.2(17) Failure to respond within 30 days of receipt of communication from the board that was sent by registered or certified mail.

504.2(18) Failure to comply with the terms of a board order or the terms of a settlement agreement or consent order.

504.2(19) Failure to pay costs assessed in any disciplinary action.

504.2(20) Submission of a false report of continuing education or failure to submit the biennial report of continuing education.

504.2(21) Failure to report another licensee to the board for any violations listed in these rules, pursuant to Iowa Code section 272C.9.

504.2(22) Knowingly aiding, assisting, or advising a person to unlawfully practice the profession.

504.2(23) Failure to report a change of name or address within 30 days after it occurs.

504.2(24) Representing oneself as a licensee when one's license has been suspended or revoked, or when one's license is on inactive status.

504.2(25) Permitting another person to use the licensee's license for any purpose.

504.2(26) Permitting an unlicensed employee or person under the licensee's control to perform activities that require a license to practice the profession.

504.2(27) Unethical conduct. In accordance with Iowa Code section 147.55(3), behavior (i.e., acts, knowledge, and practices) that constitutes unethical conduct may include but is not limited to the following:

a. Verbally or physically abusing a patient or client.

b. Improper sexual contact with or making suggestive, lewd, lascivious or improper remarks or advances to a patient, client or coworker.

c. Betrayal of a professional confidence.

d. Engaging in a professional conflict of interest.

504.2(28) Repeated failure to comply with standard precautions for preventing transmission of infectious diseases as issued by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services.

504.2(29) Violation of the terms of an initial agreement with the Iowa professional health committee or violation of the terms of an impaired practitioner recovery contract with the Iowa professional health committee.

[**ARC 8081C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—504.3(272C) Method of discipline. The board has the authority to impose the following disciplinary sanctions as defined in Iowa Code section 272C.3 and as follows:

1. Order a physical or mental evaluation or order alcohol and drug screening within a time specified by the board.
2. Such other sanctions allowed by law.

[**ARC 8081C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

481—504.4(272C) Discretion of board. The following factors may be considered by the board in determining the nature and severity of the disciplinary sanction to be imposed:

1. The relative serious nature of the violation as it relates to ensuring the citizens of this state a high standard of professional care.
2. The facts of the particular violation.
3. Any extenuating facts or other countervailing considerations.
4. The number of prior violations or complaints.
5. The seriousness of prior violations or complaints.
6. Whether remedial action has been taken.
7. Such other factors as may reflect upon the competency, ethical standards, and professional conduct of the licensee.

[**ARC 8081C**, IAB 6/26/24, effective 7/31/24; Editorial change: IAC Supplement 9/18/24]

These rules are intended to implement Iowa Code sections 21.7, 272C.4, 272C.5, and 272C.6.

[Filed 5/14/99, Notice 3/24/99—published 6/2/99, effective 7/7/99]
[Filed ARC 8081C (Notice ARC 7305C, IAB 1/24/24), IAB 6/26/24, effective 7/31/24]

CHAPTER 505
MODEL RULES FOR LICENSEE REVIEW COMMITTEE
[Prior to 7/10/24, see Public Health Department[641] Ch 193]

Chapter rescission date pursuant to Iowa Code section 17A.7: 5/8/29

481—505.1(272C) Definitions. For the purpose of these rules, the following definitions apply:

"Committee" means the licensee review committee established by a licensing board pursuant to the authority of Iowa Code section 272C.3(1)*"k."*

"Contract" means the written document establishing the terms for participation in the program.

"Impairment" means a condition identified in Iowa Code section 272C.3(1)*"k"* that renders or, if left untreated, is reasonably likely to render a licensee unable to practice the licensee's profession with reasonable skill and safety.

"Initial agreement" means the written document establishing the initial terms for participation in the program.

"Licensing board" or *"board"* means the same as defined in Iowa Code section 272C.1(6).

"Licensee" means a person licensed by a licensing board.

"Self-report" means written notification provided by the licensee to the program that the licensee has had, has, or may have an impairment. A self-report can be made even if the applicable licensing board has received a complaint or a third party has alleged the same.

[**ARC 7753C**, IAB 4/3/24, effective 5/8/24; Editorial change: IAC Supplement 7/10/24]

481—505.2(272C) Purpose. The committee assists and monitors the recovery or rehabilitation of practitioners who self-report potential impairments or who are referred by the board. The program is both an advocate for participant health and a means to protect the health and safety of the public.

[**ARC 7753C**, IAB 4/3/24, effective 5/8/24; Editorial change: IAC Supplement 7/10/24]

481—505.3(272C) Composition of the committee. The division of licensing appoints the members of the committee.

505.3(1) *Membership.* The committee may be composed of but not limited to members with the following qualifications:

a. A health care professional who has expertise in the area of substance use and addiction treatment.

b. A health care professional who has expertise in the diagnosis and treatment of mental health conditions.

c. A psychiatrist who holds a current, active Iowa license as defined in rule 481—652.1(147,148).

d. A licensee who has maintained recovery for a period of no less than two years since successfully completing a recovery program, a board-ordered probation for substance use, or a comparable monitoring program.

e. A licensed physician, physician associate or advanced registered nurse licensee whose specialty area is family practice, internal medicine, or emergency medicine or who has expertise in substance use disorders, mental health conditions or both.

f. A licensed psychiatric pharmacist.

g. A public member.

h. Non-voting members, which may include the board's executive director, the bureau chief or designee, the bureau chief of monitoring, and, if requested to join the committee for consultation during a participant review, an executive officer or board member under which a participant is regulated.

505.3(2) *Officers.* At the last meeting of each calendar year, the committee elects co-chairpersons to serve a one-year term beginning January 1.

505.3(3) *Terms.* Committee members are appointed for a three-year term, for a maximum of three terms. Each term expires on December 31 of the third year of the term. Initial terms are for a period of one to three years as designated by the division to provide continuity to the committee.

[**ARC 7753C**, IAB 4/3/24, effective 5/8/24; Editorial change: IAC Supplement 7/10/24; Editorial change: IAC Supplement 6/10/26; Editorial change: IAC Supplement 8/5/26]

481—505.4(272C) Eligibility.

505.4(1) *Eligibility.* To be eligible for participation in the program, a prospective participant must self-report or be referred by the board for an impairment or potential impairment. The committee will determine for each self-report or referral whether the prospective participant is an appropriate candidate for participation in the program. A prospective participant is ineligible if the committee finds sufficient evidence that the prospective participant:

a. Diverted medication for distribution to third parties or for personal profit;

b. Adulterated, misbranded, or otherwise tampered with medication intended for a patient;

c. Provided inaccurate, misleading, or fraudulent information or failed to fully cooperate with the committee; or

d. Caused injury or harm to a patient or client.

505.4(2) *Board referral.* The board may refer a licensee to the program privately, in a public disciplinary order, or other public order if a complaint or investigation reveals an impairment or potential impairment or the board determines that the licensee is an appropriate candidate for review by the committee.

505.4(3) *Discretion.* Eligibility for participation in the program is at the sole discretion of the committee. No person is entitled to participate in the program.

505.4(4) *Limitations.* The committee establishes the terms and monitors a participant's compliance with the program specified in the contract. The committee is not responsible for participants who fail to comply with the terms of the program or successfully complete the program. Participation in the program shall not relieve the participant's board of any duties nor divest the board of any authority or jurisdiction otherwise provided. Any violation of the statutes or rules governing the practice of the participant's profession and unrelated to their impairment will be referred to the board for appropriate action.

[**ARC 7753C**, IAB 4/3/24, effective 5/8/24; Editorial change: IAC Supplement 7/10/24]

481—505.5(272C) Terms of participation in the impaired practitioner recovery program. A participant is responsible for complying with the terms of participation established in the initial agreement and the contract, and for all expenses incurred to comply with the terms imposed by the program. Terms of participation specified in the contract shall include, but not be limited to:

505.5(1) *Duration.* Length of participation in the program may vary depending upon the review of all relevant information and the nature of the impairment.

505.5(2) *Noncompliance.* Participants are responsible for notifying the committee of any instance of noncompliance. Notification of noncompliance made to the committee by the participant, a monitoring provider, or another party may result in notice to the board for its consideration of disciplinary action.

a. First instance. After a first instance of significant noncompliance, including a relapse, the committee may give notice to the board identifying the participant by number, describing the relevant terms of the participant's contract and the noncompliance, and including the committee's recommendation for continued participation in the program.

b. Second instance. After a second instance of significant noncompliance, including a relapse, the committee may refer the case and the participant's identity to the board. In its referral, the committee may make recommendations as to continued participation in the program.

c. Referral at any time. The committee may make a referral to the board for noncompliance that identifies the participant by name at any time the circumstances warrant such a referral.

505.5(3) *Practice limitations.* The committee may impose limitations on a participant's practice as a term of the contract until such time as the committee receives a report from an approved evaluator that the licensee is capable of practicing with reasonable safety and skill. Participation in the program is conditioned upon participants agreeing to limit practice as requested by the committee and established in accordance with the terms specified in the contract. If a participant refuses to agree to or comply with the limitations established in the initial agreement or contract, the committee will refer the licensee to the board for appropriate action.

505.5(4) *Staff discretion.* Staff, in consultation with legal counsel, may provide guidance and direction to participants between regularly scheduled committee meetings, including program descriptions, interim limitations on practice, and negotiation and execution of initial agreements and contracts on behalf

of the committee. The committee retains authority to review all interim decisions at its discretion. Staff may consult with the committee chairperson or medical director if needed.

[**ARC 7753C**, IAB 4/3/24, effective 5/8/24; Editorial change: IAC Supplement 7/10/24]

481—505.6(272C) Confidentiality. Information in the possession of the board or the committee is subject to the confidentiality requirements of Iowa Code section 272C.6.

505.6(1) Participants must report their participation to the applicable monitoring program or licensing authority in any state in which the participant is currently licensed or in which the participant seeks licensure.

505.6(2) The committee is authorized to communicate information about a participant to any person assisting in the participant's treatment, recovery, rehabilitation, monitoring, or maintenance for the duration of the initial agreement or contract.

505.6(3) The committee is authorized to communicate information about a participant to the board if a participant does not comply with the terms of the contract as set forth in rule 481—505.5(272C).

505.6(4) The committee is authorized to communicate information about a current or former participant to the board if reliable information held by the committee reasonably indicates that a significant risk to the public exists.

505.6(5) If the board initiates disciplinary or other action against a participant or former participant as a result of communication from the committee, the board may include information from the program file in the public documents.

[**ARC 7753C**, IAB 4/3/24, effective 5/8/24; Editorial change: IAC Supplement 7/10/24; Editorial change: IAC Supplement 4/2/25]

These rules are intended to implement Iowa Code chapter 272C.

CHAPTER 506
MODEL RULES FOR CONTESTED CASES BEFORE LICENSING BOARDS AND SETTLEMENTS

[Prior to 9/18/24, see Professional Licensure Division[645] Ch 11]

Chapter rescission date pursuant to Iowa Code section 17A.7: 3/28/30

481—506.1(17A) Scope and applicability. This model chapter provides rules for contested cases and settlements that licensing boards and commissions may adopt for procedural consistency. This chapter is deemed applicable to any licensing board under the administrative authority of the department, excluding the department's attached units, unless the licensing board has separate rulemaking authority and has adopted rules governing contested cases and settlements.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.2(17A) Definitions. For the purpose of these rules, the following definitions apply:

"Attached units" includes the employment appeal board, office of civil rights, racing and gaming commission, and state public defender's office as described in Iowa Code chapter 10A.

"Contested case" means a proceeding defined by Iowa Code section 17A.2(5) and includes any matter defined as a no factual dispute contested case under Iowa Code section 17A.10A.

"Department" means the department of inspections, appeals, and licensing.

"Issuance" means the date of mailing of a decision or order or date of delivery if service is by other means unless another date is specified in the order.

"Licensing board" or *"board"* includes any licensing board set forth in Iowa Code section 272C.1(6) that is under the administrative authority of the department pursuant to Iowa Code chapter 10A, with the exception of the director or the department as referenced in Iowa Code section 272C.1(6)*"ad"* and *"ae,"* and also includes any other licensing board under the administrative authority of the department pursuant to Iowa Code chapter 10A that has expressly adopted this chapter.

"Party" means each person or agency named or admitted as a party or properly seeking and entitled as of right to be admitted as a party, including the state of Iowa as represented by the assistant attorney general assigned to prosecute the case on behalf of the public interest, the respondent or applicant, or an intervenor.

"Presiding officer" includes the licensing board, administrative law judge, or panel of not less than three board members who are licensed in the profession as described in Iowa Code section 272C.6(1).

"Probable cause" means a reasonable ground for belief in the existence of facts warranting the specified proceeding.

"Quorum" means a majority of the members of the board unless otherwise defined by the board's authorizing statute.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.3(17A) Time requirements.

506.3(1) Time will be computed as provided in Iowa Code section 4.1(34).

506.3(2) For good cause, the presiding officer may extend or shorten the time to take any action, except as precluded by statute or by rule. Except for good cause stated in the record, before extending or shortening the time to take any action, the presiding officer will afford all parties an opportunity to be heard or to file written arguments.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.4(17A) Probable cause. If the board finds there is probable cause for taking disciplinary action against a licensee following investigation, the board may order that a contested case hearing be commenced by the filing and service of a statement of charges and notice of hearing.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.5(17A) Statement of charges and notice of hearing.

506.5(1) *Legal review.* Every statement of charges and notice of hearing prepared by the board will be reviewed by the office of the attorney general prior to filing.

506.5(2) *Service.* Service of the statement of charges and notice of hearing constitutes the commencement of the contested case proceeding. Service may be executed by:

a. Personal service as provided in the Iowa Rules of Civil Procedure; or

b. Restricted certified mail, return receipt requested; or

c. Signed acknowledgment accepting service; or

d. Publication, as provided in the Iowa Rules of Civil Procedure, when service cannot be accomplished using the above methods.

506.5(3) *Contents.* The statement of charges and notice of hearing will contain the following information:

a. A statement of probable cause to file the statement of charges;

b. A statement of the time, place, and nature of the hearing;

c. A statement of the legal authority and jurisdiction under which the hearing is to be held;

d. A reference to the particular sections of the statutes and rules involved;

e. A short and plain statement of the matters asserted containing sufficient detail to give the respondent fair notice of the allegations so that the respondent may adequately respond to the charges, and to give the public notice of the matters at issue;

f. Identification of all parties including the name, address and telephone number of the assistant attorney general designated as prosecutor for the state and the parties' counsel, if known;

g. Reference to the procedural rules governing conduct of the contested case proceeding;

h. Reference to the procedural rules governing settlement;

i. Identification of the presiding officer;

j. Notification of the time period in which a party may request, when applicable, and pursuant to Iowa Code section 17A.11 that the presiding officer be an administrative law judge;

k. Notification of the time period in which the respondent may file an answer; and

l. Notification of the respondent's right to request a closed hearing, if applicable.

506.5(4) *Public record.* A statement of charges and notice of hearing is a public record and open for inspection under Iowa Code chapter 22. Notwithstanding, investigative information included in the statement of charges and notice of hearing as set forth in subparagraph 506.5(3)*"e"* is confidential pursuant to Iowa Code section 272C.6(4)*"a"* and should not be included in the public record. Such confidential information should be redacted from the public record or set forth in a separate document that is not included with the public record.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.6(17A,272C) Legal representation. Following the filing of the statement of charges and notice of hearing, the office of the attorney general will be responsible for the legal representation of the public interest in all proceedings before the board. The assistant attorney general assigned to prosecute a contested case before the board will not represent the board in that case but will represent the public interest. All other parties to a proceeding before the board are entitled to legal representation at their own expense.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.7(17A,272C) Presiding officer in a disciplinary contested case. The presiding officer in a disciplinary contested case may be the board, an administrative law judge delegated in accordance with rule 481—506.8(17A,272C), or a panel of the board as described in Iowa Code section 272C.6(1). The board may also request that an administrative law judge assist the board with initial rulings on prehearing matters. Decisions of the administrative law judge serving in this capacity are subject to the interlocutory appeal provisions of rule 481—506.24(17A). An administrative law judge may also assist and advise the board at the contested case hearing.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.8(17A,272C) Delegation by board to administrative law judge.

506.8(1) *Delegation.* Upon majority vote of the board, a contested case, whether disciplinary or nondisciplinary, may be delegated to an administrative law judge. The board may delegate the entirety of

the case or parts of the case to the administrative law judge. The delegation may occur at the time of filing the notice of hearing and statement of charges and should occur as early as practicable.

506.8(2) *Proposed decisions.* Decisions issued by an administrative law judge are proposed decisions in accordance with Iowa Code section 17A.15. A proposed decision issued by an administrative law judge becomes a final decision if not timely appealed or reviewed in accordance with this rule.

a. Appeal by party. Any adversely affected party may appeal a proposed decision to the board within 30 days after issuance of the proposed decision.

b. Review. The board may initiate review of the proposed decision on its own motion at any time within 30 days following the issuance of the proposed decision.

c. Exhaustion. A party must timely appeal a proposed decision to the board in order to adequately exhaust administrative remedies.

d. Notice of appeal. An appeal of a proposed decision is initiated by the filing of a timely notice of appeal with the board. The notice of appeal must be signed by the appealing party or an attorney for that party and contain a certificate of service. The notice shall specify:

(1) The party initiating the appeal;

(2) The proposed decision or order being appealed;

(3) The specific findings or conclusions to which exception is taken and any other exceptions to the decision or order;

(4) The relief sought; and

(5) The grounds for relief.

506.8(3) *Requests to present additional evidence.* A party may request the taking of additional evidence only by establishing that the evidence is material, that good cause existed for the failure to present the evidence at the hearing, and that the party has not waived the right to present the evidence. A written request to present additional evidence must be filed with the notice of appeal or by a nonappealing party within 14 days of service of the notice of appeal. The board may remand a case to the presiding officer for further hearing or may itself preside at the taking of additional evidence.

506.8(4) *Scheduling.* The board will issue a schedule for consideration of the appeal.

a. Briefs and arguments. Unless otherwise ordered, within 20 days of the notice of appeal or order for review, each appealing party may file exceptions and briefs. Within 20 days thereafter, any party may file a responsive brief. Briefs shall cite any applicable legal authority and specify relevant portions of the record in that proceeding. Written requests to present oral argument shall be filed with the briefs. The board may resolve the appeal on the briefs or provide an opportunity for oral argument. The board may shorten or extend the briefing period as appropriate.

b. Record. The record on appeal or review shall be the entire record made before the administrative law judge.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.9(17A) Presiding officer in a nondisciplinary contested case.

506.9(1) Any party in a nondisciplinary contested case who wishes to request that the presiding officer assigned to render a proposed decision be an administrative law judge employed by the department of inspections, appeals, and licensing must file a written request within 20 days after service of a notice of hearing that identifies or describes the presiding officer as the board.

506.9(2) The board may deny the request only upon a finding that one or more of the following apply:

a. There is a compelling need to expedite issuance of a final decision in order to protect the public health, safety, or welfare.

b. An administrative law judge is unavailable to hear the case within a reasonable time.

c. The case involves significant policy issues of first impression that are inextricably intertwined with the factual issues presented.

d. The demeanor of the witnesses is likely to be dispositive in resolving the disputed factual issues.

e. Funds are unavailable to pay the costs of an administrative law judge and an interagency appeal.

f. The request was not timely filed.

g. The request is not consistent with a specified statute.

506.9(3) The board will issue a written ruling specifying the grounds for its decision within 20 days after a request for an administrative law judge is filed. If the ruling is contingent upon the availability of an administrative law judge with the qualifications identified in subrule 506.9(4), the parties shall be notified at least ten days prior to hearing if a qualified administrative law judge will not be available.

506.9(4) Except as provided otherwise by another provision of law, all rulings by an administrative law judge acting as presiding officer in a nondisciplinary contested case are subject to appeal to the board. A party must seek appeal to the board in order to exhaust adequate administrative remedies. Such appeals must be filed within ten days of the date the challenged ruling was issued by the administrative law judge, but no later than the time for compliance with the order or the date of hearing, whichever is first.

506.9(5) Unless otherwise provided by law, when reviewing a proposed decision of an administrative law judge in a nondisciplinary contested case upon appeal, the board will have the powers of and will comply with the provisions of subrule 506.8(2).

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.10(17A) Disqualification.

506.10(1) A presiding officer or other person will withdraw from participation in the making of any proposed or final decision in a contested case if that person:

a. Has a personal bias or prejudice concerning a party or a representative of a party;

b. Has personally investigated, prosecuted or advocated, in connection with that case, the specific controversy underlying that case, another pending factually related contested case, or a pending factually related controversy that may culminate in a contested case involving the same parties;

c. Is subject to the authority, direction or discretion of any person who has personally investigated, prosecuted or advocated in connection with that contested case, the specific controversy underlying that contested case, or a pending factually related contested case or controversy involving the same parties;

d. Has acted as counsel to any person who is a private party to that proceeding within the past two years;

e. Has a personal financial interest in the outcome of the case or any other significant personal interest that could be substantially affected by the outcome of the case;

f. Has a spouse or relative within the third degree of relationship that is:

(1) A party to the case, or an officer, director or trustee of a party;

(2) A lawyer in the case;

(3) Known to have an interest that could be substantially affected by the outcome of the case; or

(4) Likely to be a material witness in the case; or

g. Has any other legally sufficient cause to withdraw from participation in the decision making in that case.

506.10(2) The term "personally investigated" means taking affirmative steps to interview witnesses directly or to obtain documents or other information directly. The term "personally investigated" does not include:

a. General direction and supervision of assigned investigators;

b. Unsolicited receipt of information that is relayed to assigned investigators;

c. Review of another person's investigative work product in the course of determining whether there is probable cause to initiate a proceeding; or

d. Exposure to factual information while performing other agency functions, including fact gathering for purposes other than investigation of the matter that culminates in a contested case. A person voluntarily appearing before the board or a committee of the board waives any objection to a board member or board staff both participating in the appearance and later participating as a decision maker or aid to the decision maker in a contested case.

506.10(3) Factual information relevant to the merits of a contested case received by a person who later serves as presiding officer in that case will be disclosed if required by Iowa Code section 17A.17(3), rule 481—506.10(17A), or subrule 506.22(9).

506.10(4) In a situation where a presiding officer or other person knows of information that might reasonably be deemed to be a basis for disqualification and decides voluntary withdrawal is unnecessary,

that person will submit the relevant information for the record by affidavit, including a statement of the reasons for the determination that withdrawal is unnecessary.

506.10(5) If a party asserts disqualification on any appropriate ground, including those listed in subrule 506.10(1), the party will file a motion supported by an affidavit pursuant to Iowa Code section 17A.17(7). The motion must be filed as soon as practicable after the reason alleged in the motion becomes known to the party. The board will determine the matter as part of the record in the case.

506.10(6) If, during the course of the hearing, a party first becomes aware of evidence of bias or other grounds for disqualification, the party may move for disqualification but will need to establish the grounds by the introduction of evidence into the record.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.11(17A) Consolidation—severance.

506.11(1) *Consolidation.* The presiding officer may consolidate any or all matters at issue in two or more contested case proceedings where:

a. The matters at issue involve common parties or common questions of fact or law;

b. Consolidation would expedite and simplify consideration of the issues involved; and

c. Consolidation would not adversely affect the rights of any of the parties to those proceedings.

506.11(2) *Severance.* The presiding officer may, for good cause shown, order any contested case proceedings or portions thereof severed.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.12(17A) Pleadings.

506.12(1) *Pleadings.* Pleadings may be required by rule, by the statement of charges and notice of hearing, or by order of the presiding officer.

506.12(2) *Answer or appearance.* An answer or appearance, if required, shall be filed by respondent within 20 days of service of the statement of charges and notice of hearing.

a. An answer or appearance will state the name, address, and telephone number of the person filing the answer; the person or entity on whose behalf it is filed; and the attorney representing that person, if any. If the attorney is not licensed to practice law in Iowa, the attorney must fully comply with Iowa Court Rule 31.14.

b. The presiding officer may refuse to consider any defense not raised in the answer that could have been raised on the basis of facts known when the answer was filed if any party would be prejudiced.

506.12(3) *Amendments.* Any notice of hearing or statement of charges may be amended before a responsive pleading has been filed. Otherwise, a party may amend a pleading only with the consent of the other parties or at the discretion of the presiding officer, who may impose terms or grant a continuance.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.13(17A) Service and filing.

506.13(1) *Service—when required.* Except where otherwise provided by law, every document filed in a contested case proceeding shall be served upon each of the parties of record to the proceeding, including the assistant attorney general designated as prosecutor for the state, simultaneously with its filing. Except for the original statement of charges and notice of hearing and an application for rehearing as provided in Iowa Code section 17A.16(2), the party filing a document is responsible for service on all parties.

506.13(2) *Service—how made.* Service upon a party represented by an attorney will be made upon the attorney unless otherwise ordered. Service is made by delivery or by mailing a copy to the person's last-known address. Service by mail is complete upon mailing, except where otherwise specifically provided by statute, rule, or order.

506.13(3) *Filing—when required.* After the statement of charges and notice of hearing, all pleadings and motions in a contested case proceeding shall be filed with the board. All documents that are required to be filed with the board shall be appropriately served upon all parties.

506.13(4) *Filing—when made.* Except where otherwise provided by law, a document is deemed filed at the time it is delivered to the board office at 6200 Park Avenue, Suite 100, Des Moines, Iowa 50321; delivered to an established courier service for immediate delivery to that office; mailed by first-class mail

or state interoffice mail to that office, so long as there is proof of mailing; or filed electronically through AEDMS in accordance with 481—Chapter 16.

506.13(5) *Proof of mailing.* Proof of mailing includes:

a. A legible United States Postal Service postmark on the envelope, or

b. A certificate of service, or

c. A notarized affidavit, or

d. A certification in substantially the following form:

> I certify under penalty of perjury and pursuant to the laws of Iowa that, on (date of mailing), I mailed copies of (describe document) addressed to the _____ Board, and to the names and addresses of the parties listed below by depositing the same in (a United States Post Office mailbox with correct postage properly affixed or state interoffice mail).
>
> (Date) (Signature)

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.14(17A) Discovery.

506.14(1) Discovery procedures applicable in civil actions are applicable in contested cases, with the exception of the mandatory disclosure and discovery conference requirements in Iowa Rules of Civil Procedure 1.500 and 1.507. Unless lengthened or shortened by these rules, by order of the presiding officer, or by agreement of the parties, time periods for compliance with discovery will be as provided in the Iowa Rules of Civil Procedure. Discovery will be served on all parties to the contested case proceeding but not be filed with the board.

506.14(2) Any motion relating to discovery shall allege that the moving party has previously made a good-faith attempt to resolve the discovery issues involved with the opposing party. Motions in regard to discovery will be ruled upon by the presiding officer. Opposing parties will be afforded the opportunity to respond within ten days of the filing of the motion unless the time is shortened as provided by rule. The presiding officer may rule on the basis of the written motion and any response, or may order argument on the motion.

506.14(3) Evidence obtained in discovery may be used in the contested case proceeding if that evidence would otherwise be admissible in that proceeding.

506.14(4) The board's investigative file is available to the respondent or applicant upon request only after the commencement of a contested case and prior to the resolution of the contested case. A licensee who elects to enter into a combined statement of charges and settlement agreement is not entitled to request the investigative file. In accordance with Iowa Code section 272C.6(4), information contained within an investigative file is confidential and may only be used in connection with the disciplinary proceedings.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.15(17A,272C) Subpoenas in a contested case.

506.15(1) Subpoenas issued in a contested case may compel the attendance of witnesses at depositions or hearings and may compel the production of books, papers, records, and other real evidence. A command to produce evidence or to permit inspection may be joined with a command to appear at a deposition or hearing, or may be issued separately. Subpoenas shall be issued by the board administrator or designee upon written request. A request for a subpoena of mental health records must confirm the conditions described in 481—subrule 503.5(1) prior to the issuance of the subpoena.

506.15(2) A request for a subpoena shall include the following information, as applicable, unless the subpoena is requested to compel testimony or documents for rebuttal or impeachment purposes:

a. The name, address and telephone number of the person requesting the subpoena;

b. The name and address of the person to whom the subpoena shall be directed;

c. The date, time, and location at which the person shall be commanded to attend and give testimony;

d. Whether the testimony is requested in connection with a deposition or hearing;

e. A description of the books, papers, records or other real evidence requested;

f. The date, time and location for production, or inspection and copying; and

g. In the case of a subpoena request for mental health records, confirmation that the conditions described in 481—subrule 503.5(1) have been satisfied.

506.15(3) Each subpoena will contain, as applicable:

a. The caption of the case;

b. The name, address and telephone number of the person who requested the subpoena;

c. The name and address of the person to whom the subpoena is directed;

d. The date, time, and location at which the person is commanded to appear;

e. Whether the testimony is commanded in connection with a deposition or hearing;

f. A description of the books, papers, records or other real evidence the person is commanded to produce;

g. The date, time and location for production, or inspection and copying;

h. The time within which a motion to quash or modify the subpoena must be filed;

i. The signature, address and telephone number of the board administrator or designee;

j. The date of issuance; and

k. A return of service.

506.15(4) Unless a subpoena is requested to compel testimony or documents for rebuttal or impeachment purposes, the board administrator or designee will email the subpoena to the requesting party, with a copy to the opposing party. The person who requested the subpoena is responsible for serving the subpoena upon the subject of the subpoena.

506.15(5) Any person who is aggrieved or adversely affected by compliance with the subpoena, or any party to the contested case who desires to challenge the subpoena, must file with the board a motion to quash or modify the subpoena describing the legal reasons why the subpoena should be quashed or modified before the earlier of the date specified for compliance or 14 days after the subpoena is served. The motion may be accompanied by legal briefs or factual affidavits. However, if a subpoena solely requests the production of books, papers, records, or other real evidence and does not also seek to compel testimony, the person who is aggrieved or adversely affected by compliance with the subpoena may alternatively serve written objection on the requesting party before the earlier of the date specified for compliance or 14 days after the subpoena is served. The serving party may then file a motion asking the presiding officer to issue an order compelling production.

506.15(6) Upon receipt of a timely motion to quash or modify a subpoena, the board may request an administrative law judge to issue a decision, or the board may issue a decision. Oral argument may be scheduled at the discretion of the board or the administrative law judge. The administrative law judge or the board may quash or modify the subpoena, deny the motion, or issue an appropriate protective order.

506.15(7) A person aggrieved by a ruling of an administrative law judge who desires to challenge that ruling must appeal the ruling to the board by serving on the board administrator, either in person, by email, or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge.

506.15(8) If the person contesting the subpoena is not a party to the contested case, the board's decision is final for purposes of judicial review. If the person contesting the subpoena is a party to the contested case, the board's decision is not final for purposes of judicial review until there is a final decision in the contested case.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.16(17A) Motions.

506.16(1) Prehearing motions must be in writing, state the grounds for relief, and state the relief sought.

506.16(2) Any party may file a written response to a motion within ten days after the motion is served unless the time period is extended or shortened by the presiding officer. The presiding officer may consider a failure to respond within the required time period in ruling on a motion.

506.16(3) The presiding officer may schedule oral argument on any motion.

506.16(4) Motions pertaining to the hearing must be filed and served at least ten days prior to the date of hearing unless there is good cause for permitting later action or the time for such action is lengthened or shortened by rule of the agency or an order of the presiding officer.

506.16(5) Dispositive motions, such as motions for summary judgment or motions to dismiss, must be filed and served on all parties at least 30 days prior to the scheduled hearing date unless otherwise ordered or permitted by the presiding officer. Any party may file a written response to a dispositive motion within ten days after the motion is served unless the time for response is otherwise lengthened or shortened by the presiding officer.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.17(17A) Prehearing conferences.

506.17(1) A prehearing conference may be ordered by the presiding officer, and any party may request a prehearing conference. Prehearing conferences will be conducted by an administrative law judge. A written request for prehearing conference or an order for prehearing conference on the board administrator's own motion will be filed prior to the contested case hearing, but no later than 20 days prior to the hearing date. Written notice of the prehearing conference will be given by the board administrator to all parties. For good cause the board administrator may permit variances from this rule.

506.17(2) The parties at a prehearing conference shall be prepared to discuss the following subjects, and the administrative law judge may issue appropriate orders concerning:

a. The possibility of settlement.

b. The entry of a scheduling order to include deadlines for completion of discovery.

c. Stipulations of law or fact.

d. Stipulations on the admissibility of exhibits.

e. Submission of expert and other witness lists. Witness lists may be amended subsequent to the prehearing conference within the time limits established by the administrative law judge at the prehearing conference. Any such amendments must be served on all parties. Witnesses not listed on the final witness list may be excluded from testifying unless there was good cause for the failure to include their names.

f. Submission of exhibit lists. Exhibit lists may be amended subsequent to the prehearing conference within the time limits established by the administrative law judge at the prehearing conference. Exhibits other than rebuttal exhibits that are not listed on the final exhibit list may be excluded from admission into evidence unless there was good cause for the failure to include them.

g. Stipulations of any provision of law.

h. Identification of matters that the parties intend to request be officially noticed.

i. Consideration of any additional matters that will expedite the hearing.

506.17(3) Prehearing conferences may be conducted by telephone unless otherwise ordered.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.18(17A) Continuances.

506.18(1) Unless otherwise provided, an application for continuance shall be filed with the board at least seven days before the date scheduled for hearing. If the application for continuance is not contested, the board administrator or designee may issue an order or delegate the matter to an administrative law judge. If the application for continuance is contested, the matter will be heard by the board or may be delegated by the board to an administrative law judge. No continuance shall be granted within seven days of the date of hearing except for extraordinary, extenuating or emergency circumstances.

506.18(2) A written application for a continuance shall:

a. Be made at the earliest possible time and no less than seven working days before the hearing, except in cases of unanticipated emergencies;

b. State the specific reasons for the request; and

c. Be signed by the requesting party or the party's representative.

506.18(3) An oral application for continuance may be made if the board or the presiding officer waives the requirement for a written motion. No application for continuance shall be made or granted without notice to all parties, except in an emergency where notice is not feasible.

506.18(4) The presiding officer may require documentation of any grounds for continuance. In determining whether to grant a continuance, the presiding officer may consider:

a. Prior continuances;

b. The interests of all parties;

c. The public interest;
d. The likelihood of informal settlement;
e. The existence of an emergency;
f. Any objection;
g. Any applicable time requirements;
h. The existence of a conflict in the schedules of counsel, parties, or witnesses;
i. The timeliness of the request; and
j. Other relevant factors.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.19(17A,272C) Hearing procedures.

506.19(1) Hearings are conducted before a quorum of the board or an administrative law judge. With respect to contested cases before the board of medicine, if an insufficient number of board members are available to hear a contested case, the executive director, or designee, may request alternate members as defined in rule 481—650.1(17A,147) and Iowa Code sections 148.2A and 148.7(4) to serve on the hearing panel. A hearing panel must include at least six members, at least half of whom must be current board members and at least half of whom must be licensed to practice medicine under Iowa Code chapter 148.

506.19(2) The presiding officer has the authority to administer oaths, to admit or exclude testimony or other evidence, and to rule on all motions and objections. The board may request that an administrative law judge perform any of these functions and may be assisted and advised by an administrative law judge.

506.19(3) All objections will be timely made and stated on the record.

506.19(4) Parties have the right to participate or to be represented in all hearings or prehearing conferences related to their case.

506.19(5) Subject to terms and conditions prescribed by the presiding officer, parties have the right to introduce evidence on issues of material fact, cross-examine witnesses present at the hearing as necessary for a full and true disclosure of the facts, present evidence in rebuttal, and submit briefs and engage in oral argument. Subject to terms and conditions prescribed by the presiding officer, parties may present the testimony of witnesses by affidavit, by written or video deposition, in person, by telephone, or by videoconference.

506.19(6) The presiding officer maintains the decorum of the hearing and may refuse to admit or may expel anyone whose conduct is disorderly.

506.19(7) Witnesses may be sequestered during the hearing.

506.19(8) The presiding officer has the authority to grant immunity from disciplinary action to a witness as provided by Iowa Code section 272C.6(3).

506.19(9) The presiding officer conducts the hearing in the following manner:

a. The presiding officer gives an opening statement briefly describing the nature of the proceedings;
b. The parties are given an opportunity to present opening statements;
c. The parties present their cases in the sequence determined by the presiding officer;
d. Each witness is sworn or affirmed by the presiding officer or the court reporter and subject to examination and cross-examination. The presiding officer may limit questioning in a manner consistent with law;
e. When all parties and witnesses have been heard, the parties may be given the opportunity to present final arguments.

506.19(10) The board members and the administrative law judge have the right to question a witness. Examination of witnesses is subject to properly raised objections.

506.19(11) The hearing will be open to the public unless the licensee requests that the hearing be closed. At the request of either party, or on the board's own motion, the presiding officer may issue a protective order to protect documents that are privileged or confidential by law.

506.19(12) Contested case hearings shall be recorded by electronic means or by a certified shorthand reporter. A party may request that a hearing be recorded by a certified shorthand reporter instead of through electronic means by filing a request with the board at least 14 days in advance of the hearing. Parties who request that a hearing be recorded by a certified shorthand reporter rather than by electronic means shall bear the cost of the certified shorthand reporter. Upon request, the board shall provide a copy of the whole

or any portion of the record costs. The cost of preparing a copy of the record or of transcribing the hearing record shall be paid by the requesting party. If the request for the hearing record is made as a result of a petition for judicial review, the party who filed the petition shall be considered the requesting party.
[**ARC 9106C**, IAB 4/16/25, effective 3/28/25; Editorial change: IAC Supplement 8/5/26]

481—506.20(17A) Evidence.

506.20(1) The presiding officer rules on admissibility of evidence and may, where appropriate, take official notice of facts in accordance with all applicable requirements of law.

506.20(2) Stipulation of facts is encouraged. The presiding officer may make a decision based on stipulated facts.

506.20(3) Evidence in the proceeding shall be confined to the issues as to which the parties received notice prior to the hearing unless a party waives the party's right to such notice or the presiding officer determines that good cause justifies expansion of the issues. If the presiding officer decides to admit evidence on issues outside the scope of the notice over the objection of a party who did not have actual notice of those issues, that party, upon timely request, will receive a continuance sufficient to amend pleadings and to prepare on the additional issue.

506.20(4) The party seeking admission of an exhibit must provide opposing parties with an opportunity to examine the exhibit prior to the ruling on its admissibility. Copies of documents should normally be provided to opposing parties. All exhibits admitted into evidence will be appropriately marked and be made part of the record.

506.20(5) Any party may object to specific evidence or may request limits on the scope of any examination or cross-examination. Such an objection shall be accompanied by a brief statement of the grounds upon which it is based. The objection, the ruling on the objection, and the reasons for the ruling shall be noted in the record. The presiding officer may rule on the objection at the time it is made or may reserve a ruling until the written decision.

506.20(6) Whenever evidence is ruled inadmissible, the party offering that evidence may submit an offer of proof on the record. The party making the offer of proof for excluded oral testimony shall briefly summarize the testimony or, with permission of the presiding officer, present the testimony. If the excluded evidence consists of a document or exhibit, it shall be marked as part of an offer of proof and inserted in the record.

506.20(7) Irrelevant, immaterial and unduly repetitious evidence should be excluded. A finding will be based upon the kind of evidence upon which reasonably prudent persons are accustomed to rely for the conduct of their serious affairs and may be based on hearsay or other types of evidence that may or would be inadmissible in a jury trial.
[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.21(17A) Default.

506.21(1) If a party fails to appear or participate in a contested case proceeding after proper service of notice, the presiding officer may, if no adjournment is granted, enter a default decision or proceed with the hearing and render a decision in the absence of the party.

506.21(2) Where appropriate and not contrary to law, any party may move for default against a party who has failed to appear after proper service.

506.21(3) Default decisions or decisions rendered on the merits after a party has failed to appear or participate in a contested case proceeding become final agency action unless, within 15 days after the date of notification or mailing of the decision, a motion to vacate is filed and served on all parties or an appeal of a decision on the merits is timely initiated. A motion to vacate must state all facts relied upon by the moving party that establish that good cause existed for that party's failure to appear or participate at the contested case proceeding. Each fact so stated must be substantiated by at least one sworn affidavit of a person with personal knowledge of each such fact, which affidavit(s) must be attached to the motion.

506.21(4) The time for further appeal of a decision for which a timely motion to vacate has been filed is stayed pending a decision on the motion to vacate.

506.21(5) Properly substantiated and timely filed motions to vacate will be granted only for good cause shown. The burden of proof as to good cause is on the moving party. Adverse parties will have ten

days to respond to a motion to vacate. Adverse parties will be allowed to conduct discovery as to the issue of good cause and to present evidence on the issue prior to a decision on the motion, if a request to do so is included in that party's response.

506.21(6) "Good cause" for purposes of this rule shall have the same meaning as "good cause" for setting aside a default judgment under the Iowa Rules of Civil Procedure.

506.21(7) A decision denying a motion to vacate is subject to further appeal within the time limit allowed for further appeal of a decision on the merits in the contested case proceeding. A decision granting a motion to vacate is subject to interlocutory appeal by the adverse party pursuant to rule 481—506.24(17A).

506.21(8) If a motion to vacate is granted and no timely interlocutory appeal has been taken, the presiding officer will issue another notice of hearing and statement of charges and the contested case will proceed accordingly.

506.21(9) A default decision may provide either that the default decision is to be stayed pending a timely motion to vacate or that the default decision is to take effect immediately, subject to a request for stay under rule 481—506.26(17A).

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.22(17A) Ex parte communication.

506.22(1) Unless required for the disposition of ex parte matters specifically authorized by statute, following issuance of the statement of charges and notice of hearing, there will be no communication, directly or indirectly, between the presiding officer and any party or representative of any party or any other person with a direct or indirect interest in such case in connection with any issue of fact or law in the case except upon notice and opportunity for all parties to participate. Nothing in this provision is intended to preclude board members from communicating with other board members or members of the board staff, other than those with a personal interest in, or those engaged in personally investigating, prosecuting, or advocating in, either the case under consideration or a pending factually related case involving the same parties, as long as those persons do not directly or indirectly communicate to the presiding officer any ex parte communications they have received of a type that the presiding officer would be prohibited from receiving or that furnish, augment, diminish, or modify the evidence in the record.

506.22(2) Prohibitions on ex parte communications commence with the issuance of the statement of charges and notice of hearing in a contested case and continue for as long as the case is pending before the board.

506.22(3) Written, oral or other forms of communication are ex parte if made without notice and opportunity for all parties to participate.

506.22(4) To avoid prohibited ex parte communications, notice must be given in a manner reasonably calculated to give all parties a fair opportunity to participate. Notice of written communications will be provided in compliance with rule 481—506.6(17A) and may be supplemented by telephone, facsimile, electronic mail or other means of notification. Where permitted, oral communications may be initiated through conference telephone call, including all parties or their representatives.

506.22(5) Persons who jointly act as presiding officer in a pending contested case may communicate with each other without notice or opportunity for parties to participate.

506.22(6) The board administrator or other persons may be present in deliberations or otherwise advise the presiding officer without notice or opportunity for parties to participate as long as they are not disqualified from participating in the making of a final decision under any provision of law and they comply with this rule.

506.22(7) Communications with the presiding officer involving uncontested scheduling or procedural matters do not require notice or opportunity for parties to participate. Parties should notify other parties prior to initiating such contact with the presiding officer when feasible, and will notify other parties when seeking to continue hearings or other deadlines.

506.22(8) A presiding officer who receives a prohibited ex parte communication during the pendency of a contested case must initially determine if the effect of the communication is so prejudicial that the presiding officer should be disqualified.

a. If the presiding officer determines that disqualification is warranted, a copy of any prohibited written communication, all written responses to the communication, a written summary stating the substance of any prohibited oral or other communication not available in written form for disclosure, all responses made, and the identity of each person from whom the presiding officer received a prohibited ex parte communication will be submitted for inclusion in the record under seal by protective order.

b. If the presiding officer determines that disqualification is not warranted, such documents will be submitted for inclusion in the record and served on all parties. Any party desiring to rebut the prohibited communication must be allowed the opportunity to do so upon written request filed within ten days after notice of the communication.

506.22(9) Promptly after being assigned to serve as presiding officer at any stage in a contested case proceeding, a presiding officer shall disclose to all parties material factual information received through ex parte communication prior to such assignment unless the factual information has already been or shortly will be disclosed pursuant to Iowa Code section 17A.13(2) or through discovery. Factual information contained in an investigative report or similar document need not be separately disclosed by the presiding officer as long as such documents have been or will shortly be provided to the parties.

506.22(10) The presiding officer may render a proposed or final decision imposing appropriate sanctions for violations of this rule, including default, a decision against the offending party, censure, suspension or revocation of the privilege to practice before the agency. Violation of ex parte communication prohibitions by board personnel will be reported to the board and its board administrator for possible sanctions, including censure, suspension, dismissal, or other disciplinary action.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.23(17A) Recording costs. Upon request, the board will provide a copy of the whole or any portion of the record at cost. The cost of preparing a copy of the record or of transcribing the hearing record is paid by the requesting party.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.24(17A) Interlocutory appeals. Upon written request of a party or on its own motion, the board may review an interlocutory order of the board administrator or an administrative law judge. Any request for interlocutory review must be filed within 14 days of issuance of the challenged order, but no later than the time for compliance with the order or the date of hearing, whichever is first. In determining whether to review an interlocutory order, the board will consider:

506.24(1) The extent to which granting the interlocutory appeal would expedite final resolution of the case; and

506.24(2) The extent to which review of that interlocutory order by the board at the time it reviews the proposed decision of the presiding officer would provide an adequate remedy.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.25(17A) Decisions.

506.25(1) *Final decisions.*

a. When a quorum of the board presides over the reception of the evidence at the hearing, its decision is a final decision. A final decision of the board is an open record. Final decisions shall be served on the parties in accordance with rule 481—506.13(17A).

b. A decision of a hearing panel of the board of medicine containing alternate members is considered a final decision of the board in accordance with Iowa Code section 148.2A.

506.25(2) *Proposed decisions.*

a. Panel of specialists for board of medicine. When a panel of three specialists for the board of medicine presides over the hearing, the panel shall issue a proposed decision that includes findings of fact but does not include conclusions of law. A proposed decision of a panel of specialists, together with a transcript of the proceedings and the exhibits presented, shall be reviewed by the board within 30 days of the date of the proposed decision was issued and a final decision issued.

b. Panel of board members or administrative law judge. When a panel of three or more board members or an administrative law judge presides over the hearing, the panel or administrative law judge

shall issue a proposed decision that includes proposed findings of fact, conclusions of law, and an order. A proposed decision shall be reviewed by the board within 30 days of the date of the proposed decision was issued. A proposed decision becomes a final decision without further proceedings unless appealed in accordance with paragraph 506.25(2)*"c."*

c. Appeal of proposed decisions. A proposed decision pursuant to paragraph 506.25(2)*"a"* or *"b"* may be appealed to the full board by either party by serving on the board administrator, either in person, by email or by certified mail, a written notice of appeal within three days after service of the proposed decision on the appealing party.

(1) Following receipt of a notice of appeal, the board will enter an order establishing a schedule for further proceedings, which may include submission of briefs and oral argument. The parties shall serve their briefs on the board and each party.

(2) Oral argument may be heard by the board and may be waived by the parties. The time granted each party for oral argument is established by the board.

(3) The record on appeal includes the entire record made before the presiding officer. Costs associated with the appeal shall be paid by the appealing party.

d. Confidentiality. At no time prior to the release of the final decision by the board shall a proposed decision be made public or distributed to any person other than the parties.

e. Requests to present additional evidence. A party may request the taking of additional evidence after the issuance of a proposed decision only by establishing that:

(1) The evidence is material; and

(2) The evidence arose after the completion of the original hearing; or

(3) Good cause exists for failure to present the evidence at the original hearing; and

(4) The party has not waived the right to present additional evidence.

A written request to present additional evidence must be filed with the notice of appeal or by a nonappealing party within 14 days of service of the notice of appeal. The board may remand a case to the hearing panel or administrative law judge for further hearing or may itself preside at the taking of additional evidence.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.26(17A) Applications for rehearing.

506.26(1) *Who may file.* Any party to a contested case proceeding may file an application for rehearing from a final order. The filing of an application for rehearing is not necessary to exhaust administrative remedies for purposes of judicial review.

506.26(2) *Content of application.* The application for rehearing will state on whose behalf it is filed, the specific grounds for rehearing, and the relief sought. In addition, the application shall state whether the applicant desires reconsideration of all or part of the agency decision on the existing record and whether the applicant requests an opportunity to submit additional evidence.

506.26(3) *Additional evidence.* A request that additional evidence be considered on rehearing is governed by paragraph 506.25(2)*"e."*

506.26(4) *Filing deadline.* The application shall be filed with the board within 20 days after issuance of the final decision.

506.26(5) *Notice to other parties.* A copy of the application shall be timely mailed by the applicant to all parties of record not joining therein.

506.26(6) *Disposition.* Any application for a rehearing is deemed denied unless the agency grants the application within 20 days after its filing.

506.26(7) *Only remedy.* Application for rehearing is the only procedure by which a party may request that the board reconsider a final board decision.

506.26(8) *Proceedings.* If the board grants an application for rehearing, the board may set the application for oral argument or for hearing if additional evidence will be received. If additional evidence will not be received, the board may issue a ruling without oral argument or hearing. The board may, on the request of a party or on its own motion, order or permit the parties to provide written argument on one or more designated issues. The board may be assisted by an administrative law judge in all proceedings related to an application for rehearing.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.27(17A) Stays of agency actions.

506.27(1) *When available.* Any party to a contested case proceeding may petition the board for a stay of an order issued in that proceeding or for other temporary remedies, pending review by the board or pending judicial review. The petition shall state the reasons justifying a stay or other temporary remedy. A party must petition the board for a stay pursuant to this rule prior to requesting a stay from the district court in a judicial review proceeding.

506.27(2) *When granted.* In determining whether to grant a stay, the board will consider the factors listed in Iowa Code section 17A.19(5)*"c."* The board will not grant a stay in any case in which the district court would be expressly prohibited by statute from granting a stay.

506.27(3) *Vacation.* A stay may be vacated by the issuing authority upon application of the board or any other party.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.28(17A) No factual dispute contested cases. If the parties agree that no dispute of material fact exists as to a matter that would be a contested case if such a dispute of fact existed, the parties may present all relevant admissible evidence either by stipulation or otherwise as agreed by the parties, without necessity for the production of evidence at an evidentiary hearing. If such agreement is reached, a jointly submitted schedule detailing the method and timetable for submission of the record, briefs and oral argument should be submitted to the presiding officer for approval as soon as practicable.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.29(17A) Emergency adjudicative proceedings.

506.29(1) *Emergency action.* To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare, and consistent with the Constitution and other provisions of law, the board may issue a written order in compliance with Iowa Code section 17A.18A to suspend a license in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the board by emergency adjudicative order.

506.29(2) *Factors for consideration.* Before issuing an emergency adjudicative order, the board will consider factors, including but not limited to the following:

a. Whether there has been a sufficient factual investigation to ensure that the board is proceeding on the basis of reliable information;

b. Whether the specific circumstances that pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;

c. Whether the person required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;

d. Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and

e. Whether the specific action contemplated by the board is necessary to avoid the immediate danger.

506.29(3) *Issuance of order.*

a. An emergency adjudicative order contains findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the board's decision to take immediate action. The order is a public record.

b. The written emergency adjudicative order will be immediately served upon the person who is required to comply with the order by utilizing one or more of the following procedures:

(1) Personal delivery;

(2) Certified mail, return receipt requested, to the last address on file with the agency;

(3) Certified mail to the last address on file with the agency;

(4) Email to the last email on file with the agency; or

(5) Fax. Fax may be used as the sole method of delivery if the person required to comply with the order has filed a written request that agency orders be sent by fax and has provided a fax number for that purpose.

c. To the degree practicable, the board will select the procedure for providing written notice that best ensures prompt, reliable delivery.

506.29(4) *Oral notice.* Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order is issued, the board will make reasonable immediate efforts to contact by telephone the person who is required to comply with the order.

506.29(5) *Completion of proceedings.* After the issuance of an emergency adjudicative order, the board will proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

a. Issuance of a written emergency adjudicative order will include notification of the date on which board proceedings are scheduled for hearing.

b. After issuance of an emergency adjudicative order, continuance of further board proceedings to a later date will be granted only in compelling circumstances upon application in writing unless the person who is required to comply with the order is the party requesting the continuance.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.30(17A) Appeal. Any appeal to district court from a decision in a contested case will be taken within 30 days from the date of issuance of the decision by the board pursuant to Iowa Code section 17A.19.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.31(272C) Public record. The final decision of the board in a contested case is a public record. The board will report final decisions to the appropriate organizations, which may include but are not limited to the National Practitioner Data Bank and any media or other organizations that have filed a request for public information.

[**ARC 9106C**, IAB 4/16/25, effective 3/28/25]

481—506.32(272C) Reinstatement.

506.32(1) Any person whose license to practice has been revoked or suspended may apply to the board for reinstatement in accordance with the terms and conditions of the order of revocation or suspension unless the order of revocation provides that the license is permanently revoked.

506.32(2) Unless otherwise provided by law, if the order of revocation or suspension did not establish terms and conditions upon which reinstatement might occur, or if the license was voluntarily surrendered, an initial application for reinstatement may not be made until one year has elapsed from the date of the order or the date of the voluntary surrender.

506.32(3) All proceedings for reinstatement will be initiated by the respondent, who will file with the board an application for reinstatement of the license. Such application will be docketed in the original case in which the license was revoked, suspended, or relinquished. All proceedings upon the application for reinstatement will be subject to the same rules of procedure as other cases before the board.

506.32(4) An application for reinstatement will allege facts that, if established, will be sufficient to enable the board to determine that the basis for the revocation, suspension or voluntary surrender of the respondent's license no longer exists and that it will be in the public interest for the license to be reinstated. The burden of proof to establish such facts is on the respondent.

506.32(5) An order of reinstatement will be based upon a decision that incorporates findings of facts and conclusions of law. The order will be published as provided for in this chapter.
