a. The replacement of any sealed source fastened to or contained in a radiographic exposure device and leak testing, repair, tagging, opening, or any other modification of any sealed source shall be performed only by persons specifically authorized to do so by the agency, the U.S. Nuclear Regulatory Commission, or an agreement state.

b. Leak testing requirements.

(1) Each licensee that uses a sealed source shall have the source tested for leakage at intervals not to exceed 6 months. The leak testing of the source must be performed using a method approved by this agency. The wipe sample should be taken from the nearest accessible point to the sealed source where contamination might accumulate. The wipe sample must be analyzed for radioactive contamination. The analysis must be capable of detecting the presence of 0.005 microcuries (185 Bq) of radioactive material on the test sample and must be performed by a person specifically authorized by this agency to perform the analysis.

(2) The licensee shall maintain records of the leak tests results for sealed sources and devices containing depleted uranium (DU). The results must be stated in units of microcuries (becquerels). The licensee shall retain each record for three years after it is made or until the source in storage is removed.

(3) Unless a sealed source is accompanied by a certificate from the transferor that shows that it has been leak tested within 6 months before the transfer, it may not be used by the licensee until tested for leakage. Sealed sources that are in storage and not in use do not require leak testing, but must be tested before use or transfer to another person if the interval of storage exceeds 6 months.

c. Any test conducted under this subrule which reveals the presence of 0.005 microcuries (185 Bq) or more of removable radioactive material must be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw from use the equipment involved and shall have it decontaminated and repaired or disposed of in accordance with agency rules. Within five days after obtaining the results of the test, the licensee shall file a report with the agency describing the equipment involved, the test results, and the corrective action taken.

d. Each exposure device using DU shielding and an "S" tube configuration must be tested for DU contamination at intervals not to exceed 12 months. The analysis must be capable of detecting the presence of 0.005 microcuries (185 Bq) of radioactive material on the test sample and must be performed by a person specifically authorized by the agency to perform the analysis. Should such testing reveal the presence of 0.005 microcuries (185 Bq) or more of removable DU contamination, the exposure

device must be removed from use until an evaluation of the wear on the S-tube has been made. Should the evaluation reveal that the S-tube is worn through, the device may not be used again. DU-shielded devices do not have to be tested for DU contamination while in storage and not in use. Before using or transferring such a device, however, the device must be tested for DU contamination if the interval of storage exceeds 12 months.

e. Each radiographic exposure device shall have permanently attached to it a durable label which has, as a minimum, the instruction: “Danger—Radioactive Material—Do Not Handle—Notify Civil Authorities if Found.”

45.3(6) *Operating and emergency procedures.*

a. The licensee’s operating and emergency procedures shall include instructions in at least the following:

- (1) Handling and use of sources of radiation to be employed such that no individual is likely to be exposed to radiation doses in excess of the limits established in 641—Chapter 40;
- (2) Methods and occasions for conducting radiation surveys;
- (3) Methods for controlling access to radiographic areas;
- (4) Methods and occasions for locking and securing sources of radiation;
- (5) Personnel monitoring and the use of personnel monitoring equipment, including steps that must be taken immediately by radiography personnel in the event a pocket dosimeter is found to be off-scale;
- (6) Transportation to field locations, including packing of sources of radiation in the vehicles, posting of vehicles, and control of sources of radiation during transportation;
- (7) Minimizing exposure of individuals in the event of an accident;
- (8) The procedure for notifying proper personnel in the event of an accident;
- (9) Maintenance of records;
- (10) The inspection and maintenance of radiographic exposure devices, source changers, storage containers, and radiation machines;
- (11) The procedure(s) for identifying and reporting defects and noncompliance in 10 CFR Part 21; and
- (12) Source recovery procedure if the licensee will perform source recovery.

b. Rescinded IAB 4/8/98, effective 7/1/98.

c. Whenever radiography is performed at a location other than a permanent radiographic installation, the radiographer must be accompanied by at least one other qualified radiographer or a radiographer’s assistant. If one of the personnel is a radiographer’s assistant, the other shall be a radiographer trainer authorized by the license. The additional qualified individual shall observe the operations and be capable of providing immediate assistance to prevent unauthorized entry. Radiography shall not be performed if only one qualified individual is present.

d. Collimators shall be used in industrial radiographic operations which use crank-out devices except when physically impossible.

e. All radiographic operations conducted at locations of use authorized on the license must be conducted in a permanent radiographic installation, unless specifically authorized by the agency.

45.3(7) *Radiation surveys and survey records.*

a. No radiographic operation shall be conducted unless calibrated and operable radiation survey instrumentation, as described in 45.1(5), is available and for each exposure device used at each site where radiographic exposures are made.

b. A survey with a calibrated and operable radiation survey instrument shall be made after each radiographic exposure to determine that the sealed source has been returned to its shielded position. The entire circumference of the radiographic exposure device shall be surveyed. If the radiographic exposure device has a source guide tube, the survey shall also include the entire length of the guide tube and collimator. The survey required by this subrule must be done before exchanging films, repositioning the exposure head or dismantling the equipment.

c. (1) All potential radiation areas where industrial radiographic operations are to be performed shall be posted in accordance with 641—40.61(136C), based on calculated dose rates, before industrial radiographic operations begin. An area survey shall be performed during the first radiographic exposure

(i.e., with the sealed source in the exposed position) to confirm that 641—40.61(136C) requirements have been met and that unrestricted areas do not have radiation levels in excess of the limits specified in 641—subrule 40.26(1).

(2) Each time the exposure device is relocated or the exposed position of the sealed source is changed, the requirements of 45.3(7)“c”(1) shall be met.

(3) The requirements of 45.3(7)“c”(2) do not apply to pipeline industrial radiographic operations when the conditions of exposure include, but are not limited to, the radiographic exposure device, duration of exposure, source strength, pipe size, and pipe thickness remain constant.

d. A lock-out survey, in which all accessible surfaces of the radiographic exposure device or source changer are surveyed, shall be made to determine that each sealed source is in its shielded position before securing the radiographic exposure device or source changer.

e. The sealed source shall be secured in its shielded position by locking the radiographic exposure device or source changer each time the sealed source is returned to its shielded position.

f. Each radiographic exposure device and source changer shall be locked and the key removed from any keyed lock prior to being moved or transported from one location to another and also prior to being stored at a given location.

g. If a vehicle is to be used for storage of radioactive material, a vehicle survey shall be performed after securing radioactive material in the vehicle and before transport to ensure that radiation levels do not exceed the limits specified in 641—subrule 40.26(1) at the exterior surface of the vehicle.

h. Surveys shall be performed on storage containers to ensure that radiation levels do not exceed the limits specified in 641—40.15(136C). These surveys shall be performed initially with the maximum amount of radioactive material present in the storage location and thereafter at the time of the quarterly inventory and whenever storage conditions change.

i. A survey meeting the requirements of 45.3(7)“b” shall be performed on the radiographic exposure device and the source changer after every sealed source exchange. A survey shall be made of the storage area as defined in 641—45.2(136C) whenever a radiographic exposure device is being placed in storage.

j. Records shall be kept of the surveys required by 45.3(7)“c,” “d,” “g,” “h,” and “i.” Such records shall be maintained for inspection by the agency for two years after completion of the survey. If the survey was used to determine an individual’s exposure, however, the records of the survey shall be maintained until the agency authorizes their disposition.

45.3(8) Requirements for enclosed radiography.

a. Systems for enclosed radiography, including shielded-room radiography designed to allow admittance of individuals shall comply with all applicable requirements of this chapter.

b. Procedures shall be evaluated at intervals not to exceed one year to ensure compliance with the applicable requirements as specified in 641—subrule 40.26(1). Records of these evaluations shall be maintained for inspection by the agency for a period of two years after the evaluation.

c. Tests for proper operation of high radiation area control devices or alarm systems, where applicable, shall be conducted, recorded, and maintained in accordance with 45.1(9)“b.”

45.3(9) Underwater, offshore platform, and lay-barge radiography.

a. Underwater, offshore platform, or lay-barge radiography shall not be performed unless specifically authorized in a license issued by the agency in accordance with 641—paragraph 39.4(27)“e.”

b. In addition to the other rules of this chapter, the following rules apply to the performance of lay-barge or offshore platform radiography:

(1) Cobalt-60 sources with activities in excess of 20 curies (nominal) and iridium-192 sources with activities in excess of 100 curies (nominal) shall not be used in the performance of lay-barge or offshore platform industrial radiography.

(2) Collimators shall be used for all industrial radiographic operations performed on lay-barge or offshore platforms.

45.3(10) Prohibitions. Industrial radiography performed with a sealed source which is not fastened to or contained in a radiographic exposure device (fishpole technique) is prohibited unless specifically authorized in a license issued by the agency.

45.3(11) Licensing for industrial radiographic operations. Rescinded IAB 4/5/00, effective 5/10/00.

641—45.4(136C) Radiation safety requirements for the use of particle accelerators for nonhuman use.

45.4(1) Purpose and scope.

a. This rule establishes procedures for the registration or licensing and the use of particle accelerators.

b. Unless specifically required otherwise by this rule, all registrants or licensees performing operations with a particle accelerator are subject to the requirements of 641—Chapters 38 to 40 and 641—45.1(136C).

c. The requirements of 45.1(10)“*b*”(2) and (3) and 45.1(10)“*d*”(1)“2” do not apply to nonradiographic uses.

45.4(2) Definitions. For purposes of this subrule, definitions in 641—Chapters 38 and 40 and subrule 45.1(2) may also apply. As used in this rule, the following definitions apply:

“*Cold pasteurization*” means the process of using radiation for destroying disease-causing microorganisms in commercial products.

“*Self-shielded particle accelerator*” means a particle accelerator with the accelerator installed in an enclosure independent of the existing architectural structures except the floor on which it may be placed. The enclosure must have been evaluated by a qualified expert and that evaluation approved by an appropriate regulatory authority through a device evaluation. The self-shielded accelerator is intended to contain at least that portion of material being irradiated, provide radiation attenuation, and exclude personnel from its interior during generation of radiation. A particle accelerator used within a shielded part of a building, or which may temporarily or occasionally incorporate portable shielding, is not a self-shielded particle accelerator.

“*Shielded facility*” means an accelerator facility where shielding is required to be constructed on site in order to assure compliance with the requirements of 641—Chapter 40, or where shielding supplied with the accelerator has been evaluated by qualified experts and that evaluation approved by an appropriate regulatory authority through a device evaluation.

45.4(3) Registration or license requirements. No person shall receive, possess, use, transfer, own, or acquire a particle accelerator except as authorized in a registration or license issued pursuant to 641—39.1(136C) to 39.4(136C) and the following requirements:

a. Accelerator facilities whose operations result in nuclear transformations that produce or are likely to produce radioactive material more than the exempt quantities and concentrations listed in Appendices A and B of 641—Chapter 39 shall be authorized by the issuance of a radioactive material license in accordance with 641—Chapter 39. Accelerator facilities that produce or are likely to produce radioactive material less than the exempt quantities and concentrations shall be authorized by registration.

b. For accelerator facilities required to be licensed in accordance with 45.4(3), those operations that would require personnel monitoring, pursuant to 641—40.37(136C), due to the presence of radioactive material, shall be performed only by a specific licensee. Such operations would normally include installation, testing and maintenance as well as routine operations.

45.4(4) General requirements for the issuance of a registration or license for particle accelerators. Along with the requirements of 641—39.1(136C) to 39.4(136C), an application for use of a particle accelerator will be approved only if the agency determines that:

a. The applicant is qualified by reason of training and experience to use the accelerator in question for the purpose requested in accordance with this rule and 641—Chapter 40 in such a manner as to minimize danger to public health and safety or property;

b. The applicant’s proposed or existing equipment, facilities, and operating and emergency procedures are adequate to protect health and minimize danger to public health and safety or property;

c. The issuance of the registration or license will not be inimical to the health and safety of the public, and the applicant satisfies any applicable special requirement in 45.4(4);

d. The applicant has appointed a radiation safety officer responsible for the day-to-day operation of the radiation safety program;

e. The applicant and the applicant's staff have experience in the use of particle accelerators and training sufficient for application to its intended uses;

f. The applicant has an adequate training program for operators of particle accelerators.

45.4(5) Personnel monitoring. In addition to the requirements of 641—Chapter 40, personnel monitoring shall be provided to and used by all individuals entering any area for which interlocks are required unless a survey of the area has determined that radiation levels are below that of a high radiation area; and

a. Power to an accelerator cannot be activated; or

b. An accelerated beam cannot be directed to the area.

45.4(6) Operations.

a. No registrant shall permit any individual to act as an operator of a particle accelerator until such individual:

(1) Has been instructed in radiation safety and shall have demonstrated an understanding thereof;

(2) Has received copies of and instruction in this rule and the applicable requirements of 641—Chapter 40, pertinent registration and the registrant's operating and emergency procedures, and shall have demonstrated understanding thereof; and

(3) Has demonstrated competence to use the particle accelerator, related equipment, and survey instruments which will be employed.

b. The radiation safety officer or radiation safety committee, if applicable, shall have the authority to terminate the operations at a particle accelerator facility if such action is deemed necessary to minimize danger to public health and safety or property.

c. Along with the audit required in 641—subrule 40.10(3), each operator's performance during an actual accelerator operation shall be audited by the radiation safety officer or designee at intervals not to exceed six months. If an operator has not participated in an accelerator operation for more than six months since the last audit, the individual's performance shall be observed and recorded at the first opportunity the individual participates in an accelerator operation. Records of the audits shall be maintained by the registrant for the agency inspection for three years from the date of the audit.

d. Operators of particle accelerators used for industrial radiography shall meet the requirements of 45.1(10).

45.4(7) Shielding and safety design requirements.

a. A qualified expert acceptable to the agency shall be consulted in the design of a particle accelerator installation and called upon to perform a radiation survey when the accelerator is first capable of producing radiation.

b. Each particle accelerator installation shall be provided with such primary and secondary barriers as are necessary to ensure compliance with 641—40.15(136C) and 641—40.26(136C).

c. In addition to the requirements of 45.4(8) "a" and "b," shielded facilities or self-shielded particle accelerators shall meet the following requirements:

(1) Authorization, by issuance of a construction permit, shall be granted upon a determination of adequacy being made pursuant to the review of an initial application of the shielding design, physical plant, and site specifications, and of the applicant's proposed equipment, uses and workloads. For a shielded facility, the applicant shall submit an evaluation of the shielding design by a qualified expert. For a self-shielded particle accelerator, the applicant need not submit an evaluation of a shielding design if an evaluation by an appropriate regulatory authority has been performed. The applicant may instead reference this evaluation. The applicant shall maintain a copy of the evaluation of shielding design for agency review.

(2) Authorization for installation and testing of an accelerator shall be given only after a determination of adequacy of testing protocols, testing safety procedures, staff training, and radiation detection instrumentation has been made; and

(3) Operational use of an accelerator shall be authorized only after determination of adequacy of the items listed in 45.4(4) has been made by the agency.

45.4(8) Particle accelerator controls and interlock systems.

a. Instrumentation, readouts, and controls on the particle accelerator control console shall be clearly identified, easily discernible and located outside the high radiation area.

b. Each entrance into a target area or other high radiation area shall be provided with two safety interlocks that shut down the machine when the barrier is breached.

c. Each safety interlock shall be on a circuit that allows it to operate independently of all other safety interlocks.

d. All safety interlocks shall be designed so that any defect or component failure in the safety interlock system prevents operation of the accelerator.

e. When a safety interlock system has been tripped, it shall only be possible to resume operation of the accelerator by manually resetting controls at the position where the safety interlock has been tripped and, lastly, at the main control console.

f. A scram button or other emergency power cutoff switch shall be located and easily identifiable in all high radiation areas. Such a cutoff switch shall include a manual reset so that the accelerator cannot be restarted from the accelerator control console without resetting the cutoff switch.

45.4(9) Warning devices.

a. Each location designated as a high radiation area, and each entrance to such location, shall be equipped with easily observable warning lights that operate when, and only when, radiation is being produced.

b. Each high radiation area shall have an audible warning device that shall be activated for 15 seconds prior to the possible creation of such high radiation area. Such warning device shall be clearly discernible in all high radiation areas.

c. Barriers, temporary or otherwise, and pathways leading to high radiation areas shall be posted in accordance with 641—40.61(136C).

45.4(10) Operating and emergency procedures.

a. Particle accelerators, when not in operation, shall be secured to prevent unauthorized use.

b. The safety interlock system shall not be used to turn off the accelerator beam except in an emergency.

c. All safety and warning devices, including interlocks, shall be checked for proper operation intervals not to exceed three months. Results of such tests shall be maintained at the accelerator facility for inspection by the agency for three years.

d. All incidents in which the interlock system fails to operate properly or where the operation is terminated by the interlock system shall be investigated and reported to the radiation safety officer or, if applicable, the radiation safety committee. Documentation shall be maintained for inspection by the agency for three years.

e. If, for any reason, it is necessary to intentionally bypass a safety interlock or interlocks, such action shall be:

- (1) Authorized by the radiation safety officer and, if applicable, the radiation safety committee;
- (2) Recorded in a permanent log and a notice posted at the accelerator control console; and
- (3) Terminated as soon as possible.

f. The registrant's operating and emergency procedures shall include the following:

- (1) Operation and safety instructions on the accelerator(s) to be used;
- (2) Methods for controlling access to restricted areas;
- (3) Methods and occasions for locking and securing sources of radiation;
- (4) Use of personnel monitoring equipment;
- (5) The procedure for notifying proper personnel in the event of an accident;
- (6) Maintenance of records;
- (7) Inspections and maintenance of the accelerator; and
- (8) Steps to be taken in the case of an emergency.

g. A copy of the current operating and emergency procedures shall be maintained at the accelerator control panel.

45.4(11) Radiation monitoring requirements.

a. A radiation protection survey shall be performed and documented by a qualified expert, acceptable to the agency, when changes have been made in shielding, operation, equipment, or occupancy of adjacent areas.

b. Accelerator facilities shall survey with a radiation detection instrument at intervals not to exceed 12 months. Records of this survey shall be maintained for agency review for three years.

c. Accelerator facilities registered or licensed pursuant to 45.4(3) "a" shall survey for removable contamination at intervals not to exceed six months to determine the degree of contamination.

d. Each time removable shields on self-shielded particle accelerators are opened, a visual survey of the shielding must be performed to observe physical damage. In addition, when these shields are returned to the closed position, a physical radiation survey shall be conducted upon initial reactivating of the accelerator. Records of this survey shall be maintained for agency review for three years.

e. Accelerator facilities registered or licensed pursuant to 45.4(3) "a" shall perform a survey with a radiation detection instrument and surveys for removable contamination before maintenance or servicing of its particle accelerator(s) or associated equipment located in the high radiation area.

f. Radiation levels in all high radiation areas shall be continuously monitored. The monitoring devices shall be electrically independent of the accelerator control and safety interlock systems and capable of providing a readout at the control panel.

g. Upon installation, all area monitoring equipment shall be tested to assure proper operation under operating conditions of the particle accelerator. All area monitors shall be calibrated at intervals not to exceed one year and after each servicing and repair.

h. Whenever applicable, accelerator facilities registered or licensed pursuant to 45.4(3) "a" shall perform surveys at intervals not to exceed six months to determine the amount of airborne particulate radioactivity present.

i. All surveys shall be made in accordance with the written procedures established by the radiation safety officer or a qualified expert who is acceptable to the agency.

j. Records of all radiation protection surveys, calibrations, and instrumentation tests shall be maintained at the accelerator facility for inspection by the agency.

45.4(12) Radiation safety officer.

a. Each registrant shall appoint a radiation safety officer that meets the following requirements:

(1) Possesses a high school diploma or a certificate of high school equivalency based on the GED test;

(2) Documents two years of radiation protection experience.

b. The specific duties of the RSO include, but are not limited to, the following:

(1) To establish and oversee operating, emergency, and ALARA procedures and to review them regularly to ensure that the procedures are current and conform with these rules;

(2) To oversee and approve all phases of the training program for accelerator operators so that appropriate and effective radiation protection practices are taught;

(3) To ensure that required radiation surveys are performed and documented in accordance with these rules, including any corrective measures when levels of radiation exceed established limits;

(4) To ensure that personnel monitoring devices are calibrated and used properly by occupationally exposed personnel, that records are kept of the monitoring results, and that timely notifications are made as required by 641—Chapter 40;

(5) To ensure that any required interlock switches and warning signals are functioning and that radiation signs, ropes, and barriers are properly posted and positioned;

(6) To investigate and report to the agency each known or suspected case of radiation exposure to an individual or radiation level detected in excess of limits established by these rules and each theft or loss of source(s) of radiation, to determine the cause, and to take steps to prevent its recurrence;

(7) To have a thorough knowledge of management policies and administrative procedures of the licensee or registrant;

- (8) To assume control and have the authority to institute corrective actions including shutdown of operations when necessary in emergency situations or unsafe conditions;
- (9) To maintain records as required by these rules;
- (10) To ensure the proper storing, labeling, and use of the accelerator;
- (11) To ensure that inspection and maintenance programs are performed in accordance with 45.1(6), 45.1(8), 45.4(10) “c”; and
- (12) To ensure that personnel are complying with these rules and the operating and emergency procedures of the registrant.

641—45.5(136C) Radiation safety requirements for analytical X-ray equipment.

45.5(1) Purpose and scope. This rule provides special requirements for analytical X-ray equipment. The requirements of this rule are in addition to, and not in substitution for, 641—Chapters 38, 39, and 40. The requirements of rules 641—45.1(136C) to 641—45.4(136C) do not apply.

45.5(2) Definitions. For the purpose of this subrule, definitions in 641—Chapter 38 may also apply. As used in this rule, the following definitions apply:

“*Analytical X-ray equipment*” means equipment used for X-ray diffraction or fluorescence analysis.

“*Analytical X-ray system*” means a group of components utilizing X-rays or gamma rays to determine the elemental composition or to examine the microstructure of materials.

“*Fail-safe characteristics*” means a design feature which causes beam port shutters to close, or otherwise prevents emergence of the primary beam, upon the failure of a safety or warning device.

“*Local components*” means part of an analytical X-ray system and includes X-ray areas that are struck by X-rays such as radiation source housings, port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors, and shielding, but does not include power supplies, transformers, amplifiers, readout devices, and control panels.

“*Normal operating procedures*” means step-by-step instructions necessary to accomplish the analysis. These procedures shall include sample insertion and manipulation, equipment alignment, routine maintenance by the registrant or licensee, and data recording procedures, which are related to radiation safety.

“*Open-beam configuration*” means an analytical X-ray system in which an individual could accidentally place some part of his body in the primary beam path during normal operation.

“*Primary beam*” means radiation which passes through an aperture of the source housing by a direct path from the X-ray tube or a radioactive source located in the radiation source housing.

45.5(3) Equipment requirements.

a. Safety device. A device which prevents the entry of any portion of an individual’s body into the primary X-ray beam path or which causes the beam to be shut off upon entry into its path shall be provided on all open-beam configurations. A registrant or licensee may apply to the agency for an exemption from the requirement of a safety device. Such application shall include:

- (1) A description of the various safety devices that have been evaluated;
- (2) The reason each of these devices cannot be used; and
- (3) A description of the alternative methods that will be employed to minimize the possibility of an accidental exposure, including procedures to ensure that operators and others in the area will be informed of the absence of safety devices.

b. Warning devices.

- (1) Open-beam configurations shall be provided with a readily discernible indication of:
 1. X-ray tube “on-off” status located near the radiation source housing, if the primary beam is controlled in this manner; or
 2. Shutter “open-closed” status located near each port on the radiation source housing, if the primary beam is controlled in this manner.
- (2) An easily visible warning light labeled with the words “X-RAY ON,” or words having a similar intent, shall be located:
 1. Near any switch that energizes an X-ray tube and shall be illuminated only when the tube is energized; or

2. In the case of a radioactive source, near any switch that opens a housing shutter and shall be illuminated only when the shutter is open.

(3) Warning devices shall be labeled so that their purpose is easily identified. On equipment installed after the effective date of these rules, warning devices shall have fail-safe characteristics.

c. Ports. Unused ports on radiation source housings shall be secured in the closed position in a manner which will prevent casual opening.

d. Labeling. All analytical X-ray equipment shall be labeled with a readily discernible sign or signs bearing the radiation symbol and the words:

(1) "CAUTION—HIGH INTENSITY X-RAY BEAM," or words having a similar intent, on the X-ray source housing; and

(2) "CAUTION—RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED," or words having a similar intent, near any switch that energizes an X-ray tube if the radiation source is an X-ray tube; or

(3) "CAUTION—RADIOACTIVE MATERIAL," or words having a similar intent, on the source housing in accordance with 641—40.63(136C) if the radiation source is a radionuclide.

e. Shutters. On open-beam configurations, each port on the radiation source housing shall be equipped with a shutter that cannot be opened unless a collimator or a coupling has been connected to the port.

f. Radiation source housing. Each radiation source housing shall be subject to the following requirements:

(1) Each X-ray tube housing shall be equipped with an interlock that shuts off the tube if it is removed from the radiation source housing or if the housing is disassembled.

(2) Each radioactive source housing or port cover or each X-ray tube housing shall be so constructed that, with all shutters closed, the radiation measured at a distance of 5 centimeters from its surface is not capable of producing a dose in excess of 2.5 millirems (0.025 mSv) in one hour. For systems utilizing X-ray tubes, this limit shall be met at any specified tube rating.

g. Generator cabinet. Each X-ray generator shall be supplied with a protective cabinet which limits leakage radiation measured at a distance of 5 centimeters from its surface such that it is not capable of producing a dose in excess of 0.25 millirem (2.5 mSv) in one hour.

45.5(4) Area requirements.

a. Radiation levels. The local components of an analytical X-ray system shall be located and arranged and shall include sufficient shielding or access control such that no radiation levels exist in any area surrounding the local component group which could result in a dose to an individual present therein in excess of the dose limits given in 641—40.26(136C). For systems utilizing X-ray tubes, these levels shall be met at any specified tube rating.

b. Surveys.

(1) Radiation surveys, as required by 641—40.36(136C), of all analytical X-ray systems sufficient to show compliance with 45.5(4) "a" shall be performed:

1. Upon installation of the equipment, and at least once every 12 months thereafter;

2. Following any change in the initial arrangement, number, or type of local components in the system;

3. Following any maintenance requiring the disassembly or removal of a local component in the system;

4. During the performance of maintenance and alignment procedures if the procedures require the presence of a primary X-ray beam when any local component in the system is disassembled or removed;

5. Anytime a visual inspection of the local components in the system reveals an abnormal condition; and

6. Whenever personnel monitoring devices show a significant increase over the previous monitoring period or the readings are approaching the limits specified in 641—40.15(136C).

(2) Radiation survey measurements shall not be required if a registrant or licensee can demonstrate compliance with 45.5(4) "a" to the satisfaction of the agency.

c. Posting. Each area or room containing analytical X-ray equipment shall be conspicuously posted with a sign or signs bearing the radiation symbol and the words “CAUTION—X-RAY EQUIPMENT” or words having a similar intent in accordance with 641—subrule 40.61(1).

45.5(5) Operating requirements.

a. Procedures. Normal operating procedures shall be written and available to all analytical X-ray equipment workers. No individual shall be permitted to operate analytical X-ray equipment in any manner other than that specified in the procedures unless such individual has obtained written approval of the radiation safety officer.

b. Bypassing. No individual shall bypass a safety device or interlock unless such individual has obtained the approval of the radiation safety officer. Such approval shall be for a specified period of time. When a safety device or interlock has been bypassed, a readily discernible sign bearing the words “SAFETY DEVICE NOT WORKING,” or words having a similar intent, shall be placed on the radiation source housing.

c. Repair or modification of X-ray tube systems. Except as specified in 45.5(5) “b,” no operation involving removal of covers, shielding materials or tube housings or modifications to shutters, collimators, or beam stops shall be performed without ascertaining that the tube is off and will remain off until safe conditions have been restored. The main switch, rather than interlocks, shall be used for routine shutdown in preparation for repairs.

d. Radioactive source replacement, testing, or repair. Radioactive source housings shall be opened for source replacement, leak testing, or other maintenance or repair procedures only by individuals authorized to specifically conduct such procedures under a license issued by the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state.

45.5(6) Personnel requirements.

a. Instruction. No individual shall be permitted to operate or maintain analytical X-ray equipment unless such individual has received instruction in and demonstrated competence as to:

- (1) Identification of radiation hazards associated with the use of the equipment;
- (2) Significance of the various radiation warnings, safety devices, and interlocks incorporated into the equipment, or the reasons they have not been installed on certain pieces of equipment and the extra precautions required in such cases;
- (3) Proper operating procedures for the equipment;
- (4) Recognition of symptoms of an acute localized exposure; and
- (5) Proper procedures for reporting an actual or suspected exposure.

b. Personnel monitoring.

- (1) Finger or wrist dosimetry devices shall be provided to and shall be used by:
 1. Analytical X-ray equipment workers using systems having an open-beam configuration and not equipped with a safety device; and
 2. Personnel maintaining analytical X-ray equipment if the maintenance procedures require the presence of a primary X-ray beam when any local component in the analytical X-ray system is disassembled or removed.
- (2) Reported dose values shall not be used for the purpose of determining compliance with 641—subrule 40.2(1) unless evaluated by a qualified expert.

641—45.6(136C) Radiation safety requirements for well-logging, wireline service operations and subsurface tracer studies.

45.6(1) Purpose. This rule establishes radiation safety requirements for using sources of radiation for wireline service operations including mineral-logging, radioactive markers, and subsurface tracer studies. The requirements of this rule are in addition to, and not in substitution for, the requirements of 641—Chapters 38, 39, and 40. The requirements of 641—45.1(136C) to 641—45.5(136C) do not apply.

45.6(2) Scope. This rule applies to all licensees or registrants who use sources of radiation for wireline service operations including mineral-logging, radioactive markers, or subsurface tracer studies.

45.6(3) Definitions. For the purpose of this subrule, the definitions of 641—Chapter 38 may also apply. As used in this rule, the following definitions apply:

“Energy compensation source (ECS)” means a small sealed source, with an activity not exceeding 3.7 MBq (100 microcuries), used within a logging tool, or other tool components, to provide a reference standard to maintain the tool’s calibration when in use.

“Fresh water aquifer” means a geologic formation that is capable of yielding fresh water to a well or spring.

“Injection tool” means a device used for controlled subsurface injection of radioactive tracer material.

“Logging assistant” means any individual who, under the direct supervision of a logging supervisor, handles sealed sources or tracers that are not in logging tools or shipping containers or who performs surveys required by 45.6(22).

“Logging supervisor” means the individual who uses licensed material or provides direct supervision in the use of licensed material at a temporary job site and who is responsible to the licensee for ensuring compliance with the requirements of these rules and the conditions of the license.

“Logging tool” means a device used subsurface to perform well-logging.

“Personal supervision” means guidance and instruction by the logging supervisor who is physically present at the temporary job site, who is in personal contact with logging assistants, and who can give immediate assistance.

“Radioactive marker” means licensed material used for depth determination or direction orientation. For purposes of this rule, this term includes radioactive collar markers and radioactive iron nails.

“Safety review” means a periodic review on radiation safety aspects of well-logging provided by the licensee for its employees. The review may include, as appropriate, the results of internal inspections, new procedures or equipment, accidents or errors that have been observed, and opportunities for employees to ask safety questions.

“Source holder” means a housing or assembly into which a sealed source is placed to facilitate the handling and use of the source in well-logging operations.

“Subsurface tracer study” means the release of unsealed licensed material or a substance labeled with licensed material in a single well for the purpose of tracing the movement or position of the material or substance in the well or adjacent formation.

“Surface casing” for protecting fresh water aquifers means a pipe or tube used as a lining in a well to isolate fresh water aquifers from the well.

“Temporary job site” means a place where licensed materials are present for the purpose of performing well-logging or subsurface tracer studies.

“Tritium neutron generator target source” means a tritium source used within a neutron generator tube to produce neutrons for use in well-logging applications.

“Uranium sinker bar” means a weight containing depleted uranium used to pull a logging tool down toward the bottom of a well.

“Well” means a drilled hole in which well-logging may be performed. As used in this rule, “well” includes drilled holes for the purpose of oil, gas, mineral, groundwater, or geological exploration.

“Well-logging” means all operations involving the lowering and raising of measuring devices or tools which may contain licensed material or are used to detect licensed materials in wells for the purpose of obtaining information about the well or adjacent formations and which may be used in oil, gas, mineral, groundwater, or geological exploration.

“Wireline” means a cable containing one or more electrical conductors which is used to lower and raise logging tools in the well-bore.

“Wireline service operation” means any evaluation or mechanical service which is performed in the well-bore using devices on a wireline.

45.6(4) Agreement with well owner or operator.

a. A licensee may perform well-logging with a sealed source only after the licensee has a written agreement with the employing well owner or operator. This written agreement must identify who will meet the following requirements:

- (1) If a sealed source becomes lodged in the well, a reasonable effort will be made to recover it;

(2) A person may not attempt to recover a sealed source in a manner which, in the licensee's opinion, could result in its rupture;

(3) The radiation monitoring required in 45.6(8) and 45.6(17) will be performed;

(4) If the environment, any equipment, or personnel are contaminated with licensed material, they must be decontaminated before release from the site or release for unrestricted use; and

(5) If the sealed source is classified as irretrievable after reasonable efforts at recovery have been expended, the following requirements must be implemented within 30 days:

1. Each irretrievable well-logging source must be immobilized and sealed in place with a cement plug;

2. There must be a means to prevent inadvertent intrusion on the source, unless the source is not accessible to any subsequent drilling operations; and

3. A permanent identification plaque, constructed of long-lasting material, such as stainless steel, brass, bronze, or Monel, must be mounted at the surface of the well, unless the mounting of the plaque is not practical. The size of the plaque must be at least 17 cm (7 inches) square and 3 mm (1/8-inch) thick. The plaque must contain:

- The word "Caution";
- The radiation symbol (the color requirement in 641—40.60(136C) need not be met);
- The date the source was abandoned;
- The name of the well owner or well operator, as appropriate;
- The well name and well identification number(s) or other designation;
- An identification of the sealed source(s) by radionuclide and quantity;
- The depth of the source and depth to the top of the plug; and
- An appropriate warning such as, "Do not reenter this well."

b. The licensee shall retain a copy of the written agreement for three years after the completion of the well-logging operation.

c. A licensee may apply, pursuant to 641—38.3(136C), for agency approval, on a case-by-case basis, of proposed procedures to abandon an irretrievable well-logging source in a manner not otherwise authorized in 45.6(26) "a"(5).

d. A written agreement between the licensee and the well owner or operator is not required if the licensee and the well owner or operator are part of the same corporate structure or otherwise similarly affiliated. However, the licensee shall still otherwise meet the requirements in 45.6(26) "a"(1) through (5).

45.6(5) Limits on levels of radiation. Sources of radiation shall be used, stored, and transported in such a manner that the transportation requirements of 641—39.5(136C) and the dose limitation requirements of 641—Chapter 40 are met.

45.6(6) Storage precautions.

a. Each source of radiation shall be provided with a storage or transport container. The container shall be provided with a lock, or tamper seal for calibration sources, to prevent unauthorized removal of, or exposure to, the source of radiation.

b. Sources of radiation shall be stored in a manner which will minimize danger from explosion or fire.

45.6(7) Transport precautions. Transport containers shall be physically secured to the transporting vehicle to prevent accidental loss, tampering, or unauthorized removal.

45.6(8) Radiation survey instruments.

a. The licensee or registrant shall maintain sufficient calibrated and operable radiation survey instruments at each field station to make physical radiation surveys as required by this subrule and by 641—40.36(136C). Instrumentation shall be capable of measuring 0.1 milliroentgen (25.8 nanocoulombs/kg) per hour through at least 50 milliroentgens (12.9 microcoulombs/kg) per hour.

b. Each radiation survey instrument shall be calibrated:

- (1) At intervals not to exceed six months and after each instrument servicing;

(2) For linear scale instruments, at two points located approximately 1/3 and 2/3 of full-scale on each scale; for logarithmic scale instruments, at midrange of each decade, and at two points of at least one decade; and for digital instruments, at appropriate points; and

(3) So that accuracy within 20 percent of the true radiation level can be demonstrated on each scale.

c. Calibration records shall be maintained for a period of two years for inspection by the agency.

45.6(9) Leak testing of sealed sources.

a. *Testing and record-keeping requirements.* Each licensee using sealed sources of radioactive material shall have the sources tested for leakage periodically. Records of leak test results shall be kept in units of microcuries (Bq) and maintained for three years after the leak test is performed.

b. *Method of testing.* Tests for leakage shall be performed only by persons specifically authorized to perform such tests by the NRC, an agreement state, or a licensing state. The wipe of a sealed source must be performed using a leak test kit or method approved by the NRC, an agreement state, or a licensing state. The wipe sample must be taken from the nearest assessable point to the sealed source where contamination might accumulate. The test sample shall be analyzed for radioactive contamination, and the analysis shall be capable of detecting the presence of 0.005 microcurie (185 Bq) of radioactive material on the test sample.

c. *Interval of testing.*

(1) Each sealed source of radioactive material (except an energy compensation source (ECS)) shall be tested at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made six months prior to the transfer, the sealed source shall not be put into use until tested. If, for any reason, it is suspected that a sealed source may be leaking, it shall be removed from service immediately and tested for leakage as soon as practical.

(2) Each ECS that is not exempt from testing in accordance with 45.6(9) "c"(1) must be tested at intervals not to exceed three years. In the absence of a certificate from a transferor that a test has been made within the three years before the transfer, the ECS may not be used until tested.

d. *Leaking or contaminated sources.*

(1) If the test in 45.6(9) "c" reveals the presence of 0.005 microcurie (185 Bq) or more of removable radioactive material, the licensee shall immediately withdraw the source from use and shall cause it to be decontaminated, repaired, or disposed of by an NRC, agreement state, or licensing state licensee that is authorized to perform these functions. The licensee shall check the equipment associated with the leaking source for radioactive contamination and, if contaminated, have it decontaminated or disposed of by an NRC, agreement state, or licensing state licensee that is authorized to perform these functions.

(2) A report describing the equipment involved, the test results, any contamination which resulted from the leaking source, and the corrective action taken up to the time of the report shall be filed with the agency within five days of receiving the test results.

e. *Exemptions.* The following sources are exempted from the periodic leak test requirements of 45.6(9) "a" to "d":

- (1) Hydrogen-3 (tritium) sources;
- (2) Sources of radioactive material with a half-life of 30 days or less;
- (3) Sealed sources of radioactive material in gaseous form;
- (4) Sources of beta- or gamma-emitting radioactive material with an activity of 100 microcuries (3.7 MBq) or less; and
- (5) Sources of alpha- or neutron-emitting radioactive material with an activity of 10 microcuries (0.370 MBq) or less.

45.6(10) Quarterly inventory. Each licensee or registrant shall conduct a quarterly physical inventory to account for all sources of radiation. Records of inventories shall be maintained for two years from the date of the inventory for inspection by the agency and shall include the quantities and kinds of sources of radiation, the location where sources of radiation are assigned, the date of the inventory, and the name of the individual conducting the inventory.

45.6(11) Utilization records. Each licensee or registrant shall maintain current records, which shall be kept available for inspection by the agency for two years from the date of the recorded event, showing the following information for each source of radiation:

- a. Make, model number, and a serial number or a description of each source of radiation used;
- b. The identity of the well-logging supervisor or field unit to whom assigned;
- c. Locations where used and dates of use; and
- d. In the case of tracer materials and radioactive markers, the utilization record shall indicate the radionuclide and activity used in a particular well.

45.6(12) Design, performance, and certification criteria for sealed sources used in well-logging operations.

- a. A licensee may use a sealed source for use in well-logging applications if:
 - (1) The sealed source is doubly encapsulated construction;
 - (2) The sealed source contains chemical and physical forms that are as insoluble and nondispersible as practical; and

- (3) The sealed source meets the requirements of 45.6(12)“b,” “c,” and “d.”

- b. For a sealed source manufactured on or before July 14, 1989, a licensee may use the sealed source for use in well-logging applications if it meets the requirements of USASI N5.10-1968, “Classification of Sealed Radioactive Sources,” or the requirements in 45.6(12)“c” or “d.”

- c. For a sealed source manufactured after July 14, 1989, a licensee may use the sealed source for well-logging applications if it meets the oil-well-logging requirements of ANSI/HPS N43.6-1997, “Sealed Radioactive Sources—Classification.”

- d. For a sealed source manufactured after July 14, 1989, a licensee may use the sealed source for use in well-logging applications if the sealed source’s prototype has been tested and found to maintain its integrity after each of the following tests.

- (1) Temperature. The test source must be held at -40 degrees C for 20 minutes, 600 degrees C for one hour, and then be subject to a thermal shock test with a temperature drop from 600 degrees C within 15 seconds.

- (2) Impact test. A 5 kg steel hammer, 2.5 cm in diameter, must be dropped from a height of 1 m onto the test source.

- (3) Vibration test. The test source must be subject to a vibration from 25 Hz to 500 Hz at 5 g amplitude for 30 minutes.

- (4) Puncture test. A one gram hammer and pin, 0.3 cm pin diameter, must be dropped from a height of 1 m onto the test source.

- (5) Pressure test. The test source must be subject to an external pressure of 1.695×10^7 pascals (24,600 pounds per square inch absolute).

- e. The requirements in 45.6(12)“a,” “b,” “c,” and “d” do not apply to sealed sources that contain licensed material in gaseous form.

- f. The requirements of 45.6(12)“a,” “b,” “c,” and “d” do not apply to energy compensation sources (ECS). ECSs must be registered with the NRC, licensing state, or agreement state.

45.6(13) Labeling.

- a. Each source, source holder, or logging tool containing radioactive material shall bear a durable, legible, and clearly visible marking or label, which has, as a minimum, the standard radiation caution symbol, without the conventional color requirement, and the following wording:

DANGER¹
RADIOACTIVE

This labeling shall be on the smallest component transported as a separate piece of equipment.

- b. Each transport container shall have permanently attached to it a durable, legible, and clearly visible label which has, as a minimum, the standard radiation caution symbol and the following wording:

DANGER¹
RADIOACTIVE

NOTIFY CIVIL AUTHORITIES
[OR NAME OF COMPANY]

¹or CAUTION

45.6(14) Inspection and maintenance.

a. Each licensee or registrant shall conduct, at intervals not to exceed six months, a program of inspection and maintenance of source holders, logging tools, source handling tools, storage containers, transport containers, and injection tools to ensure proper labeling and physical condition. Records of inspection and maintenance shall be maintained for a period of two years for inspection by the agency.

b. If any inspection conducted pursuant to 45.6(14) “*a*” reveals damage to labeling or components critical to radiation safety, the device shall be removed from service until repairs have been made.

c. If a sealed source is stuck in the source holder, the licensee shall not perform any operation, such as drilling, cutting, or chiseling, on the source holder unless the licensee is specifically approved by the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state to perform this operation.

d. The repair, opening, or modification of any sealed source shall be performed only by persons specifically authorized to do so by the agency, the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state.

45.6(15) Training requirements.

a. No licensee or registrant shall permit any individual to act as a logging supervisor as defined in this rule until such individual has:

(1) Received, in a course recognized by the agency, the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state, instruction in the subjects outlined in Appendix E of this chapter and demonstrated an understanding thereof;

(2) Read and received instruction in the rules contained in this chapter and the applicable sections of 641—Chapters 38, 39, and 40 or their equivalent, conditions of appropriate license or certificate of registration, and the licensee’s or registrant’s operating and emergency procedures, and demonstrated an understanding thereof; and

(3) Demonstrated competence to use sources of radiation, related handling tools, and radiation survey instruments which will be used on the job.

b. No licensee or registrant shall permit any individual to assist in the handling of sources of radiation until such individual has:

(1) Read or received instruction in the licensee’s or registrant’s operating and emergency procedures and demonstrated an understanding thereof; and

(2) Demonstrated competence to use, under the direct supervision of the logging supervisor, the sources of radiation, related handling tools, and radiation survey instruments which will be used on the job.

c. The licensee or registrant shall maintain employee training records for inspection by the agency for two years following termination of the individual’s employment.

45.6(16) Operating and emergency procedures. Each licensee or registrant shall develop and follow written operating and emergency procedures that cover:

a. The handling and use of sources of radiation, including the use of sealed sources in wells without surface casing for protecting fresh water aquifers, if appropriate;

b. The use of remote handling tools for handling sealed sources and radioactive tracer material except low-activity calibration sources;

c. Methods and occasions for conducting radiation surveys, including surveys for detecting contamination, as required by 45.6(22);

d. Minimizing personnel exposure, including exposures from inhalation and ingestion of licensed tracer materials;

e. Methods and occasions for locking and securing stored licensed or registered materials;

f. Personnel monitoring and the use of personnel monitoring equipment;

g. Transportation of licensed or registered materials to field stations or temporary job sites, packaging of licensed or registered materials for transport in vehicles, placarding of vehicles when needed, and physically securing licensed materials in transport vehicles during transportation to prevent accidental loss, tampering, or unauthorized removal;

h. Picking up, receiving, and opening packages containing licensed or registered materials, in accordance with 641—40.65(136C);

i. For the use of tracers, decontamination of the environment, equipment, and personnel;

j. Maintenance of records generated by well logging personnel at temporary job sites;

k. The inspection and maintenance of sealed sources, source holders, logging tools, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars as required by 45.6(14);

l. Identifying and reporting defects and noncompliance;

m. Actions to be taken if a sealed source is lodged in a well;

n. Notifying proper persons in the event of an accident; and

o. Actions to be taken if a sealed source is ruptured that include actions to prevent the spread of contamination and minimize inhalation and ingestion of licensed materials and actions to obtain suitable radiation survey instruments as required in 45.6(8).

45.6(17) Personnel monitoring.

a. No licensee or registrant shall permit any individual to act as a logging supervisor or to assist in the handling of sources of radiation unless each such individual wears, at all times during the handling of licensed radioactive materials, a film badge, OSL device or thermoluminescent dosimeter (TLD) that is processed and evaluated by an accredited National Voluntary Laboratory Accreditation Program (NVLAP). Each film badge, OSL device or TLD shall be assigned to and worn by only one individual. Film badges must be replaced at least monthly and OSL devices and TLDs replaced at least quarterly. After replacement, each film badge, OSL device or TLD must be promptly processed.

b. The licensee shall provide bioassay services to individuals using licensed materials in subsurface tracer studies if required by the license.

c. Personnel monitoring records and bioassay results shall be maintained for inspection until the agency authorizes disposition.

45.6(18) Security. During each logging or tracer application, the logging supervisor or other designated employee shall maintain direct surveillance of the operation to protect against unauthorized or unnecessary entry into a restricted area, as defined in 641—Chapter 38.

45.6(19) Handling tools. The licensee shall provide and require the use of tools that will ensure remote handling of sealed sources other than low activity calibration sources.

45.6(20) Subsurface tracer studies.

a. Protective gloves and other appropriate protective clothing and equipment shall be used by all personnel handling radioactive tracer material. Precautions shall be taken to avoid ingestion or inhalation of radioactive material.

b. No licensee shall cause the injection of radioactive material into potable aquifers without prior written authorization from the agency and any other appropriate state agency.

45.6(21) Particle accelerators. No licensee or registrant shall permit aboveground testing of particle accelerators, designed for use in well-logging, which results in the production of radiation, except in areas or facilities so controlled or shielded that the requirements of 641—40.15(136C) and 641—40.26(136C), as applicable, are met.

45.6(22) Radiation surveys.

a. Radiation surveys or calculations shall be made and recorded for each area where radioactive materials are used and stored.

b. Radiation surveys shall be made and recorded for the radiation levels in occupied positions and on the exterior of each vehicle used to transport radioactive material. Such surveys shall include each source of radiation or combination of sources to be transported in the vehicle.

c. If the sealed source assembly is removed from the logging tool before departing the job site, the logging tool detector shall be energized, or a survey meter used, to ensure that the logging tool is free of contamination.

d. Radiation surveys shall be made and recorded at the job site or wellhead for each tracer operation, except those using hydrogen-3, carbon-14, and sulfur-35. These surveys shall include measurements of radiation levels before and after the operation.

e. Records required pursuant to 45.6(22)“a” to “d” shall include the dates, the identification of individual(s) making the survey, the identification of survey instrument(s) used, and an exact description of the location of the survey. Records of these surveys shall be maintained for inspection by the agency for two years after completion of the survey.

45.6(23) Documents and records required at field stations. Each licensee or registrant shall maintain, for inspection by the agency, the following documents and records for the specific devices and sources used at the field station:

- a.* Appropriate license, certificate of registration, or equivalent document(s);
- b.* Operating and emergency procedures;
- c.* Applicable regulations;
- d.* Records of the latest survey instrument calibrations pursuant to 45.6(8);
- e.* Records of the latest leak test results pursuant to 45.6(9);
- f.* Records of quarterly inventories required pursuant to 45.6(10);
- g.* Utilization records required pursuant to 45.6(11);
- h.* Records of inspection and maintenance required pursuant to 45.6(14);
- i.* Survey records required pursuant to 45.6(22); and
- j.* Training records required pursuant to 45.6(15).

45.6(24) Documents and records required at temporary job sites. Each licensee or registrant conducting operations at a temporary job site shall have the following documents and records available at that site for inspection by the agency:

- a.* Operating and emergency procedures;
- b.* Survey records required pursuant to 45.6(22) for the period of operation at the site;
- c.* Evidence of current calibration for the radiation survey instruments in use at the site;
- d.* When operating in the state under reciprocity, a copy of the appropriate license, certificate of registration, or equivalent document(s); and
- e.* Shipping papers for the transportation of radioactive material.

45.6(25) Notification of incidents, abandonment, and lost sources.

a. Notification of incidents and sources lost in other than downhole logging operations shall be made in accordance with appropriate provisions of 641—Chapter 40.

b. Whenever a sealed source or device containing radioactive material is lodged downhole, the licensee shall:

(1) Monitor at the surface for the presence of radioactive contamination with a radiation survey instrument or logging tool during logging tool recovery operations; and

(2) Notify the agency immediately by telephone and subsequently, within 30 days, by confirmatory letter if the licensee knows or has reason to believe that a sealed source has been ruptured. This letter shall identify the well or other location, describe the magnitude and extent of the escape of radioactive material, assess the consequences of the rupture, and explain efforts planned or being taken to mitigate these consequences.

c. When it becomes apparent that efforts to recover the radioactive source will not be successful, the licensee shall:

(1) Advise the well operator of the regulations of the appropriate state agency regarding abandonment and an appropriate method of abandonment, which shall include:

1. The immobilization and sealing in place of the radioactive source with a cement plug;
2. The setting of a whipstock or other deflection device; and
3. The mounting of a permanent identification plaque at the surface of the well, containing the appropriate information required by 45.6(25)“d.”

(2) Notify the agency by telephone, giving the circumstances of the loss, and request approval of the proposed abandonment procedures, or specify the implemented abandonment before receiving approval because the licensee believed there was an immediate threat to public health and safety; and

(3) File a written report with the agency within 30 days of the abandonment. The licensee shall send a copy of the report to the appropriate state agency that issued permits or otherwise approved of the drilling operation. The report shall contain the following information:

1. Date of occurrence;
 2. A description of the well-logging source involved, including the radionuclide and its quantity, chemical, and physical form;
 3. Surface location and identification of the well;
 4. Results of efforts to immobilize and seal the source in place;
 5. A brief description of the attempted recovery effort;
 6. Depth of the source;
 7. Depth of the top of the cement plug;
 8. Depth of the well;
 9. The immediate threat to public health and safety justification for implementing abandonment if prior approval was not obtained in accordance with 45.6(25) "c"(2);
 10. Any other information, such as a warning statement, contained on the permanent identification plaque; and
 11. The names of state agencies receiving a copy of this report.
- d.* Whenever a sealed source containing radioactive material is abandoned downhole, the licensee shall provide a permanent plaque² for posting the well or well-bore. This plaque shall:
- (1) Be constructed of long-lasting material, such as stainless steel or Monel; and
 - (2) Contain the following information engraved on its face:
 1. The word "CAUTION";
 2. The radiation symbol without the conventional color requirement;
 3. The date of abandonment;
 4. The name of the well operator or well owner;
 5. The well name and well identification number(s) or other designation;
 6. The sealed source(s) by radionuclide and activity;
 7. The source depth and the depth to the top of the plug; and
 8. An appropriate warning, depending on the specific circumstances of each abandonment.³
- e.* The licensee shall immediately notify the agency by telephone and subsequently by confirming letter if the licensee knows or has reason to believe that radioactive material has been lost in or to an underground potable aquifer. Such notice shall designate the well location and shall describe the magnitude and extent of loss of radioactive material, assess the consequences of such loss, and explain efforts planned or being taken to mitigate these consequences.

45.6(26) Reserved.

45.6(27) *Radioactive markers.* The licensee may use radioactive markers in wells only if the individual markers contain quantities of licensed material not exceeding the quantities specified in 641—Chapter 39, Appendix B, Exempt Quantities. The use of markers is subject only to the requirements of 45.6(10).

45.6(28) *Uranium sinker bars.* The licensee may use uranium sinker bars in well-logging applications only if they are legibly impressed with the words "CAUTION—RADIOACTIVE-DEPLETED URANIUM" and "NOTIFY CIVIL AUTHORITIES [or Company name] IF FOUND."

45.6(29) *Use of a sealed source in a well without a surface casing.* The licensee may use a sealed source in a well without a surface casing for protecting fresh water aquifers only if the licensee follows a procedure for reducing the probability of the source's becoming lodged in the well. The procedure must be approved by the NRC or licensing or agreement state.

45.6(30) *Energy compensation source.* The licensee may use an energy compensation source (ECS) which is contained within a logging tool, or other tool components, only if the ECS contains quantities of licensed material not exceeding 100 microcuries (3.7 MBq).

a. For well-logging applications with a surface casing for protecting fresh water aquifers, use of the ECS is only subject to the requirements of 45.6(9) to 45.6(11).

b. For well-logging applications without a surface casing for protecting fresh water aquifers, use of the ECS is only subject to the requirements of 45.6(4), 45.6(9) to 45.6(11), 45.6(25), and 45.6(29).

45.6(31) *Tritium neutron generator target source.*

a. Use of a tritium neutron generator target source that contains quantities not exceeding 30 curies (1110 MBq) and that is in a well with a surface casing to protect fresh water aquifers is subject to the requirements of this rule except subrules 45.6(4), 45.6(12), and 45.6(25).

b. Use of a tritium neutron generator target source that contains quantities exceeding 30 curies (1110 MBq) or that is in a well without a surface casing to protect fresh water aquifers is subject to the requirements of this rule except subrule 45.6(12).

²An example of a suggested plaque is shown in Appendix F of this chapter.

³Appropriate warnings may include: (a) "Do not drill below plug-back depth"; (b) "Do not enlarge casing"; or (c) "Do not re-enter the hole", followed by the words, "before contacting the Iowa Department of Public Health."

CHAPTER 45—APPENDIX A

SUBJECTS FOR INSTRUCTION OF
RADIOGRAPHER'S ASSISTANTS

Training provided to qualify individuals as radiographer's assistants in compliance with 45.1(10) shall be presented on a formal basis. The training shall include the following subjects:

- I. Fundamentals of radiation safety
 - A. Characteristics of radiation
 - B. Units of radiation dose and quantity of radioactivity
 - C. Significance of radiation dose
 1. Radiation protection standards
 2. Biological effects of radiation
 3. Case histories of radiography accidents
 - D. Levels of radiation from sources of radiation
 - E. Methods of controlling radiation dose
 1. Working time
 2. Working distances
 3. Shielding
- II. Radiation detection instrumentation to be used
 - A. Use of radiation survey instruments
 1. Operation
 2. Calibration
 3. Limitations
 - B. Survey techniques
 - C. Use of personnel monitoring equipment
 1. Film badges
 2. Thermoluminescent dosimeters (TLDs)
 3. Pocket dosimeters
 4. OSL devices
- III. The requirements of pertinent federal and state regulations
- IV. The licensee's or registrant's written operating and emergency procedures
- V. Radiographic equipment to be used
 - A. Remote handling equipment
 - B. Operation and control of radiographic exposure devices and sealed sources, including pictures or models of source assemblies (pigtailed)
 - C. Storage and transport containers, source changers
 - D. Operation and control of X-ray equipment
 - E. Collimators

CHAPTER 45—APPENDIX B

GENERAL REQUIREMENTS FOR INSPECTION OF
INDUSTRIAL RADIOGRAPHIC EQUIPMENT

- I. Panoramic devices (devices in which the sealed source is physically removed from the shielded container during exposure) shall be inspected for:
 - A. Radiographic exposure unit
 - 1. Abnormal surface radiation levels anywhere on camera, collimator, or guide tube;
 - 2. Condition of safety plugs;
 - 3. Proper operation of locking mechanism;
 - 4. Condition of pigtail connector;
 - 5. Condition of carrying device (straps, handle, etc.);
 - 6. Proper labeling.
 - B. Source tube
 - 1. Rust, dirt, or sludge buildup inside the source tube;
 - 2. Condition of source tube connector;
 - 3. Condition of source stop;
 - 4. Kinks or damage that could prevent proper operation;
 - 5. Presence of radioactive contamination.
 - C. Control cables and drive mechanism
 - 1. Proper drive mechanism with camera, as appropriate;
 - 2. Changes in general operating characteristics;
 - 3. Condition of connector on drive cable;
 - 4. Drive cable flexibility, wear, and rust;
 - 5. Excessive wear or damage to crank assembly parts;
 - 6. Damage to drive cable conduit that could prevent the cable from moving easily;
 - 7. Connection of the control cable connector with the pigtail connector for proper mating;
 - 8. Proper operation of source position indicator, if applicable;
 - 9. Presence of radioactive contamination.
- II. Directional beam devices shall be inspected for:
 - A. Abnormal surface radiation;
 - B. Changes in the general operating characteristics of the unit;
 - C. Proper operation of shutter mechanism;
 - D. Chafing or binding of shutter mechanism;
 - E. Damage to the device that might impair its operation;
 - F. Proper operation of locking mechanism;
 - G. Proper drive mechanism with camera, as appropriate;
 - H. Condition of carrying device (strap, handle, etc.);
 - I. Proper labeling.
- III. X-ray equipment shall be inspected for:
 - A. Change in the general operating characteristics of the unit;
 - B. Wear of electrical cables and connectors;
 - C. Proper labeling of console;
 - D. Proper console with machine, as appropriate;
 - E. Proper operation of locking mechanism;
 - F. Timer run-down cutoff;
 - G. Damage to tube head housing that might result in excessive radiation levels.

CHAPTER 45—APPENDIX C

TIME REQUIREMENTS FOR RECORD KEEPING

Specific Section	Name of Record	Time Interval Required for Record Keeping
45.1(4)	Receipt, transfer and disposal.	3 years.
45.1(5)	Survey instrument calibrations.	3 years.
45.1(6)	Quarterly inventory.	3 years.
45.1(7)	Utilization logs.	3 years.
45.1(8)	Quarterly inspection and maintenance.	3 years.
45.1(9)	High radiation area control devices or alarm systems.	Until disposal is authorized by the agency.
45.1(10)	Training and testing records.	3 years.
45.1(12)	Pocket dosimeter readings.	3 years.
	Pocket dosimeter calibrations.	3 years.
	Film badge, OSL device, or TLD reports.	Until the agency terminates the license.
	Alarming ratemeter calibrations.	3 years.
	Alarming ratemeter functions.	3 years.
	Estimates of overexposures.	Until the agency terminates the license.
45.1(19)	Current operating and emergency procedures.	Until the license is terminated.
	Superseded material.	3 years after change.
40.81(1)	Internal audit program.	3 years.
45.1(11)	Radiographer audits.	3 years.
45.2(5) and 45.3(7)	Radiation surveys.	2 years or until disposal is authorized by the agency if a survey was used to determine an individual's exposure.
45.1(16)	Records at temporary job sites.	During temporary job site operations.
45.2(6) and 45.3(8)	Annual evaluation of enclosed X-ray systems.	2 years.
45.3(5)	Leak tests.	3 years.
45.2(6)	Evaluation of certified cabinet X-ray systems.	2 years.

CHAPTER 45—APPENDIX D

OPERATING AND EMERGENCY PROCEDURES

The licensee's or registrant's operating and emergency procedures shall include instructions in at least the following:

- A. Handling and use of sources of radiation for industrial radiography such that no individual is likely to be exposed to radiation doses that exceed the limits established in 641—Chapter 40;
- B. Methods and occasions for conducting radiation surveys, including lock-out survey requirements;
- C. Methods for controlling access to industrial radiography areas;
- D. Methods and occasions for locking and securing sources or radiation;
- E. Personnel monitoring and the use of personnel monitoring equipment, including steps to be taken immediately by industrial radiographic personnel in the event a pocket dosimeter is found to be off-scale;
- F. Methods of transporting equipment to field locations, including packing of sources of radiation in the vehicles, placarding of vehicles, and controlling of sources of radiation during transportation (including applicable U.S. Department of Transportation requirements);
- G. Methods or procedures for minimizing exposure of individuals in the event of an accident, including procedures for a disconnect accident, a transportation accident, and loss of a sealed source;
- H. Procedures for notifying proper personnel in the event of an accident;
- I. Specific posting requirements;
- J. Maintenance of records (Appendix C); and
- K. Inspection and maintenance of radiographic exposure devices, source changers, storage containers, transport containers, source guide tubes, crank-out devices, and radiation machines.

CHAPTER 45—APPENDIX E

SUBJECTS TO BE INCLUDED IN TRAINING COURSES FOR LOGGING SUPERVISORS

- I. Fundamentals of radiation safety.
 - A. Characteristics of radiation.
 - B. Units of radiation dose and quantity of radioactivity.
 - C. Significance of radiation dose.
 - 1. Radiation protection standards.
 - 2. Biological effects of radiation dose.
 - D. Levels of radiation from sources of radiation.
 - E. Methods of minimizing radiation dose.
 - 1. Working time.
 - 2. Working distances.
 - 3. Shielding.
 - F. Radiation safety practices including prevention of contamination and methods of decontamination.
- II. Radiation detection instrumentation to be used.
 - A. Use of radiation survey instruments.
 - 1. Operation.
 - 2. Calibration.
 - 3. Limitations.
 - B. Survey techniques.
 - C. Use of personnel monitoring equipment.
- III. Equipment to be used.
 - A. Handling equipment.
 - B. Sources of radiation.
 - C. Storage and control of equipment.
 - D. Operation and control of equipment.
- IV. The requirements of pertinent federal and state regulations.
 - V. The licensee's or registrant's written operating and emergency procedures.
- VI. The licensee's or registrant's record-keeping procedures.

CHAPTER 45—APPENDIX F

EXAMPLE OF PLAQUE FOR IDENTIFYING WELLS CONTAINING SEALED SOURCES
CONTAINING RADIOACTIVE MATERIAL ABANDONED DOWNHOLE

The size of the plaque should be convenient for use on active or inactive wells, e.g., a 7-inch square. Letter size of the word “CAUTION” should be approximately twice the letter size of the rest of the information, e.g., ½-inch and ¼-inch letter size, respectively.

These rules are intended to implement Iowa Code chapters 136B and 136C.

- [Filed 4/7/80, Notice 2/6/80—published 4/30/80, effective 7/1/80]
- [Filed 5/17/85, Notice 2/27/85—published 6/5/85, effective, see rule 41.7]
- [Filed 11/6/87, Notice 9/23/87—published 12/2/87, effective 1/6/88]
- [Filed 7/17/92, Notice 5/27/92—published 8/5/92, effective 9/9/92]
- [Filed 9/17/93, Notice 8/4/93—published 10/13/93, effective 1/1/94]
- [Filed 7/14/94, Notice 6/8/94—published 8/3/94, effective 9/7/94]
- [Filed 5/15/95, Notice 3/29/95—published 6/7/95, effective 7/12/95]
- [Filed 1/11/96, Notice 10/11/95—published 1/31/96, effective 3/6/96]
- [Filed 9/16/96, Notice 7/17/96—published 10/9/96, effective 11/16/96]
- [Filed 5/16/97, Notice 4/9/97—published 6/4/97, effective 7/9/97]
- [Filed 3/18/98, Notice 1/14/98—published 4/8/98, effective 7/1/98]
- [Filed 4/2/99, Notice 1/13/99—published 4/21/99, effective 7/1/99]
- [Filed 6/25/99, Notice 5/5/99—published 7/14/99, effective 9/15/99]
- [Filed 3/15/00, Notice 1/26/00—published 4/5/00, effective 5/10/00]
- [Filed 3/16/01, Notice 2/7/01—published 4/4/01, effective 5/9/01]
- [Filed 5/10/01, Notice 4/4/01—published 5/30/01, effective 7/4/01]
- [Filed 3/14/02, Notice 2/6/02—published 4/3/02, effective 5/8/02]
- [Filed 11/15/02, Notice 10/2/02—published 12/11/02, effective 1/15/03]
- [Filed 3/14/03, Notice 2/5/03—published 4/2/03, effective 5/7/03]
- [Filed 3/12/04, Notice 2/4/04—published 3/31/04, effective 5/5/04]
- [Filed 3/11/05, Notice 2/2/05—published 3/30/05, effective 5/4/05]
- [Filed 3/9/06, Notice 2/1/06—published 3/29/06, effective 5/3/06]
- [Filed 7/13/07, Notice 6/6/07—published 8/1/07, effective 9/5/07]

CHAPTER 46
MINIMUM REQUIREMENTS FOR TANNING FACILITIES

641—46.1(136D) Purpose and scope. This chapter provides for the permitting and regulation of tanning facilities and devices used for the purpose of tanning human skin through the application of ultraviolet radiation. This includes, but is not limited to, public and private businesses, hotels, motels, apartments, condominiums, and health and country clubs.

All references to Code of Federal Regulations (CFR) in this chapter are those in effect as of April 30, 2007.

These rules stipulate minimum safety requirements relating to the operation of tanning devices; procedures for obtaining a permit; qualifications for tanning facility operators; and procedures for health departments to provide for the inspection of tanning facilities and enforcement of these rules. Tanning facilities which are in compliance with these rules are not relieved from the requirements of any other federal and state regulations or local ordinances.

641—46.2(136D) Definitions.

“Board of health” means a county, city, or district board of health that has a 28E agreement with the Iowa department of public health to perform inspections under this chapter.

“Cleansing” means to remove soil, dirt, oils or other residues from the surface of the tanning unit which may come into contact with the skin.

“Cleansing agent” means a substance capable of producing the effect of “cleansing.” These agents shall not adversely affect the equipment or the health of the consumer and shall be acceptable to the department or board of health.

“Consumer” means any member of the public who is provided access to a tanning facility in exchange for a fee or other compensation, or any individual who, in exchange for a fee or other compensation, is afforded use of a tanning facility as a condition or benefit of membership or access.

“Department” means the Iowa department of public health.

“Director” means the director of public health or the director’s designee.

“Exposure position” means any position, distance, orientation, or location relative to the radiation surfaces of a tanning device at which the user is intended to be exposed to ultraviolet radiation from the product, as recommended by the manufacturer.

“Formal training” means a course of instruction approved by the department for operators of tanning facilities.

“Health care professional” means an individual, licensed by the state of Iowa, who has received formal medical training in the use of phototherapy.

“Inspection” means an official examination or observation including but not limited to tests, surveys, and monitoring to determine compliance with rules, orders, requirements, and conditions of these rules.

“Manufacturer’s recommendations” means written guidelines established by a manufacturer and approved by the U.S. Food and Drug Administration for the installation and operation of the manufacturer’s equipment.

“Operator” means an individual designated to control operation of the tanning facility and to instruct and assist the consumer in the proper operation of the tanning devices.

“Permit” or *“permit to operate”* means a document issued by the department which authorizes a person to operate a tanning facility in Iowa.

“Person” means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this state, any other state or political subdivision or agency thereof, and any legal successor, representative, agent, or agency of the foregoing, but shall not include federal government agencies.

“Phototherapy device” means a piece of equipment that emits ultraviolet radiation and is used by a health care professional in the treatment of disease.

“Tanning device” means any equipment that emits electromagnetic radiation with wavelengths in air between 200 and 400 nanometers and that is used for tanning of human skin, such as sunlamps,

tanning booths, or tanning beds. The terms also include any accompanying equipment such as protective eyewear, timers, and handrails.

“*Tanning facility*” means a place that provides access to tanning devices for compensation.

“*Ultraviolet radiation*” means electromagnetic radiation with wavelengths in air between 200 and 400 nanometers.

641—46.3(136D) Exemptions. The department may, upon application or upon its own initiative, grant exemptions from the requirements of these rules as long as it will not result in undue hazard to public health and safety. The following categories of devices are exempt from the provisions of this chapter:

46.3(1) Other purposes. Devices intended for purposes other than the deliberate exposure of human skin to ultraviolet radiation which produce or emit ultraviolet radiation incidental to their proper operation.

46.3(2) Personal use. Tanning devices which are limited exclusively to personal use by an individual and this individual’s immediate family. Multiple ownership of the device by persons for personal use only does not qualify it for the “personal use only” exemption.

46.3(3) Phototherapy devices. Phototherapy devices used by a properly trained health care professional in the treatment of disease.

641—46.4(136D) Permits and fees.

46.4(1) Permit to operate. No tanning facility shall be operated in the state without having a permit to operate issued by the department.

46.4(2) Application requirements for permit. Each person acquiring or establishing a tanning facility shall:

a. Apply for a permit prior to beginning operation. The application shall be completed on forms provided by the department or board of health and shall contain all information required by the form and accompanying instructions. A nonrefundable application fee of \$5 shall be remitted with the application.

b. A \$15 returned check fee will be charged for each check returned for insufficient funds.

c. The permit holder shall notify the department in writing within 30 days of any changes, additions, or deletions to the initial or renewal application as appropriate. This request does not apply to changes involving replacement of components in tanning equipment.

46.4(3) Expiration of permit. Except as provided in 46.4(4) “*b*,” each permit shall expire at the end of the specified day in the month and year stated therein.

46.4(4) Renewal of permit.

a. Permits shall be renewed annually upon acceptance of a renewal application provided by the department and upon receipt of the renewal fee of \$5.

b. If application has been filed prior to the expiration date of the existing permit, the existing permit shall not expire until the application status has been finally determined by the department.

c. A \$25 fee will be charged per month for failure to pay annual permit fees starting the month of expiration of the facility’s permit to operate. This fee is added to the annual fee not paid.

46.4(5) Transfer or termination of permit.

a. No permit shall be transferable from one person to another or from one tanning facility to another.

b. A permit shall be returned to the department or board of health if the facility ceases business or otherwise ceases on a permanent basis or changes ownership.

46.4(6) Denial, revocation, or termination of permit.

a. The department may deny, suspend or revoke a permit applied for or issued pursuant to this chapter for any of the following reasons:

(1) Submission of false statements in the application for a permit or in any statement of fact required by provisions of this chapter;

(2) Because of conditions revealed by the application or any report, record, inspection or other means which would warrant the department to refuse to grant a permit on an original application;

- (3) Operation of the tanning facility in a manner that causes or threatens to cause hazard to the public health or safety;
- (4) Failure to allow authorized representatives of the department or board of health to enter the tanning facility at reasonable times for the purpose of determining compliance with the provisions of this chapter, conditions of the permit or an order of the department or board of health;
- (5) Failure to pay fees or costs required in rule 46.4(136D);
- (6) Violation of any of the provisions of this chapter or of Iowa Code chapter 136D.
- b.* Except in cases where public health and safety require otherwise, prior to the institution of proceedings for suspension or revocation of a permit, the department or board of health shall:
- (1) Call to the attention of the permit holder, in writing, the facts or conduct which may warrant such actions, and
- (2) Provide opportunity for the permit holder to demonstrate or achieve compliance with all lawful requirements.
- c.* Any person aggrieved by a decision by the department to deny a permit or to suspend or revoke a permit after issuance may request a hearing under procedures established by the department.
- d.* Once a permit to operate has been suspended or revoked, it may be reinstated upon receipt of a fee of \$50 and completion of all other agency requirements. This fee is in addition to other applicable fees.

46.4(7) Inspections.

- a.* Inspections shall be conducted annually.
- b.* Inspection cost.
- (1) An inspection cost of \$33 per tanning device shall be billed to the permit holder up to a maximum of \$330 per facility.
- (2) Inspection costs shall be due upon receipt of payment due. When the tanning facility is located within a contracted area of a board of health, the costs billed will be paid to the contracted board of health or its designee.
- (3) Inspection costs not received within 45 days of the date of billing will be assessed a \$25 penalty for each month or fraction thereof that the bill is delinquent.
- (4) A penalty fee of \$25 per facility may be assessed for the following:
1. Failure to respond to a notice of violation within 30 days of the date of the inspection.
 2. Failure to correct violations cited during the inspection.
- c.* Inspections shall include the following areas: proper operation and maintenance of devices, review of required records and training documentation, operator understanding and competency, and the requirements of these rules.

641—46.5(136D) Construction and operation of tanning facilities. Unless otherwise ordered or approved by the department, each tanning facility shall be constructed, operated, and maintained to meet the following minimum requirements:

46.5(1) A tanning facility shall provide and post the following warning signs and statements that describe the hazards associated with the use of tanning devices:

a. A warning sign in a conspicuous location readily visible to persons entering the establishment. This warning sign shall use 0.5-inch (12.7-millimeter) letters for “DANGER, ULTRAVIOLET RADIATION” and 0.25-inch (6.4-millimeter) letters for all other lettering. The sign shall use red lettering against a white background, be at least 9.0 inches by 12.0 inches (22.9 centimeters × 30.5 centimeters) and have the following wording:

DANGER
 ULTRAVIOLET RADIATION
 — Overexposure can cause

- Eye and skin injury
- Allergic reaction

- Repeated exposure may cause
 - Premature aging of the skin
 - Skin cancer
- Failure to wear protective eyewear may result in
 - Severe burns to eyes
 - Long-term injury to eyes
- Medication or cosmetics may increase your sensitivity

b. A warning sign with the identical wording set forth in 46.5(1)“*a*” posted within one meter of the tanning device in a conspicuous location readily visible to a person preparing to use the device. This warning sign shall use 0.5-inch (12.7-millimeter) letters for “DANGER, ULTRAVIOLET RADIATION” and 0.25-inch (6.4-millimeter) letters for all other lettering. The sign shall use red lettering against a white background and be at least 6 inches by 9 inches (15.2 centimeters × 22.9 centimeters) in size.

c. A tanning facility shall require each consumer to read the information in Appendices 1, 2, and 3 prior to the consumer’s initial exposure and annually thereafter.

(1) The operator shall then require the consumer to sign a statement that the information has been read and understood.

(2) The information in Appendices 1, 2, and 3 shall be posted in each tanning room.

46.5(2) Federal certification.

a. Only tanning devices manufactured and certified under the provisions of 21 CFR Part 1040.20, “Sunlamp products and ultraviolet lamps intended for use in sunlamp products,” shall be used in tanning facilities. Compliance shall be based on the standard in effect at the time of manufacture as shown on the device identification label required by 21 CFR Parts 1010.2 and 1010.3.

b. Labeling shall meet the following requirements, be visible on each unit and be permanently affixed. Labeling shall include:

(1) A warning statement with the words “DANGER-Ultraviolet radiation. Follow instructions. Avoid overexposure. As with natural sunlight, overexposure can cause eye and skin injury and allergic reactions. Repeated exposure may cause premature aging of the skin and skin cancer. WEAR PROTECTIVE EYEWEAR; FAILURE TO MAY RESULT IN SEVERE BURNS OR LONG-TERM INJURY TO THE EYES. Medications or cosmetics may increase your sensitivity to the ultraviolet radiation. Consult a physician before using a sunlamp if you are using medications or have a history of skin problems or believe yourself especially sensitive to sunlight. If you do not tan in the sun, you are unlikely to tan from the use of this product.”

(2) Recommended exposure position(s). Any exposure position may be expressed either in terms of a distance specified both in meters and in feet (or in inches) or through the use of markings or other means to indicate clearly the recommended exposure position.

(3) Directions for achieving the recommended exposure position(s) and a warning that the use of other positions may result in overexposure.

(4) A recommended exposure schedule including duration and spacing of sequential exposures and maximum exposure time(s) in minutes.

(5) A statement of the time it may take before the expected results appear.

(6) Designation of the ultraviolet lamp type to be used in the product.

46.5(3) Tanning device timers.

a. Each tanning device shall have a timer which complies with the requirements of 21 CFR Part 1040.20. The maximum timer interval shall not exceed the manufacturer’s maximum recommended exposure time by a factor greater than ± 10 percent of the indicated setting.

b. Each tanning device must have a method of remote timing located so that consumers may not control their own exposure time.

c. Tokens for token timers shall not be issued to any consumer in quantities greater than the device manufacturer’s maximum recommended exposure time for the consumer.

46.5(4) Each tanning device shall incorporate a control on the product to enable the consumer to manually terminate the radiation emission from the product at any time without disconnecting the electrical source or removing the ultraviolet lamp.

46.5(5) The operator shall ensure that the facility's interior temperature does not exceed 100 degrees F or 38 degrees C.

46.5(6) Condition of tanning devices.

a. There shall be physical barriers to protect consumers from injury induced by falling against or breaking the lamps.

b. The tanning devices shall be maintained in good repair and comply with all state and local electrical code requirements.

46.5(7) Additional requirements for stand-up booths.

a. There shall be physical barriers (e.g., handrails) or other means (floor markings) to indicate the proper exposure distance between ultraviolet lamps and the consumer's skin.

b. The construction of the booth shall be such that it will withstand the stress of use and the impact of a falling person.

c. Access to the booth shall be of rigid construction; doors shall open outwardly. Handrails and nonslip floors shall be provided.

46.5(8) Protective eyewear.

a. Eyewear shall not be reused by another consumer.

b. Protective eyewear shall meet the requirements of 21 CFR Part 1040.20(c)(4).

c. Protective eyewear shall not be altered in any manner that would change its use as intended by the manufacturer (e.g., removal of straps).

d. A tanning facility operator shall not allow a consumer to use a tanning device if that consumer does not use the protective eyewear required by this subrule. To verify that a consumer has the proper eyewear, the operator must:

(1) Ask to see the eyewear before the consumer enters the tanning room; or

(2) Provide disposable eyewear in the tanning room at all times and post a sign stating that the disposable eyewear is available and that eyewear must be worn.

e. A tanning facility operator shall instruct the consumer in the proper utilization of the protective eyewear required by this subrule.

46.5(9) Operation.

a. A trained operator must be present when a tanning device is operated. The operator must be within hearing distance to allow the consumer to easily summon help if necessary. If the operator is not in the immediate vicinity during use, the following conditions must be met:

(1) The consumer can summon help through use of an audible device such as an intercom or buzzer; and

(2) The operator or emergency personnel can reach the consumer within a reasonable amount of time after being summoned.

b. The facility permit to operate shall be displayed in an open public area of the tanning facility.

c. A record shall be kept by the facility operator of each consumer's total number of tanning visits and tanning times, exposure lengths in minutes, times and dates of the exposure, and any injuries or illness resulting from the use of a tanning device.

d. Any tanning injury not requiring a physician's care and any resulting changes in tanning sessions shall be noted in the consumer's file. A written report of any tanning injury requiring a physician's care shall be forwarded by the permit holder to the department within five working days of its occurrence or knowledge thereof. The report shall include:

(1) The name of the affected individual;

(2) The name and location of the tanning facility involved;

(3) The nature of the injury;

(4) The name and address of the health care provider treating the affected individual, if any; and

(5) Any other information considered relevant to the situation.

e. Defective or burned-out lamps or filters shall be replaced with a type intended for use in that device as specified on the product label on the tanning device or with lamps or filters that are “equivalent” under 21 CFR Part 1040, Section 1040.20, and policies applicable at the time of lamp manufacture.

f. The permit holder shall replace ultraviolet lamps and bulbs, which are not otherwise defective or damaged, at such frequency or after such duration of use as may be recommended by the manufacturer of such lamps or bulbs.

g. Contact surfaces of tanning devices shall be:

- (1) Cleansed by the operator with a cleansing agent between each use;
- (2) Covered by a nonreusable protective material during each use; or
- (3) Cleansed by the consumer provided the following conditions are met:

1. The operator instructs the consumer annually on how to properly cleanse the unit;
2. The consumer annually signs a statement stating that the consumer agrees to cleanse the unit after each use;

3. Signs are posted in each tanning room reminding the consumer to cleanse the tanning unit after each use and stating the proper way to cleanse the unit; and

4. The operator cleanses the tanning unit at least once a day.

h. Any records or documentation required by this chapter must be maintained in the tanning facility for a minimum of two years. Records maintained on computer systems shall be regularly copied, at least monthly, and updated on storage media other than the hard drive of the computer. An electronic record must be retrievable as a printed copy.

i. The operator shall limit the exposure of the consumer to the maximum exposure frequency and session duration recommended by the manufacturer.

j. When a tanning device is being used, no other person shall be allowed to remain in the tanning device area.

k. No person or facility shall advertise or promote tanning packages labeled as “unlimited” unless tanning frequency limits set by the manufacturer are included in advertisements.

46.5(10) Training of operators.

a. No individual shall begin functioning as an operator unless the individual has satisfactorily completed a training program. Training shall include but not be limited to:

- (1) The requirements of this chapter;
- (2) Procedures for correct operation of the tanning facility and tanning devices;
- (3) The determination of skin type of consumers and appropriate determination of duration of exposure to tanning devices;
- (4) Recognition of reaction or overexposure;
- (5) Manufacturer’s procedures for operation and maintenance of tanning devices;

b. Owners and managers must complete formal training approved by the department. All owners and managers trained after December 31, 1997, must satisfactorily pass a certification examination approved by the department before operating a tanning facility or training employees.

c. For operators trained after December 31, 1997. Owners and managers are responsible to train operators in the above topics and to provide review as necessary. Training programs shall be approved by the department and include final testing. Operators shall be questioned during inspections as to the level of their understanding and competency in operating the tanning device.

d. Proof of training for both owner/managers and employees must be maintained in the tanning facility and available for inspection. For operators trained after December 31, 1997, the employee record shall be the original test which bears the signature of the employee, the date, and a statement signifying that all answers have been completed by the employee and without prior knowledge of the scoring key.

e. Operators shall be at least 16 years of age.

f. Operators shall complete the required training and testing every five years.

46.5(11) Promotional materials. A tanning facility shall not claim, or distribute promotional materials that claim, that using a tanning device is safe or free from risk or that the use of the device will result in medical or health benefits. The only claim that may be made is that the device is for cosmetic use only.

46.5(12) Requirements for electronically controlled facilities. Electronically controlled facilities are those facilities that rely on electronic means to monitor consumers.

a. Entry into the facility is allowed by card only. Two individuals may not enter under the same card. The card is specifically activated for tanning use if the facility offers other activities.

b. Police and all emergency services will have access to the facility through a key box located outside the entrance of the facility.

c. The tanning unit will not activate if the card is not programmed for tanning. The card will not activate if two individuals are in the tanning room.

d. The consumer must sign a tanning agreement that states the number of minutes per session, that the consumer agrees to wear protective eyewear, that the consumer will cleanse the unit after tanning, and that the consumer is aware of the emergency access in each room.

e. The card will be programmed for the number of minutes the consumer is allowed to tan. The card may be reprogrammed for an increase in minutes per session only after the consumer has reviewed and re-signed the Tanning Agreement. After 30 consecutive days without the consumer's accessing the tanning facility, the card will be deactivated and the consumer must reapply to access the tanning unit.

f. The operator will demonstrate to each consumer how to properly cleanse the unit after tanning, including the top, bottom, and handles. A sign will be placed in each room explaining the cleansing process. The operator will cleanse the units at least once a day when they are in use.

g. Free disposable eyewear will be placed in each room along with a sign stating that the disposable eyewear is available and that eyewear must be worn.

h. An emergency call button or device will be placed in each tanning room conveniently located within reach of the tanning bed. This device will call the operator or emergency personnel.

i. During annual inspections, the inspector may ask any consumer about any of the above processes.

641—46.6(136D) Inspections, violations and injunctions.

46.6(1) The director or an authorized agent shall have access at all reasonable times to any tanning facility to inspect the facility to determine if this chapter is being violated.

46.6(2) A person who operates or uses a tanning device or tanning facility in violation of this chapter or of any rule adopted pursuant to this chapter is guilty of a simple misdemeanor.

46.6(3) If the agency finds that a person has violated, or is violating or threatening to violate, this chapter and that the violation creates an immediate threat to the health and safety of the public, the agency may petition the district court for a temporary restraining order to restrain the violation or threat of violation.

If a person has violated, or is violating or threatening to violate, this chapter, the agency may petition the district court for an injunction to prohibit the person from continuing the violation or threat of violation.

46.6(4) On application for injunctive relief and a finding that a person is violating or threatening to violate this chapter, the district court shall grant any injunctive relief warranted by the facts.

46.6(5) Enforcement.

a. The department shall take the following steps or use county ordinances or any other applicable ordinances, resolutions, rules or regulations when enforcement of these rules is necessary.

(1) Cite each section of the Iowa Code or rules violated.

(2) Specify the manner in which the owner or operator failed to comply.

(3) Specify the steps required for correcting the violation.

(4) Request a corrective action plan, including a time schedule for completion of the plan.

(5) Set a reasonable time limit, not to exceed 30 days from the receipt of the notice, within which the permit holder must respond.

b. The department shall review the corrective action plan and approve it or require that it be modified.

c. In cases where the permit holder fails to comply with conditions of the written notice, the agency shall send a regulatory letter, via certified mail, advising the permit holder that unless action is

taken within five days of receipt, the case shall be turned over to the appropriate state/city/county attorney for court action.

Appendix 1
POTENTIAL PHOTSENSITIZING AGENTS

1. Not all individuals who use or take these agents will experience a photosensitive reaction or the same degree of photosensitive reaction. An individual who experiences a reaction on one occasion will not necessarily experience it again or every time.

2. Names of agents should be considered only as examples. They do not represent all the names under which a product may be sold. A more complete list is available from the facility operator.

3. If you are using an agent in any of these classes, you should reduce UV exposure even if your particular medication is not listed.

Acne treatment (Retinoic acid, Retin-A) Psoralens (5-Methoxypsoralen, 8-Methoxypsoralen, 4,5,8-trimethyl-psoralen)

Antibacterials (deodorant bar soaps, antiseptics, cosmetics, halogenated carbanilides, halogenated phenols, halogenated salicylanilides, bithionol, chlorhexidine, hexachlorophene)

Antibiotics, anti-infectives (Tetracyclines)

Anticonvulsants (carbamazepine, trimethadione, promethazine)

Antidepressants (amitriptyline, Desipramine, Imipramine, Nortriptyline, Protriptyline), Tranquilizers, anti-emetics (Phenothiazines)

Antidiabetics (glucose-lowering agents) (sulfonylureas, oral antidiabetics, hypoglycemics)

Antihistamines (diphenhydramine, promethazine, triprolidine, chlorpheniramine)

Anti-inflammatory (Piroxicam), Non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen, Piroxicam)

Antimicrobials (griseofulvin), Sulfonamides ("Sulfa drugs," antimicrobials, anti-infectives)

Atropine-like drugs (anticholinergics, antiparkinsonism drugs, antispasmodics, synthetic muscle relaxants)

Coal tar and derivatives (Denorex, Tegrin, petroleum products used for psoriasis and chronic eczema and in shampoos)

Contraceptives, oral and estrogens (birth control pills, estrogens, progesterones)

Dyes (used in cosmetic ingredients, acridine, anthracene, cosin (lipstick), erythrosine, fluorescein, methyl violet, methylene blue, rose bengal)

Perfumes and toilet articles (musk ambrette, oil of bergamot, oil of cedar, oil of citron, oil of lavender, oil of lemon, oil of lime, oil of rosemary, oil of sandalwood)

Thiazide diuretics ("water pills")

Appendix 2

SUN-REACTIVE SKIN TYPES USED IN CLINICAL PRACTICE

SKIN TYPE	SKIN REACTIONS TO SOLAR RADIATION (a) EXAMPLES	EXAMPLES
I	Always burns easily and severely (painful burn). Tans little or none and peels.	People most often with fair skin, blue eyes, freckles. Unexposed skin is white.
II	Usually burns easily and severely (painful burn). Tans minimally or lightly, also peels.	People most often with fair skin; red or blonde hair; blue, hazel or even brown eyes. Unexposed skin is white.
III	Burns moderately and tans about average.	Normal average Caucasoid. Unexposed skin is white.
IV	Burns minimally, tans easily, and above average with each exposure. Exhibits IPD (immediate pigment darkening) reaction.	People with white or light brown skin, dark skin, dark brown hair, dark eyes. Unexposed skin is brown.
V	Rarely burns, tans easily and substantially. Always exhibits IPD reaction.	Unexposed skin is brown.
VI	Never burns and tans profusely; exhibits IPD reaction.	Unexposed skin is black.

(a) Based in the first 45-60 minutes (= 2-3 minimum erythema dose) exposure of the summer sun (early June) at sea level

(b) Rescinded IAB 3/29/06, effective 5/3/06.

Appendix 3
 POTENTIAL NEGATIVE HEALTH EFFECTS
 RELATED TO ULTRAVIOLET EXPOSURE

1. Increased risk of skin cancer later in life.
2. Increased risk of skin thickening, age spots, irregular pigmentation, and premature aging.
3. Possibility of burning or rash, especially if using any of the potential photosensitizing drugs and agents. The consumer should consult a physician before using a tanning device if using medications, if there is a history of skin problems or if the consumer is especially sensitive to sunlight.
4. Increased risk of eye damage unless proper eyewear is worn. Iowa law requires the use of proper eyewear during tanning sessions.

TANNING SYSTEMS

1. Low-pressure tanning systems use a higher percentage of UVB rays which penetrate only the upper layer of skin and can cause burning more easily than high-pressure tanning systems. Low-pressure systems require more frequent sessions to maintain a tan. High-intensity tanning systems use more lamps and shorter tanning sessions than low-intensity tanning systems. These are still classified as low-pressure systems.
2. High-pressure tanning systems use a higher percentage of UVA rays which penetrate more deeply and can permanently damage the lower layers of skin and increase the incidences of skin cancers. High-pressure systems require fewer and less frequent sessions to maintain a tan.
3. The exposure schedule for each specific unit is shown on the labeling on the tanning unit. Iowa law requires the operator to limit the exposure of each consumer to the exposure schedule shown on the unit in which the consumer is tanning.

These rules are intended to implement Iowa Code chapter 136D.

CHAPTER 50
ORAL HEALTH

641—50.1(135) Purpose. The purpose of establishing the state public health dental director position and the oral health bureau within the Iowa department of public health is to create a strong oral health unit with sufficient leadership and capacity to determine priorities, develop plans, make funding decisions, and establish policies that improve the oral health of all Iowans. These rules will enhance the efficiency of state government, strengthen relationships with federal and local authorities, and improve interrelationships between the public and private sectors.

641—50.2(135) Definitions. For purposes of this chapter, the following definitions apply:

“Core public health functions” means the functions of health assessment, policy development, and assurance.

1. Assessment: regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets.

2. Policy development: development, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values and is in accordance with state public health policy.

3. Assurance: ensuring, by encouragement, regulation, or direct action, that programs and interventions which maintain and improve health are carried out.

“Dental care for persons with disabilities program” means the department program to provide dental services to low-income children and young adults with special health care needs.

“Dental home” means a network of dental and nondental public and private health care professionals providing individualized care based on risk assessment. Services include oral health education, dental screenings, preventive services, diagnostic services, treatment services, and emergency services. **[See Delay note at end of chapter]**

“Dental sealant program” means the department program implemented through public or private nonprofit agencies to provide dental examinations or screenings and dental sealants to children in a school-based setting.

“Department” means the Iowa department of public health.

“Direct dental services” means those services generally delivered one-on-one between a health professional and a client.

“Enabling services” means services that allow or provide for access to and the derivation of benefits from the array of basic health care services and includes activities such as outreach, case management, health education, transportation, translation, home visits, support services, and other services.

“EPSDT” means the Early and Periodic Screening, Diagnosis, and Treatment program which provides for regular preventive health care services for children aged 0 to 21 as authorized by Title XIX of the Social Security Act.

“Fluoride mouth rinse program” means the department program implemented through elementary schools and middle schools, which includes oral health education and weekly rinsing with fluoride. The program targets schools with children at high risk for tooth decay.

“Gap filling” means direct health services supported by public health staff or resources that are needed but are not otherwise accessible in the community.

“Infrastructure building” means activities directed at improving and maintaining the health status of all clients by providing support for the development and maintenance of comprehensive health service systems, including development and maintenance of health service standards or guidelines, training, data, and planning systems.

“I-Smile program” means the department program implemented through public and private nonprofit agencies and private health care providers to increase access to dental care for children and to ensure a dental home.

“*Medicaid*” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from the United States Department of Health and Human Services.

“*Oral health education*” means information provided by a health professional about dental disease, prevention, and anticipatory guidance, including oral habits, oral development, fluoride exposure, and dietary counseling.

“*Population-based services*” means preventive interventions and personal health services developed for and available to populations of the state rather than for individuals in a one-on-one situation. Disease prevention, health promotion, and statewide outreach are major components.

“*Senior smiles program*” means the department program implemented through public and nonprofit private agencies to provide oral screenings and interventions for older Iowans.

“*Title V*” means Title V of the Social Security Act and the federal requirements contained in the Omnibus Reconciliation Act of 1989 (Public Law 101-239) which address the Maternal and Child Health and Children with Special Health Care Needs programs.

“*Title V maternal and child health program*” means the department program implemented through local public or private nonprofit agencies for the assurance of access to preventive and primary child and maternal health services and services to children with special health care needs in accordance with 641—Chapter 76, Maternal and Child Health Program. Through this program, agencies are responsible for ensuring access to dental services, with an emphasis on early intervention and preventive oral health care beginning at or near the age of 12 months and continuing into adulthood.

“*Title XIX*” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from the United States Department of Health and Human Services.

“*Vulnerable populations*” means individuals and groups whose needs are not addressed by traditional dental service providers and health care systems.

641—50.3(135) Dental director responsibilities. The state public health dental director shall provide overall leadership of the state oral health program and shall be responsible for the following duties:

1. Plan and direct all work activities of the statewide public health dental program.
2. Develop comprehensive initiatives for oral health prevention and improved access to dental care.
3. Evaluate the effectiveness of the statewide public health dental program and of program personnel.
4. Manage the oral health bureau, including direction, supervision, and fiscal management of bureau staff.
5. Represent the department to external stakeholders, including public and private organizations, providers, and the general public.
6. Other related work as required.

641—50.4(135) Oral health bureau functions. The bureau shall be responsible for the core public health functions of assessment, policy development, and assurance of oral health services in Iowa.

50.4(1) Assessment. The bureau shall develop and implement an ongoing oral health surveillance system to evaluate and monitor the oral health status of children and other vulnerable population groups in Iowa. Assessment activities may include the following:

- a. Assess oral health status and needs so that problems can be identified and addressed.
- b. Assess determinants of identified oral health needs, including resources.
- c. Assess the fluoridation status of water systems and other sources of fluoride.
- d. Identify, investigate, and monitor oral health problems and health hazards.

50.4(2) Policy development. The bureau shall facilitate ongoing strategic planning and application of evidence-based research in oral health policy development to improve access to care and the overall oral health of all Iowans. Policy development activities may include the following:

- a.* Develop plans and policies through a collaborative process that supports individual and community oral health efforts to address oral health needs.
- b.* Provide leadership to address oral health problems by maintaining a strong oral health unit within the department.
- c.* Mobilize partnerships with policymakers, professionals, organizations, groups, the public and others to identify and implement solutions to oral health problems.

50.4(3) Assurance. The bureau shall assist Iowans in maintaining optimal oral health throughout all stages of life by providing or ensuring infrastructure-building, population-based, and enabling services at the state and local level. Infrastructure-building and enabling services shall target the improvement of access to dental care and prevention. Population-based services shall include public health training and technical assistance, educational activities that increase oral health awareness, and activities that improve dental support systems for families.

The bureau shall leverage federal, state, and local resources to administer grant programs which include Title V maternal and child health, including the Medicaid and EPSDT programs; I-Smile program; dental sealant program; fluoride mouth rinse program; dental care for persons with disabilities program; senior smiles program; and other new and existing programs. Assurance activities may include the following:

- a.* Provide assistance and resources to local public health programs for community capacity-building efforts to identify vulnerable populations and to develop innovative approaches that link people to needed oral health services, including gap-filling direct dental services.
- b.* Inform, educate, and empower the public regarding oral health problems and solutions.
- c.* Promote and enforce laws and regulations that protect and improve oral health, ensure safety, and assure public accountability for the public's well-being.
- d.* Assure that the public health and personal health workforce has the capacity and expertise to effectively address oral health needs.
- e.* Evaluate the effectiveness, accessibility, and quality of population-based and personal oral health services.
- f.* Conduct research and support projects to gain new insights and promote innovative solutions to oral health problems.

641—50.5(135) Funding. The oral health bureau and the state public health dental director shall be funded through federal Title V funds and state matching funds, state general funds, department of human services funding, and other funds as available.

These rules are intended to implement Iowa Code Supplement sections 135.14 and 135.15.

[Editorial change: IAC Supplement 8/27/08]

[Editorial change: IAC Supplement 11/5/08]

*September 3, 2008, effective date of ARC 7023B [Ch 50] delayed 70 days by the Administrative Rules Review Committee at its meeting held August 12, 2008. At its meeting held October 14, 2008, the Committee delayed the effective date of 641—50.2(135), definition of “Dental home,” until adjournment of the 2009 Session of the General Assembly.

CHAPTER 51
DENTAL SCREENING

641—51.1(82GA,ch146,SF2111) Purpose. The purpose of the dental screening requirement is to improve the oral health of Iowa’s children. Dental screenings will facilitate early detection and referral for treatment of dental disease; reduce the incidence, impact, and cost of dental disease; inform parents and guardians of their children’s dental problems; encourage the establishment of effective oral health practices early in life; promote the importance of oral health as an integral component of preparation for school and learning; and contribute to statewide surveillance of oral health. These rules will enhance the I-Smile dental home concepts of prevention, education, care coordination, and treatment to provide a critical step in closing the gap in access to dental care for underserved children.

641—51.2(82GA,ch146,SF2111) Definitions. For purposes of this chapter, the following definitions apply:

“*Admitting official*” means the superintendent of schools or the superintendent’s designated representative if a public school; if an accredited nonpublic school, the governing official of the school.

“*Applicant*” means any person seeking first-time enrollment in an Iowa elementary school or high school.

“*Dental hygienist*” means a person licensed to practice as a dental hygienist pursuant to Iowa Code chapter 153.

“*Dentist*” means a person licensed to practice as a dentist pursuant to Iowa Code chapter 153.

“*Department*” means the Iowa department of public health.

“*Electronic signature*” means a confidential personalized digital key, code, or number that is used for secure electronic data transmission and that identifies and authenticates the signatory.

“*Elementary school*” means kindergarten, if provided, and grades one through six in an Iowa school district or accredited nonpublic school.

“*High school*” means grades 9 through 12 in an Iowa school district or accredited nonpublic school.

“*Infection or injury*” means soft tissue laceration, bleeding or swelling, or a broken or dislodged tooth.

“*I-Smile*” means the department program designed to increase access to dental care for children and to ensure a dental home.

“*I-Smile coordinator*” means a designated dental hygienist who is employed by or under contract with a local public health agency to administer the I-Smile dental home program.

“*Local board of health*” means a county, city, or district board of health as defined in Iowa Code section 137.2.

“*No obvious problems*” means a child’s hard and soft tissues appear to be visually healthy and there is no apparent reason for the child to be seen before the next routine dental checkup.

“*Nurse*” means a person licensed to practice as a nurse pursuant to Iowa Code chapter 152.

“*Physician*” means a person licensed to practice medicine and surgery or osteopathic medicine and surgery pursuant to Iowa Code chapter 148, 150, or 150A.

“*Physician assistant*” means a person licensed to practice as a physician assistant pursuant to Iowa Code chapter 148C.

“*Requires dental care*” means that tooth decay or a white spot lesion is suspected in one or more teeth.

“*Requires urgent dental care*” means that obvious tooth decay is present in one or more teeth, the child is experiencing pain, or there is evidence of infection or injury.

“*Signature*” means an original signature, or authorized use of stamped signature, or electronic signature of a dentist, dental hygienist, physician, physician assistant, or nurse.

“*Tooth decay*” means a visible cavity or hole in a tooth with brown or black coloration, or a retained root.

“*Transfer student*” means an applicant from an elementary school or a high school outside Iowa who is seeking enrollment in an elementary school or a high school located in Iowa.

“*White spot lesion*” means a demineralized area of a tooth, usually appearing as a chalky, white spot or white line near the gum line. A white spot lesion is considered an early indicator of tooth decay, especially in primary teeth.

641—51.3(82GA,ch146,SF2111) Persons included. The dental screening requirements specified in this chapter apply to all persons newly enrolled or attempting to enroll for the first time in a public or accredited nonpublic elementary school or high school in Iowa.

641—51.4(82GA,ch146,SF2111) Persons excluded. Exclusions to these rules are permitted on an individual basis for religious and financial hardship reasons. Applicants approved for a religious or financial hardship exemption shall submit to the admitting official a valid Iowa department of public health certificate of dental screening exemption.

51.4(1) Religious exemption. A religious exemption may be granted to an applicant if the dental screening conflicts with a genuine and sincere religious belief.

a. The certificate of dental screening exemption for religious reasons shall attest that the dental screening conflicts with a genuine and sincere religious belief and that the belief is in fact religious and not based merely on philosophical, scientific, moral, personal, or medical opposition to dental screenings.

b. The certificate of dental screening exemption for religious reasons shall be signed and dated by the applicant or, if the applicant is a minor, by the parent or guardian.

c. The certificate of dental screening exemption for religious reasons is valid only when notarized.

d. To be valid, the certificate of dental screening exemption for religious reasons shall be the department certificate or a form approved in writing by the department.

51.4(2) Financial hardship exemption. A financial hardship exemption may be granted to an applicant who is unduly burdened by the cost of a dental screening.

a. The certificate of dental screening exemption for financial hardship reasons shall attest that dental screening would cause a genuine financial burden to the applicant.

b. The certificate of dental screening exemption for financial hardship reasons shall be signed and dated by a dentist, dental hygienist, physician, physician assistant, or nurse.

c. The certificate of dental screening exemption for financial hardship reasons shall include the provider type and the provider’s name, business address, and telephone number.

d. To be valid, the certificate of dental screening exemption for financial hardship reasons shall be the department certificate or a form approved in writing by the department.

51.4(3) A faxed copy, photocopy, or electronic copy of the valid certificate of dental screening exemption is acceptable.

641—51.5(82GA,ch146,SF2111) Dental screening components.

51.5(1) A dental screening is a visual assessment and is noninvasive and nondiagnostic.

51.5(2) Dental instrumentation is not required for a dental screening.

51.5(3) A dental screening can identify obvious or suspected oral health conditions that require or that might require examination by a dentist.

51.5(4) The dental screening shall include the following steps:

a. Visual inspection of the soft tissues, including the lips, cheeks, gums, tongue, floor of mouth, and roof of mouth, to assess infection or injury.

b. Visual inspection of all tooth surfaces to assess tooth decay, white spot lesions, or injury.

c. Documentation of the screening and treatment needs according to 51.9(82GA,ch146,SF2111).

641—51.6(82GA,ch146,SF2111) Dental screening providers.

51.6(1) Elementary school. A dental screening for elementary school enrollment shall be performed by a licensed dentist, a licensed dental hygienist, a licensed physician, a licensed physician assistant, or a licensed nurse.

51.6(2) High school. A dental screening for high school enrollment shall be provided by a licensed dentist or a licensed dental hygienist.

641—51.7(82GA,ch146,SF2111) Time line for valid dental screening.

51.7(1) Elementary school. To be valid, a minimum of one dental screening shall be performed on an applicant no earlier than three years of age but prior to reaching six years of age.

51.7(2) High school. To be valid, a minimum of one dental screening shall be performed on an applicant within one year prior to the enrollment date.

51.7(3) A dental screening may also be deemed valid by the department if the department determines that the applicant has substantially complied with the dental screening requirements.

641—51.8(82GA,ch146,SF2111) Proof of dental screening. The applicant or, if a minor, the parent or guardian of a child enrolled in elementary school or high school shall submit a valid Iowa department of public health certificate of dental screening to the admitting official of the school district or accredited nonpublic elementary school in which the applicant wishes to enroll.

51.8(1) To be valid, the certificate of dental screening shall be the department certificate or a form approved in writing by the department.

a. The Certificate of Dental Screening form is available on the department's Web site at http://www.idph.state.ia.us/hpcdp/oral_health.asp or is available by calling the department at (866)528-4020.

b. Elementary school. The certificate of dental screening shall be signed by a dentist, dental hygienist, physician, physician assistant, or nurse.

c. High school. The certificate of dental screening shall be signed by a dentist or dental hygienist.

d. The certificate of dental screening shall include all information required by 51.9(82GA,ch146,SF2111).

51.8(2) A faxed copy, photocopy, or electronic copy of the valid certificate of dental screening is acceptable.

641—51.9(82GA,ch146,SF2111) Dental screening documentation. A person performing a dental screening required by this chapter shall record the following student information on the certificate of dental screening provided or approved in writing by the department of public health in cooperation with the department of education:

1. Name (first and last);
2. Birth date;
3. Parent or guardian name;
4. Telephone numbers (home or mobile);
5. Address (street, city, and county);
6. School;
7. Grade level;
8. Gender;
9. Treatment needs (no obvious problems, requires dental care, requires urgent dental care);
10. Date of dental screening;
11. Provider type;
12. Provider name, business address, and telephone number; and
13. Provider signature.

641—51.10(82GA,ch146,SF2111) Assuring dental screening services. Each public and accredited nonpublic school, in collaboration with the department, shall assure that the parent or guardian of a student enrolled in the school has complied with the dental screening requirement. Parents or guardians of students who do not have a valid certificate of dental screening shall be provided with community dental screening referral resources, including contact information for the I-Smile coordinator, the department, or a dental society.

641—51.11(82GA,ch146,SF2111) Records. It shall be the duty of the admitting official of an elementary school or a high school to ensure that a valid certificate of dental screening or certificate of dental screening exemption is on file for each child enrolled.

51.11(1) The admitting official shall ensure that all certificates of dental screening are properly completed according to 51.8(82GA,ch146,SF2111).

51.11(2) The admitting official shall ensure that all certificates of dental screening exemption are properly completed according to 51.4(1) and 51.4(2).

51.11(3) The admitting official shall keep the certificates of dental screening or certificates of dental screening exemption on file at the school in which the applicant is enrolled and assist the applicant or the applicant's parent or guardian in the transfer of the certificate to another school upon the transfer of the applicant to another school.

51.11(4) The local board of health or its designee, the department of education, and the department or its designee shall have the right to have access to the certificates of dental screening and certificates of dental screening exemption of students enrolled in elementary schools and high schools.

641—51.12(82GA,ch146,SF2111) Reporting.

51.12(1) It shall be the duty of each local board of health or its designee to audit the certificates of dental screening and certificates of dental screening exemption in the schools within the local board's jurisdiction to determine compliance with 2007 Iowa Acts, chapter 146, and 2008 Iowa Acts, Senate File 2111.

51.12(2) By June 30 annually, each local board of health shall furnish the department with evidence for the preceding school year that each child enrolled in any public or accredited nonpublic school within the local board's jurisdiction met the dental screening requirement.

51.12(3) The evidence shall be in the form of a report that includes:

- a. Name of school, and
- b. Enrollments by grade, and
- c. The number of valid certificates of dental screening by grade, and
- d. The number of valid certificates for religious exemptions by grade, and
- e. The number of valid certificates for financial hardship exemptions by grade.

641—51.13(82GA,ch146,SF2111) Iowa's dental screening database. The department may develop and maintain a statewide dental screening database to ensure that students receive the required dental screening and to monitor oral health.

51.13(1) The database may consist of information from the valid certificates of dental screening and certificates of dental screening exemption, including identifying and demographic data.

51.13(2) The database may be updated, at a minimum, annually.

51.13(3) Database reporting shall comply with 51.13(82GA,ch146,SF2111).

51.13(4) Restricted uses of database. The database information shall not be used to:

- a. Market services to students or nonstudents,
- b. Assist in bill collection services, or
- c. Locate or identify students or nonstudents for any purpose other than those expressly provided in this rule.

51.13(5) Confidentiality of database information. Dental screening information, including identifying and demographic data maintained in the database, is confidential and may not be disclosed except under the following limited circumstances:

a. The department may release information from the database to the following:

- (1) The person who received the dental screening or the parent or guardian of the person who received the dental screening;
- (2) Users of the database who complete an agreement with the department that specifies the conditions under which the database can be accessed and who have been issued an identification code or password by the department;

(3) Persons or entities requesting dental screening data in an aggregate form that does not identify an individual either directly or indirectly;

(4) Agencies that complete an agreement with the department which specifies conditions for access to database information and how that information will be used. Agencies shall not use information obtained from the database to market services to students or nonstudents, to assist in bill collection services, or to locate or identify students or nonstudents for any purposes other than those expressly provided in this rule; or

(5) A representative of a state or federal agency, or an entity bound by that state or federal agency, to the extent that the information is necessary to perform a legally authorized function of that agency or the department. The state or federal agency is subject to confidentiality regulations that are the same as or more stringent than those in the state of Iowa. State or federal agencies shall not use information obtained from the database to market services to students or nonstudents, to assist in bill collection services, or to locate or identify students or nonstudents for any purposes other than those expressly provided in this rule.

b. Approved database users shall not release dental screening data except to the person who received the dental screening, the parent or guardian of the person who received the dental screening, health records staff of schools, medical, dental, or health care providers providing continuity of care, and other approved users of the database.

641—51.14(82GA,ch146,SF2111) Release of dental screening information.

51.14(1) *Between a dentist, dental hygienist, physician, physician assistant, or nurse, and the elementary school or high school that the child attends.* A dentist, dental hygienist, physician, physician assistant, or nurse shall disclose a student's dental screening information, including the student's name, date of birth, name of parent or guardian, demographic information, the month, day and year of the screening, and the screening results and treatment needs to an elementary school or a high school upon written or verbal request from the elementary school or high school. Written or verbal permission from a student or the student's parent or guardian is not required to release this information to an elementary school or a high school.

51.14(2) *Among dentists, dental hygienists, physicians, physician assistants, or nurses.* Dental screening information, including the student's name, date of birth, name of parent or guardian, demographic information, the month, day and year of the screening, and the screening results and treatment needs shall be provided by one dentist, dental hygienist, physician, physician assistant, or nurse to another health care provider without written or verbal permission from the student or the student's parent or guardian.

641—51.15(82GA,ch146,SF2111) Referral requirements. Parents or guardians of students who require dental care or require urgent dental care shall be referred to the parent's or guardian's dentist of choice. Students without a dentist or who have difficulty accessing dental care shall be referred to a local I-Smile coordinator or local public health agency for assistance with completion of dental care. This assistance may include locating dentists, scheduling appointments, and identifying payment sources.

641—51.16(82GA,ch146,SF2111) Provider training. For the purpose of quality assurance and consistency, the department shall make training and training materials available for dental screening providers.

These rules are intended to implement 2007 Iowa Acts, chapter 146, and 2008 Iowa Acts, Senate File 2111.

CHAPTER 55
ADVISORY COUNCIL ON HEAD INJURIES
[Prior to 9/30/92, see Persons With Disabilities Division[431] Ch 3]

641—55.1(135) Council established. The advisory council on head injuries, part of the Iowa department of public health, is established pursuant to Iowa Code section 135.22A consisting of a minimum of nine members in addition to the ex officio members. The council shall appoint the chairperson, vice chairperson and secretary of the council. The officers shall serve until their successors are appointed.

641—55.2(135) Meetings. The advisory council on head injuries shall meet at least quarterly. The first regular meeting of the fiscal year is the annual meeting. Upcoming meeting dates are set at regular council meetings. A majority of the members shall constitute a quorum.

All meetings will be held in facilities accessible and functional for people with physical disabilities. A good faith effort will be made to have all written meeting materials available in Braille or on audiotape if requested by people with visual impairments and to provide sign language interpreters for people who are deaf if requests are received within a reasonable time prior to the meeting. Notice of a meeting is published at least 24 hours prior to the meeting and will contain the specific date, time, and place of the meeting. All meetings shall be held in facilities that are accessible to people with physical disabilities. Agendas are available to any interested persons a minimum of five days prior to or at the meeting. If requested, agendas are available in Braille or on audiocassette. All meetings are open to the public unless a closed session is allowed, pursuant to Iowa Code section 21.5, and is voted by two-thirds of the entire membership or by all present. The operation of council meetings will be governed by the following rules of procedure:

55.2(1) Any council member who is unable to attend a meeting will notify the council office; there may not be a meeting if a majority is not present.

55.2(2) When a quorum is present, a position is carried by affirmative vote of a majority of the entire membership of the council.

55.2(3) Persons wishing to make a presentation to the council shall submit the request to the council office not less than 14 days prior to the meeting. Presentations may be made at the discretion of the chair or only upon matters appearing on the agenda.

55.2(4) Persons wishing to submit written materials should do so at least 14 days in advance of the scheduled meeting to ensure that council members have adequate time to receive and evaluate the material.

55.2(5) Special meetings may be called by the chair only upon finding good cause and shall be held in strict accordance with Iowa Code chapter 21. Special meetings may also be called by a majority of the members. A special meeting does not include the task forces; it is an emergency meeting of the council for business that cannot wait until the next regular council meeting.

55.2(6) Cameras and recording devices may be used at open meetings, provided they do not obstruct the meeting. The presiding officer may request a person using such a device to discontinue its use if it is obstructing the meeting. If a person fails to comply with the request, the presiding officer shall order that person excluded from the meeting.

55.2(7) The presiding officer may exclude any person from the meeting for repeated behavior that disrupts or obstructs the meeting.

55.2(8) Instances not covered by these rules shall be governed by Robert's Rules of Order (newly revised).

55.2(9) The council may conduct a meeting by electronic means only in circumstances where such a meeting in person is impossible or impractical, pursuant to Iowa Code section 21.8. Any vote by mail shall have the tabulated results presented at the next regular meeting of the council and the ballots retained for a period of six months for confirmation of results.

641—55.3(135) Task forces. The chair of the council may establish task forces as needed. Task forces may be composed of voting, ex officio, and nonmembers. The task force meetings must be announced at the regular council meetings.

641—55.4(135) Minutes. The council office shall keep minutes of all its meetings showing the date, time, place, members present and the action taken at each meeting. The minutes shall show the results of each vote taken, and the vote of each member present shall be made public at the open session. Approved minutes shall be available at the council office for inspection during regular office hours.

641—55.5(135) Duties of the council. Duties of the council are listed in Iowa Code section 216A.80.

641—55.6(135) Conflict of interest. A conflict of interest exists when members of the council participate in a way that directly affects the personal or financial interests of the council members. In order to avoid conflict of interest problems, council members who have a personal or financial interest in an action must abstain from participating in the entire process which would include both discussion and voting. The council members who have or think they may have a conflict of interest should declare that there is or may be a conflict of interest and request a determination from the council. Where a conflict of interest is determined to exist, council members should abstain from voting and should be recorded as abstaining when votes are taken.

These rules are intended to implement Iowa Code section 135.22A.

[Filed 5/17/91, Notice 4/3/91—published 6/12/91, effective 7/17/91]

CHAPTER 56
BRAIN INJURY SERVICES PROGRAM

641—56.1(135) Definitions. For purposes of this chapter, the following definitions apply:

“Assessment” means the review of the consumer’s current functioning with regard to the consumer’s situation, needs, strengths, abilities, desires and goals.

“Brain injury services waiver” means the state’s medical assistance home- and community-based services waiver for persons with brain injury.

“Consumer” means an individual who has applied for and been found eligible to participate in the waiver-eligible component or the cost-share component of the brain injury services program.

“Cost share” means the portion an individual is responsible to pay for services received by the individual.

“Countable income,” when determining initial and ongoing eligibility for the brain injury services program, means all earned and unearned income, unless specifically exempted in 441—subrule 86.2(2).

“Department” means the Iowa department of public health.

“Family size,” for purposes of establishing initial and ongoing eligibility under the brain injury services program, means all persons living together who are children and who are parents of those children as defined in 441—subrule 86.2(3).

“Program administrator” means the division of behavioral health and professional licensure within the department of public health.

641—56.2(135) Purpose. The purpose of the brain injury services program is to provide services, service funding, or other support for persons with a brain injury under one of the program components established pursuant to Iowa Code section 135.22B. The overall purpose of this chapter is to establish administrative rules in accordance with Iowa Code section 135.22B relative to the financial eligibility requirements for services under the waiver-eligible and cost-share components of the brain injury services program.

641—56.3(135) Waiver-eligible component. Persons eligible for the brain injury services waiver and on the waiting list for the waiver are eligible for the waiver-eligible component. The brain injury services program may provide funding for the nonfederal share of the cost of services if the appropriation for the medical assistance program does not have sufficient funding designated to do so.

56.3(1) Provision of funding under this component is not an entitlement and is subject to funding availability.

56.3(2) A person who receives support under the waiver-eligible component of the brain injury services program is not eligible to receive support under the cost-share component of the program.

641—56.4(135) Cost-share component. Persons determined ineligible for the brain injury services waiver, due to fiscal or functional criteria, or persons who are eligible for the waiver but for whom funding was not authorized or available to provide waiver eligibility are eligible for the cost-share component of the brain injury services program.

56.4(1) An individual must meet all of the following requirements:

- a. The individual is aged one month through 64 years.
- b. The individual has a diagnosed brain injury as defined in Iowa Code section 135.22.
- c. The individual is a resident of Iowa and either a United States citizen or a qualified alien as defined in 8 U.S.C. Section 1641.
- d. The individual must meet the cost-share component’s financial eligibility requirements and be willing to pay a cost share for the cost-share component.

56.4(2) Cost-share financial eligibility. Countable income shall be used when determining initial and ongoing eligibility for the program. All of the following criteria must be met.

- a. Individuals who are at 300 percent or below the federal poverty level for a family of the same size will not be assessed a cost share.

b. Individuals whose countable income is between 301 percent and 350 percent of the federal poverty level for a family of the same size will be assessed a 10 percent cost share for services that will be payable to the service provider.

c. Individuals whose countable income is between 351 percent and 400 percent of the federal poverty level for a family of the same size will be assessed a 20 percent cost share for services that will be payable to the service provider.

d. Individuals whose countable income is above 400 percent of the federal poverty level for a family of the same size will be assessed a 30 percent cost share for services that will be payable to the service provider.

56.4(3) The cost-share component must be the source of last resort for payment; the program shall not pay for services when the provision of those services is mandated by law or administrative rule to be the responsibility of another governmental unit, private agency or program. Brain injury cost-share services are not available to an individual who receives services or funding under any type of medical assistance home- and community-based services waiver.

641—56.5(135) Application process.

56.5(1) The applicant must authorize the department of human services to provide the applicant's brain injury services waiver application materials to the brain injury services program.

56.5(2) The department of human services will provide the department the application materials, which shall include but are not limited to the waiver application and any denial letter, financial assessment, and functional assessment regarding the person in an agreed-upon format.

56.5(3) The department will determine eligibility within 45 days of receipt of complete application materials.

a. After determining if the applicant's service needs fit within the scope of the brain injury services program, the department shall inform the discharge planner or case manager on behalf of the applicant or the applicant's legal representative of the applicant's eligibility.

b. The case manager shall establish an interdisciplinary team for each consumer and, with the team, identify the consumer's plan based on the consumer's needs and desires as well as the availability and appropriateness of services. The case manager shall notify the department of the service plan.

c. The date of eligibility for applicants deemed eligible for the cost-share component will be the date when both the service eligibility and financial eligibility assessments have been completed.

d. Notification of eligibility shall be mailed or given to the applicant or the applicant's legal representative within seven days of the date eligibility determination is completed.

56.5(4) After determining an applicant's eligibility, if no payment slot is available, the brain injury services program shall enter the applicant on a waiting list according to the following:

a. The date a completed Form 470-2927 or 470-2927(S), Health Services Application, is date-stamped in the county department of human services office. If more than one application is received on the same date, applicants shall be entered on the waiting list on the basis of the applicant's month of birth, with January designated as month one.

b. As slots become available, applicants shall be selected from the waiting list based on their order on the waiting list to maintain the number of persons approved for participation in the program.

56.5(5) The consumer or the consumer's legal representative shall complete and sign Iowa department of human services Form 470-3349, Brain Injury Functional Assessment, indicating the consumer's choice of caregiver.

56.5(6) The case manager for the consumer will initiate development of the consumer's service plan and commencement of services. All service plans must be approved by the program administrator.

56.5(7) The department will not pay the cost of services provided to a consumer prior to approval of eligibility.

56.5(8) The program administrator shall make the final determination as to whether program funding will be authorized under the cost-share component.

641—56.6(135) Service providers and reimbursement.

56.6(1) A service provider must either be certified to provide services under the brain injury services waiver or have a contract with a county to provide services and apply to become certified to provide services under the brain injury services waiver within 90 days of the date that services commence.

56.6(2) The reimbursement rate payable for the cost of a service provided under the cost-share component is the rate payable under the medical assistance program. However, if the service provider does not have a medical assistance program reimbursement rate, the rate shall be the amount payable under the county contract.

56.6(3) All service providers must contract with the department and will be paid retroactively to the date of service eligibility.

56.6(4) Service providers will be responsible for billing and collection of any cost share from an individual as determined by the program administrator within the department.

641—56.7(135) Available services/service plan.

56.7(1) Services available shall be consistent with the services offered through the Medicaid home- and community-based services waiver.

56.7(2) Service plans must reflect use of all services, including non-cost-shared services, to ensure that no duplication of services occurs.

56.7(3) All service plans must be submitted, either electronically or in hard-copy format, to the program administrator for approval prior to implementation.

56.7(4) Any change to the service plan must be approved by the program administrator.

641—56.8(135) Redetermination.

56.8(1) A complete financial redetermination of continuing eligibility for the brain injury services program shall be completed annually by the department, after consultation with the case manager and the interdisciplinary team.

56.8(2) A redetermination of continuing eligibility shall also be made when a change in financial or functional circumstances occurs that affects eligibility.

641—56.9(135) Appeal rights. Appeal rights for any individual denied funding under either the waiver-eligible or the cost-share component of the program are as defined in 641—176.8(135,17A) with the following exception: An appeal must be submitted within 45 days of receipt of notification of an adverse decision.

These rules are intended to implement Iowa Code section 135.22B.

CHAPTER 67
BLOOD LEAD TESTING

641—67.1(135) Purpose. The purpose of the blood lead testing requirement is to improve the health of Iowa's children. Blood lead testing will facilitate early detection and referral for treatment of lead poisoning; reduce the incidence, impact, and cost of lead poisoning; inform parents and guardians of their children's exposure to lead; promote the importance of reducing exposure to lead as an integral component of preparation for school and learning; and contribute to statewide surveillance of childhood lead poisoning.

641—67.2(135) Definitions. For purposes of this chapter, the following definitions apply:

"Applicant" means any person seeking first-time enrollment in kindergarten in a public or accredited nonpublic elementary school in Iowa.

"Blood lead database" means the database maintained by the department that includes the results of all blood lead testing reported to the department as required by 641—Chapter 1.

"Blood lead testing" means taking a capillary or venous sample of blood and sending it to a laboratory to determine the level of lead in the blood.

"Capillary" means a blood sample taken from the finger or heel for lead analysis.

"Department" means the Iowa department of public health.

"Elementary school" means an Iowa school district or accredited nonpublic school offering kindergarten.

"Health care provider" means a physician licensed under Iowa Code chapter 148, 150, or 150A, a physician assistant licensed under Iowa Code chapter 148C, or an advanced registered nurse practitioner licensed under Iowa Code chapter 152.

"Laboratory" means a laboratory certified to perform either waived or non-waived blood lead analysis according to the federal Clinical Laboratory Improvement Act of 1988 (CLIA).

"Transfer student" means an applicant from any elementary school outside Iowa who is seeking enrollment in kindergarten in an elementary school in Iowa.

"Venous" means a blood sample taken from a vein in the arm for lead analysis.

"Very low risk" means that a child has not (1) lived in, visited, or spent time in any building built before 1960, including but not limited to the child's home, a daycare center, a preschool, a baby-sitter's home or a relative's home; (2) eaten nonfood items; (3) lived with or frequently come in contact with an adult who works with lead on the job or as part of a hobby, including but not limited to painting, welding, foundry work, renovating old homes, working at a shooting range, manufacturing or recycling batteries, working with ceramics or stained glass, working with sheet metal or scrap metal, or plumbing; (4) lived near a battery manufacturing plant, battery recycling plant, lead smelter, or other source of lead emissions; (5) been born in or spent more than three months in Mexico, Central America, eastern Europe, or southeast Asia; (6) ingested food, candy, or remedies containing lead; (7) played with toys, jewelry, or other items that the U.S. Consumer Product Safety Commission has recalled due to lead contamination; or (8) been exposed to any other products or substances determined by the department, the U.S. Environmental Protection Agency, the U.S. Department of Housing and Urban Development, the Centers for Disease Control and Prevention, or the U.S. Food and Drug Administration to contain lead.

641—67.3(135) Persons included. The blood lead testing requirement specified in this chapter applies to all applicants and transfer students as defined in this chapter.

641—67.4(135) Persons excluded. Exclusions to these rules are permitted on an individual basis for religious reasons and for children determined by the department to be at very low risk for elevated blood lead levels. The parent or guardian of an applicant or transfer student approved for a religious exemption or an exemption for very low risk shall submit to the board of directors of each school district and the authorities in charge of each nonpublic school a valid Iowa department of public health certificate of

blood lead testing exemption. To be valid, the certificate shall be the certificate of blood lead testing exemption provided or approved by the department.

67.4(1) Religious exemption. A religious exemption may be granted to an applicant or transfer student if the blood lead testing conflicts with a genuine and sincere religious belief.

a. The certificate of blood lead testing exemption for religious reasons shall attest that the blood lead testing conflicts with a genuine and sincere religious belief and that the belief is in fact religious and not based merely on philosophical, scientific, moral, personal, or medical opposition to blood lead testing.

b. The certificate of blood lead testing exemption for religious reasons shall be signed and dated by the applicant's or transfer student's parent or guardian.

c. The certificate is valid only when notarized.

67.4(2) Exemption for very low risk. The department may grant to an applicant or transfer student an exemption for very low risk if the parent or guardian provides evidence satisfactory to the department that the applicant or transfer student meets the definition of very low risk.

a. The certificate of blood lead testing exemption for very low risk shall be signed and dated by the applicant's or transfer student's parent or guardian and by the chief of the bureau of lead poisoning prevention.

b. The certificate of blood lead testing exemption for very low risk is valid only when notarized.

67.4(3) A faxed copy, photocopy, or electronic copy of the valid certificate of blood lead testing exemption is acceptable.

641—67.5(135) Blood lead testing requirement.

67.5(1) Each applicant and transfer student shall meet the requirements of subrule 67.6(1).

67.5(2) The board of directors of each school district and the authorities in charge of each nonpublic school shall, in collaboration with the department, ensure that applicants and transfer students comply with the blood lead testing requirement according to subrule 67.6(1).

641—67.6(135) Time line for valid blood lead testing.

67.6(1) To be valid, a blood lead test shall be performed on an applicant or transfer student before the applicant or transfer student reaches six years of age, or in cases in which the applicant or transfer student has already reached six years of age, as soon as the department notifies the parent or guardian that a blood lead test has not yet been performed.

67.6(2) Desirable age for blood lead testing. A parent or guardian of a child under two years of age is strongly encouraged to have the child tested for elevated blood lead levels by the time that the child reaches two years of age.

641—67.7(135) Proof of blood lead testing.

67.7(1) The board of directors of each school district and the authorities in charge of each nonpublic school shall furnish the department, in the format specified by the department, within 60 days after the start of the school calendar, an electronic list of the children enrolled in kindergarten, including the names of children who have filed certificates of blood lead testing exemption.

67.7(2) The department shall match these electronic lists of children with the department's blood lead database and shall notify the school districts and nonpublic schools of the children who have and who have not met the blood lead testing requirement set forth in this chapter.

67.7(3) If the parent or guardian cannot provide evidence that the child received a blood lead test in accordance with subrule 67.5(1), the board of directors of the school district or the authorities in charge of the nonpublic school shall, in collaboration with the department, provide the parent or guardian with community blood lead testing program information, including contact information for the department. The department shall provide this information to and shall work with the school districts, nonpublic schools, and the local childhood lead poisoning prevention programs to ensure that children who have not met the blood lead testing requirement are tested as required by subrule 67.5(1).

641—67.8(135) Referral requirements. Parents or guardians of children who require a blood lead test shall be referred to a health care provider of choice. The parents or guardians of children without a health care provider or who have difficulty accessing blood lead testing shall be referred to a local childhood lead poisoning prevention program, local child health center, or local public health agency for assistance with completion of blood lead testing. This assistance may include locating health care providers, scheduling appointments, identifying payment sources, and providing blood lead testing.

641—67.9(135) Blood lead testing documentation. A health care provider performing a blood lead test required by this chapter shall ensure that the results of the blood lead test are reported to the department as required by 641—Chapter 1.

641—67.10(135) Records. The board of directors of each school district and the authorities in charge of each nonpublic school shall, in collaboration with the department, ensure that each applicant and transfer student complies with the blood lead testing requirement according to subrule 67.6(1) or has a valid certificate of blood lead testing exemption on file.

67.10(1) The board of directors of each school district and the authorities in charge of each nonpublic school shall ensure that the certificate of blood lead testing exemption is properly completed according to rule 641—67.4(135).

67.10(2) Within the constraints of the privacy rights of the parents or guardians and students, the local board of health, the department of education, and the department or its designee shall have the right to have access to the department's determination that a child has received a blood lead test and to the certificates of blood lead testing exemption of children enrolled in kindergarten.

641—67.11(135) Provider training. For the purpose of quality assurance and consistency, the department shall make training and training materials available for health care providers who will be performing blood lead testing and for school officials, school health personnel, local childhood lead poisoning prevention programs, local child health centers, and local public health agencies.

These rules are intended to implement Iowa Code Supplement section 135.105D and 2008 Iowa Acts, Senate File 2111.

[Filed 7/10/08, Notice 5/21/08—published 7/30/08, effective 9/3/08]

CHAPTER 68
CONTROL OF LEAD-BASED PAINT HAZARDS

641—68.1(135) Applicability. The provisions of this chapter are applicable in jurisdictions in which a local board has adopted this chapter for the purpose of requiring control of lead-based paint hazards where a child has been identified with an elevated blood lead level. Nothing in this chapter shall be construed as requiring a local board to adopt this chapter as a model regulation.

641—68.2(135) Definitions.

“Certified elevated blood lead (EBL) inspector/risk assessor” means a person who has met the requirements of Iowa Administrative Code 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Chewable surface” means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew.

“Child-occupied facility” means a building, or portion of a building, constructed prior to 1978, visited by the same child under the age of six years on at least two different days within any week (Sunday through Saturday period, provided that each day’s visit lasts at least three hours and the combined weekly visits last at least six hours). Child-occupied facilities may include, but are not limited to, day care centers, preschools and kindergarten classrooms.

“Clearance testing” means an activity conducted following interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation to determine that the hazard reduction activities are complete. Clearance testing includes a visual assessment, the collection and analysis of environmental samples, the interpretation of sampling results, and the preparation of a report.

“Department” means the Iowa department of public health.

“Deteriorated paint” means any interior or exterior paint or other coating that is cracking, flaking, chipping, peeling, or chalking, or any paint or coating located on an interior or exterior surface that is otherwise damaged or separated from the substrate of a building component.

“Dripline” means the area within three feet surrounding the perimeter of a building.

“Dust-lead hazard” means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead greater than or equal to 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is greater than or equal to 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property. If dust samples are not taken, it may be assumed that surfaces in rooms with hazardous lead-based paint or where renovation, remodeling, or repainting has occurred recently are dust-lead hazards.

“Elevated blood lead (EBL) child” means any child who has had one venous blood lead level greater than or equal to 20 micrograms per deciliter or at least two venous blood lead levels of 15 to 19 micrograms per deciliter.

“Elevated blood lead (EBL) inspection” means an inspection to determine the sources of lead exposure for an elevated blood lead (EBL) child and the provision within ten working days of a written report explaining the results of the investigation to the property owner and occupant of the residential dwelling or child-occupied facility being inspected and to the parents of the elevated blood lead (EBL)

child. A certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of an elevated blood lead (EBL) inspection.

“Friction surface” means an interior or exterior surface that is subject to abrasion or friction including, but not limited to, certain window, floor, and stair surfaces.

“Hazardous lead-based paint” means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is equal to or greater than the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of a residential building or child-occupied facility.

“Impact surface” means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of doorframes.

“Lead-based paint” means any paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram of lead per square centimeter or more than 0.5 percent by weight. Lead-based paint is present on any surface that is tested and found to contain lead equal to or in excess of 1.0 milligram per square centimeter or more than 0.5 percent by weight and on any surface like a surface tested in the same room equivalent that has a similar painting history and that is found to be lead-based paint.

“Lead-based paint hazard” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

“Local board” means the local board of health as authorized by Iowa Code chapter 137.

“Mid-yard” means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

“Occupant” means any person living, sleeping, cooking or eating in, or having any actual possession of, a dwelling or dwelling unit.

“Owner” means any person who, alone or jointly with others: (1) has legal title to any dwelling, with or without accompanying actual possession thereof, or (2) has charge, care or control of any dwelling by acting as the agent of the owner or as the executor, administrator, trustee, or guardian of the estate of the owner.

“Paint-lead hazard” means the presence of hazardous lead-based paint in a residential dwelling or a child-occupied facility.

“Play area” means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children’s possessions; observations of play patterns; or information provided by parents, residents, caregivers, or property owners.

“Residential building” means a building containing one or more residential dwellings.

“Residential dwelling” means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including, but not limited to, garages, farm buildings, and fences; or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

“Retaliation” means harassment, termination of the tenancy, discontinuation of utilities or other services, and any other action taken against the lessee.

“Soil-lead hazard” means bare soil on residential real property or on the property of a child-occupied facility that contains total lead greater than or equal to 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is greater than or equal to 400 parts per million. If soil samples are not taken, it may be assumed that bare soil within three feet of the foundation of a garage or other structure built prior to 1978 is a soil-lead hazard.

641—68.3(135) Elevated blood lead (EBL) inspections required. The local board shall appoint a certified elevated blood lead (EBL) inspector/risk assessor to conduct elevated blood lead (EBL) inspections in residential dwellings and child-occupied facilities where an elevated blood lead (EBL) child lives, visits, or has recently lived. All owners and occupants shall allow access to the residential dwellings and child-occupied facilities that the certified elevated blood lead (EBL) inspector/risk assessor desires to inspect.

641—68.4(135) Refusal of admittance. If the certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board is refused entry to a property, then the certified elevated blood lead (EBL) inspector/risk assessor may make a complaint under oath to any magistrate of the county. The magistrate may issue a warrant directing the owner or occupant to allow the certified elevated blood lead (EBL) inspector/risk assessor to conduct an elevated blood lead (EBL) inspection and directing a peace officer to accompany the certified elevated blood lead (EBL) inspector/risk assessor during the elevated blood lead (EBL) inspection/risk assessment.

641—68.5(135) Lead hazard reduction required.

68.5(1) When the certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board determines that hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard is present in a residential dwelling unit or child-occupied facility where an elevated blood lead (EBL) child lives, frequently visits, or has recently resided, the certified elevated blood lead inspector/risk assessor shall issue a written notice to the owner within two weeks of the inspection and receipt of any laboratory results. The written notice shall require the owner to complete lead hazard reduction in a time period determined by the certified elevated blood lead (EBL) inspector/risk assessor. If the occupant who occupies the residential dwelling at the time that this written notice is issued vacates the residential dwelling, the residential dwelling shall not be leased or occupied by any other person until the certified elevated blood lead (EBL) inspector/risk assessor issues a written notice that the lead hazard reduction has been completed.

68.5(2) The owner of any residential dwelling or child-occupied facility which has been determined to contain hazardous lead-based paint, a soil-lead hazard, or a dust-lead hazard shall correct these hazards within the time period allowed by the certified elevated blood lead (EBL) inspector/risk assessor in the written notice. The following methods shall be used for lead hazard reduction. These methods shall not require the services of a lead abatement contractor certified in accordance with Iowa Administrative Code 641—70.5(135). However, other local, state, or federal regulations may require the use of a contractor who has completed an eight-hour lead-safe work practices course or a lead abatement contractor or lead abatement worker certified in accordance with Iowa Administrative Code 641—70.5(135).

a. On a surface that contains hazardous lead-based paint, but is not chewable and does not have evidence of impact or friction, the lead-based paint hazard shall be reduced by removing all loose and deteriorated paint from the surface, preparing the surface for repainting, and repainting the surface with a lead-free coating.

b. On a surface that contains hazardous lead-based paint and is chewable or has evidence of impact or friction, the lead-based paint hazard shall be reduced by treating the surface one inch back from the edge or corner through one of the following methods:

(1) All lead-based paint on the treatment area shall be removed to the bare substrate. The surface shall be prepared for repainting and repainted with a lead-free coating.

(2) The treatment area shall be covered with a permanently affixed lead-free material such as plastic, wood, or vinyl. Carpet may be used on floors and stair treads.

c. Dust-lead hazards shall be reduced by thoroughly cleaning the affected surface.

d. Soil-lead hazards shall be reduced by planting grass or groundcover, applying sod, or covering the affected area with six inches of bark, gravel, or other material.

e. Lead hazard reduction shall be conducted using lead-safe work practices to protect the safety of the occupants and workers. Occupants shall not enter the work area while work is underway. The following are prohibited methods of lead hazard reduction:

- (1) Open-flame burning or torching of lead-based paint.
- (2) Machine sanding or grinding or abrasive blasting or sandblasting of lead-based paint unless used with high-efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.
- (3) Uncontained water blasting of lead-based paint.
- (4) Dry scraping or dry sanding of lead-based paint except in conjunction with the use of a heat gun or around electrical outlets.
- (5) Operating a heat gun at a temperature above 1100 degrees Fahrenheit.

68.5(3) The certified elevated blood lead (EBL) inspector/risk assessor shall inspect all areas identified as hazards after lead hazard reduction is complete. The certified elevated blood lead (EBL) inspector/risk assessor may conduct clearance testing pursuant to Iowa Administrative Code 641—Chapter 70 to ensure that no dust-lead hazards exist after the work is complete. Within two weeks of verifying that all lead hazard reduction has been completed as required, the certified elevated blood lead (EBL) inspector/risk assessor shall issue a written notice to the owner and occupant stating that the lead hazard reduction has been completed and that the repaired surfaces must be maintained in good condition.

641—68.6(135) Retaliation prohibited.

68.6(1) The lessor of a dwelling, the employees of the lessor, and agents or persons acting on behalf of the lessor shall not retaliate against lessees of residential dwellings and child-occupied facilities whose occupants or visitors have been tested for lead poisoning and shall not discourage the occupants or visitors from being tested for lead poisoning.

68.6(2) An action taken against the lessee shall not be considered retaliation if it is supported by reasonable cause unrelated to the testing of an occupant for lead poisoning or if it is shown to have occurred as a result of an accident or mistake and not to be the intentional act of the lessor of a dwelling, the employees of the lessor, or agents or persons acting on behalf of the lessor.

641—68.7(135) Enforcement. The certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board shall have the duty and responsibility of enforcing this chapter.

68.7(1) Penalties shall be as provided in Iowa Code section 137.21.

68.7(2) Upon failure of any person to correct a hazard identified through this chapter in the time specified by the certified elevated blood lead (EBL) inspector/risk assessor appointed by the local board, the local board may direct or cause the correction of said hazards. All expenses incurred thereby may be recovered by suit in the name of the local board, or the local board may certify the amount of said expenses, together with a description of the property, to the county treasurer, who shall enter the same upon the tax books as costs for removing a lead hazard, and said amounts shall be collected as other taxes.

641—68.8(135) Hearings. In the event any person is aggrieved by any order of the certified elevated blood lead (EBL) inspector/risk assessor, the person may appeal to the local board in writing within ten days of the date of such order. The appeal shall state the reasons for requesting such order to be rescinded or modified. The local board shall review the action of the certified elevated blood lead (EBL) inspector/risk assessor. The local board shall order compliance with said order or may, with cause, modify or withdraw said order. Any order of the local board may be appealed within ten days to the district court for the county in which the local board is located.

641—68.9(135) Variances. The elevated blood lead (EBL) inspector/risk assessor may determine that a chewable surface that would otherwise be identified as a hazard by this chapter is not causing or does not have reasonable potential to cause lead exposure and is not required to be corrected through lead hazard reduction. The elevated blood lead (EBL) inspector/risk assessor shall document the reason for this determination in the inspection report. However, the elevated blood lead (EBL) inspector/risk assessor

shall not, under any circumstances, determine that any other surface meeting the definition of hazardous lead-based paint does not need to be corrected through lead hazard reduction.

641—68.10(135) Injunction. Nothing in this chapter shall prohibit a local board from pursuing injunctive relief or other relief as allowed by law.

641—68.11(135) Effective date. This chapter shall be in effect in a jurisdiction after a local board adopts it.

These rules are intended to implement Iowa Code section 135.102.

[Filed 7/16/04, Notice 5/26/04—published 8/4/04, effective 9/8/04]

CHAPTER 69
RENOVATION, REMODELING, AND REPAINTING—
LEAD HAZARD NOTIFICATION PROCESS

641—69.1(135) Applicability. This chapter applies to all persons who perform renovation, remodeling, and repainting for compensation in target housing.

641—69.2(135) Definitions.

“Arithmetic mean” means the algebraic sum of data values divided by the number of data values. For example, the sum of the concentration of lead in several soil samples divided by the number of samples is the arithmetic mean.

“Certificate of mailing” means certified mail with return receipt or its equivalent.

“Chewable surface” means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew.

“Common area” means a portion of the building that is generally accessible to all occupants. This includes, but is not limited to, hallways, stairways, laundry and recreational rooms, playgrounds, community centers, garages, and boundary fences.

“Components” means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include, but are not limited to, interior components such as ceilings, crown moldings, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim (including sashes, window heads, jambs, sills or stools and troughs), built-in cabinets, columns, beams, bathroom vanities, countertops, and air conditioners; and exterior components such as painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, fascias, rake boards, cornerboards, bulkheads, doors and door trim, fences, floors, joists, latticework, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, windowsills or stools and troughs, casing, sashes and wells, and air conditioners.

“Department” means the department of public health.

“Dripline” means the area within three feet surrounding the perimeter of a building.

“Dust-lead hazard” means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead equal to or exceeding 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is equal to or greater than 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property.

“Dwelling unit” means a single, unified combination of rooms designed for use as a dwelling by one family.

“Emergency renovation, remodeling, and repainting” means renovation, remodeling, and repainting activities necessitated by nonroutine failures of equipment that were not planned but resulted from a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard or threatens equipment or property with significant damage.

“Friction surface” means an interior or exterior surface that is subject to abrasion or friction including, but not limited to, certain window, floor, and stair surfaces.

“Hazardous lead-based paint” means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is equal to or greater than the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

“Impact surface” means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of door frames.

“Lead-based paint” means paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or more than 0.5 percent by weight.

“Lead-based paint hazard” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

“Living area” means any area of a residential dwelling used by at least one child six years of age or less including, but not limited to, living rooms, kitchen areas, dens, playrooms, and children’s bedrooms.

“Mid-yard” means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

“Multifamily dwelling” means a structure that contains more than one separate residential dwelling unit, which is used or occupied, or is intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.

“Play area” means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children’s possessions, observations of play patterns, or information provided by parents, residents, caregivers, or property owners.

“Regulated entity” means any individual or company that is regulated by the department by virtue of these rules, the Iowa Code, or other official regulatory promulgation.

“Renovation, remodeling, repainting” means modifying any existing structure or portion of a structure where painted surfaces are disturbed, unless the activity fits the criteria of lead abatement as defined in 641—70.2(135) and is performed by a certified lead abatement contractor as defined in 641—70.2(135). This includes, but is not limited to, removing walls, ceilings, and other painted building components; window replacement; floor refinishing; and sanding, scraping, stripping, water blasting, or otherwise removing paint.

“Residential dwelling” means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including, but not limited to, garages, farm buildings, and fences, or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

“Soil-lead hazard” means bare soil on residential real property or on the property of a child-occupied facility that contains total lead in excess of 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is equal to or greater than 400 parts per million.

“Target housing” means housing constructed prior to 1978 with the exception of housing for the elderly or for persons with disabilities, unless at least one child under the age of six years resides or is expected to reside in the housing, and housing which does not contain a bedroom.

641—69.3(135) Notification required. Beginning on June 1, 1999, individuals who perform renovation, remodeling, and repainting of target housing for compensation, except for emergency renovation, remodeling, and repainting of target housing, and except for minor repair and maintenance activities that disrupt less than 0.1 square feet or less of painted surface, must do the following no more than 60 days prior to commencing the work:

69.3(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, to the owner and adult occupant of each dwelling unit where renovation, remodeling, and repainting will be performed.

69.3(2) Obtain a signed, dated acknowledgment from the owner and known adult occupant of each dwelling unit where renovation, remodeling, and repainting will be performed affirming that they have received the pamphlet prior to the start of renovation, remodeling, or repainting and are aware of the potential health hazards from remodeling, renovating, or repainting housing containing lead-based paint.

a. The acknowledgment shall include the owner's and occupant's names and the address of the residential dwelling undergoing renovation, remodeling, or repainting.

b. The acknowledgment shall include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Protect Your Family from Lead in Your Home, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting housing containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment shall require the signature of the owner and occupant, along with their dates of signature.

d. If a signature cannot be obtained from an adult occupant, the individual must certify in writing that the pamphlet has been delivered to the dwelling and that a written acknowledgment could not be obtained from an adult occupant. Such certification must include the address of the unit to be remodeled, renovated, or repainted, the date and method of delivery of the pamphlet, the name of the person delivering the pamphlet, the reason for lack of acknowledgment (e.g., occupant refuses to sign, no adult occupant available), the signature of the person conducting the renovating, remodeling, or repainting, and the date of signature.

e. The type shall be clear and legible.

f. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment must be completed prior to commencing the work.

g. If the parties use a written contract or agreement which is written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

69.3(3) In lieu of delivering the pamphlet and written acknowledgment, the person conducting the renovating, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment at least seven days prior to beginning the work.

69.3(4) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, and repainting change after the initial notification has been conducted, the individual conducting the renovation, remodeling, and repainting shall provide further notification to the owners and occupants providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the individual conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

641—69.4(135) Notification required in multifamily housing. Beginning on June 1, 1999, individuals who perform renovation, remodeling, and repainting of common areas for compensation, except for emergency renovation, remodeling, and repainting of target housing, and except for minor repair and maintenance activities that disrupt less than 0.1 square feet or less of painted surface, must do the following no more than 60 days prior to commencing the work:

69.4(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, to the owner of the multifamily target housing where renovation, remodeling, and repainting will be performed.

69.4(2) Obtain a signed, dated acknowledgment from the owner of the multifamily target housing where renovation, remodeling, and repainting will be performed affirming that the owner has received the pamphlet prior to the start of renovation, remodeling, or repainting and is aware of the potential health hazards from remodeling, renovating, or repainting housing containing lead-based paint.

a. The acknowledgment shall include the owner's name and the address of the multifamily dwelling undergoing renovation, remodeling, or repainting.

b. The acknowledgment shall include the following language:

I have received the pamphlet entitled Lead Poisoning: How to Protect Iowa Families or the federal pamphlet, Protect Your Family from Lead in Your Home, prior to the start of renovation, remodeling, or repainting and am aware of the potential health risk associated with remodeling, renovating, or repainting housing containing lead-based paint or lead-based paint hazards.

c. Below the statement, the acknowledgment shall require the signature of the owner, along with the date of signature.

d. The type shall be clear and legible.

e. The acknowledgment may be included as a separate sheet or as a part of any written contract or service agreement. The acknowledgment must be completed prior to commencing the work.

f. If the parties use a written contract or agreement which is written in a language other than English, the acknowledgment text shall be written in the same language as the text of the contract or agreement.

g. Notify each occupant of the multifamily housing, in writing, of the intended remodeling, repainting, or renovation, and make the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each occupant of the target housing. The notice shall describe:

(1) The general nature and location of the planned renovation, remodeling, and repainting activity.

(2) The expected starting and ending dates of the planned renovation, remodeling, and repainting activity.

(3) A statement of how the owners and occupants can obtain the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, at no charge from the individual conducting the renovation, remodeling, and repainting activity.

h. These activities shall be conducted by the individual planning to perform the renovation, remodeling, and repainting, or by the owner on behalf of this individual.

i. The individual planning to perform the renovation, remodeling, and repainting must prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation, remodeling, and repainting, and to provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, at no charge upon request. Regardless of who performs the notification activities required in this subrule, the individual planning to conduct the renovation, remodeling, and repainting shall be responsible for ensuring compliance with this subrule and shall be liable for any failures to comply with the notification requirements in this subrule.

69.4(3) In lieu of delivering the pamphlet and written acknowledgment to the owner, the person conducting the renovating, remodeling, or repainting may obtain a certificate of mailing the pamphlet and written acknowledgment at least seven days prior to beginning the work.

69.4(4) If the general nature, location, and expected starting and ending dates of the planned renovation, remodeling, and repainting change after the initial notification has been conducted, the individual conducting the renovation, remodeling, and repainting shall provide further notification to the owners and occupants providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the individual conducting the renovation, remodeling, or repainting initiates work beyond that which was described in the original notice.

641—69.5(135) Emergency renovation, remodeling, and repainting. Beginning on June 1, 1999, individuals who perform emergency renovation, remodeling, and repainting of target housing for compensation, except for minor repair and maintenance activities that disrupt less than 0.1 square feet or less of painted surface, must do the following:

69.5(1) Provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, to the owner of the target housing where renovation, remodeling, and repainting are performed.

69.5(2) Notify each owner and occupant of the target housing, in writing, of the remodeling, repainting, or renovation, and make the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, available upon request. At a minimum, this notification shall be accomplished by distributing written notice to each owner and occupant of the target housing. The notice shall describe:

- a. The general nature and location of the renovation, remodeling, and repainting activity.
- b. The starting and ending dates of the renovation, remodeling, and repainting activity.
- c. A statement of how the owners and occupants can obtain the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, at no charge from the individual conducting the renovation, remodeling, and repainting activity.

69.5(3) These activities shall be conducted by the individual performing the renovation, remodeling, and repainting, or by the owner on behalf of this individual. The individual planning to perform the renovation, remodeling, and repainting must prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation, remodeling, and repainting, and to provide the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, at no charge upon request. Regardless of who performs the notification activities required in this subrule, the individual conducting the renovation, remodeling, and repainting shall be responsible for ensuring compliance with this rule and shall be liable for any failures to comply with the notification requirements in this rule.

641—69.6(135) Certification of attempted delivery. When an adult occupant is unavailable for signature or refuses to sign the acknowledgment of receipt of the pamphlet, the individual conducting the renovating, remodeling, or repainting is permitted by subrule 69.3(2) to certify delivery for each instance. The certification shall include the address of the unit undergoing renovation, remodeling, or repainting, the date and method of delivery of the pamphlet, names of the persons delivering the pamphlet, reason for lack of acknowledgment (e.g., occupant refuses to sign, no adult occupant available), the signature of the individual conducting the renovation, remodeling, and repainting, and the date of signature.

69.6(1) Unavailable for signature.

a. If an adult occupant is unavailable for signature, the certification shall contain the following language:

I certify that I have made a good-faith effort to deliver the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, to the unit listed below at the dates and times indicated, and that an adult occupant was unavailable to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the unit with the occupant.

b. Below the statement, the certification shall require the printed name and signature of the individual conducting the renovating, remodeling, or repainting, the address of the unit, the attempted delivery dates and times, and the date of signature.

69.6(2) Refused to sign.

a. If the occupant refuses to sign the acknowledgment, the certification shall contain the following language:

I certify that I have made a good-faith effort to deliver the pamphlet, Lead Poisoning: How to Protect Iowa Families, or the federal pamphlet, Protect Your Family from Lead in Your Home, to the unit listed below at the dates and times indicated, and that the occupant refused to sign the acknowledgment. I further certify that I have left a copy of the pamphlet at the unit.

b. Below the statement, the certification shall require the printed name and signature of the individual conducting the renovating, remodeling, or repainting, the address of the unit, the attempted

delivery dates and times, the location where the pamphlet was left at the unit (e.g., taped to the door, slipped under the door), and the date of signature.

641—69.7(135) Exemption. Renovation, remodeling, and repainting in target housing in which a lead inspector or elevated blood lead (EBL) inspector certified pursuant to 641—Chapter 70 has made a written determination that the components affected by the renovation are free of lead-based paint and where the person conducting the renovation, remodeling, or repainting has obtained a copy of the written determination are exempt from the provisions of 641—Chapter 69.

641—69.8(135) Record-keeping requirements. Beginning on June 1, 1999, individuals who conduct renovation, remodeling, and repainting for compensation in target housing shall retain all records necessary to demonstrate compliance with this chapter for a minimum of three years following completion of the renovation, remodeling, and repainting. The records shall include:

69.8(1) The address or location of the target housing where remodeling, renovation, or repainting was conducted.

69.8(2) A list of all known occupants of the dwelling units where renovation, remodeling, or repainting was conducted at the commencement of the work.

69.8(3) Copies of signed, dated acknowledgments as required by subrule 69.3(2) from each owner and occupant of a dwelling unit where renovation, remodeling, or repainting was conducted.

69.8(4) Copies of signed, dated acknowledgments as required by subrule 69.4(2) from each owner of multifamily target housing where renovation, remodeling, or repainting was conducted in common areas.

69.8(5) Copies of all signed, dated statements of notification, as well as copies of all notification materials to all owners and occupants and acknowledgments as required by subrule 69.4(2) from each owner and occupant of multifamily target housing where renovation, remodeling, or repainting was conducted in common areas.

69.8(6) Reports showing that a lead inspector or elevated blood level (EBL) inspector certified pursuant to 641—Chapter 70 has made a written determination that the components affected by the renovation are free of lead-based paint.

69.8(7) Certifications of attempted delivery as described in 641—69.6(135).

69.8(8) Certificates of mailing as described in subrules 69.3(3) and 69.4(3).

641—69.9(135) Compliance inspections.

69.9(1) The department may enter the place of business of an individual who conducts renovation, remodeling, and repainting for the purpose of enforcing the notification required by this chapter.

69.9(2) Rescinded IAB 3/31/04, effective 5/5/04.

641—69.10(135) Enforcement.

69.10(1) The department may impose a civil penalty pursuant to Iowa Code section 135.105C and this rule or may refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code section 135.38 when it finds that a person has committed any of the following acts:

- a.* Failed or refused to comply with any requirements of this chapter.
- b.* Failed or refused to establish, maintain, provide, copy, or permit access to records or reports as required by this chapter.
- c.* Failed or refused to permit entry or inspection as described in subrule 69.9(1).
- d.* Falsified reports and records required by this chapter.
- e.* Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- f.* Failed to respond within 30 days of receipt of communication sent by the department by registered or certified mail.
- g.* Engaged in any conduct that subverts or attempts to subvert a department investigation.

h. Failed to comply with a subpoena issued by the department or failed to cooperate with a department investigation.

i. Failed to pay costs assessed in any disciplinary action.

69.10(2) Complaints and other requests for action under this rule. Complaints regarding a person who performs renovation, remodeling, or repainting for compensation in target housing shall be submitted in writing to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075. The complainant shall provide the name of the person who performs renovation, remodeling, or repainting for compensation in target housing and the specific details of the person's action(s) that did not comply with the rules.

69.10(3) Civil penalties.

a. Before instituting any proceeding to impose a civil penalty under Iowa Code section 135.105C, the department shall serve a written notice of violation upon the person charged. The notice of violation shall specify the date or dates, facts, and the nature of the alleged act or omission with which the person is charged and shall identify specifically the particular provision or provisions of the law, rule, regulation, certification, approval, or cease and desist order involved in the alleged violation and must state the amount of each proposed penalty. The notice of violation shall also advise the person charged that the civil penalty may be paid in the amount specified therein, or the proposed imposition of the civil penalty may be protested in its entirety or in part, by a written answer, either denying the violation or showing extenuating circumstances. The notice of violation shall advise the person charged that upon failure to pay a civil penalty subsequently determined by the department, if any, unless compromised, remitted, or mitigated, the fee shall be collected by civil action, pursuant to Iowa Code section 135.105C.

b. Within 20 days of the date of a notice of violation or other time specified in the notice, the person charged may either pay the penalty in the amount proposed or answer the notice of violation. The answer to the notice of violation shall state any facts, explanations, and arguments denying the charges of violation or demonstrating any extenuating circumstances, error in the notice of violation, or other reason why the penalty should not be imposed and may request remission or mitigation of the penalty.

c. If the person charged with a violation fails to answer within the time specified in paragraph 69.10(3) "b," an order may be issued imposing the civil penalty in the amount set forth in the notice of violation described in paragraph 69.10(3) "a."

d. If the person charged with a violation files an answer to the notice of violation, the department, upon consideration of the answer, will issue an order dismissing the proceeding or imposing, mitigating, or remitting the civil penalty. The person charged may, within 20 days of the date of the order or other time specified in the order, request a hearing.

e. If the person charged with a violation requests a hearing, the department will issue an order designating the time and place of hearing. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

f. If a hearing is held, an order will be issued after the hearing by the presiding officer or the department dismissing the proceeding or imposing, mitigating, or remitting the civil penalty.

g. The department may compromise any civil penalty. If the civil penalty is not compromised or is not remitted by the presiding officer or the department or if the time for requesting a hearing described in paragraph 69.10(3) "d" has expired, the department may refer the matter to the attorney general for collection.

h. Except when payment is made after compromise or mitigation by the department of justice or as ordered by a court of the state, following reference of the matter to the attorney general for collection, payment of civil penalties imposed under Iowa Code section 135.105C shall be made by check, draft, or money order payable to the Iowa Department of Public Health.

69.10(4) Appeals.

a. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

b. Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent by certified mail, return receipt requested, or by personal service to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075.

c. The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

641—69.11(135) Waivers. Rules in this chapter are not subject to waiver or variance pursuant to 641—Chapter 178 or any other provision of law.

These rules are intended to implement Iowa Code section 135.105C.

CHAPTER 70
LEAD-BASED PAINT ACTIVITIES

641—70.1(135) Applicability. Prior to March 1, 2000, this chapter applied to all persons who were certified lead professionals in Iowa. Beginning March 1, 2000, this chapter applies to all persons who are lead professionals in Iowa. Beginning July 1, 2004, this chapter also applies to agencies that provide lead-safe work practices training programs in Iowa and to those who are registered lead-safe work practices contractors in Iowa. This chapter requires lead professionals to be certified and establishes specific requirements for how to perform lead-based paint activities if a property owner, manager, or occupant chooses to undertake them. However, nothing in this chapter requires a property owner, manager, or occupant to undertake any particular lead-based paint activity. This chapter also provides for the approval of lead-safe work practices courses and the voluntary registration of lead-safe work practices contractors.

641—70.2(135) Definitions.

“Adequate quality control” means a plan or design which ensures the authenticity, integrity, and accuracy of samples, including dust, soil, and paint chip or paint film samples. Adequate quality control also includes provisions for representative sampling.

“Approved course” means a course that has been approved by the department for the training of lead professionals.

“Approved lead-safe work practices training program” means a lead-safe work practices training program that has been approved by the department.

“Arithmetic mean” means the algebraic sum of data values divided by the number of data values. For example, the sum of the concentration of lead in several soil samples divided by the number of samples is the arithmetic mean.

“Certified elevated blood lead (EBL) inspection agency” means an agency that has met the requirements of 641—70.5(135) and that has been certified by the department.

“Certified elevated blood lead (EBL) inspector/risk assessor” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified firm” means a firm that has met the requirements of 641—70.7(135) for certification and has been certified by the department.

“Certified lead abatement contractor” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified lead abatement worker” means a person who has met the requirements of 641—70.5(135) and who has been certified by the department.

“Certified lead inspector/risk assessor” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified lead professional” means a person who has been certified by the department as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, lead abatement worker, project designer, or sampling technician.

“Certified project designer” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“Certified sampling technician” means a person who has met the requirements of 641—70.5(135) and who has been certified by the department.

“Chewable surface” means an interior or exterior surface painted with lead-based paint that a young child can mouth or chew.

“Child-occupied facility” means a building, or portion of a building, constructed prior to 1978, visited by the same child under the age of six years on at least two different days within any week (Sunday through Saturday period, provided that each day’s visit lasts at least three hours and the combined weekly visits last at least six hours). Child-occupied facilities may include, but are not limited to, day-care centers, preschools and kindergarten classrooms.

“*Clearance level*” means the value at which the amount of lead in dust on a surface following completion of interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation is a dust-lead hazard and fails clearance testing. The clearance level for a single-surface dust sample from a floor is greater than or equal to 40 micrograms per square foot. The clearance level for a single-surface dust sample from an interior windowsill is greater than or equal to 250 micrograms per square foot. The clearance level for a single-surface dust sample from a window trough is greater than or equal to 400 micrograms per square foot.

“*Clearance testing*” means an activity conducted following interim controls, lead abatement, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation to determine that the hazard reduction activities are complete. Clearance testing includes a visual assessment, the collection and analysis of environmental samples, the interpretation of sampling results, and the preparation of a report.

“*Common area*” means a portion of the building that is generally accessible to all occupants. This includes, but is not limited to, hallways, stairways, laundry and recreational rooms, porches, exteriors, playgrounds, community centers, garages, and boundary fences.

“*Common area group*” means a group of common areas that are similar in design, construction, and function. Common area groups include, but are not limited to, hallways, stairwells, and laundry rooms.

“*Component*” or “*building component*” means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include, but are not limited to, interior components such as ceilings, crown moldings, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim (including sashes, window heads, jambs, sills or stools and troughs), built-in cabinets, columns, beams, bathroom vanities, countertops, and air conditioners; and exterior components such as painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, fascias, rake boards, cornerboards, bulkheads, doors and door trim, fences, floors, joists, latticework, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, windowsills or stools and troughs, casings, sashes and wells, and air conditioners. Each side of a door is considered a component within its respective room.

“*Component type*” means a group of like components constructed of the same substrate in the same multifamily housing. For example, “wood door” is a component type.

“*Composite sample*” means the collection of more than one sample of the same medium (e.g., dust, soil, or paint) from the same type of surface (e.g., floor, interior windowsill, or window trough) such that multiple samples can be analyzed as a single sample.

“*Concentration*” means the relative content of a specific substance contained within a larger mass, such as the amount of lead (in micrograms per grams or parts per million of weight) in a sample of soil or dust.

“*Containment*” means a process to protect workers and the environment by controlling exposures to the dust-lead hazards and debris created during lead abatement.

“*Course agenda*” means an outline of the key topics to be covered during a training course, including the time allotted to teach each topic.

“*Course test*” means an evaluation of the overall effectiveness of the training which shall test the trainees’ knowledge and retention of the topics covered during the course.

“*Course test blueprint*” means written documentation identifying the proportion of course test questions devoted to each major topic in the course curriculum.

“*Department*” means the Iowa department of public health.

“*Deteriorated paint*” means any interior or exterior paint or other coating that is cracking, flaking, chipping, peeling, or chalking, or any paint or coating located on an interior or exterior surface that is otherwise damaged or separated from the substrate of a building component.

“*Discipline*” means one of the specific types or categories of lead-based paint activities identified in this chapter for which individuals may receive training from approved courses and become certified by the department. For example, “lead inspector/risk assessor” is a discipline.

“Distinct painting history” means the application history, as indicated by its visual appearance or a record of application, over time, of paint or other surface coatings to a component or room.

“Documented methodologies” means methods or protocols used to sample for the presence of lead in paint, dust, and soil.

“Dripline” means the area within three feet surrounding the perimeter of a building.

“Dust-lead hazard” means surface dust in residential dwellings or child-occupied facilities that contains a mass-per-area concentration of lead greater than or equal to 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present in a residential dwelling or child-occupied facility when the weighted arithmetic mean lead loading for all single-surface or composite samples of floors and interior windowsills is greater than or equal to 40 micrograms per square foot on floors, 250 micrograms per square foot on interior windowsills, and 400 micrograms per square foot on window troughs based on wipe samples. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled residential dwelling in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled residential unit on the property. A dust-lead hazard is present on floors, interior windowsills, or window troughs in an unsampled common area in a multifamily dwelling if a dust-lead hazard is present on floors, interior windowsills, or window troughs, respectively, in at least one sampled common area in the same common area group on the property.

“Elevated blood lead (EBL) child” means any child who has had one venous blood lead level greater than or equal to 20 micrograms per deciliter or at least two venous blood lead levels of 15 to 19 micrograms per deciliter.

“Elevated blood lead (EBL) inspection” means an inspection to determine the sources of lead exposure for an elevated blood lead (EBL) child and the provision within ten working days of a written report explaining the results of the investigation to the property owner and occupant of the residential dwelling or child-occupied facility being inspected and to the parents of the elevated blood lead (EBL) child. A certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of an elevated blood lead (EBL) inspection.

“Elevated blood lead (EBL) inspection agency” means an agency that employs or contracts with individuals who perform elevated blood lead (EBL) inspections. Elevated blood lead (EBL) inspection agencies may also employ or contract with individuals who perform other lead-based paint activities.

“Encapsulant” means a substance that forms a barrier between lead-based paint and the environment using a liquid-applied coating (with or without reinforcement materials) or an adhesively bonded coating material.

“Encapsulation” means the application of an encapsulant.

“Enclosure” means the use of rigid, durable construction materials that are mechanically fastened to the substrate in order to act as a barrier between lead-based paint and the environment.

“Firm” means a company, partnership, corporation, sole proprietorship, association, or other business entity that performs or offers to perform lead-based paint activities.

“Friction surface” means an interior or exterior surface that is subject to abrasion or friction including, but not limited to, certain window, floor, and stair surfaces.

“Guest instructor” means an individual designated by the training program manager or principal instructor to provide instruction specific to the lecture, hands-on work activities, or work practice components of a course.

“Hands-on skills assessment” means an evaluation which tests the trainees’ ability to satisfactorily perform the work practices and procedures identified in 641—70.6(135), as well as any other skill taught in a training course.

“Hazardous lead-based paint” means lead-based paint that is present on a friction surface where there is evidence of abrasion or where the dust-lead level on the nearest horizontal surface underneath the friction surface (e.g., the windowsill or floor) is greater than or equal to the dust-lead hazard level, lead-based paint that is present on an impact surface that is damaged or otherwise deteriorated from impact, lead-based paint that is present on a chewable surface, or any other deteriorated lead-based paint

in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

“Hazardous waste” means any waste as defined in 40 CFR 261.3.

“Impact surface” means an interior or exterior surface that is subject to damage by repeated sudden force such as certain parts of door frames.

“Inconclusive classification” means any XRF reading falling within the inconclusive range on the performance characteristic sheet, including the boundary values defining the range.

“Interim controls” means a set of measures designed to temporarily reduce human exposure or likely exposure to lead-based paint hazards, including repairing deteriorated lead-based paint, specialized cleaning, maintenance, painting, temporary containment, ongoing monitoring of lead-based paint hazards or potential hazards, and the establishment and operation of management and resident education programs.

“Interior windowsill” means the portion of the horizontal window ledge that protrudes into the interior of the room.

“Lead abatement” means any measure or set of measures designed to permanently eliminate lead-based paint hazards in a residential dwelling or child-occupied facility. Lead abatement includes, but is not limited to, (1) the removal of lead-based paint and dust-lead hazards, the permanent enclosure or encapsulation of lead-based paint, the replacement of lead-painted surfaces or fixtures, and the removal or covering of soil-lead hazards and (2) all preparation, cleanup, disposal, repainting or refinishing, and postabatement clearance testing activities associated with such measures. Lead abatement specifically includes projects for which there is a written contract or other documentation, which provides that an individual will be conducting lead abatement in or around a residential dwelling or child-occupied facility. In addition, lead abatement includes, but is not limited to, (1) projects for which there is a written contract or other document, which provides that an individual will be conducting activities in or to a residential dwelling or child-occupied facility that shall result in or are designed to permanently eliminate lead-based paint hazards, (2) projects resulting in the permanent elimination of lead-based paint hazards that are conducted by firms or individuals certified under 641—70.5(135), (3) projects resulting in the permanent elimination of lead-based paint hazards that are conducted by firms or individuals who, through their company name or promotional literature, represent, advertise, or hold themselves out to be in the business of performing lead-based paint abatement, and (4) projects resulting in the permanent elimination of lead-based paint that are conducted in response to a lead abatement order. However, in the case of items (1) through (4) of this definition, abatement does not include renovation, remodeling, landscaping, or other activities, when such activities are not designed to permanently eliminate lead-based paint hazards, but, instead, are designed to repair, restore, or remodel a given structure or dwelling, even though these activities may incidentally result in a reduction or elimination of lead-based paint hazards. Furthermore, lead abatement does not include interim controls, operations and maintenance activities, or other measures and activities designed to temporarily, but not permanently, reduce lead-based paint hazards.

“Lead-based paint” means paint or other surface coatings that contain lead greater than or equal to 1.0 milligram per square centimeter or greater than 0.5 percent by weight. Lead-based paint is present on any surface that is tested and found to contain lead greater than or equal to 1.0 milligram per square centimeter or greater than 0.5 percent by weight and on any surface like a surface tested in the same room equivalent that has a similar painting history and that is found to be lead-based paint.

“Lead-based paint activities” means, in the case of target housing and child-occupied facilities, lead-free inspection, lead inspection, elevated blood lead (EBL) inspection, lead hazard screen, risk assessment, lead abatement, visual risk assessment, clearance testing conducted after lead abatement, clearance testing conducted after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR 35.1340, and lead-safe work practices.

“Lead-based paint hazard” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard.

“Lead-free inspection” means an inspection to determine whether a single dwelling unit or multifamily housing is free of lead-based paint and qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint and the provision of a written report explaining the results of the lead-free inspection and options for reducing lead-based paint hazards to the property owner and to the person requesting the lead inspection.

“Lead hazard screen” means a limited risk assessment activity that involves limited paint and dust sampling and the provision of a written report explaining the results of the lead hazard screen to the property owner and to the person requesting the lead hazard screen.

“Lead inspection” means a surface-by-surface investigation to determine the presence of lead-based paint and a determination of the existence, nature, severity, and location of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead-based paint hazards to the property owner and to the person requesting the lead inspection. A certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall not determine that a residential dwelling is free of lead-based paint as a result of a lead inspection.

“Lead professional” means a person who conducts lead abatement, lead inspections, elevated blood lead (EBL) inspections, lead hazard screens, risk assessments, visual risk assessments, clearance testing after lead abatement, or clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR 35.1340.

“Lead-safe work practices” means methods that are used to minimize hazards when conducting interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation.

“Lead-safe work practices contractor” means a contractor who has completed a lead-safe work practices training program with a score of at least 80 percent on the course examination.

“Lead-safe work practices training program” means an 8-hour training program that provides training on how to work safely with lead-based paint.

“Living area” means any area of a residential dwelling used by at least one child under the age of six years, including, but not limited to, living rooms, kitchen areas, dens, playrooms, and children’s bedrooms.

“Loading” means the quantity of a specific substance present per unit of surface area, such as the amount of lead in micrograms contained in the dust collected from a certain surface area divided by the surface area in square feet or square meters.

“Mid-yard” means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.

“Multifamily dwelling” means a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.

“Multifamily housing” means one or more multifamily dwellings that are under the same ownership or management.

“Negative classification” means any value defined by the performance characteristics sheet as indicating that lead-based paint is not present.

“NIST 1.02 standard film” means the National Institute of Standards and Technology 1.02 milligrams of lead per square centimeter standard reference material.

“Occupant protection plan” means a plan developed by a certified lead abatement contractor prior to the commencement of lead abatement in a residential dwelling or child-occupied facility that describes the measures and management procedures that will be taken during lead abatement to protect the building occupants from exposure to any lead-based paint hazards.

“Ongoing lead-based paint maintenance” means the maintenance of housing pursuant to 24 CFR Part 35.

“Paint-lead hazard” means the presence of hazardous lead-based paint in a residential dwelling or a child-occupied facility.

“Paint stabilization” means repairing any physical defect in the substrate of a painted surface that is causing paint deterioration, removing loose paint and other material from the surface to be treated, and applying a new protective coating or paint pursuant to 24 CFR Part 35.

Paint testing” means the process of determining, by a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor, the presence or the absence of lead-based paint on deteriorated paint surfaces or painted surfaces to be disturbed or replaced pursuant to 24 CFR Part 35.

“Performance characteristics sheet (PCS)” means an information sheet developed by the U.S. Environmental Protection Agency and U.S. Department of Housing and Urban Development that defines acceptable operating specifications and procedures for a specific model of X-ray fluorescence analyzer (XRF). The PCS contains information about XRF readings taken on specific substrates, calibration check tolerances, interpretation of XRF readings, and other aspects of the model’s performance.

“Permanently covered soil” means soil which has been separated from human contact by the placement of a barrier consisting of solid, relatively impermeable materials, such as pavement or concrete. Grass, mulch, and other landscaping materials are not considered permanent covering.

“Play area” means an area of frequent soil contact by children of less than six years of age as indicated by, but not limited to, factors including the following: the presence of play equipment (sandboxes, swing sets, and sliding boards), toys, or other children’s possessions, observations of play patterns, or information provided by parents, residents, caregivers, or property owners.

“Positive classification” means any value defined by the performance characteristics sheet as indicating the presence of lead-based paint.

“Principal instructor” means the individual who has the primary responsibility for organizing and teaching a particular course.

“Random selection” means a method of choosing residential dwellings from multifamily housing consisting of similarly constructed and maintained residential dwellings such that each residential dwelling has an equal chance of being selected.

“Recognized laboratory” means an environmental laboratory recognized by the U.S. Environmental Protection Agency pursuant to Section 405(b) of the federal Toxic Substance Control Act as capable of performing an analysis for lead compounds in paint, soil, and dust.

“Reduction” means measures designed to reduce or eliminate human exposure to lead-based paint hazards through methods including interim controls and lead abatement.

“Refresher training course” means a course taken by a certified lead professional to maintain certification in a particular discipline.

“Registered lead-safe work practices contractor” means a lead-safe work practices contractor who has been registered by the department.

“Regulated entity” means any lead professional or firm that is regulated by the department by virtue of these rules, the Iowa Code, certification documents, approval documents, lead abatement notices, or other official regulatory promulgation.

“Rehabilitation” means the improvement of an existing structure through alterations, incidental additions, or enhancements. Rehabilitation includes repairs necessary to correct the results of deferred maintenance, the replacement of principal fixtures and components, improvements to increase the efficient use of energy, and installation of security devices.

“Residential building” means a building containing one or more residential dwellings.

“Residential dwelling” means (1) a detached single-family dwelling unit, including the surrounding yard, attached structures such as porches and stoops, and detached buildings and structures including, but not limited to, garages, farm buildings, and fences, or (2) a single-family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or part, as the home or residence of one or more persons.

“Risk assessment” means an investigation to determine the existence, nature, severity, and location of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead-based paint hazards to the property owner and to the person requesting the risk assessment.

“Room” means a separate part of the inside of a building, such as a bedroom, living room, dining room, kitchen, bathroom, laundry room, or utility room. To be considered a separate room, the room must be separated from adjoining rooms by built-in walls or archways that extend at least six inches from an intersecting wall. Half walls or bookcases count as room separators if built-in. Movable or collapsible partitions or partitions consisting solely of shelves or cabinets are not considered built-in walls. A screened-in porch that is used as a living area is a room. Each exterior side of the house is considered a separate room.

“Soil-lead hazard” means bare soil on residential real property or on the property of a child-occupied facility that contains total lead greater than or equal to 400 parts per million for the dripline, mid-yard, and play areas. A soil-lead hazard is present in a dripline, mid-yard, or play area when the soil-lead concentration from a composite sample of bare soil is greater than or equal to 400 parts per million.

“Soil sample” means a sample collected in a representative location using ASTM E1727, “Standard Practice for Field Collection of Soil Samples by Atomic Spectrometry Techniques,” or equivalent method.

“Standard treatments” means a series of hazard reduction measures designed to reduce all lead-based paint hazards in a residential dwelling without the benefit of a risk assessment or other evaluation pursuant to 24 CFR 35.1335. Standard treatments consist of the stabilization of all deteriorated interior and exterior paint, the provision of smooth and cleanable horizontal hard surfaces, the correction of dust-generating conditions (i.e., conditions causing rubbing, binding, or crushing of surfaces known to or presumed to be coated with lead-based paint), and the treatment of base soil to control known or presumed soil-lead hazards.

“State certification examination” means a discipline-specific examination approved by the department to test the knowledge of a person who has completed an approved training course and is applying for certification in a particular discipline. The state certification examination may not be administered by the provider of an approved course.

“Substrate” means the material underneath the paint or finish on a surface. Substrates are classified as brick, concrete, drywall, metal, plaster, or wood.

“Substrate correction” means adjustments that must be made to readings obtained from some X-ray fluorescence analyzers to correct for systematic biases due to interference from the substrate beneath the paint.

“Substrate correction value” means the value that is used to adjust readings obtained from some X-ray fluorescence analyzers to correct for systematic biases due to interference from the substrate beneath the paint.

“Targeted selection” means selecting residential dwellings from multifamily housing for risk assessments or lead hazard screens using information supplied by the property owner.

“Target housing” means housing constructed prior to 1978 with the exception of housing for the elderly or for persons with disabilities and housing which does not contain a bedroom, unless at least one child under the age of six years resides or is expected to reside in the housing for the elderly or persons with disabilities or housing which does not contain a bedroom. Target housing also includes any nonresidential building where lead-based paint activities are conducted prior to or during the conversion of the nonresidential building to target housing.

“Testing combination” means the unique combination of the room, component, substrate, and distinct painting history.

“Training hour” means at least 50 minutes of actual learning, including, but not limited to, time devoted to lecture, learning activities, small group activities, demonstrations, evaluations, or hands-on experience.

“Training manager” means the individual responsible for administering an approved course and monitoring the performance of principal instructors and guest instructors.

“Training program” means a person or organization sponsoring a lead professional training course.

“Visual inspection for clearance testing” means the visual examination of a residential dwelling or a child-occupied facility following lead abatement or following interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR 35.1340

to determine whether or not the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation has been successfully completed.

“Visual risk assessment” means a visual assessment to determine the presence of deteriorated paint or other potential sources of lead-based paint hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the assessment to the property owner and to the person requesting the visual risk assessment. For the purpose of compliance with this chapter, housing quality standards inspections conducted in housing owned by a public housing authority and housing that is receiving tenant-based rental assistance from a public housing authority are not considered visual risk assessments.

“Weighted arithmetic mean” means the arithmetic mean of sample results weighted by the number of subsamples in each sample. Its purpose is to give influence to a sample relative to the surface area it represents. A single surface dust sample is comprised of a single dust subsample. A composite dust sample may contain from two to four dust subsamples of the same area as each other and of each single surface dust sample in the composite. The weighted arithmetic mean is obtained by summing, for all dust samples, the product of the dust sample’s result multiplied by the number of dust subsamples in the dust sample, and dividing the sum by the total number of dust subsamples contained in all dust samples. For example, the weighted arithmetic mean of a single surface dust sample containing 60 micrograms per square foot ($\mu\text{g}/\text{ft}^2$), a composite dust sample (three dust subsamples) containing 100 $\mu\text{g}/\text{ft}^2$, and a composite dust sample (four dust subsamples) containing 110 $\mu\text{g}/\text{ft}^2$ is 100 $\mu\text{g}/\text{ft}^2$. This result is based on the equation $[60+(3\times 100)+(4\times 110)] / (1+3+4)$.

“Window trough” means, for a typical double-hung window, the portion of the exterior windowsill between the interior windowsill (or stool) and the frame of the storm window. If there is no storm window, the window trough is the area that receives both the upper and lower window sashes when they are both lowered. The window trough is sometimes referred to as the window well.

“Wipe sample” means a sample collected by wiping a representative surface of known area, as determined by ASTM E1728, “Standard Practice for Field Collection of Settled Dust Samples Using Wipe Sampling Methods for Lead Determination by Atomic Spectrometry Techniques,” or equivalent method, with an acceptable wipe material as defined in ASTM E1792, “Standard Specification for Wipe Sampling Materials for Lead in Surface Dust.” The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches.

“Worst case selection” means conducting a walk-through survey of all residential dwellings in the multifamily housing to select the highest-risk residential dwellings for risk assessments or lead hazard screens.

“X-ray fluorescence analyzer (XRF)” means an instrument that determines lead concentrations in milligrams per square centimeter (mg/cm^2) using the principle of X-ray fluorescence.

“XRF reading” means the number obtained when a surface is tested with an X-ray fluorescence analyzer.

641—70.3(135) Certification. Prior to March 1, 2000, lead professionals could be certified by the department. Beginning March 1, 2000, a person or a firm shall not conduct lead abatement, clearance testing after lead abatement, lead-free inspections, lead inspections, elevated blood lead (EBL) inspections, lead hazard screens, risk assessments, and visual risk assessments unless the person or firm has been certified by the department in the appropriate discipline. However, persons who perform these activities within residential dwellings that they own are not required to be certified, unless the residential dwelling is occupied by a person other than the owner or a member of the owner’s immediate family while these activities are being performed. In addition, elevated blood lead (EBL) inspections shall be conducted only by certified elevated blood lead (EBL) inspector/risk assessors employed by or under contract with a certified elevated blood lead (EBL) inspection agency. Beginning September 15, 2000, clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR 35.1340 shall be conducted only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead

(EBL) inspector/risk assessors. Lead professionals and firms shall not state that they have been certified by the state of Iowa unless they have met the requirements of 641—70.5(135) and been issued a current certificate by the department. Prior to March 1, 2000, elevated blood lead (EBL) inspection agencies could be certified by the department. Beginning March 1, 2000, elevated blood lead (EBL) inspection agencies must be certified by the department. Elevated blood lead (EBL) inspection agencies shall not state that they have been certified by the state of Iowa unless they have met the requirements of 641—70.5(135) and been issued a current certificate by the department.

641—70.4(135) Course approval and standards. Prior to March 1, 1999, lead professional training courses for initial certification and refresher training could be approved by the department. Beginning March 1, 1999, lead professional training courses for initial certification and refresher training must be approved by the department. Training programs shall not state that they have been approved by the state of Iowa unless they have met the requirements of 641—70.4(135) and been issued a letter of approval by the department.

70.4(1) Training courses shall meet the following requirements:

a. The training course shall employ a training manager who has the following qualifications:

(1) A bachelor's or graduate degree in building construction technology, engineering, industrial hygiene, safety, public health, or a related field; or two years of experience in managing a training program specializing in environmental hazards.

(2) Demonstrated experience, education, or training in lead professional activities, including lead inspection, lead abatement, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.

b. The training manager shall designate a qualified principal instructor for each course who has the following qualifications:

(1) Demonstrated experience, education, or training in teaching workers or adults.

(2) Certification as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, or lead abatement contractor.

(3) Demonstrated experience, education, or training in lead professional activities, including lead inspection, lead abatement, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.

c. The principal instructor shall be responsible for the organization of the course and oversight of the teaching of all course material. The training manager may designate guest instructors as needed to provide instruction specific to the lecture, hands-on activities, or work practice components of a course.

d. The training program shall ensure the availability of, and provide adequate facilities for, the delivery of the lecture, course test, hands-on training, and assessment activities. This includes providing training equipment that reflects current work practices and maintaining or updating the equipment as needed.

e. The training manager shall maintain the validity and integrity of the hands-on skills assessment to ensure that it accurately evaluates the trainees' performance of the work practices and procedures associated with the course topics contained in subrules 70.4(3) to 70.4(16).

f. The training manager shall maintain the validity and integrity of the course test to ensure that it accurately evaluates the trainees' knowledge and retention of the course topics.

g. The course test shall be developed in accordance with the test blueprint submitted with the course approval application.

h. The training program shall issue unique course completion certificates to each individual who passes the course. The course completion certificate shall include:

(1) The name and address of the individual and a unique identification number.

(2) The name of the particular course that the individual completed and the course length in hours.

(3) Dates of course completion and test passage.

(4) The name, address, and telephone number of the training program.

(5) The signature of the training manager.

i. The training manager shall develop and implement a quality control program. The plan shall be used to maintain and improve the quality of the training program over time. This plan shall contain at least the following elements:

(1) Procedures for periodic revision of training materials and the course test to reflect changes in regulations and recommended practices.

(2) Procedures for the training manager to conduct an annual review of the competency of the principal instructor.

j. The training program shall offer courses that teach the work practice standards for conducting lead-based paint activities contained in 641—70.6(135) and other standards developed by the department. These standards shall be taught in the appropriate courses to provide trainees with the knowledge needed to perform the lead-based paint activities they are responsible for conducting.

k. The training manager shall ensure that each course meets the requirements in this rule for the number of training hours and hours of hands-on training. The training manager shall ensure that any student who misses more than 20 minutes of class time makes up the time before taking the course test.

l. The training manager shall ensure that the training program complies at all times with all requirements in this rule.

m. The training manager shall allow the department to audit the training program to verify the contents of the application for approval and for reapproval.

n. The training program shall maintain, and make available to the department, upon request, the following records:

(1) All documents specified in paragraph 70.4(2) “*f.*”

(2) Current curriculum/course materials and documents reflecting any changes made to these materials.

(3) The course test blueprint and the course test.

(4) Information regarding how the hands-on assessment is conducted including, but not limited to, who conducts the assessment, how the skills are graded, what facilities are used, and the pass/fail rate.

(5) The quality control plan as described in paragraph 70.4(1) “*i.*”

(6) A file for each student who has completed a course. Each student file shall contain the following:

1. The student’s name, address, and telephone number.

2. The student’s test and answer sheet.

3. A copy of the student’s course completion certificate.

4. A copy of the student’s hands-on skill assessment, if applicable.

(7) A file for each individual course that has been offered. Each file shall include the following:

1. The dates of the course.

2. The location of the course.

3. The instructors who taught the course.

4. A copy of the curriculum used for the course.

5. A copy of the test used for the course.

6. Documentation of the times that each student was present at the course, including documentation of how a student made up missed time.

7. The course evaluations.

(8) Any other materials that have been submitted to the department as part of the program’s application for approval.

o. The training program shall retain all required records at the address specified on the training program approval application for a minimum of six years.

p. The training program shall notify the department in writing within 30 days of changing the address specified on its training program approval application or transferring the records from that address.

q. A training program shall notify the department in writing at least 30 days in advance of offering an approved course. The notification shall include the date(s), time(s), and location(s) where the approved course will be held.

r. A training program shall provide the following information to the department electronically in a format specified by the department within 30 days of the conclusion of an approved course for each student who has taken the approved course:

- (1) Name, address, and social security number.
- (2) Course completion certificate number.
- (3) Test score.

70.4(2) If a training program desires approval of a course by the department, the training program shall apply to the department for approval of the course at least 90 days before the initial offering of the course. The application shall include:

- a.* Training program name, contact person, address, and telephone number.
- b.* Course dates and times.
- c.* Course location, including a description of the facilities and equipment to be used for lecture and hands-on training.
- d.* Course agenda, including approximate times allotted to each training segment.
- e.* A copy of each reference material, text, student and instructor manuals, and audio-visual material used in the course.
- f.* The name(s) and qualifications of the training manager, principal instructor(s), and guest instructor(s). The following documents shall be submitted as evidence that training managers and principal instructors have the education, work experience, training requirements, or demonstrated experience required by subrule 70.4(1):
 - (1) Official transcripts or diplomas as evidence of meeting the education requirements.
 - (2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.
 - (3) Certificates from lead-specific training courses, as evidence of meeting the training requirements.
- g.* A copy of the course test blueprint.
- h.* A description of the activities and procedures that will be used for conducting the assessment of hands-on skills for each course.
- i.* Maximum class size.
- j.* A copy of the quality control plan for the course.
- k.* A nonrefundable fee of \$200.

70.4(3) To be approved for the training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors prior to March 1, 1999, a course was required to be at least 24 training hours with a minimum of 8 hours devoted to hands-on training activities. Beginning March 1, 1999, a course must be at least 40 training hours with a minimum of 12 hours devoted to hands-on training activities. Lead inspector/risk assessor and elevated blood lead (EBL) inspector/risk assessor training courses shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of an inspector/risk assessor.
- b.* Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.
- c.* Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d.* Lead-based paint inspection methods, including selection of rooms and components for sampling or testing to determine if a property is free of lead-based paint as specified in the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (1995, U.S. Department of Housing and Urban Development), and methods to determine if lead-based paint hazards are present in a property.*
- e.* Paint, dust, and soil sampling methodologies.*
- f.* Clearance standards and testing, including random sampling.*
- g.* Collection of background information to perform a risk assessment.
- h.* Sources of environmental lead contamination such as paint, surface dust and soil, and water.

- i.* Visual inspection to identify lead-based paint hazards.*
- j.* Lead hazard screen protocol.
- k.* Visual risk assessment protocol.
- l.* Sampling for other sources of lead exposure.*
- m.* Interpretation of lead-based paint and other lead sampling results, including all applicable federal, state, and local guidance or regulations pertaining to lead-based paint hazards.*
- n.* Development of hazard control options, the role of interim controls, and operations and maintenance activities to reduce lead-based paint hazards.
- o.* Approved methods for conducting lead-based paint abatement and interim controls.
- p.* Prohibited methods for conducting lead-based paint abatement and interim controls.
- q.* Interior dust abatement and cleanup.
- r.* Soil and exterior dust abatement and cleanup.
- s.* Preparation of the final inspection report.
- t.* Record keeping.

u. The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

v. The instructor shall provide each student with instructions and forms needed to apply to the department for certification and information provided by the department regarding the state certification examination.

70.4(4) To be approved for the training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors who have already completed an approved sampling technician course, a course must be at least 20 training hours with a minimum of 8 hours devoted to hands-on training activities. The training course shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of a lead inspector/risk assessor and elevated blood lead (EBL) inspector/risk assessor.
- b.* Lead-based paint inspection methods, including selection of rooms and components for sampling or testing to determine if a property is free of lead-based paint as specified in the work practice standards in 641—70.6(135), and methods to determine if lead-based paint hazards are present in a property.*
- c.* Collection of background information to perform a risk assessment.
- d.* Lead hazard screen protocol.
- e.* Visual risk assessment protocol.
- f.* Sampling for other sources of lead exposure.*
- g.* Interpretation of lead-based paint and other lead sampling results, including all applicable federal, state, and local guidance or regulations pertaining to lead-based paint hazards.*
- h.* Development of hazard control options, the role of interim controls, and operations and maintenance activities to reduce lead-based paint hazards.*
- i.* Preparation of the final inspection report.
- j.* Record keeping.
- k.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment.

The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

l. The instructor shall provide each student with instructions and forms needed to apply to the department for certification and information provided by the department regarding the state certification examination.

70.4(5) Rescinded IAB 3/31/04, effective 5/5/04.

70.4(6) Rescinded IAB 3/31/04, effective 5/5/04.

70.4(7) Rescinded IAB 3/31/04, effective 5/5/04.

70.4(8) To be approved for the training of lead abatement contractors, a course must be at least 40 training hours with a minimum of 12 hours devoted to hands-on activities and shall cover at least the

following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a. Role and responsibilities of a lead abatement contractor.
- b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.
- c. Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d. Liability and insurance issues relating to lead abatement.
- e. Identification of lead-based paint and lead-based paint hazards.*
- f. Interpretation of lead inspection reports.*
- g. Development and implementation of an occupant protection plan and lead abatement report.
- h. Respiratory protection and protective clothing.*
- i. Employee information and training.
- j. Approved methods for conducting lead abatement and interim controls.*
- k. Prohibited methods for conducting lead abatement and interim controls.
- l. Interior dust abatement and cleanup.*
- m. Soil and exterior dust abatement and cleanup.*
- n. Clearance standards and testing, including random sampling.
- o. Cleanup and waste disposal.
- p. Record keeping.
- q. The course shall conclude with a course test and, if applicable, a hands-on skills assessment.

The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

r. The instructor shall provide each student with instructions and forms needed to apply to the department for certification and information provided by the department regarding the state certification examination.

70.4(9) To be approved for the training of lead abatement contractors who have already completed an approved lead abatement worker course, a course must be at least 16 training hours with a minimum of 4 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a. Role and responsibilities of a lead abatement contractor.
- b. Liability and insurance issues relating to lead abatement.
- c. Interpretation of lead inspection reports.*
- d. Development and implementation of an occupant protection plan and abatement report.
- e. Employee information and training.
- f. Clearance standards and testing, including random sampling.
- g. Record keeping.
- h. The course shall conclude with a course test and, if applicable, a hands-on skills assessment.

The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

i. The instructor shall provide each student with instructions and forms needed to apply to the department for certification and with information provided by the department regarding the state certification examination.

70.4(10) To be approved for the training of lead abatement workers, a course must be at least 24 training hours with a minimum of 8 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a. Role and responsibilities of a lead abatement worker.
- b. Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

- c.* Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d.* Identification of lead-based paint and lead-based paint hazards.*
- e.* Approved methods for conducting lead-based paint abatement and interim controls.*
- f.* Prohibited methods for conducting lead-based paint abatement and interim controls.
- g.* Interior dust abatement and cleanup.*
- h.* Soil and exterior dust abatement and cleanup.*
- i.* Cleanup and waste disposal.
- j.* Respiratory protection and protective clothing.*
- k.* Personal hygiene.
- l.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment.

The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

- m.* The instructor shall provide each student with instructions and forms needed to apply to the department for certification.

70.4(11) To be approved for the training of sampling technicians prior to September 15, 2000, a course was required to be at least 16 training hours with a minimum of 4 hours devoted to hands-on activities. Beginning September 15, 2000, a course must be at least 20 training hours with a minimum of 4 hours devoted to hands-on training activities. The training course shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of a sampling technician.
- b.* Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.
- c.* Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d.* Methods of conducting visual risk assessments.*
- e.* Paint, dust, and soil sampling methodologies.*
- f.* Clearance standards and testing, including random sampling.*
- g.* Identification of lead-based paint hazards.*
- h.* Sources of environmental lead contamination such as paint, surface dust and soil, and water.
- i.* Visual inspection to identify lead-based paint hazards.*
- j.* Approved methods for conducting lead abatement and interim controls.
- k.* Prohibited methods for conducting lead abatement and interim controls.
- l.* Methods of interim controls and lead abatement for interior dust and cleanup.
- m.* Methods of interim controls and lead abatement for exterior dust and soil and cleanup.
- n.* Preparation of the final assessment report.
- o.* Preparation of clearance testing reports for interim controls.
- p.* Record keeping.
- q.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment.

The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

- r.* The instructor shall provide each student with instructions and forms needed to apply to the department for certification.

70.4(12) To be approved for the training of project designers, a course must be at least 48 instructional training hours with a minimum of 12 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of a lead abatement contractor.
- b.* Background information on lead and its adverse health effects, how children and adults are exposed to lead, and how to prevent lead exposure in children and adults.

- c.* Background information on federal, state, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
- d.* Liability and insurance issues relating to lead abatement.
- e.* Identification of lead-based paint and lead hazards.*
- f.* Interpretation of lead inspection reports.*
- g.* Development and implementation of an occupant protection plan and lead abatement report.
- h.* Respiratory protection and protective clothing.*
- i.* Employee information and training.
- j.* Approved methods for conducting lead-based paint abatement and interim controls.*
- k.* Prohibited methods for conducting lead-based paint abatement and interim controls.
- l.* Interior dust abatement and cleanup.*
- m.* Soil and exterior dust abatement and cleanup.*
- n.* Clearance standards and testing, including random sampling.
- o.* Cleanup and waste disposal.
- p.* Record keeping.
- q.* Role and responsibilities of a project designer.
- r.* Development and implementation of an occupant protection plan for large-scale lead abatement projects.
- s.* Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.
- t.* Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.
- u.* Clearance standards and testing for large-scale lead abatement projects.
- v.* Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.
- w.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.
- x.* The instructor shall provide each student with instructions and forms needed to apply to the department for certification and with information provided by the department regarding the state certification examination.

70.4(13) To be approved for the training of project designers who have already completed an approved lead abatement contractor course, a course must be at least 8 instructional training hours and shall cover at least the following subjects:

- a.* Role and responsibilities of a project designer.
- b.* Development and implementation of an occupant protection plan for large-scale abatement projects.
- c.* Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.
- d.* Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.
- e.* Clearance standards and testing for large-scale lead abatement projects.
- f.* Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.
- g.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.
- h.* The instructor shall provide each student with instructions and forms needed to apply to the department for certification and information provided by the department regarding the state certification examination.

70.4(14) To be approved for the training of project designers who have already completed an approved lead abatement worker course, a course must be at least 24 instructional training hours with

a minimum of 4 hours devoted to hands-on activities and shall cover at least the following subjects (requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course):

- a.* Role and responsibilities of a lead abatement contractor.
- b.* Liability and insurance issues relating to lead abatement.
- c.* Interpretation of lead inspection reports.*
- d.* Development and implementation of an occupant protection plan and lead abatement report.
- e.* Employee information and training.
- f.* Clearance standards and testing, including random sampling.
- g.* Record keeping.
- h.* Role and responsibilities of a project designer.
- i.* Development and implementation of an occupant protection plan for large-scale lead abatement projects.
- j.* Lead abatement and lead hazard reduction methods, including restricted practices for large-scale lead abatement projects.
- k.* Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale lead abatement projects.
- l.* Clearance standards and testing for large-scale lead abatement projects.
- m.* Integration of lead abatement methods with modernization and rehabilitation projects for large-scale lead abatement projects.
- n.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.
- o.* The instructor shall provide each student with instructions and forms needed to apply to the department for certification and information provided by the department regarding the state certification examination.

70.4(15) To be approved for refresher training of sampling technicians, lead abatement contractors, lead abatement workers, and project designers, a course must be at least 8 training hours. To be approved for refresher training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors who completed an approved 24-hour training course, a course must be at least 8 training hours to meet the recertification requirements of subrule 70.5(3). To be approved for refresher training of lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors to meet the recertification requirements of subrule 70.5(6), a course must be at least 16 training hours. All refresher courses shall cover at least the following topics:

- a.* A review of the curriculum topics of the initial certification course for the appropriate discipline as listed in subrules 70.4(3) to 70.4(14).
- b.* An overview of current safety practices relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- c.* Current laws and regulations relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- d.* Current technologies relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- e.* The course shall conclude with a course test and, if applicable, a hands-on skills assessment. The student must achieve a score of at least 80 percent on the examination and successfully complete the hands-on skills assessment to successfully complete the course.

70.4(16) Approvals of training courses shall expire three years after the date of issuance. The training manager shall submit the following at least 90 days prior to the expiration date for a course to be reapproved:

- a.* Sponsoring organization name, contact person, address, and telephone number.
- b.* A list of the courses for which reapproval is sought.
- c.* A description of any changes to the training staff, facility, equipment, or course materials since the approval of the training program.

d. A statement signed by the training manager stating that the training program complies at all times with 641—70.4(135).

e. A nonrefundable fee of \$200.

70.4(17) The department shall consider a request for approval of a training course that has been approved by a state or tribe authorized by the U.S. Environmental Protection Agency.

a. The course shall be approved if it meets the requirements of 641—70.4(135).

b. If the course does not meet all of the requirements of 641—70.4(135), the department shall inform the training provider of additional topics and training hours that are needed to meet the requirements of 641—70.4(135).

641—70.5(135) Certification, interim certification, and recertification.

70.5(1) A person wishing to become a certified lead professional shall apply on forms supplied by the department. The applicant must submit:

a. A completed application form.

b. A certificate of completion of an approved course for the discipline in which the applicant wishes to become certified.

c. If wishing to become a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor, documentation of successful completion of the manufacturer's training course or equivalent for the X-ray fluorescence (XRF) analyzer that the inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor will use to conduct lead inspections.

d. If wishing to become a certified elevated blood lead (EBL) inspector/risk assessor, documentation of successful completion of 8 hours of training from the department's childhood lead poisoning prevention program. This training shall cover the roles and responsibilities of an elevated blood lead (EBL) inspector/risk assessor and the environmental and medical case management of elevated blood lead (EBL) children. The training shall conclude with a written examination. The applicant must achieve a score of at least 80 percent on the examination to successfully complete the training.

e. Documentation that the applicant meets the additional experience and education requirements in subrule 70.5(2) for the discipline in which the applicant wishes to become certified. The following documents shall be submitted as evidence that the applicant has the education and work experience required by subrule 70.5(2):

(1) Official transcripts or diplomas as evidence of meeting the education requirements.

(2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.

f. Beginning March 1, 2000, to become certified as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, or project designer, a certificate showing that the applicant has passed the state certification examination in the discipline in which the applicant wishes to become certified.

g. A \$50 nonrefundable fee.

h. A person may receive interim certification from the department as a lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, or project designer by submitting the items required by paragraphs 70.5(1) "a" to "e" and "g" to the department. If the applicant completed an approved course prior to September 1, 1999, the interim certification expired on March 1, 2000. If the applicant completed an approved course on or after September 1, 1999, the interim certification shall expire six months from the date of completion of an approved course. An applicant shall upgrade an interim certification to a certification by submitting a certificate to the department showing that the applicant has passed the state certification examination as required by paragraph 70.5(1) "f." Interim certification is equivalent to certification.

70.5(2) Beginning September 1, 1999, to become certified by the department as a lead professional, an applicant must meet the education and experience requirements for the appropriate discipline:

a. Lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors must meet one of the following requirements:

(1) Bachelor's degree and one year of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(2) Associate's degree and two years of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(3) High school diploma and three years of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(4) Certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian, registered environmental health specialist, or registered nurse.

b. Lead abatement contractors must meet one of the following requirements:

(1) One year of experience as a certified lead abatement worker.

(2) Two years of related experience or education (e.g., lead, housing inspection, building trades, property management and maintenance).

c. No additional education or experience is required for lead abatement workers.

d. Sampling technicians must meet one of the following requirements:

(1) Associate's degree.

(2) High school diploma and one year of related experience (e.g., lead, environmental health, public health, housing inspection, building trades).

(3) Certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian, registered environmental health specialist, or registered nurse.

e. Project designers must meet one of the following requirements:

(1) Bachelor's degree in engineering, architecture, or a related profession, and one year of experience in building construction and design or a related field.

(2) Four years of experience in building construction and design or a related field.

70.5(3) Certifications issued prior to September 1, 1999, expired on February 29, 2000. By March 1, 2000, lead professionals certified prior to September 1, 1999, were required to be recertified by submitting the following:

a. A completed application form.

b. For lead inspector/risk assessors and elevated blood lead (EBL) inspector/risk assessors, a certificate showing the completion of additional training hours in an approved course to meet the total training hours required by subrule 70.4(3) and the completion of an 8-hour refresher course.

c. Reserved.

d. Documentation that the applicant meets the experience and education requirements in subrule 70.5(2) for the discipline in which the applicant wishes to become certified. The following documents shall be submitted as evidence that the applicant has the education and work experience required by subrule 70.5(2):

(1) Official transcripts or diplomas as evidence of meeting the education requirements.

(2) Résumés, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirements.

e. For lead abatement contractors, lead abatement workers, project designers, and sampling technicians, if the date on which the applicant completed an approved training course is three years or more before the date of recertification, a certificate showing that the applicant has successfully completed an approved refresher training course for the appropriate discipline.

f. A certificate showing that the applicant has passed the state certification examination in the discipline in which the applicant wishes to become certified.

g. A \$50 nonrefundable fee.

70.5(4) By September 15, 2000, sampling technicians certified prior to July 1, 2000, were required to be recertified by submitting a certificate showing the completion of additional training hours in an approved course to meet the total training hours required by subrule 70.4(11) and the completion of an 8-hour refresher course.

70.5(5) All agencies that perform or offer to perform elevated blood lead (EBL) inspections after September 15, 2000, must be certified by the department. An agency wishing to become a certified

elevated blood lead (EBL) inspection agency shall apply on forms supplied by the department. The agency must submit:

- a. A completed application form.
- b. Documentation that the agency has the authority to require the repair of lead hazards identified through an elevated blood lead (EBL) inspection.
- c. Documentation that the agency employs or has contracted with a certified elevated blood lead (EBL) inspector/risk assessor to provide environmental case management of all elevated blood lead (EBL) children in the agency's service area, including follow-up to ensure that lead-based paint hazards identified as a result of elevated blood lead (EBL) inspections are corrected, and that lead-based paint activities will be conducted only by appropriately certified lead professionals. In addition, the agency must document that the agency and its employees or contractors will follow the work practice standards in 641—70.6(135) for conducting lead-based paint activities.
- d. A statement that the certified elevated blood lead (EBL) inspection agency will maintain all records required by subrule 70.6(10).

70.5(6) Beginning March 1, 2000, individuals certified as lead professionals must be recertified each year. To be recertified, lead professionals must submit the following:

- a. A completed application form.
- b. A \$50 nonrefundable fee.
- c. Every three years, a certificate showing that the applicant has successfully completed an approved refresher training course for the appropriate discipline. The initial refresher training course must be completed no more than three years after the date on which the applicant completed an approved training program.

70.5(7) The department shall approve the state certification examinations for the disciplines of lead inspector/risk assessor, elevated blood lead (EBL) inspector/risk assessor, lead abatement contractor, and project designer. The state certification examination shall be administered by selected community college testing centers in Iowa through an agreement with the consortium of Iowa community colleges. A community college testing center shall set the fee for administering the state certification examination to each applicant and shall collect the fee from each applicant.

- a. An individual may take the state certification examination no more than three times within six months of receiving a certificate of completion from an approved course.
- b. If an individual does not pass the state certification examination within six months of receiving a certificate of completion from an approved course, the individual must retake the appropriate approved course before reapplying for certification.

70.5(8) Reciprocity. Each applicant for certification who is certified in any of the disciplines specified in this rule in another state may request reciprocal certification. The department shall evaluate the requirements for certification to determine that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa. If the department determines that the requirements for certification in such other state are as protective of health and the environment as the requirements for certification in Iowa, the applicant may be certified after passing a proctored test covering Iowa-specific lead information with a score of at least 80 percent. Each applicant for certification pursuant to this subrule shall submit the appropriate application accompanied by the fee for each discipline as specified in 641—70.5(135).

641—70.6(135) Work practice standards for conducting lead-based paint activities in target housing and child-occupied facilities. Prior to March 1, 2000, when performing any lead-based paint activity described as a lead-free inspection, lead inspection, elevated blood lead (EBL) inspection, lead hazard screen, risk assessment, visual risk assessment, or lead abatement, a certified individual was required to perform that activity in compliance with the appropriate requirements below. Beginning March 1, 2000, any lead-based paint activity described as a lead-free inspection, lead inspection, elevated blood lead (EBL) inspection, lead hazard screen, risk assessment, visual risk assessment, or lead abatement shall be performed according to the work practice standards in 641—70.6(135), and a certified individual must perform that activity in compliance with the appropriate requirements below.

70.6(1) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct a lead-free inspection according to the following standards. Beginning March 1, 2000, a lead-free inspection shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall notify the department in writing no later than 30 days after conducting a lead-free inspection in a residential dwelling or child-occupied facility. The notification shall include the following information:

- (1) The address where the lead-free inspection was conducted.
- (2) The dates when the lead-free inspection was conducted.
- (3) The name, address, telephone number, Iowa certification number, and signature of the contact for the certified firm that conducted the lead-free inspection.
- (4) The name, address, telephone number, Iowa certification number, and signature of each certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor who conducted the lead-free inspection.

b. When conducting a lead-free inspection in a residential dwelling, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint in each room, including each exterior side.

(2) Except for components known to have been replaced after December 31, 1977, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. Except for walls, one sample shall be taken for each testing combination in a room. Each wall in a room shall be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall require one of the following two types of evidence to determine that components were replaced after 1977:

1. Detailed specifications showing which components were to be replaced, restored, enclosed, or encapsulated and evidence that the work was actually completed such as receipts for building materials, city building records showing a date of remodeling, or a final inspection by the city or another inspector showing that the work was actually completed.

2. A certification under penalty of perjury per Iowa Code section 622.1 from the contractor who did the work or from the person(s) who owned the property at the time outlining all of the components that were removed and replaced.

If one of these two types of evidence is not available, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test the component.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall note any components where lead-based paint has been enclosed or encapsulated. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not make a determination that the residential dwelling is lead-free where components that are painted with lead-based paint have been enclosed or encapsulated.

(4) Paint shall be tested using adequate quality control by X-ray fluorescence (XRF) or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use standards provided by the manufacturer and the NIST 1.02 standard film for calibration of the X-ray fluorescence analyzer.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection, every four hours, and at the end of the inspection.

4. Prior to taking the final set of calibration readings and if required by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If instructed by the property owner or the person requesting the report, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that inconclusive readings are positive, but shall not assume that inconclusive readings are negative.

7. As described by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct retesting of 10 surfaces, calculate the retest tolerance limit, and determine whether the inspection meets the retest tolerance limit. If the retest tolerance limit is not met, then this procedure shall be repeated with 10 additional surfaces. If the retest tolerance limit is not met with the 20 retested surfaces, then all results of the inspection shall be considered invalid.

(5) If each testing combination in the residential dwelling is found to be free of lead-based paint, then the residential dwelling is free of lead-based paint. If any surface in the residential dwelling is found to be painted with lead-based paint, then the residential dwelling is not free of lead-based paint.

(6) If lead-based paint is identified through a lead-free inspection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

(7) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a lead-free inspection is completed. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the lead-free inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The report shall include, at least:

1. A statement that the inspection was conducted to determine whether the residential dwelling is free of lead-based paint;

2. Date of inspection;

3. Address of building;

4. Date of construction;

5. Apartment numbers (if applicable);

6. The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

7. Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the investigation;

8. Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

9. Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) device;

10. XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated at each required calibration;

11. Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;

12. The results of retesting of 10 surfaces, calculations to determine the retest tolerance limit, and the determination of whether the inspection meets the retest tolerance limit;

13. If the inspector determines that the residential dwelling is free of lead-based paint, the report shall contain the following statement:

“The results of this inspection indicate that no lead in amounts greater than or equal to 1.0 mg/cm² in paint was found on any building components, using the inspection protocol in Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (1997). Therefore, this residential dwelling qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint, as defined in the rule. However, some painted surfaces may contain levels of lead below 1.0 mg/cm², which could create lead dust or lead-contaminated soil hazards if the paint is turned into dust by abrasion, scraping, or sanding. This report should be kept by the owner and all future owners for the life of the residential dwelling. Per the disclosure requirements of 24 CFR Part 35 and 40 CFR Part 745, prospective buyers are entitled to all available inspection reports should the property be resold.”;

14. If any lead-based paint is identified, a description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where

lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

15. A description of interim controls and abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

16. Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745; and

17. Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

c. When conducting a lead-free inspection in multifamily housing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) A certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may randomly select residential dwellings for testing when conducting a lead-free inspection in multifamily housing. If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not randomly select the residential dwellings for testing or if there are not enough residential dwellings to randomly select them for sampling, all residential dwellings shall be tested. If random selection is used, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor conducting the lead-free inspection shall randomly select the residential dwellings to be tested. The property owner, manager, or another interested party shall not specify which residential dwellings are to be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

Table 1

Minimum Number of Residential Dwellings to be Randomly Selected in Multifamily Housing for Lead-Free Inspection, Risk Assessment, Lead Hazard Screen, or Clearance Testing

Number of Similar Residential Dwellings, Similar Common Areas, or Similar Exteriors in Multifamily Housing	Lead-Free Inspection, Risk Assessment, or Lead Hazard Screen		Clearance Testing
	Number of Pre-1960 Residential Dwellings or Residential Dwellings of Unknown Date of Construction to Randomly Select for Testing	Number of 1960-1977 Residential Dwellings to Randomly Select for Testing	Number of Residential Dwellings to Randomly Select for Clearance Testing

(2) A certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may randomly select each type of common area in the multifamily housing, including but not limited to hallways, exterior sides of a building, and laundry rooms, for testing. Each type of common area shall be counted separately. If built before 1960, the multifamily housing shall contain at least 20 of a type of common area in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 of a type of common area in order to use random selection. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not randomly select the common areas for testing or if there are not enough common areas to randomly select them for testing, all common areas shall be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of each type of common area to randomly select for testing.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint in each room of each residential dwelling selected for testing and in each common area selected for testing.

(4) Except for components known to have been replaced after December 31, 1977, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room of a residential dwelling chosen for testing and in each common area chosen for testing. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. Each wall in a room or a common area shall be tested. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall require one of the following two types of evidence to determine that components were replaced after 1977:

1. Detailed specifications showing which components were to be replaced, restored, enclosed, or encapsulated and evidence that the work was actually completed such as receipts for building materials, city building records showing a date of remodeling, or evidence of a final inspection by the city or another inspector showing that the work was actually completed.

2. A certification under penalty of perjury per Iowa Code section 622.1 from the contractor who did the work or from the person(s) who owned the property at the time outlining all of the components that were removed and replaced.

If one of these two types of evidence is not available, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test the component.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall note any components where lead-based paint has been enclosed or encapsulated. The certified

lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not make a determination that a component or the multifamily housing is lead-free where components that are painted with lead-based paint have been enclosed or encapsulated.

(6) Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must use an X-ray fluorescence analyzer which has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not use an X-ray fluorescence analyzer using a software version or a mode of operation that could result in inconclusive readings or would require substrate correction.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use standards provided by the manufacturer and the NIST 1.02 standard film for calibration of the X-ray fluorescence analyzer.

4. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection, every four hours, and at the end of the inspection.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading as positive or negative according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall count the number of XRF readings taken for each component type. If fewer than 40 of any component type were tested, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall randomly choose additional testing combinations for the component type to reach a total of 40 XRF readings. If fewer than 40 testing combinations are available for testing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination.

(7) For each component type where at least 40 testing combinations have been tested, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine the number and percentage of each component type that is classified as positive or negative. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each component type as follows:

1. Lead-based paint is not present on a component type if all readings are classified as negative.

2. Lead-based paint is present on a component type if at least 15 percent of the readings are classified as positive.

3. Lead-based paint is present on a component type if greater than or equal to 5 percent but less than 15 percent of the XRF readings are classified as positive, unless the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor collects paint samples and obtains laboratory analyses for all positive XRF readings. If the laboratory analyses show that lead-based paint

is not present on any components, then the component type is negative. If the laboratory analyses show that lead-based paint is present on any component, then the component type is positive.

4. Lead-based paint is present on a component type if greater than 0 but less than 5 percent of the XRF readings are classified as positive, unless the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor collects paint samples and obtains laboratory analyses for all positive XRF readings or randomly selects a second set of residential dwellings for testing. If the laboratory analyses show that lead-based paint is not present on any components, then the component type is negative. If the laboratory analyses show that lead-based paint is present on any component, then the component type is positive. If a second set of randomly selected residential dwellings is sampled and greater than 0 but less than 2.5 percent of the combined set of results is positive, the component type may be considered as not having lead-based paint developmentwide but rather, having lead-based paint in isolated locations, with a reasonable degree of confidence. Individual components that are classified as positive should be considered lead-based painted and managed or abated appropriately.

5. If a particular component type in the sampled residential dwellings is classified as positive, that same component type in the unsampled residential dwellings is also classified as positive.

(8) If fewer than 40 of a component type are available for testing, each testing combination must be classified individually as positive or negative.

(9) If any component type or individual component is classified as positive, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that the multifamily housing is free of lead-based paint.

(10) As specified by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct retesting of 10 surfaces selected from two residential dwellings, calculate the retest tolerance limit, and determine whether the inspection meets the retest tolerance limit. If the retest tolerance limit is not met, then this procedure shall be repeated with 10 additional surfaces selected from the two residential dwellings. If the retest tolerance limit is not met with the 20 retested surfaces, then all results of the inspection shall be considered invalid.

(11) If lead-based paint is identified on any component or component type, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

(12) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility inspected. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The inspection report shall include, at least:

1. Date of each inspection;
2. Address of each building in the multifamily housing;
3. Date of construction for each building in the multifamily housing;
4. A list of the apartments and common areas in each building in the multifamily housing;
5. The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
6. A statement that the inspection was conducted to determine that lead-based paint is not present;
7. The name of the Iowa-certified inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor who randomly selected the residential dwellings and common areas for testing;
8. The number of residential dwellings and common areas that were selected for testing, how these numbers were determined, and a list of the residential dwellings and common areas that were selected for testing;

9. Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the investigation;

10. Name, address, and telephone number of each laboratory conducting an analysis of collected samples;

11. Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;

12. XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated at each required calibration;

13. Specific locations by room of each painted component tested for the presence of lead-based paint and by residential dwelling or common area and the results for each component expressed in terms appropriate to the sampling method used;

14. Component aggregations and the determination of whether lead-based paint is present by component type;

15. The results of retesting of 10 surfaces, calculations to determine the retest tolerance limit, and the determination of whether the inspection meets the retest tolerance limit;

16. If the inspector determines that the multifamily housing is free of lead-based paint, the report shall contain the following statement:

“The results of this inspection indicate that no lead in amounts greater than or equal to 1.0 mg/cm² in paint was found on any building components, using the inspection protocol in Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (1997). Therefore, this multifamily housing qualifies for the exemption in 24 CFR Part 35 and 40 CFR Part 745 for target housing being leased that is free of lead-based paint, as defined in the rule. However, some painted surfaces may contain levels of lead below 1.0 mg/cm², which could create lead dust or lead-contaminated soil hazards if the paint is turned into dust by abrasion, scraping, or sanding. This report should be kept by the owner and all future owners for the life of the multifamily housing. Per the disclosure requirements of 24 CFR Part 35 and 40 CFR Part 745, prospective buyers are entitled to all available inspection reports should the property be resold.”;

17. If any lead-based paint is identified, a description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

18. A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

19. Information regarding the owner’s obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745; and

20. Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

70.6(2) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct lead inspections according to the following standards. Beginning March 1, 2000, lead inspections shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting a lead inspection in a residential dwelling or child-occupied facility, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint in each room, including each exterior side.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. One sample shall be taken for each testing combination in a room. If a testing combination is not tested, it shall be assumed to be painted with lead-based paint.

b. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If required by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where required by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the

certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

c. If lead-based paint is identified through an inspection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

d. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility inspected. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The inspection report shall include, at least:

- (1) A statement that the inspection was conducted to identify lead-based paint and lead-based paint hazards in the residential dwelling;
- (2) Date of each inspection;
- (3) Address of building;
- (4) Date of construction;
- (5) Apartment numbers (if applicable);
- (6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (7) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the investigation;
- (8) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
- (9) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;
- (10) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;
- (11) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;
- (12) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;
- (13) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(14) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(15) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CRF Part 35 and Subpart I of 40 CFR Part 745; and

(16) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

70.6(3) A certified elevated blood lead (EBL) inspector/risk assessor must conduct elevated blood lead (EBL) inspections according to the following standards. Beginning March 1, 2000, elevated blood lead (EBL) inspections shall be conducted only by a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting an elevated blood lead (EBL) inspection, the certified elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified elevated blood lead (EBL) inspector/risk assessor shall test paint in each room, including each exterior side.

(2) The certified elevated blood lead (EBL) inspector/risk assessor shall test each testing combination in each room. One sample shall be taken for each testing combination in a room. On windows, the window frame, interior windowsill, window sash, and window trough shall each be considered a separate testing combination. If a testing combination is not tested, it shall be assumed to be painted with lead-based paint.

b. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If required by the performance characteristics sheet, the certified elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the

arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where required by the performance characteristics sheet, then the certified elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings, then the certified elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

c. If lead-based paint is identified through an elevated blood lead (EBL) inspection, the certified elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

d. No later than two weeks after the receipt of laboratory results, a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where an elevated blood lead (EBL) inspection has been conducted and shall provide a copy of this report to the property owner and the occupant of the dwelling. The report shall include, at least:

- (1) A statement that the elevated blood lead (EBL) inspection was conducted to identify lead-based paint and lead-based paint hazards in the residential dwelling;
- (2) Date of each elevated blood lead (EBL) inspection;
- (3) Address of building;
- (4) Date of construction;
- (5) Apartment numbers (if applicable);
- (6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (7) Name, signature, and certification number of each certified elevated blood lead (EBL) inspector/risk assessor conducting the investigation;
- (8) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
- (9) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;
- (10) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;
- (11) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;
- (12) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;
- (13) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;

(14) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;

(15) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745; and

(16) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

e. A certified elevated blood lead (EBL) inspector/risk assessor shall maintain a written record for each residential dwelling or child-occupied facility where an elevated blood lead (EBL) inspection has been conducted for no fewer than ten years. The record shall include, at least:

(1) A copy of the written report required by paragraph 70.6(3) "d."

(2) Blood lead test results for the elevated blood lead (EBL) child.

(3) A record of conversations held with the owners and occupants of each residential dwelling or child-occupied facility prior to, during, and after the EBL inspection.

(4) Records of follow-up visits made to each residential dwelling or child-occupied facility where lead-based paint hazards are identified to ensure that lead-based paint hazards are safely repaired.

70.6(4) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct lead hazard screens according to the following standards. Beginning March 1, 2000, lead hazard screens shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years shall be collected.

b. A visual inspection of the residential dwelling or child-occupied facility shall be conducted to determine if any deteriorated paint is present and to locate at least two dust sampling locations.

c. If deteriorated paint is present, each surface with deteriorated paint which is determined to have a distinct painting history must be tested for the presence of lead. In addition, friction surfaces where there is evidence of abrasion and impact surfaces that are damaged or otherwise deteriorated from impact and that have a distinct painting history shall be tested for the presence of lead.

d. In residential dwellings, a minimum of two composite or single-surface dust samples shall be collected. One sample shall be collected from the floors and the other from the interior windowsills in rooms, hallways, or stairwells where at least one child under the age of six years is most likely to come in contact with dust.

e. In multifamily dwellings and child-occupied facilities, single-surface or composite dust samples shall also be collected from common areas where at least one child under the age of six years is likely to come in contact with dust.

f. Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

g. Soil samples shall be collected and analyzed for lead content in exterior play areas and dripline areas where bare soil is present. In addition, soil samples shall be collected and analyzed for lead content from any other areas of the yard where bare soil is present. Soil and paint samples shall be collected using the documented methodologies specified in guidance documents issued by the department and shall be analyzed by a recognized laboratory to determine the level of lead.

h. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in

guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the National Institute of Standards and Technology 1.02 milligrams of lead per square centimeter standard reference material or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If required by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where required by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated

blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

i. The following standards shall be used to determine whether a residential dwelling or child-occupied facility fails a lead hazard screen:

(1) A residential dwelling or child-occupied facility shall fail a lead hazard screen if any deteriorated paint or paint on friction or impact surfaces is found to be lead-based paint.

(2) A residential dwelling shall fail a lead hazard screen if any floor dust lead level in a single-surface or composite-surface dust sample is greater than or equal to 25 micrograms per square foot.

(3) A residential dwelling shall fail a lead hazard screen if any interior windowsill dust level in a single-surface or composite-surface dust sample is greater than or equal to 125 micrograms per square foot.

(4) A residential dwelling or child-occupied facility shall fail a lead hazard screen if any bare soil is found to be a soil-lead hazard.

j. When conducting a lead hazard screen in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested. Residential dwellings chosen by targeted selection shall meet as many of the following criteria as possible:

1. The residential dwelling has been cited with a housing or building code violation within the past year.

2. The property owner believes that the residential dwelling is in poor condition.

3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall give preference to residential dwellings that house the largest number of children.

4. The residential dwelling serves as a day care facility.

5. The residential dwelling has been prepared for reoccupancy within the past three months.

If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall select them randomly. If too many residential dwellings meet the criteria, residential dwellings shall be eliminated randomly.

Table 2
Minimum Number of Residential Dwellings in Multifamily Housing for Risk Assessment
or Lead Hazard Screen Through Targeted Selection

Number of Similar Residential Dwellings	Number of Residential Dwellings to Sample*
1-4	All
5-20	4 residential dwellings or 50% (whichever is greater)**
21-75	10 residential dwellings or 20% (whichever is greater)**
76-125	17
126-175	19
176-225	20
226-300	21
301-400	22
401-500	23
501+	24 + 1 residential dwelling for each additional increment of 100 residential dwellings or less

*Does not include residential dwellings housing children with elevated blood lead levels.

**For percentages, round up to determine number of residential dwellings to be sampled.

k. If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested.

l. The following standards shall be used to determine whether multifamily housing fails a lead hazard screen:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean of the dust lead levels for carpeted floors, uncarpeted floors, and interior windowsills. If the arithmetic mean for carpeted floors or uncarpeted floors is greater than or equal to 25 micrograms per square foot, the multifamily housing shall fail the lead hazard screen. If the arithmetic mean for interior windowsills is greater than or equal to 125 micrograms per square foot, the multifamily housing shall fail the lead hazard screen. If the arithmetic mean for carpeted floors or uncarpeted floors is less than 25 micrograms per square foot, but some of the samples have dust lead levels that are greater than or equal to 25 micrograms per square foot, then the residential dwellings where these samples were taken and all other similar residential dwellings in the multifamily housing shall fail the lead hazard screen. If the arithmetic mean for interior windowsills is less than 125 micrograms per square foot, but some of the samples have dust lead levels that are greater than or equal to 125 micrograms per square foot, then the residential dwellings where these samples were taken and all other similar residential dwellings in the multifamily housing shall fail the lead hazard screen.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined to not be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the component is a lead-based paint hazard in all similar residential dwellings. If a component in a residential dwelling is determined or assumed to be

lead-based paint, then the entire group of similar residential dwellings in the multifamily housing shall fail the lead hazard screen.

(3) Multifamily housing shall fail a lead hazard screen if any bare soil is found to be a soil-lead hazard.

m. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a lead hazard screen is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the lead hazard screen, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The report shall include, at least:

- (1) Date of each lead hazard screen.
- (2) Address of building.
- (3) Date of construction.
- (4) Apartment numbers (if applicable).
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility.
- (6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the investigation.
- (7) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).
- (8) Results of the visual inspection.
- (9) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer.
- (10) If used, XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated.
- (11) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component tested expressed in terms appropriate to the sampling method used.
- (12) All results of laboratory analysis of collected paint, dust, and soil samples. The results of dust sampling shall be reported in micrograms of lead per square foot, and the results of soil sampling shall be reported in parts per million of lead. Results shall not be reported as "not detectable."
- (13) Any other sampling results;
- (14) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint.
- (15) Background information collected regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years.
- (16) Whether the residential dwelling or child-occupied facility passed or failed the lead hazard screen and recommendations, if warranted, for a follow-up lead inspection or risk assessment, and, as appropriate, any further actions.
- (17) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.
- (18) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

70.6(5) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor must conduct risk assessments according to the following standards. Beginning March 1, 2000,

risk assessments shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years shall be collected.

b. A visual inspection for risk assessment shall be undertaken to locate the existence of deteriorated paint and other potential lead hazards and to assess the extent and causes of the paint deterioration.

c. If deteriorated paint is present, each surface with deteriorated paint which is determined to have a distinct painting history must be tested for the presence of lead.

d. Friction surfaces where there is evidence of abrasion and impact surfaces that are damaged or otherwise deteriorated from impact and that have a distinct painting history shall be tested for the presence of lead.

e. In residential dwellings, dust samples shall be collected from the interior windowsill, window trough, and floor in all living areas where at least one child is most likely to come in contact with dust. Dust samples shall be analyzed for lead concentration and may be either composite or single-surface samples.

f. In multifamily dwellings, dust samples shall also be collected from interior windowsills, window troughs, and floors in common areas adjacent to the sampled residential dwellings or child-occupied facility and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust. Dust samples shall be analyzed for lead concentration and may be either composite or single-surface samples.

g. In child-occupied facilities, dust samples shall be collected from the interior windowsill, window trough, and floor in each room, hallway, or stairwell utilized by one or more children under the age of six years and in other common areas where the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor determines that at least one child under the age of six years is likely to come in contact with dust. Dust samples shall be analyzed for lead concentration and may be either composite or single-surface samples.

h. Soil samples shall be collected and analyzed for lead content in exterior play areas and dripline areas where bare soil is present. In addition, soil samples shall be collected and analyzed for lead content from any other areas of the yard where bare soil is present.

i. Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet. Soil and paint samples shall be collected using the documented methodologies specified in guidance documents issued by the department. Dust and soil samples shall be analyzed by a recognized laboratory to determine the level of lead. The results of dust sampling shall be reported in micrograms of lead per square foot, and the results of soil sampling shall be reported in parts per million of lead. The results shall not be reported as "not detectable."

j. Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

(2) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film material or standards provided by the manufacturer for calibration

of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

(3) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

(4) If required by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where required by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

(5) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

(6) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

k. When conducting a risk assessment in multifamily housing, a certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor may sample each residential dwelling or choose residential dwellings for sampling by random selection, targeted selection, or worst case selection.

(1) If built before 1960 or if the date of construction is unknown, the multifamily housing shall contain at least 20 similarly constructed and maintained residential dwellings in order to use random selection. If built from 1960 to 1977, the multifamily housing shall contain at least 10 similarly constructed and maintained residential dwellings in order to use random selection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the number of residential dwellings to randomly select for testing.

(2) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use targeted selection. If using targeted selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested. Residential dwellings chosen by targeted selection shall meet as many of the following criteria as possible. If additional residential dwellings are needed to meet the minimum number specified in Table 2, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall select them randomly. If too many residential dwellings meet the criteria, residential dwellings shall be eliminated randomly. Targeted selection criteria are as follows:

1. The residential dwelling has been cited with a housing or building code violation within the past year.
2. The property owner believes that the residential dwelling is in poor condition.
3. The residential dwelling contains two or more children between the ages of six months and six years. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall give preference to residential dwellings that house the largest number of children.
4. The residential dwelling serves as a day care facility.
5. The residential dwelling has been prepared for reoccupancy within the past three months.

(3) If the multifamily housing contains five or more similar residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may use worst case selection. If using worst case selection, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use Table 2 to determine the number of residential dwellings to test. If the multifamily housing has fewer than five similar dwellings, all residential dwellings shall be tested.

(4) The following standards shall be used to determine the extent of lead-based paint hazards throughout multifamily housing that is sampled by random selection, targeted selection, or worst case selection:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean of the dust lead levels for carpeted floors, uncarpeted floors, interior windowsills, and window troughs. If the arithmetic mean is greater than or equal to the level defined as a dust lead hazard for the component, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine that a dust lead hazard has been identified on the component throughout the multifamily housing. If the arithmetic mean is less than the level defined as a dust lead hazard for the component, but some of the individual components have dust lead levels that are greater than or equal to the level defined as a dust lead hazard, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall determine that a dust lead hazard has been identified on the individual components and on all other similar components throughout the multifamily housing.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of paint sampling by component and location. If all components at a given location are determined to be painted with lead-based paint or are determined to not be painted with lead-based paint, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume this condition is true for all similar residential dwellings. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not assume that the multifamily housing is free of lead-based paint. If a component at a given location is found to be painted with lead-based paint in some residential dwellings and not painted with lead-based paint in other residential dwellings, the certified lead inspector/risk assessor or elevated blood lead (EBL)

inspector/risk assessor shall assume that the component is a lead-based paint hazard in all similar residential dwellings.

l. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where a risk assessment is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the risk assessment, if different. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of the report for no less than three years. The report shall include, at least:

- (1) Date of each risk assessment;
- (2) Address of building;
- (3) Date of construction;
- (4) Apartment numbers (if applicable);
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (6) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the investigation;
- (7) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b));
- (8) Results of the visual inspection;
- (9) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;
- (10) If used, XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;
- (11) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component tested expressed in terms appropriate to the sampling method used;
- (12) All results of laboratory analysis of collected paint, dust, and soil samples;
- (13) Any other sampling results;
- (14) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;
- (15) Background information collected regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years;
- (16) To the extent that they are used as part of the lead-based paint hazard determination, the results of any previous inspections or analyses for the presence of lead-based paint, or other assessments of lead-based paint hazards;
- (17) A description of the location, type, and severity of identified lead-based paint hazards, and any other potential lead hazards, including bare soil in the play area or in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;
- (18) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;
- (19) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745; and
- (20) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

70.6(6) A certified lead abatement contractor or certified lead abatement worker must conduct lead abatement according to the following standards. Beginning March 1, 2000, lead abatement shall be conducted only by a certified lead abatement contractor or a certified lead abatement worker.

a. A certified lead abatement contractor must be on site during all work site preparation and during the postabatement cleanup of work areas. At all other times when lead abatement is being conducted, the certified lead abatement contractor shall be on site or available by telephone, pager, or answering service, and be able to be present at the work site in no more than two hours.

b. A certified lead abatement contractor shall ensure that lead abatement is conducted according to all federal, state, and local requirements.

c. A certified lead abatement contractor shall notify the department in writing at least seven days prior to the commencement of lead abatement in a residential dwelling or child-occupied facility. The notification shall include the following information:

- (1) The address, including apartment numbers, where lead abatement will be conducted.
- (2) The dates when lead abatement will be conducted.
- (3) The name, address, telephone number, Iowa certification number, and signature of the contact for the certified firm that will conduct the work.
- (4) The name, address, telephone number, Iowa certification number, and signature of the certified lead abatement contractor who will serve as the contact person for the project.
- (5) The name, address, and telephone number of the property owner.
- (6) Whether the dwelling is owner-occupied or a rental dwelling.
- (7) If the dwelling is an occupied rental, the names of the occupants.
- (8) The approximate year that the dwelling was built.
- (9) A brief description of the lead abatement work to be done.

d. A certified lead abatement contractor shall submit a revised notification to the department if any information in the original notification changes.

e. A certified lead abatement contractor or a certified project designer shall develop an occupant protection plan for all lead abatement projects prior to starting lead abatement and shall implement the occupant protection plan during the lead abatement project. The occupant protection plan shall be unique to each residential dwelling or child-occupied facility. The occupant protection plan shall describe the measures and management procedures that will be taken during the lead abatement to protect the building occupants from exposure to any lead-based paint hazards.

f. Approved methods must be used to conduct lead abatement and prohibited work practices must not be used to conduct lead abatement. The following are prohibited work practices:

- (1) Open-flame burning or torching of lead-based paint.
- (2) Machine sanding or grinding or abrasive blasting or sandblasting of lead-based paint unless used with High Efficiency Particulate Air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.
- (3) Uncontained water blasting of lead-based paint.
- (4) Dry scraping or dry sanding of lead-based paint except in conjunction with the use of a heat gun or around electrical outlets.
- (5) Operating a heat gun at a temperature at or above 1100 degrees Fahrenheit.

g. Soil abatement shall be conducted using one of the following methods:

- (1) If soil is removed, soil that is a soil-lead hazard shall be replaced by soil with a lead concentration as close to the local background as practicable, but less than 400 parts per million. The soil that is removed shall not be used as topsoil at another residential property or child-occupied facility.
- (2) If soil is not removed, the soil that is a soil-lead hazard shall be remediated to meet the definition of "permanently covered soil."

h. If lead-based paint is removed from a surface, the surface shall be repainted or refinished prior to postabatement clearance dust sampling. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall visually verify that lead-based paint was removed from a surface prior to repainting or refinishing.

i. If components painted with lead-based paint are removed, the replacement components shall be installed prior to postabatement clearance testing.

j. Postabatement clearance procedures shall be conducted by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor. Postabatement clearance testing shall be performed by persons or entities independent of those performing lead abatement, unless the designated party uses qualified in-house employees to conduct postabatement clearance testing. An in-house employee shall not conduct both lead abatement and the postabatement clearance testing for this work. Postabatement clearance testing shall be conducted using the following procedures:

(1) Following a lead abatement, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall review the report of the lead inspection, risk assessment, or visual assessment done prior to the lead abatement project and the lead abatement specifications to determine the lead-based paint hazards that were to be abated by the lead abatement project. The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall perform a visual inspection to determine if all lead-based paint hazards that were to be abated have been abated and to determine if deteriorated paint surfaces or visible amounts of dust, debris, or residue are still present in the rooms where lead abatement was conducted. If lead-based paint hazards that were to be abated by the project or deteriorated paint surfaces or visible amounts of dust, debris, or residue are present in the rooms where lead abatement was conducted, these conditions must be eliminated prior to the continuation of the clearance procedures. However, elimination of deteriorated paint is not required if it has been determined through paint testing or a lead-based paint inspection that the deteriorated paint is not lead-based paint. Following an exterior lead abatement, a visual inspection shall be conducted to determine if all lead-based paint hazards that were to be abated have been abated and to determine if any visible dust or debris remains on any horizontal surfaces in the outdoor living areas close to the abated surface. In addition, a visual inspection shall be conducted to determine the presence of paint chips on the dripline or next to the foundation below any exterior surface that was abated. If lead-based paint hazards that were to be abated by the project are still present, these conditions must be eliminated prior to the continuation of the clearance procedures. If visible dust, debris, or paint chips are present, they must be removed from the site and properly disposed of according to all applicable federal, state, and local standards.

(2) Following the visual inspection and any required postabatement cleanup, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall conduct clearance sampling for lead in dust. Clearance sampling may be conducted by employing single-surface sampling or composite dust sampling.

(3) Dust samples shall be collected a minimum of one hour after the completion of final postabatement cleanup activities.

(4) Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

(5) The following postabatement clearance activities shall be conducted as appropriate based upon the extent or manner of lead abatement activities conducted in the residential dwelling or child-occupied facility:

1. After conducting a lead abatement with containment between abated and unabated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells within the containment area. Dust samples shall be taken from one interior windowsill and from one window trough (if available), and one dust sample shall be taken from the floor of each of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample shall be taken from the floor outside of each individual containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, and stairwells shall be sampled.

2. After conducting a lead abatement with no containment between abated and unabated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells in the

residential dwelling or child-occupied facility. Dust samples shall be taken from one interior windowsill and from one window trough (if available), and one dust sample shall be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility, then all rooms, hallways, and stairwells shall be sampled.

3. The certified lead abatement contractors and certified lead abatement workers who abate or clean the dwellings shall not have any knowledge of which rooms or surfaces will be selected for the dust samples.

(6) Reserved.

(7) (7) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall compare the residual lead level as determined by the laboratory analysis from each single-surface dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs. If the residual lead level in a single-surface dust sample is greater than or equal to the applicable clearance level for a floor, interior windowsill, or window trough, then the failed component in each room with a failed single-surface dust sample and that type of component in each room that was not tested shall be recleaned. Additional clearance samples shall be taken from the failed component in each room where it failed and from enough additional rooms that were not previously tested so that four rooms are sampled. If four rooms are not available, then each available room shall be retested. The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall evaluate the results of this testing to determine if the recleaned components meet the clearance level. The components must be recleaned and retested until the clearance level is met.

(8) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall compare the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. If the residual lead level in a composite dust sample is greater than or equal to the applicable clearance level divided by half the number of subsamples in the composite sample, then all the components represented by the failed composite dust sample shall be recleaned and retested until clearance levels are met.

k. In multifamily housing consisting of at least 20 similarly constructed and maintained residential dwellings, random selection for the purpose of clearance testing may be conducted if the following conditions are met:

(1) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall randomly select the residential dwellings that will be sampled. The certified lead abatement contractors and certified lead abatement workers who abate or clean the dwellings do not know which residential dwellings will be selected for the random selection or which rooms or surfaces will be selected for the dust samples.

(2) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the minimum number of residential dwellings selected for dust sampling. This shall provide a 95 percent level of confidence that no more than 5 percent or 50 of the residential dwellings (whichever is smaller) in the randomly sampled population are greater than or equal to the appropriate clearance levels.

(3) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall sample the randomly selected residential dwellings and evaluate them for clearance according to the procedures found in paragraphs 70.6(6) "h" through "j."

l. No later than three weeks after the property passes clearance, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a report to the lead abatement contractor that contains the items required by subparagraphs 70.6(6) "m"(7) through (9).

m. The certified lead abatement contractor or a certified project designer shall prepare a lead abatement report containing the following information:

- (1) A copy of the original and any revised lead abatement notifications.
- (2) Starting and completion dates of the lead abatement project.

- (3) The name, address, and telephone number of the property owner(s).
 - (4) The name, address, and signature of the certified lead abatement contractor and certified lead abatement worker and of the certified firm contact for the firm conducting the lead abatement.
 - (5) Whether or not containment was used and, if containment was used, the locations of the containment.
 - (6) The occupant protection plan required by paragraph 70.6(6) "e."
 - (7) The name, address, and signature of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting clearance sampling, the date on which the clearance testing was conducted, the results of the visual inspection for the presence of lead hazards that were not abated as specified, deteriorated paint and visible dust, debris, residue, or paint chips in the interior rooms and exterior areas where lead abatement was conducted, and the results of all postabatement clearance testing and all soil analyses, if applicable. The results of dust sampling shall be reported in micrograms of lead per square foot by location of sample, and the results of soil sampling shall be reported in parts per million of lead. The results shall not be reported as "not detectable." If random selection was used to select the residential dwellings that were sampled, the report shall state that random selection was used, the number of residential dwellings that were sampled, and how this number was determined.
 - (8) A statement that the lead abatement was or was not done as specified and that the rooms and exterior areas where lead abatement was conducted did or did not pass the visual clearance and the clearance dust testing. If the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the clearance testing cannot verify that all lead-based paint hazards have been abated, the report shall contain the following statement:

"The purpose of this clearance report is to verify that the lead abatement project was done according to the project specifications. This residential dwelling may still contain hazardous lead-based paint, soil-lead hazards, or dust-lead hazards in the rooms or exterior areas that were not included in the lead abatement project."
 - (9) The name, address, and telephone number of each recognized laboratory conducting an analysis of clearance samples and soil samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).
 - (10) A detailed written description of the lead abatement project, including lead abatement methods used, locations of rooms and components where lead abatement occurred, reasons for selecting particular lead abatement methods, and any suggested monitoring of encapsulants or enclosures.
 - (11) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.
 - (12) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.
 - (13) If applicable, a copy of the written consent or waiver required by subrule 70.6(11).
 - n.* The lead abatement report shall be completed no later than 30 days after the lead abatement project passes clearance testing.
 - o.* The certified lead abatement contractor shall maintain all reports and plans required in this subrule for a minimum of three years.
 - p.* The certified lead abatement contractor shall provide a copy of all reports required by this subrule to the building owner and to the person who contracted for the lead abatement, if different.
- 70.6(7)** A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician must conduct visual risk assessments according to the following standards. Beginning March 1, 2000, visual risk assessments shall be conducted only by a certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician.
- a.* Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to at least one child under the age of six years shall be collected.

b. A visual inspection for risk assessment shall be undertaken to locate the existence of deteriorated paint and other potential lead-based paint hazards and to assess the extent and causes of the paint deterioration. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall assess each component in each room, including each exterior side. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall identify the following conditions as potential lead-based paint hazards:

- (1) All interior and exterior surfaces with deteriorated paint.
- (2) Horizontal hard surfaces, including but not limited to floors and windowsills, that are not smooth or cleanable.
- (3) Dust-generating conditions, including but not limited to conditions causing rubbing, binding, or crushing of surfaces known or presumed to be coated with lead-based paint.
- (4) Bare soil in the play area and dripline of the home.

c. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall prepare a written report for each residential dwelling or child-occupied facility where a visual risk assessment is conducted. No later than three weeks after completing the visual risk assessment, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall send a copy of the report to the property owner and to the person requesting the visual risk assessment, if different. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall maintain a copy of the report for no less than three years. The report shall include, at least:

- (1) Date of each visual risk assessment;
- (2) Address of building;
- (3) Date of construction;
- (4) Apartment numbers (if applicable);
- (5) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (6) Name, signature, and certification number of each certified sampling technician, certified lead inspector/risk assessor, or certified elevated blood lead (EBL) inspector/risk assessor conducting the visual risk assessment;
- (7) A statement that all painted or finished components must be assumed to contain lead-based paint;
- (8) Specific locations of painted or finished components identified as likely to contain lead-based paint and likely to be lead-based paint hazards;
- (9) Specific locations of bare soil in the play area and the dripline of a home;
- (10) Information for the owner and occupants on how to reduce lead hazards in the residential dwelling or child-occupied facility;
- (11) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745; and
- (12) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

70.6(8) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician must conduct clearance testing according to the following standards. Beginning March 1, 2000, clearance testing following lead abatement shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor. Beginning September 15, 2000, clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR 35.1340 shall be conducted only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead (EBL) inspector/risk assessors.

a. Clearance testing following lead abatement shall be conducted according to paragraphs 70.6(6) "h" through "l."

b. Clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR 35.1340 shall be conducted according to the following standards:

(1) A certified sampling technician shall perform clearance testing only for a single-family property or for individual residential dwellings and associated common areas in multifamily housing. A certified sampling technician shall not perform clearance testing using random selection of residential dwellings or common areas in multifamily housing.

(2) A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall review the report of the lead inspection, risk assessment, or visual assessment done prior to interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 and the project specifications to determine the lead-based paint hazards that were to be controlled by the project. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall perform a visual inspection to determine if all lead-based paint hazards that were to be controlled by the project have been controlled and to determine if deteriorated paint surfaces or visible amounts of dust, debris, or residue are still present in the rooms where interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation were conducted pursuant to 24 CFR Part 35. If lead-based paint hazards that were to be controlled by the project, deteriorated paint surfaces or visible amounts of dust, debris, or residue are present in these rooms, these conditions must be eliminated prior to the continuation of the clearance testing. However, elimination of deteriorated paint is not required if it has been determined through a lead-based paint inspection that the deteriorated paint is not lead-based paint. If exterior painted surfaces have been disturbed by the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35, the visual inspection shall include an assessment to determine if all exterior lead-based paint hazards that were to be controlled by the project have been controlled and to determine if any visible dust or debris remains on any horizontal surfaces in the outdoor living areas close to the affected exterior painted surfaces. In addition, a visual inspection shall be conducted to determine if paint chips are present on the dripline or next to the foundation below any exterior painted surface that was treated. If lead-based paint hazards that were to be controlled by the project are still present, these conditions must be eliminated prior to the continuation of the clearance procedures. If visible dust, debris, or paint chips are present, they must be removed from the site and properly disposed of according to all applicable federal, state, and local standards.

(3) Following the visual inspection and any required cleanup, clearance sampling for lead in dust shall be conducted. Clearance sampling may be conducted by employing single-surface sampling or composite dust sampling.

(4) Dust samples shall be collected a minimum of one hour after the completion of final cleanup activities.

(5) Dust samples shall be collected by wipe samples using the documented methodologies specified in guidance documents issued by the department. The minimum area for a floor wipe sample shall be 0.50 square feet or 72 square inches. The minimum area for a windowsill wipe sample and for a window trough wipe sample shall be 0.25 square feet or 36 square inches. Dust samples shall be analyzed by a recognized laboratory to determine the level of lead.

(6) The following clearance activities shall be conducted as appropriate based upon the extent or manner of interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 in the residential dwelling or child-occupied facility:

1. After conducting interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, with containment between treated and untreated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells within the containment area. Dust samples shall be taken from one interior windowsill and

from one window trough (if available), and one dust sample shall be taken from the floor of each of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample shall be taken from the floor outside of each individual containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, and stairwells shall be sampled.

2. After conducting interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35, with no containment between treated and untreated areas, three dust samples shall be taken from each of no fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility. Dust samples shall be taken from one interior windowsill and window trough (if available), and one dust sample shall be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility, then all rooms, hallways, and stairwells shall be sampled.

(7) The contractors conducting the work or cleaning the dwellings shall not know which rooms or surfaces will be selected for the dust samples.

(8) The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall compare the residual lead level as determined by the laboratory analysis from each single-surface dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs. If the residual lead level in a single-surface dust sample is greater than or equal to the applicable clearance level for a floor, interior windowsill, or window trough, then the failed component in each room with a failed single-surface dust sample and that type of component in each room that was not tested shall be recleaned. Additional clearance samples shall be taken from the failed component in each room where it failed and from enough additional rooms that were not previously tested so that four rooms are sampled. If four rooms are not available, then each available room shall be retested. The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall evaluate the results of this testing to determine if the recleaned components meet the clearance level. The components must be recleaned and retested until the clearance level is met.

(9) The certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall compare the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample. If the residual lead level in a composite dust sample is greater than or equal to the applicable clearance level divided by half the number of subsamples in the composite sample, then all the components represented by the failed composite dust sample shall be recleaned and retested until clearance levels are met.

c. In multifamily housing consisting of at least 20 similarly constructed and maintained residential dwellings, random selection for the purpose of clearance testing may be conducted if the following conditions are met:

(1) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall randomly select the dwellings that will be sampled. The contractors and the workers who conducted the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation do not know which residential dwellings will be selected for the random selection.

(2) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall use Table 1 to determine the minimum number of dwellings selected for dust sampling. This shall provide a 95 percent level of confidence that no more than 5 percent or 50 of the residential dwellings (whichever is smaller) in the randomly sampled population are greater than or equal to the appropriate clearance levels.

(3) The certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall sample the randomly selected residential dwellings and evaluate them for clearance according to the procedures found in paragraphs 70.6(6) "h" through "j."

(4) The clearance testing is conducted by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

d. A clearance report must be prepared that provides documentation of the lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 as well as the clearance testing. When lead abatement is performed, the report shall be a lead abatement report in accordance with paragraph 70.7(6)“*m.*” When interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation pursuant to 24 CFR Part 35 are performed, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall prepare a written report for each residential dwelling or child-occupied facility where clearance testing is conducted. No later than 30 days after the property passes clearance, the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician shall send a copy of the report to the property owner and to the person requesting the clearance testing, if different. The clearance report shall include the following information:

(1) The address of the residential property and, if only part of a multifamily property is affected, the specific dwelling units and common areas affected.

(2) The following information regarding the clearance testing:

1. The date(s) of the clearance testing.

2. The name, address, and signature of each certified lead professional performing the clearance examination, including the certification number.

3. Whether or not containment was used and, if containment was used, the locations of the containment.

4. If random selection was used to select the residential dwellings that were sampled, the report shall state that random selection was used, the number of residential dwellings that were sampled, and how this number was determined.

5. The results of the visual inspection for the presence of deteriorated paint and visible dust, debris, residue, or paint chips in the rooms where interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation were conducted pursuant to 24 CFR Part 35.

6. The results of the analysis of dust samples, in micrograms per square foot, by location of sample. The results shall not be reported as “not detectable.”

7. A statement that the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation conducted pursuant to 24 CFR Part 35 were or were not done as specified and that the rooms and exterior areas where these activities were conducted did or did not pass the visual clearance and the clearance dust testing. If the certified lead inspector/risk assessor, certified elevated blood lead (EBL) inspector/risk assessor, or certified sampling technician conducting the clearance testing cannot verify that all lead-based paint hazards have been controlled, the report shall contain the following statement:

“The purpose of this clearance report is to verify that this lead hazard control project was done according to the project specifications. This residential dwelling may still contain hazardous lead-based paint, soil-lead hazards, or dust-lead hazards in the rooms or exterior areas that were not included in the lead hazard control project.”

8. The name, address, and telephone number of each recognized laboratory conducting an analysis of the dust samples, including the identification number for each such laboratory recognized by EPA under Section 405(b) of the Toxic Substances Control Act (15 U.S.C. 2685(b)).

(3) The following information on the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation for which clearance testing was performed:

1. The start and completion dates of the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation.

2. The name and address of each firm or organization conducting the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation and the name of each supervisor assigned.

3. A detailed written description of the interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation, including the methods used, locations of exterior surfaces, interior rooms, common areas, and components where the hazard reduction activity occurred.

4. If interim control of soil hazards was conducted, a detailed description of the location(s) of the interim controls and the method(s) used.

5. Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745.

6. Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

e. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor or a certified sampling technician shall maintain a copy of the clearance testing information included in the lead abatement report specified in paragraph 70.6(6) "m" for no fewer than three years. A certified lead inspector/risk assessor, a certified elevated blood lead (EBL) inspector/risk assessor, or a certified sampling technician shall maintain a copy of the clearance testing report specified in paragraph 70.6(8) "d" for no fewer than three years.

f. Clearance testing shall be performed by persons or entities independent of those performing lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation, unless the designated party uses qualified in-house employees to conduct clearance testing. An in-house employee shall not conduct both lead abatement, interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, or rehabilitation and the clearance examination for this work.

70.6(9) A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall conduct paint testing pursuant to 24 CFR Part 35 according to the following standards. Beginning March 1, 2000, paint testing pursuant to 24 CFR Part 35 shall be conducted only by a certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor.

a. When conducting paint testing in a residential dwelling or child-occupied facility, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following procedures:

(1) The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall test paint on each deteriorated paint surface and on each painted surface that will be disturbed or replaced. On windows, the window frame, interior windowsill, window sash, and window trough shall each be tested.

(2) Paint shall be tested using adequate quality control by X-ray fluorescence or by laboratory analysis using a recognized laboratory to determine the presence of lead-based paint on a surface. If testing by laboratory analysis, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect paint samples using the documented methodologies specified in guidance documents issued by the department. If testing by X-ray fluorescence, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the following methodologies:

1. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use an X-ray fluorescence analyzer that has a performance characteristics sheet and shall use the X-ray fluorescence analyzer according to the performance characteristics sheet.

2. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall use the NIST 1.02 standard film or standards provided by the manufacturer for calibration of the X-ray fluorescence analyzer. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not state that any surface is free of lead-based paint unless the NIST 1.02 standard film is used for calibration.

3. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall take calibration readings consisting of an average of three readings at the beginning of the inspection.

4. If required by the performance characteristics sheet, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall conduct substrate correction for all XRF readings less than 4.0 milligrams of lead per square centimeter. For each substrate that requires substrate correction, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall completely remove all paint from an area of two different testing combinations for that substrate. If possible, the areas chosen for substrate correction should have initial XRF readings of less than 2.5 milligrams of lead per square centimeter. For each testing combination, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall remove paint from an area that is at least as large as the XRF probe faceplate. On each of the two areas, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall place the NIST 1.02 standard film over the surface, and take three XRF readings with the XRF used to conduct the inspection. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall calculate the arithmetic mean for these six readings and shall subtract 1.02 from this arithmetic mean to obtain the substrate correction value. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall then subtract the substrate correction value from each XRF reading for the substrate requiring substrate correction to obtain the corrected XRF reading. For example, if the six readings taken on the NIST 1.02 standard film were 1.1, 1.3, 1.4, 1.0, 1.2, and 1.1, the arithmetic mean is calculated by the equation $(1.1 + 1.3 + 1.4 + 1.0 + 1.2 + 1.1)/6$ and is equal to 1.18. The substrate correction value is equal to 1.18 minus 1.02, or 0.16. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not conduct substrate correction where required by the performance characteristics sheet, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that all of the readings are positive and shall not state that a surface is free of lead-based paint.

5. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall classify each XRF reading that did not require substrate correction and each corrected XRF reading for XRF readings that required substrate correction as positive, negative, or inconclusive, according to the performance characteristics sheet for the XRF. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall not discard XRF readings unless instructed to do so by the performance characteristics sheet or the operating instructions from the manufacturer. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor believes that a reading classified as positive is in error, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall collect a paint sample for laboratory analysis. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall change the positive classification to negative only if the results of the laboratory analysis indicate that the surface is not painted with lead-based paint. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor may assume that all inconclusive readings are positive and classify them as such.

6. The certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall resolve inconclusive readings as defined by the performance characteristics sheet for the XRF by collecting paint samples for laboratory analysis. If the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor does not resolve inconclusive readings by laboratory analysis, then the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor shall assume that the inconclusive readings are positive.

b. If lead-based paint is identified through paint testing, the certified lead inspector/risk assessor or elevated blood lead (EBL) inspector/risk assessor must conduct a visual inspection to determine the presence of lead-based paint hazards and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated.

c. A certified lead inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall prepare a written report for each residential dwelling or child-occupied facility where paint testing is conducted. No later than three weeks after the receipt of laboratory results, the certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor shall send a copy of the report to the property owner and to the person requesting the inspection, if different. A certified lead

inspector/risk assessor or a certified elevated blood lead (EBL) inspector/risk assessor shall maintain a copy of each written report for no less than three years. The report shall include, at least:

- (1) A statement that the inspection was conducted to determine whether lead-based paint is present on deteriorated paint surfaces and on painted surfaces that will be disturbed or replaced;
- (2) Date of the testing;
- (3) Address of building;
- (4) Date of construction;
- (5) Apartment numbers (if applicable);
- (6) The name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;
- (7) Name, signature, and certification number of each certified lead inspector/risk assessor or certified elevated blood lead (EBL) inspector/risk assessor conducting the paint testing;
- (8) Name, address, and telephone number of each laboratory conducting an analysis of collected samples;
- (9) Each testing method and sampling procedure employed for paint analysis, including quality control data and, if used, the manufacturer, serial number, software, and operating mode of any X-ray fluorescence (XRF) analyzer;
- (10) XRF readings taken for calibration and calculations to demonstrate that the XRF is properly calibrated;
- (11) Specific locations by room of each painted component tested for the presence of lead-based paint and the results for each component expressed in terms appropriate to the sampling method used;
- (12) A statement that all painted or finished components that were not tested must be assumed to contain lead-based paint;
- (13) A description of the location, type, and severity of identified lead-based paint hazards, including the classification of each tested surface as to whether it is a lead-based paint hazard, and any other potential lead hazards, including bare soil in the dripline of a home where lead-based paint is identified on exterior components or lead-based paint previously existed on exterior components, but has been removed, enclosed, or encapsulated;
- (14) A description of interim controls and lead abatement options for each identified lead-based paint hazard and a suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure;
- (15) Information regarding the owner's obligations to disclose known lead-based paint and lead-based paint hazards upon sale or lease of residential property as required by Subpart H of 24 CFR Part 35 and Subpart I of 40 CFR Part 745; and
- (16) Information about the notification regarding lead-based paint prior to renovation, remodeling, or repainting as required by 641—Chapter 69.

70.6(10) A certified elevated blood lead (EBL) inspection agency shall maintain for a period of at least 10 years the written records for all elevated blood lead (EBL) inspections conducted by persons that the agency employs or contracts with to provide elevated blood lead (EBL) inspections in the agency's service area.

70.6(11) A person may be certified as a lead inspector/risk assessor, sampling technician, or elevated blood lead (EBL) inspector/risk assessor and as a lead abatement contractor or lead abatement worker. Except as specified by paragraph 70.6(6) "j" and paragraph 70.6(8) "f," a person who is certified both as a lead inspector/risk assessor, sampling technician, or elevated blood lead (EBL) inspector/risk assessor and as a lead abatement contractor or lead abatement worker shall not provide both lead inspection or visual risk assessment and lead abatement services at the same site unless a written consent or waiver, following full disclosure by the person, is obtained from the owner or manager of the site.

70.6(12) Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in subrules 70.6(1) to 70.6(6) and 70.6(9) shall be collected by persons certified as a lead inspector/risk assessor or an elevated blood lead (EBL) inspector/risk assessor. Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in subrule 70.6(8) for clearance

testing following lead abatement shall be collected by persons certified as a lead inspector/risk assessor or an elevated blood lead (EBL) inspector/risk assessor. Any dust or soil samples collected pursuant to the work practice standards contained in subrule 70.6(8) for clearance testing after interim controls, paint stabilization, standard treatments, ongoing lead-based paint maintenance, and rehabilitation pursuant to 24 CFR 35.1340 shall be collected only by certified sampling technicians, certified lead inspector/risk assessors, or certified elevated blood lead (EBL) inspector/risk assessors. Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in 641—70.6(135) shall be analyzed by a recognized laboratory.

70.6(13) Composite dust sampling shall be conducted only in the situations specified in subrules 70.6(4) to 70.6(6) and 70.6(8). If composite sampling is conducted, it shall meet the following requirements:

- a. Composite dust samples shall consist of at least two subsamples.
- b. Every component that is being tested shall be included in the sampling.
- c. Composite dust samples shall not consist of subsamples from more than one type of component.
- d. The results of composite dust samples shall be evaluated by comparing the residual lead level as determined by the laboratory analysis from each composite dust sample with applicable single-surface dust-lead hazard or clearance levels for lead in dust on floors, interior windowsills, and window troughs divided by half the number of subsamples in the composite sample.

641—70.7(135) Firms. All firms that perform or offer to perform lead-based paint activities after September 15, 2000, must be certified by the department. Firms shall employ only appropriately certified employees to conduct lead-based paint activities, and the firm and its employees shall follow the work practice standards in 641—70.6(135) for conducting lead-based paint activities.

70.7(1) A firm wishing to be certified shall apply on forms supplied by the department. The firm must submit:

- a. A completed application form.
- b. Documentation that the firm will employ only appropriately certified lead professionals to perform lead-based paint activities. In addition, the firm must document that the agency and its employees or contractors will follow the work practice standards in 641—70.6(135) for conducting lead-based paint activities.
- c. The certified firm must maintain all records required by 641—70.6(135), with the exception of elevated blood lead (EBL) inspection reports, for three years. Certified firms that are also certified as elevated blood lead (EBL) inspection agencies must maintain elevated blood lead (EBL) inspection reports for at least 10 years.

70.7(2) Reserved.

641—70.8(135) Lead-safe work practices training program approval and lead-safe work practices contractor registration.

70.8(1) Training program approval. Beginning July 1, 2004, any lead-safe work practices training program offered in the state of Iowa shall be approved by the department. A lead-safe work practices training program shall not state that it has been approved by the state of Iowa unless it has met the requirements of 641—70.8(135) and has been issued a letter of approval by the department.

- a. Lead-safe work practices training courses shall meet the following requirements:
 - (1) The instructor shall have successfully completed a 20-hour sampling technician course, a 40-hour lead inspector/risk assessor course, or a 40-hour lead abatement contractor course.
 - (2) The instructor shall have demonstrated experience in training.
 - (3) The course shall be 8 hours in length. Each training hour shall include at least 50 minutes of instruction. Instructors shall follow the curriculum provided by the department, including the hands-on exercises and course test. Instructors may also add additional pertinent material.
 - (4) The instructor shall provide a copy of the student training manual to each person taking the course.

(5) The instructor shall ensure that each course is 8 hours in length. The instructor shall ensure that any student who misses more than 15 minutes of class time makes up the time before taking the course test. In order to receive credit for the course, attendees must be in attendance for the entire course.

(6) The instructor shall administer the course test that is included in the training materials provided by the department. A person shall receive a score of at least 80 percent on the course test to successfully complete the course.

(7) The instructor shall issue a signed course certificate to each successful participant.

(8) The instructor shall evaluate the course each time that it is offered using the form provided by the department. The instructor shall ensure that each participant completes a course evaluation.

(9) The instructor shall keep all records of the course for at least six years or until a state of Iowa/EPA requirement for the certification of lead-safe work practices contractors is implemented, whichever is longer.

(10) At a minimum, the instructor shall keep the following records for each course:

1. A copy of the student training manual given to the students.
2. The dates and place that the course was held.
3. The actual sign-in sheets for the course.
4. The test and answer sheet for the course.
5. The evaluation forms for the course.

(11) The instructor shall keep the following records in a separate file for each participant:

1. The participant's name, address, and telephone number.
2. The participant's answer sheet.
3. A copy of the course certificate issued to the participant.

(12) The instructor shall notify the department in writing at least seven days in advance of planned training courses and shall allow the department to sit in on the course and to audit the records that the training program is required by this rule to maintain.

(13) The instructor shall report to the department the number of people who successfully complete the course each quarter. Reports shall be due on January 15, April 15, July 15, and October 15 of each year.

b. The instructor shall ensure that the training program complies at all times with all requirements in this rule.

70.8(2) If a training program desires approval of a course by the department, the training program shall apply to the department on forms supplied by the department at least 30 days before the initial offering of the course. Programs that were voluntarily approved by the department prior to July 1, 2004, shall remain approved.

70.8(3) Voluntary contractor registration.

a. Beginning July 1, 2004, a person who has successfully completed an approved lead-safe work practices training course may register with the department after the date of course completion. The applicant must submit:

- (1) A completed application form;
- (2) Documentation of successful completion of an approved lead-safe work practices training course;
- (3) A nonrefundable fee of \$10.

b. Registered lead-safe work practices contractors must complete renewal registration each year. To receive renewal registration, a registered lead-safe work practices contractor shall submit:

- (1) A completed application form;
- (2) A nonrefundable fee of \$10.

c. A person shall not claim to be a registered lead-safe work practices contractor in the state of Iowa when the person is not.

641—70.9(135) Compliance inspections.

70.9(1) The department may enter premises or facilities where violations of the provisions regarding lead-based paint activities may occur for the purpose of conducting compliance inspections.

70.9(2) The department may enter premises or facilities where training programs conduct business.

70.9(3) The department may take samples and review records as part of the lead-based paint activities compliance inspection process.

641—70.10(135) Denial, suspension, or revocation of certification; denial, suspension, revocation, or modification of course approval; and imposition of penalties.

70.10(1) Violators are subject to civil penalties pursuant to Iowa Code section 135.105A and 641—70.10(135) or to criminal penalties pursuant to Iowa Code section 135.38. The following are considered to be in violation of this chapter:

- a.* Failure or refusal to comply with any requirements of this chapter.
- b.* Failure or refusal to establish, maintain, provide, copy, or permit access to records or reports as required by rules 70.3(135) to 70.7(135).
- c.* Failure or refusal to permit entry or inspection as described in subrules 70.9(1) to 70.9(3).
- d.* Obtaining certification through fraudulent representation.
- e.* Failure to obtain certification from the department and performing work requiring certification.
- f.* Fraudulently obtaining certification and engaging in any lead-based paint activities requiring certification.

70.10(2) The department may deny an application for certification, may suspend or revoke a certification, may impose a civil penalty, or may refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code section 135.38 when it finds that the applicant, certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm has committed any of the following acts:

- a.* Obtained documentation of training through fraudulent means.
- b.* Gained admission to an accredited training program through misrepresentation of admission requirements.
- c.* Obtained certification through misrepresentation of certification requirements or related documents pertaining to education, training, professional registration, or experience.
- d.* Performed work requiring certification at a job site without having proof of current certification.
- e.* Permitted the duplication or use of the individual's or firm's own certificate by another.
- f.* Performed work for which certification is required, but for which appropriate certification had not been received.
- g.* Failed to follow the standards of conduct required by 641—70.6(135).
- h.* Failed to comply with federal, state, or local lead-based paint statutes and regulations, including the requirements of this chapter.
- i.* For certified elevated blood lead (EBL) inspection agencies and certified firms, performed work for which certification is required with employees or persons under the control of the certified elevated blood lead (EBL) inspection agency or certified firm who were not appropriately certified.
- j.* Knowingly made misleading, deceptive, untrue, or fraudulent representations in the practice of lead professional activities or engaged in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.
- k.* Used untruthful or improbable statements in advertisements. This includes, but is not limited to, an action by a lead professional making information or intention known to the public that is false, deceptive, misleading, or promoted through fraud or misrepresentation.
- l.* Falsified reports and records required by this chapter.
- m.* Accepted any fee by fraud or misrepresentation.
- n.* Negligence by the firm or individual in the practice of the lead professional activities. This includes a failure to exercise due care, including negligent delegation of duties or supervision of employees or other individuals, whether or not injury results; or any conduct, practice, or conditions that impair the ability of the firm or individual to safely and skillfully practice the profession.
- o.* Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority.

A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report shall be expunged from the records of the board.

p. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

q. Representation by a firm or individual that the firm or individual is certified when the certification has been suspended or revoked or has not been renewed.

r. Failed to respond within 30 days of receipt of communication from the department that was sent by registered or certified mail.

s. Engaged in any conduct that subverts or attempts to subvert a department investigation.

t. Failed to comply with a subpoena issued by the department or failure to cooperate with a department investigation.

u. Failed to pay costs assessed in any disciplinary action.

v. Been convicted of a felony related to lead professional activities or the conviction of any felony that would affect the ability of the firm or individual to perform lead professional activities. A copy of the record of conviction or plea of guilty shall be conclusive evidence.

w. Unethical conduct. This includes, but is not limited to, the following:

(1) Verbally or physically abusing a client or coworker.

(2) Improper sexual conduct with or making suggestive, lewd, lascivious, or improper remarks or advances to a client or coworker.

(3) Engaging in a professional conflict of interest.

(4) Mental or physical inability reasonably related to and adversely affecting the ability of the firm or individual to practice in a safe and competent manner.

(5) Being adjudged mentally incompetent by a court of competent jurisdiction.

70.10(3) The department may deny, suspend, revoke, or modify the approval for a course, or may impose a civil penalty or may refer the case to the office of the county attorney for possible criminal penalties pursuant to Iowa Code section 135.38 when it finds that the training program, training manager, or other person with supervisory authority over the course has committed any of the following acts:

a. Misrepresented the contents of a training course to the department or to the student population.

b. Failed to submit required information or notifications in a timely manner.

c. Failed to maintain required records.

d. Falsified approval records, instructor qualifications, or other information or documentation related to course approval.

e. Failed to comply with the training standards and requirements in 641—70.4(135).

f. Made false or misleading statements to the department in its application for approval or reapproval which the department relied upon in approving the application.

g. Failed to comply with federal, state, or local lead-based paint statutes and regulations, including the requirements of this chapter.

h. Knowingly made misleading, deceptive, untrue, or fraudulent representations in the practice of conducting a training program or engaged in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established.

i. Used untruthful or improbable statements in advertisements. This includes, but is not limited to, an action by a training program making information or intention known to the public that is false, deceptive, misleading, or promoted through fraud or misrepresentation.

j. Falsified reports and records required by this chapter.

k. Accepted any fee by fraud or misrepresentation.

l. Revocation, suspension, or other disciplinary action taken by a certification or licensing authority of this state, another state, territory, or country; or failure by the firm or individual to report such action in writing within 30 days of the final action by such certification or licensing authority.

A stay by an appellate court shall not negate this requirement; however, if such disciplinary action is overturned or reversed by a court of last resort, the report shall be expunged from the records of the board.

m. Failed to comply with the terms of a department order or the terms of a settlement agreement or consent order.

n. Representation by a firm or individual that the firm or individual is certified when the certification has been suspended or revoked or has not been renewed.

o. Failed to respond within 30 days of receipt of communication from the department that was sent by registered or certified mail.

p. Engaged in any conduct that subverts or attempts to subvert a department investigation.

q. Failed to comply with a subpoena issued by the department or failure to cooperate with a department investigation.

r. Failed to pay costs assessed in any disciplinary action.

70.10(4) Complaints and other requests for action under this rule. Complaints regarding a certified lead professional, a certified elevated blood lead (EBL) inspection agency, a certified firm, or an approved course shall be submitted in writing to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075. The complainant shall provide:

a. The name of the certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm and the specific details of the action(s) by the certified lead professional, certified elevated blood lead (EBL) inspection agency, or certified firm that did not comply with the rules; or

b. The name of the lead professional or firm that conducted lead professional activities without the appropriate certification or approval as required by the rules; or

c. The name of the sponsoring person or organization of an approved course and the specific way(s) that an approved course did not comply with the rules; or

d. The name of the sponsoring person or organization that provided a course without the approval required by these rules.

70.10(5) Civil penalties.

a. Before instituting any proceeding to impose a civil penalty under Iowa Code section 135.105A, the department shall serve a written notice of violation upon the person charged. The notice of violation shall specify the date or dates, facts, and the nature of the alleged act or omission with which the person is charged and shall identify specifically the particular provision or provisions of the law, rule, regulation, certification, approval, or cease and desist order involved in the alleged violation and must state the amount of each proposed penalty. The notice of violation shall also advise the person charged that the civil penalty may be paid in the amount specified therein, or the proposed imposition of the civil penalty may be protested in its entirety or in part, by a written answer, either denying the violation or showing extenuating circumstances. The notice of violation shall advise the person charged that upon failure to pay a civil penalty subsequently determined by the department, if any, unless compromised, remitted, or mitigated, the fee shall be collected by civil action, pursuant to Iowa Code section 135.105A.

b. Within 20 days of the date of a notice of violation or other time specified in the notice, the person charged may either pay the penalty in the amount proposed or answer the notice of violation. The answer to the notice of violation shall state any facts, explanations, and arguments denying the charges of violation, or demonstrating any extenuating circumstances, error in the notice of violation, or other reason why the penalty should not be imposed and may request remission or mitigation of the penalty.

c. If the person charged with violation fails to answer within the time specified in paragraph 70.10(5)“*b.*,” an order may be issued imposing the civil penalty in the amount set forth in the notice of violation described in paragraph 70.10(5)“*a.*”

d. If the person charged with violation files an answer to the notice of violation, the department, upon consideration of the answer, will issue an order dismissing the proceeding or imposing, mitigating, or remitting the civil penalty. The person charged may, within 20 days of the date of the order or other time specified in the order, request a hearing.

e. If the person charged with violation requests a hearing, the department will issue an order designating the time and place of hearing. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

f. If a hearing is held, an order will be issued after the hearing by the presiding officer or the department dismissing the proceeding or imposing, mitigating, or remitting the civil penalty.

g. The department may compromise any civil penalty. If the civil penalty is not compromised, or is not remitted by the presiding officer or the department, and if payment is not made within ten days following either the service of the order described in paragraph 70.10(5)“*c*” or “*f*,” or the expiration of the time for requesting a hearing described in paragraph 70.10(5)“*d*,” the department may refer the matter to the attorney general for collection.

h. Except when payment is made after compromise or mitigation by the department of justice or as ordered by a court of the state, following reference of the matter to the attorney general for collection, payment of civil penalties imposed under Iowa Code section 135.105A shall be made by check, draft, or money order payable to the Iowa Department of Public Health.

70.10(6) Appeals.

a. Notice of denial, suspension or revocation of certification, or denial, suspension, revocation, or modification of course approval shall be sent to the affected individual or organization by restricted certified mail, return receipt requested, or by personal service. The affected individual or organization shall have a right to appeal the denial, suspension or revocation.

b. An appeal of a denial, suspension or revocation shall be submitted by certified mail, return receipt requested, within 30 days of the receipt of the department’s notice to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075. If such a request is made within the 30-day time period, the notice of denial, suspension or revocation shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, suspension or revocation has been or will be removed. After the hearing, or upon default of the applicant or alleged violator, the administrative law judge shall affirm, modify or set aside the denial, suspension or revocation. If no appeal is submitted within 30 days, the denial, suspension or revocation shall become the department’s final agency action.

c. Upon receipt of an appeal that meets contested case status, the appeal shall be transmitted to the department of inspections and appeals within five working days of receipt pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the denial, suspension or revocation is based shall be provided to the department of inspections and appeals.

d. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

e. When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. The proposed decision and order then becomes the department’s final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in paragraph 70.10(6)“*f*.”

f. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge’s proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for appeal shall state the reason for appeal.

g. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing or submission to the director. The record shall include the following:

- (1) All pleadings, motions, and rulings.
- (2) All evidence received or considered and all other submissions by recording or transcript.
- (3) A statement of all matters officially noticed.
- (4) All questions and offers of proof, objection, and rulings thereon.
- (5) All proposed findings and exceptions.
- (6) The proposed findings and order of the administrative law judge.

h. The decision and order of the director becomes the department’s final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

i. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved

party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

j. Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service to the Iowa Department of Public Health, Lead Poisoning Prevention Program, 321 East 12th Street, Des Moines, Iowa 50319-0075.

k. The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

70.10(7) Public notification.

a. The public shall be notified of the suspension, revocation, modification, or reinstatement of course approval through appropriate mechanisms.

b. The department shall maintain a list of courses for which the approval has been suspended, revoked, modified, or reinstated.

641—70.11(135) Waivers. Rules in this chapter are not subject to waiver or variance pursuant to 641—Chapter 178 or any other provision of law.

These rules are intended to implement Iowa Code section 135.105A.

EMERGENCY INFORMATION SYSTEM ON PESTICIDES FOR USE BY HEALTH CARE
PROVIDERS DURING MEDICAL EMERGENCIES

641—71.1(139A) Scope. Except as otherwise specifically provided, these rules apply to requirements for the operation of an emergency information system operated by providers of pesticides in Iowa who register with the Iowa department of agriculture and land stewardship (IDALS). These rules do not pertain to registrants who do not operate their own emergency information system.

641—71.2(139A) Definitions. As used in this chapter, these terms have the definition set forth below.

“Department” means the Iowa department of public health.

“Emergency information system (EIS)” means a system developed by a registrant that is accessible by Iowa health care providers and poison control centers 24 hours per day, every day of the year. The system must provide ready access to pesticide product profiles of the registrants to include but not be limited to characterization of inert ingredient(s) and their general proportion whether openly defined or confidentially maintained as a trade secret.

“Registrant” means the person registering any pesticide or device or who has obtained a certificate of license from IDALS pursuant to the provisions of Iowa Code chapter 206.

641—71.3(139A) Operation of EIS.

71.3(1) *Registrants operating their own EIS shall:*

a. Provide emergency treatment information to health care providers engaged in the emergency care of a real-time human exposure to a registrant’s product(s) upon request 24 hours per day, every day of the year. These services shall identify required inert ingredients, pursuant to Iowa Code section 206.12(2)“*c*”(2), even if they are considered trade secret, for the sole purpose of assisting in the medical management of persons exposed to pesticides;

b. Ensure that information response time to provide appropriate pesticide ingredient information, which may be responsible for the medical emergency, to a health care provider or poison control center, as defined in Iowa Code section 206.2, does not exceed 15 minutes;

c. Have in operation a toll-free number (800 number, reverse charges number, etc.) which can be accessed anywhere in Iowa;

d. Have qualified responders on duty at all times. A qualified responder who provides the information to the inquiring health care provider shall:

(1) Have a college degree in one of the life sciences or its equivalent and have a minimum of two years’ experience in the hazardous chemical (pesticide) field. This experience shall be in the routine handling and working with hazardous substances of the type that would, in the normal course of events, require emergency response; or

(2) Be an individual who is under the direct supervision of an individual who meets the requirements of 71.3(1)“*d*”(1); and

(3) Have comprehensive emergency response and accident mitigation training.

e. Have an adequate contingency plan to continue operation in the event of equipment or power failure;

f. Have facsimile (fax) capabilities;

g. Provide at a minimum:

(1) The immediate health hazards posed by internal or external exposure to a given pesticide,

(2) Risks of fire or explosion of a material,

(3) Immediate precautions to take in the event of an accident or incident,

(4) Preliminary first-aid measures, and

(5) A comprehensive list of compounds in a given product including identification of the inert ingredients only upon request from the health care provider who is treating a real-time human exposure to a registrant’s product.

h. Provide to poison control centers, defined in Iowa Code subsection 206.2(24), the telephone number(s) to be used to obtain treatment information for a person exposed to a registrant's product.

71.3(2) Reserved.

These rules are intended to implement Iowa Code subsection 139A.21(7).

CHAPTER 72
CHILDHOOD LEAD POISONING
PREVENTION PROGRAM

641—72.1(135) Definitions.

“*Approved program*” means a program that meets the requirements of subrule 72.2(3) and has been approved by the department.

“*Capillary*” means a blood sample taken from the finger or heel for lead analysis.

“*Certified elevated blood lead (EBL) inspection agency*” means an agency that has met the requirements of 641—70.5(135) and has been certified by the department.

“*Certified elevated blood lead (EBL) inspector/risk assessor*” means a person who has met the requirements of 641—70.5(135) for certification or interim certification and who has been certified by the department.

“*Chelation*” means the administration of medication that binds lead so that it can be removed from the body.

“*Department*” means the Iowa department of public health.

“*Elevated blood lead (EBL) child*” means any child who has had one venous blood lead level greater than or equal to 20 micrograms per deciliter or at least two venous blood lead levels of 15 to 19 micrograms per deciliter.

“*Elevated blood lead (EBL) inspection*” means an inspection to determine the sources of lead exposure for an elevated blood lead (EBL) child and the provision within ten working days of a written report explaining the results of the investigation to the owner and occupant of the residential dwelling or child-occupied facility being inspected and to the parents of the elevated blood lead (EBL) child.

“*Elevated blood lead (EBL) inspection agency*” means an agency that employs or contracts with individuals who perform elevated blood lead (EBL) inspections. Elevated blood lead (EBL) inspection agencies may also employ or contract with individuals who perform other lead-based paint activities.

“*Laboratory*” means a laboratory satisfactorily participating in the blood lead analysis proficiency testing program of the Centers for Disease Control and Prevention/University of Wisconsin.

“*Lead-based paint hazard*” means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard as defined in 641—Chapter 70.

“*Local board*” means a county, district, or city board of health.

“*Local childhood lead poisoning prevention program*” means a program in which the services listed in subrule 72.2(3) are provided by agencies located in a community.

“*Venous*” means a blood sample taken from a vein in the arm for lead analysis.

641—72.2(135) Approved programs.

72.2(1) An individual local board of health representing a geographic area with a population of at least 15,000 is eligible to apply for status as an approved program. A group of local boards of health representing a geographic area with a total population of at least 15,000 may apply for status as an approved program by designating an individual local board of health to apply on behalf of the group.

72.2(2) A local board wishing to apply for status as an approved program shall make application to the Iowa department of public health by December 1 of each year, beginning on December 1, 2003, for the program year of July 1, 2004, through June 30, 2005. An individual local board of health may submit or be included in only one application for status as an approved program. An application for status as an approved program must follow the format which will be made available from the Lead Poisoning Prevention Program, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. All materials submitted as part of the application for status as an approved program are public records.

72.2(3) A local board applying for status as an approved program must demonstrate that it is prepared to provide the following activities and authority immediately upon the receipt of funding. The application submitted by a local board of health shall specify the name of the agency and of the individual staff member who will be responsible for carrying out each of the following activities:

- a. A public education program about lead poisoning and the dangers of lead poisoning to children.
- b. An effective outreach effort to ensure the availability of services in the geographic area to be served.
- c. A blood lead testing program for children, with an emphasis on children less than six years of age. Blood lead testing should be done in conformance with the department's statewide blood lead testing plan, available on request from the department.
- d. Provision of laboratory services, in conformance with the above-cited reference.
- e. A program to ensure that children identified with blood lead levels greater than or equal to 10 micrograms per deciliter receive services appropriate for the blood lead level including, but not limited to, confirmatory venous blood lead testing, follow-up capillary or venous blood lead testing, nutrition counseling, a home nursing visit, a developmental evaluation, a medical evaluation, and chelation.
- f. Elevated blood lead (EBL) inspections in dwelling units associated with an elevated blood lead (EBL) child. Elevated blood lead (EBL) inspections shall be conducted by certified elevated blood lead (EBL) inspector/risk assessors employed by or under contract with a certified elevated blood lead (EBL) inspection agency.
- g. Follow-up inspections to ensure that lead-based paint hazards identified in dwelling units associated with an elevated blood lead (EBL) child are corrected.
- h. Adoption and enforcement of a local code which provides adequate authority to require control of lead-based paint hazards found in dwelling units associated with an elevated blood lead (EBL) child.
- i. Development of a community coalition to address childhood lead poisoning prevention.
- j. Management of blood lead and case management data using the Strategic Tracking of Elevated Lead Levels and Remediation (STELLAR) program.
- k. A plan of intent to continue the program on a maintenance basis after the grant is discontinued.

72.2(4) By January 1 of each year, the department shall notify each local board of health that has applied for status as an approved program whether the local board of health has been granted status as an approved program, beginning January 1, 2004, for the program year of July 1, 2004, through June 30, 2005.

72.2(5) A county that receives childhood lead poisoning prevention funding from the department for the program year of July 1, 2002, through June 30, 2003, shall have status as an approved program for the program year of July 1, 2003, through June 30, 2004. Unless the local board of health requests otherwise by March 1, 2003, the contractors that provide childhood lead poisoning prevention services in the county for the program year of July 1, 2002, through June 30, 2003, shall continue to serve as contractors for the program year of July 1, 2003, through June 30, 2004.

641—72.3(135) Level of funding.

72.3(1) The department shall develop a formula to allocate funding to approved programs. In the development of the formula, the department shall consider factors that affect the burden of childhood lead poisoning in a geographic area including, but not limited to, the number of children under the age of six years, the percentage of housing built before 1950, the percentage of children in poverty, and the demonstrated prevalence of childhood lead poisoning in the geographic area to be served.

72.3(2) The department shall allocate state funds appropriated to the department for this program according to this formula. Federal funds available to the department for local childhood lead poisoning prevention programs shall be allocated to approved programs according to this formula unless a different method is mandated by the federal agency providing the funding.

72.3(3) The approved program shall provide one dollar for every three dollars of state funding awarded for each of the first two years of funding and then one dollar for each dollar of state funding awarded for the third and subsequent years of funding. Local contributions may be in the form of in-kind matching.

72.3(4) Matching requirements for federal funding allocated to approved programs shall be as mandated by the federal agency providing the funding.

72.3(5) On January 1, April 1, and June 1 of each year, the department shall ask each approved program to estimate the amount of funds that the approved program will not use. The department may

allocate these funds to approved programs with demonstrated special needs for childhood lead poisoning prevention services.

641—72.4(135) Appeals.

72.4(1) Any applicant that has timely filed an application and is aggrieved by the decision made pursuant to these rules regarding the applicant's status as an approved program may request a reconsideration of the applicant's proposal by filing a written request for reconsideration with the director of the Iowa department of public health. The request shall be filed within three working days of the date of notification of the decision regarding the applicant's status as an approved program.

72.4(2) A request for reconsideration must be in writing and clearly state the reasons for reconsideration. The director's scope of review for requests shall be limited to a finding that the department erred in following the rules or procedures of the approval process as outlined in these administrative rules.

72.4(3) The department shall refrain from allocating any funds until it has received the decision of the director as to any reconsideration. The review shall be conducted as expeditiously as possible so that all funds can be allocated in a timely fashion.

72.4(4) This procedure shall end the review process at the administrative level.

These rules are intended to implement Iowa Code sections 135.100 to 135.105.

CHAPTER 73
SPECIAL SUPPLEMENTAL NUTRITION PROGRAM
FOR WOMEN, INFANTS, AND CHILDREN (WIC)
[Prior to 7/29/87, Health Department[470] Ch 73]

641—73.1(135) Program explanation. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is a federal program operated pursuant to agreement with the states. The purpose of the program is to provide supplemental foods and nutrition education to eligible pregnant, postpartum, and breastfeeding women, infants, and young children from families with inadequate incomes. The WIC program is administered on the federal level by the U.S. Department of Agriculture, Food and Nutrition Service (FNS). The Iowa department of public health serves as the administering agency for the state of Iowa. The Iowa department of public health enters into contracts with selected local agencies on an annual basis for the provision of WIC services to eligible participants.

641—73.2(135) Adoption by reference. Federal regulations found at 7 CFR Part 246 (effective as of February 13, 1985, as amended through September 27, 2006, and any additional amendments) shall be the authority for rules governing the Iowa WIC program and are incorporated by reference herein. The WIC state plan provides policy and procedural guidance in the implementation of these regulations to contract agencies administering WIC programs. The WIC state plan as approved by the United States Department of Agriculture is incorporated herein by reference.

641—73.3(135) Availability of rules. Copies of the federal rules and the WIC state plan adopted by reference in 73.2(135) are available from: Chief, Bureau of Nutrition and Health Promotion, Iowa Department of Public Health, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075, (515)281-4919.

641—73.4(135) Certain rules exempted from public participation. The Iowa department of public health finds that certain rules should be exempted from notice and public participation as being in a very narrowly tailored category of rules for which notice and public participation are unnecessary as provided in Iowa Code section 17A.4(2). Such rules shall be those that are mandated by federal law and regulation governing the Iowa WIC program where the department has no option but to adopt such rules as specified and where federal funding for the WIC program is contingent upon the adoption of the rules.

641—73.5(135) Definitions.

“Applicant” means a person applying for the WIC program, but not yet a participant of the WIC program.

“Breastfeeding women” means women up to one year postpartum who are breastfeeding their infants.

“Certification” means the implementation of criteria and procedures to assess and document each applicant’s eligibility for the program.

“Children” means persons who have had their first birthday but have not yet attained their fifth birthday.

“Competent professional authority” or *“CPA”* means an individual on the staff of the contract agency who, using standardized WIC screening tools and eligibility criteria provided by the department, determines whether an applicant for WIC services is eligible to receive those services. A CPA shall be a member of one of the following categories:

1. A dietitian licensed by the Iowa board of dietetic examiners;
2. A nutrition educator as defined in the Iowa WIC Policy and Procedure Manual;
3. A physician, registered nurse or licensed physician assistant.

“Contract agency” means a private, nonprofit or public agency that has a contract with the department to provide WIC services and receives funds from the department for that purpose.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Division director” means the director of the division of health promotion and chronic disease prevention, Iowa department of public health.

“Family” means a group of related or nonrelated individuals who are living together as one economic unit, except that residents of a homeless facility or an institution shall not all be considered as members of a single family.

“Food instrument” means a voucher, check, coupon, electronic benefits transfer (EBT) card or any other document used to obtain supplemental foods.

“HAWK-I” means healthy and well kids in Iowa and is the health insurance program in Iowa, as authorized in Title XXI of the Social Security Act.

“Health professional” means an individual who is licensed to provide health care or social services within the individual’s scope of practice.

“Health services” means ongoing, routine pediatric and obstetric care (such as infant and child care and prenatal and postpartum examinations) or referral for treatment.

“Hearing officer” means the contract agency director, health professional, community leader or impartial citizen who is designated to hear the appeal of a participant, and is not to be confused with the statutory definition of a hearing officer, which is an administrative law judge.

“Infants” means persons under one year of age.

“Nutritional risk” means: (a) detrimental or abnormal nutritional conditions detectable by biochemical or anthropometric measurements; (b) other documented nutritionally related medical conditions; (c) dietary deficiencies that impair or endanger health; or (d) conditions that predispose persons to inadequate nutritional patterns or nutritionally related medical conditions.

“Nutrition education” means individual or group education sessions and the provision of information and educational materials designed to improve health status, achieve positive change in dietary habits, and emphasize relationships between nutrition and health, all in keeping with the individual’s personal, cultural, and socioeconomic preferences.

“Participants” means pregnant women, breastfeeding women, postpartum women, infants and children who are receiving supplemental foods under the program, and the breastfed infants of participant breastfeeding women.

“Peer group” means a system of grouping WIC vendors according to structure; type; number of cash registers; square footage; and sales. Peer groups are used to establish statistical norms that an individual store may be compared against and provide the numeric baselines for the process of determining what may be fraudulent behavior.

“Postpartum women” means women up to six months postpregnancy who are not breastfeeding.

“Pregnant women” means women determined to have one or more embryos or fetuses in utero.

“Program” means the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) authorized by Section 17 of the Child Nutrition Act of 1966.

“Vendor” means a retail outlet that provides supplemental food to WIC program participants.

641—73.6(135) Staffing of contract agencies.

73.6(1) Rescinded IAB 10/9/96, effective 11/13/96.

73.6(2) The competent professional authority shall conduct either the diet history or the health history part of the certification process and shall sign the certification form attesting to the applicant’s eligibility for services after the certification process is completed.

73.6(3) Contract agencies shall maintain on file documentation of qualifications for any individual employed or under contract as a CPA.

73.6(4) All contract agencies shall employ at least one licensed dietitian to provide services for participants determined to be at high risk. Nutrition educators employed by a contract agency shall be supervised by a licensed dietitian.

73.6(5) Rescinded IAB 10/9/96, effective 11/13/96.

73.6(6) Contract agencies shall submit the license number of each dietitian hired within 30 days of employment.

73.6(7) Proposed staffing patterns within contract agencies shall be subject to approval from the department following review in accord with established statewide WIC staff patterns.

641—73.7(135) Certification of participants. The certification process to determine eligibility for WIC services, as defined in 7 CFR 246.7, shall include the following procedures and definitions:

73.7(1) Application. Information on identity, address, family incomes, and nutrition risk must be collected in accordance with the Iowa WIC Policy and Procedure Manual.

73.7(2) Income.

a. The income guidelines used shall be the same as the National School Lunch Program guidelines for reduced price school lunches, which are equal to 185 percent of the current federal poverty guidelines. Definitions of income are mandated by federal regulation and are described in the WIC state plan. Revised dollar figures for the 185 percent poverty level are published annually in the Federal Register and become effective for WIC no later than July 1 following their publication. Copies of the income definitions and monetary guidelines are available from the department.

b. Applicants must provide the contract agency written proof of their income as part of each certification process, pursuant to the Iowa WIC Policy and Procedure Manual.

73.7(3) Time frame for services.

a. The date of initial visit shall be the day on which an applicant first requests services from a contract agency. A visit to another program office to complete a common application form does not constitute an initial visit.

b. Pregnant women shall be certified for the duration of their pregnancy and for up to six weeks postpartum. Pregnant women precertified with referral data require a full certification within 30 days.

c. Rescinded IAB 5/30/01, effective 7/4/01.

d. Priority II infants pre-certified with referral data require a full certification within six weeks of the infant's birth.

73.7(4) Medical equipment.

a. Medical equipment used in conducting WIC clinics shall be subject to approval by the department.

b. Standards for conducting the medical and nutritional assessments on program applicants shall be as described in the Iowa WIC Policy and Procedure Manual.

c. Medical equipment shall be recalibrated in accord with procedures outlined in the Iowa WIC Policy and Procedure Manual.

73.7(5) Documentation of health and nutrition information. Documentation of health and nutrition information in individual participant records shall be as described in the Iowa WIC Policy and Procedure Manual.

73.7(6) Documentation of nonmedical information. Documentation of nonmedical information in individual participant and collective program records shall be as described in the Iowa WIC Policy and Procedure Manual.

73.7(7) Transfer of participant information. Requirements for use and disclosure of confidential applicant and participant information for non-WIC purposes were revised in the Federal Register September 27, 2006, Department of Agriculture, Food and Nutrition Service, 7 CFR Part 246, Miscellaneous Provisions; Final Rule 246.25(a)(4).

a. Designation by chief state health officer. The chief state health officer must designate in writing the permitted non-WIC uses of the information and the names of the organizations to which such information may be disclosed.

b. Notice to applicants and participants. The applicant or participant will be notified at the time of application (in accordance with 7 CFR 246.7(i)(11)) or through a subsequent notice that the chief state health officer may authorize the use and disclosure of information about an applicant's or participant's participation in the WIC program for non-WIC purposes. This statement will also indicate that such information will be used by state and local WIC agencies and public organizations only in the administration of programs that serve persons eligible for the WIC program.

c. Written agreement and WIC state plan. The state or local agency disclosing the information will enter into a written agreement with the other public organization or, in the case of a non-WIC use by a state or local WIC agency, the unit of the state or local agency that will be using the information. The state agency will also include in its state plan, as specified in 7 CFR 246.4(a)(24), a list of all organizations (including units of the state agency or local agencies) with which the state agency or its local agencies have executed or intend to execute a written agreement. The written agreement must:

(1) Specify that the receiving organization may use the confidential applicant and participant information only for:

1. Establishing the eligibility of WIC applicants or participants for the programs that the organization administers;

2. Conducting outreach to WIC applicants and participants for such programs;

3. Enhancing the health, education, or well-being of WIC applicants or participants who are currently enrolled in such programs, including the reporting of known or suspected child abuse or neglect that is not otherwise required by state law;

4. Streamlining administrative procedures in order to minimize burdens on staff, applicants, or participants in either the receiving program or the WIC program; or

5. Assessing and evaluating the responsiveness of a state's health system to participants' health care needs and health care outcomes; and

(2) Contain the receiving organization's assurance that it will not use the information for any other purpose or disclose the information to a third party.

641—73.8(135) Food delivery. Food delivery refers to all aspects of the method by which WIC participants receive food benefits, i.e., printing, distribution, and processing of computerized personal food instruments redeemable through retail food markets and the statewide banking system. Food delivery shall be uniform throughout the state as provided for by these rules.

73.8(1) Responsibilities of WIC participants.

a. Prompt redemption of food instruments. A WIC participant must redeem WIC benefits within the validated date of use.

b. Claiming food instruments. Enrolled participants are required to appear in person to claim food instruments when they have appointments to certify or have nutrition education contacts. Missed attendance may entitle contract agencies to deny that month's benefit. If a written statement is provided to the contract agency, a proxy may pick up food instruments.

c. Adherence to standards for use of the food instrument. The WIC participant in using the WIC food instrument to obtain the specified foods shall:

(1) Sign the WIC identification card at the time of receipt in the clinic.

(2) Present the WIC identification card to the vendor at point of purchase.

(3) Sign each food instrument in the appropriate box in the presence of the vendor.

(4) Write in the total amount of the purchase in the designated space.

(5) Not accept money in exchange for unused food instruments or portions of the food allotment.

(6) Attempt to redeem food instruments only with a WIC-contracted vendor.

73.8(2) Responsibilities of contract agencies.

a. Loss or theft of food instruments. The contract agency is responsible for any financial loss due to theft or other loss of food instruments from clinics. Steps for minimizing the chances of theft or loss are followed in accord with the Iowa WIC Policy and Procedure Manual.

b. Mailing of WIC food instruments. Mailing of food instruments to participants is allowed when inclement weather prevents participants from coming to a distribution site. Any mailing of WIC food instruments on a clinicwide basis must have prior approval from the state.

c. Use of manual food instruments. Rescinded IAB 1/30/08, effective 3/5/08.

d. Training/monitoring of WIC vendors. The contract agency shall communicate information regarding the Iowa WIC program to vendors, as instructed by the department. Monitoring and training of vendors and securement of contracts shall be carried out in accordance with department directives outlined in the Iowa WIC Policy and Procedure Manual.

e. Food instrument distribution on nonclinic days. It is the policy of the Iowa WIC program to ensure maximum accessibility to program benefits by establishing alternate procedures for distributing WIC food instruments to participants on days other than regularly scheduled clinic days when the participant notified the contract agency on or before the clinic day of the participant's inability to appear at the clinic. Each contract agency shall establish written guidelines for assessing the adequacy of reasons presented for inability to appear and shall establish written procedures for alternative means of food instrument distribution when a participant timely presents adequate reasons for inability to appear on a regularly scheduled clinic day. These written guidelines and procedures shall be subject to review and approval by the department.

73.8(3) Responsibilities of department. Provision of foods through retail grocers and special purpose vendors is an integral part of the WIC program's function. It is the responsibility of the department to ensure that there are a sufficient number of stores authorized to provide reasonable access for program participants. The department also has an obligation to ensure that both food and administrative funds are expended in the most efficient manner possible. As with all other purchases made by state government, this means that the number of vendors (retail grocers and special purpose vendors) may be limited and that all vendors must meet minimum criteria for approval. A retailer that intends to derive more than 50 percent of annual revenue of the sale of food items from the redemption of WIC food instruments will not be allowed. The department shall be responsible for the following:

a. Approving or denying vendor applications. The department shall determine if applications meet the mandatory specifications in 73.8(4) and meet the minimum review points in 73.8(4) for a subsequent agreement.

b. Compiling the statewide or local area composite data against which vendor applications are reviewed, determining if applications meet the selection criteria which require use of that data, providing training, and signing the initial authorization agreement if a vendor is determined to be eligible.

c. Developing procedures, forms, and standards for agencies to use in conducting on-site review of vendor applications, monitoring, compliance buys, educational buy monitoring, or compliance investigations as defined in 73.8(5).

d. Determining when compliance investigation activities are necessary to verify program violations, developing or approving standards and procedures to be used in conducting the activities, and arranging for an appropriate state or private agency to conduct the compliance buying investigation as required.

e. Providing written notice to vendors of program violations and sanctions.

73.8(4) Responsibilities of WIC vendors. A potential vendor shall make application to the Iowa department of public health WIC program and shall accept the obligations imposed by the signing of a WIC vendor agreement prior to acceptance of any WIC food instrument. The two categories for which any potential vendor may apply are grocery vendors and special purpose vendors. A retailer that intends to derive more than 50 percent of annual revenue of the sale of food items from the redemption of WIC food instruments will not be approved.

a. Grocery vendor agreement. To qualify for a grocery vendor agreement with the Iowa WIC program, a retail outlet shall meet all of the following criteria:

(1) The vendor must stock all of the following categories of items to be defined as a grocery vendor: a minimum of 5 linear feet of raw fruits and vegetables; a minimum of 12 linear feet of unbreaded fresh or frozen meats and poultry (prepackaged luncheon meats do not qualify); canned and frozen vegetables; dairy products; and cereals.

(2) No more than 20 percent of the vendor's gross retail sales may be from the sale of gasoline or other automotive supplies.

(3) No more than 20 percent of the vendor's gross retail sales may be from the sale of alcoholic beverages and tobacco products.

(4) The vendor must maintain regular business hours. This shall include a minimum of two 4-hour blocks of time on each of five days per week. Daily operating hours shall be consistent from week to week, and shall be posted.

(5) The vendor must stock the minimum variety and quantity of WIC-approved foods as defined in the latest revised version of the Iowa WIC vendor application.

The specific brands of products that are included on the WIC-approved food list shall be made available to the vendor at the time of application and prior to renewal of each agreement.

The variety and quantity in stock are defined as including both inventory on display and in on-premises storage, but not inventory on order from suppliers.

(6) A vendor shall charge a price to WIC participants that is equal to or less than the price charged to all other customers. The prices charged to WIC participants for the average of all WIC items, as reported on the application, at the time of the on-site review, and throughout the agreement period, shall not exceed 105 percent of the average prices of all other WIC vendors in the same peer group. The vendor's average price for any category of WIC items, as reported on the application, at the time of the on-site review, and throughout the agreement period, shall not exceed 115 percent of the average price charged for the same category by all other WIC vendors in the same peer group. Categories refer to the broad groupings of items rather than specific brands. For purposes of making the price comparisons, the average price for all other WIC vendors in the peer group shall be computed from the most recent Price Assessment Reports on file from those vendors. If a vendor intends to comply with this provision by charging WIC participants a lower price than the price charged to other customers, the WIC price for each approved item must be identified on the package or shelf front.

(7) There must be a minimum of five current WIC participants residing in the same ZIP code area as the vendor.

(8) The vendor must not have had a food stamp program disqualification or civil monetary penalty imposed within the 12 months preceding the date of the application or reauthorization.

(9) The vendor must not have had a WIC program suspension imposed or a WIC application denied within the six-month period preceding the date of the application.

(10) The vendor must not have had a conviction or civil judgment for any activity that indicates a lack of business integrity against any of the officers or owners during the previous six years.

(11) The vendor must accept training on WIC program regulations prior to signing an agreement and must agree to provide training to all employees who will handle WIC food instruments prior to accepting any food instruments.

(12) The vendor must agree to adhere to all provisions of the WIC Vendor Instructions and Agreement Booklet.

b. Special purpose vendor. To qualify as a special purpose vendor, a retail outlet shall meet all of the following criteria:

(1) The vendor may be primarily a retailer of any type of merchandise but shall be authorized to provide only specified infant formula in exchange for WIC food instruments.

(2) The vendor must be able to provide the specified formula within 48 hours; 72 hours if a weekend or holiday is involved.

(3) The prices charged WIC participants must be equal to or less than the prices charged all other customers. The average price of each brand of infant formula sold to WIC participants as reported must not exceed the average price of the same brands of infant formula charged by all authorized WIC grocery vendors in the same peer group.

(4) The vendor shall meet the criteria in paragraph "a," subparagraphs (2) to (4) and (6) to (12), for grocery vendors.

(5) The vendor must agree to adhere to applicable provisions of the WIC Vendor Instructions and Agreement Booklet.

(6) Vendors that derive more than 50 percent of annual revenue of the sale of food items from the redemption of WIC food instruments are not allowed.

The department shall review each vendor application within five working days of receipt and determine if the information provided indicates that the retail outlet meets the selection criteria. If the application shows that the vendor does not meet one or more of the criteria, the department shall deny the application. If the vendor's application indicates that the vendor would qualify, the department or contract agency shall make an on-site visit to verify that the information provided in the application

is correct, to provide training, and sign the agreement. If the department or contract agency finds that the vendor has two or more types of out-of-date, stale, or moldy WIC foods in stock during the on-site visit, the vendor's application may be denied. If the contract agency or department determines during the on-site visit that the vendor does not qualify, the contract agency or department shall not sign the agreement. Within five working days of disapproving an application or agreement, the department will advise the vendor in writing of the reasons for denial of the application and the procedure for appeal. During the on-site visit, the contract agency representative is acting as an agent of the department and has the authority to approve or deny an application.

A vendor that is denied an agreement, either at the application review level or at the on-site review, is required to wait six months prior to submitting a new application. The department may, at its discretion, request a vendor to resubmit an application prior to completing its review if the application has not been completed to the extent that a determination of eligibility can be made.

c. Reauthorization. If ownership of an authorized vendor changes during the agreement period, the agreement becomes void. The new owner must file an application and be approved prior to accepting WIC food instruments. Vendor agreements are valid only for the period of time specified, and a vendor may not continue accepting food instruments past the expiration date unless a new agreement is signed. When a currently authorized vendor makes application for a subsequent agreement, an agreement shall be signed only if the vendor has been assessed less than 60 violation points under paragraph 73.19(2) "b" within the previous 24 months.

Vendors must complete a new application and sign a new WIC vendor agreement at least every three years to continue accepting WIC food instruments.

The department shall send the vendor written notice at least 30 days prior to the expiration of the agreement that it does not intend to offer the vendor a new agreement if the vendor has been assessed 60 or more violation points under paragraph 73.19(2) "b" within the last 24 months, or if any of the following conditions are in effect:

- (1) The vendor has failed to submit any of the preceding year's Price Assessment Reports by the specified dates.
- (2) The vendor has not cashed any WIC food instruments for at least two consecutive months at any time during the contract period, or has not cashed five or more WIC food instruments for any 120-day period during the contract period. A vendor will not be excluded under this provision if it is the only grocery or special purpose vendor in that ZIP code area.
- (3) Any of the selection criteria listed in 73.8(4) "a" and "b" above are no longer met.

Expiration of a WIC agreement is not subject to appeal. A vendor who is not offered a new agreement by the department has the right to file a new application. If that application is denied, the vendor has the right to appeal.

d. Training. Vendors shall accept training in program policies and procedures at the on-site review prior to becoming an authorized vendor and shall be responsible for training all employees who will be handling WIC food instruments. The manager and person responsible for staff training must allow time at this visit for training; the agreement will not be signed until training is completed. Vendors shall be responsible for all actions of their employees in conducting WIC transactions.

If violations of program policies and procedures are documented, either through on-site monitoring or other indirect means, the vendor shall implement a corrective action training plan developed jointly by the vendor and the department or contract agency.

- e. Validity of food instruments.* The WIC vendor shall be responsible for ensuring that:
- (1) The participant signature required on the food instrument is completed in the vendor's presence;
 - (2) The participant presents a WIC identification card prior to redeeming food instruments. A signature on the WIC identification card must match the food instrument signature;
 - (3) The type and quantity of food to be purchased is as indicated on the food instrument;
 - (4) The amount of money written onto the food instrument for repayment does not exceed the maximum amount as designated by the department and printed on the food instrument;
 - (5) The expiration date is present on the food instrument and is equal to or no later than the date of usage;

- (6) WIC food instruments are never exchanged for cash or credit;
- (7) Substitutions of foods different from those listed on the food instrument in type or amount are not made;
- (8) Food instruments are presented to the state's agent (bank) for payment within 15 days of the date of receipt;
- (9) The costs of foods purchased by WIC participants do not exceed charges to other customers for the same foods;
- (10) The vendor's authorizing number is stamped with the state-issued vendor stamp on the face of the food instrument prior to its being presented for payment.

f. Cooperation during monitorings. Contracted WIC vendors shall cooperate with department and contract agency staff who are present on site to monitor the store's WIC activities.

g. Reimbursement to the program. Vendors determined by the department to have collected more moneys than the true value of food items received shall make reimbursement to the department.

73.8(5) Vendor monitoring. To maintain program integrity and accountability for federal or state program funds, the department and contract agencies shall conduct ongoing monitoring of authorized vendors, both through on-site visits and through indirect means. A sample of 10 percent of currently authorized vendors receives on-site monitoring every year. Vendors that change ownership during the year, or apply during the contract period, receive an on-site visit prior to signing an agreement. The types of on-site monitoring are defined as follows:

a. Routine or representative monitoring is used for vendors for which there is no record of violations or complaints or other indication of problems. It may include any or all of the following: use of a food instrument or observation of a participant, educational buys, review of inventory levels, examination of redeemed WIC food instruments on hand, review of store policies on return items, and review of employee training procedures. The results of the monitoring are reviewed with the owner or manager on duty, and a follow-up letter confirming the findings is sent from the department. Routine monitoring may be performed by the department or by contract agency staff under the direction of the department. Depending on the nature and severity of violations noted, the department may schedule additional visits, initiate a compliance investigation, or apply sanctions.

Educational buy monitoring is a specialized type of routine monitoring. Department or contract agency staff attempt to use a WIC food instrument to purchase unauthorized types or brands of foods to test the level of training of store employees. At the conclusion of the transaction, the results of the buy are discussed with the store owner or manager on duty. The transaction is then voided, and the merchandise returned to the shelves. Educational buys are used on authorized vendors selected by the department. If unauthorized items are allowed to be purchased, the vendor shall agree to a corrective action training plan. A follow-up educational buy is scheduled within 30 to 90 days. A letter is sent from the department documenting the violation. By signing a WIC agreement, a vendor gives consent for educational buys by the department or contract agency. Vendors are not notified in advance that an educational buy is scheduled. The protocol for educational buys, including procedures, appropriate items to purchase, and forms to be used, is specified in the Iowa WIC Policy and Procedure Manual.

b. Electronic monitoring is examination of indicators tracked in the vendor computer database. It allows the analysis of data collected via computer from the contract agencies and the state's bank, from which patterns indicating compliance with or deviation from established patterns for Iowa WIC vendors emerge. Data is collected daily and reviewed on an ongoing basis. Trends identified can necessitate another type of monitoring, depending on the nature of each exception.

c. Compliance investigations may be used for any vendors. Compliance investigations will be conducted annually in a minimum percentage of vendors as mandated in federal regulations. A compliance investigation includes a sufficient number of compliance buys to provide evidence of program noncompliance, two compliance buys in which no program violations are found, or when an inventory audit has been completed. A compliance buy means a covert, on-site investigation in which a representative of the program poses as a participant, parent or caretaker, or proxy, transacts one or more food instruments and does not reveal during the visit that he or she is a WIC representative. Compliance buys may be performed by the department or another state agency or private company under contract

with the department. The department is responsible for identifying the vendors to be investigated and for approving the protocol to be used during the investigation. Upon completion of a compliance buy documenting program violations, the department shall issue the vendor a notice of violation points assessed unless such notification would hinder an investigation.

The department also monitors vendor performance through in-office review of information. Such information, specifically the total amount of WIC redemptions, is confidential as provided for in Iowa Code section 22.7(6). This business information could provide an advantage to competitors and would serve no public purpose if made available.

641—73.9(135) Food package. The authorized supplemental foods shall be prescribed for participants by a CPA in the contract agency from food packages outlined in 7 CFR 246.10 and in accordance with the following:

73.9(1) Prescription of foods. Food packages shall maintain a balance between cost and nutrition integrity. There are two components to this balance: (1) administrative adjustments by the department; and (2) nutrition tailoring by both the department and the CPA in the contract agencies.

a. Administrative adjustments include restrictions in the packaging methods, brands, sizes, types, and forms (but not quantities) of the federally allowable foods in order to establish the approved food list for the state. Administrative adjustments include decisions to eliminate more expensive brands or prohibit more costly food items allowed by regulations. Criteria for considering foods for inclusion in the approved food list are found in 73.9(3).

b. Nutrition tailoring includes changes or substitutions to food types, forms, and quantities in order to prescribe food packages that better meet the nutritional needs of participants. Tailoring is done to reduce quantities of foods based on nutritional needs, to accommodate participant preferences, to accommodate household conditions such as lack of refrigeration or other special needs and problems of homeless or transient participants, and to recommend or prescribe specific forms of the allowable WIC foods based upon a participant's nutritional needs or goals.

c. Rescinded IAB 8/4/04, effective 9/8/04.

73.9(2) Tailoring to meet individual nutrition needs. Food packages are individually tailored to meet the needs of specific participants according to USDA regulations and the Iowa WIC Policy and Procedure Manual.

73.9(3) Criteria for approving products for inclusion in the WIC food package.

a. A product shall meet the federal regulations governing the WIC food package.

b. Variety in the food package is encouraged to increase the likelihood of products being used as well as to allow participants to exercise responsibility in shopping.

c. Changes to the approved food list take effect on October 1 in years when new vendor contracts are signed. Inquiries from food companies about new and continuing products must be received prior to February 1 of the year vendor contracts expire to be guaranteed consideration.

d. Cereals shall meet federal guidelines for sugar and iron content and shall also meet the following conditions:

(1) They shall be carried by current Iowa WIC vendors.

(2) The product form and marketing approach shall be consistent with the promotion of good nutrition and education.

(3) If a group of cereals from one manufacturer have similar names and package designs and some do not qualify, the department reserves the right to not approve those types that would otherwise qualify, to reduce the potential for confusion by retail vendors and participants.

(4) Ready-to-eat cold cereals are ranked by the six major distributors to Iowa WIC vendors based on volume of total sales. Hot cereals are ranked in the same way. Multiple varieties of a single brand of cereal shall be considered as one brand for the purposes of constructing this ranking. The state office compiles data from all distributors to develop an overall ranking or ranked list. The top 16 name-brand cold cereals, the top 3 varieties of private-label (store) brand cold cereals and the top 2 hot cereals that qualify are selected.

(5) Product shall have been available in retail stores in Iowa for one year prior to the effective date of inclusion in the approved food list.

e. Juices shall meet the federal guidelines for vitamin C content and all of the following conditions:

(1) Juices shall be 100 percent juice and contain no added sugar, sweeteners or artificial sweeteners.

(2) The brand shall be carried by current Iowa WIC vendors. Juices are ranked by the six major distributors to Iowa WIC vendors based on volume of total sales. The top two name brands of each flavor of juice (e.g., tomato, orange, grapefruit, grape, apple, or blended) and form of juice (single-strength or concentrated) that meet the selection criteria will be approved. Any private-label (store) brands that meet the selection criteria will also be approved.

(3) The product form and marketing approach shall be consistent with the promotion of good nutrition and education.

(4) If a group of juices from one manufacturer have similar names and package designs and some do not qualify, the department reserves the right to not approve those types that would otherwise qualify, to reduce the potential for confusion by retail vendors and participants. Single-strength and concentrated varieties of juice with the same brand name will be evaluated separately.

(5) Product shall have been available in retail stores in Iowa for one year prior to the effective date of inclusion in the approved food list.

(6) Concentrated juices must be single flavors of juice.

f. The following conditions apply to dairy products:

(1) To qualify, brands of whole, low fat, reduced fat, or fat-free milk marketed in Iowa must contain or be fortified with vitamins A and D to meet the federal standards. The department reserves the right to disqualify brands that significantly exceed the average price of other brands or which are marketed as providing additional health benefits.

(2) Fluid milk with added bacterial cultures or enzymes, including but not limited to sweet acidophilus or lactose-reduced milk, may qualify. Brands are approved by the department on a case-by-case basis.

(3) All brands of natural cheese designated in the USDA WIC regulations qualify. The cheese shall have no added flavors (e.g., smoke flavoring, peppers, wine).

g. All brands of dried beans or peas are approved whether packaged or purchased in bulk, however, no mixes are allowed.

h. Any brand of peanut butter qualifies as long as it does not contain other ingredients such as jelly. Brands may be either refrigerated or nonrefrigerated.

i. Eggs shall be fresh, Grade A large or smaller chicken eggs. Specialty eggs, including those with health or nutrition claims and significantly higher prices, shall not be approved.

j. Any brand of tuna qualifies if it is either water- or oil-packed, chunked, solid, or flaked, and is in six-ounce minimum-size containers. Tuna packaged with other items such as crackers or relish may not be purchased.

k. Commercial infant formula shall meet the following conditions:

(1) It shall have registered with the Food and Drug Administration as complying with the legal definition of infant formula.

(2) It shall comply with the calorie and iron content prescribed by the federal WIC regulations.

(3) It has been approved by the USDA for use in the WIC program.

(4) The product form and marketing approach shall be consistent with the promotion of good nutrition and education.

(5) All of the formula marketed under that label shall meet all standards. If a similar, nonqualifying formula is marketed along with a qualifying formula, participants may be easily confused. Therefore, the qualifying formula shall not be approved.

(6) "Special formulas," as described in the regulations, must be approved by the USDA.

l. In addition to the criteria specified above, the department reserves the right to further restrict the number of brands of any products in order to contain the cost of the food package through competitive procurement of rebate contracts or other similar means.

641—73.10(135) Education.**73.10(1) Nutrition education for WIC participants.**

a. Nutrition education is provided as a benefit to all women and to parents of all children enrolled in the program.

b. A minimum of two nutrition education contacts shall be offered to each woman participant or the parent/guardian of children participating in WIC during each certification period.

c. Nutrition education shall be based on information obtained through the diet and health histories and shall be tailored to the specific nutrition need of the participant.

d. All pregnant women enrolled in WIC shall receive education on the benefits of breastfeeding.

e. Education in normal nutrition, i.e., education in nutrition for life-cycle stages, shall be provided in accordance with the Iowa WIC Policy and Procedure Manual.

f. Participants who are at high risk, as defined in the Iowa WIC Policy and Procedure Manual, shall receive counseling and a nutrition plan of care developed by a licensed dietitian. The plan of care shall be documented in the participant record and shall include scheduling a minimum of one individual education contact by a licensed dietitian.

g. The department shall make nutrition education materials and resources available at no cost to contract agencies. The department reserves the right to review and approve or disapprove any printed materials or lesson plans developed by contract agencies.

h. To the extent that time and resources are available, nutrition education may be provided to applicants who are not eligible to receive other WIC services.

73.10(2) Education of contract agency personnel. Agencies accepting WIC funds shall be responsible for ensuring that all agency staff or contractors are adequately trained for their responsibilities. At a minimum, training shall include the components described in the Iowa WIC Policy and Procedure Manual.

Continuing education is an allowable WIC administrative expense for contract agency staff and contractors who provide nutrition education.

641—73.11(135) Health services. The WIC program shall serve in the arrangement of ongoing health services for its participants. Health services are defined to include ongoing, routine pediatric and obstetrical care, and referral for diagnosis and treatment of any other condition. Contract agencies not able to provide such health services directly shall enter into written agreements with other public health agency(ies) or private physician to ensure availability of health services.

73.11(1) Written agreements.

a. *Contract for services.* Contract agencies shall maintain an annual written, contractual agreement with any health agency performing WIC health assessments, whether for fee or exchange of service.

b. *Memorandum of understanding.* Contract agencies shall maintain a current memorandum of understanding with any health agency designated to provide ongoing health services to WIC participants and with any agency providing referral data for precertification of infants and pregnant women.

73.11(2) Referral procedures. The contract agency shall be responsible for referral of WIC participants to appropriate health care providers, as determined by the WIC health professional's assessment of their condition.

a. *Authorization for release of information.* Except as indicated below, before releasing medical or other personal information, including name, to an outside agency, the contract agency shall secure the participant's or parent/legal guardian's written authorization to release such information. A statement shall be signed for each specific provider to which information is being sent. The information contained in individual participant records shall be confidential pursuant to 7 CFR 246.26.

Referrals to the department of human services' child protective services for investigation of potential child abuse or to a law enforcement agency conducting an active criminal investigation may be made without obtaining a written release of information. Procedures for responding to a subpoena are made in accordance with the Iowa WIC Policy and Procedure Manual.

b. The referral form. A standard referral form, as provided by the department, shall be completed and sent to the referral agency. Documentation and follow-up are made in accord with the Iowa WIC Policy and Procedure Manual.

641—73.12(135) Appeals and fair hearings—local agencies and vendors.

73.12(1) Right of appeal. The right to appeal shall be granted when a local agency's or a vendor's application to participate is denied. The right to appeal shall also be granted when, during the course of the contract or agreement period, a local agency or vendor is disqualified or any other action which affects participation is taken. For participating vendors, a minimum of 30 days' advance notice will be given before the effective date of the action. For participating contract agencies, a minimum of 60 days' advance notice will be given before the effective date of the action. The right to appeal shall not be granted in the following circumstances:

- a.* When a vendor's contract expires.
- b.* When the department makes a determination regarding participant access.
- c.* When a vendor is disqualified from the WIC program as a result of a food stamp program disqualification.
- d.* When a vendor does not agree with the validity or appropriateness of selection criteria defined in 73.8(4).

73.12(2) Request for hearing. An appeal is brought by filing a written request for a hearing with the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within ten days of receipt of notification of the adverse action. The written request for hearing shall state the adverse action being appealed.

73.12(3) Contested cases. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

73.12(4) Notice of hearing. The administrative law judge (ALJ) shall schedule the time, place and date of the hearing as expeditiously as possible. Hearings shall be conducted by telephone or in person in Des Moines at the Lucas State Office Building or other suitable location. If necessary, parties will be provided at least two opportunities to have the hearing rescheduled.

73.12(5) Conduct of hearing. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code, and federal regulations found at 7 CFR 246.24. Copies of these regulations are available from the department of inspections and appeals upon request.

73.12(6) Decision. A written decision of the ALJ shall be issued, where possible, within 60 days from the date of the request for a hearing unless the parties agree to a longer period of time.

73.12(7) Decision of ALJ. When the ALJ makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 73.12(8).

73.12(8) Appeal to director. Any appeal to the director for review of the proposed decision and order of the ALJ shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the ALJ's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the ALJ. Any request for an appeal shall state the reason for appeal.

73.12(9) Record of hearing. Upon receipt of an appeal request, the ALJ shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a.* All pleadings, motions, and rules.
- b.* All evidence received or considered and all other submissions by recording or transcript.

- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the hearing officer.

73.12(10) *Decision of director.* The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

73.12(11) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review pursuant to Iowa Code chapter 17A.

73.12(12) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—73.13(135) Right to appeal—participant.

73.13(1) *Right of appeal.* A WIC participant shall have the right to appeal whenever a decision or action of the department or contract agency results in the individual's denial of participation, disqualification, or termination from the WIC program. All hearings shall be conducted in accordance with these rules.

73.13(2) *Notification of appeal rights and right to hearing.* Each program participant shall be notified in writing of the participant's right to appeal at the time of application and at the time of denial of eligibility or termination from the program (on Denial or Termination of Eligibility Form). Appeal and hearing notices shall also be written, posted, and immediately available at contract agencies to explain the method by which a hearing is requested, and that the participant may present arguments at the hearing either personally or through a representative such as a relative, friend, legal counsel, or other spokesperson.

73.13(3) *Request for hearing.* A request for hearing by an individual or the individual's parent, guardian, or other representative must be made in writing. The request for hearing shall be made to the contract agency within 90 days from the date the individual receives notice of the decision or action that is the subject of appeal.

73.13(4) *Receipt of benefits during appeal.* Participants who are involuntarily terminated from the WIC program prior to the end of the standard certification period shall continue to receive program benefits while the decision to terminate is under administrative appeal, provided that subsequent certifications are completed as required. Participants who are terminated because of categorical ineligibility (e.g., a child over five years of age) shall not continue to receive benefits during the administrative appeal period. Participants who are terminated at the end of a certification period for failure to reapply, following notice of expiration of certification, shall not continue to receive benefits during the administrative appeal period. Applicants who are denied program benefits at the initial certification or at subsequent recertifications, due to a finding of ineligibility, shall not receive benefits during the administrative appeal period.

73.13(5) *Hearing officer.* The hearing officer shall be impartial, shall not have been directly involved in the initial determination of the action being contested, and shall not have a personal stake in the decision. If the party filing the appeal objects prior to a scheduled hearing to a contract agency director serving as a hearing officer in a case involving the director's own agency, another hearing officer shall be selected and, if necessary, the hearing shall be rescheduled as expeditiously as possible. Contract agencies may seek the assistance of the state WIC office in the appointment of a hearing officer.

73.13(6) *Notice of hearing.* The hearing officer shall schedule the time, place and date of the hearing as expeditiously as possible. Parties shall receive notice of the hearing at least ten days in advance of the

scheduled hearing. The hearing shall be accessible to the party requesting the hearing. The hearing shall be scheduled within three weeks from the date the contract agency received the request for a hearing, or as soon as possible thereafter, unless a later date is agreed upon by the parties.

73.13(7) Conduct of hearing. The hearing shall be conducted in accordance with federal regulations found at 7 CFR Section 246.23. Copies of these regulations are available from the contract agency and the department. At a minimum, the party requesting the hearing or the party's representative shall have the opportunity to:

- a. Examine, prior to and during the hearing, the documents and records presented to support the decision under appeal;
- b. Be assisted or represented by an attorney or other person at the party's own expense;
- c. Bring witnesses;
- d. Question or refute any testimony or evidence, including an opportunity to confront and cross-examine adverse witnesses;
- e. Submit evidence to establish all pertinent facts and circumstances in the case;
- f. Advance arguments without undue interference.
- g. If a participant fails to attend the hearing, the agency will reschedule the hearing and give the participant 20 days' notice. The participant may have another person as the participant's designee. If neither the participant nor the designee attends the second hearing, the appeal will be closed.

73.13(8) Decision. Decisions of the hearing officer shall be in writing and shall be based on evidence presented at the hearing. The decision shall summarize the facts of the case, specify the reasons for the decision, and identify the supporting evidence and pertinent regulations or policy. The decision shall be issued within 45 days of the receipt of the request for a hearing, unless a longer period is agreed upon by the parties.

73.13(9) Appeal of decision to the department. If either party to a hearing receives an unfavorable decision, that decision may be appealed to the department. Such appeals must be made within 15 days of the mailing date of the decision. Appeals shall be sent to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

73.13(10) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the Iowa department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to the Iowa department of inspections and appeals.

73.13(11) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the Iowa department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

73.13(12) Decision of administrative law judge. The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 73.13(13).

73.13(13) Appeal to director. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

73.13(14) Record of hearing. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.

- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

73.13(15) *Decision of director.* An appeal to the director shall be based on the record of the hearing before the administrative law judge. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

73.13(16) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

73.13(17) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

73.13(18) *Benefits after decision.* If a final decision is in favor of the person requesting a hearing and benefits were denied or discontinued, benefits shall begin immediately and continue pending further review should an appeal to district court be filed. If a final decision is in favor of the contract agency, benefits shall be terminated, if still being received, as soon as administratively possible after the issuance of the decision. Benefits denied during an administrative appeal period may not be awarded retroactively following a final decision in favor of a person applying for benefits.

641—73.14(135) *State monitoring of contract agencies.* The department shall review contract agency operations through use of reports and documents submitted, state-generated data processing reports, and on-site visits for evaluation and technical assistance.

73.14(1) *On-site visits.* Department staff shall visit contract agencies whenever necessary, to review operations and ensure compliance with state and federal regulations.

73.14(2) *Request for written reports.* The department may request written progress reports from contract agencies within specified times.

73.14(3) *Qualifications of department reviewers.* At minimum, one of the persons from the department responsible for reviewing a contract agency shall be a licensed dietitian.

641—73.15(135) *Migrant services.* To meet the WIC needs of migrant workers within the state, a contract or work agreement shall be maintained with at least one contract migrant service agency within the state to provide or assist in the provision of service to this population.

641—73.16(135) *Civil rights.* The Iowa WIC program shall operate in compliance with the Equal Employment Opportunity Act of 1973, the Civil Rights Act of 1964, amended 1972, the State of Iowa Civil Rights Act of 1965, the Age Discrimination Act of 1967, Section 504 of Rehabilitation Act of 1973, Iowa Executive Order #15 of 1973, Executive Order #11246 of 1965 as amended by Executive Order #11375 of 1967, and the Americans With Disabilities Act of 1991 to ensure the rights of all individuals under this program.

641—73.17(135) *Audits.* Each contract agency shall ensure an audit of the WIC program within the agency at least every two years, to be conducted by a private certified public accountant or in accord with applicable Office of Management and Budget Circulars: A-128, Audits of State and Local Governments, and A-133, Audits of Institutions of Higher Education and Other Nonprofit Institutions. Each audit shall

cover all unaudited periods through the end of the previous grant year. The department's audit guide shall be followed to ensure an audit that meets federal and state requirements.

641—73.18(135) Reporting. Completion of grant applications, budgets, expenditure reports and written responses to the department's monitoring for the WIC program shall be conducted by contract agencies in compliance with the formats and procedures outlined by the department in the Iowa WIC Policy and Procedure Manual, as specified in the contract entered into by the department and the contract agency.

641—73.19(135) Program violation. Participants or vendors are subject to the sanctions outlined below if determined by contract agency or department staff to be guilty of abusing the program or its regulations.

73.19(1) Participant violation. Violations may be detected by contract agency staff, by vendors, or by department staff. Information obtained by the department is forwarded to the contract agency for appropriate action.

a. Whenever possible, the participant is counseled in person concerning the violation. Documentation is maintained according to procedures set forth in the Iowa WIC Policy and Procedure Manual.

b. Participants who violate program regulations are subject to sanction in accordance with the schedule below:

Violation	Points Per Event
1. Attempting to purchase unauthorized brands/types of foods (i.e., incorrect brands of cereal, juices, etc.).	3
2. Attempting to cash food instrument for more than the possible value of the foods listed.	3
3. Not signing the food instrument at the time of purchase.	3
4. Attempting to cash food instruments after the last valid date.	4
5. Redeeming WIC food instruments at an unauthorized vendor.	4
6. Redeeming food instruments before the allowable date.	4
7. Attempting to cash food instruments that were signed prior to redemption at the vendor.	5
8. Redeeming WIC food instruments that were reported as lost or stolen.	5
9. Attempting to purchase more than the quantity of foods specified on the food instrument.	5
10. Verbal abuse or harassment of WIC or vendor employees.	5
11. Threat of physical abuse of WIC or vendor employees.	10
12. Attempting to sell, return, or exchange foods for cash or credit.	10
13. Attempting to purchase unauthorized (non-WIC) foods, such as meat, canned goods, etc.	10
14. Attempting to purchase items that are not food.	10
15. Sale or exchange of WIC food instruments for cash or credit.	10
16. Altering a food instrument (e.g., changing last valid date, food item or quantity).	10
17. Attempting to redeem food instrument issued to another participant.	10
18. Receiving more than one set of benefits for the same time period.	10
19. Knowing and deliberate misrepresentation of circumstances to obtain benefits (resulting in a false determination of eligibility).	10
20. Attempting to steal WIC food instruments from a contract agency or participant.	10
21. Physical abuse of WIC contract agency or vendor employees.	10
22. Attempting to pick up food instruments for a child that is not currently in their care.	10

c. The accumulation of 10 violation points within a 12-month period will result in a 2-month disqualification.

The accumulation of 10 additional violation points within a 12-month period following the disqualification will result in a 3-month disqualification. The participant must then reapply for the program and be scheduled for a certification.

d. Fifteen days' notice must be given prior to all disqualifications. In all cases, the participant must be informed of the reason for the disqualification and of the right to appeal the decision through the fair hearing process.

e. A disqualification generally applies to all members of a family who are on the program. The competent professional authority may waive the disqualification for one or more members of the family if it is determined that a serious health risk may result from program disqualification. The reason for this waiver must be documented in the participant's file.

f. The cashing of one or more food instruments at the same time constitutes a single violation. Participants will not be charged with a second violation for minor violations worth 5 or fewer points for subsequent food instruments cashed between the first instance and the receipt of the violation notice if the violation is the same. If a major violation greater than 5 points occurs during this period, the participant will be disqualified. Violations are cumulative.

g. When a participant improperly received benefits as a result of intentionally making a false or misleading statement, or intentionally misrepresenting, concealing, or withholding facts, the department shall collect the cash value of the improperly used food instruments. Collection of overpayment is not required when the department determines it is not cost-effective to do so.

The contract agency shall issue a Statement of Restitution along with the disqualification notice. The statement lists the serial numbers and dollar value of the food instruments for which payment is required.

The participant is required to surrender any unspent food instruments and send payment to the department in check or money order for those food instruments that have been cashed.

h. Each contract agency shall maintain a master list of all participant violation notices, disqualifications, and statements of restitution. The participant's notice of violation must also indicate when it is a second offense.

73.19(2) Vendor violations. There are five types of sanctions that are applied to vendors for violations of program regulations: nonpayment of food instruments, issuance of violation points, temporary disqualification, permanent disqualification, and civil money penalties.

a. Nonpayment of food instruments.

(1) As a result of prepayment reviews conducted by the state's bank, improperly completed food items are refused payment and returned to the vendor. Items screened during prepayment are authorized vendor stamp not present or legible in the "Pay to the Order of:" box on face of food instrument, missing signature, price exceeds maximum printed on face of food instrument.

(2) If the violation can be corrected by applying the authorized stamp, obtaining the proper signature, or reducing the price, the item may be resubmitted for payment. Federal banking regulations prohibit a financial instrument from being sent through the federal reserve system more than twice. If an improperly completed WIC food instrument is received by the state's bank a second time, it is voided and may not be redeposited.

b. Administrative and procedural violation points. Administrative and procedural violations are offenses to the provisions of the WIC vendor agreement that do not rise to the level of fraud against the program or its participants.

These violations are an indication of a vendor's inattention to or disregard of the requirements of a WIC vendor agreement. It is in the department's interest to record and consider these violations when considering whether to continue its contractual relationship with the vendor.

One or more transactions prior to notification of the vendor constitute only one violation if they contain the same error.

The assignment of violation points does not limit the department's right to effect stronger penalties and sanctions in cases in which there is evidence of an intentional or systematic practice of abusing or defrauding the Iowa WIC program.

Violation	Points Per Event
1. Accepting food instrument(s) outside the valid dates of use.	5
2. Depositing food instrument(s) more than 15 days after purchase date.	5
3. Accepting food instrument(s) with no date stamp.	5
4. Refusal to accept valid WIC food instruments from participants.	10
5. Discriminatory treatment of WIC participants, such as requiring WIC participants to use special checkout lanes or provide extra identification.	10
6. Providing to WIC participants incentive items not prior authorized by the department.	10
7. Failure to carry out corrective action plan developed as a result of monitoring visit.	10
8. Failure to reimburse department for potentially overpaid food instrument or provide reasonable explanation for the cost of the food instrument.	5
9. Accepting the return of food purchased with WIC food instruments for cash or credit toward other purchases.	10
10. Failure to use the WIC vendor stamp issued by the Iowa WIC program.	5
11. Issuing "rain checks" or credit in exchange for WIC food instruments.	10
12. Stocking out-of-date, stale, or moldy WIC foods.	10
13. Failure to submit vendor price assessment reports as requested.	10
14. For vendors that have special WIC prices, failure to post WIC prices on the shelf or on the package.	15
15. Cashing food instrument(s) without amount, date of purchase, or participant signature.	15
16. Contacting WIC participants in an attempt to recover funds not paid by WIC.	15
17. Providing false information on the price assessment report.	15
18. Failure to train all employees and ensure their knowledge regarding WIC program procedures set forth in the vendor's current agreement and in the current publication of the Iowa WIC program's vendor instruction booklet.	10
19. Requiring WIC participants to purchase a particular brand when other WIC-approved brands are available.	10
20. Not allowing WIC participants to use discount coupons or promotional specials to reduce the WIC food instrument amount.	10
21. Requiring other cash purchases to redeem WIC food instruments.	15
22. Failure to allow purchase of up to the full amount of WIC foods authorized on the food instrument if such foods are available and desired by the WIC participant.	20

c. One-year disqualification. With an administrative finding of the following violations, the vendor will be disqualified for one year.

(1) Accumulation of 45 or more violation points within a single federal fiscal year of the agreement period.

(2) Allowing purchase of nonapproved and nonsimilar food items in exchange for WIC food instruments.

(3) Failure to provide access to store premises or in any manner to hinder, impede or misinform authorized WIC personnel in the act of conducting an on-site education, monitoring or investigation visit.

(4) Loss of Iowa department of inspections and appeals license.

(5) Submitting for payment a WIC food instrument redeemed by another authorized vendor.

(6) Threatening or verbally abusing WIC participants or authorized WIC program personnel in the conduct of legitimate WIC program transactions.

d. With an administrative finding of the following violations, the vendor will be disqualified from being a WIC vendor for three years.

(1) A pattern of charging WIC participants more than non-WIC customers or charging WIC participants more than the current shelf price.

(2) A pattern of charging for items not received by the WIC participant or for foods provided in excess of those listed on the WIC food instrument.

(3) A pattern of providing credit or nonfood items, except for alcohol, alcoholic beverages, or tobacco products, in exchange for WIC food instruments.

(4) One incidence of allowing the purchase of alcohol, alcoholic beverages, or tobacco products with a WIC food instrument.

(5) A pattern of receiving, transacting, or redeeming WIC food instruments outside authorized channels, including through unauthorized vendors or persons.

(6) A pattern of claiming reimbursement for the sale of a quantity of a specific food item which exceeds the store's documented inventory of that food item for a specified period of time.

(7) Submission for payment of WIC food instruments known by the vendor to have been lost or stolen.

e. With an administrative finding of the following violations, the vendor will be disqualified for six years.

(1) One incidence of buying or selling food instruments for cash (trafficking).

(2) Participating with other individuals including but not limited to WIC employees, vendors, and participants, in systematic efforts to submit false claims for reimbursement of improper WIC food instruments.

(3) One incidence of selling firearms, ammunition, explosives, or controlled substances (as defined in Section 102 of the Controlled Substances Act (21 U.S.C. 802)) in exchange for WIC food instruments.

f. With a conviction in a criminal court of law for trafficking in WIC food instruments or selling firearms, ammunition, explosives, or controlled substances (as defined in Section 102 of the Controlled Substances Act (21 U.S.C. 802)) in exchange for WIC food instruments, the vendor will be permanently disqualified from the Iowa WIC program. The department may impose a civil money penalty (CMP) in lieu of a disqualification when it determines, in its sole discretion, that:

(1) Disqualification of the vendor would result in inadequate participant access; or

(2) The vendor had, at the time of the violation, an effective policy and program in effect to prevent trafficking; and the ownership of the vendor was not aware of, did not approve of, and was not involved in the conduct of the violation.

g. The following items do not have a point value, but shall result in or extend a disqualification period:

(1) Failure to return WIC vendor stamp(s) to the WIC program within 10 days of effective date of disqualification, or expiration of agreement following denial of subsequent application, shall result in a 30-day extension of a disqualification period.

(2) For each month in which a vendor accepts WIC food instruments during a disqualification period, the disqualification period shall be extended by 30 days.

h. The above sanctions notwithstanding, the state of Iowa reserves the right to seek civil and criminal prosecution of WIC vendors for any and all instances of dealing in stolen or lost food instruments, trading cash and other inappropriate commodities for food instruments, or cases in which there exists evidence of a clear business practice to improperly obtain WIC funds, or other practices meeting the definition of fraud as defined in 7 CFR 246 or the Iowa Code.

i. A vendor shall not be entitled to receive any compensation for revenues lost as a result of any temporary or permanent disqualification.

j. A minimum of 15 days' notice is provided prior to all disqualifications, except for permanent disqualifications assessed under paragraph 73.19(2) "f," which are effective on the date of receipt of the notice of administrative action. When the department determines that an offense has occurred, a disqualification letter with supporting documentation is prepared for the WIC director's signature. The

disqualification letter identifies the specific offenses that the vendor is charged with and the procedures for filing an appeal.

k. The department is responsible for issuing all warning and disqualification letters. Contract agencies are informed of all vendor correspondence regarding violations. In situations where participant violations are also involved, the contract agency is responsible for follow-up, as detailed in subrule 73.19(1).

l. Federal food stamp regulations require automatic disqualification from the food stamp program for vendors disqualified by the WIC program for certain types of violations. When a vendor is disqualified from the WIC program, the disqualification letter to the vendor will include the following statement: "This disqualification from WIC may result in disqualification as a retailer in the food stamp program. Such disqualification may not be subject to administrative or judicial review under the food stamp program." For all vendor disqualifications from the WIC program, notice will be sent to the United States Department of Agriculture for appropriate action.

m. The department shall disqualify a vendor who has been disqualified from the food stamp program. The disqualification shall be for the same length of time as the food stamp program disqualification, may begin at a later date than the food stamp program disqualification, and shall not be subject to administrative or judicial review under the WIC program. If the department determines that disqualification of a vendor would result in inadequate participant access, it will impose a civil money penalty (CMP) in lieu of disqualification.

n. Civil money penalties.

(1) When the department determines that a civil money penalty (CMP) shall be imposed in lieu of disqualification for reasons specified under paragraph 73.19(2) "*f*" or 73.19(2) "*m*," it shall use the civil money penalty formula in accordance with Title 7 CFR Subpart 246.12(k)(1)(x) to determine the CMP.

(2) If a vendor does not pay, only partially pays, or fails to timely pay a CMP, the department will disqualify the vendor for the length of the disqualification corresponding to the violation for which the CMP was assessed. "Failure to timely pay a CMP" includes the failure to pay a CMP in accordance with an installment plan approved by the department.

(3) Money received by the state WIC agency as a result of civil money penalties or fines assessed against a vendor and any interest charged in the collection of these penalties and fines shall be considered as program income.

641—73.20(135) Data processing. All contract agencies shall comply with the instructions outlined in the Iowa WIC Policy and Procedure Manual for use of the automated data processing system in provision of WIC food instruments and monitoring of WIC services. No contract agency is exempted from adherence to any portion of these instructions.

641—73.21(135) Outreach. Outreach efforts within the Iowa WIC program shall be directed toward extension of services to the neediest Iowans of high priority by reason of their WIC status (see 7 CFR 246.1(d)3). The department and contract agencies shall share responsibility for the conduct of outreach efforts.

73.21(1) Contract agency responsibilities. Contract agencies shall conduct any or all of the following outreach activities annually:

- a.* Employ outreach worker(s).
- b.* Submit for publication a minimum of two newspaper articles on WIC in the local community.
- c.* Distribute WIC brochures to numerous community organizations and offices.
- d.* Hold informational meetings for county social service departments, including food stamp program staff, drug/alcohol abuse counseling services, family investment program staff, and child abuse staff; and for public health nurse offices, physician offices, maternal and child health programs, Head Start programs, dental programs, family planning programs, nutrition professional groups, nursing professional groups, extension services, parent-teacher and other community organizations.

73.21(2) Reserved.

641—73.22(135) Caseload management. The statewide caseload (number of participants) shall be managed by the department in accord with funding limitations and federal regulations or directives. The federally established priority categories of participant shall be followed when limitation of services is necessary in accord with 7 CFR 246.7(d)3. In addition the following rules shall apply:

73.22(1) A contract agency shall maintain a waiting list only when the department determines that sufficient funds are not available to meet demand.

73.22(2) When a waiting list has been authorized, contract agencies shall certify applicants of potential highest priority first (e.g., women and infants) and potential lower priority second (children). Within these priority groups, applicants shall be offered certification appointments in the order of placement on the list.

73.22(3) When insufficient funds are available to serve all priority categories, the department shall provide instructions to contract agencies regarding which priority categories may continue to be certified.

73.22(4) When necessitated by federal funding restrictions, the department reserves the right to terminate or temporarily suspend benefits for categories of participants prior to the end of their certification period. Each participant shall be advised in writing 15 days before the effective date of the reasons for the action and of the right to a fair hearing.

641—73.23(135) Grant application procedures for contract agencies. Private, nonprofit or public agencies wishing to provide WIC services shall file a letter of intent to make application to the department no later than April 1 of the competitive year. Applications shall be to administer WIC services for a specified project period, as defined in the request for proposal, with an annual continuation application. The contract period shall be from October 1 to September 30 annually. All materials submitted as part of the grant application are considered public records in accordance with Iowa Code chapter 22, after a notice of award is made by the department. Notification of the availability of funds and grant application procedures will be provided in accordance with the department rules found in 641—Chapter 176.

Contract agencies are selected on the basis of the grant applications submitted to the department. The department will consider only applications from private nonprofit or public agencies. In the case of competing applications, the contract will be awarded to the agency that scores the highest number of points in the review. Copies of review criteria are available from: Chief, Bureau of Nutrition and Health Promotion, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, (515)281-4913.

641—73.24(135) Participant rights. The special supplemental nutrition program for women, infants and children shall be open to all eligible persons regardless of race, color, sex, creed, age, mental/physical handicap or national origin. An applicant or participant may appeal any decision made by the contract agency or department regarding the applicant's or participant's eligibility for the program.

These rules are intended to implement federal law 42 U.S.C. Section 1786, and Iowa Code sections 10A.202(1) "h" and 135.11(1).

CHAPTER 74
FAMILY PLANNING SERVICES
[Prior to 7/29/87, Health Department[470] Ch 74]

641—74.1(135) Program explanation. The Iowa department of public health is a designated agency to operate the family planning program pursuant to an agreement with the federal government. Congress authorized grants to assist in the establishment and operation of family planning projects which offer a broad range of acceptable and effective family planning methods, including natural family planning, infertility services and services to adolescents. The majority of the funding available is from the Title X, family planning services grant, administered by the United States Department of Health and Human Services (DHHS).

The purpose of the program is to promote the health of persons of reproductive age and families by providing access to family planning and reproductive health promotion services.

The department, bureau of family health, enters into contracts with selected private and public agencies within the department family planning service area for the provision of family planning services. A description of the department family planning service area can be obtained from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

The maternal and child health (MCH) advisory council assists in the development of the state plan for MCH, including children with special health care needs and family planning. The advisory council assists with the assessment of need, prioritization of services, establishment of objectives, and encouragement of public support for MCH and family planning programs. In addition, the advisory council advises the director regarding health and nutrition services for women and children, supports the development of special projects and conferences and advocates for health and nutrition services for women and children. The director appoints the council membership. Membership shall include parents of and service providers for children with special health care needs. Council membership shall also include the chairs, or designees, of the department's advisory committee for perinatal guidelines and the birth defects advisory committee to ensure coordination of each committee's respective issues and priorities. The chair of the family services grantee committee or the designee of the chair may serve as an ex officio member of the council.

641—74.2(135) Adoption by reference. Federal regulations found at 42 CFR Subpart A, Part 59, and the Program Guidelines for Project Grants for Family Planning Services shall be the regulations governing the Iowa family planning program and are incorporated by reference herein.

Copies of the federal regulations adopted by reference are available from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—74.3(135) Rule coverage. These rules cover the agencies that have a contract with the department to provide family planning services and receive funds from the department for that purpose.

641—74.4(135) Definitions.

"Applicant" means a private nonprofit or public agency that seeks a contract with the department to provide family planning services and receives funds from the department for that purpose.

"Client" means an individual who receives family planning services through a contract agency.

"Contract agency or contractor" means a private nonprofit or public agency within the department family planning service area that has a contract with the department to provide family planning services and receives funds from the department for that purpose.

"Department" means the Iowa department of public health.

"DHHS" means the United States Department of Health and Human Services.

"DIA" means the Iowa department of inspections and appeals.

"Director" means the director of the Iowa department of public health.

"Family" means a group of two or more persons related by birth, marriage, or adoption or residing together. A pregnant woman is considered as two individuals when calculating the number of individuals

in the family. If a pregnant woman is expecting multiple births, the family size is increased by the number expected in the multiple birth.

“Family planning” means the promotion of reproductive and family health by the prevention of and planning for pregnancy, and reproductive health education.

“Health education” means services provided by a health professional to include teaching about normal anatomy and physiology, contraception, risk assessment, safety and injury prevention, signs or symptoms indicating need for medical care, and other anticipatory guidance topics.

“Health professional” means an individual who is licensed to provide health care or social services within their scope of practice.

“Health services” means services provided by family planning contract agencies.

“Medicaid” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from DHHS.

“OMB” means the United States Department of the Treasury, Office of Management and Budget.

“Performance standards” means criteria or indicators of the quality of service provided or the capability of an agency to provide services in a cost-effective or efficient manner as defined in “Iowa Department of Public Health Family Planning Manual” and the federal regulations found at 42 CFR Subpart A, Part 59, and the Program Guidelines for Project Grants for Family Planning Services.

“Title X” means the federal requirements contained in 42 CFR Subpart A, Part 59, and the Program Guidelines for Project Grants for Family Planning Services.

“Title XX” means the combined federal and state dollars in the Social Services Block Grant allocated to pay for family planning services.

641—74.5(135) Grant application procedures for contract agencies. Notification of the availability of funds and grant application procedures will be provided in accordance with the department rules found in 641—Chapter 176. Eligible applicants include only private nonprofit or public agencies. Private nonprofit or public agencies seeking to provide Title X family planning center services shall file a letter of intent to make application to the department no later than April 1 of the competitive year. The request for proposals shall identify the project period and the contract period. Contract agencies are selected on the basis of the grant applications submitted to the department. In the case of competing applications, the contract will be awarded to the applicant that scores the highest number of points in the review. Copies of review criteria are available from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. All materials submitted as part of the grant application are considered public records in accordance with Iowa Code chapter 22, after a notice of award is made by the department.

641—74.6(135) Funding levels for contract agencies. The amount of funds available to each contract agency on an annual basis shall be determined by the department using a methodology based upon dollars available, number of clients enrolled, and selected needs criteria.

641—74.7(135) Agency performance. Contract agencies are required to provide services in accordance with these rules.

74.7(1) Performance standards. The department shall establish performance standards that contract agencies shall meet in the provision of public health services in addition to meeting all federal requirements. The performance standards for community-based agencies are published in the document “Iowa Department of Public Health Family Planning Manual.” Copies of the performance standards are available from the Chief, Bureau of Family Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. Contract agencies that do not meet the performance standards shall not be eligible for continued funding as a family planning agency unless the contract agency has secured an exception.

74.7(2) Contract agency review. The state agency shall review contract agency operations through use of reports and documents submitted, state-generated data reports, chart audits, on-site and clinic visits for evaluation and technical assistance.

74.7(3) Exception. An agency that does not meet a performance standard or fails to meet action plans as approved by the department may be granted an exception for up to one year in order to improve performance. Such an exception must be requested in writing. If granted, the approval for the exception will include the conditions necessary for the successful completion of the standard, a time frame, and additional reporting requirements. The procedures for applying for and approving an exception are outlined in the “Iowa Department of Public Health Family Planning Manual.”

641—74.8(135) Reporting. Contract agencies shall complete grant applications, a budget, expenditure reports, an annual progress report, a family planning annual report, and data forms in compliance with the terms of the contract.

641—74.9(135) Fiscal management. All contract agencies are required to meet certain fiscal management policies.

74.9(1) Last pay. Family planning grant funds are considered last pay. Title XIX, Title XX and other third parties are to be billed first if the client is covered by those sources.

74.9(2) Program income. Program income means gross income earned by the contractor from activities in which part or all of the cost is either borne as a direct cost by a grant or counted as a direct cost toward providing services. It includes but is not limited to such income in the form of Title XIX and Title XX fees for services, third-party reimbursements, client fees, and proceeds from sales of tangible personal or real property.

Program income shall be used for allowable costs of the project. Program income shall be used prior to the use of funds received from the department. Excess program income may be retained to establish a three-month operating capital. Program income shall be used during the current fiscal year or the following fiscal year. Five percent of unobligated program income may be used by the contract agency for special purposes or projects provided such use furthers the mission of the family planning program and does not violate state rules or federal regulations governing the program.

74.9(3) Advances. A contract agency may request an advance up to one-sixth of its contract at the beginning of a contract year. The amount of any advance shall be deducted prior to the end of the fiscal year.

74.9(4) Subcontracts. Contract agencies may subcontract a portion of the project activity to another entity provided such subcontract is approved by the department. Subcontract agencies must follow the same rules, procedures, and policies as required of the contract agency by these rules and contract with the department. The contract agency is responsible for ensuring the compliance of the subcontract agency. Subcontract agencies may not subcontract these project activities with other entities.

641—74.10(135) Audits. Every two years, each contract agency shall undergo financial audit of the family planning program. The audit shall be conducted in compliance with OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Each audit shall cover all unaudited periods through the end of the previous grant year. The department’s audit guide should be followed to ensure an audit which meets federal and state requirements.

641—74.11(135) Denial, suspension, revocation, or reduction of contracts with contract agencies. The department may deny, suspend, revoke, or reduce contracts with contract agencies in accord with applicable federal regulations or contractual relationships. Notice of such action shall be in writing.

641—74.12(135) Right to appeal—contract agency. Contract agencies may appeal denial of a contract or the suspension, revocation or reduction of an existing contract.

74.12(1) Appeal. The appeal shall be made in writing to the department within ten days of receipt of notification of the adverse action. Notice is to be addressed to the Director, Division of Community Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

74.12(2) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the DIA pursuant to the rules adopted by the DIA regarding

the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the DIA.

74.12(3) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the DIA found in 481—Chapter 10, Iowa Administrative Code.

74.12(4) Decision of administrative law judge. The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 76.17(5).

74.12(5) Appeal to the director. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

74.12(6) Record of hearing. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

74.12(7) Decision of director. An appeal to the director shall be based on the record made at the hearing. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

74.12(8) Exhausting administrative remedies. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A. Petition for judicial review must be filed within 30 days after decision becomes final.

These rules are intended to implement Iowa Code section 135.11.

CHAPTER 75
STATEWIDE OBSTETRICAL AND
NEWBORN INDIGENT PATIENT CARE PROGRAM

641—75.1(255A) Definitions.

“Applicant” means a person for whom assistance under this program is being requested.

“Delivery” means that the delivery occurs after 20 weeks gestation.

“Director” means the administrator of a maternal health center or other designated agency.

“Family” means a group of two or more persons related by birth, marriage, or adoption who reside together or a unit of one who is an unrelated individual not living with any relatives. The unborn fetus will be counted as a family member.

“Nonquota case” means a patient who is provided obstetrical or newborn care services at the University of Iowa Hospitals and Clinics under the indigent nonquota obstetrical care program established pursuant to Iowa Code chapter 255 and referenced in Iowa Code section 255A.2.

“Obstetrical and newborn care services” means those types of services as recognized by the latest editions of The American College of Obstetricians and Gynecologists, “Standards for Obstetric-Gynecologic Services” and The American Academy of Pediatrics, “Standards and Recommendations for Hospital Care of Newborn Infants.”

“Poverty level” means poverty income guidelines established by the United States Department of Health and Human Services.

“Program” means the obstetrical and newborn indigent patient care program for quota cases.

“Provider” means a licensed hospital or a licensed physician who agrees to service eligible patients.

“Quota case” means a patient who is provided obstetrical or newborn care by a licensed hospital or physician under the obstetrical indigent patient quota program established pursuant to Iowa Code section 255A.4.

“Resident” means the individual is a legal resident of the state and resides in one of the designated 90 counties.

“Spendedown” means the process by which an applicant obligates income for allowable medical expenses to reduce income to a qualifying level. The medical expenses used for spenddown cannot be paid for with funds from this program.

“Spendedown interval” means one month for delivery services and six months for antepartum and delivery services.

641—75.2(255A) Covered services. The following obstetrical and newborn care services may be provided through the obstetrical indigent patient care program:

1. Antepartum and postpartum care except where patient qualifies for antepartum and postpartum care provided by the department of public health, maternal and child health care program.
2. Normal delivery.
3. Cesarean section.
4. Newborn hospital care.
5. Sick newborns who qualify as a quota case will be covered until the patient is stabilized and transferred to University of Iowa Hospitals and Clinics, where the patient may be eligible to receive care as a county quota indigent patient pursuant to Iowa Code chapter 255.
6. Inpatient transportation from one hospital to another when authorized by a medical provider.
7. One outpatient visit for false labor.
8. Excluded services for quota cases will include but not be limited to elective abortion, elective hysterectomy, circumcision, nonobstetric related procedures and services.

641—75.3(255A) Quota assignment. The department of public health shall establish the quota annually for each county. The formula used shall be based upon, but not limited to, the following criteria:

1. Dollars available to the program.
2. Average number of births for the most recent three-year period for each county.

3. Per capita income for each county.

641—75.4(255A) Eligibility criteria. The certification process to determine eligibility for services under this program will include the following requirements:

75.4(1) Income.

a. Income guidelines will be set at 185 percent of the poverty income guidelines published by the United States Department of Health and Human Services. State income guidelines will be adjusted following any change in Department of Health and Human Services guidelines.

b. Income information will be provided by the applicant, who will attest in writing to the accuracy of the information contained on the application. The director may request verification of income.

c. All earned and unearned income of family members as defined by DHHS poverty guidelines will be used in calculating the applicant's gross income for purposes of determining initial and continued eligibility.

d. Income will be estimated prospectively as follows:

(1) Annual income will be estimated based on the applicant's income for the past three months unless the applicant's income will be changing or has changed, or

(2) In the case of self-employed families the past year's income tax return will be used in estimating annual income unless a substantial change has occurred.

(3) Terminated income will not be considered.

e. An applicant for obstetric services under this program whose income falls between 185 percent and 300 percent of the poverty level guidelines may qualify through spenddown of medical expenses of all family members as follows:

(1) The applicant must provide copies of medical bills or a statement from the providers of projected medical expenses.

(2) Medical expenses which can be used to meet spenddown are as follows:

1. Health insurance premiums, deductibles, or coinsurance charges.

2. Medical and dental expenses as defined by the Internal Revenue Service.

(3) In order to qualify with spenddown, the amount of spenddown, adjusted by one-twelfth, must be equal to or less than the projected and actual medical expenses.

75.4(2) Resources.

a. The resource limitation for an applicant will be \$10,000 per household.

b. The following are countable resources:

(1) Unobligated cash.

(2) Savings accounts.

(3) Stocks, bonds, certificates of deposit, excluding Internal Revenue Service defined retirement plans.

c. Resource information will be provided by the applicant, who will attest in writing to the accuracy of the information contained on the application. The director may request verification of resources.

75.4(3) Noneligibility for Title XIX or medically needy without spenddown. In order to be eligible, the applicant must not be eligible for services under Title XIX or the medically needy program without a spenddown.

75.4(4) Residency. The applicant for this program must be a legal resident of Iowa currently living in any county except Clinton, Cedar, Scott, Muscatine, Louisa, Washington, Iowa, Johnson, or Keokuk.

641—75.5(255A) Application procedures.

75.5(1) A person desiring obstetrical and newborn care under this program, or the parent or guardian of a minor desiring such care, may apply to the director of the maternal health center serving the person's county of residence at any time between confirmation of the pregnancy and not later than 60 days after delivery. If there is no maternal health center covering that county, the department will designate an agency.

75.5(2) The applicant will provide the following information to be considered for eligibility under this program:

a. Income and resource information on an application form.

b. Written verification obtained from the department of human services certifying that the applicant is not eligible for Title XIX or the medically needy program without a spenddown. The applicant will submit this copy within 60 days of applying with the director. To meet this 60-day deadline, the applicant will need to apply with the department of human services before or immediately after contacting the director.

75.5(3) Assignment of quotas shall be on a first-come, first-served basis based upon application date.

75.5(4) The director will provide written notification to the applicant regarding determination of eligibility or noneligibility and applicant's right to appeal a denial.

75.5(5) After an applicant has been determined to be eligible, the patient or provider will report any changes in eligibility or status of pregnancy to the director within 10 days from the date the change occurred.

75.5(6) Standardized application, determination of eligibility, and certification forms will be furnished by the department of public health to the directors.

75.5(7) Copies of appropriate certification forms will be mailed by the director to the department of public health as follows:

a. In counties covered by the department of public health's maternal and child health program, certification forms will be sent at 26 weeks or more gestation.

b. In counties not covered by maternal and child health programs, certification forms will be sent upon determination of eligibility for patients whose antepartum care will also be paid through the program.

75.5(8) Receipt of a certification form for a quota patient by the department of public health shall be considered the point in time when the quota has been used.

75.5(9) A woman who resides in a county which exceeds the patient quota allocated for the county, and who meets eligibility under rule 75.4(255A) shall be served at the University of Iowa Hospitals and Clinics pursuant to Iowa Code section 255.16. A woman who resides in a county with available quota and who meets eligibility under rule 75.4(255A) may be served at the University of Iowa Hospitals and Clinics pursuant to Iowa Code section 255.16.

75.5(10) Maternal health center directors shall negotiate 28E agreements with general relief directors for the purpose of coordinating application and eligibility services for obstetric patients under Iowa Code chapter 255.

641—75.6(255A) Reimbursement of providers.

75.6(1) The University of Iowa Hospitals and Clinics and other hospitals will submit their billings on the UB 82, uniform hospital billing form, and physicians will submit their billings on the Health Care Financing Administration form HCFA 1500. Forms will be furnished by the providers.

75.6(2) Providers will submit bills after delivery but not more than 60 days after the delivery or after determination of eligibility, whichever occurs later, to the department of public health.

75.6(3) Reimbursement for physicians and hospitals will be based upon the Title XIX rates. Bills will be adjusted accordingly by the department of public health and forwarded to the department of revenue and finance for payment.

75.6(4) Providers may be reimbursed for antepartum care prior to the patient becoming ineligible, as long as the patient is counted as a quota case.

75.6(5) On an annual basis the department of public health will furnish participating physicians with a list of reimbursable procedure codes and maximum rate.

75.6(6) The obstetrical indigent care fund is last pay. Private insurance shall be billed first.

75.6(7) All providers of services to quota obstetrical and newborn patients shall agree to accept as full payment the reimbursements allowable under the medical assistance program established pursuant to Iowa Code chapter 249A, up to a maximum of medical assistance's average reimbursement for the most

recent fiscal year. When the medical assistance reimbursement methodologies change, the maximum reimbursement may be based upon projection.

75.6(8) The obstetrical and newborn indigent program will pay, out of a set-aside fund, for certain cases that exceed the current year's maximum reimbursement rate. Cases that can be paid out of this fund are:

a. Allowable physician and hospital costs associated with DRGs 370, 371, 372, 374, 375 for the woman. Costs associated with DRGs 383, 384 will be covered if followed by a qualifying delivery event.

b. Allowable physician and hospital costs for the newborn associated with DRGs 385, 385.1, 389, 390.

c. Care provided to newborns under DRGs 386, 386.1, 387, 387.1, 388, 388.1, 389.1, 390.1 are defined under rule 75.2(255A) as being outside the scope of this program. These services could, however, be covered by Iowa Code chapter 255 or medically needy programs.

d. Physicians who provide obstetrical or newborn care at the University of Iowa Hospitals and Clinics are not entitled to receive any compensation for the provision of such care to persons certified as eligible under this program.

75.6(9) In all other cases, the maximum reimbursement level will apply. If the total reimbursable charges exceed the maximum reimbursement level, reimbursement to providers will be prorated based upon allowable reimbursement amounts.

75.6(10) Certifications for quota cases received by June 30 will have medical assistance's average reimbursement and the 10 percent fund encumbered.

641—75.7(255A) Reassignment of county quotas.

75.7(1) Unused quota numbers will be assigned by the department of public health after March 31 of each year to counties according to receipt of request on a case-by-case, first-come basis.

75.7(2) Request for additional quotas cannot be made until all quotas have been used in a given county.

75.7(3) Requests for additional quotas may be submitted by directors and must be based on pending applications. Requests will be made on forms provided by the department of public health designed to provide necessary information regarding pending applications.

641—75.8(255A) Appeals and fair hearings.

75.8(1) *Right of appeal.* An applicant shall have the right to appeal whenever a decision of the director or the state program results in the individual's denial of eligibility for the program or denial as a quota case. No appeal can be filed for denial as a quota case, if there are no quotas available. Quotas would not be available if already assigned or sequestered to cases under appeal. Quotas will only be held when applicant is appealing a change in status.

75.8(2) *Request for reconsideration.* The applicant seeking to appeal shall first request reconsideration by the director of the denial of eligibility for this program or denial as a quota case. The written request shall be made within 15 days from the date the individual received notice of the decision which is the subject of appeal. The written request shall state the adverse decision being appealed and the reasons the applicant believes state standards were not correctly applied. The director shall reconsider the application and make a written determination with notice of right to appeal to the state within 10 days of receipt of the request. If the denial stands, the applicant may appeal to the department of public health.

75.8(3) *Request for hearing.* An appeal is brought by filing an appeal with the Division Director, Division of Family and Community Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within 30 days of the director's final determination in subrule 75.8(2).

75.8(4) *Contested use.* Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

75.8(5) *Hearing.* The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

75.8(6) *Decision.* A written decision of the hearing officer shall be issued, where possible, within 30 days from the date of the request for a hearing unless the parties agree to a longer period of time. The decision of the hearing shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings 10 days after it is received by the aggrieved party unless an appeal to the director of public health is taken as provided in subrule 75.8(7).

75.8(7) *Appeal to director.* Any appeal to the director of public health for review of the proposed decision and order of the hearing officer shall be filed in writing and mailed to the director of public health by certified mail, return receipt requested, or delivered by personal service within 10 days after the receipt of the hearing officer's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the hearing officer. Any appeal shall state the reason for appeal.

75.8(8) *Record of hearing.* Upon receipt of an appeal request, the hearing officer shall prepare the record of the hearing for submission to the director of public health. The record shall include the following:

- a. All pleadings, motions and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the hearing officer.

75.8(9) *Decision of director.* The decision and order of the director of public health becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

75.8(10) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director of public health or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

75.8(11) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Family and Community Health, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

These rules are intended to implement Iowa Code chapter 255A.

CHAPTER 76
MATERNAL AND CHILD HEALTH PROGRAM

641—76.1(135) Program explanation. The maternal and child health (MCH) programs are operated by the Iowa department of public health as the designated state agency pursuant to an agreement with the federal government. The majority of the funding available is from the Title V, MCH services block grant, administered by the Health Resources and Services Administration within the United States Department of Health and Human Services.

The purpose of the program is to promote the health of mothers and children by ensuring or providing access to quality maternal and child health services (especially for low-income families or families with limited availability of health services); to reduce infant mortality and the incidence of preventable diseases and handicapping conditions; to increase the number of children appropriately immunized against disease; and to facilitate the development of community-based systems of health care for children and their families. The program provides and promotes family-centered, community-based coordinated care, including care/service coordination for children with special health care needs.

The department's family services bureau enters into contracts with selected private nonprofit or public agencies for the assurance of access to prenatal and postpartum care for women, preventive and primary child health services, and services to children with special health care needs. The types of services provided by these contracts are infrastructure building, population-based services, enabling services, and direct health services. The department's dental health bureau collaborates with the family services bureau to develop oral health programs to reduce barriers to oral health care and reduce dental disease through prevention. The children with special health care needs program is administered by Child Health Specialty Clinics (CHSC), University of Iowa. The department contracts with the University of Iowa department of pediatrics' Child Health Specialty Clinics to provide services to children with special health care needs. In accordance with the Maternal and Child Health Services Title V Block Grant Program administered by the U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau, CHSC shall ensure that public health funds will be used to cover the cost of services only after all other sources of reimbursement have been exhausted.

The MCH advisory council assists in the development of the state plan for MCH, including children with special health care needs and family planning. The advisory council assists with assessment of need, prioritization of services, establishment of objectives, and encouragement of public support for MCH and family planning programs. In addition, the advisory council advises the director regarding health and nutrition services for women and children, supports the development of special projects and conferences and advocates for health and nutrition services for women and children. The director appoints the council membership. Membership shall include parents of and service providers for children with special health care needs. The council membership shall also include the chairs, or designees, of the department's advisory committee for perinatal guidelines, and the birth defects advisory committee to ensure coordination of their respective issues and priorities. The chair of the family services bureau grantee committee or the designee of the chair may serve as an ex-officio member of the council.

641—76.2(135) Adoption by reference. Federal requirements contained in the Omnibus Reconciliation Act of 1989 (Public Law 101-239), Title V, MCH services block grant shall be the rules governing the Iowa MCH program and are incorporated by reference herein.

The department finds that certain rules should be exempted from notice and public participation as being a very narrowly tailored category of rules for which notice and public participation are unnecessary as provided in Iowa Code section 17A.4(2). Such rules shall be those that are mandated by federal law governing the Iowa MCH program where the department has no option but to adopt such rules as specified and where federal funding for the MCH programs is contingent upon the adoption of the rules.

Copies of the federal legislation adopted by reference are available from Chief, Family Services Bureau, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—76.3(135) Rule coverage. These rules cover agencies contracting with the department to provide community-based MCH public health services and to receive funds from the department for that purpose. The contract agencies conduct essential public health services directed toward the maternal and child health populations consistent with the state's MCH services block grant state plan. The state plan is developed and administered collaboratively by the family services bureau of the department and CHSC.

641—76.4(135) Definitions.

"Applicant" means a private nonprofit or public agency that seeks a contract with the department to provide MCH services.

"Care/service coordination" means a process of linking the service system to the recipient and organizing the various elements in order to achieve a successful outcome. The terms "care coordination" and "service coordination" may be used interchangeably.

"Children with Special Health Care Needs (CSHCN)" means children with chronic physical, developmental, behavioral, or emotional conditions that require health and related services of a type or amount beyond that required by children generally.

"CHSC" means Child Health Specialty Clinics, a statewide program for children with special health care needs authorized under Title V of the Social Security Act.

"Client" means an individual who receives MCH services through a contract agency.

"CMS" means the United States Department of Health and Human Services Centers for Medicare and Medicaid Services (formerly Health Care Financing Administration).

"Contract agency" means a private nonprofit or public agency that has a contract with the department to provide MCH services and receives funds from the department for that purpose.

"Core public health functions" means the functions of community health assessment, policy development, and assurance.

1. Assessment: regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets in a community.

2. Policy development: development, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values and is in accordance with state public health policy.

3. Assurance: ensuring, by encouragement, regulation, or direct action, that programs and interventions that maintain and improve health are carried out.

"Dental home" means a usual source of dental care where dental care services are provided in a primary care setting where care is accessible, family-centered, continuous, comprehensive, coordinated, compassionate, and culturally competent. In addition, the dental care provider and parents partner to identify and access all the dental and nondental services needed to help children and their families achieve maximum oral health.

"Department" means the Iowa department of public health.

"DHHS" means the United States Department of Health and Human Services.

"DIA" means the Iowa department of inspections and appeals.

"Direct health services" means those services generally delivered one-on-one between a health professional and a client in an office or clinic.

"Director" means the director of the Iowa department of public health.

"Enabling services" means services that allow or provide for access to and the derivation of benefits from, the array of basic health care services and include activities such as outreach, case management, health education, transportation, translation, home visiting, smoking cessation, nutrition, support services, and others.

"EPSDT" means the Early and Periodic Screening, Diagnosis, and Treatment program which provides for regular preventive health care services for children aged 0 to 21 as authorized by Title XIX of the Social Security Act.

"Essential public health services" means those activities carried out by public health entities and their contractors that fulfill the core public health functions in the promotion of maternal and child health.

“Family,” for the purpose of establishing eligibility, means a group of two or more persons related by birth, marriage or adoption or residing together and functioning as one socioeconomic unit. For the purpose of these rules, a pregnant woman is considered as two individuals when calculating the number of individuals in the family. If a pregnant woman is expecting multiple births, the family size is thereby increased by the number expected in the multiple birth.

“Family planning” means the promotion of reproductive and family health by the prevention of and planning for pregnancy, and reproductive health education.

“Gap filling” means direct health services supported by Title V staff or resources that are needed by children with special health care needs but are not otherwise accessible in the community.

“HAWK-I” means healthy and well kids in Iowa and is the child health insurance program in Iowa as authorized in Title XXI of the Social Security Act.

“HCFA” means the DHHS, Health Care Finance Administration.

“Health education” means services provided by a health professional to include instruction about normal anatomy and physiology, growth and development, safety and injury prevention, signs or symptoms indicating need for medical care, and other anticipatory guidance topics.

“Health professional” means an individual who possesses specialized knowledge in a health or social science field or is licensed to provide health care.

“Health services” means services provided through MCH contract agencies.

“Informing” means the act of advising families of the services available through the EPSDT/Care for Kids program, explaining what to expect at screening, and providing information about health resources in the community.

“Infrastructure building” means activities directed at improving and maintaining the health status of all clients by providing support for the development and maintenance of comprehensive health services systems including development and maintenance of health services standards or guidelines, training, data, and planning systems.

“MCH services” means essential public health services provided by MCH contract agencies.

“Medicaid” means the Medicaid program authorized by Title XIX of the Social Security Act and funded through the Iowa department of human services from the DHHS.

“Medical home” means a usual source of health care where the physician/health care provider is available to coordinate preventive, primary and follow-up care at all times (24 hours per day, seven days per week) for the patient while maintaining the client’s health records. In addition, the physician/health care provider and parents partner to identify and access the medical and nonmedical services needed to help children and their families achieve their maximum potential.

“Nutrition screening” means nutrition education appropriate to the needs of the client, and referral to a licensed dietitian if indicated.

“OMB” means the United States Department of the Treasury, Office of Management and Budget.

“Oral health counseling” means services to assess oral health status and to provide education appropriate to the needs of the client and referral to a dentist if indicated.

“Oral health education” means information provided by a health professional about dental disease, prevention, and oral hygiene and other anticipatory guidance.

“Parenting education” means educational services for parents or expectant parents provided by health professionals to include care of infants and children, normal development, discipline, and other topics as appropriate.

“Performance measures” means a narrative statement that describes a specific maternal and child health need or requirement that, when addressed, will lead to a specific health outcome within a community and generally within a specified time frame.

“Performance standards” means criteria or indicators of the quality of service provided or the capability of a contract agency to provide public health services in a cost-effective or efficient manner as identified in the quality assurance section (501) of the MCH Administrative Manual. Copies of the performance standards are available from the Chief, Family Services Bureau, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, or on the Iowa department of public health Web site (www.idph.state.ia.us).

“Pharmacist” means a person currently licensed to practice pharmacy under Iowa Code chapter 155.

“Physician” means a person currently licensed to practice medicine and surgery, osteopathic medicine and surgery, or osteopathy under Iowa Code chapters 148 and 150A.

“Population-based services” means preventive interventions and personal health services, developed for and available to the entire MCH population of the state rather than for individuals in a one-on-one situation. Disease prevention, health promotion, and statewide outreach are major components.

“Prenatal and postpartum care” means those types of services as recognized by the American College of Obstetricians and Gynecologists.

“Program income” means gross income earned by the contract agency from activities in which part or all of the cost is either borne as a direct cost by the funds received from the department or counted as a direct cost toward meeting cost-sharing or matching requirements of the contract agency. “Program income” includes but is not limited to such income in the form of fees for services, third-party reimbursements, and proceeds from sales of tangible, personal or real property.

“Psychosocial services” means screening activities that include social assessment and assisting with a family’s additional needs for support and referral.

“Title V” means Title V of the Social Security Act and the federal requirements contained in the Omnibus Reconciliation Act of 1989 (Public Law 101-239) which address the Maternal and Child Health and Children with Special Health Care Needs programs.

“Title X” means the program authorized in the federal regulations found in 42 CFR Subpart A, Part 59, published in the Federal Register on June 3, 1980, and the Program Guidelines for Project Grants for Family Planning Services.

“Title XIX” means the Medicaid program authorized in the Social Security Act and funded through the Iowa department of human services from the DHHS.

“Title XXI” means the child health insurance program authorized in the Social Security Act and implemented in Iowa as the HAWK-I program as administered by the Iowa department of human services.

“Well-child health care” means those types of services as recognized by the latest edition of the American Academy of Pediatrics, Guidelines for Health Supervision.

“WIC” means the Special Supplemental Nutrition Program for Women, Infants and Children, funded through the department from the United States Department of Agriculture.

641—76.5(135) MCH services. The following public health services shall be provided by contract agencies:

76.5(1) Infrastructure building services.

a. Community assessment activities to identify population-based health conditions, risks, and assets in the community.

b. Analysis of health data to determine community population-based health status, health system utilization and community resources.

c. Methodological support for data collection, analysis and dissemination.

d. Community planning activities to promote family and community health initiatives based on scientific, economic, and political factors.

e. Promotion of regulations, standards, and contracts that protect the public’s health and safety.

f. Monitoring and evaluating the effectiveness, accessibility and quality of personal health and population-based services in the community.

g. Supporting innovative initiatives to gain new insights and solutions to family and community health-related needs.

h. Development of state plan and annual report in conjunction with the family services bureau.

i. Development of systems for transitioning adolescents with special health care needs to adult services.

76.5(2) Population-based services.

a. Immunization.

- b. Injury prevention.
- c. Outreach and health education.
- d. Counseling for families who have lost a child to sudden infant death syndrome.
- e. Childhood lead poisoning screening.
- f. Support screening and follow-up for sickle cell disease and other hemoglobin disorders.

76.5(3) Enabling services.

- a. Care/service coordination.
- b. Informing.
- c. Outreach to families and children who do not access a regular and continuous source of health care (medical and dental home).
- d. Coordination of local systems of care for improving access to health services.
- e. Access to translation services.
- f. Access to transportation.
- g. Parent-to-parent support for families who have children with special health care needs.
- h. Information and outreach to families applying for the Supplemental Security Income program (Title XVI).
- i. Rescinded IAB 2/6/02, effective 3/13/02.

76.5(4) Direct health services. Direct health services may be provided to meet identified community needs. The following preventive direct health services may be supported by MCH program funds to the extent the comprehensive community assessment documents that the services are not otherwise available from health professionals within the community. Payment shall be based upon Title XIX rates to the extent that current Title XIX rate information is available to the department. Contract agencies may enter into agreements that reimburse less than the Title XIX rate. Agencies shall not reimburse a provider under sanction by CMS.

a. *Child health.*

- (1) Informing.
- (2) Care/service coordination.
- (3) Nutrition counseling.
- (4) Psychosocial services.
- (5) Parenting education.
- (6) Health education.
- (7) Well-child health services include routine, ambulatory well-child care.
- (8) Assistance in establishing a medical and dental home or usual source of care.
- (9) Referral.

b. *Prenatal and postpartum services.*

- (1) Care/service coordination.
- (2) Risk assessment.
- (3) Psychosocial screening assessment and counseling.
- (4) Nutrition assessment and counseling.
- (5) Health education.
- (6) Routine, ambulatory prenatal medical care, postpartum exams, and family planning services.

c. *Dental health—maternal and child.*

- (1) Oral screening.
- (2) Dental treatment services through referral.
- (3) Oral health education.
- (4) Fluoride varnish application.

d. *Children with special health care needs.* Community-based pediatric subspecialty clinic services that are “gap filling.”

641—76.6(135) Client eligibility criteria. The certification process to determine eligibility for direct health care under the program shall include the following requirements:

76.6(1) Age.

- a. Prenatal program—no age restrictions.
- b. Child health care services—birth through 21 years of age.
- c. CHSC—birth through 21 years of age.

76.6(2) Income.

a. Income guidelines will be the same as those established for the state's Title XXI program. Guidelines are published annually by DHHS. Department income guidelines will be adjusted following any change in DHHS guidelines.

b. Income information will be provided by the individual, who will attest in writing to the accuracy of the information contained in the application.

c. Proof of Title XIX or Title XXI (HAWK-I) eligibility will automatically serve in lieu of an application.

d. All income of family members as defined by DHHS poverty guidelines will be used in calculating the individual's gross income for purposes of determining initial and continued eligibility.

e. Income will be calculated as follows:

(1) Annual income will be estimated based on the individual's income for the past three months unless the individual's income will be changing or has changed, or

(2) In the case of self-employed families the past year's income tax return (adjusted gross income) will be used in estimating annual income unless a change has occurred.

(3) Terminated income will not be considered.

f. Individuals will be screened for eligibility for Title XIX and Title XXI (HAWK-I). If an individual's income falls within the eligibility guidelines for Title XIX and Title XXI (HAWK-I), the individual should be referred to the Iowa department of human services or other enrollment source to apply for coverage. Pregnant women shall be considered for Title XIX presumptive eligibility. Children shall be considered for Title XIX eligibility to the extent these activities are approved by the Iowa department of human services.

g. An individual whose income is above the poverty level established by Title XXI and below 300 percent of the federal poverty guidelines will qualify for services on a sliding fee scale, as determined by the local agency's cost for the service. The department provides annual guidelines. An individual whose income is at or above 300 percent will qualify for services at full fee.

h. Eligibility determinations must be performed at least once annually. Should the individual's circumstances change in a manner which affects third-party coverage or Title XIX/Title XXI eligibility, eligibility determinations shall be completed more frequently.

76.6(3) Residency. Individuals must be currently residing in Iowa.

76.6(4) Pregnancy. An individual applying for the prenatal program shall have verification of pregnancy by an independent health provider, by the maternal health contract agency, or by a family planning (Title X) agency.

76.6(5) Children with special health care needs. An individual applying for CHSC services shall be determined to have a special health care need as defined by the federal MCH bureau. Children aged 0 to 21 residing in Iowa with or at risk of having a special health care need are eligible for CHSC services. Care/service coordination or other nonclinic services are provided at no charge to the family. Clinic services are provided without charge to families with adjusted gross incomes below 185 percent of the federal poverty guideline. Families above this threshold are responsible for payment according to a sliding fee scale based on tax exemptions, adjusted gross income, and extenuating circumstances.

641—76.7(135) Client application procedures for MCH services.

76.7(1) A person or the parent or guardian of a minor desiring direct health services other than those provided to children with special health care needs shall apply to a contract agency using a Health Services Application, Form 470-2927, 470-2927(SP), or the alternate form authorized by the HAWK-I board.

76.7(2) The contract agency shall verify the following information to apply for MCH services under this program:

- a. The information requested on the application form under “Household Information.”
- b. Income information for all family members or proof of eligibility for Title XIX (Medicaid) or Title XXI (HAWK-I).
- c. Information about health insurance coverage.
- d. The signature of the individual or responsible adult, dated and witnessed.
- e. For pregnant women, denial of benefits under Title XIX (Medicaid) due to economic or categorical ineligibility.

76.7(3) If an individual has completed a Health Services Application, Form 470-2927, within the last year and the form accurately documents the current financial and family status, the MCH contract agency shall accept a copy of that application and determine eligibility without requiring completion of any other application form.

76.7(4) If an individual indicates on the Health Services Application, Form 470-2927, that the individual also wishes to apply for WIC or Medicaid or HAWK-I, the contract agency shall forward the appropriate copy to the indicated agency within two working days.

76.7(5) The contract agency shall determine the eligibility of the family and the percent of the cost of care that is the family’s responsibility. The individual shall be informed in writing of eligibility status prior to incurring costs for care.

76.7(6) Once an individual has been determined to be eligible, the individual shall report any changes in income, family composition, or residency to the contract agency within 30 days from the date the change occurred.

76.7(7) A family seeking direct health care or care/service coordination services for a child with special health care needs shall follow CHSC policies and procedures. Insurance status and eligibility for the sliding fee scale are determined during the patient registration process.

641—76.8(135) Right to appeal—client.

76.8(1) *Right of appeal.* Individuals applying for MCH services and clients receiving MCH services shall have the right to appeal whenever a decision or action of the department or contract agency results in the denial of participation, suspension, or termination from the approved MCH program. Notification of the denial of participation, suspension or termination shall be made in writing and shall state the basis for the action. All hearings shall be conducted in accordance with these rules.

76.8(2) *Notification of appeal rights and right to hearing.* Individuals applying for MCH services shall be notified of the right to appeal and the procedures for requesting a hearing at the time of application for MCH services. Information about the appeal and hearing process shall be provided in writing and shall be immediately available at maternal and child health centers. A health professional shall be available to explain the method by which an appeal or hearing is requested and the manner in which the appeal and hearing will be conducted.

76.8(3) *Request for hearing.* A request for a hearing is a written expression by an individual or the individual’s parent, guardian, or other representative that an opportunity to present the individual’s case is desired. The request shall be filed with the contract agency within 60 days from the date the individual receives notice of the decision or action which is the subject of appeal.

76.8(4) *Receipt of benefits during appeal.* Individual applicants, who are denied program benefits due to a finding of ineligibility, shall not receive benefits during the administrative appeal period. Clients who are involuntarily suspended or terminated from the MCH program shall continue to receive program benefits during the administrative appeal period.

76.8(5) *Hearing officer.* The hearing officer shall be impartial, shall not have been directly involved in the initial determination of the action being contested, and shall not have a personal stake in the decision. Hearing officers may be contract agency directors, health professionals, community leaders, or any impartial citizen. If prior to the hearing, the appealing party objects to a contract agency director serving as the hearing officer in a case involving the director’s own agency, another hearing officer shall be selected and, if necessary, the hearing shall be rescheduled as expeditiously as possible. Contract agencies may seek the assistance of the Chief, Family Services Bureau, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, in the appointment of a hearing officer.

76.8(6) Notice of hearing. The hearing officer shall schedule the time, place and date of the hearing as expeditiously as possible. Parties shall receive notice of the hearing at least ten days in advance of the scheduled hearing. The hearing shall be accessible to the party requesting the hearing. The hearing shall be scheduled within three weeks from the date the contract agency received the request for a hearing or as soon as possible thereafter, unless a later date is agreed upon by the parties.

76.8(7) Conduct of hearing. The party requesting the hearing or the party's representative shall have the opportunity to:

- a. Examine, prior to and during the hearing, the documents and records presented to support the decision under appeal;
- b. Be represented by an attorney or other person at the party's own expense;
- c. Bring witnesses;
- d. Question or refute any testimony or evidence, including an opportunity to confront and cross-examine adverse witnesses;
- e. Submit evidence to establish all pertinent facts and circumstances in the case; and
- f. Advance arguments without undue interference.

76.8(8) Decision. Decisions of the hearing officer shall be in writing and shall be based on evidence presented at the hearing. The decision shall summarize the facts of the case, specify the reasons for the decision, and identify the supporting evidence and pertinent regulations or policy. The decision shall be issued within 90 days of the receipt of the request for the hearing, unless a longer period is agreed upon by the parties.

76.8(9) Appeal of decision to the department. A party receiving an unfavorable decision may file an appeal with the department. Such appeals must be filed within 15 days of the mailing date of the hearing decision. Appeals shall be sent to the Division Director, Family and Community Health, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

76.8(10) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the DIA pursuant to the rules adopted by the DIA regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information, which may be provided by the aggrieved party, shall also be provided to the DIA.

76.8(11) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the DIA found in 481—Chapter 10, Iowa Administrative Code.

76.8(12) Decision of administrative law judge. The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 76.8(13).

76.8(13) Appeal to the director. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

76.8(14) Record of hearing. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

76.8(15) *Decision of director.* An appeal to the director shall be based on the record of the hearing before the administrative law judge. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

76.8(16) *Exhausting administrative remedies.* It is not necessary to file an application for the rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

76.8(17) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the director by certified mail, return receipt requested, or by personal service. The address is Director, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

76.8(18) *Benefits after decision.* If a final decision is in favor of the person requesting a hearing and benefits were denied or discontinued, benefits shall begin immediately and continue pending further review should an appeal to district court be filed. If a final decision is in favor of the contract agency, benefits shall be terminated, if still being received, as soon as administratively possible after the issuance of the decision. Benefits denied during an administrative appeal period may not be awarded retroactively following a final decision in favor of a person applying for MCH services.

641—76.9(135) *Grant application procedures for community-based contract agencies.* Private nonprofit or public agencies seeking to provide community-based Title V-MCH public health services shall file a letter of intent to make application to the department no later than April 1 of the competitive year. Applications shall be to administer MCH services for a specified project period, as defined in the request for proposal, with an annual continuation application. The contract period shall be from October 1 to September 30 annually. All materials submitted as part of the grant application are considered public records in accordance with Iowa Code chapter 22, after a notice of award is made by the department. Notification of the availability of funds and grant application procedures will be provided in accordance with the department rules found in 641—Chapter 176.

Contract agencies are selected on the basis of the grant applications submitted to the department. The department will consider only applications from private nonprofit or public agencies. In the case of competing applications, the contract will be awarded to the applicant that scores the highest number of points in the review.

641—76.10(135) *Funding levels for community-based contract agencies.* The amount of funds available to each contract agency on an annual basis shall be determined by the department using a methodology based upon dollars available, number of clients enrolled, and selected needs criteria. A contract agency will receive four dollars of the available funds from the department for each one dollar of matching funds up to but not to exceed the total available funds for that contract agency.

641—76.11(135) *Contract agency performance.* Contract agencies are required to provide services in accordance with these rules.

76.11(1) *Performance standards.* The department shall establish performance standards that contract agencies shall meet in the provision of public health services. The performance standards for community-based agencies are published in the quality assurance section (501) of the MCH Administrative Manual. Copies of the performance standards are available from the Chief, Family Services Bureau, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, or on the Iowa department of public health Web site (www.idph.state.ia.us). Contract agencies that do not meet the performance standards shall not be eligible for continued funding as an MCH contract agency unless the contract agency has secured an exception.

76.11(2) Contract agency review. The department shall review contract agency operations through the use of reports and documents submitted, state-generated data reports, chart audits, on-site and clinic visits for direct care services as applicable for evaluation and technical assistance.

76.11(3) Exception. A contract agency that does not meet a performance standard or fails to meet an action plan as approved by the department may be granted an exception for up to one year in order to improve performance. Such an exception must be requested in writing. If granted, the approval for the exception will include the conditions necessary for the successful completion of the standard, a time frame, and additional reporting requirements. The procedures for applying for and approving of an exception are outlined in the "Performance Standards, Maternal and Child Health Contractors, Family Services Bureau."

641—76.12(135) Reporting. Completion of grant applications, budgets, expenditure reports, annual progress reports, and data forms shall be performed by contract agencies in compliance with the contract with the department.

641—76.13(135) Fiscal management. All contract agencies are required to meet fiscal management policies.

76.13(1) Last pay. MCH grant funds are considered last pay. Title XIX and other third-party payers are to be billed first if other resources cover the service.

76.13(2) Program income. Program income shall be used for allowable costs of the MCH program. Program income shall be used before using the funds received from the department. Excess program income may be retained to build a three-month operating capital. Program income shall be used during the current fiscal year or the following fiscal year. Five percent of unobligated program income may be used by the contract agency for special purposes or projects provided such use furthers the mission of the MCH program and does not violate state or federal rules governing the program.

76.13(3) Advances. A contract agency may request an advance of up to one-sixth of its contract at the beginning of a contract year. The amount of any advance will be deducted prior to the end of the fiscal year.

76.13(4) Local share. Community-based contract agencies are required to match the MCH funds received from the department at a minimum rate of one dollar of local match for every four dollars received from the department. Sources that may be used for match are reimbursement for service from third parties such as insurance and Title XIX, client fees, local funds from nonfederal sources, or in-kind contributions. In-kind contributions must be documented in accordance with generally accepted accounting principles.

76.13(5) Subcontracts. Contract agencies may subcontract a portion of the project activity to another entity provided such subcontract is approved by the department. Subcontract agencies must follow the same rules, procedures, and policies as required of the contract agency by these rules and contract with the department. The contract agency is responsible for ensuring the compliance of the subcontract. Subcontract agencies may not subcontract these project activities with other entities.

641—76.14(135) Audits. Every two years, each contract agency shall undergo financial audit of the MCH program. The audit shall be conducted in compliance with OMB Circular A-133 Audits of States, Local Governments, and Non-Profit Organizations. Each audit shall cover all unaudited periods through the end of the previous grant year. The department's audit guide should be followed to ensure an audit which meets federal and state requirements.

641—76.15(135) Diagnosis and therapeutic services for children. Rescinded IAB 2/6/02, effective 3/13/02.

641—76.16(135) Denial, suspension, revocation or reduction of contracts with contract agencies. The department may deny, suspend, revoke or reduce contracts with contract agencies in accord with applicable federal regulations or contractual relationships. Notice of such action shall be in writing.

641—76.17(135) Right to appeal—contract agency. Community-based contract agencies may appeal the denial of a contract or the suspension, revocation or reduction of an existing contract.

76.17(1) Appeal. The appeal shall be made in writing to the department within ten days of receipt of notification of the adverse action. Notice is to be addressed to the Division Director, Family and Community Health Division, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

76.17(2) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the DIA pursuant to the rules adopted by the DIA regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information, which may be provided by the aggrieved party, shall also be provided to the DIA.

76.17(3) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules of the DIA found in 481—Chapter 10.

76.17(4) Decision of administrative law judge. The administrative law judge's decision shall be issued within 60 days from the date of request for hearing. When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final decision without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 76.17(5).

76.17(5) Appeal to the director. Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

76.17(6) Record of hearing. Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions and rules;
- b. All evidence received or considered and all other submissions by recording or transcript;
- c. A statement of all matters officially noticed;
- d. All questions and offers of proof, objections and rulings thereon;
- e. All proposed findings and exceptions; and
- f. The proposed decision and order of the administrative law judge.

76.17(7) Decision of director. An appeal to the director shall be based on the record made at the hearing. The decision and order of the director becomes the department's final decision upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

76.17(8) Exhausting administrative remedies. It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A. Petition for judicial review must be filed within 30 days after decision becomes final.

These rules are intended to implement Iowa Code section 135.11.

CHAPTER 77
LOCAL BOARDS OF HEALTH
[Prior to 7/29/87, Health Department[470] Ch 77]

641—77.1(137) Purpose of local boards of health. The local board of health shall have jurisdiction over public health matters within its designated geographic area according to Iowa Code chapter 137. The local board of health shall promote and protect the health of the citizens, and carry out the powers of local boards as specified in Iowa Code sections 137.6 and 137.7, and all other applicable Iowa Code chapters.

641—77.2(137) Definitions. For the purpose of these rules, unless otherwise defined, the following definitions apply:

“Core public health functions” means the functions of community health assessment, policy development, and assurance.

1. Assessment: Regular collection, analysis, interpretation, and communication of information about health conditions, risks, and assets in a community.

2. Policy development: Development, implementation, and evaluation of plans and policies, for public health in general and priority health needs in particular, in a manner that incorporates scientific information and community values and in accordance with state public health policy.

3. Assurance: Ensuring by encouragement, regulation, or direct action that programs and interventions that maintain and improve health are carried out.

“Department” means the Iowa department of public health.

“Environmental health services” means services focused on assessing and controlling the impact of people on their physical environment and the impact of the environment on them.

“Essential public health services” means those activities carried out by public health that fulfill the core functions.

“Local board of health” means a county, city, or district board of health.

“Personal health services” means services focused on the care of individuals.

“Population-based health services” means services focused on the health status of population groups and their environments.

641—77.3(137) Roles and responsibilities of local boards of health. Public health is responsible for safeguarding the community’s health. This goal is pursued through three core functions: assessment, policy development and assurance.

77.3(1) Assessment: regularly and systematically collect, assemble, analyze, and make available information on the health of the community, including statistics on health status, community health needs, personal health services, and epidemiologic and other studies of health problems. Assessment includes the essential public health services that:

- a. Monitor health status to identify community health problems,
- b. Diagnose and investigate health problems and health hazards in the community, and
- c. Evaluate effectiveness, accessibility, and quality of personal and population-based health services.

77.3(2) Policy development: exercise its responsibility to serve the public interest in the development of comprehensive public health policies. This can be accomplished by promoting use of a scientific knowledge base in decision making about public health and by taking the lead in public health policy development. Policy development includes the essential public health services that:

- a. Develop policies and plans that support individual and community health efforts,
- b. Enforce laws and regulations that protect and ensure safety, and
- c. Research new insights and innovative solutions to health problems.

77.3(3) Assurance: assure their constituents that services necessary to achieve agreed-upon goals are provided either by encouraging actions by other entities (private or public sector), by requiring such action through regulation, or by providing services directly. Each local board must involve key

policymakers and the general public in determining a set of high-priority personal and communitywide health services. Assurance includes the essential public health services that:

- a. Link people to needed personal health services and provide such personal and environmental health services as deemed necessary,
- b. Ensure the competence of public health and personal health care workforce,
- c. Inform, educate, and empower people about health issues, and
- d. Mobilize community partnerships to identify and solve health problems.

641—77.4(137) Organization of local boards of health.

77.4(1) *Officers of local board of health.* Each local board of health shall, at its first meeting during any calendar year, elect one of its members to serve as chairperson until the first meeting of the following calendar year.

- a. The local board of health may elect a vice-chairperson, secretary, or other such officers as it may deem advisable.
- b. In case of a vacancy of the office of chairperson, a successor shall be elected at the next meeting of the board, who shall serve the remainder of the term.

77.4(2) *Meetings of local board of health.* The place, date and time of regular meetings of the local board of health shall be determined by vote of the board, and shall comply with the provisions of the open meetings law which is found in Iowa Code chapter 21.

- a. Each local board of health shall meet at least quarterly.
- b. Special meetings of the board may be called as needed by the chairperson, or by any three board members. At least 24 hours' notice shall be given of special meetings, except in case of emergency.

77.4(3) *Quorum of local board of health.* Fifty percent or more of the board membership shall constitute a quorum.

641—77.5(137) Operating procedures of local boards of health.

77.5(1) The following information shall be submitted to the Iowa department of public health:

- a. Names, addresses, and telephone numbers of members of the local board of health, within one month after their appointment.
- b. Names of the chairperson and any other officers elected by the board, within one month after their election.
- c. A copy of the minutes of each regular and special meeting of the board, which shall include at least:
 - (1) The date and place of the meeting,
 - (2) A list of members present, and
 - (3) A report of any official board actions, within one month of the date of the meeting.

77.5(2) An annual report of expenditures for the previous fiscal year, to be submitted on forms provided by the Iowa department of public health, shall be submitted within 90 days of the close of the county fiscal year.

641—77.6(137) Expenses of board of health members.

77.6(1) The following may be considered necessary expenses of board of health members:

- a. Reimbursement for travel in private car on board of health business at the same rate as provided for a public officer or employee in Iowa Code section 70A.9.
- b. Actual lodging and meal expenses including sales tax on lodging and meals.
- c. Actual expense of public transportation when traveling on board of health business.
- d. Miscellaneous expenses related to performance of duties as approved by the board of health.

77.6(2) This rule shall not be construed as requiring the payment of reimbursement to any person or as prohibiting local boards from imposing additional restrictions or administrative requirements on expenses of their members.

These rules are intended to implement Iowa Code section 135.11(13) and chapter 137.

CHAPTER 78
DISTRICT HEALTH DEPARTMENTS
[Prior to 7/29/87, Health Department[470] Ch 78]

641—78.1(137) Minimum standards for district health departments.

78.1(1) A district health department approved after September 3, 1997, shall have jurisdiction over at least two counties.

78.1(2) All areas under the jurisdiction of a district health department shall be in close proximity, and district boundaries shall follow existing county boundaries.

78.1(3) A district health department shall provide public health nursing services and environmental health services, and may provide other public health population-based services as are deemed advisable and necessary.

78.1(4) The district board of health shall delegate responsibility for administration of the district health department to an individual who is a full-time employee in the department.

641—78.2(137) Preparation of district health department plan.

78.2(1) The Iowa department of public health shall prepare a proposed plan for formation of district health departments after consideration of the following factors:

- a. Compliance with 78.1(1), 78.1(2) and 78.1(3).
- b. Opinions and desires of existing local boards of health, as determined by questionnaire, conference, or other appropriate method.
- c. Configuration of existing or proposed districts of other agencies whose activities are related to public health.

78.2(2) The plan shall consist of a map showing district boundaries, and a list of existing city and county boards of health in each district. The proposed plan shall be submitted to all existing local boards for consideration. At least 30 days shall be allowed for submission of comments by the local boards.

78.2(3) After consideration of comments by the local boards, the Iowa department of public health shall prepare a final plan and shall send copies to each local board.

78.2(4) Whenever any amendment to the final plan is proposed, the Iowa department of public health shall notify all affected local boards and shall allow at least 30 days for submission of comments.

78.2(5) Whenever amendments of the plan are made, the Iowa department of public health shall transmit copies of the amended plan to all local boards of health.

641—78.3(137) Approval of district health departments. Local boards of health desiring to form a district health department shall submit the following information:

78.3(1) A resolution passed by each involved local board of health within the district, as designated in the state plan, stating:

- a. Its desire that a district health department be formed, and
- b. Its approval of the plan for appointment of district board members.

78.3(2) Adequate assurance that, upon organization as a district, the minimum organizational and service standards specified in 78.1(4) and 78.1(5) will be met. Such assurance may include:

- a. Listing of existing personnel in the district whose services will be utilized by the district board.
- b. Copies of existing or proposed budgets or resolutions of intent from counties, cities or other organizations, indicating that funds will be provided for the district's local health fund.
- c. Such other information as shall be acceptable to the director of public health.

78.3(3) A plan for appointment of the district board of health, which shall include:

- a. The number of members to be appointed, which shall not be less than 5 nor more than 11.
- b. The number of doctors of medicine and surgery or osteopathic physicians and surgeons to be appointed, which shall not be less than one nor more than three.
- c. The term of office of the members, which shall not be less than two nor more than six years.

d. The dates of appointment of members. Except for appointment of the original board, and appointments for filling vacancies in unexpired terms, no more than 60 percent of the board members shall be appointed in any one year.

e. The appointing authority for each board member. Members may be appointed by:

- (1) County boards of supervisors.
- (2) City councils.

f. The method or methods of filling vacancies in unexpired terms of each board member.

g. Any other qualifications or restrictions relating to appointment of board members.

- (1) At least one member shall be appointed from each county.
- (2) When a district includes a city of over 25,000 population, at least one board member shall be appointed from such city.

78.3(4) Upon receipt of all necessary information, as specified in 78.3(1), 78.3(2) and 78.3(3), the Iowa department of public health shall review such information, and shall determine, within 30 days, whether the minimum standards specified in 78.1(137) will be met by the proposed district.

78.3(5) Upon determination that minimal standards will be met by the proposed district, the Iowa department of public health shall approve formation of the district, and shall set an effective date for district formation, which shall not be less than 30 days from the date of approval.

78.3(6) Notice of approval for district formation, including the effective dates, shall immediately be sent to:

- a.* The county board of health of each county in the district.
- b.* The board of supervisors of each county in the district.
- c.* The city board of health of each city over 25,000 population in the district, unless such board has been terminated.

78.3(7) Upon receipt of the notice of approval for district formation, each appointing authority shall, prior to the effective date of formation of the district, appoint board members as specified in the plan referred to in 78.3(3), who shall take office on the effective date.

641—78.4(137) Additions to district health departments.

78.4(1) The board of health of any county, or any city over 25,000 population which desires to be added to an existing district health department, shall submit an application to the district board of that district.

78.4(2) If addition of said city or county is approved by a majority of the members of the district board, the following information shall be submitted to the state board of health:

- a.* A resolution passed by the board of health of the applicant city or county, stating its desire to be added to the district, and approving the revised plan for appointment of district board members.
- b.* Adequate assurances, as described in 78.3(2), that minimum service standards will continue to be met following addition of the applicant city or county.
- c.* A revised plan for appointment of members of the district board of health, which shall conform with all requirements of 78.3(3).
- d.* A resolution or statement of agreement from each appointing authority whose authority to appoint board members is affected by the revised plan for appointment of district board members.
- e.* A resolution passed by the district board approving addition of the applicant city or county.

78.4(3) If addition of the applicant city or county to the district is approved by the state board of health, an effective date shall be set for the action, and notification sent to:

- a.* The district board of health.
- b.* The board of health of the applicant city or county.
- c.* The board of supervisors of the applicant county.
- d.* The council of the applicant city.
- e.* The council of each city within the applicant county.

78.4(4) Any new district board of health members required by the revised plan shall be appointed prior to the effective date by the appropriate authorities, and shall take office on the effective date.

641—78.5(137) Withdrawal from district health departments.

78.5(1) The board of supervisors of any county, or the city council of any city over 25,000 population, desiring to withdraw from a district health department, shall submit an application to the district board of health of that district.

78.5(2) If withdrawal of said county or city is approved by a majority of the members of the district board, the following information shall be submitted to the state board of health:

a. A resolution passed by the board of supervisors of the applicant county, or the city council of the applicant city, stating its desire to withdraw from the district and stating also its intent to:

- (1) Apply for addition to another district, or
- (2) Appoint a county or city board of health.

b. Adequate assurances, as described in 78.3(2) that minimum service standards will continue to be met in the district following withdrawal of the applicant county or city.

c. Assurance that minimum standards specified in 78.1(1), 78.1(2) and 78.1(3) will continue to be met in the district following withdrawal of the applicant county or city.

d. A revised plan for appointment of the district board of health, which shall conform with all requirements of 78.3(3).

e. A resolution passed by the district board approving withdrawal of the applicant city or county, and approving the revised plan for appointment of the district board of health.

78.5(3) If withdrawal of the applicant county or city from the district is approved by the state board of health, an effective date shall be set for the action, and notification sent to:

- a.* The district board of health.
- b.* The board of supervisors of the applicant county.
- c.* The council of the applicant city.
- d.* The council of each city within the applicant county.

78.5(4) Any new district board of health members required by the revised plan shall be appointed prior to the effective date by the appropriate authorities, and shall take office on the effective date.

These rules are intended to implement Iowa Code section 137.9.

[Filed 1/5/72]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

CHAPTER 79

PUBLIC HEALTH NURSING

[Prior to 7/29/87, Health Department[470] Ch 79]

Rescinded IAB 4/11/07, effective 7/1/07; see 641—Ch 80

CHAPTER 80
LOCAL PUBLIC HEALTH SERVICES
[Prior to 8/3/94, "Homemaker-Home Health Aide Services"]
[Prior to 4/11/07, see also 641—Ch 79]

641—80.1(135) Purpose. The purposes of the local public health services state grant is to assist with assuring core public health functions and delivering essential public health services and to increase the capacity of local boards of health to promote healthy people and healthy communities.

641—80.2(135) Definitions. For the purposes of these rules, the following definitions apply:

"Administrative expense" means the costs incurred which are not identified readily and specifically with a program but which are necessary to the general operations of the authorized agency.

"Appropriation formula" means the method used to distribute the allocations of the state grant to each county.

"Authorized agency" means a contractor or a private nonprofit or governmental organization delivering all or part of the local public health services funded by the local public health services state grant.

"Care coordination" means assessing a consumer's need for care; developing, implementing and updating the plan of care; assigning a direct care worker to the case; assigning direct care worker duties, including specifying the frequency of task performance and the length and frequency of visits; providing referrals and follow-up; coordinating the case, including coordinating interagency and intra-agency communications; and maintaining records and reports.

"Community" means the aggregate of persons with common characteristics such as race, ethnicity, age, or occupation or other similarities such as location.

"Consumer" means an individual, family, or community utilizing essential public health services through the local public health services state grant.

"Contractor" means the local board of health or the county board of supervisors as agreed upon by the local board of health and the county board of supervisors.

"Core public health functions" means the scope of activities which serve as a broad framework for public health agencies. Core public health functions are:

1. Assessment, which means to regularly and systematically collect, assemble, analyze, and make available information on the health of the community, including statistics on health status, community health needs and personal health services and epidemiologic and other studies of health problems.
2. Policy development, which means efforts to serve the public interest in the development of comprehensive public health policies by promoting use of a scientific knowledge base in decision making about public health and by taking the lead in comprehensive public health policy development.
3. Assurance, which means public health efforts to assure constituents that services necessary to achieve agreed-upon goals are provided either by encouraging actions by other entities (private or public sector), by requiring such action through regulation, or by providing services directly.

"Department" means the Iowa department of public health.

"Dependent nursing" means a function requiring the skills of a licensed registered nurse and the order of a physician according to 655—Chapter 6, Iowa Administrative Code.

"Direct care worker" means a trained and supervised individual who provides services, care, and emotional support to consumers.

"Essential public health services" means activities carried out by the authorized agency fulfilling core public health functions. Essential public health services are:

1. Monitoring health status and understanding health issues facing the community.
2. Protecting people from health problems and health hazards.
3. Giving people information they need to make healthy choices.
4. Engaging the community to identify and solve health problems.
5. Developing public health policies and plans.
6. Enforcing public health laws and regulations.
7. Helping people receive health services.

8. Maintaining a competent public health workforce.
9. Evaluating and improving programs and interventions.
10. Contributing to and applying the evidence base of public health.

“Evaluation” means the process to measure the effectiveness of interventions by measuring outcomes against previously established goals and objectives.

“Health promotion” means organizational, economic and environmental supports and education to stimulate healthy behaviors in individuals, groups or communities.

“Income” means all sources of revenue for the consumer and, if applicable, the consumer’s spouse.

“Independent nursing” means a function requiring the skills of a licensed registered nurse according to 655—Chapter 6, Iowa Administrative Code.

“Local board of health” means a county, city or district board of health as defined in Iowa Code section 137.2.

“Nonprofit” means an entity meeting the requirements for tax-exempt status under the United States Internal Revenue Code.

“Nursing process” means the steps completed by a skilled licensed registered nurse according to 655—Chapter 6, Iowa Administrative Code.

“Outcome” means an action or event that follows as a result or consequence of the provision of a service or support.

“Outcome measures” means the mathematical expression of the effect of an activity, product, or service on consumers and the public health. Outcome measures are used to determine the extent to which the activity, product, or service has impacted its intended audience and to identify progress toward the achievement of a goal.

“Personal health services” means health services delivered to individuals, including primary care, specialty care, hospital care, emergency care, and rehabilitative care. For the purpose of the local public health services state grant, personal health services include nursing (disease and disability), nursing (health maintenance), home care aide (homemaker), and home care aide (personal care) activities.

“Population-based services” means interventions or activities for a community to promote health and to prevent disease, injury, disability, premature death, and exposure to environmental hazards.

“Poverty” means the level of adjusted income, factoring in resources and income, which is at or below 75 percent of the current federal poverty guidelines.

“Preservice education” means training required prior to assignment.

“Procedures” means the steps to be taken to implement a policy.

“Process” means a service or support provided by an authorized agency to a consumer that will allow the consumer to achieve an outcome. A process may include a written, formal, and consistent trackable method or an informal method that is not written but is trackable.

“Program,” for the purposes of the state grant, means local public health services, local board of health services, public health nursing services, and home care aide services.

“Protective services” means interventions or activities for a child or adult to alleviate, protect against, or prevent situations which could lead to abuse or neglect. For the purposes of the local public health services state grant, protective services require an order from the justice system.

“Quality improvement” means a process to review, plan and ensure standards of quality for essential public health services, interventions and activities.

“Resources” means unrestricted assets owned by a consumer and, if applicable, by the consumer’s spouse. The place of residence and one vehicle are exempt from consideration of resources.

“Restricted assets” means assets typically involving a penalty for early withdrawal such as IRA accounts, KEOGH accounts, 401(k) accounts, employee retirement accounts, and other deferred tax protected assets involving a penalty for early withdrawal. Restricted assets shall not be considered as a resource in the determination of a consumer’s financial liability for services.

“Service management” means recruiting, employing, providing workforce development to, scheduling, supervising and evaluating direct care workers; ensuring the competency of direct care workers; providing quality assurance for the program; and maintaining community relations.

“*Sliding fee scale*” means a scale of consumer fee responsibility based on an assessment of the consumer’s ability to pay all or a portion of the charge for services.

“*State grant*” means the local public health services state grant, which is the allocation of state funds appropriated annually by the Iowa general assembly for local public health services.

“*Unrestricted assets*” means assets that can be converted to cash for financial support. Unrestricted assets shall be considered in the determination of a consumer’s financial liability for services in the sliding fee calculation.

“*Vulnerable population*” means individuals or groups in the community who are unable to promote and protect their personal and environmental health.

“*Workforce development*” means the provision of training relevant to services or tasks assigned to direct care workers to enhance their knowledge and the delivery of essential public health services.

641—80.3(135) Local public health services state grant. The following applies to the state allocation for local public health services, local board of health services, public health nursing services, and home care aide services.

80.3(1) Priority population. The state grant serves all populations, with a priority to serve vulnerable populations in Iowa.

80.3(2) Contractor assurance. In order to receive funding, the contractor shall provide to the department assurance that authorized agencies meet all applicable federal, state, and local requirements. The contractor may directly provide or subcontract all or part of the delivery of services. The contractor shall assure that each authorized agency complies with Title IV of the Civil Rights Act, the Americans with Disabilities Act of 1990 (ADA), and Section 504 of the 1973 Rehabilitation Act and with affirmative action requirements. In addition, the contractor shall assure that each authorized agency has, at a minimum, the following:

- a. A governing board.
- b. Program policies and procedures, which shall, at a minimum, include:
 - (1) Admission and discharge.
 - (2) A consumer appeals process.
 - (3) Records appropriate to the level of consumer care.
 - (4) A financial assessment.
 - (5) A sliding fee scale.
- c. Personnel policies and procedures, which shall be reviewed and updated annually and communicated to staff. Personnel policies and procedures shall, at a minimum, include:
 - (1) Delegation of authority and responsibility for agency administration.
 - (2) Staff supervision.
 - (3) A staff training program for the identification and reporting of child and dependent adult abuse to the department pursuant to Iowa Code sections 232.69 and 235B.3.
 - (4) Conditions of employment including recruitment, selection, termination, promotion and compensation.
 - (5) A leave of absence policy.
 - (6) A grievance procedure.
 - (7) Annual employee performance evaluations.
 - (8) A nondiscrimination policy.
 - (9) An employee orientation program.
 - (10) A provision for career or workforce development.
 - (11) Fringe benefits.
 - (12) Employment application forms which comply with civil rights regulations.
 - (13) Current job descriptions which delineate qualifications, responsibilities and essential functions, reflect current responsibilities, and are dated.
 - (14) A current salary schedule.
- d. Fiscal management, which shall, at a minimum, include:
 - (1) An annual budget.

- (2) Fiscal policies and procedures which follow generally accepted accounting practices.
- (3) An annual audit which is performed according to usual and customary accounting principles and practices.
 - e. A quality improvement plan. The plan shall address annual evaluation of the authorized agency, public health programs, and professional development and shall include:
 - (1) Written goals, objectives, and performance measures that use appropriate data and are analyzed regularly.
 - (2) Strategies to monitor program and service compliance with local, state, and federal requirements.
 - (3) Evidence that programs and services align with community health priorities.
 - (4) Methods for reporting the outcomes of evaluation to stakeholders.
 - (5) Steps to determine the cost-effectiveness of programs and services.

641—80.4(135) Billing services to the local public health services state grant. The contractor shall bill public health activities to the state grant based on the identified needs of the community.

80.4(1) *Planning process.* Prior to the ensuing fiscal year application process, the contractor shall initiate a community planning process with input from community partners including but not limited to authorized agencies in order to identify the needs of the community.

80.4(2) *Alternative plan.* A plan is required for the alternative use of the state grant funds. The plan shall be based on an assessment of the community and shall be submitted by the contractor for approval by the department. The plan shall:

- a. Assure the department of the delivery of essential public health services that are the primary purpose of these funds.
- b. Identify essential public health services to be delivered.
- c. Describe the activity to be delivered.
- d. Identify target populations to be served.
- e. Identify outcome measures.

80.4(3) *Funder of last resort.* The state grant shall be billed as the last resort.

- a. The state grant shall be billed the lower of the authorized agency's cost or charges.
- b. The state grant shall not be billed for services eligible for third-party reimbursement (e.g., Medicare, Medicaid, private insurance, approved Iowa waivers, or other federal or state funds).
- c. The state grant shall not be billed for the balance between the authorized agency cost or charge, whichever is lower, and the allowed reimbursement from a third-party payer.
- d. The state grant shall not be billed for fees waived by the authorized agency.

80.4(4) *Cost analysis.* The authorized agency shall complete, at a minimum, an annual cost analysis, using a method approved by the department. The authorized agency shall maintain documentation to support the administrative cost allocation.

80.4(5) *Fees and donations.* Fees for services and donations shall be used to support local public health services.

a. Fees for services provided shall be based on a financial assessment which determines the consumer's financial responsibility. The financial assessment shall be updated annually by the authorized agency. An authorized agency may consider additional health care-related expenses or resources above \$10,000 when determining the consumer fee according to an agency's policy.

b. Sliding fee scale. The authorized agency shall establish a sliding fee scale that considers resources and income. The sliding fee scale shall be based on the charge for services. The authorized agency shall determine placement on the sliding fee scale before the service begins. The authorized agency shall use payments, based on the sliding fee scale, and donations received from consumers to support essential public health services. The following instructions apply to the use of the sliding fee scale:

- (1) A fee shall be charged to consumers who have an income at or above 200 percent of federal poverty guidelines.

(2) No fee shall be charged to consumers who have an income at or below 75 percent of federal poverty guidelines and resources of \$10,000 or less.

(3) A sliding fee or full fee for home care aide (personal care); home care aide (homemaker), home care aide (home helper) and home care aide (chore); nursing (disease and disability); and nursing (health maintenance) shall be established.

(4) No fee shall be charged for protective services or communicable disease follow-up services.

(5) An authorized agency may charge a fee according to the authorized agency's policy for services other than those described in subparagraph (4) if the consumer has an income below 200 percent but above 75 percent of federal poverty guidelines.

80.4(6) *Reallocation.* The department will annually determine the potential for unused funds from contracts. If funds are available, reallocation of the funds shall be at the discretion of the department.

641—80.5(135) Right to appeal.

80.5(1) *Denial, reduction or termination of services.*

a. When an authorized agency denies, reduces or terminates services funded by the state grant against the wishes of a consumer, the authorized agency shall notify the consumer and the contractor of the following:

- (1) The action taken;
- (2) The reason for the action; and
- (3) The consumer's right to appeal.

b. If a consumer files an appeal, the authorized agency shall provide services to the consumer throughout the appeals process, unless the agency receives a waiver from the department pending the outcome of the appeal.

80.5(2) *Local appeals process.*

a. All contractors and their authorized agencies shall have a written local procedure to hear appeals. The local procedure shall, at a minimum, include:

- (1) The method of notification of the right to appeal;
- (2) The procedure for conducting the appeal;
- (3) Time limits for each step; and
- (4) The method of notification of the outcome of the local appeal and notification of the consumer's right to appeal to the state. Notifications of the outcome of the local appeal shall include the facts used to reach the decision and the conclusions drawn from the facts to support the authorized agency's decision.

b. The written appeals procedure and the record of appeals filed (including the record and disposition of each) shall be available for inspection by authorized representatives of the Iowa department of public health.

80.5(3) *Appeal to department.*

a. If a consumer is dissatisfied with the decision of the local appeal, the consumer may appeal to the state. The appeal shall be made in writing by certified mail, return receipt requested, to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within 15 days of the receipt of the local contractor's or authorized agency's appeal decision.

b. Department review. The department shall evaluate the appeal based upon the merits of the local appeal documentation. A department decision affirming, reserving, or modifying the local appeal decision shall be issued within 30 days of the receipt of all local appeal documentation. The department decision shall be in writing and sent by certified mail, return receipt requested, to the consumer and the contractor and the authorized agency.

80.5(4) *Further appeal.* The consumer may appeal the department's decision by submitting an appeal, within 10 days of the receipt of the department decision, to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. Upon receipt of an appeal that meets contested case status, the department shall forward the appeal within 5 working days to the department of inspections and appeals pursuant to the rules adopted by the department of inspections and appeals regarding the

transmission of contested cases. The continued process for appeals shall be governed by 641—Chapter 173, Iowa Administrative Code.

641—80.6(135) Case management. Case management is a process optimizing self-care capabilities of consumers and their families in gaining access to needed medical, social, and other services.

80.6(1) Case manager qualifications. Individuals performing case management shall meet one of the following criteria:

- a. Be a registered nurse licensed to practice in the state of Iowa.
- b. Possess a bachelor's degree in family and consumer science, education, social work or other health or human services field.
- c. Be a licensed practical nurse with a current Iowa license.
- d. Be a home care aide who has an equivalent of two years' experience and who is supervised by an individual who meets one of the criteria in paragraphs "a" to "c."

80.6(2) Case management services. Case management services shall be provided at the direction of the consumer and shall include:

- a. An initial assessment of the consumer's needs.
- b. Development and implementation of a service plan to meet the identified needs.
- c. A team composed of the consumer and the case manager and other entities, such as providers relevant to the consumer's service needs or family members, who may be included at the discretion of the consumer.
- d. Face-to-face meetings with the consumer, which shall be held at least quarterly.
- e. Coordination and monitoring of delivery of services. Case managers do not provide direct services. Case managers link the consumer to appropriate resources and natural supports.
- f. Evaluation of outcomes.
- g. Reassessment and revision of the consumer's service plan, which shall be completed as needed, but no less than annually.
- h. Advocacy on behalf of the consumer.
- i. Communication with the consumer and team members regarding the consumer's progress toward achieving the goals of the service plan.
- j. Documentation which supports and demonstrates (1) the consumer's use of the case management process, (2) contacts with the consumer and with providers the consumer is using for services, and (3) other relevant information related to the coordination and delivery of case management services.
- k. Monitoring of the consumer's health, safety and welfare.
- l. An assurance that the consumer has a choice of providers.

80.6(3) Consumer records. Consumer records for case management, at a minimum, shall include the following:

- a. An initial assessment;
- b. A service plan;
- c. Reassessment;
- d. An emergency plan;
- e. Documentation of the following:
 - (1) Consumer and family contacts;
 - (2) The coordination and monitoring of services;
 - (3) Activities related to delivery of services (i.e., interdisciplinary team meetings);
 - (4) The evaluation of outcomes.

641—80.7(135) Local board of health services.

80.7(1) Program purpose. The purpose of this program is to increase the organizational capacity of county boards of health to develop conditions for healthy people and healthy communities through public health nursing, home care aide, core public health functions and population-based essential public health services in Iowa.

80.7(2) Program services. Local board of health services include public health essential services as defined in rule 641—80.2(135).

80.7(3) Appropriation to county board of health. The funding supports the efforts of local boards of health in addressing specific health priorities in each county. The appropriation to each county board of health is determined by the following formula: 30 percent of the total allocation shall be divided so that an equal amount is available for use in each county in the state. The remaining 70 percent shall be allocated to each county according to the county's population based on the department's current published vital statistics.

641—80.8(135) Local public health services.

80.8(1) Program purpose. The purpose of this program is to increase local public health capacity by implementing core public health functions and essential public health services to address health inequalities. Local public health services address health inequalities by advocating for population-based policies and services to improve the health of the whole population in an equal way.

80.8(2) Program services. Local public health services include:

- a. Assisting local boards of health in providing services that address health problem priorities identified in each county's health improvement plan.
- b. Advancing the goals of Healthy Iowans 2010.
- c. Providing financial support for targeted areas of service relating to Iowa's elderly and disabled populations (i.e., home- and community-based services, protective services, nursing (disease and disability), nursing (health maintenance), home care aide (personal care), home care aide (home helper), home care aide (chore) or home care aide (homemaker)).

80.8(3) Appropriation to county board of health. The appropriation to each county board of health is determined by the following formula: 40 percent of the total allocation shall be divided so that an equal amount is available for use in each county in the state. The remaining 60 percent shall be allocated to each county according to the county's population based on the department's current published vital statistics.

641—80.9(135) Public health nursing services. Public health nursing is a specialized nursing practice that combines the science and art of public health with the science and art of nursing.

80.9(1) Program purpose. The purpose of this program is to improve the health of the entire community, prevent illness, enhance the quality of life, and provide leadership to safeguard the health and wellness of the community. The program implements core public health functions and essential public health services to reduce, prevent or delay inappropriate institutionalization of consumers and to preserve families.

80.9(2) Scope. The practice of public health nursing is population-based, with the goals of promoting health and preventing disease and disability for all people through the creation of conditions in which people can be healthy. For the purposes of the state grant, public health nursing services include both personal health services and population-based services.

80.9(3) Standards of practice of public health nursing are consistent with the nursing process and include:

- a. *Assessment.* The public health nurse assesses the health status of populations using data, community resources identification, input from the population, and professional judgment.
- b. *Diagnosis.* The public health nurse analyzes collected assessment data and partners with people to attach meaning to those data and determine opportunities and needs.
- c. *Outcome identification.* The public health nurse participates with other community partners to identify expected outcomes in the populations and their health status.
- d. *Planning.* The public health nurse promotes and supports the development of programs, policies, and services that provide interventions that improve the health status of populations.
- e. *Evaluation.* The public health nurse evaluates the status of the population.

80.9(4) Public health coordinator/supervisor qualifications.

a. Individuals performing public health coordination/supervision shall meet one of the following criteria:

(1) Possess a bachelor’s degree or higher from an accredited college or university in public health, health administration, nursing or other applicable field and a minimum of two years of related experience; or

(2) Be a registered nurse, licensed to practice by the Iowa board of nursing, who has a minimum of two years of related experience and has completed a course approved by the department within six months of employment.

b. By January 1, 2008, individuals who hold the position of public health coordinator/supervisor on or before June 30, 2007, shall meet one of the criteria in paragraph “a.”

80.9(5) Appropriation. The appropriation to each county is determined by the following formula: 25 percent of the total amount to be allocated shall be divided so that an equal amount is available for use in each county in the state. The remaining 75 percent shall be divided so that the share available for use in each county is proportionate to the number of elderly and low-income persons living in the county in relation to the total number of elderly and low-income persons living in the state.

641—80.10(135) Home care aide services. Home care aide services are intended to enhance the capacity of consumers to attain or maintain their independence. Trained and supervised direct care workers provide services to consumers who, due to the absence, incapacity or limitations of the usual homemaker, are experiencing stress or crisis.

80.10(1) Program purpose. The purpose of this program is to reduce, prevent or delay inappropriate institutionalization of consumers and to preserve families through the provision of supportive services by direct care workers who have completed training and are professionally supervised.

80.10(2) Scope. The direct care worker provides services for consumers by following a plan of care identifying assigned tasks. A direct care worker participates in activities to safeguard the health and wellness of the community and to implement core public health functions and essential public health services.

80.10(3) Authorized agency.

a. The authorized agency shall establish policies for supervision of direct care workers.

b. The authorized agency shall ensure that each direct care worker has completed adequate training and demonstrated competency for each task assigned. The required preservice education for direct care workers is outlined in the following chart:

Level of Direct Care Worker	Direct Care Worker I (equivalent to chore)	Direct Care Worker II (equivalent to home helper)	Direct Care Worker III (equivalent to homemaker)	Direct Care Worker IV (equivalent to personal care)	Direct Care Worker V (equivalent to protective worker)
Scope of Services	Provides services to a consumer necessary to enable the consumer to live independently and that encompass heavier cleaning tasks, including outside maintenance and chores. For chore services, there is no physical contact between the	Under the supervision of a professional, provides services to protect the environment for a self-directing consumer to preserve a safe and sanitary home	Under the supervision of a professional, provides services primarily in the homes of consumers who, due to the absence, incapacity or limitations of the usual homemaker or caregiver, are experiencing stress or crisis, to promote consumer health	Under the direction of nursing or medical staff, provides health-related services such as observation of self-administration of oral medications; checking the consumer’s pulse rate, temperature, and respiration rate; helping with simple	Provides services intended to stabilize a child’s or adult’s residential environment and relationships with relatives, caretakers, and other consumers and household members in order to alleviate a situation involving abuse or neglect or to otherwise protect the child or adult

Level of Direct Care Worker	Direct Care Worker I (equivalent to chore)	Direct Care Worker II (equivalent to home helper)	Direct Care Worker III (equivalent to homemaker)	Direct Care Worker IV (equivalent to personal care)	Direct Care Worker V (equivalent to protective worker)
	consumer and the direct care worker		and a safe, stable, sanitary home environment	prescribed exercises; keeping the consumer's rooms neat; changing nonsterile dressings; providing skin care and back rubs; assisting with braces and artificial limbs; or assisting the consumer in using medical equipment	from a threat of abuse or neglect; also provides services intended to prevent situations which could lead to abuse or neglect of a child or adult when a definite potential for abuse or neglect exists
Services or tasks assigned include, but are not limited to:	Heavy household cleaning, garbage removal, snow shoveling, changing light bulbs, putting screens on windows, covering and uncovering air conditioners, lawn care and mowing	Essential shopping and housekeeping	Money management, household management, consumer education, transportation, meal preparation, family preservation, family management, child care, assistance with personal care, respite, essential shopping, and housekeeping	Personal care and rehabilitative therapies	Family preservation, family management, money management, child care, and transportation
Preservice Education	Direct care worker possesses skills for tasks assigned	4 hours on role of the home care aide; 2 hours on communication; 2 hours on understanding basic human needs; 2 hours on maintaining a healthy environment; 2 hours on infection control in the home; and 1 hour on emergency procedures	60-hour home care aide training: A Model Curriculum and Teaching Guide for the Instruction of the Homemaker-Home Health Aide OR 75-hour certified nurse aide course and Direct Care Worker II preservice education OR	60-hour home care aide training: A Model Curriculum and Teaching Guide for the Instruction of the Homemaker-Home Health Aide OR 75-hour certified nurse aide course and Direct Care Worker II preservice education OR	Training in a department-approved curriculum

Level of Direct Care Worker	Direct Care Worker I (equivalent to chore)	Direct Care Worker II (equivalent to home helper)	Direct Care Worker III (equivalent to homemaker)	Direct Care Worker IV (equivalent to personal care)	Direct Care Worker V (equivalent to protective worker)
			Home care aide training and prior approval by the department	Home care aide training and prior approval by the department	
Workforce Development (per calendar year)	None	3 hours prorated to employment	12 hours prorated to employment	12 hours prorated to employment	12 hours prorated to employment
Competency	Documented skills for assigned tasks	Documented skills for assigned tasks	Documented skills for assigned tasks	Documented skills for assigned tasks	Documented skills for assigned tasks

80.10(4) Professional staff as providers of home care aide services. An individual who is in the process of receiving or who has completed the training required for LPN or RN licensure or who possesses an associate's degree or higher in social work, sociology, home economics or other health or human services field may be assigned to provide home care aide services if the following conditions are met:

- a. Services or tasks assigned are appropriate to the individual's prior training.
- b. Orientation to home care is conducted. Orientation includes adaptation of the individual's knowledge and skills from prior education to the home setting and to the role of the home care aide.

80.10(5) Care coordinator and service manager qualifications.

a. An individual performing care coordination or service management shall meet one of the following criteria:

- (1) Be a registered nurse licensed to practice in the state of Iowa.
- (2) Possess a bachelor's degree in family and consumer science, education, social work or other health or human services field.
- (3) Be a licensed practical nurse with a current Iowa license.

b. A home care aide with an equivalent of two years' experience may be delegated care coordination/service management duties as long as a qualified individual who meets one of the criteria in paragraph "a" retains responsibility and provides supervision and evidence of supervision.

c. An individual who has provided home care aide care coordination and service management prior to June 30, 2007, shall be considered qualified to continue in the position.

80.10(6) A qualified care coordinator or service manager may provide direct care services as appropriate to the individual's level of education and competency for the assignment.

80.10(7) The service manager's scheduling duty may be delegated to an individual not possessing one of the qualifications in paragraph 80.10(5) "a" provided that a qualified individual who meets one of the qualifications in 80.10(5) "a" retains responsibility and provides supervision and evidence of supervision.

80.10(8) Consumer records. The authorized agency shall maintain records for each consumer. The records shall include:

- a. An initial assessment.
- b. A plan of care.
- c. Assignment of direct care worker.
- d. Assignment of tasks.
- e. Reassessment.
- f. Update of plan of care.
- g. Direct care worker narrative notes.
- h. Documented supervision.

80.10(9) Appropriation. The appropriation to each county is determined by the following formula: 15 percent of the total allocation shall be divided so that an equal amount is available for use in each county in the state. The following percentages of the remaining 85 percent shall be allocated to each county according to that county's proportion of state residents with the following demographic characteristics:

- a.* Sixty percent according to the number of elderly persons living in the county.
- b.* Twenty percent according to the number of persons below the federal poverty guidelines living in the county.
- c.* Twenty percent according to the number of substantiated cases of child abuse in the county during the three most recent years for which data is available.

These rules are intended to implement Iowa Code chapter 135.

CHAPTER 81
GENERAL RULES FOR MIGRATORY LABOR CAMPS
[Prior to 7/29/87, Health Department[470] Ch 81]

641—81.1(138) Shelters.

81.1(1) Heating season. The season requiring artificial heating as provided in Iowa Code section 138.13 is designated as the period between September 15 and June 1.

81.1(2) Minimum floor space requirements. The following floor space requirements shall be provided:

a. At least 50 square feet per occupant for sleeping purposes only in family units and dormitory accommodations.

b. At least 40 square feet per occupant for sleeping purposes only in accommodations using double bunk beds.

81.1(3) Inspection. The operator of a migrant labor camp shall be in possession of keys to all migrant shelters in order that inspections can be made of the facilities at any reasonable time.

81.1(4) Register. A register of all occupants of a migrant labor camp shall be maintained and open to inspection by the Iowa department of public health representatives at all times when the camp is occupied.

81.1(5) Separate rooms. Housing used for families with one or more children six years of age or older shall have a room or partitioned sleeping area for the husband and wife. The partition shall be of rigid materials and installed so as to provide reasonable privacy.

81.1(6) Storage. Arrangements for hanging clothing and storing personal effects for each person or family shall be provided.

641—81.2(138) Water supply.

81.2(1) General.

a. The water supply shall be of a safe bacterial and chemical quality.

b. Where a public water supply is available, such water shall be used in the camp. If a private water source under pressure is provided, the water system shall be capable of delivering at least 35 gallons per person per day to the camp site.

c. Cistern supplies consisting of roof or other surface runoff water shall not be used for drinking or culinary purposes.

d. The adequacy of a well as a source of water for drinking or culinary purposes shall be determined by inspection and bacteriological examination. Defects found by inspection or contaminated samples shall be sufficient grounds for requiring repair, chlorination or condemnation of the well.

e. Water containing 45 or more parts per million nitrates shall not be used for drinking or preparation of formula for infants under one year of age. When the supply contains nitrates in the quantity above, water for infant feeding shall be obtained from another source that has been tested and found to be bacterially satisfactory and contains less than 45 parts per million nitrates. A water supply containing 45 or more parts per million of nitrates shall be placarded or posted stating the water shall not be used for infant feeding.

f. Wooden well platforms or manhole covers are prohibited.

g. Hand-pump bases shall be of the solid one-piece type bolted, including suitable gaskets, secured to the well casing by thread or weld connection. Handpumps secured to the platform by bolts cast in the concrete shall be provided with a rubber or neoprene gasket between the pump base and the platform to ensure a watertight joint.

h. The pump head shall be of a type designed to prevent external water or other contaminating material from entering the water chamber.

i. The pump spout shall be of the closed, downward-directed type.

j. No hand-operated type of pump or cylinder which requires priming shall be used. No pail and rope, bailer, or chain-bucket systems shall be used.

81.2(2) Existing pump pits. Existing pump pits may be approved if the construction conforms to the following minimum standards:

a. Walls, floor and top of pit shall be of watertight concrete or masonry construction or equivalent. The well casing shall extend at least 6 inches above the pit floor.

b. A positive seal shall be provided for the annular opening between the casing wall and the drop pipe.

c. A positive drain shall be provided by either a watertight sump and automatic sump pump discharging with at least a 6-inch free fall above the ground surface or an independent drain line discharging to the ground surface above any possible flood level. Pit drains discharging to any other drain or sewer are prohibited.

81.2(3) Water supply systems. The water supply system shall be installed so as to prevent backflow of contaminated water from appliances, fixtures, drains and sewers and shall have no cross-connections with any nonpotable supply or any other water supply which does not comply with these requirements.

81.2(4) Water tanks. All water to be hauled for a camp shall be obtained from an approved source. All equipment used for hauling or storage of potable water shall be thoroughly cleaned and disinfected with a solution containing at least 200 parts per million of chlorine immediately before use. No equipment, tanks or reservoirs used for hauling or storing potable water shall be used for any other purpose.

641—81.3(138) Waste disposal.

81.3(1) Solid waste disposal. Solid waste shall be disposed of in a sanitary disposal project approved by the Iowa department of public health, or if disposed of on the premises, the solid wastes shall be buried so as to create no health hazard or nuisance.

81.3(2) Liquid waste.

a. Existing wastewater disposal systems shall be located and constructed so as not to create a nuisance or condition of pollution.

b. Water-carriage toilets shall discharge to a septic tank and solid absorption system or other type disposal system approved by the Iowa department of public health located, designed and constructed in accordance with the specifications set forth in the Iowa department of natural resources' current publication, "Residential Sewage Disposal Systems."

c. A leaching pit or other type disposal system approved by the Iowa department of public health shall be provided to receive the wastes from sinks, laundries, showers and tubs when no septic tank and absorption system is available. Such leaching pits shall be located and constructed in accordance with the specifications set forth in the Iowa department of natural resources' current publication, "Residential Sewage Disposal Systems."

641—81.4(138) Bathing facilities.

81.4(1) Showers shall be supplied with hot and cold water under pressure. Shower enclosures shall be sufficient to provide privacy for the user. An adjacent, enclosed dry area shall be provided for dressing. No duckboards, mats or other such accessories shall be permitted.

81.4(2) Automatic water-heating equipment, or storage tanks with hand-fired heating coils, shall be equipped with combination pressure and temperature relief valves or separate pressure and temperature relief valves. Temperature relief valves shall be located in the top one-eighth or not more than 3 inches above the top of the tank served. Pressure relief valves may be located adjacent to the tank. Gas-fired or other combustion-type water heaters shall be vented to the outside atmosphere.

641—81.5(138) Central dining facilities.

81.5(1) Physical facilities. When central dining facilities are provided by a concessionaire, operator or the manager of a camp, the size of the kitchen and dining hall shall be commensurate with the capacity of the housing and shall be separate from the sleeping quarters.

81.5(2) Requirements. When central cooking and eating facilities are provided by a concessionaire, operator or the manager of a camp, such facilities shall comply with the laws and rules of the Iowa department of inspections and appeals.

641—81.6(138) Safety and fire.

81.6(1) Fire exits.

a. Shelters of one story construction housing less than ten persons shall have two means of escape, one of which may be a readily accessible window with an openable space of at least 24 by 24 inches.

b. Sleeping quarters designed for ten or more persons, central dining facilities and common assembly rooms shall have at least two doors remotely separated so as to provide alternate means of escape.

c. Floors, above the first floor, used for sleeping quarters or common assembly rooms shall have a stairway and a permanent affixed exterior ladder or a second stairway.

81.6(2) Shelter spacing. In camps established after July 1, 1972, there shall be at least 10 feet of space in all directions between shelters.

These rules are intended to implement Iowa Code section 138.18.

[Filed 8/31/71]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

CHAPTER 82
OFFICE OF MULTICULTURAL HEALTH

641—82.1(135) Purpose. The office of multicultural health exists to actively promote and facilitate health equity for Iowa’s multicultural communities.

641—82.2(135) Definitions. For purposes of this chapter, the following definitions apply:

“*Community*” is defined as a group of people living in the same locality and under the same government or a group viewed as forming a distinct segment of society.

“*Continual cultural competency*” is defined as a set of congruent behaviors, attitudes and policies that come together as a system or an agency or among professionals and that enable that system or agency or those professionals to work effectively in cross-cultural situations.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the department of public health.

“*Disparity*” is defined as the condition or fact of being unequal.

“*Diverse*” is defined as made up of distinct characteristics, qualities or elements.

“*Immigrant*” is defined as a person who leaves one country to settle permanently in another.

“*Minority*” is defined as a part of a population differing from others in one or more characteristics and often subjected to differential treatment. Racial and ethnic minorities are classified as people of African descent (African-American/Black), Hispanic/Latino descent, Asian/Pacific Islander descent, Native American descent, and refugees and immigrants.

“*Multicultural*” is inclusive of communities of racial, ethnic or linguistic diversity.

“*Refugee*” is defined as one who flees in search of refuge, as in times of war, political oppression, or religious persecution.

641—82.3(135) Responsibilities of the office of multicultural health. The office of multicultural health shall provide public health leadership regarding existing or potential issues or practices that can or could affect the health status of racial, ethnic, and linguistic multicultural individuals and families, immigrants and refugees. The office shall provide this leadership through the core functions of (1) education; (2) advocacy; (3) data management; (4) technical assistance and consultation; and (5) training and development. The office is responsible for the following:

82.3(1) Promoting continuous cultural competency in health care practice and education throughout Iowa’s public health care sector;

82.3(2) Collecting and providing valid empirical information on the health status of multicultural groups in Iowa;

82.3(3) Advocating for the development of policies and programs that improve the health of Iowa’s racially, ethnically and linguistically diverse populations and addressing health disparities that exist within these populations;

82.3(4) Providing technical planning assistance to communities and counties throughout the state;

82.3(5) Advocating for Iowa’s racial, ethnic, and linguistic multicultural communities;

82.3(6) Creating and promoting a climate of inclusiveness in the public health sector on state, regional and local levels by partnering with its racial, ethnic, and linguistic multicultural constituents in Iowa to help them improve their collective health status; and

82.3(7) Promoting the Iowa public health standards and providing technical assistance and consultation regarding state and local criteria relating to disparate populations and delivery of culturally appropriate services.

641—82.4(135) Advisory council. A multicultural health advisory council shall be established within the department.

82.4(1) Membership. The council shall be composed of no more than 15 voting members appointed by the director.

a. Membership shall include the following:

- (1) One representative from each of the six local public health service regions;
- (2) One representative from the Meskwaki Settlement;
- (3) Public-sector representatives such as legislators and state commissioners;
- (4) Service-sector representatives such as representatives from the department of human services, local councils, education, and health care;
- (5) Private-sector representatives such as business leaders, representatives from grassroots, nonprofit, faith-based and volunteer organizations, and community leaders.

b. A term of appointment is three years, with no more than three consecutive terms. An exception for individual reappointment from organizations represented shall be determined by the director.

c. The advisory council shall elect a chairperson.

d. In the case of a vacancy, the chairperson shall notify the department of the need to appoint another representative. Vacancies shall be filled in the same manner as original appointments.

e. The advisory council may designate one or more subcommittees to have such powers and perform such duties as may be deemed necessary by the council.

82.4(2) Duties. The advisory council shall perform the following duties:

a. Provide advice and make recommendations on diverse racial, ethnic, and linguistic health issues to the department, the office of multicultural health, and policy makers;

b. Provide advice and make recommendations on public policies and practices that affect multicultural communities; and

c. Provide advice and make recommendations on funding that supports the activities of the office of multicultural health.

82.4(3) Meetings. The advisory council shall meet at least four times a year to conduct its business. Meetings may be scheduled more frequently as business requires.

a. Notice of meetings and agenda shall be made available to council members a minimum of five working days prior to the meeting.

b. The operation of council meetings shall be governed by the following rules of procedure:

(1) A majority of the members of the council shall constitute a quorum.

(2) Action can be taken by a vote of the majority of the members of the council.

(3) Robert's Rules of Order shall govern at all meetings.

c. All meetings are open to the public in accordance with the open meetings law, found at Iowa Code chapter 21.

82.4(4) Absences. Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the advisory council member and to appoint another. The chairperson of the advisory council is charged with providing notification of absences.

82.4(5) Minutes. The advisory council shall keep minutes of all its meetings showing the date, time, place, members present, members absent, and the general topics discussed.

a. The minutes shall reflect the actions agreed upon by the members for topics requiring the members' input or consensus.

b. The minutes shall be provided to the members of the advisory council prior to the next scheduled meeting.

c. The minutes shall be available at the office of multicultural health for inspection Monday through Friday from 8:30 a.m. to 4:30 p.m. with the exception of holidays.

82.4(6) Expenses of the council. The following may be considered necessary expenses for reimbursement of advisory council members when incurred on behalf of advisory council business and are subject to established state reimbursement rates:

a. Reimbursement for travel in a private car.

b. Actual lodging and meal expenses, including sales tax on lodging and meals.

c. Actual expenses for public transportation.

These rules are intended to implement Iowa Code section 135.12.

[Filed 5/14/08, Notice 3/26/08—published 6/4/08, effective 7/9/08]

CHAPTER 83
IOWA SENIOR HEALTH PROGRAM

Rescinded IAB 4/11/07, effective 7/1/07

CHAPTER 84
STATE SUBSTITUTE MEDICAL DECISION-MAKING BOARD

641—84.1(135) Purpose. A state substitute medical decision-making board is established to formulate policy and guidelines for the operations of local substitute medical decision-making boards and to act if a local board does not exist. The state board shall also develop rules for adoption by the department pursuant to Iowa Code chapter 17A for the appointment and operation of the local substitute medical decision-making boards.

The state board is comprised of medical professionals and laypersons appointed by the director and the state board of health according to rules adopted by the department. The state substitute medical decision-making board and its members are not liable, jointly or severally, for actions or omissions taken or made in the official discharge of their duties, except those acts or omissions constituting willful or wanton misconduct.

641—84.2(135) Composition of board. The state substitute medical decision-making board shall consist of 15 members at least 4 of whom shall be licensed in Iowa as doctors of medicine and surgery or as osteopathic physicians and surgeons, as defined by law.

641—84.3(135) Appointment. All members of the board shall be appointed by the director of public health and approved by the state board of health. The appointments shall be for three-year staggered terms which shall expire on June 30.

Any vacancy occurring on the board shall be filled by the director, with approval of the state board of health, for the unexpired term of the vacancy.

641—84.4(135) Duties. The board shall formulate rules, policies and guidelines for the local substitute medical decision-making boards established in Iowa Code section 135.29.

641—84.5(135) Officers. Officers of the board shall be a chairperson and a vice chairperson and shall be elected at the first meeting of each fiscal year. Vacancies in the office of chairperson shall be filled by elevation of the vice chairperson. Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

The chairperson shall preside at all meetings of the board, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. The chairperson shall also appoint panels to act on cases appealed from local board decisions and cases submitted to the state board from counties which do not have local boards. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

641—84.6(135) Meetings. The board shall meet as necessary at the call of the chairperson or the director. Two-thirds of the members of the board shall constitute a quorum. Actions can be taken by a majority vote of the board membership.

641—84.7(135) Panels. The board shall act on cases appealed from local board decisions and cases submitted to the state board from counties which do not have local boards through the use of panels as defined in 641—Chapter 85. Such panels shall function in the same manner as specified for local panels in 641—Chapter 85 and shall have the same authority to make decisions as the local panels.

641—84.8(135) Review of local boards. The state board shall, at least annually, review the reports and activities of the local boards to ensure compliance with the law and rules and to determine the need for changes.

These rules are intended to implement Iowa Code section 135.28.

[Filed 9/15/89, Notice 8/9/89—published 10/4/89, effective 11/8/89]

[Filed 5/8/92, Notice 3/18/92—published 5/27/92, effective 7/1/92]

CHAPTER 85
LOCAL SUBSTITUTE MEDICAL DECISION-MAKING BOARDS

641—85.1(135) Purpose. The purpose of this chapter is to establish the requirements and procedures for local substitute medical decision-making boards. Counties may establish local substitute medical decision-making boards for patients who are incapable of making their own medical care decisions and who have no other surrogate decision maker available. If the patient has designated an individual to have durable power of attorney for health care or has a guardian or has family members who are reasonably available, willing and able to make medical care decisions, the case should not be submitted to the substitute medical decision-making board. If the patient has provided advance directives which cover the proposed care, the case should not be submitted to the board.

641—85.2(135) Definitions. For the purpose of these rules, the following definitions shall apply:

85.2(1) *“Conflict of interest”* means a standard which precludes the participation of a panel member in the proceedings with regard to a patient whenever the panel member is a relative of the patient, is a direct care provider of the patient or has a financial interest in the patient.

85.2(2) *“Correspondent”* means a person other than a relative of the patient who has demonstrated a genuine interest in promoting the best interest of a patient by having a personal relationship with the patient, by participating in the planning of a patient’s care and treatment, by regularly visiting the patient, or by regularly communicating with the patient.

85.2(3) *“Department”* means Iowa department of public health.

85.2(4) *“Local board”* means a local substitute medical decision-making board established under Iowa Code section 135.29.

85.2(5) *“Medical care”* means care a reasonably prudent person would consider to be medically necessary. It includes, but is not limited to, procedures which involve any significant invasion of bodily integrity requiring an incision or producing substantial pain, discomfort, debilitation or which has a potential for significant bodily harm. This includes, but is not limited to, any medical, surgical or diagnostic intervention or procedure for which a general anesthetic is used. Medical care may include placement decisions where there is inadequate time to obtain appointment of a guardian and the placement is a medical consideration or a medical necessity.

The definition does not include discontinuance of medical treatment which is sustaining life functions because the board does not have authority to make this decision.

The definition also does not include the following types of care which can ordinarily be provided without special approval and do not need to be submitted to the board for consideration:

- a. Routine office-based care or routine dental care;
- b. Routine diagnosis or treatment such as extraction of bodily fluids for analysis, administration of medications or routine activities of daily living support;
- c. Any procedure which is provided under emergency circumstances.

85.2(6) *“Other surrogate decision maker”* means an attorney-in-fact, guardian, spouse, adult child, parent or an adult sibling who is reasonably available, willing and able to make a medical care decision.

85.2(7) *“Panel”* means a group of three or more members of a local board or the state board who are appointed by the chairperson of that board to hear a case when an application has been filed with the board or when an appeal has been filed with the state board.

85.2(8) *“Patient”* means the person for whom the medical care decision is proposed. They may be in a hospital, long-term care facility, home, or other setting.

85.2(9) *“Person incapable of making their own medical care decisions”* means a patient who is unable to adequately understand and appreciate the nature and consequences of a proposed medical care decision, including the benefits and risks of the proposed medical care and of alternatives to such care, and cannot thereby reach an informed decision to consent or refuse such care in a knowing and voluntary manner that promotes the patient’s well-being and autonomy. This incapability may be temporary or permanent.

85.2(10) *“Physician”* means any individual licensed under Iowa Code chapter 148, 150, or 150A.

85.2(11) “*State board*” means the state substitute medical decision-making board established under Iowa Code section 135.28.

641—85.3(135) Appointment of local boards.

85.3(1) The county board of supervisors may establish and fund a local substitute medical decision-making board. The board shall include one or more representatives from each of the following three categories:

- a. Physicians, nurses, or psychologists licensed by the state of Iowa.
- b. Attorneys admitted to the practice of law in Iowa or social workers.
- c. Other individuals with recognized expertise or interest in persons unable to make their own medical care decisions not included in “a” and “b” above.

The county board of supervisors may appoint and fund a hospital ethics committee to serve as the local decision-making board provided that the composition of the committee fulfills the above requirements.

85.3(2) County boards of supervisors may join together to form a multicounty local substitute medical decision-making board pursuant to Iowa Code chapter 28E. If a multicounty board is established, the agreement shall specify the procedure for appointment of board members and the procedure for allocation of expenses.

85.3(3) Board members shall be appointed to terms of three years with staggered terms.

85.3(4) The board shall elect a chairperson at the first meeting of each fiscal year.

85.3(5) The county board of supervisors shall notify the state board when a local board is appointed and shall submit a list of the members appointed.

641—85.4(135) Filing an application.

85.4(1) Any person having knowledge and concern may file the application on behalf of any patient residing within the geographic area served by the local board, when the person filing the application believes the patient is incapable of decision making, is in need of medical care, and has no other surrogate decision maker available.

85.4(2) The local board of the county of residence of the patient shall have jurisdiction except the local board may, by mutual consent, transfer jurisdiction to the local board in the county where the treatment is being considered.

85.4(3) The application shall be made in writing and shall include the following:

- a. The relationship of the person filing the application to the patient.
- b. A statement that the patient does not have an attorney-in-fact, guardian, spouse, adult child, parent or an adult sibling who is reasonably available, willing and able to make the medical care decision. The application shall provide the factual basis for such a statement, including the efforts made to contact such persons.

- c. The reasons for believing that the person lacks the capability to consent to or refuse medical care and the factual basis supported by an appropriate statement for this belief.

- d. The patient’s opinion regarding the proposed care, if known, and the source(s) of the information regarding this opinion.

- e. If the patient’s opinion regarding the proposed care is not known, the person filing the application shall include a stated opinion on whether the best interests of the patient would be promoted by such care and the basis for the opinion.

- f. Any other information that may be necessary to determine the need for such care, including a copy of a second medical or dental opinion which would be required by a prudent physician or dentist based on the nature of the proposed medical care.

- g. A statement, completed, signed and dated by a physician or dentist including:

- (1) A description of the proposed medical care and the patient’s medical or dental condition which requires such treatment indicating the date of diagnosis;

- (2) The risks and benefits to the patient of the proposed care and any alternative treatments including consideration and consequences of nontreatment; and

(3) A statement whether the patient has any medical or dental condition which would prevent the patient's travel to or presence at the panel meeting and including a description of such condition.

h. The application shall be signed and dated by the person filing it stating that the information on the application is true to the best of that person's knowledge, except for any portion signed and dated by another person who shall make a similar statement as to that portion.

641—85.5(135) Notification of patient and review of application.

85.5(1) When an application is received, the patient shall be notified that an application has been submitted, a hearing will be scheduled, and the patient will be notified of the time and place of the hearing. The notification shall inform the patient of the right to be present, to testify orally or in writing, and to designate someone to represent the patient at the hearing. The hearing shall be held no less than 48 hours after the patient receives this notification.

85.5(2) The board chairperson or designee shall preliminarily review the application to ascertain whether additional information may be necessary to assist the board in determining the patient's need for surrogate decision making and in determining whether the patient's best interests will be served by consenting to or refusing medical care on the patient's behalf. The board chairperson or designee may:

a. Request and shall, notwithstanding any other law to the contrary, be entitled to receive from any physician, hospital or health care facility or person licensed to render health care, any information which is relevant to the patient's need for surrogate decision making or for the proposed medical care. Such information may include, among other things: information regarding the patient's preferences regarding medical care; facts regarding the patient's attorney-in-fact, guardian, spouse, adult child, parent, or an adult sibling; facts and professional opinions regarding the patient's inability to consent to or refuse medical care; and facts and professional opinions regarding whether the proposed medical care is in the patient's best interests; the board chairperson or designee shall maintain the confidentiality of records as required by Iowa Code chapters 22, 141, and 228, and 42 Code of Federal Regulations Part 2, as of January 1, 1992, or any other applicable confidentiality law provision;

b. Consult with any other person who might assist in such a determination of the best interests of the patient, including ascertainment of the personal beliefs and values of the patient.

641—85.6(135) Panel appointment and procedures.

85.6(1) When an application is filed, the chairperson shall appoint a panel to handle the case and designate a panel chairperson. The panel shall consist of at least three members with at least one from each category listed in rule 85.3(135). A person shall not participate on a panel for a case when that person has a conflict of interest. The panel may include the entire local board.

85.6(2) Upon appointment of the panel, the board chairperson or designee shall provide a copy of the application to each panel member accompanied by a notice of the time, place and date of the panel hearing on the application. The notice of the hearing shall also be provided to the patient, the person who filed the application, and any other interested party, if known. The notice shall inform the recipients of the procedures of the panel, including the opportunity for the recipient to be present and to be heard. The notice shall be given no less than 24 hours prior to the scheduled time for the hearing.

85.6(3) The general procedures of the hearing are as follows:

a. The panel shall be empowered to administer oaths and take testimony from any person who might assist the panel in making its decision. It shall also be empowered to conduct its proceeding via telephone conference calls in appropriate cases, unless someone objects and requests a face-to-face hearing.

b. A record of the deliberations and proceedings of the panel shall be made and retained for ten years. Such record shall include any information, record, assessment or consultation submitted to or considered by the panel.

c. The panel and each member of the local board shall maintain the confidentiality of records as required by Iowa Code chapters 22, 141, and 228 and 42 Code of Federal Regulations Part 2 or any other applicable confidentiality law provision.

d. The patient shall have the right to be present at the hearing and the right to express feelings to the panel orally or in writing and the right to designate someone to represent the patient before the panel.

e. If at any time during the pendency or prior to initiation of treatment, an attorney-in-fact, guardian, spouse, adult child, parent or an adult sibling is reasonably available, willing and able to consent to or refuse such care on the patient's behalf, objects to the panel acting upon the application, the proceedings regarding such patient shall cease. A record of any such person's objection shall be included as part of the record as provided for by this section.

f. The panel shall issue its written decision within 24 hours after the conclusion of the hearing. The decision shall state when the decision shall become effective and shall include a statement describing the right of appeal. The written decision shall be issued to the necessary persons, including the patient.

g. If the decision is hand-delivered, it shall not be effective sooner than 24 hours after the written decision is delivered to the patient or the person designated by the patient in 85.6(3) "e." If the decision is sent by certified mail, return receipt requested, it shall not be effective sooner than 48 hours after it is mailed. The date, time, and method of delivery of the decision to the patient shall be noted in the record.

h. A panel determination that a patient is in need of surrogate decision making for the proposed medical care shall not be valid for any future medical care and shall not be construed or deemed valid for any other purpose or for any other future medical care unless the determination explicitly applies to related or continuing treatment necessitated by the original treatment. No panel determination shall be valid after 60 days from its effective date unless the determination explicitly states otherwise.

i. All information, records, assessments or consultations submitted to or considered by the panel or board and the panel and board deliberations are confidential as required by Iowa Code chapters 22, 141, and 228 and 42 Code of Federal Regulations Part 2 or any other applicable confidentiality law provision.

641—85.7(135) Panel determination of need for surrogate decision making. The panel's determination of the patient's need for surrogate decision making shall be made in accordance with the following provisions:

85.7(1) The panel shall decide based upon a preponderance of evidence whether the patient is in need of surrogate decision making by determining that the patient: lacks the ability to consent to or refuse the proposed medical care and does not have an attorney-in-fact, guardian, spouse, adult child, parent, or an adult sibling who is reasonably available, willing and able to make such a decision.

The method of determining patient's capability to consent to or refuse care shall include examination of patient by a licensed physician with a written report to the local board.

When practical, the panel members shall personally interview and observe the patient as a part of the hearing. If a personal appearance by the patient before the panel is not practical, then either the panel chairperson shall designate a member of the panel to interview and observe the patient prior to the hearing or the panel shall require one of the following:

1. Written report of examination by psychiatrist.
2. Written report of examination by psychologist.
3. Written report of examination by physician not involved in case.
4. Written report from a department of human services investigator involved with patient.
5. Written report from long-term care case management project.

85.7(2) In making the determination of whether the patient lacks the capacity to consent to or refuse the proposed medical care, the panel or board shall consider whether the patient is unable to adequately understand and appreciate the nature and consequences of the proposed medical care.

85.7(3) A majority of the panel members must vote in the affirmative that the patient is in need of surrogate decision making or the patient will be deemed not to need surrogate decision making.

85.7(4) A panel determination that a patient is in need of surrogate decision making shall not be construed or deemed to be a legal determination that such person is incompetent.

85.7(5) In the event the panel or board has determined the patient to be capable of decision making, then the patient's consent to or refusal of such treatment, if given, shall constitute valid consent or refusal. No other consent shall be required by a provider of health services.

641—85.8(135) Panel determination regarding proposed medical care decision. If a patient has been determined by the panel to be in need of surrogate decision making, the panel's determination regarding the proposed medical care shall be made in accordance with the following provisions:

85.8(1) The past or present expression of wishes by the patient will be presumed valid unless clearly overcome by other evidence. The patient's autonomy should always be respected.

85.8(2) If there is no clear preference by the patient, the panel shall make the determination whether the proposed medical care is in the best interests of the patient based upon a preponderance of the evidence by considering the following standards:

a. The burdens of the treatment to the patient in terms of pain and suffering outweighing the benefits or whether the proposed treatment would merely prolong the patient's suffering and not provide any net benefit;

b. The degree, expected duration, and constancy of pain with and without treatment, and the possibility that the pain could be mitigated by less intrusive forms of medical treatment including the administration of medications;

c. The likely prognosis, expectant level of functioning, degree of humiliation and dependency with or without the proposed medical care; and

d. Evaluation of treatment options, including nontreatment, and their benefits and risks compared to those of the proposed medical care.

85.8(3) A majority of the panel members must vote in the affirmative for a valid determination of consent to or refusal of medical care on behalf of the patient.

85.8(4) The panel determination consenting to or refusing medical care shall constitute valid consent to or refusal of such treatment in the same manner and to the same extent as if the patient were able to consent or refuse on the patient's own behalf.

85.8(5) The panel's consent to medical care shall state that any tissues or parts surgically removed may be disposed of or preserved by the provider of health services in accordance with customary practice.

641—85.9(135) Right of appeal.

85.9(1) The patient, the person who filed the application, or a correspondent may appeal the local board's decision to the state board. The appeal must be made before the date and time that the consent becomes effective. The person appealing shall notify the local board or the department of the appeal. The notice of the appeal shall be in writing or by telephone followed by a written appeal to the department. If the appeal is initially made by telephone, the written appeal to the department shall be postmarked within 48 hours of the telephone notice. The written appeal shall state the reason for the appeal. If the initial appeal is made to the local board, the local board representative shall immediately notify the department and the health care provider. If the initial appeal is made to the department, the department representative shall immediately notify the local board and the health care provider.

85.9(2) Upon receipt of the notice of appeal the local board shall immediately provide a copy of the record of the case to the state board. The state board chairperson shall appoint a panel to review the case. The panel shall consist of at least three members with the same composition requirements as the local panels as specified in rule 85.6(135). The panel shall review the record to determine whether the determination by the local panel is supported by substantial evidence. The state panel shall also review new information which is submitted regarding the case. The state panel's decision shall be based on a review of the record and a review of any new information and shall be made in accordance with the provisions for local panel determination in rules 85.7(135) and 85.8(135). The state panel's decision shall be promptly sent by certified mail, return receipt requested, or otherwise provided by any other means that will provide more timely or reliable written notice to: the patient, the person filing the appeal, the person who filed the application and the chairperson of the local board. If any of these persons are dissatisfied with the state panel's decision, an appeal may be taken in the manner provided by Iowa Code chapter 17A.

641—85.10(135) Procedure when there is no local board. If an application is filed on behalf of a patient residing in a county which does not have a local board, the application shall be submitted to the

department. When an application is filed with the department, the chairperson of the state substitute medical decision-making board shall appoint a panel to handle the case. The panel shall consist of at least three members with the same composition requirements as the local panels. The state panel shall follow the same procedures as the local board or panel. If a decision is made by a panel of the state board, it may be appealed as provided in rule 85.9(135). The appeal shall be heard by a second panel appointed by the chairperson of the state board.

641—85.11(135) Records and reports. Each fiscal year, prior to October 1, the local board shall submit an annual report to the state board on forms provided by the state board. The report shall include summary information regarding the number, nature and disposition of applications filed with the local board in the preceding year. It shall also include a list of the local board members and officers for the new year and such other information as the state board may deem necessary. Members of the state board or authorized representatives of the department shall have access to all records of the local boards. All record information which is excluded from public access and inspection pursuant to Iowa Code chapter 22, 141 or 228 and 42 Code of Federal Regulations Part 2, or any other confidentiality law provision shall be respected by the state board members and department representatives.

641—85.12(135) Liability. The local substitute medical decision-making board and its members shall not be held liable, jointly or separately, for any actions or omissions taken or made in the official discharge of their duties, except those acts or omissions constituting willful or wanton misconduct.

These rules are intended to implement Iowa Code sections 135.28 and 135.29.

CHAPTER 86
PLACES WHERE DEAD HUMAN BODIES ARE PREPARED
FOR BURIAL OR ENTOMBMENT
[Prior to 7/29/87, Health Department[470] Ch 86]

641—86.1(156) Purpose. The purpose of this chapter is to establish standards for the operation and inspection of places where dead human bodies are prepared for burial, cremation or entombment.

641—86.2(156) Definitions.

“Board” means the board of mortuary science examiners.

“Cremated remains” means the body of a deceased person, including any form of body prosthesis that has been permanently attached to or implanted in the body.

“Cremation” means the technical process, using heat and flame, that reduces human remains to bone fragments. The reduction takes place through heat and evaporation. Cremation shall include the processing, and may include the pulverization, of the bone fragments.

“Cremation chamber” means the enclosed space within which the cremation takes place.

“Cremation establishment” means a place of business which provides any aspect of cremation of human remains.

“Cremation room” means the room in which the cremation chamber is located.

“Department” means the Iowa department of public health.

“Funeral establishment” means a place of business, as defined by the board of mortuary science examiners, devoted to providing any aspect of mortuary science.

“Human remains” means a deceased human being for which a death certificate or fetal death certificate is required.

“Listed” means equipment or materials included in a list published by an agency that maintains periodic inspection on current production of listed equipment or materials and whose listing states either that the equipment or material complies with approved standards or has been tested and found suitable for use in a specified manner.

“Preparation room” means a room in a funeral establishment where human remains are prepared, sanitized, embalmed or held for ceremonies and final disposition.

641—86.3(156) Licensing. No person, business or corporation shall operate a funeral establishment, preparation room or cremation chamber without first licensing the establishment with the board.

641—86.4(156) Public access areas. Public access areas of funeral homes and crematorium establishments shall have a public rest room with hot and cold running water.

641—86.5(156) Preparation room. The preparation room shall meet the following standards:

86.5(1) The preparation room shall be of such size and dimensions to accommodate and shall contain an embalming table, an appropriate sink, or other liquid waste receptacle with sewer and water connections, suitable cabinet or shelves, and hand-washing facilities to include hot water, soap and towels.

86.5(2) The preparation room shall be private. It shall not be used as a passageway from room to room. No toilet or commode shall be located within the preparation room. Only equipment necessary for use in preparation of bodies for burial, shipment or cremation shall be permitted in the preparation room.

86.5(3) There shall be a toilet and hand-washing facility accessible elsewhere in the building.

86.5(4) Ventilation shall be provided by an exhaust fan vented to the outside of the building.

86.5(5) Doors and windows of the preparation room shall be so installed and constructed as to obstruct view from outside and to prevent fumes and odors from entering any other part of the building.

86.5(6) There shall be adequate lighting. Light fixtures shall be easy to clean and kept clean.

86.5(7) The preparation room shall be provided with an adequate water supply with hot and cold running water.

86.5(8) The building drainage system must be discharged into the municipal sewage system where such a system is available. Where a municipal sewage system is not available, the building drainage system must be discharged into a private system of waste disposal acceptable to the Iowa department of natural resources and the Iowa department of public health.

86.5(9) Backflow prevention.

a. Funeral homes not meeting the requirements of 86.5(9) “c” shall have water-supplied aspirators equipped with a listed atmospheric vacuum breaker mounted at least six inches above the aspirator. The discharge of the aspirator shall be through an air gap.

b. Funeral homes not meeting the requirements of 86.5(9) “c” shall have hose bibbs protected by a listed nonremovable hose bibb type backflow preventer. Potable water outlets with a tube connection fitting shall be protected by a listed atmospheric vacuum breaker mounted at least six inches above the highest point of water usage.

c. In new construction, the water supply to the preparation room and to fixtures in the preparation room shall be protected against backflow in accordance with the Iowa state plumbing code (641—Chapter 25) or in accordance with the ordinance of the political subdivision in which the facility is located, provided that the requirements of the ordinance are equal to or greater than the requirements of the Iowa state plumbing code.

86.5(10) The embalming table shall have a top composed of stainless steel, porcelain or other rustproof material, and the edges shall be raised at least three-fourths inch around the entire table. There shall be a drain opening in the table.

86.5(11) Each preparation room shall have a covered, watertight receptacle for solid refuse.

86.5(12) All preparation rooms shall be maintained in a clean and sanitary condition. All embalming tables, sinks, receptacles, instruments and other appliances used in embalming dead human bodies shall be thoroughly cleaned with hot water and disinfectant. There shall be available a suitable means to sterilize instruments.

641—86.6(156) Crematorium chambers.

86.6(1) Cremation chambers shall be installed according to the manufacturer’s recommendations.

86.6(2) Cremation chambers shall be vented to the outside of the building.

86.6(3) There shall be a means to bring in a fresh air supply to aid in combustion.

86.6(4) The room where the cremation chamber is located shall have adequate exhaust to prevent heat buildup.

86.6(5) The cremation chamber shall be cleaned after each use, with cremated remains and pulverized materials being placed in containers as defined in 645—100.1(156).

641—86.7(156) Inspection fees. Inspection fees shall be billed to the owner of a funeral home or crematorium upon the completion of an inspection. Inspection fees are due upon receipt of a notice of payment due. When the funeral home or crematorium is located within the contracted area of a board of health that has a 28E agreement for inspections with the department, inspection fees billed shall be paid to the contracted board of health or its designee.

86.7(1) The fee for the inspection of a funeral home or crematorium shall be \$15 for each facility.

86.7(2) Penalty. Inspection fees not received by the department or contracted board of health within 45 days of the date of billing will be assessed a \$25 penalty for each month or fraction thereof that the payment is delinquent.

These rules are intended to implement Iowa Code chapter 156.

CHAPTER 87
HEALTHY FAMILIES IOWA (HFI)

641—87.1(135) Purpose. These rules are intended to establish standards for the healthy families Iowa (HFI) program, a family support program that provides services to families and children during the prenatal to preschool years through home visitation. This program shall be identified as healthy opportunities for parents to experience success—healthy families Iowa (HOPES-HFI). The HOPES-HFI program is intended to promote optimal child health and development; improve family coping skills and functioning; promote positive parenting skills and intrafamilial interaction; and prevent child abuse and neglect and infant mortality and morbidity. These rules outline the process by which the department assists the Iowa empowerment board in managing contracting for HOPES-HFI funds.

641—87.2(135) Definitions. For the purpose of these rules, the following terms shall have the meaning indicated in this rule:

“Accreditation” means national recognition of compliance with Healthy Families America standards through a peer review process.

“Applicant” means a governmental or nonprofit agency that received grant funds in the previous fiscal year, is fully accredited by Healthy Families America, and applies to the department during a competitive year. In any year in which expansion funds are available for the HOPES-HFI program, the department shall award new grants, subject to annual renewal, to selected applicants in a competitive process.

“Competitive grant” means the competitive grant application process to determine the grant awards for a project period.

“Contractor” means a governmental or nonprofit agency that holds a contract with the department to provide HOPES-HFI services.

“Department” means the Iowa department of public health.

“Family support” means community-based services to promote the well-being of children and families.

1. Family support programs have the following characteristics:

- Family-driven, meaning there is a true partnership with families.
 - Comprehensive, flexible, and individualized for each family based on the family’s culture, needs, values and preferences.
 - Build on strengths to increase the stability of family members and the family unit.
 - Utilize informal and formal support networks.
2. Family support programs produce the following results:
- Increased parent confidence and competence in parenting abilities.
 - Safe, stable, and supportive families who are connected to their communities.
 - Enhanced health, growth, and development of children and adults in the family unit.

“Healthy Families America” or *“HFA”* means a research-based national program model designed to help overburdened families. HFA is a family support program that provides services to families and children during the prenatal to preschool years through home visitation.

“Healthy families Iowa” or *“HFI”* means the state family support program that provides services to families and children during the prenatal to preschool years through home visitation.

“Home visitation” means a face-to-face interaction that occurs between the participant(s) and home visitor. The goals of the home visit are to promote positive parent-child interaction and healthy childhood growth and development and to enhance family functioning. Typically, home visits occur in the home, lasting a minimum of an hour, and the child is present.

“HOPES-HFI” means the healthy opportunities for parents to experience success—healthy families Iowa program. The HOPES-HFI program is intended to promote optimal child health and development; improve family coping skills and functioning; promote positive parenting skills and intrafamilial interaction; and prevent child abuse and neglect and infant mortality and morbidity.

“*Nonprofit*” means an entity that meets the requirement for tax-exempt status under Internal Revenue Code Section 501(c)(3) or 501(c)(4).

“*Participant*” means a family voluntarily enrolled in and receiving services from the program.

“*Project period*” means the period of time the department intends to support the project without requiring competition for funds.

641—87.3(135) Applicant eligibility. Governmental or nonprofit agencies that received grant funds in the previous fiscal year, are fully accredited by HFA, and apply to the department during a competitive year are eligible applicants for funding. The purpose of the applications is to administer HOPES-HFI services for a specified project period, as defined in the request for proposals, with an annual continuation application.

641—87.4(135) Participant eligibility. Families must meet the following requirements to be eligible to participate in the HOPES-HFI program: (1) A family member is pregnant or the family has a child aged birth to five years; and (2) The family is determined to be eligible for enrollment according to a universal risk assessment as defined by HFA standards.

641—87.5(135) Program requirements. Contractors shall meet the following minimum program requirements:

87.5(1) Accreditation. Contractors shall comply with Healthy Families America (HFA) standards and maintain HFA or Council on Accreditation (COA) accreditation status. HOPES-HFI contractors will be required to submit evidence of reaccreditation reports to the department within 30 days of receipt.

87.5(2) Participant identification. Contractors shall collaborate with health care, human services, education, and other partners serving pregnant women and women of childbearing age to identify families who are at risk in order to promote positive birth and parenting outcomes.

87.5(3) Standardized tools. Contractors shall utilize standardized tools approved by the department to assess and reassess a participant’s risk status and achievements and the appropriate level of service.

87.5(4) Quality assessment and improvement. Contractors shall develop a process for annual program evaluation. The process shall include the following:

a. The outcome of the program evaluation shall be reviewed by the program’s governing or advisory board with recommendations made for program improvement.

b. The evaluation shall demonstrate the effectiveness of the program through program outcomes, including acceptance and retention rates.

641—87.6(135) Contractor assurance. In order to receive funding, the contractor shall provide to the department assurance that all applicable federal, state, and local requirements are met. The contractor shall ensure compliance with Title IV of the Civil Rights Act, the Americans with Disabilities Act of 1990 (ADA), Section 504 of the 1973 Rehabilitation Act, and all affirmative action requirements. In addition, the contractor shall ensure the following:

87.6(1) Program policies and procedures. Policies and procedures shall be in accordance with HFA standards.

87.6(2) Personnel policies and procedures. The personnel policies and procedures shall, at a minimum, include:

a. Conditions of employment, including recruitment, selection, termination, promotion, and compensation.

b. A leave of absence policy.

c. A grievance procedure.

d. Annual employee performance evaluations.

e. A nondiscrimination policy.

f. Fringe benefits.

g. Employment application forms that comply with civil rights regulations.

h. Current job descriptions that delineate qualifications, responsibilities, and essential functions, that reflect current responsibilities, and that are dated.

i. A current salary schedule.

87.6(3) Fiscal management. Fiscal management shall, at a minimum, include the following:

a. An annual budget.

b. Fiscal policies and procedures that follow generally accepted accounting practices.

c. Utilization of other funds such as private and third-party funds when available.

641—87.7(135) Applicant appeal process.

87.7(1) Right of appeal. The right to appeal shall be granted when an applicant's application to participate is denied. The right to appeal shall also be granted when, during the course of the contract or agreement period, a contractor is disqualified or any other action that affects participation is taken. For participating contractors, a minimum of 60 days' advance notice shall be given before the effective date of the action.

87.7(2) Request for hearing. An appeal is brought by filing a written request for a hearing with the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within ten days of receipt of notification of the adverse action. The written request for hearing shall state the adverse action being appealed.

87.7(3) Contested cases. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information that may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

87.7(4) Notice of hearing. The administrative law judge (ALJ) shall schedule the time, place and date of the hearing as expeditiously as possible. Hearings shall be conducted by telephone or in person in Des Moines at the Lucas State Office Building or another suitable location. If necessary, parties will be provided at least two opportunities to have the hearing rescheduled.

87.7(5) Conduct of hearing. The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

87.7(6) Decision. A written decision of the ALJ shall be issued, when possible, within 60 days from the date of the request for a hearing unless the parties agree to a longer period of time. The decision of the ALJ shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action, without further proceedings, ten days after it is received by the aggrieved party unless an appeal to the director is filed as provided in subrule 87.7(7).

87.7(7) Appeal to director. Any appeal to the director for review of the proposed decision of the ALJ shall be filed in writing and mailed to the Director, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the ALJ's proposed decision by the aggrieved party. A copy of the appeal shall also be mailed to the ALJ. Any request for an appeal shall state the reason for appeal.

87.7(8) Record of hearing. Upon receipt of an appeal request, the ALJ shall prepare the record of the hearing for submission to the director of the department. The record shall include the following:

a. All pleadings, motions, and rules.

b. All evidence received or considered and all other submissions by recording or transcript.

c. A statement of all matters officially noticed.

d. All questions and offers of proof, objections and rulings thereon.

e. All proposed findings and exceptions.

f. The proposed decision and order of the hearing officer.

87.7(9) *Decision of director.* The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

87.7(10) *Exhausting administrative remedies.* It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review pursuant to Iowa Code chapter 17A.

87.7(11) *Petition for judicial review.* Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—87.8(135) Participant right to appeal.

87.8(1) *Denial, reduction or termination of services.*

a. When a contractor denies, reduces or terminates services funded by the HOPES-HFI grant against the wishes of a participant, the contractor shall notify the participant of the following:

- (1) The action taken;
- (2) The reason for the action; and
- (3) The participant's right to appeal.

b. If a participant files an appeal, the contractor shall provide services to the participant throughout the appeals process, unless the contractor receives a waiver from the department pending the outcome of the appeal.

87.8(2) *Local appeals process.*

a. All contractors shall have a written local procedure to hear appeals. The local procedure shall, at a minimum, include:

- (1) The method of notification of the right to appeal;
- (2) The procedure for conducting the appeal;
- (3) Time limits for each step; and
- (4) The method of notification of the outcome of the local appeal and notification of the participant's right to appeal to the state. Notifications of the outcome of the local appeal shall include the facts used to reach the decision and the conclusions drawn from the facts to support the contractor's decision.

b. The written appeals procedure and the record of appeals filed (including the record and disposition of each) shall be available for inspection by authorized representatives of the Iowa department of public health.

87.8(3) *Appeal to department.*

a. Procedure for appeal. If a participant is dissatisfied with the decision of the local appeal, the participant may appeal to the state. The appeal shall be made in writing by certified mail, return receipt requested, to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, within 15 days of receipt of the local contractor's appeal decision.

b. Department review. The department shall evaluate the appeal based upon the merits of the local appeal documentation. A department decision affirming, reserving, or modifying the local appeal decision shall be issued within 30 days of the receipt of all local appeal documentation. The department decision shall be in writing and shall be sent by certified mail, return receipt requested, to the participant and the contractor.

87.8(4) *Further appeal.* The participant may appeal the department's decision by submitting an appeal, within 10 days of receipt of the department's decision, to the Division Director, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. Upon receipt of an appeal that meets contested case status, the department shall forward the appeal within 5 working days to the department of inspections and appeals pursuant to the rules adopted by the department of inspections and appeals regarding the

transmission of contested cases. The continued process for appeals shall be governed by 641—Chapter 173, Iowa Administrative Code.

These rules are intended to implement Iowa Code section 135.106.

CHAPTER 88
VOLUNTEER HEALTH CARE PROVIDER PROGRAM

641—88.1(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“Charitable organization” means a charitable organization within the meaning of Section 501(c)(3) of the Internal Revenue Code which has as its primary purpose the sponsorship or support of programs designed to improve the quality, awareness, and availability of chiropractic, dental, medical, pharmaceutical, nursing, optometric, psychological, social work, behavioral science, podiatric, physical therapy, occupational therapy, respiratory therapy, or emergency medical care services to children and to serve as a funding mechanism for provision of chiropractic, dental, medical, pharmaceutical, nursing, optometric, psychological, social work, behavioral science, podiatric, physical therapy, occupational therapy, respiratory therapy, or emergency medical care services, including but not limited to immunizations, to children in this state.

“Defend” means that the office of the attorney general shall provide the volunteer health care provider with legal representation at no cost to the volunteer health care provider.

“Department” means the Iowa department of public health.

“Eligibility agreement” means a signed contract, providing for defense and indemnification, between a volunteer health care provider or free clinic and the volunteer health care provider program (VHCPP).

“Free clinic” means a facility, other than a hospital or health care provider’s office, which is exempt from taxation under Section 501(c)(3) of the Internal Revenue Code and which has as its sole purpose the provision of health care services without charge to individuals who are otherwise unable to pay for the services.

“Health care facility” means a residential care facility, a nursing facility, an intermediate care facility for persons with mental illness, or an intermediate care facility for persons with mental retardation.

“Health care services” means services received from a volunteer health care provider at a qualified program as provided in Iowa Code Supplement section 135.24 and these rules, and approved in a VHCPP eligibility or sponsor agreement.

“Indemnify” means that the state of Iowa shall pay all sums that the volunteer health care provider or free clinic holding an eligibility agreement with the VHCPP is legally obligated to pay as damages because of any claim made against the volunteer health care provider or free clinic which arises out of the provision of free health care services rendered or which should have been rendered by the volunteer health care provider or free clinic.

“Sponsor agreement” means a signed contract, providing for VHCPP participation by individual health care providers of free health care services, between a hospital, clinic, free clinic, health care facility, health care referral program, or charitable organization and the VHCPP.

“Volunteer health care provider” means an emergency medical care provider certified pursuant to Iowa Code chapter 147A; a physician licensed pursuant to Iowa Code chapter 148, 150 or 150A; a physical therapist licensed pursuant to Iowa Code chapter 148A; an occupational therapist licensed pursuant to Iowa Code chapter 148B; a physician assistant licensed pursuant to Iowa Code chapter 148C and practicing under the supervision of a physician; a podiatrist licensed pursuant to Iowa Code chapter 149; a chiropractor licensed pursuant to Iowa Code chapter 151; a respiratory therapist licensed pursuant to Iowa Code chapter 152B; an advanced registered nurse practitioner, a licensed practical nurse or a registered nurse licensed pursuant to Iowa Code chapter 152 or 152E; a dentist, dental assistant, or dental hygienist licensed or registered pursuant to Iowa Code chapter 153; an optometrist licensed pursuant to Iowa Code chapter 154; a psychologist licensed pursuant to Iowa Code chapter 154B; a bachelor social worker, a master social worker, or an independent social worker licensed pursuant to Iowa Code chapter 154C; a marital and family therapist or mental health counselor licensed pursuant to Iowa Code chapter 154D; or a pharmacist licensed pursuant to Iowa Code chapter 155A, who has executed an eligibility agreement with the VHCPP.

“Volunteer health care provider program” or *“VHCPP”* means the volunteer health care provider program of the department.

641—88.2(135) Purpose. The VHCPP is established to defend and indemnify eligible volunteer health care providers and eligible free clinics providing free health care services through qualified programs as provided in Iowa Code Supplement section 135.24 and these rules.

641—88.3(135) Eligibility for defense and indemnification coverage.

88.3(1) Volunteer health care provider eligibility. To be eligible for protection as an employee of the state under Iowa Code chapter 669 for a claim arising from covered health care services, a volunteer health care provider shall satisfy each of the following conditions at the time of the act or omission allegedly resulting in injury:

a. The applicant shall hold an active unrestricted license, registration, or certification to practice in Iowa under Iowa Code chapter 147A, 148, 148A, 148B, 148C, 149, 150, 150A, 151, 152, 152B, 152E, 153, 154, 154B, 154C, 154D, or 155A. The applicant shall provide a sworn statement attesting that the license, registration, or certification to practice is free of restrictions. The statement shall describe any disciplinary action that has ever been taken against the health care provider by any professional licensing, registering, or certifying authority or health care facility, including any voluntary surrender of license, registration, or certification or other agreement involving the health care provider's license, registration, or certification to practice or any restrictions on practice, suspension of privileges, or other sanctions. The statement shall also describe any malpractice suits that have been filed against the health care provider. The statement provided by a pharmacist volunteer health care provider shall also describe any disciplinary action that has ever been taken against any pharmacy in which the pharmacist has ever been owner, partner, or officer.

(1) Every physician and dentist shall authorize the release of information allowing certified statements to be sent to the board of medical examiners or board of dental examiners from the National Practitioner Data Bank, the Federation of State Medical Boards Disciplinary Data Bank, or State Dental Boards Disciplinary Data Bank, as appropriate, setting forth any malpractice judgment or award or disciplinary action involving the physician or dentist.

(2) Every physical therapist, occupational therapist, physician assistant, podiatrist, chiropractor, respiratory therapist, licensed practical nurse, registered nurse, advanced registered nurse practitioner, optometrist, psychologist, bachelor social worker, master social worker, independent social worker, marriage and family therapist, and mental health counselor shall request certified statements directly from the National Practitioner Data Bank—Health Care Integrity and Protection Data Bank setting forth any malpractice judgment or award or disciplinary action involving the requester, shall pay the cost for such certified statements and shall submit such certified statements as part of the VHCPP application. Every chiropractor shall also authorize the release of information allowing certified statements to be sent to the board of chiropractic examiners from the Chiropractic Information Network/Board Action Databank (CINBAD) setting forth any malpractice judgment or award or disciplinary action involving the chiropractor.

(3) Every pharmacist shall authorize the release of information allowing certified statements to be sent to the board of pharmacy examiners from the National Association of Boards of Pharmacy setting forth any disciplinary action involving the pharmacist or any pharmacy in which the pharmacist has ever been owner, partner, or officer, and the pharmacist shall pay the cost for such certified statements. Every pharmacist shall also authorize the release of information from the pharmacist's malpractice insurance carrier to be sent to the board of pharmacy examiners, and the pharmacist shall pay the cost for such release. Information released from the pharmacist's malpractice insurance carrier shall include either the history and details of all claims that have been filed on behalf of the pharmacist or any pharmacy in which the pharmacist has ever been owner, partner, or officer, or confirmation that there have been no claims.

(4) Every emergency medical care provider shall authorize the release of information allowing information to be sent from the bureau of emergency medical services to the Iowa department of public health volunteer health care provider program setting forth any malpractice judgment or award or disciplinary action involving the requester, and shall authorize the release of information allowing such

information to be shared with the bureau of emergency medical services by licensing entities within and outside Iowa.

b. Application. The applicant shall submit the following information on forms provided by the VHCPP:

- (1) The patients to be served;
- (2) The health care services to be provided;
- (3) The site where health care services are to be provided;
- (4) The days and maximum number of hours when the free health care services will be provided each month at each site;
- (5) A public health purpose that shall be served by the provision of free health care services to the patients in question.

c. The applicant shall submit a certified statement, which shall be submitted on forms provided by the VHCPP, attesting that the volunteer health care provider agrees to:

(1) Cooperate fully with the state in the defense of any claim or suit relating to participation in the VHCPP, including attending hearings, depositions and trials and assisting in securing and giving evidence, responding to discovery and obtaining the attendance of witnesses.

(2) Accept financial responsibility for personal expenses and costs incurred in the defense of any claim or suit related to participation in the VHCPP, including travel, meals, compensation for time and lost practice, and copying costs, and agree that the state will not compensate the volunteer health care provider for the volunteer health care provider's expenses or time needed for the defense of the claim or suit.

(3) Receive no direct monetary compensation of any kind for services provided in the VHCPP program.

(4) Comply with the eligibility agreement with the VHCPP concerning approved health care services and programs.

d. The applicant shall have a signed and current eligibility agreement with the VHCPP which identifies the covered health care services within the respective scope of practice and conditions of defense and indemnification as provided in rules 88.5(135) and 88.6(135). The eligibility agreement shall:

(1) Provide that the volunteer health care provider shall perform only those health care services identified and approved by the VHCPP;

(2) Identify the sponsor program, approved by the VHCPP through an application process, through which the health care services will be provided;

(3) Identify by category the patient groups to be served and the need for provision of free health care services;

(4) Identify the sites at which the free health care services will be provided;

(5) Identify the maximum amount of time the free health care services will be provided at the identified sites by the volunteer health care provider each month;

(6) Provide that the volunteer health care provider shall maintain proper records of the health care services; and

(7) Provide that the volunteer health care provider shall make no representations concerning eligibility for the VHCPP or eligibility of services for indemnification by the state except as authorized by the department.

88.3(2) *Free clinic eligibility.* To be eligible for protection as a state agency under Iowa Code chapter 669 for a claim arising from the provision of covered health care services at the free clinic, a free clinic shall satisfy each of the following conditions at the time of the act or omission allegedly resulting in injury:

a. The free clinic shall comply with subrules 88.4(1) through 88.4(6).

b. The free clinic shall provide a list of all health care providers who provide health care services at the clinic.

c. The free clinic shall submit proof that each health care professional providing health care services at the free clinic either:

- (1) Holds a current eligibility agreement with the VHCPP, or
- (2) Holds current professional liability insurance coverage and an active unrestricted license, registration, or certification to practice in Iowa under Iowa Code chapter 147A, 148, 148A, 148B, 148C, 149, 150, 150A, 151, 152, 152B, 152E, 153, 154, 154B, 154C, 154D, or 155A.
 - d. The free clinic shall submit a list of the clinic board of directors and contact information for the board of directors.
 - e. The free clinic shall submit proof of Section 501(c)(3) status.

641—88.4(135) Sponsor program eligibility. As a condition of sponsoring health care providers in the VHCPP, a hospital, clinic, free clinic, health care facility, health care referral program, or charitable organization shall satisfy each of the following conditions:

88.4(1) Licensure. The applicant program shall be licensed to the extent required by law for the facility in question.

88.4(2) If the program is a charitable organization within the meaning of Section 501(c)(3) of the Internal Revenue Code, the organization shall provide proof of Section 501(c)(3) status to the VHCPP.

88.4(3) Application. The applicant program shall submit the following information on forms provided by the VHCPP:

- a. The patients to be served;
- b. The health care services to be provided;
- c. The site where health care services are to be provided;
- d. The days and times when health care services are to be provided at each site;
- e. A public health purpose that shall be served by the provision of free health care services to the patients in question.

88.4(4) Certified statement. The applicant program shall submit a certified statement, which shall be submitted on forms provided by the VHCPP, attesting that the applicant program and its staff, employees and volunteers agree to:

- a. Cooperate fully with the state in the defense of any claim or suit relating to participation in the VHCPP, including attending hearings, depositions and trials and assisting in securing and giving evidence, responding to discovery and obtaining the attendance of witnesses;
- b. Accept financial responsibility for the applicant program's expenses and costs incurred in the defense of any claim or suit related to participation in the VHCPP, including travel, meals, compensation for time and lost practice, and copying costs, and agree that the state will not compensate the applicant program for expenses or time needed for the defense of the claim or suit;
- c. Receive no direct monetary compensation of any kind for health care services provided in the applicant program;
- d. Comply with the agreement with the VHCPP concerning approved health care services and programs.

88.4(5) General liability insurance. The applicant program shall submit proof of general liability insurance for the clinic site.

88.4(6) Agreement. A signed and current agreement shall exist with the VHCPP which shall:

- a. Provide that the applicant program shall perform only those health care services identified and approved by the VHCPP;
- b. Identify by category the patient groups to be served and the need for provision of free health care services;
- c. Identify the sites at which the free health care services will be provided;
- d. Provide that the applicant shall maintain proper records of health care services for a period of seven years from the date of service or, in the case of a minor, for a period of one year after the minor has reached the age of majority; and
- e. Provide that the applicant agrees that only the volunteer health care provider is afforded protection under Iowa Code section 135.24, and that the state assumes no obligation to the program, its employees, officers, or agents, unless the program is registered as an eligible free clinic in accordance with subrule 88.3(2).

641—88.5(135) Covered health care services. A volunteer health care provider holding a current eligibility agreement with the VHCPP shall be afforded the protection of an employee of the state under Iowa Code chapter 669, and a free clinic holding a current eligibility agreement with the VHCPP shall be afforded protection as an agency of the state under Iowa Code chapter 669, only for claims for injury alleged to have been proximately caused by a health care provider's provision of covered health care services or solely on the basis of the health care provider's participation in the free clinic.

88.5(1) Covered health care services are only those that are:

- a. Identified in the eligibility agreement with the VHCPP;
- b. In compliance with these rules;
- c. Provided by or under the direct supervision of the volunteer health care provider;
- d. Health care services of:
 - (1) Physicians and physician assistants for: well-child examinations, annual adult examinations, diagnosis and treatment of acute and chronic conditions, health education, health maintenance, immunizations, and minor surgical procedures.
 - (2) Chiropractors for: examinations, diagnosis and treatment, health education and health maintenance.
 - (3) Licensed practical nurses and registered nurses for: well-child examinations, annual adult examinations, treatment of acute and chronic conditions, health education, health maintenance, and immunizations.
 - (4) Advanced registered nurse practitioners for: well-child examinations, annual adult examinations, diagnosis and treatment of acute and chronic conditions, health education, health maintenance, immunizations and minor surgical procedures.
 - (5) Dentists for: dental examinations, diagnosis and treatment of acute and chronic conditions, health education, health maintenance and minor surgical procedures.
 - (6) Dental assistants for: intraoral services, extraoral services, infection control, radiography and removal of plaque or stain by toothbrush, floss, or rubber cup coronal polish.
 - (7) Dental hygienists for: assessments and screenings, health education, health maintenance and preventive services (cleaning, X-rays, sealants, fluoride treatments, fluoride varnish).
 - (8) Psychologists for: counseling and the use of psychological remedial measures with persons with adjustment or emotional problems.
 - (9) Bachelor social workers for: services which are within the scope of practice as defined by Iowa Code chapter 154C and the administrative rules which implement that chapter.
 - (10) Master social workers for: services which are within the scope of practice as defined by Iowa Code chapter 154C and the administrative rules which implement that chapter.
 - (11) Independent social workers for: services which are within the scope of practice as defined by Iowa Code chapter 154C and the administrative rules which implement that chapter.
 - (12) Marital and family therapists for: marital and family therapy.
 - (13) Mental health counselors for: mental health counseling.
 - (14) Pharmacists for: drug dispensing, patient counseling, health screenings and education, and immunizations.
 - (15) Physical therapists for: interpretation of performances, tests, and measurements; evaluation and treatment of human capabilities and impairments; use of physical agents, therapeutic exercises, and rehabilitative procedures to prevent, correct, minimize, or alleviate a physical impairment; establishment and modification of physical therapy program, treatment planning, and patient instruction/education.
 - (16) Occupational therapists for: evaluation and treatment of problems interfering with functional performance in persons impaired by physical illness or injury, emotional disorder, congenital or developmental disability, or the aging process.
 - (17) Optometrists for: examinations, diagnosis and treatment of the human eye and adnexa, health education, and health maintenance.
 - (18) Podiatrists for: examinations, diagnosis and treatment, health education, health maintenance, minor surgical procedures.

(19) Respiratory therapists for: diagnostic and therapeutic use of administration of medical gases, aerosols, and humidification, not including general anesthesia; pharmacologic agents relating to respiratory care procedures; bronchopulmonary hygiene; specific diagnostic and testing techniques employed in the medical management of patients to assist in diagnosis, monitoring, treatment, and research of cardiopulmonary abnormalities; and pulmonary function testing.

(20) Emergency medical care providers for: provision of emergency medical care as authorized in 641 IAC 131.3(147A).

88.5(2) Experimental procedures or procedures and treatments which lack sufficient evidence of clinical effectiveness are excluded from the program.

641—88.6(135) Defense and indemnification. The state shall defend and indemnify a volunteer health care provider or a free clinic for a claim arising from the VHCPP only to the extent provided by Iowa Code chapter 669 and Iowa Code section 135.24. Persons or entities other than the participating volunteer health care provider or free clinic are not considered state employees or state agencies under Iowa Code chapter 669. Defense and indemnification of the volunteer health care provider or a free clinic under Iowa Code chapter 669 and Iowa Code section 135.24 shall occur only if all of the following requirements are met:

88.6(1) The claim involves injury alleged to have been proximately caused by covered health care services which were identified and approved in the eligibility agreement with the VHCPP and then only to the extent the health care services were provided by or under the direct supervision of the volunteer health care provider, including claims based on negligent delegation of health care or the volunteer health care provider is named as a defendant solely because of the volunteer health care provider's participation in the free clinic.

88.6(2) The claim arises from covered health care services that were performed at a site identified and approved in the eligibility agreement with the VHCPP.

88.6(3) The claim arises from covered health care services provided through a qualified program identified and approved in the volunteer health care provider's eligibility agreement with the VHCPP and which meets the requirements of rule 88.3(135).

88.6(4) The volunteer health care provider, free clinic, or sponsor program that provided the health care services receives no direct monetary compensation of any kind or promise to pay compensation for the health care services which resulted in injury.

88.6(5) The health care services are provided to a patient who is a member of a patient group identified in the eligibility agreement with the VHCPP.

88.6(6) The volunteer health care provider, free clinic, or sponsor program is eligible and registered as provided in rule 88.3(135) or the care is provided by a health care provider who holds current professional liability insurance coverage and an active unrestricted license to practice in Iowa under Iowa Code chapter 147A, 148, 148A, 148B, 148C, 149, 150, 150A, 151, 152, 152B, 152E, 153, 154, 154B, 154C, 154D, or 155A and has been approved by the VHCPP.

641—88.7(135) Term of agreement.

88.7(1) *Volunteer health care provider.* The eligibility agreement with the VHCPP shall expire two years from the date of execution. Volunteer health care providers may apply for renewal by filing an application at least 30 days prior to expiration of the eligibility agreement.

88.7(2) *Free clinic liability.* The eligibility agreement with the VHCPP shall expire two years from the date of execution. The free clinic may apply for renewal by filing an application at least 30 days prior to expiration of the eligibility agreement.

88.7(3) *Sponsor program.* The sponsor agreement with the VHCPP shall expire two years from the date of execution. Sponsor programs may apply for renewal by filing an application at least 30 days prior to expiration of the sponsor agreement.

641—88.8(135) Reporting requirements and duties.

88.8(1) Upon obtaining knowledge or becoming aware of any injury allegedly arising out of the negligent rendering of, or the negligent failure to render, covered health care services under this program, a participating volunteer health care provider, free clinic, or sponsor program shall provide written notice to the VHCPP, as soon as practicable, containing, to the extent obtainable, the circumstance of the alleged injury, the names and addresses of the injured, and any other relevant information.

88.8(2) Upon obtaining knowledge or becoming aware of an injury as defined in subrule 88.8(1), the participating free clinic or sponsor program shall promptly take all reasonable steps to prevent further or other injury from arising out of the same or similar incidents, situations or conditions.

88.8(3) A participating volunteer health care provider, free clinic, or sponsor program shall immediately notify the Iowa Department of Justice, Special Litigation Division, Hoover State Office Building, Des Moines, Iowa 50319, of service or receipt of an original notice, petition, suit or claim seeking damages from the volunteer health care provider, free clinic or sponsor program related to participation in the VHCPP.

641—88.9(135) Revocation of eligibility and registration. The VHCPP may suspend, revoke, or condition the eligibility and registration of a volunteer health care provider, free clinic or sponsor program for cause, including but not limited to:

1. Failure to comply with the eligibility or sponsor agreement with the VHCPP.
2. Violation of state law governing the respective scope of practice or other law governing the health care services provided under the VHCPP.
3. Making false, misleading, or fraudulent statements in connection with the VHCPP, including determination of eligibility of the health care provider, free clinic or sponsor program or handling of a claim against the health care provider, free clinic, sponsor program or the state.
4. Evidence of substance abuse or intoxication affecting the provision of health care services under the VHCPP.
5. Reasonable grounds to believe that the volunteer health care provider may have provided incompetent or inadequate care to a patient under the VHCPP or is likely to do so.
6. Reasonable grounds to believe that the volunteer health care provider's, free clinic's, or sponsor program's participation in the VHCPP may expose the state to undue risk.
7. Failure to immediately notify the VHCPP of any disciplinary action brought against the volunteer health care provider by the licensing board.

641—88.10(135) Procedure for revocation of eligibility and registration. A proceeding for revocation of a volunteer health care provider's eligibility and registration or a free clinic's or sponsor program's eligibility and registration for participation shall be conducted as a contested case proceeding pursuant to Iowa Code chapter 17A and 641 IAC 173. This does not preclude emergency summary suspension of eligibility or registration where appropriate under Iowa Code section 17A.18. The VHCPP shall immediately notify the appropriate licensing board and the appropriate approved free clinic or sponsor program of revocation of a volunteer health care provider's registration.

641—88.11(135) Effect of suspension or revocation. If the VHCPP suspends or revokes a volunteer health care provider's or free clinic's eligibility, the action shall suspend or revoke future eligibility, but shall not negate defense and indemnification coverage for covered acts or omissions which occurred during the effective dates of the eligibility agreement.

641—88.12(135) Registration denied.

88.12(1) *Registration denied—appeal procedure.* An applicant who has been denied registration by the VHCPP may appeal the denial and request a hearing on the issues related to the denial by serving a notice of the appeal and request for hearing to the Director, Iowa Department of Public Health, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319-0075, in writing, not more than 30 days following the date of the mailing of the notification of registration denial to the applicant or not

more than 30 days following the date upon which the applicant was served notice if notification was made in the manner of service of an original notice. The request for hearing shall specifically delineate the facts to be contested and determined at the hearing.

88.12(2) *Registration denied—hearing.* If an applicant who has been denied registration by the VHCPP appeals the registration denial and requests a hearing pursuant to subrule 88.12(1), the hearing and subsequent procedures shall be pursuant to Iowa Code chapter 17A and 641 IAC 173.

641—88.13(135) Board notice of disciplinary action. The applicable state licensing board shall notify the VHCPP of the initiation of a contested case against a registered volunteer health care provider or the imposition of disciplinary action, including providing copies of any contested case decision or settlement agreement with the volunteer health care provider upon request of the VHCPP.

641—88.14(135) Effect of eligibility certification. The certification of a volunteer health care provider or free clinic as eligible for participation in the VHCPP by the applicable state licensing board and the department is solely a determination that the state will defend and indemnify the volunteer health care provider or the eligible free clinic to the extent provided by Iowa Code Supplement section 135.24 and these rules. The certification is not an approval or indication of ability or competence and may not be represented as such. The hospital, clinic, free clinic, health care facility, health care referral program, or charitable organization through which the volunteer health care provider provides free health care services shall retain responsibility for determining that health care personnel are competent and capable of adequately performing the health care services to be provided.

641—88.15(135) Reporting by volunteer health care provider and program. Within 60 days following each calendar quarter, the free clinic or program shall provide a report to the VHCPP. A reporting form will be provided by the VHCPP to the participating free clinic or sponsor program at the time the eligibility or sponsor agreement is approved by the VHCPP. At a minimum, the report shall include the number of free clinic patients receiving free health care services and patient demographics by age, ethnicity, and insurance status.

These rules are intended to implement Iowa Code Supplement section 135.24.

CHAPTER 89
DECISION-MAKING ASSISTANCE PROGRAM
AND PARENTAL NOTIFICATION OF INTENT
TO TERMINATE A PREGNANCY THROUGH ABORTION

641—89.1(135L) Title. This chapter may be cited as “Decision-Making Assistance Program and Parental Notification of Intent to Terminate a Pregnancy Through Abortion.”

641—89.2(135L) Purpose and scope. The rules contained in this chapter govern the procedures and documentation necessary for notification of a parent or grandparent of a pregnant minor prior to the termination of the pregnancy through abortion. These rules also describe the certification procedure for the decision-making assistance program.

641—89.3(135L) Definitions. The following definitions shall apply throughout the chapter.

“*Abortion*” means an abortion as defined in Iowa Code chapter 146.

“*Adult*” means a person 18 years of age or older.

“*Certification form*” means the form included in the written decision-making materials developed by the department.

“*Court*” means juvenile court.

“*Department*” means the Iowa department of public health.

“*Grandparent*” means the parent of an individual who is the parent of the pregnant minor.

“*Licensed physician*” means a physician as licensed by the Iowa board of medical examiners, Iowa Code chapters 148, 150, and 150A.

“*Medical emergency*” means a condition which, based upon a physician’s judgment, necessitates an abortion to avert the pregnant minor’s death, or for which a delay will create a risk of serious impairment of a major bodily function.

“*Minor*” means a person under 18 years of age who has not been and is not married.

“*Parent*” means a parent or a legal guardian or custodian of a pregnant minor.

“*Video*” means the video developed by the Iowa department of public health which provides information regarding the various options available to a pregnant minor with regard to the pregnancy, including a decision to continue the pregnancy to term and retain parental rights following the child’s birth, a decision to continue the pregnancy to term and place the child for adoption following the child’s birth, and a decision to terminate the pregnancy through abortion.

“*Written decision-making materials*” means the materials developed by the Iowa department of public health which provide information regarding the various options available to a pregnant minor with regard to the pregnancy as outlined in the definition of video.

641—89.4 to 89.10 Reserved.

DECISION-MAKING ASSISTANCE PROGRAM

641—89.11(135L) Purpose. The program is intended to provide assistance to minors in making informed decisions relating to pregnancy through the use of the video and written decision-making materials developed by the department.

89.11(1) The video and written decision-making materials contain information regarding the following options available to a pregnant minor with regard to the pregnancy:

- a. Continue the pregnancy to term and retain parental rights following the child’s birth;
- b. Continue the pregnancy to term and place the child for adoption following the child’s birth; and
- c. Terminate the pregnancy through abortion.

89.11(2) Reserved.

641—89.12(135L) Initial appointment of a pregnant minor with a licensed physician from whom an abortion is sought and certification procedure for the decision-making assistance program.

89.12(1) A licensed physician from whom a pregnant minor is seeking the performance of an abortion shall offer the viewing of the video and the written decision-making materials to the pregnant minor during the initial appointment relating to those services.

89.12(2) The pregnant minor shall sign and date the certification form provided in the written decision-making materials or an exact replica certifying that she has been offered a viewing of the video and the written decision-making materials.

a. The minor shall complete a certification form for the licensed physician providing medical services relating to the termination of the minor's pregnancy.

b. The licensed physician from whom an abortion is sought shall keep the original certification form as a part of the minor's medical record relating to the termination of the pregnancy.

c. A copy of the completed certification form shall be provided to the pregnant minor.

89.12(3) A licensed physician shall not knowingly perform an abortion on a pregnant minor prior to obtaining the completed certification form and completing the notification process.

641—89.13 to 89.20 Reserved.

NOTIFICATION PROCESS

641—89.21(135L) Notification of parent prior to the performance of abortion on a pregnant minor.

89.21(1) Notification shall be made to the parent of the pregnant minor at least 48 hours prior to the termination of a pregnancy through abortion unless a judicial waiver is granted as provided in Iowa Code section 135L.3, or unless any of the conditions of rule 89.22(135L) have been met.

a. The licensed physician who will perform the abortion shall provide notification in person or by mailing the notification by restricted certified mail to a parent of the pregnant minor at the usual place of abode of the parent.

b. For the purpose of delivery by restricted certified mail, the time of delivery is deemed to occur at 12 noon on the next day on which regular mail delivery takes place, subsequent to the mailing.

c. The notification form shall be in duplicate in the form that may be provided by the department or shall be in duplicate and include, at a minimum, the following:

(1) The name of the minor.

(2) Notification of the intent to terminate the pregnancy.

(3) The name, address, and relationship of the person to be notified.

d. The licensed physician who will perform the abortion shall keep the original notification form as a part of the minor's medical record relating to the termination of the pregnancy.

e. A copy of the completed notification form shall be provided to the pregnant minor.

89.21(2) If the pregnant minor objects to the notification of a parent prior to the performance of an abortion on the pregnant minor, the pregnant minor may petition the court to authorize waiver of the notification requirement pursuant to Iowa Code section 135L.3.

641—89.22(135L) Exceptions to notification of parent. The requirements of rule 89.21(135L) do not apply if any of the following conditions exist:

89.22(1) The abortion is authorized in writing by a parent entitled to notification.

89.22(2) The pregnant minor declares, in a written statement submitted to the licensed physician who will perform the abortion, a reason for not notifying a parent and a reason for notifying a grandparent of the pregnant minor in lieu of the notification of a parent.

a. The licensed physician who will perform the abortion shall keep all written documentation as a part of the minor's medical record relating to the termination of the pregnancy.

b. Upon receipt of the written statement from the pregnant minor, the licensed physician who will perform the abortion shall provide notification to a grandparent of the pregnant minor, specified by the pregnant minor, in the manner in which the notification of a parent was prescribed in rule 89.21(135L).

c. The notification form shall be in duplicate in the form that may be provided by the department or shall be in duplicate and include, at a minimum, the following:

- (1) The name of the minor.
- (2) Notification of the intent to terminate the pregnancy.
- (3) The name, address, and relationship of the person to be notified.
- (4) A declaration which informs the grandparent of the pregnant minor that the grandparent of the pregnant minor may be subject to civil action if the grandparent accepts notification.
- (5) A provision that the grandparent of the pregnant minor may refuse acceptance of notification and a provision that the grandparent immediately contact the licensed physician if refusing acceptance of the notification.

d. The licensed physician who will perform the abortion shall keep the original notification form as a part of the minor's medical record relating to the termination of the pregnancy.

e. A copy of the completed notification form shall be provided to the pregnant minor.

89.22(3) The licensed physician who will perform the abortion certifies in writing that a medical emergency exists which necessitates the immediate performance of an abortion in accordance with Iowa Code chapter 135L. The physician shall certify in writing the basis for the medical judgment that a medical emergency exists and place this written certification in the medical file of the pregnant minor.

89.22(4) The pregnant minor declares that the pregnant minor is a victim of child abuse pursuant to Iowa Code section 232.68, the person responsible for the care of the child is a parent of the child, and either the abuse has been reported pursuant to the procedures prescribed in Iowa Code chapter 232, division III, part 2, or a parent of the child is named in a report of founded child abuse.

89.22(5) The pregnant minor declares that the pregnant minor is a victim of sexual abuse as defined in Iowa Code chapter 709 and has reported the sexual abuse to law enforcement.

89.22(6) The pregnant minor elects not to allow notification of the pregnant minor's parent and a court authorizes waiver of the notification requirement following completion of the proceedings prescribed under Iowa Code chapter 135L.

641—89.23(135L) Physician compliance. A licensed physician shall not perform an abortion on a pregnant minor prior to compliance with the requirements outlined in rule 89.21(135L) or 89.22(135L).

641—89.24 and 89.25 Reserved.

641—89.26(135L) Fraudulent practice. A person who does any of the following is guilty of a fraudulent practice in the fourth degree pursuant to Iowa Code section 714.12:

89.26(1) Knowingly tenders a false original or copy of the signed and dated certification form described in rule 89.12(135L) or Iowa Code section 135L.2, to be retained by the licensed physician.

89.26(2) Knowingly tenders a false original or copy of the notification document mailed to a parent or grandparent of the pregnant minor under this chapter, a false original or copy of the written certification to be provided to a parent of a pregnant minor pursuant to rule 89.22(135L) or Iowa Code section 135L.6, or a false original or copy of the order waiving notification relative to the performance of an abortion on a pregnant minor.

These rules are intended to implement Iowa Code chapter 135L as amended by 1997 Iowa Acts, House File 121.

[Filed emergency 11/14/96 after Notice 10/9/96—published 12/4/96, effective 1/1/97]

[Filed emergency 7/11/97 after Notice 6/4/97—published 7/30/97, effective 7/11/97]

CHAPTER 90
IOWA CHILD DEATH REVIEW TEAM

641—90.1(135) Purpose. The purpose of the child death review team is to aid in the reduction of the incidence of serious injury and death to children by accurately identifying the cause and manner of child death for children under age 18.

641—90.2(135) Definitions.

“*Team*” means the Iowa child death review team.

“*Unexcused absence*” means failure by a team member to notify the chairperson of an anticipated absence from a team meeting.

641—90.3(135) Agency. The Iowa child death review team is established as an independent agency of state government. The Iowa department of public health shall provide staffing and administrative support to the team.

641—90.4(135) Membership. The membership of the review team is subject to the provisions of Iowa Code sections 69.16 and 69.16A, relating to political affiliation and gender balance. Review team members who are not designated by another appointing authority shall be appointed by the director of public health in consultation with the director of human services. Membership terms shall be for three years.

90.4(1) The review team shall include the following:

- a. The state medical examiner or the state medical examiner’s designee.
- b. A certified or licensed professional who is knowledgeable concerning sudden infant death syndrome.
- c. A pediatrician who is knowledgeable concerning deaths of children.
- d. A family practice physician who is knowledgeable concerning deaths of children.
- e. One mental health professional who is knowledgeable concerning deaths of children.
- f. One social worker who is knowledgeable concerning deaths of children.
- g. A certified or licensed professional who is knowledgeable concerning domestic violence.
- h. A professional who is knowledgeable concerning substance abuse.
- i. A local law enforcement official.
- j. A county attorney.
- k. An emergency room nurse who is knowledgeable concerning the deaths of children.
- l. A perinatal expert.
- m. A representative of the health insurance industry.
- n. One other appointed at large.

90.4(2) Vacancies shall be filled in the same manner in which the original appointments were made. An appointment shall complete the original member’s term.

90.4(3) Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the team member and to appoint another. The chairperson of the team is charged with providing notification of absences.

641—90.5(135) Officers. Officers of the team shall be a chairperson and a vice chairperson and shall be elected at the first meeting of each fiscal year unless designated at the time of appointment. Vacancy in the office of chairperson shall be filled by elevation of the vice chairperson. Vacancy in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs. The chairperson shall preside at all meetings of the team, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

641—90.6(135) Meetings. The team shall meet upon the call of the chairperson, upon the request of a state agency, or as determined by the team. Robert's Rules of Order shall govern all meetings.

641—90.7(135) Expenses of team members. The members of the team are eligible for reimbursement of actual and necessary expenses incurred in the performance of their official duties.

641—90.8(135) Team responsibilities. The team shall perform the following responsibilities.

1. Collect, review, and analyze child death certificates and child death data, including patient records or other pertinent confidential information concerning deaths of children aged six or younger, and other information as the review team deems appropriate for use in preparing an annual report to the governor and the general assembly concerning the causes and manner of child deaths. The report shall include analysis of factual information obtained through review and recommendations regarding prevention of child deaths.

2. Recommend to the governor and the general assembly interventions to prevent deaths of children based on an analysis of the cause and manner of such deaths.

3. Recommend to the agencies represented on the review team and to other agencies changes which may prevent child deaths.

4. Maintain the confidentiality of any patient records or other confidential information reviewed.

5. Develop protocols for and establish a committee to review child abuse investigations which involve the death of a child.

6. The team may establish subcommittees to which the team may delegate some or all of the team's responsibilities set out in this rule.

641—90.9(135) Liaisons. The following individuals shall each designate a liaison to assist the team in fulfilling its responsibilities.

1. Director of public health.

2. Director of human services.

3. Commissioner of public safety.

4. Administrator of the bureau of vital records of the Iowa department of public health.

5. Attorney general.

6. Director of transportation.

7. Director of the department of education.

641—90.10(135) Confidentiality and disclosure of information. The team and liaisons shall maintain the confidentiality of all information and records used in the review and analysis of child deaths, including disclosure of information which is confidential under Iowa Code chapter 22 or any other provisions of state law. No information on individual deaths contained in the records described in this rule shall be disclosed except for the purposes of the team, committee or subcommittee meeting, and no confidential information received in preparation for or during the course of such meeting shall be removed from the meeting room except for further review as authorized by the team chairperson.

In preparation for review of an individual death by the team or its authorized committee or subcommittee, the chairperson of the team or the chairperson's designee is authorized to gather all information pertinent to the review. This information may include, but is not limited to, hospital records, physician's records, school records, day-care records, autopsy records, child abuse registry, investigation or assessment records, state public assistance records, traffic records, public safety records, law enforcement records, fire marshal's records, birth records, death records, and other relevant records necessary to conduct a complete review.

A person in possession or control of medical, investigative or other information pertaining to a child death and child abuse review shall allow the inspection and reproduction of the information by the department upon the request of the department, to be used only in the administration and for the duties of the Iowa child death review team. Information and records which are confidential under Iowa Code section 22.7 and chapter 235A, and information or records received from the confidential records, remain

confidential under this rule. A person does not incur legal liability by reason of releasing information to the department as required under and in compliance with this rule.

641—90.11(135) Immunity and liability. Review team members and their agents are immune from any liability, civil or criminal, which might otherwise be incurred or imposed as a result of any act, omission, proceeding, decision, or determination undertaken or performed, or recommendation made as a review team member or agent provided that the review team members or agents acted in good faith and without malice in carrying out their official duties in their official capacity. A complainant bears the burden of proof in establishing malice or lack of good faith in an action brought against review team members involving the performance of their duties and powers.

A person who releases or discloses confidential data, records, or any other type of information in violation of this chapter is guilty of a serious misdemeanor.

These rules are intended to implement Iowa Code Supplement section 135.43.

CHAPTER 91
IOWA DOMESTIC ABUSE DEATH REVIEW TEAM

641—91.1(77GA,ch1221) Purpose. The purpose of the domestic abuse death review team is to aid in the reduction of the incidence of domestic abuse deaths by accurately identifying the cause and manner of deaths occurring from domestic violence and by making recommendations for changes in policy and practice to improve community interventions for preventing domestic abuse deaths.

641—91.2(77GA,ch1221) Definitions.

“*Team*” means the Iowa domestic abuse death review team.

“*Unexcused absence*” means failure by a team member to notify the chairperson of an anticipated absence from a team meeting.

641—91.3(77GA,ch1221) Agency. The Iowa domestic abuse death review team is established as an independent agency of state government. The Iowa department of public health shall provide staffing and administrative support to the team.

641—91.4(77GA,ch1221) Membership. The membership of the team is subject to the provisions of Iowa Code sections 69.16 and 69.16A, relating to political affiliation and gender balance. Team members who are not designated by another appointing authority shall be appointed by the director of public health. At least one member shall also be a member of the Iowa child death review team. Membership terms shall be for three years. One-third of the initial members shall serve for three years, one-third of the initial members shall serve for two years, and one-third of the initial members shall serve for one year, as designated by the appointing authority.

91.4(1) The team shall include the following:

- a. The state medical examiner or the state medical examiner’s designee.
- b. A licensed physician who is knowledgeable concerning domestic abuse deaths, suicide, and child deaths by homicide.
- c. A licensed mental health professional who is knowledgeable concerning domestic abuse.
- d. A representative or designee of the Iowa coalition against domestic violence.
- e. A certified or licensed professional who is knowledgeable concerning substance abuse.
- f. A law enforcement official who is knowledgeable about domestic abuse and is a member of a state law enforcement association.
- g. A law enforcement investigator experienced in domestic abuse investigation.
- h. A prosecuting attorney experienced in prosecuting domestic abuse cases.
- i. A member of the judiciary appointed by the chief justice of the supreme court.
- j. A clerk of the district court appointed by the chief justice of the supreme court.
- k. A department of correctional services’ employee or subcontractor who is assigned batterers’ treatment program responsibilities and is knowledgeable about risk level assessment.
- l. An attorney licensed in this state who provides criminal defense assistance or child custody representation and who is experienced in dissolution of marriage proceedings.
- m. A former victim of domestic abuse.
- n. A family member of a decedent whose death resulted from domestic abuse.

91.4(2) Vacancies shall be filled in the same manner in which the original appointments were made. An appointee shall complete the original member’s term.

91.4(3) Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the team member and the appointment of another. The chairperson of the team is charged with providing notification of absences.

91.4(4) The department may temporarily appoint other members to serve as experts, as needed, on a case-by-case basis.

641—91.5(77GA,ch1221) Officers. Officers of the team shall be a chairperson and a vice chairperson and shall be elected at the first meeting of each fiscal year unless designated at the time of appointment.

Vacancy in the office of chairperson shall be filled by elevation of the vice chairperson. Vacancy in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs. The chairperson shall preside at all meetings of the team, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

641—91.6(77GA,ch1221) Meetings. The team shall meet upon the call of the chairperson, upon the request of a state agency, or as determined by the team. Robert's Rules of Order shall govern all meetings.

641—91.7(77GA,ch1221) Expenses of team members. The members of the team are eligible for reimbursement of actual and necessary expenses incurred in the performance of their official duties.

641—91.8(77GA,ch1221) Team responsibilities. The team shall perform the following responsibilities.

1. Collect, review, and analyze death certificates and death data, including investigative reports, medical and counseling records, victim service records, child abuse reports, or other confidential information concerning domestic abuse deaths, survivor interviews and surveys, and other information deemed by the team as necessary and appropriate concerning the causes and manner of domestic abuse deaths.

2. Prepare an annual report to the governor, supreme court, attorney general, and the general assembly concerning the contributing factors of domestic abuse deaths.

3. Recommend community interventions to prevent domestic abuse deaths based on an analysis of the contributing factors to such deaths.

4. Recommend to the agencies represented on the review team and to other agencies changes which may prevent domestic abuse deaths.

5. Maintain the confidentiality of any patient records or other confidential information reviewed.

6. The team may establish subcommittees to which the team may delegate some or all of the team's responsibilities set out in this rule.

641—91.9(77GA,ch1221) Liaisons. The following individuals shall each designate a liaison to assist the team in fulfilling its responsibilities.

1. Director of public health.

2. Director of human services.

3. Commissioner of public safety.

4. Director of corrections.

5. Attorney general.

6. Director of education.

7. State court administrator.

8. Director of the law enforcement academy.

641—91.10(77GA,ch1221) Confidentiality and disclosure of information. The team and liaisons shall maintain the confidentiality of all information and records used in the review and analysis of domestic abuse deaths, including disclosure of information which is confidential under Iowa Code chapter 22 or any other provisions of state law. No information on individual deaths contained in the records described in this rule shall be disclosed except for the purposes of the team, committee or subcommittee meeting, and no confidential information received in preparation for or during the course of such meeting shall be removed from the meeting room except for further review as authorized by the team chairperson.

In preparation for review of an individual death by the team or its authorized committee or subcommittee, the chairperson of the team or the chairperson's designee is authorized to gather all information pertinent to the review. This information may include, but is not limited to, hospital

records, physician's records, school records, day-care records, autopsy records, child abuse registry, investigation or assessment records, state public assistance records, traffic records, public safety records, law enforcement records, fire marshal's records, birth records, death records, and other relevant records necessary to conduct a complete review.

A person in possession or control of medical, investigative or other information pertaining to a domestic abuse death and domestic abuse death review shall allow the inspection and reproduction of the information by the department upon the request of the department to be used only in the administration and for the duties of the Iowa domestic abuse death review team. Information and records which are confidential under Iowa Code section 22.7 and chapter 235A, and information or records received from the confidential records, remain confidential under this rule. A person does not incur legal liability by reason of releasing information to the department as required under and in compliance with this rule.

641—91.11(77GA,ch1221) Immunity and liability. Review team members and their agents are immune from any liability, civil or criminal, which might otherwise be incurred or imposed as a result of any act, omission, proceeding, decision, or determination undertaken or performed, or recommendation made as a review team member or agent provided that the review team members or agents acted in good faith and without malice in carrying out their official duties in their official capacity. A complainant bears the burden of proof in establishing malice or lack of good faith in an action brought against review team members involving the performance of their duties and powers.

These rules are intended to implement 1998 Iowa Acts, chapter 1221, section 5, subsection 4(10).

[Filed 11/10/98, Notice 9/9/98—published 12/2/98, effective 1/6/99]

CHAPTER 92
IOWA FATALITY REVIEW COMMITTEE

641—92.1(135) Purpose. The purpose of the child fatality review committee is to determine whether the department of human services and others involved with the case of child abuse responded appropriately.

641—92.2(135) Definitions.

“Child abuse assessment” means an assessment performed in accordance with Iowa Code section 232.71B.

“Child fatality” means the death of a child under the age of 18.

“Committee” means the Iowa child fatality review committee.

“Department” means the department of public health.

“Director” means the director of the department of public health.

“Multidisciplinary team” means the group of individuals as defined in Iowa Code section 235A.13.

641—92.3(135) Committee. The committee is an ad hoc committee appointed by the director on a case-by-case basis. The committee shall include a medical examiner, a pediatrician who is knowledgeable concerning deaths of children, and a person involved in law enforcement. The committee may also consult with individuals with specific child death expertise as necessary to perform the duties and responsibilities of the committee. The department shall provide staffing and administrative support to the committee.

641—92.4(135) Formation of the committee. The director may appoint a committee to review the death of a child under the age of 18 upon the request from a member of the legislature or the governor in cases in which a report of suspected child abuse had been filed with the department of human services pursuant to Iowa Code section 232.70 within two years preceding the child’s death.

641—92.5(135) Committee protocol for review. In determining whether the department of human services and others involved with the case of child abuse responded appropriately, the committee shall review records relevant to the child’s death, which may include but are not limited to the following:

1. All reports of suspected child abuse on the identified child made to the department of human services pursuant to Iowa Code section 232.70;
2. All child abuse assessments performed on the identified child in accordance with Iowa Code section 232.71B;
3. All other department of human services records maintained on the identified child;
4. All relevant law enforcement records which refer to the identified child;
5. All relevant medical and hospital records of the identified child;
6. All relevant court records which refer to the identified child;
7. Records of any multidisciplinary team which reviewed the case of the identified child;
8. Records of any public entity which reviewed the case of the identified child; and
9. All relevant records maintained by a day care provider, other child care provider, preschool, elementary school, middle school, or high school which refer to the identified child.

The committee shall also consult with any multidisciplinary team that is operating in the area where the fatality occurred.

641—92.6(135) Content of report.

92.6(1) Upon completion of the review, the director shall submit the committee’s report to:

- a. The governor or the governor’s designee;
- b. The member of the senate or employee of the general assembly designated by the majority leader or minority leader of the senate;
- c. The member of the house of representatives or employee of the general assembly designated by the speaker or minority leader of the house of representatives.

92.6(2) The committee report shall include findings concerning the case and recommendations for changes to prevent child fatalities when similar circumstances exist. The report shall include but is not limited to the following information:

a. The dates, outcomes, and results of any actions taken by the department of human services and others in regard to each report and allegation of child abuse involving the child who died.

b. The results of any review of the case performed by a multidisciplinary team, or by any other public entity that reviewed the case.

c. Confirmation of the department of human services' receipt of any report of child abuse involving the child, including confirmation as to whether or not any assessment involving the child was performed in accordance with Iowa Code section 232.71B, the results of any assessment, a description of the most recent assessment and the services offered to the family, the services rendered to the family, and the basis for the department's decisions concerning the case.

641—92.7(135) Consultation with county attorney. Prior to issuing the report, the committee shall consult with the county attorney responsible for prosecution of the alleged perpetrator of the child fatality. The committee's report shall include child abuse information associated with the case and the child but is subject to the restrictions applicable to the department of human services for release of information concerning a child fatality or near fatality in accordance with Iowa Code section 235A.15(9).

641—92.8(135) Supplemental report. Following the completion of the trial of any alleged perpetrator of the child fatality and the appeal period for the granting of a new trial, the committee shall issue a supplemental report containing the information that was withheld, in accordance with rule 92.7(135), so as not to jeopardize the prosecution or the rights of the alleged perpetrator to a fair trial as described in Iowa Code section 235A.15(9) "f" and "g."

641—92.9(135) Confidentiality and disclosure of information. The committee shall have access to patient records and other confidential information. The committee may disseminate confidential information in the committee's report which shall be submitted to the governor and the general assembly. For all other purposes, the committee shall maintain the confidentiality of all records which are confidential under Iowa Code section 22.7, Iowa Code chapter 235, or other provision of law. A person in possession or control of medical, investigative, or assessment information or other information pertaining to a child death and child abuse review shall allow the inspection and reproduction of the information by the department, upon the request of the department, to be used only in the administration and for the duties of the Iowa child fatality review committee. A person does not incur legal liability by reason of releasing information to the department as required under and in compliance with this rule.

641—92.10(135) Immunity and liability. Review committee members are immune from any liability, civil or criminal, which might otherwise be incurred or imposed as a result of any act, omission, proceeding, decision, or determination undertaken or performed, or recommendation made as a review committee member provided that the review committee members acted in good faith and without malice in carrying out their official duties in their official capacity. A complainant bears the burden of proof in establishing malice or lack of good faith in an action brought against review committee members involving the performance of their duties and powers.

A person who releases or discloses confidential data, records, or any other type of information in violation of this chapter is guilty of a serious misdemeanor.

These rules are intended to implement Iowa Code section 135.43(4).

[Filed emergency 11/9/00—published 11/29/00, effective 11/9/00]

[Filed 5/25/01, Notice 1/10/01—published 6/13/01, effective 7/18/01]

CHAPTER 93
ABUSE EDUCATION REVIEW PANEL

641—93.1(135) Purpose. The purpose of the abuse education review panel process is to provide an objective method by which curricula for child and dependent adult abuse mandatory reporter training are reviewed and approved. Approved curricula are to be taught to persons who work in a position classification that under law makes the persons mandatory reporters of child or dependent adult abuse and the position classification does not have a mandatory reporter training curriculum approved by a licensing or examining board.

641—93.2(135) Panel.

93.2(1) Panel composition. The director shall appoint the members of the panel. The panel shall be comprised of seven members, with one member having expertise in issues related to child abuse, one member having expertise in issues related to dependent adult abuse, one member having expertise in curriculum development, and four members representing mandatory reporters or employers of mandatory reporters. Appointments shall be for three-year staggered terms that shall expire on June 30. A member shall serve no more than three terms or nine years. The director shall fill any vacancy for the unexpired term of the vacancy. The director shall make all reasonable efforts to ensure that the total composition of the panel is fair, impartial, and equitable.

93.2(2) Designation of officers. The panel shall elect a chairperson and vice-chairperson at the first meeting of each fiscal year. A vacancy in the office of chairperson shall be filled by elevation of the vice-chairperson. A vacancy in the office of vice-chairperson shall be filled by election at the next meeting after the vacancy occurs. If the chairperson is absent or unable to act, the vice-chairperson shall perform the duties of the chairperson. The chairperson shall preside at all meetings of the panel, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee.

93.2(3) Vacancies. In the event a vacancy occurs prior to the completion of the panel member's term, the director shall fill the vacancy using the same criteria required in the selection of the original member. The director shall declare a vacancy upon the death, resignation, or failure to serve of any panel member.

641—93.3(135) Meetings. The panel shall meet as necessary and appropriate. Four members shall constitute a quorum, and no recommendations may be adopted without the affirmative vote of at least four members of the panel. The members of the panel shall be eligible for reimbursement of actual and necessary expenses for the performance of their official duties.

641—93.4(135) Duties. The panel shall perform the following duties:

1. Review and approve criteria for child and dependent adult abuse curricula for persons who work in a position classification that under law makes the persons mandatory reporters of child or dependent adult abuse and the position classification does not have a mandatory reporter training curriculum approved by a licensing or examining board.
2. Conduct literature reviews and scrutinize existing research pertinent to its purpose.
3. Review curricula based on the criteria established in rule 93.5(135).
4. Report decisions regarding approvals or denials to applicants.
5. Review appeals as provided in rule 93.7(135).
6. Maintain a list of all approved curricula and distribute the list upon request.

641—93.5(135) Standards for approval of curricula. The following criteria are established to assist in evaluation of curricula. Nothing in this rule shall preclude providers from offering additional coursework, training, or information that exceeds or expands upon the curriculum prescribed by the panel. At a minimum, approved curricula shall contain each of the following:

93.5(1) Content that necessitates at least two hours of training.

93.5(2) The definition of child abuse as defined in Iowa Code section 232.68(2) or the definition of dependent adult abuse as defined in Iowa Code section 235B.2(5) or both.

93.5(3) Training in the physical, psychological, behavioral, environmental, and other relevant indicators of child abuse as defined in Iowa Code section 232.68(2) or dependent adult abuse as defined in Iowa Code section 235B.2(5) or both.

93.5(4) Requirements and procedures for reporting suspected cases of abuse, including when to report, how to report, and to whom to report.

93.5(5) Review of the Code of Iowa and the Iowa Administrative Code pertaining to child or dependent adult abuse, including review of the classifications of mandatory reporters, confidentiality provisions, immunity provisions, and penalties for failure to report.

93.5(6) A description of the assessment protocol utilized by the department of human services and other investigating agencies following receipt of a report and the manner in which information is shared between the department of human services and the reporter, other relevant individuals, agencies, and entities.

93.5(7) An evaluation component to assess the understanding, knowledge, and skills acquired.

93.5(8) Resource materials or information in the following areas:

- a. The causes and risk factors of child or dependent adult abuse;
- b. Assisting individuals and families who have experienced child or dependent adult abuse, including information on local resources and available referral services;
- c. Prevention of child or dependent adult abuse.

641—93.6(135) Process for application review and approval.

93.6(1) *Submission and decision.* An organization, institution, agency, or individual may submit an application for approval of curriculum on a form prescribed by the panel. The application shall at a minimum demonstrate the manner in which the proposed curriculum meets the criteria in rule 93.5(135). Within three months of submission of an application, the panel shall review the application and issue a written decision regarding the application. If each of the standards for approval has been satisfied, the panel shall approve the curriculum for a period of three years and shall notify the applicant of the panel's decision in writing. If the standards for approval have not been met, the panel shall deny the curriculum and shall provide to the applicant a written explanation of the reason for denial.

93.6(2) *Renewal.* Within 90 days of expiration of the three-year approval period, an applicant may apply for approval renewal by completing a renewal of application form provided by the panel.

93.6(3) *Additional information.* The panel may request additional information from the applicant or other individuals at any phase in the review process.

93.6(4) *Evaluation of approved curriculum.* The panel may at any time reevaluate an approved curriculum. Upon evidence of a significant variation in the curriculum presented from the curriculum approved, the panel may disapprove all or any part of the previously approved curriculum.

93.6(5) *Amendment to approved curriculum.* The panel may require amendments to an approved curriculum based on legislative or administrative rule changes.

641—93.7(135) Process for appeal. A person aggrieved by a panel decision may, within 30 days of receipt of the decision, appeal the decision by submitting a written appeal to the chairperson which states the reason for the appeal. Within 60 days of receipt of the appeal, the panel shall review the application and any additional information submitted. If the panel finds that each of the standards for approval has been satisfied, the panel shall approve the curriculum. If the standards for approval have not been met, the panel shall deny the curriculum. The panel shall provide a written explanation of the reasons for the approval or denial of approval. This decision is the final action of the panel and shall be considered final agency action for purposes of judicial review. The appeal review process is not a contested case proceeding as that term is defined in Iowa Code chapter 17A.

These rules are intended to implement Iowa Code section 135.11 as amended by 2001 Iowa Acts, chapter 122, section 1.

[Filed 1/10/02, Notice 11/28/01—published 2/6/02, effective 3/13/02]

[Filed 7/13/07, Notice 6/6/07—published 8/1/07, effective 9/5/07]

CHAPTER 94
CHILD PROTECTION CENTER GRANT PROGRAM

641—94.1(135) Scope and purpose. A child protection center grant program is established to provide grants to eligible applicants for the purpose of establishing new child protection centers and to support existing child protection centers. Grants may be available to eligible organizations that meet, or that are in the process of implementing, child protection center standards established by the National Children's Alliance. If sufficient funding is available, the program shall, at a minimum, award a grant to a child protection center in or available to each department of human services region in Iowa. Implementation of the grant program is subject to the availability of funding.

641—94.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

“*Child abuse*” means abuse as defined by Iowa Code section 232.68(2).

“*Child protection center*” or “*child advocacy center*” means a comprehensive, child-focused program, designed by communities to meet their needs, based in a facility that allows law enforcement, child protection professionals, prosecutors, and the mental health and medical communities to work together to handle child abuse cases. Child advocacy center is synonymous with child protection center.

“*Child protection worker*” means a worker as defined by Iowa Code section 232.68(2A).

“*Culturally competent*” means the capacity to function in more than one culture, requiring the ability to appreciate, understand and interact with members of diverse populations within the community.

“*Department*” means the Iowa department of public health.

“*Developmentally appropriate*” means that services are based on human development and learning, individual characteristics and experiences, social and cultural contexts.

“*Director*” means the director of the Iowa department of public health.

“*Family advocate*” means an individual who supports a child provided service through a child protection center and ensures access to formal or informal community services as needed by the child or the child's family.

“*Forensic interview*” means a face-to-face meeting between individuals to elicit information and that follows a process suitable for a law court or public debate.

“*Multidisciplinary team*” means individuals with many education levels that encompass the individuals' beliefs and training in fields of health, education, human service, justice, faith, and others.

641—94.3(135) Goals. A child protection center's goals for victims of child abuse allegations shall be:

1. To provide consistent and expedient response and follow-up to abuse reports.
2. Coordination of activities to investigate, prosecute, and treat child abuse.
3. To advocate for medical and mental health resources to effectively help the child and the child's family.
4. To reduce the number of interviews and interactions with a victim.
5. To provide consistent and compassionate support for the child and the child's family.
6. To ensure that the child is not further victimized by the system designed to protect the child.
7. To increase successful prosecutions.

641—94.4(135) Review process.

94.4(1) The department shall establish a request for proposal and application process for organizations eligible to receive funding. The department shall establish a process to review applications, which includes receiving input from a review committee. The review process and review criteria shall be described in the request for proposals.

94.4(2) The director shall create a committee to review proposals and make recommendations to the director. At a minimum, committee membership shall include representation from:

- a. State departments of human services, justice and public health;
- b. Iowa Medical Society;
- c. Iowa Hospital Association;

- d.* Iowa Nurses Association; and
- e.* Iowa chapter of the National Association of Social Workers.

641—94.5(135) Eligibility and criteria. To be eligible for a child protection center grant, an organization shall:

94.5(1) Have acquired partial membership rank as a child advocacy center from the National Children's Alliance and shall identify a plan to acquire full membership rank within one year of receiving a state grant.

94.5(2) Have in place an interagency memorandum of understanding which meets the requirements of Iowa Code section 135.118. The applicant shall provide in the application written information in the following areas:

- a.* Data, statistics and facts from an assessment of need and assets in the community to support a child protection center for children.
- b.* Identification of barriers to the child protection center to reach the purpose and goals for children as may exist in federal, state or local rules, regulations, codes, policies or procedures.
- c.* A plan to request and advocate waivers of federal, state, or local rules, regulations, codes, policies, or procedures to remove or reduce barriers.
- d.* The child protection center's access to information regarding all suspected or confirmed child abuse/neglect victims in the identified service area.
- e.* The child protection center's provision of 24-hour access to center staff for support, questions and referrals regarding child abuse.
- f.* Identification of matching local funds to support and sustain the child protection center in the community.
- g.* A plan for community education on prevention of child abuse and neglect.
- h.* Collaboration agreements with providers of human services, child health services, early education services, and all other potential community partners to support the purpose and goals of the child protection center.
- i.* The child protection center's ability to access and utilize alternate funds for activities provided.

641—94.6(135) Appeals. An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by rule 641—176.8(135,17A).

These rules are intended to implement Iowa Code section 135.118.

[Filed 3/14/03, Notice 2/5/03—published 4/2/03, effective 5/7/03]

CHAPTER 95
CERTIFICATE OF BIRTH—REGISTRATION FEE
[Prior to 7/29/87, Health Department[470]Ch 95]

641—95.1(144) Birth certificates—when filing fee required. Registration of a certificate of birth shall be the following for the purpose of a registration fee being charged pursuant to Iowa Code section 144.13A: birth certificate filed pursuant to Iowa Code section 144.13; delayed certificates of birth established for persons less than 18 years of age, pursuant to Iowa Code section 144.15 or 144.18; birth certificates established for foreign-born adoptees pursuant to Iowa Code section 144.23.

The state and county registrar shall charge the parent \$10 registration fee for the registration of a certificate of birth. Partial payment of fee shall not be accepted.

For delayed certificates of birth the fee shall be charged to the individual filing the certificate.

For foreign-born adoptees the fee shall be charged to the adoptive parent or parents.

641—95.2(144) Collection. If the person responsible for the filing of the certificate of birth under Iowa Code section 144.13 is not the parent, the person shall collect the fee from the parent, and remit to the appropriate registrar.

The person is discharged from the duty to collect and remit the fee when the person has made a good faith effort to collect the fee from the parent or has established that the fee is to be waived.

641—95.3(144) Waivers. The fee for registration and certified copy of a certificate of birth shall be waived when the following circumstances exist.

95.3(1) The expenses of birth are reimbursed under the medical assistance program established by Iowa Code chapter 249A.

95.3(2) The expenses of birth are paid for under the statewide indigent patient care program established by Iowa Code chapter 249A or chapter 255.

95.3(3) The parent is indigent and unable to pay the expenses of the birth and no other means of payment is available to the parent.

641—95.4(144) Fee deposit. Fees collected by the county registrar and state registrar shall be accounted for as birth registration fees or certified copy fees and shall be remitted to the treasurer of state for deposit in the appropriate state fund.

641—95.5(144) Responsibilities of institutions. Institutions responsible for filing certificates of birth shall collect both the registration fee and fee for the certified copy from the parent. All fees shall be remitted to the state registrar with the appropriate copy of the completed Birth Registration and Certification Fee Summary Report.

95.5(1) Completion of the Birth Registration Certification Fee Summary Report documenting the fee status of each certificate of birth shall indicate:

1. Fees collected for the registration and certified copy.
2. The fees waived, as applicable, and reason.
3. No fee collected when good faith effort has been made.
4. Paternity affidavit completed.

95.5(2) All certificates of birth listed on the Birth Registration Certification Fee Summary Report shall be submitted together to the appropriate registrar. All fees shall be remitted to the state registrar with the appropriate copy of the completed Birth Registration and Certification Fee Summary Report.

641—95.6(144) Local registrar. Rescinded IAB 8/4/93, effective 7/16/93.

641—95.7(144) County registrars. For births which occur in institutions the county registrar shall review the Birth Registration Certification Fee Summary Report for completeness and correctness and verify that all certificates of birth correspond with those listed on the Birth Registration Certification Fee Summary Report.

95.7(1) For births filed directly with the county registrar, complete a Birth Registration Certification Fee Summary Report, collect the registration fee, the certified copy fee and forward report and fees to state registrar for deposit to appropriate accounts.

95.7(2) If the registration fee has not been collected or waived, provide notice to the parent that a fee is required for registration of a birth certificate and that the fee is due.

95.7(3) If the fee is paid or waived within six months of the receipt of the Birth Registration Certification Fee Summary Report, it shall be noted on the Birth Registration Certification Fee Summary Report. Fees shall be accounted for and forwarded to the state registrar for deposit to appropriate accounts.

Two weeks after notice of payment due has been sent, if no fee has been received, the uncollected fee will be referred to the county attorney of the county of residence of the parent.

641—95.8(144) State registrar. Review the Birth Registration Certification Fee Summary Report for completeness and correctness, verify that all certificates of birth correspond with those listed on the Birth Registration Certification Fee Summary Report, account for all fees and deposit fees.

95.8(1) For births filed directly with the state registrar, complete a Birth Registration Certification Fee Summary Report, collect the registration and certified copy, fees, and deposit fees.

95.8(2) If the fee has not been collected or waived, provide notice to the responsible party that a fee is required for registration of a birth certificate and that the fee is due.

95.8(3) If the fee is paid or waived within six months of the receipt of the Birth Registration Certification Fee Summary Report, it shall be noted on the Birth Registration Certification Fee Summary Report. Fees shall be accounted for and deposited.

Two weeks after notice of payment due has been sent, if no fee has been received, the uncollected fee will be referred to the county attorney of the county in which the birth occurred.

641—95.9(144) Retention. The Birth Registration Certification Fee Summary Report shall be retained for three years after the close of the fiscal year in which the fees are received.

641—95.10(144) Forms. For purposes of these rules the following forms are utilized: Hospital Birth Worksheet, CFN 220-0006; Birth Registration Certification Fee Summary Report, CFN 220-0242. These forms can be inspected or copied at the Iowa Department of Public Health, Fourth Floor, Lucas State Office Building, Des Moines, Iowa 50319-0075.

These rules are intended to implement Iowa Code chapter 144.

CHAPTER 96
VITAL RECORDS

[Prior to 7/29/87, Health Department[470] Ch 96]

641—96.1(144) Definitions. Record(s) shall be the following for the purposes of general public accessibility:

Record of death. Record of death shall be the compilation of those entries of death contained in docket books reflecting the recording of the death event.

Record of death shall also be the Certificate of Death excluding all entries indicating that they are “confidential information,” “for statistical purposes only,” or otherwise indicated as confidential or statistical in nature on the face of the record.

Record of dissolution or divorce. Record of dissolution or divorce shall be the Statistical Report of Dissolution and Report of Divorce excluding all entries under that “Confidential Statistical Section,” or indicating the “Information for Statistical Purposes Only,” or otherwise indicated as confidential or statistical in nature on the face of the record.

Record of live birth. Record of live birth shall be the compilation of those entries of live birth contained in docket books reflecting the recording of the live birth event.

Record of live birth shall also be the Certificate of Live Birth excluding all entries indicating that “they will not appear upon the certificate,” “for medical and health purposes only,” “for statistical purposes only,” “confidential information,” or otherwise indicated as confidential or statistical in nature on the face of the record.

Record of marriage. Record of marriage shall be the compilation of those entries contained in docket books reflecting the recording of the marriage event.

Record of marriage shall also be the Certificate of Marriage excluding all entries indicating “confidential information,” “for statistical purposes only,” or otherwise indicated as confidential or statistical in nature on the face of the record.

This rule is intended to implement Iowa Code section 144.43.

641—96.2(144) Specification. The state registrar may require that a person requesting a copy of a vital record, examination, or search for a vital record specify in writing the name of the person whose vital records are to be copied, examined, or searched; the purpose of such request; the relationship of the person making the request to the registrant; and the signature and address of the person making the request.

This rule is intended to implement Iowa Code section 144.43.

641—96.3(144) Handling. Equipment or vital records shall not be physically handled except by the state registrar, deputy or authorized personnel. This rule shall not prevent copying vital records.

641—96.4(144) Fees. Effective January 1, 2005, the following fees shall be charged for the various services provided by the state registrar or the county registrar.

96.4(1) A fee of \$15 shall be charged for the preparation of an adoption certificate, for amending a certificate, for amending a certificate of birth to reflect legal change of name, and for the preparation of a delayed certificate, for processing any other administrative or legal action, and for the preparation of copies of supporting documents on file in the state registrar’s office.

96.4(2) A fee of \$15 shall be charged by the state registrar and a fee of \$15 shall be charged by the county registrar for each record search conducted and shall include the issuance of a copy if the record is located. A fee of \$15 shall be charged for each additional certified copy issued. If following a search no record is found, the \$15 fee shall be retained.

96.4(3) A fee of \$15 shall be charged by the state registrar for amending an abstract or other legal documentation in support of the preparation of a new certificate.

96.4(4) Any overpayment of less than \$15 received by the state registrar for copying of or search for vital records, or for preparation or amending of a certificate, shall not be refunded.

96.4(5) When an individual is in possession of a previously issued certified copy of a vital record and the original record is subsequently changed or amended, the individual may request and receive a certified copy of the changed record without charge, if the uncorrected certified copy is relinquished.

96.4(6) When a search is conducted by the person requesting the copy, a fee based on the average administrative costs as established by the county shall be charged for an uncertified copy of a county record. The fee shall be retained by the county.

96.4(7) All fees collected by the county registrar and the state registrar, with the exception of the fee in subrule 96.4(6), shall be distributed as follows.

a. Fees collected by a county registrar. The county registrar shall retain \$4 of all fees collected by that office. The balance of fees collected by the county registrar shall be divided as follows:

(1) For birth and marriage certificates, the state registrar shall receive \$8, and \$3 shall be deposited in the general fund of the state.

(2) For death certificates, the state registrar shall receive \$6, the office of the state medical examiner shall receive \$3, and \$2 shall be deposited in the general fund of the state.

b. Fees collected by the state registrar. The state registrar shall retain \$9 of all fees collected by that office. The balance of fees collected by the state registrar shall be divided as follows:

(1) For birth and marriage certificates, \$6 shall be deposited in the general fund of the state.

(2) For death certificates, the office of the state medical examiner shall receive \$3, and \$3 shall be deposited in the general fund of the state.

All fees retained by the state registrar shall be added to the fund established by the department for the modernization of vital records.

All fees received by the office of the state medical examiner shall be added to the fund established for the operation of that office and the contribution it makes to the modernization of vital records.

This rule is intended to implement Iowa Code section 144.46; 1993 Iowa Acts, chapter 55; 1994 Iowa Acts, chapter 1068, section 8; and 2004 Iowa Acts, Senate File 2298, section 104.

641—96.5(144) Additional statistical data. Additional statistical data desired by the state registrar may be gathered on a separate sheet which may be attached to the marriage certificate. The statistical information sheet shall be clearly labeled, and data which is not required shall be clearly identified as optional. The statistical data sheet may be removed and forwarded to the department separate from the marriage certificate. Data collected by this means shall be considered as subject to Iowa Code section 144.43.

This rule is intended to implement Iowa Code chapter 144.

¹ Objection, see filed rules published IAC Supp. 6/14/76, 8/9/76

641—96.6(144) General public accessibility. At county level the general public shall have complete uncensored access and right to inspect all vital statistics records and information contained therein, except for that information specifically excluded by statute or definition for purposes of confidentiality.

96.6(1) There shall be complete uncensored access and a right to inspect all vital record docket books at the county level, when these dockets are purged of information categorized as confidential or private.

96.6(2) Access and the right to inspect all other vital records, nondocket, shall be on a document-by-document basis.

96.6(3) Upon request certified copies of vital records may be issued or made at county level, upon the payment of the required fee and demonstration of a verifiable direct and tangible interest. Uncertified copies of all vital records may be issued or made at county level, upon payment of a reasonable charge and demonstration of a verifiable direct and tangible interest.

96.6(4) Out-of-wedlock birth records prior to July 1, 1995. Accessibility: Records of out-of-wedlock births shall not be accessible to the public as of right under Iowa Code chapter 22 when they are in the custody of a county registrar.

For purposes of general public access and confidentiality, “out-of-wedlock” birth records shall be determined as follows:

a. Any record of birth where there is a reference or statement on the certificate or entry which directly indicates or specifies illegitimate or specified “no” regarding “born in wedlock” or “legitimate,” or

b. Any record of birth where there is reference or statement on the certificate or entry that either parent is “unknown,” “anonymous,” or there was a refusal to give parents’ name, or

c. Any certificate or entry which reflects the omission or absence of the name of the father of the child.

However, in all of the above paragraphs “*a*,” “*b*,” and “*c*” where the registrar has evidence from the record itself that the birth is a legitimate birth, the record of birth shall be accessible.

For out-of-wedlock births after July 1, 1995, filed at the county, accessibility will be as described in subrules 96.6(1), (2), and (3).

96.6(5) The state registrar may transmit to the appropriate local boards of health information from birth certificates for the sole purpose of identifying those children in need of immunizations. The state registrar may impose conditions to ensure that the use of the data is limited to official purposes.

This rule is intended to implement Iowa Code section 144.43.

641—96.7(144) Direct tangible interest accessibility. Certified copies of vital records may be issued or made at county level, upon the payment of the required fee for certification and demonstration of a verifiable direct and tangible interest. Uncertified copies of all vital records may be issued or made at county level, upon payment of a reasonable charge and demonstration of a verifiable direct and tangible interest.

The following persons shall be considered to have a direct tangible interest in requested records:

1. The registrant, a member of the registrant’s immediate family, legal representative or agent. Other persons may demonstrate a direct and tangible interest when it is shown the information needed is for the determination or protection of a personal or property interest.

“Legal representative” shall include an attorney, physician, funeral director, abstractor, insurance agent or an agent acting on behalf of the registrant or the registrant’s immediate family.

2. Applicants or their agents conducting family research satisfactorily demonstrating to the local custodian the existence of a direct and tangible interest. This is accomplished by substantiating a line of direct lineal consanguinity.

Direct lineal consanguinity is the existence of a line of descent in which one person is descended in a direct lineal relationship to another; as between a particular person and the person’s parent, grandparent, great-grandparent, and so upward, in the direct ascending line; or between a particular person and the person’s child, grandchild, great-grandchild and so downward in the direct descending line and any siblings of those persons. The county custodian shall require sufficient identification, such as name, address and relationship of all applicants requesting access under the criteria of direct and tangible interest. A written attestation by the applicant as to the applicant’s right to uncensored access may be required by the county custodian.

This rule is intended to implement Iowa Code section 144.3.

641—96.8(144) County custodians’ responsibility for maintenance of confidentiality. The state and county registrars shall maintain the confidentiality of all excluded material and information. Where records are such that this confidential information is included with accessible information, only accessible material and information shall be made available to the general public.

County custodians of vital records shall take all necessary steps to ensure the confidentiality of that information reflected on vital records that has been excluded from general public access. The county custodians must employ one or all of the following methods to ensure confidentiality:

1. Temporarily cover, by appropriate means, confidential material or information in such a manner as to allow access if needed at a later time.

2. If vital records are microfilmed, make a copy of the records from existing microfilm, eliminating the confidential material and information or cover the copy as above.

3. The county custodian will reproduce all vital records at county level eliminating the confidential material and information.

The county registrar may adopt reasonable charges to reflect the expenses for efforts required to allow general public access, examination and the assurance of confidentiality of this material and information pursuant to the authority of Iowa Code chapter 22. This fee is to be paid by those requesting these services as provided by the county custodian for supervising, copying or providing a suitable place for such work.

These rules are intended to implement Iowa Code sections 144.13 and 144.43.

CHAPTER 97
Rescinded, effective May 28, 1986.

CHAPTER 98
FORMS UNIFORM

[Prior to 7/29/87, Health Department[470] Ch 98]

641—98.1(144) Forms property of Iowa department of public health. All forms, certificates and reports pertaining to the registration of vital events are the property of the Iowa department of public health and shall be surrendered to the state registrar or the registrar's representative upon demand. The forms supplied or approved for reporting vital events shall be used for official purposes as provided for by law, rules and instructions of the state registrar. No forms shall be used in the reporting of vital events or making copies of vital records except those furnished or approved by the state registrar.

641—98.2(144) Preparation of certificates. Death certificates must be prepared on a typewriter with a dark ribbon. All other certificates must either be prepared on a typewriter with a dark ribbon or written in dark, unfading ink. All signatures required shall be entered in dark, unfading ink. Unless otherwise directed by the state registrar, no certificate shall be complete and correct and acceptable for filing:

1. That does not have the names typed or printed legibly under all signatures for positive identification purposes;
2. That does not supply all items of information called for thereon or satisfactorily accounts for their omission;
3. That contains major alterations or erasures;
4. That does not contain genuine signatures;
5. That is marked "copy" or "duplicate";
6. That is a carbon copy;
7. That is prepared on an improper form;
8. That contains obviously improper or inconsistent data;
9. That is not prepared in conformity with these rules or instructions issued by the state registrar.

These rules are intended to implement Iowa Code section 144.13A.

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed emergency 7/16/93—published 8/4/93, effective 7/16/93]

CHAPTER 99
DELAYED BIRTH, DEATH AND MARRIAGE REGISTRATION
[Prior to 7/29/87, Health Department[470] Ch 99]

641—99.1(144) Foundling registration. The certificate for a living infant of unknown parentage is to be filed on a regular live birth certificate and shall:

1. Have “foundling registration” plainly marked in the left top margin of the certificate;
2. Show the required facts as determined by approximation and have parentage data left blank;
3. Have the certification of the attendant changed to read “signature of custodian” indicating title, if any.

641—99.2(144) Birth registration—five days to one year. The registration of a birth after the statutory time prescribed for filing but within one year from the date of birth shall be registered on the standard form of live birth certificate. Such certificate shall not be marked delayed. In any case where the certificate is signed by one of the parents, a statement giving the reason why the certificate cannot be signed by the attendant must appear on the reverse side of the certificate. The state registrar may require additional evidence in support of the facts of birth or an explanation for the delay in filing in any case where there appears to be reason to question the adequacy of the registration.

641—99.3(144) Delayed birth registration—after one year. All births registered one year or more after the date of birth are to be registered on a special “delayed certificate of birth” form adopted by the state registrar.

641—99.4(144) Who may file delayed certificate. Any person born in Iowa and whose birth is not recorded in Iowa, or the person’s parent, guardian, next of kin or other person acting for the registrant and having personal knowledge of the facts of birth, may file a delayed certificate of birth with the state registrar.

641—99.5(144) Delayed certificate to be signed. Each delayed certificate of birth shall be signed and sworn to before an official authorized to administer oaths by the person whose birth is to be registered if such person is 16 years of age or over and is competent to sign and swear to the accuracy of the facts stated therein; otherwise, the certificate shall be signed and sworn to by one of the parents, the guardian, the next of kin, or if none of these exist, any other older person. In all cases when someone other than the applicant signs the certificate, such person must be older than the applicant and have personal knowledge of the facts of birth.

641—99.6(144) Facts to be established for delayed registration of birth. The minimum facts which must be established by documentary evidence shall be the following:

1. The full name of the person at the time of birth, except that an additional delayed certificate may reflect a name established by adoption or legitimation when such evidence is submitted;
2. The date of birth and place of birth;
3. The name of the mother;
4. The full name of the father, except that if the mother was not married to the father of the child at the time of birth or during the ten months preceding such birth, the name of the father shall not be entered on the delayed certificate unless the child has been adopted or legitimated or parentage has been determined by a court of competent jurisdiction or there is evidence of acknowledgment of paternity by both parents.

641—99.7(144) Documentary evidence.

99.7(1) To be acceptable for filing, the name of registrant and the date and place of birth entered on a delayed birth certificate shall be supported by at least:

- a. Two pieces of documentary evidence if filed within seven years after the date of birth; or
- b. Three pieces of documentary evidence if filed seven years or more after the date of birth.

99.7(2) Each document must be from an independent source. Facts of parentage need be supported by only one document which may be one of the documents above. Documents presented shall be in the form of the original record or a duly certified copy thereof or a certification statement from the custodian of the record or document.

99.7(3) All documents submitted in evidence must have been executed at least ten years prior to the date of application or have been established prior to the applicant's tenth birthday.

99.7(4) Rescinded IAB 8/4/93, effective 7/16/93.

641—99.8(144) Abstraction and certification by state registrar. The state registrar or the registrar's designated representative shall abstract on the delayed certificate of birth a description of each document submitted to support the facts on the delayed birth certificate. This description shall include:

1. The title or description of the document;
2. The name and address of the affiant if the document is an affidavit of personal knowledge or of the custodian if the document is an original or certified copy of a record or certification statement;
3. The date of the original filing of the document being abstracted;
4. The information regarding the birth and parentage contained in the document.

641—99.9(144) Documents returned.

99.9(1) The state registrar or authorized agent shall by signature certify:

- a.* That no prior birth certificate is on file for the person whose birth is to be recorded;
- b.* That the state registrar or authorized agent has reviewed the evidence submitted to establish the facts of birth;
- c.* That the abstract of the evidence appearing on the delayed birth certificate accurately reflects the nature and content of the document.

99.9(2) All documents submitted in support of the delayed birth registration shall be returned to the applicant after review and abstraction.

641—99.10(144) Cancellation after one year. Delayed certificates not completed within one year may be canceled at the discretion of the state registrar. Upon cancellation, the state registrar shall return to the applicant all documents that have been submitted.

641—99.11(144) Duties of county registrar. Documentary evidence may be presented to the county registrar for review. If presented to the county registrar, the county registrar shall prepare an abstract for each document on a separate form provided by the state registrar. The abstracts along with the partially completed delayed certificate form and any affidavits that are being presented in evidence shall be transmitted to the state registrar for final determination of acceptability.

641—99.12(144) Delayed registration of death records.

99.12(1) The registration of a death after the statutory time prescribed for filing shall be registered on the standard form of death certificate in use at the time of registration.

99.12(2) If the attending physician or medical examiner at the time of death and the attending funeral director or person who acted as such are available to complete and sign the certificate of death, it may be completed without additional documentary evidence and filed with the state registrar. However, for those certificates filed one year or more after the date of death, the physician or medical examiner must state on the reverse side of the certificate that the information on the certificate is based on records kept in the files.

99.12(3) In the absence of the attending physician or medical examiner or the funeral director or person who acted as such, the certificate may be filed by a member of the immediate family of the deceased and shall be accompanied by:

- a.* An affidavit of the person filing the certificate swearing to the accuracy of the information in the certificates;
- b.* Two documents which identify the deceased and the date and place of death.

99.12(4) In all cases, the state registrar may require additional documentary evidence to prove the facts of death.

641—99.13(144) Delayed registration of marriage records.

99.13(1) A delayed certificate of marriage may be filed by the husband or wife or survivor if either party has died, or an adult son or daughter for any marriage performed in Iowa and not recorded within the statutory time prescribed for filing.

99.13(2) To be acceptable for registration by the state registrar, the delayed certificate of marriage must be supported by:

- a.* A copy of the license or the application for the license; and
- b.* A statement transcribed from the official records where the marriage was performed or of the person who performed the ceremony proving that there was a marriage and the date and place of such marriage. Such statements must be prepared and sworn to by the custodian of such records; or
- c.* An affidavit from one witness to the wedding ceremony swearing to the facts of the marriage.

99.13(3) The delayed certificate of marriage shall be the form of marriage certificate in use at the time of registration.

These rules are intended to implement Iowa Code sections 144.3, 144.15, 144.16, and 144.17.

[Filed June 8, 1971]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed emergency 7/16/93—published 8/4/93, effective 7/16/93]

CHAPTER 100
ESTABLISHMENT OF NEW CERTIFICATES OF BIRTH
[Prior to 7/29/87, Health Department[470] Ch 100]

641—100.1(144) Certificates, forms. The standard form of certificate of birth in use at the time of preparation of the new certificate of birth shall be used.

641—100.2(144) Data required. To establish a new certificate following legitimation or determination of paternity, the necessary data to locate the original record and appropriate parental data shall be on a form furnished or approved by the state registrar.

641—100.3(144) Certificate following adoption.

100.3(1) A new certificate of birth may be prepared by the state registrar for a child born in Iowa upon receipt of an adoption report or certified copy of an adoption decree from the courts of Iowa or the several states of the United States.

100.3(2) A new certificate of birth may be prepared by the state registrar for a child born in a foreign nation upon request of resident adoptive parent(s) and receipt of all of the following documents:

a. Authenticated adoption decree in both the foreign language and English containing the official signature of the translator or an adoption report or certified copy of an adoption decree from the courts of Iowa;

b. If the decree does not contain all required fields to establish the certificate of foreign birth, then an adoptee's authenticated birth certificate in the foreign language and the English translation containing the official signature of the translator;

c. Adoptee's original permanent residence card (green card) or passport containing the official stamped I-551 statement of temporary evidence of permanent residence;

d. Certified copy of the birth certificate of the adoptive parent(s); and

e. Notarized statement on letterhead from the licensed adoption agency or certified adoption investigator that establishes parental residency.

By the authority of Public Law 106-395, a foreign-born child adopted by a U.S. citizen after February 27, 2001, automatically becomes a U.S. citizen. A certificate of citizenship may be obtained from the Immigration and Naturalization Service, and a passport may be obtained from the Department of State.

100.3(3) The name reflected on the certificate shall be the child's name exactly as listed on the decree presented to the state registrar. A legal change of name issued pursuant to Iowa Code chapter 674 shall be required to change the name.

100.3(4) The state registrar shall collect the fee for processing and registering the birth.

641—100.4(144) Certificate following legitimation.

100.4(1) If the natural parents of a child intermarry after the birth of the child, a new certificate of birth may be prepared if the child was born in Iowa. However, if another man is shown as the father on the original certificate, a new certificate may be prepared only when a determination of paternity is made by a court of competent jurisdiction.

100.4(2) An affidavit of paternity prepared and signed by the natural parents and a certified copy of the parents' marriage record or a certified copy of the court determination of paternity must be submitted to the state registrar in order that a new certificate may be prepared.

641—100.5(144) Certificate following determination of paternity. A certified copy of the court determination of paternity along with the request of the mother that a new certificate be prepared must be submitted to the state registrar in order that a new certificate may be prepared.

641—100.6(144) Minimum information required. In addition to the information required by law, the new certificate shall also contain as a minimum the following items:

1. The name of the child;
2. The date and place of birth as transcribed from the original certificate;

3. The names and personal particulars of the adoptive parents or of the natural father;
4. The name of the attendant, printed or typed;
5. The same birth number as was assigned to the original certificate;
6. The original filing date.

641—100.7(144) Original certificate to be sealed. After preparation of the new certificate, the original certificate and the evidence upon which it was based are to be sealed and placed in a special file. The state registrar may inspect such sealed information for purposes of properly administering the vital statistics program.

These rules are intended to implement Iowa Code section 144.3.

CHAPTER 101
DEATH CERTIFICATION, AUTOPSY AND DISINTERMENT
[Prior to 7/29/87, Health Department[470] Ch 101]

641—101.1(144) Report of autopsy findings.

101.1(1) In cases where an autopsy is to be performed, it shall not be necessary to defer the entry of the cause of death pending a full report of microscopic and toxicological studies.

101.1(2) In any case where the gross findings of an autopsy are inadequate to determine the cause of death, the physician or medical examiner shall enter the cause as “pending” on the certificate and sign the certification. Immediately after the medical data necessary for determining the cause of death have been made known, the physician or medical examiner shall forward the cause of death to the registrar on a supplemental form provided by the state registrar and signed by the physician or medical examiner.

101.1(3) In any case where the autopsy findings significantly change the medical diagnosis of cause of death, a supplemental report of the cause of death shall be made by the physician or medical examiner to the registrar as soon as the findings are available. Such report shall be made a part of the original certificate.

641—101.2(144) Attending physician not available. An associate physician, who relieves the attending physician while on vacation or otherwise unavailable, may certify to the cause of death in any case where the associate physician has access to the medical history of the case, provided that the associate physician views the deceased at or after death occurs and the death is from natural causes. In all other cases in which a physician is unavailable, the medical examiner shall prepare the medical certification of cause of death.

641—101.3(144) Hospital or institution may assist in preparation of certificate. When death occurs in a hospital or other institution and the death is not under the jurisdiction of the medical examiner, the person in charge of such institution or the designated representative where the cause of death is known may aid in the preparation of the death certificate as follows:

Place the full name of the deceased, date and place of death on the death certificate blank and obtain from the attending physician the medical certification of cause of death and the signature of the attending physician;

Present the partially completed death certificate (identified by the name) and the completed medical certification to the funeral director or person who acted as such.

641—101.4(135) Removal of dead body or fetus.

101.4(1) Before assuming custody of a dead human body or fetus, any person shall:

a. Contact the attending physician and receive assurance that death is from natural causes and that the physician will assume responsibility for certifying to the cause of death or fetal death; or

b. If the case comes within the jurisdiction of the medical examiner, contact the medical examiner and receive authorization to remove the dead human body or fetus.

101.4(2) If a person other than a funeral director, medical examiner, or emergency medical service assumes custody of a dead human body or fetus, the person shall secure a burial-transit permit.

641—101.5(144) Burial-transit permit.

101.5(1) The burial-transit permit shall be issued upon a form prescribed by the state registrar and shall state:

a. The name, date of death, cause of death and other necessary details required by the state registrar;

b. That a satisfactory certificate of death has been filed;

c. That permission is granted to inter, remove or otherwise dispose of the body; and

d. The name and location of the cemetery or crematory where final disposition of the body is to be made.

The burial-transit permit shall be issued by the county medical examiner, a funeral director, or the county registrar of the county where the certificate of death or fetal death was filed.

101.5(2) The burial-transit permit shall be delivered to the person in charge of the place of final disposition.

101.5(3) The person in charge of every place of final disposition shall see that all of the requirements of this chapter relative to burial-transit permits have been complied with before disposition. Such person shall retain the burial-transit permit for a period of one year from the date of final disposition.

101.5(4) A burial-transit permit shall not be issued prior to the filing of a certificate of death or fetal death in the county where the death occurred.

101.5(5) A burial-transit permit shall not be issued to a person other than a licensed funeral director if the death or fetal death is of a suspected or known communicable disease as defined by 641—paragraph 1.2(1) “a.”

101.5(6) In all cases where a fetus has reached a gestation period of 20 completed weeks or more, or with a weight of 350 grams or more, a burial-transit permit must be obtained for the disposition of the fetus.

641—101.6(135) Transportation and disposition of dead body or fetus.

101.6(1) A dead human body or fetus shall be transported only after enclosure in a container for transfer that will control odor and prevent the leakage of body fluids, unless the body or fetus has been embalmed, or is being transported by a licensed funeral director, emergency medical service, or medical examiner. In addition, the transport of a dead human body or fetus shall be in a manner that, applying contemporary community standards with respect to what is suitable, is respectful of the dead, the feelings of relatives, and the sensibilities of the community.

101.6(2) When a dead human body or fetus is transported from the state, the burial-transit permit shall accompany the body or fetus. When a dead human body or fetus is brought into the state, a burial-transit permit under the law of the state in which the death occurred shall accompany the body or fetus.

101.6(3) If the final disposition of a dead human body or fetus is cremation at a licensed cremation establishment, scattering of cremated remains shall be subject to the local ordinances of the political subdivision, and any and all regulations of the cemetery, if applicable, in which the scattering site is located. However, such local ordinances and cemetery regulations shall not allow scattering of cremated remains upon state property or upon private property without the property owner’s consent. In the absence of an applicable local ordinance or cemetery regulation, scattering of cremated remains shall not be allowed upon any public property or upon private property without the property owner’s consent. Cremation shall be considered final disposition by the department and no further burial-transit permits shall be required.

101.6(4) If the final disposition of a dead human body or fetus is burial, interment or entombment, local ordinances of the political subdivision in which the final disposition site is located and any and all regulations of the cemetery, if applicable, shall apply. In the absence of an applicable local ordinance, the depth of the grave at its shallowest point shall be at least three feet from the top of the burial container.

641—101.7(135,144) Disinterment permits.

101.7(1) Disinterment permits shall be required for any relocation (above or below ground) of a body from its original site of interment. Disinterment permits shall be valid for 30 days after the date of issuance. Disinterment permits are to be issued on a four-copy form prescribed by the state registrar: one copy filed with the sexton or person in charge of the cemetery in which disinterment is to be made; one copy to be used during transportation; one copy filed with the sexton or person in charge of the cemetery of reinterment; and one copy to be returned within ten days after the date of disinterment by the funeral director or embalmer to the state registrar.

101.7(2) A dead body, properly prepared by an embalmer and deposited in a receiving vault, shall not be considered a disinterment when removed from the vault for final burial.

641—101.8(144) Extension of time. If the attending physician or medical examiner is unable to complete the medical certification of cause of death or if the funeral director is unable to obtain the personal information about the deceased within the statutory time period, the funeral director shall file a death certificate form completed with all information available. Such certificate shall be authority for the county registrar to issue a burial-transit permit. As soon as possible, but in all cases within 15 days, a supplemental report shall be filed with the local registrar providing the information missing from the original certificate.

These rules are intended to implement Iowa Code sections 135.11(9), 144.3 and 144.32.

CHAPTER 102
CORRECTION AND AMENDMENT OF VITAL RECORDS
[Prior to 7/29/87, Health Department[470] Ch 102]

641—102.1(144) Application to amend records.

102.1(1) To amend a birth certificate, application may be made only by one of the parents, the guardian, or the registrant if of legal age.

102.1(2) To amend a death or fetal death certificate, application shall be made by the next of kin or the funeral director or person acting as such. Corrections or amendments to the medical certification of cause of death shall be requested by the attending physician or the medical examiner. The physician or medical examiner may by affidavit amend the cause of death within 90 days following the date of death or fetal death. Any amendment after 90 days following death or fetal death can be made only by court order. Provided, however, that the cause of death may be amended at any point upon submission of a report of autopsy findings.

102.1(3) To amend a marriage record, application shall be made by the parties married, the officiant, or by the next of kin.

102.1(4) To amend a divorce record, a certification must be received from the clerk of court maintaining the record from which the report was prepared stating in what manner such record has been amended. Those items appearing on the divorce record which are not a part of the divorce decree may be corrected or amended either by query or upon application of the parties to the divorce or their legal representatives.

641—102.2(144) Correction of minor errors within first year. Corrections of obvious errors, transposition of letters in words of common knowledge, or omissions, may be made by the state registrar within the first year after the date of the event, either upon observation, upon query, or upon request of a person with a direct and tangible interest in the record. If such additions or minor corrections are made by the state registrar, a notation as to the source of the information, together with the date the change was made and the initials of the authorized agent making the change, shall be made on the record. Certificates corrected under this section are not to be marked amended.

641—102.3(144) Amendments or major corrections.

102.3(1) All other corrections or amendments unless covered elsewhere in these rules or in the law, shall be supported by:

a. An affidavit setting forth

- (1) Information to identify the certificate;
- (2) The incorrect data as it is listed on the certificate;
- (3) The correct data as it should appear.

b. One or more pieces of documentary evidence supporting the correction or amendment. If the application for correction or amendment is made one year or more after the event, the documentary evidence must be established at least five years prior to the date the correction or amendment is requested or within seven years of the date of event.

102.3(2) The state registrar may determine a priority of best evidence and may, upon discretion, require additional documentary evidence to support the requested correction or amendment. The state registrar shall evaluate the evidence submitted in support of any amendment, and when there is reason to question its validity or adequacy, the state registrar may reject the amendment and shall advise the applicant of the reasons for this action.

641—102.4(144) Correction of same item more than once. Once a correction of an entry is made on a vital record, that entry shall not be corrected again unless:

1. It can be shown that the first correction was made through mistake; or
2. A court order is received from a court of competent jurisdiction.

641—102.5(144) Methods of amending certificates. Corrections or amendments shall be made by drawing a single line through the incorrect item, if listed, and inserting the correct or missing data immediately above it or to the side of it, or by completing the blank item, as the case may be. In all cases where a line must be drawn through an original entry, it must not obliterate the original entry. In addition, there shall be inserted on the certificate, or in a separate file, a statement identifying the affidavit and documentary evidence used as proof of the correct facts and the date the correction was made. The word “amended” shall be placed on the certificate. In every case where the word “amended” is required to appear on the certificate, it shall appear on all copies of such certificates.

641—102.6(144) Amendment of birth certificate by paternity affidavit. A certificate of birth may be amended to show paternity, if paternity is not shown on the certificate, by submission of a sworn acknowledgment or affidavit signed by both parents. Where there is a legal finding of fact that the husband of the mother at time of conception or birth is not the biological father of the child, the husband’s name shall be removed. Subsequent to the removal of the husband’s name a sworn acknowledgment or affidavit may be used to establish paternity. The certificate shall not be marked as “amended.”

641—102.7(144) Change of given names within first year.

102.7(1) Until the registrant’s first birthday, given names may be added or changed upon written request of:

- a.* Both parents; or
- b.* The mother in the case of a child born out of wedlock or the death or incapacity of the father; or
- c.* The father in the case of the death or incapacity of the mother; or
- d.* The guardian in the case of the death or incapacity of both parents.

102.7(2) This procedure may be employed to change a given name only once. Thereafter, and at any time after the first year, the given name may be changed only upon submission of a court order.

641—102.8(144) Addition of given names until seventh birthday.

102.8(1) Until the registrant’s seventh birthday, the given name for a child whose birth was reported without a given name may be added based upon an affidavit signed by:

- a.* Both parents; or
- b.* The mother in the case of a child born out of wedlock or the death or incapacity of the father; or
- c.* The father in the case of the death or incapacity of the mother; or
- d.* The guardian or agency having legal custody of the registrant in the case of death or incapacity of both parents.

102.8(2) A certificate amended in this manner is not to be marked “amended.”

641—102.9(144) Addition of given name after seventh birthday. After the seventh birthday one or more pieces of documentary evidence must be submitted to substantiate the given name being added.

641—102.10(144) Legal change of name. For a legal change of name, a certified copy of the court order changing the name must be presented to the state registrar along with data to identify the birth certificate and a request that it be amended to show the new name.

These rules are intended to implement Iowa Code section 144.3.

[Filed 9/23/83, Notice 8/3/83—published 10/12/83, effective 11/16/83]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

CHAPTER 103
CONFIDENTIALITY OF RECORDS
[Prior to 7/29/87, Health Department[470] Ch 103]

641—103.1(144) Disclosure of data.

103.1(1) The state registrar or county registrar shall permit the inspection of a record or issue a certified copy of a record or part thereof only when satisfied that the applicant has a direct and tangible interest in the content of the record and that the information contained therein is necessary for the determination of a personal or property right.

a. A request from the registrant, a member of the immediate family, the guardian, or their respective legal representatives shall be considered to be a direct and tangible interest.

b. For the purpose of securing information or obtaining certified copies of vital records, the term legal representative shall include an attorney, physician, funeral director, insurance company, or an authorized agency acting in behalf of the registrant or the registrant's family.

c. For the purpose of securing and obtaining data from vital records, requests from natural parents of adopted children, in the absence of a court order, and requests from commercial firms or agencies requesting listings of names and addresses shall not be considered to be direct and tangible interest.

103.1(2) The state registrar may permit use of data of vital statistics records for research purposes subject to conditions the state registrar may impose to ensure that the use of the data is limited to such research purposes.

103.1(3) The state registrar or county registrar may disclose data from vital statistics records to federal, state, county or municipal agencies of government which request such data in the conduct of their official duties, subject to conditions the state registrar may impose to ensure that the use of the data is limited to official purposes.

103.1(4) Information in vital records indicating a birth occurred out of wedlock shall be released by the state registrar to the registrant, to the legal parent(s), to the legal grandparents, to the legal guardian, to their respective legal representatives, to an authorized agency acting on behalf of the registrant or upon order of a district court. Information may also be released to a legal descendant, or the descendant's authorized agent, who has direct and tangible interest and satisfactorily substantiates a direct lineal consanguinity.

103.1(5) Whenever it shall be deemed necessary to establish an applicant's right to information from vital statistics records, the state registrar or county registrar may require written application, identification of the applicant, or a sworn affidavit.

103.1(6) No data shall be furnished from records for research purposes until the state registrar has prepared in writing the conditions under which the records may be used and received an agreement signed by a responsible agent of the research organization agreeing to meet with and conform to such conditions.

103.1(7) The state registrar or the registrar's designee shall have the right to appoint volunteers to assist with vital records. All volunteers utilized for the purging project for vital records shall be responsible to, and under the direction of, the state registrar or designees. Volunteers will be screened by the state registrar or the registrar's designee prior to participation. This purging shall be done in a secure place maintained to ensure the confidentiality of the vital records in question.

All volunteers will be required to sign an oath swearing to abide by all appropriate statutes and rules applicable to nondisclosure of confidential information contained in accessed vital records. The volunteers' obligation of confidentiality is to be clearly spelled out in the agreement as well as all penalties which the volunteers may be subjected to if violations occur.

All volunteers serve without compensation.

These rules are intended to implement Iowa Code section 144.3.

[Filed June 8, 1971]

[Filed 3/26/82, Notice 2/17/82—published 4/14/82, effective 5/19/82]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed 5/12/88, Notice 2/24/88—published 6/1/88, effective 7/6/88]

CHAPTER 104
COPIES OF VITAL RECORDS
[Prior to 7/29/87, Health Department[470] Ch 104]

641—104.1(144) Certified copies and verifications. Certified copies of vital statistics certificates may be prepared and issued by the state registrar or the county registrar.

104.1(1) Full- or short-form certified copies of vital records may be made by mechanical, electronic, or other reproductive processes, except that the medical and health data on birth and fetal death certificates, other than the cause of fetal death, shall not be included.

104.1(2) When a certified copy is issued, each certification shall contain a statement certifying that the facts are the true facts recorded in the issuing office; the date issued; the name of the issuing office; the registrar's signature or an authorized facsimile thereof; and the seal of the issuing office.

104.1(3) Confidential verifications of the facts contained in vital statistics records may be furnished by the state registrar to any federal, state, county or municipal government agency or other entity representing the interest of the registrant. Such confidential verifications shall be on forms prescribed and furnished by the state registrar or on forms furnished by the requesting agency and acceptable to the state registrar, or the state registrar may authorize the verification in other ways.

641—104.2(144) Cancellation of fraudulent records. When the state registrar is satisfied that a certificate was registered through fraud or misrepresentation, the state registrar shall give to the person named in the certificate a notice in writing of the state registrar's intention to cancel said certificate. The notice shall give such person an opportunity to appear and show cause why the certificate should not be canceled. The notice may be served on such person, or in the case of a minor or incompetent, on parent or guardian by forwarding the notice by certified mail to the last-known address on file in the division. Unless such person or the parent or guardian shall within 30 days after the date of mailing the notice show cause satisfactory to the state registrar why the certificate shall not be canceled, the state registrar may cancel the certificate, and it shall not be available for certification.

These rules are intended to implement Iowa Code section 144.3.

[Filed June 8, 1971]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

CHAPTER 105
DECLARATION OF PATERNITY REGISTRY

641—105.1(144) Definitions.

“*Child*” means a person under 18 years of age for whom paternity has not been established.

“*Court*” means the juvenile court.

“*Father*” means the male, biological parent of a child.

“*Putative father*” means a man who is alleged to be or who claims to be the biological father of a child born to a woman to whom the man is not married at the time of the birth of the child.

“*Registrant*” means a person who has registered and who claims to be the father of a child.

“*Registrar*” means the state registrar of vital statistics.

“*Registry*” means the declaration of paternity registry.

641—105.2(144) Registry established. There is established in the Bureau of Vital Records a registry for the declaration of paternity to be kept separately from paternity. The declaration may be filed prior to the birth of a child and no later than the date of the filing of a petition for termination of parental rights. Failure or refusal to file a declaration of paternity shall not be used as evidence to avoid a legally established obligation of financial support for a child.

641—105.3(144) Information to be provided. A person who files a declaration of paternity with the state registrar shall complete the correct form and provide all of the following:

1. Registrant’s name, current address, social security number, notarized signature and date.
2. The name, last known address, and social security number, if known, of the mother of the child.
3. The name of the child, if known, and the date and location of the birth of the child, if known.

A copy of the declaration of paternity shall be forwarded by the state registrar to the mother as notification that the person has registered if the mother’s name and address are known.

641—105.4(144) Change of address. The person who files the declaration will be responsible to notify the state registrar in writing of any change in address.

641—105.5(144) Fees. There shall be no fee required to file the declaration.

There shall be a fee charged for searches of the registry and the fee shall be the same as the fee charged for searches of other vital records as established by IAC 641—96.4(144). After a search is completed and no declaration of paternity is on file, a written statement to that effect shall be provided to the person making the inquiry. The fee shall be retained for the search.

641—105.6(144) Access to registry information. The information shall not be divulged to any other person and shall be considered a confidential record as to any other person, except upon order of the court for good cause shown.

The department shall, upon request, provide the name, address, and social security number of a registrant to the following:

1. The biological mother of the child;
2. A court;
3. The department of human services, child support recovery unit, for an action to establish paternity or support.
4. The attorney of any party to an adoption, termination of parental rights, or establishment of paternity or support action.

If the registry has not received a declaration of paternity, the department shall provide a written statement to that effect to the person making the inquiry.

641—105.7(144) Revocation. Information provided to the registry may be revoked by the registrant by submission of a written statement provided by the department, signed and acknowledged by the registrant before a notary public. The statement shall include a declaration that to the best of the registrant’s

knowledge, the registrant is not the father of the named child or that paternity of the true father has been established. Revocation shall be deemed a nullity and the information provided by the registrant shall be expunged. Revocation is effective only following the birth of the child.

641—105.8(144) Forms. All forms for the declaration of paternity shall be available from the state registrar of vital records and the county registrar which is the clerk of the district court located in each county.

These rules are intended to implement 1994 Iowa Acts, chapter 1174.

[Filed 11/10/94, Notice 8/31/94—published 12/7/94, effective 1/11/95]

CHAPTER 106
REPORTING OF TERMINATION OF PREGNANCY

641—106.1(144) Definitions.

“Aggregate form” means a compilation of the information received by the department on termination of pregnancies for each information item listed, with the exception of the report tracking number, the health care provider code, and any set of information for which the number is so small that the confidentiality of any person to whom the information relates may be compromised.

“Health care provider” means an individual licensed under Iowa Code chapter 148, 148C, 148D, 150, 150A, or 152 or any individual who provides medical services under the authorization of the licensee.

“Inducing a termination of pregnancy” means the use of any means to terminate the pregnancy of a woman known to be pregnant with the intent other than to produce a live birth or to remove a dead fetus.

“Spontaneous termination of pregnancy” means occurrence of an unintended termination of pregnancy at any time during the period from conception to 20 weeks’ gestation and which is not a spontaneous termination of pregnancy at any time during the period from 20 weeks or greater which is reported to the department as a fetal death under this chapter.

641—106.2(144) Report of termination of pregnancy. A health care provider who initially identifies and diagnoses a spontaneous termination of pregnancy or who induces a termination of pregnancy shall file with the department a report for each termination. The health care provider shall make a good-faith effort to obtain all of the following information that is available with respect to each termination:

1. The confidential health care provider code as assigned by the department;
2. The report tracking number;
3. The maternal health services region of the Iowa department of public health, as designated as of July 1, 1997, in which the patient resides. If the patient resides in another state, the residence shall be reported as nonresident;
4. The race of the patient;
5. The age of the patient;
6. The marital status of the patient;
7. The educational level of the patient;
8. The number of previous pregnancies, live births, and spontaneous or induced termination of pregnancies;
9. The month and year in which the termination occurred;
10. The number of weeks since the patient’s last menstrual period and clinical estimate of gestation.

The health care provider who identifies a spontaneous or induced termination shall prepare the report on the standard form and forward to the state registrar on or before the tenth day of each calendar month all records for the preceding month. Reports shall be sent certified restricted mail to the Bureau of Vital Statistics. Termination reports shall be returned within 30 days of the date of occurrence. Forms shall be provided by the department.

641—106.3(144) Confidentiality of released information. The information shall be collected, reproduced, released, and disclosed in a manner which ensures the anonymity of the patient who experiences a termination of pregnancy, the health care provider who identifies and diagnoses or induces a termination of pregnancy, and the hospital, clinic, or other health facility in which a termination of pregnancy is identified and diagnosed or induced. The department may share information with federal public health officials for the purpose of securing federal funding or conducting public health research. However, in sharing the information, the department shall not relinquish control of the information, and any agreement entered into by the department with federal public health officials to share information shall prohibit the use, reproduction, release, or disclosure of the information by federal public health officials in a manner which violates this chapter. The department shall annually publish a demographic summary of the information obtained pursuant to this chapter, except that the department shall not

reproduce, release, or disclose any information obtained pursuant to this chapter which reveals the identity of any patient, health care provider, hospital, clinic, or other health facility, and shall ensure anonymity in the following ways:

106.3(1) The department may use information concerning the report tracking number or concerning the identity of a reporting health care provider, hospital, clinic, or other health facility only for purposes of information collection. The department shall not reproduce, release, or disclose this information for any purpose other than for use in annually publishing the demographic summary under this chapter.

106.3(2) The department shall enter the information, from any report of termination submitted, within 30 days of receipt of the report, and shall immediately destroy by shredding the report following entry of the information. However, entry of the information from a report shall not include any health care provider, hospital, clinic, or other health facility identification information including, but not limited to, the confidential health care provider code, as assigned by the department.

106.3(3) To protect confidentiality, the department shall limit release of information to release in an aggregate form which prevents identification of any individual patient, health care provider, hospital, clinic, or other health facility.

The department shall establish and use a methodology to provide a statistically verifiable basis for any determination of the aggregate level at which information may be released so that the confidentiality of any person is not compromised. The methodology shall consider both the counts of the events for each item of information and the population that could be represented.

641—106.4(144) Confidentiality of reports submitted. Reports, information, and records submitted and maintained pursuant to this chapter are strictly confidential and shall not be released or made public upon subpoena, search warrant, discovery proceedings, or by any other means.

641—106.5(144) Provider codes. The department shall assign a code to any health care provider who may be required to report a termination under this chapter. An application procedure shall not be required for assignment of a code to a health care provider.

A health care provider shall assign a report tracking number which enables the health care provider to access the patient's medical information without identifying the patient. The report tracking number shall be maintained by the provider for a period of six months after the end of the calendar year.

To ensure proper performance of the reporting requirements under this chapter, it is preferred that a health care provider who practices within a hospital, clinic, or other health facility authorize one staff person to fulfill the reporting requirements.

641—106.6(144) Unlawful acts—punishment. Any person who knowingly violates a provision of these rules is guilty of a serious misdemeanor.

These rules are intended to implement 1997 Iowa Acts, Senate File 128.

[Filed emergency 7/11/97 after Notice 6/4/97—published 7/30/97, effective 7/11/97]

CHAPTER 107
MUTUAL CONSENT VOLUNTARY ADOPTION REGISTRY

641—107.1(78GA, HF497) Definitions.

“*Adult*” means an individual who has reached the age of 18 years at the time of making application to the registry.

“*Department*” means the department of public health.

“*Sibling*” means one of two or more persons born of the same parents or, sometimes, having one parent in common; brother or sister.

641—107.2(78GA, HF497) Eligibility. The state registrar shall establish a mutual consent voluntary adoption registry through which adult adopted children, adult siblings and the biological parents of adult adoptees may register to obtain identifying information. All identifying information maintained in the registry is confidential. Any person who discloses such information in violation of Iowa law is subject to criminal penalties. All requests shall be completed on the form provided by the department.

107.2(1) The state registrar shall reveal the identity of the biological parent to the adult adopted child or the identity of the adult adopted child to the biological parent if the following conditions are met:

a. A biological parent has filed a completed request form and provided consent to the revelation of the biological parent’s identity to the adult adopted child, upon request of the adult adopted child; and

b. An adult adopted child has filed a completed request form and provided consent to the revelation of the identity of the adult adopted child to a biological parent, upon request of the biological parent.

107.2(2) The state registrar shall reveal the identity of the adult adopted child to an adult sibling and shall notify the parties involved that the requests have been matched, and disclose the identifying information to those parties if all of the following conditions are met:

a. An adult adopted child has filed a completed request form and provided consent to the revelation of the adult adopted child’s identity to an adult sibling;

b. The adult sibling has filed a completed request form and provided consent to the revelation of the identity of the adult sibling to the adult adopted child; and

c. The state registrar has been provided sufficient information to make the requested match.

641—107.3(78GA, HF497) Exception. If the adult adopted person has a sibling who is a minor and who has also been adopted, the state registrar shall not grant the request of either the adult adopted person or the biological parent to reveal the identities of the parties.

641—107.4(78GA, HF497) Application. Application forms shall be provided by the department and shall be the only application accepted for registration. The adult adoptee, adult sibling, and biological parent completing an application shall be responsible for updating the contact information required.

641—107.5(78GA, HF497) Notification. Notification of parties shall be initiated via telephone at which time address information shall be verified and written notice sent to the parties involved. Written notice shall be mailed via certified mail with return notification requested.

641—107.6(78GA, HF497) Withdrawal. A person who has filed a request or provided consent may withdraw the consent at any time prior to the release of any information by completing and filing a written withdrawal of consent statement on the form provided by the department.

641—107.7(78GA, HF497) Fees. The state registrar shall collect a fee of \$25 for the filing of a completed application for the registry. A fee of \$2 shall be charged for updating applicant information maintained in the registry.

These rules are intended to implement 1999 Iowa Acts, House File 497, section 19.

CHAPTER 108
Reserved

CHAPTER 109
PRESCRIPTION DRUG DONATION REPOSITORY PROGRAM

641—109.1(135M) Definitions. For purposes of this chapter, the following definitions apply:

“Centralized repository” means a distributor approved by the contractor and licensed pursuant to 657 IAC Chapter 17 that accepts donated drugs, conducts a safety inspection of the drugs, and ships the donated drugs to a local repository to be dispensed in compliance with this chapter and federal and state laws, rules and regulations.

“Contractor” means the third party approved by the department to implement and administer the prescription drug donation repository program.

“Controlled substance” means the same as defined in Iowa Code section 124.101.

“Department” means the Iowa department of public health.

“Indigent” means a person with an income that is below 200 percent of the federal poverty level (FPL) as defined by the most recently revised poverty income guidelines published by the United States Department of Health and Human Services.

“Local repository” means a pharmacy or medical facility that elects to accept and dispense donated drugs and that meets the eligibility requirements of rule 641—109.3(135M).

“Medical facility” means any of the following:

1. A physician’s office.
2. A hospital.
3. A health clinic.
4. A nonprofit health clinic, including a federally qualified health center as defined in 42 U.S.C. § 1396d(1)(2)(B); a rural health clinic as defined in 42 U.S.C. § 1396d(1)(1); and a nonprofit health clinic that provides medical care to patients who are indigent, uninsured, or underinsured.

5. A free clinic as defined in Iowa Code section 135.24.

6. A charitable organization as defined in Iowa Code section 135.24.

7. A nursing facility as defined in Iowa Code section 135C.1.

“NDC #” means the unique national drug code number that identifies a specific approved drug.

“Nurse practitioner” means an advanced registered nurse practitioner as defined in 655 IAC Chapter 7.

“Pharmacist” means a pharmacist as defined in Iowa Code section 155A.3.

“Pharmacy” means a pharmacy as defined in Iowa Code section 155A.3.

“Physician” means an individual licensed under Iowa Code chapter 148, 150, or 150A.

“Prescription drug” means the same as defined in Iowa Code section 155A.3 and includes cancer drugs and antirejection drugs, but does not include controlled substances.

“Supplies” means the supplies necessary to administer the prescription drugs donated.

“USP” means United States Pharmacopoeia.

641—109.2(135M) Purpose. The overall purpose of this chapter is to establish administrative rules in accordance with Iowa Code chapter 135M relative to the following:

1. Requirements for medical facilities and pharmacies to accept and dispense donated prescription drugs and supplies.
2. Eligibility criteria for individuals to receive donated prescription drugs and supplies.

641—109.3(135M) Eligibility criteria for program participation by medical facilities and pharmacies.

109.3(1) To be eligible for participation in the prescription drug donation repository program, a medical facility or pharmacy shall be in compliance with all applicable federal and state laws, including laws applicable to the storage and distribution of drugs and the appropriate licensure standards, and shall hold active, nonrestricted, state-issued licenses or registrations in good standing.

109.3(2) Participation in the prescription drug donation repository program is voluntary.

109.3(3) A pharmacy or medical facility may elect to participate in the prescription drug donation repository program by providing, on a form prescribed by the department and available on the program's Web page, written notification to the centralized repository of all of the following:

a. The name, street address, and telephone number of the pharmacy or medical facility, and any state-issued license or registration number issued to the pharmacy or medical facility, including the name of the issuing agency.

b. The name and telephone number of the responsible pharmacist, physician or nurse practitioner who is employed by or under contract with the pharmacy or medical facility.

c. A statement, signed and dated by the responsible pharmacist, physician or nurse practitioner, indicating that the pharmacy or medical facility meets the eligibility requirements under this rule and shall comply with the requirements of this chapter.

109.3(4) Withdrawal from participation. A pharmacy or medical facility may withdraw from participation in the prescription drug donation repository program at any time by providing written notice to the centralized repository on a form prescribed by the department and available on the program's Web page.

641—109.4(135M) Standards and procedures for accepting donated prescription drugs and supplies.

109.4(1) Any individual who is 18 years of age or older may donate legally obtained prescription drugs or supplies to the centralized repository or a local repository if the drugs or supplies meet the requirements of this rule, as determined by a pharmacist who is employed by or under contract with a drug repository.

109.4(2) No drugs that require storage temperatures other than normal room temperature as specified by the manufacturer or United States Pharmacopoeia shall be donated or accepted as part of the prescription drug donation repository program. Drugs that require storage temperatures other than normal room temperature as specified by the manufacturer or USP shall not be donated or accepted because of the increased potential for these drugs to become adulterated. Excluded from this restriction are drugs donated directly from a drug manufacturer.

109.4(3) Controlled substances shall not be donated or accepted. Pursuant to federal and state laws, a controlled substance cannot be returned or reused once the drug has been dispensed to a patient.

109.4(4) The centralized repository or a local repository may accept a prescription drug only if all of the following requirements are met:

a. The drug is in its original sealed and tamper-evident packaging. However, a drug in a single-unit dose or blister pack with the outside packaging opened may be accepted if the single-unit-dose packaging is undisturbed;

b. The drug has been stored according to manufacturer or USP storage requirements;

c. The packaging contains the lot number and expiration date of the drug. If the lot number is not retrievable, all specified medications will be destroyed in the event of a recall, pursuant to Iowa board of pharmacy rules;

d. The drug has an expiration date that is more than six months after the date that the drug was donated. However, a donated prescription drug bearing an expiration date that is six months or less after the date the prescription drug was donated may be accepted and distributed if the drug is in high demand and can be dispensed for use prior to the drug's expiration date;

e. The drug does not have any physical signs of tampering or adulteration, and there is no reason to believe that the drug is adulterated;

f. The packaging does not have any physical signs of tampering, misbranding, deterioration, compromised integrity or adulteration; and

g. All drugs shall be inventoried at the centralized repository or a local repository. The inventory shall include the name of the drug, strength of the drug, quantity of the drug, and the date of donation if the drug has been continually under the control of a health care professional. If the drug has not been continually under the control of a health care professional, the repository shall collect a donation form

provided by the prescription drug donation repository program that is signed by the person making the donation or that person's authorized representative.

109.4(5) A repository may accept supplies necessary to administer the prescription drugs donated only if all of the following requirements are met:

- a. The supplies are in their original, unopened, sealed packaging;
- b. The supplies are not adulterated or misbranded; and
- c. All supplies shall be inventoried at the centralized repository or a local repository. The inventory shall include a description of the supplies and the date donated. Such inventory shall be recorded on a form provided by the prescription drug donation repository program.

109.4(6) Drugs and supplies may be donated on the premises of a participating centralized repository or a local repository to a person designated by the repository. A drop box may not be used to deliver or accept donations.

641—109.5(135M) Standards and procedures for inspecting and storing donated prescription drugs and supplies.

109.5(1) A licensed pharmacist employed by or under contract with the centralized repository or a local repository shall inspect donated prescription drugs and supplies to determine, to the extent reasonably possible in the judgment of the pharmacist, that the drugs and supplies are not adulterated or misbranded, are safe and suitable for dispensing, and are not ineligible drugs or supplies. The pharmacist who inspects the drugs shall sign an inspection record stating the above and attach it to the copy of the inventory or donor record provided with the drugs. If a local repository receives drugs and supplies from the centralized repository, the local repository does not need to reinspect the drugs and supplies.

109.5(2) The centralized repository and local repositories shall store donated drugs and supplies in a secure storage area under environmental conditions appropriate for the drugs or supplies being stored. Donated drugs and supplies may not be stored with nondonated inventory. When donated drugs are not inspected immediately upon receipt, a repository shall quarantine the donated drugs separately from all dispensing stock until the donated drugs have been inspected and approved for dispensing under the program.

109.5(3) Repositories shall destroy donated noncontrolled substances that are not suitable for dispensing and make a record of such destruction according to board of pharmacy rule 657—8.8(124,155A). The destruction record shall be made in the same manner as prescribed for the record of return or destruction of a controlled substance in subrule 109.5(4).

109.5(4) Controlled substances shall not be accepted for donation.

a. Controlled substances submitted for donation shall be documented and returned immediately to the donor or the donor's representative that provided the drugs.

b. In the event controlled substances enter the centralized repository or a local repository and it is not possible or practicable to return the controlled substances to the donor or the donor's representative due to inability to identify the donor or the donor's representative or due to refusal by the donor or the donor's representative to receive them, abandoned controlled substances shall be documented and destroyed beyond reclamation pursuant to rules of the board of pharmacy examiners. Such destruction shall be performed by a pharmacist or other person that has authority to dispense controlled substances and shall be witnessed by another responsible adult employee of the repository.

109.5(5) If a repository receives a recall notification, the repository shall perform a uniform destruction of all of the recalled prescription drugs in the repository and complete the destruction information form for all donated drugs destroyed. If a recalled drug has been dispensed, the repository shall immediately notify the recipient of the recalled drug pursuant to established drug recall procedures.

641—109.6(135M) Standards and procedures for dispensing donated prescription drugs and supplies.

109.6(1) Donated drugs and supplies may be dispensed only if the drugs or supplies are prescribed by a health care practitioner for use by an eligible individual and are dispensed by a licensed pharmacist, physician or nurse practitioner.

109.6(2) A repository shall prioritize dispensing to an individual requesting drugs through the program as follows:

- a. First, to an indigent individual;
- b. Second, to an individual who has no active third-party prescription drug reimbursement coverage for the drug prescribed; and
- c. Third, to any other individual if an indigent or uninsured individual is unavailable.

109.6(3) A repository shall dispense donated prescription drugs in compliance with applicable federal and state laws and regulations for dispensing prescription drugs, including all requirements relating to packaging, labeling, record keeping, drug utilization review, and patient counseling.

109.6(4) The centralized repository and a local repository shall remove the original donor's identification and the name of the dispensing pharmacy from the package prior to dispensing the drugs or supplies.

109.6(5) The centralized repository and a local repository shall be responsible for drug recalls and shall have an established mechanism to notify recipients in the event of a drug recall.

109.6(6) Prescription drugs or supplies donated under this program shall not be resold.

109.6(7) The participating centralized repository and local repositories may distribute drugs and supplies donated under this program to other participating repositories for use pursuant to the program. The repository distributing the drugs or supplies shall complete a transfer form.

641—109.7(135M) Eligibility criteria for individuals to receive donated prescription drugs and supplies.

109.7(1) An individual who requests drugs from the prescription drug donation repository program shall certify to the repository that the individual is a resident of Iowa and meets one or both of the following criteria:

- a. Is indigent;
- b. Has no active third-party prescription drug reimbursement coverage for the drug prescribed.

109.7(2) The local repository shall collect from each individual recipient a signed intake collection form provided by the department or its contractor.

- a. The intake collection form shall attest that:
 - (1) The individual is a resident of the state of Iowa;
 - (2) The individual's income does not exceed 200 percent of the FPL;
 - (3) The individual is uninsured and has no prescription coverage or is underinsured and has no prescription coverage;
 - (4) The individual acknowledges that the drugs may have been donated; and
 - (5) The individual consents to a waiver of the requirement for child resistant packaging of the Poison Prevention Packaging Act.
- b. The intake collection form will include an identification card to be given to the recipient for continued use for one year.

109.7(3) The identification card is valid for one year or until the new federal poverty guidelines have been published for all prescriptions and supplies.

109.7(4) A summary of data taken from the intake collection form is to be sent via regular mail, E-mail or facsimile to the centralized repository for data collection.

641—109.8(135M) Forms and record keeping.

109.8(1) The following forms developed for the administration of this program shall be utilized by participants of the program and are available on the program's Web page on the department's Web site, www.idph.state.ia.us.

- a. Prescription drug donation repository program notice of participation or withdrawal.
- b. Prescription drug donation repository program donation, transfer, inventory or destruction record.
- c. A record of medications dispensed.

109.8(2) The prescription drug donation repository program recipient data collection form and identification card are given to the recipient by the local repository, and the completed data collection form is collected from the recipient by the local repository.

109.8(3) Record-keeping requirements.

a. All records required to be maintained as a part of the prescription drug donation repository program shall be maintained for a minimum of five years by participating pharmacies and medical facilities.

b. Records required as part of this program shall be maintained pursuant to all current applicable practice acts.

c. Data collected by the prescription drug donation repository program from all participating repositories shall be submitted quarterly or upon request to the centralized repository. The data will consist of the information collected in accordance with 641—109.8(135M), Forms and record keeping.

d. The centralized repository and the contractor shall submit reports to the department as required by the contract or upon request of the department.

641—109.9(135M) Handling fee. A repository may charge the recipient of a donated drug a handling fee, not to exceed a maximum of 200 percent of the Medicaid professional dispensing fee as established by rule of the department of human services, to cover stocking and dispensing costs. A prescription drug dispensed through the prescription drug donation repository program shall not be eligible for reimbursement under the medical assistance program.

641—109.10(135M) List of drugs and supplies program will accept. All prescription drugs, excluding controlled substances, that have been approved for medical use in the United States, that are listed in the USP or National Formulary (USP/NF), and that meet the criteria for donation established by these rules may be accepted for donation under the prescription drug donation repository program.

641—109.11(135M) Exemption from disciplinary action, civil liability and criminal prosecution.

109.11(1) A drug manufacturer acting reasonably and in good faith is not subject to criminal prosecution or civil liability for injury, death, or loss to a person or property for matters related to the donation, acceptance, or dispensing of a prescription drug manufactured by the drug manufacturer that is donated under this chapter, including liability for failure to transfer or communicate product or consumer information or the expiration date of the donated prescription drug.

109.11(2) Except as provided in subrule 109.11(3), a person other than a drug manufacturer subject to subrule 109.11(1), acting reasonably and in good faith, is immune from civil liability and criminal prosecution for injury to or the death of an individual to whom a donated prescription drug is dispensed under this chapter and shall be exempt from disciplinary action related to the person's acts or omissions related to the donation, acceptance, distribution, or dispensing of a donated prescription drug under this chapter.

109.11(3) The immunity and exemption provided in subrule 109.11(2) does not extend to any of the following:

- a. The donation, acceptance, distribution, or dispensing of a donated prescription drug under this chapter by a person if the person's acts or omissions are not performed reasonably and in good faith.
- b. Acts or omissions outside the scope of the program.

These rules are intended to implement Iowa Code chapter 135M.

CHAPTER 110
CENTER FOR RURAL HEALTH
AND PRIMARY CARE

641—110.1(135) Purpose and scope. The following rules developed by the department of public health govern the organization of the center for rural health and primary care within the bureau of health delivery systems of the department of public health.

641—110.2(135) Definitions.

“Area health education center (AHEC)” means the linking of university health centers with community-based delivery systems in order to improve delivery of health care.

“Center for rural health and primary care” means the department of public health administrative entity that is responsible for provision of technical planning assistance to rural communities and counties, administration of a comprehensive primary care provider recruitment and retention endeavor, coordination of services to provide research of rural occupational health injuries and hazards, and coordination with the following: the center for agricultural health and safety, the center for health effects of environmental contamination, and the department of agriculture and land stewardship.

“Center for rural health and primary care advisory committee” means a group of individuals appointed by the governor, department directors and the Iowa legislature whose purpose is to provide advice and make recommendations on rural health issues to the center for rural health and primary care, department of public health.

“Community grant program” means a program that provides assistance in the form of a forgivable loan, grant, or other nonfinancial assistance to communities, to support the effort of a community which is part of the community’s long-term community health services assessment and developmental plan.

“Community health services assessment and developmental plan” means a comprehensive health services assessment and plan which has been developed through a community-wide collaborative effort of public and private entities, including citizens at large, located in rural communities.

“Department” means the Iowa department of public health.

“Director” means the director of the department of public health.

“Primary care collaborative work group” means a group of individuals who, at a minimum, represent the following entities, who are responsible for coordination of all statewide recruitment and retention activities and for recommendations related to the implementation of the primary care provider recruitment and retention endeavor (PRIMECARRE): University of Iowa college of medicine, University of Osteopathic Medicine and Health Sciences, University of Iowa physician assistant school, University of Iowa nurse practitioner school, University of Osteopathic Medicine and Health Sciences physician assistant program, Iowa-Nebraska primary care association, Iowa medical society, Iowa osteopathic medical association, Iowa chapter of American college of osteopathic family physicians, Iowa academy of family physicians, nurse practitioner association, Iowa nurses association, Iowa hospital association, and Iowa physician assistants association.

“Primary care health professional” means an individual who is providing primary health services, and is licensed to practice in the state of Iowa.

“Primary care provider community scholarship program” means a scholarship program that provides obligated-service scholarships to eligible health professional students for qualifying educational expenses incurred to obtain the credentials in that profession in return for providing primary care services in health professional shortage areas in the state.

“Primary care provider loan repayment program” means a loan repayment for qualifying loans to eligible health professionals who choose to establish practices in designated health professional shortage areas of the state.

“Primary care provider recruitment and retention endeavor (PRIMECARRE)” means a comprehensive primary health care initiative to promote and assist local efforts in developing health care provider recruitment and retention programs, and which includes a community grant program, a

primary care provider loan repayment program, primary care provider community scholarships, and area health education centers.

“Primary health services” means health services regarding family practice, internal medicine, pediatrics, obstetrics and gynecology, dentistry, or mental health that are provided by physicians or other health professionals.

641—110.3(135) Responsibilities of the center.

110.3(1) The center for rural health and primary care shall provide technical planning assistance to rural communities and counties exploring innovative means of delivering rural health services through community health services assessment, planning, and implementation, including but not limited to hospital conversions, cooperative agreements among hospitals, physician and health practitioner support, recruitment and retention of primary health care providers, public health services, emergency medical services, medical assistance facilities, rural health care clinics, and alternative means which may be included in the long-term community health services assessment and developmental plan.

110.3(2) The center for rural health and primary care shall encourage collaborative efforts of the local boards of health, hospital governing boards, and other public and private entities located in rural communities to adopt a long-term community health services assessment and developmental plan.

110.3(3) The center for rural health and primary care shall provide technical assistance to assist rural communities in improving Medicare reimbursements or establishing additional sources of funding through initiatives such as rural health clinics, distinct part skilled nursing facility beds, and the swing-bed program.

110.3(4) The center for rural health and primary care shall coordinate services to provide research for the following:

- a. Examination of the prevalence of rural occupational health injuries in the state.
- b. Assessment of training and continuing education available through local hospitals and others relating to diagnosis and treatment of diseases associated with rural occupational health hazards.
- c. Determination of continuing education support necessary for rural health practitioners to diagnose and treat illnesses caused by exposure to rural occupational health hazards.
- d. Determination of the types of actions that can help prevent agricultural accidents, surveillance and reporting of disabilities suffered by persons engaged in agricultural-related injuries and diseases in the state.
- e. Identifying causal factors associated with agricultural-related injuries and diseases, and indicating the effectiveness of intervention programs designed to reduce injuries and diseases.
- f. Cooperation with the center for agricultural health and safety, the center for health effects of environmental contamination and the department of agriculture and land stewardship, to coordinate programs to the extent practicable.

110.3(5) The center for rural health and primary care shall administer grants for farm safety education efforts directed to rural families for the purpose of preventing farm-related injuries to children.

110.3(6) The center for rural health and primary care shall administer a primary care provider recruitment and retention endeavor (PRIMECARRE).

110.3(7) The department of public health shall, in cooperation with the primary care collaborative work group, coordinate the initiative for the development of area health education centers, including making application for a federal grant.

641—110.4(135) Advisory committee to the center for rural health and primary care.

110.4(1) The purpose of the advisory committee is to provide advice and make recommendations on rural health issues to the center for rural health and primary care, department of public health.

110.4(2) The advisory committee will provide the expertise and technical assistance necessary to review and recommend policies pertinent to rural health issues, as well as guidelines for grants and other programs of the center for rural health and primary care.

110.4(3) The advisory committee will review reports prepared for the general assembly and make recommendations regarding the reports compiled.

110.4(4) The advisory committee will evaluate new care delivery concepts arising to meet the needs of the rural population.

641—110.5(135) Organization. The advisory committee to the center for rural health and primary care shall consist of one representative, approved by the respective agency, of each of the following agencies: the department of agriculture and land stewardship, the Iowa department of public health, the department of inspections and appeals, the national institute for rural health policy, the social and behavioral research center for rural health, the institute of agricultural medicine and occupational health, and the Iowa state association of counties. The governor shall appoint two representatives of consumer groups active in rural health issues and a representative of each of two farm organizations active within the state, a representative of an agricultural business in the state, a practicing rural family physician, a practicing rural physician assistant, a practicing rural advanced registered nurse practitioner, and a rural health practitioner who is not a physician, physician assistant, or advanced registered nurse practitioner, as members of the advisory committee. The advisory committee shall also include as members two state representatives, one appointed by the speaker of the house of representatives and one by the minority leader of the house, and two state senators, one appointed by the majority leader of the senate and one by the minority leader of the senate.

641—110.6(135) Meetings.

110.6(1) Meeting dates. The advisory committee shall meet at least quarterly to conduct its business. Meetings can be scheduled as business requires, but notice to committee members must be at least five working days prior to the meeting date. The administrative head of the center for rural health and primary care shall attend these meetings.

110.6(2) Meeting procedures. Robert's Rules of Order shall govern at all meetings.

110.6(3) Quorum. A majority of the total membership shall constitute a quorum. Action can be taken by a vote of the majority of the membership.

110.6(4) Vacancies. Vacancies will be filled in the same manner as was prescribed in the Code of Iowa. In the case of a vacancy the chairperson will notify the agency of the need to appoint another representative.

110.6(5) Term of appointment. Unless otherwise specified by law, term of appointment is for two years with no more than three consecutive terms, excepting the department of public health representative. Exceptions for individual reappointment from organizations represented shall be determined by the director of public health.

110.6(6) Subcommittees. The advisory committee for the center for rural health and primary care may designate one or more subcommittees to have such powers and perform such duties as may be deemed necessary by the committee.

641—110.7 to 110.10 Reserved.

PRIMECARRE COMMUNITY GRANT PROGRAM

641—110.11(135) Purpose. The purpose of the PRIMECARRE community grant program is to support community efforts which are part of the community's long-term community health services assessment and developmental plan. A community or region applying for assistance must complete a community health services assessment and adopt a long-term developmental plan. The community may request assistance with the assessment from the center for rural health and primary care. The long-term developmental plan shall include a clear commitment to informing high school students of the health care opportunities which may be available to such students. The grant assistance may be in the form of a forgivable loan, grant, or other nonfinancial assistance as deemed appropriate by the center for rural health and primary care. Grants or other assistance provided by the center are intended to promote and accommodate local creativity in efforts to recruit and retain health care professionals to provide services in the locality. Notice of the availability of these public funds shall be published in the Iowa Administrative Bulletin in accordance with 641—Chapter 176.

110.11(1) Eligibility. The following requirements must be met in order to be eligible for the program:

- a. The applicant must be a single community with a population of 10,000 or less, or a region consisting of communities with populations of 10,000 or less, respectively.
- b. The community or region must have illustrated efforts to meet the health care provider needs of the locality and surrounding area.
- c. The community or region must have completed a community health services assessment and adopted a long-term developmental plan as established herein.
- d. A letter of intent must be submitted by January 1 preceding the year for which application for assistance is to be made.

110.11(2) Funding limitations. Grants awarded under the program shall be subject to the following limitations:

- a. An award of no more than \$10,000 for a single community or region with a population of 10,000 or less.
- b. An award of no more than \$1 per capita for a region in which the population exceeds 10,000.

110.11(3) Use of funds. Funds may be used for the following:

- a. The procurement of clinical equipment, clinical facilities, and telecommunications facilities.
- b. Support for locum tenens arrangements and primary care provider mentor programs.
- c. Other capacity-building activities as they relate to recruitment and retention of primary health care providers.

110.11(4) Matching requirements. Applications submitted shall contain a commitment of at least a dollar-for-dollar match of the grant assistance.

110.11(5) Application process. Applicants for grant funds must complete application forms provided by the department. Application materials shall be made available by the department at least 45 days prior to the application due date. Grant applications will be issued in accordance with 641—Chapter 176.

110.11(6) Selection criteria and review process. Selection criteria will be based on illustrated efforts to meet the health care provider needs of the locality and surrounding area. Selection criteria and the process for evaluation of applications shall be described in the application materials provided by the department. A competitive grant application review committee shall be appointed by the administrative head of the center for rural health and primary care. Grants will be awarded according to review criteria developed by the center, in accordance with 641—Chapter 176.

110.11(7) Notice of grant award. The director of public health shall notify all applicants in writing of the decision of grant awards.

110.11(8) Appeals. Applicants with a denied request for funding may appeal the decision of grant awards. The appeal shall be made in writing to the director, Iowa department of public health, within 10 days of the notification date of the grant awards decision. The appeal shall be mailed by certified mail, return receipt requested, or delivered by personal service. The decision of the director of public health becomes the department's final action and shall be sent by certified mail, return receipt requested, or delivered by personal service within 14 days of the receipt of the appeal.

110.11(9) Grantee oversight. The department shall monitor the use of funds granted to communities to ensure accountability and conformance with legislative intent. Oversight processes shall be described in the application materials provided by the department.

641—110.12 to 110.15 Reserved.

PRIMECARRE PRIMARY CARE PROVIDER
COMMUNITY SCHOLARSHIP PROGRAM

641—110.16(135) Purpose. A primary care provider community scholarship program is established to recruit and to provide scholarships to train primary health care practitioners in federally designated health professional shortage areas of the state. If sufficient state funds are available, applications will be considered for scholarship placement in communities not located in federally designated shortage areas. Under the program, scholarships may be awarded to a recipient for educational expenses incurred

while completing an accredited health education program directly related to obtaining the credentials necessary to practice the recipient's health profession. Notice of the availability of these public funds shall be published in the Iowa Administrative Bulletin in accordance with 641—Chapter 176.

110.16(1) Student eligibility. The following requirements must be met by students in order to be eligible for the program:

a. The status of the student's citizenship must meet requirements of the National Health Service Corps scholarship program.

b. The student must be enrolled or accepted for enrollment as a student in an accredited primary care health professions program, and meet eligibility requirements of Section 338A of the Public Health Service Act as amended November 16, 1990, by Public Law 101-597.

c. The student must agree, while enrolled in a health professional school, to maintain an acceptable level of academic standing as determined by the school.

d. The student must agree to meet educational and licensure requirements necessary to become a licensed primary care health professional in the state.

e. The student must agree to provide full-time primary health care services in a designated shortage area in the state for the minimum number of years required by federal programs providing funding support for the program.

f. The student must agree not to discriminate on the basis of the ability of the individual to pay for such care or on the basis that payment for such care will be made pursuant to the program established in Title XVIII (Medicare) of the Social Security Act, or pursuant to the program established in Title XIX (Medicaid) of such Act.

g. The student must agree to accept assignment under Section 1842(b)(3)(B)(ii) of the Social Security Act for all services for which payment may be made under Part B of Title XVIII and agree to enter into an appropriate agreement with the state agency that administers the state plan for medical assistance under Title XIX of such Act to provide service to individuals entitled to medical assistance under the plan.

h. The student must complete an application form provided by the Iowa department of public health.

110.16(2) Site eligibility. The following requirements must be met, in order for a site to be eligible for placement of PRIMECARRE scholars:

a. The site must be located in a designated health professional shortage area in the state.

b. The site must agree to accept Medicare/Medicaid assignment.

c. The site must have a sliding fee schedule in place that is based upon the ability to pay.

d. The site must have completed a community health services assessment and adopted a long-term developmental plan.

e. The site must be part of a system of care. For the purpose of receiving federal assistance, a system of care is defined as a service continuum that includes comprehensive primary care for all regardless of ability to pay, and appropriate arrangements for secondary and tertiary care, including a referral system and arrangements for call coverage.

f. The site must complete an application form provided by the department.

g. The site must agree to report to the department those health professionals unable to fulfill the contract.

h. The site must meet matching funds requirements consistent with current federal requirements.

110.16(3) Federal grant requirements. Use of federal grant dollars for scholarships requires that eligibility be determined as authorized by federal grant requirements.

110.16(4) Funding limitations. Scholarships awarded under this program shall be determined annually, based upon the legislative appropriation for the PRIMECARRE initiative and other sources of funds.

110.16(5) Other sources of funds. The department of public health shall seek participation in federal programs supporting scholarships for health care providers and shall accept gifts, grants, and other aid or amounts from any person, association, foundation, trust, corporation, governmental agency, or other entity for the purposes of the program.

110.16(6) *Review process.* The department of public health shall establish a review committee which will review all community applications and make recommendations for scholarship awards. The department shall provide the review committee with a methodology for prioritization of federal shortage areas and eligible nonfederal shortage areas to be utilized in the application review process. The department of public health shall provide the review committee with the criteria and scoring methodology to be used in reviewing the applications, in accordance with 641—Chapter 176.

110.16(7) *Contract oversight and administration.* The department of public health shall establish and enforce the terms of the contract, including implementation of any methods, including legal action, that may be necessary to recoup scholarship funds in the event of failure on the part of an individual scholarship recipient to fulfill the terms and conditions of the contract. The department shall take into consideration mitigating circumstances which may prohibit a recipient from fulfilling the recipient's contractual obligation or for whom fulfilling the obligation would cause undue hardship. The department of public health shall also provide for cancellation of contracts for reasonable cause to be determined by the department.

110.16(8) *Appeals.* A community with a denied request for funding may appeal the decision of scholarship awards. The appeal shall be made in writing to the director, Iowa department of public health, within 10 days of the notification date of the grant awards decision. The appeal shall be mailed by certified mail, return receipt requested, or delivered by personal service. The decision of the director of public health becomes the department's final action and shall be sent by certified mail, return receipt requested, or delivered by personal service within 14 days of the receipt of the appeal.

641—110.17 to 110.20 Reserved.

PRIMECARRE PRIMARY CARE PROVIDER LOAN REPAYMENT PROGRAM

641—110.21(135) Purpose. A primary care provider loan repayment program is established to increase the number of health professionals practicing primary care in federally designated health professional shortage areas of the state. If sufficient state funds are available, applications will be considered for loan repayment for primary care providers practicing in communities not located in federally designated shortage areas. Under the program, loan repayment may be made to a recipient for educational loans incurred while completing an accredited health education program directly related to obtaining credentials necessary to practice the recipient's health profession. Notice of the availability of these public funds shall be published in the Iowa Administrative Bulletin in accordance with 641—Chapter 176.

110.21(1) *Health care professional eligibility.* The following requirements must be met by health care professionals in order to be eligible for the program:

a. The status of the health care professional's citizenship must meet requirements of the National Health Service Corps loan repayment program.

b. The health care professional must be licensed or certified to practice in the state of Iowa as a primary care health professional as defined in 110.2(135) and approved by the state for purposes of program priorities and requirements. Physicians must have completed a primary care residency and be board-eligible or board-certified.

c. The health care provider must possess evidence of a contractual agreement to practice full-time at a site in a designated shortage area within the state and approved by the state for the minimum number of years required by federal programs providing support for the program.

d. The health care provider must agree to comply with all contract provisions and the rules and regulations as promulgated by the department.

e. The health care provider must possess a license that is not restricted by a medical regulatory authority of any jurisdiction of the United States, other nations, or territories.

f. The health care professional must be eligible under Section 338B of the Public Health Service Act as amended November 16, 1990, by Public Law 101-597.

g. The health care provider must agree to provide full-time primary health care services at a clinical site in a designated health professional shortage area.

h. The health care provider must agree not to discriminate on the basis of the ability of the individual to pay for such care or on the basis that payment for such care will be made pursuant to the program established in Title XVIII (Medicare) of the Social Security Act, or pursuant to the program established in Title XIX (Medicaid) of such Act.

i. The health care provider must agree to accept assignment under Section 1842(b)(3)(B)(ii) of the Social Security Act for all services for which payment may be made under Part B of Title XVIII and to enter into an appropriate agreement with the state agency that administers the state plan for medical assistance under Title XIX of such Act to provide service to individuals entitled to medical assistance under the plan.

j. The health care provider must complete an application form provided by the Iowa department of public health.

110.21(2) *Site eligibility.* The following requirements must be met in order to be eligible for placement of a health professional qualified under the PRIMECARRE loan repayment program:

a. The site must be located in a designated health professional shortage area in the state.

b. The site must agree to accept Medicare/Medicaid assignment.

c. The site must have a sliding fee schedule in place that is based upon the ability to pay.

d. The site must have completed a community health services assessment and adopted a long-term developmental plan.

e. The site must be part of a system of care. For the purpose of receiving federal assistance, a system of care is defined as a service continuum that includes comprehensive primary care for all regardless of ability to pay, and appropriate arrangements for secondary and tertiary care, including a referral system and arrangements for call coverage.

f. The site must complete an application form provided by the department.

g. The site must agree to report to the department those individuals unable to fulfill the contract.

110.21(3) *Federal grant requirements.* Use of federal grant dollars for loan repayment contracts requires that eligibility be determined as authorized by federal grant requirements.

110.21(4) *Funding limitations.* Loan repayment contracts provided under this program shall be determined annually, based upon the legislative appropriation for the PRIMECARRE initiative and other sources of funds.

110.21(5) *Other sources of funds.* The department of public health shall seek participation in federal programs supporting repayment of loans of health care providers and acceptance of gifts, grants, and other aid or amounts from any person, association, foundation, trust, corporation, governmental agency, or other entity for the purposes of the program.

110.21(6) *Review process.* The department of public health shall establish a review committee which will review all applications and make recommendations for loan repayment contracts. The department shall provide the review committee with a methodology for prioritization of federal shortage areas and eligible nonfederal shortage areas to be utilized in the application review process. The department shall provide the review committee with the criteria and scoring methodology to be used in reviewing the applications, in accordance with 641—Chapter 176. Evaluation criteria will include the applicant's outstanding educational loans and professional credentials.

110.21(7) *Contract oversight and administration.* The department of public health shall establish and enforce the terms of the contract, including implementation of any methods, e.g., legal action, that may be necessary to recoup loan repayment funds in the event of failure on the part of a program recipient to fulfill the terms and conditions of the contract. The department shall take into consideration mitigating circumstances which may prohibit a recipient from fulfilling the recipient's contractual obligation or for whom fulfilling the obligation would cause undue hardship. The department of public health shall also provide for cancellation of contracts for reasonable cause to be determined by the department.

110.21(8) *Appeals.* Applicants with a denied request for loan repayment funding may appeal the decision of loan repayment awards. The appeal shall be made in writing to the director, Iowa department of public health, within 10 days of the notification date of the loan repayment awards decision. The appeal

shall be mailed by certified mail, return receipt requested, or delivered by personal service. The decision of the director of public health becomes the department's final action and shall be sent by certified mail, return receipt requested, or delivered by personal service within 14 days of the receipt of the appeal.

These rules are intended to implement Iowa Code section 135.107.

CHAPTER 112
BIOLOGICAL AGENT RISK ASSESSMENT

641—112.1(135) Purpose. The purpose of a statewide biological agent risk assessment is to protect the citizens of Iowa from exposure to biological agents which are or have the potential to be biological weapons. In order to protect the public health, the department is charged with identifying sources, locations, safety and security of select biological agents.

641—112.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

“Biological agent” means any microorganism (including bacteria, viruses, fungi, rickettsiae or protozoa), pathogen, or infectious substance, toxin, or any naturally occurring, bioengineered or synthesized component of any such microorganism, pathogen or infectious substance, whatever its origin or method of production.

“Biosecurity council” or *“council”* means a council established by the director to advise the department on biosecurity issues and to recommend guidelines to protect the citizens of Iowa from exposure to select biological agents.

“CDC” means the Centers for Disease Control and Prevention.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“DOJ” means the federal Department of Justice.

“EMD” means the emergency management division of the department of public defense.

“FBI” means Federal Bureau of Investigation.

“HHS” means the federal Department of Health and Human Services.

“Laboratory” means a facility for the examination of biological, microbiological, serological, chemical, immunohematological, hematological, biophysical, cytological or pathological materials or other materials derived from humans, animals, or plants to provide information for the diagnosis, prevention or treatment of any disease or impairment of, or for the assessment of the health of, humans, animals, or plants.

“Lethality” or *“L”* means the relative power and degree of pathogenicity possessed by organisms to produce disease.

“Select biological agent” means a biological agent identified by the director, upon recommendation from the biosecurity council, for heightened monitoring and security, including but not limited to any biological agent that is listed as a Category A, B, or C biological agent by the Centers for Disease Control and Prevention, any agent identified as a select agent in the Code of Federal Regulations, Title 42, Part 72, Appendix A, and any biological agent identified by the United States Army Medical Research Institute of Infectious Diseases as appropriate for a heightened level of monitoring and security.

“Suitability” or *“S”* means suitability for weaponization.

“Transmissibility” or *“T”* means degree of contagion.

“USAMRIID” means the United States Army Medical Research Institute of Infectious Diseases.

“Weaponization” means manipulation of a biological agent to increase the potential for use as a weapon.

641—112.3(135) Biosecurity council established. The director shall appoint a biosecurity council to advise the department on biosecurity issues and to recommend guidelines to protect the citizens of Iowa from exposure to select biological agents.

112.3(1) The council shall, at a minimum, consist of the following members:

- a. The director of the department of public health;
- b. The governor’s homeland security advisor;
- c. The director of the University of Iowa Hygienic Laboratory;
- d. A representative from the FBI as made available by the director of the FBI or a representative of the U.S. Secret Service as made available by the director of the U.S. Secret Service;
- e. A representative appointed by the Iowa adjutant general;

- f.* A representative from the Iowa attorney general's office;
- g.* The medical director of the department of public health;
- h.* The executive director of the office of disease epidemiology and disaster preparedness, department of public health;
- i.* A microbiologist at the master's or doctorate level who has expertise in human microbiology;
- j.* A microbiologist at the master's or doctorate level who has expertise in zoonosis;
- k.* A biological safety professional; and
- l.* The emergency management division administrator.

112.3(2) The council shall make recommendations to the department on classification of select biological agents, select biological agent risk assessment guidelines, and security guidelines.

112.3(3) Security guidelines shall be consistent with applicable state and federal laws, including but not limited to specific antiterrorism regulations of HHS and DOJ.

641—112.4(135) Biological agent risk assessment.

112.4(1) Questionnaire.

a. Duty to complete and submit. Any laboratory, clinic, research facility, commercial enterprise, or other entity which possesses select biological agents shall complete and submit to EMD a biological agent risk assessment questionnaire on an annual basis or more frequently as requested by EMD. The questionnaire shall identify the select biological agents possessed and shall contain such other information as required by the department and EMD.

b. Purpose and use. The questionnaires shall be used in the development of the critical asset protection plan prepared pursuant to Iowa Code section 29C.8. EMD shall provide the department with the completed questionnaires for the purpose of preparing relevant security guidelines. The department shall not disseminate the information contained in the questionnaires.

112.4(2) Assessment criteria. The criteria for assessing the risk of a select biological agent shall be based on, but not limited to, current CDC guidelines, recommendations from USAMRIID, recommendations from the biosecurity council, and this subrule. The biosecurity council may modify the criteria based on new scientific information, treatments, or public perceptions, or any combination thereof.

a. Biological agent rating criteria. Biological agents shall be rated by the department based on the following three categories:

- (1) Transmissibility (T). 0 = nontransmissible, 1 = transmissible only by injection, sexual interface or bite, 2 = transmissible by ingestion, 3 = transmissible by air or touch.
- (2) Lethality (L). 0 = nonlethal, 1 = 0-25 percent mortality, 2 = 26-50 percent mortality, 3 = 51-100 percent mortality.
- (3) Suitability for or degree of weaponization (S). 0 = not suitable, 1 = suitable but not modified, 2 = modified for antibiotic resistance or improved environmental resilience, 3 = modified and packaged for effective delivery on a mass scale.

b. The final rating for a biological agent is determined by adding the score the biological agent received in each of the three categories (T + L + S = biological agent rating).

112.4(3) On-site examination.

a. Notification. The department or its designee may conduct an on-site examination of any premises containing select biological agents. Prior to conducting the on-site examination, the department shall notify the owner or person in charge of the premises.

- b. Examination.* An on-site examination shall include each of the following components:
- (1) A review of laboratory safety and security policies and procedures;
 - (2) A review of external and internal access to the premises;
 - (3) A review of access controls to areas where select biological agents are used and stored;
 - (4) A review of employee, student and visitor access to the premises, including the identification required to access the premises and the method of recording access to the premises;
 - (5) A review of background and security clearance measures implemented;
 - (6) A review of the screening process for packages brought into or taken out of the premises;

- (7) A review of the emergency plan;
- (8) A review of appropriate biocontainment within a laboratory;
- (9) A review of the training and knowledge of research staff;
- (10) A review of the process for reporting and investigating breach-of-security incidents;
- (11) A review of disposal procedures; and
- (12) A tour of the premises to view access security, select biological agent locations, storage, inventory, records, coding and database procedures.

c. Administrative search warrant. If the owner or person in charge of the premises refuses the department's employee or designee admittance or if the department's employee or designee is not permitted to conduct a full examination, the department may obtain an administrative search warrant under Iowa Code section 808.14.

112.4(4) Security guidelines. After a biological agent risk assessment questionnaire has been completed and the on-site examination has been conducted, the department shall provide the entity with a biological agent risk assessment report and security guidelines. A select biological agent which is listed as a CDC Category A biological agent or as determined by the biosecurity council shall be maintained in accordance with maximum security guidelines as established by the biosecurity council and the director.

112.4(5) Confidentiality. The biological agent risk assessment questionnaire, the biological agent risk report and security guidelines, and any other information if it relates to the imminent threat of death, disease, biological malfunction in a human, animal, plant or other living thing, deterioration of food, water, equipment, supplies, or a deleterious alteration of the environment provided to or by EMD or the department pursuant to this chapter may be considered critical asset protection plan information and may be maintained as confidential pursuant to Iowa Code section 22.7(43).

641—112.5(135) Requests for biological agent information. A laboratory, clinic, research facility, commercial enterprise, or other entity which possesses select biological agents shall respond to written requests from the department regarding the presence, location, and security of biological agents within 30 days of the request. In the event of a disaster emergency, a laboratory, clinic, research facility, commercial enterprise, or other entity which possesses select biological agents shall immediately respond to a request from the department or its designee regarding the presence, location, and security of biological agents.

641—112.6(135) Exceptions.

112.6(1) The requirements of this chapter are not applicable to hospital laboratories which possess select biological agents solely as a result of a patient culture provided that the culture is destroyed within 14 days after referral to and confirmation by the University of Iowa Hygienic Laboratory or other laboratory approved by the council.

112.6(2) The requirements of this chapter are not applicable to a person who detects a biological agent in a clinical or environmental sample for the purpose of diagnosing disease, epidemiological surveillance, exposure assessment, reference, verification or proficiency testing, and who discards the agent within 14 calendar days. If a biological agent is kept for more than 14 calendar days, the laboratory shall provide written notice to the department identifying the agent and reason for continued or extended possession.

These rules are intended to implement Iowa Code Supplement section 135.11(28).

[Filed 7/18/02, Notice 5/29/02—published 8/7/02, effective 9/11/02]

CHAPTER 113
PUBLIC HEALTH RESPONSE TEAMS

641—113.1(135) Definitions. For purposes of this chapter, the following definitions shall apply:

“Defend” means that the office of the Iowa attorney general shall provide a public health response team member with legal representation at no cost to the public health response team member.

“Department” means the Iowa department of public health.

“Director” means the director of the Iowa department of public health.

“Disaster medical assistance team” or *“DMAT”* means a public health response team that is sponsored by a sponsor agency and approved by the department to provide medical assistance in the event of a disaster or threatened disaster or other incident as defined in Iowa Code section 135.143.

“Environmental health response team” or *“EHRT”* means a public health response team that is sponsored and approved by the department to provide environmental health expertise and assistance in the event of a disaster or threatened disaster or other incident defined in Iowa Code section 135.143.

“Epidemiology response team” or *“EpiRT”* means a public health response team that is sponsored and approved by the department to provide epidemiological assistance in the event of a disaster or threatened disaster or other incident as defined in Iowa Code section 135.143.

“Indemnify” means that the state of Iowa shall pay all sums that a public health response team member is legally obligated to pay as damages because of any claim made against the public health response team member which arises out of the provision of direct medical care or other support services rendered or which should have been rendered during a disaster, threatened disaster, or other incident defined in Iowa Code section 135.143, or arising out of a training exercise to prepare for a disaster or other incident defined in Iowa Code section 135.143.

“Physician” means an individual licensed under Iowa Code chapter 148, 150, or 150A.

“Public health response team” or *“PHRT”* means a team of professionals, including licensed health care providers, nonmedical professionals skilled and trained in disaster or emergency response, and public health practitioners, that is sponsored by the department, a hospital or other entity and approved by the department to provide assistance in the event of a disaster or threatened disaster or other incident defined in Iowa Code section 135.143. “Public health response team” shall include disaster medical assistance teams, environmental health response teams, epidemiology response teams, and other teams established and approved upon written order of the director, to supplement and support disrupted or overburdened local medical and public health personnel, hospitals, and resources.

“Public health response team member,” “DMAT member,” “EHRT member,” or *“EpiRT member”* means an individual who has registered with the department and has received approval from the department to serve on a public health response team.

“Registered nurse” or *“RN”* means an individual licensed pursuant to Iowa Code chapter 152.

“Sponsor agency” means a hospital, public health agency, health care organization, licensed health care entity, or other entity approved by the department to act as a sponsor for a public health response team.

“Sponsor agreement” means a signed agreement between a sponsor agency and the department which defines the terms and conditions under which the agency shall sponsor a public health response team.

641—113.2(135) Purpose.

113.2(1) The department, through the division of acute disease prevention and emergency response, center for disaster operations and response, shall establish, register, and approve public health response teams, including at a minimum five DMATs and one EHRT, to supplement and support disrupted or overburdened local medical and public health personnel, hospitals, and resources in the event of a disaster or threatened disaster or other incident as defined in Iowa Code section 135.143. The primary purpose of the public health response teams is to respond to Iowa incidents and to provide support for Iowa medical and public health personnel, hospitals, and resources. A public health response team may also

be requested to respond to an out-of-state disaster or emergency pursuant to the Emergency Management Assistance Compact at Iowa Code section 29C.21.

113.2(2) DMAT and EHRT shall be established, registered and approved pursuant to this chapter. Other PHRTs may be established, registered and approved as necessary upon written order of the director.

641—113.3(135) Sponsor agency.

113.3(1) *Sponsor agency approval.* A hospital or other entity may apply to the department to be a sponsor agency of a public health response team. The applicant shall apply on a form approved by the department and shall provide all information requested by the department. The department may approve an application when the department is satisfied that the sponsor agency will operate the PHRT in compliance with Iowa Code section 135.143 and this chapter. Upon approval of the application, the department and the sponsor agency shall execute a sponsor agreement which shall provide that the agency is registered with the department and has been approved to sponsor a public health response team. The sponsor agreement shall also include the effective date of the approval and the terms and conditions of approval.

113.3(2) *Sponsor agency denial and revocation.* The department may deny approval to an applicant sponsor agency or may revoke a sponsor agency's approval if the department determines that the sponsor agency has violated or failed to comply with Iowa Code section 135.143 or this chapter, any term or condition contained in the sponsor agreement, any operational procedure, or state or federal law. The department shall notify the applicant or sponsor agency of the department's decision in writing by certified mail, return receipt requested. In the event an applicant or a sponsor agency is dissatisfied with the department's decision, the applicant or sponsor agency may submit a request for reconsideration with the division director. Such request shall be delivered by certified mail, return receipt requested, within 20 days of the date of the denial or revocation notification, to Division Director, Division of Acute Disease Prevention and Emergency Response, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319. The division director shall review the matter and issue a written decision within 20 days of receipt of the request. The division director's decision shall be final agency action. This appeal process does not constitute a contested case proceeding as defined in Iowa Code chapter 17A.

641—113.4(135) Public health response team members.

113.4(1) *Registration and approval.* An individual may apply to the department through a sponsor agency to be a public health response team member. The applicant shall apply on a form approved by the department and shall provide all information requested by the department and sponsor agency. The department shall register and approve an individual to serve as a PHRT member when the department is satisfied that the individual satisfies the requirements of this chapter and will perform on a PHRT in compliance with Iowa Code section 135.143 and this chapter. Upon registration and approval of an individual, the department shall provide the individual with written notification that the individual is registered with the department and has been approved to serve on a public health response team. The written notification shall also include the effective date of the approval and the terms and conditions of approval.

113.4(2) *Denial and revocation.* The department may deny approval to an individual or may revoke an individual's approval if the department determines that the individual has violated or failed to comply with Iowa Code section 135.143 or this chapter, any term or condition contained in the written approval notification from the department, any operational procedure, or state or federal law, or has exposed or may expose the state to undue risk. The department shall notify the individual of the department's decision in writing by certified mail, return receipt requested. In the event an individual is dissatisfied with the department's decision, the individual may submit a request for reconsideration with the division director. Such request shall be delivered by certified mail, return receipt requested, within 20 days of the date of the denial or revocation notification, to Division Director, Division of Acute Disease Prevention and Emergency Response, Lucas State Office Building, 321 E. 12th Street, Des Moines Iowa 50319. The division director shall review the matter and issue a written decision within 20 days of receipt of

the request. The division director's decision shall be final agency action. This appeal process does not constitute a contested case proceeding as defined in Iowa Code chapter 17A.

113.4(3) *Effect of revocation.* If the department revokes a public health response team member's approval, the action shall revoke future eligibility, but shall not negate defense and indemnification coverage or other protection for covered acts or omissions which occurred during the effective date of approval.

641—113.5(135) Disaster medical assistance team.

113.5(1) *General requirements.*

a. An entity may make application to the department to be a sponsor agency of a DMAT pursuant to subrule 113.3(1). An individual may make application to the department to be a member of a DMAT pursuant to subrule 113.4(1).

b. The department, in conjunction with the sponsor agencies, shall establish the DMAT operational procedures. The operational procedures shall be in writing and shall be provided to each DMAT member. All DMAT members and sponsor agencies shall follow the DMAT operational procedures as established by the department. The Iowa DMAT Operational Procedures Manual is available through the Iowa Department of Public Health, Center for Disaster Operations and Response, Lucas State Office Building, Des Moines, Iowa 50319-0075.

c. If the department notifies a DMAT, DMAT member, or sponsor agency of a violation of Iowa Code section 135.143, this chapter, or an operational procedure, the DMAT, DMAT member, or sponsor agency shall correct the deficiency or violation identified by the department within a time frame determined by the department. If a DMAT, DMAT member, or sponsor agency fails to correct a deficiency or violation within the time frame identified by the department, or if the deficiency or violation constitutes an immediate danger to the public health, safety, or welfare, the department may initiate action to revoke approval pursuant to subrule 113.3(2) or 113.4(2).

113.5(2) *Team composition.*

a. A DMAT shall be comprised of a minimum of 35 health care professionals and administrative personnel as identified in the Iowa DMAT Operational Procedures Manual.

b. The sponsor agency for each team shall be responsible for maintaining adequate staffing.

113.5(3) *Licensure and educational requirements.*

a. Each DMAT member shall hold and maintain an active unrestricted license, registration, or certification to practice in Iowa in the member's respective medical or health care profession.

b. Each DMAT member shall complete the following courses or shall complete other substantially similar courses approved by the department:

- (1) Incident command structure;
- (2) Weapons of mass destruction awareness; and
- (3) Hazardous materials awareness or operations.

c. In addition to the requirements in paragraph 113.5(3)"*b*," the DMAT's leadership shall complete training in:

- (1) Hospital emergency incident command structure; and
- (2) Risk communication.

d. A sponsor agency shall provide specific position training to DMAT members as determined to be necessary by the sponsor agency and as approved by the department.

e. A sponsor agency, in conjunction with the department, shall develop and implement training exercises to test the team's notification process, deployment readiness, and response capabilities.

f. The sponsor agency shall be responsible for documenting each DMAT member's completion of required training.

113.5(4) *Deployment and standdown.*

a. DMATs shall prepare to deploy within two to four hours of notification by the department. DMATs shall not self-deploy and shall not be covered by the provisions of Iowa Code section 135.143 and this chapter if self-deployed or deployed by another agency or entity.

b. On-call team schedules shall be established and distributed by the department and shall be followed by the DMATs and sponsor agencies.

c. Deployment and standdown procedures are outlined in the Iowa DMAT Operational Procedures Manual and shall be followed by all DMAT members.

641—113.6(135) Environmental health response team.

113.6(1) General requirements.

a. An entity may make application to the department to be a sponsor agency of an EHRT pursuant to subrule 113.3(1), or the department may elect to sponsor an EHRT. An individual may make application to the department to be a member of an EHRT pursuant to subrule 113.4(1).

b. The department shall establish EHRT operational procedures. The operational procedures shall be in writing and shall be provided to each EHRT member. All EHRT members shall follow the EHRT operational procedures as established by the department. The Iowa EHRT Operational Procedures Manual is available through the Iowa Department of Public Health, Center for Disaster Operations and Response, Lucas State Office Building, Des Moines, Iowa 50319-0075.

c. If the department notifies an EHRT member of a violation of Iowa Code section 135.143, this chapter, or an operational procedure, the EHRT member shall correct the deficiency or violation identified by the department within a time frame determined by the department. If an EHRT member fails to correct a deficiency or violation within the time frame identified by the department, or if the deficiency or violation constitutes an immediate danger to the public health, safety, or welfare, the department may initiate action to revoke approval pursuant to subrule 113.3(2) or 113.4(2).

113.6(2) Team composition.

a. An EHRT shall be comprised of a minimum of 20 environmental health professionals and administrative personnel as identified in the Iowa EHRT Operational Procedures Manual.

b. The department shall be responsible for maintaining adequate staffing.

113.6(3) Licensure and educational requirements.

a. Each EHRT member shall complete the following courses or shall complete other substantially similar courses approved by the department:

- (1) Incident command structure;
- (2) Weapons of mass destruction awareness;
- (3) Environmental health core competencies and essential services;
- (4) Hazardous materials awareness or operations; and
- (5) Basic, intermediate and advanced epidemiology training.

b. In addition to the requirements in paragraph 113.5(3)“a,” the EHRT’s leadership shall complete training in risk communication.

c. The department shall provide specific position training to EHRT members as determined to be necessary by the department.

d. The department shall develop and implement training exercises to test each team’s notification process, deployment readiness, and response capabilities.

e. The department shall be responsible for documenting each EHRT member’s completion of required training.

113.6(4) Deployment and standdown.

a. EHRTs shall prepare to deploy within two to four hours of notification by the department. EHRTs shall not self-deploy and shall not be covered by the provisions of Iowa Code section 135.143 and this chapter if self-deployed or deployed by another agency or entity.

b. On-call team schedules shall be established and distributed by the department and shall be followed by the EHRT.

c. Deployment and standdown procedures are outlined in the Iowa EHRT Operational Procedures Manual and shall be followed by all EHRT members.

641—113.7(135) Legal and other protections. A public health response team member acting pursuant to Iowa Code section 135.143 and this chapter shall be considered an employee of the state under Iowa

Code section 29C.21 and chapter 669, shall be afforded protection as an employee of the state under Iowa Code section 669.21 whom the state shall defend and indemnify, and shall be considered an employee of the state for purposes of workers' compensation, disability, and death benefits, provided that the member has done all of the following:

1. Registered with and received approval from the department pursuant to subrule 113.4(1) to serve on a public health response team.
2. Provided direct medical care or other support services during a disaster, threatened disaster, or other incident described in Iowa Code section 135.143(1); or participated in a training exercise to prepare for a disaster or other incident described in Iowa Code section 135.143(1).

641—113.8(135) Reporting requirements and duties.

113.8(1) Upon obtaining knowledge or becoming aware of any injury allegedly arising out of the negligent rendering of, or the negligent failure to render, medical or other services as a public health response team member, such member or the member's sponsor agency shall provide written notice to the department, as soon as practicable, containing to the extent obtainable the circumstance of the alleged injury, the name and address of the injured, and any other relevant information.

113.8(2) Upon obtaining knowledge or becoming aware of any injury as defined in subrule 113.8(1), a public health response team member shall promptly take all reasonable steps to prevent further or additional injury from the same or similar circumstances, situations, or conditions.

113.8(3) A public health response team member shall immediately notify the Iowa Department of Justice, Special Litigation Division, Hoover State Office Building, Des Moines, Iowa 50319, of service or receipt of an original petition, suit, or claim seeking damage from the public health response team member related to participation on a public health response team.

113.8(4) Each public health response team member shall fully cooperate with the state in the defense of any claim or suit related to participation on a public health response team, including attending hearings, depositions, and trials and assisting in securing and giving evidence, responding to discovery and ensuring the attendance of witnesses.

113.8(5) Each public health response team member shall accept financial responsibility for personal expenses and costs incurred in the defense of any claim or suit related to participation on a public health response team, including travel, meals, and compensation for time and lost practice.

These rules are intended to implement Iowa Code section 135.143.

[Filed 1/10/07, Notice 11/22/06—published 1/31/07, effective 3/7/07]

CHAPTER 114
PREPAREDNESS ADVISORY COMMITTEE

641—114.1(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Chairperson*” means the chairperson of the preparedness advisory committee, who has been elected by a majority of advisory committee members.

“*Department*” means the Iowa department of public health.

“*Designee*” means the individual designated by the director.

“*Director*” means the director of public health.

“*PAC*” means the preparedness advisory committee.

“*Quorum*” means a simple majority of the voting membership of the preparedness advisory committee.

“*Regions*” means the six multicounty geographic areas of the state as identified by the preparedness advisory committee or the department to provide support services to the public health and hospital preparedness programs.

641—114.2(135) Purpose. The preparedness advisory committee (PAC) shall provide technical assistance and make recommendations for the planning and implementation of the public health emergency preparedness program for the department. The committee shall advise the department on matters of policy, plan development, funding allocations, and coordination of state, regional and local entities that are responsible for promoting and protecting the health and safety of all Iowans prior to, during, or after a public health emergency or disaster.

641—114.3(135) Appointment.

114.3(1) The voting members of the PAC shall be appointed by the director or designee as nominated by the member organizations.

114.3(2) The appointments shall be for three-year staggered terms which shall expire on June 30.

114.3(3) Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

114.3(4) Absences.

a. If a member is unable to attend a scheduled meeting, an alternate may be designated by the member organization to serve in the absence of the regular member.

b. Three consecutive unexcused absences shall be grounds for the director or designee to request nomination of an alternate representative to fill the position.

c. The chairperson of the preparedness advisory committee shall be charged with providing notification of absences to the department.

641—114.4(135) Membership.

114.4(1) The voting membership of the PAC shall consist of one representative nominated by each of the following organizations and approved by the director or the director’s designee:

- a.* American Red Cross,
- b.* Indian Health Services,
- c.* Upper Midwest Center for Public Health Preparedness,
- d.* Center for Food Security and Public Health,
- e.* Iowa Counties Public Health Association,
- f.* Iowa Environmental Health Association,
- g.* Iowa Emergency Management Association,
- h.* Iowa Emergency Medical Services Association,
- i.* Iowa Hospital Association,
- j.* Iowa Medical Society,
- k.* Iowa/Nebraska Primary Care Association,
- l.* Iowa Nurses Association,

- m.* Iowa Osteopathic Medical Association,
- n.* Iowa Pharmacy Association,
- o.* Iowa Poison Control Center,
- p.* Iowa National Guard,
- q.* University Hygienic Laboratory,
- r.* Veterans Health Administration,
- s.* Safeguard Iowa Partnership,
- t.* School Administrators of Iowa, and
- u.* A mental health association.

114.4(2) The preparedness advisory committee shall also include as voting members:

- a.* One public health representative from each of the six public health preparedness regions, and
- b.* One hospital representative from each of the six health care preparedness regions.

114.4(3) Contributions and representation to the PAC shall consist of the following entities:

- a.* The Iowa department of public health,
- b.* The Iowa department of human services,
- c.* The Iowa homeland security and emergency management division,
- d.* The Iowa department of natural resources,
- e.* The Iowa department of agriculture and land stewardship,
- f.* The Iowa department of elder affairs, and
- g.* The Iowa department of education.

641—114.5(135) Officers.

114.5(1) Officers of the PAC shall consist of a chairperson and a vice chairperson, who shall be elected at the first meeting of each fiscal year.

- a.* Vacancies in the office of chairperson shall be filled by elevation of the vice chairperson.
- b.* Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

114.5(2) Duties of officers.

- a.* The chairperson shall:
 - (1) Preside at all meetings of the advisory committee,
 - (2) Appoint such subcommittees as deemed necessary, and
 - (3) Ratify the chairperson of each subcommittee following elections.
- b.* The vice chairperson shall:

(1) Perform the duties of the chairperson if the chairperson is absent or unable to act. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson.

- (2) Perform such other duties as may be assigned by the chairperson.

641—114.6(135) Meetings.

114.6(1) The PAC shall establish a meeting schedule on an annual basis to conduct its business.

- a.* Meetings may be scheduled as business requires, but notice to members must be at least five working days prior to the meeting date unless action is required by the PAC on an emergency basis.
- b.* A four-week notice is encouraged to accommodate the schedules of professional members.

114.6(2) Robert's Rules of Order shall govern all meetings.

641—114.7(135) Subcommittees.

114.7(1) The PAC may designate one or more subcommittees pertinent to the priorities and activities of the public health and hospital preparedness program. Subcommittee members shall perform such duties as may be deemed necessary.

- a.* Each subcommittee shall include one voting member of the PAC.
- b.* The chairperson of each subcommittee shall be elected by the subcommittee membership and ratified by the PAC.

114.7(2) The designated subcommittees shall include but are not limited to:

- a.* Planning,
- b.* Epidemiology,
- c.* Lab,
- d.* Communications/information technology,
- e.* Risk communication, and
- f.* Education/exercises.

114.7(3) The PAC may establish ad hoc subcommittees for a specified time of duration for special projects or where special expertise is needed.

641—114.8(135) Expenses of preparedness advisory committee voting members. The following may be considered necessary expenses for reimbursement of PAC members when incurred on behalf of advisory committee business and are subject to established state reimbursement rates:

1. Reimbursement for travel in a private car.
2. Actual lodging and meal expenses, including sales tax on lodging and meals.
3. Actual expense of public transportation.

641—114.9(135) Gender balance. All advisory committees of the department appointed by the governor, director or designee, if not otherwise provided by law, shall be gender-balanced.

These rules are intended to implement Iowa Code chapter 135.

CHAPTER 121
STANDARD FOR IMPACT RESISTANCE AND METHOD OF TESTING
[Prior to 7/29/87, Health Department[470] Ch 121]

641—121.1(135) Standard for impact-resistant lenses. In order for a lens to be considered impact resistant, the lens must not fracture when subjected to the test specified below. For the purpose of these rules, a lens will be considered to have fractured if it cracks through its entire thickness, including a laminar layer, if any, and across a complete diameter into two or more separate pieces or if any lens material visible to the naked eye becomes detached from the ocular surface.

641—121.2(135) Method of testing lenses. All lenses used in eyeglasses or sunglasses must be capable of withstanding an impact test in which a 5/8-inch steel ball weighing approximately 0.56 ounces is dropped from a height of 50 inches upon the horizontal upper surface of the lens. The ball shall strike within a 5/8-inch diameter circle located at the geometric center on the exterior surface of the lens. The ball may be guided, but not restricted, in its fall by being dropped through a tube extending to within approximately 4 inches of the lens. The test shall be conducted with the lens supported by a tube (1-inch inside diameter, 1¼-inch outside diameter, and approximately 1-inch high) affixed to a rigid iron or steel base plate. The total weight of the base plate and its rigidly attached fixtures shall not be less than 27 pounds. For lenses of small minimum diameter, a support tube having an outside diameter of less than 1¼ inches may be used. The support tube shall be made of rigid acrylic plastic, steel or other suitable substance and shall have securely bonded on the top edge a 1/8- by 1/8-inch neoprene gasket having a hardness of 40±5, as determined by ASTM Method D 1415; a minimum tensile strength of 1,200 pounds, as determined by ASTM Method D 412; and a minimum ultimate elongation of 400 percent, as determined by ASTM Method D 412. The diameter and the contour of the lens support may be modified as necessary so that the 1/8- by 1/8-inch neoprene gasket supports the lens at its periphery. Each finished impact-resistant glass lens for prescription use shall be subjected to the impact test prescribed by this rule.

These rules are intended to implement Iowa Code section 135.30.

CHAPTER 124
INTERAGENCY COORDINATING COUNCIL
FOR THE STATE MEDICAL EXAMINER

641—124.1(691) Purpose. The purpose of the interagency coordinating council for the state medical examiner is to provide a venue for the effective coordination of the functions and operations of the office of the state medical examiner with the needs and interests of the department of public safety and the department of public health, with input and guidance from the governor's office.

641—124.2(691) Membership. Members shall include the chief state medical examiner or, when the state medical examiner is not available, the deputy state medical examiner, the commissioner of public safety or the commissioner's designee, the director of public health or the director's designee, and the governor or the governor's designee.

641—124.3(691) Meetings.

124.3(1) The interagency coordinating council shall schedule quarterly meetings to be held at the office of the director of public health.

124.3(2) Meetings may be scheduled more frequently or less frequently depending upon the circumstances and the need for consultation.

124.3(3) Meetings may be canceled by any member with the agreement of the other members.

124.3(4) All meetings are open to the public in accordance with the open meetings law, Iowa Code chapter 21.

641—124.4(691) Duties. The interagency coordinating council shall perform the following duties:

124.4(1) Provide a venue to coordinate the functions and operations of the office of the state medical examiner with the department of public safety and the department of public health in order to better serve the needs of the citizens of Iowa.

124.4(2) Provide to and receive from the governor's office updated information relevant to the mission of the state medical examiner's office.

124.4(3) Discuss legislative and budgetary decisions that may impact the functions and operations of one, two, or all three agencies represented by the interagency coordinating council.

641—124.5(691) Minutes. The office of the state medical examiner shall keep minutes of all meetings showing the date, time, place, members present, and the general topics presented.

124.5(1) The minutes shall be provided to the members of the interagency coordinating council prior to the next scheduled meeting.

124.5(2) The minutes shall be available at the office of the state medical examiner for public inspection Monday through Friday from 8:30 a.m. to 4:30 p.m.

These rules are intended to implement Iowa Code section 691.6B.

[Filed 1/10/08, Notice 11/21/07—published 1/30/08, effective 3/5/08]

CHAPTER 125
ADVISORY COUNCIL FOR THE STATE MEDICAL EXAMINER

641—125.1(691) Purpose. The purposes of the advisory council for the state medical examiner are to provide guidance concerning medicolegal death investigation for the state of Iowa, facilitate optimal relationships between the state and county medical examiners and other agencies involved in death investigation, and provide a venue for the exchange of information vital to the continued operations of the Iowa office of the state medical examiner.

641—125.2(691) Membership. Members shall include representatives from agencies and organizations that are directly involved with the office of the state medical examiner and medicolegal death investigation in the state of Iowa.

125.2(1) The advisory council shall include but not be limited to a representative from the following agencies:

- a.* The office of the attorney general;
- b.* The Iowa County Attorneys Association;
- c.* The Iowa Medical Society;
- d.* The Iowa Association of Pathologists;
- e.* The Iowa Association of County Medical Examiners;
- f.* The department of public safety;
- g.* The department of public health;
- h.* The Iowa Emergency Medical Services Association;
- i.* The Iowa Funeral Directors Association;
- j.* The University of Iowa department of pathology;
- k.* The state public defender's office; and
- l.* The office of the state medical examiner.

125.2(2) Each specific organization shall designate a representative to serve on the advisory council. Representatives shall be approved by the chief state medical examiner in consultation with the director of public health. Members may be selected from other organizations not specified in subrule 125.2(1) at the discretion of the chief state medical examiner.

125.2(3) The chair and presiding member of the council shall be the chief state medical examiner or a designee from the office of the state medical examiner.

641—125.3(691) Meetings. The advisory council will hold a meeting at the Iowa laboratory facility in Ankeny at least quarterly or on a more frequent basis as deemed necessary by the chief state medical examiner with approval of a majority of members of the council.

125.3(1) Meetings may be conducted via the Iowa Communications Network (ICN) for members who cannot physically be present at the laboratory facilities.

125.3(2) Meetings may be conducted by telephone at the discretion of the chief state medical examiner depending upon the complexity of the agenda.

125.3(3) Notice of routine meetings and agenda will be made available to the members a minimum of five working days prior to the meeting.

125.3(4) The chief state medical examiner or any member of the council may ask for a special meeting to discuss emergent issues within a 24-hour time period.

125.3(5) All meetings are open to the public in accordance with the open meetings law, Iowa Code chapter 21.

125.3(6) The operation of council meetings will be governed by the following rules of procedure:

- a.* A simple majority will be defined as a quorum, but the chair may choose to continue with the meeting even if a quorum is not present.
- b.* A course of action for topics under debate will be agreed upon by a simple majority vote of the members present at the meeting.

c. Any council member or a designated replacement who is unable to attend a meeting will notify the office of the state medical examiner at least 24 hours prior to the start of a regularly scheduled meeting; a meeting may be canceled if attendance is expected to be low.

641—125.4(691) Duties. The advisory council shall perform the following duties:

125.4(1) Provide information to council members regarding the current operations and functions of the office of the state medical examiner.

125.4(2) Provide information to council members regarding any legislative or budgetary decisions that impact the office of the state medical examiner.

125.4(3) Elicit council members' suggestions and recommendations to improve the overall operations of the office of the state medical examiner.

641—125.5(691) Minutes. The advisory council shall keep minutes of all its meetings showing the date, time, place, members present, members absent, and the general topics discussed.

125.5(1) The minutes shall reflect the actions agreed upon by the members for topics requiring the members' input or consensus.

125.5(2) If a meeting is convened within a 24-hour time period to discuss emergent issues, then the minutes shall reflect the emergent nature of this meeting.

125.5(3) If a meeting is conducted via telephone, then the minutes shall reflect the reason for the use of this method of communication.

125.5(4) The minutes shall be available at the office of the state medical examiner for inspection Monday through Friday from 8:30 a.m. to 4:30 p.m.

These rules are intended to implement Iowa Code section 691.6C.

[Filed 1/10/08, Notice 11/21/07—published 1/30/08, effective 3/5/08]

CHAPTER 126
 STATE MEDICAL EXAMINER
 [Prior to 4/20/88, see Medical Examiner, State[566] Ch 1]
 [Prior to 7/1/99, see Public Safety Department[661] Ch 21]

641—126.1(144,331,691) Definitions.

“Autopsy” means the external and internal postmortem examination of a deceased person.

“County of appointment” means the county which requests a medical examiner to conduct an investigation, perform or order an autopsy, or prepare a report(s) in a death investigation case. The request may be authorized by the county attorney or the county medical examiner. The county of appointment shall be the county in which the death occurred.

641—126.2(691) Medical examiner coverage. Rescinded IAB 12/12/01, effective 1/16/02.

641—126.3(691) Fees for autopsies and related services and reimbursement for related expenses. Autopsies performed by the state medical examiner division are provided on a fee-for-service basis. Costs of autopsies and related services and expenses are the responsibility of the county of appointment. The county of residence of the deceased shall reimburse the county of appointment.

126.3(1) Fee schedule. The following fees shall apply to autopsies conducted by the state medical examiner division:

Autopsy	\$1200
Copies of reports	\$20

EXCEPTIONS: A copy of the autopsy report is included in the autopsy fee. A single copy of an autopsy report may be provided to the immediate next of kin of the deceased without fee. Copies of autopsy reports may be provided to public officials and physicians of record for official purposes without fee.

State, deputy, or associate medical examiner(s) time for all court cases	\$350 per hour with a one-hour minimum
---------------------------------------------------------------------------------------	----------------------------------------

This fee is for time spent reviewing case materials, preparing for deposition or court, testifying in deposition or court, and travel time.

126.3(2) Expense reimbursement. Other laboratory services associated with an autopsy, which shall include, but not be limited to, photography, toxicology, radiology, microbiology, and morgue fees, shall be billed by the department to the county of appointment. Moneys collected pursuant to this subrule shall be paid by the department to the laboratory or other entity providing the service.

126.3(3) State medical examiner acting as county medical examiner. When the state medical examiner acts in the capacity of county medical examiner, the state medical examiner shall receive from the county of appointment a fee of \$100 per hour, with a one-hour minimum, for each report prepared plus the state medical examiner’s actual expenses. Counties may not depend on the state medical examiner for full-time coverage.

641—126.4(691) Fees for tissue recovery. When the tissue recovery room located within the office of the state medical examiner is utilized by an authorized tissue recovery agency, a fee of \$400 per case shall be assessed. The tissue recovery agency is responsible for this fee, payable to the office of the state medical examiner.

These rules are intended to implement Iowa Code section 691.6.

CHAPTER 127
COUNTY MEDICAL EXAMINERS
[Prior to 7/29/87, Health Department [470] Ch 127]

641—127.1(144,331,691) Definitions.

“*Autopsy*” means the external and internal postmortem examination of a deceased person.

“*Cause of death*” means the disease or injury which sets in motion the chain of events which eventually result in the death of a person. The physician shall consider “but for” this injury or disease the person would still be living.

“*County medical examiner*” or “*CME*” means a medical or osteopathic physician or surgeon licensed in the state of Iowa and appointed by the board of supervisors to serve in this capacity.

“*County medical examiner investigator*” or “*CME-I*” means an individual appointed by a county medical examiner, with approval by the board of supervisors and the state medical examiner, to serve under the supervision of a county medical examiner to assist in death investigations.

“*County of appointment*” means the county which requests a medical examiner to conduct an investigation, perform or order an autopsy, or prepare a report(s) in a death investigation case. The request may be authorized by the county attorney or the county medical examiner. The county of appointment shall be the county in which the death occurred.

“*Cremation*” means the technical process, using heat and flame, that reduces human remains to bone fragments.

“*Day*” means calendar day.

“*Death*” means the condition as described in Iowa Code section 702.8.

“*Death affecting the public interest*” means any death of a human being in which the circumstances are sudden, unexpected, violent, suspicious, or unattended, including but not limited to those deaths listed at Iowa Code section 331.802(3) and described as follows:

1. Violent death. Violent death includes homicide, suicide, or accidental death resulting from physical, mechanical, thermal, chemical, electrical, or radiation injury. A medical examiner’s investigation and report are required irrespective of the period of survival following injury.

2. Death caused by criminal abortion, including self-induced.

3. Death related to disease thought to be virulent or contagious which may constitute a public hazard. Any such case investigated by a medical examiner shall be reported to the department and to the local health authority.

4. Death that has occurred unexpectedly or from an unexplained cause. This term includes the following situations:

- Death without prior medical conditions accounting for the death.

- Apparently instantaneous death without obvious cause.

- Death during or following an unexplained syncope or coma.

- Death during an unexplained, acute, or rapidly fatal illness.

5. Death of a person confined in a prison, jail, or correctional institution.

6. Death of a person when unattended by a physician during the period of 36 hours immediately preceding death.

- This term includes the following situations:

- Persons found dead without obvious or probable cause.

- Death when the person was unattended by a physician during a terminal illness.

- Fetal death unattended by a physician. A fetal death is a fetus born dead after a gestation period of 20 completed weeks or greater or a fetus which weighs 350 grams or more (Iowa Code section 144.29).

- This term does not include a prediagnosed terminal or bedfast case in which a physician has been in attendance within 30 days preceding the death.

- This term does not include a terminally ill patient who was admitted to and received services from a hospice program as defined in Iowa Code section 135J.1, if a physician or registered nurse employed by the program was in attendance within 30 days preceding the death.

7. Death of a person if the body is not claimed by a relative or friend.

8. Death of a person if the identity of the deceased is unknown.
9. Death of a child under the age of two years if death results from an unknown cause or if the circumstances surrounding the death indicate that sudden infant death syndrome may be the cause of death.

“*Department*” means the Iowa department of public health.

“*Deputy county medical examiner*” or “*DCME*” means an individual appointed by a county medical examiner, with approval by the board of supervisors and the state medical examiner, to assist the county medical examiner in the performance of the county medical examiner’s duties.

“*External examination*” means a close inspection of the exterior of a deceased human body for the purpose of locating, describing, and delineating any and all injuries or other abnormalities. External examination of a body does not constitute an autopsy, even if toxicology samples are obtained.

“*Fee*” means an amount to be paid to a county medical examiner’s office as determined by the board of supervisors of the county of appointment for completion of an investigation, autopsy, or report(s). Fees for services provided by the state medical examiner’s office are established at 641—126.3(691).

“*Form ME-1*” means the Preliminary Report of Investigation by Medical Examiner form.

“*Form ME-2*” means the Medical Examiner Embalming Certificate form.

“*Form ME-3*” means the Permit by Medical Examiner for Autopsy form.

“*Form ME-4*” means the Preliminary Report of Child/Infant Death Scene Investigation form.

“*Form ME-5*” means the Cremation Permit by Medical Examiner form.

“*Form ME-6*” means the Iowa State Medical Examiner’s Office Personal Effects form.

“*Form ME-7*” means the Medication List form.

“*Form ME-8*” means the Body Identification Record form.

“*Manner of death*” means the circumstances under which the cause of death occurred and may be specified as follows: natural, accident, suicide, homicide, undetermined, or pending.

“*Medical care provider*” means an individual licensed or certified in any medical profession, including but not limited to a physician, physician assistant, nurse, emergency medical care provider, certified nurse’s aide, pharmacist, physical therapist, and medical technologist.

“*Medical examiner*” means the state medical examiner, deputy state medical examiner, county medical examiner, or deputy county medical examiner.

641—127.2(331,691) Duties of medical examiners—jurisdiction over deaths which affect the public interest.

127.2(1) Jurisdiction. Upon receiving notification of a death which affects the public interest, a medical examiner shall notify any appropriate law enforcement agency not otherwise notified and shall take charge of the body of the decedent. The body shall not be disturbed or removed from the position in which it was found without authorization from the medical examiner except for the purpose of preserving the body from loss or destruction or permitting the passage of traffic on a highway, railroad, or airport, or unless the failure to remove the body might endanger life, safety, or health.

127.2(2) Investigation. A county medical examiner shall conduct a preliminary investigation of the cause and manner of death and shall utilize the investigative protocol outlined in the most current edition of the County Medical Examiner’s Handbook, available from the state medical examiner’s office. A medical examiner may perform or authorize performance of any scientific study to assist in identifying the cause, circumstances, and manner of death. A medical examiner shall cooperate with other investigating officials and agencies involved and shall share reports, information, and conclusions with these officials and agencies.

127.2(3) Reports required.

a. *Form ME-1.*

(1) Preparation and filing. A county medical examiner shall prepare a written report of the examiner’s findings on the Preliminary Report of Investigation by Medical Examiner, Form ME-1. A county medical examiner shall file the original Form ME-1 with the state medical examiner’s office within 14 days of the date of death and shall file a copy of the Form ME-1 with the county attorney within 14 days of the date of the death and shall retain a copy for the medical examiner’s records.

(2) Content. Form ME-1 shall be completed as fully as possible in light of all available information and may be signed by either a county medical examiner or a county medical examiner investigator acting under the supervision of a county medical examiner. If the cause or manner of death, identity of the decedent, or other information is unknown or pending at the time of filing, “unknown” or “pending” may be written in the appropriate area of the form. If additional information becomes available, this information shall be forwarded to the state medical examiner in written form at such time as it becomes available to be added as a supplement to the file.

b. Jurisdiction declined or terminated. A form designated by the office of the state medical examiner shall be completed and filed in accordance with subparagraphs (1) and (2) of paragraph “a” above in cases reported to the county medical examiner where jurisdiction is terminated or declined.

127.2(4) Disposition of body. After an investigation, including an autopsy if one was performed, the body of the decedent shall be made available to the funeral home designated by a relative or friend of the decedent for burial or appropriate disposition. A medical examiner shall not use influence in favor of a particular funeral director or funeral home. If no one claims a body, it shall be disposed of as provided in Iowa Code chapter 142.

127.2(5) Coverage.

a. When an individual is required to report a death to a medical examiner and the county medical examiner cannot be located or is not available, the individual shall contact a county medical examiner from any adjacent Iowa county to perform those duties outlined in this chapter. The responding medical examiner shall have full authority to conduct any procedures necessary to the investigation of the cause and manner of death. If an adjacent county medical examiner is not available, the state medical examiner shall be contacted and may act in the capacity of a county medical examiner.

b. The responding county medical examiner shall be reimbursed by the county for which the service is provided for all fees and expenses at the rate which is customarily paid by the county for which the service is provided or at a rate agreed upon by the medical examiner and the board of supervisors of the county for which the service is provided.

641—127.3(331,691) Autopsies.

127.3(1) Autopsy required. A county medical examiner shall perform an autopsy or order that an autopsy be performed in the following cases:

a. All cases of homicide or suspected homicide, irrespective of the period of survival following injury.

b. All cases in which the manner of death is undetermined.

c. All cases involving unidentified bodies.

d. All deaths of children under the age of two when there is not a clear cause of death, including suspected cases of sudden infant death syndrome. A summary of the findings of the autopsy shall be transmitted by the physician who performed the autopsy to the county medical examiner within two days of completion of the report. Autopsies performed on children under the age of two when the circumstances surrounding the death indicate that sudden infant death syndrome may be the cause of death or the cause of death is not clearly explained by known medical history shall conform to Form ME-4.

e. All work- and farm-related deaths unless there is an obvious natural cause of death.

f. All drowning deaths.

g. All deaths of commercial vehicle drivers that occur during the performance of their job duties.

h. Deaths due to poisoning.

i. Deaths of airplane pilots who die as a result of an airplane crash. The National Transportation Safety Board and the Federal Aviation Administration should be contacted prior to the autopsy to request specimen kit(s).

j. Deaths due to a natural disaster, including tornadoes and floods.

k. Deaths in a prison, jail or correctional institution or under police custody, where there is not a natural disease process that accounts for the death.

127.3(2) *Autopsy recommended.* It is recommended that a county medical examiner should perform an autopsy or order that an autopsy be performed in the following cases:

- a. Deaths of adolescents less than 18 years of age when there is not a natural cause of death.
- b. All cases which involve a motor vehicle crash, unless it is a single motor vehicle accident with no potential for litigation and there is an obvious cause of death or the injuries have been clearly documented by hospitalization.
- c. Rescinded IAB 3/29/06, effective 5/3/06.
- d. Deaths from suicide.
- e. All pedestrian, bicycle, motorcycle, snowmobile, boating, watercraft, three- or four-wheeler or all-terrain vehicle fatalities.
- f. Deaths due to failure of a consumer product.
- g. Deaths due to a possible public health hazard.
- h. Deaths due to drug or alcohol abuse or overdose.
- i. Electrical- and lightning-related deaths.
- j. Deaths from burns or smoke or soot inhalation.
- k. All deaths related to exposure, such as hypothermia and hyperthermia.
- l. All sport-related deaths, including but not limited to deaths from auto racing and deaths resulting from injuries sustained in football, basketball, baseball, softball, soccer, or other games or sports.

127.3(3) *Other deaths.* For those deaths not listed in subrule 127.3(1) or 127.3(2), a county medical examiner shall determine whether the public interest requires an autopsy and may perform an autopsy or order that an autopsy be performed. A county medical examiner may consult with the state medical examiner to assist in determining the need for an autopsy.

127.3(4) *Performance of autopsy.*

a. *Who may authorize.* Autopsies may be authorized by the state medical examiner, the county medical examiner for the county in which the death occurred or the county where any injury contributing to or causing the death was sustained, or the county attorney who would have jurisdiction in any criminal proceeding related to the death.

b. *Who may perform.* An autopsy shall be performed by a pathologist trained or with experience in forensic pathology, licensed to practice medicine and surgery or osteopathic medicine and surgery in the state of Iowa and board-certified by the American Board of Pathology, or under the direct supervision of a physician with these qualifications. If an autopsy is performed by a physician who does not satisfy these criteria and who is not performing under the direct supervision of a physician who satisfies these criteria, the physician shall submit a supplemental report with the Permit by Medical Examiner for Autopsy, Form ME-3, which details the specific training, education, and experience which qualify the physician to perform an autopsy. The following cases/types of deaths shall be transported to the office of the state medical examiner for autopsy unless otherwise approved by the state medical examiner:

- (1) Deaths of adolescents through 18 years of age when there is not a known or preexisting natural cause of death.
- (2) All cases of homicide or suspected homicide, irrespective of the period of survival following injury.
- (3) Deaths of children under the age of 2 years if death results from an unknown cause or if the circumstances surrounding the death indicate that Sudden Infant Death Syndrome may be the cause of death.
- (4) All suspicious suicides.
- (5) All high-profile deaths including, but not limited to, deaths of elected officials in municipal, state or federal government.
- (6) All deaths of inmates occurring in any institutions under the department of corrections as outlined in Iowa Code section 904.102, excluding those deaths that result from a pre-existing medical condition.

c. *Permit required—Form ME-3.* A medical examiner shall complete the Permit by Medical Examiner for Autopsy, Form ME-3. All reasonable efforts shall be made to complete the Form ME-3

prior to the performance of an autopsy and to submit the form with the body of the decedent or to submit the form via facsimile to the state medical examiner.

127.3(5) Autopsy report. A complete record of the findings of the autopsy shall be submitted to the state medical examiner's office, the county attorney of the county where the death occurred and the county attorney of the county where the injury contributing to or causing the death was sustained within 90 days following the date of death, unless unusual circumstances requiring further investigation or testing exist. The report filed shall include all diagrams, transcriptions of the autopsy observations and opinions, and toxicology reports.

127.3(6) Out-of-state autopsy. The body of a decedent may be sent out of state for an autopsy or postmortem examination only if the county medical examiner certifies in writing that the out-of-state autopsy or examination is necessary for any of the following reasons:

- a. A forensic pathologist practicing in the state of Iowa is unavailable;
- b. Requiring an in-state autopsy would cause financial hardship; or
- c. Requiring an in-state autopsy would delay the funeral or burial more than three days.

127.3(7) Retention and disposal of tissues, organs, and bodily fluids. The office of the state medical examiner shall retain tissues, organs, and bodily fluids as necessary to determine the cause and manner of death or as deemed advisable by the state medical examiner for medical or public health investigation, teaching, or research. Tissues, organs, and bodily fluids shall be retained at a minimum for the time periods established by the National Association of Medical Examiners and may be retained for a longer time period at the discretion of the state medical examiner. Tissues, organs, and bodily fluids retained under this subrule shall be disposed of without the specific consent or notification of the legal next of kin and in accordance with applicable federal and state regulations including but not limited to OSHA-recommended biohazard and blood-borne pathogen standards. The anatomical material shall be removed from the laboratory premises through use of a contracted, licensed, and bonded medical waste removal service to a medical waste processing center for final disposition.

641—127.4(331,691) Fees.

127.4(1) Payment of fee and expenses.

a. A medical examiner shall receive from the county of appointment a fee for each preliminary investigation and report submitted in a case in which a death affects the public interest. A county medical examiner shall also receive from the county of appointment the examiner's actual expenses.

b. A pathologist or other physician who performs an autopsy under medical examiner authorization shall be paid for the services by the county of appointment.

127.4(2) Reimbursement.

a. *County of residence different from county of appointment—Iowa resident.* The county of the decedent's residence shall reimburse the county of appointment for the fee and expenses paid by the county of appointment.

b. *Death caused by criminal defendant.* If the person's death is caused by a criminal defendant who has been convicted and sentenced for murder, voluntary manslaughter, involuntary manslaughter, or homicide by vehicle, the county of the person's residence may recover from the defendant the fee and expenses.

c. *Out-of-state resident—law enforcement involvement.* The fee and expenses of a county medical examiner who performs an investigation or autopsy of a person who dies after being brought into the state for emergency medical treatment by or at the direction of an out-of-state law enforcement officer or public authority shall be paid by the state. A claim for payment shall be filed with the department.

d. *Out-of-state resident—no law enforcement involvement.* The fee and expenses of a county medical examiner who performs an investigation or autopsy of an out-of-state resident shall be paid by the county of appointment.

e. *Child under the age of two.* If the death of a child under the age of two results from an unknown cause or if the circumstances surrounding the death indicate that sudden infant death syndrome may be the cause of death, the department shall reimburse the county of appointment up to \$400 toward the expense of the autopsy. A county auditor may submit a copy of the bill and the autopsy report to Iowa

SIDS Program, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319. A request for reimbursement shall be submitted within one year after the date of death.

641—127.5(144,331,691) Death certificates—deaths affecting the public interest.

127.5(1) Completion. The funeral director to whom the body is released shall complete the personal data on the death certificate. The medical examiner shall complete the manner of death and cause of death sections of the death certificate within 72 hours after determination of the cause of death. If an autopsy is performed by the state medical examiner, the death certificate shall be submitted to the state medical examiner's office for completion. All information included on the certificate shall be typewritten.

127.5(2) Filing. The funeral director shall file the certificate with the county registrar in the county in which the death occurred. A death certificate shall be filed prior to the issuance of a burial transit permit and prior to disposal of the body.

127.5(3) Extension of time. If a medical examiner is unable to complete the manner of death and cause of death sections of the death certificate within the 24-hour time period, the funeral director shall file a death certificate form completed with all available information. Such certificate shall be authority for the issuance of a burial transit permit. Within 15 days, a supplemental report shall be filed with the local registrar which provides the information missing from the original certificate.

127.5(4) Additional standards. Additional rules relative to death certificates may be found at 641—Chapter 101.

641—127.6(331,691) Cremation.

127.6(1) Permit obtained prior to cremation—Form ME-5. A permit for cremation shall be obtained from a county medical examiner prior to cremation of a body of a decedent. For purposes of this requirement, a facsimile or electronic copy of the cremation permit has the same legal effect as the original. Cremation permits shall be issued on the Cremation Permit by Medical Examiner, Form ME-5.

127.6(2) Requirements for issuance of permit. A county medical examiner shall direct an inquiry into the cause and manner of death and shall determine whether the death is one which affects the public interest prior to issuing a cremation permit.

a. Death which affects the public interest. If the death occurred in a manner specified in Iowa Code section 331.802(3) or if reasonable suspicion that the death occurred in such a manner exists, a medical examiner shall view the body, make a personal inquiry into the cause and manner of death, and complete or cause to be completed all necessary autopsy or postmortem examinations prior to issuing a cremation permit.

b. Death which does not affect the public interest. If, following an inquiry into the cause and manner of death, the county medical examiner determines that the death did not occur in a manner specified in Iowa Code section 331.802(3), a medical examiner is not required to view the body prior to issuing a cremation permit. A county medical examiner shall certify on the Cremation Permit by Medical Examiner, Form ME-5, that the medical examiner's inquiry into the cause and manner of death did not disclose evidence that the death occurred in a manner specified in Iowa Code section 331.802(3).

127.6(3) Fee. A fee for the Cremation Permit by Medical Examiner, Form ME-5, shall be paid by the family, next of kin, guardian of the decedent, or other person authorized to act on behalf of the decedent.

641—127.7(331,691) County medical examiner investigators.

127.7(1) Appointment. A county medical examiner may appoint one or more county medical examiner investigators upon approval by the board of supervisors and the state medical examiner.

127.7(2) Qualifications.

a. Prior to appointment, a CME-I should possess a minimum of two years of experience as a licensed or certified nurse or medical care provider. A certified peace officer may be appointed to the position of CME-I if a nurse or medical care provider is not available.

b. A CME-I shall satisfy the following criteria:

(1) Prior to or within two years of appointment, attend the St. Louis University School of Medicine Basic Medicolegal Death Investigation Course or its state medical examiner-approved equivalent; and

(2) Prior to or within five years of appointment, obtain certification at the registry-level as a death investigator by the American Board of Medicolegal Death Investigators.

c. A CME-I is not required to meet the requirements of paragraph “a” or “b” if the individual has functioned in the capacity of a CME-I for a period of five years as of January 1, 2002.

d. If a CME is unable to appoint a CME-I who possesses the qualifications required by paragraph “a,” “b,” or “c,” the CME may request a waiver. Waiver requests shall be submitted in writing to the state medical examiner and shall include the efforts undertaken by the CME to locate a CME-I who meets the above qualifications; the qualifications of the individual willing to serve in the capacity of CME-I; and the period of time for which the waiver is requested, not to exceed two years. The state medical examiner has sole discretion to waive the requirements of this rule and may withdraw or modify a waiver request upon a finding that the CME-I has failed to adequately perform the duties of the position or for other good cause.

127.7(3) Duties. A CME-I shall assist in death investigations. A CME-I acting under the supervision of a county medical examiner may sign the Form ME-1. A CME-I shall not sign a certificate of death or a Form ME-5.

127.7(4) Supervision. A CME-I shall serve under the supervision of a county medical examiner. A CME-I provides services under the direction of a county medical examiner or state medical examiner’s office. A CME-I shall at all times perform services in a manner which is consistent with the protocol outlined in the most current edition of the County Medical Examiner’s Handbook and any policies or protocols of the supervising county medical examiner.

127.7(5) Fees. Fees for the services provided by a CME-I shall be paid by the county of appointment.

641—127.8(331,691) Deputy county medical examiners.

127.8(1) Appointment. A county medical examiner may appoint one or more deputy county medical examiners upon approval by the board of supervisors and the state medical examiner.

127.8(2) Qualifications. A DCME shall be licensed in the state of Iowa as a medical or osteopathic physician or surgeon.

127.8(3) Duties. A DCME shall serve at the direction of the county medical examiner and may perform any duty of a county medical examiner which is delegated by the county medical examiner to the DCME.

127.8(4) Fees. Fees for the services provided by a DCME shall be paid by the county of appointment.

641—127.9(331,691) Failure to comply with rules. If a county medical examiner, deputy county medical examiner, county medical examiner investigator, pathologist, or other physician fails to comply with these rules, the state medical examiner may provide written notice of the failure to comply to that individual, the appropriate county medical examiner, and the appropriate county board of supervisors. Within 30 days of the date of the notice, the individual to whom the notice was provided shall submit a written response to the state medical examiner, outlining a proposed corrective action plan. If no response is received within the 30 days or if the proposed corrective action plan is unacceptable, the state medical examiner shall forward copies of the notice and all pertinent correspondence and information to the board of supervisors for the county which appointed the individual, notifying the board of the individual’s failure to comply with these rules.

641—127.10(331,691,22) Confidentiality. Records and reports of a medical examiner may be confidential records pursuant to Iowa Code sections 22.7(2), 22.7(5), and 22.7(41) and other provisions of Iowa law. Prior to releasing a medical examiner record or report to a member of the public, a county medical examiner may inform the appropriate law enforcement agency, the county attorney, and the state medical examiner to determine whether release is authorized under Iowa law.

641—127.11(331,691,670) Indemnification. A board of supervisors shall defend, hold harmless, and indemnify a county medical examiner and any properly appointed staff members to the extent provided in Iowa Code chapter 670.

These rules are intended to implement Iowa Code chapters 331 and 691.

CHAPTER 130
EMERGENCY MEDICAL SERVICES ADVISORY COUNCIL

641—130.1(147A) Definitions. For the purposes of this chapter, the following definitions shall apply:

“*Chairperson*” means the chair of the advisory council, who has been elected by the majority of the advisory council’s members.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist, or other certification level recognized by the department before 1984 and who has been issued a certificate by the department.

“*Emergency medical services*” or “*EMS*” means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

641—130.2(147A) Purpose. The EMS advisory council shall advise the director and develop policy recommendations concerning the regulation, administration, and coordination of emergency medical services in the state.

641—130.3(147A) Appointment.

130.3(1) The EMS advisory council shall be appointed by the director. The appointments shall be for three-year staggered terms which shall expire on June 30. Vacancies shall be filled in the same manner in which the original appointments were made for the balance of the unexpired term.

130.3(2) Membership of the council shall be comprised of individuals nominated from, but not limited to, the following state or national organizations:

a. One physician from each of the following organizations:

- (1) Iowa Osteopathic Medical Association.
- (2) Iowa Medical Society.
- (3) American College of Emergency Physicians.
- (4) Iowa Academy of Family Physicians.
- (5) University of Iowa Hospitals and Clinics.
- (6) American Academy of Emergency Medicine.
- (7) American Academy of Pediatrics.

b. Representatives from each of the following organizations:

- (1) Iowa Physician Assistant Society.
- (2) EMS Education Programs Committee.
- (3) EMS Regional Council.
- (4) Iowa Nurses Association.
- (5) Iowa Hospital Association.
- (6) Iowa State Association of Counties.

c. Two out-of-hospital emergency medical care providers from the Iowa Firemen’s Association.

d. One out-of-hospital emergency medical care provider from the Iowa Professional Firefighters.

e. Three out-of-hospital emergency medical care providers, with at least one representing volunteer EMS, from the Iowa EMS Association.

641—130.4(147A) Absences. Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the advisory council member and to appoint another. The chairperson of the advisory council is charged with providing notification of absences.

641—130.5(147A) Officers.

130.5(1) Officers of the advisory council shall be a chairperson and a vice chairperson who shall be elected at the first meeting of each fiscal year unless they are designated as officers at the time of their appointment.

- a. Officers may serve no more than three consecutive terms as an officer.
- b. Vacancies in the office of chairperson shall be filled by the vice chairperson.
- c. Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs.

130.5(2) Duties of officers. The chairperson shall preside at all meetings of the advisory council, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting, the vice chairperson shall have all the powers of and be subject to all the restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

641—130.6(147A) Meetings.

130.6(1) The advisory council shall establish a meeting schedule on an annual basis to conduct business. There shall be a minimum of four meetings per year. Meetings may be scheduled as business requires, but notice to members must be at least five working days prior to the meeting date. Four weeks' notice is encouraged to accommodate the schedules of professional members.

130.6(2) Robert's Rules of Order shall govern all meetings.

130.6(3) A majority of appointed members shall be considered a quorum.

130.6(4) Any advisory council member who is unable to attend a meeting will notify the chairperson; there may not be a meeting if a quorum is not present.

130.6(5) When a quorum is present, a position is carried by affirmative vote of the majority of those present.

130.6(6) Persons wishing to make a presentation to the advisory council shall submit the request to the chairperson not less than 14 days prior to the meeting. Presentations may be made either at the discretion of the chairperson or upon matters appearing on the agenda.

130.6(7) Persons wishing to submit written materials should do so at least 14 days in advance of the scheduled meeting to ensure that advisory council members have adequate time to receive and evaluate the materials.

130.6(8) The advisory council may conduct a meeting by electronic means only in circumstances in which an in-person meeting is impossible or impractical, pursuant to Iowa Code section 21.8.

641—130.7(147A) Subcommittees. The advisory council may designate one or more subcommittees to perform such duties as may be deemed necessary.

641—130.8(147A) Expenses of advisory council members. The following may be considered necessary expenses for reimbursement of advisory council members when the expenses are incurred on behalf of advisory council business and are subject to established state reimbursement rates.

1. Reimbursement for travel in a private car.
2. Actual lodging and meal expenses, including sales tax on lodging and meals.
3. Actual expenses of public transportation.

641—130.9(147A) Gender balance. If not otherwise provided by law, all advisory bodies of the department appointed by the governor, director or designee shall be gender-balanced.

These rules are intended to implement Iowa Code chapter 147A.

[Filed 9/13/07, Notice 8/1/07—published 10/10/07, effective 11/14/07]

CHAPTER 131
EMERGENCY MEDICAL SERVICES
PROVIDER EDUCATION/TRAINING/CERTIFICATION

641—131.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Automated external defibrillator*” or “*AED*” means an external semiautomatic device that determines whether defibrillation is required.

“*Basic care*” means treatment interventions, appropriate to certification level, that provide minimum care to the patient including, but not limited to, CPR, bandaging, splinting, oxygen administration, spinal immobilization, oral airway insertion and suctioning, antishock garment, vital sign assessment and administration of over-the-counter drugs.

“*Candidate*” means an individual who has successfully completed a course of study as a first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other level certified by the department and who has been recommended by a training program for a state-approved certification examination.

“*CECBEMS*” means the continuing education coordinating board for emergency medical services.

“*CEH*” means “continuing education hour” which is based upon a minimum of 50 minutes of training per hour.

“*Certification period*” means the length of time an EMS provider certificate is valid. The certification period shall be for two years from initial issuance or from renewal, unless otherwise specified on the certificate or unless sooner suspended or revoked.

“*Certification status*” means a condition placed on an individual certificate for identification as active, deceased, denied, dropped, expired, failed, hold, idle, inactive, incomplete, pending, probation, retired, revoked, surrendered, suspended, or temporary.

“*Continuing education*” means training approved by the department which is obtained by a certified emergency medical care provider to maintain, improve, or expand relevant skills and knowledge and to satisfy renewal of certification requirements.

“*Course completion date*” means the date of the final classroom session of an emergency medical care provider course.

“*Course coordinator*” means an individual who has been assigned by the training program to coordinate the activities of an emergency medical care provider course.

“*CPR*” means training and successful course completion in cardiopulmonary resuscitation, AED, and obstructed airway procedures for all age groups according to recognized national standards.

“*Critical care paramedic (CCP)*” means a currently certified paramedic specialist who has successfully completed a critical care course of instruction approved by the department and has received endorsement from the department as a critical care paramedic.

“*Current course completion*” means written recognition given for training and successful course completion of CPR with an expiration date or a recommended renewal date that exceeds the current date.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*DOT*” means the United States Department of Transportation.

“*Emergency medical care*” means such medical procedures as:

1. Administration of intravenous solutions.
2. Intubation.
3. Performance of cardiac defibrillation and synchronized cardioversion.
4. Administration of emergency drugs as provided by protocol.
5. Any medical procedure authorized by 131.3(3).

“*Emergency medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“Emergency medical technician-ambulance (EMT-A)” means an individual who has successfully completed the 1984 United States Department of Transportation’s Emergency Medical Technician-Ambulance curriculum, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-A.

“Emergency medical technician-basic (EMT-B)” means an individual who has successfully completed the current United States Department of Transportation’s Emergency Medical Technician-Basic curriculum and department enhancements, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-B.

“Emergency medical technician-defibrillation (EMT-D)” means an individual who has successfully completed an approved program which specifically addresses manual or automated defibrillation, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-D.

“Emergency medical technician-intermediate (EMT-I)” means an individual who has successfully completed an EMT-intermediate curriculum approved by the department, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-I.

“Emergency medical technician-paramedic (EMT-P)” means an individual who has successfully completed the current United States Department of Transportation’s EMT-Intermediate curriculum or the 1985 or earlier DOT EMT-P curriculum, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-P.

“Emergency rescue technician (ERT)” means an emergency medical care provider trained in various rescue techniques including, but not limited to, extrication from vehicles and agricultural rescue, and who has successfully completed a curriculum approved by the department in cooperation with the department of public safety.

“EMS advisory council” means a council appointed by the director, pursuant to Iowa Code chapter 147A, to advise the director and develop policy recommendations concerning regulation, administration, and coordination of emergency medical services in the state.

“EMS evaluator (EMS-E)” means an individual who has successfully completed an EMS evaluator curriculum approved by the department and is currently endorsed by the department as an EMS-E.

“EMS instructor (EMS-I)” means an individual who has successfully completed an EMS instructor curriculum approved by the department and is currently endorsed by the department as an EMS-I.

“Endorsement” means providing approval in an area related to emergency medical care including, but not limited to, emergency rescue technician and emergency medical services-instructor.

“First responder (FR)” means an individual who has successfully completed the current United States Department of Transportation’s first responder curriculum and department enhancements, passed the department’s approved written and practical examinations, and is currently certified by the department as an FR.

“First responder-defibrillation (FR-D)” means an individual who has successfully completed an approved program that specifically addresses defibrillation, passed the department’s approved written and practical examinations, and is currently certified by the department as an FR-D.

“Good standing” means a student or candidate in compliance with these rules and training program requirements.

“Idle” means the status of a lower certification level when a higher level is held.

“Inactive” means the status of a certification level when an individual moves from a higher certification level to a lower certification level that was previously idle or requests inactive status.

“Intermediate” means an emergency medical technician-intermediate.

“NCA” means North Central Association of Colleges and Schools.

“NREMT” means National Registry of Emergency Medical Technicians.

“Out-of-state student” means any individual enrolled in an approved out-of-state training program and participating in clinical or field experience portions.

“Out-of-state training program” means an EMS program located outside the state of Iowa that is approved by the authorizing agency of the program’s home state to conduct initial EMS training for first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other level certified by the department.

“Outreach course coordinator” means an individual who has been assigned by the training program to coordinate the activities of an emergency medical care provider course held outside the training program facilities.

“Paramedic (EMT-P)” means an emergency medical technician-paramedic.

“Paramedic specialist (PS)” means an individual who has successfully completed the current United States Department of Transportation’s EMT-Paramedic curriculum or equivalent, passed the department’s approved written and practical examinations, and is currently certified by the department as a paramedic specialist.

“Patient” means an individual who is sick, injured, or otherwise incapacitated.

“Physician” means an individual licensed under Iowa Code chapter 148, 150, or 150A.

“Physician assistant (PA)” means an individual licensed pursuant to Iowa Code chapter 148C.

“Physician designee” means a registered nurse licensed under Iowa Code chapter 152, or any physician assistant licensed under Iowa Code chapter 148C and approved by the board of physician assistant examiners. The physician designee acts as an intermediary for a supervising physician in accordance with written policies and protocols in directing the care provided by emergency medical care providers.

“Preceptor” means an individual who has been assigned by the training program, clinical facility or service program to supervise students while the students are completing their clinical or field experience. A preceptor must be an emergency medical care provider certified at the level at which the preceptor is providing supervision or a higher level, or must be licensed as a registered nurse, physician assistant or physician.

“Primary instructor” means an individual who is responsible for teaching the majority of an emergency medical care provider course.

“Protocols” means written directions and orders, consistent with the department’s standard of care, that are to be followed by an emergency medical care provider in emergency and nonemergency situations. Protocols must be approved by the service program’s medical director and address the care of both adult and pediatric patients.

“Registered nurse (RN)” means an individual licensed pursuant to Iowa Code chapter 152.

“Service program” or *“service”* means any medical care ambulance service or nontransport service that has received authorization by the department.

“Service program area” means the geographic area of responsibility served by any given ambulance or nontransport service program.

“Student” means any individual enrolled in a training program and participating in the didactic, clinical, or field experience portions.

“Training program” means an NCA-approved Iowa college or an Iowa hospital approved by the department to conduct emergency medical care training.

“Training program director” means an appropriate health care professional (full-time educator or practitioner of emergency or critical care) assigned by the training program to direct the operation of the training program.

“Training program medical director” means a physician licensed under Iowa Code chapter 148, 150, or 150A who is responsible for directing an emergency medical care training program.

641—131.2(147A) Emergency medical care providers—requirements for enrollment in training programs. To be enrolled in an EMS training program course leading to certification by the department, an applicant shall:

1. Be at least 17 years of age at the time of enrollment.
2. Have a high school diploma or its equivalent if enrolling in an EMT-I, EMT-P, or PS course.
3. Be able to speak, write and read English.

4. Hold a current course completion card in CPR if enrolling in an EMT-B, EMT-I, EMT-P, or PS course.
5. Be currently certified, as a minimum, as an EMT-B, if enrolling in an EMT-I, EMT-P, or PS course. If currently certified in another state as an EMT-B, the applicant must submit an endorsement application to the department within two weeks of the course start date.
6. Be a current EMS provider, RN, PA, or physician and submit a recommendation in writing from an approved EMS training program if enrolling in an EMS instructor course.
7. Be currently certified as a PS if enrolling in a CCP course.

641—131.3(147A) Emergency medical care providers—EMS provider authority.

131.3(1) Authority of emergency medical care personnel. An emergency medical care provider who holds an active certification issued by the department may:

a. Render, via on-line medical direction, emergency and nonemergency medical care in those areas for which the emergency medical care provider is certified as part of an authorized service program:

- (1) At the scene of an emergency;
- (2) During transportation to a hospital;
- (3) While in the hospital emergency department;
- (4) Until patient care is directly assumed by a physician or by authorized hospital personnel; and
- (5) During transfer from one medical care facility to another or to a private home.

b. Function in any hospital or any other entity in which health care is ordinarily provided only when under the direct supervision of a physician when:

- (1) Enrolled as a student in, and approved by, a training program;
- (2) Fulfilling continuing education requirements;
- (3) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided only when under the direct supervision of a physician as a member of an authorized service program, or in an individual capacity, by rendering lifesaving services in the facility in which employed or assigned pursuant to the emergency medical care provider's certification and under direct supervision of a physician, physician assistant, or registered nurse. An emergency medical care provider shall not routinely function without the direct supervision of a physician, physician assistant, or registered nurse. However, when the physician, physician assistant, or registered nurse cannot directly assume emergency care of the patient, the emergency medical care provider may perform, without direct supervision, emergency medical care procedures for which certified, if the life of the patient is in immediate danger and such care is required to preserve the patient's life;

(4) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided only under the direct supervision of a physician, as a member of an authorized service program, or in an individual capacity, to perform nonlifesaving procedures for which certified and designated in a written job description. Such procedures may be performed after the patient is observed by and when the emergency medical care provider is under the supervision of the physician, physician assistant, or registered nurse, including when the registered nurse is not acting in the capacity of a physician designee, and where the procedure may be immediately abandoned without risk to the patient.

131.3(2) When emergency medical care personnel are functioning in a capacity identified in subrule 131.3(1), paragraph "a," they may perform emergency and nonemergency medical care without contacting a supervising physician or physician designee if written protocols have been approved by the service program medical director which clearly identify when the protocols may be used in lieu of voice contact.

131.3(3) Scope of practice.

a. Emergency medical care providers shall provide only those services and procedures as are authorized within the scope of practice for which they are certified.

b. Scope of Practice for Iowa EMS Providers (April 2005) is incorporated and adopted by reference for EMS providers. For any differences that may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

c. The department may grant a variance for changes to the Scope of Practice that have not yet been adopted by these rules. A variance to these rules may be granted by the department pursuant to 641—subrule 132.14(1).

d. Scope of Practice for Iowa EMS Providers is available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319- 0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

131.3(4) The department may approve other emergency medical pilot project(s) on a limited basis. Requests for a pilot project application shall be made to the department.

131.3(5) An emergency medical care provider who has knowledge of an emergency medical care provider, service program or training program that has violated Iowa Code chapter 147A or these rules shall report such information to the department within 30 days.

641—131.4(147A) Emergency medical care providers—certification, renewal standards, procedures, continuing education, and fees.

131.4(1) Student application and candidate examination.

a. Applicants shall complete the EMS Student Registration at the beginning of the course. EMS Student Registration shall be completed via the bureau of EMS Web site at www.idph.state.ia.us/ems.

b. EMS Student Registration shall be completed within 14 days after the course start date.

c. Upon satisfactory completion of the course and all training program requirements, including payment of appropriate fees, the candidate shall be recommended by the training program to take the state-approved certification examinations. A candidate recommended for state certification is not eligible to continue functioning as a student in the clinical and field setting. State certification must be obtained to perform appropriate skills.

d. The practical examination shall be administered using the standards and forms provided by the department. The training program shall notify the department at least four weeks prior to the administration of a practical examination.

e. Rescinded IAB 8/1/07, effective 9/5/07.

f. Candidates eligible to take the state written examination shall submit an EMS Certification Application form to the department. EMS Certification Application forms are provided by the department.

g. When a student's EMS Student Registration or a candidate's EMS Certification Application is referred to the department for investigation, the individual shall not be eligible for certification testing until approved by the department.

h. The written certification examination shall be administered at times and places determined by the department.

i. No oral certification examinations shall be permitted; however, candidates may be eligible for appropriate accommodations. The candidate should contact the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075 at least four weeks prior to the test date.

j. Certifying examination fees shall be approved by the department.

k. The fee for certification as an emergency medical care provider is \$30, payable to the Iowa Department of Public Health. This nonrefundable fee shall be paid prior to a candidate's receiving certification.

l. A candidate who fails the practical certification examination shall be required to repeat only those stations that were failed and shall have two additional opportunities to attain a passing score. A candidate failing the practical certification examination on three full attempts must repeat the entire EMS training program to be eligible for certification.

(1) An FR or EMT-B candidate will test three practical stations and have three opportunities to pass those three stations. The candidate's first attempt at all three stations will constitute the first full attempt. Each retest of failed stations will constitute an additional full attempt.

(2) A full attempt for an EMT-I, EMT-P or PS candidate will consist of completing all skills and two retesting opportunities, if eligible. The candidate must provide documentation of remediation before taking a second or third full attempt.

m. The practical examination remains valid for a 12-month period from the date it was successfully completed. Required passing practical scores for FR, EMT-B, EMT-I, EMT-P, and PS shall be based on criteria established by the department.

n. A candidate who fails to attain the appropriate overall score on the written certification examination shall have two additional opportunities to complete the entire examination and attain a passing score. Required passing written scores for FR, EMT-B, EMT-I, EMT-P, and PS shall be based on criteria established by the department.

o. A candidate who fails to pass the written certification examination on the third attempt and who wishes to pursue certification must submit, at a minimum, written verification from an approved training program of successful completion of an appropriate refresher course or equivalent. Candidates failing the examination on six attempts must repeat the entire EMT training program to be eligible for certification.

p. All examination attempts shall be completed within two years of the initial course completion date. If an individual is unable to complete the testing within two years due to medical reasons or military obligation, an extension may be granted upon submission of a signed statement from an appropriate medical/military authority and approval by the department.

q. Examination scores shall be confidential except that they may be released to the training program that provided the training or to other appropriate state agencies, or released in a manner which does not permit the identification of an individual.

r. To be eligible to take the practical examination, FR candidates shall have a current course completion card in CPR.

s. Applicants for EMS-I endorsement shall successfully complete an EMS-Instructor curriculum approved by the department.

t. Applicants for ERT endorsement shall successfully complete an ERT curriculum approved by the department in cooperation with the department of public safety.

u. Payment of all appropriate certification/examination fees shall be made prior to the candidate's receiving certification.

131.4(2) *Multiple certificates and renewal.*

a. The department shall consider the highest level of certification attained to be active. Any lower levels of certification shall be considered idle.

b. A lower level certificate may be issued if the individual fails to renew the higher level of certification or voluntarily chooses to move from a higher level to a lower level. To be issued a certificate in these instances, an individual shall:

(1) Complete all applicable continuing education requirements for the lower level during the certification period and submit a change of status request, available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

(2) Complete and submit to the department an EMS Affirmative Renewal of Certification Application and the applicable fee.

(3) Complete the reinstatement process in 131.4(3) "f" if renewal of the higher level is requested later.

c. A citation and warning, denial, probation, suspension or revocation imposed upon an individual certificate holder by the department shall be considered applicable to all certificates issued to that individual by the department.

131.4(3) *Renewal of certification.*

a. A certificate shall be valid for two years from issuance unless specified otherwise on the certificate or unless sooner suspended or revoked.

b. All continuing education requirements shall be completed during the certification period prior to the certificate's expiration date. Failure to complete the continuing education requirements prior to the expiration date shall result in an expired certification.

c. The EMS Affirmative Renewal of Certification Application shall be submitted to the department within 90 days prior to the expiration date. Failure to submit a renewal application to the department within 90 days prior to the expiration date (based upon the postmark date) shall cause the current certification to expire.

d. Emergency medical care providers shall not function on an expired certification.

e. An individual who completes the required continuing education during the certification period, but fails to submit the EMS Affirmative Renewal of Certification Application within 90 days prior to the expiration date, shall be required to submit a late fee of \$30 (in addition to the renewal fee) and complete the audit process pursuant to 131.4(4) "i" to obtain renewal of certification.

f. An individual who has not completed the required continuing education during the certification period or who is seeking to reinstate an expired, inactive, or retired certificate shall:

- (1) Complete a refresher course or equivalent approved by the department.
- (2) Meet all applicable eligibility requirements.
- (3) Submit an EMS Reinstatement Application and the applicable fees to the department.
- (4) Pass the appropriate practical and written certification examinations.

g. If an individual is unable to complete the required continuing education during the certification period due to medical reasons or military obligation, an extension of certification may be issued upon submission of a signed statement from an appropriate medical/military authority and approval by the department.

h. An individual may request an inactive or retired status for a certificate. The request must be made by submitting a change of status request, available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems). Reinstatement of an inactive or retired certificate shall be made pursuant to 131.4(3) "f." A request for inactive or retired status, when accepted in connection with a disciplinary investigation or proceeding, has the same effect as an order of revocation.

131.4(4) Continuing education renewal standards. To be eligible for renewal through continuing education, the following standards shall apply:

a. The applicant shall sign and submit an Affirmative Renewal of Certification Application provided by the department and submit the applicable fee within 90 days prior to the certificate's expiration date.

b. The applicant shall complete the continuing education requirements, including current course completion in CPR, during the certification period for the following EMS provider levels:

- (1) FR, FR-D—12 hours of approved continuing education.
- (2) EMT-A, EMT-B, EMT-D—24 hours of approved continuing education.
- (3) EMT-I—36 hours of approved continuing education.
- (4) EMT-P—48 hours of approved continuing education.
- (5) PS—60 hours of approved continuing education.
- (6) EMS-I—Attend at least one EMS-I workshop sponsored by the department.
- (7) CCP—8 hours of approved CCP core curriculum topics.

c. At least 50 percent of the required hours for renewal shall be formal continuing education including, but not limited to, refresher programs, seminars, lecture programs, scenario-based programs, conferences, and Internet-delivered courses approved by CECBEMS and shall meet the criteria established in paragraph 131.4(6) "d."

d. Up to 50 percent of the required continuing education hours may be made up of any of the following:

- (1) Nationally recognized EMS-related courses;
- (2) EMS self-study courses;
- (3) Medical director or designee case reviews;
- (4) Clinical rounds with medical team (grand rounds);

- (5) Rescinded IAB 8/1/07, effective 9/5/07.
- (6) Working with students as an EMS field preceptor;
- (7) Hospital or nursing home clinical performance;
- (8) Skills workshops/maintenance;
- (9) Community public information education projects;
- (10) Emergency driver training;
- (11) EMS course audits;
- (12) Injury prevention or wellness initiatives;
- (13) EMS service operations, e.g., management programs, continuous quality improvement;
- (14) EMS system development meetings to include county, regional and state;
- (15) Disaster preparedness;
- (16) Emergency runs/responses as a volunteer member of an authorized EMS service program (primary attendant).

e. Additional hours may be allowed for any of the following (maximum):

- (1) CPR—2 hours;
- (2) Disaster drill—4 hours;
- (3) Rescue—4 hours;
- (4) Hazardous materials—8 hours;
- (5) Practical examination evaluator—4 hours;
- (6) Topics outside the provider's core curriculum—8 hours.

f. With training program approval, persons who are not enrolled in an emergency medical care provider course may audit those courses for CEHs.

g. Certificate holders must notify the department within 30 days of a change in address.

h. The certificate holder shall maintain a file containing documentation of continuing education hours accrued during each certification period for four years from the end of each certification period.

i. A group of individual certificate holders will be audited for each certification period. Certificate holders to be audited will be chosen in a random manner or at the discretion of the bureau of EMS. Falsifying reports or failure to comply with the audit request may result in formal disciplinary action. Certificate holders who are audited will be required to submit verification of continuing education compliance within 45 days of the request. If audited, the certificate holders must provide the following information:

- (1) Date of program.
- (2) Program sponsor number.
- (3) Title of program.
- (4) Number of approved hours.
- (5) Appropriate supervisor signatures if clinical or practical evaluator hours are claimed.

j. Instructors of EMS initial or continuing education courses may use those courses for renewal as approved under subrule 131.4(6).

131.4(5) *Renewal by testing.*

a. To be eligible for renewal by testing, candidates shall meet the following standards:

(1) Submit a request to renew by testing to the department six months prior to the certificate's expiration date. Any testing fees will be in addition to renewal fees.

(2) Complete a Renewal by Testing Application provided by the department and schedule a test date with an EMS training program.

(3) Successfully complete the practical and written examinations.

b. Candidates who are unsuccessful by testing may renew under the continuing education standards in subrule 131.4(4); however, renewal must be completed prior to the certificate's expiration date.

c. Candidates who are unsuccessful by testing or who do not complete the continuing education requirements prior to the expiration date shall reinstate an expired certificate pursuant to 131.4(3) "f" if active certification is sought.

131.4(6) Continuing education approval. The following standards shall be applied for approval of continuing education:

a. Required CEHs identified in 131.4(4) “c” shall be approved by the department, CECBEMS, or an authorized EMS training program, using a sponsor number assignment system approved by the department.

b. Optional CEHs identified in 131.4(4) “d” and 131.4(4) “e” require no formal sponsor number; however, CEHs awarded shall be verified by an authorized EMS training program, a national EMS continuing education accreditation entity, a service program medical director, an appropriate community sponsor, or the department. Documentation of CEHs awarded shall include program or event, date and title, number of hours approved, and applicable signatures.

c. Courses in physical, social or behavioral sciences offered by accredited colleges and universities are approved for CEHs and need no further approval.

d. Courses approved as formal education must meet the following criteria:

(1) Involve live interaction with an instructor or be an Internet-delivered course approved by CECBEMS; and

(2) Be based on the appropriate department curricula for EMS providers and include one or more of the following topic areas: airway, patient assessment, trauma assessment and management, medical assessment and management, behavioral emergencies, obstetrics, gynecology, pediatrics, or patient care record documentation.

e. Programs developed and delivered by the department may be approved for formal education.

131.4(7) Out-of-state continuing education. Out-of-state continuing education courses will be accepted for CEHs if they meet the criteria in subrule 131.4(4) and have been approved for emergency medical care personnel in the state in which the courses were held. A copy of course completion certificates (or other verifying documentation) shall, upon request, be submitted to the department with the EMS Affirmative Renewal of Certification Application.

131.4(8) Fees. The following fees shall be collected by the department and shall be nonrefundable:

a. FR, EMT-B, EMT-I, EMT-P, and PS certification fee—\$30.

b. Certification renewal fees:

(1) FR and EMT-B—no fee.

(2) Renewal of EMT-I certification fee—\$10.

(3) Renewal of EMT-P and PS certification fee—\$25.

This fee is refundable if the applicant’s certification renewal status is not posted on the bureau of EMS Web site in the certification database within ten working days from the date the department receives the completed renewal application.

c. Endorsement certification fee—\$50.

d. Reinstatement fee—\$30.

e. Late fee—\$30.

f. Rescinded IAB 12/3/08, effective 1/7/09.

g. Duplicate/replacement card—\$10.

h. Returned check—\$20.

131.4(9) Certification through endorsement. An individual currently certified by another state or a registrant of the National Registry of EMTs must also possess a current Iowa certificate to be considered certified in this state. The department shall contact the state of certification or the National Registry of EMTs to verify certification or registry and good standing.

a. To receive Iowa certification, the individual shall:

(1) Complete and submit the EMS Endorsement Application available from the department.

(2) Provide verification of current certification in another state or registration with the National Registry of EMTs.

(3) Provide verification of current course completion in CPR.

(4) Pass the appropriate Iowa practical and written certification examinations in accordance with subrule 131.4(1) within one year of the department’s approval of the endorsement candidate’s application. Current National Registry endorsement candidates are exempt from testing.

(5) Meet all other applicable eligibility requirements necessary for Iowa certification pursuant to these rules.

(6) Submit all applicable fees to the department.

b. An individual certified through endorsement shall satisfy the renewal and continuing education requirements set forth in subrule 131.4(3) to renew Iowa certification.

131.4(10) *Temporary certification through endorsement.* Upon written request, the endorsement applicant may be issued a temporary FR or EMT-B certification by the department. Temporary certification shall not exceed 12 months per application.

131.4(11) *National registration in lieu of continuing education.*

a. An individual who is certified in Iowa and is registered with the NREMT may renew the individual's certification by meeting the NREMT reregistration requirements.

b. The individual shall submit the NREMT Registration in Lieu of Continuing Education Application, available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems), to the department, with proof of NREMT registration exceeding the current certification expiration date, within 90 days prior to the expiration date.

641—131.5(147A) Training programs—standards, application, inspection and approval.

131.5(1) *Curricula.*

a. The training program shall use the following course curricula approved by the department for certification.

(1) EMS provider curricula and course length:

1. First responder—Current DOT FR curriculum plus department enhancements, 50 to 60 hours.

2. EMT-B—Current DOT EMT-B curriculum plus department enhancements, 120 to 130 hours, clinical time or field time or both as necessary to complete objectives.

3. EMT-I—Iowa curriculum, 54 to 60 didactic hours, clinical and field time as necessary to complete objectives.

4. EMT-P—Current DOT EMT-I curriculum, 280 to 310 didactic hours, clinical and field time as necessary to complete objectives.

5. PS—Current DOT EMT-P curriculum, 600 to 660 didactic hours, clinical and field time as necessary to complete objectives.

6. Training programs that hold current accreditation by the Commission of Accreditation of Allied Health Education Programs for the EMT-P are exempt from the minimum and maximum didactic hours for the EMT-P and PS courses.

(2) Specialty curricula:

1. EMS-I—Current DOT curriculum plus department enhancements.

2. ERT—Iowa curriculum.

3. CCP—Iowa curriculum, 80 to 90 didactic hours, clinical and field time as necessary to complete objectives.

4. EMS-E—Iowa curriculum.

b. Curriculum enhancements are available from the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075.

c. The training program may waive portions of the required EMS provider training for individuals certified or licensed in other health care professions including, but not limited to, nursing, physician assistant, respiratory therapist, dentistry, and military. The training program shall document equivalent training and what portions of the course have been waived for equivalency.

131.5(2) *Clinical or field experience resources.* If clinical or field experience resources are located outside the framework of the training program, written agreements for such resources shall be obtained by the training program.

131.5(3) *Facilities.*

a. There shall be adequate classroom, laboratory, and practice space to conduct the training program. A library with reference materials on emergency and critical care shall also be available.

b. Opportunities for the student to accomplish the appropriate skill competencies in the clinical environment shall be ensured. The following hospital units shall be available for clinical experience for each training program as required in approved curricula pursuant to subrule 131.5(1):

- (1) Emergency department;
- (2) Intensive care unit or coronary care unit or both;
- (3) Operating room and recovery room;
- (4) Intravenous or phlebotomy team, or other method to obtain IV experience;
- (5) Pediatric unit;
- (6) Labor and delivery suite, and newborn nursery; and
- (7) Psychiatric unit.

c. Opportunities for the student to accomplish the appropriate skill competencies in the field environment shall be ensured. The training program shall use an appropriate emergency medical care service program to provide field experience as required in approved curricula pursuant to subrule 131.5(1).

d. The training program shall have liability insurance and shall offer liability insurance to students while they are enrolled in a training program.

131.5(4) Staff.

a. The training program medical director shall be a physician licensed under Iowa Code chapter 148, 150, or 150A. It is recommended that the training program medical director complete a medical director workshop sponsored by the department.

b. A training program director shall be appointed who is an appropriate health care professional. This individual shall be a full-time educator or a practitioner in emergency or critical care. Current EMS instructor endorsement is also recommended, but not mandatory.

c. Course coordinators, outreach course coordinators, and primary instructors used by the training program shall be currently endorsed as EMS instructors.

d. The instructional staff shall be comprised of physicians, nurses, pharmacists, emergency medical care personnel, or other health care professionals who have appropriate education and experience in emergency and critical care. Current EMS instructor endorsement is also recommended, but not mandatory.

e. Preceptors shall be assigned in each of the clinical units in which emergency medical care students are obtaining clinical experience and field experience. The preceptors shall supervise student activities to ensure the quality and relevance of the experience. Student activity records shall be kept and reviewed by the immediate supervisor(s) and by the program director and course coordinator.

f. If a training program's medical director resigns, the training program director shall report this to the department and provide a curriculum vitae for the medical director's replacement. A new course shall not be started until a qualified medical director has been appointed.

g. The training program shall maintain records for each instructor used which include, as a minimum, the instructor's qualifications.

h. The training program is responsible for ensuring that each course instructor is experienced in the area being taught and adheres to the course curricula.

i. The training program shall ensure that each practical examination evaluator and mock patient is familiar with the practical examination requirements and procedures. Practical examination evaluators shall attend a workshop sponsored by the department.

131.5(5) Advisory committee. There shall be an advisory committee, which includes training program representatives, and other groups such as affiliated medical facilities, local medical establishments, and ambulance, rescue and first response service programs.

131.5(6) Student records. The training program shall maintain an individual record for each student. Training program policy and department requirements will determine contents. These requirements may include:

- a.* Application;
- b.* Current certifications and endorsements;

c. Student record or transcript of hours and performance (including examinations) in classroom, clinical, and field experience settings.

131.5(7) Selection of students. There may be a selection committee to select students using, as a minimum, the prerequisites outlined in rule 131.2(147A).

131.5(8) Students.

a. A student may perform any procedures and skills for which the student has received training, if the student is under the direct supervision of a physician or physician designee, or under the remote supervision of a physician or physician designee, with direct field supervision by an appropriately certified emergency medical care provider.

b. A student shall not be substituted for personnel of any affiliated medical facility or service program, but may be employed while enrolled in the training program.

c. A student is not eligible to continue functioning as a student of the training program in the clinical or field setting if the student is not in good standing with the training program, once the student has met the training program requirements, or once the student has been approved for certification testing.

131.5(9) Financing and administration.

a. There shall be sufficient funding available to the training program to ensure that each class started can be completed.

b. Tuition charged to students shall be accurately stated.

c. Advertising for training programs shall be appropriate.

d. The training program shall provide to each student, no later than the first session of the course, a guide that outlines, as a minimum:

(1) Course objectives.

(2) Required hours for completion.

(3) Minimum acceptable scores on interim testing.

(4) Attendance requirements.

(5) Grievance procedure.

(6) Disciplinary actions that may be invoked, the grounds for such actions, and the process provided.

(7) Requirements for certification.

131.5(10) Training program application, inspection and approval.

a. An applicant seeking initial or renewal training program approval shall use the EMS Training Program Application provided by the department. The application shall include, as a minimum:

(1) Names of appropriate officials of the applicant;

(2) Evidence of availability of clinical resources;

(3) Evidence of availability of physical facilities;

(4) Evidence of qualified faculty;

(5) Qualifications and major responsibilities of each faculty member;

(6) Policies used for selection, promotion, and graduation of trainees;

(7) Practices followed in safeguarding the health and well-being of trainees and of patients receiving emergency medical care within the scope of the training program; and

(8) Level(s) of EMS certification to be offered.

b. New training programs shall submit a needs assessment which justifies the need for the training program.

c. Applications shall be reviewed in accordance with the 2005 Standards and Guidelines for the Accreditation of Educational Programs in the Emergency Medical Services Professions, published by the Commission on Accreditation of Allied Health Education Programs. Failure to comply with the standards may lead to disciplinary action as described in rule 641—131.8(152C).

d. An on-site inspection of the applicant's facilities and clinical resources will be performed. The purpose of the inspection is to examine educational objectives, patient care practices, facilities and administrative practices, and to prepare a written report for review and action by the department.

e. The department shall inspect each training program at least once every five years. The department without prior notification may make additional inspections at times, places and under such circumstances as it deems necessary to ensure compliance with Iowa Code chapter 147A and these rules.

f. No person shall interfere with the inspection activities of the department or its agents. Interference with or failure to allow an inspection may be cause for disciplinary action regarding training program approval.

g. Representatives of the applicant may be required by the department to meet with the department at the time the application and inspection report are discussed.

h. A written report of department action accompanied by the department inspection report shall be sent to the applicant.

i. Training program approval shall not exceed five years.

j. The training program shall notify the department, in writing, of any change in ownership or control within 30 days.

k. Temporary variances. If during a period of authorization there is some occurrence that temporarily causes a training program to be in noncompliance with these rules, the department may grant a temporary variance. Temporary variances to these rules (not to exceed six months in length per any approved request) may be granted by the department to a currently authorized training program. Requests for temporary variances shall apply only to the training program requesting the variance and shall apply only to those requirements and standards for which the department is responsible. To request a variance, the training program shall:

(1) Notify the department verbally (as soon as possible) of the need to request a temporary variance. The program shall submit to the department, within ten days after having given verbal notification to the department, a written explanation for the temporary variance request. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

(2) Cite the rule from which the variance is requested.

(3) State why compliance with the rule cannot be maintained.

(4) Explain the alternative arrangements that have been or will be made regarding the variance request.

(5) Estimate the period of time for which the variance will be needed.

l. Training program applications and on-site inspection reports are public information.

131.5(11) *Out-of-state training program application and approval.*

a. An out-of-state training program shall apply to the department for approval.

b. An applicant seeking department approval shall use the out-of-state training program application provided by the department. The application shall include, as a minimum:

(1) Verification of approval to conduct initial EMS training by the authorizing agency within the applicant's home state;

(2) Evidence of physician medical direction oversight;

(3) Evidence of qualified faculty;

(4) Evidence of curriculum utilized;

(5) Evidence of written contracts between the out-of-state training program and clinical and field sites being utilized within Iowa; and

(6) Description of practices followed in safeguarding the health and well-being of trainees and of patients receiving emergency medical care within the scope of the training program.

c. An out-of-state training program shall provide the department with a roster of students who will be participating in the clinical or field experience within the state of Iowa and, for each program, the sites where they will be participating.

d. An out-of-state training program shall not be authorized to provide initial EMS training within the state of Iowa.

e. An out-of-state training program shall be limited to utilization of clinical or field sites or both within Iowa.

f. Representatives of the applicant may be required by the department to meet with the department at the time the application is discussed.

g. An out-of-state training program approval shall not exceed five years.

h. An out-of-state training program shall notify the department, in writing, of any change in ownership, control, or approval status by the out-of-state training program's authorizing state agency within 30 days.

131.5(12) *Out-of-state students.*

a. An out-of-state student shall be a registered student in good standing of an approved out-of-state training program.

b. An out-of-state student may perform any procedure and skills that the student is training for provided that the skill is within the Iowa scope of practice policy of a comparable Iowa EMS provider. The student must be under the direct supervision of a physician or physician designee, or under the remote supervision of a physician or physician designee, with direct supervision by an appropriately certified emergency medical care provider.

c. An out-of-state student shall not be substituted for personnel of any affiliated medical facility or service program, but may be employed while enrolled in the training program.

d. An out-of-state student participating in the clinical or field setting within the state of Iowa shall provide documentation of liability insurance.

e. An out-of-state student is not eligible to continue functioning as a student of the approved out-of-state training program in the clinical or field setting if the student is not in good standing with the approved out-of-state training program, once the student has met the training program's requirements, or once the student has been approved for certification testing.

f. An out-of-state student shall not be eligible for Iowa EMS certification without meeting the requirements for certification through endorsement in 131.4(9).

641—131.6(147A) Continuing education providers—approval, record keeping and inspection.

131.6(1) Continuing education courses for emergency medical care personnel may be approved by the department, EMS training program or a national EMS continuing education accreditation entity.

131.6(2) A training program may conduct continuing education courses (utilizing appropriate instructors) pursuant to subrule 131.4(4).

a. Each training program shall assign a sponsor number to each appropriate continuing education course using an assignment system approved by the department.

b. Course approval shall be made prior to the course's being offered.

c. Each training program shall maintain a participant record that includes, as a minimum:

(1) Name.

(2) Address.

(3) Certification number.

(4) Course sponsor number.

(5) Course instructor.

(6) Date of course.

(7) CEHs awarded.

d. Each training program shall submit to the department on a quarterly basis a completed Approved EMS Continuing Education form.

131.6(3) Record keeping and record inspection.

a. The department may request additional information or inspect the records of any continuing education provider who is currently approved or who is seeking approval to ensure compliance or to verify the validity of any training program application.

b. No person shall interfere with the inspection activities of the department or its agents. Interference with or failure to allow an inspection may be cause for disciplinary action regarding training program approval.

641—131.7(147A) Complaints and investigations—denial, citation and warning, probation, suspension, or revocation of emergency medical care personnel certificates or renewal.

131.7(1) This rule is not subject to waiver or variance pursuant to 641—Chapter 178 or any other provision of law.

131.7(2) The department may deny an application for issuance or renewal of an emergency medical care provider certificate, including endorsement, or place on probation, or issue a citation and warning, or suspend or revoke the certificate when it finds that the applicant or certificate holder has committed any of the following acts or offenses:

- a.* Negligence in performing emergency medical care.
- b.* Failure to follow the directions of supervising physicians or their designees.
- c.* Rendering treatment not authorized under Iowa Code chapter 147A.
- d.* Fraud in procuring certification or renewal including, but not limited to:
 - (1) An intentional perversion of the truth in making application for a certification to practice in this state;
 - (2) False representations of a material fact, whether by word or by conduct, by false or misleading allegations, or by concealment of that which should have been disclosed when making application for a certification in this state; or
 - (3) Attempting to file or filing with the Iowa department of public health or training program any false or forged diploma or certificate or affidavit or identification or qualification in making an application for a certification in this state.
- e.* Professional incompetency. Professional incompetency includes, but is not limited to:
 - (1) A substantial lack of knowledge or ability to discharge professional obligations within the scope of practice.
 - (2) A substantial deviation from the standards of learning or skill ordinarily possessed and applied by other EMS providers in the state of Iowa acting in the same or similar circumstances.
 - (3) A failure to exercise the degree of care which is ordinarily exercised by the average EMS provider acting in the same or similar circumstances.
 - (4) Failure to conform to the minimal standard of acceptable and prevailing practice of certified EMS providers in this state.
- f.* Knowingly making misleading, deceptive, untrue or fraudulent representations in the practice of the profession or engaging in unethical conduct or practice harmful or detrimental to the public. Proof of actual injury need not be established. Acts which may constitute unethical conduct include, but are not limited to:
 - (1) Verbally or physically abusing a patient or coworker.
 - (2) Improper sexual contact with or making suggestive, lewd, lascivious or improper remarks or advances to a patient or coworker.
 - (3) Betrayal of a professional confidence.
 - (4) Engaging in a professional conflict of interest.
 - (5) Falsification of medical records.
- g.* Engaging in any conduct that subverts or attempts to subvert a department investigation.
- h.* Failure to comply with a subpoena issued by the department or failure to cooperate with an investigation of the department.
- i.* Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- j.* Failure to report another EMS provider to the department for any violations listed in these rules, pursuant to Iowa Code chapter 147A.
- k.* Knowingly aiding, assisting or advising a person to unlawfully practice EMS.
- l.* Representing oneself as an EMS provider when one's certification has been suspended or revoked, or when one's certification is lapsed or has been placed on inactive status.
- m.* Permitting the use of a certification by a noncertified person for any purpose.
- n.* Mental or physical inability reasonably related to and adversely affecting the EMS provider's ability to practice in a safe and competent manner.

- o.* Being adjudged mentally incompetent by a court of competent jurisdiction.
- p.* An EMS provider shall not sexually harass a patient, student, or supervisee. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature.
- q.* Habitual intoxication or addiction to drugs.
 - (1) The inability of an EMS provider to practice with reasonable skill and safety by reason of the excessive use of alcohol on a continuing basis.
 - (2) The excessive use of drugs which may impair an EMS provider's ability to practice with reasonable skill or safety.
 - (3) Obtaining, possessing, attempting to obtain or possess, or administering controlled substances without lawful authority.
- r.* Fraud in representation as to skill, ability or certification.
- s.* Willful or repeated violations of Iowa Code chapter 147A or these rules.
- t.* Violating a statute of this state, another state, or the United States, without regard to its designation as either a felony or misdemeanor, which relates to the provision of emergency medical care, including but not limited to a crime involving dishonesty, fraud, theft, embezzlement, controlled substances, substance abuse, assault, sexual abuse, sexual misconduct, or homicide. A copy of the record of conviction or plea of guilty is conclusive evidence of the violation.
- u.* Having certification to practice emergency medical care suspended or revoked, or having other disciplinary action taken by a licensing or certifying authority of this state or another state, territory or country. A copy of the record or order of suspension, revocation or disciplinary action is conclusive or prima facie evidence.
- v.* Falsifying certification renewal reports or failure to comply with the renewal audit request.
- w.* Acceptance of any fee by fraud or misrepresentation.
- x.* Repeated failure to comply with standard precautions for preventing transmission of infectious diseases as issued by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services.
- y.* Privacy and confidentiality. An EMS provider shall not disclose or be compelled to disclose patient information unless required or authorized by law.
- z.* Discrimination. An EMS provider shall not practice, condone, or facilitate discrimination against a patient, student, or supervisee on the basis of race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability, diagnosis, or social or economic status.
 - aa.* Practicing emergency medical services or using a designation of certification or otherwise holding oneself out as practicing emergency medical services at a certain level of certification when the EMS provider is not certified at such level.
 - ab.* Failure to respond within 30 days of receipt, unless otherwise specified, of communication from the department which was sent by registered or certified mail.

641—131.8(147A) Complaints and investigations—denial, citation and warning, probation, suspension, or revocation of training program or continuing education provider approval or renewal.

131.8(1) This rule is not subject to waiver or variance pursuant to 641—Chapter 178 or any other provision of law.

131.8(2) The department may deny an application for approval or renewal, or issue a citation and warning, or place on probation, or suspend or revoke the approval or renewal when it finds that the applicant has failed to meet the applicable provisions of these rules or has committed any of the following acts or offenses:

- a.* Fraud in procuring approval or renewal.
- b.* Falsification of training or continuing education records.

- c.* Suspension or revocation of approval to provide emergency medical care training or other disciplinary action taken pursuant to Iowa Code chapter 147A. A certified copy of the record or order of suspension, revocation or disciplinary action is conclusive or prima facie evidence.
- d.* Engaging in any conduct that subverts or attempts to subvert a department investigation.
- e.* Failure to respond within 30 days of receipt of communication from the department which was sent by registered or certified mail.
- f.* Failure to comply with a subpoena issued by the department or failure to cooperate with an investigation of the department.
- g.* Failure to comply with the terms of a department order or the terms of a settlement agreement or consent order.
- h.* Submission of a false report of continuing education or failure to submit the quarterly report of continuing education.
- i.* Knowingly aiding, assisting or advising a person to unlawfully practice EMS.
- j.* Representing itself as an approved training program or continuing education provider when approval has been suspended or revoked or when approval has lapsed or has been placed on inactive status.
- k.* Using an unqualified individual as an instructor or evaluator.
- l.* Allowing verbal or physical abuse of a student or coworker.
- m.* A training program provider or continuing education provider shall not sexually harass a patient, student, or supervisee. Sexual harassment includes sexual advances, sexual solicitation, requests for sexual favors, and other verbal or physical conduct of a sexual nature.
- n.* Betrayal of a professional confidence.
- o.* Engaging in a professional conflict of interest.
- p.* A training program or continuing education provider shall not practice, condone, or facilitate discrimination against a patient, student, or supervisee on the basis of race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability, diagnosis, or social or economic status.
- q.* Failure to comply with the 2005 Standards and Guidelines for the Accreditation of Educational Programs in the Emergency Medical Services Professions, published by the Commission on Accreditation of Allied Health Education Programs.

641—131.9(147A) Reinstatement of certification.

131.9(1) Any person whose certification to practice has been revoked or suspended may apply to the department for reinstatement in accordance with the terms and conditions of the order of revocation or suspension, unless the order of revocation provides that the certification is permanently revoked.

131.9(2) If the order of revocation or suspension did not establish terms and conditions upon which reinstatement might occur, or if the certification was voluntarily surrendered, an initial application for reinstatement may not be made until one year has elapsed from the date of the order or the date of the voluntary surrender.

131.9(3) All proceedings for reinstatement shall be initiated by the respondent, who shall file with the department an application for reinstatement of the certification. Such application shall be docketed in the original case in which the certification was revoked, suspended, or relinquished. All proceedings upon the application for reinstatement shall be subject to the same rules of procedure as other cases before the department.

131.9(4) An application for reinstatement shall allege facts which, if established, will be sufficient to enable the department to determine that the basis for the revocation or suspension of the respondent's certification no longer exists and that it will be in the public interest for the certification to be reinstated. The burden of proof to establish such facts shall be on the respondent.

131.9(5) An order denying or granting reinstatement shall be based upon a decision which incorporates findings of facts and conclusions of law. The order shall be published as provided for in this chapter.

641—131.10(147A) Certification denial.

131.10(1) An applicant who has been denied certification by the department may appeal the denial and request a hearing on the issues related to the licensure denial by serving a notice of appeal and request for hearing upon the department not more than 20 days following the date of mailing of the notification of certification denial to the applicant. The request for hearing shall specifically delineate the facts to be contested at hearing.

131.10(2) All hearings held pursuant to this rule shall be held pursuant to the process outlined in this chapter.

641—131.11(147A) Emergency adjudicative proceedings. To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare, and consistent with the Constitution and other provisions of law, the department may issue a written order in compliance with Iowa Code section 17A.18 to suspend a certificate in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the department by emergency adjudicative order.

131.11(1) Before issuing an emergency adjudicative order, the department shall consider factors including, but not limited to, the following:

- a.* Whether there has been a sufficient factual investigation to ensure that the department is proceeding on the basis of reliable information;
- b.* Whether the specific circumstances which pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;
- c.* Whether the individual required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;
- d.* Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and
- e.* Whether the specific action contemplated by the department is necessary to avoid the immediate danger.

131.11(2) Issuance of order.

a. An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the department's decision to take immediate action. The order is a public record.

b. The written emergency adjudicative order shall be immediately delivered to the individual who is required to comply with the order by utilizing one or more of the following procedures:

- (1) Personal delivery.
- (2) Certified mail, return receipt requested, to the last address on file with the department.
- (3) Fax. Fax may be used as the sole method of delivery if the service program required to comply with the order has filed a written request that agency orders be sent by fax and has provided a fax number for that purpose.

c. To the degree practicable, the department shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

d. Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order issues, the department shall make reasonable immediate efforts to contact by telephone the individual who is required to comply with the order.

e. After the issuance of an emergency adjudicative order, the department shall proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

f. Issuance of a written emergency adjudicative order shall include notification of the date on which department proceedings are scheduled for completion. After issuance of an emergency adjudicative order, continuance of further department proceedings to a later date will be granted only in compelling circumstances upon application in writing unless the service program that is required to comply with the order is the party requesting the continuance.

641—131.12(147A) Complaints, investigations and appeals.

131.12(1) This rule is not subject to waiver or variance pursuant to 641—Chapter 178 or any other provision of law.

131.12(2) All complaints regarding emergency medical care personnel, training programs or continuing education providers, or those purporting to be or operating as the same, shall be reported to the department in writing. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

131.12(3) An emergency medical care provider who has knowledge of an emergency medical care provider or service program that has violated Iowa Code chapter 147A, 641—Chapter 132 or these rules shall report such information to the department.

131.12(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

131.12(5) A determination of mental incompetence by a court of competent jurisdiction automatically suspends a certificate for the duration of the certificate unless the department orders otherwise.

131.12(6) Notice of denial, issuance of a citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, probation, suspension or revocation shall be served by certified mail, return receipt requested, or by personal service.

131.12(7) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

131.12(8) Upon receipt of a request for hearing, the department shall forward the request within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

131.12(9) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10.

131.12(10) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 131.12(11).

131.12(11) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

131.12(12) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.

- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the administrative law judge.

131.12(13) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

131.12(14) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

131.12(15) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

131.12(16) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

131.12(17) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, the news media or employer.

These rules are intended to implement Iowa Code chapter 147A.

CHAPTER 132
EMERGENCY MEDICAL SERVICES—SERVICE PROGRAM AUTHORIZATION

[Joint Rules pursuant to 147A.4]

[Prior to 7/29/87, Health Department[470] Ch 132]

641—132.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Air ambulance*” means any privately or publicly owned rotorcraft or fixed-wing aircraft which may be specifically designed, modified, constructed, equipped, staffed and used regularly to transport the sick, injured or otherwise incapacitated who are in need of out-of-hospital emergency medical care or whose condition requires treatment or continuous observation while being transported.

“*Ambulance*” means any privately or publicly owned ground vehicle specifically designed, modified, constructed, equipped, staffed and used regularly to transport the sick, injured or otherwise incapacitated.

“*Ambulance service*” means any privately or publicly owned service program which utilizes ambulances in order to provide patient transportation and emergency medical services.

“*Automated defibrillator*” means any external semiautomatic device that determines whether defibrillation is required.

“*Automated external defibrillator*” or “*AED*” means an external semiautomated device that determines whether defibrillation is required.

“*Basic ambulance service*” means an ambulance service that provides patient treatment at the basic care level.

“*Basic care*” means treatment interventions, appropriate to certification level, that provide minimum care to the patient including, but not limited to, CPR, bandaging, splinting, oxygen administration, spinal immobilization, oral airway insertion and suctioning, antishock garment, vital sign assessment and administration of over-the-counter drugs.

“*CEH*” means “continuing education hour” which is based upon a minimum of 50 minutes of training per hour.

“*Continuous quality improvement (CQI)*” means a program that is an ongoing process to monitor standards at all EMS operational levels including the structure, process, and outcomes of the patient care event.

“*CPR*” means training and successful course completion in cardiopulmonary resuscitation, AED and obstructed airway procedures for all age groups according to recognized national standards.

“*Critical care paramedic (CCP)*” means a currently certified paramedic specialist who has successfully completed a critical care course of instruction approved by the department and has received endorsement from the department as a critical care paramedic.

“*Critical care transport (CCT)*” means specialty care patient transportation when medically necessary, for a critically ill or injured patient needing critical care paramedic (CCP) skills, between medical care facilities, and provided by an authorized ambulance service that is approved by the department to provide critical care transportation and staffed by one or more critical care paramedics or other health care professional in an appropriate specialty area.

“*Current course completion*” means written recognition given for training and successful course completion of CPR with an expiration date or a recommended renewal date that exceeds the current date.

“*Deficiency*” means noncompliance with Iowa Code chapter 147A or these rules.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Direct supervision*” means services provided by an EMS provider in a hospital setting or other health care entity in which health care is ordinarily performed when in the personal presence of a physician or under the direction of a physician who is immediately available or under the direction of a physician assistant or registered nurse who is immediately available and is acting consistent with adopted policies and protocols of a hospital or other health care entity.

“*Emergency medical care*” means such medical procedures as:

1. Administration of intravenous solutions.
2. Intubation.
3. Performance of cardiac defibrillation and synchronized cardioversion.
4. Administration of emergency drugs as provided by protocol.
5. Any medical procedure authorized by 131.3(3).

“Emergency medical care provider” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“Emergency medical services” or *“EMS”* means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“Emergency medical technician-basic (EMT-B)” means an individual who has successfully completed the current United States Department of Transportation’s Emergency Medical Technician-Basic curriculum and department enhancements, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-B.

“Emergency medical technician-intermediate (EMT-I)” means an individual who has successfully completed an EMT-intermediate curriculum approved by the department, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-I.

“Emergency medical technician-paramedic (EMT-P)” means an individual who has successfully completed the current United States Department of Transportation’s EMT-intermediate curriculum or the 1985 or earlier DOT EMT-P curriculum, passed the department’s approved written and practical examinations, and is currently certified by the department as an EMT-P.

“Emergency medical transportation” means the transportation, by ambulance, of sick, injured or otherwise incapacitated persons who require emergency medical care.

“EMS advisory council” means a council appointed by the director to advise the director and develop policy recommendations concerning regulation, administration, and coordination of emergency medical services in the state.

“EMS contingency plan” means an agreement or dispatching policy between two or more ambulance service programs that addresses how and under what circumstances patient transportation will be provided in a given service area when coverage is not possible due to unforeseen circumstances.

“EMS system” is any specific arrangement of emergency medical personnel, equipment, and supplies designed to function in a coordinated fashion.

“Endorsement” means providing approval in an area related to emergency medical care including, but not limited to, CCP and emergency medical services.

“First responder (FR)” means an individual who has successfully completed the current United States Department of Transportation’s First Responder curriculum and department enhancements, passed the department’s approved written and practical examinations, and is currently certified by the department as an FR.

“First response vehicle” means any privately or publicly owned vehicle which is used solely for the transportation of emergency medical care personnel and equipment to and from the scene of a medical or nonmedical emergency.

“Fixed-wing aircraft” means any privately or publicly owned propeller-driven or jet airplane specifically designed, modified, constructed, equipped, staffed and FAA-approved to transport the sick, injured or otherwise incapacitated who are in need of out-of-hospital emergency medical care or whose condition requires treatment or continuous observation during transport.

“Hospital” means any hospital licensed under the provisions of Iowa Code chapter 135B.

“Inclusion criteria” means criteria determined by the department and adopted by reference to determine which patients are to be included in the Iowa EMS service program registry or the trauma registry.

“Intermediate” means an emergency medical technician-intermediate.

“Iowa EMS Patient Registry Data Dictionary” means reportable data elements for all ambulance service responses and definitions determined by the department and adopted by reference.

“Medical direction” means direction, advice, or orders provided by a medical director, supervising physician, or physician designee (in accordance with written parameters and protocols) to emergency medical care personnel.

“Medical director” means any physician licensed under Iowa Code chapter 148, 150, or 150A who shall be responsible for overall medical direction of the service program and who has completed a medical director workshop, sponsored by the department, within one year of assuming duties.

“Mutual aid” means an agreement, preferably in writing, between two or more services that addresses how and under what circumstances each service will respond to a request for assistance in situations that exhaust available resources.

“Nonemergency transportation” means transportation that may be provided for those persons determined to need transportation only.

“Nontransport service” means any privately or publicly owned rescue or first response service program which does not provide patient transportation (except when no ambulance is available or in a disaster situation) and utilizes only rescue or first response vehicles to provide emergency medical care at the scene of an emergency.

“Off-line medical direction” means the monitoring of EMS providers through retrospective field assessments and treatment documentation review, critiques of selected cases with the EMS personnel, and statistical review of the system.

“On-line medical direction” means immediate medical direction provided directly to service program EMS providers, in accordance with written parameters and protocols, by the medical director, supervising physician or physician designee either on-scene or by any telecommunications system.

“Paramedic (EMT-P)” means an emergency medical technician-paramedic.

“Paramedic specialist (PS)” means an individual who has successfully completed the current United States Department of Transportation’s EMT-Paramedic curriculum or equivalent, passed the department’s approved written and practical examinations, and is currently certified by the department as a paramedic specialist.

“Patient” means any individual who is sick, injured, or otherwise incapacitated.

“Patient care report (PCR)” means a computerized or written report that documents the assessment and management of the patient by the emergency care provider in the out-of-hospital setting.

“Physician” means any individual licensed under Iowa Code chapter 148, 150, or 150A.

“Physician assistant (PA)” means an individual licensed pursuant to Iowa Code chapter 148C.

“Physician designee” means any registered nurse licensed under Iowa Code chapter 152, or any physician assistant licensed under Iowa Code chapter 148C and approved by the board of physician assistant examiners. The physician designee acts as an intermediary for a supervising physician in accordance with written policies and protocols in directing the care provided by emergency medical care providers.

“Preceptor” means an individual who has been assigned by the training program, clinical facility or service program to supervise students while the students are completing their clinical or field experience. A preceptor must be an emergency medical care provider certified at the level being supervised or higher, or must be licensed as a registered nurse, physician’s assistant or physician.

“Protocols” means written directions and orders, consistent with the department’s standard of care, that are to be followed by an emergency medical care provider in emergency and nonemergency situations. Protocols must be approved by the service program’s medical director and address the care of both adult and pediatric patients.

“Registered nurse (RN)” means an individual licensed pursuant to Iowa Code chapter 152.

“Reportable patient data” means data elements and definitions determined by the department and adopted by reference to be reported to the Iowa EMS service program registry or the trauma registry or a trauma care facility on patients meeting the inclusion criteria.

“*Rescue vehicle*” means any privately or publicly owned vehicle which is specifically designed, modified, constructed, equipped, staffed and used regularly for rescue or extrication purposes at the scene of a medical or nonmedical emergency.

“*Rotorcraft ambulance*” means any privately or publicly owned rotorcraft specifically designed, modified, constructed, equipped, staffed and FAA-approved to transport the sick, injured or otherwise incapacitated who are in need of out-of-hospital emergency medical care or whose condition requires treatment or continuous observation during transport.

“*Service director*” means an individual who is responsible for the operation and administration of a service program.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

“*Service program area*” means the geographic area of responsibility served by any given ambulance or nontransport service program.

“*Student*” means any individual enrolled in a training program and participating in the didactic, clinical, or field experience portions.

“*Supervising physician*” means any physician licensed under Iowa Code chapter 148, 150, or 150A. The supervising physician is responsible for medical direction of emergency medical care personnel when such personnel are providing emergency medical care.

“*Tiered response*” means a rendezvous of service programs to allow the transfer of patient care.

“*Training program*” means an NCA-approved Iowa college, the Iowa law enforcement academy or an Iowa hospital approved by the department to conduct emergency medical care training.

“*Transport agreement*” means a written agreement between two or more service programs that specifies the duties and responsibilities of the agreeing parties to ensure appropriate transportation of patients in a given service area.

641—132.2(147A) Authority of emergency medical care provider.

132.2(1) Rescinded IAB 2/7/01, effective 3/14/01.

132.2(2) An emergency medical care provider who holds an active certification issued by the department may:

a. Render via on-line medical direction emergency and nonemergency medical care in those areas for which the emergency medical care provider is certified, as part of an authorized service program:

- (1) At the scene of an emergency;
- (2) During transportation to a hospital;
- (3) While in the hospital emergency department;
- (4) Until patient care is directly assumed by a physician or by authorized hospital personnel; and
- (5) During transfer from one medical care facility to another or to a private home.

b. Function in any hospital or any other entity in which health care is ordinarily provided only when under the direct supervision of a physician when:

- (1) Enrolled as a student in and approved by a training program;
- (2) Fulfilling continuing education requirements;

(3) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided only when under the direct supervision of a physician as a member of an authorized service program, or in an individual capacity, by rendering lifesaving services in the facility in which employed or assigned pursuant to the emergency medical care provider’s certification and under direct supervision of a physician, physician assistant, or registered nurse. An emergency medical care provider shall not routinely function without the direct supervision of a physician, physician assistant, or registered nurse. However, when the physician, physician assistant, or registered nurse cannot directly assume emergency care of the patient, the emergency medical care personnel may perform, without direct supervision, emergency medical care procedures for which certified, if the life of the patient is in immediate danger and such care is required to preserve the patient’s life;

(4) Employed by or assigned to a hospital or other entity in which health care is ordinarily provided only when under the direct supervision of a physician, as a member of an authorized service program,

or in an individual capacity, to perform nonlifesaving procedures for which certified and designated in a written job description. Such procedures may be performed after the patient is observed by and when the emergency medical care provider is under the supervision of the physician, physician assistant, or registered nurse, including when the registered nurse is not acting in the capacity of a physician designee, and where the procedure may be immediately abandoned without risk to the patient.

132.2(3) When emergency medical care personnel are functioning in a capacity identified in subrule 132.2(2), paragraph “a,” they may perform emergency and nonemergency medical care without contacting a supervising physician or physician designee if written protocols have been approved by the service program medical director which clearly identify when the protocols may be used in lieu of voice contact.

132.2(4) Scope of practice.

a. Emergency medical care providers shall provide only those services and procedures as are authorized within the scope of practice for which they are certified.

b. Scope of Practice for Iowa EMS Providers (April 2005) is incorporated and adopted by reference for EMS providers. For any differences that may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

c. The department may grant a variance for changes to the Scope of Practice that have not yet been adopted by these rules. A variance to these rules may be granted by the department pursuant to 132.14(1).

d. Scope of Practice for Iowa EMS Providers is available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

132.2(5) The department may approve other emergency medical care skills on a limited pilot project basis. Requests for a pilot project application shall be made to the department.

132.2(6) An emergency medical care provider who has knowledge of an emergency medical care provider, service program or training program that has violated Iowa Code chapter 147A or these rules shall report such information to the department within 30 days.

641—132.3(147A) Emergency medical care providers—requirements for enrollment in training programs. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.4(147A) Emergency medical care providers—certification, renewal standards and procedures, and fees. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.5(147A) Training programs—standards, application, inspection and approval. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.6(147A) Continuing education providers—approval, record keeping and inspection. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.7(147A) Service program—authorization and renewal procedures, inspections and transfer or assignment of certificates of authorization.

132.7(1) *General requirements for authorization and renewal of authorization.*

a. An ambulance or nontransport service in this state that desires to provide emergency medical care, in the out-of-hospital setting, shall apply to the department for authorization to establish a program utilizing certified emergency medical care providers for delivery of care at the scene of an emergency or nonemergency, during transportation to a hospital, during transfer from one medical care facility to another or to a private home, or while in the hospital emergency department and until care is directly assumed by a physician or by authorized hospital personnel. Application for authorization shall be made on forms provided by the department. Applicants shall complete and submit the forms to the department at least 30 days prior to the anticipated date of authorization.

b. To renew service program authorization, the service program shall continue to meet the requirements of Iowa Code chapter 147A and these rules. The renewal application shall be completed and submitted to the department at least 30 days before the current authorization expires.

c. Applications for authorization and renewal of authorization may be obtained upon request to: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

d. The department shall approve an application when the department is satisfied that the program proposed by the application will be operated in compliance with Iowa Code chapter 147A and these administrative rules.

e. Service program authorization is valid for a period of three years from its effective date unless otherwise specified on the certificate of authorization or unless sooner suspended or revoked.

f. Service programs shall be fully operational upon the effective date and at the level specified on the certificate of authorization and shall meet all applicable requirements of Iowa Code chapter 147A and these rules. Deficiencies that are identified shall be corrected within a time frame determined by the department.

g. The certificate of authorization shall be issued only to the service program based in the city named in the application and shall not be inclusive of any other base of operation when that base of operation is located in a different city. Any ambulance service or nontransport service that is based in and operates from more than one city shall apply for and, if approved, shall receive a separate authorization for each base of operation that desires to provide emergency medical care.

h. Any service program owner in possession of a certificate of authorization as a result of transfer or assignment shall continue to meet all applicable requirements of Iowa Code chapter 147A and these rules. In addition, the new owner shall apply to the department for a new certificate of authorization within 30 days following the effective date of the transfer or assignment.

i. Service programs that acquire and maintain current status with a nationally recognized EMS service program accreditation entity that meets or exceeds Iowa requirements may be exempted from the service application/inspection process. A copy of the state service application and accreditation inspection must be filed with the department for approval.

132.7(2) Out-of-state service programs.

a. Service programs located in other states which wish to provide emergency medical care in Iowa must meet all requirements of Iowa Code chapter 147A and these rules and must be authorized by the department except when:

- (1) Transporting patients from locations within Iowa to destinations outside of Iowa;
- (2) Transporting patients from locations outside of Iowa to destinations within Iowa;
- (3) Transporting patients to or from locations outside of Iowa that requires travel through Iowa;
- (4) Responding to a request for mutual aid in this state; or
- (5) Making an occasional EMS response to locations within Iowa and then transporting the patients to destinations within Iowa.

b. An out-of-state service program that meets any of the exception criteria established in 132.7(2) shall be authorized to provide emergency medical care by the state in which the program resides and shall provide the department with verification of current state authorization upon request.

132.7(3) Air ambulances.

a. Air ambulances shall meet all applicable requirements of Iowa Code chapter 147A and these rules.

b. Air ambulances shall not be subject to the requirements of Iowa Code chapter 147A and these rules except when utilizing an emergency medical care provider to provide emergency medical care. In such instances, an emergency medical care provider shall function at the appropriate level of care as identified in the scope of practice pursuant to subrule 132.2(4).

132.7(4) Service program inspections.

a. The department shall inspect each service program at least once every three years. The department without prior notification may make additional inspections at times, places and under such circumstances as it deems necessary to ensure compliance with Iowa Code chapter 147A and these rules.

b. The department may request additional information from or may inspect the records of any service program which is currently authorized or which is seeking authorization to ensure continued compliance or to verify the validity of any information presented on the application for service program authorization.

c. The department may inspect the patient care records of a service program to verify compliance with Iowa Code chapter 147A and these rules.

d. No person shall interfere with the inspection activities of the department or its agents pursuant to Iowa Code section 135.36.

e. Interference with or failure to allow an inspection by the department or its agents may be cause for disciplinary action in reference to service program authorization.

132.7(5) Temporary service program authorization.

a. A temporary service program authorization may be issued to services that wish to operate during special events that may need emergency medical care coverage at a level other than basic care. Temporary authorization is valid for a period of 30 days unless otherwise specified on the certificate of authorization or unless sooner suspended or revoked. Temporary authorization shall apply to those requirements and standards for which the department is responsible. Applicants shall complete and submit the necessary forms to the department at least 30 days prior to the anticipated date of need.

b. The service shall meet applicable requirement of these rules, but may apply for a variance using the criteria outlined in rule 132.14(147A).

c. The service shall submit a justification which demonstrates the need for the temporary service program authorization.

d. The service shall submit a report, to the department, within 30 days after the expiration of the temporary authorization which includes as a minimum:

- (1) Number of patients treated;
- (2) Types of treatment rendered;
- (3) Any operational or medical problems.

132.7(6) Conditional service program authorization. Rescinded IAB 2/6/02, effective 3/13/02.

641—132.8(147A) Service program levels of care and staffing standards.

132.8(1) A service program seeking ambulance authorization shall:

a. Apply for authorization at one of the following levels:

- (1) EMT-B.
- (2) EMT-I.
- (3) EMT-P.
- (4) PS.

b. Maintain an adequate number of ambulances and personnel to provide 24-hour-per-day, 7-day-per-week coverage. Ambulances shall comply with paragraph 132.8(1)“d.” The number of ambulances and personnel to be maintained shall be determined by the department, and shall be based upon, but not limited to, the following:

- (1) Number of calls;
- (2) Service area and population; and
- (3) Availability of other services in the area.

c. Provide as a minimum, on each ambulance call, the following staff:

- (1) One currently certified EMT-B.
- (2) One currently licensed driver. The service shall document each driver’s training in CPR (AED training not required), in emergency driving techniques and in the use of the service’s communications equipment. Training in emergency driving techniques shall include:

1. A review of Iowa laws regarding emergency vehicle operations.

2. A review of the service program’s driving policy for first response vehicles, ambulances, rescue vehicles or personal vehicles of an emergency medical care provider responding as a member of the service. The policy shall include, at a minimum:

- Frequency and content of driver’s training requirements.

- Criteria for response with lights or sirens or both.
- Speed limits when responding with lights or sirens or both.
- Procedure of approaching intersections with lights or sirens or both.
- Notification process in the event of a motor vehicle collision involving a first response vehicle, ambulance, rescue vehicle or personal vehicle of an emergency medical care provider responding as a member of the service.

3. Behind-the-wheel driving of the service's first response vehicles, ambulances and rescue vehicles.

d. Submit an EMS contingency plan that will be put into operation when coverage pursuant to the 24/7 rule in paragraph 132.8(1) "b" is not possible due to unforeseen circumstances.

e. Report frequency of use of the contingency plan to the department upon request.

f. Seek approval from the department to provide nontransport coverage in addition to or in lieu of ambulance authorization.

g. Advertise or otherwise imply or hold itself out to the public as an authorized ambulance service only to the level of care maintained 24 hours per day, seven days a week.

h. Apply to the department to receive approval to provide critical care transportation based upon appropriately trained staff and approved equipment.

i. Unless otherwise established by protocol approved by the medical director, the emergency medical care provider with the highest level of certification (on the transporting service) shall attend the patient.

132.8(2) A service program seeking nontransport authorization shall:

a. Apply for authorization at one of the following levels:

- (1) Basic care.
- (2) First responder.
- (3) EMT-B.
- (4) EMT-I.
- (5) EMT-P.
- (6) PS.

b. For staffing purposes provide, as a minimum, a transport agreement.

c. Advertise or otherwise hold itself out to the public as an authorized nontransport service program only to the level of care maintained 24 hours per day, seven days a week.

d. Not be prohibited from transporting patients in an emergency situation when lack of transporting resources would cause an unnecessary delay in patient care.

132.8(3) Service program operational requirements. Ambulance and nontransport service programs shall:

a. Complete and maintain a patient care report concerning the care provided to each patient. Ambulance services shall provide, at a minimum, a PCR verbal report upon delivery of a patient to a receiving facility and shall provide a complete PCR within 24 hours to the receiving facility.

b. Utilize department protocols as the standard of care. The service program medical director may make changes to the department protocols provided the changes are within the EMS provider's scope of practice and within acceptable medical practice. A copy of the changes shall be filed with the department.

c. Ensure that personnel duties are consistent with the level of certification and the service program's level of authorization.

d. Maintain current personnel rosters and personnel files. The files shall include the names and addresses of all personnel and documentation that verifies EMS provider credentials including, but not limited to:

- (1) Current provider level certification.
- (2) Current course completions/certifications/endorsements as may be required by the medical director.
- (3) PA and RN exception forms for appropriate personnel and verification that PA and RN personnel have completed the appropriate EMS level continuing education.

e. If requested by the department, notify the department in writing of any changes in personnel rosters.

f. Have a medical director and 24-hour-per-day, 7-day-per-week on-line medical direction available.

g. Ensure that the appropriate service program personnel respond as required in this rule and that they respond in a reasonable amount of time.

h. Notify the department in writing within seven days of any change in service director or ownership or control or of any reduction or discontinuance of operations.

i. Select a new or temporary medical director if for any reason the current medical director cannot or no longer wishes to serve in that capacity. Selection shall be made before the current medical director relinquishes the duties and responsibilities of that position.

j. Within seven days of any change of medical director, notify the department in writing of the selection of the new or temporary medical director who must have indicated in writing a willingness to serve in that capacity.

k. Not prevent a registered nurse or physician assistant from supplementing the staffing of an authorized service program provided equivalent training is documented pursuant to Iowa Code sections 147A.12 and 147A.13.

l. Not be authorized to utilize a manual defibrillator (except paramedic, paramedic specialist).

m. Implement a continuous quality improvement program that provides a policy to include as a minimum:

- (1) Medical audits.
- (2) Skills competency.
- (3) Follow-up (loop closure/resolution).

n. Require physician assistants and registered nurses providing care pursuant to Iowa Code sections 147A.12 and 147A.13 to meet CEH requirements approved by the medical director.

o. Document an equipment maintenance program to ensure proper working condition and appropriate quantities.

132.8(4) Equipment and vehicle standards. The following standards shall apply:

a. Ambulances placed into service after July 1, 2002, shall meet, as a minimum, the National Truck and Equipment Association's Ambulance Manufacture Division (AMD) performance specifications.

b. All EMS service programs shall carry equipment and supplies in quantities as determined by the medical director and appropriate to the service program's level of care and available certified EMS personnel and as established in the service program's approved protocols.

c. Pharmaceutical drugs and over-the-counter drugs may be carried and administered upon completion of training and pursuant to the service program's established protocols approved by the medical director.

d. All drugs shall be maintained in accordance with the rules of the state board of pharmacy examiners.

e. Accountability for drug exchange, distribution, storage, ownership, and security shall be subject to applicable state and federal requirements. The method of accountability shall be described in the written pharmacy agreement. A copy of the written pharmacy agreement shall be submitted to the department.

f. Each ambulance service program shall maintain a telecommunications system between the emergency medical care provider and the source of the service program's medical direction and other appropriate entities. Nontransport service programs shall maintain a telecommunications system between the emergency medical care provider and the responding ambulance service and other appropriate entities.

g. All telecommunications shall be conducted in an appropriate manner and on a frequency approved by the Federal Communications Commission and the department.

132.8(5) Preventative maintenance. Each ambulance service program shall document a preventative maintenance program to make certain that:

- a.* Vehicles are fully equipped and maintained in a safe operating condition. In addition:

(1) All ground ambulances shall be housed in a garage or other facility that prevents engine, equipment and supply freeze-up and windshield icing. An unobstructed exit to the street shall also be maintained;

(2) The garage or other facility shall be adequately heated or each response vehicle shall have permanently installed auxiliary heating units to sufficiently heat the engine and patient compartment; and

(3) The garage or other facility shall be maintained in a clean, safe condition free of debris or other hazards.

b. The exterior and interior of the vehicles are kept clean. The interior and equipment shall be cleaned after each use as necessary. When a patient with a communicable disease has been transported or treated, the interior and any equipment or nondisposable supplies coming in contact with the patient shall be thoroughly disinfected.

c. All equipment stored in a patient compartment is secured so that, in the event of a sudden stop or movement of the vehicle, the patient and service program personnel are not injured by moving equipment.

d. All airway, electrical and mechanical equipment is kept clean and in proper operating condition.

e. Compartments provided within the vehicles and the medical and other supplies stored therein are kept in a clean and sanitary condition.

f. All linens, airway and oxygen equipment or any other supplies or equipment coming in direct patient contact is of a single-use disposable type or cleaned, laundered or disinfected prior to reuse.

g. Freshly laundered blankets and linen or disposable linens are used on cots and pillows and are changed after each use.

h. Proper storage is provided for clean linen.

i. Soiled supplies shall be appropriately disposed of according to current biohazard practices.

132.8(6) Service program—incident and accident reports.

a. Incidents of fire or other destructive or damaging occurrences or theft of a service program ambulance, equipment, or drugs shall be reported to the department within 48 hours following the occurrence of the incident.

b. A copy of the motor vehicle accident report required under Iowa Code subsection 321.266(2), relating to the reporting of an accident resulting in personal injury, death or property damage, shall be submitted to the department within seven days following an accident involving a service program vehicle.

c. A service program must report the termination of an emergency medical care provider due to negligence, professional incompetency, unethical conduct or substance use to the department within ten days following the termination.

132.8(7) Adoption by reference. The Iowa EMS Patient Registry Data Dictionary (January 2004) is adopted and incorporated by reference for inclusion criteria and reportable patient data. For any differences which may occur between the adopted reference and this chapter, the administrative rules shall prevail.

a. The Iowa EMS Patient Registry Data Dictionary (January 2004) is available through the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the EMS bureau Web site (www.idph.state.ia.us/ems).

b. The department shall prepare compilations for release or dissemination on all reportable patient data entered into the EMS service program registry during the reporting period. The compilations shall include, but not be limited to, trends and patient care outcomes for local, regional, and statewide evaluations. The compilations shall be made available to all service programs submitting reportable patient data to the registry.

c. Access and release of reportable patient data and information.

(1) The data collected by and furnished to the department pursuant to this subrule are confidential records of the condition, diagnosis, care, or treatment of patients or former patients, including outpatients, pursuant to Iowa Code section 22.7. The compilations prepared for release or dissemination from the data collected are not confidential under Iowa Code section 22.7, subsection 2. However, information

which individually identifies patients shall not be disclosed, and state and federal law regarding patient confidentiality shall apply.

(2) The department may approve requests for reportable patient data for special studies and analysis provided the request has been reviewed and approved by the deputy director of the department with respect to the scientific merit and confidentiality safeguards, and the department has given administrative approval for the proposal. The confidentiality of patients and the EMS service program shall be protected.

(3) The department may require entities requesting the data to pay any or all of the reasonable costs associated with furnishing the reportable patient data.

d. To the extent possible, activities under this subrule shall be coordinated with other health data collection methods.

e. Quality assurance.

(1) For the purpose of ensuring the completeness and quality of reportable patient data, the department or authorized representative may examine all or part of the patient care report as necessary to verify or clarify all reportable patient data submitted by a service program.

(2) Review of a patient care report by the department shall be scheduled in advance with the service program and completed in a timely manner.

f. The director, pursuant to Iowa Code section 147A.4, may grant a variance from the requirements of these rules for any service program, provided that the variance is related to undue hardships in complying with this chapter.

132.8(8) The patient care report is a confidential document and shall be exempt from disclosure pursuant to Iowa Code subsection 22.7(2) and shall not be accessible to the general public. Information contained in these reports, however, may be utilized by any of the indicated distribution recipients and may appear in any document or public health record in a manner which prevents the identification of any patient or person named in these reports.

132.8(9) Implementation. The director may grant exceptions and variances from the requirements of this chapter for any ambulance or nontransport service. Exceptions or variations shall be reasonably related to undue hardships which existing services experience in complying with this chapter. Services requesting exceptions and variances shall be subject to other applicable rules adopted pursuant to Iowa Code chapter 147A. Nothing in this chapter shall be construed to require any nontransport service to provide a level of care beyond minimum basic care standards.

641—132.9(147A) Service program—off-line medical direction.

132.9(1) The medical director shall be responsible for providing appropriate medical direction and overall supervision of the medical aspects of the service program and shall ensure that those duties and responsibilities are not relinquished before a new or temporary replacement is functioning in that capacity.

132.9(2) The medical director's duties include, but need not be limited to:

a. Developing, approving and updating protocols to be used by service program personnel that meet or exceed the minimum standard protocols developed by the department.

b. Developing and maintaining liaisons between the service, other physicians, physician designees, hospitals, and the medical community served by the service program.

c. Monitoring and evaluating the activities of the service program and individual personnel performance, including establishment of measurable outcomes that reflect the goals and standards of the EMS system.

d. Assessing the continuing education needs of the service and individual service program personnel and assisting them in the planning of appropriate continuing education programs.

e. Being available for individual evaluation and consultation to service program personnel.

f. Performing or appointing a designee to complete the medical audits required in subrule 132.9(4).

g. Developing and approving an applicable continuous quality improvement policy demonstrating type and frequency of review, including an action plan and follow-up.

h. Informing the medical community of the emergency medical care being provided according to approved protocols in the service program area.

i. Helping to resolve service operational problems.

j. Approving or removing an individual from service program participation.

132.9(3) Supervising physicians, physician designees, or other appointees as defined in the continuous quality improvement policy referenced in 132.9(2) “g” may assist the medical director by:

a. Providing medical direction.

b. Reviewing the emergency medical care provided.

c. Reviewing and updating protocols.

d. Providing and assessing continuing education needs for service program personnel.

e. Helping to resolve operational problems.

132.9(4) The medical director or other qualified designees shall randomly audit (at least quarterly) documentation of calls where emergency medical care was provided. The medical director shall randomly review audits performed by the qualified appointee. The audit shall be in writing and shall include, but need not be limited to:

a. Reviewing the patient care provided by service program personnel and remedying any deficiencies or potential deficiencies that may be identified regarding medical knowledge or skill performance.

b. Response time and time spent at the scene.

c. Overall EMS system response to ensure that the patient’s needs were matched to available resources including, but not limited to, mutual aid and tiered response.

d. Completeness of documentation.

132.9(5) Rescinded IAB 2/6/02, effective 3/13/02.

132.9(6) On-line medical direction when provided through a hospital.

a. The medical director shall designate in writing at least one hospital which has established a written on-line medical direction agreement with the department. It shall be the medical director’s responsibility to notify the department in writing of changes regarding this designation.

b. Hospitals signing an on-line medical direction agreement shall:

(1) Ensure that the supervising physicians or physician designees will be available to provide on-line medical direction via telecommunications on a 24-hour-per-day basis.

(2) Identify the service programs for which on-line medical direction will be provided.

(3) Establish written protocols for use by supervising physicians and physician designees who provide on-line medical direction.

(4) Administer a quality assurance program to review orders given. The program shall include a mechanism for the hospital and service program medical directors to discuss and resolve any identified problems.

c. A hospital which has a written medical direction agreement with the department may provide medical direction for any or all service program authorization levels and may also agree to provide backup on-line medical direction for any other service program when that service program is unable to contact its primary source of on-line medical direction.

d. Only supervising physicians or physician designees shall provide on-line medical direction. However, a physician assistant, registered nurse or EMT (of equal or higher level) may relay orders to emergency medical care personnel, without modification, from a supervising physician. A physician designee may not deviate from approved protocols.

e. The hospital shall provide, upon request to the department, a list of supervising physicians and physician designees providing on-line medical direction.

f. Rescinded IAB 2/6/02, effective 3/13/02.

g. The department may verify a hospital’s communications system to ensure compliance with the on-line medical direction agreement.

h. A supervising physician or physician designee who gives orders (directly or via communications equipment from some other point) to an emergency medical care provider is not subject

to criminal liability by reason of having issued the orders and is not liable for civil damages for acts or omissions relating to the issuance of the orders unless the acts or omissions constitute recklessness.

i. Nothing in these rules requires or obligates a hospital, supervising physician or physician designee to approve requests for orders received from emergency medical care personnel.

NOTE: Hospitals in other states may participate provided the applicable requirements of this subrule are met.

641—132.10(147A) Complaints and investigations—denial, citation and warning, probation, suspension or revocation of service program authorization or renewal.

132.10(1) All complaints regarding the operation of authorized emergency medical care service programs, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

132.10(2) Complaints and the investigative process will be treated as confidential in accordance with Iowa Code section 22.7.

132.10(3) Service program authorization may be denied, issued a citation and warning, placed on probation, suspended or revoked by the department in accordance with Iowa Code subsection 147A.5(3) for any of the following reasons:

- a.* Knowingly allowing the falsifying of a patient care report (PCR).
- b.* Failure to submit required reports and documents.
- c.* Delegating professional responsibility to a person when the service program knows that the person is not qualified by training, education, experience or certification to perform the required duties.
- d.* Practicing, condoning, or facilitating discrimination against a patient, student or employee based on race, ethnicity, national origin, color, sex, sexual orientation, age, marital status, political belief, religion, mental or physical disability diagnosis, or social or economic status.
- e.* Knowingly allowing sexual harassment of a patient, student or employee. Sexual harassment includes sexual advances, sexual solicitations, requests for sexual favors, and other verbal or physical conduct of a sexual nature.
- f.* Failure or repeated failure of the applicant or alleged violator to meet the requirements or standards established pursuant to Iowa Code chapter 147A or the rules adopted pursuant to that chapter.
- g.* Obtaining or attempting to obtain or renew or retain service program authorization by fraudulent means or misrepresentation or by submitting false information.
- h.* Engaging in conduct detrimental to the well-being or safety of the patients receiving or who may be receiving emergency medical care.
- i.* Failure to correct a deficiency within the time frame required by the department.

132.10(4) The department shall notify the applicant of the granting or denial of authorization or renewal, or shall notify the alleged violator of action to issue a citation and warning, place on probation or suspend or revoke authorization or renewal pursuant to Iowa Code sections 17A.12 and 17A.18. Notice of issuance of a denial, citation and warning, probation, suspension or revocation shall be served by restricted certified mail, return receipt requested, or by personal service.

132.10(5) Any requests for appeal concerning the denial, citation and warning, probation, suspension or revocation of service program authorization or renewal shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If such a request is made within the 20-day time period, the notice shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. After the hearing, or upon default of the applicant or alleged violator, the administrative law judge shall affirm, modify or set aside the denial, citation and warning, probation, suspension or revocation. If no request for appeal is received within the 20-day time period, the department's notice of denial, probation, suspension or revocation shall become the department's final agency action.

132.10(6) Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

132.10(7) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10.

132.10(8) When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 132.10(9).

132.10(9) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

132.10(10) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections, and rulings thereon.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

132.10(11) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

132.10(12) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

132.10(13) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Bureau of Emergency Medical Services, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

132.10(14) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

132.10(15) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, the news media or employer.

132.10(16) This rule is not subject to waiver or variance pursuant to 641—Chapter 178 or any other provision of law.

132.10(17) Emergency adjudicative proceedings.

a. Necessary emergency action. To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare, and consistent with the Constitution and other provisions of law, the department may issue a written order in compliance with Iowa Code section 17A.18 to suspend a certificate in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the department by emergency adjudicative order.

b. Before issuing an emergency adjudicative order, the department shall consider factors including, but not limited to, the following:

- (1) Whether there has been a sufficient factual investigation to ensure that the department is proceeding on the basis of reliable information;
- (2) Whether the specific circumstances which pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;
- (3) Whether the program required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;
- (4) Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and
- (5) Whether the specific action contemplated by the department is necessary to avoid the immediate danger.

c. Issuance of order.

(1) An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the department's decision to take immediate action. The order is a public record.

(2) The written emergency adjudicative order shall be immediately delivered to the service program that is required to comply with the order by utilizing one or more of the following procedures:

1. Personal delivery.
2. Certified mail, return receipt requested, to the last address on file with the department.
3. Fax. Fax may be used as the sole method of delivery if the service program required to comply with the order has filed a written request that agency orders be sent by fax and has provided a fax number for that purpose.

(3) To the degree practicable, the department shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

(4) Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order issues, the department shall make reasonable immediate efforts to contact by telephone the service program that is required to comply with the order.

(5) After the issuance of an emergency adjudicative order, the department shall proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

(6) Issuance of a written emergency adjudicative order shall include notification of the date on which department proceedings are scheduled for completion. After issuance of an emergency adjudicative order, continuance of further department proceedings to a later date will be granted only in compelling circumstances upon application in writing unless the service program that is required to comply with the order is the party requesting the continuance.

641—132.11(147A) Complaints and investigations—denial, citation and warning, probation, suspension, or revocation of emergency medical care personnel certificates or renewal. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.12(147A) Complaints and investigations—denial, citation and warning, probation, suspension, or revocation of training program or continuing education provider approval or renewal. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.13(147A) Complaints, investigations and appeals. Rescinded IAB 2/9/00, effective 3/15/00.

641—132.14(147A) Temporary variances.

132.14(1) If during a period of authorization there is some occurrence that temporarily causes a service program to be in noncompliance with these rules, the department may grant a temporary variance. Temporary variances to these rules (not to exceed six months in length per any approved request) may be granted by the department to a currently authorized service program. Requests for temporary variances

shall apply only to the service program requesting the variance and shall apply only to those requirements and standards for which the department is responsible.

132.14(2) To request a variance, the service program shall:

a. Notify the department verbally (as soon as possible) of the need to request a temporary variance. Submit to the department, within ten days after having given verbal notification to the department, a written explanation for the temporary variance request. The address and telephone number are Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075; (515)725-0326.

b. Cite the rule from which the variance is requested.

c. State why compliance with the rule cannot be maintained.

d. Explain the alternative arrangements that have been or will be made regarding the variance request.

e. Estimate the period of time for which the variance will be needed.

f. Rescinded IAB 2/2/05, effective 3/9/05.

132.14(3) Upon notification of a request for variance, the department shall take into consideration, but shall not be limited to:

a. Examining the rule from which the temporary variance is requested to determine if the request is appropriate and reasonable.

b. Evaluating the alternative arrangements that have been or will be made regarding the variance request.

c. Examining the effect of the requested variance upon the level of care provided to the general populace served.

d. Requesting additional information if necessary.

132.14(4) Preliminary approval or denial shall be provided verbally within 24 hours. Final approval or denial shall be issued in writing within ten days after having received the written explanation for the temporary variance request and shall include the reason for approval or denial. If approval is granted, the effective date and the duration of the temporary variance shall be clearly stated.

132.14(5) Rescinded, effective July 10, 1987.

132.14(6) Any request for appeal concerning the denial of a request for temporary variance shall be in accordance with the procedures outlined in rule 132.10(147A).

132.14(7) Rescinded IAB 2/3/93, effective 3/10/93.

641—132.15(147A) Transport options for fully authorized paramedic service programs.

132.15(1) Upon responding to an emergency call, ambulance or nontransport paramedic level services may make a determination at the scene as to whether emergency medical transportation or nonemergency transportation is needed. The determination shall be made by a paramedic or paramedic specialist and shall be based upon the nonemergency transportation protocol approved by the service program's medical director. When applying this protocol, the following criteria, as a minimum, shall be used to determine the appropriate transport option:

a. Primary assessment,

b. Focused history and physical examination,

c. Chief complaint,

d. Name, address and age, and

e. Nature of the call for assistance.

Emergency medical transportation shall be provided whenever any of the above criteria indicate that treatment should be initiated.

132.15(2) If treatment is not indicated, the service program may make arrangements for nonemergency transportation. If arrangements are made, the service program shall remain at the scene until nonemergency transportation arrives. During the wait for nonemergency transportation, however, the ambulance or nontransport service may respond to an emergency.

641—132.16(147A) Public access defibrillation. Rescinded IAB 2/2/05, effective 3/9/05.

These rules are intended to implement Iowa Code chapter 147A.

CHAPTER 133
WHITE FLASHING LIGHT AUTHORIZATION

641—133.1(321) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Ambulance*” means the same as defined in 641 IAC 132.1(147A).

“*Ambulance service*” means the same as defined in 641 IAC 132.1(147A).

“*Authorization certificate*” means a permit issued to an emergency medical care provider which authorizes the use of a white flashing light.

“*Authorized vehicles*” means any vehicles owned by members of the service program that are authorized by the department to use flashing white lights.

“*Department*” means Iowa department of public health.

“*Emergency medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“*First response vehicle*” means the same as defined in 641 IAC 132.1(147A).

“*Medical director*” means any physician licensed under Iowa Code chapter 148, 150, or 150A who shall be responsible for overall medical direction of the service program and who has completed a medical director workshop, sponsored by the department, within one year of the physician’s assuming duties.

“*Member*” means any individual utilized by an ambulance or nontransport service to provide emergency medical care.

“*Nontransport service*” means any privately or publicly owned rescue or first response service program which does not provide patient transportation (except when no ambulance is available or in a disaster situation) and utilizes only rescue or first response vehicles to provide emergency medical care at the scene of an emergency.

“*Rescue vehicle*” means the same as defined in 641 IAC 132.1(147A).

“*Service director*” means an individual who is responsible for the operation and administration of a service program.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

“*White light*” means a white or clear rotating, flashing, or strobe lighting device utilized for identification purposes only. Any such lighting device shall not display a constant white or clear light to the rear of the vehicle.

641—133.2(321) Purpose.

133.2(1) Flashing white lights may be used on emergency vehicles or other authorized vehicles utilized by emergency medical care providers and service programs for identification purposes only.

133.2(2) Flashing white lights shall be used only on an authorized vehicle and shall not be used except in any of the following circumstances:

- a. When responding to an emergency in the line of duty requiring the services of the member.
- b. When at the scene of an emergency.
- c. When transporting a patient during a disaster situation.

133.2(3) Owners and operators of authorized vehicles are responsible for ensuring that the lighting devices are utilized in a safe manner. This shall include, but not be limited to, ensuring that lighting devices do not:

- a. Obstruct the view of the vehicle operator.
- b. Overburden the electrical system of the vehicle.
- c. Interfere with the vision of the vehicle operator, passengers, or drivers of other vehicles.

133.2(4) Operators of authorized vehicles shall ensure that the authorization certificate is carried in the vehicle.

641—133.3(321) Application.

133.3(1) Authorization certificates (provided by the department) shall be issued by the service director for service vehicles and vehicles owned by emergency medical care providers who are members in good standing with the service. Vehicle authorization shall be limited to:

- a. Vehicles owned or exclusively operated by the ambulance or nontransport service.
- b. Vehicles owned or operated by emergency medical care provider members of the ambulance or nontransport service.
- c. Vehicles owned or operated by the service program's medical director.
- d. One authorization certificate per vehicle.

133.3(2) Nothing in these rules shall prevent the use of white flashing lights on vehicles which are authorized to use red or blue flashing lights.

133.3(3) The service director shall report the issuance of white light authorization certificates within 15 days to the department on forms approved by the department. Information required by the department shall include, but not be limited to:

- a. Demonstrated necessity for authorization.
- b. Vehicle liability insurance.
- c. Current Iowa vehicle registration.
- d. The member's current driver's license number, if the authorized vehicle is privately owned.

133.3(4) The service director shall provide, upon request of the department or its agents, proof of the information required in 133.3(3) for each authorization certificate issued.

133.3(5) The service director shall provide an informational sheet which explains the requirements for use of the white lights to each member who is issued an authorization certificate. The information sheet is available upon request from the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

133.3(6) The service director shall encourage members operating authorized vehicles to complete a course in emergency driving techniques and the laws and rules governing emergency vehicle operation.

133.3(7) The authorization shall expire five years from the date issued unless sooner suspended or revoked.

133.3(8) The department may issue authorization certificates for vehicles used by employees of the department when responding to emergencies or disasters.

641—133.4(321) Approval, denial, probation, suspension and revocation of authorization.

133.4(1) The service director or the department may approve or deny an application and the department may place on probation, suspend or revoke an authorization certificate if the service director or the department finds reason to believe that the applicant or certificate holder:

- a. Has failed to meet all applicable requirements of these rules.
- b. Has been convicted of a moving violation while using flashing white lights.
- c. Has utilized a white flashing light without obtaining an authorization certificate.
- d. Does not have a valid driver's license.
- e. Does not have a current vehicle registration.

133.4(2) The authorization certificate shall be surrendered upon the request of the department or its agents.

133.4(3) An emergency medical care provider or service director who has knowledge of any emergency medical care provider or service program that has violated Iowa Code chapter 147A, Iowa Administrative Code 641—Chapter 132 or these rules shall, within 30 days, report that information to the department.

133.4(4) A denial, probation, suspension or revocation ordered by the department shall be effected, and may be appealed according to the provisions set forth in rule 133.5(321).

641—133.5(321) Appeal of denial, probation, or revocation of authorization.

133.5(1) Denial, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice of denial, probation, suspension or revocation shall

be served to the alleged violator by restricted certified mail, return receipt requested, or by personal service.

133.5(2) Any request for appeal concerning denial, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 30 days of the receipt of the department's notice. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 30-day time period, the notice shall be deemed to be suspended. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, probation, suspension or revocation has been or will be removed. If no request for appeal is received within the 30-day time period, the department's notice of denial, probation, suspension or revocation shall become the department's final agency action.

133.5(3) Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

133.5(4) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 4, Iowa Administrative Code.

133.5(5) When the administrative law judge makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 133.5(6).

133.5(6) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

133.5(7) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

133.5(8) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

133.5(9) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

133.5(10) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

133.5(11) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

These rules are intended to implement Iowa Code sections 321.423 and 321.428.

CHAPTER 134
TRAUMA CARE FACILITY CATEGORIZATION
AND VERIFICATION

641—134.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Categorization*” means a preliminary determination by the department that a hospital or emergency care facility is capable of providing trauma care at Level I, II, III or IV care capabilities.

“*Certificate of verification*” means a document awarded by the department that identifies a hospital or emergency care facility’s level and term of verification as a trauma care facility.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency care facility*” means a physician’s office, clinic, or other health care center which provides emergency medical care in conjunction with other primary care services.

“*Emergency medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“*Hospital*” means any hospital licensed under Iowa Code chapter 135B.

“*On-site verification survey*” means an on-site survey conducted by the department to assess a hospital or emergency care facility’s ability to meet the level of categorization requested.

“*Trauma*” means a single or multisystem life-threatening or limb-threatening injury, or an injury requiring immediate medical or surgical intervention or treatment to prevent death or permanent disability.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23, subsection 2, paragraph “c.”

“*Trauma care system*” means an organized approach to providing personnel, facilities, and equipment for effective and coordinated trauma care.

“*Verification*” means a process by which the department certifies a hospital or emergency care facility’s capacity to provide trauma care in accordance with criteria established for Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) trauma care facilities and these rules.

641—134.2(147A) Trauma care facility categorization and verification. Categorization and verification of hospitals and emergency care facilities shall be made by the department based upon the hospitals’ or emergency care facilities’ resources available for providing trauma care services.

134.2(1) Categorization.

a. Categorization as a trauma care facility shall be determined by the department from self-reported information provided to the department by a hospital or emergency care facility through a self-assessment categorization application provided by the department.

b. Categorization applications shall be submitted by all hospitals. New hospitals shall submit a categorization application no later than 90 days after licensing by the department of inspections and appeals, health facilities division. Categorization applications may be submitted by emergency care facilities. New emergency care facilities may submit a categorization application no later than 90 days after opening or reopening.

c. Categorization applications may be obtained from the department upon written request to: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.2(2) Categorization levels for trauma care facilities shall be identified as:

- a. Resource (Level I).
- b. Regional (Level II).
- c. Area (Level III).

d. Community (Level IV).

134.2(3) Adoption by reference.

a. “Iowa Trauma System Resource (Level I) & Regional (Level II) Hospital and Emergency Care Facility Categorization Criteria” (November 2004) is incorporated and adopted by reference for Resource (Level I) and Regional (Level II) hospital and emergency care facility categorization criteria, and the “Iowa Trauma System Area (Level III) & Community (Level IV) Hospital and Emergency Care Facility Categorization Criteria” (November 2004) is incorporated by reference and adopted for Area (Level III) and Community (Level IV) hospital and emergency care facility categorization criteria. For any differences which may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

b. “Iowa Trauma System Resource & Regional Hospital and Emergency Care Facility Categorization Criteria” (November 2004) and the “Iowa Trauma System Area & Community Hospital and Emergency Care Facility Categorization Criteria” (November 2004) are available through the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

134.2(4) Categorization shall not be construed to imply any guarantee on the part of the department as to the level of trauma care services available at a hospital or emergency care facility.

134.2(5) A hospital, emergency care facility, or trauma care facility may apply to the department for a change in level of categorization through submission of a self-assessment categorization application.

134.2(6) Verification. Verification of a trauma care facility shall be determined by the department upon successful completion of the categorization application and completion of a verification survey. All categorized hospitals and emergency care facilities shall be verified.

134.2(7) The department shall conduct a verification survey for categorized hospitals or emergency care facilities.

a. A verification survey shall assess the ability of the hospital or emergency care facility to meet criteria for the level of categorization pursuant to 134.2(3).

b. The department shall approve trauma care facility verification when the department is satisfied that the proposed facility will provide services and be operated in compliance with Iowa Code section 147A.23 and these administrative rules.

c. The department shall notify the applicant, in writing, as to the approval or denial of verification as a trauma care facility within 90 days after the completion of a verification survey.

d. Verification shall not be construed to imply any guarantee on the part of the department as to the level of trauma care services available at a hospital or emergency care facility.

e. Trauma care facility verification is valid for a period of three years from the effective date unless otherwise specified on the certificate of verification or unless sooner suspended or revoked.

f. Trauma care facilities shall be fully operational at their verified level upon the effective date specified on the certificate of verification. Trauma care facilities shall meet all requirements of Iowa Code section 147A.23 and these administrative rules.

g. As part of the verification and renewal process, the department may conduct periodic on-site reviews of the services and facilities of trauma care facilities.

h. Trauma care facilities that are unable to maintain their categorization or verification, or both, shall notify the department within 48 hours.

i. The director, pursuant to rule, may grant a variance from the requirements of rules adopted under this chapter for any hospital or emergency care facility provided that the variance is related to undue hardships in complying with this chapter or the rules adopted pursuant to this chapter.

j. Hospitals currently verified by the American College of Surgeons shall be accepted as equivalent for categorization and verification as a trauma care facility in Iowa provided that all policy, reporting, and administrative rules have been met. Documentation shall be provided to the department including, but not limited to, a current copy of the ACS verification certification, the hospital’s completed ACS verification application or a completed Self-Assessment Categorization Application (SACA).

134.2(8) Prohibited acts. A hospital or emergency care facility that imparts or conveys, or causes to be imparted or conveyed, that it is a trauma care facility, or that uses any other term to indicate or imply that the hospital or emergency care facility is a trauma care facility without having obtained a certificate of verification by the department is subject to civil penalty not to exceed \$100 per day for each offense. The director may apply to the district court for a writ of injunction to restrain the use of the term “trauma care facility.”

134.2(9) Nothing in Iowa Code section 147A.23 or these administrative rules shall be construed to restrict a hospital or emergency care facility from providing any services for which it is duly authorized.

641—134.3(147A) Complaints and investigations and appeals—denial, citation and warning, probation, suspension, and revocation of verification as a trauma care facility.

134.3(1) The department may deny verification as a trauma care facility or may give a citation and warning, place on probation, suspend, or revoke existing verification if the department finds reason to believe that the facility has not been or will not be operated in compliance with Iowa Code section 147A.23 and these administrative rules or that there is insufficient assurance of adequate protection for the public. The denial, citation and warning, period of probation, suspension, or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

134.3(2) All complaints regarding the operation of a trauma care facility, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.3(3) An EMS provider who has knowledge of a hospital, emergency care facility or trauma care facility that has violated Iowa Code section 147A.23, or these administrative rules, shall immediately report such information to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.3(4) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code section 22.7.

134.3(5) Complaint investigations may result in the department’s issuance of a notice of denial, citation and warning, probation, suspension or revocation.

134.3(6) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, citation and warning, probation, suspension, or revocation shall be served by certified mail, return receipt requested, or by personal service.

134.3(7) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department’s notice to take action. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department’s notice of denial, citation and warning, probation, suspension or revocation shall become the department’s final agency action.

134.3(8) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

134.3(9) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

134.3(10) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and

order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

134.3(11) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

134.3(12) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a.* All pleadings, motions, and rules.
- b.* All evidence received or considered and all other submissions by recording or transcript.
- c.* A statement of all matters officially noticed.
- d.* All questions and offers of proof, objections and rulings on them.
- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the administrative law judge.

134.3(13) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

134.3(14) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

134.3(15) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

134.3(16) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

134.3(17) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, news media or employer.

These rules are intended to implement Iowa Code section 147A.23.

CHAPTER 135
TRAUMA TRIAGE AND TRANSFER PROTOCOLS

641—135.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Intertrauma care facility triage and transfer protocol*” means written directives to assist in the decision making, approved by the department and followed by trauma care facility personnel, for the transfer of trauma patients to an appropriate trauma care facility.

“*Out-of-hospital triage and transfer destination decision protocol*” means written directives to assist in the decision making, established and approved by the department, that address the method of transport and trauma care facility destination to be followed by the service program.

“*SEQIC*” means system evaluation quality improvement committee.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

“*System evaluation quality improvement committee*” means the committee established by the department pursuant to Iowa Code section 147A.25 to develop, implement, and conduct trauma care system evaluation, quality assessment, and quality improvement.

“*Transfer*” means the process of a patient being transferred from the scene of an injury to a trauma care facility or from one trauma care facility to another.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23, subsection 2, paragraph “c.”

“*Trauma system advisory council*” means an advisory council established pursuant to Iowa Code section 147A.24 to advise the department on issues and strategies to achieve optimal trauma care delivery throughout the state.

“*Trauma triage and transfer*” means to determine trauma care facility destination and mode of transportation.

“*TSAC*” means trauma system advisory council.

641—135.2(147A) Trauma triage and transfer protocols.

135.2(1) Trauma triage and transfer protocols approved by the department shall be utilized to assist personnel from each service program and trauma care facility. This requirement shall not preclude service programs or trauma care facilities from making emergency revisions of the approved triage and transfer protocols when an incident overburdens medical care resources causing unnecessary delay in patient care.

a. Adoption by reference. The “Out-of-Hospital Trauma Triage Destination Decision Protocol” (Adult and Pediatric, November 2001) and the “Inter-Trauma Care Facility Triage and Transfer Protocol” (August 1996) are incorporated by reference and adopted as the out-of-hospital trauma triage destination decision and the intertrauma care facility triage and transfer protocols. For any differences which may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

b. The out-of-hospital trauma triage destination decision protocol (Adult and Pediatric) and the intertrauma care facility triage and transfer protocol are available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

c. Revisions and modifications to the out-of-hospital trauma triage destination decision protocol and the intertrauma care facility triage and transfer protocol may be made upon recommendation to the department from the system evaluation quality improvement committee (SEQIC) or the trauma system advisory council (TSAC). Revisions and modifications shall be approved by the department.

d. The director, pursuant to rule, may grant a variance from the requirements of rules adopted under this chapter for any hospital, emergency care facility, or service program provided that the variance is related to undue hardships in complying with this chapter or the rules adopted pursuant to this chapter.

135.2(2) Reserved.

641—135.3(147A) Offenses and penalties.

135.3(1) The department may deny verification as a trauma care facility or deny authorization as a service program or may give a citation and warning, place on probation, suspend, or revoke existing trauma care facility verification or service program authorization if the department finds reason to believe that the facility or service program has not been or will not be operated in compliance with Iowa Code section 147A.27 and these administrative rules. The denial, citation and warning, period of probation, suspension, or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

135.3(2) All complaints regarding the operation of a trauma care facility or service program, or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

135.3(3) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code section 22.7.

135.3(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

135.3(5) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, citation and warning, probation, suspension, or revocation shall be served by certified mail, return receipt requested, or by personal service.

135.3(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

135.3(7) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

135.3(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

135.3(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

135.3(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

135.3(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a.* All pleadings, motions, and rules.
- b.* All evidence received or considered and all other submissions by recording or transcript.
- c.* A statement of all matters officially noticed.
- d.* All questions and offers of proof, objections and rulings on them.
- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the administrative law judge.

135.3(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or personal service.

135.3(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

135.3(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

135.3(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

135.3(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, news media or employer.

These rules are intended to implement Iowa Code section 147A.23.

[Filed 1/18/01, Notice 11/15/00—published 2/7/01, effective 3/14/01]

[Filed 1/10/02, Notice 11/28/01—published 2/6/02, effective 3/13/02]

[Filed 1/13/05, Notice 11/24/04—published 2/2/05, effective 3/9/05]

CHAPTER 136
TRAUMA REGISTRY

641—136.1(147A) Definitions. For the purposes of these rules, the following definitions shall apply:

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*ICD9*” means International Classification of Diseases, 9th Revision.

“*Inclusion criteria*” means criteria determined by the department and adopted by reference to determine which trauma patients are to be included in the trauma registry.

“*Reportable patient data*” means data elements and definitions determined by the department and adopted by reference to be reported to the trauma registry or reported to a trauma care facility on trauma patients meeting the inclusion criteria.

“*Service program*” or “*service*” means any medical care ambulance service, or nontransport service that has received authorization by the department.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23, subsection 2, paragraph “c.”

“*Trauma patient*” means a victim of an external cause of injury that results in major or minor tissue damage or destruction caused by intentional or unintentional exposure to thermal, mechanical, electrical or chemical energy, or by the absence of heat or oxygen (ICD9 Codes E800.0 - E999.9).

“*Trauma registry*” means the data repository operated by the department to collect and analyze reportable patient data on the incidence, severity, and causes of trauma, including the central registry for brain and spinal cord injuries (IAC 641—21.1(135)) and farm-related injuries.

641—136.2(147A) Trauma registry.

136.2(1) Adoption by reference.

a. “Iowa Trauma Patient Data Dictionary” (July 2005) is incorporated by reference for inclusion criteria and reportable patient data to be reported to the trauma registry or reported to a trauma care facility. For any differences which may occur between the adopted reference and this chapter, the administrative rules shall prevail.

b. “Iowa Trauma Patient Data Dictionary” is available through the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

c. “Iowa EMS Patient Registry Data Dictionary” (August 2007) is incorporated by reference for inclusion criteria and reportable patient data to be reported to the department. For any differences which may occur between the adopted reference and this chapter, the administrative rules shall prevail.

d. “Iowa EMS Patient Registry Data Dictionary” is available through the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or bureau of EMS Web site (www.idph.state.ia.us/ems).

136.2(2) A verified trauma care facility shall:

a. Submit reportable patient data identified in 136.2(1) via electronic transfer or in writing to the department. Data shall be submitted in a format approved by the department.

b. Submit reportable patient data identified in 136.2(1) to the department for each calendar quarter. Reportable patient data shall be submitted no later than 90 days after the end of the quarter.

c. Submit reportable patient data identified in 136.2(1) to the receiving trauma care facility upon delivery of the injured patient. Data shall be submitted in a format approved by the department.

136.2(3) A service program shall:

a. Submit reportable patient data identified in 136.2(1) via electronic transfer or in writing. Data shall be submitted in a format approved by the department.

b. Submit reportable patient data identified in 136.2(1) to the department for each calendar quarter. Reportable patient data shall be submitted no later than 90 days after the end of the quarter.

c. Submit reportable patient data identified in 136.2(1) to the receiving trauma care facility upon delivery of the injured patient. Data shall be submitted in a format approved by the department.

136.2(4) Reportable patient data compilations. The department shall prepare compilations for release or dissemination on all reportable patient data entered into the trauma registry during the reporting period. The compilations shall include, but not be limited to, trends and patient care outcomes for local, regional and statewide evaluations. The compilations shall be made available to all providers submitting reportable patient data to the registry.

136.2(5) Access and release of reportable patient data and information.

a. The data collected by and furnished to the department pursuant to this section are confidential records of the condition, diagnosis, care, or treatment of patients or former patients, including outpatients, pursuant to Iowa Code section 22.7. The compilations prepared for release or dissemination from the data collected are not confidential under Iowa Code section 22.7, subsection 2. However, information which individually identifies patients shall not be disclosed and state and federal law regarding patient confidentiality shall apply.

b. The department may approve requests for reportable patient data for special studies and analysis provided:

(1) The request has been reviewed and approved by the department with respect to the scientific merit and confidentiality safeguards; and

(2) The department has given administrative approval for the proposal.

(3) The confidentiality of patients and trauma care facilities is protected pursuant to Iowa Code section 22.7.

c. The department may require those requesting the data to pay any or all of the reasonable costs associated with furnishing the reportable patient data.

136.2(6) Data collection methods. To the extent possible, activities under this section shall be coordinated with other health data collection methods.

136.2(7) Quality assurance.

a. For the purpose of ensuring the completeness and quality of reportable patient data, the department or authorized representative may examine all or part of the patient's medical records as necessary to verify or clarify all reportable patient data submitted by a trauma care facility or a service program.

b. Review of a patient's medical record by the department shall be scheduled in advance with the trauma care facility or service program and completed in a timely manner.

c. The director, pursuant to rule, may grant a variance from the requirements of rules adopted under this chapter for any hospital, emergency care facility, or service program provided that the variance is related to undue hardships in complying with this chapter or the rules adopted pursuant to this chapter.

641—136.3(147A) Offenses and penalties.

136.3(1) The department may deny verification as a trauma care facility or deny authorization as a service program or may give a citation and warning, place on probation, suspend, or revoke existing trauma care facility verification or service program authorization if the department finds reason to believe that the facility or service program has not been or will not be operated in compliance with Iowa Code section 147A.26 and these administrative rules. The denial, citation and warning, period of probation, suspension, or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

136.3(2) All complaints regarding the operation of a trauma care facility or service program or those purporting to be or operating as the same, shall be reported to the department. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

136.3(3) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code section 22.7.

136.3(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

136.3(5) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, citation and warning, probation, suspension, or revocation shall be served by certified mail, return receipt requested, or by personal service.

136.3(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

136.3(7) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

136.3(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

136.3(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

136.3(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

136.3(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

136.3(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or personal service.

136.3(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

136.3(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

136.3(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

136.3(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, news media or employer.

These rules are intended to implement Iowa Code section 147A.26.

CHAPTER 137
TRAUMA EDUCATION AND TRAINING

641—137.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*ACLS course*” means advanced cardiac life support course.

“*Advanced registered nurse practitioner (ARNP)*” means a nurse pursuant to 655—7.1(152) with current licensure as a registered nurse in Iowa who is registered in Iowa to practice in an advanced role. The ARNP is prepared for an advanced role by virtue of additional knowledge and skills gained through a formal advanced practice education program of nursing in a specialty area approved by the board. In the advanced role, the nurse practices nursing assessment, intervention, and management within the boundaries of the nurse-client relationship. Advanced nursing practice occurs in a variety of settings within an interdisciplinary health care team, which provide for consultation, collaborative management, or referral. The ARNP may perform selected medically delegated functions when a collaborative practice agreement exists.

“*Advanced trauma life support course*” means a course for physicians with an emphasis on the first hour of initial assessment and primary management of the injured patient, starting at the point in time of injury continuing through initial assessment, life-saving intervention, reevaluation, stabilization, and transfer when appropriate.

“*ARNP*” means advanced registered nurse practitioner.

“*ATLS*” means advanced trauma life support.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency care facility*” means a physician’s office, clinic, or other health care center which provides emergency medical care in conjunction with other primary care services.

“*Emergency medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“*EMS*” means emergency medical services.

“*EMT*” means emergency medical technician.

“*EMT-A*” means emergency medical technician ambulance.

“*EMT-B*” means emergency medical technician basic.

“*EMT-D*” means emergency medical technician defibrillation.

“*EMT-I*” means emergency medical technician intermediate.

“*EMT-P*” means emergency medical technician paramedic.

“*FR*” means first responder.

“*FR-D*” means first responder defibrillation.

“*Hospital*” means a facility licensed under Iowa Code chapter 135B, or comparable emergency care facility located and licensed in another state.

“*Licensed practical nurse*” means an individual licensed pursuant to Iowa Code chapter 152.

“*LPN*” means licensed practical nurse.

“*NRP course*” means neonatal resuscitation provider course.

“*PA*” means physician assistant.

“*PALS course*” means pediatric advanced life support course.

“*Physician*” means an individual licensed under Iowa Code chapter 148, 150 or 150A.

“*Physician assistant*” means an individual licensed pursuant to Iowa Code chapter 148C.

“*Practitioner*” means a person who practices medicine or one of the associated health care professions.

“*PS*” means paramedic specialist.

“*Registered nurse*” means an individual licensed pursuant to Iowa Code chapter 152.

“*RN*” means registered nurse.

“*RTTDC*” means rural trauma team development course.

“*SEQIC*” means system evaluation quality improvement committee.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

“*System evaluation quality improvement committee*” means the committee established by the department pursuant to Iowa Code section 147A.25 to develop, implement, and conduct trauma care system evaluation, quality assessment, and quality improvement.

“*Trauma*” means a single or multisystem life-threatening or limb-threatening injury, or an injury requiring immediate medical or surgical intervention or treatment to prevent death or disability.

“*Trauma care facility*” means a hospital or emergency care facility which provides trauma care and has been verified by the department as having Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) care capabilities and has been issued a certificate of verification pursuant to Iowa Code section 147A.23, subsection 2, paragraph “c.”

“*Trauma care system*” means an organized approach to providing personnel, facilities, and equipment for effective and coordinated trauma care.

“*Trauma nursing course objectives*” means the trauma nursing course objectives recommended to the department by the trauma system advisory council and adopted by reference in these rules.

“*Trauma patient*” means a victim of an external cause of injury that results in major or minor tissue damage or destruction caused by intentional or unintentional exposure to thermal, mechanical, electrical or chemical energy, or by the absence of heat or oxygen (ICD9 Codes E800.0 - E999.9).

“*Trauma system advisory council*” means the council established by the department pursuant to Iowa Code section 147A.24 to advise the department on issues and strategies to achieve optimal trauma care delivery throughout the state, to assist the department in the implementation of an Iowa trauma care plan, to develop criteria for the categorization of all hospitals and emergency care facilities according to their trauma care capabilities, to develop a process for verification of the trauma care capacity of each facility and the issuance of a certificate of verification, to develop standards for medical direction, trauma care, triage and transfer protocols, and trauma registries, to promote public information and education activities for injury prevention, and to review rules adopted under this division, and to make recommendations to the director for changes to further promote optimal trauma care.

“*Trauma team*” means a team of multidisciplinary health care providers established and defined by a hospital or emergency care facility that provides trauma care commensurate with the level of trauma care facility verification.

“*TSAC*” means trauma system advisory council.

“*Verification*” means a process by which the department certifies a hospital or emergency care facility’s capacity to provide trauma care in accordance with criteria established for Resource (Level I), Regional (Level II), Area (Level III) or Community (Level IV) trauma care facilities and these rules.

641—137.2(147A) Initial trauma education for Iowa’s trauma system. Initial trauma education (Table 1) is required of physicians, physician assistants, advanced registered nurse practitioners, registered nurses, and licensed practical nurses who are identified or defined as trauma team members by a trauma care facility and who participate directly in the initial resuscitation of the trauma patient.

Table 1

Practitioner	Resource (Level I) TCF	Regional (Level II) TCF	Area (Level III) TCF	Community (Level IV) TCF
Physician PA/ARNP	1. ATLS 2. Trauma System Overview	1. ATLS 2. Trauma System Overview	1. ATLS 2. Trauma System Overview	1. ATLS or RTTDC 2. Trauma System Overview
RN/LPN	1. Successful completion of trauma nursing course objectives recommended by TSAC 2. Trauma System Overview	1. Successful completion of trauma nursing course objectives recommended by TSAC 2. Trauma System Overview	1. Successful completion of trauma nursing course objectives recommended by TSAC 2. Trauma System Overview	1. Successful completion of trauma nursing course objectives recommended by TSAC 2. Trauma System Overview

137.2(1) General requirements for initial trauma education.

a. Completion of initial trauma education shall be done within three years of the trauma care facility's initial verification or within one year of the practitioner's joining the trauma care facility's trauma team.

b. Trauma nursing course objectives (1998) are incorporated and adopted by reference for all trauma care facilities. For any differences which may occur between the adopted references and these administrative rules, the administrative rules shall prevail.

c. Trauma nursing course objectives are available from the Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075, or the bureau of EMS Web site (www.idph.state.ia.us/ems).

137.2(2) Rescinded IAB 2/2/05, effective 3/9/05.

641—137.3(147A) Continuing trauma education for Iowa's trauma system. Continuing trauma education (Table 2) is required every four years of physicians, physician assistants, advanced registered nurse practitioners, registered nurses, and licensed practical nurses who are identified or defined as trauma team members by a trauma care facility and who participate directly in the initial resuscitation of the trauma patient.

Table 2

Practitioner	Resource (Level I) TCF	Regional (Level II) TCF	Area (Level III) TCF	Community (Level IV) TCF
Physician PA/ARNP	24 hours of continuing trauma education: 8 hours formal (recommend ATLS refresher course), 16 hours informal.	24 hours of continuing trauma education: 8 hours formal (recommend ATLS refresher course), 16 hours informal.	24 hours of continuing trauma education: 8 hours formal (ATLS refresher course required), 16 hours informal.	24 hours of continuing trauma education: 8 hours formal (ATLS refresher course or RTTDC required), 16 hours informal.
RN/LPN	16 hours of continuing trauma education: 4 hours formal (refresher course in trauma nursing course objectives recommended by TSAC is required), 12 hours informal.	16 hours of continuing trauma education: 4 hours formal (refresher course in trauma nursing course objectives recommended by TSAC is required), 12 hours informal.	16 hours of continuing trauma education: 4 hours formal (refresher course in trauma nursing course objectives recommended by TSAC is required), 12 hours informal.	16 hours of continuing trauma education: 4 hours formal (refresher course in trauma nursing course objectives recommended by TSAC is required), 12 hours informal.

137.3(1) Topics for all or part of the continuing trauma education hours may be recommended to the department by SEQIC or TSAC based on trauma care system outcomes.

137.3(2) General requirements for continuing trauma education.

a. Three-fourths of the required continuing trauma education hours may be informal, determined and approved by a trauma care facility from any of the following:

1. Multidisciplinary trauma case reviews;
2. Multidisciplinary trauma conferences;
3. Multidisciplinary trauma mortality and morbidity reviews;
4. Multidisciplinary trauma committee meetings;
5. Trauma peer review meetings;
6. Any trauma care facility committee meeting with a focus on trauma care evaluation; and
7. Critical care education such as ACLS course, PALS course, NRP course, or equipment inservices.

b. One-fourth of the required continuing trauma education hours shall be obtained through any formalized continuing education programs.

137.3(3) Continuing trauma education is required of certified emergency medical care providers every two years as follows:

- a.* FR or FR-D: 2 continuing education hours.
- b.* EMT-A, B, D: 4 continuing education hours.
- c.* EMT-I: 4 continuing education hours.
- d.* EMT-P: 6 continuing education hours.

641—137.4(147A) Offenses and penalties.

137.4(1) The department may deny verification as a trauma care facility or deny authorization as a service program, may give a citation and warning, or may place on probation, suspend, or revoke existing trauma care facility verification or service program authorization if the department finds reason to believe that the facility or service program has not been or will not be operated in compliance with Iowa Code sections 147A.27 and these administrative rules. The denial, citation and warning, period of probation, suspension, or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

137.4(2) All complaints regarding the operation of a trauma care facility or service program, or those purporting to be or operating as the same, shall be reported to the department. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

137.4(3) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code section 22.7.

137.4(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

137.4(5) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the alleged violator of denial, citation and warning, probation, suspension, or revocation shall be served by certified mail, return receipt requested, or by personal service.

137.4(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

137.4(7) A request for a hearing shall be forwarded within five working days of receipt of the request to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

137.4(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

137.4(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

137.4(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

137.4(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.

- e.* All proposed findings and exceptions.
- f.* The proposed decision and order of the administrative law judge.

137.4(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or personal service.

137.4(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

137.4(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

137.4(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

137.4(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the appropriate professional associations, news media or employer.

These rules are intended to implement Iowa Code chapter 147A.

[Filed 5/14/99, Notice 2/10/99—published 6/2/99, effective 7/7/99]

[Filed 1/13/05, Notice 11/24/04—published 2/2/05, effective 3/9/05]

CHAPTER 138
TRAUMA SYSTEM EVALUATION QUALITY IMPROVEMENT COMMITTEE

641—138.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Department*” means the Iowa department of public health.

“*Emergency medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“*SEQIC*” means system evaluation quality improvement committee established by the department pursuant to Iowa Code section 147A.25 to develop, implement, and conduct trauma care system evaluation, quality assessment, and quality improvement.

“*Trauma care system*” means an organized approach to providing personnel, facilities, and equipment for effective and coordinated trauma care.

641—138.2(147A) System evaluation quality improvement committee (SEQIC). The system evaluation quality improvement committee shall develop, implement, and conduct trauma care system evaluation, quality assessment, and quality improvement in accordance with Iowa Code chapter 147A, Iowa Administrative Code 641—Chapter 191 and these rules.

138.2(1) Duties. The scope of the duties of SEQIC shall include, but not be limited to:

- a. Analyzing trauma-related information and data provided by the department.
- b. Evaluating the standards for trauma care in Iowa’s trauma system.
- c. Evaluating the effectiveness of Iowa’s trauma care system.
- d. Recommending quality improvement strategies related to trauma care.
- e. Designing and recommending corrective action plans to the department for trauma care and trauma system improvement.
- f. Monitoring, evaluating, and reevaluating trauma system-related corrective action plans implemented by the department.
- g. Assisting with development of an annual SEQIC report.

138.2(2) Membership. The director, pursuant to Iowa Code section 147A.25, shall appoint members of SEQIC.

Pursuant to Iowa Administrative Code rule 641—191.6(135), SEQIC may establish a subcommittee of medical care consultants whose expertise is needed. Subcommittees are subject to the approval of the department.

138.2(3) Meetings/member attendance. SEQIC shall establish bylaws pursuant to Iowa Administrative Code rule 641—191.5(135).

138.2(4) Confidentiality.

a. The data collected by and furnished to the department pursuant to Iowa Code section 147A.26 shall not be a public record under Iowa Code chapter 22. The confidentiality of patients is to be protected, and the laws of this state shall apply with regard to patient confidentiality.

b. Proceedings, records, and reports reviewed or developed pursuant to Iowa Code section 147A.25 constitute peer review records under Iowa Code section 147.135 and are not subject to discovery by subpoena or admissible as evidence. All information and documents received from a hospital or emergency care facility under Iowa Code chapter 147A shall be confidential pursuant to Iowa Code section 272C.6, subsection 4.

c. SEQIC may enter into a closed session proceeding pursuant to Iowa Code section 21.5.

d. All committee and subcommittee members shall sign a confidentiality agreement not to divulge or discuss information obtained during a SEQIC closed session proceeding. Subcommittee members may be present only for that portion of the closed session proceeding pertaining to their expertise.

e. The signed confidentiality statements shall be kept on file at the department.

138.2(5) Documentation. The department, pursuant to Iowa Code section 21.3, shall keep minutes of open session proceedings. The department, pursuant to Iowa Code section 21.5, shall also maintain minutes and tape recordings of closed session proceedings.

a. The department, at the close of each meeting, shall collect all confidential documents. No copies of confidential documents may be made or possessed by committee or subcommittee members.

b. The department shall approve all correspondence and communication generated by SEQIC prior to dissemination.

These rules are intended to implement Iowa Code chapter 147A.

[Filed 9/17/99, Notice 6/30/99—published 10/6/99, effective 11/10/99]

[Filed 1/13/05, Notice 11/24/04—published 2/2/05, effective 3/9/05]

CHAPTER 139
IOWA LAW ENFORCEMENT EMERGENCY CARE PROVIDER

641—139.1(147A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*AED*” means automated external defibrillator.

“*CEHs*” means “continuing education hours” which are based upon a minimum of 50 minutes of training per hour.

“*Continuing education*” means training approved by the department which is obtained by a certified Iowa law enforcement emergency care provider to maintain, improve, or expand relevant skills and knowledge and to satisfy renewal of certification requirements.

“*Course completion date*” means the date of the final classroom session of an Iowa law enforcement emergency care provider course.

“*CPR*” means training and successful course completion in cardiopulmonary resuscitation, AED and obstructed airway procedures for all age groups according to recognized national standards.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency medical services*” or “*EMS*” means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“*EMS instructor*” means an individual who has successfully completed an EMS instructor curriculum approved by the department, and is currently certified by the department as an EMS-I.

“*Iowa law enforcement emergency care provider*” or “*ILEECP*” means an individual who is certified by the Iowa law enforcement academy as an Iowa peace officer, and has successfully completed an emergency care provider curriculum approved by the department, and who is currently certified by the department as an Iowa law enforcement emergency care provider.

“*Iowa law enforcement training program*” means the law enforcement academy or a law enforcement training program approved by the department to conduct ILEECP emergency medical care training.

“*Law enforcement AED service program*” means a recognized Iowa law enforcement agency that has trained its peace officers in the use of an AED and has registered with the department as a law enforcement AED service program.

“*Student*” means any individual enrolled in a training program and participating in the didactic, clinical, or field experience portions.

641—139.2(147A) Authority of Iowa law enforcement emergency care provider. Iowa law enforcement emergency care provider may perform skills identified in the Iowa law enforcement emergency care provider curriculum approved by the department, plus the skill of automated defibrillation for which training can be documented.

641—139.3(147A) Iowa law enforcement emergency care providers—requirements for enrollment in training programs. To be enrolled in an Iowa law enforcement training program, an applicant shall:

1. Be at least 18 years of age at the time of enrollment.
2. Have a high school diploma or its equivalent.
3. Be able to speak, write and read English.

641—139.4(147A) Iowa law enforcement emergency care providers—certification, renewal standards and procedures, and fees.

139.4(1) Application and examination.

a. Applicants shall complete an EMS student registration form at the beginning of the course. EMS student registration forms are provided by the department.

b. EMS student registration forms shall be forwarded to the department by the training program no later than two weeks after the beginning of the course.

c. Upon satisfactory completion of the course and all training program requirements, including successful completion of the state certifying practical examination, the student shall be recommended by the training program to take the state certification written examinations. Candidates for state certification are not eligible to continue functioning as students in the clinical and field setting. State certification must be obtained to perform appropriate skills.

d. The practical examination shall be administered by the training program using the standards and forms provided by the department. The training program shall notify the department at least two weeks prior to the administration of a practical examination.

e. To be eligible to take the written examination, the student shall first pass the practical examination.

f. The student shall submit an EMS certification application form. EMS certification application forms are provided by the department.

g. When a student's EMS student registration or EMS certification application is referred to the department for investigation, the student shall not be certified until approved by the department.

h. The certifying written examinations shall be administered at times and places determined by the department.

i. No oral certification examinations shall be permitted; however, candidates may be eligible for appropriate accommodations. Contact the Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

j. Practical examination fees shall be determined by the training program.

k. A student who fails the practical certification examination shall be required to repeat only those stations which were failed and shall have two additional opportunities to attain a passing score. The student may repeat the failed examination stations on the same day as determined by the training program. A student who fails a practical station for the third time shall be required to repeat the entire course in order to be eligible for certification. If a student fails the written examination, the practical examination remains valid for a 12-month period from the date it was successfully completed.

l. A student who fails to attain the appropriate overall score on the written certification examination shall have two additional opportunities to complete the entire examination and attain a passing score. Required overall passing score is 70 percent.

m. All examination attempts shall be completed within one year of the initial course completion date. If an individual is unable to complete the testing within one year due to medical reasons, an extension may be granted upon submission of a signed statement from a physician and approval by the department.

n. Examination scores shall be confidential except that they may be released to the training program which provided the training or released in a manner which does not permit the identification of an individual.

139.4(2) *Renewal of certification.*

a. A certificate shall be valid for two years from issuance unless specified otherwise on the certificate or unless sooner suspended or revoked.

b. All continuing education requirements shall be completed during the certification period prior to the certificate's expiration date. Failure to complete the continuing education requirements prior to the expiration date shall result in an expired certification.

c. The application for renewal of certification shall be submitted to the department within the 90 days prior to the expiration date. Failure to submit a renewal application to the department within the 90 days prior to the expiration date (based upon the postmark date) shall cause the current certification to expire. Iowa law enforcement emergency care providers shall not function on an expired certification.

An individual who completes the required continuing education during the certification period, but fails to submit the application for renewal of certification within 90 days prior to the expiration date, shall be required to submit a late fee of \$30 to obtain renewal of certification.

d. An individual who has not completed the required continuing education during the certification period and is seeking to reinstate an expired certificate shall complete a refresher course approved by the department and pass the practical and written certification examinations.

e. If an individual is unable to complete the required continuing education during the certification period due to an illness or injury, an extension of certification may be issued upon submission of a signed statement from a physician and approval by the department.

139.4(3) *Renewal standards.* To be eligible for renewal, the certificate holder shall:

a. Have signed and submitted an application for renewal of certification, provided by the department, within the 90 days prior to the certificate's expiration date.

b. Have a current CPR course completion card or a signed and dated statement from a recognized CPR instructor that documents current course completion in CPR.

c. Have completed four continuing education hours during the certification period including a minimum of one hour in the following topics:

Infectious diseases

Abuse (child and dependent adult)

Trauma emergencies

Medical emergencies

d. Notify the department of a change in address.

e. Maintain a file containing documentation of continuing education hours accrued during each certification period and retain this file for four years from the end of each certification period.

A group of individual certificate holders will be audited for each certification period and will be required to submit verification of continuing education compliance within 45 days of the request. If audited, the following information must be provided: date of program, program sponsor number, title of program, and number of hours approved. Certificate holders audited will be chosen in a random manner or at the discretion of the bureau of EMS. Falsifying reports or failure to comply with the audit request may result in formal disciplinary action.

641—139.5(147A) Iowa law enforcement training programs.

139.5(1) *Curricula.*

a. The training program shall use the course curricula approved by the department for an Iowa law enforcement emergency care provider and shall include, as a minimum, the following course components:

1. Twenty-four hours of classroom instruction.

2. Practical and written examinations.

3. Clinical and field experience as may be required by the training program.

b. The training program may waive portions of the required training by documenting equivalent training and what portions of the course have been waived for equivalency.

c. An individual currently certified by the department as an emergency medical care provider, pursuant to 641—Chapter 132, may request Iowa law enforcement emergency care provider certification. Such a request must be made in writing to the department with documentation of credentials as an Iowa peace officer.

139.5(2) *Staff.*

a. Course coordinators, outreach course coordinators, and primary instructor(s) used for the Iowa law enforcement emergency care provider course shall be currently certified by the department as EMS instructors.

b. Practical examination evaluators used for the Iowa law enforcement emergency care provider course shall attend a workshop sponsored by the department.

641—139.6(147A) Law enforcement AED service program authorization. A recognized Iowa law enforcement agency that desires to allow its peace officers to use an AED may register with the department to provide AED coverage. The purpose of this rule is to allow law enforcement agencies to train their peace officers in the use of the automated external defibrillator and to provide AED coverage when appropriately trained personnel are available. This rule is intended to enhance and supplement the local EMS system with nontraditional early defibrillation agencies.

139.6(1) Training requirements. Law enforcement personnel wishing to provide AED coverage as part of an Iowa law enforcement agency shall have current course completion in:

- a.* Adult CPR, including one rescuer CPR, foreign body airway obstruction, rescue breathing, recovery position, and activating the EMS system; and
- b.* A nationally recognized AED course approved by the department.

139.6(2) Iowa law enforcement AED service program—registration, guidelines, and standards. An Iowa law enforcement agency may register with the department to provide AED coverage. Iowa law enforcement AED service programs seeking registration with the department shall:

- a.* Complete the department's AED service program registration form.
- b.* Provide an AED liaison who shall be responsible for supervision of the AED service program.
- c.* Implement a policy for periodic maintenance of the AED.
- d.* Ensure that the service program's AED providers maintain AED and CPR skill competency.
- e.* Identify which authorized Iowa ambulance service program(s) will provide patient transportation.
- f.* Reregister with the department every five years.

139.6(3) Complaints and investigations shall be conducted as with any complaint received against an EMS service program, applying rule 641 IAC 132.10(147A).

These rules are intended to implement Iowa Code chapter 147A.

CHAPTER 140
EMERGENCY MEDICAL SERVICES SYSTEM DEVELOPMENT GRANTS FUND

641—140.1(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Ambulance service*” means any privately or publicly owned service program which utilizes ambulances in order to provide patient transportation and emergency medical services.

“*Applicant*” means a county EMS association or regional EMS council that has submitted an application for an emergency medical services system development grant.

“*CEHs*” means continuing education hours which are based upon a minimum of 50 minutes of training per hour.

“*Continuing education*” means training approved by the department which is obtained by a certified emergency medical care provider to maintain, improve, or expand relevant skills and knowledge and to satisfy renewal of certification requirements.

“*County EMS association*” means a countywide group of EMS providers and various agency and organization representatives and consumers who provide leadership for the local EMS system on needs and objectives. The county EMS association should also include representatives of services located in a neighboring county if service is provided on a regular basis to residents of the county receiving funding.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Emergency medical care personnel*” or “*provider*” means any individual currently certified by the department pursuant to Iowa Code section 147A.6.

“*Emergency medical services*” or “*EMS*” means an integrated medical care delivery system to provide emergency and nonemergency medical care at the scene or during out-of-hospital patient transportation in an ambulance.

“*EMS course*” means a course for emergency medical care personnel pursuant to Iowa Code section 147A.4, subsection 2.

“*EMS medical care provider*” means an individual who has been trained to provide emergency and nonemergency medical care at the first responder, EMT-basic, EMT-intermediate, EMT-paramedic, paramedic specialist or other certification levels recognized by the department before 1984 and who has been issued a certificate by the department.

“*Fiscal year*” means the 12-month period beginning July 1 and ending June 30.

“*Infrastructure*” means those elements that make up an EMS system.

“*Nontransport service*” means any privately or publicly owned rescue or first response service program which does not provide patient transportation (except when no ambulance is available or in a disaster situation) and utilizes only first response vehicles to provide emergency medical care at the scene of an emergency.

“*Regional EMS council*” means a multicounty nonprofit corporation whose purpose is to facilitate EMS development on a regional basis.

“*Service program*” means any 24-hour emergency medical care ambulance service or nontransport service that has received authorization by the department.

“*Strategic plan*” means a document produced via a multiagency effort to evaluate and define needs and goals to improve the local EMS system.

“*Training*” means EMS-related courses designed and intended for EMS providers and includes any item used in training including, but not limited to, slides, films, mannequins, emergency care devices, books and other items pertinent and necessary for training purposes.

641—140.2(135) Purpose. The EMS system development grant is intended to supplement EMS funds at the regional, county or local level to promote EMS system development.

641—140.3(135) County EMS associations. Each county shall have a county EMS association, council or board to develop and maintain the countywide EMS system strategic plan and to provide leadership on related EMS system development funding needs and objectives.

641—140.4(135) County EMS system development grants. Grants for EMS system development proposals at the regional, county, and local level are available through a competitive selection process from the department for equipment, training, and support of infrastructure needs as identified in the countywide EMS strategic plan. Funds for training will be used to train members of a service program that provides service on a regular basis to residents of the county being funded. Funds for equipment require a \$1 match of regional, county, or local funds for each \$1 of EMS system development grant funds.

140.4(1) Eligible costs. Costs which are eligible for EMS system development grant expenditures as defined in the request for proposal (RFP) include:

- a. Training.
 - (1) Reimbursement for initial training tuition, fees and materials up to an amount that is the lowest fee charged by the training entity following successful completion of an EMS course. Practical and written examination fees may also be included.
 - (2) Payment of continuing education tuition, fees and materials. Education provided by an EMS service program for the general public is an allowable expense.
 - (3) Payment for EMS training aids.
- b. Other equipment as defined by the RFP.
- c. Infrastructure support.
 - (1) Development and enhancement of EMS systems.
 - (2) Office equipment and supplies necessary to coordinate a countywide EMS system.
 - (3) Personnel services for staffing to provide countywide continuous quality improvement and medical direction.

The title to any EMS equipment purchased with these funds shall not lie with the department, but shall be determined by the county EMS association.

140.4(2) Ineligible costs. Costs which are not eligible for funding include, but are not limited to, the following:

- a. Certification/recertification fees.
- b. Building and construction costs.
- c. Debt amortization.
- d. Land.
- e. Rent.
- f. Utilities.
- g. Vehicles including, but not limited to, ambulances, fire apparatus, boats, rescue/first response vehicles, snowmobiles and vehicle parts.

641—140.5(135) Disbursement of funds. Rescinded IAB 2/2/05, effective 3/9/05.

641—140.6(135) Application denial or partial denial—appeal. Rescinded IAB 2/2/05, effective 3/9/05.

These rules are intended to implement Iowa Code section 135.25.

CHAPTER 141
LOVE OUR KIDS GRANT

641—141.1(321) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Applicant*” means an individual, organization, or entity that has as its responsibility the development, promotion, and implementation of injury prevention and education initiatives for children and who has submitted an application for a love our kids grant.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of the Iowa department of public health.

“*Fiscal year*” means the 12-month period beginning July 1 and ending June 30.

“*Project period*” means the period of time which the department intends to support the project.

“*Service delivery area*” means the defined geographic area for delivery of project services. Applications shall not fragment existing integrated service delivery within the defined geographic area.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

641—141.2(321) Purpose. The purpose of the love our kids grant is to provide grant funding to statewide, regional and local agencies and service programs that have as their responsibility the development, promotion, and implementation of injury prevention and education initiatives for children in Iowa.

641—141.3(321) Funding limitations. Grants awarded under this program shall be subject to the guidelines within the contract and the following, including but not limited to:

141.3(1) Up to 10 percent of the funds generated by this program may be retained by the department for program management.

141.3(2) Rescinded IAB 12/6/06, effective 11/8/06.

141.3(3) Following the disbursement of the funds pursuant to subrule 141.3(1), depending upon availability of funds, up to 24 contracts, with a goal of funding at least three per EMS region for \$1500 each, may be made available to statewide, regional and local agencies or service programs that are located within the federally appointed rural areas (listing of eligible rural counties can be found at <http://ruralhealth.hrsa.gov>) and have as their responsibility the development, promotion, and implementation of injury prevention and education initiatives for children.

141.3(4) Expenditures occurring prior to the project period are not eligible for reimbursement.

141.3(5) Grant awards shall be subject to the availability of funds.

641—141.4(321) Use of funds. Funds may be used for injury prevention initiatives specified within the guidelines for children aged birth to 21 including but not limited to:

1. Education and materials;
2. Training materials and equipment;
3. Safety equipment;
4. Public information and education campaigns;
5. Conferences/seminars/workshops;
6. Systems development;
7. Contractual services;
8. Personnel costs.

641—141.5(321) Application process. An application for a love our kids grant is required and available from the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075. The application process is as follows:

141.5(1) Applications from qualified applicants shall be submitted to the department prior to July 1 of each year.

141.5(2) The department shall review the application, and may approve, partially approve, request clarification or request a new application.

641—141.6(321) Application denial or partial denial—appeal.

141.6(1) Denial or partial denial of an application shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the applicant of denial or partial denial shall be served by restricted certified mail, return receipt requested, or by personal service.

141.6(2) Any request for appeal concerning denial or partial denial shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 30 days of the receipt of the department's notice. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075. Prior to or at the hearing, the department may rescind the denial or partial denial. If no request for appeal is received within the 30-day time period, the department's notice of denial or partial denial shall become the department's final agency action.

141.6(3) Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information which may be provided by the aggrieved party shall also be provided to the department of inspections and appeals.

141.6(4) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 4, Iowa Administrative Code.

141.6(5) When the hearing officer makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken as provided in subrule 141.6(6).

141.6(6) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

141.6(7) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.
- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

141.6(8) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

141.6(9) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

141.6(10) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is Iowa Department of Public Health, Bureau of Emergency Medical Services, Lucas State Office Building, Des Moines, Iowa 50319-0075.

141.6(11) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

These rules are intended to implement Iowa Code section 147A.4 and Iowa Code Supplement section 321.34.

CHAPTER 142
OUT-OF-HOSPITAL DO-NOT-RESUSCITATE ORDERS

641—142.1(144A) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Adult*” means an individual 18 years of age or older.

“*Attending physician*” means a physician selected by, or assigned to, the patient who has primary responsibility for the treatment and care of the patient.

“*Comfort care*” means care within the scope of the health care provider’s training and certification to alleviate pain and suffering, but does not include resuscitative measures.

“*Department*” means the Iowa department of public health.

“*Emergency medical care*” means such medical procedures as:

1. Administration of intravenous solutions.
2. Intubation.
3. Performance of cardiac defibrillation and synchronized cardioversion.
4. Administration of emergency drugs as provided by rule by the department.
5. Any other medical procedure approved by the department, by rule, as appropriate to be performed by emergency medical care providers who have been certified in that procedure.

“*EMS provider*” means an emergency medical care provider as defined in Iowa Code section 147A.1.

“*Health care provider*” means a person, including an emergency medical care provider, who is licensed, certified, or otherwise authorized or permitted by the law of this state to administer health care in the ordinary course of business or in the practice of a profession.

“*Hospital*” means any hospital licensed under the provisions of Iowa Code section 135B.1.

“*Life-sustaining procedure*” means any medical procedure, treatment, or intervention, including resuscitation, which utilizes mechanical or artificial means to sustain, restore or supplant a spontaneous vital function, and when applied to a patient in a terminal condition, would serve only to prolong the dying process. “*Life-sustaining procedure*” does not include the provision of nutrition or hydration except when required to be provided parenterally or through intubation or the administration of medication or performance of any medical procedure deemed necessary to provide comfort care or to alleviate pain.

“*Medical direction*” means direction, advice, or orders provided by a medical director, supervising physician, or physician designee (in accordance with written parameters and protocols) to emergency medical care providers.

“*Medical director*” means any physician licensed under Iowa Code chapter 148, 150, or 150A who shall be responsible for overall medical direction of the service program and who has completed a medical director workshop, sponsored by the department, within one year of assuming duties.

“*On-line medical direction*” means immediate medical direction provided directly to service program emergency medical care providers, in accordance with written parameters and protocols, by the medical director, supervising physician or physician designee either on scene or by any telecommunications system.

“*Out-of-hospital do-not-resuscitate identifier*” or “*OOH DNR identifier*” means a durable yet easily removable unique identification approved by the department and worn by a patient who has an out-of-hospital do-not-resuscitate order.

“*Out-of-hospital do-not-resuscitate order*” or “*OOH DNR order*” means a written order on a form approved by the department, signed by an attending physician, executed in accordance with the requirements of Iowa Code section 144A.7A and issued consistent with Iowa Code section 144A.2, that directs the withholding or withdrawal of resuscitation when an adult patient in a terminal condition is outside the hospital.

“*Out-of-hospital do-not-resuscitate protocol*” or “*OOH DNR protocol*” means the statewide protocol approved by the department and intended to avoid unwarranted resuscitation by emergency medical care providers when a valid out-of-hospital do-not-resuscitate order or identifier is encountered.

“*Patient*” means any individual who is sick, injured, or otherwise incapacitated.

“*Physician*” means any individual licensed under Iowa Code chapter 148, 150, or 150A.

“*Physician assistant*” or “*PA*” means an individual licensed pursuant to Iowa Code chapter 148C.

“*Physician designee*” means any registered nurse licensed under Iowa Code chapter 152, or any physician assistant licensed under Iowa Code chapter 148C and approved by the board of physician assistant examiners. The physician designee acts as an intermediary for a supervising physician in accordance with written policies and protocols in directing the actions of emergency medical care providers.

“*Qualified patient*” means any adult patient as defined in Iowa Code section 144A.2.

“*Registered nurse*” or “*RN*” means an individual licensed pursuant to Iowa Code chapter 152.

“*Resuscitation*” means any medical intervention that utilizes mechanical or artificial means to sustain, restore, or supplant a spontaneous vital function, including but not limited to chest compression, defibrillation, intubation, and emergency drugs intended to alter cardiac function or otherwise to sustain life.

“*Service program*” or “*service*” means any medical care ambulance service or nontransport service that has received authorization by the department.

“*Supervising physician*” means any physician licensed under Iowa Code chapter 148, 150, or 150A. The supervising physician is responsible for medical direction of emergency medical care providers when such providers are providing emergency medical care.

“*Terminal condition*” means an incurable or irreversible condition that, without the administration of life-sustaining procedures, will, in the opinion of the attending physician, result in death within a relatively short period of time or a state of permanent unconsciousness from which, to a reasonable degree of medical certainty, there can be no recovery.

641—142.2(144A) Purpose. These rules direct EMS providers and service programs on the processes for the recognition of OOH DNR orders or identifiers and implementation of the OOH DNR protocol. In addition, these rules set forth guidelines for consideration by health care providers and organizations to help ensure uniform and orderly understandings, processes and procedures for the use and implementation of OOH DNR orders consistent with the provisions of Iowa Code chapter 144A.

641—142.3(144A,147A) Responsibilities of the department.

142.3(1) OOH DNR physician order. The department designates the OOH DNR order form contained in Appendix A as the uniform OOH DNR order form to be used statewide. If an attending physician issues an OOH DNR order for a qualified patient, the physician shall use the form contained in Appendix A.

142.3(2) OOH DNR personal identifier. The department designates the identifier supplied by MedicAlert® as the uniform personal identifier to be used for mobile qualified patients statewide. Instructions for obtaining a uniform personal identifier are contained in Appendix A.

142.3(3) OOH DNR protocol. The department designates the OOH DNR protocol contained in Appendix B as the uniform protocol to be used by EMS providers in implementing an OOH DNR order.

142.3(4) Appendix A and Appendix B forms. Forms referenced in subrules 142.3(1) through 142.3(3) are available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or through the bureau of EMS’s Web site at www.idph.state.ia.us/ems.

641—142.4(144A,147A) EMS providers.

142.4(1) Uniform protocol. EMS providers shall act in accordance with the department’s OOH DNR protocol when implementing an OOH DNR order. EMS service programs shall incorporate the OOH DNR protocol as part of their service protocols and, using educational materials consistent with the curriculum developed and approved by the department, shall inform and educate EMS providers on the protocol’s requirements as well as the requirements of Iowa Code chapter 144A and these rules.

142.4(2) Responsibility of the EMS provider. The EMS provider responding outside a hospital as a member of a service program shall:

a. Evaluate the patient’s status and needs through an assessment consistent with the provider’s training and certification.

- b. Determine the existence of an OOH DNR order or that the patient is wearing an OOH DNR identifier.
- c. Honor the OOH DNR order or OOH DNR identifier worn by the patient.
- d. Discontinue resuscitation if the OOH DNR order or OOH DNR identifier worn by the patient is discovered after resuscitation has begun.
- e. Follow the OOH DNR protocol.
- f. Provide comfort care to the patient at all times.
- g. Contact on-line medical direction for further instructions as necessary to provide appropriate patient care.
- h. If uncertainty exists regarding the validity or applicability of the OOH DNR order or identifier, the EMS provider shall provide the necessary and appropriate resuscitation.
- i. Document compliance or noncompliance with the OOH DNR order and the reasons for not complying with the order, including evidence that the order was revoked or uncertainty regarding the validity or applicability of the order.

641—142.5(144A) Guidelines for non-EMS health care providers, patients, and organizations. In order to encourage understanding and implementation of OOH DNR orders and protocols throughout Iowa and honor a qualified patient's wishes and intent regarding the provision of life-sustaining procedures in an out-of-hospital setting consistent with the requirements of Iowa Code chapter 144A, the following guidelines should be considered.

142.5(1) Attending physicians who issue OOH DNR orders. The attending physician should ensure that the following are accomplished:

- a. Establish that the patient is qualified because the patient:
 - (1) Is an adult; and
 - (2) Has a terminal condition.
- b. Explain to the patient or the individual legally authorized to act on the patient's behalf the implications of an OOH DNR order.
- c. If the qualified patient or individual legally authorized to act on the patient's behalf decides that the patient should not be resuscitated, the attending physician may issue the OOH DNR order on the prescribed uniform order form. The order will direct health care providers to withhold or withdraw resuscitation.
- d. Explain to the qualified patient or the individual legally authorized to act on the patient's behalf how the OOH DNR order is revoked.
- e. Include a copy of the order in the qualified patient's medical record.
- f. Provide a copy of the order to the qualified patient or the individual legally authorized to act on the patient's behalf.

142.5(2) Qualified patients or legally authorized persons. A qualified patient or a person legally authorized to act on a qualified patient's behalf should:

- a. Make an informed decision concerning resuscitation in the face of a terminal condition.
- b. Ensure that the qualified patient's family members are aware of this decision and inform them of the location of the OOH DNR order and the purpose of an OOH DNR identifier.
- c. Understand the process for revocation as described in rule 641—142.6(144A).

142.5(3) Non-EMS health care providers. A non-EMS health care provider contemplating resuscitation for a patient should:

- a. Evaluate the patient's status and needs through an assessment consistent with the provider's training, certification and licensure.
- b. Determine that the presenting condition is within the scope of the patient's terminal condition and is not the result of a motor vehicle collision, fire, mass casualty or other cause of a sudden accident or injury.
- c. Determine the existence of an OOH DNR order or that the patient is wearing an OOH DNR identifier.
- d. Honor the OOH DNR order or OOH DNR identifier worn by the patient.

e. Discontinue resuscitation if the OOH DNR order or OOH DNR identifier worn by the patient is discovered after resuscitation has begun.

f. Provide comfort care to the patient at all times.

g. If uncertainty exists regarding the validity or applicability of the OOH DNR order or identifier, the health care provider shall provide the necessary and appropriate resuscitation.

h. Document compliance or noncompliance with the OOH DNR order and the reasons for not complying with the order, including evidence that the order was revoked or uncertainty regarding the validity or applicability of the order or OOH DNR identifier.

142.5(4) Hospitals. A hospital licensed under Iowa Code chapter 135B:

a. Shall not be precluded from honoring an OOH DNR order entered in accordance with this chapter and in compliance with established hospital policies and protocols.

b. Should, to avail itself of the immunities provided within Iowa Code chapter 142, establish such policies and protocols to address an OOH DNR order or identifier encountered on a person who presents to the emergency department or in any other area within the facility if the person presents as a patient or visitor.

c. Should integrate policies and procedures with the OOH DNR protocol for hospital-based ambulance service programs, if present.

142.5(5) Other health care organizations. A nursing home, home health care agency, hospice, or other health care organization should establish policies and protocols consistent with these rules to address admitted patients who have OOH DNR orders.

641—142.6(144A) Revocation of the out-of-hospital do-not-resuscitate order. An OOH DNR order is deemed revoked at any time that a patient, or an individual authorized to act on the patient's behalf as designated on the OOH DNR order, is able to communicate in any manner the intent that the order be revoked, without regard to the mental or physical condition of the patient. A revocation is only effective as to the health care provider upon communication to that provider by the patient, an individual authorized to act on the patient's behalf as designated in the OOH DNR order, or by another person to whom the revocation is communicated by the patient.

641—142.7(144A) Personal wishes of family members or other individuals who are not authorized to act on the patient's behalf. The personal wishes of family members or other individuals who are not authorized in the order to act on the patient's behalf shall not supersede a valid OOH DNR order.

641—142.8(144A) Transfer of patients.

142.8(1) An attending physician who is unwilling to comply with an OOH DNR order or who is unwilling to comply with the provisions of Iowa Code section 144A.7A shall take all reasonable steps to effect the transfer of the patient to another physician.

142.8(2) If the policies of a hospital, nursing home, home health care agency, hospice or other health care organization preclude compliance with the OOH DNR order of a qualified patient, the provider shall take all reasonable steps to effect the transfer of the patient to an organization in which the provisions of Iowa Code section 144A.7A can be carried out.

641—142.9(144A) Application to existing orders.

142.9(1) An OOH DNR order or similar order executed prior to September 10, 2003, is valid and shall be honored in accordance with the then-applicable provisions of the law.

142.9(2) Health care providers may honor an OOH DNR order or identifier from another state if it can be validated and applied in a manner consistent with the OOH DNR order or identifier prescribed in these rules. In cases where there is uncertainty, clarification should be sought through on-line medical direction or resuscitation efforts should be initiated.

These rules are intended to implement Iowa Code sections 144A.7A and 147A.4.

APPENDIX A

Iowa Department of Public Health
OUT-OF-HOSPITAL DO-NOT-RESUSCITATE ORDER

(Please type or print)

Date of Order: ____/____/____

Patient Information:

Name: (Last)_____(First)_____(Middle)_____

Address: _____(City)_____ (Zip)_____

Date of Birth: ____/____/____ Gender (Circle): M or F

Name of Hospice or Care Facility (if applicable): _____

Attending Physician Order

As the attending physician for the above-named patient, I certify that this individual is over 18 years of age and has a terminal diagnosis. After consultation with this patient (or the patient’s legal representative), I hereby direct any and all health care providers, including qualified emergency medical services (EMS) personnel, to withhold or withdraw the following life-sustaining procedures in accordance with Iowa law (Iowa Code chapter 142A):

- Cardiopulmonary Resuscitation/Cardiac Compression (Chest Compressions).
- Endotracheal Intubation/Artificial or Mechanical Ventilation (Advance Airway Management).
- Defibrillation and Related Procedures.
- Use of Resuscitation Drugs.

This directive does NOT apply to other medical interventions for comfort care.

_____/_____/_____
Signature of Attending Physician (MD, DO) **Date**

Printed Name of Attending Physician **Physician’s Telephone (Emergency)**

To the extent that it is possible, a person designated by the patient may revoke this order on the patient’s behalf. If the patient wishes to authorize any other person(s) to revoke this order, the patient MUST list those persons’ names below:

Name: _____
Name: _____
Name: _____
Name: _____

Patients please note: Directions for obtaining a uniform identifier are listed on the back of this form. The uniform identifier is the key way the health care provider and/or EMS personnel can quickly recognize that you have an Out-of- Hospital Do-Not-Resuscitate order. If you are not wearing an identifier, the health care provider and/or EMS personnel may not realize that you do not want to be resuscitated.

Physicians please note: Information regarding the completion of an Out-of-Hospital Do-Not-Resuscitate order is on the back of this form.

APPENDIX A

Directions for obtaining a uniform identifier:

The uniform identifier may be obtained through MedicAlert®¹, which requires:

1. A completed MedicAlert® application, which is available in physician offices or through MedicAlert® by phoning (880)432-5378 or their Web site www.medicalert.org, and a new membership fee of \$35.
2. A copy of this completed OOH DNR order, which must accompany the MedicAlert® application or be sent to MedicAlert® prior to the identifier's being mailed.

¹MedicAlert® is a nonprofit 501C membership organization.

Suggested guidelines for physicians:

1. Please review the Iowa Out-of-Hospital Do-Not-Resuscitate order and related protocol with the patient/patient's legal representative(s). The following points may be helpful:
 - Patient/patient's legal representative(s) listed on this order must understand the significance of this order, that in the event the patient's heart or breathing stops or malfunctions, the anticipated result of this order is death.
 - Patient/patient's legal representative(s) listed on this order may revoke this directive at any time. However, the desire to revoke must be communicated to the EMS or other health care professionals at the scene.
 - It is important to emphasize that this order does not apply to medical interventions to make the patient more comfortable.
 - The importance of wearing the uniform identifier for those qualified patients who would benefit from the mobility this offers should be stressed. It is also helpful to walk patients through the process they must follow to acquire the identifier.
2. Provide a copy of this order to the patient/patient's legal representative(s) listed on this order and place the original in the patient's medical records.

The OOH DNR Order form is available through the Iowa Department of Public Health, Bureau of EMS, Lucas State Office Building, Des Moines, Iowa 50319-0075, or through the Bureau of EMS's Web site www.idph.state.ia.us/ems.

APPENDIX B

EMS OUT-OF-HOSPITAL DO-NOT-RESUSCITATE PROTOCOL

Purpose: This protocol is intended to avoid unwarranted resuscitation by emergency care providers in the out-of-hospital setting for a *qualified patient*.¹ There must be a valid Out-of-Hospital Do-Not-Resuscitate (OOH DNR) order signed by the qualified patient's attending physician or the presence of the OOH DNR identifier indicating the existence of a valid OOH DNR order.

No resuscitation: Means withholding any medical intervention that utilizes mechanical or artificial means to sustain, restore, or supplant a spontaneous vital function, including but not limited to:

1. Chest compressions,
2. Defibrillation,
3. Esophageal/tracheal/double-lumen airway; endotracheal intubation, or
4. Emergency drugs to alter cardiac or respiratory function or otherwise sustain life.

Patient criteria: The following patients are recognized as qualified patients to receive no resuscitation:

1. The presence of the uniform OOH DNR order or uniform OOH DNR identifier, or
2. The presence of the attending physician to provide direct verbal orders for care of the patient.

The presence of a signed physician order on a form other than the uniform OOH DNR order form approved by the department may be honored if approved by the service program EMS medical director. However, the immunities provided by law apply only in the presence of the uniform OOH DNR order or uniform OOH DNR identifier. When the uniform OOH DNR order or uniform OOH DNR identifier is not present, contact must be made with on-line medical control and on-line medical control must concur that no resuscitation is appropriate.

Revocation: An OOH DNR order is deemed revoked at any time that a patient, or an individual authorized to act on the patient's behalf as listed on the OOH DNR order, is able to communicate in any manner the intent that the order be revoked. The personal wishes of family members or other individuals who are not authorized in the order to act on the patient's behalf shall not supersede a valid OOH DNR order.

Comfort Care (♥): When a patient has met the criteria for no resuscitation under the foregoing information, the emergency care provider should continue to provide that care which is intended to make the patient comfortable (a.k.a. ♥ Comfort Care). Whether other types of care are indicated will depend upon individual circumstances for which medical control may be contacted by or through the responding ambulance service personnel.

♥ **Comfort Care** may include, but is not limited to:

1. Pain medication.
2. Fluid therapy.
3. Respiratory assistance (oxygen and suctioning).

¹*Qualified patient* means an adult patient determined by an attending physician to be in a terminal condition for which the attending physician has issued an Out-of-Hospital DNR order in accordance with the law. (Iowa Administrative Code 641—142.1(144A), definitions)

CHAPTER 143
AUTOMATED EXTERNAL DEFIBRILLATOR GRANT PROGRAM

641—143.1(135) Purpose. An automated external defibrillator grant program is established to provide matching funds to eligible organizations that are seeking to implement an early defibrillation program. The objective of the grant program is to enhance and supplement the emergency response system in rural areas of the state by providing increased access to automated external defibrillator equipment by rural emergency and community personnel.

641—143.2(135) Definitions. For the purposes of these rules, the following definitions shall apply:

“*Automated external defibrillator*” or “*AED*” means an external semiautomatic device that determines whether defibrillation is required.

“*Community organization*” means an educational institution, nonprofit organization, social service agency, philanthropic organization, or business, trade, or professional association.

“*CPR*” means cardiopulmonary resuscitation.

“*Department*” means the Iowa department of public health.

“*Early defibrillation program*” means a program established by the applicant to enhance and supplement the local EMS system.

“*EMS*” means emergency medical services.

“*Local board of health*” means a county, city, or district board of health.

“*Rural*” means a geographic area outside an urban or suburban setting with a population of less than 15,000 persons.

641—143.3(135) Application process. To be eligible for an automated external defibrillator program grant, a local board of health, community organization or city shall:

143.3(1) Properly complete and submit the department’s AED grant program application, which shall require an applicant to:

- a. Demonstrate the ability to provide matching funds of 50 percent of the cost of the program;
- b. Designate an individual who shall be responsible for the overall supervision of the early defibrillation program; and
- c. Include a plan for increasing rural emergency or community personnel access to automated external defibrillator equipment; and

143.3(2) Notify local EMS service programs of the intent to establish an early defibrillation program.

641—143.4(135) Early defibrillation program. A local board of health, community organization or city that receives an automated external defibrillator program grant shall:

143.4(1) Adopt and implement a policy that ensures establishment of an emergency plan of action; AED maintenance; personnel competency in the use of an AED and CPR; and a method for postevent analysis and staff debriefing.

143.4(2) Designate an individual who shall be responsible for the overall supervision of the early defibrillation program.

143.4(3) Submit an annual report to the department indicating the number of AED uses, patient outcomes and number of individuals trained.

143.4(4) Comply with the terms and conditions of the contract with the department for implementation of the program.

641—143.5(135) Review process. The department shall establish a request for proposal and application process for eligible organizations to apply for an automated external defibrillator program grant. The department shall establish a process to review applications, which shall include receiving input from a review committee. The review process and review criteria shall be described in the request for proposals.

641—143.6(135) Appeals. An applicant may appeal the denial of a properly submitted grant application. Appeals shall be governed by 641—176.8(135,17A).

These rules are intended to implement Iowa Code section 135.26.

CHAPTER 150
IOWA REGIONALIZED SYSTEM OF PERINATAL HEALTH CARE

641—150.1(135,77GA,ch1221) Purpose and scope. Hospitals within the state shall determine whether to participate in Iowa's regionalized system of perinatal health care and shall select the hospital's level of participation in the regionalized system. A hospital having determined to participate in the regionalized system shall comply with the rules appropriate to the level of participation selected by the hospital.

Iowa's regionalized system of perinatal health care helps practitioners in rural Iowa to rapidly access specialty services for their patients even though such services may not exist in the local community. This is predicated on several factors, including the willingness of certain hospitals in moderate-to-large Iowa cities to provide specialty services and the presence of a functional system of patient transportation. These rules address how participating Iowa hospitals relate to the regionalized system and suggest a level of functioning which should identify the role each participating hospital plays in the system.

The following rules present a description of the levels of care among Iowa perinatal hospitals. The levels are as follows: Level I hospital, Level II hospital, Level II regional center, Level II regional neonatology center, and Level III center. The department is very much aware of the need for organization of limited resources in a rural state. Accordingly, the rules are designed to encourage and support the presence of a Level II regional center in areas not populous enough to support a Level III center.

These rules are not meant to hold Iowa hospitals and Iowa perinatal professionals to an impractical ideal. Although the rules are clearly not intended to serve as standards, they do specify particulars when feasible. For example, specification of a designated level of care for a hospital should be clearly evident from the descriptions. Levels of care are designated by the functional capacity of the hospital. Thus, it may be possible to have a number of Level II hospitals or Level III centers in one city.

The primary purpose of designation is to ensure Iowa perinatal patients appropriate care as close to their homes as possible. In an ideal situation, no community hospital would be more than 50 miles from a perinatal center. Unfortunately, Iowa's low population density precludes this. Accordingly, Iowa developed a network of regional centers.

The further intent of these rules is to ensure that when a hospital markets itself at a particular level of perinatal care, it is capable of providing that care. The public is entitled to know the level of functioning. The rules provide the framework to be used in defining and evaluating the level of perinatal services being offered.

641—150.2(135,77GA,ch1221) Definitions. For the purpose of these rules, the following definitions shall apply:

"Categorization" means a preliminary determination by the department that a hospital is capable of providing perinatal care at Level I, Level II, Level II regional, Level II regional neonatology center, or Level III care capabilities.

"Certificate of verification" means a document awarded by the department that identifies a hospital's level of perinatal care and term of verification at that level.

"Department" means the Iowa department of public health.

"Director" means the director of the Iowa department of public health.

"Hospital" means a facility licensed under Iowa Code chapter 135B or a comparable facility located and licensed in another state.

"On-site verification survey" means an on-site survey conducted by the department's statewide perinatal care program based at the University of Iowa hospitals and clinics to assess a hospital's ability to meet the level of designation selected by the hospital.

"Perinatal advisory committee" means the committee that provides review and counsel to the statewide perinatal care program based at the University of Iowa hospitals and clinics.

"Perinatal guidelines advisory committee" means the committee that provides consultation to the department regarding these rules for the regionalized system of perinatal health care.

"Regionalized system of perinatal health care" means the department's program for the provision of appropriate perinatal care as close to patients' homes as possible.

“*Respiratory distress*” means tachypnea (respiratory rate of 60 or more per minute), grunting, tugging, retracting, nasal flaring, or cyanosis. Any or all of these may constitute respiratory distress.

“*Statewide perinatal health care program*” means the educational team based at the University of Iowa hospitals and clinics and retained by the department of public health.

“*Verification*” means a process by which the department certifies a hospital’s capacity to provide perinatal care in accordance with criteria established for Level I hospitals, Level II hospitals, Level II regional centers, Level II regional neonatology centers, and Level III centers under these rules.

641—150.3(135,77GA,ch1221) Perinatal guidelines advisory committee.

150.3(1) Purpose. The director shall appoint an advisory committee to consult with the department in its development and maintenance of the regionalized system of perinatal health care. This advisory committee should not be confused with the perinatal advisory committee that provides review and counsel to the statewide perinatal care program.

150.3(2) Appointment.

a. Members of the advisory committee shall include a representative from each of the following organizations that chooses to designate a nominee to the director: Iowa Hospitals and Health Systems; Iowa Medical Society; Iowa Osteopathic Medical Association; Iowa Chapter, American Academy of Pediatrics; Iowa Section, American College of Obstetricians and Gynecologists; Iowa Academy of Family Physicians; Iowa Nurses Association; Iowa Association of Neonatal Nurses; Iowa Association of Women’s Health, Obstetrical and Neonatal Nurses; and Iowa Chapter, Great Plains Organization for Perinatal Health Care.

b. Nonvoting ex officio members of the committee shall include representatives from the department of inspections and appeals, the statewide perinatal health care program at the University of Iowa hospitals and clinics and the division of family and community health medical director at the department.

c. Vacancies shall be filled in the same manner in which the original appointments were made.

d. Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the committee member and appointment of another. The chairperson of the committee shall notify the director of the department.

150.3(3) Officers. Officers of the committee shall be a chairperson and a vice-chairperson and shall be elected at the first meeting of each fiscal year unless designated at the time of appointment. Vacancies in the office of chairperson shall be filled by elevation of the vice-chairperson. Vacancies in the office of vice-chairperson shall be filled by election at the next meeting after the vacancy occurs. The chairperson shall preside at all meetings of the committee, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice-chairperson shall perform the duties of the chairperson. When so acting, the vice-chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice-chairperson shall also perform such other duties as may be assigned by the chairperson.

150.3(4) Meetings.

a. The committee shall establish a meeting schedule on an annual basis to conduct its business. Meetings may be scheduled as business requires, but notice to members must be at least five working days prior to the meeting date. A four-week notice is encouraged to accommodate the schedules of members.

b. Robert’s Rules of Order shall govern all meetings.

c. Action on any issue before the committee can be taken only by a majority vote of the entire membership. The committee shall maintain information sufficient to indicate the vote of each member present.

150.3(5) Subcommittees. The committee may designate one or more subcommittees to perform such duties as may be deemed necessary.

150.3(6) Expenses of committee members. The following may be considered necessary expenses for reimbursement of committee members when incurred on behalf of committee business and are subject to established state reimbursement rates:

- a. Reimbursement for travel in a private car.
- b. Actual lodging and meal expenses including sales tax on lodging and meals.
- c. Actual expense of public transportation.

641—150.4(135,77GA,ch1221) Categorization and selection of level of care designation. Hospitals that have previously participated in the regionalized system of perinatal health care shall be categorized by the department at the level of care designation last verified by the department. A hospital that has chosen to participate in the regionalized system for the first time or that has chosen to select a new level of care designation shall:

1. Submit the following information to the department:
 - Description of the geographic area to be served.
 - Identification of the target population to be served.
 - Identification of Level I hospitals to be served.
 - Identification of unmet needs of the area to be served.
 - Demonstration of the ability to meet these rules.
2. Mail the information to:

Iowa Regionalized System of Perinatal Health Care
Iowa Department of Public Health
Division of Health Promotion and Chronic Disease Prevention
321 East 12th Street, Lucas State Office Building
Des Moines, Iowa 50319-0075

641—150.5(135,77GA,ch1221) Recommendation by the statewide perinatal care program.

150.5(1) Upon receipt of the hospital's application information from the department, the statewide perinatal care program will provide verification of the hospital's ability to meet the criteria for the level of designation selected by the hospital. The results of the verification shall be submitted to the department, along with a recommendation to grant or deny the hospital a certificate of verification.

150.5(2) The statewide perinatal health care program shall also perform periodic on-site verification surveys of established perinatal service programs to verify the continued ability of each hospital visited to meet the criteria for the level of designation selected by the hospital. The results of each survey shall also be submitted to the department, along with a recommendation to continue, suspend, or revoke the hospital's certificate of verification.

150.5(3) Any review and evaluation of the University of Iowa hospitals and clinics' established perinatal service program shall be performed by the department, or for the department, by a person or entity unaffiliated with the University of Iowa hospitals and clinics.

641—150.6(135,77GA,ch1221) Level I hospitals.

150.6(1) Definition. Level I hospitals provide basic inpatient care for pregnant women and newborns without complications; manage perinatal emergencies, including neonatal resuscitation; provide leadership in early risk identification before and after birth; seek consultation or referral for high-risk patients; and provide public and professional education.

150.6(2) Functions. Level I hospitals have a family-centered philosophy. Parents have reasonable access to their newborns 24 hours a day within all functional units and are encouraged to participate in the care of their newborns. Generally, parents can be with their newborns in the mother's room. Noninfectious siblings may visit in the mother's room or in a designated space.

Level I hospitals have the capability to:

- a. Provide surveillance and care of all patients admitted to the obstetric service with an established triage system for identifying high-risk patients who should be transferred to a facility that provides Level II or higher care, prior to delivery;
- b. Provide proper detection and supportive care of unanticipated maternal-fetal problems that occur during labor and delivery;

- c. Perform emergency Cesarean sections as soon as possible after the decision to do the operation has been made;
- d. Provide transfusions of blood and fresh frozen plasma on a 24-hour basis;
- e. Provide anesthesia, pharmacy, radiology, respiratory support, electronic fetal heart-rate monitoring, and laboratory services on a 24-hour basis;
- f. Provide care of postpartum conditions;
- g. Evaluate the condition of healthy neonates and their continuing care until discharge;
- h. Resuscitate all neonates using the neonatal resuscitation program guidelines as published by the American Heart Association/American Academy of Pediatrics;
- i. Stabilize all neonates including unexpectedly small or sick neonates before transfer;
- j. Consult and arrange transfers in conjunction with the obstetrician, pediatrician or neonatologist at the referral center;
- k. Maintain a nursery for normal-term or near-term newborns.

150.6(3) Physical facilities. Physical facilities for perinatal care in hospitals should be conducive to care that meets the normal physiologic and psychosocial needs of mothers, neonates, fathers, and families. Special facilities should be available when deviations from the norm require uninterrupted physiologic, biochemical, and clinical observations of patients throughout the perinatal period. Labor, delivery, and newborn care facilities should be located contiguously.

The following recommendations are intended as general guidelines and are meant to be flexible enough to meet local needs. It is recognized that individual limitations of physical facilities for perinatal care may impede strict adherence to the recommendations. Furthermore, not all hospitals will have all the functional units described. Provisions for individual units should be consistent within the framework of a regionalized perinatal care system and the state and local public health regulations.

- a. *Obstetric functional units.*
 - (1) Labor. Areas used for women in labor are equipped with the following components:
 - 1. Adequate space for support persons, personnel, and equipment;
 - 2. Adequate ventilation and temperature control;
 - 3. A labor or birthing bed;
 - 4. A storage area for the patient's clothing and personal belongings;
 - 5. Adjustable lighting that is pleasant for the patient and adequate for examinations;
 - 6. An emergency signal and an intercommunication system;
 - 7. A sphygmomanometer and stethoscope;
 - 8. Mechanical infusion equipment;
 - 9. Fetal monitoring equipment;
 - 10. Oxygen and suction outlets;
 - 11. Access to at least one shower for use by labor patients; and
 - 12. Storage facilities for supplies and equipment.
 - (2) Delivery.
 - 1. Delivery rooms should be close to the labor rooms in order to afford easy access and to provide privacy to women in labor. A waiting area for families should be adjacent to the delivery suite, and restrooms should be located nearby.
 - 2. Traditional delivery rooms and Cesarean birth rooms are similar in design to operating rooms. Vaginal deliveries can be performed in either room, whereas Cesarean birth rooms are designed especially for that purpose and are thus larger. Each type of birthing room is well lighted and environmentally controlled to prevent chilling of the mother and neonate.
 - 3. It is desirable that Cesarean deliveries be performed in the obstetric unit; however, if this is not possible due to cost and space, equipment for neonatal stabilization and resuscitation, as described herein under 150.6(3) "b"(1), is available during delivery.
 - 4. Each delivery room is maintained as a separate unit with the following equipment and supplies necessary for normal delivery and for the management of complications:
 - Delivery/operating table that allows variation in position for delivery;
 - Instrument table and solution basin stand;

- Instruments and equipment for vaginal delivery, repair of laceration, Cesarean delivery, and the management of obstetric emergencies;
- Solutions and equipment for the intravenous administration of fluids;
- Equipment for administration of all types of anesthesia, including equipment for emergency resuscitation of the mother;
- Individual oxygen, air, and suction outlets for mother and neonate;
- An emergency call system;
- Mirrors for patients to observe the birth;
- Wall clock with a second hand;
- Equipment for fetal heart rate monitoring; and
- Scrub sinks with controls strategically placed to allow observation of the patient.

5. 5. Trays containing drugs and equipment necessary for emergency treatment of both mother and neonate are kept in the delivery room area. Equipment necessary for the treatment of cardiac arrest is easily accessible.

(3) Postpartum care. The postpartum unit is flexible enough to permit comfortable accommodation of patients when the patient census is at its peak and use of beds for alternate functions when the patient census is low. Ideally, single-occupancy rooms should be provided; however, not more than two patients should share one room. If possible, each room in the postpartum unit should have its own toilet and hand-washing facilities. When this is not possible and it is necessary for patients to use common facilities, patients should be able to reach them without entering a general corridor. When the newborn rooms-in with the mother, the room should have hand-washing facilities, a mobile bassinet unit, and supplies necessary for the care of the newborn.

(4) Combined units (labor/delivery/recovery or labor/delivery/recovery/postpartum room).

1. Comprehensive obstetric and neonatal care can be provided to the low-risk and the high-risk parturient and infant and the family in a single room. A homelike, family-centered environment with the capability for providing high-risk care is a key design criterion for both the labor/delivery/recovery (LDR) and labor/delivery/recovery/postpartum (LDRP) rooms. Each room is equipped for all types of delivery except Cesarean deliveries or those that may require general anesthesia.

2. During the labor, delivery, and recovery phases, care can be provided in an LDR room or can be extended to include the postpartum period in an LDRP room.

3. Nurses providing care in combined units are knowledgeable in antepartum care, labor and delivery, postpartum care, and neonatal care, making the use of staff cost-effective and increasing the continuity and quality of care.

b. Neonatal functional units.

(1) Resuscitation/stabilization.

1. A resuscitation and stabilization bed should be available in the immediate area of delivery for those neonates who require it. Contingent upon their condition, neonates are moved from this area to the nursery for admission and stabilization and possible transfer to a Level II regional center or Level III center.

2. The resuscitation area contains the following items:

- Overhead source of radiant heat that can be regulated based on the infant's temperature; radiant warmers with accommodations for X-ray capabilities are recommended;
- Thin resuscitation/examination mattress that allows access on three sides;
- Wall clock;
- Equipment and medications as recommended by the neonatal resuscitation program. This includes a laryngoscope with infant-sized blades, endotracheal tubes, and resuscitation (breathing) bags with masks for full-term and preterm neonates;
- Oxygen, compressed air and suction sources that are separate from those for the mother;
- Equipment for examination, immediate care, and identification of the neonate.

3. The resuscitation area is usually within the delivery room, although it may be in a designated, contiguous, separate room. If resuscitation takes place in the delivery room, the area is large enough to ensure that the resuscitation of the neonate can be achieved without interference with or from the ongoing

care of the mother. Following stabilization of the neonate, the newborn's vital signs must be maintained (e.g., by using prewarmed blankets). The room temperature is kept at a level higher than that customary for patient rooms or operating suites. Qualified nursing staff is available to assess the newborn during this period.

(2) Admission/observation (transitional care stabilization).

1. The admission/observation area is for careful assessment of the neonate's condition during the first 24 hours after birth (i.e., during the period of physiologic adjustment to extrauterine life). This assessment may take place within one or more functional areas (e.g., the room in which the mother is recovering, the LDRP room, the newborn nursery, or a separate admission/observation area). In some hospitals, the newborn nursery is the primary area for transitional care, both for neonates born within the hospital and for those born outside the hospital.

2. The admission/observation area should be near the delivery/Cesarean birth room. If it is part of the maternal recovery area, which is preferable, physical separation of the mother and newborn during this period can be avoided.

3. The capacity of the admission/observation area depends on the size of the delivery service and the duration of close observation. The admission/observation area is well lighted, has a wall clock, and contains emergency resuscitation equipment similar to that in the designated resuscitation area.

4. The physicians' and registered nurses' assessments of the neonate's condition determine the subsequent level of care. Most neonates are transferred from the admission/observation area to the newborn nursery or to the postpartum area for rooming-in. Some neonates may require transfer to another facility. Consultation with a pediatrician or neonatologist and possible referral to a hospital offering a higher level of care should be initiated for infants with respiratory distress or those infants requiring oxygen therapy for more than two hours.

(3) Newborn nursery. Routine care of apparently normal full-term neonates who have demonstrated successful adaptation to extrauterine life may be provided either in the newborn nursery or in the area where the mother is receiving postpartum care. The nursery should be relatively close to the postpartum area. The newborn nursery is well lighted, has a large wall clock, and is equipped for emergency resuscitation.

150.6(4) Medical personnel.

a. The obstetric/newborn care area is under the supervision of a board-eligible or board-certified obstetrician-gynecologist, pediatrician or a physician with special interest and experience in obstetrics or pediatrics.

b. Adequate anesthesia coverage by a qualified anesthesia provider is available in a timely fashion for emergency situations on a 24-hour-a-day, 7-day-a-week basis.

c. For Cesarean sections or if neonatal problems are anticipated during vaginal delivery, a second physician or attendant who is skilled in resuscitation and care of the neonate should be in attendance.

150.6(5) Nursing personnel. Nurses assigned to the obstetrical/neonatal service demonstrate competency in the care of the mother and infant.

a. *Staffing.* Registered nurses assigned to the obstetrical/neonatal service must be licensed to practice in Iowa, complete an obstetrical or neonatal orientation and demonstrate obstetrical or neonatal competencies as defined by each hospital. At least one of these registered nurses must be available at all times. The primary responsibility of the registered nurse is the delivery of nursing care and departmental organization.

b. *Labor/delivery/immediate postpartum/newborn.*

(1) A registered nurse is responsible for the admission assessment of the gravida in labor, as well as continuing assessment and support of the mother and fetus during labor, delivery and the early postpartum period.

(2) A registered nurse is responsible for the admission assessment of the newborn, as well as continuing assessment during the stabilization period.

(3) Licensed practical nurses, nursing assistants and other appropriate technical personnel may assist in the care of the gravida in labor, but should be under the direct supervision of the registered nurse.

c. Later postpartum period/newborn care.

(1) Nursing care of the mother and newborn is directed and supervised by a registered nurse. A licensed practical nurse may provide care for patients without complications.

(2) Nurses have a supporting and teaching role in assisting mothers to care for their infants. This should be recognized and fostered.

150.6(6) *Outreach education.* Level I hospitals should assume an active role in the development and coordination of wellness and preventive programs concerning maternal/child health at the community level (e.g., programs on family planning, family-life education, parenting, breast feeding, cessation of smoking).

150.6(7) *Allied health personnel and services.* Level I hospitals have available, but are not limited to, the following allied health personnel and services:

- a.* Registered dietitian with knowledge of maternal and neonatal nutrition management;
- b.* Social worker;
- c.* Bioengineer-safety and environmental control;
- d.* Pharmacy;
- e.* Radiology;
- f.* Laboratory;
- g.* Pathology.

150.6(8) *Infection control.*

a. Each hospital establishes written policies and procedures for assessing the health of personnel assigned to the perinatal care services and those who have significant contact with the newborn. This includes restricting their contact with patients when necessary. These policies and procedures include screening for tuberculosis and rubella. Routine culturing of specimens obtained from personnel is not useful, although selective culturing may be of value when a pattern of infection is suspected.

b. No special or separate isolation facilities are required for neonates born at home or in transit to the hospital. Detailed descriptions of the isolation categories and requirements should be available in each hospital's infection control manual.

150.6(9) *Newborn safety.* The protection of infants is the responsibility of all personnel in a facility. Infants are to be transported in a bassinet or stroller and should never be carried. Infants are transported one at a time and are never grouped in a hallway without direct supervision. Infants should always be within the sight and supervision of staff, the mother, or other family members or friends designated by the mother. Each hospital has a policy established that addresses strategies to promote infant safety.

150.6(10) *Maternal-fetal transport.* Maternal-fetal transport is an essential component of modern perinatal care. All facilities in the state providing obstetrics need to be familiar with their own resources and capabilities in dealing with obstetrical and neonatal complications. In most instances, maternal-fetal transport is preferable to neonatal transport. Each hospital, when transporting or accepting a transport, needs a system in place to facilitate a smooth transition of care in the most expeditious manner possible. The majority of maternal-fetal transports can be carried out by ground transportation. It is important for ambulance services to be equipped for maternal-fetal transport and have appropriately trained staff.

641—150.7(135,77GA,ch1221) Level II hospitals.

150.7(1) *Definition.* Level II hospitals provide the same care and services as Level I hospitals plus they provide management of certain high-risk pregnancies and services for newborns with selected complications. These hospitals deliver approximately 500 or more babies annually and have an obstetrician and pediatrician on staff. The perinatal unit is under the co-direction of a pediatrician and an obstetrician.

150.7(2) *Functions.* In addition to the functions of Level I hospitals, Level II hospitals have the capability to:

- a.* Manage selected high-risk pregnancies.
- b.* At a minimum, manage neonates of 34 weeks and greater gestation.
- c.* Manage recovering neonates who can be appropriately transferred from the referral center.
- d.* Maintain a special area designated for the care of sick neonates.

- e. Maintain nursing personnel with demonstrated competency in the care of sick neonates.
- f. Maintain nursing personnel with demonstrated competency in the care of high-risk mothers.

Consultation with a pediatrician or neonatologist and possible referral to a higher-level perinatal center should be initiated for infants requiring oxygen therapy for more than six hours or ventilatory care for more than two hours.

150.7(3) *Physical facilities.* Level II hospitals have the same physical facilities as Level I hospitals.

150.7(4) *Medical personnel.* Level II hospitals have the same medical personnel as Level I hospitals. In addition, the perinatal units in Level II hospitals are under the co-direction/supervision of either a board-eligible or board-certified obstetrician/gynecologist or a board-eligible or board-certified pediatrician for their respective areas. Allied medical specialists in various disciplines are on staff, including specialists in internal medicine, radiology, and pathology. Psychiatric services are available.

150.7(5) *Nursing personnel.* Level II hospitals have the same minimal requirements for nursing personnel as Level I hospitals. Nursing orientation and competencies in a Level II hospital are specific to the patient population they serve.

150.7(6) *Outreach education.* Level II hospitals have the same responsibility for outreach education as Level I hospitals.

150.7(7) *Allied health personnel and services.* Level II hospitals have the same allied health personnel and services available as Level I hospitals, with the addition of the following:

- a. Respiratory therapy.
- b. Ultrasound.

150.7(8) *Infection control.* Infection control guidelines are the same as for Level I hospitals.

150.7(9) *Newborn safety.* Level II hospitals have at least the same requirements for newborn safety as Level I hospitals.

150.7(10) *Maternal-fetal transport.* Level II hospitals have the same requirements for maternal-fetal transport as Level I hospitals. In addition, Level II hospitals are expected to accept patient referrals when appropriate. A critical function of providers at Level II hospitals is to communicate with the providers at Level I hospitals in deciding whether a particular patient should be transported to the Level II hospital. Careful assessment of the hospital's capabilities for perinatal management will be critical in these decisions. This information will need to be disseminated among the hospital staff. Providers of obstetric care need to know the critical gestational age limitations for their particular nursery. Below this gestational age, maternal-fetal transport should be utilized if delivery is anticipated and the circumstances permit.

150.7(11) *Perinatal care committee.*

a. All Level II hospitals maintain a perinatal care committee. Members of this committee should represent, but not be limited to, the fields of obstetrics, pediatrics, family practice, nursing, administration, laboratory, respiratory therapy, anesthesia and social services.

b. Responsibilities of the perinatal care committee include the following:

(1) Develop policies for the unit including provisions to ensure adequate patient care by qualified providers.

(2) Conduct a meeting at least semiannually to resolve problems related to the unit.

(3) Review educational activities conducted by the unit.

(4) Serve as a general liaison between the various groups represented on the committee.

641—150.8(135,77GA,ch1221) Level II regional centers.

150.8(1) *Definition.*

a. Level II regional centers have a developed neonatal intensive care unit (NICU). The sizes of the units vary because of the differing demands in the various regions in Iowa. Accordingly, a Level II regional center may have as few as four neonatal intensive care beds.

b. The obstetric service in a Level II regional center provides services for maternity patients at higher risk than those in Level II hospitals because of the presence of an NICU. However, reasonable efforts should be expended to transfer those patients whose newborns are likely to require a higher intensity of care not available in the Level II regional center but offered in a Level III center.

c. Level II regional centers provide the same care and services as Level II hospitals. In addition, Level II regional centers have the following differentiating characteristics:

- (1) A defined referral area;
- (2) A defined relationship with a Level III center either in Iowa or a contiguous state;
- (3) A minimum of three pediatricians and three obstetricians on staff; and
- (4) The ability to manage patients at higher risk than Level I or Level II hospitals. Complexity of care is determined by the training and experience of physicians and nursing staff and extent of support services available.

150.8(2) Functions. Level II regional centers have the same functions as Level II hospitals. In addition, Level II regional centers have the capability to:

- a. Accept selected maternal transports based on criteria developed in conjunction with the Level III center;
- b. Maintain nursing personnel demonstrating competency in the care of high-risk mothers;
- c. Maintain a defined neonatal intensive care unit;
- d. Maintain nursing personnel that demonstrate competency in the care of infants in neonatal intensive care;
- e. Provide care for infants requiring ventilatory support;
- f. Maintain a functioning neonatal transport team for the regional area served; and
- g. Provide for follow-up care of high-risk newborns in accordance with the Iowa high-risk infant follow-up program.

150.8(3) Physical facilities. Level II regional centers have the same physical facilities as Level II hospitals with the addition of the following.

a. *Obstetric functional units.*

(1) Labor/delivery. Patients who have significant medical or obstetric complications are cared for in a room especially equipped with cardiopulmonary resuscitation equipment and other monitoring equipment necessary for observation and special care. It is preferable that this room be located in the labor and delivery area and meet the physical requirements of any other intensive care room in the hospital. When patients with significant medical or obstetric complications are cared for in the labor and delivery area, the unit has the same capabilities as an intensive care unit.

(2) Postpartum. Larger services may have a specific recovery room for postpartum patients with a separate area for high-risk patients. Required equipment is similar to that needed in any surgical recovery room and includes equipment for monitoring vital signs, suctioning, administering oxygen, and infusing fluids intravenously. Cardiopulmonary resuscitation equipment must be immediately available.

b. *Neonatal functional units.*

(1) Continuous cardiopulmonary monitoring and constant nursing care and other support for severely ill infants are provided in the intensive care area. Because emergency care is provided in this area, laboratory and radiological services are readily available 24 hours a day. The results of blood gas analysis are available soon after blood sample collection.

(2) The neonatal intensive care area should be near the delivery/Cesarean birth room and should be easily accessible from the hospital's ambulance entrance. It should be away from routine hospital traffic.

(3) The amount and complexity of equipment are considerably greater than required in Level I and Level II nurseries. Equipment and supplies in the intensive care area include the same items as needed in the resuscitation and intermediate care areas. Immediate availability of emergency oxygen is essential. Continuous monitoring of delivered oxygen concentrations, patient oxygenation, body temperature, ECG, respirations and blood pressure should be available. Supplies should be kept close to the patient station so that nurses are not away from the neonate unnecessarily and may use their time and skills efficiently.

150.8(4) Medical personnel.

a. Level II regional centers have the same medical personnel as Level II hospitals with the addition of a board-eligible or board-certified pediatrician serving as director of the NICU. This physician maintains a consultative relationship with Level III physicians. Additionally, Level II regional centers have a minimum of three pediatricians and three obstetricians on staff.

b. If an infant is placed on mechanical ventilation, a physician, nurse practitioner, physician assistant, or appropriate person capable of airway management and experienced in diagnosis is available in-house on a 24-hour basis.

150.8(5) *Nursing personnel.* Level II regional centers have the same minimal requirements for nursing personnel as Level II hospitals. Additionally, Level II regional center registered nurses have demonstrated competency in high-risk obstetrics or neonatal care.

150.8(6) *Outreach education.* Outreach education is provided to each hospital in the referral area at least once per year. This can be achieved by one or more of the following:

- a. Sponsoring an annual conference;
- b. Visiting Level I and Level II hospitals;
- c. Providing educational programs at the regional center for the staff members of the Level I and Level II hospitals;
- d. Sending written educational materials to the Level I and II hospitals.

150.8(7) *Allied health personnel and services.* Level II regional centers have the same allied health personnel and services available as Level II hospitals, with the addition of the following:

a. A respiratory therapist, certified lab technician/blood gas technician and an X-ray technologist should be in-house on a 24-hour basis when a neonate is being managed on mechanical ventilation.

b. Allied personnel should have special training and an interest in high-risk mothers and infants.

150.8(8) *Infection control.* Infection control guidelines are the same as for Level II hospitals.

150.8(9) *Newborn safety.* Level II regional centers have at least the same requirements for newborn safety as Level II hospitals.

150.8(10) *Maternal-fetal transport.* Level II regional centers have the same requirements for maternal-fetal transport as Level II hospitals. In addition, Level II regional centers are expected to provide transportation services.

150.8(11) *Perinatal care committee.* Level II regional centers have at least the same requirements for a perinatal care committee as Level II hospitals.

641—150.9(135,77GA,ch1221) Level II regional neonatology centers.

150.9(1) *Definition.*

a. Level II regional neonatology centers provide the same care and services as Level II regional centers with the addition of a demonstrated commitment to providing a higher level of neonatology care. The Level II regional neonatology center will manage high-risk pregnancies and infants born at less than 34 weeks' gestation or weighing less than 1500 grams. Exceptions will be cases for which surgical intervention or pediatric subspecialty care is anticipated or needed.

b. The obstetric service in a Level II regional neonatology center provides services for maternity patients at higher risk than those in Level II hospitals because of the presence of a NICU. However, reasonable efforts should be expended to transfer those patients whose newborns are likely to require a higher intensity of care not available in the Level II regional neonatology center but offered in a Level III center. Efforts should also be made to transfer those patients to a Level III center when the pregnancy has risk factors that require the care of a maternal-fetal medicine specialist.

c. Level II regional neonatology centers provide the same care and services as Level II regional centers. In addition, Level II regional neonatology centers have the following differentiating characteristics:

- (1) A defined referral area;
- (2) A defined relationship with a Level III center either in Iowa or a contiguous state;
- (3) A minimum of two board-eligible or board-certified neonatal/perinatal medicine subspecialists on staff;
- (4) Neonatology care available on a continuous 24-hour basis, with at least three obstetricians on staff; and
- (5) A medical director in the neonatal intensive care unit who is a full-time, board-eligible or board-certified pediatrician with board eligibility or certification in neonatal/perinatal medicine.

150.9(2) Functions. Level II regional neonatology centers have the same functions as Level II regional centers.

- a. Accept selected maternal transports based on criteria developed in conjunction with the Level III center;
- b. Maintain nursing personnel demonstrating competency in the care of high-risk mothers;
- c. Maintain a defined neonatal intensive care unit;
- d. Maintain nursing personnel that demonstrate competency in the care of infants in neonatal intensive care;
- e. Provide care for infants requiring ventilatory support;
- f. Maintain a functioning neonatal transport team for the regional area served; and
- g. Provide for follow-up care of high-risk newborns in accordance with the Iowa high-risk infant follow-up program.

150.9(3) Physical facilities. Level II regional neonatology centers have the same physical facilities as Level II regional centers; however, they have special equipment for infants born at less than 34 weeks' gestation or weighing less than 1500 grams, and they serve a more complicated patient population.

150.9(4) Medical personnel.

- a. Level II regional neonatology centers have the same medical personnel as Level II regional centers.
- b. The medical director of the neonatal intensive care unit is a full-time, board-eligible or board-certified pediatrician with certification in neonatal/perinatal medicine. This physician maintains a consultative relationship with Level III physicians.
- c. Anesthesia providers on staff have special training or experience in obstetric and pediatric anesthesia.
- d. A pediatric cardiologist is active on staff.
- e. A neonatologist shall be on the premises when unstable critically ill infants are in the Level II regional neonatology center.

150.9(5) Nursing personnel. Level II regional neonatology centers have the same minimal requirements for nursing personnel as Level II regional centers. Additionally, registered nurses in the NICU of Level II regional neonatology centers must have specialty certification or advanced training and experience in the nursing management of high-risk neonates and their families.

150.9(6) Outreach education. Outreach education is provided to each hospital in the referral area at least once per year. This can be achieved by one or more of the following:

- a. Sponsoring an annual conference;
- b. Visiting Level I and Level II hospitals;
- c. Providing educational programs at the regional center for the staff members of the Level I and Level II hospitals;
- d. Sending written educational materials to the Level I and II hospitals.

150.9(7) Allied health personnel and services. Level II regional neonatology centers have the same allied health personnel and services available as Level II regional centers, with the addition of the following:

- a. Respiratory therapists, certified lab technicians/blood gas technicians, X-ray technologists, and ultrasound technicians with neonatal/perinatal experience available on a 24-hour basis.
- b. Social services, with social workers assigned specifically to the maternal and neonatal units.

150.9(8) Infection control. Infection control guidelines are the same as for Level II hospitals and Level II regional centers.

150.9(9) Newborn safety. Level II regional neonatology centers have at least the same requirements for newborn safety as Level II regional centers.

150.9(10) Maternal-fetal transport. Level II regional neonatology centers have the same requirements for maternal-fetal transport as Level II hospitals and Level II regional centers. In addition, Level II regional neonatology centers are expected to provide neonatal transportation services.

150.9(11) *Perinatal care committee.* Level II regional neonatology centers maintain a perinatal care committee with the same required meetings and membership as the Level II hospitals and Level II regional centers.

150.9(12) *Quality improvement.* Centers that routinely provide care to infants born at less than 34 weeks' gestation or weighing less than 1500 grams shall maintain a patient database of all NICU admissions that includes an accounting of patient mortality and morbidity for the benchmarking of results against other centers (national or statewide) and for the purpose of continuous review and quality improvement.

641—150.10(135,77GA,ch1221) Level III centers.

150.10(1) *Definition and function.* Level III centers provide the same care and services as Level II regional centers, plus they manage high-risk pregnancies and neonates, with the possible exception of a few very specialized complications. The Level III center is an extension of the Level II regional center and serves the same regional functions. The differentiating factor between them is primarily one of additional professional staff and more extensive physical facilities. There may be multiple Level III centers in the same city.

150.10(2) *Physical facilities.* Level III centers have the same physical facilities as Level II regional centers; however, they have more equipment and serve a more complicated patient population.

150.10(3) *Medical personnel.*

a. The medical director of the maternal-fetal intensive care unit is a full-time, board-eligible or board-certified obstetrician with certification in maternal-fetal medicine.

b. The medical director of the neonatal intensive care unit is a full-time, board-eligible or board-certified pediatrician with certification in neonatal/perinatal medicine.

c. Anesthesia providers on staff have special training or experience in obstetric and pediatric anesthesia.

d. A pediatric surgeon is on staff.

e. A pediatric cardiologist is on staff.

f. These physicians must be immediately available to the Level III center and reside in the same metropolitan area as the hospital.

g. A neonatologist should be on the premises when unstable critically ill infants are in the Level III center. An obstetrician should be on the premises when unstable critically ill mothers are in the Level III center.

150.10(4) *Nursing personnel.* Level III centers have the same minimal requirements for nursing personnel as Level II regional centers. The nurse managers of the perinatal units in Level III centers have prior experience in maternal or pediatric nursing and have a minimum of a bachelor of science in nursing degree, or a bachelor's degree in a related field.

150.10(5) *Outreach education.* Level III centers have the same responsibilities for outreach education as Level II regional centers.

150.10(6) *Allied health personnel and services.* Level III centers have the same allied health personnel and services as Level II regional centers. Additionally, Level III centers have respiratory therapists, certified lab technicians/blood gas technicians, X-ray technologists and ultrasound technicians with neonatal/perinatal experience available on a 24-hour basis. Level III centers also have social work services with social workers assigned specifically to the maternal and neonatal units.

150.10(7) *Infection control.* Infection control guidelines are the same as for Level II regional centers.

150.10(8) *Newborn safety.* Level III centers have at least the same requirements for newborn safety as Level II regional centers.

150.10(9) *Maternal-fetal transport.* Level III centers have the same requirements for maternal-fetal transport as Level II regional centers. In addition, Level III centers are capable of providing ground and air transportation whose crews have demonstrated competencies in maternal/neonatal resuscitation. Important decisions to be made jointly will include the appropriateness of transport, the best mode of transportation, the need for additional personnel accompanying the transport, and the appropriate medical management to initiate prior to transport.

150.10(10) *Perinatal care committee.* Level III centers maintain a perinatal care committee with additional representation by surgical specialties.

641—150.11(135,77GA,ch1221) Grant or denial of certificate of verification; and offenses and penalties.

150.11(1) Upon receipt of the on-site survey results, the department shall within 30 days issue its decision to grant or deny the hospital a certificate of verification. The department may deny verification or may give a citation and warning, place on probation, suspend, or revoke existing verification if the department finds reason to believe the hospital's perinatal care program has not been or will not be operated in compliance with these rules. The denial, citation and warning, period of probation, suspension, or revocation shall be effected and may be appealed in accordance with the requirements of Iowa Code section 17A.12.

150.11(2) All complaints regarding the operation of a participating hospital's perinatal care program shall be reported to the department and to the department of inspections and appeals.

150.11(3) Complaints and the investigative process shall be treated as confidential to the extent they are protected by Iowa Code section 22.7.

150.11(4) Complaint investigations may result in the department's issuance of a notice of denial, citation and warning, probation, suspension or revocation.

150.11(5) Notice of denial, citation and warning, probation, suspension or revocation shall be effected in accordance with the requirements of Iowa Code section 17A.12. Notice to the hospital of denial, citation and warning, probation, suspension or revocation shall be served by certified mail, return receipt requested, or by personal service.

150.11(6) Any request for a hearing concerning the denial, citation and warning, probation, suspension or revocation shall be submitted by the aggrieved party in writing to the department by certified mail, return receipt requested, within 20 days of the receipt of the department's notice to take action. The address is: Iowa Regionalized System of Perinatal Health Care, Iowa Department of Public Health, Division of Health Promotion and Chronic Disease Prevention, 321 East 12th Street, Lucas State Office Building, Des Moines, Iowa 50319-0075. If the request is made within the 20-day time period, the notice to take action shall be deemed to be suspended pending the hearing. Prior to or at the hearing, the department may rescind the notice upon satisfaction that the reason for the denial, citation and warning, probation, suspension or revocation has been or will be removed. If no request for a hearing is received within the 20-day time period, the department's notice of denial, citation and warning, probation, suspension or revocation shall become the department's final agency action.

150.11(7) Upon receipt of a request for hearing, the request shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by that agency regarding the transmission of contested cases. The information upon which the adverse action is based and any additional information, which may be provided by the aggrieved party, shall also be provided to the department of inspections and appeals.

150.11(8) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 10, Iowa Administrative Code.

150.11(9) When the administrative law judge makes a proposed decision and order, it shall be served by certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceedings ten days after it is received by the aggrieved party unless an appeal to the director is taken.

150.11(10) Any appeal to the director for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for an appeal shall state the reason for appeal.

150.11(11) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules.

- b. All evidence received or considered and all other submissions by recording or transcript.
- c. A statement of all matters officially noticed.
- d. All questions and offers of proof, objections and rulings on them.
- e. All proposed findings and exceptions.
- f. The proposed decision and order of the administrative law judge.

150.11(12) The decision and order of the director becomes the department's final agency action upon receipt by the aggrieved party and shall be delivered by certified mail, return receipt requested, or by personal service.

150.11(13) It is not necessary to file an application for a rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19. The aggrieved party to the final agency action of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A.

150.11(14) Any petition for judicial review of a decision and order shall be filed in the district court within 30 days after the decision and order becomes final. A copy of the notice of appeal shall be sent to the department by certified mail, return receipt requested, or by personal service. The address is: Iowa Regionalized System of Perinatal Health Care, Iowa Department of Public Health, Division of Health Promotion and Chronic Disease Prevention, 321 East 12th Street, Lucas State Office Building, Des Moines, Iowa 50319-0075.

150.11(15) The party who appeals a final agency action to the district court shall pay the cost of the preparation of a transcript of the contested case hearing for the district court.

150.11(16) Final decisions of the department relating to disciplinary proceedings may be transmitted to the department of inspections and appeals and to the appropriate professional associations or news media.

641—150.12(135,77GA,ch1221) Prohibited acts. A hospital that imparts or conveys, or causes to be imparted or conveyed, that it is a participating hospital in Iowa's regionalized system of perinatal health care, or that uses any other term, such as a designated level of care, to indicate or imply that the hospital is a participating hospital in the regionalized system of perinatal health care without having obtained a certificate of verification from the department is subject to licensure disciplinary action by the department of inspections and appeals, as well as to the application by the director to the district court for a writ of injunction to restrain the use of the term or terms "Level I hospital," "Level II hospital," "Level II regional center," "Level II regional neonatology center," and "Level III center" in relation to the provision of perinatal health care services.

641—150.13(135,77GA,ch1221) Construction of rules. Nothing in these administrative rules shall be construed to restrict a hospital from providing any services for which it is duly authorized.

These rules are intended to implement 1998 Iowa Acts, chapter 1221, section 5, subsection 4 "a" (2)(c).

[Filed 1/21/99, Notice 11/18/98—published 2/10/99, effective 3/17/99]

CHAPTER 151
TOBACCO USE PREVENTION AND CONTROL
COMMUNITY PARTNERSHIP INITIATIVE

641—151.1(142A) Scope. These rules apply to community partnerships established under Iowa Code chapter 142A as part of a comprehensive tobacco use prevention and control initiative to reduce tobacco use by youth and pregnant women, to promote compliance by minors and retailers with tobacco sales laws and ordinances, to enhance the capacity of youth to make healthy choices and to foster a social and legal climate in which tobacco use becomes undesirable and unacceptable.

641—151.2(142A) Community partnership areas. It is the goal of the commission on tobacco use prevention and control that the entire state be divided into multiple community partnership areas, so that all portions of the state are included in a community partnership area and no portion of the state is without the services of a community partnership. Toward this goal, the commission will encourage formation of community partnership areas that incorporate surrounding communities in a manner that does not isolate any geographic region of the state, and encourages optimal use of resources. In addition to the requirements of Iowa Code section 142A.8(1), a community partnership area:

151.2(1) Shall be composed of one or more counties, school districts, economic development enterprise zones, or community empowerment areas.

151.2(2) Shall follow existing boundaries of one or more counties, school districts, economic development enterprise zones, or community empowerment areas.

151.2(3) Shall serve a population of at least 4,000, including a minimum school-age population of 500.

151.2(4) Shall serve a minimum geographic area of one county.

641—151.3(142A) Community partnerships. A community partnership is a public agency or nonprofit organization which utilizes broad community involvement and represents a broad coalition of community groups, organizations, and interests. Community partnerships shall promote a wide range of activities that discourage tobacco use and support smoke-free environments. Some of these activities include developing coalitions with local organizations, conducting educational programs and encouraging policies that support tobacco use prevention and cessation.

641—151.4(142A) Application requirements for community partnerships. In order to qualify for funding through the tobacco use prevention and control program, a public agency or nonprofit organization seeking to be designated as a community partnership must apply to, and be approved by, the department of public health. Only one application per community partnership will be accepted. An application must provide the following information:

151.4(1) A description of the community partnership area to be served by the community partnership, including:

a. The geographic boundaries of the area;

b. Population, including both general population and school-age population, of the area;

151.4(2) A description of the applicant, including a description of the governing structure of the agency or organization, a table of organization, and the applicant's mission statement;

151.4(3) A description of the tobacco use prevention and control services currently provided by the applicant;

151.4(4) A description of the number of years the applicant has provided tobacco use prevention and control services and the number of clients served annually by the applicant;

151.4(5) A description of the funds currently received by the applicant which are targeted to provide tobacco use prevention and control services, including the source of funds, the dollar amount, and the period of funding;

151.4(6) A list of the other agencies, organizations, and entities currently providing tobacco use prevention and control services in the proposed community partnership area and a description of the

tobacco use prevention and control services currently provided by the other agencies, organizations, or entities;

151.4(7) A description of the collaborative efforts the applicant has undertaken with the agencies, organizations, and entities described in subrule 151.4(6) and an action plan describing anticipated collaborative efforts during the funding period;

151.4(8) Letters of support from the agencies, organizations, and entities described in subrule 151.4(6);

151.4(9) If the local board of health is not the applicant, a letter of support from the local board of health shall be submitted with the application. The letter of support must include a description of the local board of health's involvement with development of the application and an action plan describing anticipated collaborative efforts between the applicant and the local board of health;

151.4(10) A letter of support from county and city law enforcement agencies shall be submitted with the application. The letter of support must include a description of the local law enforcement agencies' involvement with development of the application and an action plan describing anticipated collaborative efforts between the applicant and local law enforcement agencies;

151.4(11) An assessment of the needs of the community partnership area which incorporates, but is not limited to, the following information for each county in the community partnership area:

a. Tobacco-related information from the community health needs assessment and health improvement plan (CHNA and HIP);

b. Tobacco-related information from the most recent Iowa youth survey;

c. Relevant data regarding tobacco use;

d. Relevant Synar data;

e. Information or data received from other service providers, organizations, or law enforcement agencies;

f. Tobacco-related information from Healthy Iowans 2010;

151.4(12) A description of how the applicant intends to implement the initiative's goals described in Iowa Code section 142A.6(2) in light of the community needs identified in subrule 151.4(11), including a proposed budget and a description of how performance measures shall be developed and utilized;

151.4(13) Identification of the source and amount of local matching funds, services, or support;

151.4(14) A description of how youth (aged 5 to 24 years) will be involved in the community partnership.

641—151.5(142A) Performance indicators. Periodic reports shall be submitted to the department by the community partnerships. These required reports shall be based on the degree to which the partnerships have achieved goals set out in the application and shall include information such as how many events/meetings were held and how many participants were in attendance.

641—151.6(142A) Application deadline. Applicants seeking to be approved as a community partnership for distribution of funds during the 2001 fiscal year may apply immediately and must apply no later than November 10, 2000.

151.6(1) Application must be on forms supplied by the department of public health. To obtain an application form, contact the director of the Tobacco Use Prevention and Control Division, Department of Public Health, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319; telephone (515)281-6225; E-mail mcrawfor@idph.state.ia.us.

151.6(2) Any change in the geographic boundaries of a community partnership area after a community partnership has been approved must be submitted to the tobacco use prevention and control division as a request to amend the application. The request shall describe the boundary change, explain the reason for the boundary change and describe any impact the boundary change will have on the information provided in response to rule 151.4(142A).

641—151.7(142A) Distribution of funding.

151.7(1) Applications submitted in accordance with these rules will be evaluated by the administrator of the division of tobacco use prevention and control, or the administrator's designee, to determine whether the application meets the requirements for funding as designated in these rules. The administrator or designee may request additional information from any applicant regarding the content of the application and may condition funding based on an applicant's submission of additional information or based on an applicant's willingness to change any term of the application, including geographic boundaries of the community partnership area.

151.7(2) The commission shall fund one community partnership per community partnership area. Funds shall be distributed equitably among the state's community partnership areas based on general population, school-age population, and designation of county or counties which comprise the community partnership area as a rural county or a metropolitan statistical area as defined by the U.S. Bureau of the Census. Available funds will be distributed under the following formulas:

Rural counties:

\$.84 per school-age youth plus an additional \$.84 per non-school-age county resident

Metropolitan statistical areas (Black Hawk, Dallas, Dubuque, Johnson, Linn, Polk, Pottawattamie, Scott, Warren, and Woodbury Counties):

\$.52 per school-age youth plus an additional \$.52 per non-school-age county resident

151.7(3) Funding received by a community partnership shall be matched on a one-to-one basis. At least 25 percent must be a cash match. Up to 75 percent of the match may include in-kind services, office support, or other tangible support or offset of costs.

Any offers to assist the applicant in reaching the match must be disclosed to the department in writing. In regard to any cash offers that are declined, the applicant must disclose reasons and rationale as to why these offers were declined.

Any funds left unallocated under subrules 151.7(2) and 151.7(3) on March 1, 2001, due to the failure of community partnerships to meet the cash match requirement pursuant to subrule 151.7(3) shall be distributed among all the community partnerships no later than June 30, 2001, in proportion to the amount of funding, including any cash match, each community partnership has reported to the department by March 15, 2001.

Funding distributed to community partnerships from the department shall be matched by the community partnership on a 75 percent basis. The match may include cash, or may include only in-kind services, office support, or other tangible support or offset of costs.

Any offers to assist the applicant in reaching the match must be disclosed to the department in writing. If any cash offers are declined, the applicant must disclose the reasons and the rationale for rejecting the offer.

151.7(4) Prior to receiving funding, a community partnership shall be required to execute a contract with the department.

151.7(5) Funding may be denied on grounds including, but not limited to:

- a. Applications from more than one entity have been received covering the same, or portions of the same, geographic area and another application more closely satisfies application criteria.
- b. The application is incomplete, untimely, or includes misleading or inaccurate information.
- c. Program funds are no longer available.
- d. Local matching funds, services, or support is not available.
- e. The applicant refuses to execute a contract with the department.
- f. The applicant fails to comply with the statute or administrative rules governing this program.

641—151.8(142A) Gifts. The commission shall solicit and accept gifts of money or services or property from governmental or private sources for use in support of the comprehensive tobacco use prevention and control initiative.

151.8(1) The commission shall not accept gifts of money or services or property from a manufacturer of tobacco products.

a. A gift means a rendering of anything of value in return for which legal consideration of equal or greater value is not given and received. A gift does not include funds deposited by any manufacturer of tobacco products into the tobacco settlement fund.

b. A manufacturer of tobacco products means every person who ships cigarettes or other tobacco products as defined in Iowa Code section 453A.1 into this state from outside the state.

151.8(2) The commission shall not accept a gift of money or services or property from a corporation or other private legal entity which is controlled by a manufacturer of tobacco products. A manufacturer of tobacco products controls a corporation or other private legal entity when the manufacturer possesses, directly or indirectly, the power to direct or cause the direction of the management and policies of a corporation or other private legal entity, whether through the ownership of voting rights, by contract, or otherwise.

151.8(3) The commission may not accept a gift of money or services or property from a corporation or other private legal entity in which a manufacturer of tobacco products has a noncontrolling interest. A manufacturer of tobacco products has a noncontrolling interest in a corporation or other private legal entity when the manufacturer has a commercial contract for goods or nonmanagement services, or holds the power to vote, or holds proxies representing less than 10 percent of the voting rights of any other person.

151.8(4) The commission, in its discretion, may require any corporation or other private legal entity from which it solicits, or which offers to it, a gift of money or services or property for use in support of the comprehensive tobacco use prevention and control initiative to submit a statement describing the relationship, if any, between the corporation or other private legal entity and a manufacturer of tobacco products.

151.8(5) If the commission accepts a gift from a corporation or other private legal entity under the circumstances described in subrule 151.8(3), the commission may require the gift to be contingent on a waiver by the manufacturer of tobacco products of any right to advertise with regard to, claim responsibility for, or otherwise publicize the gift.

These rules are intended to implement Iowa Code chapter 142A.

CHAPTER 152
TOBACCO USE PREVENTION AND CONTROL FUNDING PROCESS

641—152.1(78GA, HF2565) Scope and purpose. In addition to funding community partnerships in accordance with 641—Chapter 151, it is the goal of the commission on tobacco use prevention and control to provide funding for other programs for the purpose of achieving the goals of the initiative as defined in 2000 Iowa Acts, House File 2565. Toward this end, the commission intends to provide funding on a competitive basis for school programs; a media, marketing, and communications program; and a cessation program for pregnant women.

641—152.2(78GA, HF2565) Funding.

152.2(1) In addition to other requests for proposals necessary to implement the initiative, the commission shall issue a request for proposal (RFP) for the youth program, the media, marketing and communications program, and the cessation program for pregnant women. The RFP for each program shall include the amount of funding available, the project period, the services to be delivered, performance measures, application due date and other relevant time frames, a description of the review process, the review criteria to be used, expected contract terms, and a reference to the appeal process in the event an application is denied.

152.2(2) Applications submitted in accordance with these rules shall be evaluated in accordance with the review process described in the RFP. The administrator of the division of tobacco use prevention and control shall make the final determination regarding funding and shall notify all applicants regarding funding decisions by restricted certified mail, return receipt requested.

641—152.3(78GA, HF2565) Appeals.

152.3(1) Any request for an appeal concerning denial or partial denial of an application for funding shall be submitted by an aggrieved party in writing to the department by certified mail, return receipt requested, within ten days of receipt of the notice of denial. The address is Department of Public Health, Tobacco Use Prevention and Control Division, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319. The request for appeal must state the party's complete legal name, street address, telephone number, fax number, and the specific grounds upon which the party challenges the board's denial, including legal authority, if any. The request for appeal commences a contested case.

152.3(2) Upon receipt of an appeal, the appeal shall be forwarded within five working days to the department of inspections and appeals pursuant to the rules adopted by the department regarding transmission of contested cases.

152.3(3) The hearing shall be conducted according to the procedural rules of the department of inspections and appeals found in 481—Chapter 4.

152.3(4) When the hearing officer makes a proposed decision and order, it shall be served by restricted certified mail, return receipt requested, or delivered by personal service. That proposed decision and order then becomes the department's final agency action without further proceeding ten days after it is received by the aggrieved party unless an appeal to the commission is taken as provided in subrule 152.3(5).

152.3(5) Any appeal to the commission for review of the proposed decision and order of the administrative law judge shall be filed in writing and mailed to the commission by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge. Any request for appeal shall state the reasons for appeal.

152.3(6) Upon receipt of an appeal request, the administrative law judge shall prepare the record of the hearing for submission to the commission.

152.3(7) Review of a proposed decision shall be based on the record and limited to the issues raised in the hearing. The issues shall be specified in the notice of appeal of a proposed decision. The party requesting the review shall be responsible for transcribing any tape of the oral proceedings or arranging for a transcript of oral proceedings reported by a certified shorthand reporter.

152.3(8) Each party shall have the opportunity to file exceptions and present briefs. The administrator may set deadlines for the submission of exceptions or briefs. If oral argument will be held, the administrator shall notify all parties of the date, time and location at least ten days in advance.

152.3(9) The commission shall not receive any additional evidence, unless it grants an application to present additional evidence. Any such application must be filed by a party no less than five business days in advance of oral argument. Additional evidence shall be allowed only upon a showing that it is material to the outcome and that there were good reasons for failure to present it at hearing. If an application to present additional evidence is granted, the commission shall order the conditions under which it shall be presented.

152.3(10) The commission's final decision shall be in writing and it may incorporate all or part of the proposed decision.

152.3(11) The decision and order of the commission becomes the department's final agency action pursuant to Iowa Code chapter 17A upon receipt by the aggrieved party and shall be delivered by restricted certified mail, return receipt requested, or by personal service.

These rules are intended to implement Iowa Code chapter 17A and 2000 Iowa Acts, House File 2565.

[Filed emergency 10/13/00—published 11/1/00, effective 10/13/00]

CHAPTER 153
SMOKEFREE AIR

641—153.1(82GA, HF2212) Purpose and scope. The purpose of these rules is to implement Iowa's Smokefree Air Act, enacted to reduce the level of exposure by the general public and employees to environmental tobacco smoke in order to improve the public health of Iowans. These rules apply to public places, places of employment, and certain outdoor areas in the state.

641—153.2(82GA, HF2212) Definitions. For the purposes of this chapter, the following definitions shall apply:

"Ashtray" means any receptacle, including a can, bottle, bowl, tray, or other vessel that is used for extinguishing or disposing of any lighted cigar, cigarette, pipe, or other tobacco product in any manner or form including ash, cigarette butts or filters, or cigar stubs. However, "ashtray" shall not include any receptacle located outdoors and on the perimeter of any public place, the perimeter of the grounds of any public building, the perimeter of school grounds, or the perimeter of any other outdoor space subject to the prohibition in 2008 Iowa Acts, House File 2212, section 3, and rule 641—153.3(82GA, HF2212).

"Bar" means an establishment where one may purchase alcoholic beverages, as defined in Iowa Code section 123.3, for consumption on the premises and in which the serving of food is only incidental to the consumption of those beverages.

"Child care facility" means child care facility as defined by the department of human services pursuant to Iowa Code section 237A.1.

"Child care home" means child care home as defined by the department of human services pursuant to Iowa Code section 237A.1.

"Department" means the Iowa department of public health.

"Entrance" means any doorway to an enclosed area used by the public or employees for ingress to any public place or place of employment, but does not include any doorway designated for use as an exit in an emergency only. "Entrance" also includes the commonly understood points of entry to an outdoor area, subject to the prohibitions of this chapter, such as a driveway, sidewalk, pathway, access road, gate, or dedicated point of entry, but not including a street, road, highway, or sidewalk in the public right-of-way.

"Gaming floor" means gaming floor as defined by the state racing and gaming commission pursuant to Iowa Code section 99F.1.

"Grounds of any public building" means an outdoor area of a public building that is used in connection with the building, including but not limited to a sidewalk or driveway immediately adjacent to the building, but not including a sidewalk in the public right-of-way; a sitting or standing area immediately adjacent to the building; a patio; a deck; a curtilage or courtyard; a swimming or wading pool; a beach; or any other outdoor area as designated by the person having custody or control of the public building. A person having custody or control of a public building may exclude from the designated grounds of any public building the following: a parking lot, the course of play at a golf course, a hiking trail, locations of an individual campsite or campfire, or a lake, river, or other body of water. Nothing in this definition prohibits any owner, operator, manager, or other person having custody or control of an area that is exempt from the prohibitions of 2008 Iowa Acts, House File 2212, section 3, and rule 641—153.3(82GA, HF2212) from declaring the entire area or property a nonsmoking place.

"Hotel and motel" means any building or structure equipped, used, advertised as, or held out to the public to be an inn, hotel, motel, motor inn, or place where sleeping accommodations are furnished for hire to transient guests.

"Incidental to the sale of tobacco products" means that the gross revenue of a retail tobacco store derived from the sale of products other than tobacco products is not more than 20 percent of the retail tobacco store's total gross revenue.

"Infiltrate" means to permeate an area where smoking is prohibited by passing through a wall, ceiling, floor, window, door, or ventilation system to the extent that an individual can smell secondhand smoke.

“Public and private educational facility” means a public school and nonpublic school as defined in Iowa Code section 280.2, a community college as defined in Iowa Code section 260C.2, an accredited private institution as defined in Iowa Code section 261.9, and an institution governed by the board of regents pursuant to Iowa Code section 262.7.

“Public building” means an enclosed area owned, leased, or operated by or under the control of the state government or its political subdivisions.

“Restaurant” means eating establishments, including private and public school cafeterias, which offer food to the public, guests, or employees, including the kitchen and catering facilities in which food is prepared on the premises for serving elsewhere, and including a bar area within a restaurant.

“Retail tobacco store” means a retail store utilized primarily for the sale of tobacco products and accessories and in which the sale of other products is incidental to the sale of tobacco products.

“Seating areas of outdoor sports arenas, stadiums, amphitheaters, or other entertainment venues” means areas designated by the owner, operator, manager, or other person having custody or control of the area to be used primarily to witness entertainment events and shall include, but not be limited to, all chairs, seats, and bleachers whether permanent or temporary; standing room only; general admission or festival-style seating; and any other areas where individuals congregate to witness entertainment events.

“Serving of food incidental to the consumption of alcoholic beverages” means food preparation that is limited to the service of ice, prepackaged snack foods, popcorn, peanuts, and the reheating of commercially prepared foods that do not require assembly, such as frozen pizza, prepackaged sandwiches, or other prepackaged, ready-to-serve products.

“Smoking cessation program” means a course of treatment that is capable of clinical review for evidence-based outcomes that verify that individuals in the program stop smoking and that has been approved for coverage by a private or managed health care plan, Medicaid, Medicare, the Veterans Health Administration, or the United States military.

641—153.3(82GA, HF2212) Prohibition of smoking.

153.3(1) *Public places, places of employment.* Smoking is prohibited and a person shall not smoke in either of the following areas:

- a. Public places, as defined in 2008 Iowa Acts, House File 2212.
- b. All enclosed areas within places of employment including but not limited to work areas, private offices, conference and meeting rooms, classrooms, auditoriums, employee lounges and cafeterias, hallways, medical facilities, restrooms, elevators, stairways and stairwells, and vehicles owned, leased, or provided by the employer unless otherwise provided under these rules and 2008 Iowa Acts, House File 2212.

153.3(2) *Outdoor areas.* Smoking is prohibited and a person shall not smoke in or on any of the following outdoor areas:

- a. The seating areas of outdoor sports arenas, stadiums, amphitheaters and other entertainment venues where members of the general public assemble to witness entertainment events.
- b. Outdoor seating or serving areas of restaurants.
- c. Public transit stations, platforms, and shelters under the authority of the state or its political subdivisions.
- d. School grounds, including parking lots, athletic fields, playgrounds, tennis courts, and any other outdoor area under the control of a public or private educational facility, including inside any vehicle located on such school grounds.
- e. The grounds of any public buildings owned, leased, or operated by or under the control of the state government or its political subdivisions, including the grounds of a private residence of any state employee any portion of which is open to the public with the following exceptions:

(1) This paragraph shall not apply to the Iowa state fairgrounds, or fairgrounds as defined in Iowa Code section 174.1.

(2) This paragraph shall not apply to institutions administered by the department of corrections, except that smoking on the grounds shall be limited to designated smoking areas.

(3) This paragraph shall not apply to facilities of the Iowa National Guard as defined in Iowa Code section 29A.1, except that smoking on the grounds shall be limited to designated smoking areas.

641—153.4(82GA, HF2212) Areas where smoking not regulated. Notwithstanding any provision of these rules and 2008 Iowa Acts, House File 2212, to the contrary, the following areas are exempt from the prohibitions of 2008 Iowa Acts, House File 2212, section 3:

153.4(1) Private residences, unless used as a child care facility, child care home, or a health care provider location.

153.4(2) Hotel and motel rooms that are rented to guests and are designated as smoking rooms; provided that not more than 20 percent of the rooms of a hotel or motel rented to guests are designated as smoking rooms, all smoking rooms on the same floor are contiguous, and smoke from smoking rooms does not infiltrate into areas in which smoking is otherwise prohibited under these rules. The status of smoking and nonsmoking rooms shall not be changed, except to provide additional nonsmoking rooms.

153.4(3) Retail tobacco stores, provided that smoke from these locations does not infiltrate into areas in which smoking is otherwise prohibited under these rules.

153.4(4) Private and semiprivate rooms in long-term care facilities, occupied by one or more individuals, all of whom are smokers and have requested in writing to be placed in a room where smoking is permitted, provided that smoke from these locations does not infiltrate into areas in which smoking is otherwise prohibited under these rules and 2008 Iowa Acts, House File 2212.

153.4(5) Private clubs that have no employees, except when being used for a function to which the general public is invited, provided that smoke from these locations does not infiltrate into areas in which smoking is otherwise prohibited under these rules and 2008 Iowa Acts, House File 2212. This exemption shall not apply to any entity that is established for the purpose of avoiding compliance with these rules and 2008 Iowa Acts, House File 2212.

153.4(6) Outdoor areas that are places of employment except those areas where smoking is prohibited pursuant to 2008 Iowa Acts, House File 2212, section 3, subsection 2.

153.4(7) Limousines under private hire; vehicles owned, leased, or provided by a private employer that are for the sole use of the driver and are not used by more than one person in the course of employment either as a driver or passenger; privately owned vehicles not otherwise defined as a place of employment or public place; and cabs of motor trucks or truck tractors if no nonsmoking employees are present.

153.4(8) An enclosed area within a place of employment or public place that provides a smoking cessation program or a medical or scientific research or therapy program, if smoking is an integral part of the program.

153.4(9) Farm tractors, farm trucks, and implements of husbandry when being used for their intended purposes.

153.4(10) Only the gaming floor of premises licensed pursuant to Iowa Code chapter 99F exclusive of any bar or restaurant located within the gaming floor which is an enclosed area and subject to the prohibitions of 2008 Iowa Acts, House File 2212, section 3.

153.4(11) The Iowa veterans home.

641—153.5(82GA, HF2212) Duties of employers, owners, operators, managers, and persons having custody or control of a public place, place of employment, area declared nonsmoking pursuant to 2008 Iowa Acts, House File 2212, section 5, or outdoor areas where smoking is prohibited.

153.5(1) The employer, owner, operator, manager, or person having custody or control of a place where smoking is prohibited under 2008 Iowa Acts, House File 2212, shall:

a. Not permit smoking in a public place, place of employment, outdoor area where smoking is prohibited, or an area declared nonsmoking pursuant to 2008 Iowa Acts, House File 2212, section 5.

b. Inform all current employees and all prospective employees upon application for employment of the prohibitions of 2008 Iowa Acts, House File 2212.

c. Not retaliate against any employee, applicant for employment, or customer that exercises any rights under 2008 Iowa Acts, House File 2212, registers a complaint, or attempts to prosecute a violation of 2008 Iowa Acts, House File 2212.

d. Post signs in and at every entrance to the public place, place of employment, area declared nonsmoking, and outdoor area where smoking is prohibited that clearly and conspicuously inform persons that they are entering a no smoking facility or area.

(1) The signs shall be clear and conspicuous in or at the entrance where posted.

(2) The signs shall be at least 24 square inches in size (for example, 4 inches by 6 inches) and shall be in legible font type.

(3) The signs shall contain the words “No Smoking” or the international “no smoking” symbol; the telephone number for reporting complaints, 1-888-944-2247; and the department of public health Web site, www.IowaSmokefreeAir.gov.

e. Place no smoking signs in every vehicle that constitutes a public place, place of employment, or area declared nonsmoking pursuant to 2008 Iowa Acts, House File 2212, section 5.

(1) Such signs shall be clear and conspicuous from the exterior of the vehicle.

(2) The signs shall be at least 9 square inches (for example, 3 inches by 3 inches) and shall be in legible font type.

(3) The signs shall contain the words “No Smoking” or the international “no smoking” symbol; the telephone number for reporting complaints, 1-888-944-2247; and the department of public health Web site, www.IowaSmokefreeAir.gov.

(4) Nothing in this rule requires the placement of a sign in any vehicle that the director of the department of administrative services or the director of transportation orders to receive a regular registration plate pursuant to Iowa Code section 321.19.

f. Remove all ashtrays from areas where smoking is prohibited.

153.5(2) The owner or operator of a building or facility that contains more than one public place, place of employment, or area declared nonsmoking pursuant to 2008 Iowa Acts, House File 2212, section 5, which is controlled by other employers, owners, or operators shall comply with the provisions of subrule 153.5(1) for the area of the building or facility under the owner’s or operator’s control.

153.5(3) An employer, owner, or operator of a public place, place of employment or area declared nonsmoking pursuant to 2008 Iowa Acts, House File 2212, section 5, that is within a public place that is owned or operated by another person shall comply with the provisions of subrule 153.5(1) for the area under the control of the employer, owner, or operator within that public place.

153.5(4) An employer, owner, operator, manager, or person having custody or control of a place where smoking is prohibited under 2008 Iowa Acts, House File 2212, shall inform any individual smoking in a place where smoking is prohibited that the individual is violating the smokefree air Act and shall request that the individual stop smoking immediately.

a. If the individual refuses to stop smoking, the employer, owner, operator, manager, or person having custody or control of the place where smoking is prohibited may discontinue service to that individual.

b. If the individual refuses to stop smoking, the employer, owner, operator, manager, or person having custody or control of the place where smoking is prohibited may request that the individual leave the area where smoking is prohibited.

c. If the individual refuses to leave the area where smoking is prohibited, the employer, owner, operator, manager, or person having custody or control of the place where smoking is prohibited may notify the state or local law enforcement agency with jurisdiction over the area where smoking is prohibited.

641—153.6(82GA, HF2212) Duties of other state agencies and political subdivisions. A state agency or political subdivision which inspects public places shall assess compliance with the requirements of these rules and 2008 Iowa Acts, House File 2212, during any inspection process and shall report any violations of 2008 Iowa Acts, House File 2212, to the department.

641—153.7(82GA, HF2212) Leases. Any lease entered into by the state or its political subdivisions on or after July 1, 2008, shall require that all areas where smoking is prohibited in 2008 Iowa Acts, House File 2212, section 3, comply with the provisions of 2008 Iowa Acts, House File 2212.

641—153.8(82GA, HF2212) Complaints and enforcement.

153.8(1) Duties of department. The department shall maintain a system for receiving and investigating complaints against persons who own, operate, manage, or otherwise have custody or control of a place where smoking is prohibited and who fail to comply with the provisions of 2008 Iowa Acts, House File 2212.

a. Pursuant to 2008 Iowa Acts, House File 2212, section 9, subsection 7, the department may designate one or more public agencies through a 28E agreement or other written contract to assist with the enforcement of 2008 Iowa Acts, House File 2212.

b. The department may refer complaints regarding a violation of 2008 Iowa Acts, House File 2212, to the law enforcement authorities of the state or of the political subdivision of the state in which the alleged violation occurred.

153.8(2) Enforcement against a person who smokes in an area where smoking is prohibited. Pursuant to 2008 Iowa Acts, House File 2212, section 9, subsection 7, the department designates the law enforcement authorities of the state and of each political subdivision of the state to assist with the enforcement of 2008 Iowa Acts, House File 2212. A peace officer may issue a citation in lieu of arrest pursuant to Iowa Code chapter 805 against a person who smokes in an area where smoking is prohibited pursuant to 2008 Iowa Acts, House File 2212, and such person shall pay a civil penalty pursuant to Iowa Code section 805.8C(3)“a” for each violation.

153.8(3) Enforcement against a person who owns, operates, manages, or otherwise has control of a place where smoking is prohibited. Pursuant to 2008 Iowa Acts, House File 2212, section 9, subsection 7, the department designates the law enforcement authorities of the state and of each political subdivision of the state to assist with the enforcement of 2008 Iowa Acts, House File 2212. The department or its designee may initiate a civil action against an owner, operator, manager, or person who otherwise has custody or control of a place where smoking is prohibited pursuant to 2008 Iowa Acts, House File 2212, and such person shall pay the applicable civil penalty pursuant to 2008 Iowa Acts, House File 2212, section 9.

153.8(4) Manner of filing a complaint. Any person may register a complaint with the department by calling the toll-free number, 1-888-944-2247, or registering a complaint on the department’s Web site, www.IowaSmokefreeAir.gov, or downloading a complaint form from the department’s Web site and mailing the complaint form to the department at Department of Public Health, Division of Tobacco Use Prevention and Control, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319.

153.8(5) Contents of the complaint. A complaint filed with the department shall include:

a. The name or location of the public place, place of employment, area declared a nonsmoking place pursuant to 2008 Iowa Acts, House File 2212, section 5, or outdoor area where smoking is prohibited which is the subject of the complaint;

b. A description of the occurrence that prompted the complaint; and

c. Any other information relevant to the occurrence.

153.8(6) Review of complaint by department. Upon receipt of a complaint, the department or its designee may contact the individual making the complaint to confirm the details of the complaint and obtain any additional information.

153.8(7) Information from inspections. Information received by the department pursuant to rule 641—153.6(82GA, HF2212) of one or more violations of 2008 Iowa Acts, House File 2212, as a result of an inspection of a public place by the state or political subdivision of the state shall be considered a credible complaint under this rule.

153.8(8) Notice of potential violation. If the department determines that a complaint against a public place, place of employment, area declared nonsmoking pursuant to 2008 Iowa Acts, House File 2212, section 5, or outdoor areas where smoking is prohibited is credible, the department shall:

a. For the first complaint.

(1) Issue a written notice of potential violation to the owner, operator or person having custody or control including the details of the complaint.

(2) The notice shall include educational materials about how to comply with 2008 Iowa Acts, House File 2212, and information on whom to contact for further information and assistance for compliance.

b. For the second complaint in one year.

(1) Issue a second notice of potential violation to the owner, operator, or person having custody or control.

(2) In addition, the department may authorize one or more public agencies to conduct a compliance check of the location.

(3) In addition, the department may pursue the civil penalties provided for in 2008 Iowa Acts, House File 2212, section 9, subsection 2; may refer the complaint to the appropriate authority for enforcement of the civil penalties provided for in 2008 Iowa Acts, House File 2212, section 9, subsection 2; or may pursue any other remedy authorized by 2008 Iowa Acts, House File 2212.

c. For the third and subsequent complaints of a potential violation within one year.

(1) Issue a subsequent notice of potential violation to the owner, operator, or person having custody or control.

(2) In addition, the department may authorize one or more public agencies to conduct a compliance check of the location.

(3) In addition, the department may pursue the civil penalties provided for in 2008 Iowa Acts, House File 2212, section 9, subsection 2; may refer the complaint to the appropriate authority for enforcement of the civil penalties provided for in 2008 Iowa Acts, House File 2212, section 9, subsection 2; or may pursue any other remedy authorized by 2008 Iowa Acts, House File 2212.

641—153.9(82GA, HF2212) Limitation of rules. Nothing in these rules is intended to limit any other state administrative rule or federal regulation that prohibits smoking.

These rules are intended to implement 2008 Iowa Acts, House File 2212.

CHAPTER 155
LICENSURE STANDARDS FOR SUBSTANCE ABUSE TREATMENT PROGRAMS

[Prior to 7/27/88, see Substance Abuse, Iowa Department of[805] Ch 3]

[Prior to 3/29/06, see 643—Ch 3]

641—155.1(125) Definitions. Unless otherwise indicated, the following definitions shall apply to the specific terms used in these rules:

“*Accreditation body*” means a national or not-for-profit body or organization recognized by the board as meeting the criteria of the board for deemed status.

“*Acute intoxication or withdrawal potential*” is a category to be considered in the ASAM-PPC-2R client/patient placement, continuing service and discharge criteria. This category evaluates client/patient’s current status of intoxication and potential for withdrawal complications as it impacts on level of care decision making. Historical information about client/patient’s withdrawal patterns may also be considered.

“*Administration*” means the direct application of a prescription drug, whether by injection, inhalation, ingestion, or any other means, to the body of a client/patient or research subject by one of the following:

1. A practitioner or the practitioner’s authorized agent.
2. The client/patient or research subject at the direction of a practitioner.

“*Admission*” means the point in an individual’s relationship with the program at which the screening process has been completed and the individual is entitled to receive treatment services.

“*Admission criteria*” means specific ASAM-PPC-2R criteria to be considered in determining appropriate client/patient placement and resultant referral to a level of care. Criteria vary in intensity and are organized into six categories: acute intoxication or withdrawal potential, biomedical conditions or complications, emotional/behavioral conditions or complications, treatment resistance/acceptance, relapse potential, and recovery environment.

“*Affiliation agreement*” means a written agreement between the governing authority of the program and another organization under the terms of which specified services, space or personnel are provided to one organization by the other, but without exchange of moneys.

“*Applicant*” means any substance abuse treatment program which has applied for a license or renewal thereof.

“*Application*” means the process through which a substance abuse treatment program applies for a license or renewal as outlined in the application procedures.

“*ASAM-PPC-2R*” means the American Society of Addiction Medicine Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition, Revised.

“*Assessment*” means the ongoing process of identifying a diagnosis, ruling out other diagnoses, and determining the level of care needed by the client/patient.

“*Biomedical conditions and complications*” means one category to be considered in the ASAM-PPC-2R client/patient placement, continuing service and discharge criteria. This category evaluates client/patient’s current physical condition as it impacts on level of care decision making. Historical information on client/patient’s medical/physical functioning may also be considered. This includes biological and physical aspects of the medical assessment and treatment of a patient. In addiction treatment, the physical problems may be the direct result of the substance use disorder, or be independent of and interactive with them, thus affecting the total treatment plan and prognosis.

“*Board*” means the state board of health created pursuant to Iowa Code chapter 136.

“*Case management*” means the process of using predefined criteria to evaluate the necessity and appropriateness of client/patient care.

“*Chemical dependency*” means alcohol or drug dependence or psychoactive substance use disorder as defined by the current Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM IV), criteria or by other standardized and widely accepted criteria.

“*Chemical dependency rehabilitation services*” means those individual or group services that are directly related to chemical dependency or the individual treatment plan. These services include

individual, group and family counseling, educational services, self-help groups and structured recreational activities. They do not include active employment or education courses beyond the secondary level.

“Chemical substance” means alcohol, wine, spirits and beer as defined in Iowa Code chapter 123 and controlled substances as defined in Iowa Code section 124.101.

“Client/patient” means an individual who has a substance abuse problem or is chemically dependent, has been assessed as appropriate for services, and for whom screening procedures have been completed.

“Clinically managed high-intensity residential services (Level III.5)” means high-intensity residential services designed to address significant problems with living skills. The prime example of Level III.5 care is the therapeutic community, which provides a highly structured recovery environment in combination with moderate- to high-intensity professional clinical services to support and promote recovery. Client/patients must participate in at least 50 hours of structured chemical dependency rehabilitation services per week.

“Clinically managed low-intensity residential services (halfway house) (Level III.1)” means low-intensity professional addiction treatment services offered at least five hours per week. Treatment is directed toward applying recovery skills, preventing relapse, promoting personal responsibility and reintegrating the resident into the worlds of work, education and family life. The services may include individual, group and family therapy. Mutual/self-help meetings are available on site.

“Clinically managed medium-intensity residential services (Level III.3)” are frequently referred to as extended or long-term care. Level III.3 programs provide a structured recovery environment in combination with medium-intensity professional clinical services to support and promote recovery. Client/patients must participate in at least 30 hours of structured chemical dependency rehabilitation services per week.

“Clinically managed services” means clinically managed services in which treatment is directed by addiction specialists rather than by medical professionals. They serve residents whose problems in the area of emotional/behavioral concerns, treatment acceptance, relapse potential, or recovery environment are the primary focus of treatment and problems in the areas of intoxication/withdrawal (Dimension 1) and biomedical concerns (Dimension 2), if any, are minimal.

“Clinical oversight” means oversight provided by an individual who, by virtue of education, training and experience, is capable of assessing the psychosocial history of a substance abuser to determine the treatment plan most appropriate for the client/patient. The person providing oversight shall be designated by the applicant.

“Concerned family member or concerned person” means an individual who is seeking treatment services due to problems arising from the person’s involvement or association with a substance abuser or chemically dependent individual or client/patient, and is negatively affected by the behavior of the substance abuser, chemically dependent individual, or client/patient.

“Continuing care” means Level I service of the ASAM-PPC-2R client/patient placement criteria, which provides a specific period of structured therapeutic involvement designed to enhance, facilitate and promote transition from primary care to ongoing recovery. Continuing service reviews will not be required or applicable to Level I continuing care/aftercare client/patients. Also, there shall not be any required frequency of review for continuing service or frequency of review of treatment plan by client/patient and counselor.

“Continuing service and discharge criteria” means, in accordance with ASAM-PPC-2R, during the process of client/patient assessment, certain problems and priorities are identified as justifying admission to a particular level of care and the resolution of those problems and priorities determines when a client/patient can be treated at a different level of care or discharged from treatment. New problems may require services that can be provided effectively at the same level of care or may require a more intensive or less intensive level of care.

“Continuum of care” means a structure of interlinked treatment modalities and services designed so that an individual’s changing needs will be met as that individual moves through the treatment and recovery process.

“*Contract*” means a formal legal document adopted by the governing authority of the program and any other organization, agency, or individual that specifies services, personnel or space to be provided to the program as well as the moneys to be expended in the exchange.

“*Counselor*” means an individual who, by virtue of education, training or experience, provides treatment, which includes advice, opinion, or instruction to an individual or in a group setting to allow an opportunity for a person to explore the person’s problems related directly or indirectly to substance abuse or dependence.

“*Culturally and environmentally specific*” means integrating into the assessment and treatment process the ideas, customs, beliefs, and skills of a given population, as well as an acceptance, awareness, and celebration of diversity regarding conditions, circumstances and influences surrounding and affecting the development of an individual or group.

“*Deemed status*” means that the board and division will accept a board-approved, outside accreditation body’s review, assessment and accreditation of a program, component or service of a program/organization’s operations and services. Programs which received deemed status approval are exempt from routine licensure requirements; however, such programs are subject to all other provisions of this chapter.

“*Department*” means the Iowa department of public health.

“*Designee*” means the staff person or counselor who is delegated tasks, duties and responsibilities normally performed by the treatment supervisor, treatment director or executive director.

“*Detoxification*” means the process of withdrawing a person from a specific psychoactive substance in a safe and effective manner. ASAM-PPC-2R detoxification levels of care include Levels I-D, II-D, III.2-D, III.7-D, and IV-D.

“*Director*” means the director of the Iowa department of public health.

“*Discharge planning*” means the process, begun at admission, of determining a client/patient’s continued need for treatment services and of developing a plan to address ongoing client/patient posttreatment needs. Discharge planning may or may not include a document identified as a discharge plan.

“*Division*” means the division of behavioral health and professional licensure.

“*Emergency admission*” means an admission due to an emergency situation with placement screening criteria being applied as soon after admission as possible.

“*Emotional, behavioral or cognitive conditions and complications*” is a category to be considered in the ASAM-PPC-2R client/patient placement and continuing service criteria. This category evaluates client/patient’s current emotional, behavioral, and cognitive status as it impacts on level of care decision making. Emotional, behavioral or cognitive status may include, but is not limited to, psychiatric conditions, psychological or emotional/behavioral complications, poor impulse control, changes in mental status, or transient neuropsychiatric complications and the behavior that accompanies or follows these emotional states. Historical information on client/patient emotional/behavioral functioning may also be considered.

“*Evaluation*” means the process to evaluate the client/patient’s strengths, weaknesses, problems, and needs for the purpose of defining a course of treatment. This includes use of the standardized placement screening and any additional client/patient profile information and development of a comprehensive treatment plan.

“*Extended outpatient treatment*” means Level I of the ASAM-PPC-2R client/patient placement criteria, which is an organized, nonresidential service. Services usually are provided in regularly scheduled sessions which do not exceed nine treatment hours a week.

“*Facility*” means a hospital, detoxification center, institution or program licensed under Iowa Code section 125.13 providing care, maintenance and treatment for substance abusers. Facility also includes the physical areas such as grounds, buildings, or portions thereof under direct administrative control of the program.

“*Focused reviews*” means a survey conducted during the licensing process to assess the degree to which a program has improved its level of compliance relating to specific recommendations. The

subject matter of the review is typically in area(s) of identified deficiency in compliance; however, other performance areas may also be assessed by a surveyor(s), including areas not covered in deemed status.

“Follow-up” means the process for determining the status of an individual who has been referred to an outside resource for services or who has been discharged from services.

“Governing body” means the individual(s), group, or agency that has ultimate authority and responsibility for the overall operation of the facility.

“Intake” means gathering additional assessment information at the time of admission to services.

“Intensive outpatient treatment (Level II.1)” means intensive outpatient programs (IOP) that provide a minimum of nine hours or a minimum of six hours for adolescents of structured programming per week, consisting primarily of counseling and education focused on alcohol and other drug problems. IOP differs from partial hospitalization (Level II.5) in the intensity of clinical services that are directly available. Specifically, an IOP has less capacity to effectively treat individuals who have substantial medical and psychiatric problems.

“Iowa board of substance abuse certification” means the professional certification board that certifies substance abuse counselors and prevention specialists in the state of Iowa.

“Levels of care” is a general term that encompasses the different options for treatment that vary according to the intensity of the services offered. Each treatment option in the ASAM-PPC-2R is a level of care.

“Licensee” means any program licensed by the department.

“Licensure” means the issuance of a license by the department and the board which validates the licensee’s compliance with substance abuse program standards and authorizes the licensee to operate a substance abuse treatment program in the state of Iowa.

“Licensure weighting report” means the report that is used to determine the type of license a program qualifies for based on point values assigned to areas reviewed and total number of points attained. In addition, a minimum percent value in each of three categories shall be attained to qualify a program for a license as follows: 95 percent or better rating in clinical, administrative and programming for a three-year license; 90 percent or better rating in clinical, administrative and programming for a two-year license; or less than 90 percent but no less than 70 percent rating in clinical, administrative and programming for a one-year license. The determination of length of license for programs licensed through deemed status shall be made by the accreditation body.

“Maintenance” means the prolonged scheduled administration of methadone or other approved controlled substances intended as a substitute or antagonist to abused substances in accordance with federal and state regulations.

“Management of care” means the process to ensure the appropriate level of care is utilized by implementing ASAM-PPC-2R during the placement screening, continuing service and discharge process. This includes discharge planning that begins at admission to meet the immediate, ongoing and posttreatment needs of the client/patient.

“May” means a term used in the interpretation of a standard to reflect an acceptable method that is recognized but not necessarily preferred.

“Medically managed intensive inpatient treatment (Level IV)” is an organized ASAM-PPC-2R service staffed by designated addiction physicians or addiction credentialed clinicians. Level IV care involves a planned regimen of 24-hour medically directed evaluation, care and treatment of substance-related disorders in an acute-care inpatient setting. Such a service functions under a defined set of policies and procedures and has permanent facilities that include inpatient beds. Services involve daily medical care in which diagnostic and treatment services are directly provided by a licensed physician.

“Medically monitored intensive inpatient treatment (Level III.7)” is an organized ASAM-PPC-2R service delivered by an interdisciplinary staff to client/patients whose subacute biomedical and emotional/behavioral problems are sufficiently severe to require inpatient care. Twenty-four-hour observation, monitoring and treatment are available. However, the full resources of an acute care general hospital or a medically managed inpatient treatment service system are not necessary. Services are provided by an interdisciplinary staff of nurses, counselors, social workers, addiction specialists

and other health care professionals and technical personnel, under the direction of licensed physicians. Medical monitoring is provided through an appropriate mix of direct patient contact, review of records, team meetings, 24-hour coverage by a physician, and quality assurance programs.

“Outreach” means public speaking engagements and other similar activities and functions that inform the public of available programs and services offered by a substance abuse treatment program. In addition, outreach is a process or series of activities that identifies individuals in need of services, engages them and links the individual in need of services with the most appropriate resource or service provider. Such activities may include, but are not limited to, the following: individual client/patient recruitment through street outreach and organized informational sessions at churches, community centers, recreational facilities, and community service agencies.

“Partial hospitalization (day treatment) (Level II.5)” means a program which provides 20 or more hours of clinically intensive programming per week based on individual treatment plans. Programs have ready access to psychiatric, medical and laboratory services and thus are better able than Level II.1 programs to meet client/patient needs. Partial hospitalization/day treatment is a generic term encompassing day, night, evening and weekend treatment programs that employ an integrated, comprehensive and complementary schedule of recognized treatments.

“Physician” means any individual licensed under Iowa Code chapter 148, 150, or 150A.

“Prevention” means a proactive process to eliminate unnecessary disease, disability, and premature death caused by (1) acute disease, (2) chronic disease, (3) intentional or unintentional injury or disease associated with environmental, home and workplace hazards, and (4) controllable risk factors such as poor nutrition; lack of exercise; alcohol, tobacco, and other drug use; inadequate use of preventive health services; and other risk behaviors.

“Primary care modality” means a substance abuse treatment component or modality including continuing care, halfway house, extended outpatient treatment, intensive outpatient treatment, primary extended residential treatment, medically monitored intensive inpatient treatment, and medically managed intensive inpatient treatment services.

“Prime programming time” means any period of the day when special attention or supervision is necessary, for example, upon awakening in the morning until departure for school, during meals, after school, transition between activities, evenings and bedtime, or weekends and holidays, in order to maintain continuity of program and care. Prime programming time shall be defined by the facility.

“Program” means any partnership, corporation, association, governmental subdivision or public or private organization.

“Protected classes” means classes of people who have required special legislation to ensure equality.

“Quality improvement” means the process of objectively and systematically monitoring and evaluating the quality and appropriateness of client/patient care to improve client/patient care and resolve identified problems.

“Readiness to change” is a category to be considered in the ASAM-PPC-2R client/patient placement criteria. This category evaluates the client/patient’s current emotional and cognitive awareness of the need to change and the client/patient’s level of commitment to change. It includes the client/patient’s awareness of the relationship of alcohol or other drug use to negative consequences.

“Recovery/living environment” is a category to be considered in the ASAM-PPC-2R client/patient placement criteria. This category evaluates client/patient’s current recovery/living environment as it impacts on level of care decision making. Recovery/living environment may include, but is not limited to, current relationships and degree of support for recovery, current housing, employment situation, and availability of alternatives. Historical information on client/patient’s recovery/living environment may also be considered.

“Rehabilitation” means the restoration of a client/patient to the fullest physical, mental, social, vocational, and economic usefulness of which the client/patient is capable. Rehabilitation may include, but is not limited to, medical treatment, psychological therapy, occupational training, job counseling, social and domestic rehabilitation and education.

“*Relapse*” means progressive irresponsible, inappropriate and dysfunctional behavior patterns that could lead to resumption of alcohol or drug use. “Relapse” also refers to the resumption of alcohol or drug use.

“*Relapse, continued-use or continued-problem potential*” is a category to be considered in the ASAM-PPC-2R client/patient placement and continuing service criteria. This category evaluates client/patient’s current factors that contribute to relapse potential as it impacts on level of care decision making. Relapse potential may include, but is not limited to, current statements by client/patient about relapse potential, reports from others on potential for client/patient relapse, and assessment by clinical staff. Historical information on client/patient’s relapse potential may also be considered. This may include the client/patient’s understanding of skills in coping with addictive or mental disorders, recognition of relapse triggers, skills to control impulses and ways to cope with cravings to use.

“*Residential program*” means a 24-hour live-in, seven-day-a-week substance abuse treatment program facility offering intensive rehabilitation services to individuals who are considered unable to live or work in the community due to social, emotional, or physical disabilities resulting from substance abuse. The ASAM-PPC-2R levels of care may include III.1, III.3, III.5 or III.7.

“*Rule*” means each statement of general applicability that implements, interprets, or prescribes division law or policy, or that describes the organization procedure or practice requirements of the division. The term includes the amendment or repeal of existing rules as specified in the Iowa Code.

“*Screening*” means the process by which a client/patient is determined appropriate and eligible for admission to a particular program or level of care. The focus is on the minimum criteria necessary for appropriateness/eligibility.

“*Self-administration of medication*” means the process where a properly trained staff member observes a client/patient inject, inhale, ingest, or by any other means take, medication which has been prescribed by a licensed physician.

“*Shall*” means the term used to indicate a mandatory statement, the only acceptable method under the present standards.

“*Should*” means the term used in the interpretation of a standard to reflect the commonly accepted method, yet allowing for the use of effective alternatives.

“*Sole practitioner*” means an individual incorporated under the laws of the state of Iowa, or an individual in private practice who is providing substance abuse treatment services independent from a program that is required to be licensed in accordance with Iowa Code section 125.13(1).

“*Staff*” means any individual who provides services to the program on a regular basis as a paid employee, agent, consultant, or as a volunteer.

“*Standards*” means specifications representing the minimal characteristics of a substance abuse treatment program which are acceptable for the issuance of a license.

“*Substance abuser*” means a person who habitually lacks self-control as to the use of chemical substances or uses chemical substances to the extent that the person’s health is substantially impaired or endangered or that the person’s social or economic function is substantially disrupted.

“*Time frames*” means the period of time within which the assessment and treatment plan must be completed after admission, frequency of review of the treatment plan by the client/patient and counselor, and frequency of reviews for continuing service and discharge. The time frames for Levels I and III.1 shall be every 30 days; for Levels II.1, II.5, III.3 and III.5, every 7 days; and for Levels III.7 and IV, daily. For Level I continuing care/aftercare, there shall not be any required frequency of review for continuing service or frequency of review of treatment plan by client/patient and counselor.

“*Treatment*” means the broad range of planned and continuing, inpatient, outpatient, residential care services, including diagnostic evaluation, counseling, medical, psychiatric, psychological, and social service care, which may be extended to substance abusers, concerned persons, concerned family members, or significant others, and which is geared toward influencing the behavior of such individuals to achieve a state of rehabilitation.

“*Treatment days*” means days in which the treatment program is open for services or actual working days.

“Treatment planning” means the process by which a counselor and client/patient identify and rank problems, establish agreed-upon goals, and decide on the treatment process and resources to be utilized.

“Treatment supervisor” means an individual who, by virtue of education, training or experience, is capable of assessing the psychosocial history of a substance abuser to determine the treatment plan most appropriate for the client/patient. This person shall be designated by the applicant.

641—155.2(125) Licensing. A single license will be issued to each qualifying substance abuse treatment program. The license will delineate one or more categories of services the program is authorized to provide. Although a program may have more than one facility, only one license will be issued to the program.

The categories of services for which licenses will be issued are:

1. Narcotic detoxification/chemical substitute, antagonist maintenance chemotherapy;
2. Assessment and evaluation;
3. OWI correctional residential;
4. OWI correctional outpatient;
5. Correctional residential treatment;
6. Correctional outpatient treatment;
7. Medically managed intensive inpatient services: Level IV;
8. Residential/inpatient services: Levels III.1, III.3, III.5 and III.7;
9. Intensive outpatient/partial hospitalization services: Levels II.1 and II.5; and
10. Outpatient extended and continuing care services: Level I.

641—155.3(125) Type of licenses.

155.3(1) Issuance of licenses.

a. Licenses may be issued for up to three years. A license may be renewed for one, two, or three years. An initial license may be issued for 270 days. A license issued for 270 days shall not be renewed or extended.

b. Licenses shall expire one or two calendar years from the date of issue, and a renewal of the license shall be issued only on application.

c. The renewal of a one-year or two-year license shall be contingent upon demonstration of continued compliance with licensure standards and in accordance with the licensure weighting report criteria.

d. The renewal of a three-year license shall be contingent upon demonstration of substantial continued compliance with licensure standards and in accordance with the licensure weighting report criteria or continuation in deemed status.

e. Failure to apply for renewal of the license within 30 days after the expiration date shall result in immediate termination of license and require reapplication.

155.3(2) Corrective action. Following the issuance of a license, the treatment program may be requested by the board to provide a written plan of corrective action and to bring into compliance all areas found in noncompliance during the on-site visit. The corrective action plan shall be placed in the program’s permanent file with the division and used as reference during future on-site inspections.

641—155.4(125) Nonassignability. A license issued by the department for the operation of a substance abuse program applies both to the applicant program and the premises upon which the program is to be operated. Licenses are not transferable. A discontinued program is one which has terminated its services for which it has been licensed. When a program is discontinued, its current license is void immediately and shall be returned to the department. Any person or other legal entity acquiring a licensed facility for the purpose of operating a substance abuse program shall make an application as provided for a new license. Similarly, any person or legal entity having acquired a license and desiring to fundamentally alter the treatment philosophy or transfer to different premises must notify the board 30 days prior to said action in order for the department to review the site change and to determine appropriate action.

A licensee shall, if possible, notify the department of impending closure of the licensed program at least 30 days prior to such closure. The licensee shall be responsible for the removal and placement of patients or clients and for the preservation of all records. Upon closing all facilities and terminating all service delivery activities, the licensee shall immediately return the license to the department.

641—155.5(125) Application procedures. The department shall provide an application to all applicants for licensure. An on-site visit for licensure of an initial applicant shall occur before the program opens and admits client/patients for services. For initial applicants, if technical assistance has been provided, the on-site visit may be waived at the discretion of the department. The division shall prepare a report with a recommendation for licensure to be presented at a board meeting within 60 days from the site visit. Public notice for board meetings will be made in accordance with Iowa Code section 21.4. The division shall provide notice to the program ten days prior to the board meeting notifying the program director and board chairperson of the time, place, and date the board will review and act upon the application for the program along with the results of the inspection. The division shall provide to all board members reports of the on-site program licensure inspection and a final recommendation for each application to be acted upon at the next board meeting.

155.5(1) Application information for comprehensive programs. An applicant for licensure shall submit the following information on forms available at the Iowa Department of Public Health, Division of Behavioral Health and Professional Licensure, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319.

- a. The name and address of the applicant substance abuse treatment program.
- b. The name and address of the executive director of such substance abuse treatment program.
- c. The names, titles, dates of employment, education, and years of current job-related experience of staff and a copy of the table of organization. Where multiple components and facilities exist, the relationship between components and facilities must be shown, as well as a description of the screening and training process for volunteer workers.
- d. The names and addresses of members of the governing body, sponsors, or advisory boards of such substance abuse treatment program and current articles of incorporation and bylaws.
- e. The names and addresses of all physicians, other professionally trained personnel, medical facilities, and other individuals or organizations with whom the substance abuse treatment program has a direct contractual or affiliation agreement.
- f. A description of the treatment services provided by the substance abuse treatment program and a description of weekly activities for each treatment modality or component.
- g. Copies of reports substantiating compliance with federal, state and local rules and laws for each facility, to include appropriate Iowa department of inspections and appeals rules, state fire marshal's rules and fire ordinances, appropriate local health, fire, occupancy code, and safety regulations.
- h. Information required under Iowa Code section 125.14A.
- i. Fiscal management information to include a recent audit or opinion of auditor and board minutes to reflect approval of budget and insurance program.
- j. Insurance coverage related to professional and general liability; building; workers' compensation; and fidelity bond.
- k. The address and facility code of each office, facility, or program location.
- l. The program's current written policies and procedures manual to include the staff development and training program, and personnel policies. Applications for licensure will not be considered complete until a complete policies and procedures manual has been submitted to the division.
- m. The application information for an initial application for licensure shall be complete and shall be reviewed by the department prior to a scheduled on-site inspection.

155.5(2) Application information for assessment and evaluation programs. An applicant for licensure shall submit the following information on forms available at the Iowa Department of Public Health, Division of Behavioral Health and Professional Licensure, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319.

- a. The name and address of the applicant substance abuse assessment and evaluation program.

b. The name and address of the executive director or sole practitioner of such substance abuse program.

c. The names, titles, dates of employment, education, and years of current job-related experience of staff and a copy of the table of organization (if applicable). If multiple components and facilities exist, the relationship between components and facilities must be shown, as well as a description of services.

d. The names and addresses of members of the governing body, sponsors, or advisory boards of such substance abuse assessment and evaluation program and current articles of incorporation and bylaws. (This requirement does not apply to a sole practitioner.)

e. The name(s) and address(es) of person(s) entered into the affiliation agreement for clinical oversight.

f. A description of the assessment and evaluation services.

g. Copies of reports substantiating compliance with federal, state and local rules and laws for each facility, to include appropriate state fire marshal's rules and fire ordinances, occupancy code, and safety regulations.

h. Information required under Iowa Code section 125.14A.

i. Insurance coverage related to professional and general liability; building; workers' compensation; and fidelity bond.

j. The address and facility code of each office, facility, or program location.

k. The program's current written policies and procedures manual which shall include the staff development and training program, and personnel policies. Applications for licensure will not be considered complete until a complete policies and procedures manual has been submitted to the division.

The application information for an initial application for licensure shall be complete and shall be reviewed by the department prior to a scheduled on-site inspection.

155.5(3) *Renewal.* An application for renewal shall be submitted on forms provided by the department at least 60 calendar days before expiration of the current license.

Applications for licensure renewal will not be considered complete until a current policies and procedures manual has been submitted to the department by the applicant substance abuse treatment program.

155.5(4) *Application update or revision.* The department shall be notified, and a request of an application for licensure for update or revision shall be made, by an existing licensed program 30 days prior to any change(s) of address of offices, facilities, or program locations; or additions or deletions of the type(s) of services or programs provided and licensed. A new licensure application form shall be completed to reflect change of address of offices, facilities, or program locations, or additions or deletions of the type(s) of services or program(s) provided or licensed, and returned to the division within 10 working days from the date the forms are received. After receipt of an updated or revised application for licensure, the division shall conduct an on-site visit within 60 days to verify information contained in the application. When applicable, as determined by the department, an on-site licensure inspection of a new component, service, program or facility may be conducted by the department within six months, upon receipt of the updated or revised application or during an existing licensed program's scheduled relicensure on-site inspection, whichever occurs first.

641—155.6(125) *Application review.* An applicant for licensure shall submit a completed application to the department within 30 days from the date the forms are received. The department shall review the application for completion and request any additional material as needed.

Applicants failing to return the forms shall be notified by registered mail that all programs must be licensed.

641—155.7(125) *Inspection of licensees.* The department shall inspect the facilities and review the policies and procedures utilized by each program. The examination and review may include case record audits and interviews with staff and clients, consistent with the confidentiality safeguards of state and federal laws.

155.7(1) *Technical assistance.* All treatment programs applying for an initial license to operate a substance abuse treatment program in the state of Iowa will be visited by the department for the purpose of providing needed technical assistance regarding the licensure criteria and procedures. The program may waive technical assistance in order to expedite the licensing process. Requests shall be submitted in writing to the division.

a. Following the issuance of a license, the treatment program may request technical assistance from the department so as to bring into conformity areas reported to be in noncompliance to these rules. Such technical assistance shall be scheduled within 30 days of the applicant's request depending on the availability of staff. The department may also request that technical assistance be provided to the program if deficiencies are noted during a site visit.

b. Reserved.

155.7(2) *On-site visit for licensure.* A licensure on-site inspection shall be scheduled after the department's receipt of the program's application to operate a substance abuse treatment program. The department shall not be required to provide advance notice to the program of the on-site visit for licensure.

a. The on-site visit team will consist of designated members of the division staff, as approved by the director.

b. The team will inspect the program in order to verify information contained in the application and ensure compliance with all laws, rules and regulations.

c. The inspection team shall send a written report, return receipt requested, of their findings to the applicant within 20 working days after the completion of the inspection.

155.7(3) *Effective date of license.* The effective date of a license shall begin on the date the board reviews the program's written report/application and acts to issue a license.

641—155.8(125) Licenses—renewal. Upon approval of an application for licensing by the board, a license shall be issued by the department. Licenses shall be renewed pursuant to rule 641—155.5(125).

155.8(1) *Board hearing preparation.* The division shall prepare a report with a final recommendation for licensing to be presented at a board meeting within 60 days from the site visit. Public notice of board meetings shall be made in accordance with Iowa Code section 21.4.

a. The division shall send notice to the program by certified mail, return receipt requested, ten days prior to the board meeting notifying the program director and board chairperson of the time, place, and date the board will review and act upon the application for the program along with the results of the inspection.

b. The division shall mail to all board members the following information on each application to be processed at the next board meeting:

- (1) Reports of the on-site program licensure inspections; and
- (2) A final recommendation for licensing.

155.8(2) *Board meeting format.*

a. The chairperson or designee shall call the meeting to order at the designated time.

b. The presiding officer will read each application and protocols.

c. Opportunity shall be given all concerned parties to respond, present evidence, and arguments on each application.

d. After all concerned parties are heard, the board will make a decision as to whether the applicant should be finally approved or initially denied a license to operate a substance abuse treatment program.

641—155.9(125) Corrective action plan. Programs approved for a license for 270 days by the board shall submit a corrective action plan to the director no later than 30 days following the board meeting. The corrective action plan shall include, but not be limited to:

1. Specific problem areas.
2. A delineation of corrective measures to be taken by the program.
3. A delineation of target dates for completion of corrective measures for each problem area.

4. A follow-up on-site visit will be required to review the implemented corrective action with a subsequent report to the board.

Programs issued a license for a period of one or two years shall submit a corrective action plan for those standards found to be in noncompliance following a licensure inspection. Technical assistance on a corrective action plan shall not be required for one- or two-year licenses. The corrective action plan shall be submitted within 30 days of receipt of the licensure inspection report.

641—155.10(125) Grounds for denial of initial license.

155.10(1) *Denial of application for licensure.* All programs applying for an initial license shall submit complete application information and shall be inspected by the department prior to the program's opening and offering services. A recommendation by the department of a denial of an initial application for licensure to the board may be made based on the following reasons:

a. The application for licensure is incomplete or does not have the information required by 641—155.5(125).

b. On-site inspection report results based on the licensure weighting report indicate a score below minimum required for a recommendation of a 270-day license.

c. Violation of any of the grounds for discipline pursuant to 641—155.11(125).

155.10(2) *On-site visit for licensure.* The on-site visit for licensure of an initial applicant shall occur prior to the program opening and admitting client/patients. The department shall not be required to provide advance notice to the program of the on-site visit for licensure.

a. The on-site visit team will consist of designated members of the division staff, as approved by the director.

b. The team will inspect the program that has applied for a license in order to verify information contained in the application, ensure compliance with all laws, rules and regulations.

c. The inspection team shall send a written report, return receipt requested, of their findings to the applicant within 20 working days after the completion of the inspection.

d. The application information for an initial application for licensure shall be complete and shall be reviewed by the department prior to a scheduled on-site inspection.

155.10(3) *Board action.* The board shall meet to consider all cases involving issuance of a license. Upon approval of an application for licensure by the board, a license shall be issued by the department.

a. *Board hearing preparation.* The division will prepare all documents with a final recommendation for licensing determination to be presented at a board meeting within 120 days from the site visit. The division shall provide public notice of the date, time, and place of the meeting and the names of applicants to be reviewed and processed.

(1) The division shall provide notice to the program 30 days prior to the board meeting notifying the program director and board chairperson of the time, place, and date the board will review and act upon the application for the program along with the results of the inspection.

(2) The division shall provide to all board members the following information on each application to be processed at the next board meeting: reports of the on-site program licensure inspections, and a final recommendation for licensing.

b. *Board meeting format.*

(1) The chairperson or designee shall call the meeting to order at the designated time.

(2) The presiding officer or designee shall give summary of each application and protocols.

(3) Opportunity shall be given all concerned parties to respond and present evidence and arguments on each application.

(4) After all concerned parties are heard, the board will make a decision as to whether the applicant should be finally approved or initially denied a license to operate a substance abuse treatment program.

641—155.11(125) Suspension, revocation, or refusal to renew a license.

155.11(1) The board may suspend or revoke a license or refuse to renew a license for any of the following reasons:

- a. Failure to adequately complete the application or renewal application process or submission of fraudulent or misleading information in the application or renewal process.
- b. Failure to obtain the minimum score required for a one-, two- or three-year license.
- c. Violation by a program, program employee or agent of any statute or rule pertaining to substance abuse treatment programs, including a violation of any provision of this chapter.
- d. Failure to comply with licensure, inspection, health, fire, occupancy, safety, sanitation, zoning, or building code or regulations required by federal, state, or local law.
- e. Receiving a report from an accreditation body sanctioning, modifying, terminating, or withdrawing the accreditation of the program.
- f. Suspension, revocation, refused renewal, or refused issuance of a federal registration to distribute or dispense methadone or other controlled substances.
- g. Committing or permitting or aiding or abetting the commission of an unlawful act within a facility.
- h. Conviction of a member of the governing body, a director, administrator, chief executive officer, or other managing staff member, of a felony or misdemeanor involving the management or operation of the facility or which is directly related to the operation or integrity of the facility.
- i. Use of untruthful or improbable statements in advertising.
- j. Conduct or practices found by the board to be detrimental to the general health, safety, or welfare of a client/patient or member of the general community.
- k. Violating a client/patient's confidentiality or willful, substantial, or repeated violations of a client/patient's rights.
- l. Defrauding a client/patient, potential client/patient, or third-party payor.
- m. Inappropriate conduct by a program employee, including sexual contact with a client/patient of the program.
- n. Utilization of treatment techniques which endanger the health, safety, or welfare of a client/patient.
- o. Discrimination or retaliation against a client/patient or employee who has submitted a complaint or information to the department.
- p. Failure to allow an employee or agent of the department access to the facility for the purpose of inspection, investigation, or other information collection duties necessary to the performance of the department's duties.
- q. Failure to submit an acceptable written plan of corrective action or failure to comply with a written plan of corrective action issued pursuant to 155.3(2), 641—155.9(125), or 155.16(4) "e."
- r. Violating an order of the board or violating the terms or conditions of a consent agreement or informal settlement between a program and the board.

155.11(2) Initial notice from board. When the board determines to deny a renewal, suspend or revoke a license, the board shall notify the licensee by certified mail, return receipt requested, of the board's intent to suspend, revoke, or refuse to renew the license and the changes that must be made in the licensee's operation to avoid such action. The initial notice shall further provide the licensee the opportunity to submit either a written plan of corrections or written objections to the department within 20 days from the receipt of notice from the board.

155.11(3) Correction of issues or objections.

a. *Written plan of corrections.* If a licensee submits a written plan of corrections, the licensee shall have 60 days from the date of submission within which to show compliance with the plan of corrections. The licensee shall submit any information to the board that the licensee deems pertinent to show compliance with the plan of corrections.

b. *Objections.* If a licensee submits written objections, the licensee shall submit to the board any information that the licensee deems pertinent which supports the licensee's defense.

155.11(4) Decision of board. Following receipt of a written plan of corrections and expiration of the 60-day time period, or following receipt of written objections, or when objections or notice of corrections have not been received within the 20-day time period, the board may meet to determine whether to

proceed with the disciplinary action. The licensee shall receive notice of this meeting in the same manner as provided by 155.8(1)“a.”

155.11(5) Notice of decision and opportunity for contested case hearing.

a. When the board determines to suspend, revoke or not renew a license, the licensee shall be given written notice by restricted certified mail.

b. The licensee may request a hearing on the determination. The request must be in writing, mailed to the department address within 30 days of the notice issued by the board. Failure to request a hearing will result in final action by the board.

155.11(6) Summary suspension. If the board finds that the health, safety or welfare of the public is endangered by continued operation of a substance abuse treatment program, summary suspension of a license may be ordered pending proceedings for revocation or other actions. These proceedings shall be promptly instituted and determined.

641—155.12(125) Contested case hearing. Programs that wish to contest the denial, suspension, revocation or refusal to renew their license shall be afforded an opportunity for a hearing before an administrative law judge from the Department of Inspections and Appeals. The program will be notified in writing, return receipt requested, of the date of the hearing, no less than 30 days before the hearing.

155.12(1) *Failure to appear.* If a party fails to appear in a contested case hearing proceeding after proper service of notice, the administrative law judge shall, in such a case, enter a default judgment against the party failing to appear.

155.12(2) *Conduct of hearing.* Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved and to be represented by counsel at their own expense.

a. The hearing shall be informal and all relevant evidence admissible. Effect will be given to the rules of privilege recognized by law. Objections to evidentiary offers may be made and shall be noted in the record. When the hearing will be expedited and the interests of the parties will not be prejudiced substantially, any part of the evidence may be required to be submitted in verified written form.

b. Documentary evidence may be received in the form of copies or excerpts if the original is not readily available. Upon request, parties shall be given an opportunity to compare the copy with the original, if available.

c. Witnesses present at the hearing shall be subject to cross-examination by any party as necessary for a full and true disclosure of the facts.

d. The record in a contested case shall include:

- (1) All pleadings, motions and intermediate rulings.
- (2) All evidence received or considered and all other submissions.
- (3) A statement of all matters officially noticed.
- (4) All questions and offers of proof, objections and rulings therein.
- (5) All proposed findings and exceptions.
- (6) Any decision, opinion or report by the officer presiding at the hearing.

e. Oral proceedings shall be open to the public and shall be recorded either by mechanized means or by certified shorthand reporters. Oral proceedings or any part thereof shall be transcribed at the request of any party with the expense of the transcription charged to the requesting party. The recording or stenographic notes of oral proceedings or the transcription thereof shall be filed with and maintained by the agency for at least five years from the date of decision.

f. Findings of fact shall be based solely on the evidence in the record and on matters officially noticed in the record.

155.12(3) *Continuance.* For good cause, the administrative law judge may continue hearings beyond the time originally scheduled or recessed. Requests for continuance shall be made to the administrative law judge in writing at least three days prior to the scheduled hearing date. Continuances will not be granted less than three days before the hearing except for exigent circumstances.

155.12(4) *Decision.* Findings of fact shall be based solely on the evidence in the record and upon matters officially noticed in the record.

a. The decision of the administrative law judge shall be the final decision unless there is an appeal to the board within 20 days of the receipt of the decision.

b. A proposed or final decision or order in a contested case hearing shall be in writing. A proposed or final decision shall include findings of fact and conclusions of law, separately stated. Parties will be promptly notified of each proposed or final decision or order by the delivery to them of a copy of such decision or order by certified mail, return receipt requested. In the case of a proposed decision, parties shall be notified of the right to appeal the decision to the board.

155.12(5) *Appeal to the board.*

a. Either party may request the board review the proposed decision. The request shall be in writing and mailed within 20 days of receipt of the proposed decision.

b. The parties shall have an opportunity to submit briefs to the board. The board will review the record and any briefs. No new evidence shall be admitted unless requested and allowed by the board.

c. Oral presentation will be made to the board at a time set by the board.

d. The board shall issue its decision in writing within 30 days after conclusion of the hearing.

641—155.13(125) Rehearing application. Any party may file an application for rehearing, stating the specific grounds therefor and the relief sought, within 20 days after the issuance of any final decision by the board in a contested case. A copy of such application shall be timely mailed by the applicant to all parties of record not joining therein. Such an application for rehearing shall be deemed to have been denied unless the board grants the application within 20 days after its filing.

641—155.14(125) Judicial review. A licensee who is aggrieved or adversely affected by the board's final decision and who has exhausted all adequate administrative remedies may seek judicial review of the board's decision pursuant to and in accordance with Iowa Code section 17A.19.

641—155.15(125) Reissuance or reinstatement. After suspension, revocation or refusal to renew a license, the affected licensee shall not have the license reissued or reinstated within one year of the effective date of the suspension, revocation or expiration upon refusal to renew, unless by order of the board. After that time, proof of compliance with the licensure standards must be presented to the board prior to reinstatement or reissuance of a license.

641—155.16(125) Complaints and investigations.

155.16(1) *Complaints.* Any person may file a complaint with the department against any program licensed pursuant to this chapter. The complaint shall be made in writing and shall be mailed or delivered to the division director at the Division of Behavioral Health and Professional Licensure, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319. The complaint shall include the name and address of the complainant, the name of the program, and a concise statement of the allegations against the program, including the specific alleged violations of Iowa Code chapter 125 or this chapter, if known. A complaint may also be initiated upon the board's own motion pursuant to evidence received by the department. Timely filing of complaints is required in order to ensure the availability of witnesses and to avoid initiation of an investigation under conditions which may have been significantly altered during the period of delay.

155.16(2) *Evaluation and investigation.* Upon receipt of a complaint, the department shall make a preliminary review of the allegations contained in the complaint. Unless the department concludes that the complaint is intended solely to harass a program or lacks a reasonable basis, it shall conduct an on-site investigation of the program which is the subject of the complaint as soon as is practicable. The program which is the subject of the complaint shall be given an opportunity to informally respond to the allegations contained in the complaint either in writing or through a personal interview or conference.

155.16(3) *Investigative report.* Within 30 working days after completion of the investigation, the department shall prepare a written investigative report and shall submit the report to the executive director of the program, the chairperson of the governing body, and the board. This report shall include the nature of the complaint and shall indicate if the complaint allegations were substantiated, unsubstantiated, or

undetermined, the basis for the finding, the specific statutes or rules at issue, a response from the program, if received, and a recommendation for action.

155.16(4) Review of investigations. The board shall review the investigative report at its next regularly scheduled meeting and shall determine appropriate action.

a. Closure. If the board determines that the allegations contained in the complaint are unsubstantiated, the board shall close the case and shall promptly notify the complainant and the program by letter.

b. Referral for further investigation. If the board determines that the case warrants further investigation, it shall refer the case to the department for further investigation.

c. Written plan of corrective action. If the board determines that the allegations contained in the complaint are substantiated and corrective action is warranted, the board may require the program to submit and comply with a written plan of corrective action. A program shall submit a written plan of corrective action to the department within 20 working days after receiving a request for such plan. The written plan of corrective action shall include a plan for correcting violations as required by the board and a time frame within which such plan shall be implemented. The plan is subject to department approval. Requiring a written plan of corrective action is not formal disciplinary action. Failure to submit or comply with a written plan of corrective action may result in formal disciplinary action against the program.

d. Disciplinary action. If the board determines that the allegations contained in the complaint are substantiated and disciplinary action is warranted, the board may proceed with such action in accordance with rule 641—155.11(125).

155.16(5) Confidential information and public information. Information contained in a complaint may be confidential pursuant to Iowa Code section 22.7(2), 22.7(18), or 125.37 or any other provision of state or federal law. Investigative reports, written plans of corrective action, and all notices and orders issued pursuant to rule 641—155.11(125) shall refer to clients and patients by number and shall not include any other client or patient identifying information. Investigative reports, written plans of corrective action, and all notices and orders issued pursuant to rule 641—155.11(125) shall be available to the public as open records pursuant to Iowa Code chapter 22.

641—155.17 Reserved.

641—155.18(125) Deemed status. The board shall grant deemed status to programs accredited either by a recognized national or not-for-profit accreditation body when the board determines that the accreditation is for the same services.

155.18(1) National accreditation bodies. The national accreditation bodies currently recognized as meeting board criteria for possible deemed status are:

- a.* Joint Commission on Accreditation of Healthcare Organizations (JCAHO).
- b.* Council on Accreditation of Rehabilitation Facilities (CARF).
- c.* Council on Accreditation of Children and Family Services (COA).
- d.* American Osteopathic Association (AOA).

155.18(2) Credentials and expectations of accreditation bodies.

a. The accreditation credentials of the bodies shall specify the types of organizations, programs and services the bodies accredit and targeted population groups, if appropriate.

b. Deemed status means that the board and division shall recognize, in lieu of their own review, an outside body's review, assessment, and accreditation of a hospital-based or freestanding community-based substance abuse program's operations, functioning, and services that correspond to those described in this chapter.

155.18(3) Responsibilities of programs granted deemed status.

a. When a program receives accreditation and is then granted licensure through deemed status, the program shall continue to be responsible for meeting all requirements in accordance with this chapter and all applicable laws and regulations.

b. If a program that is nationally accredited requests deemed status for services not covered by the national accreditation body's standards, but covered by this chapter, the licensing for those services shall be conducted by the division.

c. Copies of the entire CARF, JCAHO, COA, or AOA behavioral health accreditation survey/inspection report and certificate of accreditation shall be submitted to the division with the application for deemed status provided by the division.

d. A program shall submit to the division accreditation corrective plans or written conditions to accreditation.

e. A program shall be currently accredited by a board-approved national accreditation body for services that are outlined in this chapter.

f. A program shall advise the division of any changes in the program's accreditation status, address, executive director/CEO, facility locations, or any other changes to the program/organization within 30 days of such change.

g. All survey reports for the hospital-based or freestanding community-based substance abuse treatment program from the accrediting or licensing body shall be sent to the division.

h. For a program granted deemed status, the period of deemed status shall coincide with the period of time that program is awarded accreditation by the national accreditation body. However, under no circumstances shall it be longer than three years.

155.18(4) The board and division shall retain the following responsibilities and rights when deemed status is granted to program/organizations:

a. The division may conduct site follow-up visits as determined appropriate.

b. The division shall investigate all complaints that are under the authority of this chapter and recommend and require corrective action or other sanctions in accordance with 641—155.16(125). All complaints, findings, and required corrective action may be reported to the accreditation body.

c. The board shall review and act upon deemed status if necessary when complaints have been founded, when national accreditation bodies find instances of noncompliance with accreditation, when the accreditation status of the program expires without renewal, when the program's accreditation status is downgraded or withdrawn by the accreditation body, or when focused reviews find instances of noncompliance.

155.18(5) *Continuation of deemed status.* The program shall submit a copy of all CARF, JCAHO, COA, or AOA behavioral health accreditation survey reports to the division.

641—155.19(125) Funding. The issuance of the license to any program shall not be construed as a commitment on the part of either the state or federal government to provide funds to such licensed program.

641—155.20(125) Inspection. Each applicant or licensee agrees as a condition of licensure:

155.20(1) To permit properly designated representatives of the department to enter into and inspect any and all premises of programs for which a license has been either applied or issued to verify information contained in the application or to ensure compliance with all laws, rules, and regulations relating thereto, during all hours of operation of said facility and at any other reasonable hour.

155.20(2) To permit properly designated representatives of the department to audit and collect statistical data from all records maintained by the licensee. A facility shall not be licensed which does not permit inspection by the department or examination of all records, including financial records, methods of administration, general and special dietary programs, the disbursement of drugs and methods of supply, and any other records the board deems relevant to the establishment of such a system.

641—155.21(125) General standards for all substance abuse treatment programs. The following standards shall apply to all substance abuse treatment programs in the state of Iowa regardless of the category of treatment services provided by such programs. In situations where differences between general standards for all treatment programs and specific standards occur, both general and specific standards must be met.

155.21(1) Governing body. Each program shall have a formally designated governing body that is representative of the community being served, complies with the Iowa Code, and is the ultimate authority for the overall program operations. Persons in private practice as sole practitioners shall be exempt from this subrule.

a. The governing body shall develop and adopt written bylaws and policies that define the powers and duties of the governing body, its committees, advisory groups, and the executive director. These bylaws shall be reviewed and revised by the governing body as necessary.

b. The bylaws shall minimally specify the following:

- (1) The type of membership;
- (2) The term of appointment;
- (3) The frequency of meetings;
- (4) The attendance requirements; and
- (5) The quorum necessary to transact business.

c. Minutes of all meetings shall be kept and be available for review by the department and shall include, but not necessarily be limited to:

- (1) Date of the meeting;
- (2) Names of members attending;
- (3) Topics discussed; and
- (4) Decisions reached and actions taken.

d. The duties of the governing body shall include, but not necessarily be limited to, the following:

- (1) Appointment of a qualified executive director who shall have the responsibility and authority for the management of the program in accordance with the governing body's established policies;
- (2) Establish an effective control which will ensure that quality services are delivered;
- (3) Review and approve the program's annual budget; and
- (4) Approve all contracts.

e. The governing body shall develop and approve policies for the effective operation of the program.

f. The governing body shall be responsible for all funds, equipment, supplies and the facility in which the program operates. The governing body shall be responsible for the appropriateness and adequacy of services provided by the program.

g. The governing body shall at least annually prepare a report which will include, but not necessarily be limited to, the following items:

- (1) The name, address, occupation, and place of employment of each governing body member;
- (2) Any family relationships which a member of the governing body may have to a program staff member; and
- (3) Where applicable, the name and address of all owners or controlling parties whether they are individuals, partnerships, corporation body, or subdivision of other bodies, such as a public agency, or religious group, fraternity, or other philanthropic organization.

h. The governing body shall assume responsibility in seeing that the program has malpractice and liability insurance and a fidelity bond.

155.21(2) Executive director. This individual shall have primary responsibility for the overall program operations. The duties of the executive director shall be clearly defined by the governing authority, when applicable, in accordance with the policies established by the governing body.

155.21(3) Clinical oversight. The program shall have appropriate clinical oversight to ensure quality of clinical services provided to client/patients. This may be provided in-house or through consultation.

Clinical oversight may include assisting the program in developing policies and procedures relating to the assessment and treatment of psychopathology, assisting in the training of the staff and providing assistance to the clinical staff in assessment or treatment. The executive director or designee shall be ultimately responsible for clinical services and implementation of treatment services to client/patients.

155.21(4) Staff development and training. There shall be written policies and procedures that establish staff development. Staff development shall include orientation for staff and opportunities for continuing job-related education. For corporations organized under Iowa Code chapter 496C and

sole practitioners, documentation of continuing education to maintain professional license or substance abuse certification will meet the requirements of this subrule.

a. Evidence of professional education, substance abuse certification, licensing, or orientation which includes the following: psychosocial, medical, pharmacological, confidentiality, and tuberculosis and blood-borne pathogens; an orientation to the program and community resources; counseling skill development; HIV/AIDS (Human Immunodeficiency Virus/Acquired Immune Deficiency Syndrome) information/education; and the attitudes, values and lifestyles of racially diverse cultures, other cultures and special populations.

b. The program shall establish on-site training programs or enter into relationships with outside resources capable of meeting staff training needs.

c. The staff development program shall take steps to ensure that staff members are kept informed of new developments in the field of substance abuse assessment, evaluation, placement, treatment and rehabilitation.

d. In-service training programs shall be instituted when program operations or functions are changed and shall be designed to allow staff members to develop new skills so that they may effectively adapt to such changes.

e. Staff development activities and participation in state, national and regional training shall be planned and scheduled. These activities shall be documented in order to evaluate their scope, effectiveness, attendance, and amount of time spent on such efforts. The written plan for on-site staff development and activities for professional growth and development of personnel shall be based on the annual needs assessment and shall be available to all personnel.

f. Minutes shall be kept of on-site training activities and shall include, but not necessarily be limited to:

- (1) Date of the meeting;
- (2) Names of persons attending; and
- (3) Topics discussed, to include name and title of presenters.

g. The individual responsible for supervising staff development activities shall conduct at least an annual needs assessment.

155.21(5) *Management information system.* Programs receiving Medicaid or state funding and programs performing OWI evaluations in accordance with 641—Chapter 157 shall submit client/patient data to the Iowa Department of Public Health, Division of Behavioral Health and Professional Licensure, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075, in accordance with substance abuse reporting system procedures.

155.21(6) *Procedures manual.* All programs shall develop and maintain a procedures manual. This manual shall define the program's policies and procedures to reflect the program's activities. Revisions shall be entered with the date, name and title of the individual making the entries. This manual shall contain all of the required written policies, procedures, definitions, and all other documentation outlined throughout these standards.

155.21(7) *Fiscal management.* The program shall ensure proper fiscal management which shall include the following:

a. The preparation and maintenance of an annual written budget which shall be reviewed and approved by the governing body prior to the beginning of the budget year.

b. The fiscal management system shall be maintained in accordance with generally accepted accounting principles, including internal controls to reasonably protect agency assets. This shall be verified by an independent fiscal audit of the program by the state auditor's office or certified public accountant based on an agreement entered into by the governing body. An annual fiscal audit shall not be required for programs with an annual budget of \$75,000 or less.

c. There shall be an insurance program that provides for the protection of the physical and financial resources of the program which provides coverage for all people, buildings, and equipment. The insurance program shall be reviewed annually by the governing body.

d. Assessment and evaluation programs shall make public the OWI evaluation fees, and the client/patient shall be informed of the fee at the time of scheduling the appointment for the evaluation.

155.21(8) *Personnel.* Written personnel policies and procedures shall be developed by all programs except for sole practitioners. The sole practitioner shall subscribe to a code of conduct such as found in professional certification or licensure.

a. All programs shall have written policies and procedures that address the following areas:

- (1) Recruitment, selection, and certification of staff members;
- (2) Recruitment and selection of volunteers;
- (3) Wage and salary administration;
- (4) Promotions;
- (5) Employee benefits;
- (6) Working hours;
- (7) Vacation and sick leave;
- (8) Lines of authority;
- (9) Rules of conduct;
- (10) Disciplinary actions and termination of employees;
- (11) Methods for handling cases of inappropriate care;
- (12) Work performance appraisal;
- (13) Employee accidents and safety;
- (14) Employee grievances; and
- (15) Policy on staff persons suspected of using or abusing substances.

b. The written personnel policies and practices shall include an equal employment opportunity policy and an affirmative action plan for hiring members of protected classes.

c. There shall be written job descriptions that reflect the actual duties of the employee.

d. Job descriptions shall accurately reflect the actual job situation and shall be reviewed when necessary by the executive director or whenever there is a change in required qualifications or duties.

e. All positions shall have job descriptions included in the personnel section of the procedures manual or personnel record of the staff member.

f. The written personnel policies and practices shall include a mechanism for written evaluation of personnel performance on at least an annual basis. There shall be evidence that this evaluation is reviewed with the employee and that the employee is given the opportunity to respond to this evaluation.

g. There shall be a personnel record kept on each staff member. These records shall contain as applicable:

- (1) Verification of training, experience, and all professional credentials relevant to the position;
- (2) Job performance evaluations;
- (3) Incident reports;
- (4) Disciplinary actions taken; and
- (5) Documentation of review and adherence to confidentiality laws and regulations. This review and agreement shall occur prior to assumption of duties.

h. There shall be written policies and procedures designed to ensure confidentiality of personnel records and a delineation of authorized personnel who have access to various types of personnel information.

i. Personnel providing screening, evaluations, assessments or treatment shall be certified through the Iowa board of substance abuse certification, or certified by an international certification and reciprocity consortium member board in the states of Illinois, Minnesota, Nebraska, Missouri, South Dakota, and Wisconsin; or be eligible for certification or have education, training, and experience in the substance abuse field.

j. There shall be written policies related to the prohibition of sexual harassment.

k. There shall be written policies related to the implementation of the Americans with Disabilities Act.

155.21(9) *Child abuse/criminal records check.*

a. Written policies and procedures shall prohibit mistreatment, neglect, or abuse of children and specify reporting and enforcement procedures for the program. Alleged violations shall be reported immediately to the director of the facility and appropriate department of human services personnel.

Written policies and procedures on reporting alleged violations shall be in compliance with DHHS, 42 CFR, Part 2, Regulations on Confidentiality of Alcohol and Drug Abuse Client Records. Any employee found to be in violation of Iowa Code chapter 232, division III, part 2, as substantiated by the department of human services' investigation shall be subject to the agency's policies concerning dismissal.

b. For each employee working within a juvenile services area, the personnel record shall contain:

(1) Documentation of a criminal records check with the division of criminal investigation on all new applicants for employment asking whether the applicant has been convicted of a crime.

(2) A written, signed and dated statement furnished by a new applicant for employment which discloses any substantiated reports of child abuse, neglect or sexual abuse that may exist.

(3) Documentation of a check after hiring on probationary or temporary status, but prior to permanently employing the individual, with the Iowa central child abuse registry for any substantiated reports of child abuse, neglect or sexual abuse.

A person who has a record of a criminal conviction or founded child abuse report shall not be employed, unless an evaluation of the crime or founded child abuse has been made by the department of human services which concludes that the crime or founded child abuse does not merit prohibition of employment. If a record of criminal conviction or founded child abuse does exist, the person shall be offered the opportunity to complete and submit Form 470-2310, Record Check Evaluation. In its evaluation, the department of human services shall consider the nature and seriousness of the crime or founded abuse in relation to the position sought, the time elapsed since the commission of the crime or founded abuse, the circumstances under which the crime or founded abuse was committed, the degree of rehabilitation and the number of crimes or founded abuses committed by the person involved.

c. Each treatment staff member shall complete two hours of training relating to the identification and reporting of child abuse and dependent adult abuse within six months of initial employment and at least two hours of additional training every five years thereafter.

155.21(10) *Client/patient case record maintenance.* There shall be written policies and procedures governing the compilation, storage and dissemination of individual client/patient case records.

a. These policies and procedures shall ensure that:

(1) The program exercises its responsibility for safeguarding and protecting the client/patient case record against loss, tampering, or unauthorized disclosure of information;

(2) Content and format of client/patient records are kept uniform; and

(3) Entries in the client/patient case record are signed and dated.

b. The program shall provide adequate physical facilities for the storage, processing, and handling of client/patient case records. These facilities shall include suitably locked, secured rooms or file cabinets.

c. Appropriate records shall be readily accessible to those staff members providing services directly to the client/patient and other individuals specifically authorized by program policy. Records should be kept in proximity to the area in which the client/patient normally receives services.

d. The program shall have a written policy governing the disposal and maintenance of client/patient case records. Client/patient case records shall be maintained for not less than seven years from the date they are officially closed.

e. Each file cabinet or storage area containing client/patient case records shall be locked.

f. The governing body shall establish policies that specify the conditions under which information on applicants or client/patients may be released and the procedures to be followed for releasing such information. Even if a program is not federally funded, all such policies and procedures shall be in accordance with the federal confidentiality regulations, "Confidentiality of Alcohol and Drug Abuse Patient Records," 42 CFR, Part 2, effective June 9, 1987, which implement federal statutory provisions, 42 U.S.C. 290dd-3 applicable to alcohol abuse client/patient records, and 42 U.S.C. 290ee-3 applicable to drug abuse client/patient records, and state confidentiality laws and regulations.

g. Confidentiality of alcohol and drug abuse client/patient records. The confidentiality of alcohol and drug abuse client/patient records maintained by a program is protected by the "Confidentiality of Alcohol and Drug Abuse Patient Records" regulations, 42 CFR, Part 2, effective June 9, 1987, which

implement federal statutory provisions, 42 U.S.C. 290dd-3 applicable to alcohol abuse client/patient records, and 42 U.S.C. 290ee-3 applicable to drug abuse client/patient records.

155.21(11) *Placement screening, admission, assessment and evaluation.* The program shall conduct an initial assessment which shall include evaluation of the American Society of Addiction Medicine Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition, Revised, or other national or recognized criteria approved by the department upon granting a variance by the director in accordance with 641—Chapter 178 for determining the eligibility of individuals for placement and admission. The program shall utilize a recognized diagnostic test/tool to determine substance abuse or dependence as defined in the DSM IV (Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition).

a. The program shall have written policies and procedures governing a uniform process that defines:

- (1) The types of information to be gathered on all individuals upon admission;
- (2) Procedures to be followed when accepting referrals from outside agencies or organizations;
- (3) The types of records to be kept on all individuals applying for services.

b. Following admission, the comprehensive assessment (psychosocial history) shall be an analysis and synthesis of the client/patient status and shall address the client/patient's strengths, problems, and areas of clinical concern. Sufficient information shall be collected so that a comprehensive treatment plan can be developed. It shall be developed within the period of time between admission and the first review date specified for that particular level of care within the management of care review process.

c. At the time of admission, documentation shall be made that the individual has been informed of:

- (1) General nature and goals of the program;
- (2) Rules governing client/patient conduct and infractions that can lead to disciplinary action or discharge from the program;
- (3) In a nonresidential program, the hours during which services are available;
- (4) Treatment costs to be borne by the client/patient, if any;
- (5) Client's rights and responsibilities;
- (6) Confidentiality laws, rules and regulations;
- (7) HIV/AIDS information; and
- (8) Safety and emergency procedures for residential, halfway house, inpatient and treatment services with housing.

d. The results of the screening and admission process shall be clearly explained to the client/patient and to the client/patient's family when appropriate. This shall be documented in the client/patient record.

155.21(12) *Treatment plans.* Based upon the initial assessment, an individualized written treatment plan shall be developed and recorded in the client/patient case record.

a. A treatment plan shall be developed as soon after the client/patient's admission as is clinically feasible and within the period of time between admission and the next review date specified for that particular level of care within the management of care review process.

b. The individualized treatment plan shall minimally contain:

- (1) A clear and concise statement of the client/patient's current strengths and needs;
- (2) Clear and concise statements of the short- and long-term goals the client/patient will be attempting to achieve;
- (3) Type and frequency of therapeutic activities in which the client/patient will be participating;
- (4) The staff person(s) to be responsible for the client/patient's treatment; and
- (5) Treatment plans shall be culturally and environmentally specific so as to meet the needs of the client/patient. Treatment plans shall be written in a manner readily understandable to the client/patient, with assistance if necessary.

c. Treatment plans shall be developed in partnership with the client/patient and shall be reviewed by the primary counselor and the client/patient as often as necessary and in accordance with the time frames specified within the management of care review process.

d. The reviews shall consist of: a reassessment of the client/patient's current status in conjunction with the continued stay review criteria, accomplishments and needs, and a redefining of treatment goals when appropriate. The date of the review, as well as any changes, shall be recorded in the record.

e. The use of abstract terms, technical jargon, or slang should be avoided in the treatment plan. The program should provide the client/patient with copies of all treatment plans upon request.

155.21(13) Progress notes. A client/patient's progress and current status in meeting the goals set in the treatment plan shall be recorded in the client/patient case record. Information will be noted following each individual counseling session and a summary of group counseling services shall be documented at least weekly.

a. Entries shall be filed in chronological order and shall include the date services were provided or observations made, the date the entry was made, the signature or initials and staff title of the individual rendering the services. All progress notes shall be entered into the client/patient case record in permanent pen, typewriter, or by computer. In those instances where records are maintained electronically, a staff identification code number authorizing access shall be accepted in lieu of a signature.

b. All entries that involve subjective interpretations of a client/patient's progress should be supplemented with a description of the actual behavioral observations which were the basis for the interpretation.

c. The use of abstract terms, technical jargon, or slang should be avoided in progress notes.

d. The program shall develop a uniform progress note format to be used by all clinical staff.

155.21(14) Client case record contents. There shall be a case record for each client/patient that contains:

a. Results of all examinations, tests, and screening and admissions information;

b. Reports from referring sources;

c. Treatment plans;

d. Continued stay and discharge reviews;

e. Medication records, which shall allow for the monitoring of all medications administered and self-administered and the detection of adverse drug reactions. All medication orders in the client/patient case records shall define at least the name of the medication, dose, route of administration, frequency of administration, the name of the physician who prescribed the medication, and the name of the person administering or dispensing the medication;

f. Reports from outside resources shall be dated and include the name of the resource;

g. Multidisciplinary case conference and consultation notes, including the date of the conference or consultation, recommendations made, actions taken, and individuals involved;

h. Correspondence related to the client/patient, including all letters and dated notations of telephone conversations relevant to the client/patient's treatment;

i. Treatment consent forms, if applicable;

j. Information release forms;

k. Progress notes;

l. Records of services provided;

m. Discharge summaries of services provided shall be completed within 30 days of discharge and shall be sufficiently detailed to identify the types of services the client/patient has received and action taken to address specific problems identified. General terms such as "counseling" or "activities" shall be avoided in describing services;

n. Management information system or other appropriate data forms; and

o. Incident reports.

155.21(15) Urinalysis. All programs serving clients who are receiving treatment for use or abuse of a controlled substance shall establish policies and procedures, if applicable, for the collection of urine specimens and utilization of urinalysis results.

a. Urine specimens obtained from clients shall be collected under direct supervision and analyzed as indicated by the program.

b. Any laboratory used by the program for urine testing and analysis shall comply, if applicable, with all federal and state proficiency testing programs.

c. Any program conducting on-site urine testing shall comply with the Clinical Laboratory Improvement Act regulations.

d. Client records shall reflect the manner in which urine test results are utilized in treatment.

e. For programs with a urinalysis service, policies shall be developed concerning measures to be employed when urine specimens of clients are found to contain substances.

155.21(16) Medical services. The applicant shall have policies and procedures developed in conjunction with a physician to examine and evaluate substance abusers/concerned persons seeking or undergoing treatment or rehabilitation. Individuals who enter an inpatient, residential, halfway house facility, chemotherapy or emergency care facility (ASAM Levels III.1, III.3, III.5, III.7 and IV) shall undergo a medical history and physical examination. Laboratory examinations may be performed as deemed necessary by the physician. The medical history, physical examination, and necessary laboratory examinations shall be performed as soon as possible, however minimally, as follows:

a. Inpatient medically managed and medically monitored residential treatment services (ASAM Levels IV and III.7) within 24 hours of admission;

b. Primary residential and extended residential treatment (Levels III.5 and III.3) within seven calendar days of admission; and

c. Halfway house services (Level III.1) within 21 calendar days of admission.

For individuals who enter a Level I or Level II service, a medical history shall be obtained upon admission.

A program may accept medical history and physical examination results from referral sources which were conducted no more than 90 days prior to admission.

All client/patients admitted to residential, inpatient or halfway house services and high-risk outpatient client/patients shall have a tuberculosis skin test administered and read within 5 days of admission. If the client/patient has documentation of a negative tuberculosis skin test within the previous 90 days, the tuberculosis test may be accepted if the client/patient does not show any symptoms. If the client/patient has unexplained symptoms or a history of positive tuberculosis skin tests, the physician shall determine what tests are needed.

155.21(17) Emergency medical services. The program shall ensure, by affiliation agreement, or contract, that emergency medical services at a general hospital are available on a 24-hour basis.

a. The program will maintain emergency medical service coverage on a 24-hour, seven days a week, basis.

b. The program shall ensure that all community service providers, medical facilities, law enforcement agencies, and other appropriate personnel are informed of the 24-hour emergency services and treatment available.

155.21(18) Medication control. Policies and procedures shall be developed to ensure that prescription and over-the-counter drugs are administered or self-administered safely and properly in accordance with federal, state and local laws and regulations. The written policies and procedures shall include, but not be limited to, the following:

a. Authorized personnel who administer medications shall be qualified and an updated list of such personnel shall be maintained. Only the following are designated by 657—10.16(124) as qualified individuals to whom a physician can delegate the administration of controlled substances:

(1) Persons who have successfully completed a medication administration course reviewed by the board of pharmacy examiners.

(2) Advanced emergency medical technicians and paramedics.

(3) Licensed physician assistants.

(4) Licensed pharmacists.

(5) Nurse, intern or other qualified individual delegated the responsibility to administer a prescription drug by a practitioner, licensed by the appropriate state board, to administer drugs to patients, in accordance with Iowa Code section 155A.4(2)“c.”

b. Medications shall be administered only in accordance with the instructions of the attending physician. The type and amount of the medication, the time and date, and the staff member administering the medication shall be documented in the client/patient’s record.

c. Self-administration of prescription medication shall be observed by a staff member who has been oriented to the program's policies and procedures on self-administration. Self-administration of prescription medications shall be permitted only when the client/patient's medication is clearly labeled. There shall be written policies and procedures relative to self-administration of prescription medications by client/patients and only when:

- (1) Medications are prescribed by a physician.
- (2) The physician agrees that the client/patient can self-administer the drug.
- (3) What is taken, how, and when, are documented in the record of the client/patient.

d. Drugs/medications shall be prescribed by a physician or other practitioner authorized to prescribe under Iowa law.

e. Prescription drugs shall not be administered or self-administered to a client/patient without a written order signed by a physician or other practitioner authorized to prescribe under Iowa law. All prescribed medications shall be clearly labeled indicating the client/patient's full name, physician's name, prescription number, name and strength of the medication, dosage, directions for use, date of issue; and name, address and telephone number of the pharmacy or physician issuing the medication. Medications shall be packaged and labeled according to state and federal guidelines.

f. If the medications the client/patient brings to the program are not to be used, they shall be packaged, sealed and stored. The sealed packages of medications shall be returned to the client/patient, family or significant others at the time of discharge.

g. Accountability and control of medications.

(1) There shall be a specific routine for medication administration, indicating dose schedules and standardization of abbreviations.

(2) There shall be specific methods for control and accountability of medication products throughout the program.

(3) The staff member in charge of medications shall provide for monthly inspection of all storage units.

(4) Medication containers having soiled, damaged, illegible, or makeshift labels shall be returned to the issuing pharmacist, pharmacy, or physician for relabeling or disposal.

(5) Unused prescription drugs prescribed for residents who have left the facility without their medication shall be destroyed by the person in charge with a witness and notation made on the resident's record. When a resident is discharged or leaves the facility, medications currently being administered shall be sent, in the original container, with the resident or with a responsible agent, and with the approval of the physician.

h. Medication storage shall be maintained in accordance with the security requirements of federal, state and local laws.

(1) All medication shall be maintained in locked storage. Controlled substances shall be maintained in a locked box within the locked cabinet.

(2) Medications requiring refrigeration shall be kept in a refrigerator and separated from food and other items.

(3) Disinfectants and medication for external use shall be stored separately from internal and injectable medications.

(4) The medication for each client/patient shall be stored in the original containers.

(5) All potent poisonous or caustic medication shall be plainly labeled, stored separately from other medication in a specific well-illuminated cabinet, closet, or storeroom, and made accessible only to authorized persons.

i. Dispensed from a licensed pharmacy. Medication provided to a client/patient shall be dispensed only from a licensed pharmacy in the state of Iowa in accordance with the pharmacy laws in the Code of Iowa, or from a licensed pharmacy in another state according to the laws of that state, or by a licensed physician.

j. Use of medications. Prescription medications prescribed for one resident may not be administered to or allowed in the possession of another resident.

k. Patient reaction. Any unusual client/patient reaction to a medication shall be documented in the client/patient record and reported to the attending physician immediately.

l. Dilution or reconstitution of medication. Dilution or reconstitution and labeling of medication shall be done only by a licensed pharmacist.

155.21(19) Management of care. The program shall ensure appropriate level of care utilization by implementing and maintaining the written placement screening, continuing service, and discharge criteria process developed by the department. The programs shall also address underutilization, overutilization, and the effective use of levels of care available. The time frames for management of care activities minimally shall be implemented within 30 days for Levels I and III.1; within 7 days for Levels II.1, II.5, III.3 and III.5; and daily for Levels III.7 and IV.

The discharge planning process shall begin at admission, determining a client/patient's continued need for treatment services and developing a plan to address ongoing client/patient needs posttreatment. Discharge planning may or may not include a document identified as a discharge plan.

155.21(20) Quality improvement. The program shall have an ongoing quality improvement program designed to objectively and systematically monitor and evaluate the quality and appropriateness of client/patient care, pursue opportunities to improve client/patient care, and resolve identified problems. Quality improvement efforts shall be facilitywide in scope and include review of clinical and professional services.

a. There shall be a written plan for a quality improvement program that describes the objectives, organization, scope, and mechanisms for overseeing the effectiveness of monitoring, evaluation, and problem-solving activities.

b. The program shall establish written policies and procedures to both describe and document the quality improvement of the program's monitoring and evaluation activities. The policies and procedures shall ensure that:

(1) Information is collected or screened by a designated individual, individuals, or committee. Quality improvement activities may be contracted through all outside resources;

(2) Objective criteria shall be utilized in the development and application of criteria relating to the care or service it provides; and

(3) Objective criteria shall be utilized in the evaluation of the information collected in order to identify important problems in, or opportunities to improve, client/patient care and clinical performance.

c. The program shall document that the quality of client/patient care is improved and identified problems are resolved through actions taken as appropriate by the program's administrative and supervisory staffs and through professional staff functions.

d. Necessary information shall be communicated among program components, modalities, or services when problems or opportunities to improve client/patient care involve more than one program component or service.

e. The program shall ensure that the status of identified problems is tracked to ensure improvement or resolution.

f. Information from program components or services and the findings of discrete quality improvement activities are used to detect trends, patterns of performance, or potential problems that affect more than one program component or service.

g. The objectives, scope, organization, and effectiveness of the quality improvement program are evaluated at least annually and revised as necessary.

155.21(21) Building construction and safety. All buildings in which clients receive screenings, evaluations, assessments or treatment are designed, constructed, equipped, and maintained in a manner that is designed to provide for the physical safety of clients, personnel, and visitors.

a. If required by local jurisdiction, all programs shall maintain a certification of occupancy.

b. During all phases of construction or alterations of buildings, the level of life safety shall not be diminished in any occupied area. The construction shall be in compliance with all applicable federal, state, and local codes.

c. New construction shall comply with Iowa Code chapter 104A and all applicable federal and local codes and provide for safe and convenient use by disabled individuals.

d. All programs shall have written policies and procedures to provide a safe environment for clients, personnel, and visitors and to monitor that environment. The program shall document implementation of the procedures. The written policies and procedures shall include, but not be limited to, the following:

- (1) The process for the identification, development, implementation, and review of safety policies and procedures for all departments or services.
- (2) The promotion and maintenance of an ongoing, facilitywide hazard surveillance program to detect and report all safety hazards related to clients, visitors, and personnel.
- (3) The process by which the staff is to dispose of biohazardous waste within the clinical service areas.
- (4) All program areas.
 1. Stairways, halls, and aisles shall be of substantial nonslippery material, shall be maintained in a good state of repair, shall be adequately lighted and shall be kept free from obstructions at all times. All stairways shall have handrails.
 2. Radiators, registers, and steam and hot water pipes shall have protective covering or insulation. Electrical outlets and switches shall have wall plates.
 3. For juvenile facilities, fuse boxes shall be under lock and key or six feet above the floor.
 4. Facilities shall have written procedures for the handling and storage of hazardous materials.
 5. Facilities shall have policies and procedures for weapons removal.
 6. Swimming pools shall conform to state and local health and safety regulations. Adult supervision shall be provided at all times when children are using the pool.
 7. Facilities shall have policies regarding fishing ponds, lakes, or any bodies of water located on or near the program and accessible to the client/patient.

155.21(22) Outpatient facility. The outpatient facility shall be safe, clean, well ventilated, properly heated, free from vermin and rodents and in good repair.

- a. The facility shall be appropriate for providing services available from the program and for protecting confidentiality.
- b. Furniture shall be in good repair.
- c. There shall be a written plan outlining procedures to be followed in the event of fire or tornado. These plans shall be conspicuously displayed at the facility.

155.21(23) Therapeutic environment. All programs shall establish an environment that enhances the positive self-image of client/patients and preserves their human dignity. The grounds of the program shall have adequate space for the program to carry out its stated goals. When client/patient needs or program goals involve outdoor activities, these activities and programs shall be appropriate to the ages and clinical needs of the client/patient.

- a. All services shall be accessible to people with disabilities or the program shall have written policies and procedures that describe how people with disabilities can attain access to the facility for necessary services. All programs shall comply with the Americans with Disabilities Act.
- b. The waiting or reception areas shall be of adequate size, have appropriate furniture and be located so as to ensure confidentiality of client/patients in session or receiving services.
- c. Program staff shall be available in waiting or reception areas so as to address the needs of the client/patients and visitors.
- d. The program shall have written policies and procedures regarding chemical substances in the facility.
- e. Smoking shall be prohibited within any facilities or any portion of a facility used for outpatient drug and alcohol treatment services and programs. Smoking shall be prohibited, except in designated areas within facilities or portions of facilities used for inpatient and residential drug and alcohol treatment services.

f. A program or person shall not sell, give, or otherwise supply any tobacco, tobacco products, or cigarettes to any person under 18 years of age, and a person under 18 years of age shall not smoke, use, purchase, or attempt to purchase, any tobacco, tobacco products, or cigarettes.

- g. There shall be written policies and procedures to address the following:

- (1) There shall be a policy to inform client/patients of their legal and human rights at the time of admission;
- (2) Client/patient communication, opinions, or grievances, with a mechanism for redress;
- (3) Prohibition of sexual harassment; and
- (4) Client/patient rights to privacy.

641—155.22(125) Inpatient, residential, and halfway house safety. Specific safety standards for inpatient, residential and halfway house safety.

155.22(1) Health and fire safety inspections. Inpatient, residential and halfway house substance abuse treatment facilities shall comply with appropriate department of inspections and appeals rules, state fire marshal's rules and fire ordinances, and appropriate local health, fire, occupancy code, and safety regulations. The program shall maintain documentation of such compliance.

a. Inpatient, residential and halfway house substance abuse treatment facilities required to be licensed by the department of public health shall comply with standards for food service sanitation in accordance with rules promulgated by the department of inspections and appeals pursuant to 481—Chapter 32 of the Iowa Administrative Code and Iowa Code chapter 137B.

b. Food service operations in substance abuse inpatient, residential, and halfway house treatment facilities shall be inspected on an annual basis by the department of inspections and appeals or appropriate local boards of health having agreements with the department of inspections and appeals to conduct such inspections.

c. The use of door locks or closed sections shall be approved by the fire marshal, professional staff and governing body.

155.22(2) Emergency preparedness. The inpatient, residential and halfway house programs shall have an emergency preparedness program designed to provide for the effective utilization of available resources so that client/patient care can be continued during a disaster.

641—155.23(125) Specific standards for inpatient, residential, and halfway house service. An inpatient, residential, and halfway house service shall be designed to provide comprehensive diagnostic, treatment and rehabilitation services in a 24-hour therapeutic setting.

155.23(1) Hours of operation. An inpatient, residential, and halfway house service shall operate seven days per week, 24 hours a day.

155.23(2) Meals. Inpatient and residential programs shall provide a minimum of three meals per day to each client/patient enrolled in the program. Inpatient, residential, and other programs where clients/patients are not present during mealtime shall make provisions to make available the necessary meals. Menus shall be prepared in consultation with a dietitian. If client/patients are allowed to prepare meals, the program shall document conformity with all commonly accepted policies and procedures of state health regulations and food hygiene.

155.23(3) Consultation with counsel. An inpatient, residential, and halfway house program shall have policies and procedures which will ensure that all client/patients in a facility have opportunity for and access to consultation with legal counsel at any reasonable time.

155.23(4) Visitation with family and friends. An inpatient, residential, and halfway house program shall have policies and procedures which will ensure opportunities for continuing contact with family and friends. If such visiting opportunities are clinically contraindicated, they shall be approved on an individual basis by the treatment supervisor and subject to review by the executive director. The justification for restrictions shall be documented in the client/patient record. If clinical indications require restrictions on visitation, such restrictions shall be evaluated for continuing therapeutic effectiveness every seven days by the treatment supervisor and primary counselor.

The program shall establish visiting hours which shall be conspicuously displayed at the facility and in such a manner to be visible to those entering the facility.

155.23(5) Telephone use. An inpatient, residential, and halfway house program shall have policies and procedures which allow client/patients to conduct private telephone conversations with family and friends at the facility. If such are clinically contraindicated, they shall be approved on an individual

basis by the treatment supervisor and subject to review by the executive director. The justification for restrictions shall be documented in the client/patient record. If clinical indications require restrictions, such shall be evaluated for continuing therapeutic effectiveness every seven days by the treatment supervisor and primary counselor. Access to the telephone shall be available during reasonable hours as defined by the program in written policies and procedures except for emergency calls, which may be received at the time of the call, or made when necessary.

155.23(6) *Written communication.* An inpatient, residential, and halfway house program shall have policies and procedures which ensure that neither mail nor other communications to or from a client/patient in a facility is intercepted, read, or censored.

155.23(7) *Facility.* An inpatient, residential, and halfway house facility shall be safe, clean, well-ventilated, properly heated, in good repair, and free from vermin to ensure the well-being of residents.

- a. Client/patient bedrooms shall include:
 - (1) A sturdily constructed bed;
 - (2) A clean mattress protected with a clean mattress pad;
 - (3) A designated space for personal possessions and for hanging clothing in proximity to the sleeping area; and
 - (4) Windows in bedrooms shall have curtains or window blinds.
- b. Sleeping areas shall include:
 - (1) Doors for privacy;
 - (2) Partitioning or placement of furniture to provide privacy for all client/patients;
 - (3) The number of client/patients in a room shall be appropriate to the goals of the facility and to the ages, developmental levels, and clinical needs of the client/patients;
 - (4) Client/patients will be allowed to keep and display personal belongings and add personal touches to the decoration of their rooms in accordance with program policy;
 - (5) Staff shall respect the client/patient's right to privacy by knocking on the door of the client/patient's room before entering.
- c. Clean linen, towels and washcloths shall be available minimally on a weekly basis and more often as needed.
- d. Bathrooms shall provide residents with facilities necessary for personal hygiene and personal privacy, including:
 - (1) A safe supply of hot and cold running water which is potable;
 - (2) Clean towels, electric hand dryers or paper towel dispensers, and an available supply of toilet paper and soap;
 - (3) Natural or mechanical ventilation capable of removing odors;
 - (4) Tubs or showers shall have slip-proof surfaces;
 - (5) Partitions with doors which provide privacy if a bathroom has multiple toilet stools;
 - (6) Toilets, wash basins, and other plumbing or sanitary facilities shall at all times be maintained in good operating condition; and
 - (7) The ratio of bathroom facilities to residents shall be one tub or shower head per 12 residents, one wash basin per 12 residents and one toilet per 8 residents.
 - (8) If the facility is coeducational, the program shall designate and so identify separate bathrooms for male and female client/patients.
- e. There shall be a written plan outlining procedures to be followed in the event of fire or tornado. These plans shall be conspicuously displayed on each floor or dormitory area that client/patients, residents, or visitors occupy at the facility and shall be explained to all inpatient, residential, and halfway house client/patients as a part of their orientation to the program. Fire drills shall be conducted at least monthly and tornado drills conducted during the tornado season from April through October.
- f. Written reports of annual inspections by state or local fire safety officials shall be maintained with records of corrective action taken by the program on recommendations articulated in such reports.
- g. Smoking shall not be permitted in bedrooms.

h. Every facility shall have an adequate water supply from an approved source. A municipal water system shall be considered as meeting this requirement. Private water sources shall be tested annually.

i. The facility shall allow for the following:

- (1) Areas in which a client/patient may be alone when appropriate; and
- (2) Areas for private conversations with others.

j. Articles of grooming and personal hygiene that are appropriate to the client/patient's age, developmental level, and clinical state shall be readily available in a space reserved near the client/patient's sleeping area. If clinically indicated as determined by the treatment supervisor, a client/patient's personal articles may be kept under lock and key by staff. If access to potentially dangerous grooming aids or other personal articles is contraindicated for clinical reasons, a member of the professional staff shall explain to the client/patient the conditions under which the articles may be used; and the clinical rationale for these conditions shall be documented in the client/patient case record.

k. Housekeeping. If client/patients take responsibility for maintaining their own living quarters and for day-to-day housekeeping activities of the program, these responsibilities shall be clearly defined in writing and be a part of the client/patient orientation program. Staff assistance and equipment shall be provided as needed.

l. Clothing. Client/patients shall be allowed to wear their own clothing in accordance with program rules. If clothing is provided by programs, it shall be suited to the climate and appropriate. In addition, a laundry room shall be accessible so client/patients may wash their clothing.

m. Noise-producing equipment. The program shall ensure that the use and location of noise-producing equipment and appliances, such as television sets, radios, and CD players do not interfere with clinical and therapeutic activities.

n. Recreation and outdoor activities. The program shall provide recreation and outdoor activities, unless contraindicated for therapeutic reasons.

155.23(8) *Religion-culture.* The inpatient, residential, and halfway house program shall have a written description of its religious orientation, particular religious practices that are observed, and any religious restrictions. This description shall be provided to the client/patients, parent(s) or guardian, and the placing agency at the time of admission in compliance with DHHS, 42 CFR, Part 2, Regulations on Confidentiality of Alcohol and Drug Abuse Client Records. This information shall also be available to adults during orientation. The client/patient shall have the opportunity to participate in religious activities and services in accordance with the client/patient's own faith or that of a minor client/patient's parent(s) or guardian. The facility shall, when necessary and reasonable, arrange transportation for religious activities.

641—155.24(125) Specific standards for inpatient, residential, and halfway house substance abuse service admitting juveniles. An inpatient, residential, and halfway house program that houses one or more juveniles under the age of 18 must also comply with the following standards.

155.24(1) *Personal possessions.* The inpatient, residential, and halfway house program shall allow a child to bring personal belongings. However, the inpatient, residential, and halfway house program shall, as necessary, limit or supervise the use of these items. In addition, the program shall ensure that each child has adequate, clean, well-fitting, attractive, and seasonable clothing as required for health, comfort, and physical well-being. The clothes should be appropriate to age, sex and individual needs.

155.24(2) *Family involvement.* There shall be written policies and procedures for family involvement that shall encourage continued involvement of the family.

155.24(3) *Children's money.* Money earned or received as a gift or as an allowance by a child in care shall be deemed to be that child's personal property. The program shall have a written policy on the child's use of funds. The program shall maintain a separate accounting system for children's money.

155.24(4) *Discipline.* The inpatient, residential, and halfway house program shall have written policies and procedures regarding methods used for control and discipline of children which shall be available to all staff and to the child's family. Agency staff shall be in control of and responsible for discipline at all times. Discipline shall not include the withholding of basic necessities such as food, clothing, or sleep.

a. The program shall have a policy that clearly prohibits staff or the children from utilizing corporal punishment as a method of disciplining or correcting children. This policy is to be communicated, in writing, to all staff of the facility.

b. Behavior expectations. The program shall make available to the child and the child's parents or guardian written policies regarding the following areas:

(1) The general expectations of behavior including the program's rules and practices.

(2) The range of reasonable consequences that may be used to deal with inappropriate behavior.

155.24(5) *Number of staff.* The program shall have 7 days per week, 24-hour per day coverage. The number and qualifications of the staff will vary depending on the needs of the children.

a. Inpatient, residential, halfway house programs, and community residential facilities as defined in 441—Chapter 114, shall have an on-call system operational 24 hours a day to provide supervisory consultation. The program shall have a written plan documenting this system. During prime programming time, there shall be at least a one-to-eight, staff-to-client/patient ratio.

b. Comprehensive residential facilities, as defined in 441—Chapter 115, shall have at least a one-to-five, staff-to-client/patient ratio during prime programming time. A staff person shall be in each living unit at all times when children are in residence, and there shall be a minimum of three nighttime checks between the hours of 12 midnight and 6 a.m. These checks shall be logged. Policies and procedures for nighttime checks shall be in writing.

c. The program's prime programming time shall be defined in writing.

155.24(6) *Illness, accident, death, or absence from the inpatient, residential, and halfway house program.* The program shall have written policies and procedures to notify the child's parent(s), guardian, and responsible agency of any serious illnesses, incidents involving serious bodily injury, or circumstances causing removal of the child from the facility in compliance with DHHS, 42 CFR, Part 2, Regulations on Confidentiality of Alcohol and Drug Abuse Client Records. In the event of the death of a child, a facility shall notify immediately the physician, the child's parent(s) or guardian, the placing agency, and the appropriate state authority.

155.24(7) *Educational services.* An educational program shall be available for each child in accordance with abilities and needs. The educational and teaching standards established by the state department of public instruction shall be met.

155.24(8) *Needs of the juvenile.* Program services and rules shall be designed to meet individual needs of the juvenile.

641—155.25(125) Specific standards for assessment and evaluation programs.

155.25(1) *Definitions.*

"Acute intoxication or withdrawal potential" is a category to be considered in the ASAM-PPC-2 placement, continued stay, and discharge criteria. This category evaluates client/patient's current status of intoxication and potential for withdrawal complications as it impacts on level of care decision making. Historical information about client/patient's withdrawal patterns may also be considered.

"Admission" means the point in an individual's relationship with the program at which the evaluation, placement screening and assessment process has been completed and the individual is entitled to receive treatment services.

"Admission criteria" means specific ASAM-PPC-2 criteria to be considered in determining appropriate client/patient placement and resultant referral to a level of care. Criteria vary in intensity and are organized into six categories: acute intoxication or withdrawal potential, biomedical conditions or complications, emotional/behavioral conditions or complications, treatment resistance/acceptance, relapse potential, and recovery environment.

"ASAM-PPC-2" means the American Society of Addiction Medicine, Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition.

"Assessment" means the ongoing process of identifying a diagnosis, ruling out other diagnoses, and determining the level of care needed by the client.

"Biomedical condition or complication" means one category to be considered in ASAM-PPC-2 placement, continued stay, and discharge criteria. This category evaluates client/patient's current

physical condition as it impacts on level of care decision making. Historical information on client/patient's medical/physical functioning may also be considered.

"Case management" means the process of using predefined criteria to evaluate the necessity and appropriateness of client care.

"Chemical dependency" means alcohol or drug dependence or psychoactive substance use disorder as defined by current Diagnostic and Statistical Manual for Mental Disorders, Fourth Edition (DSM-IV) criteria or by other standardized and widely accepted criteria.

"Client/patient" means an individual who has a substance abuse problem or is chemically dependent, has been assessed as appropriate for services, and for whom screening procedures have been completed.

"Clinically managed high-intensity residential services" (Level III.5) offers high-intensity residential services designed to address significant problems with living skills. The prime example of Level III.5 care is the therapeutic community, which provides a highly structured recovery environment in combination with moderate- to high-intensity professional clinical services to support and promote recovery. (Reference ASAM-PPC-2)

"Clinically managed low-intensity residential services" (Level III.1) offers low-intensity professional addiction treatment services at least five hours a week. Treatment is directed toward applying recovery skills, preventing relapse, promoting personal responsibility and reintegrating the resident into the worlds of work, education, and family life. The services provided may include individual, group and family therapy. Mutual/self-help meetings usually are available on site. (Reference ASAM-PPC-2)

"Clinically managed medium-intensity residential services" (Level III.3) is frequently referred to as extended or long-term care. Level III.3 programs provide a structured recovery environment in combination with medium-intensity professional clinical services to support and promote recovery. (Reference ASAM-PPC-2)

"Clinical oversight" means oversight provided by an individual who, by virtue of education, training or experience, is capable of assessing the psychosocial history of a substance abuser to determine the treatment plan most appropriate for the client. The person providing oversight shall be designated by the applicant.

"Continued stay criteria" means specific ASAM-PPC-2 criteria to be considered in determining appropriate client/patient placement for continued stay at a level of care or referral to a more appropriate level of care. Criteria vary in intensity and are organized into six categories: acute intoxication or withdrawal potential; biomedical conditions or complications; emotional/behavioral conditions or complications; treatment resistance/acceptance; relapse potential; and recovery environment.

"Continuing care" means Level I service of ASAM-PPC-2 placement criteria, which provides a specific period of structured therapeutic involvement designed to enhance, facilitate and promote transition from primary care to ongoing recovery. (Reference ASAM-PPC-2)

"Detoxification" means the process of eliminating the toxic effects of drugs and alcohol from the body. Supervised detoxification methods include social detoxification and medical monitoring or management and are intended to avoid withdrawal complications. (Reference ASAM-PPC-2 for detoxification level of care)

"Emotional/behavioral conditions or complications" is a category to be considered in ASAM-PPC-2 placement criteria. This category evaluates client/patient's current emotional/behavioral status as it impacts on level of care decision making. Emotional/behavioral status may include, but is not limited to, anxiety, depression, impulsivity, and guilt and the behavior that accompanies or follows these emotional states. Historical information on client/patient's emotional/behavioral functioning may also be considered.

"Evaluation" means the process to evaluate the client/patient's strengths, weaknesses, problems, and needs for the purpose of defining a course of treatment. This includes use of the standardized placement screening and any additional client/patient profile information and recommendation to an appropriate level of care.

"Intake" means gathering additional assessment information at the time of admission to services.

“Intensive outpatient treatment” (Level II.1) programs generally provide nine or more hours of structured programming per week, consisting primarily of counseling and education concerning alcohol and other drug problems. Intensive outpatient treatment differs from partial hospitalization (Level II.5) in the intensity of clinical services that are directly available; specifically, intensive outpatient treatment has less capacity to effectively treat individuals who have substantial medical and psychiatric problems.

“Levels of care” is a general term that encompasses the different options for treatment that vary according to the intensity of the services offered. Each treatment option in the client/patient placement criteria is a level of care.

“Recovery environment” means one category to be considered in the ASAM-PPC-2 placement, continued stay and discharge criteria. This category evaluates client/patient’s current recovery environment as it impacts on level of care decision making. Recovery environment may include, but is not limited to, current relationships and degree of support for recovery, current housing, employment situation, and availability of alternatives. Historical information on client/patient’s recovery environment may also be considered.

“Relapse” means progressive irresponsible, inappropriate and dysfunctional behavior patterns that could lead to resumption of alcohol or drug use. “Relapse” also refers to the resumption of alcohol or drug use.

“Relapse potential” means a category to be considered in ASAM-PPC-2 placement, continued stay, and discharge criteria. This category evaluates client/patient’s current relapse potential as it impacts on level of care decision making. Relapse potential may include, but is not limited to, current statements by client/patient about relapse potential, reports from others on client/patient’s potential for relapse, and assessment by clinical staff. Historical information on client/patient’s relapse potential may also be considered.

“Screening” means the process by which a client/patient is determined appropriate and eligible for admission to a particular program or level of care. The focus is on the minimum criteria necessary for appropriateness/eligibility.

“Sole practitioner” means an individual incorporated under the laws of the state of Iowa.

“Substance abuser” means a person who lacks self-control as to the use of chemical substances or uses chemical substances to the extent that the person’s health is substantially impaired or endangered or that the person’s social or economic function is substantially disrupted.

“Treatment acceptance/resistance” is a category to be considered in ASAM-PPC-2 placement, continued stay, and discharge criteria. This category evaluates client/patient’s current treatment acceptance/resistance as it impacts on level of care decision making. Treatment acceptance/resistance may include, but is not limited to, current statements by client/patient about treatment acceptance/resistance, reports from others on client/patient treatment acceptance/resistance, and assessment by clinical staff on client/patient motivation. Historical information on client/patient may also be considered.

155.25(2) Governing body. Each program shall have a formally designated governing body that is representative of the community being served, complies with the Iowa Code and is the ultimate authority for the overall program operations. Persons in private practice as sole practitioners shall be exempt from this subrule.

a. The governing body shall develop and adopt written bylaws and policies that define the powers and duties of the governing body, its committees, advisory groups, and the executive director. These bylaws shall be reviewed and revised by the governing body as necessary.

b. The bylaws shall minimally specify the following:

- (1) The type of membership;
- (2) The term of appointment;
- (3) The frequency of meetings;
- (4) The attendance requirements; and
- (5) The quorum necessary to transact business.

c. Minutes of all meetings shall be kept and be available for review by the department and shall include, but not necessarily be limited to:

- (1) Date of the meeting;
- (2) Names of members attending;
- (3) Topics discussed; and
- (4) Decisions reached and actions taken.

d. The duties of the governing body shall include, but not necessarily be limited to, the following:

- (1) Appointment of a qualified executive director who shall have the responsibility and authority for the management of the program in accordance with the governing body's established policies;
- (2) Establish an effective control which will ensure that quality services are delivered;
- (3) Review and approve the program's annual budget; and
- (4) Approve all contracts.

e. The governing body shall develop and approve policies for the effective operation of the program.

f. The governing body shall be responsible for all funds, equipment, supplies and the facility in which the program operates. The governing body shall be responsible for the appropriateness and adequacy of services provided by the program.

g. The governing body shall at least annually prepare a report which will include, but not necessarily be limited to, the following items:

- (1) The name, address, occupation, and place of employment of each governing body member;
- (2) Any family relationship which a member of the governing body may have to a program staff member; and
- (3) Where applicable, the names and addresses of all owners or controlling parties whether they are individuals, partnerships, corporation body, or subdivision of other bodies, such as a public agency, or religious group, fraternity, or other philanthropic organization.

h. The governing body shall assume responsibility in seeing that the program has malpractice and liability insurance and a fidelity bond.

155.25(3) *Executive director.* This individual shall have primary responsibility for the overall program operations. The duties of the executive director shall be clearly defined by the governing authority, when applicable.

155.25(4) *Clinical oversight.* The program shall have appropriate clinical oversight to ensure quality of clinical services provided to client/patients. This may be provided in house or through a consultation agreement.

155.25(5) *Staff development and training.* There shall be written policies and procedures that establish staff development. Staff development shall include orientation for staff and opportunities for continuing job-related education. For corporations organized under Iowa Code chapter 496C and sole practitioners, documentation of continuing education to maintain professional license or substance abuse certification will meet the requirement of this subrule.

a. Evidence of professional education, substance abuse certification or licensing, or orientation which includes the following: psychosocial, medical, pharmacological, confidentiality, tuberculosis, community resources; screening, evaluation, HIV/AIDS (Human Immunodeficiency Virus/Acquired Immune Deficiency Syndrome) information/education; and the attitudes, values and lifestyles of racially diverse cultures, other cultures and special populations.

b. Staff development shall ensure that staff members are kept informed of new developments in the field of substance abuse screening, evaluation and placement.

155.25(6) *Management information system.* Programs receiving Medicaid or state funding and programs performing OWI evaluation in accordance with 641—Chapter 157 shall submit client data to the Iowa Department of Public Health, Division of Behavioral Health and Professional Licensure, Lucas State Office Building, 321 East 12th Street, Des Moines, Iowa 50319-0075, in accordance with substance abuse reporting system procedures.

155.25(7) *Procedures manual.* All programs shall develop and maintain a procedures manual. This manual shall define the program's policies and procedures to reflect the program's activities. Revisions shall be entered with the date, name and title of the individual making the entries. This manual shall

contain all of the required written policies, procedures, definitions, and all other documentation required by these standards in the following areas:

- a. Legal authority and organization;
- b. Personnel policies, except for sole practitioner;
- c. Emergency medical services;
- d. Staff development;
- e. Maintenance of client case records;
- f. Confidentiality of client records;
- g. Clinical services, such as placement screening, evaluation and assessment; and
- h. Relationship with other providers.

155.25(8) Fiscal management. The program shall ensure proper fiscal management.

a. The fiscal management system shall be maintained in accordance with generally accepted accounting principles, including internal controls to reasonably protect the agency assets.

b. The OWI evaluation fee schedule shall be made public, and the client/patient shall be informed of the fee schedule at the time of scheduling the evaluation.

c. There shall be an insurance program that provides for the protection of the physical and financial resources of the program which provides coverage for all people, buildings, and equipment. The insurance program shall be reviewed annually by the governing body.

155.25(9) Personnel. Written personnel policies and procedures shall be developed, except for the sole practitioner.

a. These policies and procedures shall address the following areas:

- (1) Recruitment, selection, and certification of staff members;
- (2) Wage and salary administration;
- (3) Promotions;
- (4) Employee benefits;
- (5) Working hours;
- (6) Vacation and sick leave;
- (7) Lines of authority;
- (8) Rules of conduct;
- (9) Disciplinary actions and termination of employees;
- (10) Methods for handling cases of inappropriate client care;
- (11) Work performance appraisal;
- (12) Employee accidents and safety;
- (13) Employee grievances; and
- (14) Policy on staff persons suspected of using or abusing substances.

b. The written personnel policies and practices shall include an equal employment opportunity policy and an affirmative action plan for hiring members of protected classes.

c. There shall be written job descriptions that reflect the actual job situation.

d. The written personnel policies and practices shall include a mechanism for a written evaluation of personnel performance on at least an annual basis. There shall be evidence that this evaluation is reviewed with the employee and that the employee is given the opportunity to respond to this evaluation.

e. There shall be a personnel record kept on each staff member. These records shall contain as applicable:

- (1) Verification of training, experience, and all professional credentials relevant to the position;
- (2) Job performance evaluations;
- (3) Incident reports;
- (4) Disciplinary actions taken; and
- (5) Documentation of review and adherence to confidentiality laws and regulations. This review and agreement shall occur prior to assumption of duties.

f. There shall be written policies and procedures designed to ensure confidentiality of personnel records and a delineation of authorized personnel who have access to various types of personnel information.

155.25(10) Professional qualifications.

a. Personnel conducting screenings, placements, and assessments shall be certified through the Iowa board of substance abuse certification, or certified by an international certification and reciprocity consortium member board in the states of Illinois, Minnesota, Nebraska, Missouri, South Dakota, and Wisconsin; or be eligible for certification or have education, training, or experience in the substance abuse field.

b. The sole practitioner shall subscribe to a code of conduct such as that found in professional certification or licensure.

155.25(11) Child abuse/criminal records check.

a. Written policies and procedures shall prohibit mistreatment, neglect, or abuse of children and specify reporting and enforcement procedures for the program. Alleged violations shall be reported immediately to the director of the facility and appropriate department of human services personnel. Written policies and procedures on reporting alleged violations shall be in compliance with the department of human services, 42 CFR, Part 2, regulations on confidentiality of alcohol and drug abuse client records. Any employee found to be in violation of Iowa Code chapter 232, division III, part 2, as substantiated by the department of human services' investigation shall be subject to the agency's policies concerning dismissal.

b. For each employee working within a juvenile service area, the following shall be documented:

(1) Documentation of a criminal records check with the Iowa division of criminal investigation on all new applicants for employment asking whether the applicant has been convicted of a crime.

(2) A written, signed, and dated statement furnished by a new applicant for employment which discloses any substantiated reports of child abuse, neglect, or sexual abuse that may exist on the applicant.

(3) Documentation of a check after hiring on probationary or temporary status, but prior to permanently employing the individual with the Iowa central child abuse registry for any substantiated reports of child abuse, neglect, or sexual abuse.

(4) A person who has a record of a criminal conviction or founded child abuse report shall not be employed, unless an evaluation of the crime or founded child abuse has been made by the department of human services which concludes that the crime or founded child abuse does not merit prohibition of employment. If a record of criminal conviction or founded child abuse exists, the person shall be offered the opportunity to complete and submit Form 470-2310, Record Check Evaluation. In its evaluation, the department of human services shall consider the nature and seriousness of the crime or founded abuse in relation to the position sought, the time elapsed since the commission of the crime or founded abuse, the circumstances under which the crime or founded abuse was committed, the degree of rehabilitation, and the number of crimes or founded abuses committed by the person involved.

c. Each treatment staff member shall complete two hours of training relating to the identification and reporting of child abuse and dependent adult abuse within six months of initial employment, and at least two hours of additional training every five years thereafter.

155.25(12) Client case record maintenance. There shall be written policies and procedures governing the compilation, storage and dissemination of individual client case records.

a. These policies and procedures shall ensure that:

(1) The program exercises its responsibility for safeguarding and protecting the client case record against loss, tampering, or unauthorized disclosure of information;

(2) Content and format of client records are kept uniform; and

(3) Entries in the client case record are signed and dated.

b. The program shall provide adequate physical facilities for the storage, processing, and handling of client case records. These facilities shall include suitably locked, secured rooms or file cabinets.

c. Appropriate records shall be readily accessible to those staff members providing services directly to the client and other individuals specifically authorized by program policy.

d. There shall be a written policy governing the disposal and maintenance of client case records. Client case records shall be maintained for not less than five years from the date they are officially closed.

e. Each file cabinet or storage area containing client/patient case records shall be locked.

f. Policies shall be established that specify the conditions under which information on applicants or clients may be released and the procedures to be followed for releasing such information. All such policies and procedures shall be in accordance with the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987, which implement federal statutory provisions, 42 U.S.C. 290dd-3 applicable to alcohol abuse patient records, and 42 U.S.C. 290ee-3 applicable to drug abuse patient records, and state confidentiality laws and regulations.

g. Confidentiality of alcohol and drug abuse patient records. The confidentiality of alcohol and drug abuse patient records maintained by a program is protected by the “Confidentiality of Alcohol and Drug Abuse Patient Records” regulations, 42 CFR, Part 2, effective June 9, 1987, which implement federal statutory provisions, 42 U.S.C. 290dd-3 applicable to alcohol abuse patient records, and 42 U.S.C. 290ee-3 applicable to drug abuse patient records.

155.25(13) *Placement screening, evaluation and assessment.* There shall be clearly stated written criteria for determining the eligibility of individuals for placement screening evaluation and assessment.

a. The program shall have written policies and procedures governing a uniform process that defines:

- (1) Procedures to be followed when accepting referrals from outside agencies or organizations;
- (2) The types of records to be kept on all individuals applying for services.

b. The program shall conduct a screening, which shall include evaluation of the ASAM-PPC-2 for determining the recommendation of individuals for placement into a level of care.

c. At the time of screening, documentation shall be made that the individual has been informed of:

- (1) Evaluation costs to be borne by the client, if any;
- (2) Client’s rights and responsibilities; and
- (3) Confidentiality laws, rules and regulations.

d. Sufficient information shall be collected during the screening and evaluation process so that a recommendation can be made for placement into a level of care.

e. The results of the screening and evaluation process shall be clearly explained to the client and to the client’s family when appropriate. This shall be documented in the client record.

f. Programs conducting screenings and evaluations on persons convicted of operating a motor vehicle while intoxicated (OWI), Iowa Code section 321J.2, and persons whose driver’s license or nonresident operating privileges are revoked under chapter 321J, shall do so in accord with and adhere to 641—Chapter 157.

155.25(14) *Client case record contents.* There shall be a case record for each client that contains:

- a.* Results of all examinations, tests, and screening and admissions information;
- b.* Reports from referring sources when applicable;
- c.* Reports from outside resources shall be dated and include the name of the resource;
- d.* Multidisciplinary case conference and consultation notes, including the date of the conference or consultation, recommendations made, actions taken, and individuals involved when applicable;
- e.* Correspondence related to the client, including all letters and dated notations of telephone conversations relevant to the client’s treatment;
- f.* Information release forms;
- g.* Records of services provided; and
- h.* Management information system or other appropriate data forms.

155.25(15) *Emergency medical services.* The program shall ensure that emergency medical services are available through an affiliation agreement or contract or policy and procedure.

155.25(16) *Management of care.* The program shall ensure appropriate level of care utilization by implementing and maintaining the written placement screening.

155.25(17) *Building construction and safety.* All buildings in which clients receive treatment shall be designed, constructed, equipped, and maintained in a manner that is designed to provide for the physical safety of clients, personnel, and visitors.

a. All programs shall have written policies and procedures to provide a safe environment for clients, personnel and visitors. The program shall have written policies and procedures for the maintenance, supervision, and safe use of all its grounds and equipment.

b. Safety education shall include orientation of new employees to general facilitywide safety practices.

155.25(18) Outpatient facility. The outpatient facility shall be safe, clean, well ventilated, properly heated and in good repair.

a. The facility shall be appropriate for providing services available from the program and for protecting client confidentiality.

b. Furniture shall be clean and in good repair.

c. Written reports of annual inspections by state or local fire safety officials and records of corrective action taken by the program on recommendations articulated in such reports shall be maintained.

d. There shall be a written plan outlining procedures to be followed in the event of fire and tornado. This plan shall be conspicuously displayed at the facility.

e. All services shall be accessible to people with disabilities, or the program shall have written policies and procedures that describe how people with disabilities can gain access to the facility for necessary services.

f. The program shall ensure confidentiality of clients receiving services.

g. Smoking shall be prohibited except in designated areas.

155.25(19) Client rights. The program shall maintain written policies and procedures that ensure that the legal and human rights of clients participating in the program shall be observed and protected.

a. There shall be procedures to inform all clients of their legal and human rights at the time of evaluation.

b. There shall be documentation of the implementation of these procedures.

c. There shall be written policies and procedures for:

- (1) Clients' communications, e.g., opinions, recommendations;
- (2) Client grievances, with a mechanism for redress;
- (3) Prohibition of sexual harassment; and
- (4) Implementation of the Americans with Disabilities Act.

d. There shall be procedures designed to protect the clients' rights and privacy.

155.25(20) Administrative and procedural standards. The program shall comply with the following rules:

a. 641—155.2(125) Licensing.

b. 641—155.3(125) Type of licenses.

c. 641—155.4(125) Nonassignability.

d. 641—155.5(125) Application procedures.

e. 641—155.6(125) Application review.

f. 641—155.7(125) Inspection of licensees.

g. 641—155.8(125) Licenses—renewal.

h. 641—155.9(125) Corrective action plan.

i. 641—155.10(125) Grounds for denial of initial license.

j. 641—155.11(125) Suspension, revocation, or refusal to renew a license.

k. 641—155.12(125) Contested case hearing.

l. 641—155.13(125) Rehearing application.

m. 641—155.14(125) Judicial review.

n. 641—155.15(125) Reissuance or reinstatement.

o. 641—155.16(125) Complaints.

p. 641—155.17 Reserved.

q. 641—155.18(125) Deemed status.

r. 641—155.19(125) Funding.

s. 641—155.20(125) Inspection.

This rule is intended to implement Iowa Code section 125.13.

641—155.26 to 155.34 Reserved.

641—155.35(125) Specific standards for opioid treatment programs. All programs that use methadone or other medications approved by the Food and Drug Administration under Section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and the state of Iowa for use in the treatment of opioid addiction shall comply with this rule and Part II, Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, 42 CFR Part 8, Opioid Drugs in Maintenance and Detoxification Treatment of Opiate Addiction, effective May 18, 2001.

155.35(1) Definitions.

“Accredited opioid treatment program” means an opioid treatment program that is the subject of a current, valid accreditation from an accreditation body approved by the Substance Abuse and Mental Health Services Administration (SAMHSA).

“Certification” means the process by which SAMHSA determines that an opioid treatment program is qualified to provide opioid treatment under the federal opioid treatment standards.

“Certification application” means the application filed by an opioid treatment program for purposes of obtaining certification from SAMHSA.

“Certified opioid treatment program” means an opioid treatment program that is the subject of a current, valid certification.

“Comprehensive maintenance treatment” means maintenance treatment provided in conjunction with a comprehensive range of appropriate medical and rehabilitative services.

“Detoxification treatment” means the dispensing of an opioid agonist treatment medication in decreasing doses to an individual to alleviate adverse physical or psychological effects incident to withdrawal from the continuous or sustained use of an opioid drug and as a method of bringing the individual to a drug-free state within such a period.

“Interim maintenance treatment” means detoxification treatment for a period of more than 30 days but not in excess of 180 days.

“Maintenance treatment” means the dispensing of an opioid agonist treatment medication at stable dosage levels for a period in excess of 21 days in the treatment of an individual for opioid addiction.

“Medical and rehabilitative services” means services such as medical evaluations, counseling, and rehabilitative and other social programs (e.g., vocational and educational guidance, employment placement) that are intended to help patients in opioid treatment programs become or remain productive members of society.

“Medical director” means a physician who is licensed to practice medicine in accordance with Iowa Code chapter 148, 150, or 150A and who assumes responsibility for administering all medical services performed by the program, either by performing them directly or by delegating specific responsibility to authorized program physicians and health care professionals functioning under the medical director’s direct supervision.

“Medication unit” means a facility established as part of, but geographically separate from, an opioid treatment program from which licensed private practitioners or community pharmacists dispense or administer opioid agonist treatment medications or collect samples for drug testing or analysis.

“Opiate addiction” means a cluster of cognitive, behavioral, and physiological symptoms in which the individual continues use of opiates despite significant opiate-induced problems. Opiate dependence is characterized by an individual’s repeated self-administration of opiates that usually results in opiate tolerance, withdrawal symptoms, and compulsive drug-taking. Dependency may occur with or without the physiological symptoms of tolerance and withdrawal.

“Opioid agonist treatment medication” means any opioid agonist drug that is approved by the Food and Drug Administration under Section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) for use in the treatment of opiate addiction.

“*Opioid drug*” means any drug having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having such addiction-forming or addiction-sustaining liability.

“*Opioid treatment*” means the dispensing of an opioid agonist treatment medication, along with a comprehensive range of medical and rehabilitative services, when clinically necessary, to an individual to alleviate the adverse medical, psychological, or physical effects incident to opiate addiction. This term encompasses detoxification treatment, short-term detoxification treatment, long-term detoxification treatment, maintenance treatment, comprehensive maintenance treatment, and interim maintenance treatment.

“*Opioid treatment program*” or “*OTP*” means a program or practitioner engaged in opioid treatment or interim maintenance treatment.

“*Patient*” or “*client/patient*” means any individual who undergoes treatment in an opioid treatment program.

“*Program sponsor*” means the person responsible for the operation of the opioid treatment program and who assumes responsibility for all its employees, including any practitioners, agents, or other persons providing medical, rehabilitative, or counseling services at the program or any of its medication units. The program sponsor need not be a licensed physician but shall employ a licensed physician for the position of medical director.

“*Short-term detoxification treatment*” means detoxification treatment for a period not in excess of 30 days.

“*State authority*” means the Iowa department of public health, division of behavioral health and professional licensure, which regulates the treatment of opiate addiction with opioid drugs.

“*Treatment plan*” means a plan that outlines for each patient attainable short-term treatment goals that are mutually acceptable to the patient and the opioid treatment program and that specifies the services to be provided and the frequency and schedule for their provision.

155.35(2) Required approvals. All opioid treatment programs shall be licensed or approved by the board and shall maintain all other approvals required by the Drug Enforcement Administration, Substance Abuse and Mental Health Services Administration and the Iowa board of pharmacy examiners in order to provide services.

155.35(3) Central registry system. To prevent simultaneous enrollment of a client/patient in more than one program, all opioid treatment programs shall participate in a central registry as established by the division.

Prior to admission of an applicant to an opioid treatment program, the program shall submit to the registry the applicant’s name, birth date, and date of intended admission, and any other information required for the clearance procedure. No person shall be admitted to a program who is found by the registry to be participating in another such program. All opioid treatment programs shall report all admissions, discharges, and transfers to the registry immediately. All information reported to the registry from the programs and all information reported to the programs from the registry shall be treated as confidential in accordance with “Confidentiality of Alcohol and Drug Abuse Patient Records” regulations, 42 CFR Part 2, effective June 9, 1987.

a. Definitions. For purposes of this subrule:

“*Central registry*” means the system through which the Iowa department of public health, division of behavioral health and professional licensure, obtains client/patient identifying information about individuals applying for maintenance or detoxification treatment for the purpose of preventing an individual’s concurrent enrollment in more than one such program.

“*Opioid treatment program*” means a detoxification or maintenance treatment program which is required to report client/patient identifying information to the central registry, and which is located in the state.

b. Restrictions on disclosure. A program may disclose client/patient identifying information to a central registry for the purpose of preventing multiple enrollment of a client/patient only if:

(1) The disclosure is made when:

1. The client/patient is admitted for treatment; or

2. The treatment is interrupted, resumed or terminated.

(2) The disclosure is limited to:

1. Client/patient identifying information; and
2. Relevant dates of admission.

(3) The program shall inform the client/patient of the required disclosure prior to admission.

c. Use of information limited to prevention of multiple enrollments. Any information disclosed to the central registry to prevent multiple enrollments may not be redisclosed by the registry or such information used for any other purpose than the prevention of multiple enrollments unless so authorized by court order in accordance with 42 CFR, Part 2, effective June 9, 1987.

d. Permitted disclosure by the central registry to prevent a multiple enrollment. If a program petitions the central registry, and an identified client/patient is enrolled in another program, the registry may disclose:

(1) The name, address, and telephone number of the program in which the client/patient is currently enrolled to the inquiring program; and

(2) The name, address, and telephone number of the inquiring program to the program in which the client/patient is currently enrolled. The programs may communicate as necessary to verify that no error has been made and to prevent or eliminate any multiple enrollment.

155.35(4) Admission requirements.

a. Prior to or at the time of a client/patient's admission to an opioid treatment program, the program shall conduct a comprehensive assessment so as to determine appropriateness for admission.

b. The program shall verify, to the extent possible, the client/patient's name, address, and date of birth.

c. The program physician shall determine and document in the client/patient's record that the client/patient is physiologically dependent on narcotic substances and has been so dependent for at least one year prior to admission. A one-year history of addiction means that the client/patient was physiologically dependent on a narcotic at a time one year before admission to a program and was addicted for most of the year preceding admission.

(1) When physiological addiction cannot be clearly documented, the program physician or an appropriately trained staff member designated and supervised by the physician shall record in the client/patient's record the criteria used to determine the client/patient's current physiologic dependence and history of addiction. In the latter circumstance, the program physician shall review, date, and countersign the supervised staff member's evaluation to demonstrate the physician's agreement with the evaluation. The program physician shall make the final determination concerning a client/patient's physiologic dependence and history of addiction. The program physician also shall sign, date, and record a statement that the physician has reviewed all the documented evidence to support a one-year history of addiction and the current physiologic dependence and that in the physician's reasonable clinical judgment the client/patient fulfills the requirements for admission to maintenance treatment. Before the program administers any medication to the client/patient, the program physician shall complete and record the statement documenting addiction and current physiologic dependence.

(2) When a client/patient has voluntarily left an opioid treatment program in good standing and seeks readmission within two years of discharge, the program shall document the following information:

1. Prior opioid treatment of six months or more; and

2. The program physician shall enter in the client/patient's record that in the physician's medical judgment treatment is warranted.

d. The program shall collect a drug screening sample for analysis. Where dependence is substantially verified through other indicators, a negative drug screen will not necessarily preclude admission to the program.

e. Prior to admission, the program shall confirm with the central registry that the client/patient is not currently enrolled in another opioid treatment program.

f. If a potential client/patient has previously been enrolled in another program, the admitting program shall request from the previous program a copy of the client/patient's assessment data, treatment

plan, and discharge summary including the type of or reason for discharge. All programs subject to these rules shall promptly respond to such a request upon receipt of a valid release of information.

g. A person under the age of 18 is required to have had two documented attempts at short-term detoxification or drug-free treatment to be eligible for maintenance treatment. A one-week waiting period is required after such a detoxification attempt, however, before an attempt is repeated. The program physician shall document in the client/patient's record that the client/patient continues to be, or is again, physiologically dependent on narcotic drugs.

h. Program staff shall ensure that a client/patient is voluntarily participating in the program, and the client/patient shall sign a Consent to Treatment Form.

i. Pregnant client/patients may be admitted to opioid treatment with the following provisions:

(1) Evidence of current physiological dependency is not needed if the program physician certifies the pregnancy and, in the physician's reasonable judgment, finds treatment to be justified. Documentation of all findings and justifications for admission shall be documented in the client/patient's record by the program physician prior to the initial dose of methadone.

(2) Pregnant client/patients shall be offered comprehensive prenatal care. If the program cannot provide prenatal services, the program shall assist the client/patient in obtaining such services and shall coordinate ongoing care with the collateral provider.

(3) The program physician shall document that the client/patient has been informed of the possible risks to the unborn child from the use of medication and the risks of continued use of illicit substances.

(4) Should a program have a waiting list for admission to the program, pregnant client/patients shall be given priority.

155.35(5) Placement, admission and assessment. The program shall have written criteria for considering an individual for placement and admission. In addition, the program shall maintain current procedures to ensure that patients are admitted to maintenance treatment by qualified staff who have determined by using accepted medical criteria such as those outlined in the Diagnostic and Statistical Manual for Mental Disorders (DSM IV) that the person is currently addicted to an opioid drug.

a. The program shall have written policies and procedures governing a uniform process that defines:

- (1) The types of information to be gathered on all individuals upon admission;
- (2) Procedures to be followed when accepting referrals from outside agencies or organizations;
- (3) The types of records to be kept on all individuals applying for services.

b. The client/patient assessment (psychosocial history) shall be an analysis and synthesis of the client/patient's status, and shall address the client/patient's strengths, problems, and areas of clinical concern.

It shall be developed within the period of time between admission and the first review date specified for that particular level of care within the continued stay review process. This initial assessment upon admission to treatment services is an expansion of information on the six categories contained within the placement screening document.

c. When an individual refuses to divulge information or to follow the recommended course of treatment, this refusal shall be noted in the case record.

d. At the time of admission, documentation shall be made that the individual has been informed of:

- (1) General nature and goals of the program;
- (2) Rules governing client/patient conduct and infractions that can lead to disciplinary action or discharge from the program;
- (3) The hours during which the services are available;
- (4) Treatment costs, if any, to be borne by the client/patient;
- (5) Client/patient rights and responsibilities;
- (6) Confidentiality laws, rules and regulations; and
- (7) Information on preventing exposure to and transmission of human immunodeficiency virus.

e. Sufficient information shall be collected during the admission process so that the assessment process allows for the development of a complete assessment of the client/patient's status and a comprehensive plan of treatment can be developed.

f. The results of the screening and admission process shall be clearly explained to the client/patient, and to the client/patient's family when appropriate. This shall be documented in the client/patient record.

g. The program physician or designee, who is a qualified medical professional, shall complete a medical evaluation and a current psychological/mental status evaluation of the client/patient prior to the administration of the initial dose of medication. If the history and current psychological/mental status evaluation is completed by an individual other than the program physician, the program shall document in the client/patient's case record that this information was reviewed by the program physician prior to the initial dosage of medication. The medical evaluation shall include but not be limited to:

- (1) A complete medical history;
- (2) An assessment of the client/patient's current psychological and mental status;
- (3) A physical examination including examination for:
 1. Pulmonary, liver, or cardiac abnormalities;
 2. Infectious disease; and
 3. Dermatologic sequela of addiction.
- (4) Laboratory tests including:
 1. Serological test for syphilis; and
 2. Urine screening for drugs.
- (5) Intradermal PPD (tuberculosis skin test) and review of tetanus immunization status; and
- (6) When indicated, an EKG, chest X-ray, pap smear, pregnancy test, sickle cell screening, complete blood count and white cell differential, multiphasic chemistry profile, routine and microscopic urinalysis, or other tests indicated by the client/patient's condition.

155.35(6) Treatment plans. Based upon the initial assessment, an individualized written treatment plan shall be developed and recorded in the client/patient's case record.

a. A treatment plan shall be developed and shall delineate the client/patient's immediate needs and actions required to meet these needs.

b. The treatment plan shall be developed as soon after the client/patient's admission as is clinically feasible, but no later than 30 days following admission to an outpatient opioid maintenance treatment program.

c. The individualized treatment plan shall minimally contain:

- (1) A clear and concise statement of client/patient's current strengths and needs;
- (2) Clear and concise statements of the short- and long-term goals the client/patient will be attempting to achieve;
- (3) Type and frequency of therapeutic activities in which the client/patient will be participating;
- (4) The staff person(s) to be responsible for the client/patient's treatment; and
- (5) The specific criteria to be met for successful completion of treatment.

d. Treatment plans shall be developed in partnership with the client/patient. Comprehensive treatment plans shall be reviewed by the primary counselor and the client/patient as often as necessary, but no less than every 90 days during the first year and semiannually each subsequent year for opioid treatment modalities. Treatment plans shall be reviewed by the program physician on an annual basis.

e. The reviews shall consist of a reassessment of the client/patient's current status to include accomplishments and needs and a redefining of treatment goals when appropriate. The date of the review and any change, as well as the individuals involved in the review, shall also be recorded.

f. The use of abstract terms, jargon, or slang should be avoided in the treatment plan, and the plan should be written in a manner readily understandable to the average client/patient. The program shall provide the client/patient with copies of all treatment plans upon request.

g. Treatment plans shall be culturally and environmentally specific so as to meet the needs of the client/patient. Treatment plans shall be written in a manner readily understandable to the average person or with assistance available to illiterate, handicapped, or mentally impaired client/patients.

155.35(7) Progress notes. A client/patient's progress and current status in meeting the goals set in the treatment plan, as well as efforts by staff members to help the client/patient achieve these stated goals, shall be recorded in the client/patient's case record. Such information will be noted following each individual counseling session. Group therapy progress notes shall be recorded following each session or summarized at least weekly.

a. Entries shall be filed in chronological order and shall include the date services were provided or observations made, the date the entry was made, the signature or initials and staff title of the individual rendering the services. All progress notes shall be entered into the client/patient case record in permanent pen, typewriter, or by computer.

b. All entries that involve subjective interpretations of a client/patient's progress should be supplemented with a description of the actual behavioral observations which were the basis for the interpretation.

c. The use of abstract terms, jargon, or slang should be avoided in progress notes.

d. If a client/patient is receiving services from an outside resource, the program shall attempt to secure a written copy of status reports and other client/patient records from that resource.

e. The program shall develop a uniform progress notes format to be used by all clinical staff.

155.35(8) Rehabilitative services. The program shall have policies and procedures on the minimum attendance for rehabilitative services relative to the client/patient's progress and length of involvement in treatment. The minimum frequency of rehabilitative services shall occur at the same frequency of on-site dosing for client/patients receiving more than two take-home dosages a week in the first year. The minimum frequency for rehabilitative services for client/patients receiving two or fewer take-home dosages shall be weekly. The program shall provide rehabilitative services that are appropriate for the client/patient based on needs identified during the assessment process. The program may provide rehabilitative services through collateral agreements with other service providers. A client/patient who does not comply with the program's rehabilitative service requirements shall be placed on a period of probation as defined by the program, or be required to immediately increase the frequency of clinic attendance for medication and rehabilitative services. If, during a period of probation, the client/patient continues to be in noncompliance with rehabilitation services, the program shall continue to increase the attendance requirement until daily attendance is obtained or the client/patient complies with rehabilitative services. This requirement shall not preclude the program's ability to determine that discharge of a client/patient is warranted for therapeutic reasons or program needs.

155.35(9) Medication dispensing.

a. The program physician shall determine the client/patient's initial and subsequent dose of medication and clinic dosing schedule and shall assume responsibility for the amount of the narcotic drug administered or dispensed and shall record, date, and sign in each client/patient's case record each change in the dosage schedule. The physician shall directly communicate orders to the pharmacy or registered or licensed personnel supervising medication dispensing. The program physician may communicate such orders verbally; however, orders shall be reduced in writing and countersigned within 72 hours by the program physician.

b. The initial dose of medication shall not exceed 30 milligrams, and the total dose for the first day shall not exceed 40 milligrams, unless the program physician documents in the client/patient's case record that 40 milligrams did not suppress opiate abstinence symptoms. A client/patient transferring into the program or on a guest-dosing status may receive an initial dosage of no more than the last daily dosage authorized by the former or primary program.

(1) Medication shall be administered by a professional authorized by law.

(2) No medication shall be administered unless the client/patient has completed admission procedures, unless the client/patient enters the program on a weekend and the central registry cannot be contacted. If, in the clinical judgment of the program physician, a client/patient is experiencing an emergency situation, the admission procedures may be completed on the following workday.

c. Administration.

(1) Take-home medication shall be labeled in accordance with state and federal law and have childproof caps.

(2) A dispensing log shall be kept in the dispensing area and in the client/patient case records which shall document the amount of medication dispensed and include the signature of the staff member authorized to dispense the medication. No dose shall be dispensed until the client/patient has been positively identified and the dosage amount is compared with the currently ordered and documented dosage level.

(3) Ingestion shall be observed and verified by the staff person authorized to dispense the medication.

(4) The program physician shall record, date, and sign in each client/patient's case record each change in the dosage schedule. Daily dosages of medications in excess of 100 milligrams shall be dispensed only with the approval of the program physician and shall be documented and justified in the client/patient's case record.

155.35(10) Take-home or unsupervised medication use.

a. Take-home medication may be given to client/patients who demonstrate a need for a more flexible schedule in order to enhance and continue rehabilitative progress. For client/patients receiving take-home medication, the program shall document the following requirements:

(1) Absence of recent abuse of drugs (narcotic or nonnarcotic), including alcohol;

(2) Regular attendance at the clinic;

(3) Attendance at a licensed or approved treatment program for rehabilitative services (e.g., programs are considered approved when licensed or approved in accordance with Iowa Code chapter 125);

(4) Absence of recent criminal activity;

(5) Stable home environment and social relationships;

(6) Active employment or participation in school, or similar responsible activities related to employment, education or vocation; and

(7) Assurance that medication can be safely transported and stored by the client/patient for the client/patient's own use.

b. Prior to granting take-home privileges, the program physician shall document in the client/patient's case record that all the above criteria have been considered and that, in the physician's professional judgment, the risk of diversion or abuse is outweighed by the rehabilitative benefits to be derived.

c. If the client/patient meets the above criteria, the client/patient may receive take-home medication according to the following guidelines:

(1) During the first 90 days of treatment, the take-home supply is limited to a single dose each week;

(2) During the second 90 days of treatment, the take-home supply is limited to two doses per week;

(3) In the remaining months of the first year, a patient may be given a maximum six-day supply of take-home medication;

(4) After one year of continuous treatment, a patient may be given a maximum two-week supply of take-home medication;

(5) After two years of continuous treatment, a patient may be given a maximum one-month supply of take-home medication; and

(6) Take-home medication shall not be dispensed to patients in interim maintenance treatment or detoxification.

d. If a client/patient is unable to conform to the applicable mandatory schedule, a revised schedule may be permitted provided the program receives an exception to these rules from the division and SAMHSA, when applicable. A copy of the written exception shall be placed in the client/patient's case record. The division will consider exceptions only in unusual circumstances. When a program is applying for less frequent pickups for client/patients, approval will be based on considerations in addition to distance when another program exists within 25 miles of the client/patient's residence.

e. Should a patient receiving take-home medication provide a drug screen that is confirmed either positive for substances or negative for the prescribed medication, the program shall ensure that when test results are used, presumptive laboratory results are distinguished from results that are definitive.

(1) The program physician shall place the client/patient on three months' probation, as defined by the program, or increase the client/patient's frequency of clinic dosing after considering the client/patient's overall progress and length of involvement in the program.

(2) Should the client/patient provide a drug screen that is positive for substances or negative for medication during a period of probation, the program physician shall increase the client/patient's frequency of clinic attendance for dosage pickup for at least three months. If after the three-month period the client/patient meets the eligibility criteria, the client/patient may return to the previous take-home schedule.

f. Take-home or unsupervised dosages of medication in excess of 100 milligrams may be dispensed by the program physician when the need for those dosages is carefully reviewed and considered and justified in the client/patient's case record based on the physician's clinical judgment.

155.35(11) Drug testing. Each program shall establish policies and procedures for the collection of drug-screening specimens and utilization of results.

a. The program shall ensure that an initial drug-screening test or analysis is completed for each prospective client/patient and that at least eight additional random tests or analyses are performed on each client/patient during the first year in maintenance treatment and that at least quarterly random tests or analyses are performed on each client/patient in maintenance treatment for each subsequent year. When a sample is collected from each client/patient for such a test or analysis, it shall be done in a manner that minimizes opportunity for falsification. Each test or analysis shall be analyzed for opiates, methadone, amphetamines, cocaine, and barbiturates. In addition, if any other drug or drugs have been determined by a program to be abused in that program's locality, or as otherwise indicated, each test or analysis must be analyzed for any of those drugs as well. Any laboratory that performs the testing required under this rule shall be in compliance with all applicable federal proficiency testing and licensing standards and all applicable state standards.

b. The program shall ensure that test results are not used as the sole criterion to force a client/patient out of treatment but are used as a guide to change treatment approaches. The program shall also ensure that when test results are used, presumptive laboratory results are distinguished from results that are definitive.

155.35(12) Client/patient case records. The program shall have written policies and procedures governing the compilation, storage and dissemination of individual client/patient case records.

a. These policies and procedures shall ensure that:

(1) The program exercises its responsibility for safeguarding and protecting the client/patient case records against loss, tampering, or unauthorized disclosure of information;

(2) Content and format of client/patient case records are kept uniform; and

(3) Entries in the client/patient case record are signed and dated.

b. The program shall provide adequate physical facilities for the storage, processing, and handling of client/patient case records. These facilities shall include suitably locked, secured rooms or file cabinets.

c. Appropriate records shall be readily accessible to those staff members providing services directly to the client/patient and other individuals specifically authorized by program policy. Records should be kept in proximity to the area in which the client/patient normally receives services.

d. The program shall have a written policy governing the disposal and maintenance of client/patient case records. Client/patient case records shall be maintained for not less than seven years from the date they are officially closed.

e. Confidentiality of alcohol and drug abuse client/patient case records. The confidentiality of alcohol and drug abuse client/patient case records maintained by a program is protected by the "Confidentiality of Alcohol and Drug Abuse Patient Records" regulations 42 CFR, Part 2, effective June 9, 1987, which implement federal statutory provisions, 42 U.S.C. 290dd-3 applicable to alcohol abuse client/patient records, and 42 U.S.C. 290ee-3 applicable to drug abuse client/patient records. The program is precluded from identifying that a client/patient attends the program or disclosing any information identifying a client/patient as an alcohol or drug abuser unless:

(1) The client/patient consents in writing;

- (2) The disclosure is allowed by a court order;
- (3) The disclosure is made to medical personnel in a medical emergency; or
- (4) The disclosure is required by law.

155.35(13) *Diversion prevention plan.*

a. The program shall develop a diversion identification and prevention plan that:

- (1) Outlines methods by which the program shall detect possible diversion of take-home medication; and
- (2) Actions to be taken when diversion is identified or suspected.

b. The program shall establish and implement proactive procedures to reduce the likelihood or possibility of diversion.

155.35(14) *Quality improvement.* The program shall have an ongoing quality improvement process designed to objectively and systematically monitor and evaluate the quality and appropriateness of client/patient care, pursue opportunities to improve client/patient care, and resolve identified problems. Quality improvement efforts shall be facilitywide in scope and include review of clinical and professional services.

a. The program shall have a written plan for a quality improvement process. The written plan shall describe the objectives, organization, scope, and mechanisms for overseeing the effectiveness of monitoring, evaluation, and problem-solving activities.

b. The program shall establish written policies and procedures to describe and document the quality improvement process, including the monitoring and evaluation activities of the program. The policies and procedures shall ensure that:

- (1) Information is collected or screened by a designated individual, individuals, or committee. Quality improvement activities may be contracted through all outside resources;
- (2) Objective criteria are utilized in the development and application of criteria relating to the care or service the program provides; and
- (3) Objective criteria are utilized in the evaluation of the information collected in order to identify important problems in, or opportunities to improve, client/patient care and clinical performance.

c. The program shall document that the quality of client/patient care is improved and identified problems are resolved through appropriate actions taken by the program's administrative and supervisory staff and through professional staff functions.

d. Necessary information shall be communicated among program components, modalities, or services when problems or opportunities to improve client/patient care involve more than one program component or service.

e. The program shall ensure that the status of identified problems is tracked to ensure improvement or resolution.

f. The program shall ensure that information from program components or services and the findings of discrete quality improvement activities are used to detect trends, patterns of performance, and potential problems that affect more than one program component or service.

g. The objectives, scope, organization, and effectiveness of the quality improvement process are evaluated at least annually and revised as necessary.

155.35(15) *Interim maintenance treatment.*

a. An approved program may offer interim maintenance treatment when, due to capacity, the program cannot place the client/patient in a program offering comprehensive services within 14 days of the client/patient's application for admission.

b. An approved program may provide interim maintenance treatment only if the program also provides comprehensive maintenance treatment to which interim maintenance treatment client/patients may be transferred.

c. Interim maintenance treatment program approval. Before a public or nonprofit private narcotic treatment program may provide interim maintenance treatment, the program must receive approval of both the U.S. Food and Drug Administration and the division of behavioral health and professional licensure and:

(1) The program director must certify that the program seeking such authorization is unable to place client/patients in a public or private nonprofit program within a reasonable geographic area within 14 days of the client/patient's application for admission; and

(2) That interim maintenance treatment will not reduce the capacity of the program's comprehensive maintenance treatment.

(3) Client/patients admitted to interim maintenance treatment shall be transferred to comprehensive maintenance treatment within 120 days of admission.

d. Minimum standards for interim maintenance treatment. The program may admit a client/patient who is eligible for comprehensive maintenance treatment to interim maintenance treatment if the client/patient cannot be placed in a public or private nonprofit comprehensive program within a reasonable geographic area and within 14 days of application for services. An initial drug screen, and at least two others, shall be taken from the client/patient during the maximum admission period of 120 days. A program shall establish and follow reasonable criteria for determining the transfer of client/patients to comprehensive maintenance treatment. These transfer criteria shall be in writing, available for inspection, and shall include at a minimum a preference for the transfer of pregnant client/patients. Interim maintenance shall be conducted in accordance with all applicable federal regulations and state rules. The program shall notify the division when a client/patient begins interim treatment; when a client/patient leaves interim treatment, and when a client/patient transfers to comprehensive maintenance treatment. Such notifications shall be documented by the program in the client/patient's case record. All requirements for comprehensive maintenance treatment apply to interim maintenance treatment with the following exceptions:

(1) The medication is required to be administered daily under observation;

(2) Take-home medication is not allowed;

(3) Initial and comprehensive treatment plans are not required;

(4) A primary counselor is not required to be assigned to the client/patient; and

(5) Interim maintenance cannot be provided for longer than 120 days in any 12-month period.

155.35(16) *Complaints, investigations, suspension and revocation.* The rules relating to complaints, investigation, suspension and revocation as outlined in 641—155.11(125) through 155.17(125) shall apply to opioid treatment programs.

155.35(17) *Deemed status.* The board shall grant deemed status to programs accredited either by a recognized national or not-for-profit accreditation body when the board determines that the accreditation is for the same services.

a. National accreditation bodies. The national accreditation bodies currently recognized as meeting board criteria for possible deemed status are:

(1) Joint Commission on Accreditation of Healthcare Organizations (JCAHO).

(2) Council on Accreditation of Rehabilitation Facilities (CARF).

(3) Council on Accreditation of Children and Family Services (COA).

(4) American Osteopathic Association (AOA).

b. Credentials and expectations of accreditation bodies.

(1) The accreditation credentials of the bodies shall specify the types of organizations, programs, and services the bodies accredit and targeted population groups, if appropriate.

(2) Deemed status means that the board and division shall recognize, in lieu of their own review, an outside body's review, assessment and accreditation of a hospital-based or freestanding community-based substance abuse program's operations, functioning, and services that correspond to those described in this chapter.

c. Responsibilities of programs granted deemed status.

(1) When a program receives accreditation and is then granted licensure through deemed status, the program shall continue to be responsible for meeting all requirements in accordance with this chapter and all applicable laws and regulations.

(2) If a program that is nationally accredited requests deemed status for services not covered by the national accreditation body's standards, but covered by this chapter, the licensing for those services shall be conducted by the division.

(3) Copies of the entire CARF, JCAHO, COA or AOA behavioral health accreditation survey/inspection report and certificate of accreditation shall be submitted to the division with the application for deemed status provided by the division.

(4) The program shall submit to the division accreditation corrective plans or written conditions to accreditation.

(5) The program shall be currently accredited by a board-approved national accreditation body for services that are outlined in this chapter.

(6) The program shall advise the division of any changes in the program's accreditation status, address, executive director/CEO, facility locations, or any other changes to the program/organization within 30 days of such changes.

(7) All survey reports for the hospital-based or freestanding community-based substance abuse treatment program from the accrediting or licensing body shall be sent to the division.

(8) For a program granted deemed status, the period of deemed status shall coincide with the period of time that program is awarded accreditation by the national accreditation body. However, under no circumstances shall it be longer than three years.

d. The board and division shall retain the following responsibilities and rights when deemed status is granted to program/organizations:

(1) The division may conduct focused or general on-site follow-up visits as determined appropriate.

(2) The division shall investigate all complaints that are under the authority of this chapter and recommend and require corrective action or other sanctions in accordance with 641—155.16(125). All complaints, findings and required corrective action may be reported to the accreditation body.

(3) The board shall review and act upon deemed status if necessary when complaints have been founded, when national accreditation bodies find instances of noncompliance with accreditation, when the accreditation status of the program expires without renewal, when the program's accreditation status is downgraded or withdrawn by the accreditation body, or when focused reviews find instances of noncompliance.

e. Continuation of deemed status. The program shall submit a copy of all CARF, JCAHO, COA or AOA behavioral health accreditation survey reports to the division.

These rules are intended to implement Iowa Code sections 125.13 and 125.21.

- ² Effective date of 643—3.35(125) delayed 70 days by the Administrative Rules Review Committee at its meeting held April 11, 1994; on June 15, 1994, the Committee voted to delay the rule until adjournment of the 1995 General Assembly.

CHAPTER 156
LICENSURE STANDARDS FOR SUBSTANCE ABUSE TREATMENT PROGRAMS
IN CORRECTIONAL FACILITIES

[Prior to 7/27/88, see Substance Abuse, Iowa Department of[805] Ch 6]

[Prior to 3/29/06, see 643—Ch 6]

641—156.1(125) Definitions. Unless otherwise indicated, the following definitions shall apply to the specific terms used in these rules:

“Admissions” means the point in an inmate’s relationship with the program at which the screening process has been completed and the inmate is to receive treatment services.

“Affiliation agreement” means a written agreement between the governing authority of the program and another organization under the terms of which specified services, space or personnel are provided to one organization by the other, but without exchange of moneys.

“Applicant” means any substance abuse treatment program which has applied for a license or renewal.

“Application” means the process through which a substance abuse treatment program applies for a license or renewal as outlined in the application procedures.

“Assessment” means the process of evaluating an inmate’s strengths, weaknesses, problems, current status, and needs so that a treatment plan can be developed.

“Board” means the state board of health created pursuant to Iowa Code chapter 136.

“Case management” means the process of using predefined criteria to evaluate the necessity and appropriateness of client/patient care.

“Chemical dependency” means alcohol or drug dependence or psychoactive substance use disorder as defined by the criteria in the current Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM IV), or by other standardized and widely accepted criteria.

“Chemical dependency rehabilitation services” means those inmate or group services that are directly related to chemical dependency or the inmate treatment plan. These services may include inmate, group, and family counseling; educational services; curriculum-based therapeutic approaches; self-help groups; and structured recreational activities. These services do not include active employment or education courses beyond the secondary level.

“Chemical substance” means alcohol, wine, spirits, and beer as defined in Iowa Code chapter 123 and controlled substances as defined in Iowa Code section 124.101.

“Concerned person” means an inmate who is receiving treatment services due to problems arising from the person’s involvement or association with a correctional substance abuser or chemically dependent inmate or client/patient, and is negatively affected by the behavior of the substance abuser, chemically dependent inmate, or client/patient.

“Continuing care” means providing a specific period of structured therapeutic involvement designed to enhance, facilitate and promote transition from primary treatment to ongoing recovery.

“Continuum of care/treatment” means a structure of interlinked treatment modalities and services designed so that an inmate’s changing needs will be met as that inmate moves through the treatment and recovery process.

“Contract” means a formal legal document adopted by the governing authority of the program and any other organization, agency, or individual that specifies services, personnel, or space to be provided to the program as well as the moneys to be expended in the exchange.

“Correctional substance abuse treatment facilities” means those correctional specialized unit facilities and OWI programs that provide 24-hour, live-in, seven-days-a-week substance abuse treatment services.

“Counselor” means an individual who, by virtue of education, training, or experience, provides treatment, which includes advice, opinion, or instruction, to an inmate or in a group setting to allow an opportunity for an inmate to explore the inmate’s problems related directly or indirectly to substance abuse or dependence.

“Culturally and environmentally specific” means integrating into the assessment and treatment process the ideas, customs, beliefs, and skills of a given population, as well as an acceptance, awareness, and celebration of diversity regarding conditions, circumstances, and influences surrounding and affecting the development of an inmate or group.

“Department” means the Iowa department of public health.

“Designee” means the staff person or counselor who is delegated tasks, duties and responsibilities normally performed by the treatment supervisor, treatment director or executive director.

“Detoxification” means the withdrawal of an inmate from a physiologically addicting substance.

“Director” means the director of the Iowa department of public health.

“Discharge criteria” means criteria to be considered when determining appropriateness of discharge or referral to a different level of treatment.

“Discharge planning” means the process, begun at admission, of determining a client/patient’s continued need for treatment services and of developing a plan to address ongoing client/patient posttreatment needs. Discharge planning may or may not include a document identified as a discharge plan.

“Division” means the division of behavioral health and professional licensure.

“Extended residential program” means a designated unit for substance abuse treatment that is staffed 24 hours a day, seven days a week. There is a structured daily schedule. Treatment services total a minimum of 20 hours a week for no less than four months, unless the primary residential program is two months or longer.

“Facility” means a hospital, correctional institution, a program located in a judicial district, or detoxification center, or installation providing care, maintenance, and treatment for substance abusers and licensed by the department under Iowa Code section 125.13.

“Follow-up” means the process for determining the status of an inmate who has been referred to an outside resource for services or who has been discharged from the program.

“Governing body” means the individual(s), group, or agency that has ultimate authority and responsibility for the overall operation of the facility.

“Inmate” means a person confined in a correctional institution or under the supervision of the department of corrections or a judicial district department of correctional services as a result of a conviction of a public offense.

“Intake” means the process of collecting and assessing information to determine the appropriateness of admitting or retaining an inmate in a substance abuse treatment program.

“Iowa board of substance abuse certification” means the professional certification board that certifies substance abuse counselors and prevention specialists in the state of Iowa.

“Licensee” means any program licensed by the department.

“Licensure” means the issuance of a license by the department upon due process by the board which validates the licensee’s compliance with substance abuse standards and authorizes the licensee to operate a substance abuse treatment program in the state of Iowa.

“Licensure weighting report” means the report that is used to determine the type of license for which a program qualifies based on point values assigned to areas reviewed and total number of points attained. In addition, a minimum percent value in each of three categories shall be attained to qualify a program for a license as follows: 95 percent or better rating in clinical, administrative and programming for a three-year license; 90 percent or better rating in clinical, administrative and programming for a two-year license; or less than 90 percent but no less than 70 percent rating in clinical, administrative and programming for a one-year license.

“May,” in the interpretation of a standard, means an acceptable method that is recognized but not necessarily preferred.

“Outpatient program” means substance abuse services totaling a minimum of ten hours per week for no less than three months that are not assigned to a designated unit.

“Primary residential program” means a designated unit for substance abuse treatment that is staffed 24 hours a day, seven days a week. There is a structured daily schedule. Treatment services total a minimum of 30 hours per week for no less than one month.

“Program” means any partnership, corporation, association, correctional facility, governmental subdivision, or public or private organization.

“Protected classes” means classes of people who have required special legislation to ensure equality.

“Quality improvement” means the process of objectively and systematically monitoring and evaluating the quality and appropriateness of client/patient care to improve client/patient care and resolve identified problems.

“Referral agreement” means a written document defining a relationship between the program and an outside resource for the provision of inmate services that are not available within the substance abuse treatment program.

“Rehabilitation” means assisting an inmate to attain the fullest physical, mental, social, vocational, and economic usefulness within the inmate’s own capabilities. Rehabilitation may include, but is not limited to, medical treatment, psychological therapy, occupational training, job counseling, prosocial behavioral change and domestic rehabilitation/habilitation, and education.

“Relapse” means progressively irresponsible, inappropriate and dysfunctional or criminal behavior patterns that could lead to resumption of alcohol or drug use. “Relapse” also refers to the resumption of alcohol or drug use.

“Rule” means each statement of general applicability that implements, interprets, or prescribes department law or policy, or that describes the organization, procedure or practice requirements of the department. The term includes the amendment or repeal of existing rules as specified in the Iowa Administrative Code.

“Screening” means the process by which a client/patient is determined to be appropriate and eligible for admission to a particular program. The focus is on the minimum criteria necessary for appropriateness/eligibility.

“Shall,” in the interpretation of a standard, means a mandatory statement; that is, the only acceptable method under the present standards.

“Should,” in the interpretation of a standard, means the commonly accepted method, yet allows for the use of effective alternatives.

“Staff” means any individual who provides services to the program on a regular basis as a paid employee, agent, or consultant or as a volunteer.

“Standards” means specifications that represent the minimum criteria of a substance abuse treatment program which are acceptable for the issuance of a license.

“Substance abuser” means an inmate who habitually lacks self-control as to the use of chemical substances or uses chemical substances to the extent that the inmate’s health is substantially impaired or endangered or that the inmate’s social or economic function is substantially disrupted.

“Treatment” means the broad range of planned and continuing inpatient, outpatient, and residential care services, including diagnostic evaluation, counseling, and medical, psychiatric, psychological, and social service care which may be extended to substance abusers, concerned persons, concerned family members or significant others, and which is geared toward influencing the inmate’s behavior to achieve a state of rehabilitation.

“Treatment days” means days in which the treatment program is open for services or actual working days.

“Treatment plan” means a written plan which specifies the goals, activities, and services determined through process of assessment to be appropriate to meet the objective needs of the inmate.

“Treatment planning” means the process by which a counselor and client/patient identify and rank problems, establish agreed-upon goals, and decide on the treatment process and resources to be utilized.

“Treatment supervisor” means an individual who, by virtue of education, training, or experience, is capable of assessing the psychosocial history of a substance abuser to determine the treatment plan most appropriate for the inmate. This individual shall be designated by the applicant.

641—156.2(125) Inspection. Upon approval of the warden/superintendent or district director, each applicant or licensee shall agree as a condition of license to permit properly designated representatives of the department to enter into and inspect any and all premises of facilities for which a license has been

either applied or issued to verify information contained in the application or to ensure compliance with all laws, rules, and regulations during all hours of operation of the facility and at any other reasonable hour. Further, each licensee shall agree to permit properly designated representatives of the department to audit and collect statistical data from all records maintained by the licensee. Right of entry and inspection shall, under due process of law, extend to any premises on which the department has reason to believe a program is being operated in violation of these rules. A facility shall not be licensed which does not permit inspection by the department or examination of all records, including financial records, methods of administration, general and special dietary programs, the disbursement of drugs and methods of supply, and any other records the board deems relevant to the establishment of a system.

641—156.3(125) General standards for all correctional substance abuse treatment programs. The following standards shall apply to all correctional substance abuse treatment programs in the state of Iowa regardless of the category of treatment services provided by the programs. In situations in which differences between general standards for all treatment programs and specific standards occur, both general and specific standards must be met.

156.3(1) Procedures manual. All programs shall develop and maintain a procedures manual. This manual shall define the program's policies and procedures to reflect the program's activities. Revisions to the procedures manual shall be entered with the date, name, and title of the individual making the entries. This manual shall contain all of the required written policies, procedures, definitions, and all other documentation required by these standards in the following areas:

- a. Organization and management of the program;
- b. Personnel policies;
- c. Medical services/detoxification;
- d. Staff training;
- e. Intake and initial assessment;
- f. Treatment planning;
- g. Inmate case records;
- h. Discharge planning;
- i. Inmate rights;
- j. Confidentiality of inmate records;
- k. Medication control;
- l. Treatment philosophy;
- m. Objectives;
- n. The role of the coordinator/director in charge of this service;
- o. Admission criteria; and
- p. Interrelationship with other service components and providers.

The policies and procedures manual shall be reviewed and approved on an annual basis.

156.3(2) Personnel. Written personnel policies and procedures shall be developed by all programs. Merit rules may be utilized in lieu of specific program personnel policies and procedures.

- a. All programs shall have written policies and procedures that address the following areas:
 - (1) Recruitment, selection, and certification of staff members;
 - (2) Recruitment and selection of volunteers;
 - (3) Wage and salary administration;
 - (4) Promotions;
 - (5) Employee benefits;
 - (6) Working hours;
 - (7) Vacation and sick leave;
 - (8) Lines of authority;
 - (9) Rules of conduct;
 - (10) Disciplinary actions and termination of employees;
 - (11) Methods for handling cases of inappropriate client care;
 - (12) Work performance appraisal;

- (13) Employee accidents and safety;
- (14) Employee grievances; and
- (15) Policy on staff persons suspected of using or abusing substances.

b. The written personnel policies and practices shall include an equal employment opportunity policy and an affirmative action plan for hiring members of protected classes.

c. There shall be written job descriptions.

d. Job descriptions shall accurately reflect the actual job situation and shall be reviewed when necessary by the executive director or whenever there is a change in required qualifications or duties.

e. All positions shall have job descriptions included in the personnel section of the procedures manual or personnel record of the staff member.

f. The written personnel policies and practices shall include a mechanism for the written evaluation of personnel performance on at least an annual basis. Evidence that this evaluation is reviewed with the employee and that the employee is given the opportunity to respond to this evaluation shall be documented.

g. A personnel record shall be kept on each staff member. These records shall contain as applicable:

- (1) Verification of training, experience, and all professional credentials relevant to the position;
- (2) Documentation of a criminal records check with the Iowa division of criminal investigation;
- (3) Job performance evaluations;
- (4) Incident reports;
- (5) Disciplinary actions taken; and

(6) Documentation of review and adherence to confidentiality laws and regulations. This review and agreement shall occur prior to assumption of duties.

h. Written policies and procedures shall be designed to ensure confidentiality of personnel records and a delineation of authorized personnel who have access to various types of personnel information.

i. Personnel providing screening, evaluations, assessments or treatment shall be certified through the Iowa board of substance abuse certification, or certified by an international certification and reciprocity consortium member board, or have education, training, and experience in the substance abuse field.

j. There shall be written policies related to the prohibition of sexual harassment.

k. There shall be written policies related to the implementation of the Americans with Disabilities Act.

156.3(3) Medical services. A medical history and physical examination shall be conducted for all inmates within seven days of admission to the residential OWI facility. Laboratory examinations may be completed as deemed necessary by the physician.

The program shall have written policies and procedures defining the appropriate action to be taken when a medical emergency arises and the detoxification of an inmate is necessary.

OWI facilities shall ensure by contract or affiliation agreement that emergency medical services at a general hospital are available on a 24-hour, seven-days-a-week basis.

156.3(4) Confidentiality. All inmate substance abuse records shall be kept confidential and shall be handled in compliance with the Confidentiality of Alcohol and Drug Abuse Patient Records regulations, 42 CFR Part 2, effective June 9, 1987, which implement federal statutory provisions, 42 U.S.C. 290dd-3, applicable to alcohol abuse client/patient records, and 42 U.S.C. 290ee-3, applicable to drug abuse client/patient records.

a. *Disclosure of benefits.* If the inmate gives specific written consent, the content of the record may be disclosed to legal counsel upon written endorsement by the attorney to nongovernmental personnel for the purpose of collecting health insurance claims or other benefits or to a present or potential employer when employment is conditioned upon the status or progress in a treatment program.

b. *Disclosure for evaluation.* Disclosure of information for research, management, audit, or evaluation purposes must be specifically authorized by the warden/superintendent or district director.

c. *Record of consent.* The inmate's written release of information shall be kept in the inmate's record.

d. Confidentiality orientation. A program shall ensure that all staff and inmates, as a part of their initial orientation, are made aware of the confidentiality requirements. Any decision to disclose inmate information under any provision of Iowa Code chapter 125, or other applicable federal or state rule which permits disclosure, shall be made only by the warden/superintendent or district director.

156.3(5) Clinical oversight. The program shall have appropriate clinical oversight to ensure quality of clinical services provided to inmates. Clinical oversight may be provided in house or through consultation. Clinical oversight may include assisting the program in developing policies and procedures relating to the assessment and treatment of psychopathology, assisting in the training of the staff and providing assistance to the clinical staff in assessment or treatment. The executive director or designee shall ultimately be responsible for clinical services and implementation of treatment services to inmates.

156.3(6) Staff development and training. There shall be written policies and procedures that establish staff development. Staff development shall include orientation for and opportunities for continuing job-related education.

Documentation of continuing education to maintain substance abuse certification shall meet the requirements of this subrule.

a. Evidence of substance abuse certification or orientation which includes the following: psychosocial, medical, and pharmacological information, confidentiality, and tuberculosis and blood-borne pathogens; an orientation to the program and community resources; counseling skill development; HIV/AIDS (human immunodeficiency virus/acquired immune deficiency syndrome) information/education; and the attitudes, values and lifestyles of racially diverse cultures, other cultures and special populations.

b. The program shall establish on-site training programs or enter into relationships with outside resources capable of meeting staff training needs.

c. The staff development program shall ensure that staff members are kept informed of new developments in the field of substance abuse treatment and rehabilitation.

d. In-service training programs shall be instituted when program operations or functions are changed and shall be designed to allow staff members to develop new skills.

e. Staff development activities and participation in state, national and regional training shall be planned and scheduled on an annual basis. These activities shall be documented in order to evaluate their scope, effectiveness, attendance, and amount of time spent on such efforts. The written plan for on-site staff development and the activities for professional growth and development of personnel shall be based on the annual needs assessment and shall be available to all personnel.

f. A record shall be kept of on-site training activities and shall include, but not necessarily be limited to, the following:

- (1) Date of the meeting;
- (2) Names of persons attending; and
- (3) Topics discussed.

156.3(7) Intake. Clearly stated written criteria shall determine the eligibility of inmates for admission to level of care. The program shall have written policies and procedures governing a uniform intake process that defines the following:

- a.* The types of information to be gathered on all inmates upon admission; and
- b.* Procedures to be followed when accepting referrals.

156.3(8) Orientation. During the intake process, documentation shall be made that the inmate has been informed of the following:

- a.* General nature and goals of the correctional substance abuse program;
- b.* Rules governing conduct and infractions that can lead to disciplinary action or discharge from the program;
- c.* Inmate's rights and responsibilities;
- d.* Confidentiality laws, rules, and regulations; and
- e.* Treatment costs to be borne by the individual, if any.

156.3(9) Assessment.

a. Sufficient information shall be collected during the intake process so that the assessment process allows for the development of a complete assessment of the inmate's status and a comprehensive plan of treatment can be developed.

b. A complete assessment of the inmate's status, which shall include an analysis and synthesis of the intake data, shall be developed and shall address the inmate's strengths, problems, and areas of clinical concern.

c. If the initial assessment was developed by personnel of the Iowa Medical and Classification Center (IMCC) or other correctional institution personnel, the substance abuse treatment program must document review of information in the inmate's record and provide updates or amendments as applicable.

d. The following information shall be collected as part of the assessment process:

- (1) Identifying information which includes name, home address, and telephone number;
- (2) Demographic information which includes date of birth, sex, race or ethnicity;
- (3) Presenting problem;
- (4) Substance abuse history, including type, amount, frequency, and duration of substance use;
- (5) Family history, which describes the family composition and dynamics;
- (6) Education status and history, which describes levels of achievement;
- (7) Vocational, employment status and history, which describes skills or trades learned, record of jobs held, duration, and reasons for leaving;
- (8) Peers and friends, which includes a description of interpersonal relationships and interaction with persons and groups outside the home, if available;
- (9) Legal history, which describes involvement with the criminal justice system;
- (10) Medical and health history, including any incidences of overdoses and any physical indicators of contagious diseases for which necessary action was required in accordance with the Iowa Code;
- (11) Psychological history and mental status;
- (12) Any other relevant information which will assist in formulating an initial assessment of the inmate; and
- (13) A financial evaluation.

156.3(10) Treatment plans. Based upon the initial assessment, a written treatment plan shall be developed and recorded in the inmate's case record.

a. A treatment plan shall be developed as soon after the inmate's admission to the substance abuse program as is clinically feasible, but no later than 30 days following admission.

b. The treatment plan shall, at a minimum, contain the following:

- (1) A clear and concise statement of the inmate's current strengths and needs;
- (2) Clear and concise statements of the short- and long-term goals the inmate will be attempting to achieve;
- (3) A delineation of primary and support services to be provided to the inmate; and
- (4) The staff person(s) to be responsible for the inmate's treatment.

c. Treatment plans shall be developed in conjunction with the inmate. Treatment plans shall be reviewed by the primary counselor and the inmate as often as necessary, but at least every 60 days.

d. A review shall consist of a reassessment of the inmate's current status including accomplishments and needs and a redefinition of treatment goals when appropriate. The date of the review and any change, as well as the persons involved in the review, shall also be recorded.

e. The use of abstract terms, technical jargon, or slang should be avoided in the written treatment plan.

f. Treatment plans shall be culturally and environmentally specific so as to meet the needs of the inmate. Treatment plans shall be written in a manner readily understandable to the inmate, with assistance if necessary.

g. The program shall provide the inmate with a copy of all treatment plans.

156.3(11) Progress notes. An inmate's progress and current status in meeting the goals set in the treatment plan as well as efforts by staff members to help the inmate achieve these stated goals shall be recorded in the inmate's case record. Information shall be noted following each inmate's counseling

session. Group counseling sessions shall be summarized at least monthly for each inmate receiving group counseling services in an outpatient program. Group summaries shall be completed at least biweekly for inmates receiving residential correctional substance abuse treatment services.

a. Entries shall be filed in chronological order and shall include the date of service or the observation made, the date of the entry, and the signature or initials and staff title of the individual rendering the service. All progress notes shall be entered into the inmate's case record in permanent pen, by typewriter, or by computer. In those instances in which records are maintained electronically, a staff identification code number authorizing access shall be accepted in lieu of a signature.

b. All entries that involve subjective interpretations of an inmate's progress should be supplemented with a description of the actual behavioral observations which were the basis for the interpretations.

c. The use of abstract terms, technical jargon, or slang should be avoided in progress notes.

d. The program shall develop a uniform progress note format to be used by all clinical staff.

156.3(12) Discharge planning.

a. The substance abuse program shall participate in release planning through the discharge summary. The discharge summary shall contain:

- (1) Summary of current strengths and weaknesses of inmate;
- (2) Summary of assessment results;
- (3) Summary of treatment activities;
- (4) Social family support;
- (5) Summary of current client status to include motivation/participation; and
- (6) Recommendations that include the reason for referral and prognosis.

b. The program shall maintain a list of all substance abuse resources available within the state.

The list of resources shall, at a minimum, contain the following:

- (1) The name and location of the resource;
- (2) The types of services provided by the resource.

156.3(13) Quality improvement. The program shall have an ongoing quality improvement process designed to objectively and systematically monitor and evaluate the quality and appropriateness of inmate care, pursue opportunities to improve inmate care, and resolve identified problems.

a. The program shall have a written plan for a quality improvement process. The written plan shall describe the objectives, organization, scope, and mechanisms for overseeing the effectiveness of monitoring, evaluation, and problem-solving activities.

b. The program shall establish written policies and procedures to describe and document the quality improvement process, including the monitoring and evaluation activities of the program. The policies and procedures shall ensure that:

- (1) Information is collected or screened by a designated individual(s) or committee. Quality improvement activities may be contracted through all outside resources;
- (2) Objective criteria are utilized in the development and application of criteria relating to the care or service the program provides; and
- (3) Objective criteria are utilized in the evaluation of the information collected in order to identify important problems in, or opportunities to improve, inmate care and clinical performance.

c. The program shall document that the quality of inmate care is improved and identified problems are resolved through appropriate actions taken by the program's administrative and supervisory staff and through professional staff functions.

d. Necessary information shall be communicated among program components, modalities, or services when problems or opportunities to improve inmate care involve more than one program component or service.

e. The program shall ensure that the status of identified problems is tracked to ensure improvement or resolution.

f. The program shall ensure that information from program components or services and the findings of distinct quality improvement activities are used to detect trends, patterns of performance, and potential problems that affect more than one program component or service.

g. The objectives, scope, organization, and effectiveness of the quality improvement process are evaluated at least annually and revised as necessary.

156.3(14) Inmate case records. There shall be written policies and procedures governing the compilation, storage, and dissemination of inmate case records.

a. These policies and procedures shall ensure that:

(1) The program exercises its responsibility for safeguarding and protecting the inmate case record against loss, tampering, or unauthorized disclosure of information;

(2) The content and format of records are kept uniform; and

(3) The entries in the case record are signed and dated.

b. The program shall provide adequate physical facilities for the storage, processing, and handling of case records. These facilities shall include suitably locked, secured rooms or file cabinets.

c. Appropriate records shall be readily accessible to those staff members providing services directly to the inmate and other persons specifically authorized by program policy. Records should be kept in proximity to the area in which the inmate normally receives services.

d. There shall be a written policy governing the disposal and maintenance of inmate case records. Inmate case records shall be maintained for not less than seven years from the date the record is officially closed.

e. The governing body shall establish policies that specify the conditions under which information may be released and the procedures to be followed for releasing information. Even if a program is not federally funded, all policies and procedures shall be in accordance with applicable provisions of Section 408 of Public Law 92-255, the Drug Abuse Office and Treatment Act of 1972 (21 U.S.C. 1175) as amended by Section 303 of Public Law 93-282, the Comprehensive Alcohol Abuse and Rehabilitation Act amendments of 1974 (88 Stat, 137), the federal confidentiality regulations issued, and state confidentiality laws and rules.

f. An inmate's written authorization shall appear on a consent form containing the following:

(1) The name of the program which is to make the disclosure;

(2) The name or title of the person or organization to which disclosure is to be made;

(3) The name of the inmate;

(4) The purpose or need for the disclosure;

(5) The extent or nature of information to be disclosed; and

(6) Except when the inmate is a mandatory criminal justice system referral, a statement that the consent is subject to revocation at any time, date, event or condition upon which it will expire without express revocation.

g. When participation by an inmate in a treatment program is made a condition of the release of the inmate from confinement, the disposition or status of any criminal proceedings against the inmate, or the execution or suspension of any sentence imposed upon the inmate, the inmate may consent to unrestricted communication between any program in which the inmate is enrolled in fulfillment of a condition and (1) the court granting probation or other posttrial or retrial conditional release, (2) the parole board or other authority granting parole, or (3) probation or parole officers responsible for the inmate's supervision. In addition, when consent is given for disclosures in this manner, consent shall expire 60 days after it is given or when there is substantial change in the inmate's status, whichever is later.

h. All policies related to confidentiality shall apply even after the inmate has terminated active involvement with the program.

i. In a life-threatening situation, or when an inmate's condition or situation precludes the possibility of obtaining written consent, the program may release pertinent medical information to the medical personnel responsible for the inmate's care without the inmate's authorization and without the authorization of the warden/superintendent or district director or designee if obtaining authorization would cause an excessive delay in delivering treatment to the inmate.

j. When information has been released without the inmate's authorization under these standards, the staff member responsible for the release of information shall enter into the inmate's case record all details pertinent to the transaction, which shall include at least:

- (1) The date the information was released;
- (2) The person to whom the information was released;
- (3) The reason the information was released; and
- (4) The nature and details of the information given.

k. As soon as possible after the release of information, the inmate shall be informed that it was released.

l. There shall be a record for each inmate that contains the following:

- (1) Results of all examinations, tests, and intake and assessment information;
- (2) Reports from referring sources;
- (3) Treatment plans;
- (4) Medication records, which shall allow for the monitoring of all medications administered and the detection of adverse drug reactions. All medication orders in the inmate case records shall define at least the name of the medication, dose, route of administration, frequency of administration, the name of the physician who prescribed the medication, and the name of the person administering or dispensing the medication;
- (5) Reports from outside resources, which shall include the name of the resource and the date of the report. These reports shall be signed by the person making the report or by the program staff member receiving the report;
- (6) Multidisciplinary case conference and consultation notes if applicable, including the date of the conference or consultation, recommendations made, and action taken;
- (7) Correspondence related to the inmate, including all letters and dated notations of telephone conversations relevant to the inmate's treatment;
- (8) Treatment consent forms, if applicable;
- (9) Information release forms;
- (10) Progress notes;
- (11) Records of service provided; and
- (12) Discharge summary.

156.3(15) *Inmate rights.* The program shall maintain written policies and procedures that ensure that the legal rights of inmates participating in the program are observed and protected.

a. Procedures to inform all inmates of legal rights shall be available at the time of admission into the program.

b. The implementation of these procedures shall be documented.

c. Written policies and procedures for reviewing and responding to an inmate's communications, e.g., opinions, recommendations, and inmate grievances, with a mechanism for redress, shall be documented.

d. Procedures shall be designed to protect the inmate's rights and privacy with respect to facility visitors, e.g., educational or other individual or group visitations at the program.

156.3(16) *Medication control.* Policies and procedures shall be developed to ensure that all medications are administered or self-administered safely and properly in accordance with federal, state, and local laws and regulations. OWI facilities shall be in compliance with 641—subrule 155.22(19).

156.3(17) *Facilities.*

a. The facilities shall comply with rules 641—155.22(125) and 641—155.23(125) or ACA standards or other standards established by the department of corrections.

b. The facilities shall comply with rules 641—155.2(125) to 641—155.20(125).

These rules are intended to implement Iowa Code section 125.13.

CHAPTER 157
STANDARDS FOR SUBSTANCE ABUSE TREATMENT AND
ASSESSMENT PROGRAMS AND THE OPERATING A MOTOR VEHICLE
WHILE INTOXICATED (OWI) LAW

[Prior to 3/29/06, see 643—Ch 8]

641—157.1(125) Definitions. Unless otherwise indicated, the following definitions shall apply to the specific terms used in these rules:

“Assessment” means the ongoing process of identifying a diagnosis, ruling out other diagnoses, and determining the level of care needed by the client.

“Course for drinking drivers” means an approved course designed to inform the offender about drinking and driving and to encourage the offender to assess the offender’s own drinking and driving behavior in order to select practical alternatives. Enrollment in the course is not limited to persons ordered to enroll, attend, and successfully complete the course required under Iowa Code sections 321J.1 and 321J.17. However, any person under the age of 18 who is required to attend the course for violation of Iowa Code section 321J.2 or 321J.17 must attend a course offered by a substance abuse treatment program licensed under Iowa Code chapter 125. Any instructional course for drinking drivers shall be approved by the department of education in consultation with the community colleges and substance abuse treatment programs licensed under Iowa Code chapter 125 and using the course of instruction detailed in 281—21.31(321J).

“Department” means the Iowa department of public health.

“Evaluation” means the process to evaluate the client’s strengths, weaknesses, problems, and needs for the purpose of defining a course of treatment. This includes use of a standardized placement screening and any additional patient/client profile information, and recommendation to an appropriate level of care.

“HIPAA” means the Health Insurance Portability and Accountability Act of 1996.

“Licensed” means issuance of a license by the department and the state board of health, which validates the licensee’s compliance with substance abuse program standards and authorizes the licensee to operate a substance abuse program in the state of Iowa.

“Posttreatment” means continuing care after primary treatment has been completed.

“Primary treatment” means substance abuse treatment modality including inpatient, primary residential treatment, extended residential treatment, medically monitored residential, extended outpatient, intensive outpatient, and partial hospitalization.

“Program” means any individual, partnership, corporation, association, governmental subdivision or public or private organization.

“Qualifying program” means a program which has a contract with the state of Iowa or the state’s contracted managed care entity to provide substance abuse treatment using a sliding fee scale.

“Satisfactory completion of the drinking drivers course” means receiving at the completion of the course a grade from the course instructor of “C” or “2.0,” or better.

“Screening” means the process by which a client/patient is determined at risk and in need of further evaluation. The focus is on the minimum criteria necessary for appropriateness/eligibility.

“Substance abuser” means a person who lacks self-control as to the use of chemical substances or uses chemical substances to the extent that the person’s health is substantially impaired or endangered or that the person’s social or economic function is substantially disrupted.

“Treatment” means the broad range of planned and continuing, inpatient, outpatient, residential care services, including diagnostic evaluation, counseling, medical, psychiatric, psychological, and social service care, which may be extended to substance abusers, concerned persons, concerned family members, or significant others, and which is geared toward influencing the behavior of such individuals to achieve a state of rehabilitation.

641—157.2(125) Screening, evaluation, treatment, and drinking drivers course. Persons who are charged with operating a motor vehicle while intoxicated (OWI), Iowa Code section 321J.2, and whose driver’s license or nonresident operating privileges are revoked under Iowa Code chapter 321J shall

be assigned to undergo a substance abuse evaluation and, if recommended, treatment from a provider licensed by the department under Iowa Code chapter 125.

157.2(1) Screening. The initial screening shall consist of a generally accepted standardized substance abuse screening instrument. The program shall utilize a recognized diagnostic test or tool to determine “substance abuse” or “dependence” as those terms are defined in the DSM IV (Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition). In addition, programs shall collect information on blood alcohol content at time of arrest; history of other alcohol or drug-related arrests; history of alcohol/drug treatment; history of mental health problems and treatment; any OWI arrest that included personal injury or additional charge(s); and family history of substance abuse.

157.2(2) Evaluation. If the initial screening shows a potential for chemical dependency, then a further evaluation will be completed. This evaluation shall consist of further development of the six assessment dimensions outlined in the American Society of Addiction Medicine, Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition-Revised.

157.2(3) Treatment. Treatment shall consist of a broad range of planned and continuing, inpatient, outpatient, and residential care services, including ongoing diagnostic evaluation, counseling, and medical, psychiatric, psychological, and social service care geared toward influencing the behavior of such individuals to achieve a state of rehabilitation. Individuals will be placed in the appropriate level of care at a substance abuse treatment program licensed by the department under Iowa Code chapter 125 in accordance with the American Society of Addiction Medicine, Patient Placement Criteria for the Treatment of Substance-Related Disorders, Second Edition-Revised.

157.2(4) Drinking drivers course. Substance abuse treatment programs licensed by the department under Iowa Code chapter 125 may provide the drinking drivers course if the course curriculum is approved by the department of education under Iowa Code section 321J.22 and 281—21.31(321J).

641—157.3(125) Screening, evaluation, treatment, and drinking drivers course completion. The program shall report substance abuse screening, assessment, evaluation and treatment completion to the department of transportation and to the district court in accordance with Iowa Code sections 125.37, 125.84 and 125.86; the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law. The program shall report satisfactory completion of the drinking drivers course to the department of education in accordance with Iowa Code section 321J.22 and 281—21.31(321J); the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law.

157.3(1) Reporting form. Programs shall report screening, evaluation, and treatment completion utilizing the form “Notice Iowa Code 321J—Confidential Medical Record.” Iowa substance abuse evaluation and treatment providers licensed by the department under Iowa Code chapter 125 shall submit this form online to the department of transportation using the department of transportation’s 321J Web site, <https://www.saeval.dot.state.ia.us>.

157.3(2) Primary treatment. Upon completion of primary treatment, programs shall report to the department of transportation and the courts that treatment has been completed in accordance with Iowa Code section 321J.22; the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law.

157.3(3) Posttreatment results. If the court orders a posttreatment program, the program shall report progress and attendance to the person’s probation officer or otherwise as ordered by the court in accordance with Iowa Code section 321J.22; the federal confidentiality regulations, “Confidentiality of Alcohol and Drug Abuse Patient Records,” 42 CFR, Part 2, effective June 9, 1987; HIPAA; and other relevant provisions of federal and state law.

157.3(4) Drinking drivers course. Substance abuse treatment programs licensed by the department under Iowa Code chapter 125 may provide the drinking drivers course and shall report satisfactory completion of the drinking drivers course to the department of education in accordance with Iowa Code section 321J.22 and 281—21.31(321J).

641—157.4(125) Cost of evaluation and treatment.

157.4(1) Screening and evaluation. The program shall charge no more than \$125 for the cost of screening and evaluation. The individual or the individual's insurance provider shall be responsible for the costs of the screening and evaluation.

157.4(2) Treatment. Qualifying programs shall consider a person admitted to the program pursuant to Iowa Code section 321J.3 who does not possess sufficient income or estate to make payment of the costs of the treatment in whole or in part to be a state patient and eligible for state-funded treatment as provided in Iowa Code section 125.44. Qualifying programs shall utilize a sliding fee schedule approved by the department to determine cost of treatment. There is no prohibition on any individual from paying in whole the cost of treatment.

157.4(3) Reimbursement. Programs shall be able to seek reimbursement of the cost of screening, evaluation and treatment from an individual's insurance company, firm or corporation bound to pay, or from Medicaid for an individual who is eligible or enrolled in Medicaid.

641—157.5(125) Timeliness. The program shall conduct and complete substance abuse evaluations and treatment at the program's earliest convenience.

641—157.6(125) Confidentiality. Programs will abide by the federal regulations, "Confidentiality of Alcohol and Drug Abuse Patient Records," 42 CFR, Part 2; Iowa Code section 125.37; HIPAA; and other relevant provisions of federal and state law.

641—157.7(125) Records. Programs shall maintain records for a minimum of seven years after discharge or completion of screening, evaluation, or treatment, and then destroy or maintain the records based on the program's written policy and procedure.

641—157.8(125) Reciprocity. For a resident of a state other than Iowa or an Iowa resident obtaining evaluation or treatment outside the state, screening, evaluation or treatment services shall be provided by programs licensed or approved by that state's substance abuse authority. Programs shall submit the results of the screening, evaluation and treatment to the Iowa department of public health, division of behavioral health and professional licensure, for review and reporting purposes to the Iowa department of transportation.

These rules are intended to implement Iowa Code section 125.13.

[Filed 1/23/98, Notice 11/19/97—published 2/11/98, effective 3/18/98]

[Filed 3/9/06, Notice 2/1/06—published 3/29/06, effective 5/3/06]

[Filed 7/13/07, Notice 4/11/07—published 8/1/07, effective 9/5/07]

CHAPTER 158
REGIONS FOR SUBSTANCE ABUSE PREVENTION AND TREATMENT

[Prior to 3/29/06, see 643—Ch 9]

641—158.1(125) Service areas established. The department of public health has established regions for substance abuse prevention and treatment service areas. Substance abuse assessment, prevention and education, and outpatient and follow-up treatment and rehabilitation shall be available in each service area. Emergency treatment provided by a facility affiliated with or part of the medical service of a general hospital, inpatient treatment, residential treatment, and halfway house treatment shall be available within reasonable driving distance of the service area.

641—158.2(125) Request for a change in service areas. Any existing service provider may file an application with the director to change an existing service area.

641—158.3(125) Application. The application shall include the following:

1. The name, address, and description of the applicant;
2. A description of the proposed change;
3. The applicant's rationale in support of the change in service area;
4. The number of clients the applicant proposes to serve and the proposed increase in quality or quantity of services to these clients;
5. A description of community support for the change; and
6. The names and addresses of all affected parties, including existing service providers.

641—158.4(125) Notification of affected parties. Within ten calendar days of receipt of a completed application, the director shall provide written notification to any affected parties identified in the application and shall allow any affected parties so notified 30 calendar days to submit written information in support of, or in opposition to, the application.

641—158.5(125) Public hearing. The director may hold a public hearing at which the applicant and any affected parties may provide an oral presentation with respect to their positions. The director shall give notice to the applicant and all affected parties ten calendar days prior to holding the hearing. The hearing shall not be a contested case hearing as that term is defined in Iowa Code chapter 17A.

641—158.6(125) Proposed decision. The director shall issue a written proposed decision which includes findings of fact and either approves or rejects the application. In issuing this decision, the director shall consider the proposed application, other information received from the applicant, information received from affected parties, the terms of any relevant contract, city and county lines, population concentrations, and existing substance abuse treatment and prevention services.

641—158.7(125) Change during term of contract. The director shall not approve an application which would change a service area during the term of an existing contract or after the release of a request for proposal for a new contract. Applications submitted after issuance of a request for proposal will, if granted, not become effective until after the expiration of the contract awarded pursuant to said request for proposal.

641—158.8(125) State board of health review. The director's proposed decision shall be reviewed by the board at its next regularly scheduled meeting. The board shall review all of the materials considered by the director, as described in rule 158.6(125), and the proposed decision and vote to approve or reject the director's proposed decision.

641—158.9(125) State board of health decision. The board's decision shall be issued in writing and shall be final agency action for the purposes of Iowa Code chapter 17A.

These rules are intended to implement Iowa Code section 125.12.

CHAPTER 162
LICENSURE STANDARDS FOR PROBLEM GAMBLING TREATMENT PROGRAMS

[Prior to 7/3/96, see Human Services Department, 441—Ch 162]

641—162.1(135) Definitions.

“Admission” means the point in an individual’s relationship with the problem gambling treatment program at which the problem gambling treatment screening process has been completed and the individual is eligible to receive problem gambling treatment services.

“Affiliation agreement” means a written agreement between the governing body of the problem gambling treatment program and another organization under the terms of which specified services, space or personnel are provided to one organization by the other, but without exchange of moneys.

“Applicant” means any problem gambling treatment program that has applied for a license or for license renewal.

“Application” means the process through which a problem gambling treatment program applies for a license or for license renewal as outlined in rule 641—162.5(135).

“Assessment” means the ongoing process of identifying a diagnosis, ruling out other diagnoses, and determining the care needed by the problem gambling client. The assessment shall evaluate the problem gambling client’s strengths and needs for the purpose of defining a course of treatment, including collecting additional client information in order to develop a treatment plan.

“Client” means an individual whose problem gambling treatment screening identifies a need for problem gambling treatment services.

“Clinical director” means the person(s) designated by the problem gambling treatment program who provides clinical oversight and who, by virtue of education, training and experience, is capable of supervising the screening and assessment of the problem gambling client to approve the treatment plan most appropriate for the client.

“Clinical oversight” means oversight provided by an individual who, by virtue of education, training and experience, is capable of supervising the clinical staff members who assess the psychosocial history of a problem gambling client to determine the treatment plan most appropriate for the client. The problem gambling treatment program shall designate the person who shall provide clinical oversight.

“Concerned person” means a person affected by the problem gambling behavior of an individual who needs problem gambling treatment services or a person willing to become involved in the treatment of an individual who gambles excessively. The concerned person may be either a relative or nonrelative of the individual.

“Confidentiality” means the confidentiality of records to be maintained by a problem gambling treatment facility, which shall conform to the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and other relevant provisions of federal and state law.

“Contract” means a formal legal document adopted by the governing body of the problem gambling treatment program and any other organization, agency, or individual which specifies services, personnel or space to be provided to the problem gambling treatment program as well as the moneys to be expended in the exchange.

“Counselor” means a licensed or certified practitioner in a counseling-related field including: an advanced certified alcohol and drug counselor (ACADC) or certified alcohol and drug counselor (CADC) or CADC equivalent; a certified criminal justice professional (CCJP); a gambling counselor certified by the National Council on Problem Gambling (NCPG); a gambling treatment counselor (CGTC) certified by the Iowa board of certification (IBC); a licensed bachelor social worker (LBSW), a licensed independent social worker (LISW), and a licensed master social worker (LMSW) licensed under Iowa Code chapters 154C and 147; a licensed marital and family therapist (LMFT) licensed under Iowa Code chapters 154D and 147; a licensed mental health counselor (LMHC) licensed under Iowa Code chapters 154D and 147; an advanced registered nurse practitioner (ARNP) licensed under Iowa Code chapters 152 and 147; a psychologist licensed under Iowa Code chapters 154B and 147; a board-certified psychiatrist; or another licensed or certified professional approved by the department.

“Culturally and environmentally specific” means integrating into the problem gambling assessment and treatment process the ideas, customs, beliefs, and skills of a given population, as well as an acceptance, awareness, and celebration of diversity regarding conditions, circumstances and influences surrounding and affecting the development of an individual or group.

“Department” means the Iowa department of public health.

“Designee” means the staff person or counselor who is delegated tasks, duties and responsibilities normally performed by the clinical director, executive director or department director.

“Director” means the director of the Iowa department of public health.

“Discharge planning” means the process, beginning at the time of the client’s admission for treatment in a problem gambling treatment program, of determining a client’s continued need for problem gambling treatment services and of developing a plan to address the ongoing posttreatment needs of the client. Discharge planning may include a document identified as a discharge plan.

“Division” means the division of behavioral health and professional licensure in the Iowa department of public health.

“Division director” means the director of the division of behavioral health and professional licensure in the Iowa department of public health.

“Executive director” or *“program director”* means an individual who is hired by the problem gambling treatment program governing body to manage the overall operations of the program in accordance with the governing body’s established policies.

“Facility” means a hospital, institution or program licensed under Iowa Code section 135.150 providing treatment for problem gamblers. *“Facility”* also means the physical areas including grounds, buildings, or portions of buildings under direct administrative control of the program.

“Governing body” means the individual(s), group, or agency that has ultimate authority and responsibility for the overall operation of the problem gambling treatment facility.

“HIPAA” means the Health Insurance Portability and Accountability Act of 1996.

“Intake” means gathering additional problem gambling treatment information at the time of the problem gambling assessment process.

“Licensee” means any problem gambling treatment program licensed by the department.

“Licensure” means the issuance of a license by the department which validates the licensee’s compliance with problem gambling treatment program standards set forth in 641—Chapter 162 and authorizes the licensee to operate a problem gambling treatment program in the state of Iowa.

“Licensure weighting report” means the problem gambling treatment program report that is used to determine the type of license for which a problem gambling treatment program qualifies based on point values assigned to licensure standards reviewed and the total number of points attained. In addition, the problem gambling treatment program shall attain a minimum percent value in each of three categories to qualify for a license as follows: 95 percent or higher rating in clinical, administrative and programming for a three-year license; 90 percent or higher rating in clinical, administrative and programming for a two-year license; or less than 90 percent but not less than 70 percent rating in clinical, administrative and programming for a one-year license.

“Outpatient treatment” means an organized problem gambling outpatient, nonresidential treatment service. Services usually are provided in regularly scheduled individual, group and family sessions.

“Physician” means any individual licensed under Iowa Code chapter 148, 150, or 150A.

“Primary care modality” means a problem gambling treatment component or modality, including problem gambling outpatient treatment.

“Problem gambler” means an individual affected by problem gambling who has been assessed as habitually lacking impulse control while gambling to the extent that the individual’s life is substantially endangered or that the individual’s social or economic functioning is substantially disrupted.

“Problem gambling” means a pattern of gambling behavior which may compromise, disrupt or damage family, personal or vocational pursuits.

“Program” means any partnership, corporation, association, governmental subdivision or public or private organization that provides problem gambling treatment services.

“Protected class” means any class of people that requires special legislation to ensure equality.

“*Quality improvement*” means the process of objectively and systematically monitoring and evaluating the quality and appropriateness of problem gambling treatment program services to improve client care and resolve identified problems.

“*Rehabilitation*” means the restoration of a client to the fullest physical, mental, social, vocational, and economic functioning of which the client is capable. Rehabilitation may include, but is not limited to, medical treatment, counseling and therapy, occupational training, job counseling, social and domestic rehabilitation and education.

“*Relapse*” means the recurrence of symptoms of problem gambling after a period of improvement. Relapse may include the resumption of problem gambling or worsening of symptoms.

“*Screening*” means the process by which a client is determined appropriate and eligible for admission to a particular problem gambling treatment program.

“*Sentinel event*” means any event which occurs at a problem gambling treatment program or to program staff members or clients who are currently active or within one week of discharge from the program. Sentinel events include the unexpected incidence or serious risk of death or serious physical or psychological injury or any event which may be subject to litigation.

“*Staff member*” means any person who provides services to the problem gambling treatment program on a regular basis as a paid employee, agent or consultant or as a volunteer.

“*Standards*” means criteria that represent the minimal qualifications required of a problem gambling treatment program for the issuance of a license.

“*Substance abuse*” means any use of illegal chemical substances or the abuse of legal substances or the use of chemical substances to the extent that the person’s health is substantially impaired or endangered or that the person’s social or economic functioning is substantially disrupted.

“*Treatment*” means the broad range of planned and continuing problem gambling treatment services, including diagnostic screening and assessment, counseling, medical, psychiatric, psychological, and social services, which may be extended to problem gambling clients or concerned persons, and which is geared toward influencing the behavior of clients or concerned persons in order to facilitate rehabilitation.

641—162.2(135) Licensure. The department shall issue a single license to each qualifying problem gambling treatment program. The license shall delineate one or more categories of services the problem gambling treatment program is authorized to provide. Although a problem gambling treatment program may have more than one facility, the department shall issue only one license to the program.

641—162.3(135) Type of licenses.

162.3(1) Issuance of licenses.

a. An initial license may be issued for 270 days. The department shall not renew or extend an initial license issued for 270 days.

b. Licenses shall expire 270 days or one, two or three calendar years from the date of issuance, and the department shall renew a one-, two- or three-year license only on application.

c. A license may be renewed for one, two or three years.

d. The department shall renew a one- or two-year license contingent upon demonstration by the problem gambling treatment program of continued compliance with licensure standards and in accordance with the licensure weighting report criteria.

e. The department shall renew a three-year license contingent upon demonstration by the problem gambling treatment program of substantial continued compliance with licensure standards and in accordance with the licensure weighting report criteria.

f. Failure to apply for renewal of the license within the 30-day grace period after the expiration date shall result in immediate termination of the license and shall require reapplication.

162.3(2) Corrective action. Following the issuance of a license, the problem gambling treatment program may be requested by the department to provide a written plan of corrective action and to bring into compliance all areas found in noncompliance during an on-site visit. The department shall place the corrective action plan in the problem gambling treatment program’s permanent file with the department and use it as a reference during future on-site inspections.

641—162.4(135) Nonassignability.

162.4(1) A license issued by the department for the operation of a problem gambling treatment program applies both to the applicant program and to the facility at which the program is to be operated.

162.4(2) Licenses are not transferable.

162.4(3) Any person or other legal entity acquiring a currently licensed program for the purpose of operating a problem gambling treatment program shall apply as provided in rule 641—162.5(135) for a new license.

162.4(4) Any person or legal entity licensed by the department that plans to fundamentally alter the treatment philosophy or transfer the program to a different premises must notify the department 30 days prior to the action in order for the department to review the treatment philosophy or site change and determine appropriate action.

162.4(5) A licensee shall, if possible, notify the department of impending closure of the licensed problem gambling treatment program at least 30 days prior to closure. The licensee shall be responsible for the removal and placement of clients and for the preservation of all records. Upon closing all facilities and terminating all service delivery activities, the licensee shall immediately return the license to the department.

641—162.5(135) Application procedures.

162.5(1) *The department shall provide an application form to all applicants for licensure.*

a. Any problem gambling treatment program applying for an initial license shall submit complete application information to the department and shall be inspected by the department prior to the program's opening and offering services to clients.

b. Any problem gambling treatment program that notifies the department within 60 days after May 16, 2007, that the program is currently operating in Iowa and that provides documentation verifying operation of a program in Iowa shall be exempt from the on-site inspection requirement for initial licensure before the program opens and admits clients for services. Documentation that a program is operating in Iowa may include a current contract with the department to provide problem gambling treatment services, a mission statement specifying that the program offers problem gambling treatment services, governing board bylaws specifying that the program is providing problem gambling treatment services, or articles of incorporation specifying that the program is providing problem gambling treatment services. Problem gambling treatment programs that qualify under this paragraph shall apply for licensure pursuant to this chapter within 60 days of May 16, 2007. These programs may continue to operate until their licenses are approved or denied by the department.

c. For initial applicants, if technical assistance has been provided to the problem gambling treatment program by the department, and if enough information was gathered during the technical assistance visit to determine that the program is eligible to receive an initial 270-day license, then the on-site inspection for initial licensure may be waived at the discretion of the department.

d. The division shall prepare a report with a recommendation for licensure to be presented to the department within 30 days of the on-site inspection.

162.5(2) *Application information for problem gambling treatment programs.* An applicant for licensure shall submit to the Iowa Department of Public Health, Division of Behavioral Health and Professional Licensure, Lucas State Office Building, Des Moines, Iowa 50319, the following information on forms provided by the department. The department shall not consider an application for licensure complete until the following information is received by the department from the problem gambling treatment program:

a. The name and address of the applicant for licensure.

b. The name and address of the executive director or program director of the problem gambling treatment program.

c. The names, titles, dates of employment, education, and years of recent job-related experience of staff members and a copy of the table of organization. When multiple treatment modalities and facilities exist, the relationship between treatment modalities and facilities must be shown and a description of the problem gambling treatment screening and training process for volunteer workers must be included.

- d.* The names and addresses of members of the governing body, sponsors, or advisory boards of the problem gambling treatment program and current articles of incorporation and bylaws.
- e.* The names and addresses of all physicians, other professionally trained personnel, medical facilities, and other individuals or organizations with which the problem gambling treatment program has a direct contractual or affiliation agreement.
- f.* A description of the treatment services provided by the problem gambling treatment program and a description of weekly activities for each treatment modality or component.
- g.* Copies of reports substantiating compliance with federal, state and local rules and laws for each facility, including appropriate Iowa department of inspections and appeals rules, state fire marshal rules and fire ordinances, and appropriate local health, fire, occupancy code, and safety regulations.
- h.* Information required under Iowa Code section 135C.33 for programs that admit juveniles.
- i.* Fiscal management information including the most recent audit or opinion of an auditor and the governing body minutes to reflect approval of the audit, and budget and insurance coverage. If this information is already on file with the department, the problem gambling treatment program does not need to resubmit this information.
- j.* Documentation of insurance coverage for professional and general liability, the facility, workers' compensation, and fidelity bond or crime and dishonesty insurance.
- k.* For programs using the gambling treatment reporting system (GTRS), the address and primary facility code of each office, facility, or program location.
- l.* Current, complete written policies and procedures manual to include the staff development and training plan and personnel policies.

The problem gambling treatment program shall complete the application information for an initial application for licensure and the department shall review the application information prior to a scheduled on-site inspection.

162.5(3) *Renewal.* The problem gambling treatment program shall submit an application for renewal on forms provided by the department at least 60 calendar days before expiration of the current license.

162.5(4) *Application update or revision for existing licensed programs.*

- a.* The problem gambling treatment program shall notify the department of the need for and shall request an application for a licensure update or revision.
- b.* The problem gambling treatment program shall apply for licensure update or revision 30 days prior to any planned change(s) of address of offices, facilities, or program locations or any additions or deletions of the type(s) of services or programs provided and licensed.
- c.* The problem gambling treatment program shall submit to the department within 10 working days from the date the forms are received a revised licensure application form which shall reflect changes of address of offices, facilities, or program locations or additions or deletions of the type(s) of services or program(s) provided or licensed to the division.
- d.* When applicable, as determined by the department, an on-site licensure inspection of a new component, service, program or facility may be conducted by the department within six months of the receipt of the updated or revised application or during an existing licensed problem gambling treatment program's scheduled relicensure on-site inspection, whichever occurs first.

641—162.6(135) *Application review.* An applicant for licensure shall submit a completed application to the department within 30 days from the date the forms are received. The department shall review the application for completeness and request any additional material as needed. The department shall notify applicants that fail to return the application forms on time. Iowa Code section 135.150 requires that all state-funded problem gambling treatment programs be licensed.

641—162.7(135) *Inspection of licensees.* The department shall inspect the problem gambling treatment program and review the policies and procedures utilized by the program. The inspection may include case record audits and interviews with problem gambling treatment staff members and clients, consistent with the confidentiality safeguards of state and federal law.

162.7(1) *Technical assistance.* The department shall visit all problem gambling treatment programs applying for an initial license to operate a program in the state of Iowa for the purpose of providing needed technical assistance regarding the licensure criteria and procedures. The problem gambling treatment program may waive technical assistance in order to expedite the licensing process. The problem gambling treatment program shall submit requests for additional technical assistance in writing to the department.

a. Following the issuance of a license, the problem gambling treatment program may request technical assistance from the department to bring into conformity standards reported to be in noncompliance with these rules.

b. The department shall schedule technical assistance within 30 days of the applicant's request depending on the availability of staff.

c. The department may also request that technical assistance be provided to the problem gambling treatment program if deficiencies are noted during an on-site technical assistance visit.

162.7(2) *On-site inspection for licensure.* The department shall schedule an on-site inspection for licensure after the department's receipt of the problem gambling treatment program's completed application to operate a program in Iowa. The department shall not be required to provide advance notice to the problem gambling treatment program of the on-site inspection for licensure.

a. The on-site inspection team shall consist of designated members of the division staff.

b. Team members shall inspect the problem gambling treatment program in order to verify information contained in the application and ensure compliance with all laws, rules and regulations.

c. The inspection team shall send a written report, return receipt requested, of its findings to the applicant within 20 working days after the on-site inspection.

162.7(3) *Effective date of license.* The effective date of a license shall begin on the date the department reviews the problem gambling treatment program's written application and licensure weighting report and acts to issue a license.

641—162.8(135) Licensure renewal. Upon approval of an application for licensure renewal, the department shall renew the license pursuant to rule 641—162.5(135).

641—162.9(135) Corrective action plans.

162.9(1) *Corrective action plans for 270-day license for problem gambling treatment programs.*

a. Problem gambling treatment programs approved by the department for a 270-day license shall submit a corrective action plan to the division director no later than 30 days following notice that the program has received a 270-day license.

b. The corrective action plan shall include, but not be limited to:

(1) Specific problem areas.

(2) A delineation of corrective measures to be taken by the problem gambling treatment program for each problem area.

(3) A delineation of target dates for completion of corrective measures for each problem area.

c. The department shall review the implemented corrective action during the required follow-up on-site visit and issue a subsequent report to the division director and the program.

162.9(2) *Corrective action plans for one- and two-year licensure programs.*

a. Problem gambling treatment programs approved by the department for a one- or two-year license shall submit a corrective action plan for those standards found to be in noncompliance, if applicable, following an on-site inspection.

b. The department shall not be required to offer technical assistance on a corrective action plan for one- and two-year licenses.

c. The problem gambling treatment program approved by the department for a one- or two-year license shall submit a corrective action plan within 30 days of receipt of the licensure inspection report.

641—162.10(135) On-site inspection for initial licensure.

162.10(1) On-site inspection for licensure. The on-site inspection for licensure of an initial applicant shall occur prior to the problem gambling treatment program's opening and admitting clients (see 162.5(1) for details regarding exemption from this subrule). The department shall not be required to provide advance notice to the program of the on-site inspection for licensure.

- a.* The on-site inspection team shall consist of a designated member(s) of the division staff.
- b.* The team shall inspect the applicant program in order to verify information contained in the application and to ensure compliance with all laws, rules and regulations.
- c.* The inspection team shall send a written report, return receipt requested, of its findings to the applicant within 20 working days after completion of the inspection.
- d.* The application information for an initial application for licensure shall be completed by the program and reviewed by the department prior to a scheduled on-site inspection.

162.10(2) Upon approval of an application for licensure, the department shall issue a license.

641—162.11(135) Denial, suspension, revocation, or refusal to renew a license.

162.11(1) The department may deny, suspend, revoke or refuse to renew a license for any of the following reasons:

- a.* Failure to adequately complete the application or renewal application process or submission of fraudulent or misleading information on the initial or renewal application form.
- b.* Failure to obtain the minimum score required for a one-, two- or three-year license.
- c.* Violation by a problem gambling treatment program, program employee or agent of the employee of any statute or rule pertaining to problem gambling treatment programs, including a violation of any provision of this chapter.
- d.* Failure to comply with licensure, inspection, health, fire, occupancy, safety, sanitation, zoning, or building codes or regulations required by federal, state, or local law.
- e.* The commission of or permitting or aiding or abetting the commission of an unlawful act within a facility.
- f.* Conviction of a member of the problem gambling treatment program governing body, a director, administrator, chief executive officer, or other managing staff member, of a felony or misdemeanor involving the management or operation of the facility or directly related to the operation or integrity of the facility.
- g.* Use of untruthful or improbable statements in advertising.
- h.* Conduct or practices found by the department to be detrimental to the general health, safety, or welfare of a client or member of the community in which the program operates.
- i.* Violation of a client's confidentiality or willful, substantial, or repeated violation of a client's rights.
- j.* An attempt to defraud a problem gambling client, potential client, or third-party payor.
- k.* Inappropriate conduct by a problem gambling treatment program employee, including sexual contact with a client of the program.
- l.* Use of treatment techniques which endanger the health, safety, or welfare of a client.
- m.* Discrimination or retaliation against a client or employee who has submitted a complaint or information to the department.
- n.* Failure to allow an employee or agent of the department access to the facility for the purpose of inspection, investigation, or other information collection duties necessary to the performance of the department's duties.
- o.* Commission of an act to defraud the state of Iowa.
- p.* Failure to submit an acceptable written plan of corrective action or failure to comply with a written plan of corrective action issued pursuant to subrule 162.3(2), rule 641—162.9(135), or paragraph 162.16(4) "c."
- q.* Violation of an order of the department or violation of the terms or conditions of a consent agreement or informal settlement between a problem gambling treatment program and the department.

r. Failure to complete in full the application for licensure or failure to submit the information required by rule 641—162.5(135).

162.11(2) Initial notice from the department. When the department determines to deny, suspend, revoke or refuse to renew a license, the department shall notify the licensee by certified mail, return receipt requested, of the department's intent to deny, suspend, revoke, or refuse to renew the license and of the changes required to avoid denial, suspension, revocation or refusal to renew a license. The initial notice shall further provide the licensee the opportunity to submit to the department either a written plan of corrections or written objections within 20 days from the receipt of notice from the department.

162.11(3) Correction of deficiencies; objections.

a. Written plan of corrections. If a licensee submits a written plan of corrections, the licensee shall have 60 days from the date of submission to show compliance with the plan of corrections. The licensee shall submit any information to the department that the licensee deems pertinent to verify compliance with the plan of corrections.

b. Objections. If a licensee submits written objections, the licensee shall submit to the department any information that the licensee deems pertinent to support the licensee's defense.

162.11(4) Decision of the department. Following receipt of a written plan of corrections and expiration of the 60-day time period, or following receipt of written objections, or when objections or a notice of corrections has not been received within the 20-day time period, the department may determine whether to proceed with disciplinary action.

162.11(5) Notice of decision and opportunity for contested case hearing.

a. When the department determines to deny, suspend, revoke or refuse to renew a license, the department shall give the licensee written notice by certified mail, return receipt requested.

b. The licensee may request a hearing on the determination. The request must be in writing and received by the department within 30 days of receipt of the notice issued by the department. Failure to request a hearing by the deadline shall result in final action by the department.

162.11(6) Summary suspension. If the department finds that the health, safety or welfare of the public is endangered by continued operation of a problem gambling treatment program, summary suspension of a license may be ordered pending proceedings for revocation or other actions. These proceedings shall be promptly determined and instituted.

641—162.12(135) Contested case hearings. Any problem gambling treatment program that wishes to contest the denial, suspension, revocation or refusal to renew a license shall be afforded an opportunity for a hearing before an administrative law judge from the department of inspections and appeals. The department shall notify the problem gambling treatment program in writing, return receipt requested, of the date of the hearing not less than 30 days before the hearing.

162.12(1) *Failure to appear.* If a party fails to appear in a contested case hearing proceeding after proper service of notice, the administrative law judge shall, in such a case, enter a default judgment against the party failing to appear.

162.12(2) *Conduct of hearing.* The administrative law judge shall afford all parties opportunity to respond to and present evidence and argument on all issues involved and to be represented by counsel at their own expense.

a. The hearing shall be informal and all relevant evidence shall be admissible. Effect shall be given to the rules of privilege recognized by law. Objections to evidentiary offers may be made and shall be noted in the record. The hearing shall be expedited and the interests of the parties shall not be prejudiced substantially. Any part of the evidence may be required to be submitted in verified written form.

b. Documentary evidence may be received in the form of copies or excerpts if the original is not readily available. Upon request, parties shall be given an opportunity to compare the copy with the original, if available.

c. Witnesses present at the hearing shall be subject to cross-examination by any party as necessary for a full and true disclosure of the facts.

d. The record in a contested case shall include:

- (1) All pleadings, motions and intermediate rulings.
- (2) All evidence received or considered and all other submissions.
- (3) A statement of all matters officially noticed.
- (4) All questions and offers of proof, objections and rulings therein.
- (5) All proposed findings and exceptions.
- (6) Any decision, opinion or report by the officer presiding at the hearing.

e. Oral proceedings shall be open to the public and shall be recorded either by mechanized means or by certified shorthand reporters. Oral proceedings or any part thereof shall be transcribed at the request of any party with the expense of the transcription charged to the requesting party. The recording or stenographic notes of oral proceedings or the transcription thereof shall be filed with and maintained by the problem gambling treatment program for at least five years from the date of decision.

f. Findings of fact shall be based solely on the evidence in the record and on matters officially noticed in the record.

162.12(3) Continuance. For good cause, the administrative law judge may either continue a hearing beyond the time originally scheduled or may recess the hearing. Requests for continuance shall be made to the administrative law judge in writing at least three days prior to the scheduled hearing date. The administrative law judge shall not grant continuances less than three days before the hearing except for exigent circumstances.

162.12(4) Decision. Findings of fact shall be based solely on the evidence in the record and upon matters officially noticed in the record.

a. The decision of the administrative law judge shall be a final decision unless there is an appeal to the department within 20 days of the receipt of the decision.

b. A proposed or final decision or order in a contested case hearing shall be in writing. A proposed or final decision shall include findings of fact and conclusions of law, separately stated. Parties shall be promptly notified of each proposed or final decision or order by delivery of a copy of the decision or order by certified mail, return receipt requested. In the case of a proposed decision, the department shall notify the parties of the right to appeal the decision to the department director.

162.12(5) Appeal to the department director.

a. Either party may request that the department director review the proposed decision. The request shall be in writing and delivered by certified mail, return receipt requested, within 20 days of receipt of the proposed decision.

b. The parties shall have an opportunity to submit briefs to the department director. The department director shall review the record and any briefs. No new evidence shall be admitted unless requested and allowed by the department director.

c. The department director shall issue a decision in writing within 90 days after receiving the request to review the proposed decision.

641—162.13(135) Rehearing application. Within 20 days after the department director issues a final decision in a contested case, any party may file an application for rehearing, stating the specific grounds therefor and the relief sought, and shall mail a copy of the application by certified mail, return receipt requested, to all parties of record. The application for rehearing is deemed to have been denied unless the department director grants the application within 20 days after its filing.

641—162.14(135) Judicial review. A licensee that is aggrieved or adversely affected by the department director's final decision and that has exhausted all adequate administrative remedies may seek judicial review of the department director's decision pursuant to and in accordance with Iowa Code section 17A.19.

641—162.15(135) Reissuance or reinstatement. After suspension, revocation or refusal to renew a license, the department shall not reissue or reinstate the license to the affected licensee within one year of the effective date of the suspension, revocation or expiration upon refusal to renew, unless by order

of the department. After that time, proof of compliance with licensure standards must be presented to the department prior to reinstatement or reissuance of a license.

641—162.16(135) Complaints and investigations.

162.16(1) *Complaints.* Any person may file a complaint with the department against any problem gambling treatment program licensed pursuant to this chapter. The person filing the complaint shall make the complaint in writing and shall mail or deliver the complaint to the division director at the Division of Behavioral Health and Professional Licensure, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319. The complaint shall include the name and address of the complainant, the name of the problem gambling treatment program, and a concise statement of the allegations against the program, including the specific alleged violations of this chapter, if known. A complaint may also be initiated by the department pursuant to evidence received by the department. Timely filing of complaints is required in order to ensure the availability of witnesses and to avoid initiation of an investigation under conditions which may have been significantly altered during the period of delay.

162.16(2) *Evaluation and investigation.* Upon receipt of a complaint, the department shall make a preliminary review of the allegations contained in the complaint. Unless the department concludes that the complaint is intended solely to harass a problem gambling treatment program or lacks a reasonable basis, the department shall conduct an on-site investigation of the program which is the subject of the complaint as soon as practicable. The department shall consider the complaint to be confidential and shall protect the name of the complainant, unless the complainant waives the right to confidentiality.

162.16(3) *Investigative report.* Within 30 working days after completion of the investigation, the department shall prepare a written investigative report and shall submit the report to the executive director or program director of the problem gambling treatment program and the chairperson of the program governing body. This report shall include the general nature of the complaint and shall indicate if the allegations were substantiated, unsubstantiated, or undetermined; the basis for the finding; the specific statutes or rules at issue; a response from the problem gambling treatment program, if received; and a recommendation for action.

162.16(4) *Review of investigations.* The department shall review the investigative report and shall determine appropriate action.

a. Closure. If the department determines that the allegations contained in the complaint are unsubstantiated, the department shall close the case and shall promptly notify the complainant and the problem gambling treatment program by certified mail, return receipt requested.

b. Referral for further investigation. If the department determines that the case warrants further investigation, it shall refer the case to department staff members for further investigation.

c. Written plan of corrective action. If the department determines any allegations contained in the complaint are substantiated and corrective action is warranted, the department may require the problem gambling treatment program to submit and comply with a written plan of corrective action. A problem gambling treatment program shall submit a written plan of corrective action to the department within 20 working days after receiving a request for the plan. The written plan of corrective action shall include a plan for correcting violations as required by the department and a time frame within which the problem gambling treatment program shall implement the plan. The plan is subject to department approval. The requirement of a written plan of corrective action is not formal disciplinary action. Failure to submit or comply with a written plan of corrective action may result in formal disciplinary action against the problem gambling treatment program.

d. Disciplinary action. If the department determines that any allegations contained in the complaint are substantiated and disciplinary action is warranted, the department may proceed with such action in accordance with rule 641—162.11(135).

162.16(5) *Confidential information and public information.* Information contained in a complaint is confidential pursuant to Iowa Code sections 22.7(18) and 22.7(35) or any other provision of state or federal law, unless the complainant waives the right to confidentiality. Investigative reports, written plans of corrective action, and all notices and orders issued pursuant to rule 641—162.11(135) shall refer

to problem gambling clients by number and shall not include any other client-identifying information. The department shall ensure that investigative reports, written plans of corrective action, and all notices and orders issued pursuant to rule 641—162.11(135) are available to the public as open records pursuant to Iowa Code chapter 22.

641—162.17(135) Funding. The issuance of a license by the department to any problem gambling treatment program shall not be construed as a commitment on the part of either the state or federal government to provide funds to the program.

641—162.18(135) Inspection. Each applicant or licensee agrees as a condition of licensure:

162.18(1) To permit properly designated representatives of the department to enter and inspect any and all premises of problem gambling treatment programs for which a license has been either applied or issued to verify information contained in the application or to ensure compliance with all laws, rules, and regulations relating thereto, during all hours of operation of the facility and at any other reasonable hour.

162.18(2) To permit properly designated representatives of the department to audit and collect statistical data from all records maintained by the licensee. The department shall not license a problem gambling treatment program which does not permit inspection by the department or examination of all records, including client records, personnel records, financial records, methods of administration, and any other records the department deems relevant.

641—162.19(135) Exemptions to rule 641—162.20(135).

162.19(1) The department shall exempt problem gambling treatment programs that hold a valid license under 641—Chapter 155 from all the standards required pursuant to rule 641—162.20(135), except for the standards set forth in the following subrules:

- a. 162.20(6), Personnel;
- b. 162.20(7), Child abuse, dependent adult abuse, and criminal history background checks;
- c. 162.20(8), Client case record maintenance;
- d. 162.20(9), Client screening, admission and assessment;
- e. 162.20(15), Sentinel events;
- f. 162.20(16), Quality improvement; and
- g. 162.20(20), Financial counseling.

162.19(2) The department shall exempt problem gambling treatment programs accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) from all the standards required pursuant to rule 641—162.20(135), except for the standards set forth in the following subrules:

- a. 162.20(6), Personnel;
- b. 162.20(7), Child abuse, dependent adult abuse, and criminal history background checks;
- c. 162.20(8), Client case record maintenance; and
- d. 162.20(9), Client screening, admission and assessment.

162.19(3) The department shall exempt problem gambling treatment programs accredited by the Council on Accreditation (COA) from all the standards required pursuant to rule 641—162.20(135), except for the standards set forth in the following subrules:

- a. 162.20(6), Personnel;
- b. 162.20(7), Child abuse, dependent adult abuse, and criminal history background checks; and
- c. 162.20(9), Client screening, admission and assessment.

162.19(4) The department shall exempt problem gambling treatment programs accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) from all the standards required pursuant to rule 641—162.20(135), except for the standards set forth in the following subrules:

- a. 162.20(6), Personnel;
- b. 162.20(9), Client screening, admission and assessment; and
- c. 162.20(20), Financial counseling services.

162.19(5) The department shall combine the scores for all programming, administrative and clinical standards into one score for the licensure weighting report for those problem gambling treatment programs exempted under this rule.

641—162.20(135) General standards for all problem gambling treatment programs. The following standards shall apply to all licensed problem gambling treatment programs in the state of Iowa regardless of the category of services provided by such programs. In situations in which differences between general standards and specific standards occur, both general and specific standards must be met.

162.20(1) Governing body. Each problem gambling treatment program shall have a formally designated governing body that is representative of the community being served, complies with Iowa Code chapter 504 and other Iowa Code chapters as appropriate, and has ultimate authority and responsibility for overall program operations.

a. The governing body shall develop and adopt written bylaws and policies that define the powers and duties of the governing body, its committees and advisory groups, and the executive director or program director. The governing body shall review and revise the bylaws and policies as necessary.

b. The bylaws shall specify, at a minimum, the following:

- (1) Type of membership;
- (2) Term of appointment;
- (3) Frequency of meetings;
- (4) Attendance requirements; and
- (5) Quorum necessary to transact business.

c. The governing body shall keep minutes of all meetings and shall make the minutes available for review by the department. Minutes shall include, but not be limited to, the following:

- (1) Date of the meeting;
- (2) Names of members attending;
- (3) Topics discussed; and
- (4) Decisions reached and actions taken.

d. The duties of the governing body shall include, but not be limited to, the following:

(1) To appoint a qualified executive director or program director who shall have the responsibility and authority for the management of the problem gambling treatment program in accordance with the governing body's established policies;

(2) To establish effective controls which shall ensure that quality services are delivered;

(3) To review and approve the program's annual budget;

(4) To ensure that the program shall maintain the fiscal management system in accordance with generally accepted accounting principles, including internal controls, to reasonably protect program assets;

(5) To ensure that the program shall have insurance coverage that provides for the protection and replacement of the physical and financial resources of the program and that provides fidelity bond or crime and dishonesty insurance coverage for all staff members, facilities, and equipment;

(6) To review the insurance coverage annually; and

(7) To approve all contracts.

e. The governing body shall develop and approve policies for the effective operation of the program.

f. The governing body is responsible for all funds, equipment, supplies and the facility or facilities in which the program operates, and for the appropriateness and adequacy of services provided by the program.

g. The governing body shall at least annually prepare a report which shall include, but not be limited to, the following information:

(1) The name, address, occupation, and place of employment of each governing body member;

(2) Any family or business relationships which a member of the governing body may have with a program staff member; and

(3) When applicable, the name and address of any owner or controlling party whether it is an individual, a partnership, a corporation body or a subdivision of other bodies, such as a public agency, religious group, fraternity, or other philanthropic organization.

h. The governing body shall assume the responsibility of ensuring that malpractice and liability insurance and fidelity bond or crime and dishonesty insurance have been provided for the program.

162.20(2) Executive director or program director. The executive or program director shall have primary responsibility for overall problem gambling treatment program operations. The problem gambling treatment program governing body shall clearly define the duties of the executive director or program director, when applicable, in accordance with the policies established by the governing body.

162.20(3) Clinical oversight. The problem gambling treatment program shall have appropriate clinical oversight to ensure the quality of clinical services provided to clients. Clinical oversight shall be provided in-house or through consultation. The clinical director shall meet the criteria for staff members detailed in subrule 162.20(6), paragraph “*k.*” Clinical oversight may include assisting the problem gambling treatment program in developing policies and procedures relating to the assessment and treatment of clients, assisting in the training of staff members and providing assistance to clinical staff members in assessment or treatment. The executive director or program director or designee is ultimately responsible to the governing body for the supervision of clinical services and the provision of services to clients.

162.20(4) Staff development.

a. The problem gambling treatment program governing body shall approve written policies and procedures that establish a staff development and training plan, based on an annual needs assessment. Staff development shall include orientation for staff members and opportunities for continuing job-related education.

b. The problem gambling treatment program shall institute and document in-service training programs when program operations or functions are changed. In addition, the program shall design in-service training programs to allow staff members to develop new skills so that staff members may effectively adapt to such changes.

c. The problem gambling treatment program shall make on-site staff development and activities for professional growth and development available to all personnel. These activities shall be culturally and environmentally specific.

162.20(5) Procedures manual. All problem gambling treatment programs shall develop and maintain a procedures manual. The manual shall define the program’s policies and procedures to reflect the program’s activities. Any revision entered in the manual shall include the date and the name and title of the individual making the entries. The manual shall include the required written policies, procedures, definitions, and all other documentation required in this chapter.

162.20(6) Personnel. All problem gambling treatment programs shall develop written personnel policies and procedures.

a. The problem gambling treatment program shall have written policies and procedures that address the following criteria:

- (1) Recruitment, selection, and credentials of staff members;
- (2) Recruitment and selection of volunteers;
- (3) Wage and salary administration;
- (4) Promotions;
- (5) Employee benefits;
- (6) Working hours;
- (7) Vacation and sick leave;
- (8) Lines of authority;
- (9) Rules of conduct;
- (10) Disciplinary actions and termination of employees;
- (11) Methods for handling cases of inappropriate services to clients;
- (12) Work performance appraisals;
- (13) Employee accidents and safety;

(14) Employee grievances; and

(15) Employee assistance for staff members.

b. The problem gambling treatment program shall ensure that written personnel policies and practices include compliance with the United States Equal Employment Opportunity Commission.

c. The problem gambling treatment program shall have written job descriptions that reflect the actual duties of the employee.

d. The executive director or program director or designee shall review job descriptions when necessary or whenever there is a change in required qualifications or duties.

e. The problem gambling treatment program shall ensure that all positions have job descriptions included in the personnel section of the procedures manual or personnel record of the staff member.

f. The problem gambling treatment program shall have written personnel policies and practices that include a mechanism for written evaluation of employee performance on at least an annual basis. The program shall provide evidence that each evaluation is reviewed with the employee and that the employee is given the opportunity to respond to the evaluation.

g. The problem gambling treatment program shall have a personnel record for each staff member. These records shall contain, as applicable:

(1) Verification of training, experience and all professional credentials relevant to the position;

(2) Job performance evaluations;

(3) Incident reports;

(4) Disciplinary actions taken; and

(5) Documentation that the employee agrees to follow problem gambling treatment program-related confidentiality laws and rules. This documentation shall occur prior to the employee's assumption of duties.

h. The problem gambling treatment program shall have written policies and procedures that ensure confidentiality of personnel records and that list authorized personnel who have access to various types of personnel information.

i. The problem gambling treatment program shall have written policies related to the prohibition of sexual harassment.

j. The problem gambling treatment program shall have written policies related to the implementation of the Americans with Disabilities Act.

k. Staff members who provide treatment services and the clinical director must meet at least one of the following conditions:

(1) Currently maintain active status as a nationally certified gambling counselor or an Iowa-certified gambling counselor.

(2) Have received a minimum of 30 hours of training or education related to problem gambling within the previous 24 months and are working toward certification within a maximum of 24 months as a nationally certified gambling counselor or an Iowa-certified gambling counselor.

(3) Currently maintain active status as a licensed or certified practitioner in a counseling-related field and have received a minimum of 20 hours of training or education related to problem gambling within the previous 24 months.

162.20(7) *Child abuse, dependent adult abuse, and criminal history background checks.*

a. Written policies and procedures shall prohibit mistreatment, neglect, or abuse of children and dependent adults and shall specify reporting and enforcement procedures for the problem gambling treatment program. Staff members shall immediately report alleged violations to the executive director or program director or designee and appropriate department of human services personnel. The program shall have written policies and procedures for reporting alleged violations that comply with Iowa department of human services rules. The program shall hold any employee found to be in violation of Iowa Code sections 232.67 to 232.70, as substantiated by a department of human services investigation, subject to the program's policies concerning dismissal.

b. The personnel record for each employee working with clients shall contain at a minimum:

(1) Documentation of a criminal history background check with the Iowa division of criminal investigation on a new applicant for employment asking whether the applicant has been convicted of a crime.

(2) A written, signed and dated statement furnished by a new applicant for employment that discloses any substantiated reports of child abuse, neglect or sexual abuse or dependent adult abuse.

(3) For all employees working with or in contact with juveniles, documentation of a background check with the Iowa central child abuse registry on an applicant hired on probationary or temporary status, but prior to permanent employment, for any substantiated reports of child abuse, neglect or sexual abuse pursuant to Iowa Code section 125.14A.

(4) For all employees hired on or after July 1, 1994, and working with or in contact with dependent adults, documentation of a background check with the Iowa central adult abuse registry on an applicant hired on probationary or temporary status, but prior to permanent employment, for any substantiated reports of dependent adult abuse, neglect or sexual abuse pursuant to Iowa Code section 125.14A and chapter 235B.

c. A problem gambling treatment program shall not employ a person to work with juveniles who has a record of a criminal conviction or a founded child abuse report, unless an evaluation of the crime or founded child abuse has been made by the department of human services which concludes that the crime or founded child abuse does not merit prohibition of employment. If a record of criminal conviction or founded child abuse exists, the program shall offer the person with a criminal conviction or founded child abuse the opportunity to complete and submit Form 470-2310, Record Check Evaluation, to the Iowa department of human services. In its evaluation, the department of human services shall consider the nature and seriousness of the crime or founded abuse in relation to the position sought, the time elapsed since the commission of the crime or founded abuse, the circumstances under which the crime or founded abuse was committed, the degree of rehabilitation, and the number of crimes or founded abuses committed by the person.

d. A problem gambling treatment program shall not employ a person to work with dependent adults who has a record of a criminal conviction or a founded dependent adult abuse report, unless an evaluation of the crime or founded dependent adult abuse has been made by the department of human services which concludes that the crime or founded dependent adult abuse does not merit prohibition of employment. If a record of criminal conviction or founded dependent adult abuse exists, the program shall offer the person with a criminal conviction or founded dependent adult abuse the opportunity to complete and submit Form 470-2310, Record Check Evaluation, to the Iowa department of human services. In its evaluation, the department of human services shall consider the nature and seriousness of the crime or founded abuse in relation to the position sought, the time elapsed since the commission of the crime or founded abuse, the circumstances under which the crime or founded abuse was committed, the degree of rehabilitation, and the number of crimes or founded abuses committed by the person.

e. Each problem gambling treatment staff member shall complete two hours of training relating to the identification and reporting of child abuse and dependent adult abuse within six months of initial employment and shall complete at least two hours of additional training every five years thereafter.

162.20(8) Client case record maintenance. The problem gambling treatment program shall have written policies and procedures governing the compilation, storage and dissemination of individual client case records.

a. These policies and procedures shall ensure that:

(1) The problem gambling treatment program exercises its responsibility for safeguarding and protecting the client case record against loss, tampering, or unauthorized disclosure of information;

(2) Content and format of client case records are uniform; and

(3) Entries in the client case record are signed and dated.

b. The problem gambling treatment program shall provide adequate physical facilities for the storage, processing, and handling of client case records. These facilities shall include locked office doors and file cabinets and secure computer storage and storage areas. In those instances where records are maintained electronically, the program shall accept a staff identification code number authorizing access in lieu of a signature.

c. The problem gambling treatment program shall maintain appropriate records readily accessible to both staff members who provide services directly to the client and other persons specifically authorized by program policy. The program shall maintain records in proximity to the area in which the client normally receives services.

d. The problem gambling treatment program shall have a written policy governing the disposal and maintenance of client case records. The program shall maintain any client case record for not less than six years from the date the record is officially closed.

e. The problem gambling treatment program governing body shall establish policies that specify the conditions under which information on applicants or clients may be released and the procedures to be followed for releasing such information, in accordance with HIPAA and other relevant provisions of federal and state law. Program staff members as defined in this chapter may release confidential information with a properly authorized release of information.

f. Confidentiality of client case records. The problem gambling treatment program shall protect the confidentiality of client case records maintained by a program in accordance with HIPAA and other relevant provisions of federal and state law.

162.20(9) Client screening, admission and assessment.

a. Client screening. A problem gambling treatment program shall consider a client who is either a problem gambler or a concerned person affected by problem gambling behavior to be eligible for outpatient services if:

(1) Screening of a client, which includes the use of the following tool, determines that the client has a gambling problem if:

1. The gambler meets diagnostic criteria for pathological gambling in the American Psychiatric Association: Diagnostic and Statistical Manual (DSM) of Mental Disorders, version IV; or

2. The gambler does not meet full criteria for pathological gambling but demonstrates two to four of the diagnostic criteria for pathological gambling in the American Psychiatric Association: Diagnostic and Statistical Manual (DSM) of Mental Disorders, version IV.

(2) A concerned person, if any one of the following applies:

1. The individual who gambles excessively, and whose behavior is affecting the concerned person, meets the criteria in subparagraph 162.20(9) "a"(1); or

2. The concerned person meets the criteria of the Gam-Anon 20 questions screening tool.

b. Client admission. The problem gambling treatment program shall determine a client is in need of services if the client meets the criteria in subparagraph 162.20(9) "a"(1) or (2), and may then admit the client to the program. The program shall collect and record prior to or at the time of admission the following intake information on standardized forms for all persons applying for services. The program shall ensure that the following information shall become part of the client case record:

(1) Identifying information, including name, address, and telephone number.

(2) Demographic information, including date of birth, sex, race or ethnicity.

(3) Identification of the referral source.

(4) Presenting problem.

(5) Gambling history, including type, amount, frequency and duration of gambling activity.

(6) A problem gambling treatment screening as described in paragraph 162.20(9) "a."

(7) A GTRS admission form if funded by the Iowa gambling treatment fund.

c. Client assessment. The problem gambling treatment program shall develop a complete assessment which is an analysis and synthesis of the intake data and which addresses the client's strengths, needs, and areas of clinical concern, including any problem gambling-specific goals and objectives the client has identified. The assessment shall be completed within 21 days of admission and shall include the following information:

(1) Legal history describing any involvement with the criminal justice system.

(2) Medical and health history.

(3) Mental health history and current mental health status, including, at a minimum, the use of a version of the Modified-MINI screening tool identified by the department. The program shall be exempt

from the requirement in this subparagraph if the client was referred by a mental health provider that already completed a mental health history and current mental health status.

(4) Suicidal/homicidal assessment including past suicide attempts, method, suicide plan, family history of suicide attempts, and suicidal intent.

(5) Substance abuse history and screening describing current use, past use and treatment history, including, at a minimum, the use of a version of the Texas Christian University screening tool identified by the department. The program shall be exempt from the requirement in this subparagraph if the client was referred by a licensed substance abuse provider that already completed a substance abuse history and screening.

(6) Family history describing family composition and dynamics.

(7) Education status and history documenting levels of achievement.

(8) Vocational or employment status and history describing skills or trades learned, jobs held, duration of employment, and reasons for leaving.

(9) Peers and friends, indicating interpersonal relationships and interaction with persons and groups outside the home.

(10) A financial evaluation and information, including current financial status, gambling debt, any previous bankruptcy or repayment plans, and insurance coverage.

(11) Any other relevant information which shall assist in formulating an initial assessment of the client.

d. Problem gambling screening, admission and assessment policies and procedures. The problem gambling treatment program shall have written policies and procedures governing uniform screening, admission and assessment, which shall define:

(1) The types of information to be gathered on all problem gambling clients during screening, admission and assessment.

(2) Procedures to be followed to accept referrals from outside agencies or organizations.

(3) The types of records to be kept on all problem gambling clients applying for services.

e. The problem gambling treatment program shall ensure that all clinical observations and recommendations are documented in the client case record. If, in the judgment of the clinical director, psychological, psychiatric or further medical examinations are indicated, then the program shall refer the client to the appropriate professional services and document the referral in the client case record.

f. When a client refuses to divulge information or to follow the recommended course of treatment, the problem gambling treatment program shall note this refusal in the client case record.

g. During the screening and admission process, the program shall document that the client has been informed of:

(1) The general nature and goals of the problem gambling treatment program.

(2) The rules governing client conduct and the infractions that may lead to discharge from the program.

(3) The hours during which services are available.

(4) Problem gambling treatment costs to be borne by the client, if any.

(5) The client's rights and responsibilities.

(6) Confidentiality laws, rules and regulations including HIPAA.

h. The problem gambling treatment program shall clearly explain the results of the assessment to the client and to the client's family when appropriate. The problem gambling treatment program shall document this explanation in the client case record.

i. The clinical director shall review and approve all client screenings and assessments within 30 days of completion by probationary employees. The clinical director shall review and approve a minimum of 10 percent of all problem gambling client screenings and assessments within 30 days of completion by nonprobationary employees.

j. If the client is a minor, the program shall provide treatment services only with the permission of the client's parent or guardian.

162.20(10) Treatment plans. The problem gambling treatment program shall have a treatment plan in effect for each client receiving services. Based upon the initial assessment, the program shall develop and record an individualized written treatment plan in the client case record.

a. The problem gambling treatment program shall develop a treatment plan based upon the assessment as soon after the client's admission to the program as is clinically feasible, but not later than 30 days following admission.

b. The problem gambling treatment program shall have an individualized treatment plan for each client which, at a minimum, shall contain:

(1) Short-term and long-term goals that the client is attempting to achieve, based on the client's strengths and needs, including any problem gambling-specific goals and objectives that the client has identified.

(2) Time lines for the client to complete short-term and long-term goals and to successfully complete treatment.

(3) Type and frequency of therapeutic problem gambling treatment services which the client is receiving.

(4) Cultural and environmental criteria to meet the needs of the client.

c. The problem gambling treatment program shall develop treatment plans in partnership with the client.

d. The problem gambling treatment program shall provide the client with copies of all treatment plans upon request.

e. The problem gambling treatment program shall review the treatment plan with the client at a minimum of every 60 days or as progress occurs, whichever is sooner. The program shall document each review in the progress notes as required in subrule 162.20(11).

f. The problem gambling treatment program shall document that it has attempted to engage in joint treatment planning with other professionals who also provide services to the client.

g. If the client is a minor, the problem gambling treatment program shall develop a treatment plan in consultation with the client's parent or guardian.

162.20(11) Progress notes.

a. The problem gambling treatment program shall record a client's progress and current status in meeting the goals set in the treatment plan, as well as efforts by staff members to help the client achieve the stated goals in the client case record. Staff members shall record information following each individual counseling session and shall record a summary of group counseling services at least weekly for clients who receive group counseling services.

b. The problem gambling treatment program shall use a standard documentation format for progress notes.

c. The progress notes for each individual counseling session shall document the following:

(1) Content of the session.

(2) A reassessment of the client's status, including any new short-term or long-term goals which were developed in conjunction with the client.

(3) Efforts by staff members to help the client achieve the treatment plan goals.

(4) Progress in achieving short-term and long-term goals.

(5) A plan to determine future short-term and long-term goals.

d. Entries shall be filed in chronological order and shall include the date services were provided or observations made, the amount of service time, the date the entry was made, and the signature or initials and title of the staff member providing the services. Staff members shall enter all progress notes into the client case record in permanent pen or by typewriter or computer. For records maintained electronically, the program shall accept a staff identification code number authorizing access in lieu of a signature.

e. Staff members shall supplement all entries that involve subjective interpretations of a client's progress with a description of the actual behavioral observations which were the basis for the interpretation.

f. If a client is also receiving services from an outside resource, the program shall attempt to periodically provide an updated status report to the outside resource, and shall attempt to:

- (1) Secure a written copy of status reports and other client records from the outside resource, and
- (2) Engage in joint treatment planning with other professionals involved in the management of the client's case.

g. The problem gambling treatment program shall ensure that individual progress notes are written, typed or dictated within one working day of the session and that group progress notes are written, typed or dictated within five working days of the session.

162.20(12) Client case record contents. The problem gambling treatment program shall ensure that there is a case record for each client that contains, as applicable:

- a.* Results of all examinations, tests, screening, and admission information;
- b.* Reports from referring sources;
- c.* An assessment;
- d.* Treatment plans;
- e.* Date of report from an outside resource or documentation of verbal consultation with an outside resource including the name of the resource;
- f.* Documentation of multidisciplinary case conferences and consultations, including the date of the conference or consultation, recommendations made, actions taken, and individuals involved;
- g.* Correspondence related to the client, including all letters and dated notations of telephone conversations relevant to the client's treatment;
- h.* Treatment consent forms;
- i.* Release of information forms;
- j.* Progress notes;
- k.* Records of services provided;
- l.* A discharge summary of services provided, to be completed within 45 days of discharge.

The program shall ensure that the discharge summaries are sufficiently detailed to identify the types of services the client has received and the actions taken to address the specific problems identified. The discharge planning process shall begin at the time of client admission, shall determine a client's continued need for treatment services, and shall include development of a plan to address ongoing client posttreatment needs. Discharge planning may also include a document identified as a discharge plan. Discharge of the client shall occur not later than 45 days after services have ceased. If the client is a minor, staff members shall develop the discharge plan in consultation with the client's parent or guardian;

- m.* GTRS forms if funded by the Iowa gambling treatment fund, or other appropriate data forms;
- n.* Incident reports; and
- o.* Documentation of all missed appointments and failure to comply with treatment recommendations.

In describing services, staff members shall avoid general terms such as "counseling" or "activities."

162.20(13) Medical services.

a. The problem gambling treatment program shall have policies and procedures developed to ensure that a medical history for all clients is completed upon admission to a treatment program. The program shall have policies and procedures developed in conjunction with a physician. The program policies and procedures shall specify how program staff members review the medical history of, examine, and evaluate persons seeking services, and shall specify when staff members refer clients to medical services.

b. The program shall ensure that the medical history is performed as soon as possible.

c. A program may accept a medical history from referral sources which was conducted not more than 90 days prior to admission.

162.20(14) Emergency medical services. The problem gambling treatment program shall have policies and procedures to address medical emergencies.

162.20(15) Sentinel events.

a. The problem gambling treatment program shall have written policies and procedures to identify sentinel events that include but are not limited to:

- (1) Situations in which a client or staff member is determined to be a danger to self or others;

- (2) Any injury occurring at the facility;
 - (3) Any child abuse or dependent adult abuse involving a client or involving a program staff member as the respondent;
 - (4) Vehicular accidents involving a staff member on program business or involving a program-owned vehicle;
 - (5) Abuse of licit substances on program property;
 - (6) Use or possession of illicit substances on program property;
 - (7) Any events which may be subject to litigation; and
 - (8) Any other event which the program considers a sentinel event.
- b. The problem gambling treatment program shall identify and respond appropriately to all sentinel events.

162.20(16) *Quality improvement.* The problem gambling treatment program shall have an ongoing quality improvement plan primarily designed to improve client services and to resolve identified problems.

- a. The program shall have a written plan for quality improvement that is designed to evaluate the quality and appropriateness of client services and to resolve identified problems.
- b. Staff members shall document program progress in the quality improvement plan.
- c. Staff members shall document program changes in the quality improvement plan.
- d. Staff members shall document how the quality of client services is improved by means of the quality improvement plan.
- e. Staff members shall identify problems resolved through actions taken in compliance with the quality improvement plan.
- f. The program shall demonstrate that problem gambling treatment modalities are grounded in current best practices within the problem gambling treatment field.
- g. The program shall demonstrate integration of available research-based findings into its clinical practice.
- h. The program shall have written policies and procedures for incorporating client satisfaction, treatment outcomes and performance measurement data into the quality improvement plan and shall demonstrate that findings from these data sources have been used to monitor and improve program performance.

162.20(17) *Facility construction and safety.* All facilities in which clients receive screenings, assessments or treatment services shall be designed, constructed, equipped, and maintained in a manner that is designed to provide for the physical safety of clients, staff members, visitors, and others.

- a. If required by local jurisdiction, the program shall display a certification of occupancy.
- b. During all phases of construction or alterations of facilities, the program and construction contractor shall not diminish the level of life safety in any occupied area. The program shall ensure that construction is in compliance with all applicable federal, state, and local codes.
- c. New construction shall comply with Iowa Code chapter 104A and all applicable federal and local codes and provide for safe and convenient use by disabled individuals.
- d. The program shall have written policies and procedures to provide a safe environment for clients, personnel, and visitors and to monitor that environment. Staff members shall document implementation of the procedures. The program's written policies and procedures shall include, but not be limited to, the following:
 - (1) A process for the identification, development, implementation, and review of safety policies and procedures for all facilities and services.
 - (2) The promotion and maintenance of an ongoing, facilitywide hazard surveillance program to detect and report all safety hazards related to clients, visitors, and personnel.
 - (3) The process by which staff members dispose of biohazardous waste within clinical service areas.
 - (4) For all facilities, the program shall:
 1. Maintain all stairway, hall, and aisle floors with a substantial nonslippery material. The program shall maintain all stairways, halls, and aisles in a good state of repair, with adequate lighting. The

program shall ensure that halls and aisles are free from obstructions at all times and that all stairways have handrails.

2. Ensure that radiators, registers, and steam and hot water pipes have protective covering or insulation and that electrical outlets and switches have wall plates.

3. Have written procedures for the handling and storage of hazardous materials.

4. Have policies and procedures for weapons removal.

5. Maintain swimming pools in conformance with state and local health and safety regulations.

The program shall ensure that adult supervision is available at all times during which children are using the pool.

6. Have policies regarding fishing ponds, lakes, or any bodies of water located on or near the facility and accessible to the client.

162.20(18) Facility safety. The problem gambling treatment program shall:

a. Ensure that the outpatient facility is safe, clean, well-ventilated, properly heated, free from vermin and rodents and in good repair.

b. Ensure that the facility is appropriate for providing those services available from the program and for protecting confidentiality.

c. Ensure that furniture is in good repair.

d. Have a written plan outlining procedures to be followed in the event of fire or tornado. This plan shall be conspicuously displayed in the facility.

162.20(19) Therapeutic environment. The problem gambling treatment program shall establish an environment that enhances the positive self-image of clients and preserves their human dignity. The program shall:

a. Ensure that all services are accessible to people with disabilities or have written policies and procedures that describe how people with disabilities can attain access to the facility for necessary services. The program shall comply with the Americans with Disabilities Act.

b. Ensure that the waiting or reception areas are of adequate size, have appropriate furniture and are located to ensure confidentiality.

c. Ensure that staff members are available to address the needs of clients and to greet clients and visitors.

d. Prohibit smoking within each facility.

e. Ensure that no staff member or other person sells, gives, or otherwise supplies any tobacco, tobacco products, or cigarettes to any client or staff member. The program shall not allow a person under the age of 18 to smoke, use, purchase, or attempt to purchase any tobacco, tobacco products, or cigarettes.

f. Have written policies and procedures to:

(1) Inform problem gambling clients of their legal and human rights at the time of admission to the program;

(2) Address client communication, opinions, or grievances and have a mechanism for redress;

(3) Address prohibition of sexual harassment; and

(4) Address a client's right to privacy.

162.20(20) Financial counseling services.

a. The program shall offer financial counseling services to clients. Financial counseling services shall be provided in-house or through consultation.

b. If the problem gambling treatment program determines that the client has financial problems, then financial counseling services shall include assisting clients in preparing a budget and discussing financial debt options, including restitution and bankruptcy.

These rules are intended to implement Iowa Code section 135.150.

CHAPTER 170
DESCRIPTION OF ORGANIZATION
[Prior to 7/29/87, Health Department[470]Ch 170]

641—170.1(17A) Definitions.

“*Department*” means the Iowa department of public health.

“*Director*” means the director of public health.

641—170.2(17A) State board of health. The state board of health, which consists of nine members, appointed by the governor, is the policymaking body for the Iowa department of public health and has the power and duty to adopt, promulgate, amend and repeal rules, consider legislation, and advise or make recommendations to the governor, general assembly, and director relative to public health, hygiene, and sanitation. The state board of health meets on the second Wednesday in July and on the second Wednesday on each second month thereafter and at such other time as may be deemed necessary by the president of the board.

641—170.3(17A) Director of public health. The director is the chief administrative officer of the department, and in that capacity directs and administers the programs and services of the department. The duties of the director include: recommendations to the state board of health; the adoption of rules for the implementation of statutes; service as secretary to the state board of health; the establishment of the administrative organization; and other actions to administer and direct the department’s programs.

641—170.4(17A,135) Administrative divisions of the department. There are five divisions in the department, each directed by a division director who reports to the department director.

170.4(1) *Division of central administration/professional licensure.* The division provides support to department staff in functions of fiscal, personnel, office services, data entry, statistics, computer management, communications, special projects, administrative rules, and legislative liaison activities. The division is also responsible for carrying out Iowa Code chapter 144 (Vital Statistics Act). Staff support in licensing and certification is provided to the following boards of examiners: barber, chiropractic, cosmetology, dietetic, hearing aid dealer, mortuary science, nursing home administrator, ophthalmic dispenser, optometry, physical and occupational therapy, physician assistant, podiatry, psychology, respiratory care therapist, social work, speech pathology and audiology.

170.4(2) *Office of health planning.* The office of health planning provides interagency staffing for the Iowa health data commission and for ad hoc committees and task forces. The certificate of need program is administered by the office of health planning. Staff also provides for coordination of primary care. The office of rural health is administered by the office of health planning, providing technical assistance and resources to communities throughout the state. A nursing grant program is administered by the office of rural health. The office of health planning also coordinates the department’s county health planning effort. The office also functions in the designation of health manpower shortage areas and in the review of health maintenance organizations.

170.4(3) *Division of disease prevention.* The division of disease prevention is responsible for collecting data and determining the frequency with which infectious diseases occur within Iowa’s population. This includes diseases transmitted from animals to humans. Advice and assistance are provided to local communities pertaining to the incidence and control of all communicable diseases. Disease control programs are conducted for such diseases as hospital-acquired infections, sexually transmitted diseases, tuberculosis, vaccine-preventable diseases, and acquired immune deficiency syndrome (AIDS). Active monitoring of disease occurrence, case investigations, and medical consultation in diagnosis, treatment, and control are conducted daily.

Environmental health programs include asbestos and polychlorinated biphenyls compliance monitoring and toxic substance evaluations regarding toxic waste sites.

Health engineering and consumer safety programs focus on compliance with U.S. Public Health Service milk standards, various environmental water quality problems, a swimming pool and spa registration and inspection program, and product safety recalls.

Radiological health programs include the registration and licensure of radiation-emitting equipment and radiation operators. Radioactive materials are licensed and inspected, ensuring low-level radiation exposure. Radon mitigation, testing and control programs are also administered.

The division is responsible for approving laboratories that desire to perform drug testing services for businesses located or doing business in Iowa and for issuing tattoo establishment and tattoo artist permits.

The refugee health program provides interpreter services to health providers in all areas of medical and public health concern.

The emergency medical services program is responsible for the training and certification of basic care providers and for the authorization of advanced care services.

The division also maintains a centralized registry for brain and spinal cord injuries and a reporting and surveillance system for agricultural and other work-related injuries.

170.4(4) *Division of family and community health.* The division of family and community health provides support for local public health services throughout Iowa, including public health nursing services, well-elderly clinics, homemaker-home health aide services, genetic counseling services, dental public health services, maternal and child health services, family planning services, adolescent health, child health specialty clinics, and nutrition services. The division also administers the disability prevention program and reimbursement for chronic renal disease services and in-home nonnursing homemaker services for human immunodeficiency virus (HIV)-infected persons.

The division establishes program standards and assists communities to develop services by providing technical assistance, monitoring, and financial support. Most of the services are provided through contracts with city or county governmental units or agencies serving a county or regional area. Additional services are provided directly by division staff and through contracts with the University of Iowa.

170.4(5) *Division of substance abuse.* The division of substance abuse administers the statewide substance (alcohol and other drugs) abuse prevention and treatment programs of the department. Policy is established by the nine-member commission on substance abuse appointed by the governor. The primary functions of the division include: licensure of substance abuse treatment programs; administration (planning, allocation and monitoring) of federal and state funds for substance abuse prevention and treatment efforts; provision of training opportunities for substance abuse program personnel, and provision of technical assistance on substance prevention and treatment to programs and communities.

641—170.5(17A) Central office. The address of the central office is: Iowa Department of Public Health, Third Floor, Lucas State Office Building, Des Moines, Iowa 50319-0075. Location of specific offices and the regional offices may be obtained by writing to the department at the aforesaid address.

641—170.6(17A) Business hours. The normal business hours of the department are 8 a.m. to 4:30 p.m., Monday through Friday, except legal holidays.

641—170.7(17A) Submission of materials. Request for applications, submission of applications, and other materials shall be made directly to the division of the department administering the program involved. Any person who submits materials should enclose a cover letter which states the use for which the materials are intended. Where the rules give specific procedure, such procedure should be followed.

641—170.8(17A) Request for information. Request for information concerning programs within the department should be addressed or telephoned to the specific division of the department. General requests for information may be made to: Public Information Section, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

These rules are intended to implement Iowa Code sections 17A.3 and 135.11.

[Filed 3/18/76, Notice 2/9/76—published 4/5/76, effective 5/10/76]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed emergency 9/25/90—published 10/17/90, effective 9/25/90]

[Filed 1/14/91, Notice 11/14/90—published 2/6/91, effective 3/13/91]

CHAPTER 171
PETITIONS FOR RULE MAKING
[Prior to 7/29/87, Department of Health[470] Ch 171]

641—171.1(17A) Petition for rule making.

171.1(1) Any person or agency may file a petition for rule making with the Director, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. A petition is deemed filed when it is received by that office. The department must provide the petitioner with a file-stamped copy of the petition if the petitioner provides the agency an extra copy for this purpose. The petition must be typewritten, or legibly handwritten in ink and must substantially conform to the following form:

BEFORE THE DEPARTMENT OF PUBLIC HEALTH	
Petition by (Name of Petitioner) for the (adoption, amendment, or repeal) of rules relating to (state subject matter).	} PETITION FOR RULE MAKING

The petition must provide the following information:

1. A statement of the specific rule-making action sought by the petitioner including the text or a summary of the contents of the proposed rule or amendment to a rule and, if it is a petition to amend or repeal a rule, a citation and the relevant language to the particular portion or portions of the rule proposed to be amended or repealed.
2. A citation to any law deemed relevant to the department’s authority to take the action urged or to the desirability of that action.
3. A brief summary of petitioner’s arguments in support of the action urged in the petition.
4. A brief summary of any data supporting the action urged in the petition.
5. The names and addresses of other persons, or a description of any class of persons, known by petitioner to be affected by or interested in, the proposed action which is the subject of the petition.
6. Any request by petitioner for a meeting provided for by rule 171.4(17A).

171.1(2) The petition must be dated and signed by the petitioner or the petitioner’s representative. It must also include the name, mailing address, and telephone number of the petitioner and petitioner’s representative, and a statement indicating the person to whom communications concerning the petition should be directed.

171.1(3) The department may deny a petition because it does not substantially conform to the required form.

641—171.2(17A) Briefs. The petitioner may attach a brief to the petition in support of the action urged in the petition. The department may request a brief from the petitioner or from any other person concerning the substance of the petition.

641—171.3(17A) Inquiries. Inquiries concerning the status of a petition for rule making may be made to the Director, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—171.4(17A) Department consideration.

171.4(1) Within 14 days after the filing of a petition, the department must submit a copy of the petition and any accompanying brief to the administrative rules coordinator and to the administrative rules review committee. Upon request by petitioner in the petition, the department must schedule a brief and informal meeting between the petitioner and a member of the staff of the department, to discuss the petition. The department may request the petitioner to submit additional information or argument concerning the petition. The department may also solicit comments from any person on the substance of the petition. Also, comments on the substance of the petition may be submitted to the department by any person.

171.4(2) Within 60 days after the filing of the petition, or within any longer period agreed to by the petitioner, the department must, in writing, deny the petition, and notify petitioner of its action and the specific grounds for the denial, or grant the petition and notify petitioner that it has instituted rule-making proceedings on the subject of the petition. Petitioner shall be deemed notified of the denial or grant of the petition on the date when the department mails or delivers the required notification to petitioner.

171.4(3) Denial of a petition because it does not substantially conform to the required form does not preclude the filing of a new petition on the same subject that seeks to eliminate the grounds for the agency's rejection of the petition.

These rules are intended to implement Iowa Code chapter 17A as amended by 1998 Iowa Acts, chapter 1202.

[Filed 3/18/76, Notice 2/9/76—published 4/5/76, effective 5/10/76]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed 5/14/99, Notice 3/24/99—published 6/2/99, effective 7/7/99]

CHAPTER 172
DECLARATORY ORDERS
[Prior to 7/29/87, Health Department[470] Ch 172]

641—172.1(17A) Petition for declaratory order. Any person may file a petition with the department of public health for a declaratory order as to the applicability to specified circumstances of a statute, rule, or order within the primary jurisdiction of the Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. A petition is deemed filed when it is received by that office. The department shall provide the petitioner with a file-stamped copy of the petition if the petitioner provides the department an extra copy for this purpose. The petition must be typewritten or legibly handwritten in ink and must substantially conform to the following form:

BEFORE THE DEPARTMENT OF PUBLIC HEALTH	
Petition by (Name of Petitioner) for a Declaratory Order on (Cite provisions of law involved).	
PETITION FOR DECLARATORY ORDER	

The petition must provide the following information:

1. A clear and concise statement of all relevant facts on which the order is requested.
2. A citation and the relevant language of the specific statutes, rules, policies, decisions, or orders, whose applicability is questioned, and any other relevant law.
3. The questions petitioner wants answered, stated clearly and concisely.
4. The answers to the questions desired by the petitioner and a summary of the reasons urged by the petitioner in support of those answers.
5. The reasons for requesting the declaratory order and disclosure of the petitioner's interest in the outcome.
6. A statement indicating whether the petitioner is currently a party to another proceeding involving the questions at issue and whether, to the petitioner's knowledge, those questions have been decided by, are pending determination by, or are under investigation by, any governmental entity.
7. The names and addresses of other persons, or a description of any class of persons, known by petitioner to be affected by, or interested in, the questions presented in the petition.
8. Any request by petitioner for a meeting provided for by 172.7(17A).

The petition must be dated and signed by the petitioner or the petitioner's representative. It must also include the name, mailing address, and telephone number of the petitioner and petitioner's representative and a statement indicating the person to whom communications concerning the petition should be directed.

641—172.2(17A) Notice of petition. Within 15 days after receipt of a petition for a declaratory order, the department shall give notice of the petition to all persons not served by the petitioner pursuant to 172.6(17A) to whom notice is required by any provision of law. The department may also give notice to any other persons.

641—172.3(17A) Intervention.

172.3(1) Persons who qualify under any applicable provision of law as an intervenor and who file a petition for intervention within 20 days of the filing of a petition for declaratory order shall be allowed to intervene in a proceeding for a declaratory order.

172.3(2) Any person who files a petition for intervention at any time prior to the issuance of an order may be allowed to intervene in a proceeding for a declaratory order at the discretion of the department.

172.3(3) A petition for intervention shall be filed at the Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. Such a petition is deemed filed when it is received by that office. The department will provide the petitioner with a file-stamped copy of the petition for

intervention if the petitioner provides an extra copy for this purpose. A petition for intervention must be typewritten or legibly handwritten in ink and must substantially conform to the following form:

BEFORE THE DEPARTMENT OF PUBLIC HEALTH	
Petition by (Name of Original Petitioner) for a Declaratory Order on (Cite provisions of law cited in original petition).	} PETITION FOR INTERVENTION

The petition for intervention must provide the following information:

1. Facts supporting the intervenor's standing and qualifications for intervention.
2. The answers urged by the intervenor to the question or questions presented and a summary of the reasons urged in support of those answers.
3. Reasons for requesting intervention and disclosure of the intervenor's interest in the outcome.
4. A statement indicating whether the intervenor is currently a party to any proceeding involving the questions at issue and whether, to the intervenor's knowledge, those questions have been decided by, are pending determination by, or are under investigation by, any governmental entity.
5. The names and addresses of any additional persons, or a description of any additional class of persons, known by the intervenor to be affected by, or interested in, the questions presented.
6. Whether the intervenor consents to be bound by the determination of the matters presented in the declaratory order proceeding.

The petition must be dated and signed by the intervenor or the intervenor's representative. It must also include the name, mailing address, and telephone number of the intervenor and intervenor's representative, and a statement indicating the person to whom communications should be directed.

641—172.4(17A) Briefs. The petitioner or any intervenor may file a brief in support of the position urged. The department may request a brief from the petitioner, any intervenor, or any other person concerning the questions raised.

641—172.5(17A) Inquiries. Inquiries concerning the status of a declaratory order proceeding may be made to the Director, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

641—172.6(17A) Service and filing of petitions and other papers.

172.6(1) Service—when required. Except where otherwise provided by law, every petition for declaratory order, petition for intervention, brief, or other paper filed in a proceeding for a declaratory order shall be served upon each of the parties of record to the proceeding, and on all other persons identified in the petition for declaratory order or petition for intervention as affected by or interested in the questions presented, simultaneously with their filing. The party filing a document is responsible for service on all parties and other affected or interested persons.

172.6(2) Filing—when required. All petitions for declaratory orders, petitions for intervention, briefs, or other papers in a proceeding for a declaratory order shall be filed with the Director, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. All petitions, briefs, or other papers that are required to be served upon a party shall be filed simultaneously with the department.

172.6(3) Method of service, time of filing, and proof of mailing. Method of service, time of filing, and proof of mailing shall be as provided by 641—173.12(17A).

641—172.7(17A) Consideration. Upon request by petitioner, the department must schedule a brief and informal meeting between the original petitioner, all intervenors, and a member of the staff of the department, to discuss the questions raised. The department may solicit comments from any person on the questions raised. Also, comments on the questions raised may be submitted to the department by any person.

641—172.8(17A) Action on petition.

172.8(1) Within the time allowed by 1998 Iowa Acts, chapter 1202, section 13(5), after receipt of a petition for a declaratory order, the department or designee shall take action on the petition as required by 1998 Iowa Acts, chapter 1202, section 13(5).

172.8(2) The date of issuance of an order or of a refusal to issue an order is as defined in 641—173.2(17A).

641—172.9(17A) Refusal to issue order.

172.9(1) The department shall not issue a declaratory order where prohibited by 1998 Iowa Acts, chapter 1202, section 13(1), and may refuse to issue a declaratory order on some or all questions raised for the following reasons:

1. The petition does not substantially comply with the required form.
2. The petition does not contain facts sufficient to demonstrate that the petitioner will be aggrieved or adversely affected by the failure of the department to issue an order.
3. The department does not have jurisdiction over the questions presented in the petition.
4. The questions presented by the petition are also presented in a current rule making, contested case, or other agency or judicial proceeding, that may definitively resolve them.
5. The questions presented by the petition would more properly be resolved in a different type of proceeding or by another body with jurisdiction over the matter.
6. The facts or questions presented in the petition are unclear, overbroad, insufficient, or otherwise inappropriate as a basis upon which to issue an order.
7. There is no need to issue an order because the questions raised in the petition have been settled due to a change in circumstances.
8. The petition is not based upon facts calculated to aid in the planning of future conduct but is, instead, based solely upon prior conduct in an effort to establish the effect of that conduct or to challenge an agency decision already made.
9. The petition requests a declaratory order that would necessarily determine the legal rights, duties, or responsibilities of other persons who have not joined in the petition, intervened separately, or filed a similar petition and whose position on the questions presented may fairly be presumed to be adverse to that of petitioner.
10. The petitioner requests the department to determine whether a statute is unconstitutional on its face.

172.9(2) A refusal to issue a declaratory order must indicate the specific grounds for the refusal and constitutes final agency action on the petition.

172.9(3) Refusal to issue a declaratory order pursuant to this provision does not preclude the filing of a new petition that seeks to eliminate the grounds for the refusal to issue an order.

641—172.10(17A) Contents of declaratory order—effective date. In addition to the order itself, a declaratory order must contain the date of its issuance, the name of petitioner and all intervenors, the specific statutes, rules, policies, decisions, or orders involved, the particular facts upon which it is based, and the reasons for its conclusion. A declaratory order is effective on the date of issuance.

641—172.11(17A) Copies of orders. A copy of all orders issued in response to a petition for a declaratory order shall be mailed promptly to the original petitioner and all intervenors.

641—172.12(17A) Effect of a declaratory order. A declaratory order has the same status and binding effect as a final order issued in a contested case proceeding. It is binding on the department, the petitioner, and any intervenors and is applicable only in circumstances where the relevant facts and the law involved are indistinguishable from those on which the order was based. As to all other persons, a declaratory

order serves only as precedent and is not binding on the department. The issuance of a declaratory order constitutes final agency action on the petition.

These rules are intended to implement Iowa Code chapter 17A as amended by 1998 Iowa Acts, chapter 1202.

[Filed 3/18/76, Notice 2/9/76—published 4/5/76, effective 5/10/76]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]

[Filed 5/14/99, Notice 3/24/99—published 6/2/99, effective 7/7/99]

CHAPTER 173
CONTESTED CASES

[Prior to 7/29/87, Health Department[470] Ch 173]

641—173.1(17A) Scope and applicability. This chapter applies to contested case proceedings conducted by the department of public health.

641—173.2(17A) Definitions. Except where otherwise specifically defined by law:

“*Contested case*” means a proceeding defined by Iowa Code section 17A.2(5) and includes any matter defined as a no factual dispute contested case under 1998 Iowa Acts, chapter 1202, section 14.

“*Issuance*” means the date of mailing of a decision or order or date of delivery if service is by other means unless another date is specified in the order.

“*Party*” means each person or agency named or admitted as a party or properly seeking and entitled as of right to be admitted as a party.

“*Presiding officer*” means an administrative law judge from the department of inspections and appeals or the director of the department or the members of a multimember board or commission.

“*Proposed decision*” means the presiding officer’s recommended findings of fact, conclusions of law, decision, and order in a contested case in which the department did not preside.

641—173.3(17A) Time requirements.

173.3(1) Time shall be computed as provided in Iowa Code subsection 4.1(34).

173.3(2) For good cause, the presiding officer may extend or shorten the time to take any action, except as precluded by statute or by rule. Except for good cause stated in the record, before extending or shortening the time to take any action, the presiding officer shall afford all parties an opportunity to be heard or to file written arguments.

641—173.4(17A) Requests for contested case proceeding. Any person claiming an entitlement to a contested case proceeding shall file a written request for such a proceeding within the time specified by the particular rules or statutes governing the subject matter or, in the absence of such law, the time specified in the agency action in question.

The request for a contested case proceeding should state the name and address of the requester, identify the specific department action which is disputed, and where the requester is represented by a lawyer identify the provisions of law or precedent requiring or authorizing the holding of a contested case proceeding in the particular circumstances involved, and include a short and plain statement of the issues of material fact in dispute.

641—173.5(17A) Notice of hearing.

173.5(1) Delivery. Delivery of the notice of hearing constitutes the commencement of the contested case proceeding. Delivery may be executed by:

- a. Personal service as provided in the Iowa Rules of Civil Procedure; or
- b. Certified mail, return receipt requested; or
- c. First-class mail; or
- d. Publication, as provided in the Iowa Rules of Civil Procedure.

173.5(2) Contents. The notice of hearing shall contain the following information:

- a. A statement of the time, place, and nature of the hearing;
- b. A statement of the legal authority and jurisdiction under which the hearing is to be held;
- c. A reference to the particular sections of the statutes and rules involved;
- d. A short and plain statement of the matters asserted. If the department or other party is unable to state the matters in detail at the time the notice is served, the initial notice may be limited to a statement of the issues involved. Thereafter, upon application, a more definite and detailed statement shall be furnished;

e. Identification of all parties including the name, address and telephone number of the person who will act as advocate for the department or the state and of parties’ counsel where known;

- f.* Reference to the procedural rules governing conduct of the contested case proceeding;
- g.* Reference to the procedural rules governing informal settlement;
- h.* Identification of the presiding officer, if known. If not known, a description of who will serve as presiding officer; and
- i.* Notification of the time period in which a party may request, pursuant to 1998 Iowa Acts, chapter 1202, section 15(1), and rule 173.6(17A), that the presiding officer be an administrative law judge.

641—173.6(17A) Presiding officer.

173.6(1) Any party who wishes to request that the presiding officer assigned to render a proposed decision be an administrative law judge employed by the department of inspections and appeals must file a written request within 20 days after service of a notice of hearing which identifies or describes the presiding officer as the director of the department or members of the department.

173.6(2) The department may deny the request only upon a finding that one or more of the following apply:

- a.* Neither the department nor any officer of the department under whose authority the contested case is to take place is a named party to the proceeding or a real party in interest to that proceeding.
- b.* There is a compelling need to expedite issuance of a final decision in order to protect the public health, safety, or welfare.
- c.* An administrative law judge with the qualifications identified in subrule 173.6(4) is unavailable to hear the case within a reasonable time.
- d.* The case involves significant policy issues of first impression that are inextricably intertwined with the factual issues presented.
- e.* The demeanor of the witnesses is likely to be dispositive in resolving the disputed factual issues.
- f.* Funds are unavailable to pay the costs of an administrative law judge and an interagency appeal.
- g.* The request was not timely filed.
- h.* The request is not consistent with a specified statute.

173.6(3) The department shall issue a written ruling specifying the grounds for its decision within 20 days after a request for an administrative law judge is filed. If the ruling is contingent upon the availability of an administrative law judge with the qualifications identified in subrule 173.6(4), the parties shall be notified at least 10 days prior to hearing if a qualified administrative law judge will not be available.

173.6(4) An administrative law judge assigned to act as presiding officer in a contested case shall have the following technical expertness unless waived by the department: a J.D. degree.

173.6(5) Except as provided otherwise by another provision of law, all rulings by an administrative law judge acting as presiding officer are subject to appeal to the department. A party must seek any available intra-agency appeal in order to exhaust adequate administrative remedies.

173.6(6) Unless otherwise provided by law, the director of the department and members of multimember boards and commissions, when reviewing a proposed decision upon intra-agency appeal, shall have the powers of and shall comply with the provisions of this chapter which apply to presiding officers.

641—173.7(17A) Waiver of procedures. Unless otherwise precluded by law, the parties in a contested case proceeding may waive any provision of this chapter. However, the department in its discretion may refuse to give effect to such a waiver when it deems the waiver to be inconsistent with the public interest.

641—173.8(17A) Telephone proceedings. The presiding officer may resolve preliminary procedural motions by telephone conference in which all parties have an opportunity to participate. Other telephone proceedings may be held with the consent of all parties. The presiding officer will determine the location of the parties and witnesses for telephone hearings. The convenience of the witnesses or parties, as well as the nature of the case, will be considered when location is chosen.

641—173.9(17A) Disqualification.

173.9(1) A presiding officer or other person shall withdraw from participation in the making of any proposed or final decision in a contested case if that person:

- a.* Has a personal bias or prejudice concerning a party or a representative of a party;
- b.* Has personally investigated, prosecuted or advocated in connection with that case, the specific controversy underlying that case, another pending factually related contested case, or a pending factually related controversy that may culminate in a contested case involving the same parties;
- c.* Is subject to the authority, direction or discretion of any person who has personally investigated, prosecuted or advocated in connection with that contested case, the specific controversy underlying that contested case, or a pending factually related contested case or controversy involving the same parties;
- d.* Has acted as counsel to any person who is a private party to that proceeding within the past two years;
- e.* Has a personal financial interest in the outcome of the case or any other significant personal interest that could be substantially affected by the outcome of the case;
- f.* Has a spouse or relative within the third degree of relationship that (1) is a party to the case, or an officer, director or trustee of a party; (2) is a lawyer in the case; (3) is known to have an interest that could be substantially affected by the outcome of the case; or (4) is likely to be a material witness in the case; or
- g.* Has any other legally sufficient cause to withdraw from participation in the decision making in that case.

173.9(2) The term “personally investigated” means taking affirmative steps to interview witnesses directly or to obtain documents or other information directly. The term “personally investigated” does not include general direction and supervision of assigned investigators, unsolicited receipt of information which is relayed to assigned investigators, review of another person’s investigative work product in the course of determining whether there is probable cause to initiate a proceeding, or exposure to factual information while performing other agency functions, including fact gathering for purposes other than investigation of the matter which culminates in a contested case. Factual information relevant to the merits of a contested case received by a person who later serves as presiding officer in that case shall be disclosed if required by Iowa Code section 17A.17 as amended by 1998 Iowa Acts, chapter 1202, section 19, and subrules 173.9(3) and 173.23(9).

173.9(3) In a situation where a presiding officer or other person knows of information which might reasonably be deemed to be a basis for disqualification and decides voluntary withdrawal is unnecessary, that person shall submit the relevant information for the record by affidavit and shall provide for the record a statement of the reasons for the determination that withdrawal is unnecessary.

173.9(4) If a party asserts disqualification on any appropriate ground, including those listed in subrule 173.9(1), the party shall file a motion supported by an affidavit pursuant to 1998 Iowa Acts, chapter 1202, section 19(7). The motion must be filed as soon as practicable after the reason alleged in the motion becomes known to the party.

If the presiding officer determines that disqualification is appropriate, the presiding officer or other person shall withdraw. If the presiding officer determines that withdrawal is not required, the presiding officer shall enter an order to that effect. A party asserting disqualification may seek an interlocutory appeal under rule 173.25(17A) and seek a stay under rule 173.29(17A).

641—173.10(17A) Consolidation—severance.

173.10(1) *Consolidation.* The presiding officer may consolidate any or all matters at issue in two or more contested case proceedings where (a) the matters at issue involve common parties or common questions of fact or law; (b) consolidation would expedite and simplify consideration of the issues involved; and (c) consolidation would not adversely affect the rights of any of the parties to those proceedings.

173.10(2) *Severance.* The presiding officer may, for good cause shown, order any contested case proceedings or portions thereof severed.

641—173.11(17A) Pleadings.

173.11(1) Pleadings may be required by rule, by the notice of hearing, or by order of the presiding officer.

173.11(2) Answer. An answer shall be filed within 20 days of service of the notice of hearing unless otherwise ordered. A party may move to dismiss or apply for a more definite and detailed statement when appropriate.

An answer shall show on whose behalf it is filed and specifically admit, deny, or otherwise answer all material allegations of the notice of hearing to which it responds. It shall state any facts deemed to show an affirmative defense and contain as many additional defenses as the pleader may claim.

An answer shall state the name, address and telephone number of the person filing the answer, the person or entity on whose behalf it is filed, and the attorney representing that person, if any.

Any allegation in the notice of hearing not denied in the answer is considered admitted. The presiding officer may refuse to consider any defense not raised in the answer which could have been raised on the basis of facts known when the answer was filed if any party would be prejudiced.

173.11(3) Amendment. Notices of hearing and answers may be amended with the consent of the parties or in the discretion of the presiding officer who may impose terms or grant a continuance.

641—173.12(17A) Service and filing of pleadings and other papers.

173.12(1) *Service—when required.* Except where otherwise provided by law, every document filed in a contested case proceeding shall be served upon each of the parties of record to the proceeding, including the person designated as prosecutor for the state or the department, simultaneously with their filing. Except for the original notice of hearing and an application for rehearing as provided in Iowa Code section 17A.16(2), the party filing a document is responsible for service on all parties.

173.12(2) *Service—how made.* Service upon a party represented by an attorney shall be made upon the attorney unless otherwise ordered. Service is made by delivery or by mailing a copy to the person's last-known address. Service by mail is complete upon mailing, except where otherwise specifically provided by statute, rule, or order.

173.12(3) *Filing—when required.* After the notice of hearing, all documents in a contested case proceeding shall be filed with the Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. All documents that are required to be served upon a party shall be filed simultaneously with the department.

173.12(4) *Filing—when made.* Except where otherwise provided by law, a document is deemed filed at the time it is delivered to the department, delivered to an established courier service for immediate delivery to that office, or mailed by first-class mail or state interoffice mail to that office, so long as there is proof of mailing.

173.12(5) *Proof of mailing.* Proof of mailing includes either: a legible United States Postal Service postmark on the envelope, a certificate of service, a notarized affidavit, or a certification in substantially the following form:

I certify under penalty of perjury and pursuant to the laws of Iowa that, on (date of mailing), I mailed copies of (describe document) addressed to the Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075, and to the names and addresses of the parties listed below by depositing the same in (a United States post office mailbox with correct postage properly affixed or state interoffice mail).

(Date)

(Signature)

641—173.13(17A) Discovery.

173.13(1) Discovery procedures applicable in civil actions are applicable in contested cases. Unless lengthened or shortened by these rules or by order of the presiding officer, time periods for compliance with discovery shall be as provided in the Iowa Rules of Civil Procedure.

173.13(2) Any motion relating to discovery shall allege that the moving party has previously made a good-faith attempt to resolve the discovery issues involved with the opposing party. Motions in regard to

discovery shall be ruled upon by the presiding officer. Opposing parties shall be afforded the opportunity to respond within ten days of the filing of the motion unless the time is shortened as provided in subrule 173.13(1). The presiding officer may rule on the basis of the written motion and any response, or may order argument on the motion.

173.13(3) Evidence obtained in discovery may be used in the contested case proceeding if that evidence would otherwise be admissible in that proceeding.

641—173.14(17A,135) Subpoenas.

173.14(1) *Investigatory subpoenas.*

a. The department may subpoena books, papers, records, and other real evidence which is necessary for the department to decide whether to institute a contested case proceeding. Each subpoena shall contain:

- (1) The name and address of the person to whom the subpoena is directed;
- (2) A description of the books, papers, records or other real evidence requested;
- (3) The date, time and location for production, or inspection and copying;
- (4) The time within which a motion to quash or modify the subpoena must be filed;
- (5) The signature, address and telephone number of the division director or designee;
- (6) The date of issuance;
- (7) A return of service.

b. Any person who is aggrieved or adversely affected by compliance with the subpoena and who desires to challenge the subpoena must, within 14 days after service of the subpoena, or before the time specified for compliance if such time is less than 14 days, file with the department a motion to quash or modify the subpoena. The motion shall describe the legal reasons why the subpoena should be quashed or modified, and may be accompanied by legal briefs or factual affidavits.

c. Upon receipt of a timely motion to quash or modify a subpoena, the department may request an administrative law judge to issue a decision. Oral argument may be scheduled at the discretion of the administrative law judge. The administrative law judge may quash or modify the subpoena, deny the motion, or issue an appropriate protective order.

d. A person who is aggrieved by a ruling of an administrative law judge and who desires to challenge that ruling must appeal the ruling to the department by serving on the department director, either in person or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge.

e. If the person contesting the subpoena is not the person under investigation, the department's decision is final for purposes of judicial review. If the person contesting the subpoena is the person under investigation, the department's decision is not final for purposes of judicial review until either (1) the person is notified the investigation has been concluded with no formal action, or (2) there is a final decision in the case.

173.14(2) *Issuance of subpoenas in a contested case.*

a. Subpoenas issued in a contested case may compel the attendance of witnesses at a deposition or hearing, and may compel the production of books, papers, records, and other real evidence. A command to produce evidence or to permit inspection may be joined with a command to appear at a deposition or hearing, or may be issued separately. Subpoenas shall be issued by the department upon written request. In the absence of good cause, a request for a subpoena must be received at least three days before the scheduled hearing.

b. A request for a subpoena shall include the following information, as applicable, unless the subpoena is requested to compel testimony or documents for rebuttal or impeachment purposes:

- (1) The name, address and telephone number of the person requesting the subpoena;
- (2) The name and address of the person to whom the subpoena shall be directed;
- (3) The date, time and location at which the person shall be commanded to attend and give testimony;
- (4) Whether the testimony is requested in connection with a deposition or hearing;
- (5) A description of the books, papers, records or other real evidence requested;

- (6) The date, time and location for production, or inspection and copying.
- c. Each subpoena shall contain, as applicable:
 - (1) The caption of the case;
 - (2) The name, address and telephone number of the person who requested the subpoena;
 - (3) The name and address of the person to whom the subpoena is directed;
 - (4) The date, time and location at which the person is commanded to appear;
 - (5) Whether the testimony is commanded in connection with a deposition or hearing;
 - (6) A description of the books, papers, records or other real evidence the person is commanded to produce;
 - (7) The date, time and location for production, or inspection and copying;
 - (8) The time within which a motion to quash or modify the subpoena must be filed;
 - (9) The signature, address and telephone number of the division director or designee;
 - (10) The date of issuance;
 - (11) A return of service.
- d. Unless a subpoena is requested to compel testimony or documents for rebuttal or impeachment purposes, the division director or designee shall mail copies of all subpoenas to the parties to the contested case. The person who requested the subpoena is responsible for serving the subpoena upon the subject of the subpoena.
- e. Any person who is aggrieved or adversely affected by compliance with the subpoena, or any party to the contested case who desires to challenge the subpoena must, within 14 days after service of the subpoena, or before the time specified for compliance if such time is less than 14 days, file with the department a motion to quash or modify the subpoena. The motion shall describe the legal reasons why the subpoena should be quashed or modified, and may be accompanied by legal briefs or factual affidavits.
- f. Upon receipt of a timely motion to quash or modify a subpoena, the department may request an administrative law judge to issue a decision. Oral argument may be scheduled at the discretion of the administrative law judge. The administrative law judge may quash or modify the subpoena, deny the motion, or issue an appropriate protective order.
- g. A person who is aggrieved by a ruling of an administrative law judge and who desires to challenge that ruling must appeal the ruling to the department by serving on the department director, either in person or by certified mail, a notice of appeal within ten days after service of the decision of the administrative law judge.

641—173.15(17A) Motions.

173.15(1) No technical form for motions is required. However, prehearing motions must be in writing, state the grounds for relief, and state the relief sought.

173.15(2) Any party may file a written response to a motion within ten days after the motion is served. The presiding officer may consider a failure to respond within the required time period in ruling on a motion.

173.15(3) The presiding officer may schedule oral argument on any motion.

173.15(4) Motions pertaining to the hearing, except motions for summary judgment, must be filed and served at least ten days prior to the date of hearing unless there is good cause for permitting later action or the time for such action is lengthened or shortened by an order of the presiding officer.

173.15(5) Motions for summary judgment. Motions for summary judgment shall comply with the requirements of Iowa Rule of Civil Procedure 237 and shall be subject to disposition according to the requirements of that rule to the extent such requirements are not inconsistent with the provisions of this rule or any other provision of law governing the procedure in contested cases.

Motions for summary judgment must be filed and served at least 45 days prior to the scheduled hearing date, or other time period determined by the presiding officer. Any party resisting the motion shall file and serve a resistance within 15 days, unless otherwise ordered by the presiding officer, from the date a copy of the motion was served. The time fixed for hearing or nonoral submission shall be not less than 20 days after the filing of the motion, unless a shorter time is ordered by the presiding officer.

A summary judgment order rendered on all issues in a contested case is subject to rehearing pursuant to 173.28(17A) and appeal pursuant to 173.27(17A).

641—173.16(17A) Prehearing conference.

173.16(1) Any party may request a prehearing conference. A written request for prehearing conference or an order for prehearing conference on the presiding officer's own motion shall be filed not less than seven days prior to the hearing date. A prehearing conference shall be scheduled not less than three business days prior to the hearing date.

Written notice of the prehearing conference shall be given by the presiding officer to all parties. For good cause the presiding officer may permit variances from this rule.

173.16(2) Each party shall bring to the prehearing conference:

a. A final list of the witnesses who the party anticipates will testify at hearing. Witnesses not listed may be excluded from testifying unless there was good cause for the failure to include their names; and

b. A final list of exhibits which the party anticipates will be introduced at hearing. Exhibits other than rebuttal exhibits that are not listed may be excluded from admission into evidence unless there was good cause for the failure to include them.

c. Witness or exhibit lists may be amended subsequent to the prehearing conference within the time limits established by the presiding officer at the prehearing conference. Any such amendments must be served on all parties.

173.16(3) In addition to the requirements of subrule 173.16(2), the parties at a prehearing conference may:

a. Enter into stipulations of law or fact;

b. Enter into stipulations on the admissibility of exhibits;

c. Identify matters which the parties intend to request be officially noticed;

d. Enter into stipulations for waiver of any provision of law; and

e. Consider any additional matters which will expedite the hearing.

173.16(4) Prehearing conferences shall be conducted by telephone unless otherwise ordered. Parties shall exchange and receive witness and exhibit lists in advance of a telephone prehearing conference.

641—173.17(17A) Continuances. Applications for continuances shall be made to the presiding officer.

173.17(1) A written application for a continuance shall:

a. Be made at the earliest possible time and no less than seven days before the hearing except in case of unanticipated emergencies;

b. State the specific reasons for the request; and

c. Be signed by the requesting party or the party's representative.

173.17(2) In determining whether to grant a continuance, the presiding officer may consider:

a. Prior continuances;

b. The interests of all parties;

c. The likelihood of informal settlement;

d. The existence of an emergency;

e. Any objection;

f. Any applicable time requirements;

g. The existence of a conflict in the schedules of counsel, parties, or witnesses;

h. The timeliness of the request; and

i. Other relevant factors.

The presiding officer may require documentation of any grounds for continuance.

641—173.18(17A) Withdrawals. A party requesting a contested case proceeding may withdraw that request prior to the hearing only in accordance with department rules. Unless otherwise provided, a withdrawal shall be with prejudice.

641—173.19(17A) Intervention.

173.19(1) Motion. A motion for leave to intervene in a contested case proceeding shall state the grounds for the proposed intervention, the position and interest of the proposed intervenor, and the possible impact of intervention on the proceeding. A proposed answer or petition in intervention shall be attached to the motion. Any party may file a response within 14 days of service of the motion to intervene unless the time period is extended or shortened by the presiding officer.

173.19(2) When filed. Motion for leave to intervene shall be filed as early in the proceeding as possible to avoid adverse impact on existing parties or the conduct of the proceeding. Unless otherwise ordered, a motion for leave to intervene shall be filed before the prehearing conference, if any, or at least 20 days before the date scheduled for hearing. Any later motion must contain a statement of good cause for the failure to file in a timely manner. Unless inequitable or unjust, an intervenor shall be bound by any agreement, arrangement, or other matter previously raised in the case. Requests by untimely intervenors for continuances which would delay the proceeding will ordinarily be denied.

173.19(3) Grounds for intervention. The movant shall demonstrate that (a) intervention would not unduly prolong the proceedings or otherwise prejudice the rights of existing parties; (b) the movant is likely to be aggrieved or adversely affected by a final order in the proceeding; and (c) the interests of the movant are not adequately represented by existing parties.

173.19(4) Effect of intervention. If appropriate, the presiding officer may order consolidation of the petitions and briefs of different parties whose interests are aligned with each other and limit the number of representatives allowed to participate actively in the proceedings. A person granted leave to intervene is a party to the proceeding. The order granting intervention may restrict the issues that may be raised by the intervenor or otherwise condition the intervenor's participation in the proceeding.

641—173.20(17A) Hearing procedures.

173.20(1) The presiding officer presides at the hearing, and may rule on motions, require briefs, issue a proposed decision, and issue such orders and rulings as will ensure the orderly conduct of the proceedings.

173.20(2) All objections shall be timely made and stated on the record.

173.20(3) Parties have the right to participate or to be represented in all hearings or prehearing conferences related to their case. Partnerships, corporations, or associations may be represented by any member, officer, director, or duly authorized agent. Any party may be represented by an attorney or another person authorized by law.

173.20(4) Subject to terms and conditions prescribed by the presiding officer, parties have the right to introduce evidence on issues of material fact, cross-examine witnesses present at the hearing as necessary for a full and true disclosure of the facts, present evidence in rebuttal, and submit briefs and engage in oral argument.

173.20(5) The presiding officer shall maintain the decorum of the hearing and may refuse to admit or may expel anyone whose conduct is disorderly.

173.20(6) Witnesses may be sequestered during the hearing.

173.20(7) The presiding officer shall conduct the hearing in the following manner:

a. The presiding officer shall give an opening statement briefly describing the nature of the proceedings;

b. The parties shall be given an opportunity to present opening statements;

c. Parties shall present their cases in the sequence determined by the presiding officer;

d. Each witness shall be sworn or affirmed by the presiding officer or the court reporter, and be subject to examination and cross-examination. The presiding officer may limit questioning in a manner consistent with law;

e. When all parties and witnesses have been heard, parties may be given the opportunity to present final arguments.

641—173.21(17A) Evidence.

173.21(1) The presiding officer shall rule on admissibility of evidence and may, where appropriate, take official notice of facts in accordance with all applicable requirements of law.

173.21(2) Stipulation of facts is encouraged. The presiding officer may make a decision based on stipulated facts.

173.21(3) Evidence in the proceeding shall be confined to the issues as to which the parties received notice prior to the hearing unless the parties waive their right to such notice or the presiding officer determines that good cause justifies expansion of the issues. If the presiding officer decides to admit evidence on issues outside the scope of the notice over the objection of a party who did not have actual notice of those issues, that party, upon timely request, shall receive a continuance sufficient to amend pleadings and to prepare on the additional issue.

173.21(4) The party seeking admission of an exhibit must provide opposing parties with an opportunity to examine the exhibit prior to the ruling on its admissibility. Copies of documents should normally be provided to opposing parties.

All exhibits admitted into evidence shall be appropriately marked and be made part of the record.

173.21(5) Any party may object to specific evidence or may request limits on the scope of any examination or cross-examination. Such an objection shall be accompanied by a brief statement of the grounds upon which it is based. The objection, the ruling on the objection, and the reasons for the ruling shall be noted in the record. The presiding officer may rule on the objection at the time it is made or may reserve a ruling until the written decision.

173.21(6) Whenever evidence is ruled inadmissible, the party offering that evidence may submit an offer of proof on the record. The party making the offer of proof for excluded oral testimony shall briefly summarize the testimony or, with permission of the presiding officer, present the testimony. If the excluded evidence consists of a document or exhibit, it shall be marked as part of an offer of proof and inserted in the record.

641—173.22(17A) Default.

173.22(1) If a party fails to appear or participate in a contested case proceeding after proper service of notice, the presiding officer may, if no adjournment is granted, enter a default decision or proceed with the hearing and render a decision in the absence of the party.

173.22(2) Where appropriate and not contrary to law, any party may move for default against a party who has requested the contested case proceeding and has failed to file a required pleading or has failed to appear after proper service.

173.22(3) Default decisions or decisions rendered on the merits after a party has failed to appear or participate in a contested case proceeding become final agency action unless, within 15 days after the date of notification or mailing of the decision, a motion to vacate is filed and served on all parties or an appeal of a decision on the merits is timely initiated within the time provided by rule 173.27(17A). A motion to vacate must state all facts relied upon by the moving party which establish that good cause existed for that party's failure to appear or participate at the contested case proceeding. Each fact so stated must be substantiated by at least one sworn affidavit of a person with personal knowledge of each such fact, which affidavit(s) must be attached to the motion.

173.22(4) The time for further appeal of a decision for which a timely motion to vacate has been filed is stayed pending a decision on the motion to vacate.

173.22(5) Properly substantiated and timely filed motions to vacate shall be granted only for good cause shown. The burden of proof as to good cause is on the moving party. Adverse parties shall have ten days to respond to a motion to vacate. Adverse parties shall be allowed to conduct discovery as to the issue of good cause and to present evidence on the issue prior to a decision on the motion, if a request to do so is included in that party's response.

173.22(6) "Good cause" for purposes of this rule shall have the same meaning as "good cause" for setting aside a default judgment under Iowa Rule of Civil Procedure 236.

173.22(7) A decision denying a motion to vacate is subject to further appeal within the time limit allowed for further appeal of a decision on the merits in the contested case proceeding. A decision

granting a motion to vacate is subject to interlocutory appeal by the adverse party pursuant to rule 173.25(17A).

173.22(8) If a motion to vacate is granted and no timely interlocutory appeal has been taken, the presiding officer shall issue another notice of hearing and the contested case shall proceed accordingly.

173.22(9) A default decision may award any relief consistent with the request for relief made in the petition and embraced in its issues (but, unless the defaulting party has appeared, it cannot exceed the relief demanded).

173.22(10) A default decision may provide either that the default decision is to be stayed pending a timely motion to vacate or that the default decision is to take effect immediately, subject to a request for stay under rule 173.29(17A).

641—173.23(17A) Ex parte communication.

173.23(1) Prohibited communications. Unless required for the disposition of ex parte matters specifically authorized by statute, following issuance of the notice of hearing, there shall be no communication, directly or indirectly, between the presiding officer and any party or representative of any party or any other person with a direct or indirect interest in such case in connection with any issue of fact or law in the case except upon notice and opportunity for all parties to participate. This does not prohibit persons jointly assigned such tasks from communicating with each other. Nothing in this provision is intended to preclude the presiding officer from communicating with members of the department or seeking the advice or help of persons other than those with a personal interest in, or those engaged in personally investigating as defined in subrule 173.9(2), prosecuting, or advocating in, either the case under consideration or a pending factually related case involving the same parties as long as those persons do not directly or indirectly communicate to the presiding officer any ex parte communications they have received of a type that the presiding officer would be prohibited from receiving or that furnish, augment, diminish, or modify the evidence in the record.

173.23(2) Prohibitions on ex parte communications commence with the issuance of the notice of hearing in a contested case and continue for as long as the case is pending.

173.23(3) Written, oral or other forms of communication are “ex parte” if made without notice and opportunity for all parties to participate.

173.23(4) To avoid prohibited ex parte communications, notice must be given in a manner reasonably calculated to give all parties a fair opportunity to participate. Notice of written communications shall be provided in compliance with rule 173.12(17A) and may be supplemented by telephone, facsimile, electronic mail or other means of notification. Where permitted, oral communications may be initiated through conference telephone call including all parties or their representatives.

173.23(5) Persons who jointly act as presiding officer in a pending contested case may communicate with each other without notice or opportunity for parties to participate.

173.23(6) The division director or other persons may be present in deliberations or otherwise advise the presiding officer without notice or opportunity for parties to participate as long as they are not disqualified from participating in the making of a proposed or final decision under any provision of law and they comply with subrule 173.23(1).

173.23(7) Communications with the presiding officer involving uncontested scheduling or procedural matters do not require notice or opportunity for parties to participate. Parties should notify other parties prior to initiating such contact with the presiding officer when feasible, and shall notify other parties when seeking to continue hearings or other deadlines pursuant to rule 173.17(17A).

173.23(8) Disclosure of prohibited communications. A presiding officer who receives a prohibited ex parte communication during the pendency of a contested case must initially determine if the effect of the communication is so prejudicial that the presiding officer should be disqualified. If the presiding officer determines that disqualification is warranted, a copy of any prohibited written communication, all written responses to the communication, a written summary stating the substance of any prohibited oral or other communication not available in written form for disclosure, all responses made, and the identity of each person from whom the presiding officer received a prohibited ex parte communication

shall be submitted for inclusion in the record under seal by protective order (or disclosed). If the presiding officer determines that disqualification is not warranted, such documents shall be submitted for inclusion in the record and served on all parties. Any party desiring to rebut the prohibited communication must be allowed the opportunity to do so upon written request filed within ten days after notice of the communication.

173.23(9) Promptly after being assigned to serve as presiding officer at any stage in a contested case proceeding, a presiding officer shall disclose to all parties material factual information received through ex parte communication prior to such assignment unless the factual information has already been or shortly will be disclosed pursuant to Iowa Code section 17A.13(2) or through discovery. Factual information contained in an investigative report or similar document need not be separately disclosed by the presiding officer as long as such documents have been or will shortly be provided to the parties.

173.23(10) The presiding officer may render a proposed or final decision imposing appropriate sanctions for violations of this rule including default, a decision against the offending party, censure, or suspension or revocation of the privilege to practice before the department. Violation of ex parte communication prohibitions by department personnel shall be reported to the director for possible sanctions including censure, suspension, dismissal, or other disciplinary action.

641—173.24(17A) Recording costs. Upon request, the department shall provide a copy of the whole or any portion of the record at cost. The cost of preparing a copy of the record or of transcribing the hearing record shall be paid by the requesting party. Parties who request that a hearing be recorded by certified shorthand reporters rather than by electronic means shall bear the cost of that recordation, unless otherwise provided by law.

641—173.25(17A) Interlocutory appeals. Upon written request of a party or on its own motion, the director or board or commission may review an interlocutory order of the presiding officer. In determining whether to do so, the director or board or commission shall weigh the extent to which its granting the interlocutory appeal would expedite final resolution of the case and the extent to which review of that interlocutory order by the department at the time it reviews the proposed decision of the presiding officer would provide an adequate remedy. Any request for interlocutory review must be filed within 14 days of issuance of the challenged order, but no later than the time for compliance with the order or the date of hearing, whichever is first.

641—173.26(17A) Final decision.

173.26(1) When the director of the department presides over the reception of evidence at the hearing, the decision is a final decision.

173.26(2) When the director of the department does not preside at the reception of evidence, the presiding officer shall make a proposed decision. The proposed decision becomes the final decision of the department without further proceedings unless there is an appeal to, or review on motion of, the department within the time provided in rule 173.27(17A).

641—173.27(17A) Appeals and review.

173.27(1) Appeal by party. Any adversely affected party may appeal a proposed decision to the director within 30 days after issuance of the proposed decision.

173.27(2) Review. The director may initiate review of a proposed decision on its own motion at any time within 30 days following the issuance of such a decision.

173.27(3) Notice of appeal. An appeal of a proposed decision is initiated by filing a timely notice of appeal with the department. The notice of appeal must be signed by the appealing party or a representative of that party and contain a certificate of service. The notice shall specify:

- a. The parties initiating the appeal;
- b. The proposed decision or order appealed from;
- c. The specific findings or conclusions to which exception is taken and any other exceptions to the decision or order;

- d. The relief sought;
- e. The grounds for relief.

173.27(4) Requests to present additional evidence. A party may request the taking of additional evidence only by establishing that the evidence is material, that good cause existed for the failure to present the evidence at the hearing, and that the party has not waived the right to present the evidence. A written request to present additional evidence must be filed with the notice of appeal or, by a nonappealing party, within 14 days of service of the notice of appeal. The director may remand a case to the presiding officer for further hearing or the director may preside at the taking of additional evidence.

173.27(5) Scheduling. The department shall issue a schedule for consideration of the appeal.

173.27(6) Briefs and arguments. Unless otherwise ordered, within 20 days of the notice of appeal or order for review, each appealing party may file exceptions and briefs. Within 20 days thereafter, any party may file a responsive brief. Briefs shall cite any applicable legal authority and specify relevant portions of the record in that proceeding. Written requests to present oral argument shall be filed with the briefs.

The director may resolve the appeal on the briefs or provide an opportunity for oral argument. The director may shorten or extend the briefing period as appropriate.

641—173.28(17A) Applications for rehearing.

173.28(1) By whom filed. Any party to a contested case proceeding may file an application for rehearing from a final order.

173.28(2) Content of application. The application for rehearing shall state on whose behalf it is filed, the specific grounds for rehearing, and the relief sought. In addition, the application shall state whether the applicant desires reconsideration of all or part of the department decision on the existing record and whether, on the basis of the grounds enumerated in subrule 173.27(4), the applicant requests an opportunity to submit additional evidence.

173.28(3) Time of filing. The application shall be filed with the department within 20 days after issuance of the final decision.

173.28(4) Notice to other parties. A copy of the application shall be timely mailed by the applicant to all parties of record not joining therein. If the application does not contain a certificate of service, the department shall serve copies on all parties.

173.28(5) Disposition. Any application for a rehearing shall be deemed denied unless the department grants the application within 20 days after its filing.

641—173.29(17A) Stays of department actions.

173.29(1) When available.

a. Any party to a contested case proceeding may petition the department for a stay of an order issued in that proceeding or for other temporary remedies, pending review by the department. The petition shall be filed with the notice of appeal and shall state the reasons justifying a stay or other temporary remedy. The director may rule on the stay or authorize the presiding officer to do so.

b. Any party to a contested case proceeding may petition the department for a stay or other temporary remedies pending judicial review of all or part of that proceeding. The petition shall state the reasons justifying a stay or other temporary remedy.

173.29(2) When granted. In determining whether to grant a stay, the presiding officer or the board, commission, or director, as appropriate, shall consider the factors listed in 1998 Iowa Acts, chapter 1202, section 23(5c).

173.29(3) Vacation. A stay may be vacated by the issuing authority upon application of the department or any other party.

641—173.30(17A) No factual dispute contested cases. If the parties agree that no dispute of material fact exists as to a matter that would be a contested case if such a dispute of fact existed, the parties may present all relevant admissible evidence either by stipulation or otherwise as agreed by the parties, without necessity for the production of evidence at an evidentiary hearing. If such agreement is reached,

a jointly submitted schedule detailing the method and timetable for submission of the record, briefs and oral argument should be submitted to the presiding officer for approval as soon as practicable. If the parties cannot agree, any party may file and serve a motion for summary judgment pursuant to the rules governing such motions.

641—173.31(17A) Emergency adjudicative proceedings.

173.31(1) Necessary emergency action. To the extent necessary to prevent or avoid immediate danger to the public health, safety, or welfare and, consistent with the Constitution and other provisions of law, the department may issue a written order in compliance with Iowa Code section 17A.18 to suspend a license in whole or in part, order the cessation of any continuing activity, order affirmative action, or take other action within the jurisdiction of the department by emergency adjudicative order. Before issuing an emergency adjudicative order the department shall consider factors including, but not limited to, the following:

- a. Whether there has been a sufficient factual investigation to ensure that the department is proceeding on the basis of reliable information;
- b. Whether the specific circumstances which pose immediate danger to the public health, safety or welfare have been identified and determined to be continuing;
- c. Whether the person required to comply with the emergency adjudicative order may continue to engage in other activities without posing immediate danger to the public health, safety or welfare;
- d. Whether imposition of monitoring requirements or other interim safeguards would be sufficient to protect the public health, safety or welfare; and
- e. Whether the specific action contemplated by the department is necessary to avoid the immediate danger.

173.31(2) Issuance of order.

a. An emergency adjudicative order shall contain findings of fact, conclusions of law, and policy reasons to justify the determination of an immediate danger in the department's decision to take immediate action.

b. The written emergency adjudicative order shall be immediately delivered to persons who are required to comply with the order by utilizing one or more of the following procedures:

- (1) Personal delivery;
- (2) Certified mail, return receipt requested, to the last address on file with the department;
- (3) Certified mail to the last address on file with the department;
- (4) First-class mail to the last address on file with the department; or
- (5) Fax. Fax may be used as the sole method of delivery if the person required to comply with the order has filed a written request that department orders be sent by fax and has provided a fax number for that purpose.

c. To the degree practicable, the department shall select the procedure for providing written notice that best ensures prompt, reliable delivery.

173.31(3) Oral notice. Unless the written emergency adjudicative order is provided by personal delivery on the same day that the order issues, the department shall make reasonable immediate efforts to contact by telephone the persons who are required to comply with the order.

173.31(4) Completion of proceedings. After the issuance of an emergency adjudicative order, the department shall proceed as quickly as feasible to complete any proceedings that would be required if the matter did not involve an immediate danger.

Issuance of a written emergency adjudicative order shall include notification of the date on which department proceedings are scheduled for completion. After issuance of an emergency adjudicative order, continuance of further department proceedings to a later date will be granted only in compelling circumstances upon application in writing.

These rules are intended to implement Iowa Code chapter 17A as amended by 1998 Iowa Acts, chapter 1202.

CHAPTER 174
AGENCY PROCEDURE FOR RULE MAKING

The department of public health adopts the agency procedure for rule making segment of the Uniform Administrative Rules which is printed in the first volume of the Iowa Administrative Code with the following amendments.

641—174.3(17A) Public rule-making docket.

174.3(2) *Anticipated rule making.* In lieu of the words “(commission, board, council, director)” insert “director”.

641—174.4(17A) Notice of proposed rule making.

174.4(3) *Notices mailed.* In lieu of the words “(specify time period)” insert “one calendar year”.

641—174.5(17A) Public participation.

174.5(1) *Written comments.* In lieu of the words “(identify office and address) or” insert “Director’s Office, Iowa Department of Public Health, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319”.

174.5(5) *Accessibility.* In lieu of the words “(designate office and telephone number)” insert “Director’s Office, Iowa Department of Public Health, (515)281-7689”.

641—174.6(17A) Regulatory flexibility analysis.

174.6(3) *Mailing list.* In lieu of the words “(designate office)” insert “Director’s Office, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319”.

641—174.11(17A) Concise statement of reasons.

174.11(1) *General.* In lieu of the words “(specify the office and address)” insert “Director’s Office, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319”.

641—174.13(17A) Agency rule-making record.

174.13(2) *Contents.* Amend paragraph “c” by inserting “director” in lieu of “(agency head)”.

These rules are intended to implement Iowa Code section 17A.4 and Iowa Code chapter 135.

[Filed 9/13/91, Notice 8/7/91—published 10/2/91, effective 11/6/91]

[Filed 11/19/01, Notice 8/22/01—published 12/12/01, effective 1/16/02]

CHAPTER 175
FAIR INFORMATION PRACTICES AND PUBLIC RECORDS

641—175.1(17A,22) Definitions. For purposes of this chapter, the following definitions apply:

“*Agency*” or “*department*” means the Iowa department of public health.

“*Confidential record*” means a record which is not available as a matter of right for examination and copying by members of the public under applicable provisions of law. Confidential records include records or information contained in records that the department is prohibited by law from making available for examination by members of the public, and records or information contained in records that are specified as confidential by Iowa Code section 22.7, or other provision of law, but that may be disclosed upon order of a court, the lawful custodian of the record, or by another person duly authorized to release the record. Mere inclusion in a record of information declared confidential by an applicable provision of law does not necessarily make that entire record a confidential record.

“*Custodian*” means the department or a person lawfully delegated authority by the department to act for the department in implementing Iowa Code chapter 22.

“*Open record*” means a record other than a confidential record.

“*Personally identifiable information*” means information about or pertaining to an individual in a record which identifies the individual and which is contained in a record system.

“*Record*” means the whole or a part of a “public record” as defined in Iowa Code section 22.1 that is owned by or in the physical possession of the department.

“*Record system*” means any group of records under the control of the department from which a record may be retrieved by a personal identifier such as the name of an individual, number, symbol, or other unique retriever assigned to an individual.

641—175.2(17A,22) Statement of policy. The purpose of this chapter is to facilitate broad public access to open records and to facilitate sound department determinations with respect to the maintenance of confidential records and the implementation of the fair information practices Act. The department is committed to the policies set forth in Iowa Code chapter 22, and department staff shall cooperate with members of the public in implementing the provisions of that chapter.

641—175.3(17A,22) Requests for access to records.

175.3(1) Location of record. A request for access to a record should be directed to the division where the record is maintained. If the location of the record is not known by the requester, the request shall be directed to the Iowa Department of Public Health, Public Information Officer, Lucas State Office Building, Des Moines, Iowa 50319-0075, Attention: Record Request. The department will forward the request to the appropriate person.

175.3(2) Office hours. Open records shall be made available during all customary office hours, which are 8 a.m. to 4:30 p.m. daily, excluding Saturdays, Sundays and legal holidays.

175.3(3) Request for access. Requests for access to open records may be made in writing, in person, by telephone, or by electronic means. A person requesting a record shall identify the particular record sought by name or description in order to facilitate the location of the record. A person requesting a record by mail, telephone, or by electronic means shall include the name, address, and telephone number of the person requesting the information in order to facilitate delivery of the record. A person shall not be required to give a reason for requesting an open record.

175.3(4) Response to requests. The custodian shall provide prompt access to an open record upon request unless the size or nature of the request makes prompt access infeasible. If the size or nature of the request for access to an open record requires time for compliance, the custodian shall comply with the request as soon as feasible. The custodian may delay access to an open record for one of the purposes authorized by Iowa Code section 22.8(4) or 22.10(4). The custodian shall promptly give notice to the requester of the reason for any delay in access to an open record and an estimate of the length of that delay and, upon request, shall promptly provide that notice to the requester in writing.

The custodian of a record may deny access to the record by members of the public only on the grounds that such a denial is warranted under Iowa Code sections 22.8(4) and 22.10(4), or that it is a confidential record, or that its disclosure is prohibited by a court order.

175.3(5) *Security of record.* No person may, without permission from the custodian, search or remove any record from the department files. The custodian or a designee of the custodian shall supervise examination and copying of department records. Records shall be protected from damage and disorganization.

175.3(6) *Copying.* A reasonable number of copies of an open record may be made in the department's office. If photocopy equipment is not available in the department office where an open record is kept, the custodian shall permit its examination in that office and shall arrange to have copies promptly made elsewhere.

175.3(7) *Fees.*

a. When charged. The department may charge a reasonable fee in connection with the examination or copying of records. To the extent permitted by applicable provisions of law, the payment of fees may be waived when the imposition of fees is inequitable or when a waiver is in the public interest.

b. Copying and postage costs. Price schedules for published materials and for photocopies of records supplied by the department shall be prominently posted in department offices. Copies of records may be made by or for members of the public on department photocopy machines or from electronic storage systems at cost as determined and posted in department offices by the custodian. When the mailing of copies of records is requested, the actual costs of such mailing may also be charged to the requester.

c. Search and supervisory fee. An hourly fee may be charged for actual department expenses in searching for and supervising the examination and copying of requested records. The fee shall be based upon the actual costs incurred. The department shall post the hourly fees to be charged in routine cases for search and supervision of records. Except as provided in Iowa Code section 144.46, no fee shall be charged if the records are not made available for inspection, or if the time required does not exceed one hour in duration, or if the time required for the search was the result of department error or record-keeping problems. Iowa Code section 144.46 specifically allows for fees for vital record searches when the record is not copied or is not found, and this Iowa Code section is implemented by 641—96.4(144).

d. Advance deposits.

(1) Fulfillment of a request for a copy of a public record may be contingent upon receipt of payment of expenses to be incurred in fulfilling the request, and such estimated expenses shall be communicated to the requester prior to fulfillment of the request. When the estimated total fee chargeable under this subrule exceeds \$25, the custodian may require a requester to make an advance payment to cover all or a part of the estimated fee.

(2) When a requester has previously failed to pay a fee chargeable under this subrule, the custodian may require payment of the prior fee and advance payment of the full amount of any estimated fee before the custodian processes a new request from that requester.

641—175.4(17A,22) Access to confidential records. Under Iowa Code section 22.7 or other applicable provisions of law, the lawful custodian may disclose certain confidential records to particular persons under certain limited circumstances if the person is legally entitled to the record. In requesting the custodian to permit the examination and copying of such a confidential record, the following procedures apply and are in addition to those specified for requests for access to records in rule 175.3(17A,22).

175.4(1) *Proof of identity.* A person requesting access to a confidential record may be required to provide proof of identity or authority to secure access to the record.

175.4(2) *Requests.* The custodian may require a request to examine and copy a confidential record to be in writing. A person requesting access to such a record may be required to sign a certified statement or affidavit enumerating the specific reasons justifying access to the confidential record and to provide any proof necessary to establish relevant facts.

175.4(3) *Notice to subject of record and opportunity to obtain injunction.* After the custodian receives a request for access to a confidential record, and before the custodian releases such a record,

the custodian may make reasonable efforts to notify promptly any person who is a subject of that record, is identified in that record, and whose address or telephone number is contained in that record. To the extent such a delay is practicable and in the public interest, the custodian may give the subject of such confidential record to whom notification is transmitted a reasonable opportunity to seek an injunction under Iowa Code section 22.8, and indicate to the subject of the record the specific period of time during which disclosure will be delayed for that purpose. The department is not required to provide notification or an opportunity to seek an injunction under this subrule and retains sole discretion as to whether to pursue such action.

175.4(4) *Requests denied.* When the custodian denies a request for access to a confidential record, the custodian shall promptly notify the requester. If the requester indicates to the custodian that a written notification of the denial is desired, the custodian shall promptly provide such a notification that is signed by the custodian and that includes:

- a. The name and title or position of the custodian responsible for the denial; and
- b. A citation to the provision of law vesting authority in the custodian to deny disclosure of the record and a brief statement of the reasons for the denial.

175.4(5) *Request granted.* When the custodian grants a request for access to a confidential record to a particular person, the custodian shall notify that person and indicate any lawful restrictions imposed by the custodian on that person's examination and copying of the record.

641—175.5(17A,22) Requests for treatment of a record as a confidential record and its withholding from examination. The custodian may treat a record as a confidential record and withhold it from examination only to the extent that the custodian is authorized by Iowa Code section 22.7, another applicable provision of law, or a court order to refuse to disclose that record to members of the public.

175.5(1) *Persons who may request.* Any person who would be aggrieved or adversely affected by disclosure of a record and who asserts that Iowa Code section 22.7, another applicable provision of law, or a court order authorizes the custodian to treat the record as a confidential record may request the custodian to treat that record as a confidential record and to withhold it from public inspection.

175.5(2) *Request.* A request that a record be treated as a confidential record and be withheld from public inspection shall be in writing and shall be filed with the custodian. The request must set forth the legal and factual basis justifying such confidential treatment for that record, and the name, address, and telephone number of the person authorized to respond to any inquiry or action of the custodian concerning the request. A person requesting treatment of a record as a confidential record may also be required to sign a certified statement or affidavit enumerating the specific reasons justifying the treatment of that record as a confidential record and to provide any proof necessary to establish relevant facts. Requests for treatment of a record as a confidential record for a limited time period shall also specify the precise period of time for which that treatment is requested.

A person filing such a request shall, if possible, accompany the request with a copy of the record in question from which those portions for which such confidential record treatment has been requested have been deleted. If the original record is being submitted to the department by the person requesting such confidential treatment at the time the request is filed, the person shall indicate conspicuously on the original record that all or portions of it are confidential.

175.5(3) *Failure to request.* Failure of a person to request confidential record treatment for a record does not preclude the custodian from treating it as a confidential record. However, if a person who has submitted business information to the department does not request that it be withheld from public inspection under Iowa Code sections 22.7(3) and 22.7(6), the custodian of records containing that information may proceed as if that person has no objection to its disclosure to members of the public.

175.5(4) *Timing of decision.* A decision by the custodian with respect to the disclosure of a record to members of the public may be made when a request for its treatment as a confidential record is filed or when the custodian receives a request for access to the record by a member of the public.

175.5(5) *Request granted or deferred.* If a request for such confidential record treatment is granted, or if action on such a request is deferred, a copy of the record from which the matter in question has been deleted and a copy of the decision to grant the request or to defer action upon the request will be made

available for public inspection in lieu of the original record. If the custodian subsequently receives a request for access to the original record, the custodian will make reasonable and timely efforts to notify any person who has filed a request for its treatment as a confidential record that is not available for public inspection of the pendency of that subsequent request.

175.5(6) Request denied and opportunity to seek injunction. If a request that a record be treated as a confidential record and be withheld from public inspection is denied, the custodian shall notify the requester in writing of that determination and the reasons therefor. On application by a requester, the custodian may engage in a good faith, reasonable delay in allowing examination of the record so that the requester may seek injunctive relief under the provisions of Iowa Code section 22.8 or other applicable provision of law. However, such a record shall not be withheld from public inspection for any period of time if the custodian determines that the requester had no reasonable ground to justify the treatment of that record as a confidential record. The custodian shall notify requester in writing of the time period allowed to seek injunctive relief or the reasons for the determination that no reasonable grounds exist to justify the treatment of that record as a confidential record. The custodian may extend the period of good faith, reasonable delay in allowing examination of the record so that the requester may seek injunctive relief only if no request for examination of that record has been received, or if a court directs the custodian to treat it as a confidential record, or to the extent permitted by another applicable provision of law, or with the consent of the person requesting access.

641—175.6(17A,22) Procedure by which additions, dissents, or objections may be entered into certain records. Except as otherwise provided by law, a person may file a request with the custodian to review, and to have a written statement of additions, dissents, or objections entered into a record containing personally identifiable information pertaining to that person. However, a person who is a subject of such a record shall not be authorized to alter the original copy of that record or to expand the official record of any agency proceeding. A requester shall send the request to review such a record or the written statement of additions, dissents, or objections to the custodian or to the division in which the record is maintained. The request to review such a record or the written statement of such a record of additions, dissents, or objections must be dated and signed by requester, and shall include the current address and telephone number of the requester or the requester's representative.

641—175.7(17A,22) Consent to disclosure by the subject of a confidential record. Except as otherwise provided by law, a person who is the subject of a confidential record may have a copy of the portion of that record concerning the subject disclosed to a third party. A request for such a disclosure must be in writing and must identify the particular record or records that may be disclosed, and the particular person or class of persons to whom they may be disclosed. The person who is the subject of the record and, where applicable, the person to whom the record is to be disclosed, may be required to provide proof of identity. Appearance of counsel before the department on behalf of a person who is the subject of a confidential record is deemed to constitute consent for the department to disclose records about that person to the person's attorney.

641—175.8(17A,22) Notice to suppliers of information. When the department requests a person to supply information about that person, the department may notify the person of the use that will be made of the information, which persons outside the department might routinely be provided this information, which parts of the requested information are required and which are optional, and the consequences of a failure to provide the information requested. This notice may be given in these rules, on the written form used to collect the information, on a separate fact sheet or letter, in brochures, in formal agreements, in contracts, in handbooks, in manuals, verbally, or by other appropriate means.

641—175.9(17A,22) Disclosures without the consent of the subject.

175.9(1) The department shall routinely disclose open records without the consent of the subject.

175.9(2) To the extent allowed by law, disclosure of confidential records may occur without the consent of the subject. Following are instances where disclosure, if lawful, will generally occur without notice to the subject:

- a.* For a routine use as defined in rule 175.10(17A,22) or in the notice for a particular record system.
- b.* To a recipient who has provided the department with advance written assurance that the record will be used solely as a statistical research or reporting record. The department shall not release confidential data or information pursuant to this chapter unless the department and the recipient have executed an agreement which includes the conditions under which the confidential data or information may be used and a restriction on the further disclosure of the data or information.
- c.* To another government agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil, administrative, or criminal law enforcement activity if the activity is authorized by law, and if an authorized representative of such government agency or instrumentality has submitted a written request to the department specifying the record desired and the law enforcement activity for which the record is sought.
- d.* To an individual pursuant to a showing of compelling circumstances affecting the health or safety of any individual if a notice of the disclosure is transmitted to the last-known address of the subject.
- e.* To the legislative services agency under Iowa Code section 2A.3.
- f.* Disclosures in the course of employee disciplinary proceedings.
- g.* In response to a court order or subpoena.
- h.* To the office of citizens' aide pursuant to Iowa Code section 2C.9.

641—175.10(17A,22) Routine use.

175.10(1) Defined. "Routine use" means the disclosure of a record without the consent of the subject for a purpose which is compatible with the purpose for which the record was collected. "Routine use" includes disclosures required or authorized by statute or rule.

175.10(2) To the extent allowed by law, the following uses are considered routine uses of all department records:

- a.* Disclosure to those officers, employees, and agents of the department who have a need for the record in the performance of their duties.
- b.* Disclosure to employees of federal, state and local agencies and other researchers for purposes of bona fide research. The department shall not release data or information pursuant to this paragraph unless the department and the researcher have executed an agreement which includes the conditions under which the confidential data or information may be used and restrictions on further disclosure of the data or information.
- c.* Disclosure of information indicating an apparent violation of the law to appropriate law enforcement authorities for investigation and possible criminal prosecution, civil court action, or regulatory order.
- d.* Disclosure to the department of inspections and appeals for matters in which it is performing services or functions on behalf of the department.
- e.* Transfers of information within the department, to other state or federal agencies, or to local units of government as necessary to administer the program for which the information is collected or as necessary to administer a program within the other governmental agency. Confidential information transferred within the department or provided to other agencies pursuant to this paragraph shall continue to maintain its confidential status and shall not be rereleased by the receiving agency.
- f.* Information released to staff of federal and state entities for audit purposes or for purposes of determining whether the department is operating a program lawfully.
- g.* Any disclosure specifically authorized by the statute or rule under which the record was collected or maintained.

641—175.11(17A,22) Consensual disclosure of confidential records.

175.11(1) *Consent to disclosure by a subject individual.* To the extent permitted by law, the subject may consent in writing to department disclosure of confidential records as provided in rule 175.7(17A,22).

175.11(2) *Complaints to public officials.* A letter from a subject of a confidential record to a public official which seeks the official's intervention on behalf of the subject in a matter that involves the department may to the extent permitted by law be treated as an authorization to release sufficient information about the subject to the official to resolve the matter.

641—175.12(17A,22) Release to subject.

175.12(1) The subject of a confidential record may file a written request to review confidential records about that person as provided in rule 175.6(17A,22). However, the department need not release the following records to the subject:

a. The identity of a person providing information to the department need not be disclosed directly or indirectly to the subject of the information when the information is authorized to be held confidential pursuant to Iowa Code section 22.7(18) or other provision of law.

b. Records need not be disclosed to the subject when they are the work product of an attorney or are otherwise privileged.

c. Peace officers' investigative reports may be withheld from the subject, except as required by the Iowa Code.

d. As otherwise authorized by law.

175.12(2) Where a record has multiple subjects with interest in the confidentiality of the record, the department shall take reasonable steps to protect confidential information relating to another subject.

641—175.13(17A,22) Availability of records.

175.13(1) *General.* Department records are open for public inspection and copying subject to supervision unless otherwise provided by statute or rule.

175.13(2) *Confidential records.* The following records shall be withheld from public inspection. Records are listed by department division and include the legal authority for withholding the record from public inspection.

a. Division of acute disease prevention and emergency response.

(1) Records which identify a person infected with or exposed to a reportable disease or other disease or health condition collected pursuant to Iowa Code chapter 139A, and maintained as confidential pursuant to Iowa Code section 139A.3(2) "b" and Iowa Code section 22.7(16).

(2) Records which identify a business involved in a reportable disease or other disease or health condition investigation collected pursuant to Iowa Code chapter 139A, and maintained as confidential pursuant to Iowa Code section 139A.3(2) "c." The identity of a business may be disclosed pursuant to this authority only if the state epidemiologist or the director of the department determines such a release of information necessary for the protection of the health of the public.

(3) Records which identify a person infected with or exposed to a reportable sexually transmitted disease or infection collected pursuant to Iowa Code chapter 139A, and maintained as confidential pursuant to Iowa Code section 139A.30 and Iowa Code section 22.7(16).

(4) Records which identify a person infected with or exposed to HIV/AIDS collected pursuant to Iowa Code chapter 141A, and maintained as confidential pursuant to Iowa Code section 141A.9.

(5) Data and records received or developed by the trauma system evaluation and quality improvement committee, including patient and emergency medical care service program identifying information, collected pursuant to Iowa Code chapter 147A, and maintained as confidential pursuant to Iowa Code section 147A.25.

(6) Data collected by and furnished to the statewide trauma registry which identifies a patient or former patient collected pursuant to Iowa Code section 147A.26, and maintained as confidential pursuant to Iowa Code section 147A.26.

(7) All information in complaint and investigative files maintained by the bureau of emergency medical services collected pursuant to Iowa Code chapter 147A, and maintained as confidential pursuant to Iowa Code section 272C.6(4), except that the information may be released to the provider or the service once a disciplinary proceeding has been initiated by the filing of a notice of proposed action. A notice of proposed action and final agency action are public documents.

(8) Immunization information which identifies a patient maintained on the statewide immunization registry collected pursuant to Iowa Code section 22.7(2), and maintained as confidential pursuant to Iowa Code section 22.7(2) and 641—subrule 7.11(4). The department's rules regarding sharing of immunization information are contained at 641—7.12(22).

b. Division of administration and professional licensure.

(1) Vital records maintained pursuant to Iowa Code chapter 144, including records of births, deaths, fetal deaths, adoptions, marriages, divorces, annulments and related data and correspondence, and maintained as confidential pursuant to Iowa Code section 144.43.

(2) Licensing and disciplinary records of the professional licensing boards may be confidential in accordance with Iowa Code section 272C.6(4) and 645—10.13(17A,22).

c. Division of behavioral health.

(1) Records which identify a person named in a report to the central registry for brain or spinal cord injuries collected pursuant to Iowa Code section 135.22, and maintained as confidential pursuant to Iowa Code section 135.22 and 641—21.6(135).

(2) Information contained in a complaint regarding a licensed substance abuse program collected pursuant to Iowa Code chapter 125, and maintained as confidential pursuant to Iowa Code sections 22.7(2), 22.7(18), and 125.37. Investigative reports, written plans of corrective action, and all notices and orders issued by the board of health shall refer to clients and patients by number and shall not include any other client or patient identifying information. Investigative reports, written plans of corrective action, and all notices and orders issued by the board of health shall be available to the public as open records in accordance with 641—subrule 155.16(5).

(3) Records which identify the victim of a domestic abuse death collected or maintained by the Iowa domestic abuse death review team pursuant to Iowa Code section 135.110, and maintained as confidential pursuant to Iowa Code section 135.111.

d. Division of environmental health.

(1) Drafts of proposed regulations released to the department from the federal government which constitute essential information needed by the department to ensure compliance with federal regulations collected pursuant to Iowa Code chapter 136C, and maintained as confidential pursuant to Iowa Code section 22.9 and 641—subrule 38.7(2).

(2) Applications and documents submitted to the department pursuant to Iowa Code chapter 136C, which may be maintained as confidential pursuant to 641—subrule 39.4(24) if disclosure of their contents is not required in the public interest and would adversely affect the interest of a person concerned.

(3) Records which identify a person infected with or exposed to a reportable disease or other disease or health condition, including lead and other heavy metal poisonings, collected pursuant to Iowa Code chapter 139A, and maintained as confidential in accordance with Iowa Code section 139A.3(2) "b."

(4) Records which identify a business involved in a reportable disease or other disease or health condition investigation, including a lead or other heavy metal poisoning investigation, collected pursuant to Iowa Code chapter 139A, and maintained as confidential pursuant to Iowa Code section 139A.3(2) "c." The identity of a business may be disclosed pursuant to this authority only if the state epidemiologist or the director of the department determines such a release of information necessary for the protection of the health of the public or if the release is required by federal, state, or local law.

e. Division of health promotion and chronic disease prevention.

(1) All medical, health and nutrition information which identifies a WIC program participant collected pursuant to federal law and Iowa Code chapter 135, and maintained as confidential in accordance with 7 CFR 246, Iowa Code section 22.7(2), and 641—subrule 73.7(7).

(2) Records which identify the victim of a child death collected or maintained by the Iowa child death review team pursuant to Iowa Code section 135.43, and maintained as confidential pursuant to Iowa Code section 135.43.

(3) Records which identify a child subject to a newborn and infant hearing screening collected pursuant to Iowa Code section 135.131, and maintained as confidential pursuant to Iowa Code section 135.131 and 641—3.10(80GA,ch102).

(4) Records which identify a person named in a report to the central registry for congenital and inherited disorders collected pursuant to Iowa Code section 136A.7, and maintained as confidential in accordance with Iowa Code section 136A.7 and 641—subrule 4.3(7).

(5) Records which identify a person infected with or exposed to a reportable disease or other disease or health condition, including a congenital or inherited disorder, collected pursuant to Iowa Code chapter 139A, and maintained as confidential pursuant to Iowa Code section 139A.3(2)“b.”

f. Sections which govern all divisions.

(1) Records which contain medical information collected pursuant to Iowa Code chapters 135, 139A, and 147A, and maintained as confidential pursuant to Iowa Code section 22.7(2).

(2) Records collected from any person, hospital, or other organization related to the condition and treatment of any person to be used in the course of any study for the purpose of reducing morbidity or mortality collected pursuant to Iowa Code section 135.40, and maintained as confidential pursuant to Iowa Code sections 135.40, 135.41, and 135.42.

(3) Records concerning security procedures or emergency preparedness developed and maintained by the department or other federal or state agency for the protection of governmental employees, visitors to the department, persons in the care, custody, or under the control of the department, or property under the jurisdiction of the department, if disclosure could reasonably be expected to jeopardize such employees, visitors, or property. Pursuant to Iowa Code section 22.7(50), the department has adopted a policy which identifies all specific records or classes of records to which this protection applies.

175.13(3) Minutes of closed meetings of a government body shall be kept confidential in accordance with Iowa Code section 21.5.

175.13(4) Identifying details in final orders, decisions and opinions shall be kept confidential to the extent required to prevent a clearly unwarranted invasion of personal privacy or trade secrets under Iowa Code section 17A.3(1)“e.”

175.13(5) Portions of department staff manuals, instructions or other statements issued shall be kept confidential when such documents set forth criteria or guidelines to be used by department staff in auditing, in making inspections, in settling commercial disputes or negotiating commercial arrangements, or in the selection or handling of cases, such as operational tactics or allowable tolerances or criteria for the defense, prosecution or settlement of cases, when disclosure of these statements would:

- a. Enable law violators to avoid detection;
- b. Facilitate disregard of requirements imposed by law; or
- c. Give a clearly improper advantage to persons who are in an adverse position to the department.

175.13(6) Records which constitute attorney work product or attorney-client communications or which are otherwise privileged shall be kept confidential. Attorney work product is confidential under Iowa Code sections 22.7(4), 622.10 and 622.11, Iowa R.C.P. 1.503, Fed. R. Civ. P. 26(b)(3), and case law. Attorney-client communications are confidential under Iowa Code sections 622.10 and 622.11, the rules of evidence, the Code of Professional Responsibility, and case law.

175.13(7) Records exempted from public inspection under Iowa Code section 22.7 or any other provision of law shall be kept confidential.

641—175.14(17A,22) Personally identifiable information. This rule describes the nature and extent of personally identifiable information which is collected, maintained, and retrieved by the department by personal identifiers in record systems as defined in rule 175.1(17A,22). For each record system, this rule describes the legal authority for the collection of that information and the means of storage of that information. A data processing system does not match, collate, or permit the comparison of personally

identifiable information in one record system with personally identifiable information in another record system unless so indicated. The record systems maintained by the department are as follows:

175.14(1) *Division of acute disease prevention and emergency response.*

a. Records of reportable diseases and other diseases and health conditions collected pursuant to Iowa Code chapter 139A. These records are stored on paper, electronically, or both, depending on the specific type of record. Except for statistical reports, these records are confidential as outlined in 175.13(2)“*a.*”

b. Records of reportable sexually transmitted diseases or infections collected pursuant to Iowa Code chapter 139A. These records are stored on paper, electronically, or both, depending on the specific type of record. Except for statistical reports, these records are confidential as outlined in 175.13(2)“*b.*”

c. Records of the veterinary public health program collected pursuant to Iowa Code chapter 139A. These records are stored on paper. Certain medical information in these records may be confidential as outlined in 175.13(2)“*a.*”

d. Records of the emergency medical services program collected pursuant to Iowa Code chapter 147A. These records are stored on paper, electronically, or both, depending on the specific type of record. Some of these records are confidential as outlined in 175.13(2)“*a.*”

e. Records of the AIDS drug reimbursement program collected for purposes of implementing a federal grant program authorized by HR 1827. These records are stored on paper. Certain patient records are confidential as outlined in 175.13(2)“*a.*”

f. Personnel records containing information about employees, families and dependents, and applicants for positions with the department. Some of this information is confidential under Iowa Code sections 22.7(11) and 22.7(18).

g. Records of the certificate of need program collected pursuant to Iowa Code sections 135.61 to 135.83. These records are stored on paper.

h. Annual hospital surveys collected pursuant to Iowa Code sections 135.74 and 135.75. These records are stored on paper and electronically.

175.14(2) *Division of administration and professional licensure.*

a. Vital records collected pursuant to Iowa Code chapter 144, including records of births, deaths, fetal deaths, adoptions, marriages, divorces, annulments and related data and correspondence. These records are stored on paper, on microfiche, and electronically. These records are confidential as noted in 175.13(2)“*b.*”

b. Licensing records of the professional licensing boards. These records are identified in rules filed by the individual licensing boards (see Professional Licensure Division, IAC 645). They contain information about individuals, some of which is confidential.

c. An electronic inventory of records maintained by the department, which indicates the type of information contained in the record, contact person for the record, how the record is stored, whether the record is confidential, and whether it contains personally identifiable information. This inventory is maintained by the information management bureau.

d. Fiscal records, including itemized vouchers collected from individuals pursuant to Iowa Code section 8A.514. These records are stored on paper and electronically.

175.14(3) *Division of behavioral health.*

a. Records of substance abuse programs of this division are identified in rules adopted by the board of health in 641—Chapter 155.

b. Records of the domestic abuse death review team collected pursuant to Iowa Code section 135.110. These records are stored on paper, electronically, or both. Except for statistical reports, these records are confidential as outlined in 175.13(2)“*c.*”

c. Records which identify a person named in a report to the central registry for brain or spinal cord injuries collected pursuant to Iowa Code section 135.22. These records are stored on paper, electronically, or both. Except for statistical reports, these records are maintained as confidential pursuant to Iowa Code section 135.22 and 641—21.6(135).

d. Records which identify brain injury service program recipients collected pursuant to Iowa Code section 135.22B. These records are stored on paper, electronically, or both.

175.14(4) *Division of environmental health.*

a. Records of the environmental health programs collected pursuant to Iowa Code section 135.11(1) and PL 96-510, Section 104(d)(1), 40 CFR 763 effective June 28, 1983, and 40 CFR 761 effective May 31, 1979, dealing with asbestos, PCB and other environmental health factors. These records are stored on paper, electronically, or both, depending on the specific type of record. Certain medical information in the work-related disease program file may be confidential as outlined in 175.13(2)“*d.*” Certain asbestos and PCB inspection records are collected under contract with the federal Environmental Protection Agency, and requests for such records will be referred to that agency.

b. Records of the radiological health program collected pursuant to Iowa Code chapters 136B and 136C. These records are stored on paper, electronically, or both, depending on the specific record. Certain of these records are confidential as outlined in 175.13(2)“*d.*”

c. Records of reportable diseases and other diseases and health conditions, including lead and other heavy metal poisonings, collected pursuant to Iowa Code chapter 139A. These records are stored on paper, electronically, or both, depending on the specific type of record. Except for statistical reports, these records are confidential as outlined in 175.13(2)“*a.*”

d. Records of the childhood lead poisoning prevention program collected pursuant to Iowa Code sections 135.100 to 135.105. These records are stored on paper, electronically, or both. Certain of these records are confidential as outlined in 175.13(2)“*d.*” Data processing systems will link certain client data in these programs with client data in the maternal and child health program, WIC program, and refugee health program.

175.14(5) *Division of health promotion and chronic disease prevention.*

a. Records of the maternal and child health programs collected pursuant to Iowa Code section 135.11(20). These records are stored on paper, electronically, or both, depending on the specific type of record. Data processing systems will link certain client data in these programs with client data in the WIC program.

b. Records of the nutrition and WIC (supplemental food program for women, infants and children) programs collected pursuant to Iowa Code section 135.11(1) and Chapter 17 of the federal Child Nutrition Act of 1966 as amended. These records are stored on paper, electronically, or both, depending on the specific type of record. Data processing systems will link certain client data in this program with client data in maternal and child health programs.

c. Records of the center for congenital and inherited disorders collected pursuant to Iowa Code chapter 136A. These records are stored on paper.

d. Records of the dental health programs collected pursuant to Iowa Code section 135.11(19), funded primarily by maternal and child health funds. These records are stored on paper or electronically, depending on the specific type of record.

e. Records of the newborn and infant hearing screening program collected pursuant to Iowa Code section 135.131. These records are stored on paper, electronically, or both, depending on the specific type of record. Information which identifies an individual patient is confidential as outlined in 175.13(2)“*e.*”

f. Refugee health program records collected pursuant to Iowa Code section 135.11(1) and Section 412(c)(3) of the federal Immigration and Naturalization Act. These records are stored on paper, electronically, or both, depending on the specific type of record. Certain medical information in these records is confidential as outlined in 175.13(2)“*f.*”

g. Records of the bureau of chronic disease prevention and management collected pursuant to Iowa Code section 135.11(1), including the Well-Integrated Screening and Evaluation for Women Across the Nation (WISEWOMAN) program and the Breast and Cervical Cancer Early Detection Program (BCCEDP). Certain medical information in these records is confidential as outlined in 175.13(2)“*f.*” The medical information from wellness programs and screening programs is stored on paper, electronically, or both, depending on the specific type of record. Data processing systems will link certain client data in these programs with client data in the University of Iowa’s health registries.

641—175.15(17A,22) Other groups of records. This rule describes groups of records maintained by the agency other than record systems as defined in rule 175.2(17A,22). These records are routinely

available to the public. However, the department's files of these records may contain confidential information as discussed in rule 175.13(17A,22). The records listed may contain information about individuals. All records are stored on paper unless otherwise noted.

175.15(1) Rule making. Rule-making records may contain information about individuals making written or oral comments on proposed rules. This information is collected pursuant to Iowa Code section 17A.4.

175.15(2) Council and commission records. Agendas, minutes, and materials presented to the councils, committees and commissions listed below, by division, are available from the department, except those records concerning closed sessions which are exempt from disclosure under Iowa Code section 21.5(4) or which are otherwise confidential by law. Council and commission records contain information about people who participate in meetings. This information is collected pursuant to Iowa Code section 21.3.

- a. Division of acute disease prevention and emergency response.
 - (1) EMS advisory council established in Iowa Code section 147A.2.
 - (2) System evaluation and quality improvement committee established in Iowa Code section 147A.25.
 - (3) Trauma system advisory council established in Iowa Code section 147A.24.
 - (4) State health facilities council established in Iowa Code section 135.61.
- b. Division of administration and professional licensure: professional licensing boards established in Iowa Code chapters 147 and 272C.
- c. Division of behavioral health.
 - (1) Advisory council on brain injuries established in Iowa Code section 135.22A.
 - (2) Domestic abuse death review team established in Iowa Code section 135.109.
 - (3) State substitute medical decision-making board established in Iowa Code section 135.28.
- d. Division of environmental health: technical advisory committee for radiation machines and radioactive materials established in Iowa Code section 136C.3(2).
- e. Division of health promotion and chronic disease prevention.
 - (1) Abuse education review panel established in Iowa Code section 135.11(27).
 - (2) Advisory committee to the center for rural health and primary care established in Iowa Code section 135.107.
 - (3) Committee on maternal and child health established in Iowa Code section 235C.1.
 - (4) Council on chemically exposed infants and children established in Iowa Code section 235C.1.
 - (5) Iowa child death review team established in Iowa Code section 135.43.
- f. Division of tobacco use prevention and control.
 - (1) Commission on tobacco use prevention and control established in Iowa Code section 142A.3(2).
 - (2) Commission on tobacco use prevention and control advisory council established in Iowa Code section 142A.3(9).
 - (3) Just Eliminate Lies executive body established in Iowa Code section 142A.9(2)“c.”
- g. Director's office.
 - (1) Interagency coordinating council established in Iowa Code section 691.6B.
 - (2) State board of health established in Iowa Code chapter 136.
 - (3) State medical examiner advisory council established in Iowa Code section 691.6C.
 - (4) Preventative health and health services block grant advisory committee.
 - (5) Other ad hoc and advisory committees as established by the director pursuant to Iowa Code section 135.11(26).

175.15(3) Publications. News releases, annual reports, project reports, and department newsletters are available from the public information office. Department news releases, project reports, and newsletters may contain information about individuals, including department staff or members of department councils or committees.

175.15(4) Statistical reports. Periodic reports of vital statistics records are available from the bureau of vital statistics.

175.15(5) *Appeal decisions and advisory opinions.* All final orders, decisions and opinions are open to the public except for information that is confidential according to rule 175.13(17A,22) or 175.14(17A,22). These records may contain information about individuals.

175.15(6) *Published materials.* The department uses many legal and technical publications in its work. The public may inspect these publications upon request. Some of these materials may be protected by copyright law.

175.15(7) *Policy manuals.* Policy or program manuals for various programs may be obtained by contacting the program.

175.15(8) *All other records that are not exempted from disclosure by law.* Other records used by the department include correspondence files, surveys conducted by programs, information and data files, and records used for processing purposes internally. Some of these records may contain information about individuals. Correspondence files may contain confidential information protected by statutes cited in rule 175.13(17A,22).

641—175.16(17A,22) *Data processing systems.* Except where otherwise noted, data processing systems used by the department do not permit the comparison of personally identifiable information in one record system with personally identifiable information in another record system.

641—175.17(17A,22) *Applicability.* This chapter does not:

1. Require the department to index or retrieve records which contain information about individuals by that person's name or other personal identifier.
2. Make available to the general public records which would otherwise not be available under the public records law, Iowa Code chapter 22.
3. Govern the maintenance or disclosure of, notification of, or access to records in the possession of the department which are governed by the regulations of another agency.
4. Apply to grantees, including local governments or subdivisions, that administer state-funded programs, unless otherwise provided by law or agreement.
5. Make available records compiled by the department in reasonable anticipation of court litigation or formal administrative proceedings. The availability of such records to the general public or to any individual or party subject to such litigation or proceedings shall be governed by applicable legal and constitutional principles, statutes, rules of discovery, evidentiary privileges, and applicable regulations of the department.

These rules are intended to implement Iowa Code chapters 17A and 22.

[Filed 4/15/88, Notice 1/27/88—published 5/4/88, effective 7/1/88]

CHAPTER 176
CRITERIA FOR AWARDS OR GRANTS

641—176.1(135,17A) Purpose. The department provides funds to a variety of entities throughout the state for the support of public health programs. The department considers that all funds are subject to competition pursuant to Iowa Code statutes and Iowa Administrative Code rules governing service contracts.

641—176.2(135,17A) Definitions. For the purpose of these rules, the following definitions shall apply:

“Competitive selection process” means the competitive selection application process engaged in by the department to compare applicant qualifications, terms, conditions and pricing for services to purchase services based on quality, performance, and prices of equal or similar services in order to meet the objective of purchasing services based on quality, performance, or price or any combination thereof.

“Continuation application” means the application process for subsequent years within a project period following a competitive selection process.

“Department” means the Iowa department of public health.

“Project” means the activities or program(s) funded by the department.

“Project period” means the period of time which the department intends to support the project without requiring the recompetition for funds. The project period is specified within the competitive selection application and may extend to six years.

“Service delivery area” means the defined geographic area for delivery of project services. Competitive applications shall not fragment existing integrated service delivery within the defined geographic area.

641—176.3(135,17A) Exceptions. Exceptions to these rules are as follows:

1. New funds (including pilot studies and demonstration grants) that become available for new services.
2. Federal or private funding agency specified a sole source.
3. An organization failed to meet conditions and performance standards specified in the contract awards.
4. Mutual agreement among department and contract organizations.

641—176.4(135,17A) Requirements. The following shall be included in all competitive selection applications made available by the department:

1. Funding source.
2. Project period.
3. Services to be delivered.
4. Service delivery area.
5. Funding purpose.
6. Funding restrictions.
7. Funding formula (if any).
8. Matching requirements (if any).
9. Reporting requirements.
10. Performance criteria (experience of applicant in administering similar contracts).
11. Description of eligible applicants.
12. Need for letters of support or other materials (if applicable).
13. Application due date.
14. Anticipated date of award.
15. Eligibility guidelines for those receiving the service or product and the source of those guidelines, including fees or sliding fee scales (if applicable).
16. Target population to be served (if applicable).
17. Evaluation process and criteria.

18. Appeal process.
19. Contractual terms.
20. Business organization.

641—176.5(135,17A) Review process (competitive applications only). The review process to be followed in determining amount of funds to be approved for award of contract shall be described in the competitive selection application. The review criteria and point allocation for each shall also be described in the competitive selection application.

The review committee membership shall be determined by the bureau chief, with oversight from the respective division director. The review committee members shall allocate points per review criteria in conducting the review.

In the event applications for the service delivery area receive an equal number of points, a second review may be conducted by two division directors and the respective bureau chief administering the program.

641—176.6(135,17A) Opportunity for review and comment. Rescinded IAB 1/30/08, effective 3/5/08.

641—176.7(135,17A) Public notice of available funds. The program making funds available through a competitive selection application process shall post all competitive selection documents on the department of public health's Web site at <http://www.idph.state.ia.us> for the duration of the application period.

641—176.8(135,17A) Appeals.

176.8(1) Appeal. Letters of intent and applications received by the department after the due date and time stated in the competitive selection application will be rejected, returned to the applicant, and not reviewed by the department. An applicant may appeal the denial of a timely submitted application. The appeal shall be submitted in writing within ten business days of receipt of notification of the adverse decision. The appeal shall be addressed to the contract administrator cited in the competitive selection application guidance, Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. In the event of an appeal, the department will continue working with the applicant awarded funding pending the outcome of the appeal.

176.8(2) Contested case. Upon receipt of an appeal that meets contested case status, the appeal shall be forwarded within five working days to the department of inspections and appeals (DIA) pursuant to the administrative rules adopted by DIA regarding transmission of cases.

176.8(3) Hearing. Parties shall receive notice of the hearing in advance. The administrative law judge shall schedule the time, place, and date of the hearing so that the hearing is held as expeditiously as possible. The hearing shall be conducted according to the procedural rules for contested case hearings found at 481—Chapter 10.

176.8(4) Decision of administrative law judge. The administrative law judge's decision shall be issued within 60 days from the date of the hearing. The administrative law judge's proposed decision shall be served by certified mail, return receipt requested, or delivered by personal service. The proposed decision and order becomes the department's final decision without further proceedings 10 days after it is received by the aggrieved party unless an appeal to the director is filed by either of the parties as provided in subrule 176.8(5) or the director serves notice on the parties of the director's intent to review the decision.

176.8(5) Appeal to director. Any appeal to the director for review of a proposed decision shall be mailed to the director by certified mail, return receipt requested, or delivered by personal service within ten days after the receipt of the administrative law judge's proposed decision and order by the aggrieved party. A copy of the appeal shall also be mailed to the administrative law judge and the other parties. A request for appeal shall include the specific grounds for appeal.

176.8(6) *Record of hearing.* Upon receipt of an appeal request, the administrative law judge shall prepare a record of the hearing for submission to the director. The record shall include the following:

- a. All pleadings, motions, and rules;
- b. All evidence received or considered and all other submissions by recording or transcript;
- c. All statements of matters officially noticed;
- d. All questions and offers of proof, objections, and rulings thereon;
- e. All proposed findings and exceptions; and
- f. The proposed decision and order of the administrative law judge.

176.8(7) *Decision of director.* Upon receipt of a properly filed appeal, the director shall establish a briefing schedule and, at the discretion of the director, an opportunity for oral argument. An appeal to the director shall be based on the record made at the hearing. The director may reverse or modify any finding of fact if a preponderance of the evidence will support a determination to reverse or modify such a finding, or may reverse or modify any conclusion of law the director finds to be in error. The decision and order of the director shall be delivered by certified mail, return receipt requested, or by personal service, and becomes the department's final decision upon receipt by the aggrieved party.

176.8(8) *Exhausting administrative remedies.* It is not necessary to file an application for rehearing to exhaust administrative remedies when appealing to the director or the district court as provided in Iowa Code section 17A.19.

176.8(9) *Judicial review.* The aggrieved party to the final decision of the department who has exhausted all administrative remedies may petition for judicial review of that action pursuant to Iowa Code chapter 17A. Petitions for judicial review shall be filed within 30 days after the decision becomes final. The party who appeals a final agency action to district court shall pay the costs of the preparation of a transcript of the contested case hearing for the district court.

176.8(10) *Applicability of rule.* This rule governs the appeal process for a competitive selection process if the specific administrative rules of the relevant program do not contain a process for appeal.

These rules are intended to implement Iowa Code chapters 17A and 135.

CHAPTER 177
HEALTH DATA

641—177.1(76GA,ch1212) Purpose. The purpose of this chapter is to collect and provide access to health information to health care providers, health care subscribers, third-party payors and the general public. Such information may be collected from state agencies, health care providers, the state medical assistance program, third-party payors, associations, and other appropriate sources.

641—177.2(76GA,ch1212) Definitions. For purposes of this chapter, the following definitions shall apply:

“Confidential record” in these rules means a record which is not available as a matter of right for examination and copying by members of the public under applicable provisions of law. Confidential records include records or information contained in records that the agencies are prohibited by law from making available for examination by members of the public, and records or information contained in records that are specified as confidential by Iowa Code section 22.7, or other provision of law, but that may be disclosed upon order of a court, the lawful custodian of the record, or by another person duly authorized to release the record. Mere inclusion in a record of information declared confidential by an applicable provision of law does not necessarily make that entire record a confidential record. Included in the definition are those data collected by the department, pursuant to 1996 Iowa Acts, chapter 1212, for preparation and dissemination as compilations.

“Contractor” means a nonprofit corporation acting, pursuant to written agreement with the department to, among other things, compile, correlate and develop data for release by the department in accordance with the provisions of 1996 Iowa Acts, chapter 1212.

“Department” is defined as Iowa department of public health.

“Payor” is as defined by Iowa Code chapter 144C.

“Record” in these rules means the whole or a part of a “public record” as defined in Iowa Code section 22.1, that is owned by or in the physical possession of this agency.

641—177.3(76GA,ch1212) Description of data to be submitted.

177.3(1) The department shall collect information from other state agencies for the purpose of public dissemination of health data.

177.3(2) Hospitals shall submit data to the Iowa Hospital Association which shall serve as an intermediary for the Iowa department of public health. The information shall include inpatient, outpatient and ambulatory information.

641—177.4(76GA,ch1212) Department studies. The department shall conduct special studies consistent with the intent of 1996 Iowa Acts, chapter 1212, using data collected in accordance with subrule 177.3(1). In conducting such studies, the department may utilize the services of a contractor.

641—177.5(76GA,ch1212) Fees. Fees charged for data provided by the department shall not exceed administrative costs. Such charges may include copying, postage, supervisory, computer programming, time and medium fees.

641—177.6(76GA,ch1212) Patient confidentiality. The department shall protect patient confidentiality. Confidential records or parts of such records collected as a part of this process shall be kept confidential. Individual patient names shall not be collected to protect patient confidentiality.

641—177.7(76GA,ch1212) Department contracting. Contracting procedures shall follow 641—Chapter 176.

641—177.8(76GA,ch1212) Address and specification for data submissions. Data required to be submitted pursuant to this chapter shall be sent by agencies and health care providers, or their

representatives, to the Iowa Department of Public Health, Center for Health Statistics, Lucas State Office Building, East 12th and Grand Avenue, Des Moines, Iowa 50319.

Data required to be submitted pursuant to this rule shall be sent in the form designated by the department within 30 days following the six-month calendar periods ending in June and December.

These rules are intended to implement 1996 Iowa Acts, chapter 1212.

[Filed 5/16/97, Notice 2/26/97—published 6/4/97, effective 7/9/97]

[Filed 3/14/02, Notice 2/6/02—published 4/3/02, effective 5/8/02]

CHAPTER 178
VARIANCES AND WAIVERS OF PUBLIC HEALTH
ADMINISTRATIVE RULES

641—178.1(17A,135) Waivers.

178.1(1) Definition. For purposes of this chapter, “a waiver or variance” means action by the department that suspends, in whole or in part, the requirements or provisions of a rule as applied to an identified person on the basis of the particular circumstances of that person. For simplicity, the term “waiver” shall include both a “waiver” and a “variance.”

178.1(2) Scope. This rule outlines generally applicable standards and a uniform process for the granting of an individual waiver from a rule adopted by the department in situations where no other more specifically applicable law provides for a waiver. To the extent another more specific provision of law governs the issuance of a waiver from a particular rule, the more specific provision shall supersede this rule with respect to any waiver from that rule.

178.1(3) Applicability. The department may only grant a waiver from a rule if the department has jurisdiction over the rule and the requested waiver is consistent with applicable statutes, constitutional provisions, or other provisions of law. The department may not waive requirements created or duties imposed by statute.

178.1(4) Criteria for waiver. In response to a petition completed pursuant to subrule 178.1(6), the department may in its sole discretion issue an order waiving in whole or in part the requirements of a rule if the department finds, based on clear and convincing evidence, all of the following:

- a. The application of the rule would impose an undue hardship on the person for whom the waiver is requested;
- b. The waiver from the requirements of the rule in the specific case would not prejudice the substantial legal rights of any person;
- c. The provisions of the rule subject to the petition for a waiver are not specifically mandated by statute or another provision of law; and
- d. Substantially equal protection of public health, safety, and welfare will be afforded by a means other than that prescribed in the particular rule for which the waiver is requested.

178.1(5) Filing of petition. A petition for a waiver must be submitted in writing to the department as follows:

- a. Application for license, registration, certification, or permit. If the petition relates to an application for license, registration, certification, or permit, the petition shall be made in accordance with the filing requirements for the application in question.
- b. Contested cases. If the petition relates to a pending contested case, the petition shall be filed in the contested case proceeding, using the caption of the contested case.
- c. Other. If the petition does not relate to an application or a pending contested case, the petition may be submitted to the department director.
- d. A petition is deemed filed when it is received at the department’s office. A petition should be sent to the Department of Public Health, Lucas State Office Building, 321 E. 12th Street, Des Moines, Iowa 50319. The petition must be typewritten or legibly handwritten in ink and substantially conform to the form specified in 641—178.2(17A,135).

178.1(6) Content of petition. A petition for waiver shall include the following information where applicable and known to the requester:

- a. The name, address, and telephone number of the person for whom a waiver is being requested and a reference to any related contested case. The petition shall also include the name, address, and telephone number of the petitioner’s legal representative, if applicable, and a statement indicating the person to whom communications concerning the petition should be directed.
- b. A description and citation of the specific rule from which a waiver is requested.
- c. The specific waiver requested, including the precise scope and duration.
- d. The relevant facts that the petitioner believes would justify a waiver under each of the four criteria described in subrule 178.1(4). This statement shall include a signed statement from the petitioner

attesting to the accuracy of the facts provided in the petition and a statement of reasons that the petitioner believes will justify a waiver.

e. A history of any prior contacts between the department and the petitioner relating to the regulated activity, license, registration, certification, or permit affected by the proposed waiver, including a description of each affected license, registration, certification, or permit held by the requester, any formal charges filed, any notices of violation, contested case hearings, or investigations relating to the regulated activity, license, registration, certification or permit.

f. Any information known to the requester regarding the department's action in similar circumstances.

g. The name, address, and telephone number of any public agency or political subdivision that also regulates the activity in question or that might be affected by the granting of a waiver.

h. The name, address, and telephone number of any person who would be adversely affected by the granting of the petition.

i. The name, address, and telephone number of any person with knowledge of the relevant facts relating to the proposed waiver.

j. Signed releases of information authorizing persons with knowledge regarding the request to furnish the department with information relevant to the waiver.

178.1(7) Additional information. Prior to issuing an order granting or denying a waiver, the department may request additional information from the petitioner relative to the petition and surrounding circumstances. If the petition was not filed in a contested case, the department may, on its own motion or at the petitioner's request, schedule a telephonic or in-person meeting between the petitioner and the department director or the director's designee.

178.1(8) Notice. The department shall acknowledge a petition upon receipt. Except where otherwise provided by law, every petition shall be served by the petitioner upon each of the parties of record of the proceeding and on all other persons identified in the petition for waiver as affected by the petition, simultaneously with the filing. The petitioner shall serve the notice on all persons to whom notice is required by any provision of law and provide a written statement to the department attesting that notice has been provided. In addition, the department may give notice to other persons.

178.1(9) Hearing procedures. The provisions of Iowa Code sections 17A.10 to 17A.18A regarding contested case hearings shall apply to any petition for a waiver filed within a contested case. A person who objects to a denial of a waiver in proceedings other than a contested case hearing may make an informal appearance before the department director, or the director's designee, to request reconsideration.

178.1(10) Ruling. An order granting or denying a waiver shall be in writing and shall contain a reference to the particular person and rule or portion thereof to which the order pertains, a statement of the relevant facts and reasons upon which the action is based, and a description of the precise scope and duration of the waiver if one is issued.

a. Department discretion. The final decision on whether the circumstances justify the granting of a waiver shall be made at the sole discretion of the department upon consideration of all relevant factors. Each petition for a waiver shall be evaluated by the department based on the unique, individual circumstances set out in the petition.

b. Burden of persuasion. The burden of persuasion rests with the petitioner to demonstrate by clear and convincing evidence that the department should exercise its discretion to grant a waiver from a department rule.

c. Narrowly tailored exception. A waiver, if granted, shall provide the narrowest exception possible to the provisions of a rule.

d. Administrative deadlines. When the rule from which a waiver is sought establishes administrative deadlines, the department shall balance the special individual circumstances of the petitioner with the overall goal of uniform treatment of all similarly situated persons.

e. Conditions. The department may place any condition on a waiver that the department finds desirable to protect the public health, safety, and welfare.

f. Time period of waiver. A waiver shall not be permanent unless the petitioner can show that a temporary waiver would be impracticable. If a temporary waiver is granted, there is no automatic right

to renewal. At the sole discretion of the department, a waiver may be renewed if the department finds that grounds for a waiver continue to exist.

g. Time for ruling. The department shall grant or deny a petition for a waiver as soon as practicable but, in any event, shall do so within 120 days of its receipt unless the petitioner agrees to a later date. However, if a petition is filed in a contested case, the department shall grant or deny the petition no later than the time at which the final decision in that contested case is issued.

h. When deemed denied. Failure of the department to grant or deny a petition within the required time period shall be deemed a denial of that petition by the department. However, the department shall remain responsible for issuing an order denying a waiver.

i. Service of order. Within seven days of its issuance, any order issued under this rule shall be transmitted to the petitioner or the person to whom the order pertains and to any other person entitled to such notice by any provision of law.

178.1(11) Public availability. All orders granting or denying a waiver petition shall be indexed, filed, and available for public inspection as provided in Iowa Code section 17A.3. Petitions for a waiver and orders granting or denying a waiver petition are public records under Iowa Code chapter 22. Some petitions or orders may contain information the department is authorized or required to keep confidential. The department may accordingly redact confidential information from petitions or orders prior to public inspection.

178.1(12) Summary reports. Semiannually, the department shall prepare a summary report identifying the rules for which a waiver has been granted or denied, the number of times a waiver was granted or denied for each rule, a citation to the statutory provisions implemented by these rules, and a general summary of the reasons justifying the department’s actions on waiver requests. If practicable, the report shall detail the extent to which the granting of a waiver has affected the general applicability of the rule itself. Copies of this report shall be available for public inspection and shall be provided semiannually to the administrative rules coordinator and the administrative rules review committee.

178.1(13) Cancellation of a waiver. A waiver issued by the department pursuant to this rule may be withdrawn, canceled, or modified if, after appropriate notice and hearing, the department issues an order finding any of the following:

- a.* The petitioner or the person who was the subject of the waiver order withheld or misrepresented material facts relevant to the propriety or desirability of the waiver; or
- b.* The alternative means for ensuring that the public health, safety and welfare will be adequately protected after issuance of the waiver order have been insufficient; or
- c.* The subject of the waiver order has failed to comply with all conditions contained in the order.

178.1(14) Violations. A violation of a condition in a waiver order shall be treated as a violation of the particular rule for which the waiver was granted. As a result, the recipient of a waiver under this rule who violates a condition of the waiver may be subject to the same remedies or penalties as a person who violates the rule at issue.

178.1(15) Defense. After the department issues an order granting a waiver, the order is a defense within its terms and the specific facts indicated therein only for the person to whom the order pertains in any proceeding in which the rule in question is sought to be invoked.

178.1(16) Judicial review. Judicial review of the department’s decision to grant or deny a waiver petition may be taken in accordance with Iowa Code chapter 17A.

641—178.2(17A,135) Sample petition for waiver. A petition for waiver filed in accordance with 641—178.1(17A,135) must meet the requirements specified therein and must substantially conform to the following form:

BEFORE THE DEPARTMENT OF PUBLIC HEALTH		
Petition by (name of petitioner) for the waiver/variance of (insert rule citation) relating to (insert the subject matter).	}	PETITION FOR WAIVER/VARIANCE

1. Provide petitioner’s (person asking for a waiver or variance) name, address, and telephone number. Also include the name, address, and telephone number of the petitioner’s legal representative, if applicable, and a statement indicating the person to whom communications concerning the petition should be directed.
2. Describe and cite the specific rule from which a waiver is requested.
3. Describe the specific waiver requested, including the precise scope and time period for which the waiver will extend.
4. Explain the relevant facts and reasons that the petitioner believes justify a waiver. Include in your answer all of the following:
 - a. Why applying the rule would result in undue hardship to the petitioner;
 - b. Why waiving the rule would not prejudice the substantial legal rights of any person;
 - c. Whether the provisions of the rule subject to the waiver are specifically mandated by statute or another provision of law; and
 - d. How substantially equal protection of public health, safety, and welfare will be afforded by a means other than that prescribed in the particular rule for which the waiver is requested.
5. Provide a history of any prior contacts between the department and petitioner relating to the regulated activity, license, registration, certification or permit that would be affected by the waiver. Include a description of each affected license, registration, certification, or permit held by the petitioner, any formal charges filed, any notices of violation, any contested case hearings held, or any investigations related to the regulated activity, license, registration, certification, or permit.
6. Provide information known to the petitioner regarding the department’s action in similar circumstances.
7. Provide the name, address, and telephone number of any public agency or political subdivision that also regulates the activity in question or that might be affected by the granting of the petition.
8. Provide the name, address, and telephone number of any person or entity that would be adversely affected by the granting of the waiver.
9. Provide the name, address, and telephone number of any person with knowledge of the relevant facts relating to the proposed waiver.
10. Provide signed releases of information authorizing persons with knowledge regarding the request to furnish the department with information relevant to the waiver.

I hereby attest to the accuracy and truthfulness of the above information.

CHAPTER 191
ADVISORY BODIES OF THE DEPARTMENT

641—191.1(135) Definitions. For the purpose of these rules, the following definitions shall apply:

“*Advisory body*” means a council, committee, or task force whose members have been appointed by the governor, the director or the director’s designee to provide advice or technical assistance to the department in an identified area of public health. An advisory body has no substantive authority to affect individual rights, duties or responsibilities.

“*Chairperson*” means the chair of the advisory body who has been elected by the majority of the advisory body’s members.

“*Department*” means the Iowa department of public health.

“*Designee*” means the individual designated by the director.

“*Director*” means the director of public health.

“*Governor*” means the governor of Iowa.

641—191.2(135) Purpose. The department may from time to time establish an advisory body for the provision of advice or technical assistance in an identified area of public health. These rules are applicable only to an advisory body established for a period to exceed one year or more. These rules do not apply to an advisory body governed by other administrative rule or statute.

641—191.3(135) Appointment. Members of the advisory body shall be appointed by the governor, director, or designee. The appointments, unless provided otherwise by law, shall be for three-year staggered terms which shall expire on June 30.

191.3(1) Vacancies shall be filled in the same manner in which the original appointments were made. Appointments shall complete the original member’s term.

191.3(2) Absences. Three consecutive unexcused absences shall be grounds for the director to consider dismissal of the advisory body member and to appoint another. The chairperson of the advisory body is charged with providing notification of absences.

641—191.4(135) Officers. Officers of the advisory body shall be a chairperson and a vice chairperson and shall be elected at the first meeting of each fiscal year unless designated at the time of appointment. Vacancies in the office of chairperson shall be filled by elevation of the vice chairperson. Vacancies in the office of vice chairperson shall be filled by election at the next meeting after the vacancy occurs. The chairperson shall preside at all meetings of the advisory body, appoint such subcommittees as deemed necessary, and designate the chairperson of each subcommittee. If the chairperson is absent or unable to act, the vice chairperson shall perform the duties of the chairperson. When so acting, the vice chairperson shall have all the powers of and be subject to all restrictions upon the chairperson. The vice chairperson shall also perform such other duties as may be assigned by the chairperson.

641—191.5(135) Meetings.

191.5(1) The advisory body shall establish a meeting schedule on an annual basis to conduct its business. Meetings may be scheduled as business requires, but notice to members must be at least five working days prior to the meeting date. A four-week notice is encouraged to accommodate the schedules of professional members.

191.5(2) Robert’s Rules of Order shall govern all meetings.

191.5(3) Action on any issue before the advisory body can only be taken by a majority vote of the entire membership. The advisory body shall maintain information sufficient to indicate the vote of each member present.

641—191.6(135) Subcommittees. The advisory body may designate one or more subcommittees to perform such duties as may be deemed necessary.

641—191.7(135) Expenses of advisory body members. The following may be considered necessary expenses for reimbursement of advisory body members when incurred on behalf of advisory body business and are subject to established state reimbursement rates:

1. Reimbursement for travel in a private car.
2. Actual lodging and meal expenses including sales tax on lodging and meals.
3. Actual expense of public transportation.

641—191.8(135) Gender balance. All advisory bodies of the department appointed by the governor, director or designee, if not otherwise provided by law, shall be gender-balanced.

These rules are intended to implement Iowa Code section 135.11.

CHAPTER 192
CHILD SUPPORT NONCOMPLIANCE

641—192.1(252J) Issuance or renewal of a license—denial. The department or board shall deny the issuance or renewal of a license upon the receipt of a certificate of noncompliance from the child support recovery unit of the department of human services according to the procedures in Iowa Code chapter 252J. In addition to the procedures set forth in Iowa Code chapter 252J, the following shall apply.

192.1(1) The notice required by Iowa Code section 252J.8 shall be served upon the applicant or licensee by restricted certified mail, return receipt requested, or personal service in accordance with Iowa Rules of Civil Procedure 56.1. Alternatively, the applicant or licensee may accept service personally or through authorized counsel.

192.1(2) The effective date of the denial of the issuance or renewal of a license, as specified in the notice required by Iowa Code section 252J.8, shall be 60 days following service of the notice upon the applicant or licensee.

192.1(3) The department or board's administrator is authorized to prepare and serve the notice required by Iowa Code section 252J.8, upon the applicant or licensee.

192.1(4) Applicants and licensees shall keep the department or board informed of all court actions, and all child support recovery unit actions taken under or in connection with Iowa Code chapter 252J, and shall provide the department or board copies, within seven days of filing or issuance, of all applications filed with the district court pursuant to Iowa Code section 252J.9, all court orders entered in such actions, and withdrawals of certificates of noncompliance by the child support recovery unit.

192.1(5) All department or board fees required for application, license renewal, or license reinstatement must be paid by applicants or licensees before a license will be issued, renewed, or reinstated after the department or board has denied the issuance or renewal of a license pursuant to Iowa Code chapter 252J.

192.1(6) In the event an applicant or licensee timely files a district court action following service of a department or board notice pursuant to Iowa Code sections 252J.8 and 252J.9, the department or board shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the department or board to proceed. For purposes of determining the effective date of the denial of the issuance or renewal of a license, the department or board shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

192.1(7) The department or board shall notify the applicant or licensee in writing through regular first-class mail, or such other means as the department or board determines appropriate in the circumstances, within ten days of the effective date of the denial of the issuance or renewal of a license, and shall similarly notify the applicant or licensee if the license is issued or renewed following the department or board's receipt of a withdrawal of the certificate of noncompliance.

641—192.2(252J) Suspension or revocation of a license. The department or board shall suspend or revoke a license upon the receipt of a certificate of noncompliance from the child support recovery unit of the department of human services according to the procedures set forth in Iowa Code chapter 252J. In addition to the procedures set forth in Iowa Code chapter 252J, the following shall apply.

192.2(1) The notice required by Iowa Code section 252J.8 shall be served upon the licensee by restricted certified mail, return receipt requested, or personal service in accordance with Iowa Rules of Civil Procedure 56.1. Alternatively, the licensee may accept service personally or through authorized counsel.

192.2(2) The effective date of the suspension or revocation of a license, as specified in the notice required by Iowa Code section 252J.8, shall be 60 days following service of the notice upon the licensee.

192.2(3) The department or board's administrator is authorized to prepare and serve the notice required by Iowa Code section 252J.8 and is directed to notify the licensee that the license will be suspended unless the license is already suspended on other grounds. In the event that the license is on

suspension, the administrator shall notify the licensee of the department or board's intention to revoke the license.

192.2(4) Licensee shall keep the department or board informed of all court actions, and all child support recovery unit action taken under or in connection with Iowa Code chapter 252J, and shall provide the department or board copies, within seven days of filing or issuance, of all applications filed with the district court pursuant to Iowa Code section 252J.9, all court orders entered in such actions and withdrawals of certificates of noncompliance by the child support recovery unit.

192.2(5) All department or board fees required for license renewal or license reinstatement must be paid by licensees before a license will be reinstated after the department or board has suspended or revoked a license pursuant to Iowa Code chapter 252J.

192.2(6) In the event a licensee files a district court action following service of a department or board notice pursuant to Iowa Code sections 252J.8 and 252J.9, the department or board shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the department or board to proceed. For purposes of determining the effective date of the suspension or revocation, the department or board shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

192.2(7) The department or board shall notify the licensee in writing through regular first-class mail, or such other means as the department or board determines appropriate in the circumstances, within ten days of the effective date of the suspension or revocation of a license, and shall similarly notify the licensee if the license is reinstated following the department or board's receipt of a withdrawal of the certificate of noncompliance.

641—192.3(17A,22,252J) Sharing of information. Notwithstanding any statutory confidentiality provision, the department or board may share information with the child support recovery unit of the department of human services through manual or automated means for the sole purpose of identifying applicants or licensees subject to enforcement under Iowa Code chapter 252J or Iowa Code chapter 598.

These rules are intended to implement Iowa Code chapter 252J.

CHAPTER 193
IMPAIRED PRACTITIONER REVIEW COMMITTEE

641—193.1(272C) Impaired practitioner review committee. Pursuant to the authority of Iowa Code section 272C.3(1)“k,” the department establishes the impaired practitioner review committee.

193.1(1) Definitions.

“Committee” means the impaired practitioner review committee.

“Contract” means the written document establishing the terms for participation in the impaired practitioner program prepared by the committee.

“Impairment” means an inability to practice with reasonable safety and skill as a result of alcohol or drug abuse, dependency, or addiction, or any neuropsychological or physical disorder or disability.

“Practitioner” means a person licensed under Iowa Code chapter 147, 148C, 149, 152B, 152C, 152D, 154A, or 155.

“Self-report” means the licensee’s providing written or oral notification to the board that the licensee has been or may be diagnosed as having an impairment prior to the board’s receiving a complaint or report alleging the same from a second party.

193.1(2) Purpose. The impaired practitioner review committee evaluates, assists, monitors and, as necessary, makes reports to the board on the recovery or rehabilitation of practitioners who self-report impairments.

193.1(3) Composition of the committee. The chairperson of the board shall appoint the members of the committee. The membership of the committee includes, but is not limited to:

a. One practitioner, licensed under the same board or similar professional licensing board who has remained free of addiction for a period of no less than two years since successfully completing a board-approved recovery program and board-ordered probation for drug or alcohol dependency, addiction, or abuse;

b. One practitioner with expertise in substance abuse/addiction treatment programs;

c. One public member of the board.

193.1(4) Eligibility. To be eligible for participation in the impaired practitioner recovery program, a licensee must meet all the following criteria:

a. The licensee must self-report an impairment or suspected impairment directly to the office of the board.

b. The licensee must not have engaged in the unlawful diversion or distribution of controlled substances or illegal substances.

c. At the time of the self-report, the licensee must not already be under board order for an impairment of any other violation of the laws and rules governing the practice of the profession.

d. The licensee has not caused harm or injury to a client.

e. There is currently no board investigation of the licensee that the committee determines concerns serious matters related to the ability to practice with reasonable safety and skill or in accordance with the accepted standards of care.

f. The licensee has not been subject to a civil or criminal sanction, or ordered to make reparations or remuneration by a government or regulatory authority of the United States, this or any other state or territory or a foreign nation for actions that the committee determines to be serious infractions of the laws, administrative rules, or professional ethics related to the practice of the licensee’s profession.

g. The licensee has provided truthful information and fully cooperated with the board or committee.

193.1(5) Meetings. The committee shall meet as necessary in order to review licensee compliance, develop consent agreements for new referrals, and determine eligibility for continued monitoring.

193.1(6) Terms of participation. A licensee shall agree to comply with the terms for participation in the impaired practitioner program established in a contract. Conditions placed upon the licensee and the duration of the monitoring period shall be established by the committee and communicated to the licensee in writing.

193.1(7) *Noncompliance.* Failure to comply with the provisions of the agreement shall require the committee to make immediate referral of the matter to the board for possible disciplinary action.

193.1(8) *Practice restrictions.* The committee may impose restrictions on the licensee's practice as a term of the contract until such time as it receives a report from an approved evaluator that the licensee is capable of practicing with reasonable safety and skill. As a condition of participating in the program, a licensee is required to agree to restricted practice in accordance with the terms specified in the contract. In the event that the licensee refuses to agree to or comply with the restrictions established in the contract, the committee shall refer the licensee to the board for appropriate action.

193.1(9) *Limitations.* The committee establishes the terms and monitors a participant's compliance with the program specified in the contract. The committee is not responsible for participants who fail to comply with the terms of or successfully complete the impaired practitioner program. Participation in the program under the auspices of the committee shall not relieve the board of any duties and shall not divest the board of any authority or jurisdiction otherwise provided. Any violation of the statutes or rules governing the practice of the licensee's profession by a participant shall be referred to the board for appropriate action.

193.1(10) *Confidentiality.* The committee is subject to the provisions governing confidentiality established in Iowa Code section 272C.6. Accordingly, information in the possession of the board or the committee about licensees in the program shall not be disclosed to the public. Participation in the impaired practitioner program under the auspices of the committee is not a matter of public record.

This rule is intended to implement Iowa Code chapter 272C.

CHAPTER 194
SCOPE OF PRACTICE REVIEW COMMITTEES

Rescinded IAB 12/5/07, effective 1/9/08

CHAPTER 195
STUDENT LOAN DEFAULT/NONCOMPLIANCE WITH
AGREEMENT FOR PAYMENT OF OBLIGATION

641—195.1(261) General definitions. For the purposes of this chapter, the following definitions shall apply:

“*Certificate of noncompliance*” means written certification from the college student aid commission to the licensing authority certifying that the licensee has defaulted on an obligation owed to or collected by the commission.

“*Commission*” means the college student aid commission.

“*Department*” means the department of public health.

“*Licensing authority*” means the department or board.

641—195.2(261) Issuance or renewal of a license—denial. The department or board shall deny the issuance or renewal of a license upon receipt of a certificate of noncompliance from the college student aid commission according to the procedures set forth in Iowa Code sections 261.121 to 261.127.

195.2(1) In order to process the certificate of noncompliance received by the department or board, the department or board will maintain records of licensees by name, current known address, and social security number.

195.2(2) Upon receipt of a certificate of noncompliance duly issued by the commission, the department or board shall initiate procedures for denial of issuance or renewal of licensure.

195.2(3) The department or board shall provide notice to the licensee or applicant informing that person of the board’s intent to deny the license and said notice shall be served by restricted certified mail, return receipt requested, or by personal service in accordance with the Iowa Rules of Civil Procedure. The notice shall state all of the following:

a. The licensing authority intends to deny issuance or renewal of an individual’s license due to the receipt of a certificate of noncompliance from the commission.

b. The individual must contact the commission to schedule a conference or to otherwise obtain a withdrawal of a certificate of noncompliance.

c. Unless the commission furnishes a withdrawal of a certificate of noncompliance to the licensing authority within 30 days of the issuance of the notice under this subrule, the individual’s license shall be denied.

195.2(4) The applicant or licensee served with a notice under 195.2(3) above shall not have a right to a hearing before the board but may request a court hearing pursuant to Iowa Code section 261.127. Such court hearing must be requested within 30 days of the provision of notice.

195.2(5) The effective date of the denial of the issuance or renewal of a license, as specified in the notice required by Iowa Code section 261.126, shall be 60 days following service of the notice upon the applicant or licensee.

195.2(6) The department’s or board’s administrator is authorized to prepare and serve the notice required by Iowa Code section 261.126 upon the applicant or licensee.

195.2(7) All department or board fees required for application, license renewal, or license reinstatement must be paid by applicants or licensees and all continuing education requirements must be met before a license will be issued, renewed, or reinstated after the department or board has denied the issuance or renewal of a license pursuant to Iowa Code chapter 261.

195.2(8) In the event an applicant or licensee timely files a district court action following service of a department or board notice pursuant to Iowa Code section 261.126, the department or board shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the department or board to proceed.

195.2(9) Upon the filing of a district court action, the applicant or licensee shall promptly file a copy of the petition filed with the district court with the department or board. In addition, the applicant or licensee shall provide the department or board with copies of all court orders and rulings entered in such action within seven days of the action.

195.2(10) For purposes of determining the effective date of the denial of the issuance or renewal of a license, the department or board shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

641—195.3(261) Suspension or revocation of a license. The department or board shall suspend or revoke a license upon receipt of a certificate of noncompliance from the college student aid commission according to the procedures set forth in Iowa Code sections 261.121 to 261.127. In addition to the provisions contained in those sections, the following shall apply:

195.3(1) In order to process the certificate of noncompliance received by the department or board, the department or board will maintain records of licensees by name, current known address, and social security number.

195.3(2) Upon receipt of a certificate of noncompliance duly issued by the commission, the board shall initiate procedures for suspension or revocation of licensure.

195.3(3) The board shall provide notice to the licensee informing that person of the board's intent to suspend or revoke the license and said notice shall be served by restricted certified mail, return receipt requested, or by personal service in accordance with the Iowa Rules of Civil Procedure. The notice shall state all of the following:

a. The licensing authority intends to suspend or revoke an individual's license due to the receipt of a certificate of noncompliance from the commission.

b. The individual must contact the commission to schedule a conference or to otherwise obtain a withdrawal of a certificate of noncompliance.

c. Unless the commission furnishes a withdrawal of a certificate of noncompliance to the licensing authority within 30 days of the issuance of the notice under this subrule, the individual's license shall be suspended or revoked.

195.3(4) The licensee served with a notice under 195.3(3) above shall not have a right to a hearing before the board but may request a court hearing pursuant to Iowa Code section 261.127. Such court hearing must be requested within 30 days of the provision of notice.

195.3(5) The effective date of the suspension or revocation of a license, as specified in the notice required by Iowa Code section 261.126, shall be 60 days following service of the notice upon the licensee.

195.3(6) The department's or board's administrator is authorized to prepare and serve the notice required by Iowa Code section 261.126 upon the licensee.

195.3(7) All department or board fees required for application, license renewal, or license reinstatement must be paid by applicants or licensees and all continuing education requirements must be met before a license will be issued, renewed, or reinstated after the department or board has suspended or revoked a license pursuant to Iowa Code chapter 261.

195.3(8) In the event a licensee timely files a district court action following service of a department or board notice pursuant to Iowa Code section 261.126, the department or board shall continue with the intended action described in the notice upon the receipt of a court order lifting the stay, dismissing the action, or otherwise directing the department or board to proceed.

195.3(9) Upon the filing of a district court action, the licensee shall promptly file a copy of the petition filed with the district court with the department or board. In addition, the licensee shall provide the department or board with copies of all court orders and rulings entered in such action within seven days of the action.

195.3(10) For purposes of determining the effective date of the suspension or revocation, the department or board shall count the number of days before the action was filed and the number of days after the action was disposed of by the court.

641—195.4(17A,22,261) Sharing of information. Notwithstanding any statutory confidentiality provision, the department or board may share information with the commission for the sole purpose of identifying applicants or licensees subject to enforcement under Iowa Code chapter 261.

These rules are intended to implement Iowa Code chapter 261.

CHAPTER 200
STANDARDS COMMITTEE PROCEDURES—CHANGES IN STANDARDS
FOR THE STATE HEALTH PLAN
Rescinded IAB 5/30/90, effective 7/4/90

CHAPTER 201
ORGANIZED DELIVERY SYSTEMS

LICENSURE AND REGULATION

641—201.1(135,75GA,ch158) Purpose and scope. The following rules developed by the department of public health govern the organization and regulation of organized delivery systems, also referred to as accountable health plans, pursuant to the authority set forth by the Seventy-fifth General Assembly in Senate File 380, which can also be found in chapter 158 of the 1993 Iowa Acts. It is the intent of these rules to allow for flexibility in the formation of organized delivery systems while ensuring accountability for the cost, quality and access to health care for those they serve. This chapter shall apply to all organized delivery systems operating in this state or providing coverage to Iowa residents. This chapter is not intended to apply to entities that fall under the regulation of the division of insurance.

641—201.2(135,75GA,ch158) Definitions.

“Accountable health plan (AHP)” means a type of organized delivery system.

“Commissioner” means the commissioner of insurance.

“Coverage decision” means a final adverse decision based on medical necessity. This definition does not include a denial of coverage for a service or treatment specifically listed in plan or evidence of coverage documents as excluded from coverage.

“Department” means the department of public health.

“Director” means the director of the department of public health.

“Emergency medical condition” means a medical condition that manifests itself by symptoms of sufficient severity, including but not limited to severe pain, that an ordinarily prudent person, possessing average knowledge of medicine and health, could reasonably expect the absence of immediate medical attention to result in one of the following:

1. Placing the health of the individual, or with respect to a pregnant woman, the health of the woman or her unborn child, in serious jeopardy.
2. Serious impairment to bodily function.
3. Serious dysfunction of a bodily organ or part.

“Emergency services” means covered inpatient and outpatient health care services that are furnished by a health care provider who is qualified to provide the services that are needed to evaluate or stabilize an emergency medical condition.

“Enrollee” means an individual, or an eligible dependent, who receives health care benefits coverage through an organized delivery system.

“Essential community providers” means those publicly funded health care providing organizations which the director deems to be vital to a local health care delivery system to ensure that all vulnerable populations in Iowa have assured access to health care.

“Independent review entity” means a reviewer or entity, certified by the commissioner pursuant to Iowa Code section 514J.6 [1999 Iowa Acts, chapter 41, section 12].

“Organized delivery system (ODS)” means an organization with defined governance that is responsible for delivering or arranging to deliver the full range of health care services covered under a standard benefit plan and is accountable to the public for the cost, quality and access of its services and for the effect of its services on their health. The organization operating as an ODS shall assume risk and be subject to solvency standards as found in 201.12(135,75GA,ch158).

“Primary care” means essential, community-based health care services that are coordinated, comprehensive, accountable and accessible on a first contact and on an ongoing basis. Primary care includes diagnosis and treatment, prevention, maintenance, management of chronic problems, and linkages for specialized care.

“Standard benefit plan” means, at a minimum, the same benefit plan that is required of small group insurers under Iowa Code chapter 513B.

“Utilization review” means a program or process by which an evaluation is made of the necessity, appropriateness, and efficiency of the use of health care services, procedures, or facilities given or proposed to be given to an individual within this state. Such evaluation does not apply to requests by an individual or provider for a clarification, guarantee, or statement of an individual’s health insurance coverage or benefits provided under a health insurance policy, nor to claims adjudication. Unless it is specifically stated, verification of benefits, preauthorization, or a prospective or concurrent utilization review program or process shall not be construed as a guarantee or statement of insurance coverage or benefits for any individual under a health insurance policy.

641—201.3(135,75GA,ch158) Application. An ODS shall not operate in Iowa without an approved application from the department. An application on forms provided by the department accompanied by a filing fee of \$2,000 (a portion of this fee is for the solvency review) payable to the department, shall be completed by an authorized representative of the organized delivery system. The application shall be submitted in duplicate. An application shall not be deemed to be filed until all information necessary to properly process said application has been received by the department; this includes information that addresses rules 201.4(135,75GA,ch158) through 201.15(135,75GA,ch158). The application shall set forth or be accompanied by the following:

1. A copy of the basic organizational document of the applicant such as the articles of incorporation, articles of association, partnership agreement, trust agreement, or other applicable documents and all of its amendments.
2. A copy of the bylaws, rules or similar document, if any, regulating the governance and the conduct of the internal affairs of the applicant.
3. A list of names, addresses and official position of the persons who are to be responsible for the conduct of the affairs of the applicant, including all members of the board of directors, board of trustees, executive committee, or other governing board or committee, the principal officers of a corporation and the partners or members if a partnership or association.
4. A copy of the form of evidence of coverage.
5. A copy of the form of the group contract, if any, which is to be issued to employers, unions, trustees or other organizations.
6. Financial statements showing the applicant’s current assets, liabilities and sources of financial support. If the applicant’s financial affairs are audited by an independent certified public accountant, a copy of the applicant’s most recent regular certified financial statement shall satisfy this requirement unless the department directs that additional financial information is required.
7. A description of the proposed method of marketing the plan, a financial plan which includes a three-year projection of operating results anticipated, and a statement as to the sources of funding.
8. A statement describing the geographic area to be served.
9. A description of the complaint procedures to be utilized.
10. A sample copy of the provider contract for risk-bearing providers.

641—201.4(135,75GA,ch158) Governing body. An organized delivery system shall have a basic written organizational document setting forth its scheme of organization and establishing a governing body appropriate to its form of organization. The governing body shall be responsible for matters of policy and operation.

201.4(1) The ODS shall provide for enrollee representation on the governing body. The organizational document shall describe what this representation shall be and the method the ODS proposes to use to achieve enrollee representation.

201.4(2) Advisory committee. An ODS shall have an enrollee advisory committee to the board. The majority of the members of this advisory committee shall be enrollees with no official capacity within the ODS.

641—201.5(135,75GA,ch158) Service area/geographic access.

201.5(1) An organized delivery system shall establish its own service area subject to approval by the department. The department shall approve only service areas where the county was used as the basic building block.

201.5(2) The ODS's plan of operation shall address the capability of the ODS to serve an enrollee residing anywhere in the service area.

201.5(3) ODSs shall cover emergency care to enrollees who are traveling outside the ODS's service area. The ODS may impose copayments or deductibles for such care to the extent permitted by the enrollee's policy and may require the enrollee to return to the service area for continuing treatment as soon as the enrollee's condition reasonably permits such travel.

201.5(4) An ODS shall provide geographic access to its enrollees within its service area as follows:

a. Primary care shall be available within 30 minutes' travel time.

b. Primary inpatient hospital care shall be available within 60 minutes' travel time. Inpatient hospital services at a secondary or tertiary level may be made available at a referral center exceeding the 60-minute limit and may be located outside the service area.

c. The above requirements do not require that care be provided within the state of Iowa.

201.5(5) A licensed ODS wishing to expand its service area shall seek approval from the department for the expansion. The ODS shall submit evidence that the requirements of subrules 201.5(1) through 201.5(4) can be met for the additional counties.

641—201.6(135,75GA,ch158,78GA,ch41) Provider network and contracts; treatment and services.

201.6(1) Each ODS shall have flexibility in establishing a provider network to achieve the balance of providers which best meets the needs of its enrollees. An ODS may determine its own standards and criteria by which it determines which providers will be included in its network. These standards and criteria shall be public and the ODS shall be held accountable for abiding by the standards and criteria. An ODS shall establish an internal first level provider appeal process.

201.6(2) An ODS shall not use the design of its provider network as a means for discouraging enrollment from high-risk or special needs populations.

201.6(3) Each ODS shall provide data to the department on the utilization of all providers by its enrollees, by provider type. This information shall be disseminated as part of the ODS report card.

201.6(4) A list of available ODS providers, which shall be updated at least once a year, shall be provided to enrollees on request.

201.6(5) An ODS shall be encouraged to establish working relationships with essential community providers. The department shall provide for the identification of essential community providers within the service area of each ODS. The director shall establish criteria for essential community provider designation. The criteria shall focus on:

a. Whether the provider has a demonstrated record of service to impoverished or medically underserved populations which face language, ethnic, or cultural barriers to health care access or which have health care needs that are not being met by other providers in the geographic area; and

b. Whether the provider is an entity who serves all patients regardless of ability to pay and who charges for services on an income-based sliding fee schedule.

201.6(6) Emergency services. Emergency services, as defined in rule 201.2(135,75GA,ch158), shall be provided by the ODS, either through its own facilities or through guaranteed arrangements with other providers, on a 24-hour basis.

a. A physician and sufficient other licensed and ancillary personnel shall be readily available at all times to render such services.

b. Since ODSs are not required to contract with every emergency care provider in an area, ODSs shall make every effort to inform enrollees of participating providers.

c. Reimbursement to a provider of emergency services shall not be denied by any ODS without review of the patient's medical history, presenting symptoms, and admitting or initial as well as final diagnosis, submitted by the provider, in determining whether, by definition, emergency services could reasonably have been expected to be provided.

d. Reimbursement for emergency services shall not be denied solely on the grounds that services were performed by a noncontracted provider. Coverage for emergency services is subject to the terms and conditions of the health plan or contract.

e. If reimbursement for emergency services is denied, the enrollee may file a complaint with the ODS as outlined in rule 201.7(135,75GA,ch158). Upon denial of reimbursement for emergency services, the ODS shall notify the enrollee and the provider that they may register a complaint with the department.

f. Prior authorization for emergency services shall not be required. All services necessary to evaluate and stabilize an emergency medical condition shall be considered covered emergency services.

201.6(7) All provider contracts shall contain the following provisions:

a. (Provider), or its assignee or subcontractor, hereby agrees that in no event, including, but not limited to, nonpayment by the ODS, ODS insolvency or breach of this agreement, shall (provider), or its assignee or subcontractor, bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against subscriber/enrollee or persons other than the ODS acting on their behalf for services provided pursuant to this agreement. This provision shall not prohibit collection of supplemental charges or copayments on an ODS's behalf made in accordance with the terms of (applicable agreement) between an ODS and subscriber/enrollee.

b. (Provider), or its assignee or subcontractor, further agrees that (1) this provision shall survive the termination of this agreement regardless of the cause giving rise to termination and shall be construed to be for the benefit of the ODS subscriber/enrollee and that (2) this provision supersedes any oral or written contrary agreement now existing or hereafter entered into between (provider) and subscriber/enrollee or persons acting on their behalf.

201.6(8) Prohibition of interference with medical communications.

a. An ODS shall not prohibit, penalize, or otherwise restrict a participating provider from advising an enrollee of the ODS about the health status of the enrollee or medical care or treatment of the enrollee's condition or disease, regardless of whether benefits for such care or treatment are provided under the plan, if the provider is acting within the lawful scope of practice.

b. An ODS shall not penalize a provider because the provider, in good faith, reports to state or federal authorities any act or practice by the ODS that, in the opinion of the provider, jeopardizes patient health or welfare.

c. An ODS shall not prohibit, penalize, or otherwise restrict a provider from advocating on behalf of a covered individual within a review or grievance process established by the organized delivery system.

201.6(9) Continuity of care—pregnancy.

a. An ODS that terminates its contract with a participating health care provider shall continue to provide coverage under the contract to a covered person in the second or third trimester of pregnancy for continued care from such health care provider. Such persons may continue to receive such treatment or care through postpartum care related to the child birth and delivery. Payment for covered benefits and benefit levels shall be according to the terms and conditions of the contract.

b. A covered person who makes an involuntary change in health plans may request that the new health plan cover the services of the covered person's physician specialist who is not a participating health care provider under the new health plan, if the covered person is in the second or third trimester of pregnancy. Continuation of such coverage shall continue through postpartum care related to the child birth and delivery. Payment for covered benefits and benefit level shall be according to the terms and conditions of the new health plan contract.

c. An ODS that terminates the contract of a participating health care provider for cause shall not be liable to pay for health care services provided by the health care provider to a covered person following the date of termination.

201.6(10) Continuity of care—terminal illness.

a. If an ODS terminates its contract with a participating health care provider, a covered individual who is undergoing a specified course of treatment for a terminal illness or a related condition, with the recommendation of the covered individual's treating physician licensed under Iowa Code chapter 148, 150, or 150A, may continue to receive coverage for treatment received from the covered individual's

physician for the terminal illness or a related condition, for a period of up to 90 days. Payment for covered benefits and benefit level shall be according to the terms and conditions of the contract.

b. A covered person who makes a change in health plans involuntarily may request that the new health plan cover services of the covered person's treating physician licensed under Iowa Code chapter 148, 150, or 150A, who is not a participating health care provider under the new health plan, if the covered person is undergoing a specified course of treatment for a terminal illness or a related condition. Continuation of such coverage shall continue for up to 90 days. Payment for covered benefits and benefit levels shall be according to the terms and conditions of the contract.

c. Notwithstanding paragraphs "*a*" and "*b*" above, an ODS that terminates the contract of a participating health care provider for cause shall not be required to cover health care services provided by the health care provider to a covered person following the date of termination.

201.6(11) Experimental treatment review. An ODS that limits coverage for experimental medical treatment, drugs, or devices, shall develop and implement a procedure to evaluate experimental medical treatments.

a. A description of the procedure must be submitted to the division of insurance in writing and include, at a minimum:

(1) The process used to determine whether the ODS will provide coverage for new medical technologies and new uses of existing technologies;

(2) A requirement for review of information from appropriate government regulatory agencies and published scientific literature concerning new medical technologies, new uses of existing technologies, and the use of external experts in making decisions; and

(3) A process for a person covered under a plan or contract to request an appeal of a denial of coverage because the proposed treatment is experimental.

b. An evaluation of a particular treatment shall not be required more than once a year.

c. An ODS shall include appropriately licensed or qualified professionals in the evaluation process.

d. An ODS that limits coverage for experimental treatment, drugs, or devices shall clearly disclose such limitations in a contract, policy, or certificate of coverage.

201.6(12) Utilization review requirements. An organized delivery system that provides health benefits to a covered individual residing in this state shall not conduct utilization review, either directly or indirectly, under a contract with a third party who does not meet the requirements established for accreditation by the Utilization Review Accreditation Commission, National Committee on Quality Assurance, or another national accreditation entity recognized and approved by the commissioner. This subrule does not apply to any utilization review performed solely under contract with the federal government for review of patients eligible for services under any of the following:

1. Title XVIII of the federal Social Security Act.
2. The civilian health and medical program of the uniformed services.
3. Any other federal employee health benefit plan.

641—201.7(135,75GA,ch158) Complaints. Each ODS shall provide in its bylaws for a system to resolve and record complaints.

201.7(1) The complaint system shall provide for the resolution of the following kinds of complaints:

- a.* Complaints about the quality of health care services provided by the ODS.
- b.* Complaints about the availability of health care services.
- c.* Complaints relating to enrollee participation in the operation of the ODS.
- d.* Complaints relating to reimbursement.

201.7(2) An ODS shall submit to the department an annual report in a form prescribed by the department which shall include:

- a.* A description of the procedures of the complaint system.
- b.* The total number of complaints handled through the complaint system and a compilation of reasons underlying the complaints filed in accord with 201.7(1).

c. The number, amount and disposition of malpractice claims settled during the year by the ODS and any of its providers.

641—201.8(135,75GA,ch158) Accountability. Accountability measures shall be in place to ensure access and quality of care. Each ODS shall provide information to the department on measures of quality, access, member satisfaction, membership and utilization, finance, and management. The department shall publish annually, by November 1 of each year, the indicators that will be required for the reporting year in a document that shall be shared with all licensed ODSs as well as all applicants. Indicators shall be based upon nationally recognized, documented standards.

201.8(1) Quality. The department shall establish indicators to measure the quality of care provided by an ODS.

201.8(2) Access. The department shall establish indicators of access to care within an ODS. At least one of the indicators shall be the ratio of primary care providers to enrollees by category of provider.

201.8(3) Member satisfaction. The following shall be reported by the ODS to demonstrate member satisfaction.

- a. Percent of members indicating overall satisfaction with plan from a member survey.
- b. Submission of a copy of the member satisfaction survey used by the ODS.

201.8(4) Membership and utilization. Indicators of utilization shall be established by the department for costs, frequency of procedures, inpatient and outpatient services. Indicators of membership shall include the following:

- a. Member months stratified by age, gender, residence, and purchaser.
- b. Disenrollments by month stratified by age, gender, residence, and purchaser.

201.8(5) Finance. Indicators of financial stability and solvency shall be reported according to the standard established in rules 201.12(135,75GA,ch158) and 201.13(135,75GA,ch158).

201.8(6) Management practices. Management practices shall be described for the following areas:

- a. Credentialing. The ODS shall describe its credentialing process as provided for in 201.6(1).
- b. Points of service. The ODS shall provide information on the location of providers, including primary care providers, specialty providers, and hospitals, as provided for in 201.5(4).
- c. Quality assessment and improvement activities.
- d. Case management.
- e. Risk management.
- f. Community needs assessments.
- g. Relationships with essential community providers.
- h. Efforts to address the needs of underserved populations and geographic areas.

641—201.9(135,75GA,ch158) Reporting.

201.9(1) An ODS shall, as part of the application for licensure, submit documentation of ability to comply or plans to achieve compliance with the reporting of the accountability requirements.

201.9(2) Narrative information shall be submitted in report format as specified by the department. Until such time that the data for the calculation of the indicators is available from the Community Health Management Information System (CHMIS), the ODS shall submit the calculated indicator, including documentation of the numerator and denominator used, to the department.

201.9(3) Reports shall be based upon calendar year information. Narrative information shall be submitted within 90 days of the close of the reporting period. Indicator reports shall be submitted within 45 days of the end of each quarter.

201.9(4) The department or its subcontractor shall have the right to validate reports, including record review and site visits. Reasonable costs related to this review shall be the responsibility of the ODS.

641—201.10(135,75GA,ch158) Evaluation. The department shall adopt nationally recognized benchmarks for indicators of quality and access. The department shall seek input and advice from the provider community on the indicators and benchmarks. These benchmarks will include minimum performance standards for identifying ODSs with deficit performance. The department shall establish

criteria for issuing provisional licenses and corrective plans of action. Evaluation criteria shall be published annually with the indicators and shall be based upon established criteria. Utilization, member satisfaction, and management information shall be reported as submitted without established benchmarks.

641—201.11(135,75GA,ch158) Annual report. The department shall publish annually a report comparing all ODSs licensed in the state on all information contained in 201.8(135,75GA,ch158). The report shall also include comparisons by geographic area.

641—201.12(135,75GA,ch158) Finance and solvency. Solvency oversight shall be conducted by the division of insurance under an agreement with the department with examination fees paid as provided for in 201.3(135,75GA,ch158). For purposes of finance and solvency, including investments as detailed in 201.13(135,75GA,ch158), the ODS submits to the jurisdiction of the insurance division.

201.12(1) Accounting system. Statutory accounting principles shall apply to ODSs to ensure the accurate and complete reporting of financial information. Any premium or assessment amount that is not paid within three months of the due date shall be assumed uncollectible for financial statement purposes and in considering the amount of assessments and dividends.

201.12(2) Unencumbered funds. ODSs shall maintain at all times unencumbered funds that are the greater of:

- a. \$1 million; or
- b. Three times its average monthly claims for third-party providers. Average monthly expenditure is defined as liabilities incurred, including those which are outstanding. In addition to the requirements set forth above, the required unencumbered funds may be increased when, in the insurance commissioner's judgment, it is necessary to do so to protect the enrollees of the ODS.

201.12(3) Bond requirement. ODSs shall obtain a surety bond designating the commissioner of insurance as beneficiary in the event of the insolvency of the ODS in the amount and form acceptable to the commissioner of insurance.

201.12(4) Financially impaired or insolvent ODSs. The provisions of Iowa Code chapter 507C shall apply to ODSs, which shall be considered insurers for the purposes of chapter 507C. All HMOs and ODSs in the state operating within the service area of the ODS will provide a 30-day open enrollment in the event of insolvency of the ODS with no underwriting or preexisting conditions imposed. The open enrollment plan shall be actuarially equivalent to the standard benefit plan adopted by the small group reinsurance board.

201.12(5) Examination. The commissioner of insurance shall make an examination of the affairs of any ODS and its providers as often as the commissioner deems necessary for the protection of the interests of the residents of Iowa, but not less frequently than once every five years. Iowa Code chapter 507 shall be applicable to the examination of ODSs. The expense of such examination shall be assessed against the ODS in the same manner that insurers are assessed for examinations pursuant to chapter 507. ODS providers shall agree to fully cooperate with the insurance commissioner in providing access to books and records necessary for the commissioner to perform the examination process.

201.12(6) Annual financial statement. An ODS shall annually, on or before March 1 of each year, file with the commissioner of insurance an annual financial statement, covering the preceding calendar year, in a form prescribed by the commissioner. Such statement shall be verified by at least two of the ODS's principal officers. The ODS shall also file at this time an independent actuarial opinion certifying the adequacy of the ODS unencumbered funds. The commissioner may also request quarterly filings.

641—201.13(135,75GA,ch158) Investment.

201.13(1) All ODS assets, including unencumbered funds referenced in subrule 201.12(2), shall be invested only in securities or other investments as follows:

- a. All investments made pursuant to this subrule shall have investment qualities and characteristics such that the speculative elements are not predominant.

b. Financial terms relating to an ODS have the meanings assigned to them under statutory accounting methods.

c. Investments shall be valued in accordance with the valuation procedures established by the National Association of Insurance Commissioners, unless the commissioner requires or finds another method of valuation reasonable under the circumstances.

d. If an investment qualifies under more than one subrule, the ODS may elect to hold the investment under the subrule of its choice.

201.13(2) An ODS's investments shall be held in its own name or the name of its nominee, except as follows:

a. Investments may be held in the name of a clearing corporation or of a custodian bank or in the name of the nominee of either on the following conditions:

(1) The clearing corporation, custodian bank, or nominee must be legally authorized to hold the particular investment for the account of others.

(2) When the investment is evidenced by a certificate and held in the name of a custodian bank or the nominee of a custodian bank, a written agreement shall provide that certificates so deposited shall at all times be kept separate and apart from other deposits with the depository, so that at all times they may be identified as belonging solely to the ODS making the deposit.

(3) If a clearing corporation is to act as depository, the investment may be merged or held in bulk in the name of the clearing corporation or its nominee with other investments deposited with the clearing corporation by any other person, if a written agreement between the clearing corporation and the ODS provides that adequate evidence of the deposit is to be obtained and retained by the ODS or a custodian bank.

b. An ODS may loan stocks or obligations held by it under this rule to a broker-dealer registered under the federal Securities Exchange Act of 1934 or to a member bank. The loan must be evidenced by a written agreement which provides all of the following:

(1) That the loan shall be fully collateralized by cash or obligations issued or guaranteed by the United States or any agency or an instrumentality of the United States and that the collateral shall be adjusted as necessary each business day during the term of the loan to maintain the required collateralization in the event of market value changes in the loaned securities or collateral.

(2) That the loan may be terminated by the ODS at any time and that the borrower shall return the loaned stocks or obligations within five business days after termination.

(3) That the ODS shall have the right to retain the collateral or use the collateral to purchase investments equivalent to the loaned securities if the borrower defaults under the terms of the agreement and that the borrower shall remain liable for any losses and expenses incurred by the association due to default that are not covered by the collateral.

c. An ODS may participate through a member bank in the United States federal reserve book entry system, and the records of the member bank shall at all times show that the investments are held for the ODS or for specific accounts of the ODS.

d. An investment may consist of an individual interest in a pool of obligations or a fractional interest in a single obligation if the certificate of participation or interest or the confirmation of participation or interest in the investment is issued in the name of the ODS, the name of the custodian bank, or the nominee of either, and, if the interest as evidenced by the certificate or confirmation is, if held by a custodian bank, kept separate and apart from the investments of others so that at all times the participation may be identified as belonging solely to the ODS making the investment.

e. Transfers of ownership of investments held as described in subparagraph 201.13(2) "a"(3) and paragraphs 201.13(2) "c" and "d" may be evidenced by bookkeeping entry on the books of the issuer of the investment, its transfer or recording agent, or the clearing corporation without physical delivery of a certificate evidencing the ODS's investment.

201.13(3) Except as provided in paragraph 201.13(2) "e," if an investment is not evidenced by a certificate, adequate evidence of the ODS's investment shall be obtained from the issuer or its transfer or recording agent and retained by the ODS, a custodian bank, or clearing corporation. Adequate evidence,

for purposes of this subrule, means a written receipt or other verification issued by the depository or issuer or a custodian bank which shows that the investment is held for the ODS.

201.13(4) Except as otherwise permitted by this rule, an ODS licensed under this chapter shall only invest in the following:

a. United States government obligations. Obligations issued or guaranteed by the United States or an agency or instrumentality of the United States.

b. Certain development bank obligations. Obligations issued or guaranteed by the international bank for reconstruction and development, the Asian development bank, the inter-American development bank, the export-import bank, the world bank, or any United States government-sponsored organization of which the United States is a member, if the principal and interest is payable in United States dollars. An ODS shall not invest more than 5 percent of its total admitted assets in the obligations of any one of these banks or organizations and shall not invest more than a total of 10 percent of its total admitted assets in the obligations authorized by this subrule.

c. State obligations. Obligations issued or guaranteed by a state, a political subdivision of a state, or an instrumentality of a state.

d. Canadian government obligations. Obligations issued or guaranteed by Canada, by an agency or province of Canada, by a political subdivision of such province, or by an instrumentality of any of those provinces or political subdivisions.

e. Corporate and business trust obligations. Obligations issued, assumed, or guaranteed by a corporation or business trust organized under the laws of the United States or a state, or the laws of Canada or a province of Canada, provided that a company shall not invest more than 5 percent of its admitted assets in the obligations of any one corporation or business trust. Investments shall be made only in investment grade bonds.

f. Stocks. Common stocks, common stock equivalents, mutual fund shares securities convertible into common stocks or common stock equivalents, or preferred stocks issued or guaranteed by a corporation incorporated under the laws of the United States or a state, or the laws of Canada or a province of Canada. Aggregate investments in non-dividend-paying stocks shall not exceed 5 percent of unencumbered funds.

(1) Stocks purchased under this lettered paragraph shall not exceed 50 percent of unencumbered funds. With the approval of the commissioner of insurance, an ODS may invest any amount in common stocks, preferred stocks, or other securities of one or more subsidiaries provided that after such investments the insurer's surplus as regards policyholders will be reasonable in relation to the insurer's outstanding liabilities and adequate to its financial needs.

(2) An ODS shall not invest more than 10 percent of its unencumbered funds in the stocks of any one corporation.

g. Home office real estate. Funds may be invested in a home office building, at the direction of the board of directors and with the prior approval of the commissioner of insurance. An ODS shall not invest more than 25 percent of its total admitted assets in such real estate. With the prior approval of the commissioner, an ODS may exceed the real estate investment limitation to effectuate a merger with, or the acquisition of, another ODS.

641—201.14(135,75GA,ch158) Rating practices. An ODS shall use the rate restrictions and regulations applicable to each market segment. All form filings shall include an actuarial certification by a fellow in the society of actuaries (FSA) attesting to the adequacy and fairness of the rates.

641—201.15(135,75GA,ch158) Name. No name other than that certified by the department may be used. The name of an ODS or AHP must clearly identify the entity as an ODS or AHP and all literature published by the ODS or AHP must identify its status as an ODS or AHP.

641—201.16(135,75GA,ch158) Change in organizational documents or control.

201.16(1) Changes to bylaws, articles of incorporation and any other document that would affect the operation and governance of the ODS shall be filed with the department at least 30 days prior to their proposed implementation date.

201.16(2) An ODS which desires to transfer ownership or control of more than 10 percent of ownership interest in the ODS shall not do so without first submitting a proposed plan to the department for review.

641—201.17(135,75GA,ch158) Appeal. A decision by the department to deny an application for licensure as an ODS may be appealed following the procedures in 641—Chapter 173.

641—201.18(135,78GA,ch41) External review. This rule is intended to implement the provisions of 1999 Iowa Acts, chapter 41, to provide a uniform process for enrollees of organized delivery systems to appeal a final adverse coverage decision based on medical necessity. This rule applies to any ODS that issues health plans or policies delivered in the state of Iowa. At the time of a coverage decision, an organized delivery system shall notify the enrollee in writing of the right to have the coverage decision reviewed under the external review process established pursuant to 1999 Iowa Acts, chapter 41, by the division of insurance. The request for an external review shall meet the requirements of the commissioner contained at 191—Chapter 76.

641—201.19 Reserved.

ANTITRUST

641—201.20(135,75GA,ch158) Purpose. The Iowa legislature has determined that the goals of controlling health care costs and improving the quality of and access to health care services will be significantly enhanced by cooperative arrangements involving providers wishing to become an ODS that might be prohibited by state and federal antitrust law if undertaken without governmental involvement. The purpose of the following rules is to institute new public policy by creating an opportunity for the state to review proposed arrangements and to substitute regulation for competition when an arrangement is likely to result in lower costs, or greater access or quality, than would otherwise occur in the marketplace. It is the intent that approval of arrangements be accompanied by appropriate conditions, supervision, and regulation to protect against private abuses of economic power, and that an arrangement approved by the department and accompanied by such appropriate conditions, supervision, and regulation shall not be subject to state and federal antitrust liability. It is the further intent that any immunity from scrutiny under federal or state antitrust statutes offered under these exceptions shall be limited to such specific agreements as are approved by the department, and shall not be extended or applied to unforeseen circumstances, parties, acts, or other agreements which were not part of or contemplated by the approved agreement.

641—201.21(135,75GA,ch158) Definitions.

“Access” means the financial, temporal, and geographic availability of health care to individuals who need it.

“Applicant” means the party or parties to an agreement or business arrangement for which the department’s approval is sought under this provision.

“Certificate of public advantage” means the sanction by and protection of the department of public health of an operating arrangement which otherwise might be excepted under certain antitrust regulations.

“Cost” or *“cost of health care”* means the amount paid by consumers or third-party payers for health care services or products.

“Criteria” means the cost, access, and quality of health care.

“Department” means the department of public health.

“Person” means an individual or legal entity.

641—201.22(135,75GA,ch158) Scope.

201.22(1) *Certificate of public advantage.* Providers or purchasers wishing to engage in contracts, business or financial arrangement, or other activities, practices, or arrangements that might be construed to be violations of state or federal antitrust laws but which are in the best interests of the state and further the policies and goals of this provision may apply to the department for a certificate of public advantage.

201.22(2) *Immunity regarding negotiation.* Directors, trustees, or other representatives of a health care provider or third-party payer who participate in discussion or negotiation culminating in any arrangement as described in subrule 201.22(1) are immune from civil actions or criminal prosecution for a violation of state or federal antitrust laws, unless the discussion or negotiation exceeds the scope authorized in this subrule.

201.22(3) *Disputes among the parties.* Any dispute among the parties to an arrangement as described in subrule 201.22(1) concerning the meaning or terms of their agreement is governed by normal principles of contract law.

201.22(4) *Department approval.* Approval by the department is an absolute defense against any action under state and federal antitrust laws, except as provided under subrule 201.30(5).

201.22(5) *Application cannot be used to impose liability.* The department shall ask the attorney general to comment on an application. The application and any information obtained by the department under rules 201.23(135,75GA,ch158) through 201.25(135,75GA,ch158) that is not otherwise available is not admissible in any civil or criminal proceeding brought by the attorney general or any other person based on an antitrust claim, except (a) a proceeding brought under subrule 201.30(5), based on an applicant's failure to substantially comply with the terms of the application; or (b) a proceeding based on actions taken by the applicant prior to submitting the application, where such actions are admitted to in the application.

201.22(6) *Out-of-state applicant.* Providers or purchasers not physically located in Iowa are eligible to seek a certificate of public advantage for an arrangement in which they transact business in Iowa.

641—201.23(135,75GA,ch158) Application.

201.23(1) *Disclosure.* An application for approval must include, to the extent applicable, disclosure of the following:

- a. A descriptive title;
- b. A table of contents;
- c. Exact names of each party to the application and the address of the principal business office of each party;
- d. The name, address, and telephone number of the persons authorized to receive notices and communications with respect to the application;
- e. A verified statement by a responsible officer of each party to the application attesting to the accuracy and completeness of the enclosed information;
- f. Background information relating to the proposed arrangement, including:
 - (1) A description of the proposed arrangement, including a list of any services or products that are the subject of the proposed arrangement;
 - (2) An identification of any tangential services or products associated with the services or products that are the subject of the proposed arrangement;
 - (3) A description of the geographic territory involved in the proposed arrangement;
 - (4) If the geographic territory described in subparagraph 201.23(1) "f"(3) is different from the territory in which the applicants have engaged in the type of business at issue over the last five years, a description of how and why the geographic territory differs;
 - (5) Identification of all products or services that a substantial share of consumers would consider substitutes for any service or product that is the subject of the proposed arrangement;
 - (6) Identification of whether any services or products of the proposed arrangement are currently being offered, capable of being offered, utilized, or capable of being utilized by other providers or purchasers in the geographic territory described in subparagraph 201.23(1) "f"(3);

- (7) Identification of the steps necessary, under current market and regulatory conditions, for other parties to enter the territory described in subparagraph 201.23(1) “f”(3) and compete with the applicant;
- (8) A description of the previous history of dealings between the parties to the application;
- (9) A detailed explanation of the projected effects, including expected volume, change in price, and increased revenue, of the arrangement on each party’s current businesses, both generally as well as the aspects of the business directly involved in the proposed arrangement;
- (10) The present market share of the parties to the application and of others affected by the proposed arrangement, and projected market shares after implementation of the proposed arrangement; and
- (11) A statement of why the projected levels of cost, access, or quality could not be achieved in the existing market without the proposed arrangement.

g. A detailed explanation of how the transaction will affect cost, access, and quality. The explanation must address the factors in paragraphs 201.26(2) “b” to “d” to the extent applicable.

201.23(2) *Administrative bulletin notice.* In addition to the disclosures required in subrule 201.23(1), the application must contain a written description of the proposed arrangement for purposes of publication in the Iowa Administrative Bulletin. The notice must include sufficient information to advise the public of the nature of the proposed arrangement and to enable the public to provide meaningful comments concerning the expected results of the arrangement. The notice must also state that any person may provide written comments to the department, with a copy to the applicant, within 20 days of the notice’s publication. The department shall approve the notice before publication. If the department determines that the submitted notice does not provide sufficient information, the department may amend the notice before publication and may consult with the applicant in preparing the amended notice. The department shall not publish an amended notice without the applicant’s approval.

201.23(3) *Multiple parties to proposed arrangement.* For a proposed arrangement involving multiple parties, one joint application shall be submitted on behalf of all parties to the arrangement.

201.23(4) *Department’s authority to refuse to review.*

a. If the department determines that an application is unclear, incomplete, or provides an insufficient basis on which to base a decision, the department may return the application. The applicant may complete or revise the application and resubmit it.

b. If, upon review of the application and upon advice from the attorney general, the department concludes that the proposed arrangement does not present any potential for liability under the state or federal antitrust laws, the department may decline to review the application, and so notify the applicant.

c. The department may decline to review any application relating to arrangements already in effect before the submission of the application. However, the department shall review any application if the review is expressly provided for in a settlement agreement entered into by the applicant and the attorney general before the enactment of these rules.

201.23(5) *Department’s authority to extend time limit.* Upon the showing of good cause, the department may extend any of the time limits stated in rules 201.23(135,75GA,ch158) and 201.24(135,75GA,ch158) at the request of the applicant or another person.

641—201.24(135,75GA,ch158) Notice and comment.

201.24(1) *Notice.* The department shall cause the notice described in subrule 201.23(2) to be published in the Iowa Administrative Bulletin and sent to any person who has requested to be placed on a list to receive notice of applications. The department may maintain separate notice lists for different regions of the state. The department may also send a copy of the notice to any person together with a request that the person comment as provided under subrule 201.24(2). Copies of the request must be provided to the applicant.

201.24(2) *Comments.* Within 20 days after the notice is published, any person may mail to the department written comments with respect to the application. Persons submitting comments shall provide a copy of the comments to the applicant. The applicant may mail to the department written responses to any comments within 10 days after the deadline for mailing such comments. The applicant shall send a copy of the response to the person submitting the comment.

641—201.25(135,75GA,ch158) Procedure for review of applications.

201.25(1) Choice of procedures. After the conclusion of the period provided in subrule 201.24(2) for the applicant to respond to comments, the department shall select one of the two procedures provided in subrule 201.25(2). In determining which procedure to use, the department shall consider the following criteria:

- a. The size of the proposed arrangement, in terms of number of parties and amount of money involved;
- b. The complexity of the proposed arrangement;
- c. The novelty of the proposed arrangement;
- d. The substance and quantity of the comments received; and
- e. The presence or absence of any significant gaps in the factual record.

If the applicant demands a contested case hearing no later than the conclusion of the period provided in subrule 201.24(2) for the applicant to respond to comments, the department shall not select a procedure. Instead, the applicant shall be given a contested case proceeding as a matter of right.

201.25(2) Procedures available.

a. *Decision on the written record.* The department may issue a decision based on the application, the comments and the applicant's responses to the comments, to the extent each is relevant. In making the decision, the department may consult with the attorney general or the staff of the department and may rely on department data.

b. *Contested case hearing.* The department may order a contested case hearing. A contested case hearing shall be heard before an administrative law judge who shall issue a written recommendation to the department and shall follow the procedures in 641—Chapter 173. All factual issues relevant to a decision must be presented in the contested case. The attorney general may appear as a party. The record in the contested case shall include the application, the comments, the applicant's response to the comments, and any other evidence that is part of the record under 641—Chapter 173.

641—201.26(135,75GA,ch158) Criteria for decision.

201.26(1) The department shall not approve an application unless the department determines that the arrangement is more likely to result in lower costs, increased access, or increased quality of health care, than would otherwise occur under existing market condition or conditions likely to develop without an exemption from state and federal antitrust law. In the event that a proposed arrangement appears likely to improve one or two of the criteria at the expense of another one or two of the criteria, the department shall not approve the application unless the department determines that the proposed arrangement, taken as a whole, is likely to substantially further the purpose of this chapter. In making such a determination, the department may employ a cost/benefit analysis.

201.26(2) Factors.

a. *Generally applicable factors.* In making a determination about cost, access, and quality, the department may consider the following factors, to the extent relevant:

- (1) Market structure: actual and potential sellers and buyers, or providers and purchasers; actual and potential consumers; geographic market area; and entry conditions;
- (2) Current market condition;
- (3) The historical behavior of the market;
- (4) Performance of other similar arrangements;
- (5) Whether the proposal unnecessarily restrains competition, or restrains competition in ways not reasonably related to the purposes of this chapter; and
- (6) The financial condition of the applicant.

b. *Cost.* The department's analysis of cost must focus on the individual consumer of health care. Cost savings to be realized by providers, health carriers, group purchasers, or other participants in the health care system are relevant only to the extent that the savings are likely to be passed on to the consumer. However, where an application is submitted by providers or purchasers who are paid primarily by third-party payers unaffiliated with the applicant, it is sufficient for the applicant to show that cost savings are likely to be passed on to the unaffiliated third-party payers; the applicants do not have the

burden of proving that third-party payers with whom the applicants are not affiliated will pass on cost savings to individuals receiving coverage through the third-party payers. In making determinations as to costs, the department may consider:

- (1) The cost savings likely to result to the applicant;
- (2) The extent to which the cost savings are likely to be passed on to the consumer and in what form;
- (3) The extent to which the proposed arrangement is likely to result in cost-shifting by the applicant onto other payers or purchasers of other products or services;
- (4) The extent to which the cost-shifting by the applicant is likely to be followed by other persons in the market;
- (5) The current and anticipated supply and demand for any products or services at issue;
- (6) The representations and guarantees of the applicant, and their enforceability;
- (7) Likely effectiveness of regulation by the department;
- (8) Inferences to be drawn from market structure;
- (9) The cost of regulation, both for the state and for the applicant; and
- (10) Any other factors tending to show that the proposed arrangement is or is not likely to reduce cost.

c. *Access.* In making determinations as to access, the department may consider:

- (1) The extent to which the utilization of needed health care services or products by the intended targeted population is likely to increase or decrease. When a proposed arrangement is likely to increase access in one geographic area, by lowering prices or otherwise expanding supply, but limits access in another geographic area by removing service capabilities from that second area, the department shall articulate the criteria employed to balance these effects;
- (2) The extent to which the proposed arrangement is likely to make available a new and needed service or product to a certain geographic area; and
- (3) The extent to which the proposed arrangement is likely to otherwise make health care services or products more financially or geographically available to persons who need them.

If the department determines that the proposed arrangement is likely to increase access and bases that determination on a projected increase in utilization, the department shall also determine and make a specific finding that the increased utilization does not reflect overutilization.

d. *Quality.* In making determinations as to quality, the department may consider the extent to which the proposed arrangement is likely to:

- (1) Decrease morbidity and mortality;
- (2) Result in faster convalescence;
- (3) Result in fewer hospital days;
- (4) Permit providers to attain needed experience or frequency of treatment likely to lead to better outcomes;
- (5) Increase patient satisfaction; and
- (6) Have any other features likely to improve or reduce the quality of health care.

641—201.27(135,75GA,ch158) Decision.

201.27(1) Approval or disapproval. The department shall issue a written decision approving or disapproving the application within 45 days after receipt of the application or, in the case of a contested hearing, within 10 days of receipt of the administrative law judge's recommendation. The department may condition approval on a modification of all or part of the proposed arrangement to eliminate any restriction on competition that is not reasonably related to the goals of reducing cost or improving access or quality. The department may also establish conditions for approval that are reasonably necessary to protect against abuses of private economic power and to ensure that the arrangement is appropriately supervised and regulated by the state.

201.27(2) Findings of fact. The department's decision shall make specific findings of fact concerning the cost, access, and quality criteria, and identify one or more of those criteria as the basis for the decision.

201.27(3) *Data for supervision.* A decision approving an application shall require the periodic submission of specific data relating to cost, access, and quality, and to the extent feasible, identify objective standards of cost, access, and quality by which the success of the arrangement will be measured. However, if the department determines that the scope of a particular proposed arrangement is such that the arrangement is certain to have neither a positive nor negative impact on one or two of the criteria, the department's decision need not require the submission of data or establish an objective standard relating to those criteria.

641—201.28(135,75GA,ch158) Appeal. After the department has rendered a decision, the applicant or any other person aggrieved may appeal the decision to the district court within 30 days after receipt of the department's decision. The appeal is governed by Iowa Code chapter 17A. The department's determination, under subrule 201.25(1), of which procedure to use may not be raised as an issue on appeal.

641—201.29(135,75GA,ch158) Supervision after approval.

201.29(1) *Active supervision.* The department shall actively supervise, monitor, and regulate approved arrangements, as described below.

201.29(2) *Procedures.* The department shall review data submitted periodically by the applicant. The department's order shall set forth the time schedule for the submission of data, which shall be at least once a year. The department's order must identify the data that must be submitted, although the department may subsequently require the submission of additional data or alter the time schedule. Upon review of the data submitted, the department shall notify the applicant of whether the arrangement is in compliance with the department's order. If the arrangement is not in compliance with the department's order, the department shall identify those respects in which the arrangement does not conform to the department's order.

An applicant receiving notification that an arrangement is not in compliance has 30 days in which to respond with additional data. The response may include a proposal and a time schedule by which the applicant shall bring the arrangement into compliance with the department's order. If the arrangement is not in compliance and the department and the applicant cannot agree to the terms of bringing the arrangement into compliance, the matter shall be set for a contested case hearing.

The department shall publish notice in the Iowa Administrative Bulletin two years after the date of an order approving an application, and at two-year intervals thereafter, soliciting comments from the public concerning the impact that the arrangement has had on cost, access, and quality. The department may request additional oral and written information from the applicant or from any other source.

641—201.30(135,75GA,ch158) Revocation.

201.30(1) *Conditions.* The department may revoke a certificate of public advantage only if:

- a. The arrangement is not in substantial compliance with the terms of the application;
- b. The arrangement is not in substantial compliance with the conditions of approval;
- c. The arrangement is not in substantial compliance with 641—Chapter 201;
- d. The arrangement has not and is not likely to substantially achieve the improvements in cost, access, or quality identified in the approval order as the basis for the department's approval of the arrangement; or
- e. The conditions in the marketplace have changed to such an extent that competition would promote reductions in cost and improvements in access and quality better than does the arrangement at issue. In order to revoke on the basis that conditions in the marketplace have changed, the department's order shall identify specific changes in the marketplace and articulate why those changes warrant revocation.

201.30(2) *Notice.* The department shall begin a proceeding to revoke approval by providing written notice to the applicant describing in detail the basis for the proposed revocation. Notice of the proceeding shall be published in the Iowa Administrative Bulletin. The notice shall invite the submission of written

comments to the department, with a copy to the applicant. Comments must be received by the department within 20 days of the publication of the notice.

201.30(3) Procedure. A proceeding to revoke an approval shall be conducted as a contested case proceeding upon the written request of the applicant. Contested cases regarding revocations shall be heard by an administrative law judge who shall issue a written recommendation to the department and shall follow the procedures in 641—Chapter 5. Decisions of the department in a proceeding to revoke approval are subject to judicial review under Iowa Code chapter 17A.

201.30(4) Alternatives to revocation preferred. In deciding whether to revoke an approval, the department shall take into account the hardship that the revocation may impose on the applicant and any potential disruption of the market as a whole. The department shall not revoke an approval if the arrangement can be modified, restructured, or regulated so as to remedy the problem upon which the revocation proceeding is based. The applicant may submit proposals for alternatives to revocation. Before approving an alternative to revocation that involves modifying or restructuring an arrangement, the department shall publish notice in the Iowa Administrative Bulletin that any person may comment on the proposed modification or restructuring within 20 days after publication of the notice. The department shall not approve the modification or restructuring until the comment period has concluded. An approved, modified, or restructured arrangement shall be subject to appropriate supervision under rule 201.29(135,75GA,ch158).

201.30(5) Impact of revocation. An applicant that has had its approval revoked is not required to terminate the arrangement. The applicant cannot be held liable under state or federal antitrust law for acts that occurred while the approval was in effect, except to the extent that the applicant failed to substantially comply with the terms of the approval. The applicant is fully subject to state and federal antitrust law after the revocation becomes effective and may be held liable for acts that occur after the revocation.

These rules are intended to implement 1993 Iowa Acts, chapter 158, section 3.

CHAPTER 202
 CERTIFICATE OF NEED PROGRAM
 [Prior to 7/29/87, Health Department[470] Ch 202]

641—202.1(135) Definitions.

202.1(1) “Any expenditure in excess of five hundred thousand dollars” as defined in Iowa Code section 135.61(18) “e” means new capital expenditures and new personnel necessary to operate the service for a year.

202.1(2) “Any mobile health service with a value in excess of one million five hundred thousand dollars” as defined in Iowa Code section 135.61(18) “l” means the value of all equipment used to provide the service, including the trailer. The party providing the equipment shall be the applicant regardless of the location of that party.

202.1(3) “Appropriate geographic service area” as the term applies to defining affected persons in Iowa Code section 135.61(1) “c” shall be defined as follows:

a. For applications regarding hospitals, hospitals located in the same county and in Iowa counties contiguous to the county wherein the applicant hospital’s proposed project will be located.

b. For applications regarding nursing facilities, other nursing facilities located in the same county and in Iowa counties contiguous to the county wherein the applicant’s proposed nursing facility will be located.

c. For applications sponsored by other than the above-mentioned hospitals or health facilities, notice shall be sent to those providers within the same county who offer similar service or might logically be viewed as potential providers of such service.

202.1(4) “Bed capacity.”

a. Designed bed capacity means the number of beds the facility was originally designed for in architectural plans.

b. Usable bed capacity means the number of beds available for patient care excluding that portion of the “designed capacity” which cannot be used as an inpatient bed area by adding staff or movable equipment. For purposes of Iowa Code section 135.61(18) “d,” usable beds will be the bed capacity against which a permanent change is measured. Determination of the usable beds shall be made by the department as a result of the facility’s submitting a number to the department in its annual report for hospitals and related facilities. Usable beds will be categorized in the following ways:

Acute	Long-Term
Medical/surgical	Nursing care (NF)
ICU	Intermediate care/mental retardation (ICF/MR)
CCU	Skilled nursing care (SNF)
Pediatric	
Obstetric	
Psychiatric	
Rehabilitation	
Neonatal intensive care	
Substance abuse	

c. Long-term care bed capacity is defined as a facility’s licensed bed capacity.

202.1(5) “Consumer” as defined in Iowa Code section 135.61(4) shall be applicable to members of the individual’s household.

202.1(6) “Consumers served by a new institutional health service” means those consumers residing in the service area as determined by the department.

202.1(7) “Organized outpatient health facility” as defined in Iowa Code section 135.61(20) shall include, but not be limited to, the following types of facilities:

a. Community mental health centers;

b. Comprehensive outpatient rehabilitation facilities (CORFs), certified by Medicare.

202.1(8) “Organ transplantation service” as the term applies to new or changed institutional health service in Iowa Code section 135.61(18) “*m*”(3) means each type of organ transplant shall be considered separately.

202.1(9) “Permanent change in bed capacity” of an institutional health facility means a change which is intended to be effective for one year or more and which redistributes the beds among the categories listed in the definition of “Bed capacity.”

a. A conversion of a long-term acute care hospital or a rehabilitation hospital as defined by federal regulations to a general acute care hospital or to a different type of specialty hospital is a permanent change in bed capacity and requires a Certificate of Need.

b. A hospital which has deleted beds pursuant to Iowa Code section 135.63(2) “*g*” for the purpose of receiving designation as a critical access hospital may reestablish the deleted beds at a later time without obtaining a certificate of need, provided that the number of beds reestablished does not exceed the number of beds maintained prior to the deletion as reported on the bed reduction form.

202.1(10) “Private offices or clinics of individual physicians, dentists or other practitioners, or groups of practitioners, who are health care providers.” The meaning of this term as used in Iowa Code section 135.63(2) “*a*” shall be determined by looking at factors which include, but are not limited to:

a. The type of health care service delivered;

b. The control and supervision of medical judgment in the care of and treatment of patients;

c. The control and supervision of professional assistants, including nurses, physician assistants, and technicians; and

d. The ownership and maintenance of medical records of patients.

202.1(11) “Relocation of an institutional health facility,” as the term applies to new or changed institutional health service in Iowa Code section 135.61(18) “*b*,” means the replacement of a facility located in one county with a facility located in another county.

202.1(12) “Value in excess of one million five hundred thousand dollars” as used in Iowa Code section 135.61(18) “*g*,” “*h*,” “*i*” and “*j*” means the value of the equipment including any applicable sales tax, delivery charge and installation charge.

202.1(13) “Long-term (acute) care hospital,” for purposes of these rules, means a hospital that has been approved to participate in the Title XVIII (Medicare) program as a long-term care hospital-prospective payment system hospital (LTCH-PPS) in accordance with 42 CFR Part 412.

202.1(14) “Rehabilitation hospital,” for the purposes of these rules, means a hospital that has been approved to participate in the Title XVIII (Medicare) program as an inpatient rehabilitation facility-prospective payment system hospital (IRF-PPS) in accordance with 42 CFR Part 412.23(b), 412.25 or 412.29.

641—202.2(135) Letter of intent.

202.2(1) Before applying for a certificate of need, the sponsor of a proposed new institutional health service or changed institutional health service shall submit a letter of intent to the department. The letter of intent shall contain the following:

1. A brief description of the proposal;

2. Project’s location;

3. Its estimated cost (site costs, land improvements, facility costs, movable equipment and financing costs); and

4. An explanation of how the project will be financed.

202.2(2) The letter shall be submitted as soon as possible after the initiation of the applicant’s planning process and in any case not less than 30 calendar days before applying for a certificate of need and before substantial expenditures are made. This 30-day waiting period shall begin upon the department’s receipt of the applicant’s letter of intent.

202.2(3) The department shall make available to each applicant any and all criteria and standards which are pertinent to a particular application. This shall be done within 15 calendar days of receipt of a letter of intent or upon request.

202.2(4) A letter of intent received by the department shall be valid for a period of one year from the date of receipt by the department. The sponsor may renew the validity of a letter of intent by providing written notification to the department prior to the one-year expiration date.

641—202.3(135) Preliminary review.

202.3(1) Upon receipt of a written request from the sponsor of the proposal, the department shall make a preliminary review of the letter of intent for the purpose of:

- a.* Determining if a proposed project requires a certificate of need under Iowa Code sections 135.61 to 135.83; and
- b.* Informing the sponsor of the project of any factors which may appear likely to result in denial of a certificate of need based on the criteria for evaluation in Iowa Code section 135.64.

202.3(2) The health services listed in Iowa Code section 135.61(18) “*m*” shall be deemed to require a certificate of need for the initiation or expansion of these services.

202.3(3) The department shall provide to the sponsor written comment within 15 calendar days of receipt of such request for preliminary review. A written comment by the department is not binding on the council.

641—202.4(135) Submission of application.

202.4(1) Application form.

a. The statement of information required by the department for purposes of review shall be the information requested on the department’s application form. All information requested in the application form will be required in the absence of a written waiver by the department.

b. An original application and six copies thereof shall be sent to the Certificate of Need Program, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075.

c. The department shall establish and maintain files on each application.

202.4(2) Application fee.

a. The application shall be accompanied by a fee equivalent to three-tenths of 1 percent of the anticipated cost of the project. There shall be a minimum fee of \$600 and a maximum fee of \$21,000.

b. The fee shall be based on the total cost of the project which shall include site costs, land improvements, facility costs, movable equipment and financing costs. Fee for leased or donated new institutional health services would be calculated in the same manner as if the new institutional health services were purchased. Financing costs shall not be applicable on leases or cash purchases.

c. The fee shall be remitted by check or money order made payable to the Treasurer, State of Iowa, and addressed to Iowa Department of Public Health—Certificate of Need, Lucas State Office Building, Des Moines, Iowa 50319-0075.

d. The application fee will be refunded by the department for any application which is voluntarily withdrawn from the review process in the following amounts:

- (1) If an application is voluntarily withdrawn within 30 calendar days after submission, 75 percent of the fee shall be refunded;
- (2) If an application is voluntarily withdrawn more than 30 but within 60 calendar days after submission, 50 percent of the fee shall be refunded;
- (3) If an application is withdrawn voluntarily more than 60 calendar days after submission, 25 percent of the application fee shall be refunded.

e. The department shall refund the proper amount within 30 calendar days of the applicant’s voluntary withdrawal.

f. An applicant for a new or changed institutional health service offered or developed by an intermediate care facility for the mentally retarded or the mentally ill is exempt from payment of the application fee.

g. For purposes of this subrule and Iowa Code section 135.63(1), the term “submission” shall mean the day the application is received by the department.

202.4(3) Determination of completeness.

a. The department shall send written notice to the applicant within 15 business days of receipt of the application if the application has been accepted as complete or otherwise state in said notice what information is needed to make the application complete.

b. An application shall be deemed “accepted” once the department has determined it to be complete and the fees defined in 202.4(2) “*a*” are paid in full.

202.4(4) Promptly after an application is accepted, the department shall provide written notification to all affected persons defined in Iowa Code section 135.61(1) “*c*” and “*d*” which are identified in the department’s data banks or by the applicant, as provided in Iowa Code section 135.66(2). The department shall notify other affected persons by distribution of pertinent information to the news media. The notice shall identify deadlines for the submission of written materials as provided in 202.6(2).

202.4(5) Written analysis of application.

a. The department shall provide a written report evaluating the application against all applicable criteria specified in Iowa Code section 135.64.

b. All reports shall be mailed to council members and applicant at least ten calendar days prior to the health facilities’ council meeting at which the application is to be heard.

641—202.5(135) Organizational procedures.

202.5(1) The presence of four members of the council shall constitute a quorum.

202.5(2) The chairperson and all other council members present shall cast votes or abstain, as the case may be, on all council action. No proxy votes shall be allowed.

202.5(3) A vote of a majority of those present shall be necessary to take action on any motion before the council. A tie vote shall mean no action on the motion.

202.5(4) The council shall, at the July meeting of each odd-numbered year, elect a vice-chairperson, who shall perform the duties of the chairperson in the absence of the chairperson, when the chairperson has a conflict of interest or when the chairperson so directs.

202.5(5) A council member shall refrain from participating in an application review process if the member:

- a.* Has a personal bias or prejudice concerning the applicant;
- b.* Has acted as counsel to the applicant or a competitor of the applicant in the same or adjoining county within the past two years;
- c.* Has a financial interest in the outcome of the application process or any other significant personal interest that could be substantially affected by the outcome of the case;
- d.* Has a spouse or relative within the third degree of relationship that (1) is affiliated with or represents the applicant or a competitor of the applicant in the same or adjoining county; (2) has a known financial or significant personal interest which could be substantially affected by the outcome of the application process; or (3) is likely to testify on behalf of the applicant or an affected person at public hearing; or
- e.* Has any other legally sufficient cause to refrain from participating in the application review process.

641—202.6(135) Public hearing on application. Public hearings conducted pursuant to Iowa Code section 135.66(3) “*b*” are not contested cases. Judicial review pursuant to Iowa Code section 17A.19 of final agency decisions under Iowa Code section 135.69 shall be treated as other agency action.

202.6(1) The council shall use the following meeting format:

- a.* Announcement of application under review.
- b.* Presentation of department report.
- c.* Applicant presentation.
- d.* Affected persons’ presentation.
- e.* Applicant’s rebuttal.
- f.* Council discussion, motion and final decision.

202.6(2) The notice of an accepted application issued pursuant to Iowa Code section 135.66(2) shall inform the applicant and affected persons of the deadlines for the submission to the department of

written statements or other materials. Written submissions received by the department after the deadlines established in this notice shall not be considered by the department or the council unless submitted at the public hearing solely to support oral testimony or upon a showing of good cause. Applicants and affected persons shall submit six copies of all written materials.

202.6(3) The applicant, affected persons, or their designated representatives shall be given the opportunity to make oral presentations to the council. Other interested persons may be given the opportunity to make oral presentations to the council.

202.6(4) Oral testimony that simply duplicates material received in writing will not be heard. The applicant and affected persons shall present only one witness for each issue raised unless permission is requested and granted by the chairperson.

202.6(5) All questions to an applicant or affected person presenting oral testimony shall be directed from the council or council staff unless permission is requested and granted by the chairperson. Persons making oral presentations to the council are not expected to be placed under oath.

202.6(6) The council may designate technical consultants or experts to assist in its activities as defined by the council.

641—202.7(135) Summary review. Pursuant to Iowa Code section 135.67, an applicant requesting a summary review shall abide by the following procedures:

202.7(1) If an applicant desires to request a summary review of its application for a certificate of need, it shall submit a written request for summary review, an original application and six copies thereof to the Certificate of Need Program, Iowa Department of Public Health, Lucas State Office Building, Des Moines, Iowa 50319-0075. The applicant is not required to submit a letter of intent pursuant to Iowa Code section 135.65 prior to submitting a written request for a summary review.

202.7(2) The eligibility of an application for summary review pursuant to Iowa Code section 135.67 shall not mandate or require such review. The decision as to whether an application will be reviewed in the summary review process is the department's.

202.7(3) Upon receipt of a written request for summary review, an application, and the fee required by 202.3(2) "a," the department shall notify the applicant in writing within 15 calendar days if the application is complete and if a summary review will be granted.

202.7(4) If an application is deemed incomplete, the department shall state specifically in writing what information is needed to make the application complete.

202.7(5) If the department notifies the applicant that a summary review will not be performed, this decision is binding on the applicant and the application will be entered into the formal review process on the date of written notice that such application will not be reviewed summarily.

202.7(6) A summary review of an application for a certificate of need shall be completed within 60 calendar days of the acceptance of an application by the department.

202.7(7) At any time during the summary review process, an application may be withdrawn without prejudice from the process. The applicant may then submit the application for a formal 90-day review.

641—202.8(135) Extension of review time.

202.8(1) A formal review of an application for a certificate of need pursuant to Iowa Code section 135.66 may be extended by the department on the basis of any of the following criteria:

- a. In order to review competing applications simultaneously;
- b. In the case of technologically innovative equipment, to obtain additional information necessary to evaluate the proposal. The department shall specify in writing such additional information as necessary;
- c. At the request of the applicant;
- d. At the request of at least two members of the state health facilities council in order to allow additional time for deliberation on all evidence present. The council shall specify the time of the delay and the date on which the final decision will be rendered.

202.8(2) An extension by the department made pursuant to subrule 202.8(1) shall in no case be more than 60 calendar days beyond the time a decision is required under Iowa Code section 135.69 unless the applicant and department agree.

202.8(3) Where none of the provisions of 202.8(1) are applicable and where an application will be automatically denied because of the expiration of time required by Iowa Code section 135.69 for the issuance of a written decision by the council, the department shall notify the applicant of the likelihood of an automatic denial and shall ask the applicant to request in writing an extension of the review time. Where an extension is so requested, the application shall be heard at the next regularly scheduled meeting of the council or at any time agreeable to the applicant and the department.

641—202.9(135) Rehearing of certificate of need decision.

202.9(1) The applicant or any affected person who has participated or sought unsuccessfully to participate in the formal review procedure prescribed in Iowa Code section 135.66 may, for good cause shown, file an application for rehearing in writing with the department stating the specific grounds therefor and the relief sought, within 20 calendar days after the date of the issuance of the final decision on an application for certificate of need.

202.9(2) Grounds for rehearing include, but are not limited to:

- a. New significant, relevant information which was unavailable at the date of the hearing;
- b. Significant changes in factors or circumstances relied upon by the council in reaching its decision;
- c. Demonstration that the council has materially failed to follow its adopted procedures in reaching its decision; or
- d. Such other bases as the council determines constitute good cause.

202.9(3) An application for rehearing shall be deemed to have been denied unless the council grants the application in writing within 20 calendar days after its filing.

202.9(4) If the application for rehearing is granted, the council may issue an order modifying the initial final order, or may set the matter for consideration at a subsequent meeting date. If public hearing is granted on the application for rehearing, notice shall be provided ten calendar days prior to hearing to the person applying for rehearing, the applicant and other affected persons upon request pursuant to 202.10(135).

202.9(5) The council shall issue the final decision on rehearing, stating the basis for its decision, within 30 calendar days after the application for rehearing was granted or 30 calendar days after public hearing on rehearing, whichever is later.

202.9(6) If a rehearing is not requested or an affected party remains dissatisfied after the request for rehearing, an appeal may be taken in the manner provided by Iowa Code chapter 17A. A request for rehearing is not required prior to appeal under Iowa Code section 17A.19.

641—202.10(135) Status reports to affected persons. Affected persons are entitled to status reports from the department while a formal application review is in progress pursuant to Iowa Code section 135.68. The department shall maintain a log of all requests for written status reports by affected persons. Affected persons who request written status reports must submit their name and address in a written request (by letter, fax, or E-mail) to the department, identifying the specific information requested, which may include notification of the council's final decision, any application for rehearing, or the filing of a petition for judicial review. The formal process does not preclude informal contacts with department staff for verbal status reports. Copies of the council's final decision, an application for rehearing, a petition for judicial review, or any other public record will be provided upon request and payment of the department's per page fee for copies as described in 641 IAC 175.3(7).

641—202.11(135) Finality. The certificate of need application process is continuous beginning with submission of a letter of intent or request for waiver of a letter of intent through issuance of a final decision by the council subject to judicial review under Iowa Code chapter 17A.

202.11(1) The following stages of the process are intermediate and subject to judicial review only to the extent they meet criteria for intermediate review under Iowa Code section 17A.19.

- a. A response from the department to a request for preliminary review pursuant to 202.3(135);
- b. A decision by the department to waive submission of the letter of intent and substitute summary review; and
- c. The rejection of an application by the department which fails to provide all information required under Iowa Code section 135.63, subsection 1.

202.11(2) The following stages of the process are final decisions subject to judicial review as final agency action under Iowa Code section 17A.19:

- a. A decision by the department to disallow summary review;
- b. A decision by the council to approve or deny an application; and
- c. The council's final ruling on an application for rehearing.

641—202.12(135) Project progress reports. The department shall maintain an effective follow-up program to ensure that applicants make timely progress on each approved application.

202.12(1) Progress reports of all approved projects shall be submitted to the department six months after approval.

202.12(2) Progress reports shall fully identify the project and indicate the current status of the project in descriptive terms. The reports shall also reflect an amended project schedule if necessary.

641—202.13(135) Request for extension of certificate.

202.13(1) Requests for extension of a certificate of need must be filed in letter form to the department from the applicant no later than 45 days prior to the expiration of the certification.

202.13(2) Request for extension shall fully identify the project and indicate the current status of the project in descriptive terms.

202.13(3) The department shall use the news media to notify the public and affected parties of the council meeting agenda, including extension requests. The news media shall be notified at least ten days before the council meeting.

Any affected persons shall have the right to submit to the department in writing, or orally at the council meeting at which the extension request is considered, information which may be relevant to the question of granting an extension.

202.13(4) When an extension has been requested, the council shall approve or deny the request at a meeting of the council preceding the expiration of the certification. The certificate of need may be revoked by the council at the end of the certification period for insufficient progress in developing the project.

202.13(5) If the extension is denied, the applicant shall have the right to appeal under the provisions of Iowa Code section 135.70.

641—202.14(135) Application changes after approval.

202.14(1) Once a project has been approved by the council, no changes that vary from or alter the number of approved beds, the approved services or the approved cost by an amount indicated in 202.14(2) shall be made unless requested by the applicant and approved by the council. Requests shall be made in writing and filed with the department.

202.14(2) An increase in the actual cost of the project over and above that originally approved shall automatically generate a rereview by the council if the increase exceeds the originally approved amount by:

- a. Fifteen percent for projects up to \$999,999.99;
- b. Twelve percent for projects from \$1,000,000.00 to \$4,999,999.99;
- c. Eight percent for projects \$5,000,000.00 and over.

An increase in the approved cost that falls below the above percentages shall be reported to the department.

202.14(3) Failure to notify and receive permission of the council to change the project as originally approved may result in the imposition of sanctions provided in Iowa Code section 135.73. The council may make a recommendation to the department regarding the imposition of a sanction and the amount of the fine to be imposed.

641—202.15(135) Sanctions. Hearings to determine class I or class II violations pursuant to Iowa Code section 135.73 shall be conducted in accordance with the department's procedural rules for contested cases found at 641 IAC 173.

These rules are intended to implement Iowa Code chapter 135.

CHAPTER 203
STANDARDS FOR CERTIFICATE OF NEED REVIEW
[Prior to 7/29/87, Health Department[470] Ch 203]

641—203.1(135) Acute care bed need.

203.1(1) Purpose and scope.

a. The methodology described in this section provides the basis for estimating the anticipated number of patient-days of acute care hospital service that Iowa citizens will need in the future. The methodology embodies predictive indicators of acute care usage, population and demographic adjustments, and “target” usage rates. The “target” rates express the intent to reduce the levels of acute care usage in areas of the state where that usage is excessive, and not otherwise attributable to the presence of high-usage population groups.

b. The number of acute care beds which will be needed by each of the state’s hospitals in the future is a function of the number of patient-days of acute care that will be needed by Iowa citizens, with allowance for the needs of specific population groups and for the travel distance to and location of the state’s hospitals.

c. Certificate of need project applications are to be evaluated against the projected bed need determination for those hospitals seeking permission to:

1. Construct new acute care beds;
2. Modernize or renovate acute care beds/patient nursing units;
3. Convert acute care beds from one service use to another;
4. Add to the square footage space of the hospital, where it might be architecturally feasible and cost-effective to convert excess bed space.

d. The methodology responds to the following criteria for evaluation of certificate of need applications:

1. The need of the population for the health services;
2. Availability of alternative, less costly or more effective methods of providing the proposed services;
3. Relationships of the proposed service to the existing health care system of the area;
4. Consideration of the capacity to provide services and consideration of alternatives such as sharing or cooperating arrangements;
5. Other existing facilities providing similar services to those proposed are being used in an appropriate and efficient manner.

203.1(2) Definitions.

a. “*Estimated patient-day use rate*” means the number of days of hospital care provided per year, per thousand residents of a county (or the state). The rate is calculated by adding together all of the patient-days per year for residents of a county (or state), obtained from the records of hospitals where those residents received services. The total patient-days is then divided by the number of residents in the county (or the state), and the answer is expressed as “X patient-days per 1,000 persons.” A patient-day use rate can be calculated for any specific age group by identifying the number of patient-days of use by residents in that age group and dividing by the number of residents in that age group.

b. “*Target use rate*” for a county means the patient-day use rate that establishes a projected need level for the county at a future point in time. A target use rate can be determined for a specific age group, using the method described above. In this methodology, target use rates will be determined for four age groups: 0-14, 15-44, 45-64, and 65 and older. Therefore, each county will have four target use rates. For each county, the target use rate for each age group shall be the lowest of (1) the estimated patient-day use rate for the county during the survey period or (2) the state average estimated patient-day use rate during the survey period. The rates in effect at the time that an application is declared complete by the state are the rates employed in reviewing that application.

c. “*Patient destination patterns*” means the distribution, by hospital, of the total patient-days of each county. The patterns show where patients were referred for hospital service.

d. “*Patient destination proportion*” means the percentage of a given county’s patient-days that occurred in any given hospital.

e. “*Target occupancy rate*” means the desired average annual percent of a given hospital’s usable beds that will be occupied. An occupancy rate is determined by dividing a hospital’s average daily census (ADC) of patients by the facility’s number of usable beds. A “target” occupancy establishes desired levels of efficiency.

f. “*Acute care beds*” means short-stay hospital beds including general medical/surgical, pediatric, obstetric, psychiatric and other short-stay specialized beds.

203.1(3) Data requirements.

a. Patient destination patterns, patient destination proportions, and the patient-use of acute care services shall be determined from the most recent statewide patient origin and destination study. Such a study shall be conducted at intervals not to exceed three years and shall be the responsibility of the department of public health. The initial study conducted in 1977 produced target utilization rates. Those target rates produced by subsequent studies shall be reviewed as to their continued appropriateness at the time each three-year study is analyzed. If better data is submitted in the interim between studies such shall be considered in readjusting the target use rates. As revised target use rates are determined by study, the Statewide Health Coordinating Council (SHCC) shall review the new target use rates to determine their appropriateness. All Iowa hospitals shall participate in the survey and shall cooperate with the department in providing the most accurate information available. Out-of-state hospitals will also be surveyed in order to obtain information on Iowa residents receiving hospital care out of the state.

b. Population estimates and projections shall be obtained from the most recent Official Iowa Population Projections, published by the department of economic development. The projecting horizon used in this methodology shall be ten years in the future. Using the year of the most recent patient origin and destination study as “year one,” projected patient-day use rates will be applied to the projected populations in “year ten” (example: from the information in the 1977 patient origin and destination study, projections will be made for 1987).

c. Data pertaining to bed capacity and annual patient-days shall be obtained from the most recent Annual Report for Hospital and Related Health Facilities submitted by hospitals to the department of public health.

203.1(4) Methodology.

a. Annual “estimated patient-day use rate” by county:

(1) Annually adjust the patient-day information obtained from the one month patient origin and destination study by multiplying the patient-days of each hospital by the ratio of annual patient-days (obtained from the Annual Report) to sample month patient-days (obtained from the patient origin and destination study).

(2) To determine estimated annual county patient-days for each of the age groups (0-14, 15-44, 45-64 and 65 and older) for any given county do the following: first, annually adjust all patient-days identified in the one month survey as described in (1) above; second, for each hospital identify the residence of origin of their annually adjusted patient-days by each specific county; third, for each county identify the annually adjusted patient-days for that county’s residents from all of those hospitals which served the residents of the county during the patient origin study period. Follow the same procedure for each age group.

(3) To determine the county patient-day use rate for each age group divide the number of patient-days for that age group (identified in (2) above) by the population of the county in that age group. Express the results as “X number of patient-days per 1,000 residents in Y age group.”

b. Annual “estimated patient-day use rate” by state. For each age group add together the estimated annual county patient-day for that age group in all counties and divide by the state population in that age group.

c. To determine target use rates—each county will have four target use rates; one for each of the age groups 0-14, 15-44, 45-64, and 65 and older. The target use rate for any age group for a county will be the lowest of:

(1) Estimated annual patient-day use rate for the age group in that county;

(2) Estimated annual patient-day use rate for the age group in the state.

d. To determine projected patient-days for a county—multiply the target rate for each age group by the projected county population in that age group for the year ten years after the most recent patient origin survey (counting the survey year as “year one”).

e. To determine facility projected patient-days—for each of the four age groups divide up the projected patient-days for each county among the hospitals that served the county during the patient origin study period. The distribution of any county’s projected patient-days (in each age group) will be made in accordance with the percentage distribution of patient-days (in each age group) among the various hospitals in the study period. The percentage distribution number for any given hospital of the patient-days of any given county is called the “patient destination proportion.” Add together all of the projected patient-days in each of the four age groups going to each hospital from all of the counties served by that hospital.

f. To determine a facility’s projected patient-days for out-of-state residents—first, determine the in-state and out-of-state percentage of patient-days identified for each facility during the patient origin survey period; next divide a given facility’s in-state percentage into its number of projected patient-days in the patient origin survey. The projected patient-days for facility A from Iowa counties is 2,000. To expand the patient-days to allow for the anticipated out-of-state patients divide 2,000 by .90 to get 2,222. (Ninety percent of 2,222 would be 2,000 and 222 would allow for the 10 percent out-of-state patients expected to use the hospital in the future projection.)

g. To determine facility projected bed need—divide the projected patient-days for the facility by 365 days to estimate the projected average daily census of patients. The average daily census for the facility will determine the facility’s projected bed need when allowance is made for a margin of unoccupied beds. The margin of unoccupied beds provides for the fluctuations in average-to-peak service periods. The smaller hospitals have a greater margin allowed in order to accommodate the necessary emergency and primary care functions that account for the majority of their patients. The following scale incorporates the margin and provides the link between the projected average daily census for a facility and the projected bed need.

If Average Daily Census (ADC) is:		Presumed Occupancy Rate:
1-30	$BN = 1.670 \times ADC$	60%
31-70	$BN = 50 + 1.250 \times (ADC - 30)$	61-70%
71-160	$BN = 100 + 1.111 \times (ADC - 70)$	71-80%
161-249	$BN = 200 + 1.124 \times (ADC - 60)$	81-83%
250 or more	$BN = 1.205 \times ADC$	83%

Specific exception—University of Iowa Hospitals and Clinics serve a unique role as a nearly exclusively tertiary facility with many specialized units. Its occupancy rate should allow for greater peak load fluctuation and therefore will have an occupancy rate of 80%.

203.1(5) Contingencies.

a. Patient-days for hospitals that close in the interim between revisions of the patient origin and destination study will be divided among other hospitals serving the same counties as the hospital that closed. The projected patient-days will be divided according to the percentage of the county’s patient-days going to each of the other hospitals serving that county. (Example: County A has a projected 1,000 patient-days divided among three hospitals—

Facility X = 60% of the patient-days = 600 patient-days

Facility Y = 20% of the patient-days = 200 patient-days

Facility Z = 20% of the patient-days = 200 patient-days

If Facility Z closes, the 200 patient-days would be distributed to Facilities X and Y according to the following ratios:

Facility X = 600/800

$600/800 \times 200 = 150$ patient-days

Facility Y = 200/800

$200/800 \times 200 = 50$ patient-days

Facilities X and Y will then have projected patient-days of 750 and 250 respectively.)

b. Joint planning in multiple-hospital communities is encouraged and any alternative distribution plan for the aggregate community bed need in those communities may be presented by the hospitals affected. So long as the total community bed need does not exceed the sum of the individual facility needs for the community and so long as all of the hospitals in the community agree to the alternative distribution plan, the plan will replace the distribution pattern determined by this methodology.

641—203.2(135) Cardiac catheterization and cardiovascular surgery standards.

203.2(1) Purpose and scope.

a. These standards are measures of some of those criteria found in Iowa Code sections 135.64(1)“a” to “q,” and 135.64(3). Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against these cardiac catheterization and cardiovascular surgery standards include:

- (1) Proposals to commence or expand capacity to perform cardiac catheterization.
- (2) Proposals to add new or replace cardiovascular surgery services.
- (3) Any other applications which relate to cardiac catheterization or cardiovascular surgery.

203.2(2) Definitions.

a. Adult cardiac catheterization laboratory—a diagnostic facility exclusively for intracardiac or coronary artery catheterization on adults.

b. Pediatric cardiac catheterization laboratory—the same as adult cardiac catheterization laboratory, except exclusively for children and infants.

c. Cardiac catheterization—

(1) Intracardiac—a diagnostic study of the heart, and pulmonary arteries, or both, in which a small catheter passes through a vein or artery in the neck, leg or arm and advances into the great vessels, the heart or the pulmonary arteries. Through this procedure one can measure pressure within the heart and in adjacent veins and arteries, collect blood samples for blood gas analysis and inject radiopaque material, visualize cardiac and vessel anatomy. The procedure permits detection of congenital and acquired heart abnormalities, the study of ventricular function, the estimation of the orifice size, the placement of pacemakers, etc. Cardiac catheterization is incomplete without cineangiography, intracardiac pressure measurements, blood gas analysis and the ability to diagnose intracardiac shunts.

(2) Coronary artery catheterization—a diagnostic study of the coronary arteries, in which a small catheter passes through an artery in the leg, neck or arm into a coronary artery orifice. Intravascular pressure measurements are taken, and angiography of the coronary arteries is performed. Catheterization and cineangiography of the left ventricle are an integral part of this procedure.

d. Angiography.

The photographic recording of X-ray or radiologic images of blood vessels, in any part of the body—the heart, the head, the great vessels, the kidney, etc. In the procedure blood vessels are injected with a radiopaque chemical. Immediately following injection, X-rays are employed to image the path of the injected chemical. These X-ray images are then photographically recorded.

Angiocardiography.

The recording of moving X-ray images (fluoroscopic images) of the heart and great vessels. After injection of radiopaque chemicals, moving X-rays of the chemical’s flow are projected on a screen called a fluoroscope. Moving pictures (cineangiography) or still pictures in sequence (serialography) may be recorded of the X-ray image.

e. Adult cardiovascular surgery—cardiovascular surgery exclusively for adults.

f. Pediatric cardiovascular surgery—cardiovascular surgery exclusively for infants and children.

g. Cardiovascular surgery—the services associated with and surgery performed for congenital or acquired diseases of the heart, great vessels, or pericardium, including the placement of travenous and epicardial pacemakers.

(1) Open heart surgery—cardiovascular surgery in which an incision of sufficient size is made to allow direct vision of the area. Open heart surgery requires temporary use of a heart-lung (cardiopulmonary bypass) machine, as blood flow through the heart is greatly reduced or stopped altogether.

(2) Coronary artery surgery—surgery to correct inadequate blood flow to the heart through using revascularization techniques to bypass significantly obstructed coronary artery lesions.

h. Closed heart surgery—cardiovascular surgery in which a small incision and repairs are made without direct vision of the area.

203.2(3) Availability of services.

a. Minimum utilization—cardiovascular surgery (Iowa Code sections 135.64(1) “c,” “g,” “h”).

(1) Adult cardiovascular surgical programs should project an annual minimum rate of over 200, or no approval shall be granted. Higher case loads over 200 per annum, are encouraged.

(2) Pediatric cardiovascular surgical units should project a minimum of 100 pediatric heart operations after the first year, at least 75 of which must be open heart procedures.

(3) Combined adult/pediatric cardiovascular surgery units should project the minimum projected annual rates for both adult and pediatric surgery, or no approval shall be granted.

(4) Applicants should project utilization of cardiovascular surgery, catheterization and cardiac care units based upon service area population demographics, current regional or national utilization rates of the service, disease incidence and prevalence rates, current cardiac care treatment modes, and in consideration those adult cardiovascular surgery units currently operating in Iowa, and bordering states within two hours surface travel time, if the applicant proposes an adult unit; and in consideration of pediatric cardiovascular surgery units currently operating in Iowa and bordering states within three hours surface travel time, if the applicant’s proposed unit is pediatric. If a combined unit is proposed both the two- and three-hour considerations for existing adult and pediatric units apply. The assumptions, data and methodology used to arrive at projections shall be provided in each application.

b. Expansions—cardiovascular surgery (sections 135.64(1) “c,” “d,” “e,” “g,” “h”).

(1) There should be no additional adult cardiovascular surgery units initiated unless each existing unit within two hours surface travel time is operating at a minimum of 350 open heart surgery cases per year.

(2) There should be no additional pediatric cardiovascular surgery units initiated, unless each existing unit within three hours surface travel time is operating at 130 surgeries per year. (If one team serves more than one institution the numbers for those institutions should be combined.)

(3) No additional cardiovascular surgery units should be approved which will reduce the volume of existing services below 350 procedures annually for adults and 130 annually, 75 of which are open heart, for pediatric units. The applicant will demonstrate that an attempt was made to determine with the cooperation of existing providers whether such a reduction would occur. Existing providers of consequence are within two hours surface travel time for adult services and within three for pediatric services.

(4) Adult cardiovascular surgical service units should be granted only to institutions which can demonstrate an unserved population base of 500,000 persons. An unserved area is one which lies outside of an existing unit’s service area.

(5) Pediatric cardiovascular surgical services should be granted unto institutions which can demonstrate an unserved population base of 2.5 million with 30,000 live births per year.

c. Minimum utilization—cardiac catheterization (sections 135.64(1) “c,” “d,” “g,” “h”).

(1) Adult cardiac catheterization laboratories should be projected to operate at a minimum of 300 catheterizations per annum.

(2) Pediatric catheterization laboratory units should project a minimum of 150 catheterizations annually.

(3) Combined units should meet each of the adult and pediatric standards.

(4) Applicant should project utilization of cardiac catheterization units based upon service area population demographics, current regional or national utilization rates of the service, disease incidence and prevalence rates, current cardiac care treatment modes, and in consideration those adult cardiovascular surgery units currently operating in Iowa, and bordering states within two hours surface travel time if the proposed unit is for adults; and in consideration of pediatric cardiovascular surgery units currently operating in Iowa, and bordering states within three hours surface travel time if the proposed unit is for children. If a combined unit is proposed both time considerations shall apply. The assumptions, data and methodology used to arrive at projections shall be provided in the application.

d. Expansions—cardiac catheterizations (sections 135.64(1) “c,” “d,” “e,” “g,” “h”).

(1) There should be no additional adult cardiac catheterization unit opened unless the number of studies per year in each existing unit within two hours surface travel time is greater than 500. No additional pediatric unit should be opened unless the number of studies per year in each existing unit within three hours surface travel time is greater than 250.

(2) There should be no additional cardiac catheterization units initiated which would reduce the volume of existing units below 500 adult catheterizations, 200 of which are intracardiac or coronary artery catheterizations, or 150 pediatric catheterizations, or both for combined units. The applicant must attempt and demonstrate that an attempt was made to determine with the cooperation of existing providers whether such a reduction would occur. Existing providers of consequence are those within two hours surface travel time for adults or three hours for pediatrics.

e. There should be no new cardiac catheterization unit open in any facility not performing open heart surgery (sections 135.64(1) “e,” “g,” “h,” “k”).

203.2(4) Costs.

a. *Financial feasibility.* (Sections 135.64(1) “f,” “i,” “p”) Cardiovascular surgery and catheterization equipment, and associated remodeling or construction should be depreciated over a period consistent with American Hospital Association schedules as limited by existing reimbursement payors.

b. *Cost-effectiveness.* Proposed new or replacement cardiac catheterization laboratories cost per catheterization and cardiovascular surgery services estimated costs per surgery should when compared to their peers demonstrate cost-effectiveness.

203.2(5) Accessibility. (Sections 135.64(1) “c,” “d”)

a. Cardiovascular surgery units and cardiac catheterization labs should be available 24 hours a day, seven days a week for emergency coverage.

b. Facilities with cardiovascular surgery/cardiac catheterization should have available 24-hour, seven days a week ambulance and emergency room service.

c. Travel distance should be within two hours surface travel time or less for 80 percent of the projected service area for pediatric services.

d. Cardiac catheterization and cardiovascular surgery service should be provided regardless of ability to pay, in consideration of those programs available in the state which serve the medically indigent.

203.2(6) Quality. (Sections 135.64(1) “i,” “k”)

a. Each surgery unit and cardiac catheterization lab shall demonstrate a reasonable set of criteria that are used in selecting appropriate candidates for surgery and catheterization.

b. Staffing minimums.

(1) The open heart surgery team should minimally consist of:

1. At least two certified or board eligible cardiovascular surgeons for the first 75 to 130 pediatric open heart surgeries. If pediatric surgery is performed, one surgeon must have special training and experience in surgery for congenital cardiac defects.

2. A board certified or board eligible adult or pediatric cardiologist(s). The latter only if pediatric surgery is performed, the former only if adult surgery is performed.

3. Board certified or board eligible anesthesiologist with special training in the management of cardiovascular cases’ respiratory care.

4. Radiologist trained in the cardiovascular field.

5. Pathologist familiar with cardiac problems.

6. Specially trained in heart disease surgical nursing staff.
 7. Cardiopulmonary bypass pump technicians.
 8. Other ancillary staff as needed.
- (2) Each applicant shall document that the proposed surgery unit can be so staffed when completed and operational.
- c.* Equipment and facilities. The applicant seeking to provide cardiovascular surgery should demonstrate that the following support services will be available:
- (1) General X-ray diagnostic facilities and facilities for emergency X-rays on a 24-hour basis.
 - (2) A cardiac catheterization laboratory or angiography lab available on a 24-hour basis.
 - (3) A cardiographics laboratory, with facilities for recording the following tests: EKG, vector cardiogram, phonocardiogram, echocardiogram, and exercise stress testing.
 - (4) A supporting blood bank and hematology laboratory.
 - (5) A microbiology laboratory.
- d.* Cardiac catheterization labs serving infants and children should have biplane angiographic equipment, either cineangiographic or cut film. Pediatric cardiac catheterization labs should be supervised by board certified or board eligible pediatric cardiologists; adult cardiac catheterization labs should be supervised by a board certified or board eligible adult cardiologist.

203.2(7) Continuity. (Sections 135.64(1) “g,” “h,” “i,” “k”)

- a.* The applicant should demonstrate that an attempt was made to solicit letters and to establish referral agreements from area hospitals and physicians to indicate a willingness to participate in a cooperative endeavor to refer to the proposed service.
- b.* The applicant should provide documentation that emergency medical transport services will be available.
- c.* Institutions providing cardiovascular surgery services should include mechanisms for comprehensive medical followup including adequate medical records exchange.

203.2(8) Acceptability. (Section 135.64(1) “c”) Facilities with cardiovascular surgery and cardiac catheterization indicate a willingness to observe and respect the rights of patients as stated in the Patients Bill of Rights adopted by the American Hospital Association February 6, 1973, and reprinted in 1975.

641—203.3(135) Radiation therapy or radiotherapy standards.

203.3(1) Purpose and scope.

- a.* These standards are measures of some of those criteria 1 (a to q) and 3 found in Iowa Code section 135.64. Criteria which are measured by a standard are cited in parentheses following each standard.
- b.* Certificate of need applications which are to be evaluated against these radiation therapy standards include:
- (1) Proposals to commence or expand the kind or capacity of megavoltage radiation therapy services.
 - (2) Proposals to replace a radiation therapy unit.
 - (3) Any other applications which relate to radiation therapy.

203.3(2) Definitions.

a. Radiation modality. The method of applying ionizing radiation in the treatment of patients with malignant disease. Externally applied modes.

Superficial X-ray therapy. The use of a conventional X-ray machine, which generates X-rays of up to 150 kilovolts (150 kv), to treat superficial lesions, such as skin cancer.

Orthovoltage X-ray therapy. The use of a conventional X-ray machine which generates X-rays between 150 kv up to and including 800 kvs. (These X-rays are of insufficient energy to avoid preferential bone absorption or to be “skin sparing”.)

Megavoltage therapy. The use of ionizing radiation in excess of one million electron volts. Energies above one million electron volts cause considerably less skin damage, increase depth dose markedly, and result in much less scatter from the therapeutic beam. Megavoltage machines are classified as follows:

1. Particle accelerators. These machines use a supply of electrons, which are accelerated into high energy beams. These beams are either caused to strike a target resulting in high energy X-ray production, or are used themselves as the treatment beam. Particle accelerators generate from 4 million up to as many as 45 million electron volts. Most common particle accelerators are the linear accelerator and the betatron.

2. Isotope sources (gamma ray teletherapy units).

Cobalt 60 units—emit gamma rays of approximately 1.2 million electron volts.

Cesium teletherapy units—utilize gamma rays of approximately 650 kv.

b. Megavoltage therapy unit. A piece of megavoltage therapeutic radiologic equipment.

c. Radiation therapy facility. A piece of megavoltage therapeutic radiologic equipment, the accompanying support equipment, and the physical space which houses the equipment.

d. Treatment (procedure). All those radiation fields applied in a single patient visit. Interstitial/intracavitary treatment counts as one visit.

e. Dosimetrist. A technologist who calculates, verifies, and develops maps for the dose distribution of radiation within the patient. The technologist is an essential member of the treatment planning team.

f. Radiation therapist (radiation oncologist). A physician who is board certified or board eligible in therapeutic radiology or in general radiology and who devotes full time to the practice of radiation therapy.

g. Radiation therapy technologist. An individual registered or eligible for registration by the American Board of Radiologic Technologists, or its equivalent, in radiation therapy.

h. Transverse tomograms. A special diagnostic X-ray procedure to determine the depth of the tumors inside the body.

i. Conjoint radiation oncology center (cancer center). A multi-institution, multidisciplinary network to provide radiation therapy for cancer patients. Each institution has an equal voice in decision making and direction of the work of the center. Integration of patient care management, common utilization of personnel and equipment, and a single system of records between center institutions assures optimal care regardless of entry portal. A common cancer registry of all patients treated by center hospitals is maintained.

j. Simulator. Used to reproduce the geometry of the external beam treatment technique, and consists of an isocentrally mounted X-ray source with X-rays passing per a collimation system to reproduce the therapy beam.

k. New patient. A patient receiving treatment for the first time at a given radiation therapy facility.

203.3(3) Availability.

a. Minimum utilization. (Sections 135.64(1) “c,” “g,” “h”)

(1) A megavoltage radiation therapy unit which is of relatively low energy, including small linear accelerators (4-10 MEVs), cobalt units and cesium teletherapy units, should serve a population of at least 200,000 persons, and treat at least 300 new patients annually within three years after initiation of the service.

(2) A megavoltage radiation therapy unit which is of medium energy, including linear accelerators of 12-20 MEVs should only be placed in facilities which are currently treating with megavoltage radiation therapy a minimum of 500 new patients annually.

(3) A megavoltage radiation therapy unit which is of high energy, including those linear accelerators of greater than 20 MEVs, should only be placed in facilities which are currently treating at least 750 new patients annually with megavoltage radiation therapy.

(4) To determine the number of new patients needing megavoltage radiation therapy annually in a service area, the following formula shall be applied:

Multiply the service area population times .00304 (3.04/1,000 population was the mean cancer incidence rate in 1976 in Iowa as filed by the Surveillance, Epidemiology, and End Results Program—SEER). A service area population is determined by each facility’s catchment area as reported in the most recent patient origin study of the Iowa department of public health.

Multiply this product times .5 (50 percent of all new cancer patients require radiation therapy).

(5) Institutions which form a conjoint oncology center should have at least 500 new patients annually who are amenable to megavoltage therapy.

b. Expansions. (Sections 135.64(1)“c,” “d,” “e,” “g,” “h”)

(1) There should be no additional megavoltage units of comparable size approved unless each existing megavoltage unit of that size within 90 minutes travel time of the proposed unit is performing at least 6,000 treatments per annum.

(2) Proposed new small megavoltage units within 90 minutes travel time of other small units must identify an unserved population base of 200,000 apart from that 200,000 currently served by institutions in the service area.

(3) Megavoltage treatments per annum should be projected by multiplying the number of projected new patients needing megavoltage therapy times 20.

(4) There should be no additional megavoltage radiation therapy units of comparable size within 90 minutes surface travel time of existing units which would reduce the projected volume of treatments per annum in existing units of comparable size to less than 6,000 treatments per annum and which would result in less than 300 projected new patients per annum for that existing unit. The applicant will attempt and demonstrate that an attempt was made to determine with the cooperation of existing providers whether such a reduction would occur.

(5) New conjoint centers should be justified if more than 3,000 new patients are currently being treated by radiation therapy in an existing center.

c. A simulator which can accurately reproduce the geometry of each external beam technique should be available for every two megavoltage units in a radiation oncology department.

203.3(4) Costs.

a. Financial feasibility. (Sections 135.64(1)“f,” “i,” “p”)

(1) Megavoltage radiation therapy units should be depreciated over a period no shorter than that indicated by “Estimated Useful Lives of Depreciable Hospital Assets” published by the American Hospital Association. Associated remodeling should be depreciated according to generally accepted accounting principles and over a period no shorter than indicated in the above-named publication.

(2) Recognizing anticipated volume rate structure, and third party reimbursement, the applicant should present a breakeven analysis for the service. If the analysis shows breakeven will fail to occur after three years of the service’s initiation, the applicant should demonstrate why operating a service with the revenues below costs appears desirable.

(3) Charges will be based on actual or projected yearly treatments, but not less than 6,000 treatments.

b. Cost-effectiveness. (Section 135.64(1)“e”) Costs per unit of service should not exceed 10 percent of the state average unit cost for the service. If costs exceed 10 percent of that average the applicant shall demonstrate how the proposal represents the most cost-effective way to deliver the service and explain why the project was chosen instead of alternative ways of meeting the need for the service.

203.3(5) Accessibility. (Sections 135.64(1)“c,” “d”)

a. Travel distance shall be within 90 minutes auto travel time for the projected service area population.

b. Radiation therapy services should be provided regardless of ability to pay, in consideration of those programs available in the state which serve the medically indigent.

203.3(6) Quality. (Sections 135.64(1)“i,” “k”)

a. Minimum staffing requirements for radiation therapy facilities:

(1) Each facility shall have the services of radiation therapists which should be staffed at a level of one therapist per 400 new cancer patients needing treatment.

(2) Each facility shall have the services of radiation physicists which should be staffed at a level of one physicist per 800 new patients.

(3) Each facility shall have the services of radiation therapy technologists which should be staffed at a level of two technologists per megavoltage unit.

(4) Each facility should have the services of nurses.

(5) Each facility should have the services of dosimetrists which should be staffed at a level of one dosimetrist per 500 new patients.

- b. Reserved.
- c. Each conjoint center shall have at least two cancer biologists available.
- d. Each conjoint center shall have one radiation technologist available for each simulator.
- e. Replacement or development of orthovoltage treatment should not occur.
- f. The long-range plans for radiation therapy services shall be submitted to the Iowa department of public health.
- g. Multidisciplinary tumor boards should be established in all institutions housing megavoltage or orthovoltage machines.
- h. A source of continuing education should exist within each conjoint center to reach participating community referral hospitals and physicians.
- i. Each conjoint center should have a unified training program in radiation therapy for radiation therapists.
- j. Each radiation therapy facility should offer psychosocial counseling services and nutritional counseling.

203.3(7) Continuity. (Sections 135.64(1)“g,” “h,” “i,” “k”)

a. The applicant should demonstrate that an attempt was made to solicit letters and establish referral agreements from area hospitals and physicians to indicate their willingness to participate in a cooperative endeavor to refer to the proposed service.

b. A minimum of 75 percent of all radiation therapy procedures should be projected to be done on an outpatient basis. If the applicant believes that 75 percent is inappropriate for its facility, then documentation which shows how its facility is different and why it sufficiently justifies not meeting this 75 percent outpatient rate, shall be provided.

203.3(8) Acceptability. (Section 135.64(1)“c”) Facilities with radiation therapy services shall document a willingness to observe and respect the rights of patients as stated in the “Patients Bill of Rights” adopted by the American Hospital Association February 6, 1973, and reprinted in 1975. Provisions for counseling services shall be available.

641—203.4(135) Computerized tomography standards.

203.4(1) Purpose and scope.

a. These standards are measures of some of those criteria in Iowa Code sections 135.64(1)“a” to “l.” Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against these computerized tomography standards include:

- (1) Proposals to commence or expand the capacity of computerized tomography services.
- (2) Any other applications which relate to computerized tomography services.

203.4(2) Definitions.

a. Computerized tomographic (CT) scanner—a diagnostic tool which rotates about and which sends X-ray beams through cross-sectional layers of the body or brain. The X-ray beams which emerge from the body or brain are absorbed by a detector. Differences in the amount of X-rays absorbed by the detector indicate differences in tissue density. As the scanner rotates it takes many images of a cross-section. The images on the detector are transmitted to a computer which displays on a TV a reconstructed cross-sectional picture or slice. Contrast media is then usually injected to alter absorption of the detector, and the scan repeated; this is called enhancement.

- (1) Whole body scanner—one capable of imaging the entire body.
- (2) Head scanner—one capable of imaging only the brain and structures adjacent to the head.

b. Enhanced scan—a scan performed on a patient who has been treated with a contrast medium so that specific organs or areas of the body will be displayed more distinctly on the scan image.

c. Arteriography—imaging of blood vessels supplying the area of interest following injection of contrast media.

d. Pneumoencephalogram—the X-ray imaging of the skull and its content after introducing air or gas into the fluid-filled spaces within and around the brain and spinal cord.

e. Radioisotope brain scan—nuclear imaging of the concentration of radioactive isotopes which have been injected by biochemical or physiological actions into the brain, referred to later as nuclear brain scan.

f. H.E.C.T. (head equivalent C.T. unit)—a unit by which to measure the capacity of a CT scanner, and being defined as the average number of minutes necessary to perform a single unenhanced CT head study on a body scanner (including the room and equipment preparation time).

By comparing the average times for performing various types of scan procedures to the time necessary to perform an unenhanced head scan, the following table of equivalencies was determined:

On a head scanner—

One unenhanced head scan = 1.05 HECTs

One enhanced head scan = 1.26 HECTs

A procedure involving both types of scans = 1.85 HECTs

On a body scanner—

One unenhanced head scan = 1.00 HECTs

One enhanced head scan = 1.16 HECTs

A procedure involving both types of scans = 1.74 HECTs

One unenhanced body scan = 1.48 HECTs

One enhanced body scan = 2.00 HECTs

A procedure involving both types of scans = 2.75 HECTs

g. Operational capacity for a CT scanner—the operational capacity of a scanner is 3000 HECTs per year, plus or minus 10 percent.

h. Minimum shared-market area for a scanner (hereafter referred to as “area”)—the smallest geographic area within which any scanner installation is judged to affect the utilization rate of any other scanner is the community (as defined by the U.S. Bureau of the Census) or a Standard Metropolitan Statistical Area (where an area is so designated).

i. Emergency medical service (EMS) level II trauma service—the level of various services and staffing that qualify a facility to be designated by the emergency medical service division of the Iowa department of public health, using the facilities categorization criteria of such services that is in effect on the date of the enactment of this standard.

j. Shared service agreements—a multi-institutional arrangement for coordination or consolidation of services or sharing of support services. Among the various types of arrangements are referred services, purchased or joint contract services, multisponsored services and regional services.

k. CT consortia—a cooperative venture in which two or more institutions form a separate entity which is created for the purpose of owning, leasing, planning for, and maintaining the use of the scanner. Each facility in the consortium maintains its autonomy for all other services.

l. Applicant—an applicant may be a facility or a consortium of facilities within an area, or a physician or group of physicians.

m. General imaging procedures—a radiological diagnostic procedure performed on an X-ray machine or similar radiological diagnostic instrument.

n. Active oncology service—full, multidisciplinary cancer care, provided by a medical team that would include: surgery, gynecology, medical oncology, radiation oncology, pathology, diagnostic radiology and nuclear medicine. The surgery specialties that might be available would include: thoracic, abdominal, genitourinary and gynecological. The active oncology staff would include those specialists with training in oncology, hematology, and pathology and who spend at least half of their time at the institution.

o. Radiotherapy service—the therapeutic application of megavoltage radiation, using a linear accelerator or cobalt unit. The availability of such service at a hospital would necessitate personnel trained in the therapeutic application of radiology.

p. Chemotherapy service—the treatment of cancer by chemical agents.

203.4(3) Determination of need.

a. Applicants who do not now have a scanner, or who have a scanner and seek a certificate for one or more additional scanners.

(1) Applicants in areas with no other scanners.

i. Applicants must have performed at least 30,000 general imaging procedures during the past calendar year or 12 months, or

ii. Demonstrate that during the past calendar year or 12 months, the applicant performed diagnostic procedures equivalent to 1500 HECTs, using the following scale:

50% of the number of radioisotopic brain scans \times 1.75

25% of the number of cerebral angiograms/arteriograms \times 1.75

100% of the number of pneumoencephelograms \times 1.75

100% of the number of echoencephelograms \times 1.17

10% of the number of skull X-rays \times 1.75

100% of the number of patients referred to other facilities for CT diagnosis \times 1.75 (in the case of head scans) and 2.75 (in the case of body scans)

(2) Applicants in areas with one or more scanners.

i. An applicant must meet the requirement of need, described in 203.4(3) "a"(1), and

ii. The average level of utilization for scanners within the area was at least 3000 HECTs (plus or minus 10 percent) for the past calendar year or 12 months. The average level of utilization will be determined by adding the number of HECTs performed during the period at all area facilities divided by the number of facilities.

iii. The University of Iowa Hospitals and Clinics is specifically exempted from consideration under ii., directly above, because it has a service area that encompasses the entire state and adjoining states. The utilization statistics for the University Hospital will therefore neither affect nor be affected by Mercy Hospital, Iowa City. Additionally, the utilization statistics for scanners at the University of Nebraska Hospitals and Clinics and St. Joseph's Hospital (both in Omaha) will not affect the need for scanners at hospitals in Council Bluffs.

b. Replacement scanners—applicants who currently have a scanner.

(1) All applicants seeking to replace a scanner with another scanner, head or body.

i. The applicant must demonstrate that the applicant's use of the applicant's current scanner was at least at the operating capacity level during the last calendar year or 12 months, or

ii. Below the operating capacity level, but above 1500 HECT level, and the applicant must demonstrate reasons for permanently utilizing their scanner below operating capacity level and demonstrate that discontinuation of their scanner service would impair the applicant's ability to respond to the emergency needs of the area. Reasons for utilizing the scanner below the capacity should include a unique patient or procedure mix which would define the capacity level differently for this applicant.

(2) Applicants seeking to replace a head scanner with a body scanner.

i. The applicant must meet the requirements listed in 203.4(3) "a," and

ii. The applicant must meet the requirements for applicants seeking body scanners in 203.4(6), "Quality."

203.4(4) Costs—whole body and head scanners.

a. *Financial feasibility.* (Sections 135.64(1) "f," "i," "p") CT scanners should be depreciated over a period of not less than seven years. Remodeling shall be depreciated as appropriate by generally accepted accounting principles.

b. *Cost-effectiveness.*

(1) Applicants should demonstrate for themselves and the health care system that the most cost-effective method of providing CT services has been chosen. If a CT scanner which requires less than 20 seconds to produce one section is chosen, the applicant should demonstrate the scanner's cost-effectiveness over scanners requiring greater than 20 seconds to produce one section. If a CT scanner which requires 20 seconds to 2 minutes to produce one scan is chosen, the applicant should demonstrate the scanner's cost-effectiveness over scanners requiring greater than 2 minutes to produce one section.

(2) Proposed new and replacement CT scanner's cost per CT scan should, when compared to their peers, demonstrate cost-effectiveness.

203.4(5) Accessibility. (Sections 135.64(1) "c," "d")

a. All scanners must be available for emergency use 24 hours a day, less any down time. (Section 135.64(1) "d.")

b. Services should be provided to all patients regardless of the patient's ability to pay, taking into consideration the availability of those programs available in the state which serve the medically indigent.

c. Applicants will demonstrate a willingness to accept referrals for CT services from all area physicians.

d. All applicants must demonstrate through documented correspondence that an attempt has been made to form shared CT service agreements with all facilities within the area.

203.4(6) Quality. (Sections 135.64(1) "i," "k")

a. Data on use and costs of the CT scanners should be submitted to the Iowa department of public health as a condition of approval. (Sections 135.64(1) "a," "h")

b. All scanners.

(1) All applicants must demonstrate that they have on their staff or will acquire on their staff a full-time diagnostic radiologist, trained in the use of the CT scanner, or other physicians with comparable training and expertise.

(2) All applicants must document that they have on their medical staff individuals who are qualified to operate a scanner and interpret and act upon the diagnostic results. Such documentation may include reference to board certification, apprenticeship, academic credentials or such other qualifications that would prompt a medical staff to accept the responsibility for offering this new service. Applicants who intend to acquire staff with the desired expertise should provide signed letters of intent from the incoming medical personnel. Applicants who intend to upgrade the specialty skills of their staff should document a plan for training their current staff in the use of CT scanners.

(3) All applicants should have a complement of other diagnostic modalities available. Applicants seeking body scanners should also have available ultrasound, radionuclide scanning and conventional X-ray services.

(4) All applicants should have the facilities for treating the conditions diagnosed by imaging with the scanner or should demonstrate referral agreements with treatment facilities, in the event that the scanner will be used as a screening device.

(5) All applicants should have on their staff or available on a consultative basis the services of a biomedical engineer or radiation physicist, with special training in CT applications. These functions may also be provided by contract with the scanner manufacturer.

c. Head scanner only.

(1) Applicants for a head scanner should be a facility which qualifies for EMS Level II Trauma Service.

(2) If an applicant does not qualify for Level II Trauma Services, it must demonstrate that it has or will acquire a specialty practice in the field of diagnosing neurologic disorders, exclusive of neuropsychiatric disorders.

d. Body scanner only.

(1) Applicants for a body scanner must meet the criteria for EMS Level II Trauma Service.

(2) Applicants for a body scanner must be a hospital with 200 or more acute care beds. An applicant who does not meet the 200-bed rule may qualify for a body scanner if the applicant directly provides active oncology services with radiotherapy or chemotherapy treatment services, or both.

203.4(7) Continuity. (Sections 135.64(1) "g," "h," "i," "k")

a. The applicant should demonstrate that an attempt was made to solicit letters and to establish referral agreements from area hospitals and physicians to indicate a willingness to participate in a cooperative endeavor to refer to the proposed service.

b. The applicant should provide documentation that emergency medical transport services will be available.

c. The applicant should demonstrate an emphasis on the availability of outpatient CT procedures, and that an appropriate percentage of all CT procedures on head and whole body units will be done on an outpatient basis.

203.4(8) Acceptability. (Section 135.64(1)“k”) Providers of CT services should indicate a willingness to observe the rights of patients.

203.4(9) Rescinded effective 1/28/81.

641—203.5(135) Long-term care.

203.5(1) Purpose and scope.

a. These standards are measures of criteria found in Iowa Code sections 135.64(1)“a” to “g.” Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against these standards include applications to:

(1) Construct, develop, offer new, modernize, replace, renovate, or relocate intermediate care or skilled nursing care beds in nursing homes or hospitals.

(2) Expand bed capacity in intermediate care or skilled nursing care facilities or designated units in hospitals.

203.5(2) Definitions.

“*Intermediate care facility*” (ICF) means any institution, place, building, or agency providing for a period exceeding 24 consecutive hours accommodation, board, and nursing services, the need for which is certified by a physician, to three or more individuals, not related to the administrator or owner thereof within the third degree of consanguinity, who by reason of illness, disease, or physical or mental infirmity require nursing services which can be provided only under the direction of a registered nurse or a licensed practical nurse.

“*Rural counties*” means all counties not designated by the U.S. Census as SMA (Standard Metropolitan Area) counties.

“*Skilled nursing facility*” (SNF) means any institution, place, building, or agency providing for a period exceeding 24 consecutive hours accommodation, board, and nursing services, the need for which is certified by a physician, to three or more individuals not related to the administrator or owner thereof within the third degree of consanguinity who by reason of illness, disease, or physical or mental infirmity require continuous nursing care services and related medical services, but do not require hospital care. The nursing care services provided must be under the direction of a registered nurse on a 24-hour-per-day basis.

“*Urban counties*” means those counties designated by the U.S. Census as SMA (Standard Metropolitan Area) counties.

203.5(3) Availability and need. (Iowa Code sections 135.64(1)“c,” “d,” “e,” “g,” “h”)

a. The following formula shall be used as a means of projecting the approximate number of intermediate and skilled nursing care beds needed to serve the projected population five years into the future:

(1) Rural counties:

$[\text{.09}(\text{65} + \text{population}) + \text{.0015}(\text{64} - \text{population})] \times 110\%$ equals total long-term care bed need

Combined SNF and ICF bed need equals 2/3 (total long-term care bed need)

Assumed RCF bed need equals 1/3 (total long-term care bed need).

(2) Urban counties:

$[\text{.07}(\text{65} + \text{population}) + \text{.0015}(\text{64} - \text{population})] \times 110\%$ equals total long-term care bed need

Combined SNF and ICF bed need equals 2/3 (total long-term care bed need)

Assumed RCF bed need equals 1/3 (total long-term care bed need).

(3) Department of economic development population projections are adopted for use in the determination of long-term care bed need.

(4) The department of public health will calculate long-term care bed need figures annually, using population projections five years into the future.

b. For purposes of comparing “need” to “existing” beds in a given county, the following shall be considered in the calculation of “existing” beds:

- (1) ICF and SNF beds licensed at freestanding facilities in the county.
- (2) Additional ICF and SNF beds previously approved through certificate of need but not yet licensed.
- (3) ICF and SNF beds in designated units in hospitals in the county.

c. The statistical calculation of bed need shall serve as a guideline for the health facilities council in reviewing need for the proposed long-term care beds. Other factors which may be considered by the council include, but are not limited to:

- (1) The availability and utilization of other ICF and SNF services in the county, or within the applicant’s service area.
- (2) The availability and utilization of other long-term care services in nearby hospitals, such as skilled care available through the swing bed program.
- (3) The availability of supportive living arrangements which may or may not be licensed as residential care facilities (RCF).
- (4) The availability of home health and other in-home services.
- (5) The availability of other services to the elderly.
- (6) The availability of ICF and SNF services in neighboring counties.
- (7) Utilization by out-of-state residents of facilities in counties bordering other states, where the applicant provides evidence that in-migration of long-term care patients exceeds out-migration to the bordering state.
- (8) Programs and services directed at special populations whose needs cannot otherwise be met, or whose needs cannot be met cost-effectively at other facilities.

d. In documenting need for a project, the applicant shall identify the service area and target population, including a description of the methodology used by the applicant in determining need for the requested beds and the expected sources of referrals. The applicant shall document that the number of beds requested is appropriate to address the identified need. The applicant shall also identify how the target population is currently being cared for, and what hardship is being experienced by the absence of the proposed beds.

203.5(4) *Quality.* (Iowa Code sections 135.64(1)“i,” “k”) The applicant shall document that the applicant has contacted the health facilities division of the department of inspections and appeals to conform with physical standards, staffing requirements, and other licensing requirements to assess the potential for provision of quality care at the facility. When necessary, the applicant shall attempt to arrange an on-site visit to the facility to determine compliance with physical requirements, and shall provide documentation of this site visit or attempts to arrange such a site visit.

203.5(5) *Continuity.* (Iowa Code sections 135.64(1)“g,” “h,” “k”)

a. The applicant shall document the relationship of the facility’s proposed services to other health and long-term care services in the community such as physician and hospital services, habilitation, rehabilitation, transportation or other services. The facility should be capable of providing or arranging for the provision of a continuum of long-term care services.

b. The facility should be capable of providing or arranging for the provision of a comprehensive program of coordinated patient services. The applicant shall provide evidence of contracts for services, appropriate staffing patterns and ratios, and licensure of personnel as necessary.

203.5(6) *Accessibility and acceptability.* (Iowa Code sections 135.64(1)“c,” “d”)

a. Population subgroups which have traditionally been underserved, such as adolescents, the elderly, women, racial minorities, mentally ill, mentally retarded, and developmentally disabled should be considered when planning for or reviewing long-term care facilities.

b. The applicant shall document to what extent Medicaid patients will be served by the proposed beds, using past Medicaid utilization as an indicator or, in the case of a new facility, projecting anticipated Medicaid utilization.

203.5(7) *Costs and financial feasibility.* (Iowa Code sections 135.64(1)“e,” “f,” “i,” “p”)

- a. The applicant shall identify capital and operating costs associated with the project, identify sources of funding to cover those costs, and demonstrate that the project is financially feasible.
- b. Construction costs shall be in line with construction costs of other similar projects.
- c. The applicant shall provide budgets for the first three years of operation, including documentation of all assumptions used. The budget shall include anticipated sources of revenue, including the percentage of revenue from private pay, Medicaid, Medicare and other patient revenues.
- d. Proposed charges per patient day should be justifiable when compared to current charges of other similarly licensed facilities in the applicant’s service area, or other similar facilities elsewhere in the state. If charges are significantly higher or lower, the applicant shall provide a description of proposed programs or services which explain the difference in charges.

641—203.6(135) Bed need formula for mentally retarded.

203.6(1) Age—ten years to sixty-five years. It was determined that services for mentally retarded under age 10 would in most cases be met in the home and that in many cases not identified until approximately that age. For age 65 and older, the services needed would in most cases be similar to those of geriatric needs.

203.6(2) Levels of retardation in population.

a. Mildly retarded	2.6%
b. Moderately retarded	.3%
c. Severely and profoundly retarded	.1%
<hr/>	
% of mentally retarded in total population	3%

- 90% of “c” need services outside of home
- 50% of “b” need services outside of home
- 0% of “a” need services outside of home

203.6(3) Formula.

.1% (90%) = .09
 .3% (50%) = $\frac{.15}{.24} \div .03 = 8\%$

- (8% of mentally retarded population need services outside of home)
- 8% of mentally retarded population = number of ICF/RCF beds
- 20% of all beds = ICF/MR beds at state-operated institution
- 30% of all beds = ICF/MR community-based facilities
- 50% of all beds = residential type services for all types of facilities.

641—203.7(135) End-stage renal disease standards.

203.7(1) Purpose and scope.

a. These standards are measures of some of those criteria found in Iowa Code sections 135.64(1)“a” to “g.” Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against end-stage renal disease standards include:

- (1) Proposals to expand the number of renal dialysis stations or renal transplant services.
- (2) Proposals to add new transplant or dialysis services.
- (3) Any other applications which relate to end-stage renal disease services.

203.7(2) Definitions.

a. *Dialysis.* A process by which dissolved substances are removed from a patient’s body by diffusion from one fluid compartment to another across a semipermeable membrane. The two types of dialysis which are currently in common clinical practice are hemodialysis and peritoneal dialysis. In these rules a dialysis is used to mean one treatment.

b. Dialysis station. Any permanent or portable dialysis machine to a health care facility which is set up to service mainly ESRD patients. Back-up dialysis machines which are used for isolation and acute cases are excluded from the definition of dialysis station except where specifically mentioned in particular standards.

c. End-state renal disease (ESRD). That stage of renal impairment which is virtually always irreversible and permanent, and requires dialysis or kidney transplantation to ameliorate uremic symptoms and maintain life.

d. ESRD facility. A facility which is approved to furnish at least one specific ESRD service (see June 3, 1976 Federal Register 405.2102(f)). Such facilities are:

(1) Renal transplantation center. A hospital unit which is approved to furnish directly transplantation and other medical and surgical specialty services required for the care of the ESRD transplant patients, including inpatient dialysis furnished directly or under arrangement. A renal transplantation center may also be a renal dialysis center.

(2) Renal dialysis center. A hospital unit which is approved to furnish the full spectrum of diagnostic, therapeutic (including inpatient dialysis furnished directly or under arrangement), and rehabilitative services, except renal transplantation required for the care of ESRD dialysis patients.

(3) Renal dialysis facility. A unit which is approved to furnish dialysis services to ESRD patients. Renal dialysis facilities may be hospital or nonhospital based.

e. ESRD service. The type of care or services furnished to an ESRD patient. Such types of care are:

(1) Transplantation services. A process by which a kidney is excised from a live or cadaveric donor. Such kidney is implanted in an ESRD patient and supportive care is furnished to the living donor and to the recipient following implantation.

(2) Dialysis service.

1. Outpatient dialysis. Self-dialysis, which is performed with little or no professional assistance by a patient with appropriate training; and staff-assisted dialysis which is performed by the staff of the center or facility.

2. Inpatient dialysis. Dialysis which, because of medical necessity, is furnished to an ESRD patient on a temporary basis in a hospital.

3. Home dialysis. Dialysis performed at home by an appropriately trained ESRD patient.

f. Network, ESRD. An approved organized group of ESRD facilities in a designated geographic area which by their type and location, and because of local referral patterns, collectively furnish the necessary care for ESRD patients in the population served.

g. Organ procurement agency. An organization which performs, or coordinates the performance of, all the following services:

(1) Harvesting of donated kidneys;

(2) Preservation of donated kidneys;

(3) Transportation of donated kidneys;

(4) Maintenance of a system to locate prospective recipients for harvested organs.

203.7(3) Availability of services.

a. Renal dialysis centers and renal dialysis facilities. (Sections 135.64(1) “c,” “d,” “e,” “g,” “h”)

(1) Renal dialysis centers and renal dialysis facilities located within a standard metropolitan statistical area (SMSA) of 500,000 population or greater, which perform greater than 20 percent of dialyses on ESRD outpatients should have a minimum of six stations performing a minimum of 4.5 dialyses per station per week within three years of beginning operation or expanding.

(2) Renal dialysis centers and renal dialysis facilities, located within a SMSA or other service area of less than 500,000 population, which perform greater than 20 percent of dialyses on outpatients, should have a minimum of three stations performing a minimum of 4.0 dialyses per station per week within three years of beginning operation or expanding.

(3) Self-dialysis training stations which are used to successfully train at least six self-care or home dialysis ESRD patients per calendar year, and the dialyses performed on these stations, may be excluded from the calculation of utilization rates in standards (1) and (2).

(4) There should be no renal dialysis centers or renal dialysis facilities performing less than 20 percent outpatient dialyses.

(5) Each renal dialysis center and renal dialysis facility may have a reasonable number of back-up dialysis stations for isolation and acute cases.

b. Renal transplantation centers should perform 25 or more transplants annually and have a service area population of at least 2 million people.

c. Expansions. (Sections 135.64(1) “*c*,” “*d*,” “*e*,” “*g*,” “*h*”)

(1) There should be no additional renal dialysis centers or renal dialysis facilities, unless all stations within 90 minutes travel time are performing at a rate of at least 7 dialyses per station per week.

(2) There should be no expansions of an existing renal dialysis center or facility, unless that facility is performing at least 7 dialyses per station per week and the applicant’s projected cost studies demonstrate that an expansion of service capacity is more cost-effective (when operating capital costs are weighed) than offering the service at current capacity for two shifts per day.

(3) Self-dialysis training stations which are used to successfully train at least six self or home dialysis ESRD patients per calendar year, and the dialyses performed on these stations are to be excluded from the calculation of the previous standards (1) and (2).

(4) There should be no increase in the number of dialysis stations or centers if less than 35 percent of ESRD patients in the catchment area of that center or facility are on home or self-care dialysis, unless 100 percent of the ESRD dialysis patients at that center or facility have been evaluated by personnel or an appropriate training center for and where feasible entered into a program of home or self-dialysis training.

(5) New renal dialysis facilities or centers should be initiated only if the applicant can demonstrate a reasonably large unserved population within 90 minutes travel time of the proposed site.

(6) Each transplant center in the ESRD Network should perform a minimum of 50 transplants annually before additional transplant centers are open. (For the purpose of this document, the Veteran’s Administration Hospital at Iowa City and the University of Iowa Hospitals and Clinics are considered to be one transplant center.)

203.7(4) Cost. (Sections 135.64(1) “*f*,” “*i*,” “*p*”) Proposed new or expanded renal dialysis facility’s or renal dialysis center’s estimated cost per dialysis treatment should when compared to their peers, demonstrate cost-effectiveness.

203.7(5) Accessibility. (Sections 135.64(1) “*c*,” “*d*”) The service area for renal dialysis facilities and centers should be that area within 90 minutes travel time by auto of that facility or center.

203.7(6) Quality. (Sections 135.64(1) “*i*,” “*k*”) ESRD services shall meet all applicable federal quality control standards, as published in the June 3, 1976 Federal Register, “Renal Disease: Implementation of Coverage of Suppliers of End-Stage Services,” and “Federal Health Insurance for the Aged and Disabled: Requirements for Self-Dialysis Units and Self-Dialysis Services,” sections 405.2134, 405.2135, 405.2136, 405.2137, 405.2139, 405.2140, 405.2160, 405.2161, 405.2162, 405.2163, 405.2171.

203.7(7) Continuity. (Sections 135.64(1) “*g*,” “*h*,” “*i*,” “*k*”) Proposed new ESRD facilities and those ESRD facilities proposing expansions should have membership in an ESRD network.

203.7(8) Acceptability. (Section 135.64(1) “*k*”) Patients’ rights and responsibilities should be assured in accordance with the June 3, 1976 Federal Register, “Renal Disease: Implementation of Coverage of Suppliers of End-Stage Services,” section 405.2138.

These rules are intended to implement Iowa Code section 135.72.

641—203.8(135) Financial and economic feasibility.

203.8(1) Purpose and scope.

a. These standards are measures of some of those criteria ¹(a to q) found in Iowa Code section 135.64. Criteria ¹(a to q) which are measured by a standard are cited below:

Financial feasibility subrule 203.8(3), paragraph “*b*,” criteria ¹“*b*,” “*c*,” “*p*”; subrule 203.8(3), paragraph “*c*,” criteria ¹“*f*,” “*p*”; subrule 203.8(3), paragraph “*d*,” criteria ¹“*c*,” “*f*,” “*p*,” “*q*.”

Economic feasibility subrule 203.8(4), paragraph “*a*,” criteria ¹“*e*,” “*f*,” “*g*,” “*i*,” “*p*,” “*q*.”

b. Certificate of need applications which are to be evaluated against these financial and economic feasibility standards include institutional health facilities, as defined in Iowa Code section 135.61.

203.8(2) Definitions.

a. *Project.* The remodeling, replacing or equipping of existing buildings, as well as the building or equipping of new structures.

b. *Financial feasibility.* The applicant's demonstration that it has the money, or that it can reasonably expect to obtain moneys equal to the estimated project costs, to any debt associated with the project, and to the annual expenses of providing the service, as well as the demonstration of overall institutional financial strength.

c. *Financial ratio analysis.* Evaluation of the financial position of an organization through creating indexes of income, revenue, assets, liabilities, etc. Financial ratios can be classified into liquidity, capital structure, activity and profitability ratios. Financial ratios measure financial feasibility.

(1) Net margin. The net income (after taxes if the applicant is not tax-exempt) minus nonoperating revenue divided by gross revenue.

(2) Net operating margin. Net income (after taxes if the applicant is not tax-exempt) minus nonoperating revenue divided by total operating revenue.

(3) Current asset ratio (current ratio). Current assets divided by current liabilities.

(4) Debt ratio. Total long-term debts divided by total fixed assets.

(5) Debt service coverage. The total of net income, interest expense, amortization of financing costs, and depreciation plus amortization and interest divided by the annual debt service.

(6) Days revenue in accounts receivable. Gross accounts receivable divided by gross patient revenue divided by 365.

d. *Debt financing.* Any portion of the cost of projects to be financed through borrowing either at the time the project is undertaken or at anytime subsequent thereto.

e. *(Gross) revenue.* Total of operating and nonoperating revenues.

f. *Nonoperating revenues.* Revenues not related to patient care or normal day-to-day operations, including unrestricted gifts, unrestricted endowments, income from the sale of a fixed asset, unrestricted income from a restricted or unrestricted fund, rental of facilities not used in operation, etc. (restricted funds are specifically excluded, unless expended during the accounting period, in which case they are accounted for either as operating or nonoperating revenues).

g. *Operating revenues.* Net patient service revenues (patient revenues minus deduction for charity, contractual and bad debt allowances) and other operating revenues.

h. *Excess (or deficiency) of gross revenues over (or under) expenses.* Net income.

i. *Excess (or deficiency) of operating revenues over (or under) expenses.* Net operating income.

j. *Economic feasibility.* The applicant's demonstration that its project will provide for the allocation of scarce resources within a community in a manner that is of maximum benefit to that community, in other words demonstration that the project will be cost-effective and will contain health care costs to the greatest extent possible.

k. *Expense.* An expired cost (cost = price paid for operations and assets, including leased assets vis-a-vis cash outlay, indebtedness incurred, or cash equivalent) incurred directly or indirectly in earning revenue. Expenditures may be expended over many years.

l. *Asset.* Economic potentials from which future benefits are expected to result, include leased capital equipment.

m. *Liabilities.* Debts or obligations.

n. *Gross patient revenues.* Patient service revenues before allowances for bad debt and charity and contracts.

o. *Debt service.* The payment of matured interest and principal; the outlay needed, supplied, or accrued for meeting such payments during any given accounting period; a budget or operating statement heading such items.

p. *Current assets.* Liquid assets which can be expected to directly or indirectly be converted into cash within one year or the operating cycle, whichever is longer (includes leased assets).

203.8(3) Financial feasibility analysis.

a. The applicant will provide financial feasibility analysis of the project's (facility's) past and projected costs, as requested by the Iowa department of public health.

b. The applicant shall show evidence of sound financial planning.

(1) If the sponsor has a long-range institutional plan, the project should be consistent with it. If the sponsor has no long-range institutional plan, the applicant shall demonstrate that the proposal helps meet the long-range needs of the community.

(2) The project should be consistent with the sponsor's three-year capital expenditure plan which all hospital and skilled nursing facilities must have.

c. The applicant shall demonstrate the financial feasibility of the services (institution) at completion and, shall show evidence of sound historical, financial, and operational management.

(1) The net operating margin should be positive. If a net loss is projected following completion of the project, an explanation of source funds should be given. Institutions funded by tax levy or endowment shall demonstrate that money from those sources has been historically applied to cover operating expenses if those institutions have a negative net operating margin.

(2) The net margin should be positive. If net loss is projected an explanation of source funds should be given.

(3) The past and projected current ratio should be at least 2:1.

(4) Past and projected debt service coverage ratio should be at least 2:1.

(5) The debt financing of a project should not increase the debt ratio above .8 unless debt service payments will derive from sources other than operating revenues.

(6) Days revenues in accounts receivable should not have been more than 65 days.

(7) If third party payment can be expected for the project, then some documentation indicating that the type of project which is proposed is generally third party reimbursable should be provided.

d. Sponsors shall show evidence of past efficient utilization. Standards (1) and (2) below apply to hospital project applications for:

—Construction of new acute care beds;

—Modernization or renovation of acute care beds/patient nursing units;

—Conversion of acute care beds from one service use to another;

—Addition to the square footage space of the hospital, where it might be architecturally feasible and cost-effective to convert excess bed space.

(1) Hospitals should have been no lower than 5 percent below the implicit target occupancy rate according to the bed need formula for the last year. Additionally hospitals with lower than target occupancy rates should show a trend during the last three years of increasing occupancy rates. This 5 percent refers to deviation on a scale of 1-100 percent and not to 5 percent of the target occupancy rate itself. Long-term care facilities should have had a 90 percent average occupancy for the last three years.

(2) Hospitals should have an average length of stay by service no greater than 10 percent above the average of their size category for the last three years.

Standards (1) and (2) above do not amend rule 641—203.1(135) acute bed care need methodology. But are additional measures of financial viability which supplement rule 641—203.1(135).

(3) Prior to the project's initiation, the full-time equivalent employees per adjusted patient day as reported in the most recent American Hospital Association Hospital Statistics should be no greater than 110 percent of the state average for hospitals of similar size. Categories of hospitals of similar size are:

<u>Beds</u>
6-24
25-49
50-99
100-199
200-299
300-399
400-499
500+

Adjusted patient day as used here is defined in Hospital Statistics, AHA, 1978.

Nursing homes shall meet regulations for licensure personnel requirements.

(4) Prior to initiation of a project, the cost per patient day of a hospital should be within 10 percent of the state average for hospitals within that size category. (See standard 203.8(3)“d”(3) for size categories.) An applicant's costs, which are incurred as a result of shared service contracts with other entities, and which are not charged to patients within the applicant's facility should not be included in the estimation of costs per patient day.

203.8(4) *Economic feasibility.*

a. The project as proposed shall be cost-effective.

(1) The applicant should demonstrate that the project represents the most cost-effective alternative. Such alternatives include, among others, new construction versus renovation and new service versus shared or contracted services.

(2) The applicant should demonstrate that of the financing methods available, the financing method chosen is the least costly alternative.

(3) Applicants shall demonstrate that construction or renovation costs are reasonable when compared to similar projects of the most recent year.

(4) The net operating margin should not exceed a percentage sufficient to provide for the organization's financial requirements, as defined in “Financial Requirements of Health Care Institutions and Services” (American Hospital Association, S031, February 1979), and limited by existing reimbursement payors.

(5) Facilities should show evidence that they have considered alternate energy sources within their institutions; and energy efficiency in project construction design.

b. Reserved.

This rule is intended to implement Iowa Code section 135.74.

¹ Iowa Code section 135.64(1).

641—203.9(135) Obstetrical services and neonatal intensive care unit standards.

203.9(1) *Purpose and scope.*

a. These standards are measures of some of those criteria 1(a to q) and 3 found in Iowa Code section 135.64. Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications for new institutional, or changed institutional health services, which are to be evaluated by the standards in this section, are those applications to:

- (1) Offer new, discontinue, or change the level of perinatal services;
- (2) Construct, develop, offer new, modernize, replace, renovate or relocate neonatal intensive care services;
- (3) Expand bed capacity in neonatal intensive care units.

203.9(2) Definitions.

a. “*Perinatal services*” means the facilities, equipment and personnel which provide fetal, neonatal, and maternal care from the first indication of pregnancy up through and including birth and to the time when mother and infant are in stable health. Perinatal services in acute care facilities are classified by the Iowa department of public health into three levels of centers. For detailed descriptions of what constitutes levels of obstetrical and neonatal services, reference Standards for Perinatal Centers (most recent edition), Iowa department of public health.

(1) Level I perinatal centers are hospitals whose function it is to provide neonatal nursery and obstetrical services for uncomplicated newborn and maternity patients. Certain level I centers with large numbers of births may offer some of those neonatal and obstetrical services associated with regional level II perinatal centers.

(2) Regional level II perinatal centers are designated hospitals whose responsibility is to provide care for the majority of complicated/high-risk fetal, neonatal and maternal patients in their areas. Regional level II referral area facilities have:

1. A defined referral area;
2. An educational outreach program; and
3. Staffing for maternal and neonatal emergency transport in the referral area.

Regional level II perinatal centers also provide level I neonatal and obstetrical services.

(3) Level III perinatal centers are designated hospitals whose priority responsibility is to provide tertiary care for all types of fetal neonatal and maternal illnesses and abnormalities. Tertiary responsibilities are to provide:

1. Consultation to level I and level II centers;
2. Transportation from level I and level II centers;
3. Continuing education and training for level I and level II centers.

Level III centers also provide level I and level II perinatal services.

b. “*Obstetrical unit*” means the labor, delivery, post partum, auxiliary facilities and primary care nursery unit in any perinatal center. The intensity of obstetrical services differs between the three levels of perinatal centers. Intensity means the kinds of personnel and equipment, and to a lesser extent physical facilities available, and is related to the number of births occurring at a facility. Auxiliary facilities include, but are not limited to, scrub facilities, equipment rooms, formularies, sterilization facilities, and drug distribution stations.

c. “*Neonatal intensive care unit*” means a nursery unit for neonates who are critically ill or of extremely high risk.

203.9(3) Availability.

a. Relationship of perinatal centers to Iowa department of public health’s perinatal standards committee.

(1) Each hospital submitting an application shall identify in writing the level of care at which the state health plan classifies that hospital’s perinatal services, as identified by the Iowa department of public health’s perinatal standards committee.

(2) In addition to meeting the standards which follow, each applicant which seeks to change the level of care at which the state health plan classifies its perinatal services should submit to the department, during the letter of intent period, additional information in which the applicant describes the degree of conformance with the perinatal standards for the level of care that it seeks to deliver.

(3) Upon receipt of the additional information, the staff to the health facilities council shall seek a recommendation of the perinatal standards committee as to the applicant’s conformance to the standards.

b. Minimum utilization—neonatal intensive care units. Each regional perinatal center service area should have no more than four neonatal intensive care beds per 1,000 live births.

c. Expansions. Applications for expanding or starting new neonatal intensive care units should not receive approval unless they have received the endorsement of the Iowa department of public health’s perinatal standards committee. Such endorsement should be accompanied by an analysis of the impact the new beds will have on the occupancy rates of other neonatal intensive care units in the same referral area.

203.9(4) Costs. See financial and economic feasibility standards, 641—203.8(135).

203.9(5) Accessibility.

a. Travel time to a level I obstetrical unit should not exceed 30 minutes for 80 percent of the population served by that unit.

b. Services should be provided regardless of ability to pay, in consideration of those programs available in the state which serve the medically indigent.

203.9(6) Quality. Facilities should meet those Standards for Perinatal Centers (most recent edition), Iowa department of public health, for the levels of care which they provide.

203.9(7) Continuity. Facilities should meet those Standards for Perinatal Centers (most recent edition), Iowa department of public health, for the levels of care which they provide.

203.9(8) Acceptability. Facilities with neonatal and obstetrical services shall document a willingness to observe and respect the rights of patients. Provisions for counseling services shall be available.

This rule is intended to implement Iowa Code section 135.64.

641—203.10(135) Designated pediatric units standards.

203.10(1) Purpose and scope.

a. These standards are measures of some of those criteria 1¹(a to q) found in Iowa Code section 135.64. Criteria 1¹(a to q) which are measured by a standard are cited in parentheses, following each standard.

b. Certificate of need applications for new institutional or changed institutional health services, which are to be evaluated by the standards in this rule, are those applications to:

(1) Construct, develop, offer new, modernize, replace, renovate or relocate designated pediatric units, services and equipment;

(2) Expand bed capacity in designated pediatric units.

203.10(2) Definitions.

a. Designated pediatric units. A designated set of hospital facilities with equipment and personnel planned for the care of infants (other than newborn) and children (usually less than 16 years of age). According to 641—Chapter 51 of the Iowa Administrative Code, pediatric units constructed after 1976 have in addition to patient rooms, nurseries, nursery workrooms, examination and treatment room for nurseries; multipurpose rooms for dining, education and play; space for preparation and storage of infant formula; patient toilet room(s) convenient to multipurpose room equipment; and storage space for replacement of youth and adult beds to provide for swing capacity. Nurse staffing for pediatric units should have special training in pediatrics. While usable bed capacity in a section of a facility may be a designated pediatric unit, beds in that unit may be swung when peak patient census demands such.

b. Swing bed. Acute care beds which may serve adult medical/surgical patients, and pediatric patients, depending upon the patient census.

203.10(3) Availability.*a. Minimum utilization.* (Sections 135.64(1) “c,” “g,” “h”)

(1) All designated pediatric units should operate at least at the following minimum occupancy rates:

<u>Beds</u>	<u>% Occupancy</u>	<u>Beds</u>	<u>% Occupancy</u>
< 10.....	60%	32-35	68%
11-13.....	61%	36-39	69%
14-15.....	62%	40-47	70%
16-17.....	63%	48-55	71%
18-19.....	64%	56-63	72%
20-23.....	65%	64-71	73%
24-27.....	66%	72-79	74%
28-31.....	67%	80+	75%

Facilities which cannot justify a designated pediatrics unit based on the above minimum occupancy rates are encouraged to care for pediatric patients in medical surgical beds.

b. Expansions. (Sections 135.64(1) “c,” “d,” “e,” “g,” “h”)

(1) Designated pediatric units in a multihospital community should be operating at least at the minimum occupancy levels of 203.10(3) “a”(1) before additional beds are approved. Expansion of designated pediatric units in a multihospital community which has units running at less than the minimum occupancy rates of 203.10(3) “a”(1) and expansion of designated pediatric units which would likely cause other units in the community to operate at less than the minimum occupancy rates should be approved only if such expansions reflect the outcome of a community planning effort which includes recommendations to adopt the least long run cost method of providing designated pediatric services in the community.

203.10(4) Costs. See financial and economic feasibility standards, 641—203.8(135).

203.10(5) Accessibility. (Sections 135.64(1) “c,” “d”)

a. Surface travel time to a designated pediatric unit in a service area should not exceed 60 minutes for 80 percent of Iowa’s population.

b. Services should be provided regardless of ability to pay, in consideration of those programs available in the state which serve the medically indigent.

203.10(6) Quality. (Sections 135.64(1) “i,” “k”) The proposal should meet all applicable licensure regulations.

203.10(7) Continuity. (Sections 135.64(1) “g,” “h,” “i,” “k”)

a. The applicant should provide documentation that physician’s services are available 24 hours a day, and that registered nursing services are available on-site 24 hours a day.

b. Facilities with designated pediatric units should include mechanisms for comprehensive medical follow-up, including medical records exchange.

203.10(8) Acceptability. (Section 135.64(1) “c”) Facilities with pediatric services shall document a willingness to observe and respect the rights of patients as stated in the “Patients Bill of Rights” adopted by the American Hospital Association, February 6, 1973, and reprinted in 1975.

This rule is intended to implement Iowa Code sections 135.61 to 135.83.

¹ Iowa Code section 135.64(1).

641—203.11(135) Designated inpatient substance abuse treatment unit standards.**203.11(1) Purpose and scope.**

a. These standards are measures of some of those criteria found in Iowa Code section 135.64(1) “a” to “g.” Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against these standards include applications to:

(1) Construct, develop, offer new, modernize, replace, renovate, or relocate designated inpatient substance abuse treatment units and services.

(2) Expand bed capacity in designated inpatient substance abuse treatment units.

203.11(2) Definition. Designated inpatient substance abuse treatment unit is a designated set of hospital facilities with patient beds, equipment and personnel designed for the treatment and rehabilitation of patients for whom the primary diagnosis is alcohol abuse or dependence or other drug abuse or dependence. Units designated strictly for detoxification are not considered a treatment unit as defined in this standard.

203.11(3) Availability and need. (Iowa Code sections 135.64(1) “c,” “d,” “e,” “g,” “h”)

a. The following formula shall be used as a means of projecting current utilization of inpatient substance abuse treatment services into the future and shall serve as an approximation of the number of beds needed to serve the projected population.

$$\text{Bed Need} = \frac{\text{Population by Thousand}}{80\% \text{ Occupancy}} \times \frac{\text{Patient Days per Thousand Population}}{365}$$

The formula shall be calculated separately for community hospitals and state mental health institutes. The methodology for applying the formula shall be as follows.

(1) Bed need shall be calculated annually for a period five years into the future.

(a) “Population by thousand” refers to department of economic development population projection for five years into the future.

(b) For calculating community hospital bed need, “patient days per thousand population” is calculated by dividing the total patient days in all community hospital-based substance abuse treatment units during the past year (as reported on the annual hospital survey by the department of health) by the state population for that year as projected by the department of economic development.

(c) Applying the figures from (1)(a) and (1)(b) in the formula will project a statewide total of likely bed need for community hospital substance abuse treatment units, based on current utilization.

(d) For calculating mental health institute bed need, “patient days per thousand population” is calculated by dividing the total patient days in the four mental health institute substance abuse treatment units (as reported to the department of human services) by the state population for that year as projected by the department of economic development.

(e) Applying the figures from (1)(a) and (1)(d) in the formula will project a statewide total of likely bed need for mental health institute substance abuse treatment units based on current utilization.

(2) For purposes of comparing “need” to “existing” beds in community hospitals, the state shall be divided into eight planning districts, as used by the department of human services.

(a) The total number of beds derived in (1)(c) above for likely bed need for community hospital units shall be divided by the projected state population in thousands to derive beds needed per thousand population.

(b) For each district, the factor in (2)(a) above shall be multiplied by the projected population by thousand in that district for a district bed need.

(c) To determine number of existing beds in a given district, the number of substance abuse treatment beds at all community hospitals in that district shall be added together. The number of beds at each facility shall be the number of licensed or registered beds in the substance abuse treatment unit, as reported on the annual hospital survey to the Iowa department of public health.

(3) For purposes of comparing “need” to “existing” beds in mental health institutes, the total number of beds derived in (1)(e) above for likely bed need for MHI units will be compared to the total of the existing substance abuse treatment beds at the four MHIs in the state as reported on the Iowa department of public health annual survey.

b. In documenting need for a project, the applicant shall identify the service area and target population, including a description of the methodology used by the applicant in determining need for the requested beds, the expected sources of referrals, and expected average length of stay. The applicant shall document that the number of beds requested is appropriate to the modality of treatment being proposed. The applicant shall also identify where the target population has received services in the past.

c. The availability and utilization of other services in the area (e.g., inpatient, outpatient, and residential services) shall be considered in the determination of need. The applicant shall describe the relationship of the proposed service to existing services and describe what impact the proposed service will have on similar or alternate services in the district.

d. Existing hospital-based substance abuse treatment programs in the district should be running at least 85 percent occupancy in units of less than 20 beds and at least 90 percent occupancy in units of 20 beds or more before any additional inpatient substance abuse treatment beds are approved.

e. A hospital seeking expansion of a substance abuse treatment unit must demonstrate that its occupancy has been greater than 90 percent for the past two years.

f. Applicants must be able to project an annual 70 percent occupancy rate in the unit for the second year of operation and must be able to project an 80 percent occupancy rate in the unit by the third year of operation.

203.11(4) Quality. (Iowa Code sections 135.64(1) "i," "k")

a. Staffing for an inpatient substance abuse treatment unit should minimally consist of:

(1) Medical director. The applicant shall document that the physician has specific knowledge and special interest in the area of substance abuse and several years of experience and training in the treatment of substance abusers. Physician backup must be available on a 24-hour basis.

(2) Administrative director. The applicant shall document that the director, if other than the medical director, has experience in hospital administration or substance abuse treatment and rehabilitation.

(3) Nursing personnel must staff the unit on a 24-hour basis. The applicant shall document that the RNs and LPNs have had or will be provided with specific training in the area of substance abuse treatment.

(4) Counselors. The applicant shall document the availability of chemical dependency counselors who are certified or have equivalent qualifications in training, education, and experience.

(5) Psychiatrist or psychologist should be available on staff or on a contract basis. The applicant shall document that the psychiatrist or psychologist has shown a continued interest in the area of substance abuse treatment and has experience in dealing with chemically dependent patients.

(6) Family therapist(s): The program shall employ or contract with a family therapist(s) that has completed a chemical dependency counselor training program with emphasis on family involvement; or has a master's level in family social work, family counseling or other appropriate fields; or has the equivalent in training or experience.

(7) Other ancillary personnel. The program should have access to other personnel such as social workers, dietitians, recreational therapists, occupational therapists, physical therapists, and other ancillary services as needed.

b. All inpatient programs shall develop and utilize specific written admission criteria. A good example of such criteria is that developed by the Iowa Foundation for Medical Care.

c. The program shall have a written evaluation system and be capable of providing treatment process and outcome data to evaluate the quality and effectiveness of the program at least once annually.

203.11(5) Continuity. (Iowa Code sections 135.64(1) "g," "h," "k")

a. The applicant shall have formal referral arrangements with existing diagnosis and referral services, and detoxification services.

b. If outpatient services are available, the applicant shall provide a description of the circumstances under which a client would be accepted for inpatient treatment rather than entered into the outpatient program. The applicant shall also describe the circumstances under which a patient would be referred from inpatient to outpatient care and should have referral arrangements for outpatient services.

c. The applicant shall document that aftercare or continuing care services will be provided by the facility on a long-term basis or that such services will be provided through referral arrangements.

For patients leaving the vicinity of the hospital to return to their home communities, the applicant shall indicate what arrangements will be made to provide for aftercare.

203.11(6) Accessibility and acceptability. (Iowa Code sections 135.64(1)“c,” “d”) Population subgroups which have traditionally been underserved, such as adolescents, the elderly, women, and racial minorities, should be considered when planning for or reviewing inpatient treatment programs.

203.11(7) Costs and financial feasibility. (Iowa Code sections 135.64(1)“e,” “f,” “i,” “p”)

a. The applicant shall document that for the target population, hospital-based inpatient care is warranted. The applicant shall demonstrate that alternatives were considered and that there is no less costly acceptable mode of treatment.

b. Charges per patient day should be justifiable when compared to current charges of other inpatient substance abuse treatment programs in the state.

c. The applicant should outline the anticipated sources of reimbursement in preparing the program’s projected budget, indicating the percentage of patient days allocated to indigent clients, Medicare clients, private pay clients, privately insured clients or others.

d. Conversion projects will be considered preferable to new construction unless documentation of cost-savings is presented, or other factors to be specified by the applicant prohibit such conversion.

This rule is intended to implement Iowa Code section 135.64.

641—203.12(135) Magnetic resonance imaging services standards.

203.12(1) Purpose and scope.

a. These standards are measures of some of those criteria in Iowa Code sections 135.64(1)“a” to “q.” Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against these standards include:

- (1) Proposals to commence or expand the capacity of magnetic resonance imaging services.
- (2) Proposals to replace a magnetic resonance imaging unit.
- (3) Any other applications which relate to magnetic resonance imaging.

203.12(2) Definitions.

“Area” means the community or a metropolitan statistical area (as defined by the U.S. Office of Management and Budget and used by the U.S. Census Bureau).

“CT (computed tomography) procedure” means a CT study of a single site of anatomic interest during an individual patient visit.

“Magnetic resonance imaging (MRI)” means a diagnostic modality which employs a combination of magnetic and radio frequency fields and computers to produce images of body organs and tissues.

“MRI procedure” means each discrete MRI study of one patient.

“MRI unit” means the essential equipment and facility necessary to operate one MRI system.

203.12(3) Availability and need. (Iowa Code sections 135.64(1)“c,” “d,” “e,” “g,” “h”)

a. Applicants in areas with no other MRI units. Applicant must document a CT procedure volume of at least 4,500 CT procedures during the most recent calendar or fiscal year period. For purposes of calculating the volumes required, the applicant may use the combined total of more than one facility if the application involves joint ownership of the equipment, or the applicant provides evidence of referral arrangements for the proposed MRI service from the facilities whose procedure or patient volumes are included in the calculations.

b. Applicants in areas with one or more MRI units currently in operation or approved by certificate of need for operation.

(1) Applicant must meet the requirement of need described in 203.12(3)“a” and

(2) The other MRI unit(s) within the area must have been operating at a minimum of 3,000 MRI procedures annually (or 750 in three months), or proportionately more if the MRI unit runs more than one ten-hour shift.

(3) If the annual utilization of the other MRI unit(s) within the area has been below 3,000 procedures, future utilization above that current level must be reasonably projected or reasons for permanently utilizing the equipment below the 3,000 procedure level must be demonstrated.

c. Applicants seeking to replace an MRI unit.

(1) The applicant must demonstrate that the existing MRI unit has been operating at the level of at least 3,000 procedures during the most recent annual period.

(2) If the applicant's annual utilization has been below 3,000 procedures, the applicant must reasonably project future utilization above that level or demonstrate reasons for permanently utilizing the equipment below that level.

d. Applicants seeking to add an additional MRI unit.

(1) The applicant must demonstrate that the existing MRI unit(s) has been operating at the level of at least 3,500 procedures during the most recent annual period.

(2) The applicant must demonstrate that the demand significantly exceeds the 3,500 procedures annually.

e. The provisions of subrule 203.12(3) shall be effective until June 30, 1995. Prior to that time the Iowa department of public health shall reconvene a task force to recommend continuing use of the need methodology outlined or develop a new or revised methodology to use in projecting future MRI needs. The department shall promulgate a new subrule 203.12(3) accordingly.

203.12(4) *Quality and continuity.* (Iowa Code sections 135.64(1) "g," "h," "i," "k")

a. The proposed MRI unit must function as a component of a comprehensive inpatient or outpatient diagnostic service. The proposed MRI unit must have the following modalities on-site or through referral arrangements:

- (1) Ultrasound
- (2) Computed tomography — whole body unit
- (3) Angiography
- (4) Nuclear medicine
- (5) Conventional radiography

b. The proposed MRI unit must be located in a facility which has, either in-house or through referral arrangement, the resources necessary to treat most of the conditions diagnosed or confirmed by MRI. The following medical specialties must be available during MRI service hours on-site or by referral arrangements: neurology or neurosurgery, oncology and cardiology.

c. A proposal to provide new or expanded MRI must include satisfactory assurances that the services will be offered in a physical environment that conforms to federal standards, manufacturer's specifications, and licensing agencies' requirements.

d. The applicant must provide evidence that the proposed MRI equipment has been certified for clinical use by the U.S. Food and Drug Administration or will be operated under an institutional review board whose membership is consistent with U.S. Department of Health and Human Services regulations.

e. Applicants for MRI shall document that the necessary qualified staff are available to operate the proposed unit. The following minimum staff shall be available to the MRI unit:

1. A full-time board eligible or board certified radiologist or nuclear medicine imaging physician or any other board eligible or board certified licensed physician whose exclusive responsibility for at least a two-year period prior to submission of a certificate of need request has been in the acquisition and interpretation of clinical images. This individual shall have a knowledge of MRI through training, experience, or documented postgraduate education. The individual shall also have training with a functional MRI facility.

2. Qualified engineering personnel, available to the institution during MRI service hours, with training and experience in the operation and maintenance of the MRI equipment.

3. Diagnostic radiologic technologists or other certified technologists with expertise in computed tomography or other cross-sectional imaging methods, at a staffing level consistent with the hospital's expected MRI service volume.

4. Other appropriate physicians shall be available during MRI service hours in clinical specialties such as neurology or neurosurgery, oncology and cardiology.

f. The applicant shall demonstrate how emergencies within the MRI unit will be managed in conformity with accepted medical practice.

203.12(5) *Accessibility and acceptability.* (Iowa Code sections 135.64(1) "c," "d")

a. MRI facilities should have adequate scheduled hours to avoid an excessive backlog of cases and MRI shall be available 24 hours a day, seven days a week on an emergency (on-call) basis.

b. Selection of patients for clinical MRI studies must guarantee equal access to all persons regardless of insurance coverage or ability to pay.

c. In addition to accepting patients from participating institutions, facilities performing clinical MRI procedures shall accept appropriate referrals from other local providers. These patients shall be accommodated to the extent possible by extending the hours of service and by prioritizing patients according to standards of need and appropriateness rather than source of referral.

203.12(6) *Costs and financial feasibility.* (Iowa Code sections 135.64(1) “*e*,” “*f*,” “*i*,” “*p*”)

a. The applicant shall identify capital and operating costs associated with the proposed MRI unit, identify sources of funding to cover those costs, and demonstrate that the project is financially feasible.

b. The applicant shall provide budgets for the first three years of operation, including documentation and justification of all assumptions used.

c. The applicant must document its projected average cost per procedure and charge per procedure for the first three years. Charges for MRI should be reasonably related to service cost, and comparable to MRI charges at other facilities in the state.

d. The applicant shall demonstrate that alternatives were considered and the proposed application is the most cost-effective and will accomplish the goals of the project.

e. To provide a data base for evaluation of subsequent MRI applications by the health facilities council, applicants granted a certificate of need shall provide to the certificate of need office the following data upon request of the Iowa department of public health. The department will request the following data on an annual basis.

1. Total number of procedures performed;
2. Total number of inpatient procedures;
3. Total number of outpatient procedures;
4. Average charge per procedure;
5. Hours of operation of the MRI unit;
6. Total revenues and expenses for the MRI unit for the year.

This rule is intended to implement Iowa Code section 135.64.

641—203.13(135) Positron emission tomography services standards.

203.13(1) *Purpose and scope.*

a. These standards are measures of some of those criteria in Iowa Code sections 135.64(1) “*a*” to “*q*.” Criteria which are measured by a standard are cited in parentheses following each standard.

b. Certificate of need applications which are to be evaluated against these standards include:

- (1) Proposals to commence or expand the capacity of positron emission tomography services.
- (2) Proposals to replace a positron emission tomography unit.
- (3) Any other applications which relate to positron emission tomography.

203.13(2) *Definitions.*

“*Area*” means the community or a metropolitan statistical area (as defined by the U.S. Office of Management and Budget and used by the U.S. Census Bureau).

“*CT (computed tomography)*” means an imaging method in which a cross-sectional image of the structures in a body plane is reconstructed by a computer program from the X-ray absorption of beams projected through the body in the image plane.

“*Cyclotron*” means an apparatus for accelerating protons or neutrons to high energies by means of a constant magnet and an oscillating electric field.

“*MRI (magnetic resonance imaging)*” means a diagnostic modality which employs a combination of magnetic and radio frequency fields and computers to produce images of body organs and tissues.

“*Radiopharmaceutical*” means a radioactive pharmaceutical used for diagnostic or therapeutic purposes.

“*PET procedure*” means an image-scanning sequence derived from a single administration of PET, equated with a single injection of the tracer.

“*Positron emission tomography (PET)*” means an imaging method in which positron-emitting radionuclides, which are produced either by a cyclotron or generator, and a nuclear camera are used to create pictures of organ function rather than structure. PET installations generally take one of two forms: a PET scanner using only generator-produced tracers (basic PET unit), or a PET scanner with a cyclotron (enhanced PET unit).

“*SPECT (single photon emission computed tomography)*” means a camera-based imaging system using the radionuclides in the routine practice of nuclear medicine.

203.13(3) Availability and need. (Iowa Code sections 135.64(1) “c,” “d,” “e,” “g,” “h”)

a. Applicants in areas with no other basic or enhanced PET units.

(1) Applicants should demonstrate a reasonable potential utilization of a PET unit based on diversified inpatient and outpatient case mix thresholds including:

1. Intracranial cases

- Primary brain tumors 50/year
- Metastasis 100/year
- Cerebral vascular disease 200/year
- Organic brain disease and dementia/psychiatric diagnoses (including epilepsy-seizure disorders) 500/year

- Spinal 100/year

2. Cardiovascular cases

- Ischemic heart disease (including acute and chronic infarction) 1200/year

3. Neoplasms (head, neck, thorax (excluding heart), abdomen, pelvic and musculoskeletal) 1300/year

4. If the application is for a basic unit, the above case mix and numbers should be adjusted according to the proposed use of the unit.

(2) Applicants should have other diagnostic capabilities, on-site or through referral arrangements, with appropriate volumes including:

	<u>Proposed Threshold</u>
Nuclear medicine imaging services	7,000
Single photon emission computed tomography (including brain, bone, liver, Gallium and Thallium stress)	2,000
CT	10,000
MRI	3,000
Cardiac angiography	1,500
Cardiac ultrasound	7,000

(3) Applicants must demonstrate secondary and tertiary service capability, on-site or through referral arrangements, including cardiac surgery, cardiology, internal medicine, general surgery, hematology/oncology, neurology, pathology, thoracic surgery and psychiatry.

b. Applicants in areas with one or more basic or enhanced PET units currently in operation or approved by the certificate of need program for operation.

(1) Applicant should have access to cyclotron-produced radiopharmaceuticals.

(2) Existing PET units within the area (whether basic or enhanced) must have been operating at a minimum of 1000 PET procedures during the most recent annual period as reported to the certificate of need program according to 203.13(6) “e.”

c. The provisions of subrule 203.13(3) shall be effective until June 30, 1995. Prior to that time the Iowa department of public health shall reconvene a task force to recommend continuing use of the need methodology outlined or develop a new or revised methodology to use in projecting future PET needs. The department shall promulgate a new subrule 203.13(3) accordingly.

203.13(4) Quality and continuity. (Iowa Code sections 135.64(1) “g,” “h,” “i,” “k”)

a. The proposed PET unit must function as a component of a comprehensive inpatient or outpatient diagnostic service. The proposed PET unit must have the following modalities (and capabilities) on-site or through referral arrangements:

- (1) Computed tomography — (whole body)
- (2) Magnetic resonance imaging — (brain and whole body)
- (3) Nuclear medicine — (cardiac, SPECT)
- (4) Conventional radiography

b. The proposed PET unit must be located in a facility which has, either in-house or through referral arrangement, the resources necessary to treat most of the conditions diagnosed or confirmed by PET. The following medical specialties must be available during PET service hours on-site or by referral arrangements: cardiology, neurology, neurosurgery, oncology, and psychiatry.

c. A proposal to provide new or expanded PET must include satisfactory assurances that services will be offered in a physical environment that conforms to federal standards, manufacturer's specifications, and licensing agencies' requirements. The following areas are to be addressed:

- (1) Quality control and assurance of radiopharmaceutical production of generator or cyclotron-produced agents;
- (2) Quality control and assurance of PET tomograph and associated instrumentation;
- (3) Radiation protection and shielding;
- (4) Radioactive emissions to the environment.

d. The applicant must provide evidence that the proposed PET equipment has been certified for clinical use by the U.S. Food and Drug Administration or will be operated under an institutional review board whose membership is consistent with U.S. Department of Health and Human Services regulations.

e. Applicants for PET shall document that the necessary qualified staff are available to operate the proposed unit. The applicants shall document the PET training and experience of the staff. The following minimum staff shall be available to the PET unit:

(1) One or more nuclear medicine imaging physician(s) available on a full-time basis to the PET unit who have been licensed by the state for the handling of medical radionuclides and whose primary responsibility for at least a one-year period prior to submission of the certificate of need application has been in acquisition and interpretation of tomographic images. This individual shall have knowledge of PET through training, experience, or documented postgraduate education. The individual shall also have training with a functional PET facility.

(2) Qualified PET radiochemist or radiopharmacist personnel, available to the facility during PET service hours, with at least one year of training and experience in the synthesis of short-lived positron-emitting radiopharmaceuticals. The individual(s) shall have experience in the testing of chemical, radiochemical, and radionuclidic purity of PET radiopharmaceutical syntheses.

(3) Qualified engineering and physics personnel, available to the facility during PET service hours, with training and experience in the operation and maintenance of the PET equipment.

(4) Qualified radiation safety personnel, available to the facility at all times, with training and experience in the handling of short-lived positron-emitting nuclides.

(5) Certified nuclear medicine technologists with expertise in computed tomographic nuclear medicine imaging procedures, at a staffing level consistent with the proposed center's expected PET service volume.

(6) Other appropriate physicians shall be available during PET service hours which may include certified nuclear medicine technologists, computer programmers, nurses, and radiochemistry technicians.

f. The applicant shall demonstrate how emergencies within the PET unit will be managed in conformity with accepted medical practice.

203.13(5) Accessibility and acceptability. (Iowa Code sections 135.64(1) "c," "d")

a. PET facilities should have adequate scheduled hours to avoid an excessive backlog of cases.

b. Selection of patients for clinical PET studies must guarantee equal access to all persons regardless of insurance coverage or ability to pay.

c. In addition to accepting patients from participating institutions, facilities performing clinical PET procedures shall accept appropriate referrals from other local providers. These patients shall be accommodated to the extent possible by extending the hours of service and by prioritizing patients according to standards of need and appropriateness rather than source of referral.

203.13(6) Costs and financial feasibility. (Iowa Code sections 135.64(1)“e,” “f,” “i,” “p”)

a. The applicant shall identify capital and operating costs associated with the proposed PET unit, identify sources of funding to cover those costs, and demonstrate that the project is financially feasible.

b. The applicant shall provide budgets for the first three years of operation, including documentation and justification of all assumptions used.

c. The applicant must document its projected average cost per procedure and charge per procedure for the first three years. Charges for PET should be reasonably related to service cost and comparable to PET charges at other facilities in the state.

d. The applicant shall verify whether the service is eligible for reimbursement by public and private third-party payers.

e. The applicant shall demonstrate that alternatives were considered and the proposed application is the most cost-effective and will accomplish the goals of the project.

f. To provide a data base for evaluation of subsequent PET applications by the health facilities council, applicants granted a certificate of need shall provide to the certificate of need office the following data upon request of the Iowa department of public health. The department will request the following data on an annual basis.

- (1) Total number of procedures performed;
- (2) Total number of inpatient procedures (indicate type of procedure);
- (3) Total number of outpatient procedures (indicate type of procedure);
- (4) Average charge per specific procedure;
- (5) Hours of operation of the PET unit;
- (6) Total revenues and expenses for the PET unit for the year.

This rule is intended to implement Iowa Code section 135.64.

CHAPTER 204
UNIFORM REPORTING REQUIREMENTS
[Prior to 7/29/87, Health Department[470]Ch 204]

641—204.1(135) Reporting requirements¹. The following uniform reporting requirements are hereby required for hospitals and health care facilities:

204.1(1) Each hospital shall annually file with the Iowa Department of Public Health Form SHD-7.0-490 including the following information and schedules.

a. Hospital services provided and employment data by cost center. (Schedule H-A) Form SHD-7.0-490.

b. Hospitals shall identify revenues received from each class of payor during the fiscal year. (Schedule H-B) Form SHD-7.0-490.

c. Current rate schedule.

d. Financial report prepared by certified public accountant or the state auditor's office.

e. Annual report submitted to Medicare intermediary.

204.1(2) Each health care facility shall annually file with the department Form SHD-7.0-489 including the following information and schedules.

a. Current rate schedule.

b. Annual report submitted to department of human services. (Form AA-4036-0, AA-4038-0 or AA-4039-0).

This rule is intended to implement Iowa Code section 135.74.

¹ Form filed with administrative coordinator or from department.

641—204.2(135) Initial reporting period. Pursuant to Iowa Code section 135.74, each hospital and each health care facility shall file reports annually, within 120 days of the close of their fiscal year, for all years ended after July 1, 1979. Each hospital and each health care facility that has had a fiscal year ending after July 1, 1979, but before the adoption of these proposed administrative rules shall file the required reports within 120 days of the date of adoption. Hospitals and health care facilities that have fiscal years ending after the date of adoption and before July 1, 1980, shall file the required reports within 120 days of the close of their fiscal year.

[Filed 5/23/80, Notice 4/2/80—published 6/11/80, effective 7/16/80]

[Filed emergency 9/10/80—published 10/1/80, effective 9/10/80]

[Filed emergency 9/10/81—published 9/30/81, effective 9/10/81]

[Filed emergency 7/10/87—published 7/29/87, effective 7/10/87]
