

21—47.3(190C) Drift. The party in control of the site shall notify the department's organic program of suspected pesticide drift incidences onto certified organic land or land which is under consideration for organic certification. The department may require residue testing to make a determination regarding certification. In the case of drift, the affected party may file a complaint under Iowa Code section 206.14 with the department's pesticide bureau.
