

**21—61.24(167) Rendering plant—spraying.** It will be necessary for the management of each rendering or processing plant to spray the inside of each building, including the doors, windows and screens, as well as all trucks used in transporting the bodies of dead animals, with an approved and effective fly control agent every 30 days beginning the first of April and continuing through the month of October.

This rule is intended to implement Iowa Code section 167.13.
