

**21—68.56(192) Measuring the milk in the bulk tank.**

**68.56(1)** Before milk is transferred from a bulk tank to a bulk milk tanker, the milk hauler shall measure the amount of milk in the bulk tank.

**68.56(2)** The milk hauler shall measure the milk using a clean gauge rod or other measuring device that is specifically designed and calibrated to measure milk in the bulk tank.

**68.56(3)** Immediately before using the gauge rod or measuring device, the milk hauler shall wipe it dry with a clean, single-service disposable towel.

**68.56(4)** A milk hauler shall not measure the amount of milk in a dairy farm bulk tank until the milk in the tank is motionless.

**68.56(5)** If the milk is being agitated, the milk hauler shall turn off the agitator and wait for the milk to become completely motionless before measuring the milk.

**68.56(6)** After measuring the milk with a gauge rod or other device, the milk hauler shall use that measurement to calculate the weight or volume of milk in the bulk tank with the manufacturer's conversion chart.

**68.56(7)** The milk hauler shall record that weight or volume on a written collection record.
