

21—68.63(192) Producer sample identification. Immediately before a milk hauler collects a milk sample, but before the milk hauler opens the sample container, the milk hauler shall, unless that sample container is pre-labeled with the producer information, clearly and indelibly label the sample container with all of the following information:

1. The producer identification number.
2. The date when the sample was collected.
3. The temperature of the milk in the bulk tank.
