

**21—68.64(192) Care and delivery of producer milk samples.**

**68.64(1)** Immediately after a milk hauler collects a milk sample, the milk hauler shall place the sample container in a clean, refrigerated carrying case in which the temperature is kept at from 32°F to 40°F.

**68.64(2)** If the sample containers are packed in ice or cold water to keep the samples refrigerated, the ice or water shall cover no more than  $\frac{3}{4}$  of each sample container.

**68.64(3)** The milk hauler shall promptly deliver the samples to the place designated by the milk purchaser.
