

481—70.22(231D) Evaluation of participant.

70.22(1) *Evaluation prior to participation.* A program shall evaluate each prospective participant's functional, cognitive and health status prior to the participant's signing the contractual agreement and participating in the program, with the exception of visiting day(s), to determine the participant's eligibility for the program, including whether the services needed are available. The cognitive evaluation shall be appropriate to the population served. When the cognitive evaluation indicates moderate cognitive decline and risk, the Global Deterioration Scale shall be used at all subsequent intervals, if applicable. If the participant subsequently returns to the participant's mildly cognitively impaired state, the program may discontinue the GDS and revert to a scored cognitive screening tool. The evaluation shall be conducted by a health care professional or human service professional.

70.22(2) *Evaluation within 30 days of participation and with significant change.* A program shall evaluate each participant's functional, cognitive and health status within 30 days of the participant's beginning participation in the program. A program shall also evaluate each participant's functional, cognitive and health status as needed with significant change, but not less than annually, to determine the participant's continued eligibility for the program and to determine any changes to services needed. The evaluation shall be conducted by a health care professional or human service professional. A licensed practical nurse may complete the evaluation via nurse delegation when the participant has not exhibited a significant change.

70.22(3) *Requirements for visiting day(s).* Evaluation of the participant is not required during visiting day(s), but the program shall provide the participant or the participant's legal representative with a written explanation of the expectations for the visiting day(s).
