

685—12.3(263B) Iowa site database. Specific locational and descriptive information on each reported site is recorded in the Iowa Archaeological Site File database in a data format developed by OSA. The electronically digitized, mapped location of each reported site is part of the Iowa Archaeological Site File database. Information explaining the process of reporting site information is available from OSA upon request.

12.3(1) OSA shall develop and maintain a system for Internet access to the Iowa Archaeological Site File database. Information about access to the system is available from OSA on request.

12.3(2) The Internet system is updated on a regular basis as new site information is added to the Iowa Archaeological Site File.
