

871—23.40(96) Computation of rates for private sector employer. An employer's experience rate shall be computed by dividing the average of all benefits charged to an employer during the five periods of four consecutive calendar quarters immediately preceding July 31 of each year by the employer's five-year average annual taxable payroll to determine its benefit ratio. This ratio is then applied to the current tax rate table to determine the employer's contribution rate for the next calendar year. Contributory Indian tribes are considered private sector employers for the purpose of computing their contribution rate.

This rule is intended to implement Iowa Code sections 96.7(2), 96.7(11), 96.7(12) and 96.1A(7).
