

**761—500.5(321) Deadline for placing a vehicle in storage.** The registrant of a currently registered vehicle may at any time request that a vehicle be put into storage. The registrant must complete a vehicle schedule and return it with the plate, cab card and validation sticker to the vehicle and motor carrier services bureau. The vehicle schedule, plate, cab card and sticker must be received or postmarked on or before the registration expiration date to stop the registration fee from being assessed for the renewal year. The vehicle and motor carrier services bureau shall destroy the plate and return the cab card to the registrant with the word “stored” stamped on it. Placing the vehicle in storage stops penalties on registration fees. When the vehicle is taken out of storage, the vehicle shall be assessed for the current annual registration fee.

This rule is intended to implement Iowa Code sections 321.126 and 321.134.
