

481—69.22(231C) Evaluation of tenant.

69.22(1) *Evaluation prior to occupancy.* A program shall evaluate each prospective tenant's functional, cognitive and health status prior to the tenant's signing the occupancy agreement and taking occupancy of a dwelling unit in order to determine the tenant's eligibility for the program, including whether the services needed are available. The cognitive evaluation shall utilize a scored, objective tool. When the score from the cognitive evaluation indicates moderate cognitive decline and risk, the Global Deterioration Scale (GDS) shall be used at all subsequent intervals, if applicable. If the tenant subsequently returns to the tenant's mildly cognitively impaired state, the program may discontinue the GDS and revert to a scored cognitive screening tool. The evaluation shall be conducted by a health care professional, a human service professional, or a licensed practical nurse via nurse delegation.

69.22(2) *Evaluation within 30 days of occupancy .* A program shall evaluate each tenant's functional, cognitive and health status within 30 days of occupancy. The evaluation shall be conducted by a health care professional, a human service professional, or a licensed practical nurse via nurse delegation when the tenant has not exhibited a significant change.

69.22(3) *Evaluation annually and with significant change.* A program shall evaluate each tenant's functional, cognitive and health status as needed with significant change, but not less than annually, to determine the tenant's continued eligibility for the program and to determine any changes to services needed. The evaluation shall be conducted by a health care professional, a human service professional, or a licensed practical nurse via nurse delegation when the tenant has not exhibited a significant change. A licensed practical nurse shall not complete the evaluation when the tenant has exhibited a significant change.
