

761—380.4(321) Registration of driverless-capable vehicles.

380.4(1) Upon registration of a driverless-capable vehicle under 761—subrule 400.3(16) or notification of a vehicle modification under 761—subrule 400.21(5), the department will notate the vehicle's SAE level of automation in the records system established under Iowa Code section 321.31. Any changes to the SAE level of automation are to be reported to the department by the vehicle owner, or manufacturer on behalf of the owner.

380.4(2) Upon request, the vehicle owner, or manufacturer on behalf of the owner, is to provide to the department the vehicle's operational design domain and associated operational capabilities, which the department may review to impose operational restrictions as provided in rule 761—400.21(321) as a condition of registration of the vehicle. Any subsequent material changes to the vehicle's operational design domain and associated operational capabilities related to any previously imposed operational restrictions are to be submitted to the department in order to determine whether the previously imposed operational restrictions should be modified or removed as a result of such changes.
