

**567—122.12 (455B,455D) Further requirements for batteries for CRT recycling facilities.**

**122.12(1)** CRT recycling facilities shall manage waste batteries derived from discarded CRTs in a manner that prevents release of any hazardous material into the environment.

**122.12(2)** Any battery that shows evidence of leakage, spillage, or damage that could cause a release of hazardous material into the environment must be contained in a container that is compatible with the contents of the battery.

**122.12(3)** All batteries must be managed in accordance with all state and federal regulations.
