

**567—122.4 (455B,455D) CRT recycling permits.**

**122.4(1) *Permit required.*** A CRT recycling facility shall not be constructed or operated without a permit from the department.

**122.4(2) *CRT recycling permit exemption.*** If a CRT recycling facility is located at a permitted sanitary disposal project, it shall not require its own permit; instead, the CRT recycling activities shall be amended into the host facility's permit.

**122.4(3) *Construction and operation.*** CRT recycling facilities shall be constructed and operated according to the plans and specifications approved by the department and the conditions of the permit. The approved plans and specifications shall constitute a condition of the permit.

**122.4(4) *Transfer of title and permit.*** If title to a CRT recycling facility is transferred, then the department shall transfer the permit within 60 days if the department has found that the following requirements have been met:

*a.* The title transferee has applied in writing to the department to request a transfer of the permit within 30 days of the transfer of title.

*b.* The permitted facility is in compliance with Iowa Code chapters 455B and 455D, these rules and the conditions of the permit.

**122.4(5) *Permit conditions.*** Any permit may be issued subject to conditions specified in writing by the department that are necessary to ensure that the facility is constructed and operated in compliance with Iowa Code chapters 455B and 455D and these rules.

**122.4(6) *Effect of revocation.*** If a permit held by any public or private agency is revoked by the director, then no new permit shall be issued to that agency for that CRT recycling facility for a period of one year from the date of revocation. Such revocation shall not prohibit the issuance of a permit for the facility to another public or private agency.

**122.4(7) *Inspection prior to commencing new operation.*** The department shall be notified when the construction of a new facility has been completed. No discarded CRTs shall be accepted by the facility until it has been inspected and approved by the department or until 30 days have passed from the date of permit issuance and no inspection has been performed by the department.

**122.4(8) *Duration and renewal of permits.*** A permit shall be issued and may be renewed for a period of five years, unless otherwise authorized by the department.

**122.4(9) *Request and approval of permit renewal.*** A request for permit renewal shall be in writing and shall be filed at least 90 days before the expiration of the current permit by submitting Form 50 (542-1542) to the department. The department may request that additional information be submitted for review to make a permit renewal decision. The department shall renew the permit if, after a review and inspection of the facility and its compliance history, the department finds that the facility is in compliance with Iowa Code chapters 455B and 455D, these rules and the conditions of the permit, and is making a good-faith effort to maintain compliance. If the facility is found not to be in compliance with Iowa Code chapters 455B and 455D, these rules, and the conditions of the permit or if a good-faith effort to maintain compliance is not being made, the facility shall be brought into compliance or placed on a compliance schedule approved by the department before the permit is renewed.

**122.4(10) *Request for permit modification.*** A request for permit modification shall be submitted in writing to the department with supporting documentation and materials. The department may request that additional information be submitted for review to make a permit modification decision.
