

481—51.4(135B) Long-term acute care hospital located within a general hospital.

51.4(1) If a long-term acute care hospital occupies the same building, premises or physical location of a general hospital, all treatment facilities and administrative offices for each hospital shall be clearly marked and separated from each other, and located within the licensed premises of each licensee.

- a. Treatment facilities shall be sufficient to meet the medical needs of the patients.
- b. Administrative offices shall include, but not be limited to, record rooms and personnel offices.
- c. There shall be clearly identifiable and distinguishable signs for each hospital.

51.4(2) If a long-term acute care hospital occupies the same building, premises or physical location of a general hospital, each hospital shall have its own entrance. The separate entrance shall have appropriate signs and shall be clearly identifiable as belonging to a particular hospital. Nothing shall prohibit a long-term acute care hospital that is occupying the same building, premises or physical location as a general hospital from utilizing the entrance, hallway, stairs, elevators or escalators of the general hospital to provide access to the long-term acute care hospital's separate entrance.

51.4(3) A long-term acute care hospital located within a general hospital shall have sufficient staff to meet the patients' needs. No nursing services staff of either the long-term acute care hospital or the host general hospital shall be simultaneously assigned patient duties in both licensed hospitals.

51.4(4) Each long-term acute care hospital located within a general hospital and the host general hospital shall have a separate and distinct governing board, which shall be in control of the respective hospital. No more than one board member shall serve in a common capacity on the governing board of each licensed hospital. For the purposes of this rule, control exists if an individual or an organization has the power, directly or indirectly, to significantly influence or direct the actions or policies of an organization or institution.

51.4(5) A long-term acute care hospital located within a general hospital may contract with the host general hospital for the provision of services, including but not limited to pharmaceutical, radiological, laboratory, food and dietetic, surgical, anesthesia, emergency, housekeeping, laundry and environmental, or other services necessary to maintain a clean and safe physical environment. The contract shall be executed by the governing boards of the long-term acute care hospital and the host general hospital. All contracts shall clearly delineate the responsibilities of and services provided by the long-term acute care hospital and the host general hospital.

51.4(6) Any life safety code violation identified by the state fire marshal during an inspection of a licensee may be a life safety code violation for both the long-term acute care hospital and the general hospital.
