

501—2.1(80B) General requirements for law enforcement officers. In no case shall any person hereafter be selected or appointed as a law enforcement officer unless the person:

2.1(1) Is a citizen of the United States and a resident of Iowa or intends to become a resident upon being employed; provided that the state residency requirement under this subrule shall not apply to employees of a city or county that has adopted an ordinance to allow employees of the city or county to reside in another state and shall not apply to an employee of a city or county that later repeals such an ordinance if the employee resides in another state at the time of the repeal. A city or county that has adopted an ordinance to allow the employees of the city or county to reside in another state shall provide a current copy of the ordinance to the Iowa law enforcement academy. Railway special agents who are approved by the commissioner of public safety as special agents of the department shall be exempt from the Iowa residency requirement.

2.1(2) Is 18 years of age at the time of appointment.

2.1(3) Has a valid driver's or chauffeur's license issued by the state of Iowa. Railway special agents who are approved by the commissioner of public safety as special agents of the department and officers who are allowed to reside in an adjacent state shall be required to possess a valid driver's or chauffeur's license of the state of residence of the officer.

2.1(4) Is not addicted to drugs or alcohol.

2.1(5) Is of good moral character as determined by a thorough background investigation including a fingerprint search conducted on local, state and national fingerprint files and has not been convicted of a felony or a crime involving moral turpitude. "Moral turpitude" is defined as an act of baseness, vileness, or depravity in the private and social duties which a person owes to another person or to society in general, contrary to the accepted and customary rule of right and duty between person and person. Moral turpitude is conduct that is contrary to justice, honesty or good morals.

a. The following nonexclusive list of acts has been found by the Iowa law enforcement academy council to involve moral turpitude:

(1) Any felony. As used in this section, the word "felony" means any offense punishable in the jurisdiction where it occurred by imprisonment for a term exceeding one year, but does not include any offense, other than an offense involving a firearm or explosive, classified as a misdemeanor under the laws of the state and punishable by a term of imprisonment of two years or less.

(2) A misdemeanor crime of domestic violence as defined by Iowa Code section 724.26(2) "c," or other offenses of domestic violence.

(3) An adjudication of delinquency as a juvenile based on conduct that would constitute a felony if committed by an adult.

(4) Assault or harassment.

(5) Stalking.

(6) Any offense in which a weapon was used in the commission.

(7) Income tax evasion.

(8) Perjury or its subornation.

(9) Theft, aggravated theft, fraudulent practices, robbery or burglary.

(10) Any sex crime or crime listed in Iowa Code chapter 709.

(11) Conspiracy or solicitation to commit a crime listed in this rule.

(12) Defrauding the government.

(13) Delivering, manufacturing or possessing with the intent to deliver or manufacture a controlled substance.

(14) Convictions by any other state or by the federal government under statutes substantially corresponding to the crimes listed in this rule.

(15) Any crime as an adult that resulted in the requirement of being listed on a sex offender registry.

(16) An adjudication of delinquency as a juvenile based on conduct that would constitute a crime as an adult that resulted in the requirement of being listed on a sex offender registry.

b. In determining whether to grant a waiver of subrule 2.1(5) under rule 501—16.3(17A,80B), the council shall consider in its analysis of numbered paragraph "4" of rule 501—16.3(17A,80B):

(1) The nature and seriousness of the crime;

- (2) The time elapsed since the crime was committed;
- (3) The degree of rehabilitation which has taken place since the crime was committed;
- (4) The likelihood that the person will commit the same crime again;
- (5) The number of criminal convictions; and
- (6) Such additional factors as may in a particular case demonstrate mitigating circumstances or heightened risk to public safety.

2.1(6) Has successfully passed a physical test adopted by the Iowa law enforcement academy.

2.1(7) Is not by reason of conscience or belief opposed to the use of force, when necessary to fulfill that person's duties.

2.1(8) Is a high school graduate with a diploma, or possesses a GED equivalency certificate.

2.1(9) Has an uncorrected vision of not less than 20/100 in both eyes, corrected to 20/20. Has color vision consistent with the occupational demands of law enforcement. Passing any of the following color vision tests indicates that the applicant has color vision abilities consistent with the occupational demands of law enforcement:

Pseudoisochromatic plates tests such as but not limited to: Tokyo Medical College, Ishihara, Standard Pseudoisochromatic Plates, Dvorine, American Optical HRR Plates, American Optical.

Panel tests such as:

Farnsworth Dichotomous D-15 Test or any other test designed and documented to identify extreme anomalous trichromatic, dichromatic or monochromatic color vision.

Individuals with extreme anomalous trichromatism or monochromasy color vision, as determined through testing, are not eligible to be hired as law enforcement officers in the state of Iowa.

2.1(10) Meets hearing standards as outlined below.

a. The person shall have normal hearing in each ear. Hearing is considered normal when, tested by an audiometer, hearing sensitivity thresholds are within 25dB measured at 500Hz, 1000Hz, 2000Hz and 3000Hz averaged together.

b. If the person does not have normal hearing as described above and any of the following (as recommended by the American Academy of Otolaryngology) conditions exist, a medical specialist's evaluation (otologic evaluation) is required in order for the candidate to be considered for hire:

- (1) Average hearing level at 500Hz, 1000Hz, 2000Hz, and 3000Hz greater than 25dB, in either ear.
- (2) Difference in average hearing level between the better and poorer ear of:
 1. More than 15dB at 500Hz, 1000Hz, and 2000Hz, or
 2. More than 30dB at 3000Hz, 4000Hz, and 6000Hz.
- (3) History of ear pain; drainage; dizziness; severe persistent tinnitus; sudden, fluctuating, or rapidly progressive hearing loss; or a feeling of fullness or discomfort in one or both ears within the preceding 12 months.
- (4) Cerumen accumulation sufficient to completely obstruct the view of the tympanic membrane or a foreign body in the ear canal.

c. Functional hearing evaluation required. Issues of reversibility and prognosis should be addressed during the otologic evaluation. The evaluation should consist of directional speech comprehension in noise and speech comprehension in quiet using the High Intensity Noise Test (HINT) or other tests that meet the performance characteristics as outlined in paragraph "*d.*" Candidates who perform more poorly than the fifth percentile of the normal hearing group under any of the three background noise conditions (noise in front, right, or left) are not eligible for hire. Candidates with quiet thresholds greater than 28dB(A) on the HINT or other tests that meet the performance characteristics as outlined in paragraph "*d.*" are not eligible for hire.

d. Required performance testing characteristics include the following:

- (1) Testing is available in both headphone and sound field versions.
- (2) The testing has an adequate normal hearing control group.
- (3) The testing is capable of spatial separation between the speech and the noise source.
- (4) The testing uses adaptive testing techniques.

(5) The testing uses a stationary background noise with the same average level across frequencies as the speech.

e. Use of a hearing aid. A candidate who uses a hearing aid(s) should be administered the HINT or other tests that meet the performance characteristics as outlined in paragraph “*d*” to assess speech comprehension ability in noise and quiet. Both tests must be administered by sound field methods rather than headphones. An aided audiogram can be reviewed to evaluate sound detection ability.

Before functional testing, the examining physician must ensure that the aid(s) has been worn regularly for at least one month, since it takes some practice before an individual obtains the maximum benefit from the hearing aid(s). Furthermore, the examining physician should obtain all records from the audiologist who dispensed the hearing aid(s). The records must include documentation of the fitting program and other hearing aid settings, which are used on a regular basis by the candidate. This information shall be reviewed by the certified audiologist performing the testing procedure to verify that the settings have not been intentionally altered.

The following protocol must be used. No modifications to the candidate’s hearing aid program or settings should be made prior to or during the performance of this protocol.

(1) Evaluate whether the hearing aid(s) is working properly. The electroacoustic response characteristics of each hearing aid worn by the candidate should be measured in an appropriate acoustic coupler and test chamber according to ANSI specifications (ANSI 1992 and 1996). The response of the hearing aid(s) should be measured at the four designated input levels with a broadband test signal, as specified in the specifications. All measurements should be printed and retained in the candidate’s records. If the hearing aid(s) is not in proper working condition, no further testing should be performed at that time. The candidate may elect to have the hearing aid(s) repaired or replaced and may return to repeat the protocol. In this event, the entire protocol, including measurements of the electroacoustic response characteristics of the hearing aid(s), should be repeated with the new or repaired hearing aid(s). Hearing aid sales, repairs, and replacements should be from an independent provider other than the provider of the functional assessment services.

(2) Review the candidate’s regular fitting program and settings. The fitting program and settings should be equivalent to those measured according to subparagraph (1). If they are not equivalent, no further testing should be performed at that time.

(3) Determine whether the functional gain is both physiologic and appropriate for the candidate’s hearing loss. Unaided and aided binaural sound field thresholds should be measured at 250Hz, 500Hz, 1000Hz, 2000Hz, 3000Hz, 4000Hz, and 6000Hz, using warble tone stimuli presented from a loudspeaker positioned 1 meter in front of the candidate at 0 degrees azimuth. If the functional gain is not physiologic and appropriate, then no further testing should be performed at that time.

(4) Perform aided sound field HINT or other approved testing in noise and quiet. Compare the results to the site-specific normal values for sound field noise front, noise right, and noise left conditions. If the measured thresholds are better than the fifth percentile under all three conditions, then the noise testing shall be repeated with the background noise fixed at 80dB(A). The same normative values used with the standard background noise levels may be used to assign percentile scores to these results.

The examining physician may use the evaluation algorithm described in Hearing Guidelines—Abnormal Audiogram, with one exception. Many present-day hearing aids employ methods of sound processing that vary as a function of the background noise level, and it is necessary to measure aided sound field HINT thresholds through a range of background noise levels. Therefore, candidates who use hearing aid(s) should be functionally normal both under standard HINT background noise levels (i.e., 65dB) and at levels that are commonly encountered in the field (80dB).

The candidate has met the required hiring standards if the candidate has demonstrated acceptable functional ability when wearing a hearing aid(s) and wears a hearing aid(s) when assigned to field duty.

2.1(11) Is examined by a licensed physician or surgeon and meets the physical requirements necessary to fulfill the responsibilities of a law enforcement officer.

2.1(12) Has not been previously decertified in another jurisdiction.

2.1(13) Has not committed any act that could result in decertification under 501—Chapter 6.
